**UNITED NATIONS
New York, 2011**

NOTE

Symbols of United Nations documents are composed of capital letters combined with figures. Mention of such a symbol indicates a reference to a United Nations document.

The footnote numbering follows that used in the original documents on which this *Yearbook* is based. Any footnotes added subsequently are indicated by lower-case letters.

Changes of and additions to wording that appeared in earlier drafts of conventions, model laws and other legal texts are in italics, except in the case of headings to articles, which are in italics as a matter of style.

V.	CHECK-LIST OF DOCUMENTS OF THE UNITED NATIONS COMMISSION ON INTERNATIONAL TRADE LAW	1365
VI.	LIST OF DOCUMENTS OF THE UNITED NATIONS COMMISSION ON INTERNATIONAL TRADE LAW REPRODUCED IN PREVIOUS VOLUMES OF THE <i>YEARBOOK</i>	1375

INTRODUCTION

This is the thirty-seventh volume in the series of *Yearbooks* of the United Nations Commission on International Trade Law (UNCITRAL).¹

The present volume consists of three parts. Part one contains the Commission's report on the work of its thirty-ninth session, which was held in New York, from 19 June-7 July 2006, and the action thereon by the United Nations Conference on Trade and Development (UNCTAD) and by the General Assembly.

In part two most of the documents considered at the thirty-ninth session of the Commission are reproduced. These documents include reports of the Commission's Working Groups as well as studies, reports and notes by the Secretary-General and the Secretariat. Also included in this part are selected working papers that were prepared for the Working Groups.

Part three contains the revised articles of the UNCITRAL Model Law on International Commercial Arbitration, recommendation regarding the interpretation of article II, paragraph 2, and article VII, paragraph 1, of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards, done in New York, 10 June 1958, adopted by the UNCITRAL on 7 July 2006 at its thirty-ninth session, Explanatory Notes on the United Nations Convention on the Use of Electronic Communications in International Contracts, bibliography of recent writings related to the Commission's work, a list of documents before the thirty-ninth session and a list of documents relating to the work of the Commission reproduced in the previous volumes of the *Yearbook*.

Recommendation regarding the interpretation of article II, paragraph 2, and article VII, paragraph 1, of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards, done in New York, 10 June 1958, adopted by the United Nations Commission on International Trade Law on 7 July 2006 at its thirty-ninth session	
III.	List of documents before the Commission at its thirty-ninth session	

I. Introduction

1. The present report of the United Nations Commission on International Trade Law (UNCITRAL) covers the thirty-ninth session of the Commission, held in New York from 19 June to 7 July 2006.
2. Pursuant to General Assembly resolution 2205 (XXI) of 17 December 1966, the report is submitted to the Assembly and is also submitted for comments to the United Nations Conference on Trade and Development.

II. Organization of the session

A. Opening of the session

3. The thirty-ninth session of the Commission was opened on 19 June 2006.

B. Membership and attendance

4. The General Assembly, in its resolution 2205 (XXI), established the Commission with a membership of 29 States, elected by the Assembly. By its resolution 3108 (XXVIII) of 12 December 1973, the Assembly increased the membership of the Commission from 29 to 36 States. By its resolution 57/20 of 19 November 2002, the General Assembly further increased the membership of the Commission from 36 States to 60 States. The current members of the Commission, elected on 16 October 2000 and 17 November 2003, are the following States, whose term of office expires on the last day prior to the beginning of the annual session of the Commission in the year indicated:¹ Algeria (2010), Argentina (2007), Australia (2010), Austria (2010), Belarus (2010), Belgium (2007), Benin (2007), Brazil (2007), Cameroon (2007), Canada (2007), Chile (2007), China (2007), Colombia (2010), Croatia (2007), Czech Republic (2010), Ecuador (2010), Fiji (2010), France (2007), Gabon (2010), Germany (2007), Guatemala (2010), India (2010), Iran (Islamic Republic of) (2010), Israel (2010), Italy (2010), Japan (2007), Jordan (2007), Kenya (2010), Lebanon (2010), Lithuania (2007), Madagascar (2010), Mexico (2007), Mongolia (2010), Morocco (2007), Nigeria (2010), Pakistan (2010), Paraguay (2010), Poland (2010), Qatar (2007), Republic of Korea (2007), Russian Federation (2007), Rwanda (2007), Serbia (2010), Sierra Leone (2007), Singapore (2007), South Africa (2007), Spain (2010), Sri Lanka (2007), Sweden (2007), Switzerland (2010), Thailand (2010), the former Yugoslav Republic of Macedonia (2007), Tunisia (2007), Turkey (2007), Uganda (2010), United Kingdom of Great Britain and Northern Ireland (2007), United States of America (2010), Uruguay (2007), Venezuela (Bolivarian Republic of) (2010) and Zimbabwe (2010).

¹ Pursuant to General Assembly resolution 2205 (XXI), the members of the Commission are elected for a term of six years. Of the current membership, 17 were elected by the Assembly at its fifty-fifth session, on 16 October 2000 (decision 55/308), and 43 were elected by the Assembly at its fifty-eighth session, on 17 November 2003 (decision 58/407). By its resolution 31/99, the Assembly altered the dates of commencement and termination of membership by deciding that members would take office at the beginning of the first day of the regular annual session of the Commission immediately following their election and that their terms of office would expire on the last day prior to the opening of the seventh regular annual session following their election.

5. With the exception of Ecuador, Fiji, Israel, Jordan, Lebanon, Mongolia, Rwanda, the former Yugoslav Republic of Macedonia, Tunisia, Uruguay and Zimbabwe, all the members of the Commission were represented at the session.

6. The session was attended by observers from the following States: Angola, Bangladesh, Bolivia, Bulgaria, Cape Verde, Côte d'Ivoire, Cuba, Egypt, El Salvador, Finland, Guinea, Holy See, Kuwait, Latvia, Lesotho, New Zealand, Panama, Philippines, Romania, Senegal, Slovenia, Syrian Arab Republic, Tonga, Ukraine and Viet Nam.

7. The session was also attended by observers from the following international organizations:

(a) *United Nations system*: World Bank, and United Nations Economic Commission for Europe;

(b) *Intergovernmental organizations*: Asian-African Legal Consultative Organization, Banque des États de l'Afrique centrale, European Community, International Cotton Advisory Committee and International Institute for the Unification of Private Law;

(c) *Non-governmental organizations invited by the Commission*: American Arbitration Association, American Bar Association, Centro de Estudios de Derecho, Economía y Política, Commercial Finance Association, European Law Students Association, Federación Latinoamericana de Bancos, INSOL International, International Bar Association, International Chamber of Commerce, International Council for Commercial Arbitration, International Insolvency Institute, International Women's Insolvency and Restructuring Confederation, Kuala Lumpur Regional Centre for Arbitration, London Court of International Arbitration, Moot Alumni Association, Association of the Bar of the City of New York, Regional Centre for International Commercial Arbitration (Lagos), School of International Arbitration, Swiss Arbitration Association and Union internationale des avocats.

8. The Commission welcomed the participation of international non-governmental organizations with expertise in the major items on the agenda. Their participation was crucial for the quality of texts formulated by the Commission and the Commission requested the Secretariat to continue to invite such organizations to its sessions.

C. Election of officers

9. The Commission elected the following officers:

Chairperson: Stephen Karangizi (Uganda)

Vice-Chairpersons: Álvaro Sandoval (Colombia)
Wisit Wisitsora-At (Thailand)
Vesna Živković (Serbia)

Rapporteur: Alexander Markus (Switzerland)

D. Agenda

10. The agenda of the session, as adopted by the Commission at its 812th meeting, on 19 June, was as follows:

1. Opening of the session.
2. Election of officers.
3. Adoption of the agenda.
4. Preliminary approval of a draft UNCITRAL legislative guide on secured transactions.
5. Finalization and adoption of legislative provisions on interim measures and the form of arbitration agreement and of a declaration regarding the interpretation of articles II (2) and VII (1) of the 1958 New York Convention on the Recognition and Enforcement of Foreign Arbitral Awards.
6. Procurement: progress report of Working Group I.
7. Transport law: progress report of Working Group III.
8. Possible future work in the area of electronic commerce.
9. Possible future work in the area of insolvency law.
10. Possible future work in the area of commercial fraud.
11. Monitoring implementation of the 1958 New York Convention.
12. Technical assistance to law reform.
13. Status and promotion of UNCITRAL legal texts.
14. Coordination and cooperation:
 - (a) General;
 - (b) Reports of other international organizations.
15. Congress 2007.
16. Willem C. Vis International Commercial Arbitration Moot competition.
17. Relevant General Assembly resolutions.
18. Other business.
19. Date and place of future meetings.
20. Adoption of the report of the Commission.

E. Establishment of two Committees of the Whole

11. The Commission established two Committees of the Whole (Committee I and Committee II) and referred to them for consideration agenda items 4 and 5 respectively. The Commission elected Kathryn Sabo (Canada) Chairperson of Committee I and José Maria Abascal Zamora (Mexico) Chairperson of Committee II. Committee I met from 19 to 26 June and held 11 meetings. Committee II met from 26 to 28 and on 30 June and held 7 meetings.

F. Adoption of the report

12. At its 821st meeting, on 23 June 2006, at its 822nd meeting, on 26 June 2006, at its 828th meeting, on 30 June 2006, and at its 834th meeting, on 7 July 2006, the Commission adopted the present report by consensus.

III. Preliminary approval of a draft UNCITRAL legislative guide on secured transactions

A. Approval of the substance of the recommendations of the draft UNCITRAL legislative guide on secured transactions

13. The Commission expressed its satisfaction with the progress achieved by Working Group VI (Security Interests) in developing a legislative guide on secured transactions. With a view to approving in principle the substance of the recommendations of the draft guide, the Commission considered the recommendations contained in documents A/CN.9/WG.VI/WP.21/Add.3, A/CN.9/WG.VI/WP.24 and Add.5, A/CN.9/WG.VI/WP.26/Add.4-8 and A/CN.9/611 and Add.1 and 2.

1. Key objectives (A/CN.9/WG.VI/WP.26/Add.7)

14. The Commission approved the substance of the key objectives.

2. Scope of application (A/CN.9/WG.VI/WP.26/Add.7)

15. Broad support was expressed for recommendation 2 (parties, security rights, secured obligations and assets covered). With respect to recommendation 3, the view was expressed that it might not be necessary, as it merely listed examples that would be covered in any case by recommendation 2. It was stated, however, that the non-exhaustive list contained in recommendation 3 was useful in providing guidance to States with respect to a number of important issues, such as, for example, whether the same law should cover both possessory and non-possessory security rights. As to subparagraph (g) of recommendation 3, the Commission noted with appreciation the analysis provided in the note with respect to the appropriateness of a qualified rather than an outright exclusion of security rights in securities, immovable property, aircraft, ships and attachments thereto and agreed to leave that question to Working Group VI. As to subparagraph (h) of recommendation 3, it was generally accepted that some reference might be included to future work on security rights in intellectual property rights in line with the decision of the Commission (see paras. 81-84 and 86 below).

16. With respect to recommendation 4, it was noted that the chapeau should be retained without square brackets and that the substance of subparagraphs (a) (securities) and (b) (immovable property) would depend on whether Working Group VI would decide to adopt a qualified rather than an outright exclusion with respect to security rights in securities and immovable property (see para. 15 above). In particular with respect to directly held securities, the hope was expressed that Working Group VI would not exclude them, as security rights in directly held securities was part of significant financing transactions and directly held securities were not part of the work of other organizations. As to subparagraphs (c) (wages) and (d) (assets necessary for the livelihood of a person), it was widely felt that they should be reformulated in broader terms by reference to law other than secured transactions law.

17. After discussion, the Commission approved the substance of the recommendations on scope.

3. Basic approaches to security (A/CN.9/WG.VI/WP.26/Add.7)

18. The Commission approved the substance of the recommendations on the basic approaches to security that enshrined the comprehensive approach and the functional approach that should be followed in a modern secured transactions law.

**4. Creation of the security right (effectiveness as between the parties)
(A/CN.9/WG.VI/WP.26/Add.7, A/CN.9/WG.VI/WP.26/Add.4 and A/CN.9/611
and Add.1)**

19. With respect to subparagraph (d) of recommendation 16 (creation of a security right in a right that secures an assigned receivable, a negotiable instrument or any other obligation), it was stated that neutral terminology should be used that would be suitable for the various legal systems (see A/CN.9/603, para. 23).

20. As to recommendations 33 and 34 (time of creation), it was widely felt that they should be revised to provide that the parties could agree to postpone the time of creation of a security right until after conclusion of the security agreement or dispossession but not that creation could occur at an earlier time. It was also generally thought that those recommendations should be revised to ensure their consistency with recommendation 7 (creation of a security right by agreement).

21. After discussion, the Commission approved the substance of the recommendations on the creation of the security right.

**5. Effectiveness of the security right against third parties and registration
(A/CN.9/WG.VI/WP.26/Add.5, A/CN.9/WG.VI/WP.26/Add.4 and A/CN.9/611
and Add.1)**

22. It was widely felt that recommendation 34 bis (meaning of third-party effectiveness) was useful in particular for States that were not familiar with the distinction between creation and third-party effectiveness of a security right.

23. While one delegation reserved its position with respect to recommendation 35 dealing with registration as the general method for achieving third-party effectiveness of a security right, it was widely felt that registration was essential to ensure transparency with respect to security rights.

24. In response to a question, it was noted that dispossession of the grantor was a method for achieving third-party effectiveness only if a security right had been effectively created, a matter that was dealt with in recommendation 7 (creation of a security right by agreement) and the definition of dispossession (see A/CN.9/WG.VI/WP.27/Add.1, para. 21, subpara. (pp)).

25. There was broad support in the Commission for the deletion of recommendation 39 bis (third-party effectiveness of a non-acquisition security right in low-value consumer goods) on the ground that there were no financing practices that involved security rights in low-value consumer goods. The Commission referred the matter to Working Group VI.

26. With respect to recommendations 41 and 41 bis (third-party effectiveness of security rights in proceeds), it was widely felt that the two alternatives should be referred to

Working Group VI with a view to trying, to the extent possible, to reach agreement on one of them.

27. With respect to recommendation 47 bis (functions of registration in the general security rights registry), the concern was expressed that subparagraphs (a) and (b) essentially addressed the same point. However, it was generally felt that they should be retained as separate subparagraphs, since subparagraph (a) dealt with registration as a third-party effectiveness method, while subparagraph (b) dealt with priority as the legal consequence of registration.

28. As to recommendation 47 quater (design principles), the concern was expressed that a registry system such as the one described in the recommendation was not possible. However, it was widely felt that such efficient registry systems were already well functioning not only in developed but also in developing countries and in countries with economies in transition. It was also generally felt that the use of the registry should be inexpensive to registrants and searchers, while the costs of the establishment of the registry system could be recovered over a reasonably long period of time.

29. With respect to subparagraph (c) of recommendation 48 (speedy, cost-efficient and effective registration and searching), the concern was expressed that free access to the registry could inadvertently result in breach of privacy and unauthorized use of information. In order to address that concern, the suggestion was made that a screening process should be introduced requiring searchers to have, give or justify the reasons for the search.

30. However, it was widely felt that such a screening process was not necessary and that, while it could not effectively prevent unauthorized use of the registry, it could inadvertently add costs and delays, a result that would outweigh any benefits. It was stated that free access to the registry was the logical consequence of third-party effectiveness, and priority being based on registration as a security right could not produce legal consequences against parties that had no access to the registry. In addition, it was said that experience with land registries indicated that free access did not necessarily lead to breach of privacy or abuse of information. Moreover, it was pointed out that verification of the identity of the searcher at the time of payment of a search fee was a sufficient deterrent to unauthorized use. Most importantly, it was stated that the fact that the record would contain only a limited amount of data minimized the risk of breach of privacy or abuse, which would, in any case, be addressed by other law.

31. With respect to recommendation 48 bis (security and integrity of the registry), a number of suggestions were made. With respect to subparagraph (c), it was suggested that an option be included for States to permit the issuance (including by electronic means) by the registrar of a certified copy of the notice. As to subparagraph (e), it was suggested that the commentary should clarify the allocation of responsibility between a governmental supervisory authority and a private entity operating the registry. With respect to subparagraph (f), the suggestion was made that it should be recast to focus on the need for the information on the registry to be capable of reconstitution rather than on how that result could be achieved.

32. In response to a question relating to recommendation 48 ter (liability for loss or damage) on what recourse was available to registering or searching parties for loss or damage caused by an error in the administration or operation of the registration and searching system, it was clarified that the draft guide left it to States to allocate liability based on other law.

33. With respect to recommendation 49 (required content of notice), the concern was expressed that disclosure of the name of the secured creditor, in particular where the secured creditor was a supplier of goods on credit, could make it possible for competitors to find out the list of suppliers of a certain grantor. The concern was also expressed that requiring the inclusion of reference to the maximum amount for which the security right could be enforced in the notice could inadvertently limit the amount of credit available.

34. With respect to recommendations 50 and 51 (sufficiency of grantor name in a notice), it was suggested that, with respect to companies, reference should be made to the name of the company in the company registry. In addition, it was suggested that reference should also be made to the natural persons that were authorized to represent the company. As to whether other identifiers should also be required, it was widely felt that they would not be necessary with respect to corporations, whose name had to be unique to be accepted by the company registry, but would be useful to identify natural persons with the same name.

35. After discussion, the Commission approved the substance of the recommendations on the effectiveness of the security right against third parties and registration.

**6. Priority of the security right over the rights of competing claimants
(A/CN.9/WG.VI/WP.26/Add.6, A/CN.9/WG.VI/WP.26/Add.4 and
A/CN.9/611/Add.1)**

36. With respect to recommendation 62 ter (priority of security rights in future assets), it was widely felt that it should state more clearly that the rule in recommendation 64 (priority between security rights in the same encumbered assets) applied also to security rights in future assets.

37. In response to a question with respect to subparagraphs (b) and (c) of recommendation 69 (rights of buyers, lessees and licensees of encumbered assets), it was clarified that lessees and licensees took their rights under the lease or license agreement respectively free of the security right. It was widely felt that the recommendation or the commentary should clarify that the security right did not cease to exist, but that the right of the secured creditor to enforce its security right was limited to the lessor's or the licensor's interest.

38. With respect to recommendation 78 (priority of a security right in a right to payment of funds credited to a bank account) and 79 (priority of security rights in money), it was generally felt that the commentary should clarify the meaning of the words "transfer of funds". It was stated that the term "transfer of funds" was intended to cover a variety of transfers, including those by cheque and wire transfer.

39. As to recommendations 82 and 83 (priority of a security or other right in attachments to immovable property), it was stated that an alternative approach might be to require registration of attachments to immovable property only in the general security rights registry and that a note be forwarded from that registry to the immovable property registry. In response, it was observed that that approach was very similar to the one recommended in recommendations 82 and 83; the main difference was said to be that, under the proposed alternative approach, security rights in attachments to immovable property would be registered only in the general security rights registry, while under recommendations 82 and 83 registration could take place in either registry. In that connection, it was pointed out that the particular approach to be followed by each State would depend on the structure of its registry systems.

40. After discussion, the Commission approved the substance of the recommendations on the priority of the security right over the rights of competing claimants.

7. Pre-default rights and obligations of the parties (A/CN.9/611 and Add.2)

41. After discussion, the Commission approved the substance of the recommendations on pre-default rights and obligations of the parties.

8. Rights and obligations of third-party obligors (A/CN.9/611 and Add.1)

42. In response to a question with respect to subparagraph (b) of recommendation W (rights and obligations of the depositary bank), it was stated that the depositary bank was under no obligation to respond to requests for information by third parties even if its customer (the grantor of a security right) had consented to a release of information. However, it was observed that that result could be achieved by way of an agreement between the grantor and the depositary bank.

43. After discussion, the Commission approved the substance of the recommendations on the rights and obligations of third-party obligors.

9. Default and enforcement (A/CN.9/611 and Add.1 and 2)

44. In response to a question with respect to recommendation 89 (general standard of conduct), regarding the difference between the principles of “good faith” and “commercial reasonableness”, it was stated that “good faith” was a subjective standard, while “commercial reasonableness” was an objective standard.

45. With respect to recommendation 101 (secured creditor’s right to possession of an encumbered asset), it was widely felt that the recommendation should be revised to state clearly that the secured creditor could take possession of the encumbered assets out of court with the prior consent of the grantor given in the security agreement. It was stated that such a recommendation was necessary since in many States the secured creditor was not allowed to take possession of the encumbered assets without applying to a court or other authority.

46. In that connection, it was stated that, while theoretically no further consent would be required, if, at the time the secured creditor attempted to take possession of the encumbered assets, the grantor objected, the secured creditor would have to refer the matter to a court or other authority as a result of the limitations in recommendations 89 (general standard of conduct), 100 (relief with respect to extrajudicial enforcement) and 101 (secured creditor’s right to possession of an encumbered asset) and in particular the reference in recommendation 101 to the use or threat of force or any other illegal act.

47. The suggestion was made that, in the absence of prior explicit consent, subsequent implicit consent or acquiescence should be sufficient, provided that the secured creditor notified the grantor of its intention to pursue extrajudicial repossession with details as to its time and modalities. That suggestion was referred to Working Group VI.

48. With respect to recommendation 106 (enforcement of a security right in proceeds under an independent undertaking), it was suggested that the first sentence be deleted.

49. With respect to recommendations 110 and 110 bis (disposition of encumbered assets), the suggestion was made that they should be recast to provide for court authorization of an extrajudicial disposition of encumbered assets, at least for the purpose of determining default and in view of the impartiality of courts and the need to avoid abuse of rights on the part of secured creditors.

50. That suggestion was objected to. It was stated that recommendations 110 and 110 bis appropriately reflected the principle that the secured creditor could dispose of the encumbered assets out of court if the grantor, after having been notified (recommendation 111), neither came forward to pay (recommendation 99) nor objected to out-of-court disposition of the encumbered assets (recommendation 100). In addition, it was observed that practice indicated that default was a factual issue that was easily determined on the basis of documents. Moreover, it was pointed out that the real question was not whether an encumbered asset would be disposed in or out of court but rather whether any party had an interest in and requested a judicial disposition. In that connection, it was said that all parties had an interest in maximizing the realization value of encumbered assets in order to satisfy the secured obligation and minimize the amount of the outstanding debt. With respect to the concern about abuse of rights on the part of the secured creditor, it was observed that other law could more effectively deal with such instances.

51. With respect to recommendation 111 (advance notice with respect to extrajudicial disposition of encumbered assets), it was suggested that the notice should be optional as it would otherwise place an undue burden on the secured creditor. That suggestion was objected to. It was widely felt that the notice of intention to pursue extrajudicial disposition was an important safeguard to protect the grantor against abusive behaviour on the part of the secured creditor. In addition, it was stated that the recommendation provided an appropriate balance between the need for efficiency and the need to protect the grantor and third parties. In that connection, it was observed that subparagraph (e) of recommendation 111 provided for situations in which the notice did not need to be given and recommendation 112 provided for the notice to be given in an efficient, timely and reliable way.

52. With respect to subparagraph (c) of recommendation 111, it was agreed that the Working Group should clarify and simplify the words in the parenthesis, dealing with the notice of extrajudicial disposition to the grantor.

53. With respect to recommendation 112, the question was raised as to when the notice to the grantor or other parties would be deemed to have been received. In response, it was stated that, while recommendation 112 provided some guidance, the time and place of receipt of a notice was a matter for other law. In that connection, the Commission noted that article 10 of the United Nations Convention on the Use of Electronic Communications in International Contracts² (the “Convention on Electronic Contracts”) provided guidance with respect to the time and place of dispatch and receipt of electronic communications.

54. With respect to recommendations 113 to 115 (acceptance of encumbered assets in satisfaction of the secured obligation), it was agreed that the recommendations should be revised to make it clear that the grantor could also propose to hand over the encumbered asset to the secured creditor in satisfaction of the secured obligation, provided that the interests of third parties were protected. In that connection, it was stated that giving the asset in payment of the secured obligation was like any other payment and thus would not affect the rights of third parties.

55. The suggestion was also made that encumbered assets could be valued by an independent expert prior to their acceptance by the secured creditor in satisfaction of the secured obligation so that objections that typically arose in the exercise of the remedy could be minimized. It was, however, widely felt that the nature of some assets was such

² General Assembly resolution 60/21, annex.

that an accurate valuation could not be made by an expert and the market itself should be left to set the value of the encumbered assets when they were offered for sale.

56. With respect to recommendation 120 (right of prior-ranking secured creditor to take over enforcement), the Commission noted a suggestion that a higher-ranking secured creditor should be entitled to pay off a lower-ranking secured creditor and obtain a release of the asset from that lower-ranking security right. The Commission referred that suggestion to Working Group VI.

57. After discussion, the Commission approved the substance of the recommendations on default and enforcement.

10. Insolvency (A/CN.9/WG.VI/WP.21/Add.3)

58. The Commission noted that the chapter on insolvency contained recommendations taken from the UNCITRAL Legislative Guide on Insolvency Law³ (the “Insolvency Guide”) and a small number of additional recommendations that focused on specific issues relating to the treatment of security rights in the case of insolvency. The Commission expressed its appreciation to experts from both Working Group V (Insolvency Law) and Working Group VI for their contribution to what was generally found to be a comprehensive and balanced treatment of security rights in insolvency proceedings. With respect to the additional recommendations, it was widely felt that they addressed important issues in a thorough and clear way that was consistent with the Insolvency Guide.

59. With respect to recommendation B (non-unitary approach to acquisition financing devices), it was stated that the two sets of bracketed language should be set out in a way that would make it clear that they were alternatives.

60. With respect to recommendation E (effectiveness of security rights in insolvency) and recommendation 46, subparagraphs (b) and (c), in response to a question it was noted that a secured creditor could take steps to make its security right effective against third parties after commencement of insolvency if secured transactions law permitted such rights to be made effective against third parties within specified time periods. It was also stated that the Insolvency Guide addressed the situations where a secured creditor could take steps to enforce its security right.

61. With respect to recommendation G (automatic termination clauses), it was observed that it should clarify that the commencement of insolvency did not invalidate or render unenforceable a contractual clause that relieved a creditor from an obligation to extend credit.

62. After discussion, the Commission approved the substance of the recommendations on insolvency.

11. Acquisition financing devices (A/CN.9/WG.VI/WP.24/Add.5)

63. It was widely felt that the main difference in the approaches recommended in the chapter on acquisition finance was that, in the unitary approach and one of the two versions of the non-unitary approach to enforcement, acquisition security rights were treated as being functionally equivalent to non-acquisition security rights, while, in the other version of the non-unitary approach to enforcement, retention-of-title devices would be treated as ownership devices.

³ United Nations publication, Sales No. E.05.V.10.

64. With respect to recommendation 130 (priority of acquisition security rights in inventory), the concern was expressed that, by requiring registration before delivery of the goods to the grantor and notification of inventory financiers on record, the recommendation imposed an undue burden on acquisition financiers.

65. In response, it was stated that recommendation 130 reflected an appropriate balance of interests. The interests of the acquisition financier were protected to the extent that it could obtain priority over a previously registered non-acquisition security right in inventory. The interests of the non-acquisition financier were protected to the extent that it did not have to check the registry before extending credit against new inventory as security and could rely on notification from the acquisition financier. In that connection, it was noted that registration and notification did not have to take place before each and every delivery of inventory to the grantor. A notice that has been registered could cover several transactions between the same parties over a long period of time and registration could be very quick in particular if it was made through electronic means of communication. Similarly, it was stated, a notification of non-acquisition financiers on record could cover several transactions over a long period of time (see recommendation 131).

66. However, it was observed that the concern expressed (see para. 64 above) remained unaddressed, at least to the extent that the burden of registration and notification was placed on small- and medium-size acquisition financiers rather than on non-acquisition financiers that would typically be large financing institutions. It was also pointed out that that burden would create obstacles to commerce. In addition, it was stated that consideration should be given, at least, to setting aside the requirement for the acquisition inventory financier to notify non-acquisition inventory financiers on record. In response, it was observed that the law should take into account not only the interests of suppliers of goods on credit as opposed to other credit providers but rather the interests of all parties involved, including buyers, and thus of the economy as a whole. In that connection, it was said that it was crucial to create a level playing field that would promote competition among the various credit providers, which could have a beneficial impact on the general availability and the cost of credit.

67. In addition, it was observed that whether acquisition inventory financiers should notify non-acquisition inventory financiers or whether the registry should send out such notices to non-acquisition inventory financiers was a matter of efficiency that could be considered further. In that connection, it was pointed out that both systems could be efficient. After discussion, it was widely felt that, while recommendation 131 was appropriately cast, the issue of notification of non-acquisition inventory financiers on record could be explored further by Working Group VI.

68. With respect to recommendations 130 bis (priority of acquisition security rights over the rights of judgement creditors) and ter (priority of acquisition security rights in attachments to immovable property), the Commission noted that they were in square brackets as they had not yet been considered by Working Group VI. The Commission referred them to the Working Group.

69. As to recommendation 134 (enforcement), the Commission noted that the main difference between the alternatives set out in the recommendation was that the second version of the non-unitary approach resulted in acquisition security rights not being functionally equivalent to non-acquisition security rights. It was stated that, as a result, all the rights and remedies set out in the enforcement chapter of the draft guide would not apply. In addition, it was observed that reference to the regime applicable to ownership rights would inadvertently result in differences from State to State as there was no uniformity in the treatment of ownership devices. On the other hand, it was said that the

non-unitary approach would not make sense if it was not different, at least in some respects, from the unitary approach. It was also pointed out that States might adopt slightly different systems depending on their evaluation of what system was most efficient. After discussion, the Commission approved the substance of the unitary approach and referred the non-unitary approach to Working Group VI for further discussion.

70. After discussion, and subject to the qualifications mentioned above, the Commission approved the substance of the recommendations on acquisition financing devices.

12. Conflict of laws (A/CN.9/WG.VI/WP.24, A/CN.9/WG.VI/WP.26/Add.4 and A/CN.9/611 and Add.1)

71. The question was raised as to the law that would govern security rights in assets that were moved from State A to State B for a few months and then back to State A. In response, it was stated that, if the assets were mobile assets (e.g. cars or trucks), the creation, third-party effectiveness and priority of a security right in them would be governed by the law of the State in which the grantor was located (recommendation 136). In addition, it was observed that, if those assets were export goods or goods in transit, the creation and third-party effectiveness (but not the priority, which would remain subject to the law of the initial location of the assets) of a security right in them would also be governed by the law of the State of their ultimate destination, provided that the assets would reach that destination within a short period of time after creation of the security right (recommendation 142). Moreover, it was said that, in all other cases, the security right would remain effective against third parties for a short period after the assets were moved to State B and thereafter only if the third-party effectiveness requirements under the law of State B were met (recommendation 145).

72. With respect to recommendations 139 (law applicable to a security right in a right to payment of funds credited to a bank account) and 148 (law applicable to the enforcement of a security right), the Commission urged Working Group VI to reach agreement, if at all possible, on one of the alternatives set out in each one of those recommendations.

73. With respect to the law applicable to a security right in an attachment to immovable property, the Commission noted with interest the suggestion for the application of the law of the State in which the immovable property was located. The Commission referred that suggestion to Working Group VI.

74. After discussion, the Commission approved the substance of the recommendations on conflict of laws.

13. Transition (A/CN.9/WG.VI/WP.26/Add.8)

75. With respect to recommendations 156 to 158 (transition period), it was stated that, rather than addressing creation, they should focus on third-party effectiveness to ensure that a security right that was made effective against third parties under the old law would remain effective against third parties during the transition period. If during that period it was made effective against third parties under the new law, it was said, third-party effectiveness should be continuous.

76. With respect to all the recommendations in the chapter on transition, the Commission noted that they were very general and urged Working Group VI to try to refine and add more details to them so as to strike an appropriate balance between the need to enable parties to benefit from the new law and the need to avoid unsettling business relationships established under the old law.

77. After discussion, and subject to the qualifications mentioned above, the Commission approved the substance of the recommendations on transition.

14. Conclusions

78. After conclusion of its discussion of the recommendations of the draft guide, the Commission expressed its appreciation to the Working Group for the results achieved so far in the development of the draft guide and noted that the views expressed and the suggestions made above (see paras. 13-77) would be taken into account in the next version of the draft guide. In addition, the Commission briefly considered the terminology of the draft guide (see A/CN.9/WG.VI/WP.27/Add.1), which was not part of the recommendations but was intended to facilitate their understanding. It was stated that a definition of the term “consumer goods” could be included in the terminology as several recommendations referred to consumer goods. The Commission referred the terminology to Working Group VI.

B. Future work

79. The Commission next considered its future work. It was noted that Working Group VI was expected to hold another two sessions, one in Vienna from 4 to 8 December 2006 and another in New York from 12 to 16 February 2007 and submit the draft guide for approval by the Commission at its fortieth session, in 2007 (see paras. 272 and 273 (f) below).

80. With respect to the presentation of the material, the suggestion was made that, for the sake of clarity and simplicity, the draft guide might highlight the general recommendations or core principles, for the benefit of those States that might not need all the asset-specific recommendations. The suggestion was also made that the materials should be made available to States as far in advance of the next Commission session as possible. In that connection, one delegation expressed a concern about the complexity of the draft guide, which could jeopardize the acceptability of the draft guide.

81. With respect to future work in the field of secured financing law, the Commission noted that intellectual property rights (e.g. copyrights, patents or trademarks) were increasingly becoming an extremely important source of credit and should not be excluded from a modern secured transactions law. In that connection, it was stated that financing transactions with respect to equipment or inventory often included security rights in intellectual property rights as an essential and valuable component. It was also observed that significant financing transactions involving security rights in all the assets of a grantor would typically include intellectual property rights.

82. In addition, the Commission noted that the recommendations of the draft guide generally applied to security rights in intellectual property rights to the extent they were not inconsistent with intellectual property law (see A/CN.9/WG.VI/WP.26/Add.7, recommendation 3, subparagraph (h)). Moreover, the Commission noted that, as the recommendations had not been prepared with the special intellectual property law issues in mind, the draft guide made a general recommendation that enacting States might consider making any necessary adjustments to the recommendations to address those issues.

83. In order to provide more guidance to States, the suggestion was made that the Secretariat should prepare, in cooperation with international organizations with expertise in the fields of security rights and intellectual property law and in particular the World Intellectual Property Organization (WIPO), a note for submission to the Commission at its

fortieth session, in 2007, discussing the possible scope of work that could be undertaken by the Commission as a supplement to the draft guide. In addition, it was suggested that, in order to obtain expert advice and the input of the relevant industry, the Secretariat should organize expert group meetings and colloquiums as necessary.

84. There was broad support in the Commission for those suggestions. It was stated that particular attention should be paid to the representation of all parts of the relevant industry and experts from various regions of the world. It was also observed that one issue of particular importance related to the enforcement of security rights in intellectual property rights, which was jeopardized by their unauthorized use.

85. The suggestion was also made that other issues should also be the subjects of notes by the Secretariat concerning future work in the field of secured financing law. In that connection, the Commission noted that plans for a congress on international trade law to be held in conjunction with the fortieth anniversary session of UNCITRAL (see paras. 256-258 below) included, inter alia, the consideration of topics for future work in the field of secured financing law.

86. After discussion, the Commission requested the Secretariat to prepare, in cooperation with relevant organizations and in particular WIPO, a note discussing the scope of future work by the Commission on intellectual property financing. The Commission also requested the Secretariat to organize a colloquium on intellectual property financing ensuring to the maximum extent possible the participation of relevant international organizations and experts from various regions of the world. (For additional suggestions regarding future work in the field of secured financing law, see paras. 235-251 below).

IV. Finalization and adoption of legislative provisions on interim measures and the form of arbitration agreement and of a declaration regarding the interpretation of articles II (2) and VII (1) of the 1958 New York Convention on the Recognition and Enforcement of Foreign Arbitral Awards

A. Organization of deliberations

87. The Commission considered the revised version of the draft legislative provisions on interim measures and the form of arbitration agreement, and of a draft declaration regarding the interpretation of article II, paragraph 2, and article VII, paragraph 1, of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards (New York, 1958)⁴ (the “New York Convention”), adopted by Working Group II (Arbitration and Conciliation) at its forty-fourth session (New York, 23-27 January 2006) (A/CN.9/592). The Commission took note of the summary of the deliberations on the draft provisions and declaration since the thirty-second session of the Working Group (Vienna, 20-31 March 2000) and the background information provided in documents A/CN.9/605, A/CN.9/606 and A/CN.9/607. The Commission also took note of the comments on the draft provisions and declaration that had been submitted by Governments and international organizations, as set out in document A/CN.9/609 and Add.1-6.

⁴ United Nations, *Treaty Series*, vol. 330, No. 4739.

B. Consideration of the draft legislative provisions on interim measures

1. General comments

88. The Commission recalled that the provisions had been drafted in recognition not only that interim measures were increasingly being found in the practice of international commercial arbitration, but also that the effectiveness of arbitration as a method of settling commercial disputes depended on the possibility of enforcing such interim measures (see A/CN.9/485 and Corr.1, para. 78). General agreement was expressed as to the need for a harmonized and widely acceptable model legislative regime governing interim measures granted by arbitral tribunals and their enforcement as well as interim measures ordered by courts in support of arbitration. The Commission recalled that the draft legislative provisions on interim measures and preliminary orders were the result of extensive discussion in the Working Group. The Commission recalled as well that the Working Group, at its forty-second session (New York, 10-14 January 2005), had agreed to include a compromise text of the provisions on preliminary orders, on the basis that those provisions would apply unless otherwise agreed by the parties; that it be made clear that preliminary orders had the nature of procedural orders and not of awards; and that no enforcement procedure would be provided for such orders in section 4 (A/CN.9/573, para. 27).

2. Consideration of draft articles

89. The text of the draft legislative provisions considered by the Commission at the current session was as contained in document A/CN.9/605.

Section 1. Interim measures

Article 17. Power of arbitral tribunal to order interim measures

Paragraph 1

90. It was recalled that paragraph 1 reproduced in part the wording of article 17 of the 1985 UNCITRAL Model Law on International Commercial Arbitration⁵ (the “Arbitration Model Law”).

91. Paragraph 1 was adopted in substance by the Commission without modification.

Paragraph 2

Subparagraph (b)

92. A question was raised whether the words “or prejudice to the arbitral process itself”, at the end of subparagraph (b), should be retained.

93. It was recalled that the purpose of those words was to clarify that an arbitral tribunal had the power to prevent obstruction or delay of the arbitral process, including by issuing anti-suit injunctions. It was also recalled that, in the Working Group, anti-suit injunctions had given rise to serious reservations on the part of many delegations. In support of deletion, it was stated that anti-suit injunctions did not always have the provisional nature of interim measures but could also relate to substantive matters such as questions relating to the competence of the arbitral tribunal. It was also said that such a provision derogated

⁵ *Official Records of the General Assembly, Fortieth Session, Supplement No. 17 (A/40/17)*, annex I, and United Nations publication, Sales No. E.95.V.18.

from the fundamental principle that a party should not be deprived of any judicial remedy to which it was entitled.

94. In response, the Commission noted that, at previous sessions, the Working Group had expressed a preference for the inclusion of anti-suit injunctions in draft article 17. It was also recalled that the words in question should not be understood as merely covering anti-suit injunctions but rather as more broadly covering injunctions against the large variety of actions that existed and were used in practice to obstruct the arbitral process.

95. After discussion, paragraph 2 was adopted in substance by the Commission without modification.

Exhaustive nature of the list of functions characteristic of interim measures

96. The Commission recalled that the Working Group, at its thirty-sixth (New York, 4-8 March 2002) and thirty-ninth (Vienna, 10-14 November 2003) sessions, had considered whether all possible grounds for which an interim measure might need to be granted were covered by the current formulation under article 17, paragraph 2 (see A/CN.9/508, paras. 70-76, and A/CN.9/545, para. 21). It was recalled that the Working Group agreed that, to the extent that all the purposes for interim measures were generically covered by the revised list contained in paragraph 2, the list could be expressed as exhaustive (A/CN.9/545, para. 21). The Commission decided that clarification of that matter should be included in any explanatory material accompanying article 17.

Article 17 bis. Conditions for granting interim measures

Paragraph 1

General remark

“Urgent need for the measure”

97. The Commission took note of the decision by the Working Group that the need for urgency should not be a general feature of interim measures. The Commission decided that guidance should be provided in explanatory material indicating how urgency impacted on the operation of the provisions in section 1.

Subparagraph (a)

“Substantially”

98. A suggestion was made to delete the word “substantially” for the reason that it might introduce an unnecessary and unclear requirement, making it more difficult for the arbitral tribunal to issue an interim measure. In support of that proposal, it was said that it would be preferable to leave it to arbitral practice over time to determine how the balance of inconvenience reflected in subparagraph (a) should be used as a standard.

99. In response, it was pointed out that the text of subparagraph (a), including the word “substantially” was consistent with existing standards in many judicial systems for the granting of an interim measure.

100. After discussion, the Commission decided to retain the word “substantially”. Subparagraph (a) was adopted in substance by the Commission without modification.

*Subparagraph (b)**“Prima facie”*

101. A proposal was made to delete subparagraph (b) on the basis that interim measures might need to be granted as a matter of urgency and a requirement for an arbitral tribunal to make a determination as to the possibility of success on the merits of the claim might unnecessarily delay matters or appear as a prejudgement of the case. That proposal was not supported for the reason that subparagraph (b) was considered to constitute a necessary safeguard for the granting of interim measures. It was said that that subparagraph was drafted with the intention that the arbitral tribunal would make a preliminary judgement based on the information available to it at the time of its determination.

102. A proposal to add the words “prima facie” to subparagraph (b) so that the arbitral tribunal would not be required to make a full determination on the question of possibility of success on the merits was not supported. In rejecting that proposal, the Commission noted that the term “prima facie” was susceptible to differing interpretations. It was recalled that the Working Group’s intention in drafting that subparagraph was to provide a neutral formulation of the standard of proof.

“provided that”

103. It was observed that the words “provided that” suggested that the second part of the sentence was a condition for the first part and therefore did not reflect the intention of the Working Group. In order to address that concern, a proposal was made to delete those words and split the subparagraph into two sentences.

104. After discussion, it was agreed that subparagraph (b) should read as follows: “There is a reasonable possibility that the requesting party will succeed on the merits of the claim. The determination on this possibility shall not affect the discretion of the arbitral tribunal in making any subsequent determination”.

Paragraph 2

105. Paragraph 2 was adopted in substance by the Commission without modification.

Section 2. Preliminary orders**Article 17 ter. Applications for preliminary orders and conditions for granting preliminary orders**

106. Article 17 ter was adopted in substance by the Commission without modification.

Article 17 quater. Specific regime for preliminary orders*Paragraph 1*

107. Paragraph 1 was adopted in substance by the Commission without modification.

Paragraph 2

108. It was noted that paragraph 2 required the arbitral tribunal to give the party against whom a preliminary order was directed an opportunity to present its case at the earliest practicable time. It was noted that while paragraph 1 required the arbitral tribunal to give notice to “all parties”, paragraph 2, which referred to “any party against whom a preliminary order is directed to present its case”, appeared to be more limited. A proposal was made to extend the application of paragraph 2 by adding after the word “directed” the

words “or to any other party”. An alternative proposal was made to replace the words “any party against whom a preliminary order is directed”, with “the party affected by the preliminary order”.

109. It was stated in response that the proposed amendments could unnecessarily complicate the arbitral process. Concern was expressed that the addition of wording such as “any affected party” could provide a person that was not a party to the arbitral proceedings, but nevertheless affected by the preliminary order (for example, a bank), with a right to present its case. It was said that the existing text in paragraph 2 was appropriate in that it gave priority to the party most affected by the preliminary order and did not exclude the possibility that other arbitral parties could respond to the preliminary order if they so wished. It was agreed that the substance of paragraph 2 should be retained but that clarification should be included in explanatory material relating thereto. It was proposed that such explanatory material could indicate that, when an arbitral tribunal invited a party against whom the preliminary order was directed to present its case, that invitation should be copied to all parties and, consistent with general arbitration practice, those parties that wished to react to the preliminary order would do so, even in the absence of a specific invitation. It was also suggested that the explanatory material could clarify that paragraph 2 was not intended to extend to persons that were not party to the arbitration.

110. After discussion, paragraph 2 was adopted in substance by the Commission without modification.

Paragraph 3

111. Paragraph 3 was adopted in substance by the Commission without modification.

Paragraph 4

112. Paragraph 4 was adopted in substance by the Commission without modification.

Paragraph 5

Time when a preliminary order becomes binding

113. A question was raised as to when a preliminary order would become binding on the parties. It was recalled that the arbitral tribunal could, at the same time that it grants a preliminary order, also establish a deadline for the requesting party to put security in place and that this possibility was the reason for the flexible wording “in connection with” under article 17 *sexies*, paragraph 2. It was therefore considered that a preliminary order could become binding on the parties when granted by the arbitral tribunal.

Non-enforceability of preliminary orders

114. The Commission recalled that the Working Group had considered at length whether an enforcement regime should be provided in respect of preliminary orders. The need for including such a regime was questioned given the temporary nature of a preliminary order and the fact that it could raise practical difficulties, such as whether notification of the preliminary order to the other party should be deferred until after the order had been enforced by a court. Further, it was said that parties usually honour interim measures out of respect for the arbitrators’ authority and a desire not to antagonize them. The Commission noted that non-enforceability of preliminary orders was central to the compromise reached at the forty-second session of the Working Group (see para. 88 above).

Seeking relief in a court

115. The Commission considered a proposal made at the forty-fourth session of the Working Group (New York, 23-27 January 2006) to add the following text, either to paragraph 5 of article 17 quater or in explanatory material: “a party shall not be prevented from seeking any relief in a court because it has obtained such a preliminary order from the arbitral tribunal” (see A/CN.9/592, para. 27). Doubts were expressed as to the need to include such a clarification as it was said that the provision could only operate in exceptional circumstances. It was however pointed out that article 9 of the Arbitration Model Law already protected the right of a party to arbitral proceedings to request from a court an interim measure. It was suggested that that proposal merely clarified the operation of provisions in respect to preliminary orders.

116. The Commission agreed that wording along the following lines: “a party shall not be prevented from seeking any relief it would otherwise be entitled to seek in a court because it has obtained such a preliminary order from the arbitral tribunal” should be included in any explanatory material.

117. After discussion, paragraph 5 was adopted in substance by the Commission without modification.

Section 3. Provisions applicable to interim measures and preliminary orders**Article 17 quinquies. Modification, suspension, termination**

118. Article 17 quinquies was adopted in substance by the Commission without modification.

Article 17 sexies. Provision of security*Paragraph 1*

119. Paragraph 1 was adopted in substance by the Commission without modification.

Paragraph 2

120. Paragraph 2 was adopted in substance by the Commission without modification.

Article 17 septies. Disclosure*General remarks*

121. The view was expressed that, under many national laws, the obligation for a party to present facts or arguments against its position was unknown. In addition, it was said that that provision did not contain any sanction in case of non-compliance by the party requesting the measure of its disclosure obligation. A proposal was made to delete paragraph 1 and the second sentence of paragraph 2.

122. It was recalled that the two paragraphs of article 17 septies reflected two distinct disclosure obligations that operated in distinct circumstances. Whereas the obligation in paragraph 1 to disclose changed circumstances related to interim measures, the obligation to disclose all “relevant” circumstances in article 17 septies, paragraph 2, was inspired from the rule in existence in certain jurisdictions that counsel had a special obligation to inform the court of all matters, including those that spoke against its position and that it was considered as a fundamental safeguard and an essential condition, namely to the acceptability of preliminary orders. Similarly, in many other legal systems, a comparable obligation arose from the recognized requirement that parties act in good faith. It was

observed that article 17 septies was a result of lengthy discussions in the Working Group and it was recalled that those two paragraphs were carefully drafted, taking account of the type of measures they related to.

123. In support of retaining paragraph 1, it was recalled that the essential purpose of article 17 septies, paragraph 1, was to ensure that a decision to grant an interim measure would be made by the arbitral tribunal on the basis of the most complete record of the facts. Given that the interim measure might be granted at an early stage of the arbitral proceedings, an arbitral tribunal might often be faced with an imperfect record and wish to be informed of any changes concerning the facts on the basis of which the interim measure was granted.

124. Various proposals were made in order to address the objection that the obligation of disclosure contained in article 17 septies, paragraph 1, would be unfamiliar to certain jurisdictions, and therefore difficult to enact in those jurisdictions. In order to provide a more flexible duty of disclosure, adapted to the circumstances of each arbitral proceeding, it was proposed to include as opening words to article 17 septies, paragraph 1, the following words “[i]f so ordered by the arbitral tribunal”.

125. A further proposal was made to replace the words at the end of article 17 septies, paragraph 1, “or granted” with the words “if it becomes aware of such a change”. That proposal was objected to on the ground that it was implicit in article 17 septies that the obligation to disclose would only arise where a party became aware of such a change. As well, it was suggested that inclusion of those words would create difficulties in practice. It was suggested that, if the proposal were retained, additional words were necessary to require the party requesting the interim measure to disclose material changes in circumstances where it should have been aware of such changes.

126. A related proposal was made to amend article 17 septies, paragraph 1, along the following lines: “The arbitral tribunal may require any party promptly to disclose any material change in the circumstances on the basis of which the measure was requested or granted.” The second sentence of paragraph 2 would then be amended as follows: “Thereafter, paragraph 1 of this article shall apply.”

127. After discussion, the Commission adopted the related proposal referred to under paragraph 126 above, and agreed that the explanatory material should clarify the scope of application of the disclosure obligation contained in article 17 septies.

Article 17 octies. Costs and damages

128. Article 17 octies was adopted in substance by the Commission without modification.

Section 4. Recognition and enforcement of interim measures

Article 17 novies. Recognition and enforcement

129. A proposal was made to delete in paragraph 1 the words “unless otherwise provided by the arbitral tribunal”, for the reason that those words introduced an unnecessary condition to enforcement. That proposal did not receive support.

130. Paragraph 1 was adopted in substance by the Commission without modification.

131. Article 17 novies was adopted in substance by the Commission without modification.

Article 17 decies. Grounds for refusing recognition or enforcement*Paragraph 1**Alternative proposal*

132. The Commission considered a proposal made by a delegation, contained in document A/CN.9/609/Add.5, footnote 2 to paragraph 8. It was explained that the proposal was intended to simplify the text and avoid any cross reference to article 36 of the Arbitration Model Law. The application of article 36 to interim measures was said to be of limited relevance in view of the difference in nature between interim measures and award on the merits. Some support was expressed for the proposed shorter draft on the basis that it was concise and set forth rules that were specifically geared to the recognition and enforcement of interim measures, as opposed to the text of draft article 17 decies, which essentially mirrored rules established in the New York Convention in respect of the recognition and enforcement of arbitral awards.

133. However, reservations were expressed against the general policy reflected in the proposed shorter draft, which was said to exclude a number of important details that were set out in draft article 17 decies.

134. After discussion, paragraph 1 was adopted in substance by the Commission without modification.

Paragraph 2

135. It was said that, when a court was called upon to enforce an interim measure, under article 17 decies, paragraph 1 (a)(i) (which referred to the grounds set forth in article 36, sub-subparagraphs 1 (a)(i), (ii), (iii) or (iv)), its decision should not have an effect beyond the limited sphere of recognition and enforcement of the interim measure. The Commission agreed that any explanatory material should clarify that the purpose of article 17 decies, paragraph 2, was to confine the power of a court to the determination of recognition and enforcement of the interim measure only.

136. Paragraph 2 was adopted in substance by the Commission without modification.

Footnote

137. The footnote to article 17 decies was adopted in substance by the Commission without modification.

Section 5. Court-ordered interim measures**Article 17 undecies. Court-ordered interim measures***Drafting proposal*

138. It was suggested that the text of article 17 undecies might be simplified, along the following lines: "A court shall have the same power of issuing an interim measure in relation to arbitration proceedings as it has in relation to proceedings in the courts, including in cases where the place of the arbitration proceedings is in a State other than the court's. The court shall exercise such power in accordance with its own procedures in consideration of the specific features of international arbitration."

139. That proposal received support. It was clarified that the purpose of article 17 undecies was to preserve the power of courts to issue interim measures in support of arbitration, but should not be understood as expanding the powers of the court

for interfering in the arbitral process. The Commission agreed that that matter should be clarified in any explanatory material to that provision.

“including in cases where the place of the arbitration proceedings is in a State other than the court’s”

140. A suggestion was made that the phrase “where the place of the arbitration proceedings is in a State other than the court’s” appearing in the proposal (see para. 138 above) was unnecessary given the intention to add article 17 undecies to the list of articles contained under article 1, paragraph 2, of the Arbitration Model Law. That suggestion did not receive support because it was considered that those words provided necessary clarification.

141. After discussion, the Commission agreed that article 17 undecies would read as follows: “A court shall have the same power of issuing an interim measure in relation to arbitration proceedings, irrespective of whether their place is in the territory of this State, as it has in relation to proceedings in courts. The court shall exercise such power in accordance with its own procedures in consideration of the specific features of international arbitration”. It was explained that that language was more closely aligned to the language used in the Arbitration Model Law and that replacing the words “the court” by the word “courts” at the end of the first sentence was intended to clarify that there was no intention to refer to specific court proceedings, either domestic or foreign. Article 17 undecies was meant to encompass the power of issuing interim measures in relation to court proceedings, domestic or international, as the case may be. However, article 17 undecies did not relate to the function of assistance and supervision of arbitration proceedings (juge d’appui) as referred to in article 6 of the Arbitration Model Law and, consequently, under no circumstances should article 17 undecies be construed as expanding the powers of courts in relation to those functions.

142. The Commission agreed that any explanatory material to article 17 undecies should clarify that the court could exercise jurisdiction on arbitration matters, whether the place of arbitration is located in the enacting State or in another State and that the provision should not be construed as expanding the territorial jurisdiction of courts.

Placement of article 17 undecies

143. The Commission considered whether article 17 undecies should be located elsewhere in another part of the Arbitration Model Law given that it dealt with court-ordered interim measures which might not easily fit into a chapter intended to deal mostly with interim measures granted by arbitral tribunals. One suggestion was to place article 17 undecies following article 9 of the Arbitration Model Law, which dealt with interim measures granted by courts. However, given that article 9 was located within chapter II of the Arbitration Model Law, which related to the arbitration agreement, that option was not considered appropriate. The Commission agreed that a text suggesting that States could place article 17 undecies in the most appropriate part of their enacting legislation could be included in explanatory material accompanying that provision.

3. Consideration of amendment to article 1, paragraph 2, of the Arbitration Model Law

144. The text of the draft amendment to article 1, paragraph 2, of the Arbitration Model Law as considered by the Commission at the current session was as contained in document A/CN.9/605, paragraph 23.

145. The proposed amendment to article 1, paragraph 2, which consisted in adding a reference to articles 17 novies, 17 decies and 17 undecies within the list of excepted articles was adopted by the Commission.

C. Consideration of the draft legislative provision on the form of arbitration agreement

1. General comments

146. The Commission exchanged views on the draft legislative provision recalling that, in order to ensure a uniform interpretation of the form requirement that responded to the needs of international trade, it was desirable to prepare a modification of article 7, paragraph 2, of the Arbitration Model Law, with an accompanying guide to enactment and to formulate a statement addressing the interpretation of article II, paragraph 2, of the New York Convention, that would reflect a broad and liberal understanding of the form requirement.

147. It was recalled that the Working Group's intention in revising article 7 of the Arbitration Model Law was to update domestic laws on the question of the writing requirement for the arbitration agreement, while preserving enforceability of such agreements as foreseen in the New York Convention. The Commission had before it two texts for consideration, the first gave a detailed description of how the writing requirement could be satisfied (the revised draft article 7) and the other omitted the writing requirement altogether (the alternative proposal). The text of the draft legislative provisions considered by the Commission at the current session was as contained in document A/CN.9/606.

2. Consideration of the revised draft article 7

Paragraph 1

148. It was recalled that paragraph 1 reproduced article 7, paragraph 1, of the Arbitration Model Law. A proposal was made to delete the second sentence in that paragraph for the reason that it was considered unnecessary. That proposal was not accepted.

149. After discussion, paragraph 1 was adopted in substance by the Commission without modification.

Paragraph 2

150. Paragraph 2 was adopted in substance by the Commission without modification.

Paragraph 3

151. The Commission noted that paragraph 3 defined the writing requirement and sought to clarify how the writing requirement could be fulfilled.

152. Various proposals were made to amend paragraph 3. One proposal was to add as the opening words of paragraph 3: "Without prejudice to the parties' consent in the arbitration agreement or contract" in order to emphasize the importance of the consent of the parties. A related proposal was made to redraft paragraph 3 as follows: "an arbitration agreement or contract may be concluded orally, by conduct or by any other means of proof which manifest the will of the parties". Another proposal, aimed at clarifying the meaning of paragraph 3 was as follows: "The form prescribed in paragraph 2 is met if the content of the arbitration agreement is recorded in any form, an arbitration agreement is in writing,

whether or not the arbitration agreement or contract has been concluded orally, by conduct, or by other means". Yet another proposal was made along the lines suggested in document A/CN.9/609. Those proposals did not receive support.

153. The Commission noted that the Working Group, at its forty-fourth session (New York, 23-27 January 2006), had discussed whether the purpose of the writing requirement was to provide a record as to the consent of the parties to arbitrate or as to the content of the arbitration agreement. At that session, it was observed that what was to be recorded was the content of the arbitration agreement as opposed to the meeting of the minds of the parties or any other information regarding the formation of the agreement (A/CN.9/592, para. 61). The Commission confirmed that paragraph 3 dealt with the definition of the form of the arbitration agreement and the question whether the parties actually reached an agreement to arbitrate was a substantive issue to be left to national legislation. In that context, the Commission took note of a comment that, by contrast with certain national laws under which the written form of the arbitration agreement was prescribed to achieve certainty about the parties' will to arbitrate, the revised text of paragraph 3 achieved a significant change of perspective by shifting the focus of the provision on reaching certainty regarding the substance of the rights and obligations created by the arbitration agreement, including rules that might govern the arbitration proceedings. It was also pointed out that the question of proof of the content of the agreement and that of proof of the consent could not be dissociated from each other, and the writing could only prove existence of the arbitration agreement if at the same time it established the parties' agreement to arbitrate.

154. The Commission confirmed that a mere reference in an oral contract to a set of arbitration rules or to a law governing the arbitral procedure were cases that were not intended to be covered by paragraph 3 and that such a clarification should be included in any explanatory material accompanying that paragraph. The Commission agreed that further clarification as to the factual situations that were intended to be covered by paragraph 3 could be included in any explanatory material accompanying that provision.

155. After discussion, paragraph 3 was adopted in substance by the Commission without modification.

Paragraph 4

156. It was observed that paragraph 3 already provided that an arbitration agreement could be concluded "by any other means", and that those words encompassed the conclusion of an arbitration agreement by electronic means referred to under paragraph 4. The need to retain paragraph 4 was therefore questioned.

157. In favour of its deletion, it was said that it was inappropriate for legislation relating to arbitration to contain provisions on electronic communications and that the definitions provided under paragraph 4 were already contained in other UNCITRAL instruments, namely the UNCITRAL Model Law on Electronic Commerce⁶ and the Convention on Electronic Contracts. A proposal was made to delete paragraph 4 and add, at the end of paragraph 3, words along the following lines: "including electronic communications". An alternative proposal was made to retain paragraph 4, but simplify its content by referring in footnotes to the definitions that were already contained in the UNCITRAL Model Law on Electronic Commerce and the Convention on Electronic Contracts. Those proposals did not receive support.

⁶ Ibid., *Fifty-first Session, Supplement No. 17* (A/51/17), annex I, and United Nations publication, Sales No. E.99.V.4, which contains also the accompanying Guide to Enactment.

158. In favour of retaining paragraph 4, it was said that the language used in paragraph 4 was consistent with that used in article 9, paragraph 2, of the Convention on Electronic Contracts, and the definitions of “electronic communication” and “data message” reproduced the definitions contained under subparagraphs (b) and (c) of article 4 of that Convention. It was observed that maintaining consistency between UNCITRAL texts was crucial and that the definitions contained under paragraph 4 would provide useful guidance.

159. After discussion, paragraph 4 was adopted in substance by the Commission without modification.

Paragraph 5

160. A comment was made that the situation addressed by paragraph 5 rarely arose in practice, and that that provision could be deleted as paragraph 3 already contemplated the situation covered under paragraph 5. It was objected that that provision was already part of article 7 of the Arbitration Model Law and deleting it might be misinterpreted as invalidating arbitration agreements concluded by an exchange of statements of claim and defence in which the arbitration agreement was alleged by one party and not denied by the other.

161. After discussion, paragraph 5 was adopted in substance by the Commission without modification.

Paragraph 6

162. Paragraph 6 was adopted by the Commission without modification.

3. Consideration of the alternative proposal to draft article 7

163. The Commission noted that the alternative proposal omitted entirely the writing requirement and thereby recognized oral arbitration agreements as valid.

164. A question was raised whether the alternative proposal should be retained. It was said that the revised draft article 7 established the minimum requirements that should apply in respect of the form of arbitration agreement, whereas the alternative proposal went much further and did away with all form requirements in order, for example, to recognize the validity of oral arbitration agreements. While the alternative proposal met with considerable interest, the view was expressed that it might depart too radically from traditional legislation, including the New York Convention, to be readily acceptable in many countries.

165. In support of retention of the alternative proposal, it was noted that, in several jurisdictions that had removed the written form requirement for arbitration agreements, that removal had not given rise to significant disputes as to the validity of arbitration agreements. In such jurisdictions, it was said that the provision contained in the revised draft article 7 would be unlikely to be adopted and that therefore the alternative proposal should be retained. In addition, it was argued that the trend was towards relaxing the form requirement for the arbitration agreement and that therefore the Arbitration Model Law, with a view to providing a solution for the future, should offer to national legislators the possibility to opt for the alternative proposal.

166. In addition, it was observed that State courts tended to interpret the New York Convention in light of the provisions of the Arbitration Model Law and that the revised draft would indicate to States that the written form requirement contained in article II,

paragraph 2, of the New York Convention should be interpreted in a more liberal manner. It was observed as well that according to article V, paragraph 1 (a), of the New York Convention, the issue of the validity of the arbitration agreement (in the context of a request for enforcement of the arbitral award) was governed by the law of the place where the award was made and that therefore, if the arbitration agreement was valid pursuant to the law of the place of arbitration, the award was enforceable pursuant to the New York Convention in its States parties. It was further observed that State courts could still refer to article VII, paragraph 1, of the New York Convention to apply a more favourable domestic legislation.

167. After discussion, the alternative proposal was adopted in substance by the Commission without modification.

4. Presentation of the revised draft article 7 and the alternative proposal

168. It was questioned whether the revised draft article 7 and the alternative proposal should be presented as options in the Arbitration Model Law. Concern was expressed that presenting options in the Arbitration Model Law would not encourage harmonization of legislation in that field and might potentially create difficulties for enacting States.

169. It was suggested that the alternative proposal could be inserted as a footnote to the revised draft article 7 or in any explanatory material. It was objected that both texts represented two different approaches on the question of definition and form of arbitration agreement, the first to liberalize the writing requirement and the second to suppress that requirement altogether, and presenting the alternative text as a footnote to the revised draft article 7 would therefore be unsatisfactory.

170. After discussion, the Commission decided to present both the revised draft article 7 and the alternative proposal as options in the text of the Arbitration Model Law and to include guidance for enacting States in respect of each option.

5. Consideration of article 35, paragraph 2, of the Arbitration Model Law

171. It was noted that article 35, paragraph 2, of the Arbitration Model Law, which was modelled on article IV of the New York Convention, provided that the party relying on an award or applying for its enforcement should supply the duly authenticated original award or a duly certified copy thereof, as well as the original arbitration agreement or a duly certified copy thereof. The Commission observed that, in its deliberations regarding the written form of arbitration agreements, the Working Group had considered it necessary to ensure that a modified understanding of the writing requirement (article 7 of the Arbitration Model Law, and article II, para. 2, of the New York Convention) would be reflected in article 35, paragraph 2, of the Arbitration Model Law, through an amendment to that article as envisaged in document A/CN.9/606, paragraph 22.

172. A proposal was made to delete the word “certified” from the first and second sentences in article 35, paragraph 2, for the reason that inclusion of such a requirement had created, in some cases, uncertainty as to who could undertake the certification and what the certification would consist of, which could hinder unnecessarily the enforcement of an award. In that respect, it was noted that the question of the need for certification or similar evidence regarding the authenticity of a text or its translation was a matter that was better left to the general law of evidence, or court rules, and to judicial discretion than dealt with by way of imposed requirements that could be overly cumbersome and open to differing interpretations.

173. After discussion, the Commission agreed that article 35, paragraph 2, should read as follows: “The party relying on an award or applying for its enforcement shall supply the original award or a copy thereof. If the award is not made in an official language of this State, the court may request the party to supply a translation thereof into such language”. It was agreed that, in line with the footnote to article 35, the conditions set forth in that article were intended to set maximum standards and that the explanatory material should clarify that deletion of the certification requirement should not be read as ruling out the possibility that certification might be required by judges, where appropriate and in accordance with local law.

6. Additional provision

174. The Commission considered whether the Arbitration Model Law should include a provision along the lines of article 7 of the United Nations Convention on Contracts for the International Sale of Goods (Vienna, 1980)⁷ (the “United Nations Sales Convention”), which was designed to facilitate interpretation by reference to internationally accepted principles. The Commission observed that similar provisions were included in other model laws prepared by the Commission, including article 3 of the UNCITRAL Model Law on Electronic Commerce.

175. The Commission agreed that the inclusion of such a provision would be useful and desirable because it would promote a more uniform understanding of the Arbitration Model Law. The Commission agreed that the provision should read as follows:

“Article 2 A. International origin and general principles

“1. In the interpretation of this Law, regard is to be had to its international origin and to the need to promote uniformity in its application and the observance of good faith.

“2. Questions concerning matters governed by this Law which are not expressly settled in it are to be settled in conformity with the general principles on which this Law is based.”

7. Explanatory material

176. It was noted that recent model laws adopted by UNCITRAL were accompanied by a guide to enactment and use. Such guides were generally regarded as useful instruments for national legislators and other users of UNCITRAL standards. They also furthered the process of harmonization of laws. After discussion, the Commission agreed that it would be useful to prepare a guide to enactment and use for the entire Arbitration Model Law as revised. The Secretariat was requested to prepare a draft guide for consideration at future sessions of the Working Group and the Commission.

D. Consideration of the draft declaration regarding the interpretation of articles II (2) and VII (1) of the New York Convention

177. The text of the draft declaration regarding the interpretation of article II, paragraph 2, and article VII, paragraph 1, of the New York Convention, as considered by the Commission, was contained in paragraph 4 of document A/CN.9/607.

⁷ United Nations, *Treaty Series*, vol. 1489, No. 25567, and United Nations publication, Sales No. E.95.V.12.

178. A question was raised as to whether it was appropriate for the Commission to issue a declaration on the interpretation of a multilateral treaty. The Commission recalled that it had a mandate, as defined in its founding General Assembly resolution 2205 (XXI), *inter alia*, to promote “ways and means of ensuring a uniform interpretation and application of international conventions and uniform laws in the field of the law of international trade”.⁸ Therefore, issuing a recommendation that was persuasive rather than binding in nature, for the benefit of users of the treaty, including law-makers, arbitrators, judges and commercial parties, was within the mandate of the Commission. Such a recommendation was said to be appropriate and, in the circumstances, particularly desirable as it would encourage the development of rules favouring the validity of arbitration agreements in a wider variety of situations and encourage States to adopt the revised version of article 7 of the Arbitration Model Law.

179. The Commission noted the discussions of the Working Group on the form of the document, including the question whether the document should take the form of a declaration or a recommendation (A/CN.9/485, paras. 65-69). The Commission agreed that the purpose of the document, in line with the Commission’s mandate, was to propose a harmonizing interpretation of certain provisions of the New York Convention, without interfering with the competence of the State parties to the New York Convention to issue binding declarations regarding the interpretation of that treaty.

180. Against that background, the Commission agreed that the most appropriate form for such a document was that of a recommendation, instead of a declaration which could be misinterpreted as to its nature. The title of the document was amended accordingly. The Commission also agreed to bring forward the reference to its mandate in the opening paragraphs of the recommendation.

E. Adoption of legislative provisions and recommendation

181. The Commission, after considering the text of the draft model legislative provisions relating to the definition and form of arbitration agreements and interim measures, and the text of the draft recommendation regarding the interpretation of article II, paragraph 2, and article VII, paragraph 1, of the New York Convention, adopted the following decision at its 834th meeting, on 7 July 2006:

“The United Nations Commission on International Trade Law,

“Recalling its mandate under General Assembly resolution 2205 (XXI) of 17 December 1966 to further the progressive harmonization and unification of the law of international trade and in that respect to bear in mind the interests of all peoples, in particular those of developing countries, in the extensive development of international trade,

“Recalling also General Assembly resolution 40/72 of 11 December 1985 noting the adoption of the Model Law on International Commercial Arbitration by the United Nations Commission on International Trade Law and recommending that all States give due consideration to the Model Law, in view of the desirability of uniformity of the law of arbitral procedures and the specific needs of international commercial arbitration practice,

⁸ General Assembly resolution 2205 (XXI), section II, paragraph 8 (d).

“Recognizing the value of arbitration as a method of settling disputes arising in the context of international commercial relations,

“Recognizing also the need for provisions in the Model Law to conform to current practices in international trade and modern means of contracting with regard to the form requirement of arbitration agreement and the granting of interim measures,

“Believing that revised articles of the Model Law on the requirement of written form and interim measures, together with explanatory material relating thereto, will significantly enhance the operation of the Model Law,

“Noting that the preparation of the revised articles of the Model Law was the subject of due deliberation and extensive consultations with Governments and interested circles and would contribute significantly to the establishment of a harmonized legal framework for a fair and efficient settlement of international commercial disputes,

“Believing that, in connection with the modernization of articles of the Model Law, the promotion of a uniform interpretation and application of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards, done in New York, 10 June 1958, is particularly timely,

“1. Adopts the revised articles of the UNCITRAL Model Law on International Commercial Arbitration as they appear in annex I to the report of the United Nations Commission on International Trade Law on the work of its thirty-ninth session;⁹

“2. Recommends that all States give favourable consideration to the enactment of the revised articles of the UNCITRAL Model Law on International Commercial Arbitration, or the revised UNCITRAL Model Law on International Commercial Arbitration, when they enact or revise their laws, in view of the desirability of uniformity of the law of dispute settlement procedures and the specific needs of international commercial arbitration practice;

“3. Adopts the recommendation regarding the interpretation of articles II, paragraph 2, and VII, paragraph 1, of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards, done in New York, 10 June 1958, as it appears in annex II to the report of the United Nations Commission on International Trade Law on the work of its thirty-ninth session.”

F. Future work in the field of settlement of commercial disputes

182. With respect to future work in the field of settlement of commercial disputes, the Commission had before it two notes entitled “Possible future work in the field of settlement of commercial disputes” (A/CN.9/610 and Corr.1) and “Possible future work in the field of settlement of commercial disputes: revision of the UNCITRAL Arbitration Rules” (A/CN.9/610/Add.1).

183. The Commission took note of suggestions of the Working Group made at its forty-fourth session (New York, 23-27 January 2006) that priority consideration be given to, inter alia, possible revision of the UNCITRAL Arbitration Rules;¹⁰ arbitrability of

⁹ *Official Records of the General Assembly, Sixty-first Session, Supplement No. 17* (A/61/17).

¹⁰ *Ibid.*, *Thirty-first Session, Supplement No. 17* (A/31/17), para. 57.

intra-corporate disputes (and possibly other issues relating to arbitrability, for example, arbitrability in the fields of intellectual property rights, investment disputes, insolvency or unfair competition); and online dispute resolution (see A/CN.9/592, paras. 89-95).

184. It was agreed that the topic of revising the UNCITRAL Arbitration Rules should be given priority. The Commission noted that, as one of the early instruments developed by UNCITRAL in the field of arbitration, the UNCITRAL Arbitration Rules were recognized as a very successful text, adopted by many arbitration centres and used in many different instances, such as, for example, in investor-State disputes. In recognition of the success and status of the UNCITRAL Arbitration Rules, the Commission was generally of the view that any revision of the UNCITRAL Arbitration Rules should not alter the structure of the text, its spirit or its drafting style, and should respect the flexibility of the text rather than make it more complex. It was suggested that the Working Group should undertake to define carefully the list of topics that might need to be addressed in a revised version of the UNCITRAL Arbitration Rules. It was observed that the list contained in document A/CN.9/610/Add.1 provided a useful starting point in that respect.

185. The topic of arbitrability was said to be an important question, which should also be given priority. It was said that it would be for the Working Group to consider whether arbitrable matters could be defined in a generic manner, possibly with an illustrative list of such matters, or whether the legislative provision to be prepared in respect of arbitrability should identify the topics that were not arbitrable. It was suggested that a study might be undertaken of the question of arbitrability and other forms of alternative dispute resolution in the context of immovable property, unfair competition and insolvency. It was cautioned, however, that the topic of arbitrability was a matter raising questions of public policy, which was notoriously difficult to define in a uniform manner, and that providing a pre-defined list of arbitrable matters could unnecessarily restrict a State's ability to meet certain public policy concerns that were likely to evolve over time.

186. Other topics mentioned for possible inclusion in the future work of the Working Group included issues raised by online dispute resolution. It was suggested that the UNCITRAL Arbitration Rules, when read in conjunction with other instruments, such as the UNCITRAL Model Law on Electronic Commerce and the Convention on Electronic Contracts, already accommodated a number of issues arising in the online context. Another topic mentioned was the issue of arbitration in the field of insolvency. Yet another suggestion was to address the impact of anti-suit injunctions on international arbitration. A further suggestion was to consider clarifying the notions used in article I, paragraph 1, of the New York Convention, of "arbitral awards made in the territory of a State other than the State where the recognition and enforcement of such awards are sought" or "arbitral awards not considered as domestic awards in the State where their recognition and enforcement are sought", which were said to have raised uncertainty in some State courts. The Commission also heard with interest a statement made on behalf of the International Cotton Advisory Committee suggesting that work could be undertaken by the Commission to promote contract discipline, effectiveness of arbitration agreements and enforcement of awards in that industry.

187. After discussion, the Commission was generally of the view that several matters could be dealt with by the Working Group in parallel. The Commission agreed that the Working Group should undertake work on the question of a revision of the UNCITRAL Arbitration Rules. It was also agreed that the issue of arbitrability was a topic that the Working Group should also consider. As to the issue of online dispute resolution, it was agreed that the Working Group should place the topic on its agenda but, at least in an initial phase, should consider the implications of electronic communications in the context of the revision of the UNCITRAL Arbitration Rules.

V. Procurement: progress report of Working Group I

188. At its thirty-sixth and thirty-seventh sessions, in 2003 and 2004 respectively, the Commission considered the possible updating of the UNCITRAL Model Law on Procurement of Goods, Construction and Services¹¹ and its Guide to Enactment, on the basis of notes by the Secretariat (A/CN.9/539 and Add.1 and A/CN.9/553).¹² At its thirty-seventh session, the Commission agreed that the Model Law would benefit from being updated to reflect new practices, in particular those which resulted from the use of electronic communications in public procurement, and the experience gained in the use of the Model Law as a basis for law reform in public procurement as well as possible additional issues. The Commission decided to entrust the preparation of proposals for the revision of the Model Law to its Working Group I (Procurement) and gave the Working Group a flexible mandate to identify the issues to be addressed in its considerations. The Commission noted that, in updating the Model Law, care should be taken not to depart from the basic principles of the Model Law and not to modify the provisions whose usefulness had been proven.¹³

189. The Working Group commenced its work pursuant to that mandate at its sixth session (Vienna, 30 August-3 September 2004). At that session, it decided to proceed with in-depth consideration of the topics suggested in the notes by the Secretariat (A/CN.9/WG.I/WP.31 and A/CN.9/WG.I/WP.32)¹⁴ in sequence at its future sessions (A/CN.9/568, para. 10).

190. At its thirty-ninth session, the Commission took note of the reports of the eighth (Vienna, 7-11 November 2005) and ninth (New York, 24-28 April 2006) sessions of the Working Group (see A/CN.9/590 and A/CN.9/595, respectively).

191. The Commission was informed that, at its eighth and ninth sessions, the Working Group continued the in-depth consideration of the topics related to the use of electronic communications and technologies in the procurement process. The Commission noted that, pursuant to the Working Group's decision at its seventh session to accommodate the use of electronic communications and technologies (including electronic reverse auctions) in the Model Law (A/CN.9/575, para. 9),¹⁵ the Working Group, at its ninth session, had come to preliminary agreement on the draft revisions to the Model Law and the Guide that would be necessary in that regard. The Commission also noted that the Working Group had decided that at its subsequent sessions it would proceed with the in-depth consideration of the proposed revisions to the Model Law and the Guide addressing the remaining aspects of electronic reverse auctions and the investigation of abnormally low tenders, and would take up the topics of framework agreements and suppliers' lists (A/CN.9/595, para. 9).

192. The Commission commended the Working Group for the progress made in its work and reaffirmed its support for the review being undertaken and for the inclusion of novel procurement practices in the Model Law. In the context of its consideration of agenda item 14, Coordination and cooperation, with reference to document A/CN.9/598/Add.1 (see para. 232 below), the Commission recommended that the Working Group, in updating

¹¹ Ibid., *Forty-ninth Session, Supplement No. 17* and corrigendum (A/49/17 and Corr.1), annex I, and United Nations publication, Sales No. E.98.V.13, which contains also the accompanying Guide to Enactment.

¹² Ibid., *Fifty-eighth Session, Supplement No. 17* (A/58/17), paras. 225-230 and *ibid.*, *Fifty-ninth Session, Supplement No. 17* (A/59/17), paras. 79-82.

¹³ Ibid., *Fifty-ninth Session, Supplement No. 17* (A/59/17), paras. 81-82.

¹⁴ Ibid., *Sixtieth Session, Supplement No. 17* (A/60/17), para. 171.

¹⁵ Ibid.

the Model Law and the Guide, should take into account issues of conflict of interest and should consider whether any specific provisions addressing those issues would be warranted in the Model Law. (For the following two sessions of the Working Group, see para. 273 (a) below.)

VI. Transport law: progress report of Working Group III

193. At its thirty-fourth session, in 2001, the Commission established Working Group III (Transport Law) to prepare, in close cooperation with interested international organizations, a legislative instrument on issues relating to the international carriage of goods by sea, such as the scope of application, the period of responsibility of the carrier, the obligations of the carrier, the liability of the carrier, the obligations of the shipper and transport documents.¹⁶ At its thirty-fifth session, in 2002, the Commission approved the working assumption that the draft convention on transport law should cover door-to-door transport operations.¹⁷ At its thirty-sixth, thirty-seventh and thirty-eighth sessions, in 2003, 2004 and 2005, respectively, the Commission noted the complexities involved in the preparation of the draft convention, and authorized the Working Group, on an exceptional basis, to hold its sessions on the basis of two-week sessions.¹⁸

194. At its thirty-ninth session, the Commission took note with appreciation of the progress made by the Working Group at its sixteenth (Vienna, 28 November-9 December 2005) and seventeenth (New York, 3-13 April 2006) sessions (see A/CN.9/591 and Corr.1 and A/CN.9/594, respectively).

195. The Commission was informed that, at its sixteenth and seventeenth sessions, the Working Group had proceeded with its second reading of the draft convention and had made good progress regarding a number of difficult issues, including those regarding jurisdiction, arbitration obligations of the shipper, delivery of goods, including the period of responsibility of the carrier, the right of control, delivery to the consignee, scope of application and freedom of contract, and transport documents and electronic transport records. Also considered by the Working Group were the topics of transfer of rights and, more generally, the issue of whether any of the substantive topics currently included in the draft convention should be deferred for consideration in a possible future instrument. The Commission was also informed that the Secretariat had facilitated the initiation of consultations that were currently under way between experts from Working Group III (Transport Law) and experts from Working Group II (Arbitration and Conciliation) with the hope that an agreement could be found on the provisions in the draft convention relating to arbitration.

196. The Commission was informed that, with a view to continuing the acceleration of the exchange of views, the formulation of proposals and the emergence of consensus in preparation for a third and final reading of the draft convention, a number of delegations participating in the sixteenth and seventeenth sessions of the Working Group had continued their initiative of holding informal consultations for the continuation of discussion between sessions of the Working Group.

¹⁶ Ibid., *Fifty-sixth Session, Supplement No. 17* and corrigendum (A/56/17 and Corr.3), para. 345.

¹⁷ Ibid., *Fifty-seventh Session, Supplement No. 17* (A/57/17), para. 224.

¹⁸ Ibid., *Fifty-eighth Session, Supplement No. 17* (A/58/17), para. 208; *ibid.*, *Fifty-ninth Session, Supplement No. 17* (A/59/17), para. 133; and *ibid.*, *Sixtieth Session, Supplement No. 17* (A/60/17), para. 238.

197. Some concerns were expressed regarding the treatment in the draft convention of the issues of scope of application and freedom of contract. The freedom given to the parties to volume contracts to derogate from provisions of the draft convention was said to constitute a significant departure from the prevailing regime in transport law conventions. It was argued that, in view of the broad definition of volume contracts in article 1 of the draft convention, freedom of contract might potentially cover almost all carriage of goods by shipping lines falling within the scope of the draft convention. It was further argued that the conditions for valid derogation from the draft convention did not require the express consent to the derogations by both parties, which was said to open up the possibility that standard contracts containing derogating clauses could be submitted to the shippers.

198. There was support for those concerns and for the need for the Working Group to consider them. However, there were also objections to both the criticism of the treatment of freedom of contract as well as to the characterization of the alleged problems created by the draft convention. It was said, in that connection, that freedom of contract was an important element in the overall balance of the draft convention and that the current text reflected an agreement that had emerged in the Working Group after extensive discussions.

199. The Commission took note of the concerns related to the treatment in the draft convention of the issues of scope of application and freedom of contract and of the joint proposal by Australia and France on freedom of contract under volume contracts set out in document A/CN.9/612, as well as the expressions of support for the current draft provisions. The Commission was of the view that the Working Group was the proper forum to consider those substantive points at the present stage and expressed its confidence that the Working Group would deal with those concerns in the ongoing discussions on the draft convention. The Commission noted the views expressed by a number of delegations on the need for the outcome of the deliberations of the Working Group to receive wide international acceptance.

200. With respect to a possible time frame for completion of the draft convention, the Commission was informed that the Working Group planned to complete its second reading of the draft convention at the end of 2006 and the final reading at the end of 2007, with a view to presenting the draft convention for finalization by the Commission in 2008. The Commission agreed that 2008 would be a desirable goal for completion of the project, but that it was not desirable to establish a firm deadline at the present stage. The Commission, noting the complexities and magnitude of the work involved in the preparation of the draft convention, authorized the Working Group to hold its sessions on the basis of two-week sessions. (For the next two sessions of the Working Group, see para. 273 (c) below).

VII. Possible future work in the area of electronic commerce

201. At its thirty-eighth session, in 2005, the Commission considered the possibility of undertaking future work in the area of electronic commerce in the light of a note submitted by the Secretariat in pursuance of the Commission's mandate to coordinate international legal harmonization efforts in the area of international trade law (A/CN.9/579).¹⁹ In that note, the Secretariat had summarized the work undertaken by other organizations in various areas related to electronic commerce, which were indicative of the various elements required to establish a favourable legal framework for electronic commerce.²⁰

¹⁹ Ibid., *Sixtieth Session, Supplement No. 17* (A/60/17), paras. 213-215.

²⁰ Ibid., para. 213.

202. The Commission, at that time, welcomed the information provided in the note by the Secretariat and confirmed the usefulness of such a cross-sectoral overview of activities from the viewpoint both of its coordination activities and of the information requirements of Member States. The Commission requested the Secretariat to prepare a more detailed study, for consideration by the Commission at its thirty-ninth session, in 2006, which should include proposals as to the form and nature of a comprehensive reference document, which the Commission might in the future consider preparing with a view to assisting legislators and policymakers around the world.²¹

203. At its thirty-ninth session, the Commission had before it a note prepared by the Secretariat following that request (A/CN.9/604). The note identified the following areas as possible components of a comprehensive reference document: (a) authentication and cross-border recognition of electronic signatures; (b) liability and standards of conduct for information-services providers; (c) electronic invoicing and legal issues related to supply chains in electronic commerce; (d) transfer of rights in tangible goods and other rights through electronic communications; (e) unfair competition and deceptive trade practices in electronic commerce; and (f) privacy and data protection in electronic commerce. The note also identified other issues which, although in a more summary fashion, could be included in such a document: (a) protection of intellectual property rights; (b) unsolicited electronic communications (spam); and (c) cybercrime.

204. The Commission welcomed the information and the proposals submitted by the Secretariat. The Commission reiterated its belief that the UNCITRAL Model Law on Electronic Commerce, the UNCITRAL Model Law on Electronic Signatures,²² and the Convention on Electronic Contracts, provided a good basis for States to facilitate electronic commerce, but only addressed a limited number of issues.

205. The Commission heard expressions of support for the view that the task of legislators and policymakers, in particular in developing countries, might be greatly facilitated if the Commission were to formulate a comprehensive reference document dealing with the topics identified by the Secretariat. Such a document, it was also said, might also assist the Commission to identify areas in which it might itself undertake future harmonization work.

206. However, there was also support for the view that the range of issues identified by the Secretariat was too wide and that the scope of the comprehensive reference document might need to be reduced. Given the variety of issues involved, it was agreed that Member States might need more time, at least to consider the desirability and possible scope of future legislative work on those issues, and that the Commission should postpone a final decision on the topics to be covered until its fortieth session, in 2007. The Commission further agreed that its final decision on that matter might be facilitated if it could review a sample portion of the comprehensive reference document on a discrete topic. The Commission therefore requested the Secretariat to prepare a document dealing specifically with issues related to authentication and cross-border recognition of electronic signatures, for review at its fortieth session, in 2007.

²¹ Ibid., para. 214.

²² Ibid., *Fifty-sixth Session, Supplement No. 17* and corrigendum (A/56/17 and Corr.3), annex II, and United Nations publication, Sales No. E.02.V.8, which contains also the accompanying Guide to Enactment.

VIII. Possible future work in the area of insolvency law

207. The Commission had before it a note by the Secretariat (A/CN.9/596) reporting on the international colloquium that took place from 14 to 16 November 2005, in Vienna, to discuss a series of proposals, made to the Commission at its thirty-eighth session, in 2005 (A/CN.9/582 and Add.1-7),²³ for future work in the area of insolvency law, specifically on treatment of corporate groups in insolvency, cross-border insolvency protocols in transnational cases, post-commencement financing in international reorganizations, directors' and officers' responsibilities and liabilities in insolvency and pre-insolvency cases, and commercial fraud and insolvency. The Commission also took note of document A/CN.9/597.

208. The Commission expressed its appreciation for the organization of the colloquium, noting the topics that had been discussed and the issues that had been raised. With respect to the proposals made by the Secretariat for possible future work, the Commission recalled, in particular, that treatment of corporate groups in insolvency had arisen in the context of the development of the Insolvency Guide, and that the treatment in the Insolvency Guide was either limited to a brief introduction, as in the case of treatment of corporate groups in insolvency, or limited to domestic insolvency law, as in the case of post-commencement financing. It was acknowledged that undertaking further work on those two topics would build upon and complement the work already completed by the Commission. The Commission also noted that the proposal on cross-border insolvency protocols was closely related and complementary to the promotion and use of a text already adopted by the Commission, the Model Law on Cross-Border Insolvency,²⁴ which had been enacted by 11 States and was the subject of increasing interest and discussion. It was therefore appropriate to consider how implementation of the coordination and cooperation provisions of the Model Law could be facilitated by making the legal and judicial experience with respect to the negotiation, use and content of protocols available, in some form, to the international legal community.

209. After consideration, the Commission agreed that:

(a) The treatment of corporate groups in insolvency was sufficiently developed for the topic to be referred to Working Group V (Insolvency Law) for consideration in 2006 and that the Working Group should be given the flexibility to make appropriate recommendations to the Commission regarding the scope of its future work and the form it should take, depending upon the substance of the proposed solutions to the problems the Working Group would identify under that topic;

(b) Post-commencement financing should initially be considered as a component of work to be undertaken on insolvency of corporate groups, with the Working Group being given sufficient flexibility to consider any proposals for work on additional aspects of the topic;

(c) Initial work to compile practical experience with respect to negotiating and using cross-border insolvency protocols should be facilitated informally through consultation with judges and insolvency practitioners. A preliminary progress report on that work should be presented to the Commission for further consideration at its fortieth session, in 2007;

²³ Ibid., *Sixtieth Session, Supplement No. 17* (A/60/17), paras. 209 and 210.

²⁴ Ibid., *Fifty-second Session, Supplement No. 17* (A/52/17), annex I, and United Nations publication, Sales No. E.99.V.3, which contains also the accompanying Guide to Enactment.

(d) The Secretariat should have flexibility to organize the work to be undertaken with respect to topics (b) and (c), as appropriate, in view of limited resources;

(e) Work being undertaken by other organizations in relation to the topics of directors' and officers' responsibilities in insolvency and pre-insolvency, and insolvency and commercial fraud should be monitored to facilitate consideration, at some future date, of work that might be undertaken by the Commission.

210. The Commission noted that the topic of arbitrability of insolvency issues and the use of other alternative dispute resolution processes (such as mediation and facilitation) in the context of insolvency had been discussed as a possible topic for future work which would be undertaken by Working Group II (Arbitration and Conciliation), with input from Working Group V (Insolvency Law) (see paras. 183 and 185-187 above).

IX. Possible future work in the area of commercial fraud

211. The Commission had before it a note by the Secretariat (A/CN.9/600) reporting on ongoing and possible future work in the area of commercial fraud. The Commission recalled that it had previously considered the subject of commercial fraud at its thirty-fifth to thirty-eighth sessions, from 2002 to 2005.²⁵

212. It was recalled that, at its thirty-seventh session, in 2004, the Commission had agreed that the Secretariat should facilitate, whenever appropriate, the discussion of examples of commercial fraud in the particular contexts of projects worked on by the Commission so as to enable delegates involved in those projects to take the problem of fraud into account in their deliberations. In addition, with a view towards education, training and prevention, the Commission agreed that the preparation of lists of common features present in typical fraudulent schemes could be useful as educational material for participants in international trade and other potential targets of perpetrators of fraud to the extent such lists would help potential targets protect themselves and avoid becoming victims of fraudulent schemes. While it was not proposed that the Commission itself or its intergovernmental working groups should be directly involved in that activity, it was agreed that the Secretariat should consider preparing, in close consultation with experts, such materials listing common features present in typical fraudulent schemes and that the Secretariat would keep the Commission informed of progress in that regard.²⁶

213. At its thirty-eighth session, in 2005, the Commission's attention was drawn to resolution 2004/26 adopted by the Economic and Social Council on 21 July 2004, entitled "International cooperation in the prevention, investigation, prosecution and punishment of fraud, the criminal misuse and falsification of identity and related crimes".²⁷ At that session, the Commission was advised that, pursuant to that resolution, the United Nations Office on Drugs and Crime had convened an intergovernmental expert group meeting from 17 to 18 March 2005 to prepare a study on fraud and, the criminal misuse and falsification of identity, and to develop on the basis of such a study relevant practices, guidelines or other materials, taking into account in particular the relevant work of UNCITRAL. The Commission noted that the results of that meeting were reported to the Commission on Crime Prevention and Criminal Justice at its fourteenth session (Vienna, 23-27 May 2005;

²⁵ Ibid., *Fifty-seventh Session, Supplement No. 17* (A/57/17), paras. 279-290; *Fifty-eighth Session, Supplement No. 17* (A/58/17), paras. 231-241; *Fifty-ninth Session, Supplement No. 17* (A/59/17), paras. 108-112; and *Sixtieth Session, Supplement No. 17* (A/60/17), paras. 216-220.

²⁶ Ibid., *Fifty-ninth Session, Supplement No. 17* (A/59/17), paras. 110-112.

²⁷ Ibid., *Sixtieth Session, Supplement No. 17* (A/60/17), para. 217.

see E/CN.15/2005/11), and that participants at that meeting had agreed that a study of the problem should be undertaken, based on information received in response to a questionnaire on fraud and the criminal misuse and falsification of identity. The Commission was also informed that the UNCITRAL secretariat had participated in the expert group meeting and the Commission expressed its support for the assistance of the UNCITRAL secretariat in the project of the United Nations Office on Drugs and Crime.²⁸

214. At its thirty-ninth session, the Commission heard a progress report of work by the Secretariat on materials listing common features present in typical fraudulent schemes, which had the following main purposes: (a) the formulation of materials that would identify patterns and characteristics of commercial fraud in a manner that would encourage the private sector to mobilize its resources to combat commercial fraud in an organized and systematic manner; (b) to assist governmental bodies in understanding how they might help the public and private sectors to address the problem of commercial fraud; and (c) to assist the criminal law sector in understanding how best to engage the private sector in the battle against commercial fraud. The Commission took note of the suggested format for the preparation of common features of fraudulent schemes as set out in document A/CN.9/600, paragraph 14, and that the materials to be prepared could contain other items, such as a glossary of commonly used terms or explanations of how to effectively perform due diligence (A/CN.9/600, para. 16).

215. The Commission also heard that the United Nations Office on Drugs and Crime had reported on the progress of work on the study on fraud, the criminal misuse and falsification of identity and related crimes to the Commission on Crime Prevention and Criminal Justice at its fifteenth session (Vienna, 24-28 April 2006; see E/CN.15/2006/11 and Corr.1), and that it was anticipated that the study would be submitted to that Commission at its sixteenth session, in 2007. The UNCITRAL secretariat had worked with the secretariat of the Office in the drafting and dissemination of the questionnaire in preparation for that study.

216. Statements were made that commercial fraud deterred legitimate trade and undermined confidence in established contract practices and instruments. Against that background, it was said that the UNCITRAL transactional and private-law perspective and expertise were necessary for the full understanding of the problem of commercial fraud and were most useful in the formulation of measures to fight it. Appreciation was expressed for the work by the UNCITRAL secretariat in that area as well as for its cooperation with the United Nations Office on Drugs and Crime. Statements were made that particular attention should be paid to the increased use by fraudsters of the Internet and to the use of business transactions for money-laundering.

217. The Commission agreed with those statements and concluded that its secretariat should continue its work in conjunction with experts and other interested organizations with respect to identifying common features of fraudulent schemes, with a view to presenting interim or final materials for the consideration of the Commission at a future session, and that it should continue to cooperate with the United Nations Office on Drugs and Crime in its study on fraud, the criminal misuse and falsification of identity and related crimes, and that it should keep the Commission informed of the progress of that work.

²⁸ Ibid., paras. 218 and 219.

X. Monitoring implementation of the New York Convention

218. The Commission recalled that, at its twenty-eighth session, in 1995, it had approved a project, undertaken jointly with Committee D (now known as the Arbitration Committee) of the International Bar Association, aimed at monitoring the legislative implementation of the New York Convention.²⁹ It was also recalled that the Secretariat had presented an interim report to the Commission at its thirty-eighth session, in 2005 (A/CN.9/585), which set out the issues raised by the replies received in response to the questionnaire circulated in connection with the project.³⁰

219. It was further recalled that, at that session, the Commission welcomed the progress reflected in the interim report, noting that the general outline of replies received served to facilitate discussions as to the next steps to be taken and highlighted areas of uncertainty where more information could be sought from States parties or further studies could be undertaken. It was suggested that one possible future step could be the development of a legislative guide to limit the risk that State practice would diverge from the spirit of the New York Convention.³¹

220. At its thirty-ninth session, the Commission took note of an oral presentation by the Secretariat on additional questions it proposed to put to States (as noted in document A/CN.9/585, para. 73) in order to obtain more comprehensive information regarding various aspects of implementation of the New York Convention, including legislation, case law and practice. The Commission agreed that the project should aim at the development of a legislative guide, with a view to promoting a uniform interpretation of the New York Convention. After discussion, the Commission reaffirmed the decisions made at its thirty-eighth session, in 2005, that a level of flexibility should be left to the Secretariat in determining the time frame for completion of the project and the level of detail that should be reflected in the report that the Secretariat would present for consideration by the Commission in due course.³²

XI. Technical assistance to law reform

A. Technical assistance activities

221. The Commission had before it a note by the Secretariat (A/CN.9/599) describing the technical assistance activities undertaken subsequent to the date of the note on technical assistance submitted to the Commission at its thirty-eighth session, in 2005 (A/CN.9/586). The Commission emphasized the importance of such technical cooperation and expressed its appreciation for the activities undertaken by the Secretariat referred to in document A/CN.9/599, paragraphs 8-14.

222. The Commission noted that the continuing ability to provide technical assistance in response to specific requests of States was dependent upon the availability of funds to meet associated UNCITRAL costs and reiterated its appeal to all States, international organizations and other interested entities to consider making contributions to the UNCITRAL Trust Fund for Symposia, if possible in the form of multi-year contributions,

²⁹ Ibid., *Fiftieth Session, Supplement No. 17* (A/50/17), paras. 401-404.

³⁰ Ibid., *Sixtieth Session, Supplement No. 17* (A/60/17), para. 189.

³¹ Ibid., paras. 190-191.

³² Ibid., para. 191.

or as specific-purpose contributions, so as to facilitate planning and enable the Secretariat to meet the increasing requests from developing countries and countries with economies in transition for training and technical legislative assistance. The Commission expressed its appreciation to those States that had contributed to the fund since the thirty-eighth session, namely Mexico and Singapore, and also to organizations that had contributed to the programme by providing funds or staff or by hosting seminars.

223. The Commission appealed to the relevant bodies of the United Nations system, organizations, institutions and individuals to make voluntary contributions to the trust fund established to provide travel assistance to developing countries that were members of the Commission, noting that no contributions to the trust fund for travel assistance had been received since the thirty-eighth session.

B. Technical assistance resources

224. The Commission noted with appreciation the continuing work under the system established for the collection and dissemination of case law on UNCITRAL texts (CLOUT). As at 4 April 2006, 54 issues of CLOUT had been prepared for publication, dealing with 604 cases, relating mainly to the United Nations Sales Convention and the Arbitration Model Law.

225. It was widely agreed that CLOUT continued to be an important aspect of the overall technical assistance activities undertaken by UNCITRAL and that the broad dissemination of CLOUT, in all six official languages of the United Nations, promoted the uniform interpretation and application of UNCITRAL texts. The Commission expressed its appreciation to the national correspondents for their work in selecting decisions and preparing case abstracts.

226. The Commission noted that the digest of case law on the United Nations Sales Convention, published in December 2004, was being reviewed and edited and that the first draft of a digest of case law relating to the Arbitration Model Law was being finalized for publication.

227. The Commission also noted developments with respect to the UNCITRAL website (www.uncitral.org), emphasizing its importance as a component of the overall programme of information and technical assistance activities, expressing its appreciation for its availability in the six official languages of the United Nations and encouraging the Secretariat to further maintain and upgrade it in accordance with existing guidelines.

228. The Commission took note of developments with respect to the UNCITRAL Law Library and UNCITRAL publications. With respect to the UNCITRAL Yearbook, the Commission encouraged the Secretariat to take steps to reduce the costs and time delays associated with its publication, noting the importance of the Yearbook as a means of disseminating information on the work of UNCITRAL.

C. Future activities

229. The Commission noted that permanent missions to the United Nations located in Vienna had been briefed on the objectives and planning of UNCITRAL's technical assistance activities and that the Secretariat was taking further steps to strengthen links with those permanent missions to facilitate identification of national and regional needs for technical assistance.

XII. Status and promotion of UNCITRAL legal texts

230. The Commission considered the status of the conventions and model laws emanating from its work, as well as the status of the New York Convention, on the basis of a note by the Secretariat (A/CN.9/601), as updated by information available on the UNCITRAL website. The Commission noted with appreciation the new actions and enactments of States and jurisdictions since its thirty-eighth session regarding the following instruments:

(a) [Unamended] Convention on the Limitation Period in the International Sale of Goods (New York, 1974).³³ New action by Liberia; number of States parties: 26;

(b) Convention on the Limitation Period in the International Sale of Goods, as amended (New York, 1980).³⁴ New action by Liberia; number of States parties: 19;

(c) United Nations Convention on the Carriage of Goods by Sea (Hamburg, 1978).³⁵ New actions by Liberia and Paraguay; number of States parties: 31;

(d) United Nations Convention on Contracts for the International Sale of Goods (Vienna, 1980). New actions by Liberia and Paraguay; number of States parties: 67;

(e) United Nations Convention on International Bills of Exchange and International Promissory Notes (New York, 1988).³⁶ New action by Liberia; number of States parties: five;

(f) United Nations Convention on the Liability of Operators of Transport Terminals in International Trade (Vienna, 1991).³⁷ New action by Paraguay; number of States parties: four;

(g) United Nations Convention on Independent Guarantees and Stand-by Letters of Credit (New York, 1995).³⁸ New action by Liberia; number of States parties: eight;

(h) United Nations Convention on the Assignment of Receivables in International Trade (New York, 2001).³⁹ New action by Liberia; number of States parties: one;

(i) United Nations Convention on the Use of Electronic Communications in International Contracts (New York, 2005). New actions by the Central African Republic, Lebanon and Senegal;⁴⁰

³³ United Nations, *Treaty Series*, vol. 1511, No. 26119.

³⁴ Ibid., No. 26121, and United Nations publication, Sales No. E.95.V.13.

³⁵ Ibid., vol. 1695, No. 29215, and United Nations publication (Sales No. E.95.V.14).

³⁶ General Assembly resolution 43/165, annex, and United Nations publication, Sales No. E.95.V.16.

³⁷ *Official Records of the United Nations Conference on the Liability of Operators of Transport Terminals in International Trade, Vienna, 2-19 April 1991* (United Nations publication, Sales No. E.93.XI.3), part I, document A/CONF.152/13, annex.

³⁸ United Nations, *Treaty Series*, vol. 2169, No. 38030, and United Nations publication (Sales No. E.97.V.12).

³⁹ General Assembly resolution 56/81, annex, and United Nations publication, Sales No. E.04.V.14.

⁴⁰ General Assembly resolution 60/21, annex. For actions by China, Singapore and Sri Lanka during the special event on 6 July 2006, held in conjunction with the thirty-ninth session of the Commission, which included the ceremony of the signing of the Convention on Electronic Contracts, see paragraph 266 of the present report.

(j) Convention on the Recognition and Enforcement of Foreign Arbitral Awards (New York, 1958). New actions by Liberia and Pakistan; number of States parties: 137;

(k) UNCITRAL Model Law on International Commercial Arbitration (1985). New jurisdictions that had enacted legislation based on the Model Law: Austria, Denmark, Nicaragua, Norway, Poland, Turkey and, within the United States of America, the state of Louisiana;

(l) UNCITRAL Model Law on Electronic Commerce (1996). New jurisdictions that had enacted legislation based on the Model Law: China, within Canada, the state of Alberta, Sri Lanka and, within the United States, the states of Alaska and South Carolina;

(m) UNCITRAL Model Law on Cross-Border Insolvency (1997). New jurisdictions that had enacted legislation based on the Model Law: Serbia, United Kingdom of Great Britain and Northern Ireland and the British Virgin Islands (overseas territory of the United Kingdom);

(n) UNCITRAL Model Law on Electronic Signatures (2001). New jurisdictions that had enacted legislation based on the Model Law: China;

(o) UNCITRAL Model Law on International Commercial Conciliation (2002).⁴¹ New jurisdictions that had enacted legislation based on the Model Law: Canada, Croatia, Hungary and Nicaragua; uniform state legislation based on the Model Law had been prepared in the United States and enacted, within the United States, by the states of Illinois, Iowa, Nebraska, New Jersey, Ohio and Washington.

231. The Commission noted the finalization by the Secretariat of the explanatory note relating to the Convention on Electronic Contracts (A/CN.9/608 and Add.1-4). The Commission expressed its appreciation for that explanatory note and requested the Secretariat to publish and widely circulate it, possibly as a sales publication.

XIII. Coordination and cooperation

A. General

232. At its thirty-ninth session, the Commission had before it a note by the Secretariat (A/CN.9/598) providing a brief survey of the work of international organizations related to the harmonization of international trade law, focusing upon substantive legislative work, as well as two additional notes addressing specific areas of activity, procurement (A/CN.9/598/Add.1) and security interests (A/CN.9/598/Add.2) (for an account of the discussion, see para. 192 above and paras. 235-251 below). The Commission commended the Secretariat for the preparation of those reports, recognizing their value to coordination of the activities of international organizations in the field of international trade law, and welcomed the revision of the survey on an annual basis.

233. It was recalled that the Commission had generally agreed at its thirty-seventh session, in 2004, that it should adopt a more proactive attitude, through its secretariat, to fulfilling its coordination role.⁴² Recalling the endorsement by the General Assembly, most recently in its resolution 60/20 of 23 November 2005, paragraph 4, of UNCITRAL efforts and initiatives towards coordination of activities of international organizations in

⁴¹ *Official Records of the General Assembly, Fifty-seventh Session, Supplement No. 17 (A/57/17)*, annex I, and United Nations publication, Sales No. E.05.V.4.

⁴² *Ibid.*, *Fifty-ninth Session, Supplement No. 17 (A/59/17)*, paras. 113-115.

the field of international trade law (see para. 260 below), the Commission noted with appreciation that the secretariat was taking steps to engage in a dialogue, on both legislative and technical assistance activities, with a number of organizations, including the Common Market for Eastern and Southern Africa, the Hague Conference on Private International Law, the International Council for Commercial Arbitration, the International Institute for the Unification of Private Law (Unidroit), the International Law Institute, the International Monetary Fund, the Organization of American States (OAS), and the World Bank. The Commission noted that that work often involved travel to meetings of those organizations and the expenditure of funds allocated for official travel. The Commission reiterated the importance of coordination work being undertaken by UNCITRAL as the core legal body in the United Nations system in the field of international trade law and supported the use of travel funds for that purpose.

234. In response to a request from Unidroit, the Secretariat proposed that the current edition of the Unidroit Principles of International Commercial Contracts⁴³ might be circulated to States with a view to possible endorsement by the Commission at its fortieth session, in 2007. After discussion, the Commission agreed to that proposal, noting that the circulation would facilitate coordination between the two organizations and would be of assistance to States that were not members of Unidroit and to other users in using the Unidroit Principles in their legislative and other work.

B. Coordination and cooperation in the field of secured financing law

235. The Commission had before it a note by the Secretariat on current activities of international organizations related to the harmonization and unification of security interests law (A/CN.9/598/Add.2).

1. Draft Unidroit convention on substantive rules regarding intermediated securities

236. The Commission noted with appreciation the cooperation between the secretariat of Unidroit and the UNCITRAL secretariat with a view to ensuring consistency between the draft Unidroit convention on substantive rules regarding intermediated securities (the “draft Unidroit securities convention”) and the draft UNCITRAL legislative guide on secured transactions (see chap. III above). Noting its earlier decision to generally exclude the taking of security rights in investment securities, the Commission discussed certain exceptions that could be considered by its Working Group VI (Security Interests). It was stated that the proposal contained in paragraph 11 of document A/CN.9/598/Add.2 needed to be formulated more narrowly so as to be limited to the exceptions to be approved by the Commission.

237. In particular, it was noted that a security right in securities, as original encumbered assets or as proceeds, created and made effective against third parties under the draft Unidroit securities convention, would have priority over a competing security right in the securities as proceeds of an asset falling within the scope of legislation based on the draft UNCITRAL legislative guide on secured transactions. Similarly, it was noted that a security right in a receivable or other asset within the scope of the draft UNCITRAL legislative guide as an original encumbered asset should have priority over a competing security right in such a receivable or other asset as proceeds of securities. It was also noted that a security right in securities securing a receivable, negotiable instrument or other

⁴³ Available as at the date of the preparation of the present report at <http://www.unidroit.org/english/principles/contracts/main.htm>.

obligation would follow the receivable that it secured, provided that third-party rights, priority and enforcement were not affected.

238. It was widely felt that the points mentioned above formed an acceptable basis for discussion between the two secretariats and experts from the relevant Unidroit and UNCITRAL working groups with a view to reaching agreement on the coverage of cross-over issues in the two texts and on a qualified exclusion of securities from the scope of the draft UNCITRAL legislative guide on secured transactions. It was stated that one of the advantages of such an approach might be the avoidance of excluding from the draft UNCITRAL legislative guide matters not addressed in the draft Unidroit securities convention, such as security rights in directly held securities. It was stated that, for practical reasons, security rights in bank accounts and security rights in securities accounts should be treated as far as possible in the same manner and with the same result.

2. Draft Unidroit model law on leasing

239. The Commission noted that Unidroit was preparing a draft model law on leasing (the “draft Unidroit model law”) that would cover both operating and financial leases (i.e. leases serving security purposes), which were addressed in the draft UNCITRAL legislative guide on secured transactions as acquisition financing devices. In addition, it was noted that discussions between the two secretariats showed some preference for ensuring that the draft Unidroit model law would defer to secured transactions law with respect to financial leases and be coordinated with the draft UNCITRAL legislative guide to avoid creating obstacles to legislation based on the draft UNCITRAL legislative guide. In addition, it was stated that the draft Unidroit model law would be of particular benefit to countries in the African region in view of the need for infrastructure improvements.

240. Broad support was expressed for the coordination of efforts by Unidroit and the Commission with a view to ensuring harmony between the draft Unidroit model law and the draft UNCITRAL legislative guide on secured transactions. It was widely felt that the cooperation of the two secretariats was a useful step in the right direction in identifying a common approach to be proposed to States.

241. After discussion, the Commission requested the Secretariat to continue its efforts of coordination with Unidroit with a view to ensuring harmony between the draft Unidroit model law and the draft UNCITRAL legislative guide on secured transactions.

3. European Bank for Reconstruction and Development Guiding Principles for the Development of a Charges Registry

242. The Commission noted with interest the publication by the European Bank for Reconstruction and Development of a set of principles dealing with security rights registries. It was stated that the Commission should also prepare such a set of principles, taking into account the European Bank Principles, as well as other similar sets of principles.

4. European Commission proposal for a regulation on the law applicable to contractual obligations (Rome I)

243. With respect to the relationship between the European Commission’s proposal for a regulation on the law applicable to contractual obligations (the “proposed Rome I Regulation”) and the United Nations Convention on the Assignment of Receivables in International Trade (the “United Nations Assignment Convention”), the Commission noted with appreciation that the European Commission shared the concerns expressed in the note

by the Secretariat (see A/CN.9/598/Add.2, para. 34) and admitted that the adoption in a European Union binding instrument of an approach to the law applicable to third-party effects of assignments that would be different from the approach taken in the United Nations Assignment Convention would undermine the certainty reached at the international level and might have a negative impact on the availability and the cost of credit. In addition, the Commission noted with appreciation that the European Commission had expressed its willingness to cooperate closely with the UNCITRAL secretariat to ensure, as far as possible, coherence between the two instruments and the facilitation of ratification of the United Nations Assignment Convention by European Union member States.

244. Strong support was expressed in the Commission for close cooperation with the European Commission with a view to ensuring consistency between the two texts and enabling ratification of the United Nations Assignment Convention by European Union member States. It was widely felt that an internationally uniform rule on the law applicable to third-party effects of assignment would enhance certainty of law with regard to important financial transactions and promote the availability of lower-cost credit throughout the world.

245. It was stated that, for the proposed Rome I Regulation to be consistent with the United Nations Assignment Convention, a number of issues might be usefully clarified, including that the branch rule in article 18, paragraph 1, of the proposed Rome I Regulation would not apply to the situations covered in article 13, paragraph 3, of the proposed Rome I Regulation.

246. In that connection, a concern was expressed that, while it was appropriate for the Secretariat to express comments, it was not for the Commission to make suggestions with respect to a draft regulation of the European Union at such an early stage in the process. In response, it was stated that, far from wishing to interfere with the legislative process of the European Union, the Commission had a legitimate interest not only to ensure wide ratification of a text that emanated from its work but mainly to avoid a situation where, because of inconsistencies between the two texts, lack of harmony and lack of certainty with respect to the law applicable to important financing transactions, the whole work of the Commission in that area would be undermined, a result that could disrupt international financial markets and have a negative impact on the availability and the cost of credit. It was also observed that, in the context of work by the Commission, many States had accepted to change their laws in order to benefit from the harmonization and unification of international trade law. In addition, it was said that the timing of the consideration of the matter by the Commission was most appropriate as the proposed regulation was still in draft form and any comments could still be taken into account. For the reasons mentioned above, coordination was generally considered appropriate and useful.

247. The delegations of Canada and the United States stated that they were jointly taking steps to implement and ratify the United Nations Assignment Convention. In that context, it was stated that those States were examining the differences between the United Nations Assignment Convention and their laws, as well as the changes that they needed to make in their laws (in particular with respect to the definition of "location") to benefit from the uniform law rules of the United Nations Assignment Convention. It was also observed that, in the spirit of coordination, those States looked forward to discussing those issues with other States.

248. The Commission requested the Secretariat to continue cooperating closely with the European Commission to ensure consistency between the proposed Rome I Regulation and the United Nations Assignment Convention.

5. Organization of American States project on security rights registries

249. The Commission noted with interest a new project of OAS with respect to the preparation of rules and regulations for the registration of notices in security rights registries, which could be applied to national, subregional or regional registries that might be utilized by more than one State. It was stated that interested experts, upon invitation by the OAS secretariat, could participate in an Internet-based forum discussing these matters. The Commission requested the Secretariat to follow the OAS project and report to the Commission in due course.

6. World Intellectual Property Organization work on intellectual property financing

250. Recalling its discussion about future work in the field of intellectual property financing (see paras. 81-84 and 86 above), the Commission took note with appreciation of the cooperation between the WIPO secretariat and the UNCITRAL secretariat with respect to intellectual property financing.

7. World Bank manual on secured financing

251. The Commission noted plans by the Investment Climate Unit of the World Bank to prepare a manual on secured transactions and requested the Secretariat to monitor developments and report to the Commission in due course with a view to avoiding duplication of efforts, overlap and conflicts between that text and the draft UNCITRAL legislative guide on secured transactions being prepared by the Commission.

C. Reports of other international organizations**1. International Institute for the Unification of Private Law (Unidroit)**

252. The Commission heard a statement on behalf of Unidroit, reporting on progress with a number of projects, including the following:

(a) The Protocol to the Cape Town Convention on Matters Specific to Aircraft Equipment (Cape Town, 2001)⁴⁴ had entered into force on 1 March 2006 and the registry function under that Convention was operable and being supervised by the International Civil Aviation Organization;

(b) Adoption of the second protocol to the Cape Town Convention, dealing with the financing of railway rolling stock, was expected in early 2007; negotiation of a third protocol, dealing with space assets was continuing; and work on a possible fourth protocol dealing with agricultural, construction and mining equipment was under way;

(c) A third version of the Unidroit Principles of International Commercial Contracts was under consideration, with completion and adoption expected in 2010;

(d) A further meeting of experts on the draft convention on substantive rules regarding intermediated securities (see para. 236 above) was to be held in 2006, with possible adoption or, depending on progress, a further round of consultations, in 2007;

⁴⁴ Available as at the date of the preparation of the present report at <http://www.unidroit.org/english/conventions/mobile-equipment/main.htm>.

(e) A uniform contract law prepared for States parties to the Treaty on the Harmonization of Business Law in Africa⁴⁵ was ready for adoption;

(f) Adoption of a model law on leasing was also foreshadowed (see para. 239 above).

253. The Commission heard that Lithuania had become the sixty-first member of Unidroit.

2. United Nations Convention on Contracts for the International Sale of Goods Advisory Council

254. The Commission heard a presentation from the CISG Advisory Council, a private international initiative aimed at promoting uniform interpretation of the United Nations Sales Convention pursuant to article 7 of the Convention. The Commission heard that advisory opinions of the Council on the Convention were given either on request or at the initiative of the Council itself, with five advisory opinions already having been issued and several more being prepared.

3. Banque des Etats de l'Afrique Centrale

255. The Commission was informed that the Banque des Etats de l'Afrique Centrale was a subregional central bank under the jurisdiction of the Economic and Monetary Community of Central Africa (CEMAC), which included six member States. It was noted that the CEMAC member States were also members of the Organization for the Harmonization of Business Law in Africa (OHADA). The Commission noted that CEMAC and OHADA were undertaking modernization of trade laws, in particular in the areas of insolvency, securities and means of payment and, like other regional legal integration institutions, had a mandate to cooperate with UNCITRAL.

XIV. Congress 2007

256. The Commission recalled that, at its thirty-eighth session, in 2005, it had approved a plan, in the context of the fortieth annual session of the Commission in Vienna, in 2007, to hold a congress similar to the UNCITRAL Congress on Uniform Commercial Law in the Twenty-first Century (New York, 18-22 May 1992).⁴⁶ The Commission had envisaged that the congress would review the results of the past work programme of UNCITRAL, as well as related work of other organizations active in the field of international trade law, assess current work programmes and consider and evaluate topics for future work programmes.⁴⁷

257. At its thirty-ninth session, the Commission had before it a proposal by the Secretariat regarding a suggested programme outline for the congress, contained in a conference room paper A/CN.9/XXXIX/CRP.2. It was understood that the congress would not formulate conclusions or collective recommendations but rather that the Commission would be able

⁴⁵ Available as at the date of the preparation of the present report at <http://www.ohada.com/traite.php?categorie=10>.

⁴⁶ For the proceedings of the Congress, see *Uniform Commercial Law in the Twenty-first Century: Proceedings of the Congress of the United Nations Commission on International Trade Law, New York, 18-22 May 1992*, United Nations publication, Sales No. E.94.V.14 (A/CN.9/SER.D/1).

⁴⁷ *Official Records of the General Assembly, Sixtieth Session, Supplement No. 17 (A/60/17)*, para. 231.

to draw inspiration from views expressed at the congress as it deemed appropriate. The Commission welcomed the proposals by the Secretariat and heard expressions of support for the overall concept of the congress. However, concerns were also expressed about the proposed duration of the congress (five days), in particular in view of the overall duration of the Commission's fortieth session (see para. 272 below). Concerns were also expressed that some of the topics outlined for the congress (e.g., corporate governance; foreign investment; methods and institutional arrangements for commercial law reform; and the role of the judiciary in ensuring a stable framework for commercial transactions: predictability of law and legal interpretation) were not directly related to the current work programme of the Commission. The Secretariat was encouraged to consider limiting the number of topics proposed to be covered and to focus on matters directly related to the Commission's line of work. The Commission also encouraged Member States to transmit their views on the proposed programme to the Secretariat, with a view to the finalization of the programme before the end of 2006.

258. The Commission, after having discussed the duration of the congress also in connection with the overall duration of the Commission session, adopted the view that every effort should be made to shorten the duration of the formal deliberations on the agenda at its next session to a maximum of two weeks and that the congress, which should commence after the completion of the formal deliberations in the Commission, should not exceed four days. (For the dates of the Commission's session, including the congress, see para. 272 below).

XV. Relevant General Assembly resolutions

259. The Commission took note with appreciation of General Assembly resolutions 60/20, on the report of the Commission on the work of its thirty-eighth session, and 60/21, on the United Nations Convention on the Use of Electronic Communications in International Contracts, both of 23 November 2005.

260. Particular note was taken of paragraph 4 of General Assembly resolution 60/20, by which the Assembly endorsed the efforts and initiatives of the Commission aimed at increasing coordination of and cooperation on legal activities of international and regional organizations active in the field of international trade law and appealed to those organizations to coordinate their legal activities with those of the Commission.

261. With reference to paragraphs 5 and 6 of resolution 60/20, the Commission appreciated the General Assembly's calls for support by all concerned to the Commission's technical assistance programme and for contributions to the UNCITRAL Trust Fund for Symposia (from which legislative technical assistance was financed) and to the trust fund established to provide travel assistance to developing countries that were members of the Commission to attend the sessions of the Commission and its working groups.

XVI. Other business

A. Willem C. Vis International Commercial Arbitration Moot

262. It was noted that the Institute of International Commercial Law at Pace University School of Law in White Plains, New York, had organized the Thirteenth Willem C. Vis International Commercial Arbitration Moot in Vienna, from 7 to 13 April 2006. As in

previous years, the Moot had been co-sponsored by the Commission. It was noted that legal issues dealt with by the teams of students participating in the Thirteenth Moot had been based on the United Nations Sales Convention, the Arbitration Rules of the Chicago International Dispute Resolution Association,⁴⁸ the Arbitration Model Law and the New York Convention. A total of 156 teams from law schools in 49 countries had participated in the Thirteenth Moot. The best team in oral arguments was that of Queen Mary, University of London, followed by Stetson University, Florida, United States. The Fourteenth Willem C. Vis International Commercial Arbitration Moot would be held in Vienna, from 30 March to 5 April 2007.

263. The Commission heard a report about the history, growth and features of the Moot. Statements were made highlighting the importance of the Moot as a means of introducing law students to the work of UNCITRAL and to its uniform legal texts, in particular in the areas of contract law and arbitration. The Commission noted the positive impact that the Moot had on law students, professors and practitioners around the world. It was widely felt that the annual Moot, with its extensive oral and written competition and its broad international participation, presented an excellent opportunity to disseminate information about UNCITRAL and its legal texts and for teaching international trade law. A suggestion was made that information about the Moot should be more broadly circulated in law schools and universities and that the Moot should be considered as an important part of the UNCITRAL technical assistance programme.

264. The Commission expressed its gratitude to the organizers and sponsors of the Moot, including Pace University, the Austrian Federal Economic Chamber and the Law Faculty of the University of Vienna, for their efforts to make the Moot successful. It was hoped that the international outreach and positive impact of the Moot would continue growing. Special appreciation was expressed to Eric E. Bergsten, former Secretary of the Commission, for the development and direction of the Moot since its inception in 1993-1994.

B. Special event, including the ceremony of the signing of the United Nations Convention on the Use of Electronic Communications in International Contracts

265. The Commission heard a report on the special event that took place on 6 July 2006 at United Nations Headquarters, in New York, which included the ceremony of the signing of the Convention on Electronic Contracts. The Secretariat had organized the event with a view to promoting participation in the Convention and to disseminating information about its provisions.

266. The Commission expressed its appreciation to the Governments of China, Singapore and Sri Lanka for having signed the Convention, and to the Governments of Colombia, Iran (Islamic Republic of), Mexico, Paraguay, Russian Federation, Spain and the United States for the expressions of strong support for the Convention made during the special event.

⁴⁸ Available as at the date of the preparation of the present report at <http://www.cidra.org/rules.htm>.

C. Internship

267. An oral report was presented on the internship programme in the Commission's secretariat. While general appreciation was expressed for the programme, it was observed that only a small proportion of interns originated from developing countries. A suggestion was made that consideration should be given to establishing the financial means of supporting wider participation by young lawyers from developing countries, possibly by way of a trust fund, which could be established by the General Assembly.

D. Bibliography

268. The Commission noted with appreciation the bibliography of recent writings related to its work (A/CN.9/602). The Commission was informed that the bibliography was being updated on the UNCITRAL website on an ongoing basis. The Commission stressed that it was important for the bibliography to be as complete as possible and, for that reason, requested Governments, academic institutions, other relevant organizations and individual authors to send copies of relevant publications to the UNCITRAL secretariat.

XVII. Date and place of future meetings

A. General discussion on the duration of sessions

269. At its thirty-sixth session, in 2003, the Commission agreed (a) that working groups should normally meet for a one-week session twice a year; (b) that extra time, if required, could be allocated from the unused entitlement of another working group provided that such arrangement would not result in the increase of the total number of 12 weeks of conference services per year currently allotted to sessions of all six working groups of the Commission; and (c) that if any request by a working group for extra time would result in the increase of the 12-week allotment, it should be reviewed by the Commission, with proper justification being given by that working group regarding the reasons for which a change in the meeting pattern was needed.⁴⁹

270. In view of the magnitude and complexities of the project before Working Group III (Transport Law), the Commission decided to authorize two week sessions of the Working Group to be held in the autumn of 2006 and the spring of 2007 (see para. 273 (c) below), utilizing the entitlement of Working Group IV (Electronic Commerce), which would not meet before the Commission's fortieth session (see para. 273 (d) below).

271. In the light of the new project in the area of insolvency law to be undertaken by Working Group V (Insolvency Law) (see para. 209 above), the Commission agreed that the Working Group would meet for its thirty-first and thirty-second sessions in the autumn of 2006 and in the spring of 2007 (see para. 273 (e) below). In addition, the Commission noted that tentative arrangements had been made for a session in the autumn of 2007 (see para. 274 (d) below), which could be used to accommodate the need for a session of either Working Group V (Insolvency Law) or of Working Group IV (Electronic Commerce), depending on the needs of the working groups and subject to the Commission's decision at its next session, in 2007. The Commission further noted that the resulted saving of one

⁴⁹ *Official Records of the General Assembly, Fifty-eighth Session, Supplement No. 17 (A/58/17)*, para. 275.

week of conference services in the autumn of 2007 would allow holding the twentieth session of Working Group III (Transport Law) for two weeks (see para. 274 (c) below).

B. Fortieth session of the Commission

272. The Commission approved the holding of its fortieth session in Vienna, from 25 June to 12 July 2007. It was agreed that the congress (see paras. 256-258 above) would be held during the last week of the session, from 9 to 12 July 2007.

C. Sessions of working groups up to the fortieth session of the Commission

273. The Commission approved the following schedule of meetings for its working groups:

(a) Working Group I (Procurement) would hold its tenth session in Vienna from 25 to 29 September 2006 and its eleventh session in New York from 21 to 25 May 2007;

(b) Working Group II (Arbitration and Conciliation) would hold its forty-fifth session in Vienna from 11 to 15 September 2006 and its forty-sixth session in New York from 5 to 9 February 2007;

(c) Working Group III (Transport Law) would hold its eighteenth session in Vienna from 6 to 17 November 2006 and its nineteenth session in New York from 16 to 27 April 2007;

(d) No session of Working Group IV (Electronic Commerce) was envisaged;

(e) Working Group V (Insolvency Law) would hold its thirty-first session in Vienna from 11 to 15 December 2006 and its thirty-second session in New York from 14 to 18 May 2007;

(f) Working Group VI (Security Interests) would hold its eleventh session in Vienna from 4 to 8 December 2006 and its twelfth session in New York from 12 to 16 February 2007.

D. Sessions of working groups in 2007 after the fortieth session of the Commission

274. The Commission noted that tentative arrangements had been made for working group meetings in 2007 after its fortieth session (the arrangements were subject to the approval of the Commission at its fortieth session):

(a) Working Group I (Procurement) would hold its twelfth session in Vienna from 3 to 7 September 2007;

(b) Working Group II (Arbitration and Conciliation) would hold its forty-seventh session in Vienna from 10 to 14 September 2007;

(c) Working Group III (Transport Law) would hold its twentieth session in Vienna from 15 to 25 October 2007 (the United Nations offices in Vienna would be closed on 26 October);

(d) Tentative arrangements had been made for a session to be held in Vienna from 5 to 9 November 2007, which could be used for the forty-fifth session of Working

Group IV (Electronic Commerce) or for the thirty-third session of Working Group V (Insolvency Law) (see para. 271 above);

(e) Working Group VI (Security Interests) would hold its thirteenth session in Vienna from 24 to 28 September 2007.

the report of UNCITRAL on its thirty-ninth session (A/61/17).

C. General Assembly: Report of the Sixth Committee on the report of the United Nations Commission on International Trade Law on the work of its thirty-ninth session (A/61/453)

Rapporteur: Mr. Mamadou Moustapha Loum (Senegal)

I. Introduction

1. At its 2nd plenary meeting, on 13 September 2006, the General Assembly, on the recommendation of the General Committee, decided to include in the agenda of its sixty-first session the item entitled “Report of the United Nations Commission on International Trade Law on the work of its thirty-ninth session” and to allocate it to the Sixth Committee.
2. The Sixth Committee considered the item at its 1st, 2nd and 15th meetings, on 10, 11 and 30 October 2006. The views of the representatives who spoke during the Committee’s consideration of the item are reflected in the relevant summary records (A/C.6/61/SR.1, 2 and 15).
3. For its consideration of the item, the Committee had before it the report of the United Nations Commission on International Trade Law on the work of its thirty-ninth session.¹
4. At the 1st meeting, on 10 October, the Chairman of the United Nations Commission on International Trade Law at its thirty-ninth session introduced the report of the Commission on the work of that session.

II. Consideration of Proposals

A. Draft resolution A/C.6/61/L.7

5. At the 15th meeting, on 30 October, the representative of Austria, on behalf of Albania, Algeria, Argentina, Australia, Austria, Azerbaijan, Belarus, Belgium, Belize, Brazil, Bulgaria, Canada, Chile, China, Colombia, Croatia, Cyprus, the Czech Republic, the Democratic Republic of the Congo, Denmark, Estonia, Ethiopia, Finland, France, Germany, Greece, Hungary, India, Iran (Islamic Republic of), Ireland, Israel, Italy, Japan, Jordan, Kenya, Latvia, Liechtenstein, Lithuania, Luxembourg, Madagascar, Malaysia, Malta, Mexico, Mongolia, the Netherlands, Norway, the Philippines, Poland, Portugal, Romania, the Russian Federation, Serbia, Sierra Leone, Singapore, Slovakia, Slovenia, Spain, Sri Lanka, Sweden, Switzerland, Thailand, the former Yugoslav Republic of Macedonia, Trinidad and Tobago, Tunisia, Turkey, Uganda, Ukraine, the United Kingdom of Great Britain and Northern Ireland and Uruguay, subsequently joined by Morocco, introduced and orally revised a draft resolution entitled “Report of the United Nations Commission on International Trade Law on the work of its thirty-ninth session” (A/C.6/61/L.7).
6. At its 15th meeting, on 30 October, the Committee adopted draft resolution A/C.6/61/L.7, as orally revised, without a vote (see para. 9, draft resolution I).

¹ *Official Records of the General Assembly, Sixtieth Session, Supplement No. 17 (A/60/17).*

B. Draft resolution A/C.6/61/L.8

7. At the 15th meeting, on 30 October, the representative of Malaysia introduced a draft resolution entitled “Revised articles of the Model Law on International Commercial Arbitration of the United Nations Commission on International Trade Law, and the recommendation regarding the interpretation of article II, paragraph 2, and article VII, paragraph 1, of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards, done at New York on 10 June 1958” (A/C.6/61/L.8).

8. At its 15th meeting, on 30 October, the Committee adopted draft resolution A/C.6/61/L.8 without a vote (see para. 9, draft resolution II).

III. Recommendations of the Sixth Committee

9. The Sixth Committee recommends to the General Assembly the adoption of the following draft resolutions:

[The text of the draft resolutions is not reproduced in this section. The draft resolutions were adopted, with editorial changes, as General Assembly resolutions 61/32 and 61/33 (see section D below).]

D. General Assembly resolutions 61/32 and 61/33 of 4 December 2006

Resolutions adopted by the General Assembly on the report of the Sixth Committee (A/61/453)

61/32. Report of the United Nations Commission on International Trade Law on the work of its thirty-ninth session

The General Assembly,

Recalling its resolution 2205 (XXI) of 17 December 1966, by which it established the United Nations Commission on International Trade Law with a mandate to further the progressive harmonization and unification of the law of international trade and in that respect to bear in mind the interests of all peoples, in particular those of developing countries, in the extensive development of international trade,

Reaffirming its belief that the progressive modernization and harmonization of international trade law, in reducing or removing legal obstacles to the flow of international trade, especially those affecting the developing countries, would contribute significantly to universal economic cooperation among all States on a basis of equality, equity and common interest and to the elimination of discrimination in international trade and, thereby, to the well-being of all peoples,

Having considered the report of the Commission on the work of its thirty-ninth session,¹

Reiterating its concern that activities undertaken by other bodies in the field of international trade law without adequate coordination with the Commission might lead to undesirable duplication of efforts and would not be in keeping with the aim of promoting efficiency, consistency and coherence in the unification and harmonization of international trade law,

Reaffirming the mandate of the Commission, as the core legal body within the United Nations system in the field of international trade law, to coordinate legal activities in this field, in particular to avoid duplication of efforts, including among organizations formulating rules of international trade, and to promote efficiency, consistency and coherence in the modernization and harmonization of international trade law, and to continue, through its secretariat, to maintain close cooperation with other international organs and organizations, including regional organizations, active in the field of international trade law,

1. *Takes note with appreciation* of the report of the United Nations Commission on International Trade Law on the work of its thirty-ninth session;¹

2. *Commends* the Commission for the finalization and adoption of revised articles² of the Model Law on International Commercial Arbitration of the United Nations Commission on International Trade Law³ on the form of the arbitration agreement and interim measures, and of the recommendation regarding the interpretation of article II,

¹ *Official Records of the General Assembly, Sixty-first Session, Supplement No. 17 (A/61/17).*

² *Ibid.*, chap. IV, para. 181, and annex I.

³ *Ibid.*, *Fortieth Session, Supplement No. 17 (A/40/17)*, annex I.

paragraph 2, and article VII, paragraph 1,⁴ of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards, done at New York, 10 June 1958;⁵

3. *Also commends* the Commission for the approval of the substance of the recommendations of the draft legislative guide on secured transactions, which has been designed to facilitate secured financing, thus promoting increased access to low-cost credit and enhancing national and international trade;

4. *Welcomes* the progress made by the Commission in its work on a revision of its Model Law on Procurement of Goods, Construction and Services,⁶ and on a draft instrument on transport law, and endorses the decision of the Commission to take up new topics in the areas of arbitration and insolvency law;

5. *Endorses* the efforts and initiatives of the Commission, as the core legal body within the United Nations system in the field of international trade law, aimed at increasing coordination of and cooperation on legal activities of international and regional organizations active in the field of international trade law, as well as promoting the rule of law at the national and international levels in this field, and in this regard appeals to relevant international and regional organizations to coordinate their legal activities with those of the Commission, to avoid duplication of efforts and to promote efficiency, consistency and coherence in the modernization and harmonization of international trade law;

6. *Reaffirms* the importance, in particular for developing countries, of the work of the Commission concerned with technical assistance and cooperation in the field of international trade law reform and development, and in this connection:

(a) *Welcomes* the initiatives of the Commission towards expanding, through its secretariat, its technical assistance and cooperation programme;

(b) *Expresses* its appreciation to the Commission for carrying out technical assistance and cooperation activities in Belarus, Benin (for the United Nations Conference on Trade and Development/World Trade Organization International Trade Centre seminar), Colombia, Egypt, the Republic of Korea, Singapore, Slovakia and Switzerland (for the United Nations Conference on Trade and Development/World Trade Organization International Trade Centre symposium on multilateral trade treaties and developing countries) and for providing assistance with legislative drafting in the field of international trade law to China, Georgia, Greece, Malaysia, Peru, Rwanda (through the joint project with the International Law Institute), Serbia, Slovenia and the former Yugoslav Republic of Macedonia, and to the Commonwealth Telecommunications Organisation;

(c) *Expresses* its appreciation to the Governments whose contributions enabled the technical assistance and cooperation activities to take place, and appeals to Governments, the relevant bodies of the United Nations system, organizations, institutions and individuals to make voluntary contributions to the United Nations Commission on International Trade Law Trust Fund for Symposia and, where appropriate, to the financing of special projects, and otherwise to assist the secretariat of the Commission in carrying out technical assistance activities, in particular in developing countries;

(d) *Reiterates* its appeal to the United Nations Development Programme and other bodies responsible for development assistance, such as the World Bank and regional

⁴ Ibid., *Sixty-first Session, Supplement No. 17* (A/61/17), chap. IV, para. 181, and annex II.

⁵ United Nations, *Treaty Series*, vol. 330, No. 4739.

⁶ *Official Records of the General Assembly, Forty-ninth Session, Supplement No. 17* and corrigendum (A/49/17 and Corr.1), annex I.

development banks, as well as to Governments in their bilateral aid programmes, to support the technical assistance programme of the Commission and to cooperate and coordinate their activities with those of the Commission, in the light of the relevance and importance of the work and programmes of the Commission to the implementation of the United Nations development agenda, including the achievement of the Millennium Development Goals;

7. *Takes note with regret* that, since the thirty-sixth session of the Commission, no contributions have been made to the trust fund established to provide travel assistance to developing countries that are members of the Commission, at their request and in consultation with the Secretary-General,⁷ stresses the need for contributions to the trust fund in order to increase expert representation from developing countries at sessions of the Commission and its working groups, necessary to build local expertise and capacities in the field of international trade law in those countries to facilitate the development of international trade and the promotion of foreign investment, and reiterates its appeal to Governments, the relevant bodies of the United Nations system, organizations, institutions and individuals to make voluntary contributions to the trust fund;

8. *Decides*, in order to ensure full participation by all Member States in the sessions of the Commission and its working groups, to continue, in the competent Main Committee during the sixty-first session of the General Assembly, its consideration of granting travel assistance to the least developed countries that are members of the Commission, at their request and in consultation with the Secretary-General;

9. *Recalls* that the responsibility for the work of the Commission lies with the meetings of the Commission and its intergovernmental working groups, and stresses in this regard that information should be provided regarding meetings of experts, which bring an essential contribution to the work of the Commission;

10. *Recalls* its resolutions on partnerships between the United Nations and non-State actors, in particular the private sector,⁸ and in this regard encourages the Commission to further explore different approaches to the use of partnerships with non-State actors in the implementation of its mandate, in particular in the area of technical assistance, in accordance with the applicable principles and guidelines and in cooperation and coordination with other relevant offices of the Secretariat, including the Global Compact Office;

11. *Reiterates its request* to the Secretary-General, in conformity with the General Assembly resolutions on documentation-related matters,⁹ which, in particular, emphasize that any reduction in the length of documents should not adversely affect either the quality of the presentation or the substance of the documents, to bear in mind the particular characteristics of the mandate and work of the Commission in implementing page limits with respect to the documentation of the Commission;

12. *Requests* the Secretary-General to continue providing summary records of the meetings of the Commission relating to the formulation of normative texts;

13. *Recalls* its resolution approving the establishment of the *Yearbook of the United Nations Commission on International Trade Law*, with the aim of making the work of the Commission more widely known and readily available,¹⁰ expresses its concern

⁷ Resolution 48/32, para. 5.

⁸ Resolutions 55/215, 56/76, 58/129 and 60/215.

⁹ Resolutions 52/214, sect. B, 57/283 B, sect. III, and 58/250, sect. III.

¹⁰ Resolution 2502 (XXIV), para. 7.

regarding the timeliness of the publication of the *Yearbook*, and requests the Secretary-General to explore options to facilitate the timely publication of the *Yearbook*;

14. *Stresses* the importance of bringing into effect the conventions emanating from the work of the Commission for the global unification and harmonization of international trade law, and to this end urges States that have not yet done so to consider signing, ratifying or acceding to those conventions;

15. *Welcomes* the preparation of digests of case law relating to the texts of the Commission, such as a digest of case law relating to the United Nations Convention on Contracts for the International Sale of Goods¹¹ and a digest of case law relating to the Model Law on International Commercial Arbitration of the United Nations Commission on International Trade Law,³ with the aim of assisting in dissemination of information on those texts and promoting their use, enactment and uniform interpretation;

16. *Welcomes also* the decision of the Commission to hold, in the context of its fortieth session in 2007, a congress on international trade law in Vienna, with a view to reviewing the results of the past work of the Commission as well as related work of other organizations active in the field of international trade law, assessing current work programmes and considering topics and areas for future work, and acknowledges the importance of holding such a congress for the coordination and promotion of activities aimed at the modernization and harmonization of international trade law;

17. *Recalls* its resolutions affirming the importance of high-quality, user-friendly and cost-effective United Nations websites and the need for their multilingual development, maintenance and enrichment,¹² commends the restructured website of the Commission in the six official languages of the United Nations, and welcomes the continuous efforts of the Commission to maintain and improve its website in accordance with the applicable guidelines.

*64th plenary meeting

¹¹ United Nations, *Treaty Series*, vol. 1489, No. 25567.

¹² Resolutions 52/214, sect. C, para. 3; 55/222, sect. III, para. 12; 56/64 B, sect. X; 57/130 B, sect. X; 58/101 B, sect. V, paras. 61-76; 59/126 B, sect. V, paras. 76-95; and 60/109 B, sect. IV, paras. 66-80.

61/33. Revised articles of the Model Law on International Commercial Arbitration of the United Nations Commission on International Trade Law, and the recommendation regarding the interpretation of article II, paragraph 2, and article VII, paragraph 1, of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards, done at New York, 10 June 1958

The General Assembly,

Recognizing the value of arbitration as a method of settling disputes arising in the context of international commercial relations,

Recalling its resolution 40/72 of 11 December 1985 regarding the Model Law on International Commercial Arbitration,¹³

Recognizing the need for provisions in the Model Law to conform to current practices in international trade and modern means of contracting with regard to the form of the arbitration agreement and the granting of interim measures,

Believing that revised articles of the Model Law on the form of the arbitration agreement and interim measures reflecting those current practices will significantly enhance the operation of the Model Law,

Noting that the preparation of the revised articles of the Model Law on the form of the arbitration agreement and interim measures was the subject of due deliberation and extensive consultations with Governments and interested circles and would contribute significantly to the establishment of a harmonized legal framework for a fair and efficient settlement of international commercial disputes,

Believing that, in connection with the modernization of articles of the Model Law, the promotion of a uniform interpretation and application of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards, done at New York, 10 June 1958,¹⁴ is particularly timely,

1. *Expresses its appreciation* to the United Nations Commission on International Trade Law for formulating and adopting the revised articles of its Model Law on International Commercial Arbitration on the form of the arbitration agreement and interim measures, the text of which is contained in annex I to the report of the United Nations Commission on International Trade Law on the work of its thirty-ninth session,¹⁵ and recommends that all States give favourable consideration to the enactment of the revised articles of the Model Law, or the revised Model Law on International Commercial Arbitration of the United Nations Commission on International Trade Law, when they enact or revise their laws, in view of the desirability of uniformity of the law of arbitral procedures and the specific needs of international commercial arbitration practice;

2. *Also expresses its appreciation* to the United Nations Commission on International Trade Law for formulating and adopting the recommendation regarding the interpretation of article II, paragraph 2, and article VII, paragraph 1, of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards, done at New York,

Intellectual property rights (A/CN.9/WG.VI/WP.21, rec. 3 (h) and A/CN.9/WG.VI/WP.22/Add.1, paras. 13, 14 and 21 (dd)).	70-74
Proceeds from drawings under independent undertakings (A/CN.9/WG.VI/WP.22/Add.1, para. 21 (y), (z), (aa) and (bb), A/CN.9/WG.VI/WP.21, rec. 25, A/CN.9/WG.VI/WP.21/Add.1, recs. 49 and 62, A/CN.9/WG.VI/WP.21/Add.2, rec. 106, and A/CN.9/WG.VI/WP.21/Add.5, rec. 138)	75-83
Chapter XI. Conflict of laws (A/CN.9/WG.VI/WP.21/Add.5, recs. 136-149)	84-110
Chapter IX. Insolvency (A/CN.9/WG.VI/WP.21/Add.3).	111-114
Negotiable instruments and negotiable documents (A/CN.9/WG.VI/WP.22/Add.1, para. 21 (w) and (x), and A/CN.9/WG.VI/WP.21, recs. 3 (d) and 24)	115-117
V. Future work.	118

I. Introduction

1. At its present session, Working Group VI continued its work on the preparation of a legislative guide on secured transactions pursuant to a decision taken by the Commission at its thirty-fourth session, in 2001.¹ The Commission's decision to undertake work in the area of secured credit law was taken in response to the need for an efficient legal regime that would remove legal obstacles to secured credit and could thus have a beneficial impact on the availability and the cost of credit.²

II. Organization of the session

2. The Working Group, which was composed of all States members of the Commission, held its eighth session in Vienna from 5 to 9 September 2005. The session was attended by representatives of the following States members of the Working Group: Algeria, Argentina, Austria, Belarus, Belgium, Brazil, Cameroon, Canada, Colombia, Czech Republic, France, Germany, India, Iran (Islamic Republic of), Italy, Japan, Mexico, Poland, Republic of Korea, Russian Federation, Spain, Sweden, Switzerland, Thailand, Tunisia, Uganda and United States of America.

3. The session was attended by observers from the following States: Dominican Republic, Greece, Hungary, Indonesia, Iraq, Ireland, Latvia, Malaysia, Peru, Philippines, Romania, Senegal and Slovakia.

4. The session was also attended by observers from the following international organizations:

(a) *United Nations system*: International Monetary Fund, World Bank and World Intellectual Property Organization; and

(b) *International non-governmental organizations invited by the Commission*: American Bar Association, Center for International Legal Studies, Commercial Finance Association, EUROPAFACTORING, Forum for International Arbitration, International Federation of Insolvency Practitioners, Hague Conference on Private International Law, International Chamber of Commerce, International Insolvency Institute, International Swaps and Derivatives Association, International Working Group on European Security Rights, Max-Planck-Institute for Foreign and Private International Law, the Association of the Bar of the City of New York, the Cairo Regional Centre for International Commercial Arbitration and the European Law Student's Association.

¹ *Official Records of the General Assembly, Fifty-sixth Session, Supplement No. 17* and corrigendum (A/56/17 and Corr.3), para. 358. For a history of the project, see A/CN.9/WG.VI/WP.22. The reports of the first to the seventh sessions of the Working Group are contained in documents A/CN.9/512, A/CN.9/531, A/CN.9/532, A/CN.9/543 and A/CN.9/549, A/CN.9/570 and A/CN.9/574. The reports of the first and the second joint sessions of Working Group V (Insolvency Law) and VI (Security Interests) are contained in documents A/CN.9/535 and A/CN.9/550. The consideration of those reports by the Commission is reflected in documents A/57/17 (paras. 202-204), A/58/17 (paras. 217-222), A/59/17 (paras. 75-78) and A/60/17 (paras. 185-187).

² *Ibid.*, *Fifty-fifth Session, Supplement No. 17* (A/55/17), para. 455, and *Fifty-sixth Session, Supplement No. 17* and corrigendum (A/56/17 and Corr.3), para. 347.

5. The Working Group elected the following officers:
Chairman: Ms. Kathryn SABO (Canada)
Rapporteur: Mr. Madhukar Rangnath UMARJI (India).
6. The Working Group had before it the following documents: A/CN.9/WG.VI/WP.21 and Addenda 1 to 5 (Recommendations), A/CN.9/WG.VI/WP.22 (Background remarks) and A/CN.9/WG.VI/WP.22/Add.1 (Introduction and key objectives).
7. The Working Group adopted the following agenda:
 1. Opening of the session and scheduling of meetings.
 2. Election of officers.
 3. Adoption of the agenda.
 4. Preparation of legislative guide on secured transactions.
 5. Other business.
 6. Adoption of the report.

III. Deliberations and decisions

8. The Working Group considered recommendations in chapters VII (Pre-default rights and obligations), VIII (Default and enforcement), IX (Insolvency), X (Acquisition financing) and XI (Conflict of laws). It also considered terminology and recommendations related to: (i) negotiable instruments and negotiable documents (definitions (w) and (x), as well as recommendations 3 (d) and 24); (ii) proceeds from a drawing under an independent undertaking (definitions (y), (z), (aa) and (bb), as well as recommendations 25, 49, 62, 106 and 138); and intellectual property rights (definition (dd), and recommendation 3 (h)). The deliberations and decisions of the Working Group are set forth below in chapter IV. The Secretariat was requested to revise those chapters, definitions and asset-specific recommendations to reflect the deliberations and decisions of the Working Group.

IV. Preparation of a legislative guide on secured transactions

Chapter VIII. Default and enforcement (A/CN.9/WG.VI/WP.22/Add.2, reccs. 88-124)

Purpose

9. The Working Group approved the substance of the purpose section unchanged.

Recommendation 88 (scope)

10. Differing views were expressed as to whether recommendation 88 should be retained. One view was that the rule in recommendation 88 was superfluous and confusing, as the draft Guide would, in any case, apply to security devices and only where so provided by way of exception to non-security devices. Another view was that recommendation 88 was useful in that it drew a distinction between situations where the grantor was not liable for a deficiency and situations where the grantor was liable, which,

if it were not made clear in recommendation 88, would need to be made clear in several recommendations in that chapter. The Working Group decided to review that matter once it had completed its consideration of the chapter on default and enforcement.

Recommendation 89 (general standard of conduct)

11. The Working Group approved the substance of recommendation 89 unchanged and decided to consider its application to other chapters of the draft Guide in the context of its discussion of each of those chapters.

Recommendations 90 and 91 (party autonomy)

12. It was agreed that the words “at any time” should be added at the end of the first sentence of recommendation 90. Subject to that change, the Working Group approved the substance of recommendation 90.

13. While there was broad support for the substance of recommendation 91, differing views were expressed as to whether recommendation 91 should also provide that a disposition in accordance with a method provided for in the security agreement was commercially reasonable unless the objecting party established that it was manifestly unreasonable. One view was that such a provision would be useful in that it would provide *ex ante* certainty (i.e. advance certainty before the conclusion of an agreement) in referring to the agreement of the parties in particular for methods of disposition about the reasonableness of which there might be some doubt, at least for a court looking at the matter once a dispute had arisen. Another view was that such a provision would be harmful in that it would change not only the burden of proof but also the general standard of conduct established in recommendation 89 and would be difficult to apply. After discussion, the Working Group approved the substance of recommendation 91 unchanged.

Recommendations 92 (rights and remedies after default), 93 (secured creditor remedies) and 94 (grantor remedies)

14. It was agreed that, at the beginning of recommendations 92 to 94, language along the following lines should be added: “As more specifically provided in subsequent recommendations of this Chapter”. Subject to that change, the Working Group approved the substance of recommendations 92 to 94.

Recommendation 95 (election of remedies)

15. The Working Group agreed that the commentary should list situations to which recommendation 95 was intended to apply (including the simultaneous exercise of remedies, for example, against the grantor and against a guarantor). Subject to that clarification to be made in the commentary, the Working Group approved the substance of recommendation 95 unchanged.

Recommendation 96 (other remedies)

16. It was agreed that recommendation 96 should also apply to the converse situation (i.e. where a remedy had been exercised first with respect to the secured obligation). Subject to that change, the Working Group approved the substance of recommendation 96.

Recommendation 97 (release of the encumbered assets after full payment)

17. The Working Group approved the substance of recommendation 97 unchanged.

Recommendation 98 (judicial and extra-judicial enforcement)

18. It was agreed that the change agreed upon with respect to recommendations 92 to 94 (see para. 14 above) should be made also in recommendation 98. In addition, it was agreed that recommendation 98 should also provide for a mixed-process method of enforcement (i.e. partly judicial and partly extra-judicial enforcement). Subject to those changes, the Working Group approved the substance of recommendation 98.

Recommendation 99 (notice of intention to pursue extra-judicial enforcement)

19. Differing views were expressed as to whether recommendation 99 should be retained. One view was that recommendation 99 should be deleted. It was stated that a general advance notice of extra-judicial enforcement would cause unnecessary cost, delay, error and litigation in the case of a good-faith grantor, as such a grantor would be aware of and would comply with its obligations even without such a notice. In addition, it was observed that, in the case of a grantor acting in bad faith, such a general notice could inadvertently result in compromising the ability of the secured creditor to enforce its security right as the grantor could conceal the encumbered assets or move them beyond the reach of the secured creditor. Another view was that recommendation 99 should be retained mainly on the grounds that unnecessary cost, delay, error and litigation would not be caused. It was also stated that a notice of enforcement before repossession of the encumbered assets by the secured creditor would be essential in particular for those jurisdictions in which extra-judicial enforcement was not known. In addition, it was observed that recommendation 99 made no specific recommendation but rather raised a point that the legislator should consider. Moreover, it was said that subparagraph (f) of recommendation 99 provided for an exception in situations in which advance notice might not be useful or might be harmful. After discussion, it was agreed that recommendation 99 should be retained in square brackets.

20. The Working Group next considered whether recommendation 99 should be merged with recommendation 111 on advance notice with respect to extra-judicial disposition of encumbered assets. One view was that, as there was significant overlap between those recommendations, they should be merged. Another view was that, while there was some overlap, there were also significant differences between the two recommendations. It was stated that, unlike recommendation 111, recommendation 99 dealt with notice before repossession of the encumbered assets and with all methods of enforcement. After discussion, the Working Group decided that recommendations 99 and 111 should not be merged.

Recommendation 100 (objections to extra-judicial enforcement)

21. The Working Group approved the substance of recommendation 100 unchanged.

Recommendation 101 (dispossession of the debtor)

22. It was agreed that recommendation 101 should make it clear that it referred to actual possession of tangibles. Subject to that change, the Working Group approved the substance of recommendation 101.

Recommendations 102 and 103 (collection of receivables)

23. It was agreed that recommendation 102 should make it clear that the secured creditor had the right, not only to instruct the account debtor to pay the secured creditor, but also to seek and to obtain payment of a receivable directly from the account debtor. Subject to that change, the Working Group approved the substance of recommendation 102.

24. It was agreed that whether the reference to guarantees in recommendation 103 should be limited to accessory guarantees only would need to be reviewed after the Working Group had the opportunity to consider the recommendations on security rights in proceeds from a drawing under an independent undertaking. Subject to later consideration of that matter, the Working Group approved the substance of recommendation 103.

Recommendations 104 and 105 (negotiable instruments)

25. The Working Group approved the substance of recommendation 104 unchanged. As to recommendation 105, the Working Group approved its substance subject to the same reservation made with respect to recommendation 103 (see para. 24 above).

Recommendation 106 (proceeds from drawings under independent undertakings)

26. The Working Group decided to postpone consideration of recommendation 106 until it had the opportunity to consider at one time all the recommendations dealing with security rights in proceeds from drawings under independent undertakings (see para. 83 below).

Recommendations 107 and 108 (bank accounts)

27. It was agreed that the second sentence of recommendation 107 should be deleted. It was stated that requiring the secured creditor to resort to court proceedings in order to enforce a security right in a bank account where the grantor was a consumer and the security right had been given for consumer purposes might be inconsistent with law applicable to set-off, receivables or even consumer-protection law. Subject to that change, the Working Group approved the substance of recommendation 107.

28. It was agreed that recommendation 108 should provide that a court order would be necessary for the enforcement of a security right in a bank account unless the depository bank consented to enforcement without a court order. Subject to that change, the Working Group approved the substance of recommendation 108.

Recommendation 109 (negotiable documents)

29. It was agreed that recommendation 109 should refer to the rights of a holder of a negotiable document against the issuer or any other person obligated on the document. Subject to that change, the Working Group approved the substance of recommendation 109.

Recommendation 110 (disposition of encumbered assets)

30. Subject to the change made in recommendations 92 to 94 and 98 (see paras. 14 and 18 above), the Working Group approved the substance of recommendation 110.

Recommendations 111 and 112 (advance notice with respect to extra-judicial disposition of encumbered assets)

31. The Working Group considered a proposal to include in recommendation 111 language along the lines of subparagraph (d) of recommendation 99 (registration of notice) for consistency reasons. That proposal was objected to. It was observed that, while registration of the notice referred to in recommendation 99 was a suggestion for consideration rather than a recommendation, such a suggestion was not appropriate in recommendation 111 as it would unnecessarily create the risk of costs, delays, errors and litigation and should be deleted even in recommendation 99. It was also pointed out that, unlike recommendation 99, which was expressed in general terms, recommendation 111 might be reformulated to be more specific. As a matter of drafting, it was suggested that recommendation 111 might be rearranged in separate paragraphs. Subject to those changes, the Working Group approved the substance of recommendation 111.

32. The Working Group approved the substance of recommendation 112 unchanged.

Recommendations 113-115 (acceptance of encumbered assets in satisfaction of the secured obligation)

33. It was agreed that the relationship among recommendations 113, 114 and 115 should be clarified. It was also agreed that registration of the notice with the proposal of the secured creditor to accept the encumbered assets in total or partial satisfaction of the secured obligation in the security rights registry was not necessary, since the grantor and other interested persons could protect their rights by simply objecting to the proposal of the secured creditor.

34. A number of proposals were made. One proposal was that the notice with the proposal of the secured creditor to accept the encumbered assets in total or partial satisfaction of the secured obligation should specify the amount owed and the amount to be paid. It was stated that such specificity would provide the grantor and notified third parties with the information they needed to determine whether to accept or to object to the proposal. It was agreed that the commentary could clarify that a good faith estimate of the amount owed would be sufficient. While some reservation was expressed as to the need for such specificity in the notice on the grounds that, in the absence of sufficient information, the grantor or any notified third party could object and thus deprive the secured creditor of that remedy, there was sufficient support in the Working Group for the proposal.

35. Another proposal was that, in the case of partial satisfaction of the secured obligation, actual consent by the grantor should be required and not just the absence of any objection by the grantor within a short period of time after notice was given. It was stated that actual consent by the grantor might be more appropriate to protect the grantor from the risk of error or misunderstanding of the notice. That proposal did not attract sufficient support. It was stated that there was no reason to require actual consent of the grantor and, if such a requirement were added, it should apply to both the grantor and notified third parties.

36. Yet another proposal was that the last sentence of recommendation 115, providing for a judicial or other official review of the reasonableness of the objections of the grantor and notified third parties, should be deleted. It was stated that acceptance of the encumbered assets by the secured creditor in total or partial satisfaction of the secured obligation was a voluntary, extra-judicial remedy that should not be unnecessarily burdened with the delay and cost involved in any judicial or other official process. In addition, it was observed that the reasonableness of any objection was a practical matter for the parties and not a legal matter to be addressed by a court. While there was some objection mainly on the grounds that recourse to courts should and, in some countries, would, in any case, always be available, the proposal was met with sufficient support by the Working Group.

37. Yet another proposal was that, at least, the secured creditor should be given the right to accept the encumbered assets at a fixed market price even over the objection of the grantor or a notified third party. It was stated that such an approach would not prejudice the rights of the grantor or notified third parties as the secured creditor would, in any case, pay the market price. That proposal was objected to. It was observed that such a provision was unnecessary since, if there were a fixed market price (which should be carefully defined), interested parties would normally accept the proposal of the secured creditor. It was also observed that, if interested parties objected to the proposal, the secured creditor could still sell the encumbered assets at the market price.

38. Yet another proposal was that the last words of the first sentence of recommendation 115 (“but ... dispositions”) should be deleted. It was stated that, if the proposal of the secured creditor to accept the encumbered assets in satisfaction of the secured obligation was found by the grantor or any notified third party to be objectionable, the secured creditor should have all the other available remedies as if the proposal had never been made. There was sufficient support for that proposal.

39. After discussion, subject to the above-mentioned changes, the Working Group approved the substance of recommendations 113 to 115.

Recommendations 116 to 119 (surplus and shortfall)

40. With respect to recommendation 116, it was agreed that the net proceeds (i.e. after deduction of the costs of enforcement) should be applied to the secured obligation. With respect to recommendations 117 and 118, it was agreed that they should be revised to ensure that the priority status of the various competing claimants under the priority rules of the secured transactions law would not be changed as a result of the application of procedural rules. With respect to recommendation 119, it was agreed that it should be revised to ensure that a non-debtor grantor would not be liable for any shortfall. Subject to those changes, the Working Group approved the substance of recommendations 116 to 119.

Recommendation 120 (right of prior-ranking secured creditor to take over enforcement)

41. The Working Group approved the substance of recommendation 120 unchanged. It was suggested that the principle that prior-ranking secured creditors prevailed was a general principle that applied to other rights beyond enforcement and should be included in the general provisions of the draft Guide. The Working Group decided to postpone

consideration of that proposal until it had the opportunity to consider the general provisions of the draft Guide.

Recommendation 121 (title or other right acquired through non-judicial disposition)

42. It was agreed that the commentary should clarify that reference was made in recommendation 121 to “title or other right” since: according to recommendation 110 the secured creditor could “sell, lease, license or otherwise dispose of encumbered assets”; and the encumbered assets themselves might be a partial right as the right of a lessee or a licensee. It was also agreed that the commentary should clarify that the reference to good faith was meant to apply to situations, in which the disposition was not in accordance with the general standard of conduct set forth in recommendation 89, so as to protect the buyer who had no knowledge of that fact. After discussion, the Working Group approved the substance of recommendation 121 unchanged.

Recommendation 122 (title or other right acquired through judicial disposition)

43. The Working Group approved the substance of recommendation 122 unchanged.

Recommendation 123 (intersection of movable and immovable secured transactions law)

44. It was agreed that subparagraph (b) should be revised to provide that, if movables and immovables were disposed of in the same disposition, the movables might be disposed of in accordance with either the law of security rights in movables or the law of security rights in immovables. Subject to that change, the Working Group approved the substance of recommendation 123.

Recommendation 124 (coordination with other law)

45. The Working Group approved the substance of recommendation 124 unchanged.

**Chapter VII. Pre-default rights and obligations of the parties
(A/CN.9/WG.VI/WP.21/Add.2, recs. 86-87)**

Purpose section

46. The Working Group approved the substance of the purpose section unchanged.

Recommendation 86 (party autonomy)

47. It was agreed that alternative B of recommendation 86 was preferable and should be placed in the context of the general provisions of the draft Guide as the principle of party autonomy applied throughout the draft Guide. In view of the importance of that principle for the relationship between the parties, it was also agreed that it should be sufficiently elaborated in the commentary of chapter VII. In addition, it was agreed that, to avoid diluting the principle of party autonomy, any exceptions to that principle should be clearly specified, limited and aimed at protecting the grantor. Moreover, despite some doubt initially expressed, it was agreed that the rights of third parties were appropriately set out as the limits of party autonomy. It was also agreed that the general principle of party autonomy should be coordinated with the specific expressions of that principle included in

chapters of the draft Guide (e.g. recommendations 90 and 91). After discussion, the Working Group approved the substance of alternative B of recommendation 86 and decided that alternative A should be deleted.

Recommendation 87 (suppletive rules)

48. The Working Group approved the substance of recommendation 87 unchanged.

**Chapter X. Acquisition financing devices
(A/CN.9/WG.VI/WP.21/Add.4, recs. 125-135)**

Purpose

49. The Working Group approved the substance of subparagraph (a) of the purpose section unchanged. With respect to subparagraph (b), it was agreed that discussion of the alternatives reflected therein be postponed until all the recommendations relating to acquisition financing devices had been considered.

Recommendation 125 (equivalence of acquisition financing devices to security rights)

50. It was agreed that discussion of the alternatives set out in recommendation 125 with respect to the non-unitary approach be postponed until all the recommendations relating to acquisition financing devices had been considered.

Recommendation 126 (creation of acquisition security rights)

51. There was general support in the Working Group for the substance of recommendation 126, which was based on a unitary approach. It was agreed that a parallel recommendation should be prepared for States wishing to follow a non-unitary approach. It was widely felt that, in line with the decision of the Working Group at its seventh session that all providers of acquisition financing should be treated equally (see A/CN.9/574,

para. 35), such recommendation should provide the same requirements and the same results for all aspects of acquisition financing devices. It was also generally felt that, for such recommendation to be readily understood and implemented in States in which retention of title and similar devices were the prevalent functional equivalents of security devices, the recommendation should be based on terminology and concepts familiar in such systems. In that context, it was stated that, in the case of retention of title, both the seller and the buyer might have ownership rights and no one granted a right to the other, and the intent to be bound could be reflected in the general terms and conditions of the seller or the buyer. In the same vein, it was observed that, if the form requirements of a sale with a retention-of-title clause were not met, the seller would remain the owner. Moreover, it was agreed that recommendation 126 should be retained only if it were different from the general recommendation on form requirements (i.e. recommendation 8 in document A/CN.9/WG.VI/WP.21, which remained to be discussed).

Recommendation 127 (effectiveness of acquisition security rights against third parties)

52. There was general agreement in the Working Group with the substance of recommendation 127, which was based on a unitary approach. It was also agreed that a parallel recommendation should be prepared following a non-unitary approach. As to whether the same rule should apply in both cases, differing views were expressed. One view was that, if a non-unitary approach were followed, registration should not be required or, alternatively, a longer grace period should be granted to accommodate retention of title and similar devices. It was stated that registration could add cost and bureaucracy and thus undermine the efficiency of important retention-of-title transactions. However, the prevailing view was that all devices performing security functions should be subject to registration. It was stated that the availability and the cost of credit would be negatively affected if all providers of acquisition financing were not treated equally. It was also observed that the efficiency of any registration system would be seriously compromised if all transactions serving security purposes were not subject to registration. In addition, it was said that registration enhanced transparency, discouraged hidden security rights and promoted certainty in secured financing.

53. As a matter of drafting, it was agreed that the second sentence of recommendation 127 should be revised to ensure that the rights registered were effective not only as against third parties whose rights arose between the time the acquisition security right was created and registration but also as against third parties whose rights were registered subsequently.

54. After discussion, the Working Group, recalling its decision at its seventh session (see A/CN.9/574, para. 46), decided that, whether a State followed a unitary or a non-unitary approach, all acquisition financing devices should be subject to registration and the grace period should be as short as possible.

Recommendation 128 (exceptions to the principle of registration)

55. It was agreed that acquisition financing transactions relating to consumer goods should not be subject to registration, whether the consumer goods had a resale value or not. It was also agreed that that exception did not affect registration in specialized registries or title certificate systems. Subject to those changes, the Working Group approved the substance of recommendation 128.

Recommendation 129 (priority of acquisition security rights over pre-registered non-acquisition security rights in future goods other than inventory)

56. There was general agreement in the Working Group that recommendation 129 was sufficient for the purposes of a unitary approach. As a matter of drafting, in order to avoid confusion with a security right registered before its creation, it was agreed that reference should be made, not to pre-registered security rights, but rather to security rights registered earlier. While some doubt was expressed as to whether subparagraph (i) would be appropriate in the context of a recommendation reflecting the non-unitary approach, it was widely felt that a purchase-money lender and a retention-of-title seller would have super-priority (i.e. priority even over a security right that had been registered earlier) if they retained actual possession of the goods, registered a notice in the security rights registry within a certain period of time after actual delivery of the goods to the grantor or buyer, or upon creation of the security right if no registration was required under recommendation 128 (subject to compliance with any other applicable registration system,

such as for vehicles). Subject to the above-mentioned change, the Working Group approved the substance of recommendation 129 reflecting a unitary approach and requested the Secretariat to draft a parallel recommendation to implement a non-unitary approach.

Recommendations 130 and 131 (priority of acquisition security rights over pre-registered non-acquisition security rights in future inventory)

57. It was agreed that the change made in recommendation 129 (concerning the reference to “pre-registration”) should be made in recommendation 130 as well (see para. 56 above). After discussion, it was also agreed that it was not necessary for the notice to refer to the priority rank of the acquisition security right. It was stated that the notice should be easy for business people to formulate and, in any case, acquisition financiers did not have to give, in essence, to inventory financiers on record legal advice about the priority status of acquisition security rights. Subject to those changes, the Working Group approved the substance of recommendation 130 as part of a unitary approach.

58. It was also agreed that that a parallel recommendation should be prepared for States wishing to follow a non-unitary approach. It was stated that such recommendation would need to deal not with priority but rather with the question whether the retention-of-title seller could set up its ownership rights against third parties (it was clarified that that point applied to recommendation 129 as well).

59. In that connection, the suggestion was made that, in order to avoid creating delays, costs and unnecessary formalities for retention-of-title transactions, they should not be subject to registration or, at least, be subject to registration within a sufficiently long grace period (3-6 months), without treating inventory differently from goods other than inventory. It was stated that registration could undermine retention-of-title transactions that were based on concepts shared by a number of European countries and reflected in European Union legislation. That suggestion was objected to for the same reasons given at the discussion of that matter at the seventh session of the Working Group (see A/CN.9/574, paras. 55 and 56). It was observed that the Working Group should bear in mind the interests of all States and not just of any region in particular. It was also pointed out that law and practice of retention of title differed widely even among countries of the same region, and that European Union legislation on retention of title referred it to national legislation.

60. It was widely felt, however, that, in order to make recommendation 130 more easily understandable to civil law lawyers, the commentary could explain their impact. The commentary could explain, in particular, that, once security rights in future assets were made possible, conflicts that could currently arise only in very few retention-of-title jurisdictions that permitted the sale of future assets with retention of title, could arise between a retention-of-title seller and a lender. The commentary could also explain that, under the system of the draft Guide, retention-of-title sellers would be able to register and notify for a period of five years, covering multiple sales transactions between the same parties, and thus ensure that their rights would be effective against third parties and have priority even over the rights of parties that had made an earlier registration.

61. After discussion, the Working Group approved the substance of recommendation 131 unchanged and requested the Secretariat to prepare a parallel recommendation for a non-unitary approach.

Recommendation 132 (cross-collateralization)

62. It was stated that recommendation 132 dealt with multiple security rights rather than cross-collateralization. It was also observed that recommendation 132 might not be necessary as there was nothing in the draft Guide to suggest that an acquisition financier was not an acquisition financier merely because it also had a non-acquisition security right in the goods covered by the acquisition security right or the acquisition security right also secured other obligations. After discussion, it was agreed that recommendation 132 could be deleted and the matter could be addressed in the commentary.

Recommendation 133 (priority of acquisition security rights in proceeds of inventory)

63. It was agreed that recommendation 133 should make it clear that the notice referred to in the proviso clause with respect to proceeds of inventory could be given at the same time it was given to an inventory financier on record under recommendation 130 (i.e. before actual delivery of the inventory to the grantor). It was also agreed that, in any case, that notice ought to be given no later than the time the proceeds arose.

64. In response to a query, it was stated that, by requiring that notification be given to financiers on record with a right in the same kind of assets as the proceeds, such as receivables, recommendation 133 eased the burden on the searcher who would know to search for security rights in both inventory and receivables of the grantor. It was agreed that the commentary could elaborate on the concept and the effect of the notice.

65. Subject to those changes, the Working Group approved the substance of recommendation 133 and requested the Secretariat to prepare a parallel recommendation following a non-unitary approach, as well as a similar recommendation (without the proviso clause) on priority of security rights in proceeds of equipment.

Recommendation 134 (enforcement)

66. It was agreed that the alternative of recommendation 134 addressing the unitary approach should refer to all remedies of an acquisition financier (including the acceptance of the assets in total or partial satisfaction of the secured obligation and collection of receivables) and not only to the right to repossess and dispose of the assets. Subject to that change, the Working Group approved the substance of the unitary approach-related alternative of recommendation 134.

67. With respect to the alternative of recommendation 134 addressing the non-unitary approach, a number of concerns were expressed. One concern was that the rights and remedies of a retention-of-title seller could not be the same as those of a purchase-money lender. Another concern was that no reference was made to obligations. Yet another concern was that the words “to the maximum extent possible” might not be sufficient to produce the desired equivalence in the treatment of all acquisition financing devices, whether a unitary or a non-unitary approach was followed. Yet another concern was that the current text might not be sufficient for States that might introduce the notion of an acquisition security right for lenders while preserving retention of title for sellers and lessors. In order to address those concerns, several suggestions were made. One suggestion was that the recommendation based on a unitary approach could apply equally to a non-unitary approach. That suggestion was objected to. It was stated that, while the preconditions and the results should be the same, the rights and remedies (or the way to achieve the desired equivalence) were different. Another suggestion was that the

recommendation could read along the following lines: “The law should provide that, in the case of default on the part of the buyer, grantor or financial lessee, an acquisition security right should be enforced in such a manner that: (i) the same principles and objectives as those governing enforcement of security rights generally are complied with; and (ii) the same results are obtained.” As there was sufficient support for that suggestion, the Working Group requested the Secretariat to revise the non-unitary approach-related alternative of recommendation 134 along those lines.

Recommendations on the treatment of acquisition financing devices in the case of insolvency

68. The Working Group decided to defer consideration of the recommendations dealing with acquisition financing devices in the case of insolvency until it had the opportunity to consider all insolvency-related recommendations.

Recommendation 135 (conflict of laws)

69. It was agreed that all conflict-of-laws recommendations should apply to acquisition financing rights, including those relating to security rights in intangibles, so as to cover proceeds of tangibles subject to an acquisition financing right that could be intangibles. Subject to that change, the Working Group approved the substance of recommendation 135.

Intellectual property rights (A/CN.9/WG.VI/WP.21, rec. 3 (h) and A/CN.9/WG.VI/WP.22/Add.1, paras. 13-14 and 21 (dd))

70. The Working Group first considered the question whether security rights in intellectual property rights should be included in the scope of the draft Guide. It was widely felt that intellectual property rights should be included in the scope of the draft Guide. It was stated that it was important to facilitate the use of intellectual property rights as a source of credit and to recognize the growing importance and value of intellectual property rights as business assets, particularly to small- and medium-size enterprises throughout the world. In addition, it was observed that intellectual property rights were so inter-connected with other assets, such as equipment and inventory, that it would be extremely difficult to separate them from those assets and exclude them from the draft Guide. Moreover, it was said that exclusion of intellectual property rights from a secured transactions regime would not only impede access to credit in respect of intellectual property but would also limit the benefits of the draft Guide and leave States with no guidance on security rights in intellectual property rights.

71. On behalf of the World Intellectual Property Organization (WIPO), it was stated that WIPO supported UNCITRAL in that endeavour, and was prepared to provide assistance to the Working Group on the basis of WIPO’s mandate and expertise in the field of intellectual property. In addition, it was observed that intellectual property should be included in the scope of the draft Guide for the reasons mentioned above. However, the issue that needed to be addressed was that the draft Guide made recommendations that might require adjustment so as to avoid a negative impact on intellectual property industry, as well as the finance community, and any conflict following the implementation of the recommendations of the draft Guide on pre-existing intellectual property laws and treaty obligations, and the business practices that had developed over time to give effect to those

laws and obligations. While recognizing the need for modernization of secured transactions laws, WIPO urged the Working Group to be sensitive to the need in doing so to avoid a negative effect on the exercise of intellectual property rights. WIPO recognized the need to give States and legislators guidance on issues of intellectual property and security rights and to review the draft Guide's recommendations to identify where adjustments to those recommendations might be needed, why those adjustments might be necessary and how they might be made. It was observed that that guidance was not given in the draft Guide in its current state.

72. It was, therefore, announced that WIPO would undertake a process of consultation with a specially constituted working group of intellectual property experts at WIPO to report and give guidance to States on intellectual property and security rights, to review the recommendations of the draft Guide to ensure that they were appropriate for intellectual property assets and to suggest adjustments to those recommendations where necessary. In particular, it was mentioned that the WIPO initiative would seek to enhance awareness of the use of intellectual property in secured transactions in countries where familiarity and understanding of those issues was relatively undeveloped. It was also stated that WIPO would communicate with UNCITRAL, to ensure that that cooperation was appropriately managed to ensure that WIPO's work was effectively coordinated with the work of the Working Group, so as to provide maximum assistance and guidance to States in reforming law relating to intellectual property and security rights.

73. After discussion, the Working Group agreed that intellectual property rights should be included in the scope of the draft Guide.

Recommendation 3 (h) (A/CN.9/WG.VI/WP.21)

74. The Working Group next turned to the formulation of recommendation 3 (h), noting that it was discussed in paragraphs 13 and 14 of chapter I, Introduction, while intellectual property rights were defined in paragraph 21 (dd) of chapter I (A/CN.9/WG.VI/WP.22/Add.1). It was generally thought that the recommendation was appropriately formulated to ensure that the draft Guide would generally apply to security rights in intellectual property rights not only without the need for the Working Group to examine the application of each and every recommendation to security rights in intellectual property, which was generally thought to be a task that went beyond the current project, but also without interfering with intellectual property legislation. The suggestion to defer not only to intellectual property law, whether national or international, but also to business practices was not met with support. It was stated that such an unqualified reference to all business practices would be too broad and could inadvertently result in excluding intellectual property rights from secured transactions legislation altogether. It was also observed that, if necessary, reference could be made in the commentary to certain business practices that were generally acceptable, widely used and reflected in legislation. After discussion, the Working Group approved the substance of recommendations 3 (h) unchanged.

**Proceeds from drawings under independent undertakings
(A/CN.9/WG.VI/WP.22/Add.1, para. 21 (y), (z), (aa) and (bb),
A/CN.9/WG.VI/WP.21, rec. 25, A/CN.9/WG.VI/WP.21/Add.1,
recs. 49 and 62, A/CN.9/WG.VI/WP.21/Add.2, rec. 106,
A/CN.9/WG.VI/WP.21/Add.5, rec. 138)**

75. It was generally agreed that the draft Guide should deal with security rights in proceeds from drawings under independent undertakings (i.e. commercial and standby letters of credit and independent guarantees). It was stated that such an approach would reflect the wide acceptance of proceeds of drawings under independent undertakings as a source of credit. In addition, it was observed that the draft Guide would supplement other international efforts to unify the law relating to independent undertakings, particularly the work of the International Chamber of Commerce (ICC). As to the asset that would be subject to the security right, it was agreed that it should not be the independent undertaking itself nor the right to demand payment under an independent undertaking, but rather the right to receive such payment. In that connection, a view was expressed that, while proceeds from drawings under independent undertakings could be addressed in the draft Guide, there was no need to elaborate specific recommendations since the recommendations applicable to general receivables could apply. However, the Working Group noted that the right to receive payment under an independent undertaking should be treated, like the right to receive payment of the balance in a bank account, as a special kind of receivable subject to certain asset-specific recommendations reflecting the needs of parties to the relevant transactions.

Definitions (A/CN.9/WG.VI/WP.22/Add.1, para. 21 (y), (z), (aa) and (bb))

76. The Working Group next turned to the definitions of the relevant terms (see A/CN.9/WG.VI/WP.22/Add.1, para. 21 (y), (z), (aa) and (bb)). It was stated that the words “subject to law other than secured transactions law” in the definition of “independent undertaking” (see A/CN.9/WG.VI/WP.22/Add.1, para. 21 (y)) were not necessary as there was sufficient reference to the relevant body of law and, in any case, the definition was not intended to set forth a rule.

77. A number of proposals were made regarding the definition of the term “proceeds from a drawing under an independent undertaking” (see A/CN.9/WG.VI/WP.22/Add.1, para. 21 (z)). One proposal was that the term “payment made” be replaced by “payment due or to become due”, the words “a deferred payment obligation incurred” be deleted and the words “to be” be added before the word “delivered”. Another proposal was that use of the word “proceeds” in the defined term itself should be replaced by language along the lines “the right to receive payment under an independent undertaking”. It was stated that use of the term “proceeds” might create confusion in view of the fact that it was used in the draft Guide in the sense of “whatever was received in respect of an encumbered asset” (see A/CN.9/WG.VI/WP.22/Add.1, para. 21 (ee)). Yet another proposal was that the term “receivable” could be used instead. In response to both proposals, it was observed that the term “proceeds from the drawing under an independent undertaking” was more familiar to the relevant industry and was used in relevant texts. It was also stated that, in view of the relevant law and practice, use of the term “receivable” would be inappropriate.

78. It was suggested that in the definition of “guarantor/issuer” (see A/CN.9/WG.VI/WP.22/Add.1, para. 21 (aa)) reference should also be made to counter-guarantors.

79. After discussion, the Working Group requested the Secretariat to revise the definitions, taking into account the views expressed and the suggestions made.

Recommendation 25 (A/CN.9/WG.VI/WP.21)

80. There was general support in the Working Group for recommendation 25.

Recommendation 49 (A/CN.9/WG.VI/WP.21/Add.1)

81. A number of suggestions were made. One suggestion was that the definition in the note to recommendation 49 could replace the definition of “control” with respect to independent undertakings (and a similar wording could replace the definition of “control” with respect to bank accounts). Another suggestion was that the definition of “control” should refer to the right to dispose. Yet another suggestion was that a separate recommendation might be necessary to ensure that, irrespective of the creation, third-party effectiveness or priority of a security right in proceeds from the drawing under an independent undertaking, the guarantor/issuer did not have to pay the secured creditor against its will. Yet another suggestion was that subparagraph (d) should be revised since an independent undertaking did not automatically follow the receivable, the payment of which it supported. It was stated that a separate act of transfer was necessary under article 10 (1) of the United Nations Assignment Convention. After discussion, the Working Group requested the Secretariat to revise recommendation 49, taking into account the views expressed and the suggestions made.

Recommendation 62 (A/CN.9/WG.VI/WP.21/Add.1)

82. A number of suggestions were made. One suggestion was that subparagraph (b) should be deleted as acknowledgement was a form of control already covered in subparagraph (a). It was stated that the element of inconsistent acknowledgements could be incorporated in subparagraph (a). Another suggestion was that subparagraph (c) should be limited to situations envisaged in recommendation 49 (b) in which possession was a condition to payment. Yet another suggestion was that, if registration were to be preserved as a method of achieving third-party effectiveness, a priority rule should be introduced in recommendation 62 to address the priority of registered security rights. Yet another suggestion was that subparagraph (d) should be deleted since a fundamental aspect of the independent character of an undertaking was that it did not follow the receivables the payment of which it supported. It was stated, however, that the expectation of the parties would be that supporting obligations would follow the receivable. In an effort to bridge the gap between those views, it was observed that in either case, absent its consent, the guarantor/issuer or nominated person would not have to pay the secured creditor, as provided in recommendation 106 (A/CN.9/WG.VI/WP.21/Add.2). In that connection, it was suggested that recommendation 106 should be recast as a principle of general application even outside enforcement. After discussion, the Working Group requested the Secretariat to revise recommendation 62, taking into account the views expressed and the suggestions made.

Recommendation 106 (A/CN.9/WG.VI/WP.21/Add.2)

83. There was general support in the Working Group for the substance of recommendation 106. The suggestion to recast it as a general principle applicable to all chapters of the draft Guide was reiterated.

Chapter XI. Conflict of laws (A/CN.9/WG.VI/WP.21/Add.5, recs. 136-149)**Purpose**

84. It was agreed that the words “as appropriate” in the second paragraph of the purpose section should be deleted. It was also agreed that the examples given in that paragraph should be separated as transfer of title was a security right in both unitary and non-unitary systems, while the situation was different with respect to retention of title and financial leases in a non-unitary system.

Recommendation 136 (security rights in tangible property)

85. The Working Group agreed that recommendation 136 appropriately applied to security rights in negotiable instruments and negotiable documents. It was suggested, however, that the third-party effectiveness of a non-possessory security right in a negotiable instrument should be subject to the law of the State of the grantor’s location (i.e. the law provided for in recommendation 137). It was widely felt that that approach was appropriate, since a secured creditor could refer to the law of one jurisdiction to make effective against third parties security rights in negotiable instruments issued in various countries.

86. The suggestion was made that recommendation 136 should be reformulated to refer to the law of the location of the asset all issues relating to a security right and not just its creation, third-party effectiveness and priority. It was stated that exceptions should be limited and clearly stated. There was no sufficient support for that suggestion. It was observed that the draft Guide was divided in those categories of issues. It was also said that any issue not covered in recommendation 136 (e.g. enforcement) was addressed in subsequent recommendations (e.g. 149).

87. With respect to mobile assets, it was observed that the rule in the second sentence of recommendation 136 would not apply if they were subject to specialized registration systems, which, as provided in the third-party effectiveness chapter, were to be preserved.

88. After discussion, the Working Group approved the substance of recommendation 136 unchanged, and requested the Secretariat to include in the commentary appropriate explanation of the matters addressed above. The Secretariat was also requested to prepare a draft recommendation referring the third-party effectiveness of a non-possessory security right in a negotiable instrument to the law of the grantor’s location.

Recommendation 137 (security rights in intangible property)

89. It was questioned whether recommendation 137 should apply to intellectual property rights. It was agreed that the commentary could clarify that matter. On behalf of WIPO, it was stated that recommendation 137 was among the recommendations that required

adjustments so as to apply to intellectual property rights. After discussion, the Working Group approved the substance of recommendation 137 unchanged.

Recommendation 138 (security rights in proceeds from a drawing under an independent undertaking)

90. A number of suggestions were made. One suggestion was that the reference to enforcement in subparagraph (a) should be deleted. It was stated that the enforcement of a security right in proceeds from a drawing under an independent undertaking should be subject to the law applicable to enforcement (recommendation 149), and not to the law of the grantor's location. Another suggestion was that subparagraph (b) should be recast as a recommendation dealing with the law applicable to the obligations of the guarantor/issuer or nominated person and coordinated with subparagraph (c). It was stated that the new provision should track, to the extent possible, the language of recommendation 148 dealing with the relationship between the account debtor and the assignee. Yet another suggestion was that a recommendation along the lines of recommendation 140 should be prepared for security rights in proceeds from a drawing under an independent undertaking. After discussion, the Working Group requested the Secretariat to revise recommendation 138, taking into account the views expressed and the suggestions made.

Recommendations 139 and 140 (security rights in bank accounts)

91. Differing views were expressed with regard to the alternatives presented in recommendation 139. In support of alternative A, it was stated that the rule applicable to securities under the Hague Convention on the Law Applicable to Certain Rights in Respect of Securities Held With an Intermediary (i.e. the law governing the account) was preferable since bank accounts and securities accounts were very similar and it was difficult to distinguish between the two particularly when a bank provided both services to its customers. In addition, it was observed that such an approach would provide certainty and predictability as lenders would expect to receive a copy of the account agreement (or even obtain a control agreement) before extending credit on the basis of a bank account. Moreover, it was said that alternative C (the law of the location of the bank where the account was held and the "closest connection" test) would cause uncertainty as there was no universally acceptable system to locate bank accounts and the closest connection test was vague. It was also mentioned that application of the law governing the bank account would not cause any changes in practice since banks already applied that rule with respect to securities accounts.

92. In favour of alternative C, it was stated that the law applicable to security rights in bank accounts should be different from the law applicable to such rights in securities accounts, since bank accounts were different from securities accounts both conceptually and operationally. The bank account, it was stated, involved a bilateral relationship between the customer and the bank and not the intermediated multi-tier holding systems that were found in securities accounts. It was also stated that, although cash could be held also in securities accounts, it was considered to be ancillary to the securities account and was held temporarily in separate sub-accounts for specific purposes, such as for the purchase of securities or the deposit of dividends. It was further said that the Hague Convention was not designed for bank accounts and, while studies were being conducted on the impact of the rules on securities accounts, there was no information as to any parallel studies with respect to the impact of similar provisions on bank accounts. The

scope of the Hague Convention, it was observed, extended to dematerialized securities whose operation was much more complex than bank accounts.

93. In addition, it was observed that a bank account could be traced to a specific branch with relative ease, so a rule based on that connecting factor would provide *ex ante* certainty (advance certainty, i.e. before a transaction had been concluded)). To the contrary, it was said, it would be difficult for third parties to ascertain the choice of law in an account agreement because those documents were usually confidential. It was further observed that application of the law of the account agreement could have serious adverse effects on banking practice, since the rights and duties of the bank or enforcement would be made subject to a law other than that of its location. It was also mentioned that third parties would have no way of determining the law applicable to the account as the account agreement would be protected by bank secrecy. It was also said that party autonomy was not appropriate in the case of proprietary law issues. In response, it was stated that, whatever the law applicable to bank accounts might be, it would not affect the law applicable to regulatory, tax, accounting or criminal law issues, which would remain subject to the law of the bank's relevant location. It was also said that bank secrecy was not an issue since borrowers were prepared to give lenders copies of the bank account agreements so as to obtain credit on the basis of those agreements, and often lenders would obtain a control agreement with the consent of the depositary bank. In addition, it was observed that analysis based on the principle of party autonomy was not very helpful, since alternative B referred to some objective connecting factors and alternative C eventually involved some degree of choice by the parties as to the location of an account.

94. In the discussion, the question was raised as to whether recommendation 139 would apply to transfers of accounts. In response, it was noted that it would apply to conflicts of priority involving transfers of bank accounts by virtue of the definition of "competing claimant", which included a transferee (A/CN.9/WG.VI/WP.22/Add.1, para. 21 (gg)). For the same reason, the priority recommendations of the draft Guide would apply to a conflict involving a transferee of a bank account. However, whether the draft Guide as a whole applied to transfers of bank accounts was questionable since, while recommendation 3 (f) (see A/CN.9/WG.VI/WP.21) provided that in general outright transfers of receivables were within the scope of the draft Guide, bank accounts were excluded from the definition of "receivable" (A/CN.9/WG.VI/WP.22/Add.1, para. 21 (o)).

95. After discussion, the Working Group decided to retain in recommendation 139 alternative B (which reflected the approach taken in alternative A in a concise way which was more suitable to the draft Guide) and alternative C (without the reference to the "closest connection test"). It was widely felt that as the choice between those alternatives depended on whether, as a matter of fact or practice, the location of bank accounts could be easily determined, information about the relevant practices should be collected and introduced into the discussion. As to recommendation 140 and the reference to it in the chapeau of recommendation 139, the Working Group decided that they should be retained outside square brackets.

Recommendation 141 (proceeds)

96. The Working Group approved the substance of recommendation 141 unchanged.

Recommendation 142 (goods in transit and export goods)

97. It was noted that a security right in goods in transit and export goods could be created and made effective against third parties, under recommendation 136, in accordance with the law of the country of their origin, or, under recommendation 142, in accordance with the law of the country of their ultimate destination. It was widely felt that there was no need to refer in recommendation 142 to negotiable documents. It was stated that in the normal situation in which the documents would travel with the goods, recommendation 142 was sufficient. It was also observed that recommendation 142 was sufficient also for situations where the goods travelled but not the documents. As to the rare situation in which the goods were not in transit but the documents were, it was said that recommendation 136 would apply to provide for the application of the law of the location of the encumbered asset (i.e. the document). After discussion, the Working Group agreed that the matters discussed above could be usefully clarified in the commentary and approved the substance of recommendation 142 unchanged.

Recommendation 143 (meaning of “location” of the grantor)

98. The Working Group approved the substance of recommendation 143 unchanged.

Recommendation 144 (relevant time when determining location)

99. It was agreed that priority disputes exclusively among claims created before relocation of the assets or the grantor should be subject to the law of the original location and not to the law of their location at the time the conflict of priority arose. Subject to that limited change, the Working Group approved the substance of recommendation 144.

Recommendation 145 (continued third-party effectiveness upon change of location)

100. It was agreed that, at the end of recommendation 145, language should be added along the following lines: “and, in determining priority under the law of the enacting State, for the purposes of any rule in which time of registration or other method of achieving third-party effectiveness is relevant, that time is the time at which that event occurred under the law of that other State.”. It was stated that the effect of that wording would be to clarify the time third-party effectiveness had been achieved. It was also agreed that the reference to the “enacting State” might be revised to avoid an implication that the other State would be a State that had not enacted the recommendations. It was explained that the recommendation had been drafted from the point of view of the receiving State, as the law of that State would normally apply, and on the basis of the assumption that that State would be an enacting State as, otherwise, the recommendations would not apply. Subject to those changes, the Working Group approved the substance of recommendation 145.

Recommendation 146 (*renvoi*)

101. It was stated that the title of recommendation 146 should be revised to indicate that *renvoi* was excluded (e.g. exclusion of *renvoi* or no *renvoi*). It was also observed that the commentary could explain the reference to the “law in force”. Subject to those changes, the Working Group approved the substance of recommendation 146.

Recommendation 147 (law governing the rights and obligations of the grantor and the secured creditor)

102. The Working Group agreed to retain outside square brackets the phrase “with respect to the security right” to align the scope of that provision to the subject matter of the draft Guide, by making the rule applicable to the parties’ rights and obligations that related to the security right. The Working Group also agreed to retain outside square brackets the words “by law” to make the rule applicable to rights and obligations relating to the security right which, although originating from the creation of the security right (and in that sense having an origin in the security agreement), arose from law in that they were not expressly or impliedly dealt with in the security agreement but became part of the security right as a matter of law. An example given was the nature and extent of the secured party’s duty to care for the collateral while it was in its possession, an obligation not strictly arising from the security agreement but being part of the security right as a matter of law.

103. As to the fallback rule applicable in the absence of a choice of law by the parties, differing views were expressed. One view was that no fallback rule should be provided on the assumption that one would not be needed since in most cases parties to secured transactions would include a choice-of-law clause in their agreements. Another view was that, in the absence of a choice of law by the parties, reference should be made to the law of the grantor’s location. However, the prevailing view was that the law applicable to the rights and obligations of the parties should be aligned with the law applicable to the purely contractual rights and obligations, an approach that would most likely be in line with the expectations of the parties. After discussion, the Working Group decided that the reference to the law governing the security agreement should be retained and the reference to the law of the grantor’s location should be deleted. Subject to the changes mentioned above, the Working Group approved the substance of recommendation 147.

104. In the discussion, the suggestion was made that, to recognize rules of practice and usages, reference should be made to “rules of law”. That suggestion did not attract support.

Recommendation 148 (law governing the rights and obligations of the account debtor and the assignee)

105. It was agreed that the parts of the recommendations on security rights in proceeds from drawings under independent undertakings and in bank accounts that dealt with the relationship between the account debtor and the assignee should be, to the extent possible, aligned with recommendation 148. After discussion, the Working Group approved the substance of recommendation 148 unchanged.

Recommendation 149 (enforcement matters)

106. There was support in the Working Group for both alternatives A and B. In support of alternative A, it was stated that enforcement involved procedural matters that should be subject to the law of the place of enforcement. It was observed, however, that such a rule could result in the application of more than one law where enforcement action, including out-of-court measures, was taken in various jurisdictions. In the same vein, it was mentioned that it was not easy to determine the place of enforcement with respect to intangibles, but even with respect to tangibles in particular when an action from a different place was required (e.g. the mailing of a notice). In support of alternative B, it was observed that it was suitable to address both court and out-of-court measures in various countries and sufficient to preserve legitimate interests of the forum in case of repossession

of the assets by the secured creditor or inconsistency between an enforcement measure and mandatory law or public policy of the forum. On the other hand, it was stated that, while party autonomy could work in the case of extra-judicial enforcement, it was not appropriate in the case of judicial enforcement. It was also observed that enforcement of intangibles would take place in the “location” of the receivable (i.e. the account debtor) and would typically involve a request for payment by the creditor to the account debtor.

107. As a matter of drafting, it was suggested that the words “outside insolvency proceeding” be deleted as they might cause confusion as to whether they required that an insolvency proceeding had been opened or not. The suggestion attracted support, provided that some other way was found to avoid interference with the insolvency-related recommendations. It was also suggested that the mandatory law and public policy exceptions in alternative B were applicable to all the conflict-of-laws recommendations and should be reformulated as such. That suggestion was met with interest, subject to a determination of the impact of those exceptions to the conflict-of-laws recommendations.

108. After discussion, the Working Group decided that both alternatives should be retained for the continuation of the discussion. The Secretariat was requested to prepare drafts to address the suggestions made.

Impact of insolvency on conflict-of-laws rules

109. The Working Group agreed to defer discussion of the insolvency-related conflict-of-laws recommendations until it had an opportunity to consider all the insolvency-related recommendations.

Multi-Unit States

110. The Secretariat was requested to prepare recommendations to address the application of the conflict-of-laws recommendations in multi-unit States.

Chapter IX. Insolvency (A/CN.9/WG.VI/WP.21/Add.3)

Insolvency Guide recommendations

111. With respect to the recommendations of the Insolvency Guide included in the Secured Transactions Guide, the Working Group decided that they should all be retained with appropriate explanations in the commentary. It was also agreed that some additional definitions from the Insolvency Guide (e.g. on financial contracts) might be usefully included in the Insolvency Chapter of the Secured Transactions Guide and any differences with the definitions of the Secured Transactions Guide explained.

Draft additional recommendations

Recommendations A and B

112. The Working Group agreed that both approaches be retained. It was widely felt that, in the context of a non-unitary approach, application of the principle of equivalence should lead to the various acquisition financing devices being treated in the same way. It was also agreed that in recommendation B a reference to the purchase-money lender should be added to reflect the equivalence principle. But it was also agreed that the characteristics of acquisition financing rights in law and practice should be respected. In addition, it was

generally thought that the commentary should explain with examples the treatment of acquisition financiers both in the unitary and the non-unitary approach. Moreover, it was agreed that the commentary should clarify the terminology in particular with respect to the non-unitary approach.

Recommendations C to E and G to K

113. The Working Group retained recommendations C and D unchanged.

Recommendation F

114. It was agreed that recommendation F should make it clear that the insolvency representative would be entitled to recover costs and expenses on a first priority basis. Subject to that change, the Working Group retained recommendation F.

Negotiable instruments and negotiable documents (A/CN.9/WG.VI/WP.22/Add.1, para. 21 (w) and (x), and A/CN.9/WG.VI/WP.21, recs. 3 (d) and 24)

The Working Group approved the substance of the definitions of “negotiable instrument” and “negotiable document”, subject to the deletion of the reference to other law.

Recommendation 3 (d) (A/CN.9/WG.VI/WP.21, rec. 3 (d))

115. The Working Group approved the substance of recommendation 3 (d) and agreed that all the square brackets be deleted.

Recommendation 24 (A/CN.9/WG.VI/WP.21)

116. The Working Group approved the substance of recommendation 24, reserving final decision on whether the recommendation should be based on the characterization of the right as accessory or independent. It was also agreed that the recommendation should deal only with negotiable instruments and not with other payment obligations.

V. Future work

117. The Working Group noted that its ninth session was scheduled to take place in New York from 30 January to 3 February 2006 and that the following session was scheduled to take place in Vienna from 18 to 22 September 2006, the latter dates being subject to approval by the Commission at its thirty-ninth session scheduled to take place in New York from 19 June to 7 July 2006. In addition, the Working Group noted that it could have an additional session in New York from 1 to 5 May 2006, which was subject to a decision by the Working Group in January 2006.

**Recommendations of the draft Legislative Guide on Secured
Transactions**

I. Key objectives

Purpose

The purpose of the recommendations on key objectives is to provide a broad policy framework for the establishment and development of an effective and efficient secured transactions law. These recommendations could be included in a preamble of the secured transactions law as a guide to the underlying legislative policies to be taken into account in the interpretation of the law (hereinafter referred to as “the law”).

Key objectives

1. The following key objectives should be considered:
 - (a) Promote secured credit;
 - (b) Allow utilization of the full value inherent in assets to support credit in a broad array of credit transactions;
 - (c) Obtain security rights in a simple and efficient manner;
 - (d) Recognize party autonomy;
 - (e) Provide for equal treatment of diverse sources of credit;
 - (f) Validate non-possessory security rights;
 - (g) Encourage responsible behaviour on the part of all parties by enhancing predictability and transparency;
 - (h) Establish clear and predictable priority rules;

- (i) Facilitate enforcement of creditor's rights in a predictable and efficient manner;
- (j) Balance the interests of affected persons; and
- (k) Harmonize secured transactions laws, including conflict-of-laws rules.

II. Scope of application

Purpose

The purpose of the scope provisions of the law is to specify the parties, the security rights, the secured obligations and the assets to which the law applies.

Parties, security rights, secured obligations and assets covered

2. The law should apply to all parties and types of security rights, secured obligations and encumbered assets. Any exceptions should be limited and clearly stated in the law.

3. In particular, the law should provide that it applies to:

(a) Legal and natural persons, including consumers, without, however, affecting their rights under consumer-protection legislation;

(b) Property rights created contractually to secure all types of obligations, including future obligations, fluctuating obligations and obligations described in a generic way;

(c) Possessory and non-possessory security rights in movable property and fixtures securing payment or other performance of one or more obligations, present or future, determined or determinable;

(d) All types of movable assets and fixtures, tangible or intangible, present or future, not specifically excluded in the law, including inventory, equipment and other goods, receivables, [negotiable instruments (such as cheques, bills of exchange and promissory notes), negotiable documents (such as bills of lading),] bank accounts [proceeds from the drawing under an independent undertaking and intellectual property rights];

[Note to the Working Group: Negotiable instruments, negotiable documents, independent undertakings and intellectual property rights are within square brackets as the Working Group has not decided yet that they should be included in the scope of the Guide. If the Working Group decides that such types of asset should be covered in the Guide, it may wish to review the recommendations to ensure that both the recommendations applicable to all types of asset and the asset-specific recommendations are appropriate for those assets.]

(e) Security rights acquired by way of transfer of title and all other types of rights securing the payment or other performance of one or more obligations, irrespective of the form of the relevant transaction and whether ownership of the encumbered assets is held by the secured creditor or the grantor, including the various forms of retention of title, financial leases and hire-purchase agreements;

(f) Generally, absolute transfers of receivables;

(g) Aircraft, ships and fixtures to the extent that the recommendations of this law are not inconsistent with existing laws or international obligations of the State relating to

these assets. Where a direct inconsistency exists, the State's secured transactions law should expressly confirm that the other law and international obligations govern those assets to the extent of that inconsistency;

[(h) Intellectual property rights to the extent that the recommendations of this law are not inconsistent with existing laws or international obligations of the State relating to these assets. A State enacting secured transactions legislation in accordance with this Guide should consider whether it might be appropriate to adjust certain of the recommendations as they apply to security rights in intellectual property. In this regard, a State should examine its existing intellectual property laws and the State's obligations under intellectual property treaties, conventions and other international agreements and, in the event that the recommendations of the Guide are directly inconsistent with any such existing laws or obligations, the State's secured transactions law should expressly confirm that those existing intellectual property laws and obligations govern such issues to the extent of the inconsistency. In considering whether any adjustments of the recommendations as they apply to security rights in intellectual property are appropriate, a State should analyse each circumstance on an issue-by-issue basis and should have proper regard both to establishing an efficient secured transactions regime and to ensuring the protection and exercise of intellectual property rights in accordance with international conventions and national laws.]

4. The law should not apply to security rights in:
 - (a) Securities;
 - (b) Real property, with the exception of fixtures;
 - (c) Wages;
 - (d) [...].

III. Basic approaches to security

Purpose

The purpose of the recommendations on basic approaches to security is to ensure that the law covers in a comprehensive and consistent manner all forms of transactions that function as security.

Comprehensive approach

5. The law should include a comprehensive and consistent set of provisions on non-possessory security rights in tangibles and intangibles. The law should also provide for possessory security rights in tangibles.

Functional approach

6. The law should treat all devices that perform security functions as secured transactions, including the transfer of title to tangibles or the assignment of intangibles for security purposes, retention of title, financial leases and hire-purchase agreements, except to the extent otherwise contemplated in recommendation 7 .

Unitary and non-unitary approach

7. The law could subsume all devices that perform security functions into a unitary notion of security rights or preserve retention of title and similar devices as separate devices under other law but provide that the same rules applicable to security devices apply to the maximum extent possible.

IV. Creation of the security right (effectiveness as between the parties)

Purpose

The purpose of the provisions of the law dealing with creation is to specify the way in which a security right in movable property is created.

[Note to the Working Group: As the recommendations follow a unitary approach, the Working Group may wish to include at the end of each chapter alternative recommendations that follow a non-unitary approach as contemplated in recommendation 7 or a general recommendation drawing the attention of legislators to the need to adjust the recommendations if they decide to follow a non-unitary approach.]

Creation of a security right by agreement

8. The law should specify that a security right is created by agreement between the grantor and the secured creditor which is in writing [signed by the grantor in accordance with recommendation 12] [that evidences the intent of the grantor to grant a security right] or is accompanied by delivery of possession pursuant to the agreement and in accordance with recommendation 9.

Delivery of possession

9. The law should provide that the delivery of possession of the assets to be encumbered is to the secured creditor or a third person (other than the grantor or an agent or employee of the grantor) that holds the assets on behalf of the secured creditor.

Minimum contents of the security agreement

10. The law should provide that the security agreement must, at a minimum, identify the secured creditor and the grantor, and reasonably describe the secured obligation and the assets to be encumbered. A generic description of the secured obligation and the encumbered assets should be sufficient.

Form

11. The law should specify that a writing requirement is met by an electronic communication if the information contained therein is accessible so as to be usable for subsequent reference (see article 6 of the UNCITRAL Model Law on Electronic Commerce).

12. [The law should also specify that, unless the law provides otherwise, where the law requires a signature of a person, that requirement is satisfied in relation to an electronic communication if:

(a) A method is used to identify that person and to indicate that person's approval of the information contained in the electronic communication message; and

(b) That method is as reliable as was appropriate for the purpose for which the electronic communication was generated or communicated, in the light of all the circumstances, including any relevant agreement (see article 7 of the UNCITRAL Model Law on Electronic Commerce).]

Assets and obligations subject to a security agreement

13. The law should specify that a security right may secure all types of obligation, including future, conditional and fluctuating obligations. It should also specify that a security right may be given in all types of asset, including parts of assets and undivided interests in assets and assets which, at the time of the security agreement, the grantor may not yet own or have the power to dispose of, or which may not yet exist, as well as in proceeds. Any exceptions to these rules should be limited and described clearly in the law.

Receivables

Effectiveness of an assignment as between the assignor and the assignee and as against the account debtor

14. The law should provide that the assignment of receivables that are not specifically identified, future receivables and parts of or undivided interests in receivables is effective as between the assignor and the assignee and as against the account debtor, as long as, at the time of the assignment or, in the case of future receivables, at the time they arise, they can be identified to the assignment to which they relate.

[Note to the Working Group: Article 8 of the United Nations Assignment Convention.]

Effectiveness of an assignment made despite an anti-assignment clause

15. The law should provide that:

(a) An assignment is effective as between the assignor and the assignee and as against the account debtor notwithstanding an agreement between the initial or any subsequent assignor and the account debtor or subsequent assignee limiting in any way the assignor's right to assign its receivables;

(b) If other law creates any obligation or liability of the assignor for breach of such an agreement, the other party to such an agreement may not avoid the contract from which the assigned receivables arise or the assignment contract on the sole ground of that breach;

(c) A person who is not a party to such an agreement is not liable on the sole ground that it had knowledge of the agreement.

[Note to the Working Group: The Working Group may wish to consider whether recommendation 15, which is based on article 9 of the United Nations Assignment Convention should apply only to receivables listed in article 9 (3) of the Convention, i.e. receivables:

- (a) Arising from an original contract that is a contract for the supply or lease of goods or services other than financial services, a construction contract or a contract for the sale or lease of real property;*
- (b) Arising from an original contract for the sale, lease or licence of industrial or other intellectual property or of proprietary information;*
- (c) Representing the payment obligation for a credit card transaction; or*
- (d) Owed to the assignor upon net settlement of payments due pursuant to a netting agreement involving more than two parties.]*

Transfer of rights securing the assigned receivables

16. The law should provide that:

- (a) Personal or property rights securing or supporting payment of the assigned receivable are transferred to the assignee without a new act of transfer. If such a right, under the law governing it, is transferable only with a new act of transfer, the assignor is obliged to transfer such right and any proceeds to the assignee;

[Note to the Working Group: The Working Group may wish to note that the commentary to this recommendation would clarify that the first sentence reflects the rule that accessory security rights follow the secured obligation automatically and the second sentence means that independent rights, if transferable, require a separate act of transfer.]

- (b) A right securing payment of the assigned receivable may be transferred notwithstanding any agreement between the assignor and the account debtor or other person granting that right, limiting in any way the assignor's right to assign the receivable or the right securing payment of the assigned receivable;

- (c) If other law creates any obligation or liability of the assignor for breach of such an agreement, the other party to such an agreement may not avoid the contract from which the assigned receivables arise or the assignment contract on the sole ground of that breach;

- (d) A person who is not a party to such an agreement is not liable on the sole ground that it had knowledge of the agreement.

[Note to the Working Group: The Working Group may wish to consider whether recommendation 16, which is based on article 10 of the United Nations Assignment Convention should apply only to receivables listed in article 10 (4) of the Convention (identical with the list in article 9 (3) reproduced under recommendation 15 above.)]

Principle of account debtor protection

[Note to the Working Group: Recommendations 17 to 23 are based on articles 15-21 of the United Nations Assignment Convention.]

17. The law should provide that:

- (a) Except as otherwise provided in this law, an assignment does not, without the consent of the account debtor, affect the rights and obligations of the account debtor, including the payment terms contained in the original contract;

(b) A payment instruction may change the person, address or account to which the account debtor is required to make payment, but may not change:

- (i) The currency of payment specified in the original contract; or
- (ii) The State specified in the original contract in which payment is to be made to a State other than that in which the account debtor is located.

Notification of the account debtor

18. The law should provide that:

(a) Notification of the assignment or a payment instruction is effective when received by the account debtor if it is in a language that is reasonably expected to inform the account debtor about its contents. It is sufficient if notification of the assignment or a payment instruction is in the language of the original contract;

(b) Notification of the assignment or a payment instruction may relate to receivables arising after notification and that notification of a subsequent assignment constitutes notification of all prior assignments.

Discharge of the account debtor by payment

19. The law should provide that:

(a) Until the account debtor receives notification of the assignment, it is entitled to be discharged by paying in accordance with the original contract;

(b) After the account debtor receives notification of the assignment, subject to paragraphs (c) to (h) of this recommendation, it is discharged only by paying the assignee or, if otherwise instructed in the notification of the assignment or subsequently by the assignee in a writing received by the account debtor, in accordance with such payment instruction;

(c) If the account debtor receives more than one payment instruction relating to a single assignment of the same receivable by the same assignor, it is discharged by paying in accordance with the last payment instruction received from the assignee before payment;

(d) If the account debtor receives notification of more than one assignment of the same receivable made by the same assignor, it is discharged by paying in accordance with the first notification received;

(e) If the account debtor receives notification of one or more subsequent assignments, it is discharged by paying in accordance with the notification of the last of such subsequent assignments;

(f) If the account debtor receives notification of the assignment of a part of or an undivided interest in one or more receivables, it is discharged by paying in accordance with the notification or in accordance with this recommendation as if the account debtor had not received the notification. If the account debtor pays in accordance with the notification, it is discharged only to the extent of the part or undivided interest paid.

(g) If the account debtor receives notification of the assignment from the assignee, it is entitled to request the assignee to provide within a reasonable period of time adequate proof that the assignment from the initial assignor to the initial assignee and any intermediate assignment have been made and, unless the assignee does so, the account debtor is discharged by paying in accordance with this recommendation as if the

notification from the assignee had not been received. Adequate proof of an assignment includes but is not limited to any writing emanating from the assignor and indicating that the assignment has taken place.

(h) This recommendation does not affect any other ground on which payment by the account debtor to the person entitled to payment, to a competent judicial or other authority, or to a public deposit fund discharges the account debtor.

Defences and rights of set-off of the account debtor

20. The law should provide that:

(a) In a claim by the assignee against the account debtor for payment of the assigned receivable, the account debtor may raise against the assignee all defences and rights of set-off arising from the original contract, or any other contract that was part of the same transaction, of which the account debtor could avail itself as if the assignment had not been made and such claim were made by the assignor;

(b) The account debtor may raise against the assignee any other right of set-off, provided that it was available to the account debtor at the time notification of the assignment was received by the account debtor;

(c) Notwithstanding paragraphs (a) and (b) of this recommendation, defences and rights of set-off that the account debtor may raise pursuant to recommendations 15 and 16 against the assignor for breach of an agreement limiting in any way the assignor's right to make the assignment are not available to the account debtor against the assignee.

Agreement not to raise defences or rights of set-off

21. The law should provide that:

(a) The account debtor may agree with the assignor in a writing signed by the account debtor not to raise against the assignee the defences and rights of set-off that it could raise pursuant to recommendation 20. Such an agreement precludes the account debtor from raising against the assignee those defences and rights of set-off;

(b) The account debtor may not waive defences:

- (i) Arising from fraudulent acts on the part of the assignee; or
- (ii) Based on the account debtor's incapacity;

(c) Such an agreement may be modified only by an agreement in a writing signed by the account debtor. The effect of such a modification as against the assignee is determined by recommendation 22, paragraph (b).

[Note to the Working Group: Recommendation 21 is based on article 19 of the United Nations Assignment Convention, which refers to a signed writing only for a waiver of defences or its modification. If the Working Group decides not to refer to signature in recommendation 8, it may wish to reconsider the reference to signature in recommendation 21.]

Modification of the original contract

22. The law should provide that:

(a) An agreement concluded before notification of the assignment between the assignor and the account debtor that affects the assignee's rights is effective as against the

assignee, and the assignee acquires corresponding rights;

(b) An agreement concluded after notification of the assignment between the assignor and the account debtor that affects the assignee's rights is ineffective as against the assignee unless:

(i) The assignee consents to it; or

(ii) The receivable is not fully earned by performance and either the modification is provided for in the original contract or, in the context of the original contract, a reasonable assignee would consent to the modification.

(c) Paragraphs (a) and (b) of this recommendation do not affect any right of the assignor or the assignee arising from breach of an agreement between them.

Recovery of payments

23. The law should provide that failure of the assignor to perform the original contract does not entitle the account debtor to recover from the assignee a sum paid by the account debtor to the assignor or the assignee.

[Negotiable instruments [and other non-payment obligations]

24. The law should provide that, if a security right has been effectively created in a negotiable instrument, the secured creditor also has a security right in accessory rights with respect to the negotiable instrument without a new act of transfer. Such accessory rights may include:

(a) Rights against guarantors with respect to the negotiable instrument; and

(b) Security rights securing the obligation of the obligor on the negotiable instrument.]

[Note to the Working Group: Under recommendation 24, if A gets a note from B guaranteed by C and then grants a security right in the note to D, D gets a security right in the guarantee as well.]

[Independent undertakings

25. The law should provide that a beneficiary may grant a security right in proceeds from a drawing under an independent undertaking.]

[Note to the Working Group: "Proceeds from a drawing under an independent undertaking" is a defined term.]

Bank accounts

26. The law should provide that a security right in a bank account is effective as between the secured creditor and the grantor notwithstanding an agreement between the grantor and the depositary bank limiting in any way the grantor's right to create a security right in its bank accounts. However, the security right is not effective against the depositary bank, the depositary bank has no duty to recognize the secured creditor and no obligations are otherwise imposed on the depositary bank with respect to the security right, without the depositary bank's consent.

27. Consistent with consumer-protection laws and policies, the law should deal with the question whether and to what extent a security right in a bank account may be created [or be subject to enforcement proceedings under this law] by an individual grantor if the funds

in the bank account or the credit extended to the individual grantor is for the grantor's personal, family or household purposes.

[Negotiable documents of title]

28. The law should provide that a security right in a negotiable document is also a security right in the goods represented by the document [, provided that the issuer is in possession of the document, directly or indirectly, at the time the security right in the document is created].

[Note to the Working Group: The commentary may clarify that recommendation 28 is intended to negate that a separate security right needs to be created in the goods.]]

Proceeds

29. The law should provide that, unless otherwise agreed by the parties to the security agreement, the security right in the encumbered assets extends to the proceeds to the extent that the proceeds are identifiable in accordance with rules dealing with tracing that are also included in the law.

30. [The law should provide that, notwithstanding recommendation 29, the security right extends to civil and natural fruits of encumbered assets, such as [...], only if the parties so provide in the security agreement.]

[Note to the Working Group: In order to reflect the normal expectations of parties, recommendation 30 introduces a different approach as to civil and natural fruits of encumbered assets from the approach taken in recommendation 29 with respect to other types of proceeds (the notion of "proceeds", as defined in the terminology section, includes civil and natural fruits).]

Fixtures

31. The law should provide that a security right may be created or continue in fixtures in immovables under this law or real property law or fixtures in movables that have not lost their identity.

Products or masses of goods

32. The law should also provide that a security right may not be created in goods that are physically united with other goods in such a way that their identity is lost in another product or mass. However, if encumbered assets become part of another product or mass, the security right becomes a security right in the product or mass [proportionately] [up to the value of the encumbered assets at the time they are physically united with other goods].

[Note to the Working Group: Under the first alternative, if the value of the flour is 5 and the value of the sugar is 5, while the value of the cake is 100, the secured creditors share the value of the cake 50 and 50. Under the second alternative, if the value of product or mass is higher than the value of the goods, the security right extends only to the value of the goods before commingling (i.e. each gets 5, while the remaining value of 90 is preserved for the grantor and its unsecured creditors). If the value of the product or mass is lower than the value of the goods, the secured creditors share the loss proportionately (e.g. if the value of the cake is 8, each secured creditor gets 4).]

Time of creation

33. The law should provide that, unless the parties otherwise agree, a security right becomes effective as between the parties at the time the security agreement is concluded or at the time the encumbered assets are delivered to the secured creditor.

34. The law should also provide that, unless the parties otherwise agree, a security right in future property is created when the grantor acquires rights or the right to transfer rights in such property.

A/CN.9/WG.VI/WP.21/Add.1

Recommendations of the draft Legislative Guide on Secured Transactions

ADDENDUM

CONTENTS

	<i>Recommendations</i>	<i>Page</i>
V. Effectiveness of the security right against third parties	35-57	
VI. Priority of the security right over the rights of competing claimants	58-85	

V. Effectiveness of the security right against third parties

Purpose

The purpose of the provisions of the law on the effectiveness of a security right against third parties is to require an additional step before a security right may become effective against third parties so as to:

- (a) Alert third parties dealing with the movable assets of the grantor of the risk that those assets may be encumbered by a security right; and
- (b) Provide a temporal event for ordering priority among secured creditors and between a secured creditor and other classes of competing claimants.

Methods for achieving third-party effectiveness

35. The law should provide that a security right is effective against third parties only when one of the following events occurs:

- (a) Registration of a notice of the security right in a general security rights registry;
- (b) Dispossession of the grantor if the encumbered assets are specific items of tangible movable property;
- [(c) Transfer of control to the secured creditor if the encumbered assets are [certain intangible obligations, other than receivables, owing to the grantor by a third person] [a bank account];]
- (d) Registration of a notice of the security right in a specialized title registry if the encumbered assets are specific items of movable property for which title is established, under other law of the enacting State, by registration in such a registry; (e) Entry of a notation of the security right on the title certificate if the encumbered assets are specific items of tangible movable property for which, under other law of the enacting State, title is evidenced by a title certificate; [or
- (f) ...].

[Note to the Working Group: The Working Group may wish to consider additional methods for achieving third-party effectiveness (e.g. automatic third-party effectiveness upon creation of a security right in consumer goods. The Working Group may also wish to consider whether, in the case of assets subject to registration in a specialized registry or to

a title certificate registration system, in addition to registration in a specialized title registry or a title certificate, registration of a notice in the general security rights registry should also be required. The advantage of such an additional registration requirement would be that a search in the security rights registry would reveal all security rights in a wide range of assets, including those that are subject to a specialized registration system.]

36. The law should confirm that different methods for achieving third-party effectiveness may be used for different items or kinds of encumbered assets, whether or not they are encumbered by the same security agreement or by separate security agreements.

Establishment and characteristics of a general security rights registry

37. The law should provide for the establishment of a general security rights registry having the following characteristics:

- (a) Registration is effected by filing a notice of the security right as opposed to a copy of the security documentation;
- (b) The record of the registry is centralized; that is, it contains all notices of security rights registered under the secured transactions law of the enacting State;
- (c) The registration system is set up to permit the indexing and retrieval of notices according to the name of the grantor or according to some other reliable identifier of the grantor;
- (d) The registry is open to the public;
- (e) Reasonable public access to the registry is assured through such measures as:
 - (i) Setting fees for registration and searching at a cost-recovery level; and
 - (ii) Making available remote modes or points of access;
- (f) The registration system is administered and organized to facilitate efficient registration and searching. In particular:
 - (i) A notice may be registered without verification or scrutiny of the sufficiency of its content;
 - (ii) If the financial and infrastructural capacity of the enacting State permits, notices are stored in electronic form in a computer database;
 - (iii) If the financial and infrastructural capacity of the enacting State permits, registrants and searchers have access to the registry record by electronic or similar means, including electronic data interchange, electronic mail, telex, telephone or telecopy; and
- (g) The law provides rules on the allocation of liability for loss or damage caused by an error in the administration or operation of the registration and searching system.

Required content of registered notice

38. To constitute a legally effective registration, the law should require the registered notice to contain only:

- (a) The names (or other reliable identifiers) of the grantor and the secured creditor, and their addresses;
- (b) A description of the movable property covered by the notice;

(c) The term of the registration; and

[(d) A statement of the maximum monetary amount for which the security right may be enforced [if a State elects that such information is necessary to facilitate subordinate lending].]

Legal sufficiency of grantor name in a registered notice

39. The law should provide that the name or other identifier of the grantor entered on a registered notice is legally sufficient if the notice can be retrieved by searching the registry record according to the correct legal name or other identifier of the grantor. For this purpose, the law should specify rules for determining the correct legal name or other identifier of individuals and entities.

Legal sufficiency of description of assets covered by a registered notice

40. The law should provide that a description of the assets covered by a registered notice is legally sufficient if it enables a third person to identify the assets covered by the notice separate from other assets of the grantor.

41. If the assets covered by the notice consist of a generic category or categories of movable property, the law should confirm that a generic description is legally sufficient.

42. If the assets covered by the notice are all the present and after-acquired movable property of the grantor, the law should confirm that it is legally sufficient to describe the charged assets as “all movable property” or by using equivalent language.

Advance registration

43. The law should confirm that a registration may be made before or after the creation of the security right to which it relates.

One registration for multiple security agreements between the same parties

44. The law should confirm that a single registration is sufficient for security rights created by all security agreements entered into between the same parties to the extent they cover items or kinds of movable property that fall within the description contained in the registered notice.

Duration and renewal of registration

45. The law should specify the duration of registration or permit the duration to be selected by the registrant at the time of registration. The law should provide for the right to successively renew the term of a registration.

[Note to the Working Group: The Working Group may wish to note that, if the registration system permits paper notices or requires that a notice, whether in paper or electronic form, needs to be checked or verified before being entered into the record, there will be some delay between receipt of the notice by the registrar and the time the notice will be entered into the record and become available to searchers. In such circumstances, the question arises as to the time when the registration should be effective, the time of receipt of the notice by the registrar or the time the notice is entered into the record and becomes available to searchers. If the registration is effective when received by the registrar, a search will not disclose all legally effective registrations. If the registration is effective as of the time the notice is entered into the record and made available to searchers, the registering party has the risk associated with any delay. In a fully electronic

system that requires no verification of registered data by the registrar, the time difference between receipt of the data by the registrar and their availability to searchers is minimal and this problem is significantly reduced.]

Discharge of registration

46. The law should adopt a summary procedure to enable the grantor to compel discharge of a registration if no security agreement has been completed between the parties or if the security right has been terminated by full payment or performance of all of the secured obligations. The law should also permit discharge of a registration by agreement of the secured creditor and the grantor.

Additional rights subject to registration

47. The law should provide that the following rights are effective against third parties only if notice of the right is registered in the general security rights registry:

[(a) The title of a creditor who retains title to goods to secure payment of the purchase price of the goods or its economic equivalent under a financial lease or hire-purchase agreement;] and

(b) The right of an assignee under an outright assignment of receivables;

[(c) The law may also permit registration of a notice in respect of the following rights for purposes of achieving third-party effectiveness:

(i) A lessor under a lease that is not a financing lease but which extends for a term of more than one year;

(ii) A consignor under a commercial consignment in which the goods are consigned to a consignee as agent for sale other than an auctioneer or that a consignee who does not act as a consignee in the ordinary course of business; and

(iii) A buyer under a sale of goods outside the ordinary course of the seller's business where the seller remains in possession of the goods for more than [thirty] [sixty] [ninety] days;]

Dispossession of the grantor

48. The law should provide that, for a possessory security right to be effective against third parties, dispossession of the grantor should be actual and not constructive, fictive or symbolic. Dispossession of the grantor is sufficient only if an objective third person can conclude that the encumbered assets are not in the actual possession of the grantor. Possession by a third person constitutes sufficient dispossession only if the third person is not an agent or employee of the grantor and holds possession for or on behalf of the secured creditor.

[Note to the Working Group: The Working Group may wish to note that no recommendation is included on third-party effectiveness of security rights in negotiable instruments. Asset-specific recommendations are included only where the general recommendations are not applicable to certain types of asset (with the exception of recommendation 70 which is included for the sake of completeness of the recommendations on priority of security rights in fixtures). The recommendations on negotiable instruments, independent undertakings and negotiable documents appear within square brackets as the Working Group has not decided yet that those types of asset should be addressed in the Guide.]

Independent undertakings

49. [The law should provide that a security right in the proceeds from the drawing under an independent undertaking may be made effective against third parties by:

- (a) Control;
- (b) Possession of the original text of the independent undertaking if presentation of it is a condition to payment;
- (c) Registration of a notice in the security rights registry with respect to the proceeds or the underlying receivable; or
- (d) Automatically upon creation of a security right in the receivable supported by an independent undertaking.]

[Note to the Working Group: Under the definition of control in the terminology section, the secured creditor has control of an independent undertaking where: (i) the issuer/guarantor or nominated person paying the proceeds is the secured creditor; (ii) the issuer/guarantor or nominated person paying the proceeds has acknowledged the security right in the proceeds from the drawing under an independent undertaking; or (iii) the secured creditor is the beneficiary. Under the third method of obtaining control, as between the issuer/guarantor or nominated person paying the proceeds and the secured creditor, the secured creditor is the beneficiary of the independent undertaking. It may be that, as between the grantor and the secured creditor, the secured creditor has agreed to treat the proceeds as encumbered assets. Any such agreement does not affect the relationship between the issuer/guarantor or nominated person paying the proceeds and the beneficiary (the secured creditor). It only gives the secured creditor "control" for purposes of the effectiveness of its rights against third parties.]

Bank accounts

50. The law should provide that a security right in a bank account may be made effective against third parties through registration of a notice in the security rights registry or through the control of the bank account.

51. If the secured creditor and the depositary institution are the same person, the law should provide that the secured creditor automatically has control upon the creation of the security right.

Negotiable documents of title

52. [The law should provide that, for a possessory security right in tangibles represented by a negotiable document of title to be effective against third parties, delivery of the document to the secured creditor constitutes effective dispossession of the grantor during the time that the tangibles are covered by the document.

53. The law should provide that, if a security right in a negotiable document is effective against third parties, the corresponding security right in the goods represented by the document is also effective against third parties.]

Proceeds

54. The law should provide that, if a security right in encumbered assets is effective against third parties, the security right in the proceeds is effective against third parties as soon as the right in the proceeds is created provided that:

(a) The security right in the encumbered assets was made effective against third parties by registration [and the proceeds are a kind of asset in which a security right may be made effective against third parties by registration];

[Note to the Working Group: Paragraph (a) would not apply, for example, to a security right in inventory which was made effective against third parties by possession, although the security right in the proceeds in the form of receivables would have to be registered.]

(b) The proceeds take the form of money, [negotiable instruments, negotiable documents of title] or bank accounts;

(c) If neither (a) nor (b) applies, the security right in the proceeds is effective against third parties for [...] days and continuously thereafter if it is made effective against third parties by one of the methods referred to in recommendation 35.

Fixtures

55. The law should provide that a security right in fixtures in immovables or in movables becomes effective against third parties by one of the methods referred to in recommendation 35. With respect to security rights in fixtures in immovables, the law should provide that registration under this law does not preclude registration under real property law.

[Note to the Working Group: With respect to security rights in fixtures in immovables, the Working Group may wish to consider whether a notation in the real property registry should be required.]

56. If a security right is effective against third parties at the time when the encumbered assets become fixtures in movables, the security right in the encumbered assets remains effective against third parties.

Products or masses of goods

57. If a security right is effective against third parties at the time the encumbered assets are physically united with other goods in such a way that their identity is lost in a product or mass of goods, the security right in the product or mass remains effective against third parties.

VI. Priority of the security right over the rights of competing claimants

Purpose

The purpose of the provisions of the law on priority is to:

(a) Enable a potential secured creditor to determine, in an efficient manner and with a high degree of certainty prior to extending credit, the priority that the security rights would have over competing claimants; and

(b) Enable grantors to create more than one security right in the same asset and to thereby use the full value of their assets to facilitate obtaining credit.

Scope of priority rules

58. The law should have a complete set of priority rules covering all possible priority conflicts.

Secured obligations affected

59. The law should provide that the priority accorded to a security right:

(a) Extends to all monetary and non-monetary obligations owed to the secured creditor [up to a maximum monetary amount set forth in the registered notice], including principal, costs, interest and fees, to the extent secured by the security right; and

(b) Is unaffected by the date on which an advance or other obligation secured by the security right is made or incurred (i.e. a security right may secure future advances under a credit facility with the same priority as advances made under the credit facility at the time the security right is made effective against third parties).

Priority in after-acquired property

60. The law should specify that a security right in after-acquired or after-created assets of the grantor has the same priority as a security right in assets of the grantor owned or existing at the time the security right is made effective against third parties.

Negotiable instruments

61. [The law should provide that a security right in a negotiable instrument that has been made effective against third parties by a method other than possession of the instrument by the secured creditor is subordinate to the rights of a buyer, another secured creditor or other transferee in a consensual transaction who either:

(a) Qualifies as a protected holder under the law governing negotiable instruments; or

(b) Otherwise takes possession of the negotiable instrument in good faith and without knowledge that the transfer was in violation of the rights of the holder of the security right.]

Independent undertakings

62. [The law should provide that a security right in the proceeds from the drawing under an independent undertaking that has been made effective against third parties:

(a) By control has priority over the rights of all other secured creditors;

(b) By acknowledgement has priority over a security right made effective by any method other than control to the extent the proceeds are payable under and pursuant to the terms of that acknowledgement; in the case of inconsistent acknowledgements given by the same person, the first secured creditor to obtain an acknowledgement from that person has priority;

(c) By possession has priority over a security right made effective against third parties automatically upon creation or by registration; and

(d) Automatically upon creation has priority, in accordance with its priority in the underlying receivable and in the proceeds from the drawing under an independent undertaking, over a security right made effective against third parties by registration.]

Bank accounts

63. The law should provide that a security right in a bank account which has been made effective against third parties by control has priority over a security right in that bank account which has been made effective against third parties by another method. If the secured creditor is the depositary bank, the depositary bank's security right has priority over any other security right.

64. The law should provide that the depositary bank's right to set-off against the bank account obligations owed to the depositary bank by the grantor has priority over the security right of another secured creditor other than a secured creditor who has acquired control of the bank account by becoming the customer of the depositary bank with respect to the bank account.

65. In the case of a funds transfer from a bank account initiated by the grantor, the transferee of funds takes free of a security right in the funds of the bank account [unless the transferee has knowledge that the transfer violates the terms of the security agreement and the transfer is outside the ordinary course of business of the grantor].

Negotiable documents

66. [The law should provide that, while goods are in the possession of a person who has issued a negotiable document with respect to them, a security right in those goods that became effective against third parties by making a security right in the negotiable document effective against third parties has priority over another security right in the goods that was made effective against third parties by a different method [while the goods were in the possession of the issuer or [...]] [while the document of title is outstanding].

67. The law should provide that a security right in a negotiable document and the goods represented thereby is subject to the rights under the law governing negotiable documents of a person to whom the negotiable document has been duly negotiated.]

Proceeds

68. The law should provide that a secured creditor's priority with respect to an encumbered asset extends to the proceeds of the asset subject to the requirements of recommendation 54.

Fixtures and products or masses of goods

69. The law should provide that a secured creditor with a security right in fixtures in immovables that has been made effective against third parties under real property law has priority over a secured creditor with a security right in those fixtures that has been made effective against third parties by one of the methods referred to in recommendation 55.

70. The law should provide that the priority of security rights in fixtures in movables is governed by the general rules applicable to movable property.

71. The law should set forth rules governing the priority of security rights in goods that are physically united with other goods in such a way that their identity is lost in a product or mass of goods.

Continuity in priority in the case achieving third-party effectiveness by various methods

72. The law should provide that, if a security right is made effective against third parties by one method, it is also made effective against third parties by another method, priority dates as of the time the first method is completed [provided that there was no time gap between completion of the first and the second method].

Priority of security rights that are not effective against third parties**Unsecured creditors**

73. The law should provide that a secured creditor with a security right that is not effective against third parties has [towards third parties no right other than as an unsecured creditor] [priority over unsecured creditors unless the unsecured creditor has taken steps to reduce its claim to a judgement or the grantor has become insolvent].

Secured creditors

74. The law should provide that:

(a) A security right in an asset that is not effective against third parties is subordinate to a security right in the same asset that is effective against third parties, without regard to the order in which the security rights were created; and

(b) Priority among security rights that are not effective against third parties is determined by the order in which they were created.

Priority of security rights that are effective against third parties**Unsecured creditors**

75. The law should provide that a security right that is effective against third parties has priority over the rights of unsecured creditors.

Secured creditors

76. The law should provide that:

(a) As between two security rights in the same encumbered asset that are effective against third parties, except as provided in recommendation [on priority of acquisition financing devices], priority is determined by the order in which their respective third-party effectiveness steps occurred, even if one or more of the requirements for the creation of a security right was not satisfied at such time. If one of the security rights is made effective against third parties by possession or control of the encumbered asset, the holder of that security right will have the burden of establishing when it obtained possession or control;

(b) Where a security right may be made effective against third parties by control, that security right has priority over a security right made effective against third parties by any other method.

Judgement creditors

77. The law should provide that, if, under applicable law, a judgement creditor, who has taken steps to enforce the judgement, acquires rights in assets of the judgement debtor, a security right that is effective against third parties has priority over the right of the judgement creditor that is registered after the security right has become effective against

third parties, except with respect to amounts advanced by the secured creditor subsequent to a specified number of days after the date on which the judgement creditor registers a notice of its rights.

Buyers of encumbered assets

78. The law should provide that the right of a buyer of goods is subject to a security right that has become effective against third parties before the sale, unless the secured creditor authorized the sale. However, a buyer of inventory, who buys encumbered inventory in the ordinary course of business of the seller (and anyone whose rights to the encumbered inventory derive from that buyer), takes free of a security right that is effective against third parties in that inventory, even if such buyer has knowledge of the existence of the security right.

Reclamation claims

79. If the law provides that suppliers of goods have the right to reclaim the goods within a specified time after the buyer becomes insolvent, the law should also provide that such specified time is short, and that the right to reclaim the goods is subordinate to security rights in such goods granted by the buyer that are effective against third parties.

Lessees

80. The law should address the priority of a security right in a leased asset that is effective against third parties as against the rights of a lessee of such asset.

Holders of promissory notes and negotiable documents

81. The law should provide that the rights of a [person who by other law takes rights in a promissory note or negotiable document free of claims to it] [holder in due course of a promissory note or negotiable document] takes such asset free of a security right that is effective against third parties.

Holders of rights in money

82. The law should provide that a person in possession of money holds the money free of a security right in the money [if that person gives value for the money or has no knowledge that the transfer of the money to that person violates the terms of the security agreement. This recommendation does not lessen the rights of holders of money under law other than this law].

Statutory (preferential) creditors

83. The law should limit, both in number and amount, preferential claims that have priority over security rights that are effective against third parties, and to the extent preferential claims exist, they should be described in the law in a clear and specific way.

Holders of rights in assets for improving and storing the assets

84. If applicable law gives rights equivalent to security rights to a creditor who has added value to goods (e.g. by repairing them) or preserved the value of goods (e.g. by storing them), such rights should be limited to the goods whose value has been improved or preserved that are in the possession of such creditor, and should have priority over pre-existing security rights in the goods that are effective against third parties only to the

extent that the value added by the improvement or preservation directly benefits the holders of the pre-existing security rights.

Creditors in insolvency proceedings

[Note to the Working Group: See recommendation I in the recommendations of this Guide on Insolvency: “The insolvency law should specify that, if a security right is entitled to priority under law other than the insolvency law, that priority continues unimpaired in insolvency proceedings except if, pursuant to the insolvency law, another claim is given priority. Such exceptions should be minimal and clearly set forth in the insolvency law. This recommendation is subject to Recommendation 88 of the Insolvency Guide.”]

Subordination agreements

85. The law should provide that a holder of a security right entitled to priority may at any time subordinate its priority unilaterally or by agreement in favour of any existing or future competing claimant.

[Note to the Working Group: As to subordination agreements in the case of the grantor’s insolvency, see recommendation J in the recommendations of this Guide on Insolvency: “The insolvency law should provide that if a holder of a security right in an asset of the insolvency estate has subordinated its priority unilaterally or by agreement in favour of any existing or future competing claimant, such subordination is binding in insolvency proceedings with respect to the grantor.”]

A/CN.9/WG.VI/WP.21/Add.2

Report of the Secretary-General: recommendations of the draft
Legislative Guide on Secured Transactions

ADDENDUM

CONTENTS

	<i>Recommendations</i>	<i>Page</i>
VII. Pre-default rights and obligations of the parties	86-87	
VIII. Default and enforcement.	88-124	

VII. Pre-default rights and obligations of the parties**Purpose**

The purpose of the provisions of the law on pre-default rights and obligations of the parties is to:

- (a) Provide rules on additional terms for a security agreement with a view to rendering secured transactions more efficient and predictable;
- (b) Reduce transaction costs by eliminating the need to negotiate and draft terms to be included in the security agreement where the rules provide an acceptable basis for agreement;
- (c) Reduce potential disputes;
- (d) Provide a drafting aid or checklist of issues the parties may wish to address at the time of negotiation and conclusion of the security agreement; and
- (e) Encourage party autonomy.

Party autonomy

86.

Alternative A

The law should allow the parties to waive or vary their rights and obligations unless such waiver or variation is against public policy or fails to adequately protect third parties.

Alternative B

The law should provide that, except as otherwise provided in [specify the provisions that may not be derogated from or varied by agreement], the secured creditor and the grantor may derogate from or vary by agreement its provisions relating to their respective rights and obligations. Such an agreement should not affect the rights of any person who is not a party to the agreement.

[Note to the Working Group: The Working Group may wish to consider the formulation of the recommendation on party autonomy and whether it should be placed in

this Chapter or in the Chapter on scope and general provisions. The Working Group may also wish to consider together with this recommendation the recommendations on party autonomy in Chapter VIII.]

Suppletive rules

87. The law should include suppletive, non-mandatory rules that would apply in the absence of contrary agreement of the parties. Such rules should, *inter alia*:

- (a) Provide for the care of the encumbered assets by either the grantor or the secured creditor in possession of the encumbered assets;
- (b) Preserve the security rights in the encumbered assets, including the right to proceeds or civil fruits derived from the encumbered assets;
- (c) Provide for the right of the grantor to continue the operation of its business including the right to use, commingle and dispose of the encumbered assets in the ordinary course of its business; and
- (d) Secure the discharge of a security right once the obligation it secures has been paid or otherwise performed.

VIII. Default and enforcement

Purpose

The purpose of the provisions of the law on default and enforcement is to:

- (a) Provide clear and simple procedures for the enforcement of security rights after debtor default in a predictable and efficient manner;
- (b) Provide procedures that maximize the potential realization value of the encumbered assets for the grantor, the secured creditor and other creditors of the grantor;
- (c) Provide for expeditious judicial and, subject to appropriate safeguards, non-judicial methods for the secured creditor to realize the value of the encumbered assets;
- (d) Coordinate the secured transactions enforcement regime with other law governing the enforcement of claims in encumbered assets, including insolvency law.

Scope

88. The law should provide that this Chapter does not apply to an absolute transfer of receivables, except to the extent that there is recourse to the transferor for a payment default of the account debtor.

[Note to the Working Group: Recommendation 88 is intended to clarify that this Chapter applies only to assignments that serve security purposes.]

General standard of conduct

89. The law should provide that all parties must enforce their rights and perform their obligations under the rules recommended of this Chapter in good faith and in a commercially reasonable manner. Any party that fails to comply with the rules of this Chapter is liable for any loss caused by that failure.

[Note to Working Group: The Working Group may wish to consider whether the principle in recommendation 89 should be applied, as appropriate, in the exercise of rights and performance of duties under all Chapters of the Guide.]

Party autonomy

90. The law should provide that the general standard of conduct set forth in recommendation 89 cannot be waived or varied. No other rule recommended in this Chapter that gives rights to the grantor or to any other person or imposes obligations on the secured creditor may be waived or varied by agreement prior to the debtor's default.

91. Subject to recommendations 89 and 90, the law should permit parties to the security agreement or any other person to waive or vary by agreement rules recommended of this Chapter after the debtor's default. Such an agreement does not affect the rights of a person not party to the agreement. The person challenging such an agreement has the burden of showing that the agreement was made prior to default or was inconsistent with recommendations 89 or 90.

[Note to the Working Group: The words "subject to ..." are intended to clarify that the general standard of conduct provided in recommendation 89 is applicable and cannot be waived or varied. No reference is made to public policy as the standard set forth in recommendation 89 will reflect the public policy of the State enacting these recommendations. The Working Group may also wish to consider including the following additional text in recommendation 91: "The law should provide that a disposition of encumbered assets in accordance with a method provided in the security agreement is commercially reasonable unless the objecting party establishes that it was manifestly unreasonable." Such an agreement can take place before or after default and its objective would be to indicate how a secured creditor is to meet the obligation to dispose of an encumbered asset in a commercially reasonable way.]

Rights and remedies after default

92. The law should provide that after default the grantor and the secured creditor have the rights and remedies provided in the rules recommended in this Chapter, in the security agreement (except to the extent inconsistent with the rules recommended in this Chapter) and in any other law.

Secured creditor remedies

93. The law should provide that after default the secured creditor may exercise one or more of the following remedies:

- (a) Obtain possession of tangible encumbered assets;
- (b) Collect on encumbered assets that are receivables, negotiable instruments, bank accounts or proceeds from drawings under independent undertakings;
- (c) Enforce rights under negotiable documents;
- (d) Sell, lease, license, or otherwise dispose of encumbered assets;
- (e) Propose to the grantor that the secured creditor accept the encumbered assets in total or partial satisfaction of the secured obligations; and
- (f) Any other remedy provided in the security agreement (except to the extent inconsistent with the rules recommended in this Chapter) or any other law.

Grantor remedies

94. The law should provide that after default the grantor may exercise one or more of the following remedies:

(a) At any time after default and until the disposition, acceptance or collection of the encumbered assets by the secured creditor, pay in full the secured obligation, including interests and costs of enforcement up to the time of full payment, and obtain a release of the encumbered assets from the security right;

(b) Apply to a court or other authority for relief if the secured creditor has not complied or is not complying with its obligations under the rules recommended in this Chapter with respect to extrajudicial enforcement;

(c) Reject the proposal of the secured creditor to obtain the encumbered assets in total or partial satisfaction of the secured obligations within the time limits prescribed by the rules recommended in this Chapter; and

(d) Any other remedy provided in the security agreement (except to the extent prohibited by the rules recommended in this Chapter) or any other law.

Election of remedies

95. The law should provide that the exercise of a remedy does not prevent the exercise of another remedy.

[Note to Working Group: This recommendation relates to both the situation where exercise of one or more remedies has not resulted in the complete satisfaction of the secured obligation and the situation where a creditor or grantor has commenced the exercise of a remedy and later commences the exercise of a different remedy. For example, a creditor has given the notice for an auction and later chooses instead to pursue a judicial remedy.]

Other remedies

96. The law should provide that the exercise of remedies with respect to the encumbered assets under this law does not prevent any party from exercising its remedies with respect to the secured obligation.

Release of the encumbered assets after full payment

97. The law should provide that, after default and until a disposition, acceptance or collection of the encumbered assets by the secured creditor, the debtor, the grantor or any other interested party (e.g. a secured creditor with a lower priority ranking than that of the enforcing secured creditor, a guarantor or a co-owner of the encumbered assets) is entitled to pay in full the secured obligation, including interest and the costs of enforcement up to the time of full payment. The law should specify that the effect of such payment is to release the encumbered assets from the security right, or, to the extent provided in other law, to subrogate any other interested party that makes the payment to the rights of the secured creditor.

Judicial and extrajudicial enforcement

98. The law should enable the secured creditor after default to:

(a) Resort to court or other authority to enforce its security right; or

- (b) Enforce its security right without resorting to court or other authority.

[Notice of intention to pursue extrajudicial enforcement]

99. The law should:

(a) Address whether, when and to whom a secured creditor is required to give notice of its intention to pursue extrajudicial enforcement of a security right following default;

(b) State the manner in which the notice is to be given, its timing, and its minimum contents, including whether the notice [to the grantor] should contain an accounting of the amount then owed and a description of the steps the debtor or the grantor must take to obtain the release of the encumbered assets from the security right under recommendation 97;

(c) Provide that the notice should be in a language that is reasonably expected to inform its recipients about its contents, such as the language of the security agreement;

(d) Address whether the notice must be registered in the security rights registry;

(e) Address the legal consequences of insufficient or erroneous notices of intention to pursue extrajudicial enforcement; and

(f) List circumstances in which the notice need not be given in order to avoid a negative effect on the realization value of the encumbered assets (e.g. perishable tangibles).]

[Note to the Working Group: The Working Group may wish to consider recommendation 99 together with recommendations 111 and 112. The Working Group may also wish to consider whether, while recommendation 99 may be appropriate in the case of consumer grantors or security rights in immovable property, it might inadvertently give a business grantor the opportunity to move movable encumbered assets beyond the reach of the secured creditor and thus frustrate the purpose of the security right. If the Working Group finds that assumption to be correct, it may wish to replace recommendation 99 by text addressing notices to consumer grantors or leave the matter to consumer-protection law.]

Objections to extrajudicial enforcement

100. The law should provide that nothing in the law prevents the debtor, the grantor or other interested parties (e.g. a secured creditor with a lower priority ranking than that of the enforcing secured creditor, a guarantor or a co-owner of the encumbered assets) from applying to a court or other authority for relief if the secured creditor has not complied or is not complying with its obligations under the rules recommended in this Chapter. The law should build safeguards into the process to discourage unfounded applications and to prevent any improper interference with or undue delay of the secured creditor's ability to realize on encumbered assets.

Dispossession of the debtor

101. The law should provide that after default the secured creditor is entitled to obtain possession of the encumbered assets either without resorting to a court or other authority, or with the assistance of a court or other authority. In either case, the law should provide an expedited process enabling a secured creditor to obtain, upon ex parte application, a court order obliging the grantor either to permit the secured party to take possession of the

encumbered assets or to keep the encumbered assets in their present location and condition until further court order, and to permit service of the order on the grantor concurrently with or prior to the giving of notice of the application and any other notice required under the rules recommended in this Chapter.

[Note to the Working Group: Any person entitled to seek relief under recommendation 100 may do so.]

Collection of receivables

102. The law should provide that after default the secured creditor may instruct any account debtor on a receivable that is an encumbered asset to pay the receivable directly to the secured creditor or, if otherwise instructed in the notification of the assignment by the secured creditor in a writing received by the account debtor, in accordance with such payment instruction (for the rights of account debtors, see recommendations 17-23 in A/CN.9/WG.VI/WP.21).

[Note to the Working Group: Recommendation 102 tracks the language of article 17 (2) of the United Nations Assignment Convention.]

103. The law should provide that the secured creditor's right to collect a receivable includes the right to enforce any right supporting payment or performance of the receivable, such as a guarantee or security right.

Negotiable instruments

104. The law should provide that after default the secured creditor has the right to enforce a negotiable instrument against a person obligated on that instrument. However, as between the secured creditor and the person obligated on the negotiable instrument or other persons claiming rights under the law governing negotiable instruments, the obligations and rights of those persons are determined by the law governing negotiable instruments.

[Note to Working Group: The commentary will include the following examples of such persons:

(a) The person obligated on the negotiable instrument may be obligated to pay only a holder or other person entitled to enforce the instrument under the law governing negotiable instruments; and

(b) The right of the person obligated on the instrument to raise defences to that obligation is determined by the law governing negotiable instruments.]

105. The law should provide that the secured creditor's right to enforce a negotiable instrument includes the right to enforce any right supporting payment or performance of the negotiable instrument, such as a guarantee or security right.

Proceeds from drawings under independent undertakings

106. The law should provide that a secured creditor's post-default enforcement rights in the proceeds from a drawing under an independent undertaking are subject to the rights, under the law and practice governing independent undertakings, of the issuer/guarantor or nominated person and of any other beneficiary named in the undertaking or to whom a transfer of drawing rights has been effected. Neither an issuer/guarantor nor a nominated bank is obligated to pay any person other than the named beneficiary, an acknowledged

transferee beneficiary, a nominated bank, or an acknowledged assignee of proceeds. The law should provide that a secured creditor that is an acknowledged assignee of the proceeds from a drawing under an independent undertaking has the right to enforce the acknowledgement against an issuer/guarantor or nominated person that withholds assigned proceeds contrary to its acknowledgement.

[Note to the Working Group: To emphasize that this is a type of original encumbered assets and not proceeds from a different type of encumbered assets, the Working Group may wish to consider replacing the words “proceeds from the drawing from an independent undertaking” with words along the lines “the beneficiary’s right to payment resulting from a drawing under an independent undertaking”.]

Bank accounts

107. The law should provide that after default a secured creditor who has control of a bank account (see recommendation 50 in A/CN.9/WG.VI/WP.21/Add.1) is entitled to enforce its security right in accordance with the terms of the agreement with the bank establishing control without having to resort to a court or other authority. However, with respect to a bank account where the grantor is an individual and the obligation secured by the security right in the bank account was incurred for the grantor’s personal, family or household purposes, the secured creditor may enforce its security right only by resorting to a court or other authority, whether or not it has control of the bank account.

108. The law should provide that a secured creditor who does not have control of a bank account is entitled to enforce the security right only pursuant to a court order.

Negotiable documents

109. The law should provide that after default the secured creditor has the right to enforce a negotiable document against the issuer. However, as between the secured creditor and the issuer, the obligation of the issuer is determined by the law governing negotiable documents.

[Note to Working Group: The commentary will include the example that the issuer may be obligated to deliver the goods only to a holder of the negotiable document with respect to them.]

Disposition of encumbered assets

110. The law should provide that a secured creditor after default is entitled to sell, lease, license or otherwise dispose of encumbered assets:

- (a) By resort to court or other authority; or
- (b) Without resorting to court or other authority.

Advance notice with respect to extrajudicial disposition of encumbered assets

111. The law should:

- (a) Address whether, when and to whom a secured creditor is required to give notice with respect to extrajudicial disposition of an encumbered asset after default;
- (b) State the manner in which any such notice is to be given, its timing, and its minimum contents, including whether the notice [to the grantor] should contain an accounting of the amount then owed and the right of the debtor or the grantor to obtain the

release of the encumbered assets from the security right under recommendation 97;

(c) Provide that any such notice should be in a language that is reasonably expected to inform its recipients about its contents (it is sufficient if the notice is in the language of the security agreement);

(d) Address the legal consequences of insufficient or erroneous notices of with respect to extrajudicial dispositions; and

(e) List circumstances in which any such notice need not be given in order to avoid a negative effect on the realization value of the encumbered assets (e.g. perishable tangibles).

112. The law should provide rules ensuring that the notice can be given in an efficient, timely and reliable way so as to protect the debtor, the grantor or other interested parties, while, at the same time, avoiding having a negative impact on the secured creditor's remedies and the potential realization value of the encumbered assets.

[Note to Working Group: As there is a significant amount of overlap between recommendation 111 and recommendation 99 (which may be appropriate only for consumer grantors), the Working Group may wish to consider whether recommendation 99 should be retained. If recommendation 99 is retained, the Working Group may wish to consider whether it should be aligned with recommendations 111 and 112.]

Acceptance of encumbered assets in satisfaction of the secured obligation

113. The law should provide that after default a secured creditor may propose to accept, without resorting to a court or other authority, one or more of the encumbered assets in total or partial satisfaction of the secured obligation.

114. The law should provide that a secured creditor who proposes to accept an encumbered asset in total or partial satisfaction of the secured obligation must give advance notice of the proposal to:

(a) The grantor, the debtor and any other person who owes payment of the secured obligation (e.g. a guarantor);

(b) Any person with rights in the encumbered asset who, prior to the sending of the notice by the secured creditor, has notified in writing the secured creditor of those rights; and

(c) Any other secured creditor who has registered a notice of a security right in the encumbered asset in the name of the grantor or who was in possession of the encumbered asset at the time it was seized by the secured creditor.

115. The law should provide that, if a person entitled to notice under recommendation 114 objects in writing to a proposal [within a short time period, such as 20 days, of the date notice is given] to accept the encumbered assets in total or partial satisfaction of the secured obligation, the secured creditor may not proceed with the proposal but must dispose of the encumbered assets in accordance with the rules governing dispositions. However, the secured creditor should be entitled to apply to a court or other authority for a determination of the reasonableness of the objection.

Surplus and shortfall

116. The law should provide that the enforcing secured creditor must apply any proceeds of its enforcement (including costs of enforcement) to the secured obligations. Except as provided in recommendation 117, the enforcing secured creditor must pay any surplus remaining after such application to subordinate competing claimants, who, prior to any distribution of the surplus, gave written notice of their claims to any surplus to the enforcing secured creditor. Any balance remaining must be remitted to the grantor.

117. The law should also provide that whether or not there is any dispute as to the entitlement of any claimant or as to the priority of payment, the enforcing secured creditor may pay the surplus to a competent judicial or other authority or to a public deposit fund for distribution in accordance with generally applicable procedural rules.

[Note to the Working Group: The reference to “a competent judicial or other authority, or to a public deposit fund” in the last sentence tracks the language in the United Nations Assignment Convention, article 17(8).]

118. The law should provide that distribution of the proceeds realized by a judicial disposition or other officially administered process is to be made in accordance with general rules of the State governing execution proceedings.

119. The law should provide that the grantor and any other person who owes payment of the secured obligation are liable for any shortfall still owing after application of the proceeds of enforcement to the secured obligation.

Right of prior-ranking secured creditor to take over enforcement

120. The law should provide that a prior-ranking secured creditor is entitled to take control of enforcement initiated by a subordinate competing claimant at any time before final disposition, acceptance or collection of the encumbered assets. The right to take control includes the right to choose whether or not any disposition will be administered by a court or other authority.

Title or other right acquired through non-judicial disposition

121. The law should provide that, if a secured creditor elects to dispose of an encumbered asset without resorting to a court or other authority, the person that acquires title or other right in the asset in good faith acquires its right in the asset subject to prior-ranking rights but takes free of the rights of the grantor, the enforcing secured creditor and any subordinate competing claimant. The same rule applies to the title or other right acquired by a secured creditor who has accepted the encumbered assets in total or partial satisfaction of the secured obligation.

[Note to the Working Group: Reference is made to “title or other right” since, according to recommendation 110 the secured creditor may “sell, lease, license or otherwise dispose of encumbered assets.”]

Title or other right acquired through judicial disposition

122. The law should provide that, if a secured creditor disposes of the encumbered assets through a judicial or other officially administered process, the title or other right acquired by the transferee should be determined by the general rules of the State governing

execution proceedings (for the distribution of the money realized by the disposition, see recommendation 118).

Intersection of movable and immovable secured transactions law

123. The law should provide that:

(a) A security right in fixtures in immovables may be enforced in accordance with either this law or the law governing enforcement of encumbrances on immovable property; and

(b) If a secured obligation is secured by both a security right in a movable and an encumbrance on an immovable, the security right in the movable may be enforced in accordance with this law or the law governing enforcement of encumbrances on immovable property.

Coordination with other law

124. The law should be coordinated with general civil procedure law to provide a right for secured creditors to intervene in court proceedings initiated by other creditors of the grantor so as to protect security rights and to ensure the same priority status of security rights as under the law.

A/CN.9/WG.VI/WP.21/Add.3

Recommendations of the draft Legislative Guide on Secured Transactions

ADDENDUM

CONTENTS

Page

IX. Insolvency	
--------------------------	--

Introduction

1. This note includes recommendations taken from the UNCITRAL Legislative Guide on Insolvency Law (the Insolvency Guide), indicated by numbers in parentheses (the numbers reflect the numbers of the Insolvency Guide), and recommendations A-K, which are new and therefore additional to the recommendations in the Insolvency Guide.

2. The recommendations included from the Insolvency Guide are those that specifically address issues relevant to the treatment of secured creditors and their rights in insolvency, as well as those recommendations regarded as necessary to explain that treatment. So, for example, the definition of “assets of the debtor” is included to explain the scope of the insolvency estate formed on commencement of the insolvency proceedings and thus the assets that will be affected by the commencement of those proceedings.

IX. Insolvency**Recommendations**

The following definitions are taken from the glossary of the Insolvency Guide (Introduction, paragraph 12):

12. (b) “Assets of the debtor”³: property, rights and interests of the debtor, including rights and interests in property, whether or not in the possession of the debtor, tangible or intangible, movable or immovable, including the debtor’s interests in encumbered assets or in third party-owned assets;

12. (pp) “Security interest”: a right in an asset to secure payment or other performance of one or more obligations.

³ For the purposes of this chapter, the term “debtor” as used in the recommendations taken from the Insolvency Guide should be read as referring to a person who meets the requirements for the commencement of insolvency proceedings (see Insolvency Guide, part two, chapter I, section A, paras. 1-11 and recommendation 8). Where the security right at issue (which secures the debtor’s obligation) is granted by the debtor, the term “debtor” also refers to the grantor. However, where the security right at issue is granted not by the debtor but by a third party (e.g. on the basis of some contractual arrangement with the debtor), the term “debtor” refers to the third-party grantor, since only in that third-party grantor’s insolvency is the secured creditor a secured creditor with a proprietary right in the encumbered assets. In the insolvency of a non-grantor debtor, the creditor is an unsecured creditor with an unsecured claim against the non-grantor debtor.

[*Note to the Working Group: The insolvency chapter will need to address other terms used in the Insolvency Guide and the Secured Transactions Guide; the definition of “security interest” and “security right”, for example, differ in the two texts.*]

Insolvency Guide recommendations

Key objectives of an efficient and effective insolvency law

(1) In order to establish and develop an effective insolvency law, the following key objectives should be considered:

- (a) Provide certainty in the market to promote economic stability and growth;
- (b) Maximize value of assets;
- (c) Strike a balance between liquidation and reorganization;
- (d) Ensure equitable treatment of similarly situated creditors;
- (e) Provide for timely, efficient and impartial resolution of insolvency;
- (f) Preserve the insolvency estate to allow equitable distribution to creditors;
- (g) Ensure a transparent and predictable insolvency law that contains incentives for gathering and dispensing information; and
- (h) Recognize existing creditors rights and establish clear rules for ranking of priority claims.

(4) The insolvency law should specify that where a security interest is effective and enforceable under law other than the insolvency law, it will be recognized in insolvency proceedings as effective and enforceable.

(7) In order to design an effective and efficient insolvency law, the following common features should be considered:

- (a)-(d) ...
- (e) Protection of the insolvency estate against the actions of creditors, the debtor itself and the insolvency representative, and where the protective measures apply to secured creditors, the manner in which the economic value of the security interest will be protected during the insolvency proceedings;
- (f)-(r) ...

Law applicable to validity and effectiveness of rights and claims

(30) The law applicable to the validity and effectiveness of rights and claims existing at the time of the commencement of insolvency proceedings should be determined by the private international law rules of the State in which insolvency proceedings are commenced.

Law applicable in insolvency proceedings: lex fori concursus

(31) The insolvency law of the State in which insolvency proceedings are commenced (*lex fori concursus*) should apply to all aspects of the commencement, conduct, administration and conclusion of those insolvency proceedings and their effects. These may include, for example:

- (a)-(i) ...

- (j) Treatment of secured creditors;
- (k)-(n) ...
- (o) Ranking of claims;
- (p)-(s) ...

Assets constituting the estate

(35) The insolvency law should specify that the estate should include:

- (a) Assets of the debtor, including the debtor's interest in encumbered assets and in third party-owned assets;
- (b)-(c) ...

Draft additional recommendations

Unitary approach

A. The insolvency law should provide that, in the case of the insolvency proceedings of the grantor, the acquisition financier has the rights and duties of a holder of a security right.

Non-unitary approach

B. [The insolvency law should provide that, in the case of insolvency proceedings with respect to a buyer under a title retention arrangement, a grantor or a financial lessee, the seller, purchase-money lender or financial lessor has the rights and duties of a holder of a security right.] [The insolvency law should provide that, in the case of insolvency proceedings with respect to a buyer under a title retention arrangement, a grantor or a financial lessee, the seller or financial lessor has the rights and duties of a third-party owner of the asset under the UNCITRAL Legislative Guide on Insolvency Law.]

Treatment of assets acquired after commencement

C. Except as provided in [D], the insolvency law should provide that an asset of the estate acquired after the commencement of an insolvency proceeding is not subject to a security right created by the grantor before the commencement of the insolvency proceeding.

D. The insolvency law should provide that an asset of the estate acquired after the commencement of an insolvency proceeding with respect to the grantor is subject to a security right created by the grantor before the commencement of the insolvency proceeding to the extent the asset is proceeds (whether cash or non-cash) of an encumbered asset which was an asset of the grantor before the commencement of the proceeding.

Insolvency Guide recommendations

Provisional measures

(39) The insolvency law should specify that the court may grant relief of a provisional nature, at the request of the debtor, creditors or third parties, where relief is needed to protect and preserve the value of the assets of the debtor or the interests of creditors, between the time an application to commence insolvency proceedings is made and commencement of the proceedings, including:

(a) Staying execution against the assets of the debtor, including actions to make security interests effective against third parties and enforcement of security interests;

(b)-(d) ...

Measures applicable on commencement

(46) The insolvency law should specify that, on commencement of insolvency proceedings [add: a, b, c, d, e]:

(a) Commencement or continuation of individual actions or proceedings concerning the assets of the debtor, and the rights, obligations or liabilities of the debtor are stayed;

(b) Actions to make security interests effective against third parties and to enforce security interests are stayed;

(c) Execution or other enforcement against the assets of the estate is stayed;

(d) The right of a counterparty to terminate any contract with the debtor is suspended; and

(e) The right to transfer, encumber or otherwise dispose of any assets of the estate is suspended.

Draft additional recommendation

Effectiveness of security rights in insolvency

E. The insolvency law should provide that, if a security right was effective against third parties at the time of the commencement of insolvency proceedings, action may be taken after the commencement of the insolvency proceedings to continue, preserve or maintain the effectiveness against third parties of the security right to the extent and in the manner permitted under the secured transactions law.⁴

Insolvency Guide recommendations

Duration of measures automatically applicable on commencement

(49) The insolvency law should specify that the measures applicable on commencement of insolvency proceedings remain effective throughout those proceedings until:

(a) The court grants relief from the measures;

(b) In reorganization proceedings, a reorganization plan becomes effective; or

⁴ See footnote to recommendation 46(b) of the Insolvency Guide, which provides that: "If law other than the insolvency law permits those security interests to be made effective within certain specified time periods, it is desirable that the insolvency law recognize those periods and permit the interest to be made effective where the commencement of insolvency proceedings occurs before expiry of the specified time period. Where law other than the insolvency law does not include such time periods, the stay applicable on commencement would operate to prevent the security interest being made effective."

(c) In the case of secured creditors in liquidation proceedings, a fixed time period specified in the law expires, unless it is extended by the court for a further period on a showing that:

- (i) An extension is necessary to maximize the value of assets for the benefit of creditors; and
- (ii) The secured creditor will be protected against diminution of the value of the encumbered asset in which it has a security interest.

Protection from diminution of the value of encumbered assets

(50) The insolvency law should specify that, upon application to the court, a secured creditor should be entitled to protection of the value of the assets in which it has a security interest. The court may grant appropriate measures of protection that may include:

- (a) Cash payments by the estate;
- (b) Provision of additional security interests; or
- (c) Such other means as the court determines.

Relief from measures applicable on commencement

(51) The insolvency law should specify that a secured creditor may request the court to grant relief from the measures applicable on commencement of insolvency proceedings on grounds that may include that:

- (a) The encumbered asset is not necessary to a prospective reorganization or sale of the debtor's business;
- (b) The value of the encumbered asset is diminishing as a result of the commencement of insolvency proceedings and the secured creditor is not protected against that diminution of value; and
- (c) In reorganization, a plan is not approved within any applicable time limits.

Power to use and dispose of assets of the estate

(52) The insolvency law should permit:

- (a) The use and disposal of assets of the estate (including encumbered assets) in the ordinary course of business, except cash proceeds; and
- (b) The use and disposal of assets of the estate (including encumbered assets) outside the ordinary course of business, subject to the requirements of recommendations 55 and 58.

Draft additional recommendation

Costs and expenses of maintaining value of the encumbered asset

F. The insolvency law should provide that the insolvency representative is entitled to recover from the value of an encumbered asset reasonable costs or expenses (including overhead as appropriate) incurred by the insolvency representative in maintaining, preserving or increasing the value of the encumbered asset for the benefit of the secured creditor.

Insolvency Guide recommendations

Further encumbrance of encumbered assets

(53) The insolvency law should specify that encumbered assets may be further encumbered, subject to the requirements of recommendations 65, 66 and 67.

Use of third-party-owned assets

(54) The insolvency law should specify that the insolvency representative may use an asset owned by a third party and in the possession of the debtor provided specified conditions are satisfied, including:

- (a) The interests of the third party will be protected against diminution in the value of the asset; and
- (b) The costs under the contract of continued performance of the contract and use of the asset will be paid as an administrative expense.

Ability to sell assets of the estate free and clear of encumbrances and other interests

(58) The insolvency law should permit the insolvency representative to sell assets that are encumbered or subject to other interests free and clear of those encumbrances and other interests, outside the ordinary course of business, provided that:

- (a) The insolvency representative gives notice of the proposed sale to the holders of encumbrances or other interests;
- (b) The holders are given the opportunity to be heard by the court where they object to the proposed sale;
- (c) Relief from the stay has not been granted; and
- (d) The priority of interests in the proceeds of sale of the asset is preserved.

Use of cash proceeds

(59) The insolvency law should permit the insolvency representative to use and dispose of cash proceeds if:

- (a) The secured creditor with a security interest in those cash proceeds consents to such use or disposal; or
- (b) The secured creditor was given notice of the proposed use or disposal and an opportunity to be heard by the court; and
- (c) The interests of the secured creditor will be protected against diminution in the value of the cash proceeds.

Burdensome assets

(62) The insolvency law should permit the insolvency representative to determine the treatment of any assets that are burdensome to the estate. In particular, the insolvency law may permit the insolvency representative to relinquish burdensome assets following the provision of notice to creditors and the opportunity for creditors to object to the proposed action, except that where a secured claim exceeds the value of the encumbered asset, and the asset is not required for a reorganization or sale of the business as going concern, the insolvency law may permit the insolvency representative to relinquish the asset to the secured creditor without notice to other creditors.

Security for post-commencement finance

(65) The insolvency law should enable a security interest to be granted for repayment of post-commencement finance, including a security interest on unencumbered assets, including after-acquired assets, or a junior or lower priority security interest on already encumbered assets of the estate.

(66) The law should specify that a security interest over the assets of the estate to secure post-commencement finance does not have priority ahead of any existing security interest over the same assets unless the insolvency representative obtains the agreement of the existing secured creditor(s) or follows the procedure in recommendation 67.

(67) The insolvency law should specify that, where the existing secured creditor does not agree, the court may authorize the creation of a security interest having priority over pre-existing security interests provided specified conditions are satisfied, including:

- (a) The existing secured creditor was given the opportunity to be heard by the court;
- (b) The debtor can prove that it cannot obtain the finance in any other way; and
- (c) The interests of the existing secured creditor will be protected.

Effect of conversion on post-commencement finance

(68) The insolvency law should specify that where reorganization proceedings are converted to liquidation, any priority accorded to post-commencement finance in the reorganization should continue to be recognized in the liquidation.

Automatic termination and acceleration clauses

(70) The insolvency law should specify that any contract clause that automatically terminates or accelerates a contract upon the occurrence of any of the following events is unenforceable as against the insolvency representative and the debtor:

- (a) An application for commencement, or commencement, of insolvency proceedings;
- (b) The appointment of an insolvency representative.

(71) The insolvency law should specify the contracts that are exempt from the operation of recommendation 70, such as financial contracts, or subject to special rules, such as labour contracts.

(72) The insolvency law should specify that the insolvency representative may decide to continue the performance of a contract of which it is aware where continuation would be beneficial to the insolvency estate. The insolvency law should specify that:

- (a) The right to continue applies to the contract as a whole; and
- (b) The effect of continuation is that all terms of the contract are enforceable.

Performance prior to continuation or rejection

(80) The insolvency law should specify that the insolvency representative may accept or require performance from the counterparty to a contract prior to continuation or rejection of the contract. Claims of the counterparty arising from performance accepted or required by the insolvency representative prior to continuation or rejection of the contract should be payable as an administrative expense:

(a) ...

(b) If the insolvency representative uses assets owned by a third party that are in the possession of the debtor subject to contract, that party should be protected against diminution of the value of those assets and have an administrative claim in accordance with subparagraph (a).

[Note to the Working Group: The commentary will make it clear that rejection of a credit agreement does not terminate the security agreement and does not extinguish the security right.]

Draft additional recommendation**Automatic termination clauses**

G. If the insolvency law provides that a contract clause which, upon the commencement of insolvency proceedings or the occurrence of another insolvency-related event, automatically terminates any obligation under a contract or accelerates the maturity of any obligation under a contract, is unenforceable as against the insolvency representative or the debtor, then the insolvency law should specify that such provision does not render unenforceable or invalidate a contract clause relieving a creditor from an obligation to make a loan or otherwise extend credit or other financial accommodations to or for the benefit of the debtor.

Insolvency Guide recommendations*Avoidance of security interests*

(88) The insolvency law should specify that notwithstanding that a security interest is effective and enforceable under law other than the insolvency law, it may be subject to the avoidance provisions of insolvency law on the same grounds as other transactions.

Financial contracts

(103) Once the financial contracts of the debtor have been terminated, the insolvency law should permit counterparties to enforce and apply their security interest to obligations arising out of financial contracts. Financial contracts should be exempt from any stay under the insolvency law that applies to the enforcement of a security interest.

Participation by creditors

(126) The insolvency law should specify that creditors, both secured and unsecured, are entitled to participate in insolvency proceedings and identify what that participation may involve in terms of the functions that may be performed.

Right to be heard and to request review

(137) The insolvency law should specify that a party in interest have a right to be heard on any issue in the insolvency proceedings that affects its rights, obligations or interests. For example, a party in interest should be entitled to:

- (a) Object to any act that requires court approval;
- (b) Request review by the court of any act for which court approval was not required or not requested; and
- (c) Request any relief available to it in insolvency proceedings.

Right of appeal

(138) The insolvency law should specify that a party in interest may appeal from any order of the court in the insolvency proceedings that affects its rights, obligations or interests.

Approval by classes

(150) Where voting on approval of the plan is conducted by reference to classes, the insolvency law should specify how the vote achieved in each class would be treated for the purposes of approval of the plan. Different approaches may be taken, including requiring approval by all classes or approval by a specified majority of the classes, but at least one class of creditors whose rights are modified or affected by the plan must approve the plan.

(151) Where the insolvency law does not require a plan to be approved by all classes, the insolvency law should address the treatment of those classes which do not vote to approve a plan that is otherwise approved by the requisite classes. That treatment should be consistent with the grounds set forth in recommendation 152.

Confirmation of an approved plan

(152) Where the insolvency law requires court confirmation of an approved plan, the insolvency law should require the court to confirm the plan if the following conditions are satisfied:

- (a) The requisite approvals have been obtained and the approval process was properly conducted;
- (b) Creditors will receive at least as much under the plan as they would have received in liquidation, unless they have specifically agreed to receive lesser treatment;
- (c) The plan does not contain provisions contrary to law;
- (d) Administrative claims and expenses will be paid in full, except to the extent that the holder of the claim or expense agrees to different treatment; and
- (e) Except to the extent that affected classes of creditors have agreed otherwise, if a class of creditors has voted against the plan, that class shall receive under the plan full recognition of its ranking under the insolvency law and the distribution to that class under the plan should conform to that ranking.

Challenges to approval (where there is no requirement for confirmation)

(153) Where a plan becomes binding on approval by creditors, without requiring confirmation by the court, the insolvency law should permit parties in interest, including

the debtor, to challenge the approval of the plan. The insolvency law should specify criteria against which a challenge can be assessed, which should include:

- (a) Whether the grounds set forth in recommendation 152 are satisfied; and
- (b) Fraud, in which case the requirements of recommendation 154 should apply.

Draft additional recommendation

Valuation of encumbered assets in reorganization proceedings

H. The insolvency law should provide that, in determining the liquidation value of encumbered assets in a reorganization proceeding, consideration should be given to the use of those assets and the purpose of the valuation. The liquidation value of those assets may be based on their value as part of a going concern.

[Note to the Working Group: The commentary will note that the Insolvency Guide commentary provides the same rule for all assets, see paragraph 66, part two, chapter II, section B.]

Insolvency Guide recommendations

Secured claims

(172) The insolvency law should specify whether secured creditors are required to submit claims.

Admission or denial of claims

- Valuation of secured claims

(179) The insolvency law should provide that the insolvency representative may determine the portion of a secured creditor's claim that is secured and the portion that is unsecured by valuing the encumbered asset.

Secured claims

(188) The insolvency law should specify that secured claims should be satisfied from the encumbered asset in liquidation or pursuant to a reorganization plan, subject to claims that are superior in priority to the secured claim, if any. Claims superior in priority to secured claims should be minimized and clearly set forth in the insolvency law. To the extent that the value of the encumbered asset is insufficient to satisfy the secured creditor's claim, the secured creditor may participate as an ordinary unsecured creditor.

Draft additional recommendations

Priority of a security right in insolvency proceedings

I. The insolvency law should specify that, if a security right is entitled to priority under law other than the insolvency law, that priority continues unimpaired in insolvency proceedings except if, pursuant to the insolvency law, another claim is given priority. Such exceptions should be minimal and clearly set forth in the insolvency law. This recommendation is subject to Recommendation 88 of the Insolvency Guide.

[Note to the Working Group: The commentary will provide examples of exceptions, such as post-commencement priority financings and privileged claims.]

Effect of a subordination agreement in insolvency proceedings

J. The insolvency law should provide that, if a holder of a security right in an asset of the insolvency estate has subordinated its priority unilaterally or by agreement in favour of any existing or future competing claimant, such subordination is binding in insolvency proceedings with respect to the grantor.

[Note to the Working Group: See recommendation 85 (see WP.21/Add.1), which sets forth the general rule on subordination applicable in the absence of insolvency proceedings.]

Impact of insolvency on conflict-of-laws rules

K. The law should provide that, notwithstanding the commencement of an insolvency proceeding, the creation, effectiveness against third parties, priority and enforcement of a security right are governed by the law that would be applicable in the absence of the insolvency proceeding. This recommendation does not affect the application of any insolvency rules, including any rules relating to avoidance, priority, or enforcement of security rights.

[Note to the Working Group: The commentary will clarify the relationship among this recommendation and recommendations 30 and 31 of the Insolvency Guide. The commentary will also explain that this recommendation refers to insolvency rules without regard to whether they are characterized for any purpose as procedural, substantive, jurisdictional or otherwise.]

A/CN.9/WG.VI/WP.21/Add.4

Recommendations of the draft Legislative Guide on Secured Transactions

ADDENDUM

CONTENTS

	<i>Recommendations</i>	<i>Page</i>
X . Acquisition financing devices		125-135

X. Acquisition financing devices

Purpose

The purpose of the provisions of the law on acquisition financing devices (sales with a retention of title arrangement, purchase-money security devices and financial leases) is to:

- (a) Recognize the importance of acquisition financing as a source of affordable credit, in particular for small- and medium-size businesses; and
- (b) Provide for equal treatment of all providers of acquisition financing, by subjecting them to the rules governing security rights or to [a different but equivalent set of rules] [certain of the rules governing security rights].

Equivalence of acquisition financing devices to security rights

125. The law should treat acquisition rights arising under transactions, such as sales with retention of title arrangements, purchase-money lending arrangements and financial leases, as security rights by including such rights within the definition of “security rights” and, thus, applying the rules governing security rights to these rights directly (“unitary approach”). Alternatively, the law might exclude such rights (or some of them) from the definition of “security rights”, but subject them to [a different but equivalent set of rules] [certain of the rules governing security rights] (“non-unitary approach”). In either case, the recommendations applicable to acquisition security rights should apply, as supplemented by the recommendations applicable to non-acquisition security rights.

Creation of acquisition security rights

126. The law should specify that a security right is created by agreement between the buyer, grantor or financial lessee (hereinafter referred to as “the grantor”) and the seller, secured creditor or financial lessor (hereinafter referred to as “the acquisition financier”) which is in writing and evidences the intent of the grantor to grant a security right or is accompanied by delivery of possession pursuant to the agreement and in accordance with recommendation 9. Writing includes a purchase order, invoice, general terms and conditions and the like. It also includes an electronic communication if the information contained therein is accessible so as to be usable for subsequent reference (see article 6 of the UNCITRAL Model Law on Electronic Commerce).

[Note to the Working Group: Recommendation 126 is based on recommendation 8 (see A/CN.9/WG.VI/WP.21) and is, in essence, consistent with the previous version of this recommendation (see A/CN.9/WG.VI/WP.17/Add.1, Rec. 2). The Working Group may wish to include a note to States that prefer to follow a non-unitary approach that could read along the following lines: "States that prefer to follow a non-unitary approach may wish to maintain the specific terminology (e.g. buyer, seller, financial lessee, financial lessor, etc.)."]

Effectiveness of acquisition security rights against third parties

127. The law should provide that, in order for a non-possessory acquisition security right to be effective against third parties, the acquisition financier has to register a notice covering its right in the relevant security rights registry. If the acquisition financier registers the notice not later than [specify a short time period, such as 20 or 30 days] from the time of actual delivery of the goods to the grantor, the right should also be effective against third parties whose rights arose between the time the acquisition security right was created and its registration. If the acquisition financier registers the notice after the expiration of that period, the acquisition security right is effective against third parties from the time the notice is registered.

Exceptions to the principle of registration

128. The law should provide that non-possessory acquisition security rights in consumer goods with resale value, such as motor vehicles, trailers, boats and aircraft, are effective against third parties when they are created and need not be registered in the security rights registry.

Priority of acquisition security rights over pre-registered non-acquisition security rights in future goods other than inventory

129. In the case of goods other than inventory, the law should provide that an acquisition security right has priority over a pre-registered security right in the same goods (even if a notice covering that pre-registered security right was registered in the security rights registry before the acquisition security right was registered) if: (i) the acquisition financier retains actual possession of the goods; (ii) notice of the acquisition security right was registered within a period of [the same number of days specified in recommendation 127] from the actual delivery of the goods to the grantor; or (iii) the acquisition security right became effective against third parties under recommendation 128 at the time it was created.

Priority of acquisition security rights over pre-registered non-acquisition security rights in future inventory

130. The law should provide that an acquisition security right has priority over a pre-registered security right in the grantor's inventory (even if that pre-registered right became effective against third parties before the acquisition security right became effective against third parties) if: (i) the acquisition financier retains actual possession of the goods; or (ii) before actual delivery of the inventory to the grantor, the acquisition financier: (a) registers a notice covering its right in the relevant security rights registry; and (b) notifies the holder of the pre-registered security right in writing that the acquisition financier intends to enter into one or more transactions pursuant to which that person will have a higher-ranking acquisition security right with respect to the additional inventory of the grantor described in the notification.

131. The law should provide that notification to holders of pre-registered security rights may cover multiple acquisition transactions between the same parties. However, the notification should be effective only for acquisition security rights created within a period of [specify time, such as five years] after the notification is given.

Cross-collateralization

132. The law should provide that an acquisition security right is subject to the recommendations in this Chapter regarding effectiveness against third parties and priority even if the acquisition financier: (i) also has a security right in the goods securing non-acquisition obligations of the grantor; or (ii) has a security right in other assets of the grantor securing the payment obligation relating to the acquisition security right.

Priority of acquisition security rights in proceeds of inventory

133. The law should provide that the priority, provided under recommendation 130, for an acquisition security right in inventory over a pre-registered security right in the same goods applies to the proceeds of such inventory, provided that the acquisition financier notified pre-registered financiers with a security right in assets of the same kind as the proceeds.

Enforcement

134.

Unitary approach

The law should provide that, in the case of default on the part of the grantor, the acquisition financier is entitled to repossess and dispose of the goods subject to the same rules applicable to security rights generally.

Non-unitary approach

The law should provide that, in the case of default on the part of the buyer, grantor or financial lessee, the seller, purchase-money secured creditor or financial lessor has, to the maximum extent possible, the same rights and remedies as the holder of a security right.

Insolvency

[Note to the Working Group: See recommendations A and B in the recommendations of this Guide on Insolvency:]

Unitary approach

A. The insolvency law should provide that, in the case of the insolvency proceedings of the grantor, the acquisition financier has the rights and duties of a holder of a security right.

Non-unitary approach

B. [The insolvency law should provide that, in the case of insolvency proceedings with respect to a buyer under a title retention arrangement, a grantor or a financial lessee, the seller, purchase-money lender or financial lessor has the rights and duties of a holder of a security right.] [The insolvency law should provide that, in the case of insolvency proceedings with respect to a buyer under a title retention arrangement, a grantor or a

financial lessee, the seller or financial lessor has the rights and duties of a third-party owner of the asset under the UNCITRAL Legislative Guide on Insolvency Law.]

[Note to the Working Group: The two alternatives in recommendation B reflect different approaches that States may take with respect to the extent acquisition financing devices will be treated fully or only to some extent in the same way as purchase-money security rights.]

Conflict of laws

135. The law should provide that the conflict-of-laws recommendation apply to acquisition financing devices with the exception of recommendation 137.

A/CN.9/WG.VI/WP.21/Add.5

Recommendations of the draft Legislative Guide on Secured Transactions

ADDENDUM

CONTENTS

	<i>Recommendations</i>	<i>Page</i>
XI. Conflict of laws	136-149	
XII. Transition	150-158	

XI. Conflict of laws***Purpose**

The purpose of conflict-of-laws rules is to determine the law applicable to each of the following issues: the creation of a security right; the pre-default rights and obligations between the secured creditor and the grantor; the effectiveness of a security right against third parties; the priority of a security right over the rights of competing claimants; and the enforcement of a security right.

These rules should also be applicable, as appropriate, to rights that are not classified as “security rights” but which fulfil a similar economic function and are susceptible of competing with security rights, such as the rights of a transferee of receivables, a supplier of goods who retains title to the goods in a retention-of-title arrangement or a financial lessor.

[Note to the Working Group: The Working Group may wish to note that the words “as appropriate” are intended to provide some flexibility for States following a non-unitary approach as to the manner in which they might assimilate acquisition financing devices to security devices (see A/CN.9/574, para. 34). The Working Group may also wish to recall that the words “between the parties” had been added after the word “creation” to clarify the distinction made in the Guide between “effectiveness between the parties” and “effectiveness against third parties”. However, there are no two types or two times of creation, but only two types of effectiveness. Therefore, the recommendations no longer refer to creation “as between the parties”. The Working Group may wish to include a footnote to the first paragraph of the purpose section that “The meaning of these terms is elaborated in chapters IV, V, VI, VII and VIII respectively”.]

Security rights in tangible property

136. The law should provide that the creation, the effectiveness against third parties and the priority over the rights of competing claimants of a security right in tangible property are governed by the law of the State in which the encumbered asset is located (for goods in transit and export goods, see also recommendation 142). However, with respect to security rights in tangible property of a type ordinarily used in more than one State, the law should

* Recommendations prepared in close cooperation with the Hague Conference on Private International Law.

provide that such issues are governed by the law of the State in which the grantor is located.

[Note to the Working Group: The Working Group may wish to consider that recommendation 136 should apply to negotiable documents. As to negotiable instruments, the Working Group may wish to consider whether recommendation 136 should apply, except to the extent they are subject to a non-possessory security right in which case recommendation 137 should apply.]

Security rights in intangible property

137. The law should provide that the creation, the effectiveness against third parties and the priority over the rights of competing claimants of a security right in intangible property are governed by the law of the State in which the grantor is located.

Security rights in proceeds from a drawing under an independent undertaking

138. [The law should provide that:

(a) Subject to subparagraphs (b) and (c), the creation, the effectiveness against third parties, the priority over the rights of competing claimants and the enforcement of a security right in the proceeds from a drawing under an independent undertaking are governed by the law of the State in which the grantor is located;

(b) To the extent that payment is sought from the issuer/guarantor or nominated person or made under an acknowledgement by the issuer/guarantor or nominated person, the effectiveness against third parties, the priority over the rights of competing claimants and the enforcement of a security right in the proceeds from a drawing under an independent undertaking are governed by the law of the State where the [relevant branch of the] payor of the proceeds is located; and

(c) The rights and duties of an issuer/guarantor or nominated person to act or not act on a request for an acknowledgement of an assignment of proceeds or on an acknowledgement made by it are governed by the law that is chosen in that person's acknowledgement or, absent an acknowledgement or a choice of law therein, by the law of the State in which that person is located and without regard to the law governing the independent undertaking itself.]

[Note to the Working Group: The Working Group may wish to consider whether: (i) subparagraph (a) is necessary as it repeats the rule in recommendation 137; (ii) subparagraph (b) is necessary as it deals with the issue of account debtor protection addressed in recommendation 147; (iii) subparagraph (c) is necessary since it deals with a contractual matter. The Working Group may also wish to specify the meaning of location of a person for the purposes of this recommendation.]

Security rights in bank accounts

139. [Except as otherwise provided in recommendation 140,] the law should provide that the creation, the effectiveness against third parties, the priority over the rights of competing claimants, the rights and duties of the depositary bank with respect to the security right and the enforcement of the security right in a bank account are governed by

Alternative A

the law of the State expressly stated in the account agreement as the State whose law governs the account agreement or, if the account agreement expressly provides that another law is applicable to all such issues, that other law. However, the law designated in this recommendation applies only if the depositary bank has, at the time of the account agreement, an office in that State which is engaged in the regular activity of maintaining bank accounts.

[Note to the Working Group: Alternative A is based on article 4.1 of the Hague Convention on the Law Applicable to Certain Rights in Respect of Securities Held With An Intermediary, “the Hague Convention”.]

139 bis. If the applicable law is not determined under recommendation 139, but it is expressly and unambiguously stated in a written account agreement that the bank entered into the account agreement through a particular office, the law should provide that the law applicable to all the issues specified in recommendation 139 is the law in force in the State in which that office was then located, provided that such office then satisfied the condition specified in the second sentence of recommendation 139.

[Note to the Working Group: This recommendation is based on article 5.1 of the Hague Convention.]

139 ter. If the applicable law is not determined under recommendation 139 or 139 bis, that law is the law in force in the State under whose law the depositary bank is incorporated or otherwise organized at the time the written account agreement is entered into or, if there is no such agreement, at the time the bank account was opened.

[Note to the Working Group: This recommendation is based on article 5.2 of the Hague Convention.]

139 quater. If the applicable law is not determined under any of recommendations 139, 139 bis or 139 ter, that law is the law in force in the State in which the depositary bank has its place of business, or, if the depositary bank has more than one place of business, its principal place of business, at the time the written account agreement is entered into or, if there is no such agreement, at the time the bank account was opened.

[Note to the Working Group: This recommendation is based on article 5.3 of the Hague Convention.]

Alternative B

Same as alternative A but without recommendations 139 bis, 139 ter and 139 quater which could be replaced by language along the following lines: “If the applicable law is not determined under recommendation 139, the law should specify fallback rules based on article 5 of the Hague Convention.”

[Note to the Working Group: Alternative B is a simplified version of alternative A. The commentary could include the detailed fallback rules of the Hague Convention with sufficient explanation. A variation of alternative B would be to leave out of the recommendation any reference to fallback rules but instead to include and explain them sufficiently in the commentary.]

Alternative C

the law of the State [with the closest connection to the depositary bank with which] [where] the bank account is held.

[Note to the Working Group: Alternative C has been added at the request of the Working Group (see A/CN.9/574, para. 80). It is based on the assumption that the location of a bank account can be easily determined (for example, through an international bank account number which contains both the account number and the code of the bank with which the account is held.)]

140. [If the State in which the grantor is located recognizes registration as a method of achieving effectiveness against third parties of a security right in a bank account, the law of that State determines the effectiveness against third parties of a security right in a bank account achieved by registration.]

[Note to the Working Group: As requested by the Working Group (see A/CN.9/574, para. 80), recommendation 140 has been added within square brackets. This recommendation would supplement recommendation 139 (regardless of which alternative is adopted) to provide that, if the State in which the grantor is located recognizes registration as a method of achieving third-party effectiveness, the effectiveness against third parties of a security right in a bank account achieved by registration would be governed by the law of the State in which the grantor is located. If adopted, this suggestion would, under those circumstances, enable a secured creditor to register a security right in a bank account in the same State in which it registers a security right in other intangible property. Recommendation 140 applies only to third-party effectiveness achieved by registration. Third-party effectiveness achieved by control or any other method would be governed by the law designated in recommendation 139 (under recommendation 63 in A/CN.9/WG.VI/ WP.21/Add.1, a security right in a bank account made effective against third parties achieved by control has priority over a security right in a bank account made effective against third parties by registration).]

Proceeds

141. The law should provide that:

(a) The creation of a security right in proceeds is governed by the law governing the creation of the security right in the original encumbered asset from which the proceeds arose; and

(b) The effectiveness against third parties and the priority over the rights of competing claimants of a security right in proceeds are governed by the same law as the law governing the effectiveness against third parties and the priority over the rights of competing claimants of a security right in original encumbered assets of the same kind as the proceeds.

Goods in transit and export goods

142. The law should provide that a security right in tangible property (other than negotiable instruments or negotiable documents) in transit or to be exported from the State in which it is located at the time of the creation of the security right may also be created and made effective against third parties under the law of the State of the ultimate destination, provided that the property reaches that State within a specified short time period after the time of creation of the security right.

[Note to the Working Group: As they provided for the application of the same law, the recommendations on goods in transit and export goods have been merged. The Working Group may wish to consider whether recommendation 142 should apply to all

types of “tangible property”, a term defined in the Guide to include negotiable instruments and negotiable documents.]

Meaning of “location” of the grantor

143. The law should provide that, for the purposes of the recommendations in this chapter, the grantor is located in the State in which it has its place of business. If the grantor has a place of business in more than one State, the grantor’s place of business is that place where the central administration of the grantor is exercised. If the grantor does not have a place of business, reference is to be made to the habitual residence of the grantor.

Relevant time when determining location

144. The law should provide that references to the location of the assets or of the grantor in the recommendations in this chapter refer, for creation issues, to that location at the time of the creation of the security right and, for third-party effectiveness and priority issues, to that location at the time the issue arises.

[Note to the Working Group: Under recommendation 144, in the event of a change in the location of the assets or the grantor (as the case may be) after creation of a security right, third-party effectiveness and priority of the security right are governed by the law of the State in which the assets or the grantor are currently located even if all the competing claims were also created before the relocation. The Working Group may wish to consider whether an exception should be introduced pursuant to which such priority disputes would continue to be governed by the law of the original location provided that the secured creditor has taken whatever steps are necessary under that law to make its security right effective against third parties.]

Continued third-party effectiveness upon change of location

145. The law should provide that, if a security right in encumbered assets is effective against third parties under the law of a State other than the enacting State and the location of the encumbered assets or the grantor (as relevant under the recommendations in this chapter) changes to the enacting State, the security right continues to be effective against third parties under the law of the enacting State for a period of [to be specified] days after the location of the encumbered assets or the grantor (as relevant under the recommendations in this chapter) has changed to the enacting State. If the requirements of the enacting State to make the security right effective against third parties are satisfied prior to the end of that period, the security right continues to be effective against third parties thereafter under the law of the enacting State.

[Note to the Working Group: For the purpose of clarifying the application of recommendation 145 in the context of a priority dispute, the Working Group may wish to consider adding the following text at the end of recommendation 145: “, and, in determining priority under the law of the enacting State, for the purposes of any rule in which time of registration or other method of achieving third-party effectiveness is relevant, that time is the time at which that event occurred under the law of that other State”.]

Renvoi

146. The law should provide that the reference to “the law” of another State as the law governing an issue refers to the law in force in that State other than its conflict-of-laws rules.

Law governing the rights and obligations of the grantor and the secured creditor

147. The law should provide that the mutual rights and obligations of the grantor and the secured creditor [with respect to the security right] [, whether] arising from the security agreement [or by law,] are governed by the law chosen by them [and, in the absence of a choice of law, by the law governing the security agreement] [of the State in which the grantor is located at the time the security right was created].

[Note to the Working Group: The Working Group may wish to note that three changes are proposed to recommendation 147, which is based on article 28 of the United Nations Assignment Convention. The phrase “with respect to the security right” aligns the scope of this provision to the subject matter of the Guide, by making the rule applicable to the parties’ rights and obligations that relate to the security right. The addition of “by law” makes the rule applicable to rights and obligations relating to the security right which, although originating from the creation of the security right (and in this sense having an origin in the security agreement), arise from law in that they are not expressly or impliedly dealt with in the security agreement but become part of the security right as a matter of law. If this phrase is not added, the Guide provides no conflict-of-laws rule to determine which State’s law governs this class of rights and obligations. An example would be the nature and extent of the secured party’s duty to care for the collateral while it is in its possession, an obligation not strictly arising from the security agreement but part of the security right as a matter of law. As to the fallback rule applicable in the absence of a choice of law by the parties, recommendation 147 presents three alternatives. The first alternative is to provide no fallback rule on the assumption that one would not be needed since in most cases parties to secured transactions would include a choice-of-law clause in their agreements. The second alternative would be to align the law applicable to the rights and obligations of the parties with the law applicable to the purely contractual rights and obligations, an approach that would most likely be in line with the expectations of the parties. The third alternative refers to the grantor’s location (which might or might not be the connecting factor under the second alternative). This third alternative might appear to provide more certainty; it might result in different laws governing the rights and obligations of the parties covered by recommendation 147 and the purely contractual rights and obligations of the parties.]

Law governing the rights and obligations of the account debtor and the assignee

148. The law should provide that the relationship between an account debtor and the assignee of an assigned receivable, and between the transferee and the obligor under a negotiable instrument, the conditions under which an assignment of a receivable can be invoked against the account debtor or the obligor under a negotiable instrument and the determination of whether the account debtor’s or obligor’s obligations have been discharged are governed by the law governing the receivable or the negotiable instrument.

[Note to the Working Group: The purpose of this recommendation is to avoid any implication that recommendation 149, which deals with the law governing enforcement of the security right against the grantor, determines the law governing enforcement by the secured creditor against the account debtor of an assigned receivable (or the obligor

under a negotiable instrument). However, recommendation 148, which is based on article 29 of the United Nations Assignment Convention, applies to the entire relationship between the account debtor of an assigned receivable or the obligor under a negotiable instrument and the secured creditor, matters including but not limited to enforcement.]

Enforcement matters

149. The law should provide that:

Alternative A

Matters affecting the enforcement of a security right outside insolvency proceedings are governed by the law of the State where enforcement takes place.

Alternative B

Matters affecting the enforcement of a security right outside insolvency proceedings are governed by the law governing the security agreement [determined in accordance with recommendation 147]. However:

(a) A secured creditor may take possession of tangible encumbered assets without the consent of the person in possession of them only in accordance with the law of the State in which those assets are located at the time the secured creditor takes possession of them;

(b) A forum may apply those provisions of its own law which, irrespective of rules of conflict of laws, must be applied even to international situations; and

(c) The application of the law determined under the first sentence of this recommendation may be refused by the forum only if the effects of its application would be manifestly contrary to the public policy of the forum.

[Note to the Working Group: Subparagraphs (b) and (c) are derived from article 11 of the Hague Convention. Subparagraph (c) refers only to the first sentence of this recommendation and not to subparagraph (a) as parties to the security agreement and third parties in the State in which the encumbered assets are located should always be able to rely on and be protected by the law of the place where the repossession of tangible encumbered assets occurs to govern such conduct and the lex fori should not override the lex situs.]

Impact of insolvency on conflict-of-laws rules

[Note to the Working Group: See recommendation K and note in the recommendations of this Guide on Insolvency, A/CN.9/WG.VI/WP.21/Add.3, which read as follows: "The law should provide that, notwithstanding the commencement of an insolvency proceeding, the creation, effectiveness against third parties, priority and enforcement of a security right are governed by the law that would be applicable in the absence of the insolvency proceeding. This recommendation does not affect the application of any insolvency rules, including any rules relating to avoidance, priority or enforcement of security rights.

[Note to the Working Group: See also recommendations 30 and 31 of the Insolvency Guide. The commentary will clarify the relation between this recommendation, on the one hand, and recommendations 30 and 31 of the Insolvency Guide on the other hand. The commentary will also explain that this recommendation covers procedural, substantive, jurisdictional, etc., rules.]"

Multi-unit States

[Note to the Working Group: The Working Group may wish to consider whether an additional recommendation is needed to provide for the application of the recommendations in this chapter in a Multi-unit State.]

XII. Transition**Purpose**

The purpose of transition provisions of the law is to provide a fair and efficient transition from the regime before the enactment of the law to the regime after the enactment of the law.

Effective date

150. The law should specify a date or a mechanism by which a date may be specified, subsequent to its enactment, as of which it will enter into force (the “effective date”) in view of:

- (a) The impact of the effective date on credit decisions and in particular the maximization of benefits to be derived from the law;
- (b) The necessary regulatory, institutional, educational and other arrangements or infrastructure improvements to be made by the State; the status of the pre-existing law and other infrastructure;
- (c) The harmonization of the law with other legislation; and
- (d) The content of constitutional rules with respect to pre-effective date transactions; and standard or convenient practice for the entry into force of legislation (e.g. on the first day of a month); and
- (e) The need to give affected persons sufficient time to prepare for the law.

Transition period

151. The law should provide a period of time after the effective date (the “transition period”), during which creditors with security rights effective against the grantor and third parties under the previous regime may take steps to assure that those rights are effective against the grantor and third parties under the law. If those steps are taken during the transition period, the law should provide that the effectiveness of the creditor’s rights against those parties is continuous.

Priority

152. The law should provide clear rules for resolving:

- (a) Which law applies to the priority between post-effective date security rights;
 - (b) Which law applies to the priority between pre-effective date security rights;
- and
- (c) Which law applies to the priority between pre-effective date and post-effective date security rights.

153. The law should provide that priority between post-effective date security rights is governed by the law.

154. The law should provide generally that priority between pre-effective date security rights is governed by the former legal regime. The law should also provide, however, that application of those former rules will occur only if no event occurs after the effective date that would have changed the priority under the former regime. If such an event occurs, the law should determine priority.

155. With respect to priority between pre-effective date security rights and post-effective date security rights, the law should provide that it will apply as long as the holder of a pre-effective date right may, during the transition period, ensure priority under the law by taking whatever steps are necessary under the law. During the transition period, the priority of the pre-effective date right should continue as though the law had not become effective. If the appropriate steps are taken during the transition period, the holder of the pre-effective date right should have priority to the same extent as would have been the case had the law been effective at the time of the original transaction and those steps had been taken at that time.

156. When a dispute is in litigation (or a comparable dispute resolution system) or the secured creditor has taken steps towards enforcing its rights at the effective date of the law, the law should specify that it does not apply to the rights and obligations of the parties.

157. The law should deal with the transition from a regime in which no filing is required to a regime where filing is a condition for ensuring the effectiveness of security rights as against third parties.

158. The law should ensure that the transition should not entail any cost other than the nominal cost of registration.

**C. Note by the Secretariat on the draft Legislative Guide
on Secured Transactions, submitted to the Working Group
on Security Interests at its eighth session**

(A/CN.9/WG.VI/WP.22 and Add.1) [Original: English]

Background remarks

1. At its thirty-third session in 2000, the Commission considered a report of the Secretary-General on possible future work in the area of secured credit law (A/CN.9/475). At that session, the Commission agreed that security interests was an important subject and had been brought to the attention of the Commission at the right time, in particular in view of the close link of security interests with the work of the Commission on insolvency law. It was widely felt that modern secured credit laws could have a significant impact on the availability and the cost of credit and thus on international trade. It was also widely felt that modern secured credit laws could alleviate the inequalities in the access to lower-cost credit between parties in developed countries and parties in developing countries, and in the share such parties had in the benefits of international trade. A note of caution was struck, however, in that regard to the effect that such laws needed to strike an appropriate balance in the treatment of privileged, secured and unsecured creditors so as to become acceptable to States. It was also stated that, in view of the divergent policies of States, a flexible approach aimed at the preparation of a set of principles with a guide, rather than a model law, would be advisable. Furthermore, in order to ensure the optimal benefits from law reform, including financial-crisis prevention, poverty reduction and facilitation of debt financing as an engine for economic growth, any effort on security interests would need to be coordinated with efforts on insolvency law.⁵

2. At its thirty-fourth session in 2001, the Commission considered a further report by the Secretariat (A/CN.9/496). At that session, the Commission agreed that work should be undertaken in view of the beneficial economic impact of a modern secured credit law. It was stated that experience had shown that deficiencies in that area could have major negative effects on a country's economic and financial system. It was also stated that an effective and predictable legal framework had both short- and long-term macroeconomic benefits. In the short term, namely, when countries faced crises in their financial sector, an effective and predictable legal framework was necessary, in particular in terms of enforcement of financial claims, to assist the banks and other financial institutions in controlling the deterioration of their claims through quick enforcement mechanisms and to facilitate corporate restructuring by providing a vehicle that would create incentives for interim financing. In the longer term, a flexible and effective legal framework for security rights could serve as a useful tool to increase economic growth. Indeed, without access to affordable credit, economic growth, competitiveness and international trade could not be fostered, with enterprises being prevented from expanding to meet their full potential.⁶

3. While some concerns were expressed with respect to the feasibility of work in the field of secured credit law, the Commission noted that those concerns were not widely

⁵ *Official Records of the General Assembly, Fifty-fifth Session, Supplement No. 17 (A/55/17)*, para. 459.

⁶ *Ibid.*, *Fifty-sixth Session, Supplement No. 17 (A/56/17)*, para. 351.

shared and went on to consider the scope of work.⁷ It was widely felt that work should focus on security interests in goods involved in a commercial activity, including inventory. It was also agreed that securities and intellectual property should not be dealt with. As to intellectual property, it was stated that there was less need for work in that area, the issues were extremely complex and any efforts to address them should be coordinated with other organizations, such as the World Intellectual Property Organization (WIPO).⁸ As to the form of work, the Commission considered that a model law might be too rigid and noted the suggestions made for a set of principles with a legislative guide that would include, where feasible, model legislative provisions.⁹

4. After discussion, the Commission decided to entrust a working group with the task of developing “an efficient legal regime for security rights in goods involved in a commercial activity, including inventory, to identify the issues to be addressed, such as the form of the instrument, the exact scope of the assets that can serve as collateral ...”.¹⁰ Emphasizing the importance of the matter and the need to consult with representatives of the relevant industry and practice, the Commission recommended that a two- to three-day colloquium be held.¹¹

5. At its first session (New York, 20-24 May 2002), Working Group VI (Security Interests) had before it a first, preliminary draft legislative guide on secured transactions, prepared by the Secretariat (A/CN.9/WG.VI/WP.2 and Add.1-12), a report on an UNCITRAL-CFA international colloquium, held in Vienna from 20 to 22 March 2002 (A/CN.9/WG.VI/WP.3), and comments by the European Bank for Reconstruction and Development (EBRD) (A/CN.9/WG.VI/WP.4). At that session, the Working Group considered chapters I to V and X (A/CN.9/WG.VI/WP.2 and Add.1-5 and 10), and requested the Secretariat to revise these chapters (A/CN.9/512, para. 12). At the same session, the Working Group agreed on the need to ensure, in cooperation with Working Group V (Insolvency Law), that issues relating to the treatment of security rights in insolvency proceedings would be addressed consistently with the conclusions of Working Group V on the intersection of the work of Working Group V and Working Group VI (see A/CN.9/512, para. 88 and A/CN.9/511, paras. 126-127).

6. At its thirty-fifth session in 2002, the Commission had before it the report of Working Group VI (Security Interests) on the work of its first session (A/CN.9/512). The Commission expressed its appreciation to the Working Group for the progress made in its work. It was widely felt that, with that legislative guide, the Commission had a great opportunity to assist States in adopting modern secured transactions legislation, which was generally thought to be a necessary, albeit not sufficient in itself, condition for increasing access to low-cost credit, thus facilitating the cross-border movement of goods and services, economic development and ultimately friendly relations among nations.¹²

7. In addition, the feeling was widely shared that the timing of the Commission’s initiative was most opportune both in view of the relevant legislative initiatives under way at the national and the international level and in view of the Commission’s own initiative in the field of insolvency law. In that connection, the Commission noted with particular satisfaction the efforts undertaken by Working Group V (Insolvency Law) and Working

⁷ Ibid., paras. 352-354.

⁸ Ibid., paras. 354-356.

⁹ Ibid., para. 357.

¹⁰ Ibid., para. 358.

¹¹ Ibid., para. 359.

¹² Ibid., *Fifty-seventh Session, Supplement No. 17* (A/57/17), para. 202.

Group VI towards coordinating their work on a subject of common interest such as the treatment of security interests in the case of insolvency proceedings. Strong support was expressed for such coordination, which was generally thought to be of crucial importance for providing States with comprehensive and consistent guidance with respect to the treatment of security interests in insolvency proceedings. The Commission endorsed a suggestion made to revise the insolvency chapter of the draft legislative guide on secured transactions in light of the core principles agreed by Working Groups V and VI (see A/CN.9/511, paras. 126-127 and A/CN.9/512, para. 88). The Commission stressed the need for continued coordination and requested the secretariat to consider organizing a joint session of the two Working Groups in December 2002.¹³

8. After discussion, the Commission confirmed the mandate given to the Working Group at its thirty-fourth session to develop an efficient legal regime for security interests in goods, including inventory. The Commission also confirmed that the mandate of the Working Group should be interpreted widely to ensure an appropriately flexible work product, which should take the form of a legislative guide.¹⁴

9. At its second session (Vienna, 17-20 December 2002), the Working Group considered chapters VI, VII and IX (A/CN.9/WG.VI/WP.2 and Add.6, 7 and 9) of the first preliminary draft guide on secured transactions, prepared by the Secretariat. At that session, the Working Group requested the Secretariat to prepare revised versions of those chapters (see A/CN.9/531, para. 15). In conjunction with that session and in accordance with suggestions made at the first session of the Working Group (see A/CN.9/512, para. 65), an informal presentation of the registration systems of security rights in movable property of New Zealand and Norway was held. Immediately before that session, Working Groups V (Insolvency Law) and VI (Security Interests) held their first joint session (Vienna, 16-17 December 2002), during which the revised version of former chapter X (new chapter IX; A/CN.9/WG.VI/WP.6/Add.5) on insolvency was considered. At that session, the Secretariat was requested to prepare a revised version of that chapter (see A/CN.9/535, para. 8).

10. At its third session (New York, 3-7 March 2003), the Working Group considered chapters VIII, XI and XII of the first preliminary draft guide on secured transactions and chapters II and III of the second version of the draft Guide (A/CN.9/WG.VI/WP.2/Add.8, A/CN.9/WG.VI/WP.2/Add.11, A/CN.9/WG.VI/WP.2/Add.12, A/CN.9/WG.VI/WP.6/Add.2 and A/CN.9/WG.VI/WP.6/Add.3) and requested the Secretariat to prepare revised versions (A/CN.9/532, para. 13). In conjunction with that session, an informal presentation was made of the recently completed secured transactions law in the Slovak Republic, which was supported by the World Bank and by EBRD.

11. At its thirty-sixth session in 2003, the Commission had before it the reports of Working Group VI (Security Interests) on the work of its second and third sessions (A/CN.9/531 and A/CN.9/532), as well as the report of the first joint session of Working Group V and VI (A/CN.9/535). The Commission commended the Working Group for the progress in its work and expressed its appreciation to Working Group V and Working Group VI for the coordination of their work in relation to the treatment of security rights in insolvency proceedings. The Commission also noted with appreciation the presentation of modern registration systems of security rights in movable property and the plan of the Secretariat to prepare a paper addressing technical registration-related issues.¹⁵

¹³ Ibid., para. 203.

¹⁴ Ibid., para. 204.

¹⁵ Ibid., *Fifty-eighth Session, Supplement No. 17* (A/58/17), para. 217.

12. In addition, the Commission emphasized the importance of coordination with organizations with interest and expertise in the field of secured transactions law, such as Unidroit, the Hague Conference on Private International Law, the World Bank, the International Monetary Fund, EBRD and the Asian Development Bank. Reference was made to the current work of Unidroit on security rights in securities, to the World Bank's Principles and Guidelines for Effective Insolvency and Creditor Rights Systems to the extent they concerned secured transactions, to the Model Law on Secured Transactions and the Principles of EBRD, to the Asian Development Bank's Guide to Movables Registries and to the Inter-American Model Law on Secured Transactions of 2002 prepared by the Organization of American States. Reference was also made to the need to coordinate with the Hague Conference with respect to the conflict-of-laws chapter of the draft legislative guide on secured transactions, in particular with respect to the law applicable to the enforcement of security rights in the case of insolvency.¹⁶

13. With respect to the scope of work, the Commission noted suggestions that the Working Group should consider covering, in addition to goods (including inventory), trade receivables, letters of credit, deposit accounts and intellectual property rights in view of their economic importance as security for credit. As to the substance of the draft legislative guide, the Commission noted statements that, while the draft guide should discuss various workable approaches, it should also include recommendations and, that if alternative recommendations had to be prepared, their relative merits, in particular for developing countries and for countries with economies in transition, should also be discussed.¹⁷

14. After discussion, the Commission confirmed the mandate given to Working Group VI at its thirty-fourth session to develop an efficient legal regime for security rights in goods, including inventory, and its decision at its thirty-fifth session that the mandate should be interpreted widely to ensure an appropriate work product, which should take the form of a legislative guide. The Commission also confirmed that it was up to the Working Group to consider the exact scope of its work and, in particular, whether trade receivables, letters of credit, deposit accounts and intellectual and industrial property rights should be covered in the draft legislative guide.¹⁸

15. At its fourth session (Vienna, 8-12 September 2003), the Working Group considered chapters I (Introduction), II (Key Objectives), IV (Creation), IX (Insolvency) and paragraphs 1 to 41 of chapter VII (Priority), and requested the Secretariat to prepare revised versions of those chapters (see A/CN.9/543, para. 15).

16. At its fifth session (New York, 22-25 March 2004), the Working Group considered the summary and recommendations of chapters V (Publicity), VI (Priority), X (Conflicts of Laws) and requested the Secretariat to prepare revised versions of those chapters (see A/CN.9/549, para. 16).

17. At their second joint session (New York, 26 and 29 March 2004), Working Groups V (Insolvency Law) and VI (Security Interests) considered the treatment of security interests in the draft Legislative Guide on Insolvency Law on the basis of document A/CN.9/WG.V/WP.71 (see A/CN.9/550, para. 11).

18. At its thirty-seventh session in 2004, the Commission had before it the reports of Working Group VI (Security Interests) on the work of its fourth and fifth sessions (A/CN.9/543 and A/CN.9/549), as well as the report of the second joint session of

¹⁶ Ibid., para. 218.

¹⁷ Ibid., paras. 220-221.

¹⁸ Ibid., para. 222.

Working Groups V and VI (A/CN.9/550). The Commission commended the Working Group for the progress achieved so far and expressed its appreciation to Working Groups V and VI for the progress made during their second joint session, at which they had considered pending issues of common interest.¹⁹

19. In addition, the Commission noted with appreciation the progress made by the Working Group in the coordination of its work on conflict of laws with the Hague Conference on Private International Law and in particular the plans for a joint meeting of experts. The Commission also commended the efforts to coordinate with the International Institute for the Unification of Private Law (Unidroit), which was preparing a text on security interests in securities. The Commission also expressed its appreciation for the coordination with the World Bank, which was preparing principles and guidelines for effective insolvency and creditor rights systems, and in particular for the agreement that the World Bank text would form with the draft legislative guide on secured transactions a single international standard.²⁰

20. The Commission noted with interest that a preliminary consolidated set of recommendations might be ready by early 2005. The Commission also welcomed the preparation of additional chapters on various types of asset, such as negotiable instruments and documents, bank accounts, letters of credit and intellectual property rights. In that connection, while the importance of those types of asset was generally recognized, it was stated that including them in the draft guide should not be at the expense of slowing down work with respect to the core assets within the scope of the draft guide (i.e. goods, including inventory, and receivables).²¹

21. After discussion, the Commission confirmed the mandate given to Working Group VI at the thirty-fourth session of the Commission and subsequently confirmed at its thirty-fifth and thirty-sixth sessions. The Commission also requested the Working Group to expedite its work so as to submit the draft guide to the Commission for final adoption as soon as possible and, hopefully, in 2006.²²

22. At its sixth session (Vienna, 27 September-1 October 2004), the Working Group considered chapters I and II (Introduction and key objectives), III (Basic approaches to security), IV (Creation), V (Effectiveness against third parties), VII (Pre-default rights and obligations), VIII (Default and enforcement), X (Conflict of laws) and XI (Transition) and requested the Secretariat to revise those chapters to reflect the deliberations and decisions of the Working Group (see A/CN.9/570, para. 8). At that session, the Working Group noted with appreciation that the conflicts-of-laws chapter of the Guide was being prepared in close cooperation with the Hague Conference on Private International Law (A/CN.9/570, para. 75).

23. At its seventh session (New York, 24-28 January 2005), the Working Group considered chapters X (Conflict of laws), XII (Acquisition financing devices) and XVI (Security rights in bank accounts) and requested the Secretariat to revise those chapters to reflect the deliberations and decisions of the Working Group (see A/CN.9/574, para. 8).

¹⁹ Ibid., *Fifty-ninth Session, Supplement No. 17* (A/59/17), para. 75.

²⁰ Ibid., para. 76.

Draft legislative guide on secured transactions	1-48	
I. Introduction	1-36	
A. Purpose	1-8	
B. Scope	9-20	
C. Terminology	21	
D. Examples of financing practices covered in the Guide	22-32	
1. Inventory and equipment acquisition financing	23-28	
2. Inventory and receivable revolving loan financing	29-31	
3. Term-loan financing	32-34	
4. Transfer of title for security purposes	35	
5. Sale and leaseback transactions	36	
II. Key objectives of an effective and efficient secured transactions regime	37-48	
A. Promote secured credit	38	
B. Allow utilization of the full value inherent in assets to support credit in a broad array of credit transactions	39	
C. Obtain security rights in a simple and efficient manner	40	
D. Recognize party autonomy	41	
E. Provide for equal treatment of diverse sources of credit	42	
F. Validate non-possessory security rights	43	
G. Encourage responsible behaviour on the part of all parties by enhancing predictability and transparency	44	
H. Establish clear and predictable priority rules	45	
I. Facilitate enforcement of creditor's rights in a predictable and efficient manner	46	
J. Balance the interests of the affected persons	47	
K. Harmonize secured transactions laws, including conflict-of-laws rules	48	

I. Introduction

A. Purpose

1. The purpose of this Guide is to assist States in the development of modern secured transactions laws with a view to promoting the availability of low-cost secured credit. The Guide is intended to be useful to States that do not currently have efficient and effective secured transactions laws, as well as to States that already have workable laws but wish to review or modernize them, or to harmonize or coordinate their laws with those of other States.
2. The Guide is based on the premise that sound secured transactions laws can have significant economic benefits for States that adopt them, including attracting credit from domestic and foreign lenders and other credit providers, promoting the development and growth of domestic businesses (particularly small and medium-size enterprises), and generally increasing trade. Such laws also benefit consumers by lowering prices for goods and services and making low-cost consumer credit more readily available. To be effective, such laws must be supported by efficient and effective judicial systems and other enforcement mechanisms. They must also be supported by insolvency laws that respect rights derived from secured transactions laws (see UNCITRAL Legislative Guide on Insolvency Law).
3. The Guide seeks to rise above differences among legal regimes to suggest pragmatic and proven solutions that can be accepted and implemented in States having divergent legal traditions. The focus of the Guide is on developing laws that achieve practical economic benefits for States that adopt them. While it is possible that States will have to incur predictable, yet limited, costs to develop and implement these laws, substantial experience suggests that the resulting short- and long-term benefits to such States should greatly outweigh the costs.
4. All businesses, whether manufacturers, distributors, service providers or retailers, require working capital to operate, to grow and to compete successfully in the marketplace. It is well established, through studies conducted by such organizations as the International Bank for Reconstruction and Development (the World Bank), the International Monetary Fund, the Asian Development Bank and the European Bank for Reconstruction and Development (EBRD), that one of the most effective means of providing working capital to commercial enterprises is through secured credit.
5. The key to the effectiveness of secured credit is that it allows businesses to use the value inherent in their assets as a means of reducing risk for the creditor. Risk is reduced because credit secured by assets gives creditors access to the assets as another source of payment in the event of non-payment of the secured obligation. As the risk of non-payment is reduced, the availability of credit increases and the cost of credit falls.
6. A legal system that supports secured credit transactions is critical to reducing the perceived risks of credit transactions and promoting the availability of secured credit. Secured credit is more readily available to businesses in States that have efficient and effective laws that provide for consistent, predictable outcomes for creditors in the event of non-performance by debtors. On the other hand, in States that do not have efficient and effective laws, where creditors perceive the legal risks associated with credit transactions to be high, the cost of credit increases as creditors require increased compensation to evaluate and assume the increased risk. In some States, the absence of an efficient and effective secured transactions regime, or of an insolvency law regime under which security

rights are recognized, has resulted in the virtual elimination of credit for small and medium-size commercial enterprises, as well as for consumers.

7. By aiding in the cultivation and growth of individual businesses, creating a legal regime that promotes secured credit can have a positive effect upon the general economic prosperity of a State. Thus, States that do not have an efficient and effective secured transactions regime may deny themselves a valuable economic benefit.

8. To best promote the availability of low-cost secured credit, the Guide suggests that secured transactions laws should be structured to enable businesses to utilize the value inherent in their property to the maximum extent possible to obtain credit. In this regard, the Guide adopts two of the most essential concepts of successful secured transactions laws, the concepts of priority and effectiveness against third parties. The concept of priority, which allows for the concurrent existence of security rights having different priority status in the same assets, makes it possible for a business to utilize the value of its assets to the maximum extent possible by obtaining secured credit from more than one creditor using the same assets as security with transparent rules allowing each creditor to know the priority of its security right. The concept of effectiveness against third parties, in the form of a system allowing, *inter alia*, the registration of a notice concerning security rights, is designed to promote legal certainty with regard to the relative priority status of creditors and thus to reduce the risks and costs associated with secured transactions.

B. Scope

9. The Guide deals with consensual security rights. However, it contains references to non-consensual rights, such as those provided by statute or judicial process, when the same property is subject to both consensual and non-consensual security rights and the law must provide for the relative priority of such rights (see A/CN.9/WG.VI/WP.14/Add.1, paras. 56-61 and 82-85). The primary focus of the Guide is on core commercial assets, such as commercial goods (inventory and equipment) and trade receivables. However, the Guide proposes that all types of asset are capable of being the object of a security right, including all present and future assets of a business, and covers all assets, both tangible and intangible, with the exception of assets specifically excluded.

10. Real property, securities and wages are types of asset that are subject to an outright exclusion. Real property (with the exception of fixtures, which are covered by the Guide and can be subjected to security rights) is excluded as it raises different issues and is subject to a special title registration system indexed by asset and not by grantor. In addition, the Guide does not cover security rights in securities as original encumbered assets because the nature of securities and their importance for the functioning of financial markets raise a broad range of issues that merit special legislative treatment. The substantive law issues relating to security and other rights in securities held with an intermediary are dealt with in a draft Convention being prepared by the International Institute for the Unification of Private Law (Unidroit). The private international law issues with respect to that subject matter are not addressed in this Guide since they are dealt with in the Hague Convention on the Law applicable to Certain Rights in Respect of Securities (The Hague, December 2002). The Guide is structured in such a way that the State enacting legislation based on the regime envisaged in the Guide can, at the same time, implement the texts prepared by Unidroit and the Hague Conference, as well as relevant texts prepared by UNCITRAL, such as the United Nations Convention on the Assignment of Receivables in International Trade (New York, December 2001; herein after referred to

as “the United Nations Assignment Convention”) and the UNCITRAL Legislative Guide on Insolvency Law.

[Note to the Working Group: The Working Group may wish to consider whether security rights in directly-held securities, whether certificated or uncertificated, should be addressed in the Guide. The Working Group may also wish to address the question of which regime applies to securities as proceeds of types of asset that are within the scope of the Guide, their special regime or the general regime of the Guide applicable to proceeds. A related question that the Working Group may wish to address is whether proceeds from drawings of independent undertakings are subject only to the special rules in the Guide or also to the rules applicable to proceeds generally. The same question arises with respect to receivables, negotiable instruments, negotiable documents and bank accounts.]

11. Security rights in wages are excluded based on the policy of protecting individual and family life. Any additional exclusions based on competing policy objectives should be limited in number and in scope, should be clearly stated in the law and should be adopted only after their potential benefit has been carefully weighed against the social and economic policy underlying the secured transactions law of promoting the availability of low-cost credit.

12. Some assets, such as ships, aircraft [and intellectual property rights] are in whole or in part subject to special laws. Security rights in such assets are not excluded but, in the case of any inconsistency between such a special law and secured transactions law, the special law (e.g. the special registration system) prevails.

13. [In particular, the Guide does not address issues specific to security rights in intellectual property rights and it does not make recommendations concerning those issues. However, in developing its secured transactions law, a State should take account of the increasing importance and economic value of intellectual property assets to companies seeking to obtain low-cost secured credit. Subject to the limitations discussed in the following paragraph, the secured transactions law would apply to security interests in intellectual property rights.

14. When adopting a secured transaction regime, a State should take into account the particular characteristics of, and national laws applicable to, intellectual property, as well as the State’s obligations under international intellectual property treaties, conventions and other international agreements. Accordingly, when implementing the recommendations of the Guide, a State should give careful consideration to situations in which the existing legal regime and characteristics of intellectual property are sufficiently unique as to justify the adjustment of those recommendations when the encumbered assets include intellectual property rights. If upon examination there is found to be a direct inconsistency between the State’s intellectual property laws or obligations under intellectual property treaties, conventions and other international agreements, in particular insofar as they establish a rule for the creation, effectiveness against third parties, priority or enforcement of security rights in intellectual property, then the State’s secured transactions law should provide that the intellectual property laws and obligations will govern such issues to the extent of any inconsistency.]

[Note to the Working Group: The Working Group may wish to note that references to negotiable instruments, negotiable documents, intellectual property rights and proceeds from drawings under independent undertakings appear within square brackets pending a decision of the Working Group as to whether they should be included in the Guide. After all of the substantive recommendations of the Guide have been completed, the Working Group may wish to align the recommendations on scope with the substantive recommendations.]

15. The Guide stresses the need to enable a grantor to create security rights not only in its existing assets but also in its future assets (i.e. assets acquired or created after the conclusion of the security agreement), without requiring the grantor or secured creditor to execute any additional documents or to take any additional action at the time such assets are acquired or created. This approach is consistent, for example, with the United Nations Assignment Convention, which provides for the creation of security rights in future receivables without requiring any additional steps to be taken. In addition, the Guide recommends recognition of a security right in all existing and future assets of a business grantor through a single security agreement such as already exists in some legal systems as an “enterprise mortgage” or as a combination of fixed and floating charges.

16. The Guide also recommends that a broad range of obligations, monetary and non-monetary may be secured, and that both physical and legal persons may be parties to a secured transaction, including consumers, subject to consumer-protection laws. In addition, the Guide is intended to cover a broad range of transactions that serve security functions, including those related to possessory and non-possessory security rights, as well as transactions not denominated as secured transactions (such as retention of title, transfer of title for security purposes, assignment of receivables for security purposes, financial leases, and sale and leaseback transactions and the like).

17. The legal regime envisaged in the Guide is a purely domestic regime. The recommendations of the Guide are addressed to national legislators considering reform of domestic secured transactions laws. However, because secured transactions often involve parties and assets located in different jurisdictions, the Guide also seeks to address the recognition of security rights and title-based security devices, such as retention of title and financial leases, effectively created in other jurisdictions. This would represent a marked improvement for the holders of those rights over the laws currently in effect in many States, under which such rights often are lost once an encumbered asset is transported across national borders, and would go far toward encouraging creditors to extend credit in cross-border transactions (see A/CN.9/WG.VI/WP.14/Add.4, paras. 21-25).

18. Throughout, the Guide seeks to establish a balance among the interests of debtors, creditors (whether secured, privileged or unsecured), affected third persons, buyers and other transferees, and the State. In so doing, the Guide adopts the premise, supported by substantial empirical evidence, that all creditors will accept such a balanced approach, and will thereby be encouraged to extend credit, as long as the laws (and supporting legal and governmental infrastructure) are effective to enable the creditors to assess their risks with a high level of predictability and with confidence that they will ultimately realize the economic value of the encumbered assets. Essential to this balance is a close coordination between the secured transactions and insolvency law regimes, including provisions pertaining to the treatment of security rights in the event of a reorganization or liquidation of a business. Additionally, certain debtors, such as consumer debtors, require additional protections. Thus, although the regime envisioned by the Guide will apply to many forms of consumer transactions, it is not intended to override consumer-protection laws or to discuss consumer-protection policies, since this matter does not lend itself to unification.

19. In the same spirit, the Guide also addresses concerns that have been expressed with respect to secured credit. One such concern is that providing a creditor with a priority claim to all or substantially all of a person’s assets may appear to limit the ability of that person to obtain financing from other sources. Another concern is the potential ability of a secured creditor to exercise influence over a business, to the extent that the creditor may seize, or threaten seizure of, the encumbered assets of that business upon default. Yet another concern is that in some cases secured creditors may take most or all of a person’s assets in the case of insolvency and leave little for unsecured creditors, some of whom are

not in a position to bargain for a security right in those assets. The Guide discusses these concerns and, in those situations where the concerns appear to have merit, suggests solutions.

20. The Guide builds on the work of UNCITRAL and other organizations. Such work includes: the United Nations Assignment Convention; the UNCITRAL Legislative Guide on Insolvency Law; the Convention on International Interests in Mobile Equipment, approved in November 2001; the EBRD Model Law on Secured Transactions, completed in 1994; the EBRD General principles of a modern secured transactions law, completed in 1997; the study on Secured Transactions Law Reform in Asia, prepared by the Asian Development Bank in 2000; the Organization of American States (OAS) Model Inter-American Law on Secured Transactions, prepared in 2002; and the OHADA Uniform Act Organizing Securities, prepared in 1997 [...].

C. Terminology

21. This Guide adopts terminology to express the concepts that underlie an effective secured transactions regime. The terms used are not drawn from any particular legal system. Even when a particular term appears to be the same as that found in a particular national law, the meaning given to the term may differ. This approach is taken to provide readers with a common vocabulary and conceptual framework and to encourage harmonization of the law governing security rights. The following paragraphs therefore identify the principal terms used and the core meaning given to them in this Guide. The meaning of those terms is further refined when they are used in subsequent chapters. Those chapters also define and use additional terms.

(a) “Security right” means a consensual property right in movable property and fixtures that secures payment or other performance of one or more obligations.

(b) “Acquisition security right” means a security right in an asset that secures the obligation to pay any unpaid portion of the purchase price of the asset or other obligation incurred to enable the grantor to acquire the asset. Acquisition security rights include those that are denominated as security rights, as well as those that are denominated as retention of title, arrangements and financial leases.

(c) “Secured obligation” means the obligation secured by a security right.

(d) “Secured creditor” means a creditor that has a security right.

(e) “Debtor” means a person that owes performance of the secured obligation [and includes secondary obligors, such as guarantors of a secured obligation]. The debtor may or may not be the person that grants the security right to a secured creditor (see grantor).

(f) “Grantor” means a person that creates a security right in one or more of its assets in favour of a secured creditor to secure either its own obligation or that of another person (see debtor).

(g) “Security agreement” means an agreement between a grantor and a creditor, in whatever form or terminology, that creates a security right.

(h) “Encumbered asset” means property that is subject to a security right. The property may be tangible or intangible. Each of these two general types of property includes various categories, some of which fall within particular defined terms used in the Guide.

(i) “Tangibles” means all forms of corporeal movable property. Among the categories of tangibles are inventory, equipment, fixtures, negotiable instruments and negotiable documents.

(j) “Inventory” means a stock of tangibles (other than negotiable instruments and negotiable documents) held for sale or lease in the ordinary course of business and also raw and semi-processed materials (work-in-process).

(k) “Equipment” means tangibles (other than negotiable instruments, negotiable documents and inventory), used by a person in the operation of its business.

(l) “Fixtures in immovables” means tangibles (other than negotiable instruments and negotiable documents), that can become subject to separate security rights even though they are so closely attached to or associated with immovable property as to be treated as immovable property under the law of the State where the immovable property is located. “Fixtures in movables” means tangibles (other than negotiable instruments and negotiable documents) that can become subject to separate security rights even though they are closely associated with other movable property, without however losing their identity. “Mass or product” means tangibles (other than negotiable instruments or documents) that are so closely associated with each other that they cannot become subject to separate security rights.

(m) “Intangibles” means all forms of movable property other than tangibles. Among the categories of intangibles are claims and receivables.

(n) “Claim” means a right to the performance of a non-monetary obligation other than a right in tangibles under a negotiable document.

(o) “Receivable” means a right to the payment of a monetary obligation, excluding, however, rights to payment evidenced by a negotiable instrument, the obligation to pay under an independent undertaking and the obligation of a bank to pay with respect to a bank account.

(p) “Assignment” means the creation of a security right in a receivable or the transfer of a receivable, whether the transfer is for security purposes or is an [absolute] [outright] transfer. [Note to the Working Group: Article 2 (a) of the United Nations Assignment Convention.]

(q) “Assignor” means the person that makes an assignment of a receivable. [Note to the Working Group: Article 2 (a) of the United Nations Assignment Convention.]

(r) “Assignee” means the person to which an assignment of a receivable is made. [Note to the Working Group: Article 2 (a) of the United Nations Assignment Convention.]

(s) “Subsequent assignment” means an assignment by the initial or any other assignee. In the case of a subsequent assignment, the person that makes that assignment is the assignor and the person to which that assignment is made is the assignee. [Note to the Working Group: Article 2 (b) of the United Nations Assignment Convention.]

(t) “Account debtor” means a person liable for payment of a receivable. [Note to the Working Group: Article 2 (a) of the United Nations Assignment Convention.]

(u) “Notification of the assignment” means a communication in writing that reasonably identifies the assigned receivables and the assignee [Note to the Working Group: Article 5 (d) of the United Nations Assignment Convention.]

(v) “Original contract” in the context of an assignment means the contract between the assignor and the account debtor from which the assigned receivable arises.

[*Note to the Working Group: Article 5 (a) of the United Nations Assignment Convention.*]

(w) “Negotiable instrument” means, subject to law other than secured transactions law, an instrument that embodies a right to payment, such as a promissory note or a bill of exchange, which satisfies the requirements for negotiability under the law governing negotiable instruments.

(x) “Negotiable document” means, subject to law other than secured transactions law, a document that embodies a right for delivery of tangibles, such as a warehouse receipt or a bill of lading, which satisfies the requirements for negotiability under the law governing negotiable documents.

(y) [“Independent undertaking” means, subject to law other than secured transactions law, a letter of credit (commercial or standby), independent guarantee (demand, first demand, or bank guarantee), and other undertaking recognized as independent by law or practice rules, such as the United Nations Convention on Independent Guarantees and Standby Letters of Credit, the Uniform Customs and Practice for Documentary Credits, the International Standby Practices, and the Uniform Rules of Demand Guarantees.

(z) “Proceeds from a drawing under an independent undertaking” means the beneficiary-grantor’s right to receive a payment made, a draft accepted, a deferred payment obligation incurred, or other item of value delivered by the issuer/guarantor in honouring, or by a nominated person in giving value for, a drawing under an independent undertaking. The term does not include the beneficiary-grantor’s right to draw under an independent undertaking.

(aa) “Guarantor/Issuer” means a bank or other person that issues an independent undertaking. The term includes a bank or other person that confirms the independent undertaking (“confirmer”).

(bb) “Nominated person” means a bank or other person that is identified in an independent undertaking by name or type (e.g. “any bank in country X”) as being nominated to give value, i.e. to purchase or pay upon presentation of documents, and that acts pursuant to that nomination. The term includes a confirmer that is nominated to confirm and that confirms pursuant to the nomination.]

(cc) “Bank account” means, subject to law other than secured transactions law, an account maintained by a bank into which funds may be deposited. The term includes checking, saving and time-deposit accounts.

(dd) [“Intellectual property right” includes, subject to law other than the secured transactions law, patents, trademarks, service marks, trade secrets, copyright and related rights and designs. It also includes rights under licences of such rights.]

(ee) “Proceeds” means whatever is received in respect of encumbered assets, including what is received as a result of sale, lease or other disposition or collection, civil and natural fruits, dividends, distributions, insurance proceeds and claims arising from damage or loss, and tort or warranty claims. [It does not include proceeds from drawings under independent undertakings or types of asset excluded from the scope of the Guide as original encumbered assets.]

(ff) “Priority” means the right of a person to derive the economic benefit of its security right in an encumbered asset in preference to a competing claimant.

(gg) “Competing claimant” means:

- (i) Another secured creditor with a security right in the same encumbered asset (whether as an original encumbered asset or proceeds);
- (ii) The seller or financial lessor of the same encumbered asset that has retained title to it pursuant to an acquisition security right;
- (iii) Another creditor of the grantor asserting a right in the same encumbered asset (e.g. by operation of law, attachment or seizure or a similar process);
- (iv) The insolvency representative in the insolvency of the grantor; or
- (v) Any buyer or other transferee (including a lessee or licensee) of the encumbered asset.

(hh) “Control” means the legal authority of a secured creditor to direct the disposition of an encumbered asset that is either a bank account or a right to proceeds under an independent undertaking without the need of any further consent or other action by the grantor.

(ii) “Possessory security right” means a security right in tangibles that are in the actual possession of the secured creditor or of another person (other than the debtor or other grantor) holding the asset for the secured creditor.

(jj) “Non-possessory security right” means a security right in: (i) tangibles that are not in the actual possession of the secured creditor or another person holding the tangibles for the benefit of the secured creditor, or (ii) intangibles.

(kk) “Insolvency court” means a judicial or other authority competent to control or supervise an insolvency proceeding.

(ll) “Insolvency estate” means assets and rights of the debtor that are controlled or supervised by the insolvency representative and subject to the insolvency proceedings.

(mm) “Insolvency proceedings” means collective judicial or administrative proceedings for the purposes of either reorganization or liquidation of the debtor’s business conducted according to the insolvency law.

(nn) “Insolvency representative” means a person or body responsible for administering the insolvency estate.

(oo) “Buyer in the ordinary course of business” means a person that buys inventory in the ordinary course from a person in the business of selling tangibles of that kind and without knowledge that the sale violates the security rights or other rights of another person in the tangibles.

D. Examples of financing practices covered in the Guide

22. Set forth below are short examples of the types of secured credit transactions that the Guide is designed to encourage, and to which reference will be made throughout the Guide to illustrate specific points. These examples represent only a few of the numerous forms of secured credit transactions currently in use, and an effective secured transactions regime must be sufficiently flexible to accommodate many existing methods of financing, as well as methods that may evolve in the future.

1. Inventory and equipment acquisition financing

23. Businesses often obtain financing for specific purchases of inventory or equipment. In many cases, the financing is provided by the seller of the tangibles (inventory and equipment) purchased. In other cases, the financing is provided by a lender. Sometimes the lender is an independent third party, but in other cases the lender may be an affiliate of the seller. The seller retains title or the lender is granted a security right in the tangibles purchased to secure the repayment of the credit or loan.

24. Here is an illustration of acquisition financing: ABC Manufacturing Company (ABC), a manufacturer of furniture, wishes to acquire certain inventory and equipment for use in manufacturing operations. ABC desires to purchase paint (constituting raw materials and, therefore, inventory) from Vendor A. ABC also wishes to purchase certain drill presses (constituting equipment) from Vendor B and certain conveyor equipment from Vendor C. Finally, ABC wishes to lease certain computer equipment from Lessor A.

25. Under the purchase agreement with Vendor A, ABC is required to pay the purchase price for the paint within thirty days of Vendor's A invoice to ABC, and ABC grants to Vendor A a security right in the paint to secure the purchase price. Under the purchase agreement with Vendor B, ABC is required to pay the purchase price for the drill presses within ten days after they are delivered to ABC's plant. ABC obtains a loan from Lender A to finance the purchase of the drill presses from Vendor B, secured by a security right in the drill presses. ABC also maintains a bank account with Lender A and has granted Lender A a security right in the bank account as additional security for the repayment of the loan.

26. Under the purchase agreement with Vendor C, ABC is required to pay the purchase price for the conveyor equipment when it is installed in ABC's plant and rendered operational. ABC obtains a loan from Lender B to finance the purchase and installation of the conveyor equipment from Vendor C, secured by a security right in the conveyor equipment.

27. Under the lease agreement with Lessor A, ABC leases the computer equipment from Lessor A for a period of two years. ABC is required to make monthly lease payments during the lease term. ABC has the option (but not the obligation) to purchase the equipment for a nominal purchase price at the end of the lease term. Lessor A retains title to the equipment during the lease term but title will be transferred to ABC at the end of the lease term if ABC exercises the purchase option. This type of lease is often referred to as a "financial lease". Under some forms of financial lease, title to the leased property is transferred to the lessee automatically at the end of the lease term. A financial lease is to be distinguished from what is usually called an "operating lease". Under an operating lease, the leased property is expected to have a remaining useful life at the end of the lease term and the lessee does not have an option to purchase the leased property at the end of the lease term for a nominal price, nor is title to the leased property transferred to the lessee automatically at the end of the lease term.

28. In each of the above four cases, the acquisitions are made possible by means of acquisition financing provided by another person (seller, lender or financial lessor) who holds rights in the acquired property for the purpose of securing the acquisition financing granted. As the illustrations make clear, acquisition financing can occur with respect to both inventory and equipment.

2. Inventory and receivable revolving loan financing

29. Businesses generally have to expend capital before they are able to generate and collect revenues. For example, before a typical manufacturer can generate receivables and collect payments, the manufacturer must expend capital to purchase raw materials, to convert the raw materials into finished goods and to sell the finished goods. Depending on the type of business, this process may take up to several months. Access to working capital is critical to bridge the period between cash expenditures and revenue collections.

30. One highly effective method of providing such working capital is a revolving loan facility. Under this type of credit facility, loans secured by the borrower's existing and future inventory and receivables are made from time to time at the request of the borrower to fund the borrower's working capital needs (see also A/CN.9/WG.VI/WP.11/Add.2, para. 12). The borrower typically requests loans when it needs to purchase and manufacture inventory, and repays the loans when the inventory is sold and the sales price is collected. Thus, borrowings and repayments are frequent (though not necessarily regular) and the amount of the credit is constantly fluctuating. Because the revolving loan structure matches borrowings to the borrower's cash conversion cycle (that is, acquiring inventory, selling inventory, creating receivables, receiving payment and acquiring more inventory to begin the cycle again), this structure is, from an economic standpoint, highly efficient and beneficial to the borrower, and helps the borrower to avoid borrowing more than it actually needs.

31. Here is an illustration of this type of financing: It typically takes four months for ABC to manufacture, sell and collect the sales price for its products. Lender B agrees to provide a revolving loan facility to ABC to finance this process. Under the line of credit, ABC may obtain loans from time to time in an aggregate amount of up to 50 per cent of the value of its inventory that Lender B deems to be acceptable for borrowing (based upon its type and quality, as well as other criteria) and of up to 80 per cent of the value of its receivables that Lender B deems to be acceptable for borrowing (based upon criteria such as the creditworthiness of the account debtors). ABC is expected to repay these loans from time to time as it receives payments from its customers. The line of credit is secured by all of ABC's existing and future inventory and receivables. In this type of financing, it is also common for the lender to obtain a security right in the bank account into which customer payments (i.e. the proceeds of inventory and receivables) are deposited.

3. Term-loan financing

32. Businesses often need financing for large, non-ordinary-course expenditures, such as the acquisition of equipment or the acquisition of a business. In these situations, businesses generally seek financing that such loans are repaid over a fixed period of time (with principal being repaid in monthly or quarterly instalments pursuant to an agreed-upon schedule or in a single payment at the end of the loan term).

33. For businesses that do not have strong, well-established credit ratings, term loan financing will generally be available only if the business is able to grant security rights in its assets to secure the financing. The amount of the financing will be based in part on the creditor's estimate of the net realizable value of the assets to be encumbered. In many States, real property is the only type of asset that is accepted by lenders to typically secures term loan financing. This is most likely the case in States whose secured transactions regime is not up to date. However, many businesses, particularly newly-established businesses, do not own any real property and, therefore, may not have access to term-loan financing. In other States, term loans secured by movables other assets, such as equipment and even intellectual property, are common.

34. Here is an illustration of this type of financing: ABC desires to expand its operations and purchase a business in State Y. ABC obtains a loan from Lender C to finance such acquisition. The loan is repayable in equal monthly instalments over a period of ten years and is secured by existing and future assets of ABC and the entity being acquired.

4. Transfer of title for security purposes

35. In States that honour a form of transfer of ownership even when it does not entail a transfer of possession and is done for financing purposes, a transaction denominated as a transfer of title by way of security (or sometimes as a “fiduciary” transfer of title) is recognized. These transactions are essentially non-possessory security rights, and they are primarily used in States where the secured transactions law has not yet appropriately recognized non-possessory security rights.

5. Sale and leaseback transactions

36. A “sale and leaseback transaction” provides a method by which a company can obtain credit based upon its existing tangibles (usually equipment) while still retaining possession and the right to use the tangibles in the operation of its business. In a sale and leaseback transaction, the company will sell its assets to another person for a specific sum (which it may then use as working capital, to make capital expenditures or for other purposes). Simultaneously with the sale, the company will lease the equipment back from that other person for a lease term and at a rental rate specified in the lease agreement. Often, the lease is a “financial lease” as opposed to an “operating lease” (see para. 27 for a definition of both terms).

II. Key objectives of an effective and efficient secured transactions regime

37. In the spirit of providing practical, effective solutions, the Guide explores and develops the following key objectives and themes of an effective and efficient secured transactions regime.

A. Promote secured credit

38. The primary overall objective of the Guide is to promote low-cost secured credit for persons in jurisdictions that adopt legislation based on the Guide’s recommendations, thereby enabling such persons and the economy as a whole to obtain the economic benefits that flow from access to such credit (see para. 2).

B. Allow utilization of the full value inherent in assets to support credit in a broad array of credit transactions

39. A key to a successful legal regime governing secured transactions is to enable a broad array of businesses to utilize the full value inherent in their assets to obtain credit in a broad array of credit transactions. In order to achieve this objective, the Guide emphasizes the importance of comprehensiveness, by: (i) permitting a broad range of assets to serve as encumbered assets (including present and future assets); (ii) permitting a broad range of obligations (including future and conditional obligations) to be secured by

security rights in encumbered assets; and (iii) extending the benefits of the regime to a broad array of debtors, creditors and credit transactions.

C. Obtain security rights in a simple and efficient manner

40. The cost of credit will be reduced if security rights can be obtained in an efficient manner. For this reason, the Guide suggests methods for streamlining the procedures for obtaining security rights and otherwise reducing transaction costs. These methods include: eliminating unnecessary formalities; providing for a single method for creating security rights rather than a multiplicity of security devices for different kinds of encumbered assets; and permitting security rights in future assets and for future advances of credit without any additional documentation or actions by the parties.

D. Recognize party autonomy

41. Because an effective secured transactions regime should provide maximum flexibility and durability to encompass a broad array of credit transactions, and also accommodate new and evolving forms of credit transactions, the Guide stresses the need to keep mandatory rules to a minimum so that parties may tailor their credit transactions to their specific needs. At the same time, the Guide takes into account that other legislation may protect the legitimate interests of consumers or other persons and specifies that a secured transactions regime should not override such legislation.

E. Provide for equal treatment of diverse sources of credit

42. Because healthy competition among all potential creditors is an effective way of reducing the cost of credit, the Guide recommends that the secured transactions regime apply equally to various creditors, including banks and other financial institutions, as well as domestic and non-domestic creditors.

F. Validate non-possessory security rights

43. Because the granting of a security right should not make it difficult or impossible for the debtor or other grantor to continue to operate its business, the Guide recommends that the legal regime provide for non-possessory security rights in a broad range of assets coupled with mechanisms for publicizing the existence of such security rights.

G. Encourage responsible behaviour on the part of all parties by enhancing predictability and transparency

44. Because an effective secured transactions regime should also encourage responsible behaviour by all parties to a credit transaction, the Guide seeks to promote predictability and transparency to enable the parties to assess all relevant legal issues and to establish appropriate consequences for non-compliance with applicable rules, while at the same time respecting and addressing confidentiality concerns.

H. Establish clear and predictable priority rules

45. A security right will have little or no value to a creditor unless the creditor is able to ascertain, at the time a transaction takes place, its priority in the property relative to other creditors (including an insolvency representative). Thus, the Guide proposes the establishment of a system for registering public notices with respect to security rights and, based on that system, clear rules that allow creditors to determine the priority of their security rights at the outset of the transaction in a reliable, timely and cost-efficient manner.

I. Facilitate enforcement of creditor's rights in a predictable and efficient manner

46. A security right will also have little or no value to a creditor unless the creditor is able to enforce the security right in a predictable and efficient manner. Thus, the Guide proposes procedures that allow creditors to so enforce their security rights, subject to judicial or other official control, supervision or review when appropriate. The Guide also recommends that there be a close coordination between a State's secured transactions laws and its insolvency laws with a view to respecting the pre-insolvency effectiveness and priority, as well as the economic value, of a security right subject to the appropriate rules of insolvency law.

J. Balance the interests of the affected persons

47. Because secured transactions affect the interests of various persons, including the debtor, other grantors, competing creditors, such as secured, privileged and unsecured creditors, purchasers and other transferees, and the State, the Guide proposes rules that take into account their legitimate interests and seek to achieve, in a balanced way, all the objectives mentioned above.

K. Harmonize secured transactions laws, including conflict-of-laws rules

48. Adoption of legislation based on the recommendations contained in the Guide will result in harmonization of secured transactions laws (through the adoption of similar substantive laws which will facilitate the cross-border recognition of security rights). This result in itself will promote the financing of international trade and the movement of goods and services across national borders. Furthermore, to the extent complete harmonization of national secured transactions laws might not be achieved, conflict rules would be particularly useful to facilitate cross-border transactions. In any event, conflict-of-laws rules would be useful in order, for example, to help secured creditors determine how to make their security rights effective against third parties.

I. Introduction

1. At its present session, Working Group VI continued its work on the preparation of a legislative guide on secured transactions pursuant to a decision taken by the Commission at its thirty-fourth session, in 2001.²³ The Commission's decision to undertake work in the area of secured credit law was taken in response to the need for an efficient legal regime that would remove legal obstacles to secured credit and could thus have a beneficial impact on the availability and the cost of credit.²⁴

²³ *Official Records of the General Assembly, Fifty-sixth Session, Supplement No. 17* and corrigendum (A/56/17 and Corr.3), para. 358. For a history of the project, see A/CN.9/WG.VI/WP.22. The reports of the first to the seventh sessions of the Working Group are contained in documents A/CN.9/512, A/CN.9/531, A/CN.9/532, A/CN.9/543 and A/CN.9/549, A/CN.9/570 and A/CN.9/574. The reports of the first and the second joint sessions of Working Group V (Insolvency Law) and VI (Security Interests) are contained in documents A/CN.9/535 and A/CN.9/550. The consideration of those reports by the Commission is reflected in documents A/57/17 (paras. 202-204), A/58/17 (paras. 217-222), A/59/17 (paras. 75-78) and A/60/17 (paras. 185-187).

²⁴ *Ibid.*, *Fifty-fifth Session, Supplement No. 17* (A/55/17), para. 455, and *Fifty-sixth Session, Supplement No. 17* and corrigendum (A/56/17 and Corr.3), para. 347.

II. Organization of the session

2. The Working Group, which was composed of all States members of the Commission, held its ninth session in New York from 30 January to 3 February 2006. The session was attended by representatives of the following States members of the Working Group: Algeria, Argentina, Austria, Belgium, Cameroon, Canada, China, Colombia, Czech Republic, France, Germany, Guatemala, India, Iran (Islamic Republic of), Italy, Japan, Jordan, Kenya, Madagascar, Mexico, Nigeria, Pakistan, Poland, Republic of Korea, Russian Federation, South Africa, Spain, Sri Lanka, Sweden, Switzerland, Thailand, Tunisia, Turkey, Uganda, United States of America and Zimbabwe.

3. The session was attended by observers from the following States: Guinea, Ireland, Malaysia, Panama and Philippines.

4. The session was also attended by observers from the following international organizations:

(a) *United Nations system*: International Monetary Fund, World Bank and World Intellectual Property Organization;

(b) *Intergovernmental organizations*: European Commission;

(c) *International non-governmental organizations invited by the Commission*: American Bar Association, Center for International Legal Studies, Commercial Finance Association, Forum for International Commercial Arbitration, Independent Film & Television Alliance, International Federation of Insolvency Practitioners, International Chamber of Commerce, International Insolvency Institute, International Law Institute, International Trademark Association, International Working Group on European Security Rights, Max-Planck-Institute for Foreign and Private International Law, National Law Center for Inter-American Free Trade, the Association of European Trademark Owners, the Association of the Bar of the City of New York and the European Law Student's Association.

5. The Working Group elected the following officers:

Chairman: Ms. Kathryn SABO (Canada)

Rapporteur: Mr. Pornchai ASAWAWATTANAPORN (Thailand).

6. The Working Group had before it the following documents: A/CN.9/WG.VI/WP.21 and Addenda 1 and 2 (Recommendations), A/CN.9/WG.VI/WP.22 (Background remarks), A/CN.9/WG.VI/WP.22/Add.1 (Introduction and key objectives) and A/CN.9/WG.VI/WP.24 and Addenda 1 to 5 (Revised recommendations).

7. The Working Group adopted the following agenda:

1. Opening of the session and scheduling of meetings.
2. Election of officers.
3. Adoption of the agenda.
4. Preparation of legislative guide on secured transactions.
5. Other business.
6. Adoption of the report.

III. Deliberations and decisions

8. The Working Group considered recommendations in chapters V (Effectiveness against third parties), VI (Priority) and X (Acquisition financing). The deliberations and decisions of the Working Group are set forth below in chapter IV. The Secretariat was requested to revise the recommendations in those chapters to reflect the deliberations and decisions of the Working Group.

IV. Preparation of a legislative guide on secured transactions

Chapter V. Effectiveness of the security right against third parties (A/CN.9/WG.VI/WP.24/Add.3, recs. 35-57 ter)

Purpose

9. The Working Group approved the substance of the purpose section unchanged.

Recommendation 35 (general methods for achieving third-party effectiveness of security rights)

10. It was agreed that the words “or to be created” that appeared within square brackets in the chapeau of recommendation 35 should be deleted, since a security right that was not effective even as between the parties to the security agreement could not be effective against third parties (whether the first-registered right would have priority as of the time of registration even if it had not been created at that time was said to be a priority issue to be discussed later).

11. It was also agreed that paragraph (b) should be recast so as to focus on dispossession of the grantor rather than on delivery of possession of the assets by the grantor to the secured creditor. It was observed that, to avoid the appearance of unencumbered title on the part of the grantor, the important element was dispossession of the grantor. It was also stated that the delivery of possession could be not only by the grantor but also by another person, such as the manufacturer of goods. Furthermore, it was pointed out that delivery of possession was sufficient, if it was made not only to the secured creditor, but also to its agents or employees, or to persons like an independent warehouseman that acknowledged that they would hold possession for the benefit of the secured creditor.

12. Moreover, it was agreed that the words “is effective only if” should be substituted for the words “becomes effective if” in order to avoid an implication that a security right might be effective as against all parties even before it was created. It was also agreed that the word “or” should be inserted after paragraph (a), indicating that paragraph (b) introduced alternative methods of achieving third-party effectiveness.

13. In the discussion, the suggestion was made that a security right, about which a notice was registered in the general security rights registry before it was created (see A/CN.9/WG.VI/WP.24/Add.3, recommendation 54), should be effective against third parties, only if it was created within a certain time period after registration. While some support was expressed for that suggestion, it was objected to on the ground that, if a security right was not created, the grantor could obtain a discharge of a registration, even through a summary proceeding (see A/CN.9/WG.VI/WP.24/Add.3, recommendation 57).

Recommendations 35 bis and 36 (special methods for achieving third-party effectiveness of security rights)

14. The Working Group agreed that recommendation 35 bis should be recast so as to separate special methods that were exclusive methods to achieve third-party effectiveness from special methods that were applicable in addition to registration in the general security rights registry. With respect to paragraph (d), the concern was expressed that the dichotomy between delivery of possession of the negotiable document and of the goods covered by the document might be problematic. The Working Group deferred discussion of that matter until it had the opportunity to consider recommendations 39 and 40 (see paras. 20 and 21 below).

15. Differing views were expressed as to whether a security right other than an acquisition security right in consumer goods should be effective against third parties automatically upon its creation. One view was that such an automatic effect would not be appropriate since the absence of transparency could have a negative impact on the availability and the cost of credit. Another view was that an automatic third-party effectiveness upon creation would be appropriate at least with respect to non-acquisition security rights in consumer goods low-value consumer goods, whose value and importance as a source of credit might not justify registration. After discussion, it was agreed that a recommendation should be included within square brackets for future consideration providing for automatic third-party effectiveness of non-acquisition security rights in low-value consumer goods that were not subject to title registration or title certificate systems.

16. The suggestion was made that recommendation 36 be deleted since it restated the obvious rule that, if different types of asset were covered in the same security agreement, different methods of achieving third-party effectiveness would be applicable. That suggestion was objected to. It was widely felt that recommendation 36 usefully clarified a matter with which many jurisdictions might be unfamiliar.

Recommendations 37 and 37 bis (third-party effectiveness of other rights)

17. While there was agreement as to the substance of recommendation 37, it was agreed that the draft Guide should state at the outset that the recommendations on security rights applied also to outright assignments and that, accordingly, references to the “grantor” also referred to the “assignor”, references to the “secured creditor” also referred to the “assignee” and references to a “security right” also referred to the “right of the assignee”.

18. The Working Group agreed that recommendation 37 bis should be deleted and that the commentary should discuss the possibility of extending the registration system to rights of lessors or consignors, setting forth the economic benefits to be derived from such an approach. It was widely felt that, while the commentary could address the possibility that lease or consignment law might provide that rights of lessors or consignors were subject to registration, a recommendation along the lines of 37 bis might go far beyond the scope of a secured transactions law. It was also observed that that approach was more in line with the nature of recommendation 37 bis, which was formulated as an option for States rather than as a recommendation (as indicated by the use of the verb “may” rather than the verb “should”).

Recommendation 38 (third-party effectiveness of a security right in tangibles by delivery of possession to the secured creditor)

19. In line with its decision with respect to recommendation 35 (b) (see para. 3 above), the Working Group agreed that recommendation 38 should be recast so as to focus on

dispossession of the grantor rather than on delivery of possession by the grantor to the secured creditor. It was also agreed that the bracketed text should be revised to explain that dispossession ought to be actual, which would be the case if the encumbered assets were in the possession of the secured creditor, an agent or employee of the secured creditor, or an independent warehouseman that had acknowledged that it retained possession on behalf of the secured creditor. It was observed that that text could be included in the appropriate place in the recommendations or the definitions, so as to apply throughout the draft Guide.

Recommendations 39 (third-party effectiveness of a security right in a negotiable document) and 40 (third-party effectiveness of a security right in goods covered by a negotiable document of title)

20. The Working Group agreed that recommendations 39 and 40 should be merged as, in practical terms, they addressed the same issue (i.e. the third-party effectiveness of a security right in a negotiable document of title and in the goods covered by the document). It was also agreed that the first sentence of recommendation 39 should be deleted as it repeated the general rule of recommendations 35 (b) and 38 that would be applicable in any case unless otherwise provided.

21. Differing views were expressed as to whether a security right in goods that were covered by a negotiable document of title should be made effective as against third parties during the time the goods were covered by the document through delivery of possession of the document only or also through delivery of possession of the goods. One view was that providing that such a security right might be made effective against third parties through delivery of possession of the goods (rather than the document) during the time the goods were covered by the document might undermine the reliability and negotiability of the document. Another view was that such an approach would appropriately recognize delivery of possession of the goods as a method of achieving third-party effectiveness, which would be useful if there was no delivery of the document or the goods were no longer covered by the document. It was observed that such an approach would not undermine the negotiability of the document, as long as a security right that was made effective against third parties by delivery of possession of the document had priority over a security right that was made effective against third parties through delivery of possession of the goods (as was provided in A/CN.9/WG.VI/WP.24/Add.4, rec. 80). After discussion, it was agreed that the language in recommendation 40, referring to third-party effectiveness achieved during the time the goods were covered by the document through delivery of possession of the goods (rather than the document) should be placed within square brackets for future discussion of the matter by the Working Group.

Recommendation 40 bis (third-party effectiveness of a security right in movables with respect to which there is a specialized title registry or a title certificate system)

22. There was general agreement in the Working Group with the substance of recommendation 40 bis. In response to a question as to whether paragraph (c) was redundant since it repeated the general rule of recommendation 35 (a), it was observed that, in the absence of paragraph (c), it might not be clear that third-party effectiveness could be achieved by registration in the general security rights registry, unless that was made clear in recommendations 35 and 35 bis. In response to another question as to whether the methods provided in recommendation 40 bis were exclusive, it was pointed out that that matter should be left to the special legislation dealing with title registration and title certificates. In the discussion, it was stated that recommendation 40 bis might need to be adjusted to apply to security rights in intellectual property rights. The Working

Group agreed that the Commission would have to decide how to deal with intellectual property rights.

Recommendation 41 (third-party effectiveness of security rights in rights to drawing proceeds from independent undertakings)

23. It was agreed that recommendation 41 (see A/CN.9/WG.VI/WP.24/Add.2, rec. 49) should be discussed together with the other recommendations dealing with security rights in rights to drawing rights from independent undertakings (see A/CN.9/WG.VI/WP.24/Add.2).

Recommendations 42-43 (third-party effectiveness of security rights in bank accounts)

24. It was agreed that paragraph (a) of recommendation 42, referring to registration of a notice in the general security rights registry, repeated the general rule of recommendation 35 (a) and should be deleted.

25. While there was general agreement in the Working Group as to the substance of recommendation 43, it was observed that the identification of the encumbered asset should be reviewed since it was not the bank account itself but rather a claim for the payment of funds in the account. The Working Group agreed that that matter could be considered in the context of the discussion of recommendations dealing with bank accounts (see para. 88 below). The Working Group also agreed that the rights of the depositary bank, addressed in the note after recommendation 43, should also be discussed in that context.

Recommendation 44 (third-party effectiveness of security rights in proceeds)

26. A number of concerns were expressed. One concern was that automatic third-party effectiveness of security rights in proceeds of encumbered assets (i.e. without a description of the proceeds in the notice registered or registration of an additional notice once the proceeds arise) would inadvertently result in third parties not being alerted as to pre-existing security rights in cases where the proceeds were of a kind different from the original encumbered assets (e.g. the encumbered assets were inventory and the proceeds receivables). In order to address that concern, the suggestion was made that paragraph (a) should be deleted so that, under the residual rule in recommendation 44, the secured creditor would have a period within which to take any additional step necessary to make a security right in proceeds effective against third parties. There was both support for and opposition to that suggestion. In support, it was stated that, for the registry to fulfil its role of providing sufficient notice to third parties, the notice should include a reasonable description of proceeds other than money, negotiable instruments, negotiable documents or bank accounts. Otherwise, it was observed, parties would need to search outside the registry to find out possible security rights. It was also stated that automatic third-party effectiveness of security right in proceeds could eliminate competition among lenders, as the lender with a security right in the main assets of a grantor would have a security right in all assets that were proceeds of these main assets, a result that could have a negative impact on the availability and the cost of credit.

27. In opposition to that suggestion, it was observed that third parties would normally expect that assets in which they took a security right might be subject to other security rights as proceeds and would conduct a search ("due diligence") in any case to ensure that the grantor had rights in the encumbered assets. It was also pointed out that requiring an additional step to extend third-party effectiveness to security rights in proceeds would result in the secured creditor having to monitor all acts of the grantor with respect to the

encumbered assets so as to make its security rights in the proceeds effective against third parties. Furthermore, it was pointed out that in cases where, for example, inventory was sold and the proceeds subsequently took the form of receivables, negotiable instruments and funds in a bank account, the normal expectation of market participants would be that the security right in all proceeds would be automatically effective against third parties without any additional step. In that connection, the suggestion was made that receivables should be added to the list of assets in paragraph (b), with respect to which a security right in proceeds was automatically effective against third parties. That suggestion received sufficient support.

28. Another concern was that paragraph (a) was not appropriate in that it treated differently registration in the general security rights registry from registration in specialized title registries, although in both cases third parties were put on notice about the possible existence of security rights. In order to address that concern, it was suggested that paragraph (a) should also include a reference to third-party effectiveness by registration in a specialized title registry. There was sufficient support for that suggestion.

29. Yet another concern was that recommendation 44 did not make it sufficiently clear whether third-party effectiveness could be re-established if the secured creditor, having failed to take the steps necessary to make its right in the original encumbered assets or the first proceeds effective against third parties, later took all the steps necessary to make its right in subsequent proceeds effective against third parties. In order to address that concern, it was suggested that recommendation 44 should be revised to address that matter. While the view was expressed that, if third-party effectiveness had lapsed, it was permanently lost, the prevailing view was that the secured creditor could re-establish third-party effectiveness. It was widely felt that such an approach would be consistent with the rule suggested in the note after recommendation 65 (see A/CN.9/WG.VI/WP.24/Add.4), according to which priority would date back to the time when third-party effectiveness was re-established.

30. In response to a question as to whether a separate step was necessary to make effective against third parties a security right in proceeds where the security right in the original encumbered assets had been made effective against third parties by dispossession of the grantor, it was noted that, under the residual rule in recommendation 44, the secured creditor could make its right in proceeds effective against third parties by taking any steps necessary under recommendations 35 or 35 bis within a certain period of time after the proceeds arose.

31. In the discussion, it was stated that the Working Group should keep in mind the overall objective of the draft Guide to promote the availability of secured credit, in particular in developing countries and countries with economies in transition, rather than include a comparative-law analysis of national systems of developed countries.

32. After discussion, the Working Group requested the Secretariat to revise recommendation 44 presenting alternatives with regard to automatic third-party effectiveness of security rights in proceeds, taking into account the suggestions made and the views expressed.

Recommendations 45 and 46 (third-party effectiveness of security rights in fixtures)

33. A number of suggestions were made. One suggestion was that the first sentence of recommendation 45 should be deleted because it either repeated the general rule or required completion of the third-party effectiveness steps a second time after tangibles had become fixtures. That suggestion did not attract sufficient support. Another suggestion was that, for a security right in a fixture to an immovable to become effective against third

parties, notice ought to be registered in the immovables registry. That suggestion was objected to. It was stated that, while the integrity of immovables registries should be preserved by appropriate priority rules, there was no reason to render a security right, with respect to which a notice had been registered in the general security rights registry, ineffective against third parties. Yet another suggestion was that recommendation 45 should be revised to make it clear that registration in the general security rights registry or, alternatively, in the immovables registry should be sufficient to make a security right effective against third parties. There was sufficient support in the Working Group for that suggestion. As a matter of drafting, it was suggested that the reference to negotiable instruments and negotiable documents should be deleted since these types of asset could not be fixtures (see para. 92 below). After discussion, the Working Group requested the Secretariat to revise recommendation 45 taking into account the views expressed and the suggestions made.

Recommendation 46 (third-party effectiveness of security rights in masses of goods or products)

34. There was general agreement in the Working Group as to the substance of recommendation 46.

Recommendation 47 (third-party effectiveness of security rights in masses of goods or products)

35. Differing views were expressed as to whether a security right in an encumbered asset that was effective against third parties should continue to be effective when the asset became a part of a mass of goods or product. One view was that, as in the case of proceeds (see para. 27 above), no additional step should be required to preserve the effectiveness of the security right in the resulting mass or product, since the commercial expectation would be that the encumbered goods would be converted into the mass or product (e.g. as inventory was expected to be sold and converted into receivables, checks and funds in a bank account, so flour and sugar was expected to be converted into cakes). Another view was that, in the absence of an additional step to render the security interest in the mass or product effective against third parties, third parties might not have a way of knowing whether the original encumbered asset was in fact part of the mass or product. After discussion, the Working Group agreed that the recommendation be recast to reflect both alternatives for discussion at a later stage.

36. It was also agreed that the security right in the original encumbered asset that was effective against third parties did not result in a security right in the entire mass of goods or product but rather to a proportionate part of the mass of goods or product. The Working Group agreed that recommendation 47 refer to the formulation of proportionality already found in recommendation 32 in A/CN.9/WG.VI/WP.21 dealing with the creation of a security right in a mass of goods or product. Drafting suggestions made to this effect were to delete the words after the comma in the third and fourth lines and replace them with either the words “the security right thereby arising in accordance with recommendation 32 remains effective” or “that arises under recommendation 32 is effective against third parties”.

Additional recommendation on third-party effectiveness of security rights in personal or property rights securing or supporting assigned receivables

37. The Working Group agreed that a new recommendation should be added to address the third-party effectiveness of a security right in personal or property rights securing or supporting assigned receivables (see A/CN.9/WG.VI/WP.21, recommendation 16 (a)).

Recommendation 48 (characteristics of a general security rights registry)

38. With respect to paragraph (a), the Working Group agreed that the words “indicating the possibility of the existence of a security right” be added in the first sentence in order to accurately reflect the position that the notice registered did not create the security right but only alerted third parties of the possible existence of a security right particularly in the case of advance registration where a notice could be registered before steps to create a security right had been concluded. It was also agreed that the word “only” in the second sentence be deleted since the information required to be reflected in the notice could change.

39. The Working Group approved paragraphs (b), (c) and (d) unchanged. In respect of paragraph (d)(i), it was agreed that the words “and publishing periodic audited statements of the expenses and revenues of the revenue of registration system” that appeared in square brackets be removed and reflected in the commentary since the level of that detail was inconsistent with the rest of the paragraph.

40. In response to a question on the relationship between paragraph (e)(i) with respect to setting of fees at a cost-recovery level and paragraph (h)(v) recommending possible delegation of the registry function to a private authority, it was agreed that there was no conflict between the two paragraphs, since a State could outsource part of the registry function (e.g. operation and maintenance of computers) to a private authority which could operate the function more effectively and that profit by a private entity did not necessarily have to translate into a cost to users. The intent of the paragraphs, it was felt, was to underscore the principle that the registry should not be operated by the State for profit purposes or as a form of indirect tax to users. It was noted that that had led to inefficiencies and decline in the use of security rights and other registries in many jurisdictions.

41. The Working Group agreed that paragraph (e)(i) be amended to reflect the principles in paragraph 40 above by adding the words “at a level no higher than” between the words “searching” and “at” in the first line. In response to a suggestion that language be added to the paragraph to reflect that fees should be as low as possible so as to reasonably provide for operation of the registry, the Working Group agreed that that matter was sufficiently covered by paragraph (a) of the purpose section of the chapter and by paragraph (e)(i) itself.

42. The Working Group approved the substance of paragraphs (e)(ii), (iii) and (iv) unchanged.

43. While there was broad support for paragraph (f)(i), the Working Group agreed that scrutiny relating to validity, sufficiency and accuracy of the notice was too narrow in scope and that the paragraph should be broadened so that no scrutiny of any kind would be necessary by any person other than the registrant. A suggestion that, in the absence of scrutiny of the notice by a registry staff, the draft Guide should provide penalties for filing false or misleading statements did not receive sufficient support. It was felt that, as a false notice had no legal effect and could be discharged under recommendation 57, the matter of penalties should be left to tort, penal or other law and should not be duplicated in the draft Guide. The Working Group agreed that the commentary reflect that position so as to provide guidance to States concerned by potential fraud and abuse of the registry system. It

was also agreed that the Working Group consider expanding the scope of recommendation 57 or the commentary to address the possibility of a grantor abusing the integrity of the registry process by filing a false release.

44. The Working Group approved the substance of paragraphs (g)(i), (ii) and (iii) unchanged. It was also agreed that the examples in paragraph (g)(iv) be moved to the commentary. In addition, the Working Group approved the substance of paragraphs (h)(i), (ii) and (iii) unchanged.

45. With respect to subparagraphs (h) (ii) and (iii), differing views were expressed. One view was that the identity of registrants should be disclosed and a copy of the registered notice should be sent to the grantor. It was stated that disclosure of the identity of the registrant could usefully limit fraudulent registrations and maintain the integrity of the registry. It was also observed that the identity of the secured creditor would be disclosed anyway in the context of payment of the registration fee on line. Furthermore, it was pointed out that, as the secured creditor could register a notice even on its own, the grantor should be informed in a timely fashion so as to be able to exercise its rights. Another view was that such requirements should be left to States that could decide on the basis of a cost-benefit analysis. It was stated that adding such requirements could inadvertently increase the cost of the system, which would have to be borne ultimately by the grantor. It was also observed that it might not always be possible to verify the identity of a registrant, particularly where independent messengers or intermediaries were used to make the registration. Furthermore, it was stated that if the obligation to send a copy of the notice to the grantor was retained, consideration should be given to specifying the consequences of failure to comply.

46. As to whether the obligation to forward a copy of the registered notice should be on the registry or the secured creditor, differing views were expressed. One view was that, in a system that was intended to limit involvement of registry staff so as to avoid costs and the possibility of errors, the secured creditor should forward the copy of the registered notice to the grantor. In addition, it was observed that, as it was in the interest of the secured creditor to ensure that a registration was made, the burden to forward a copy thereof to the grantor was better placed on the secured creditor. Another other view was that the registered notice should be sent to the grantor by the registry. It was stated that that would be easy, quick and inexpensive in the context of an electronic system. After discussion, the Working Group approved the substance of paragraphs (h) and (i) unchanged, and agreed that the issues raised be reflected in the commentary.

Recommendation 49 (required content of registered notice)

47. With respect to paragraph (a), the concern was expressed that inclusion in the notice of the name and address of the secured creditor could inadvertently provide to competitors of the secured creditor access to confidential business information. It was stated that systematic profiling of secured creditors and business relationships would be possible. In order to address that concern, it was suggested that the name and address of the secured creditor should not be included in the notice to be registered. That suggestion was objected to. It was stated that the registration system could not work if third parties were not able to contact secured creditors so as to find out about the existence and the scope of existing security rights. It was also observed that the confidentiality concerns could be satisfied by inclusion in the notice of the name of a nominee of the secured creditor instead of the name of the secured creditor. In addition, it was stated that the concern expressed related to the ability of third parties to search in the registry using the name of the secured creditor rather than the name of the grantor, a matter that could be addressed in the commentary. In response to the point mentioned above about inclusion in the notice of the name of a

nominee of the secured creditor instead of the name of the secured creditor, it was pointed out that that would not hinder profiling if the nominee was an agent of the secured creditor.

48. The Working Group agreed that where a search yielded an excessive number of potentially positive matches, supplementary identification criteria should be required. It was therefore agreed that the word “permitted” in square brackets be deleted and the word “required” be retained outside square brackets. Subject to that change, the Working Group approved the substance of recommendation 49, retaining paragraph (d) within square brackets for consideration at a later stage.

Recommendation 50 and 50 bis (legal sufficiency of grantor name in a registered notice)

49. The Working Group approved the substance of recommendations 50 and 50 bis unchanged.

Recommendation 50 ter (change in name or other identifier of the grantor)

50. The Working Group approved the substance of recommendation 50 ter unchanged.

Recommendations 51-53 (legal sufficiency of description of assets covered by a registered notice)

51. It was agreed that recommendations 51 to 53 should be revised to make it clear that the main rule was in recommendation 51, while recommendations 52 and 53 dealt with the description of generic categories of assets and after-acquired assets respectively. Subject to that change, the Working Group approved the substance of recommendations 51 to 53.

Recommendations 54 (advance registration) and 55 (one registration for multiple security agreements between the same parties)

52. The Working Group approved the substance of recommendations 54 and 55 unchanged.

Recommendation 56 and 56 bis (duration and renewal of registration)

53. The Working Group approved the substance of recommendations 56 and 56 bis unchanged. It was agreed that a new heading should be inserted for recommendation 56 bis along the following lines: “time of effectiveness of registration”.

Recommendations 57 and 57 bis (discharge of registration)

54. It was agreed that, in order to address revolving credit facilities in which new advances could be made at any time before termination of the facility, termination of all lending commitments should be added to the alternative conditions of the discharge of registration listed in the chapeau of recommendation 57. It was also agreed that, in order to avoid placing on the secured creditor the undue burden of having to constantly monitor payments and discharge registrations, paragraph (a) should be amended to provide that the secured creditor should discharge the registration within a specified time period after the request of the grantor. It was stated that, according to paragraph (b), the grantor could seek a discharge of a registration through a summary proceeding even before expiry of the deadline set out in paragraph (a). However, it was observed, in such a case, the grantor might have to bear any costs involved. It was agreed that the commentary should include a discussion of those issues. Subject to those changes, the Working Group approved the

substance of recommendation 57. The Working Group approved also the substance of recommendation 57 bis unchanged.

Recommendation 57 ter (amendment of registration)

55. It was agreed that the secured creditor could seek an amendment of the registered notice at any time. It was also agreed that recommendation 57 ter should include parallel language to the language of recommendation 57 dealing with the amendment of the registered notice by the grantor (e.g. to include a narrower description of the encumbered assets). Subject to those changes, the Working Group approved the substance of recommendation 57 ter.

Additional recommendation on the registration of assignments of secured obligations

56. The suggestion was made that a new recommendation should be added to deal with the question whether, in the case of an assignment of a secured obligation, which would result in the transfer to the assignee of any rights securing the obligation, the registered notice should be amended to indicate the name of the new secured creditor. As to the contents of that recommendation, differing views were expressed. One view was that, despite the assignment, the debt was still owed and the security right remained effective against third parties without any amendment of the registered notice. Another view was that, without such an amendment, the information on record would be inaccurate, which would undermine the reliability of the registry. In response, it was observed that failure to change the name of the secured creditor should not result in a loss of third-party effectiveness, in particular as third parties would conduct searches in registries using the name of the grantor as a search criterion. After discussion, the Working Group requested the Secretariat to prepare an appropriate recommendation and place it within square brackets for future consideration of the matter by the Working Group.

57. In the discussion, the question was raised whether a recommendation should be prepared to address the question of new registration in the case of an assumption of the obligation by a person other than the grantor. In response, it was noted that as, in such a case, the debtor would change but not the grantor, no amendment of the registered notice would be required.

Chapter VI. Priority of the security right over the rights of competing claimants (A/CN.9/WG.VI/WP.24/Add.4, recs. 58-85)

Purpose

58. The Working Group approved the substance of the purpose section unchanged.

Recommendation 58 (scope of the priority rules)

59. The Working Group approved the substance of recommendation 58 unchanged.

Recommendation 59 (secured obligations affected)

60. The Working Group agreed to delete the text in parenthesis in paragraph (b) of recommendation 59 on the understanding that the commentary would clarify that future advances had the same priority as the first advance. It was also agreed that paragraph (b)

should explicitly refer to future advances or other obligations. Subject to those changes, the Working Group approved the substance of recommendation 59.

Recommendation 60 (subordination agreements)

61. It was observed that recommendation 60 should be revised to permit not only a competing claimant with priority but also a competing claimant with the same priority ranking as the beneficiary of the subordination to subordinate its right to the right of another competing claimant. It was also stated that subordination should extend to an amount up to the secured claim of the beneficiary of the subordination. The Working Group approved the substance of recommendation 60 on the understanding that the commentary would include those clarifications.

Recommendations 61 and 62 (priority of security rights that are not effective against third parties)

62. The Working Group considered the question whether security rights that were not effective against third parties should nevertheless be effective against some parties. It was generally agreed that such security rights should be effective as between the grantor and the secured creditor.

63. Differing views were expressed as to whether such rights should be effective against any third party. One view was that security rights that were not effective against third parties should be effective against the general (unsecured) creditors (see recommendation 61 (c)), as well as against other secured creditors whose security rights were not effective against third parties (see recommendation 61 (b)). It was stated that, outside insolvency proceedings there was no reason not to give effect to a security right as against general creditors (with the exception of judgement creditors). It was also observed that, between two security rights that were not effective against third parties, the one that was created first should prevail.

64. However, the prevailing view was that a security right that was not effective against third parties should have no effects as against general creditors or secured creditors whose security rights were not effective against third parties. It was stated that such an approach would be simple and consistent with the meaning of third party effectiveness adopted in the draft Guide. It was also stated that the practical result of such an approach, namely that no issue of priority would arise as between the rights of secured creditors with security rights that were not effective against third parties and that, therefore, their rights would be equal between them and with the rights of general creditors, would be appropriate and could be discussed in the commentary.

65. After discussion, the Working Group agreed that a security right that was not effective against third parties should nevertheless be effective against the grantor but not against other similar secured creditors or general creditors.

66. With respect to recommendation 62, it was widely felt that it appropriately reflected the principle that judgement creditors should have priority over secured creditors whose security rights were not effective against third parties. As a matter of drafting, it was agreed that recommendation 62 should be recast to state in a positive way that, once enforcement had begun, the secured creditor was barred from making its security right effective against third parties. It was also agreed that recommendation 62 should be coordinated with recommendation 71 which dealt with priority as between a judgement creditor and a secured creditor with a security right that was effective against third parties.

Recommendation 63 (priority of security rights that are effective against third parties)

67. Recalling its decision with respect to recommendation 35 (see para. 10 above) that a security right could not become effective against third parties before it was created (i.e. before it became effective as between the grantor and the secured creditor), the Working Group decided that the text in the note after recommendation 63 should be substituted for the first sentence of recommendation 63. It was noted that that text provided that, in the case of advance registration, priority dated back to the time of mere registration or third-party effectiveness (i.e. registration or possession and creation), whichever occurred first. It was widely felt that such an approach would facilitate and recognize advance registration, which should have a beneficial impact on the availability and the cost of credit. It was also agreed that, for the same reasons, reference should be made to registration in a specialized title registry or notation on a title certificate.

68. The suggestion was made that, if the secured creditor took possession of tangibles in advance of the creation of a security right, priority should date back to the time of delivery of possession. That suggestion was objected to. It was stated that with the exception of securities that were outside the scope of the draft Guide and negotiable instruments and negotiable documents with respect to which third-party effectiveness by possession gave a superior right, it was difficult to envisage delivery of possession of tangibles without (implicit or explicit) creation of a security right. It was also observed that, even if such situations could arise, giving retroactive priority to security rights made effective against third parties by possession, would raise uncertainty as third parties would have to follow the assets to determine whether to lend on the basis of those assets as security. After discussion, it was agreed that the matter could be raised in a note for the Working Group to consider it further to an evaluation of various practices.

Recommendation 64 (priority of a security right registered in a specialised title registry or by notation on a title certificate)

69. The Working Group approved the substance of recommendation 64 unchanged (see para. 76 below).

Recommendation 65 (continuity in priority when third-party effectiveness is achieved by more than one method)

70. The Working Group agreed that recommendation 65 should be amended to give effect to the decisions made by the Working Group with respect to recommendation 63 (see para. 67 above) by adding an appropriate reference to registration. It was also agreed that a new recommendation should be added to state that, if third-party effectiveness lapsed, priority dated as of the time third-party effectiveness was re-established.

Recommendations 66 (priority of security rights in proceeds)

71. The Working Group approved the substance of recommendation 66 unchanged.

Recommendations 67-69 (priority of rights of buyers, lessees and licensees of encumbered assets)

72. Differing views were expressed as to whether the buyer of inventory in the ordinary course of business should take free of security rights of the immediate seller only or also of persons from whom the immediate seller acquired the assets. One view was that the buyer should take free of security rights created by the immediate seller only (i.e. the bracketed

language in recommendation 67 should be retained). It was stated that, if the buyer were to take free of all security rights, a bad-faith grantor could achieve the extinction of the security right by organizing two subsequent sales of the encumbered assets (i.e. from grantor A to B and from B to C, where C would take the assets free of security rights created by A).

73. The prevailing view, however, was that buyers in the ordinary course of business should take free of all security rights (i.e. the bracketed language should be deleted). It was stated that it was important to protect the reliability of ordinary course of business transactions. It was also observed that secured creditors would be protected to the extent that their security rights would extend to the proceeds from the sale of encumbered assets (and to proceeds of proceeds), which, assuming that buyers in the ordinary course of business were in good faith, would represent a reasonable price. In addition, it was pointed out that secured creditors would be protected if the sale of the encumbered assets took place outside the ordinary course of business of the seller.

74. As a matter of drafting, it was suggested that the first sentence of recommendation 67 should be recast to make it clear that it constituted the main rule, while the second sentence of recommendation 67 and recommendations 68 and 69 were exceptions to that rule. That suggestion received sufficient support.

75. After discussion, it was agreed that the bracketed language in recommendation 67 should be deleted and recommendations 67 to 69 should be revised as suggested in paragraphs 72 and 74 above. Subject to those changes, the Working Group approved the substance of recommendations 67 to 69.

Additional recommendations on the priority of rights of buyers, lessees and licensees of encumbered assets

76. It was suggested that not only security rights (see recommendation 64 and para. 69 above) but also rights of buyers, lessees or licensees of encumbered assets, registered in a specialised title registry or by notation on a title certificate should be given priority over security rights that were made effective against third parties by registration in the general security rights registry. That suggestion received sufficient support. The Secretariat was requested to prepare a recommendation.

77. It was also suggested that rights of buyers of consumer goods in good faith should be given priority over security rights in consumer goods of low value, as well as over acquisition security rights in consumer goods. It was stated that such a recommendation was necessary since security rights in consumer goods of low value and acquisition security rights in consumer goods in general were exempted from registration (see para. 15 above and A/CN.9/WG.VI/WP.24/Add.5, recommendation 128), and, as a result buyers of consumer goods, could not find out about the possible existence of any security right. It was also suggested that buyers of encumbered assets should have priority over security rights in any asset of low value. In order to address a concern expressed that such an approach might not be appropriate with respect to commercial goods, it was stated that the recommendation could be limited to consumer goods. Interest was expressed in those suggestions. The Secretariat was requested to reflect them in a note for future consideration by the Working Group.

Recommendation 70 (priority of statutory (preferential) claims)

78. The Working Group approved the substance of recommendation 70 unchanged.

Recommendation 71 (priority of rights of judgement creditors)

79. Recalling its decision with respect to recommendation 62 (see para. 66 above), the Working Group agreed that recommendation 71 should also be recast to state the rule in a positive way and be coordinated with recommendation 62. As a matter of drafting, it was suggested that recommendation 71 should refer to “the extension of credit” in general rather than to “amounts advanced” to cover loans but also open credit facilities and similar lending structures (e.g. letters of credit). In addition, it was agreed that the scope of the recommendation be extended to include a creditor that had obtained a provisional court order.

80. The suggestion was made that recommendation 71 should be revised to give priority to a secured creditor over a judgement creditor even with respect to credit extended after the issuance of a judgement on the basis of earlier-made commitments. It was stated that, in the absence of such a provision, lenders in a number of important long-term credit transactions would be reluctant to commit to extend credit in the future, whether by commitment to advance funds or to issue an independent undertaking, and if they did, they would insist that the funds be withdrawn from the facility by the grantor earlier than needed which would result in additional cost to the grantor. It was also observed that, if the secured creditor were to cease providing credit at the time it received knowledge of the judgement, it would deny the grantor liquidity or further credit at a time it was most needed and could lead to insolvency of the grantor. That suggestion was objected to. It was observed that, after the issuance of a judgement, a lender could not expect to obtain priority over the judgement creditor on the basis of a mere commitment and should not be expected to extend credit. It was also stated that that result was obtained in practice through clauses in the loan documentation giving the lender the right to cease providing credit.

81. In the discussion, the view was expressed that the issue would be more easily resolved if the draft Guide were to provide that the notice needed to include the maximum amount secured (see A/CN.9/WG.VI/WP.24/A dd.3, rec. 49 (d)), since priority of a security right could be limited to that amount, thus freeing other assets of the grantor for the benefit of other creditors, such as judgement creditors.

82. Subject to the changes referred to in paragraph 79 above, the Working Group approved the substance of recommendation 71, on the understanding that the implications discussed above would be reflected in the commentary.

Recommendation 72 (priority of rights in assets for improving and storing the assets)

83. The suggestion was made that the recommendation be deleted or at least the priority given be limited to the value added or preserved, since such a priority rule did not further the purpose of the draft Guide of promoting secured credit. After discussion, the Working Group agreed to clarify that the priority in recommendation 72 was limited to the value added or preserved.

Recommendation 73 (priority of reclamation claims)

84. The Working Group agreed that the reference to “an event specified in the sales contract” should be deleted. It was observed that, in practice, reclamation claims arose out of operation of law upon default or financial insolvency of a buyer. Subject to that change, the Working Group approved the substance of recommendation 73.

Recommendation 74 (priority of security rights in negotiable instruments)

85. The Working Group approved the substance of recommendation 74 unchanged.

Recommendation 75 (priority of security rights in rights to drawing rights from independent undertakings)

86. It was agreed that recommendation 75 (see A/CN.9/WG.VI/WP.24/Add.2, rec. 62) should be discussed together with other recommendations dealing with security rights in rights to drawing rights from independent undertakings (see A/CN.9/WG.VI/WP.24/Add.2).

Recommendation 76 to 78 (priority of security rights in bank accounts)

87. A number of concerns were expressed. One concern was that recommendation 76 did not address priority conflicts between a security right in a bank account made effective against third parties by control and a security right in the same account made effective against third parties by any other method (e.g. in the bank account as proceeds). In order to address that concern, it was suggested that a right made effective against third parties by control should have priority over a right made effective against third parties by any other method. That suggestion attracted sufficient support.

88. Another concern was that the encumbered asset was not the bank account itself but the right to claim the funds in the bank account. In order to address that concern, the suggestion was made that the definition of “bank account” should be revised. Yet another concern was that the term “control” was misleading, since it suggested physical possession. With respect to the definition of “control” (see A/CN.9/WG.VI/WP.24/Add.3, note after recommendation 42), the concern was expressed that many countries would not be able to implement it and the priority rules based on it, for example, because, under banking law, a bank was precluded from accepting instructions with respect to an account from any person other than the holder of the account and a bank account would not be transferred to the secured creditor but the funds in that account would be transferred to an account of the secured creditor. To address those concerns, the suggestion was made that the definitions of “bank account” and “control” should be revised to address the concerns raised. That suggestion received sufficient support.

89. With respect to recommendation 77, it was agreed that reference should be made to the right of set-off not being impaired by a security right and not being available unless created by other law.

90. Subject to the changes mentioned above (see paras. 87-89), the Working Group approved the substance of recommendations 76 to 78.

Recommendations 79 (priority of security rights in money) and 80-81 (priority of security rights in negotiable documents and goods covered by negotiable documents)

91. The Working Group approved the substance of recommendations 79 to 81 unchanged.

Recommendations 82-84 (priority of security rights in fixtures)

92. A number of suggestions were made. One suggestion was that recommendations 82 and 83 should refer to rights of buyers, lessees and other parties with a right in fixtures to immovables. Another suggestion was that the language of recommendations 82 and 83

should be aligned so that both referred to registration in the immovables registry. Yet another suggestion was that recommendation 83 should be retained without square brackets and the words in parenthesis should be deleted (see para. 33 above). Subject to those changes, the Working Group approved the substance of recommendations 82 and 83. As to recommendation 84, it was agreed that it should be deleted as it repeated the general rule.

Recommendation 85 (priority of security rights in masses of goods or products)

93. It was agreed that paragraph (a) should be retained as a separate recommendation dealing with security rights in fixtures to movables with respect to which there was a specialized registration or title certificate system. With respect to paragraph (b), it was agreed that the commentary should set forth examples of priority rules so as to provide guidance to States. It was also agreed that the commentary should discuss issues of characterization, for example, of security rights in rents or crops, which in some jurisdictions were subject to the regime on movables, while in other jurisdictions were subject to the regime on immovables.

**Chapter X. Acquisition financing devices
(A/CN.9/WG.VI/ WP.24/Add.5, recs. 125-135)**

94. Due to the lack of sufficient time, the Working Group decided to consider only recommendations 133 and 134.

Recommendation 133 (priority of acquisition security rights in proceeds of inventory)

95. The Working Group considered the bracketed text in recommendation 133 (unitary and non-unitary approach), according to which the super-priority of an acquisition security right in proceeds would not extend to proceeds in the form of receivables. Differing views were expressed. After discussion, it was agreed that the bracketed text in recommendation 133 should be retained within square brackets.

Recommendation 134 (enforcement)

96. There was support for both the unitary and the non-unitary approach. As to the alternative ways to implement the non-unitary approach, there was both support and criticism of both alternatives. The need to preserve the functional equivalence between the various devices was particularly emphasized. At the same time, there was support for preserving the flexibility of States in implementing the non-unitary approach. The Working Group approved the substance of recommendation 134 (unitary approach) unchanged. As to the alternatives reflected in recommendation 134 (non-unitary approach), the Working Group agreed that they should be retained. It was also agreed that the commentary should be further developed to explain in some detail the ways in which these alternatives could be implemented and their specific implications.

V. Future work

97. In view of the expectation of the Commission to approve in principle the substance of the recommendations of the draft Guide at its thirty-ninth session, which was scheduled to take place in New York from 19 June to 7 July 2006, the Working Group agreed to hold

an extra session, its tenth session, in New York from 1 to 5 May 2006. The Working Group noted that its eleventh session would take place in Vienna from 4 to 8 December 2006, those dates being subject to approval by the Commission at its thirty-ninth session.

E. Note by the Secretariat on security interests: recommendations of the draft Legislative Guide on Secured Transactions, submitted to the Working Group on Security Interests at its ninth session

	<i>Recommendations</i>	<i>Page</i>
XI. Conflict of laws		136-154

XI. Conflict of laws *

Purpose

The purpose of conflict-of-laws rules is to determine the law applicable to each of the following issues: the creation of a security right; the pre-default rights and obligations between the secured creditor and the grantor; the effectiveness of a security right against third parties; the priority of a security right over the rights of competing claimants; and the enforcement of a security right.²⁵

These rules are also applicable to: (i) rights that are not “security rights” but which are within the scope of this Guide (see recommendation 3 (f)); and (ii) in States that enact a non-unitary system with respect to acquisition financing devices, the rights of a seller or a financial lessor of goods who retains title to the goods.

Security rights in tangible property

136. The law should provide that, except as otherwise provided in recommendations 140 and 142, the creation, the effectiveness against third parties and the priority over the rights of competing claimants of a security right in tangible property are governed by the law of the State in which the encumbered asset is located. However, with respect to security rights in tangible property of a type ordinarily used in more than one State, the law should provide that such issues are governed by the law of the State in which the grantor is located. [With respect to security rights in the type of tangible property mentioned in the preceding sentence that is subject to a title registration system, the law should provide that such issues are governed by the law of the State under the authority of which the registry is maintained.]

[Note to the Working Group: The commentary will explain that the application of recommendation 136 to negotiable instruments and negotiable documents is subject to the limited exception provided in recommendation 140 that the law of the grantor’s location determines in specified circumstances whether the effectiveness against third parties has been achieved by registration. The commentary will also explain that recommendation 142

* Recommendations prepared in close cooperation with the Hague Conference on Private International Law.

²⁵ The meaning of these terms is elaborated in chapters IV, V, VI, VII and VIII.

provides an additional option for the law governing creation and third-party effectiveness of security rights in goods in transit and export goods.

At the eighth session of the Working Group, it was observed that the rule in the second sentence of recommendation 136 should not apply if the assets were subject to specialized registration systems (see A/CN.9/588, para. 87). Language is included in recommendation 136 within square brackets for the consideration of this matter by the Working Group. The Working Group may wish to focus on the exact description of the types of asset to which this rule should apply (e.g. ships, planes).

In addition, the Working Group may wish to consider whether a rule along the lines of recommendation 140 should apply to security rights in tangible assets covered in recommendation 136. If that approach were to be followed, if the grantor's location provided for third-party effectiveness by registration, the only law applicable to third party-effectiveness of security rights in tangible assets other than by possession would be the law of the grantor's location and not the law of the location of the assets.]

Security rights in intangible property

137. The law should provide that the creation, the effectiveness against third parties and the priority over the rights of competing claimants of a security right in intangible property are governed by the law of the State in which the grantor is located. [However, with respect to security rights in intangible property that is subject to a title registration system, the law should provide that such issues are governed by the law of the State in which [...].]

*[Note to the Working Group: The commentary will explain that recommendation 137, reflecting the principle in articles 22 and 30 of the United Nations Assignment Convention, applies, for example, to receivables. The second sentence within square brackets is intended to draw the attention of the Working Group to the possibility that a different law might apply to other intangible assets that are subject to title registration, such as intellectual property rights (e.g. the *lex loci protectionis* for patents and trademarks and the *lex loci protectionis* or the *lex originis* for copyrights).]*

Security rights in rights to proceeds from a drawing under an independent undertaking

138. [See A/CN.9/WG.VI/WP.24/Add.2.]

Security rights in bank accounts

139. Except as otherwise provided in recommendation 140, the law should provide that the creation, the effectiveness against third parties, the priority over the rights of competing claimants, the rights and duties of the depository bank with respect to the security right and the enforcement of the security right in a bank account are governed by

Alternative A

the law of the State expressly stated in the account agreement as the State whose law governs the account agreement or, if the account agreement expressly provides that another law is applicable to all such issues, that other law. However, the law of the State determined pursuant to the preceding sentence applies only if the depository bank has, at the time of the conclusion of the account agreement, an office in that State which is engaged in the regular activity of maintaining bank accounts. The law should also specify that, if the applicable law is not determined pursuant to the

preceding two sentences, the applicable law is to be determined pursuant to fallback rules based on article 5 of the Hague Convention on the Law Applicable to Certain Rights in Respect of Securities Held with an Intermediary.

[Note to the Working Group: Alternative A is an abbreviated version of the approach followed in articles 4.1 and 5 of the Hague Convention on the Law Applicable to Certain Rights in Respect of Securities Held With An Intermediary (“the Hague Securities Convention”). The commentary will include the detailed fallback rules in article 5 of the Hague Securities Convention with sufficient explanation.]

Alternative B

the law of the State in which the bank that maintains the bank account has its place of business. In the case of more than one place of business, reference should be made to the place where the branch maintaining the account is located.

[Note to the Working Group: The Working Group may wish to consider whether alternative B should address methods for identifying the branch which maintains an account.]

Third-party effectiveness of security rights in specified types of asset by registration

140. If the State in which the grantor is located recognizes registration as a method of achieving effectiveness against third parties of a security right in any of the following types of encumbered assets, the law of that State determines whether the effectiveness against third parties of a security right in such encumbered assets has been achieved by registration under the laws of that State:

- (a) Negotiable instruments;
- (b) Negotiable documents; and
- (c) Bank accounts.

[Note to the Working Group: The commentary will explain that recommendation 140 provides that the State whose law governs the achievement of third-party effectiveness by registration with respect to security rights in the specified types of assets is the same State whose law governs the achievement of third-party effectiveness with respect to security rights in intangible property. Thus, secured creditors seeking to achieve third-party effectiveness by registration for security rights in the specified types of assets and in intangible property will need to comply with the registration system of only one State. Similarly, third parties seeking to determine whether any secured creditor is claiming a security right in the specified types of assets or in intangible property will need to search in the registration system of only one State. Recommendation 140 applies only to third-party effectiveness achieved by registration (not by control or any other method) and does not determine the law governing priority. Under recommendations 61 to 66 in A/CN.9/WG.VI/ WP.21/Add.1, a security right in the specified types of asset made effective against third parties by registration is subordinate to a security made effective against third parties by control or possession.]

Security rights in proceeds

141. The law should provide that:

(a) The creation of a security right in proceeds is governed by the law [of the State whose law governs] [governing] the creation of the security right in the original encumbered asset from which the proceeds arose; and

(b) The effectiveness against third parties and the priority over the rights of competing claimants of a security right in proceeds are governed by the same law as the law [of the State whose law governs] [governing] the effectiveness against third parties and the priority over the rights of competing claimants of a security right in original encumbered assets of the same kind as the proceeds.

Security rights in goods in transit and export goods

142. The law should provide that a security right in tangible property (other than negotiable instruments or negotiable documents) in transit or to be exported from the State in which it is located at the time of the creation of the security right may also be created and made effective against third parties under the law of the State of the ultimate destination, provided that the property reaches that State within a short time period of [to be specified] days after the time of creation of the security right.

[Note to the Working Group: The commentary will explain that a security right in goods in transit and export goods can be created and made effective against third parties, under recommendation 136, in accordance with the law of the country of their location at the time of creation, or, under recommendation 142, in accordance with the law of the country of their ultimate destination. The commentary will also explain that the law of the State of the ultimate destination that governs creation and third-party effectiveness will apply even in the case of a contest with competing rights that were created and made effective against third parties while the export goods were located in the State of origin. In addition, the commentary will explain that the rule in this recommendation: (i) is applicable to encumbered assets that travel whether or not negotiable documents relating to the goods accompany the goods; (ii) is not applicable to encumbered goods that do not travel, whether or not negotiable documents relating to the goods do travel; and (iii) is not applicable to encumbered negotiable documents whether or not they travel.]

Meaning of “location” of the grantor

143. The law should provide that, for the purposes of the recommendations in this chapter, the grantor is located in the State in which it has its place of business. If the grantor has a place of business in more than one State, the grantor’s place of business is that place where the central administration of the grantor is exercised. If the grantor does not have a place of business, reference is to be made to the habitual residence of the grantor.

Relevant time when determining location

144. The law should provide that:

(a) Except as provided in paragraph (b), references to the location of the assets or of the grantor in the recommendations in this chapter refer, for creation issues, to that location at the time of the creation of the security right and, for third-party effectiveness and priority issues, to that location at the time the issue arises;

(b) If all rights of competing claimants in an encumbered asset arose before a change in location of the asset or the grantor, references in the recommendations in this chapter to the location of the asset or of the grantor (as relevant under the recommendations in this chapter) refer, with respect to third-party effectiveness and priority issues, to the location prior to the change in location.

Continued third-party effectiveness upon change of location

145. The law should provide that, if a security right in encumbered assets is effective against third parties under the law of the State in which the encumbered assets or the grantor (as relevant under the recommendations in this chapter) are located and that location changes to this State (i.e. the State that has enacted the law), the security right continues to be effective against third parties under the law of this State for a period of [to be specified] days after the location of the encumbered assets or the grantor (as relevant under the recommendations in this chapter) has changed to this State. If the requirements of the law of this State to make the security right effective against third parties are satisfied prior to the end of that period, the security right continues to be effective against third parties thereafter under the law of this State. For the purposes of any rule of this State in which time of registration or other method of achieving third-party effectiveness is relevant for determining priority, that time is the time at which that event occurred under the law of the State in which the encumbered assets or the grantor were located before their location changed to this State.

[Note to the Working Group: The commentary will explain that the application of the recommended provision is not based on reciprocity; i.e. it operates regardless of whether or not the State of the old location of the encumbered assets or of the grantor has enacted an equivalent provision to cover the converse situation involving the relocation of encumbered assets or a grantor to that State. The commentary will also explain that recommendation 145 will apply: (i) if the asset or the grantor moves from an enacting State or a non-enacting State to an enacting State. Recommendation 145 (or the Guide) will not apply if: (i) the asset or the grantor moves from an enacting State or a non-enacting State to a non-enacting State. Furthermore, the commentary will explain that the effect of the last sentence of this recommendation is that priority in the receiving State “relates back” to the time at which the relevant event for achieving third-party effectiveness occurred in the other State.]

Rights and obligations of the grantor and the secured creditor

146. The law should provide that the mutual rights and obligations of the grantor and the secured creditor with respect to the security right, whether arising from the security agreement or by law, are governed by the law chosen by them and, in the absence of a choice of law, by the law governing the security agreement.

Rights and obligations of the account debtor and the assignee, the obligor under a negotiable instrument or the issuer of a negotiable document and the transferee

147. The law should provide that the following matters are governed by the law of the State whose law governs an assigned receivable, a transferred negotiable instrument or a transferred negotiable document:

(a) The relationship between an account debtor and the assignee of the receivable, between an obligor under a negotiable instrument and the transferee of that instrument or between the issuer of a negotiable document and the transferee of that document;

(b) The conditions under which the assignment of the receivable, the transfer of the negotiable instrument or the transfer of the negotiable document can be invoked against the account debtor, the obligor on the negotiable instrument or the issuer of the negotiable document; and

(c) The determination of whether the obligations of the account debtor, the obligor on the negotiable instrument or the issuer of the negotiable document have been discharged.

[Note to the Working Group: The Working Group may wish to note that the draft Guide has both substantive and private international law recommendations with respect to the rights and obligations of a guarantor/issuer or nominated person (recs. 25bis, 25tres in A/CN.9/WG.VI/WP.24/Add.2 and 138), a depositary bank (recs. 26 in A/CN.9/WG.VI/WP.21 and 139), an account debtor in the case of an assignment of receivables (recs. 17-23 in A/CN.9/WG.VI/WP.21 and 147) and an obligor under a negotiable instrument (recs. 24 in A/CN.9/WG.VI/WP.21 and 147). The draft Guide includes also a substantive law recommendation with respect to the rights and obligations of an issuer of a negotiable instrument (rec. 109 in A/CN.9/WG.VI/WP.21/Add.2). The Working Group may wish to extend the scope of recommendation 147 to cover the relationship between the issuer of a negotiable document and a transferee of the document, as the same tri-partite relationship exists in the case of a transfer of a negotiable document and the same conflict-of-laws rule might apply.]

The Working Group may also wish to note that recommendation 3 (f) in A/CN.9/WG.VI/WP.21 provides that absolute (or outright) transfers of receivables are “generally” included. However, the definition of “receivable” in para. 21 (o) of A/CN.9/WG.VI/WP.22/Add.1 excludes rights to payment under a negotiable instrument, the obligation to pay under an independent undertaking and the obligation to pay under a bank account. As a result, absolute transfers of all those types of obligation are excluded from the scope of the draft Guide and are left to other non-secured transactions law. While this result may be appropriate with respect to obligations to pay under independent undertakings and bank accounts, which are subject to special rules and have been excluded also from the scope of the UN Assignment Convention, it may not be appropriate with respect to obligations to pay under negotiable instruments. The Working Group may wish to consider the matter and make a decision as to whether the obligation to pay under a negotiable instrument should be included, taking into account that special recommendations might need to be added in this regard.]

Enforcement of security rights

148. Except as provided in the recommendations on the law applicable to the enforcement of security rights after an insolvency proceeding has been commenced with respect to the assets of the grantor, the law should provide that matters affecting the enforcement of a security right are governed by

Alternative A

the law of the State where enforcement takes place.

Alternative B

the law governing the security agreement. However a secured creditor may take possession of tangible encumbered assets without the consent of the person in

possession of them only in accordance with the law of the State in which those assets are located at the time the secured creditor takes possession of them.

Impact of insolvency on the law applicable

[Note to the Working Group: See recommendation K and note in the recommendations of this Guide on Insolvency, A/CN.9/WG.VI/WP.21/Add.3, which read as follows: “The law should provide that, notwithstanding the commencement of an insolvency proceeding, the creation, effectiveness against third parties, priority and enforcement of a security right are governed by the law that would be applicable in the absence of the insolvency proceeding. This recommendation does not affect the application of any insolvency rules, including any rules relating to avoidance, priority or enforcement of security rights. See also recommendations 30 and 31 of the Insolvency Guide. The commentary will clarify the relation between this recommendation, on the one hand, and recommendations 30 and 31 of the Insolvency Guide on the other hand. The commentary will also explain that this recommendation refers to insolvency rules without regard to whether they are characterized as procedural, substantive, jurisdictional or otherwise.]

Exclusion of renvoi

149. The law should provide that the reference in the recommendations in this chapter to “the law” of another State as the law governing an issue refers to the law in force in that State other than its conflict-of-laws rules.

Public policy and internationally mandatory rules

150. The law should provide that:

(a) The application of the law determined under the recommendations of this chapter may be refused by the forum only if the effects of its application would be manifestly contrary to the public policy of the forum;

(b) A forum may apply those provisions of its own law, which, irrespective of rules of conflict of laws, must be applied even to international situations; and

(c) The rules in paragraphs (a) and (b) do not permit the application of provisions of the law of the forum to third-party effectiveness or priority among competing claimants, unless the law of the forum is the applicable law under the recommendations of this chapter.

[Note to the Working Group: The commentary will explain the meaning of public policy and internationally mandatory rules referred to in recommendation 150. Subparagraphs (a) and (b), which track the language of article 11.1 and 11.2 of the Hague Securities Convention, have been prepared pursuant to a suggestion made at the eighth session of the Working Group (see A/CN.9/588, para. 107). Subparagraph (c), which tracks the language of article 11.3 of the Hague Securities Convention, is also in line with articles 30 to 32 of the United Nations Assignment Convention. It is intended to ensure that the certainty of the law applicable to third-party effectiveness and priority of a security right achieved with the recommendations in this chapter will not be compromised by application of the law of the forum.]

Special rules when the applicable law is the law of a multi-unit State

[Note to the Working Group: The Working Group may wish to note that recommendations 151-154 are intended to provide ex ante certainty as to the application

of the recommendations not only by a multi-unit State but also, most importantly, by a unitary State when the law applicable is the law of a multi-unit State. If the Working Group considers that these recommendations are too detailed for a guide, it may wish to consider whether these matters should be addressed with more general recommendations and appropriate explanations in the commentary.]

151. The law should provide that in applying the recommendations in this chapter to situations in which the State whose law governs an issue is a multi-unit State:

(a) Subject to paragraph (b), references to the law of a multi-unit State are to the law of the relevant territorial unit (as determined on the basis of the location of the grantor or of an encumbered asset or otherwise under the recommendations in this chapter) and, to the extent applicable in that unit, to the law of the multi-unit State itself;

(b) If the law in force in a territorial unit of a multi-unit State designates the law of another territorial unit of that State to govern third-party effectiveness or priority, the law of that other territorial unit governs that issue.

152. The law should provide that if, under the recommendations in this chapter, the applicable law is that of a multi-unit State or one of its territorial units, the internal choice of law rules in force in that multi-unit State shall determine whether the substantive rules of law of that multi-unit State or of a particular territorial unit of that multi-unit State shall apply.

[Note to the Working Group: The Working Group may wish to note that recommendations 151 and 152 track the language of article 12.2 and 12.3 of the Hague Securities Convention respectively. The Working Group may wish to consider a definition of “multi-unit State” along the lines of article 1 (1) (m) of the Hague Securities Convention (“multi-unit State” means a State within which two or more territorial units of that State, or both the State and one or more of its territorial units, have their own rules of law in respect of any of the issues specified in the recommendations in this Guide).]

153. The law should provide that, if the account holder and the depositary bank have agreed on the law of a specified territorial unit of a multi-unit State:

(a) The references to “State” in the first sentence of recommendation 139 (alternative A) are to that territorial unit;

(b) The references to “that State” in the second sentence of recommendation 139 (alternative A) are to the multi-unit State itself.

154. The law should provide that the law of a territorial unit applies if:

(a) Under recommendation 139 (alternative A) and 153, the designated law is that of a territorial unit of a multi-unit State;

(b) Under the law of that State the law of a territorial unit applies only if the depositary bank has an office within that territorial unit which satisfies the condition specified in the second sentence of recommendation 139 (alternative A); and

(c) The rule described in paragraph (b) was in force at the time the security right in the bank account was created.]

[Note to the Working Group: Recommendations 153 and 154, which track the language of article 12.1 and 12.4 of the Hague Securities Convention respectively, may be necessary if the Working Group decides to retain alternative A in recommendation 139.]

A/CN.9/WG.VI/WP.24/Add.1

Report of the Secretary-General: recommendations of the draft
Legislative Guide on Secured Transactions

ADDENDUM

CONTENTS

	<i>Paragraphs</i>	<i>Page</i>
VII. Pre-default rights and obligations of the parties	86-87	
VIII. Default and enforcement.	88-124	

VII. Pre-default rights and obligations of the parties**Purpose**

The purpose of the provisions of the law on pre-default rights and obligations of the parties is to:

- (a) Provide rules on additional terms for a security agreement with a view to rendering secured transactions more efficient and predictable;
- (b) Reduce transaction costs by eliminating the need to negotiate and draft terms to be included in the security agreement where the rules provide an acceptable basis for agreement;
- (c) Reduce potential disputes;
- (d) Provide a drafting aid or checklist of issues the parties may wish to address at the time of negotiation and conclusion of the security agreement; and
- (e) Encourage party autonomy.

Party autonomy

86. [The law should provide that, except as otherwise provided in [specify the provisions that may not be derogated from or varied by agreement], the secured creditor and the grantor may derogate from or vary by agreement its provisions relating to their respective rights and obligations. Such an agreement should not affect the rights of any person who is not a party to the agreement.]

[Note to the Working Group: Recommendation 86 will be moved to the general provisions of the draft Guide—see A/CN.9/588, para. 47.]

Suppletive rules

87. The law should include suppletive, non-mandatory rules that would apply in the absence of contrary agreement of the parties. Such rules should, inter alia:

- (a) Provide for the care of the encumbered assets by either the grantor or the secured creditor in possession of the encumbered assets;
- (b) Preserve the security rights in the encumbered assets, including the right to

proceeds or civil fruits derived from the encumbered assets;

(c) Provide for the right of the grantor to continue the operation of its business including the right to use, commingle and dispose of the encumbered assets in the ordinary course of its business; and

(d) Secure the discharge of a security right once the obligation it secures has been paid or otherwise performed.

VIII. Default and enforcement

Purpose

The purpose of the provisions of the law on default and enforcement is to:

(a) Provide clear and simple procedures for the enforcement of security rights after debtor default in a predictable and efficient manner;

(b) Provide procedures that maximize the potential realization value of the encumbered assets for the grantor, the secured creditor and other creditors of the grantor;

(c) Provide for expeditious judicial and, subject to appropriate safeguards, non-judicial methods for the secured creditor to realize the value of the encumbered assets;

(d) Coordinate the secured transactions enforcement regime with other law governing the enforcement of claims in encumbered assets, including insolvency law.

Application of this chapter to absolute transfers of receivables

88. The law should provide that this chapter applies to the enforcement of the rights of a transferee of receivables acquired by means of an absolute transfer only to the extent that, pursuant to the terms of the transfer, there is recourse to the transferor for a payment default of the account debtor.

[Note to the Working Group: The Working Group may wish to note that recommendation 88 is intended to clarify that, although the Guide applies generally to the absolute transfer of receivables, this chapter applies only to absolute transfers of receivables made for security purposes.]

General standard of conduct

89. The law should provide that all parties must enforce their rights and perform their obligations under the recommendations of this chapter in good faith and in a commercially reasonable manner.

Liability for failure to comply with recommendations of this chapter

89 bis. The law should provide that any party that fails to comply with the recommendations of this chapter is liable for any loss caused by that failure.

[Note to the Working Group: The Working Group may wish to consider whether the principles in recommendations 89 and 89 bis should be applied, as appropriate, in the exercise of rights and performance of duties under all chapters of the Guide.]

Party autonomy

90. The law should provide that the general standard of conduct set forth in recommendation 89 cannot be waived unilaterally or varied by agreement at any time.

[91.] Subject to recommendation 90, the law should provide that; (i) the grantor and any other person who owes payment or other performance of the secured obligation may waive unilaterally or vary by agreement any of their rights and remedies under the recommendations of this chapter only after default, and (ii) the secured creditor may waive unilaterally or by agreement any of its rights and remedies under the recommendations of this chapter at any time. A variation by agreement does not affect the rights of any person not a party to the agreement. A person challenging an agreement has the burden of showing that it was made prior to default or is inconsistent with recommendation 90.

Rights and remedies after default

92. As more specifically provided in other recommendations of this chapter, the law should provide that after default the grantor and the secured creditor have the rights and remedies provided in the recommendations of this chapter, in the security agreement (except to the extent inconsistent with the mandatory recommendations of this chapter) and in any other law.

Secured creditor remedies

93. As more specifically provided in other recommendations of this chapter, the law should provide that after default the secured creditor may exercise one or more of the following remedies with respect to an encumbered asset:

- (a) Obtain possession of a tangible encumbered asset;
- (b) Collect on an encumbered asset that is a receivable, negotiable instrument, bank account or right to drawing proceeds from an independent undertaking;
- (c) Enforce rights under a negotiable document;
- (d) Dispose of an encumbered asset;
- (e) Propose to the grantor that the secured creditor accept an encumbered asset in total or partial satisfaction of the secured obligation; and
- (f) Any other remedy provided in the security agreement (except to the extent inconsistent with the mandatory recommendations of this chapter) or any other law.

[Note to the Working Group: The Working Group may wish to note that the rule of interpretation “the use of the singular also includes the plural and vice versa” will be added in the general provisions of the Guide.]

Judicial and extrajudicial enforcement

94. As more specifically provided in other recommendations of this chapter, the law should enable the secured creditor after default to exercise the remedies described in recommendation 93:

- (a) By resorting to a court or other authority; or
- (b) Without resorting to a court or other authority.

Grantor remedies

95. As more specifically provided in other recommendations of this chapter, the law should provide that after default the grantor may exercise one or more of the following remedies:

(a) At any time before the disposition, acceptance or collection of an encumbered asset by the secured creditor, pay in full the secured obligation, including interest and costs of enforcement up to the time of full payment, and obtain a release from the security right of all encumbered assets securing that obligation;

(b) Apply to a court or other authority for relief if the secured creditor has not complied or is not complying with its obligations under the recommendations of this chapter with respect to extrajudicial enforcement;

(c) Reject the proposal of the secured creditor to accept an encumbered asset in total or partial satisfaction of the secured obligation within the time limits prescribed by the recommendations of this chapter; and

(d) Any other remedy provided in the security agreement (except to the extent inconsistent with the mandatory recommendations of this chapter) or any other law.

Cumulative remedies

96. The law should provide that the exercise of a remedy does not prevent the exercise of another remedy.

Other remedies

97. The law should provide that the exercise of remedies with respect to an encumbered asset under this law does not prevent the secured creditor from exercising its remedies with respect to the obligation secured by that encumbered asset. The law should also provide that the exercise of remedies with respect to a secured obligation does not prevent the secured creditor from exercising its remedies with respect to an encumbered asset that secures that obligation.

Release of the encumbered assets after full payment

98. The law should provide that, after default and until a disposition, acceptance or collection of an encumbered asset by the secured creditor, the debtor, the grantor or any other interested party (e.g. a secured creditor whose security right has lower priority than that of the enforcing secured creditor, a guarantor or a co-owner of the encumbered assets) is entitled to pay in full the secured obligation, including interest and the costs of enforcement up to the time of full payment. The law should specify that the effect of such payment is to release from the security right, all encumbered assets securing that obligation or, to the extent provided in other law, to subrogate any other interested party that makes the payment to the rights of the secured creditor.

[Notice of intention to pursue extrajudicial enforcement]

99. The law should:

(a) Address whether, when and to whom a secured creditor is required to give notice of its intention to pursue extrajudicial enforcement of a security right following default;

(b) State the manner in which the notice is to be given, its timing, and its

minimum contents, including whether the notice [to the grantor] should contain an accounting of the amount then owed and a description of the steps the debtor or the grantor must take to obtain the release of the encumbered assets from the security right under recommendation 98;

(c) Provide that the notice should be in a language that is reasonably expected to inform its recipients about its contents, such as the language of the security agreement;

(d) Address whether the notice must be registered in the general security rights registry;

(e) Address the legal consequences of failure to comply with the recommendations governing notices with respect to extrajudicial enforcement; and

(f) List circumstances in which the notice need not be given in order to avoid a negative effect on the realization value of the encumbered assets (e.g. perishable tangibles or other assets whose value may decline speedily).]

Objections to extrajudicial enforcement

100. The law should provide that nothing in the law prevents the debtor, the grantor or other interested parties (e.g. a secured creditor with a lower priority ranking than that of the enforcing secured creditor, a guarantor or a co-owner of the encumbered assets) from applying to a court or other authority for relief if the secured creditor has not complied or is not complying with its obligations under the recommendations of this chapter. The law should build safeguards into the process to discourage unfounded applications and to prevent any improper interference with or undue delay of the secured creditor's ability to realize on encumbered assets.

[Note to the Working Group: The Working Group may wish to consider whether the principle with respect to the right to apply to court for relief by the debtor, grantor or other interested third parties should generally apply to the exercise of all rights and remedies under the recommendations of this chapter and not only with respect to extrajudicial enforcement.]

Secured creditor's right to take possession of an encumbered asset

101. The law should provide that after default the secured creditor is entitled to take possession of a tangible encumbered asset. The secured creditor may obtain possession of such asset without resorting to a court or other authority, but only if this can be accomplished without the use of force or the threat of force. [The law should provide expedited procedures for situations in which the secured creditor resorts to court or other authority to obtain possession of an encumbered asset.]

[Note to the Working Group: The Working Group may wish to consider whether the principle of summary judicial proceedings should be reformulated as a general principle that would apply to the exercise of all rights and remedies under the recommendations of this chapter. If so, language along the following lines could be considered: "The law should provide for summary judicial proceedings with respect to the exercise of rights and remedies of the secured creditor, the grantor, and any other person who owes performance of the secured obligation or claims to have a right in the encumbered assets". The commentary will explain that any person entitled to seek relief under recommendation 100 may seek such relief for violation of this recommendation. Also, the terminology section of the Guide will include a definition of "possession" that defines the term to mean actual rather than fictive or constructive possession.]

Collection of receivables

102. With respect to a receivable that is an encumbered asset, the law should provide that after default the secured creditor may collect or otherwise enforce the receivable.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that the secured creditor may, as an alternative, elect to dispose of a receivable pursuant to recommendations 93 (d) and 110.]

103. The law should provide that the secured creditor's right to collect or otherwise enforce a receivable includes the right to collect or otherwise enforce any personal or property right that supports payment or performance of the receivable (such as a guarantee or security right).

Negotiable instruments

104. The law should provide that after default the secured creditor has the right to enforce a negotiable instrument that is an encumbered asset against a person obligated on that instrument. However, as between the secured creditor and (i) the person obligated on the negotiable instrument, or (ii) other persons claiming rights under the law governing negotiable instruments, the obligations and rights of those persons are determined by the law governing negotiable instruments.

[Note to Working Group: The commentary will include the following examples of such persons:

(a) The person obligated on the negotiable instrument may be obligated to pay only a holder or other person entitled to enforce the instrument under the law governing negotiable instruments; and

(b) The right of the person obligated on the instrument to raise defences to that obligation is determined by the law governing negotiable instruments.]

105. The law should provide that the secured creditor's right to collect or enforce a negotiable instrument includes the right to collect or enforce any personal or property right that supports payment or performance of the negotiable instrument (such as a guarantee or security right).

Rights to drawing proceeds from an independent undertaking

106. *[See A/CN.9/WG.WGVI/WP.24/Add.2.]*

Bank accounts

106 bis. The law should provide that after default a secured creditor with a security right in a bank account may exercise any remedy of secured creditors under this chapter. However, the right to collect on a bank account is, as against the depositary bank, subject to recommendation [...].

[Note to the Working Group: The Working Group may wish to note that the recommendation mentioned in recommendation 106 bis, which could be placed in a new section of the Guide dealing with third-party rights and obligations, could read along the following lines: "The law should provide that nothing in this Guide obligates a depositary bank to pay any person other than: (i) a person that is the depositary bank's customer with respect to the bank account, and (ii) a secured creditor who has control of the bank account pursuant to an agreement with the depositary bank."]

107. The law should provide that after default a secured creditor who has control of a bank account is entitled to enforce its security right as a depositary bank if the secured creditor is a depositary bank or, if the depositary bank is not the secured creditor, in accordance with the terms of the agreement with the bank establishing control without having to resort to a court or other authority.

108. The law should provide that a secured creditor that does not have control of a bank account may enforce the security right against the depositary bank only pursuant to a court order, unless the depositary bank agrees otherwise.

[Note to the Working Group: The Working Group may wish to note that the following definition will be added to the terminology section of the Guide: “a secured creditor has “control” with respect to a bank account where: (i) the secured creditor is the depositary bank; (ii) the depositary bank has agreed to follow instructions from the secured creditor with respect to the bank account without further consent of the grantor (the agreement by which the depositary bank has agreed to follow instructions from the secured creditor with respect to the bank account without further consent of the grantor is referred to as a “control agreement”); or (iii) the secured creditor is the bank’s customer as to the bank account”.]

Negotiable documents

109. The law should provide that after default the secured creditor has the right to enforce a negotiable document against the issuer or any other person obligated on the negotiable document. However, as between the secured creditor and the issuer or other person obligated on the negotiable document, the rights and obligations of those persons are determined by the law governing negotiable documents.

[Note to Working Group: The Working Group may wish to note that the commentary will include the example that the issuer may be obligated to deliver the goods only to a holder of the negotiable document with respect to them.]

Disposition of encumbered assets

110. As more specifically provided in other recommendations of this chapter, the law should provide that a secured creditor after default is entitled to sell, lease, license or otherwise dispose of an encumbered asset pursuant to recommendation 93(d).

110 bis. The law should provide that a secured creditor that disposes of encumbered assets without resorting to court or other authority may select the method, manner, time, place, and other aspects of the disposition.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that this recommendation is subject to the standard of good faith and commercial reasonableness set out in recommendation 89. It will also explain that the purpose and effect of this recommendation is to provide a balance between the interests of both the grantor (and its other creditors) and the secured creditor in enabling flexibility in the methods used to dispose of the encumbered assets toward the end of obtaining an economically effective realization, while at the same time protecting the grantor against actions taken by the secured creditor that, in the commercial context, are not reasonable.]

Advance notice with respect to extrajudicial disposition of encumbered assets

111. The law should address whether a secured creditor is required to give notice with respect to extrajudicial disposition of an encumbered asset after default. Where the law requires such notice to be given, the law should:

(a) Specify that the notice should be given to: (i) the grantor, the debtor and any other person who owes payment of the secured obligation, (ii) any person with rights in the encumbered asset who, prior to the sending of the notice by the secured creditor to the grantor, has notified in writing the secured creditor of those rights, and (iii) any other secured creditor who, more than [...] days before the notice is sent to the grantor has registered a notice of a security right in the encumbered asset under the name of the grantor or who was in possession of the encumbered asset at the time it was seized by the secured creditor;

(b) State the manner in which such notice is to be given, its timing, and its minimum contents, including whether the notice [to the grantor] should contain an accounting of the amount then owed and the right of the debtor or the grantor to obtain the release of the encumbered assets from the security right under recommendation 98;

(c) Provide that any such notice should be in a language that is reasonably expected to inform its recipients about its contents (notice to the grantor is sufficient if it is in the language of the security agreement and, if the security right was made effective against third parties by registration, notice to all other persons is sufficient if it is in the language of the registry);

(d) Address the legal consequences of failure to comply with the recommendations governing notices with respect to extrajudicial dispositions; and

(e) List circumstances in which any such notice need not be given either because the time delay associated with requiring advance notice could have a negative effect on the realization value of the encumbered assets (as in the case of perishable tangibles or other assets whose value may decline speedily) or because the encumbered assets are of a sort sold on a recognized market (thereby obviating the need for advance notice).

112. The law should provide rules ensuring that the notice can be given in an efficient, timely and reliable way so as to protect the grantor or other interested parties, while, at the same time, avoiding having a negative effect on the secured creditor's remedies and the potential realization value of the encumbered assets.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that these rules should balance the interest of the secured creditor in having the flexibility to dispose of the encumbered asset promptly in order to take advantage of favourable market conditions (an interest that also benefits the grantor and other interested parties) with the interest of the grantor and those other parties in obtaining notice of the disposition sufficiently before the disposition in order to take actions that might further protect their interests (such as locating potential buyers for the encumbered asset or attending a public disposition of the encumbered asset to verify the secured creditor's compliance with its obligations under this chapter.)]

Acceptance of encumbered assets in satisfaction of the secured obligation

113. The law should provide that after default a secured creditor may propose to accept, without resorting to a court or other authority, one or more of the encumbered assets in total or partial satisfaction of the secured obligation.

114. The law should provide that a secured creditor who proposes to accept an encumbered asset in total or partial satisfaction of the secured obligation must send the proposal, specifying the amount owed as of the date the proposal is sent and the amount of the obligation that is proposed to be satisfied by accepting the encumbered asset to:

(a) The grantor, the debtor and any other person who owes payment of the secured obligation (e.g. a guarantor);

(b) Any person with rights in the encumbered asset who, more than [...] days prior to the sending of the proposal by the secured creditor to the grantor, has notified in writing the secured creditor of those rights; and

(c) Any other secured creditor who has registered a notice of a security right in the encumbered asset in the name of the grantor [more than [...] days before the proposal is sent to the grantor] or who was in possession of the encumbered asset at the time it was seized by the secured creditor.

115. The law should provide that, if a person to whom a proposal to accept an encumbered asset in total or partial satisfaction of the secured obligation must be sent under recommendation 114 objects in writing to such a proposal within [a short time, such as 20 days] after the proposal is sent, the secured creditor may not proceed with the proposal.

Surplus and shortfall

116. The law should provide that the enforcing secured creditor must apply the net proceeds of its enforcement (after deducting costs of enforcement) to the secured obligations. Except as provided in recommendation 117, the enforcing secured creditor must pay any surplus remaining after such application to subordinate competing claimants, who, prior to any distribution of the surplus, gave written notice of their claims to any surplus to the enforcing secured creditor. Any balance remaining must be remitted to the grantor.

117. The law should also provide that whether or not there is any dispute as to the entitlement of any competing claimant or as to the priority of payment, the enforcing secured creditor may, in accordance with generally applicable procedural rules, pay the surplus to a competent judicial or other authority or to a public deposit fund for distribution. In the case of such payment, the surplus should be applied in accordance with the priority rules of this law.

118. The law should provide that distribution of the proceeds realized by a judicial disposition or other officially administered enforcement process is to be made in accordance with general rules of the State governing execution proceedings, but subject to the priority rules of this law.

119. The law should provide that the debtor and any other person who owes payment of the secured obligation are liable for any shortfall still owing after application of the net proceeds of enforcement to the secured obligation.

Right of prior-ranking secured creditor to take over enforcement

120. The law should provide that, at any time before final disposition, acceptance or collection of an encumbered asset, a secured creditor whose security right has priority over that of an enforcing [secured creditor] [competing claimant] is entitled to take control of the enforcement process initiated by that [secured creditor] [competing claimant]. The right to take control includes the right to continue enforcement initiated by the [secured

creditor] [competing claimant], enforce by a different method provided in the recommendations of this chapter, and choose whether or not any remedy under the recommendations of this chapter will be administered by a court or other authority.

Title or other right acquired through non-judicial disposition

121. The law should provide that, if a secured creditor elects to dispose of an encumbered asset without resorting to a court or other authority, the person that acquires title or other right in the asset in good faith pursuant to the disposition acquires its right in the asset subject to rights that had priority over the security right of an enforcing [secured creditor] [competing claimant] but takes free of the rights of the grantor, the enforcing secured creditor and any competing claimant whose right has a lower priority than that of the enforcing secured creditor. The same rule applies to the title or other right acquired by a secured creditor who has accepted an encumbered asset in total or partial satisfaction of the secured obligation.

Title or other right acquired through judicial disposition

122. The law should provide that, if a secured creditor disposes of an encumbered asset through a judicial or other officially administered process, the title or other right acquired by the transferee is determined by the general rules of the State governing execution proceedings (for the distribution of the proceeds realized by the disposition, see recommendation 118).

Intersection of movable and immovable secured transactions law

123. The law should provide that:

(a) A security right in fixtures in immovables may be enforced in accordance with either the secured transactions law or the law governing enforcement of encumbrances on immovable property; and

(b) If an obligation to a secured creditor is secured by both a security right in an encumbered asset of the grantor and by an encumbrance on an immovable property of the grantor, the secured creditor may enforce both the security right and the encumbrance under the law governing enforcement of encumbrances on immovables or may enforce the security right under the secured transactions law and the encumbrance under the law governing enforcement of encumbrances on immovable property.

Coordination with other law

124. The law should be coordinated with general civil procedure law to provide a right for secured creditors to intervene in court proceedings initiated by other creditors of the grantor so as to protect security rights and to ensure the same priority status of security rights as under the law.

Security rights in rights to drawing proceeds from an independent undertaking: definitions and recommendations

ADDENDUM

CONTENTS

	<i>Page</i>
Security rights in rights to drawing proceeds from an independent undertaking	
I. Definitions	
II. Recommendations	

Security rights in rights to drawing proceeds from an independent undertaking

I. Definitions (A/CN.9/WG.VI/WP.22/Add.1, paragraph 21, (y), (z), (aa) and (bb))

(y) “Independent undertaking” means a letter of credit (commercial or standby), a letter of credit confirmation, an independent guarantee (demand, first demand, bank guarantee or counter-guarantee) or any other undertaking recognized as independent by law or practice rules, such as the United Nations Convention on Independent Guarantees and Standby Letters of Credit, the Uniform Customs and Practice for Documentary Credits, the International Standby Practices and the Uniform Rules for Demand Guarantees.

(z) “Right to drawing proceeds from an independent undertaking” means the right to receive a payment due, a draft accepted or deferred payment or another item of value, in each case to be delivered by the guarantor/issuer honouring or by a nominated person giving value for, a draw under an independent undertaking. The term does not include[:]
(i) the right to draw (i.e. to request payment) under an independent undertaking, or (ii) what is received upon honour of a drawing from the guarantor/issuer or nominated person or upon disposition of a right to drawing proceeds from an independent undertaking (i.e. the proceeds themselves).

[Note to the Working Group: The commentary will explain that the definition covers only the “right to receive” whatever value is paid or provided upon honour of a drawing and not the right to draw, i.e. to request payment under an independent undertaking. It will also explain that the right to receive the proceeds does not include the proceeds themselves, i.e. what is actually received upon honour of a drawing from the guarantor/issuer or nominated person (a beneficiary’s receipt of value from a negotiating bank should not be characterised as honour or disposition) or upon disposition of a right to drawing proceeds from an independent undertaking. The commentary will also highlight the distinction between the right to drawing proceeds from an independent undertaking (as an original encumbered asset) and the “proceeds” (a key concept of this Guide) of that right. The Working Group will note that the reference to the “beneficiary-

grantor” has been deleted as unnecessary. This is in line with the Guide’s treatment of the term “receivable”(the Guide does not define “receivable” in terms of the grantor). Moreover, at the time of the grant, the grantor may not yet be a beneficiary, indeed, the independent undertaking may not even exist at that time. Who is entitled to receive payment is a matter of other law (in the context of receivables, for example, the Guide does not specify who is entitled to receive payment of the receivable).]

(aa) “Guarantor/Issuer” means a bank or other person that issues an independent undertaking. The term includes a bank or other person that issues a letter of credit confirmation (“confirmer”) or counter-guarantee.

(bb) “Nominated person” means a bank or other person that is identified in an independent undertaking by name or type (e.g. “any bank in country X”) as being nominated to give value, i.e. to purchase or pay upon presentation of documents, and that acts pursuant to that nomination. The term includes a confirmer that is nominated to confirm and that confirms pursuant to the nomination.

(hh) “Control” with respect to a right to drawing proceeds from an independent undertaking means that the guarantor/issuer or nominated person that will pay or give value upon a draw under an independent undertaking: (i) is itself the secured creditor, or (ii) has made an acknowledgment in favour of the secured creditor. “Acknowledgment” with respect to a right to drawing proceeds from an independent undertaking means that the guarantor/issuer or the nominated person that will pay or otherwise give value upon a draw under an independent undertaking has, unilaterally or by agreement: (i) acknowledged or consented to (however evidenced) the creation of a security right (whether denominated as an assignment or otherwise) in favour of the secured creditor in the right to drawing proceeds from an independent undertaking, or (ii) has obligated itself to pay or give value to the secured creditor upon a draw under an independent undertaking.

[Note to the Working Group: This new definition was prepared pursuant to the request of the Working Group (see A/CN.9/588, para. 81). The commentary will include language that the definitions must be read together with all recommendations relating to independent undertakings (3 (d), 16, 25, 25 bis, 25 ter, 25 quater, 49, 62, 106, 138 and 138 bis.).]

II. Recommendations

Parties, secured obligations and assets covered (see A/CN.9/WG.VI/WP.21, recommendations 3 (d), 16 and 25)

3. In particular, the law should provide that it applies to:

(d) All types of movable assets and fixtures, tangible or intangible, present or future, not specifically excluded in the law, including inventory, equipment and other goods, receivables, negotiable instruments (such as cheques, bills of exchange and promissory notes), negotiable documents (such as bills of lading), bank accounts, rights to drawing proceeds from an independent undertaking and intellectual property rights;

Security rights in a right that secures or supports an assigned receivable, a negotiable instrument, or another obligation

16. The law should provide that upon creation of a security right in a receivable, a negotiable instrument or any other obligation covered as an encumbered asset by this Guide, a security right is automatically created, without further action by either the grantor

or the secured creditor, in any personal or property right that secures or supports payment or performance of that receivable, negotiable instrument, or other obligation. However, if, under the law governing a right that secures or supports payment of a receivable, negotiable instrument or other obligation covered as an encumbered asset by this Guide, a security right in that securing or supporting right may be created only after a separate act of creation, the grantor is obligated to take such action. When an independent undertaking supports payment or performance of a receivable, a negotiable instrument or any other obligation covered as an encumbered asset by this Guide, the right to drawing proceeds from the independent undertaking is a supporting obligation under this recommendation and the security right in it is created without a separate act of creation by the grantor.

[Note to the Working Group: Recommendation 16 introduces the concept of supporting rights (which might usefully be presented as a defined term, if the Working Group so decides) and provides for automatic creation of a security right in a personal or property right that supports a receivable, a negotiable instrument or any other obligation covered as an encumbered asset by this Guide, immediately upon the creation of a security right in the supported encumbered asset. The substantive effect is to do away with the necessity for a separate act of creation with respect to the supporting obligation. While this concept does nothing that the parties cannot do expressly, it nevertheless serves a very valuable function in practice. A great many routine secured transactions involve supporting obligations and provision for this arrangement serves greatly to enhance the probability of achieving the goal of the secured transactions law to maximize credit at lower cost. In the exceptional case (if that might exist) where the parties would not wish to create a security right in a supporting obligation, that can be done by negating language in the security agreement. The Working Group has already adopted the technique of automatic creation of a security right in proceeds, without the need for express use of special wording.]

The Working Group may find it useful to consider some examples of situations involving supporting rights. An example of a supporting personal right would be a fourth-party guaranty that supports payment of a receivable that is the encumbered asset provided by a grantor (A, grantor, grants to B, secured creditor, a security right in a receivable owed to A by C, account debtor or third-party debtor; the receivable, the supported encumbered asset, is guaranteed by D; D's guaranty is the supporting personal right). An example of a supporting property right would be a security right in a piece of equipment that secures payment of a negotiable instrument that is the encumbered asset provided by a grantor (A, grantor, grants to B, secured creditor, a security interest in a negotiable instrument issued by X in favour of A; the obligation of X evidenced by the instrument, the supported encumbered asset, is secured by a security right, the supporting property right, in a piece of equipment granted to A by the owner of the equipment (who might be X or Y)).

The second sentence of recommendation 16 is intended to ensure that, if the supporting right is transferable, under the law governing it, only by way of a separate act of transfer, a separate act is required for the creation of a security right in that supporting right. This approach is consistent with the relevant law and practice, as well as with article 10 (1) of the UN Assignment Convention.

The purpose of the third sentence is to make clear that the fact that an independent undertaking is a supporting right does not mean that for the creation of a security right in a right to drawing proceeds from that independent undertaking a separate act of creation is required. In other words, the general rule of the first sentence (and not of the second sentence) is applicable.

Thus, for example, a standard commercial letter of credit typically supports a buyer's obligation to pay a commercial invoice and a standby letter of credit or demand guarantee typically supports some other payment or performance obligation of the person who procures the standby letter of credit or demand guarantee for the benefit of the beneficiary. Recognition of the supporting function served by a right to drawing proceeds from an independent undertaking (which by definition does not include the right to request payment, or the proceeds themselves) in no way diminishes the independence of the undertaking itself and in no way adversely affects the guarantor/issuer (who is fully protected under the rules set forth in other recommendations (e.g. 25 bis, 25 ter and 25 quater).]

Creation of a security right in a right to drawing proceeds from an independent undertaking

25. The law should provide that a beneficiary may grant a security right in a right to drawing proceeds from an independent undertaking, [even if the right to draw under the independent undertaking is not itself transferable under the law that governs the independent undertaking]. The grant of a security right in a right to drawing proceeds from an independent undertaking is not a transfer of the right to draw under an independent undertaking.

[Note to the Working Group: The Working Group may wish to note that the bracketed language makes clear the important point that transferability of the undertaking itself (i.e. the right to draw) is irrelevant to the right to create a security right in the right to drawing proceeds from an independent undertaking. The second sentence distinguishes the transfer of the right to request payment under an independent undertaking from the transfer of a right to receive the proceeds from payment under an independent undertaking.]

25 bis. The law should provide that:

(a) A secured creditor's rights in a right to drawing proceeds from an independent undertaking are subject to the rights, under the law and practice that govern independent undertakings, of the guarantor/issuer or nominated person and of any other beneficiary named in the undertaking or to whom a transfer of drawing rights has been effected;

(b) The rights of a transferee- [or co-] beneficiary of an independent undertaking are superior to a security right in a right to drawing proceeds of the independent undertaking acquired from the transferor or any prior transferor; and

(c) The independent rights of a guarantor/issuer, nominated person or transferee-beneficiary [or co-beneficiary] under an independent undertaking [supersede] [are not impaired by reason of] [are distinct from] any security rights it may have in rights to drawing proceeds, including any right to drawing proceeds that may be included in a transfer of drawing rights to a transferee-beneficiary [or co-beneficiary].

[Note to the Working Group: The Working Group may wish to note that the commentary will make clear that this recommendation is intended to ensure that the rights of holders of independent rights to payment, notably nominated persons that have given value and transferee-beneficiaries to whom a transfer has been effected, are superior to mere assignees of rights to drawing proceeds from a drawing by the original beneficiary. The commentary will also explain that their independent rights are distinct and are not impaired because of their rights as secured creditors of the original beneficiary (in other terms, their status as protected holders of independent rights should not be confused with their incidental status as secured creditors). When a nominated person gives value and

obtains reimbursement from the issuer, it does so on the basis of its independent reimbursement rights and not as an acquirer of the rights of the beneficiary.]

25 ter. Neither a guarantor/issuer nor a nominated person is obligated to pay any person other than a named beneficiary, an acknowledged transferee-beneficiary [or co-beneficiary], a nominated person or an acknowledged assignee of the right to drawing proceeds from an independent undertaking.

25 quater. The law should provide that, if a secured creditor has obtained control over a right to drawing proceeds from an independent undertaking by becoming an acknowledged assignee of the right, the secured creditor has the right to enforce the acknowledgement against the guarantor/issuer or nominated person that made the acknowledgement

[Note to Working Group: The Working Group may wish to note that recommendations 25 bis, 25 ter and 25 quater, which have been prepared pursuant to the request of the Working Group (see A/CN.9/588, paras. 82 and 83) and track the language of recommendation 106 (see A/CN.9/WG.VI/WP.21/Add.2), are not really about creation of security rights (or about third-party effectiveness, priority over competing claims or enforcement). However, they are included here as the recommendations on the rights and obligations of the account debtor follow the recommendations dealing with the assignment of receivables. The Working Group may wish to include these three provisions (and other similar sections dealing with the rights and obligations of account debtors, depositary banks, obligors on negotiable instruments and issuers of negotiable documents) in a separate part that addresses rights and obligations of third parties that are obligated with respect to an encumbered asset.]

Third party effectiveness of a security right in a right to drawing proceeds from an independent undertaking (see A/CN.9/WG.VI/WP.21/Add.1, recommendations 49 and 62)

49. The law should provide that a security right in a right to drawing proceeds from an independent undertaking is made effective against third parties :

(a) If the secured creditor has control of the right to drawing proceeds from an independent undertaking; or

(b) Automatically, without further action by either the grantor or the secured creditor, if a security right in the receivable, negotiable instrument or other obligation supported by the independent undertaking is effective against third parties.

[Note to the Working Group: The Working Group may wish to note that recommendation 49 has been revised on the basis of the assumption that neither possession of the independent undertaking nor registration should be a method of achieving third-party effectiveness of a security right in a right to drawing proceeds from an independent undertaking. Possession of an independent undertaking (even when it is in tangible form) plays only a limited role in the modern use of independent undertakings. In addition, if possession were included in this Guide as a method of achieving effectiveness against third parties, there would be a need for complex rules dealing with priority and conflict of laws. It should be noted, however, that, although possession does not constitute a method of achieving effectiveness against third parties, as a practical matter, possession would give protection to a secured creditor when the terms of the independent undertaking require the physical presentation of the independent undertaking to make a draw under the independent undertaking. In such a circumstance, the beneficiary could not make an effective draw without the secured creditor's cooperation, so the secured creditor could take steps to assure itself of payment (e.g. the secured creditor could require the

beneficiary to obtain an acknowledgement that would achieve control for the secured creditor before surrendering the independent undertaking and allowing it to be presented to the guarantor/issuer or nominated person that gave the acknowledgement).]

Priority of a security right in a right to drawing proceeds from an independent undertaking

62. The law should provide that a security right in a right to drawing proceeds from an independent undertaking, which has been made effective against third parties by control has, with respect to a particular guarantor/issuer or a nominated person agreeing to give value under an independent undertaking, priority over the rights of all other secured creditors who have not, with respect to that person, made their security right effective against third parties by control. If control has been achieved by acknowledgement and inconsistent acknowledgements have been given to more than one secured creditor by a person, among those secured creditors, the secured creditor who was identified in the first acknowledgement given by that person has priority.

[Note to the Working Group: The Working Group may wish to note that, as the typical method of achieving control is by obtaining an acknowledgment, in the case of several potential payors (e.g. the issuer and several nominated persons), control is achieved only vis-à-vis the particular guarantor/issuer(s) or nominated person(s) who gave the acknowledgment(s). Thus, the priority rule must focus on the particular person who is the payor. The priority rules relating to possession and registration contained in the previous draft of this recommendation (see A/CN.9/WG.VI/WP.21/Add.1, recommendation 49 (b) and (c)) were deleted since, under revised recommendation 49, possession of the independent undertaking and registration are not recognized as methods of achieving third-party effectiveness of a security right in a right to drawing proceeds from an independent undertaking. The priority rule relating to inconsistent acknowledgements (see A/CN.9/WG.VI/WP.21/Add.1, recommendation 49 (a)) has been included in the second sentence of revised recommendation 62. The basic priority rule makes clear that a secured creditor that has control of the right to drawing proceeds from an independent undertaking has priority over a secured creditor whose security right became effective against third parties automatically.]

Enforcement of a security right in a right to drawing proceeds from an independent undertaking (see A/CN.9/WG.VI/ WP.21/Add.2, recommendation 106)

106. The law should provide that after default the secured creditor with a security right in a right to drawing proceeds from an independent undertaking may exercise any remedy provided for secured creditors in this chapter. Effectiveness against third parties of a security right in a right to drawing proceeds from an independent undertaking (whether achieved by control or automatically) is not a prerequisite to enforcing the right. However, the power to enforce is, as against the guarantor/issuer, nominated person or beneficiary other than the grantor, subject to recommendations 25 bis, 25 ter and 25 quater.

[Note to Working Group: The commentary will make clear that no separate act of transfer by the grantor is necessary for the secured creditor to enforce a security right in a right to drawing proceeds from an independent undertaking when the security right is created automatically under recommendation 16. The commentary will also explain that any obligations of the guarantor/issuer or nominated person to the secured creditor are governed by recommendations 25 bis, 25 ter and 25 quater. Furthermore, the commentary will explain that recommendation 106 is not intended to disturb any pre-default arrangements agreed between the grantor and the secured creditor by which, prior to the

grantor's default, the secured creditor receives the proceeds realized from collection on the right to drawing proceeds from an independent undertaking.]

Law applicable to security rights in a right to drawing proceeds from an independent undertaking (see A/CN.9/WG.VI/WP. 21/Add.5, recommendation 138)

138. The law should provide that: (i) the rights and duties of a guarantor/issuer or a nominated person that has received a request for an acknowledgement or that has or may pay or otherwise give value under an independent undertaking, (ii) the right to enforce a security right in a right to drawing proceeds from an independent undertaking against a guarantor/issuer or nominated person, and (iii) [except to the extent otherwise provided in recommendation 138 bis,] the effectiveness against third parties and the priority over the rights of competing claimants of a security right in a right to the drawing proceeds from the independent undertaking are governed, separately with respect to a particular guarantor/issuer or nominated person, by the law of the State determined as follows:

(a) If the guarantor-issuer has issued an independent undertaking or the nominated person has issued an acknowledgement that specifies that it is governed by the law of a State, the applicable law is the law of the specified State;

(b) If the applicable law is not determined under the preceding paragraph, the applicable law is the law of the State in which is located the branch or office of the guarantor/issuer or nominated person indicated in the independent undertaking of the guarantor/issuer or nominated person. However, in the case of a nominated person that has not issued an independent undertaking, the applicable law is the law of the State in which is located the nominated person's branch or office that has or may pay or otherwise give value under the independent undertaking.

[138 bis. The law should provide that[, to the extent that a security right in a right to drawing proceeds from an independent undertaking is created and is made effective against third parties automatically under recommendations 16 and 49,] the creation and the effectiveness against third parties of that security right is governed by the law of the State whose law governs the creation and the effectiveness against third parties of the security right in the supported receivable, negotiable instrument, or other obligation covered as an encumbered asset by this Guide.]

[Note to the Working Group: The commentary will explain that recommendation 138 follows the conflict-of-laws rules applicable with respect to the rights and obligations of guarantor/issuers and nominated persons. The only exception to the principle embodied in recommendation 138 is recommendation 138 bis, which appears within square brackets, for the limited issues of creation and third-party effectiveness in the cases where a security right arises or is made effective against third parties automatically. Each bank (or sometimes non-bank) filling one of these roles acts pursuant to the law where it is located, meaning where its relevant branch or office is located (or the law it chooses, which is typically where its relevant branch or office is located). Accordingly, different laws govern the different banks involved, and a choice of law in an independent undertaking governs only the particular issuer's obligations (see URDG article 27, UCC 5-116(b), and UN Assignment Convention article 22). The commentary will also explain that what recommendation 138 strives to do is be clear that a request for acknowledgement or for payment (without prior acknowledgement) made by a claimed secured creditor (or the beneficiary on its behalf) is to be handled by the affected bank branch under its local law. Under recommendation 138, all priority conflicts are subject to the law chosen by a guarantor/issuer or nominated person or, in the absence of a choice of law, to the law of the relevant branch or office. The Working Group may wish to consider the question

whether: (i) if that bank branch pays (or gives value to) that secured creditor, then that same law should apply to that secured creditor's dispute with third parties; and (ii), if the payment is to the beneficiary and the competition is among third parties, recommendation 138 should be inapplicable and residual conflict-of-laws rules apply (i.e. recommendation 137).

The commentary will further explain that: (i) creation of the security right is governed by the general conflict-of-laws rule in recommendation 137 for security rights in intangibles (except as provided in recommendation 138 bis for automatic creation); and (ii) enforcement of the security right is governed by the general conflict-of-laws rule in recommendation 148, except to the extent otherwise provided in recommendation 138.

The Working Group may wish to consider whether recommendation 138 bis is necessary, i.e. whether the creation and the third-party effectiveness of a security right in a right to drawing proceeds from an independent undertaking should be referred to the law governing the obligation supported by the independent undertaking (i.e. the law of the grantor's location under recommendation 137 with the exception of situations covered in the second sentence of recommendations 137 and 140). In the absence of recommendation 138 bis, recommendation 137 would apply to the creation (including automatic creation) of such a security right, while recommendation 138 (i.e. the law specified in the independent undertaking or acknowledgement or, in the absence of such specification, the law of the branch of the payor) would apply to the third-party effectiveness of that right. If the Working Group decides that recommendation 138 bis is necessary, it may wish to consider whether the reference to automatic creation under recommendations 16 and 49, which appears within separate square brackets, should be retained. Retention of that reference might complicate the application of recommendation 138 bis where the State whose law is applicable under this recommendations has not adopted the substantive law recommendations of the Guide.]

	<i>Recommendations</i>	<i>Page</i>
V. Effectiveness of the security right against third parties		35-57 ter

V. Effectiveness of the security right against third parties

Purpose

The purpose of the provisions of the law on the effectiveness of a security right against third parties is to establish a foundation for the predictable, fair and efficient ordering of priorities by:

- (a) Relying on a simple, cost-efficient and effective public registry system for the registration of notices of non-possessory security rights;
- (b) Requiring registration or delivery of possession as a pre-condition to the effectiveness of a security right against third parties;
- (c) Identifying appropriate exceptions and alternatives to registration or delivery of possession in the light of countervailing practical considerations.

General methods for achieving third-party effectiveness of security rights

35. The law should provide that, except as otherwise provided in the recommendations of this chapter and the chapter on acquisition financing devices, a security right, created [or to be created] in accordance with the recommendations in the chapter on creation, becomes effective against third parties:

- (a) If a notice with respect to the security right is registered in a general security rights registry, as provided in recommendations 48 to 57 ter;
- (b) If possession of tangibles is delivered by the grantor to the secured creditor, as provided in recommendations 38 to 40.

[Note to the Working Group: The Working Group may wish to note that, under recommendation 54, a notice with respect to a security right may be registered before the conclusion of a security agreement or before the relevant assets are acquired by the grantor or are produced. In such a case, the question arises as to whether third-party effectiveness should be achieved as of the time of registration or actual creation. If the Working Group considers that creation should be one of the requirements for achieving third-party effectiveness (i.e. if the bracketed language is deleted), the question arises as a question of priority between a security right that was registered before one or more of the requirements for its creation were satisfied and a security right that was created and made effective against third parties subsequently. If the legislator wishes to encourage early registration (making the registry more reliable), priority should be given to the first-registered security right even if one or more of the requirements for its creation had

not been satisfied at the time of registration (see recommendation 63 in A/CN.9/WG.VI/WP.24/Add.4). Such an approach does not create a disadvantage for secured creditors that obtain a security right and make it effective against third parties subsequently, since they can always protect their interests by searching the registry and discovering registered notices of security rights.]

Special methods for achieving third-party effectiveness of security rights

35 bis. The law should provide that a security right in the following types of asset becomes effective against third parties as follows:

- (a) In movable property, with respect to which title or a security right is established or evidenced by registration of a notice in the specialized title registry or by a notation in a title certificate, by registration or notation, as provided in recommendation 40 bis;
- (b) In a right to drawing proceeds from an independent undertaking by control, as provided in recommendation 41;
- (c) In a bank account, by control or registration, as provided in recommendations 42 and 43;
- (d) In a negotiable document of title, by delivery of possession of the document to the secured creditor, as provided in recommendation 39, and in goods covered by a document through delivery of the goods under recommendation 35 or delivery of the document under recommendation 40;
- (e) In proceeds, by achieving third-party effectiveness with respect to the original encumbered assets, as provided in recommendation 44;
- (f) In fixtures, by registration, as provided in recommendation 45;
- (g) In masses of goods or products, as provided in recommendation 47; and
- (h) In consumer goods, upon creation of an [acquisition] security right in consumer goods as provided in recommendation [128 (see A/CN.9/WG.VI/WP.24/Add.5)].

[Note to the Working Group: The Working Group may wish to consider whether the exemption for registration agreed upon with respect to acquisition security rights in consumer goods should be extended to non-acquisition security rights in consumer assets (tangibles and intangibles).]

36. The law should confirm that different methods for achieving third-party effectiveness may be used for different items or kinds of encumbered assets, whether or not they are encumbered by the same security agreement or by separate security agreements.

Third-party effectiveness of other rights

37. The law should provide that the right of an assignee under an outright assignment of receivables becomes effective against third parties by registration of a notice of the right in the general security rights registry.

[37 bis. The law may also require registration of a notice in respect of the following rights for them to become effective against third parties:

(a) The title of a lessor under a lease that is not a financing lease but which extends for a term of more than one year;

(b) The title of a consignor under a commercial consignment in which the goods are consigned to a consignee as agent for sale other than an auctioneer or a consignee who does not act as a consignee in the ordinary course of business; and

(c) The title of a buyer under a sale of goods outside the ordinary course of the seller's business where the seller remains in possession of the goods for more than [thirty] [sixty] [ninety] days.]

[Note to the Working Group: The Working Group may wish to note that long-term leases and the other devices mentioned in recommendation 37 bis, which appears within square brackets, are not within the scope of the draft Guide. They are made subject to registration in the general security rights registry as they may compete with a security right. If the Working Group approves their inclusion in this chapter, the scope of the draft Guide may need to be adjusted. The Working Group may also wish to note that, with respect to third-party effectiveness of acquisition financing devices, recommendation 127 (unitary or non-unitary approach) will apply.]

Third-party effectiveness of a security right in tangibles by delivery of possession to the secured creditor

38. The law should provide that a security right in tangibles becomes effective against third parties through delivery of possession of the tangibles by the grantor to the secured creditor. [Delivery of possession should be actual and not constructive, fictive or symbolic, and it is sufficient only if an objective third-party can conclude that the tangibles are not in the actual possession of the grantor. Possession by a third-party constitutes sufficient delivery of possession only if the third person is not an agent or employee of the grantor and holds possession for or on behalf of the secured creditor.]

[Note to the Working Group: The Working Group may wish to consider whether the bracketed language would be necessary if the terminology section clarifies that possession or delivery of possession has to be actual and the commentary deals with possession by an agent or employee of the grantor. In addition, the Working Group may wish to note that, as the term "tangibles" covers negotiable instruments and negotiable documents (see A/CN.9/WG.VI/WP.22/Add.1, para. 21 (i)), recommendation 38 applies to third-party effectiveness of security rights in negotiable instruments and negotiable documents. As a result, a security right in a negotiable instrument or in a negotiable document is made effective against third parties by delivery of the instrument or the document to the secured creditor. Recommendations 39 and 40 add special rules with respect to third-party effectiveness of security rights in negotiable documents of title and goods covered by negotiable documents of title.]

Third-party effectiveness of a security right in a negotiable document

39. [The law should provide that a security right in a negotiable document becomes effective against third parties by delivery of possession of the document to the secured creditor.] If a security right in a negotiable document is effective against third parties, the corresponding security right in the goods covered by the document is also effective against third parties.

[Note to the Working Group: The first sentence of recommendation 39 is intended to reiterate a rule already expressed in recommendation 38 (for the sake of avoiding any doubt and completeness of recommendation 39). It appears within square brackets as it may not be necessary.]

Third-party effectiveness of a security right in goods covered by a negotiable document of title

40. The law should provide that a security right in goods, covered by a negotiable document, may be made effective against third parties either through delivery of possession of the goods under recommendation 38 or through delivery of possession of the document, as long as the document covers the goods.

Third-party effectiveness of a security right in movables with respect to which there is a specialized title registry or a title certificate system

40 bis. The law should provide that a security right in movable property, with respect to which title or a security right is established or evidenced by registration in a specialized title registry or in a title certificate system, becomes effective against third parties:

- (a) If it is registered in the title registry;
- (b) A notation of it is made on the title certificate; or
- (c) A notice with respect to that right is registered in the general security rights registry.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that registration, as provided in recommendation 40 bis, is the exclusive method for achieving third-party effectiveness (i.e. third-party effectiveness may not be achieved by possession), if so provided in the relevant special legislation. The Working Group may also wish to note that recommendation 40 bis is supplemented by recommendation 64 in A/CN.9/WG.VI/WP.24/Add.4, under which a security right registered in the specialized title registry or with respect to which a notation was made in a title certificate has priority over a security right registered in the general security rights registry.]

Third-party effectiveness of security rights in rights to drawing proceeds from independent undertakings

41. *[See A/CN.9/WG.VI/WP.24/Add.2, recommendation 49.]*

Third-party effectiveness of security rights in bank accounts

42. The law should provide that a security right in a bank account becomes effective against third parties:

- (a) If a notice with respect to that right is registered in the general security rights registry; or
- (b) If the secured creditor has control of the bank account.

43. If the secured creditor and the depositary institution are the same person, the law should provide that the secured creditor automatically has control upon the creation of the security right.

[Note to the Working Group: The Working Group may wish to note that the following definition will be added to the terminology: “a secured creditor has “control” with respect to a bank account where: (i) automatically upon the creation of a security right where the depositary bank is the secured creditor; (ii) the depositary bank has concluded a control agreement with the secured creditor, according to which the bank has agreed to follow instructions from the secured creditor with respect to the bank account without further consent of the grantor; or (iii) the bank account is transferred to secured creditor so that the secured creditor becomes the bank’s customer with respect to the bank account”.

The Working Group may also wish to note that, according to recommendation 26 (see A/CN.9/WG.VI/WP.21), no obligations are imposed on the depositary bank without its consent. The Working Group may wish to add, in the creation chapter or in a separate chapter on the rights of third-party debtors, recommendations along the following lines:

“X. The law should provide that:

(a) A secured creditor’s rights in a bank account are subject to the rights, under the law and practice that govern bank accounts, of the depositary bank;

(b) The rights of a transferee of a bank account are superior to a security right in a bank account acquired from the transferor or any prior transferor; and

(c) The rights of set-off of the depositary bank [supersede] [are not impaired by reason of] [are distinct from] any security rights it may have in a bank account.

“Y. The depositary bank is not obligated to:

(a) Pay any person other than a person that has control of the bank account;

(b) Respond to requests for information about whether a control agreement or a security right in its own favour exists and whether the grantor retained the right to deal with the account.

“Z. The law should provide that, if a secured creditor has control over a bank account, the secured creditor has the right to enforce the security right against the depositary bank.”

The commentary will explain that these exceptions are designed to complement recommendations 76 and 77 (see A/CN.9/WG.VI/WP.24/Add.4), under which: (i) a secured creditor who has control of a bank account has priority over one who has merely registered a notice of its right in the general security rights registry, and (ii) the depositary bank has priority over other secured creditors except a secured creditor holding the account in its own name. These priority recommendations mean that third parties are taken to know that they cannot rely on a bank account as a primary source of security for extensions of credit or can do so only by obtaining a subordination agreement from the depositary bank or having the account entered in their own name. Consequently, the absence of publicity of the security right is not seen as problematic.]

Third-party effectiveness of security rights in proceeds

44. The law should provide that, if a security right in an encumbered asset is effective against third parties, a security right in any proceeds of the encumbered asset becomes effective against third parties as soon as the proceeds arise, provided that:

(a) The security right in the encumbered asset became effective against third parties by registration of a notice in the general security rights registry and remains effective; or

[Note to the Working Group: Paragraph (a) would not apply, for example, to a security right which was made effective against third parties by possession or by registration in a specialized title registry or by a notation on a title certificate.]

(b) The proceeds take the form of money, negotiable instruments, negotiable documents of title or bank accounts.

If neither (a) nor (b) applies, the security right in the proceeds is effective against third parties for [...] days after the proceeds arise and continuously thereafter, if it becomes effective against third parties by one of the methods referred to in recommendations 35 or 35 bis before the expiry of that time period.

Third-party effectiveness of security rights in fixtures

45. The law should provide that a security right in tangibles (other than negotiable instruments and negotiable documents) that are or to become fixtures to immovables or to movables becomes effective against third parties, if a notice with respect to that right is registered in the general security rights registry. A security right in fixtures in immovables may also become effective against third parties, if a notice of the security right is registered in the immovables registry.

[Note to the Working Group: The commentary will explain that the provision for registration in the immovables registry in order for a security right to take effect against third-party buyers or secured creditors dealing with the related immovable is designed to protect the integrity and reliability of the immovables registry system. This recommendation is supplemented by recommendation 83 in A/CN.9/WG.VI/WP.24/Add.4, under which a security right in tangibles (other than negotiable instruments and negotiable documents) that are or are to become fixtures in immovables that became effective against third parties by registration of a notice in the immovables registry under recommendation 45 has priority over a security right in the related immovable that became registered subsequently.]

46. The law should also provide that, if a security right in an encumbered asset is effective against third parties at the time when the encumbered asset becomes a fixture, the security right remains effective against third parties thereafter.

Third-party effectiveness of security rights in masses of goods or products

47. The law should provide that, if a security right in an encumbered asset is effective against third parties at the time when the asset becomes part of a mass of goods or products, the security right in the mass or product remains effective against third parties thereafter.

[Note to the Working Group: The Working Group may wish to note that the issue of creation of a security right in a mass of goods or products is dealt with in recommendation 32 (see A/CN.9/WG.VI/WP.21).]

Characteristics of a general security rights registry

48. The law should provide for a general security rights registry that has the following characteristics:

- (a) Registration is effected by registering a notice of the security right, containing only the information specified in recommendation 49, as opposed to a copy of the underlying security documentation;
- (b) The record of the registry is centralized (i.e., it contains all notices of security rights registered under this law);
- (c) The registration system is set up to permit the indexing and retrieval of notices according to the name of the grantor or according to some other reliable identifier of the grantor (e.g. identification or commercial registration number);
- (d) The registry is open to the public;
- (e) Reasonable public access to the registry is assured through such measures as:
 - (i) Setting fees for registration and searching at a cost-recovery level, [and publishing periodic audited statements of the expenses and revenues of the registration system];
 - (ii) Making modes and points of access to the registry widely available;
 - (iii) Preparing and disseminating guides to registration and searching procedures and generally educating the public about the existence and role of the registry; and
 - (iv) Establishing reliable and consistent service hours compatible with the needs of potential registry users;
- (f) The registration system is administered and operated to facilitate speedy, cost-effective and effective registration and searching. In particular:
 - (i) A notice may be registered without verification or scrutiny by anybody other than the registrant of the validity, sufficiency and accuracy of its content;
 - (ii) A search may be made without the need for the searcher to justify the reasons for the search;
- (g) To the extent the financial and infrastructural capacity of the State permits, the registration system is computer-based. In particular,
 - (i) Notices registered are stored in electronic form in a computer database;
 - (ii) Registrants and searchers have immediate access to the registry record by electronic or similar means, including Internet and electronic data interchange;
 - (iii) The system is programmed to minimize the risk of entry of incomplete or irrelevant information (e.g. by requiring essential data fields to be completed);
 - (iv) The system is programmed to facilitate speedy and complete retrieval of information and to minimize the practical consequences of human error (for example, search algorithms are designed to display similar grantor names and to disregard generic terms for denoting the status of legal entities, e.g. “Inc.”, “Co.”, “LLP”, “Plc”);
- (h) Legal rules and operating procedures are designed to ensure the security and integrity of the registry record. In particular:

- (i) A registrant can obtain a copy of the registration as soon as the registration information is entered so as to verify that the entry is accurate and complete;
- (ii) The identity of registrants is verified in advance and evidence of identity is preserved;
- (iii) [The registry] [The secured creditor] is obligated to forward a copy of a registration to the grantor named in the registration;
- (iv) The registry is obligated to send a copy of any changes to a registration to the secured creditor named in the financing statement;
- (v) Although the day-to-day operation of the registry may be delegated to a private authority, the State retains the responsibility to ensure that it is operated in accordance with the governing legal framework.
- (vi) A back-up copy of the registry record is maintained so as to ensure that it can be reconstructed.

(i) Provision is made for the allocation of liability for loss or damage caused by an error in the administration or operation of the registration and searching system. If the system is designed to permit direct registration and searching by registry users without the intervention of registry personnel, the responsibility of the registry with respect to an inaccurate or incomplete printed registration or search result is limited to a system malfunction.

Required content of registered notice

49. The law should require the registered notice to contain only:

- (a) The names (or other reliable identifiers) of the grantor and the secured creditor, and their addresses; where the name and address of the grantor is likely to yield an excessive number of potentially positive matches on a search, supplementary identification criteria may be [required] [permitted], for example, date of birth for individuals or company registration number for legal entities;
- (b) A description of the movable property covered by the notice in accordance with recommendations 51 to 53;
- (c) The duration of the registration in accordance with recommendation 56; and
- [(d) A statement of the maximum monetary amount for which the security right may be enforced [if the State determines that such information is helpful to facilitate subordinate lending.]]

Legal sufficiency of grantor name in a registered notice

50. The law should provide that the name or other identifier of the grantor entered on a registered notice is legally sufficient if the notice can be retrieved by searching the registry record according to the correct legal name or other identifier of the grantor. For this purpose, the law should specify rules for determining the correct legal name or other identifier of individuals and entities.

50 bis. Where the grantor is a legal entity, the law should provide that its legal name is the name that appears in the documents constituting the entity. Where the name of the grantor is listed in separate record maintained by the State, for example, a commercial or company register, the State may wish to set up links between the two registers to facilitate accurate data entry. Where the grantor is an individual, the State should provide detailed

guidance on the authoritative source of the grantor's legal name (e.g. name appearing in birth certificate or passport or certificate of citizenship or residence issued by country of habitual residence, or, in the absence of the former, name appearing in at least two government issued documents, such as. driver's licence or social or medical insurance card).

Change in name or other identifier of the grantor

50 ter. The law should provide that, if the name of the grantor changes so that the notice is no longer sufficient as provided in recommendations 53 and 54:

(a) A security right in an encumbered asset, in which the grantor has rights on the date of the name change remains effective against third parties;

(b) A security right in an asset acquired by the grantor or created within [...] days after the date of the name change, is effective against third parties; and

(c) A security right in an asset acquired by the grantor or created more than [...] days after the date of the name change, is not effective against third parties unless the notice is amended to provide the new name of the grantor.

[Note to the Working Group: The Working Group may wish to note that recommendation 50 ter provides a short period within which third-party effectiveness is preserved with respect to assets acquired by the grantor or created . It is assumed that reasonable secured creditors should be able to discover the name change within that period. Alternatively, the Working Group may wish to consider that security rights in such after-acquired or after-created assets are not effective after the name change or after the secured creditor acquires or ought to acquire knowledge of the name change.]

Legal sufficiency of description of assets covered by a registered notice

51. The law should provide that a description of the assets covered by a registered notice is legally sufficient if it enables a third person to identify the assets covered by the notice separate from other assets of the grantor.

52. If the assets covered by the notice consist of a generic category or categories of movable property, the law should provide that a generic description is legally sufficient.

53. If the assets covered by the notice are all the present and after-acquired movable property of the grantor, the law should provide that it is legally sufficient to describe the charged assets as "all movable property" or by using equivalent language.

Advance registration

54. The law should confirm that a registration may be made before or after the creation of the security right to which it relates.

One registration for multiple security agreements between the same parties

55. The law should confirm that a single registration is sufficient for security rights created by all security agreements entered into between the same parties to the extent they cover items or kinds of movable property that fall within the description contained in the registered notice.

Duration and renewal of registration

56. The law should specify the duration of registration or permit the duration to be selected by the registrant at the time of registration. The law should provide for the right of the registrant to renew the term of a registration before its expiry.

56 bis. [The law should provide that a registration takes effect when the information is entered into the registry record so as to be disclosed on a search of the registry record.]

[Note to the Working Group: The Working Group may wish to note that, if the registration system permits the submission of paper notices to the registry (as opposed to direct data entry by registrants), there will be some delay between receipt of the notice by the registrar and the time the information on the notice is entered into the record by registry staff so as to become available to searchers. In such circumstances, the question arises as to the time when the registration should be effective, the time of receipt of the notice at the registry or the time the notice is entered into the record and becomes available to searchers. If the registration is effective when received by the registrar, a search will not disclose all legally effective registrations. To protect the information needs of third parties, recommendation 56 bis, therefore, makes the time of registration concomitant with searchability. Although this puts the risk associated with any delay on the secured creditor, the secured creditor is in a better position to take steps to protect itself than third parties. Moreover, the recommendations earlier outlined on the design and operation of the registry should ensure speedy and efficient registration procedures. In a fully electronic system that requires no intervention by registry staff entry of the notice and its availability to searchers is virtually simultaneous and this problem is significantly reduced.]

Discharge of registration

57. The law should provide that, if no security agreement has been completed between the parties or if the security right has been terminated by full payment or performance of all of the secured obligations:

- (a) The secured creditor must discharge the registration within [...] days;
- (b) The grantor is entitled to compel discharge of a registration through a summary procedure;
- (c) The grantor and the secured creditor may agree to discharge the registration.

57 bis. The law should provide that the registrar should remove a registration from the searchable records of the registry within a short period of time after a discharge is registered, but the information should be archived so as to be capable of retrieval if necessary.

Amendment of registration

57 ter. The law should provide that a registration may be amended at any time. An amendment takes effect only from the time when the information is entered into the registry record so as to be disclosed on a search of the registry record.

[Note to the Working Group: The Working Group may wish to note, in line with recommendation 56 bis which provides that a registration becomes effective when the information entered into the record can be disclosed on a search, recommendation 57 ter provides that an amendment takes effect when it can be disclosed on a search. The Working Group may also wish to note that the commentary will explain that amendment

may involve various changes, such as: (i) adding or deleting items or kinds of encumbered assets; (ii) adding or deleting the name of a grantor; (iii) recording a change in the name of a grantor or secured creditor; (iv) disclosing an assignment of the security right by the secured creditor named in the original registration to a new secured creditor; or (v) disclosing a subordination agreement or undertaking that affects a registered security right.]

A/CN.9/WG.VI/WP.24/Add.4

Recommendations of the draft Legislative Guide on Secured Transactions

ADDENDUM

CONTENTS

	<i>Recommendations</i>	<i>Page</i>
VI. Priority of the security right over the rights of competing claimants		58-85

VI. Priority of the security right over the rights of competing claimants

Purpose

The purpose of the provisions of the law on priority is to establish clear and precise rules for ranking security rights in encumbered assets relative to the rights of competing claimants and to encourage the extension of secured credit by:

(a) Enabling a potential secured creditor to determine, in an efficient manner and with a high degree of certainty prior to extending credit, the priority that its security right would have over the rights of competing claimants; and

(b) Facilitating transactions by which a grantor may create more than one security right in the same asset and thereby use the full value of its assets to obtain credit.

Scope of priority rules

58. The law should have a complete set of priority rules covering priority conflicts with every possible competing claimant.

Secured obligations affected

59. The law should provide that the priority accorded to a security right:

(a) Extends to all monetary and non-monetary obligations owed to the secured creditor [up to a maximum monetary amount set forth in the registered notice], including principal, costs, interest and fees, to the extent secured by the security right; and

(b) Is unaffected by the date on which an advance is made or other obligation secured by the security right is incurred (so that a security right may secure future advances or other future obligations with the same priority as advances made or other obligations incurred at the time or before the security right is made effective against third parties).

Subordination agreements

60. The law should provide that a competing claimant entitled to priority may at any time subordinate its priority unilaterally or by agreement in favour of any other existing or future competing claimant.

[Note to the Working Group: As to subordination agreements in the case of the grantor's insolvency, see recommendation J in the recommendations of this Guide on Insolvency (A/CN.9/WG.VI/WP.21/Add.3): "The insolvency law should provide that if a holder of a security right in an asset of the insolvency estate has subordinated its priority unilaterally or by agreement in favour of any existing or future competing claimant, such subordination is binding in insolvency proceedings with respect to the grantor."]

Priority of security rights that are not effective against third parties

61. The law should provide that:

(a) A security right in an encumbered asset that is not effective against third parties is subordinate to a security right in the same asset that is effective against third parties, without regard to the order in which the security rights were created;

(b) Priority among security rights that are not effective against third parties is determined by the order in which they were created[; and

(c) A security right that is not effective against third parties has, [relative to the right of an unsecured claimant, the same priority status as that right] [subject to insolvency law, priority over that right]].

[Note to the Working Group: The Working Group may wish to note that: (i) recommendation 61 (a) deals with a contest of priority between a security right that is not effective against third parties and a security right that is effective against third parties, (ii) recommendation 61 (b) deals with a priority contest between two security rights that are not effective against third parties, and (iii) recommendation 61 (c), which appears within square brackets for the consideration of the Working Group, deals with a priority contest between a security right that is not effective against third parties and an unsecured claim. Recommendation 62 deals with a priority contest between a security right that is not effective against third parties and the right of a judgement creditor in the encumbered asset. Recommendation 71 deals with a priority contest between a security right that is effective against third parties and the right of a judgement creditor in the encumbered asset.]

62. The law should provide that[, except as provided in recommendation 130 bis,] a security right that is not effective against third parties is subordinate to the right of an unsecured creditor that has, under law other than this law, obtained a judgement against a grantor and has taken the steps necessary to acquire rights in encumbered assets of the grantor by reason of the judgement, and remains subordinate to the right of such unsecured creditor even if the security right is later made effective against third parties.

[Note to the Working Group: The Working Group may wish to consider whether an exception to this recommendation should be introduced for acquisition security rights that are made effective against third parties within the relevant grace period (see recommendation 130 bis in A/CN.9/WG.VI/WP.24/Add.5). Acquisition security rights that are made effective against third parties during the relevant grace period should not lose to a judgement creditor described in this recommendation whose interest in the encumbered asset arose after the creation of the security right but before it was made effective against third parties. If this were not the case, utilizing the grace period would be too risky for acquisition financiers.]

Priority of security rights that are effective against third parties

63. The law should provide that, except as provided in other recommendations in this chapter and in the chapter on acquisition financing devices, as between two security rights in the same encumbered asset that are effective against third parties, the security right that was first made effective against third parties has priority[, even if one or more of the requirements for the creation of a security right was not satisfied at that time]. A security right in assets that the grantor acquired or that were created after the time a security right became effective against third parties has the same priority as the security right in assets that the grantor owned or that existed at the time the security right was made effective against third parties.

[Note to the Working Group: The Working Group may wish to note that the current formulation of the first sentence of recommendation 64 is based on the assumption that the words within square brackets in recommendation 35 (see A/CN.9/WG.VI/WP.24/Add.3, recommendation 35 and Note to the Working Group) will be retained and thus a security right may be made effective against third parties even before one or more of the requirements for its creation have been satisfied at that time. If the bracketed language in recommendation 35 is deleted and thus a security right cannot be made effective against third parties before it is actually created, the first sentence of recommendation 64 will need to be reformulated along the following lines:

“The law should provide that, except as provided in other recommendations in this chapter and in the chapter on acquisition financing devices, as between two security rights in the same encumbered asset that are effective against third parties, the security right with respect to which a notice has been registered in the general security rights registry or which was first made effective against third parties, whichever occurs first, has priority.”

The commentary will provide examples as to the operation of recommendations 35 and 63, including the following:

(a) Secured creditor A (SC-A) and secured creditor B (SC-B) both register notices covering the same encumbered asset. First to register has priority, regardless of the sequence of creation of the respective security rights and regardless of whether the asset belonged to the grantor or existed at the time of creation of the first security right to be created; and

(b) SC-A registers before its security right is created, subsequently SC-B's security right is created and SC-B takes possession, subsequently SC-A's security right is created. SC-A has priority, whether or not grantor owned asset or asset existed at the time of SC-A's registering, regardless of the sequence of creation of the respective security rights and regardless of whether the asset belonged to the grantor or existed at the time of creation of the first security right to be created. In both of these cases (including all variant assumptions about times of creation and times grantor acquired asset or asset was produced), SP-A wins even though at time SP-A registered the notice its security right was not yet created.

This rule serves to encourage early registration (making the registry more reliable) and because in no case did SP-B, regardless of the fact pattern, achieve its effectiveness against third parties before SP-A registered, so SP-B could always have protected itself by searching and discovering SP-A's notice.]

Priority of a security right registered in a specialised title registry or by notation on a title certificate

64. The law should provide that a security right in movable property that was made effective under recommendation 40 bis (a) and (b) [see A/CN.9/WG.VI/WP.24/Add.3] by registration of a notice with respect to the right in a specialized title registry or by notation of the security right in a title certificate has priority over a right in the same property that was made effective against third parties by registration in the general security rights registry.

Continuity in priority when third-party effectiveness is achieved by more than one method

65. The law should provide that, if a security right is made effective against third parties by more than one method, priority dates as of the time third-party effectiveness was first achieved, provided that there was no time at which the security right was not effective against third parties.

[Note to the Working Group: The Working Group may wish to consider whether recommendation 65 should state expressly a rule that it seems to imply, namely that if there is a lapse in third-party effectiveness (such as where the registration lapses or it is made after the relevant grace period, or where possession of an encumbered asset is delivered to the secured creditor and subsequently obtained by the grantor), priority dates as of the time third-party effectiveness is re-established. Alternatively, the matter may be clarified in the commentary.]

Priority of security rights in proceeds

66. Except as provided in the recommendations of this chapter, the law should provide that a security right in the proceeds of an encumbered asset that is effective against third parties has the same priority as the security right in the encumbered asset.

Priority of rights of buyers, lessees and licensees of encumbered assets

67. The law should provide that the right of a buyer of goods is subject to a security right in the goods that has become effective against third parties before the sale, unless the secured creditor authorized the sale. However, a buyer of inventory, who buys encumbered inventory in the ordinary course of business of the seller (and any person whose rights to the inventory derive from the buyer), takes free of the security right [created by the seller], even if the buyer has knowledge of the existence of the security right.

68. The law should provide that a lessee of goods in the ordinary course of business of the lessor takes its rights under the lease free of a security right [created by the lessor] in the goods that is effective against third parties, even if the lessee has knowledge of the existence of the security right.

69. The law should provide that a licensee in the ordinary course of business of the licensor under a non-exclusive license takes its rights under such license free of a security right [created by the licensor] in the licensed property that is effective against third parties, even if the licensee has knowledge of the existence of the security right.

[Note to the Working Group: The Working Group may wish to note that recommendations 68, 69 and 70 are designed to protect buyers, lessees and licensees of goods against secured creditors with security rights in the goods sold, leased or licensed. If the bracketed language in these recommendations is retained, protection would be limited only against secured creditors who acquired their rights from the immediate sellers, lessors or licensors and would not apply to secured creditors who acquired their rights from other persons. A possible undesirable side effect of such an approach is that, by entrusting the encumbered assets to a seller, lessor or licensor for the purpose of procuring a sale, lease or licence of the assets free of the security right, a grantor could extinguish a security right.]

Priority of statutory (preferential) claims

70. The law should limit, both in number and amount, preferential claims that have priority over security rights that are effective against third parties, and to the extent preferential claims exist, they should be described in the law in a clear and specific way.

Priority of rights of judgement creditors

71. The law should provide that a security right that is effective against third parties has priority over the rights of an unsecured creditor, even if, at or after the time when the security right has become effective against third parties, the unsecured creditor has, under law other than this law, obtained a judgement against a grantor and taken the steps necessary to acquire rights in assets of the grantor by reason of the judgement. The priority of the security right extends to amounts advanced by the secured creditor subsequent to a specified period of days after the secured creditor acquired knowledge of the existence of the unsecured creditor's rights but does not extend to amounts advanced after the expiry of that period.

[Note to the Working Group: The Working Group may wish to consider expanding recommendations 62 and 71 to cover a creditor who obtains a right as provided in recommendations 62 and 71 by way of a provisional court order.]

Priority of rights in assets for improving and storing the assets

72. If law other than this law gives rights equivalent to security rights to a creditor that has added value to goods (e.g. by repairing them) or preserved the value of goods (e.g. by storing them), such rights should be limited to the goods whose value has been improved or preserved that are in the possession of that creditor, and should have priority over pre-existing security rights in the goods that are effective against third parties.

Priority of reclamation claims

73. If law other than this law provides that suppliers of goods have the right to reclaim the goods within a specified time after occurrence of an event specified in the sales contract, the law should provide that the right to reclaim the goods is subordinate to security rights in such goods.

[Note to the Working Group: The Working Group may wish to note that recommendation 73 creates a commercial law rule designed to accord priority to secured creditors over reclamation claims. Reclamation claims may arise in the case of the insolvency of the buyer. If an insolvency proceeding has commenced, applicable insolvency law will determine the extent to which the secured creditors and the

reclamation claimants would be stayed or their rights would otherwise be affected (see recommendations 39-51 of the UNCITRAL Insolvency Guide). However, the priority rule established by this recommendation would be unaffected by the insolvency proceeding (see A/CN.9/WG.VI/WP.21/Add.3, draft additional recommendation I).]

Priority of rights of creditors in insolvency proceedings

[Note to the Working Group: See recommendation I in the recommendations of this Guide on Insolvency (A/CN.9/WG.VI/WP.21/Add.3): “The insolvency law should specify that, if a security right is entitled to priority under law other than the insolvency law, that priority continues unimpaired in insolvency proceedings except if, pursuant to the insolvency law, another claim is given priority. Such exceptions should be minimal and clearly set forth in the insolvency law. This recommendation is subject to Recommendation 88 of the Insolvency Guide.”]

Asset-specific priority recommendations

Priority of security rights in negotiable instruments

74. The law should provide that a security right in a negotiable instrument that has been made effective against third parties by a method other than possession of the instrument by the secured creditor is subordinate to the rights of a buyer, another secured creditor or other transferee in a consensual transaction that either:

(a) Qualifies as a protected holder under the law governing negotiable instruments; or

(b) Takes possession of the negotiable instrument and gives value in good faith and without knowledge that the transfer was in violation of the rights of the holder of the security right.]

Priority of security rights in rights to drawing proceeds from independent undertakings

75. [See A/CN.9/WG.VI/WP.24/Add.2, recommendation 62.]

Priority of security rights in bank accounts

76. The law should provide that a security right in a bank account, which has been made effective against third parties by control, has priority over a security right in the bank account, which has been made effective against third parties by registration of a notice in the general security rights registry. If the secured creditor is the depositary bank, the depositary bank's security right has priority over any other security right (including a security right made effective against third parties by a control agreement with the depositary bank even if the depositary bank's security right is later in time).

77. The law should provide that any right of the depositary bank to recoup from or set-off against the bank account obligations owed to the depositary bank by the grantor has priority over the security right of any secured creditor other than a secured creditor who has acquired control of the bank account by becoming the customer of the depositary bank with respect to the bank account.

78. In the case of a transfer of funds from a bank account initiated by the grantor, the law should provide that the transferee of funds takes free of a security right in the bank account, unless the transferee acts in collusion with the grantor to deprive the secured

creditor of its security right in the funds. This recommendation does not lessen the rights of holders of funds in bank accounts under law other than this law.

Priority of security rights in money

79. The law should provide that a person that obtains possession of money that is subject to a security right holds the money free of the security right, whether the money constitutes an original encumbered asset or proceeds, unless that person acts in collusion with the transferor to deprive the secured creditor of its security right in the money. This recommendation does not lessen the rights of holders of money under law other than this law.

[Note to the Working Group: The Working Group may wish to note that recommendation 79 is designed to promote the important policy of maximizing the negotiability of money, limiting negotiability only to the extent necessary to protect the holder of a security right in the money against collusion by a transferee of money and its transferor. It is intended that this recommendation be aligned with recommendation 78 dealing with security rights in funds transferred from a bank account.]

Priority of security rights in negotiable documents and goods covered by negotiable documents

80. The law should provide that, while goods are in the possession of a person that has issued a negotiable document with respect to them, a security right in those goods that became effective against third parties as a result of the security right in the negotiable document becoming effective against third parties has priority over another security right in the goods that was made effective against third parties by a different method while the goods were covered by the document of title.

81. The law should provide that a security right in a negotiable document and the goods covered thereby is subject to the rights under the law governing negotiable documents of a person to whom the negotiable document has been duly negotiated.

Priority of security rights in fixtures

82. The law should provide that a secured creditor with a security right in fixtures in immovables that has been made effective against third parties under real property law has priority over a secured creditor with a security right in those fixtures that has been made effective against third parties by one of the methods referred to in recommendation 35.

83. [A security right in tangibles (other than negotiable instruments and negotiable documents) that are or are to become fixtures in immovables that became effective against third parties by registration of a notice in the immovables registry under recommendation 45 has priority over a security right in the related immovable that was registered subsequently.]

[Note to the Working Group: The Working Group may wish to consider recommendation 83 with the relevant recommendation in the Chapter on acquisition financing devices (see A/CN.9/WG.VI/WP.24/Add.5, recommendation 130 ter.)]

84. The law should provide that the priority of security rights in fixtures in movables is governed by the general rules applicable to movable property.

Priority of security rights in masses of goods or products

85. The law should set forth rules that are consistent with the priority recommendations in this chapter and respect the priority of security rights in:

- (a) Fixtures in movables over rights of competing claimants in the asset to which the fixture is attached; and
- (b) A product or mass of goods over the rights of competing claimants in the assets from which the product or the mass results.

Recommendations of the draft Legislative Guide on Secured Transactions

ADDENDUM

CONTENTS

	Recommendations	Page
X. Acquisition financing devices		125-135

X. Acquisition financing devices

Definitions (see A/CN.9/WG.VI/WP.22/Add.1, para. 21 (b))

(a) “Security right” means a consensual property right in movable property and fixtures that secures payment or other performance of one or more obligations. [Security rights include acquisition security rights and non-acquisition security rights.]

(b) “Acquisition security right” [in the context of a unitary approach] means a security right in an asset that secures the obligation to pay any unpaid portion of the purchase price of the asset or other obligation incurred to enable the grantor to acquire the asset. Acquisition security rights include those that are denominated as security rights, as well as those that are denominated as retention-of-title sales, hire-and-purchase transactions, financial leases and purchase-money lending transactions). “Grantor” of an acquisition security right includes a buyer, financial lessee or grantor in a purchase-money lending transaction. “Acquisition financier” includes a retention-of-title seller, financial lessor or purchase-money lender.

[Note to the Working Group: The Working Group may wish to define acquisition financing devices along the following lines: “Acquisition financing devices [in the context of a unitary approach] are arrangements which, whether denominated as security devices or not, enable a person to acquire possession or use of assets subject to an obligation to pay their price to a person who retains a security right in them until the price is paid.” This definition could be placed right before the definition of “acquisition security right”.]

The Working Group may also wish to consider that additional definitions are necessary for the non-unitary approach along the following lines: (i) “Retention-of-title devices [in the context of a non-unitary approach] are arrangements, which enable a person to acquire possession or use of assets subject to an obligation to pay their price to a person who retains title in them until the price is paid. Retention-of-title devices [in the context of a non-unitary approach] include retention-of-title sales, hire-and-purchase agreements, financial leases and purchase-money lending transactions. and (ii) “Ownership right under a retention-of-title device is ownership in an asset that secures the obligation to pay any unpaid portion of the purchase price of the asset or other obligation incurred to enable the buyer, financial lessee or grantor to acquire the asset.

The Working Group may wish to note that, in the context of a non-unitary approach, in which retention-of-title sellers and financial lessors are treated as owners, purchase-money lenders also need to be treated equally as owners (for this equal-treatment principle, see A/CN.9/574, para. 35.)

Purpose (unitary approach)

The purpose of the provisions of the law on acquisition financing devices is to:

- (a) Recognize the importance and facilitate the use of acquisition financing as a source of affordable credit, in particular for small- and medium-size businesses; and
- (b) Provide for equal treatment of all providers of acquisition financing, by applying to them the general regime governing security rights;
- (c) Facilitate secured transactions in general by creating transparency with respect to acquisition financing devices.

[Note to the Working Group: The Working Group may wish to note that subparagraph (c) has been added in the purpose section of this Chapter since the lack of transparency with respect to acquisition financing in those jurisdictions where acquisition financing devices are not subject to a registration requirement is often a serious impediment to non-acquisition inventory and equipment financing (as well as receivables financing in jurisdictions that recognize extended retention-of-title arrangements). Creating transparency would significantly encourage these types of financing.]

Purpose (non-unitary approach)

The purpose of the provisions of the law on retention-of-title devices is to:

- (a) Recognize the importance and facilitate the use of retention-of-title devices as a source of affordable credit, in particular for small- and medium-size businesses; and
- (b) Provide for equal treatment of all retention-of-title sellers, financial lessors and purchase-money lenders and apply to retention-of-title devices particular rules so as to produce outcomes that are functionally equivalent to the outcomes produced by a security rights regime [to the extent compatible with the relevant ownership regime];
- (c) Facilitate the use of security rights by creating transparency with respect to retention-of-title devices.

[Note to the Working Group: The Working Group may wish to note that a separate set of recommendations has been prepared for States that may wish to adopt a non-unitary approach with respect to retention-of-title devices. In order to use the relevant terminology and to reflect a slight difference in the issue, where necessary, separate titles have been added to the recommendations of the non-unitary approach. In addition, separate (but the same) numbers have been included to the recommendations of the non-unitary approach not only to facilitate their reading but also their possible later reproduction as a separate, consolidated set of recommendations at the end of the recommendations of the unitary approach.]

The Working Group may wish to note that the words “to the extent compatible with the relevant ownership regime” have been added to align the purpose section with one of the alternatives on the enforcement of acquisition security rights in the case of insolvency, which is the treatment of acquisition financiers as owners (see recommendation 135 (non-unitary approach)). The equivalent of this recommendation has been added also with respect to enforcement of an acquisition security right outside an insolvency proceeding (see recommendation 134 (non-unitary approach)). Under this alternative of the non unitary approach, the treatment of the enforcement of acquisition security rights in and outside insolvency proceedings would not be equivalent to the treatment of security rights but would rather conform to the treatment of enforcement of ownership rights (for a

discussion of the differences, see A/CN.9/WG.VI/WP.17, paras. 39-42; see also Note under recommendation 134 below). The commentary will discuss the consequences of such an approach (e.g. lack of uniformity, potential impact on the availability of credit) to assist States in making a choice.]

Equivalence of acquisition security rights to security rights (unitary approach)

125. The law should treat all acquisition security rights as security rights (see definition of “security right” and “acquisition security right”) and, thus, the recommendations in this Guide governing security rights generally, as supplemented by the specific recommendations in this Chapter, should apply equally to acquisition security rights (“unitary approach”).

[Note to the Working Group: The Working Group may wish to have additional text as follows: “In this case, the characterization of an acquisition security right as a security right, with the result that the acquisition secured creditor is the secured creditor and the grantor is the owner of the encumbered assets, applies only to the secured financing aspect of the transaction. While the acquisition security right secures the grantor’s obligation to pay the balance of the purchase price, the underlying transaction is still a sale or a financial lease. Therefore, the law of sales or leases continues to apply to other aspects of the transaction (such as warranties of title and quality, right to re-sell or sub-lease, taxation, insurance and accounting).” The commentary will explain that, if, for example, a secured creditor under an acquisition financing device sold equipment to a buyer which was defective, the buyer would be able to rely on the terms of the contract including other relevant law to pursue such remedies as may be available to a buyer by that other law, such as rejection of the goods and repudiation of the contract by the buyer.]

Equivalence of ownership rights under retention-of-title devices to security rights (non-unitary approach)

125. If the law excludes ownership rights under retention of title devices from the definition of “security rights”, the law should provide that purchase-money lenders have the same status that is inherent in a retention-of-title transaction by a transfer of ownership either from the seller or from the buyer. The law should also provide that the recommendations applicable to security rights, as supplemented by the specific recommendations applicable to ownership rights under retention-of-title devices in this chapter, apply to all retention-of-title devices in a manner that preserves the functional equivalence of rights under retention-of-title devices to security rights [to the extent compatible with the relevant ownership regime].

[Note to the Working Group: The Working Group may wish to note that, in order to implement the Working Group’s decision to treat all providers of acquisition financing equally (see A/CN.9/574, para. 35), under the non-unitary approach, language has been added to recommendation 125 (non-unitary approach) to ensure that purchase-money lenders are treated as owners. The commentary will explain the words “to the extent compatible with the relevant ownership regime” and their consequences with respect to the enforcement of an ownership right under a retention-of-title device in and outside insolvency (see recommendations 134 and 135 (non-unitary approach below).]

Creation of acquisition security rights (unitary approach)

126. The law should provide that an acquisition security right is created [in the same way as a security right under recommendations 8 to 12] [by agreement between the grantor and the secured creditor which need not be concluded in or evidenced by writing and is not

subject to any other requirement as to form. It may be proved by any means, including witnesses].

[Note to the Working Group: The Working Group may wish to note that recommendation 126 (unitary approach) includes the same alternatives as recommendation 126 (non-unitary approach), so as to implement the equivalence principle. However, if the Working Group decides to retain the creation requirements applicable under recommendations 8 to 12, recommendation 126 may not be necessary.]

Creation of ownership rights under retention-of-title devices (non-unitary approach)

126. The law should provide that an ownership right under a retention-of-title device is created [in the same way as a security right under recommendations 8 to 12] [by an agreement between the buyer, financial lessee or grantor and the seller, financial lessor or purchase-money lender which need not be concluded in or evidenced by writing and is not subject to any other requirement as to form. It may be proved by any means, including witnesses].

[Note to the Working Group: The Working Group may wish to note that, in order to ensure that all issues addressed by recommendations 8 to 12 are covered, recommendation 126 (non-unitary approach) refers to creation, although no new ownership right is created by a retention-of-title device. The Working Group may wish to consider alternative wording or an explanation for the commentary.]

As requested by the Working Group, recommendation 126 (non-unitary approach) provides for two alternatives, one based on article 11 of the United Nations Sales Convention ("CISG") and another based on the form requirements foreseen in recommendations 8 to 12 of the draft Guide.

With regard to recommendation 126 (non-unitary approach), the Working Group may wish to consider additional wording along the following lines: "The law should also provide that a buyer, financial lessee or grantor under a retention-of-title device has the power to grant security rights in the goods sold or leased notwithstanding the seller's, lessor's or purchase-money lender's ownership rights."

Effectiveness of acquisition financing rights against third parties (unitary approach)

127. Except as otherwise provided in recommendation 128, the law should provide that a non-possessory acquisition security right becomes effective against third parties by registration of a notice of the right in the general security rights registry in the same manner as provided in the recommendations in chapter V with respect to security rights in the same kind of encumbered assets. If the notice is registered not later than [specify a short time period, such as 20 or 30 days] from the time of delivery of the goods to the grantor, the right is effective against third parties whose rights arose between the time the acquisition security right was created and its registration, as well as against third parties whose rights were registered subsequently. If the notice is registered after the expiration of that period, the acquisition security right is effective against third parties from the time the notice is registered.

[Note to the Working Group: The Working Group may wish to note that the references to "actual" possession and "actual" delivery in recommendations 127, 129 and 130 have been deleted on the assumption that "possession" and "delivery" will be

explained in the terminology section as referring to “actual” possession and “actual” delivery.]

Effectiveness of ownership rights under retention-of-title devices against third parties (non-unitary approach)

127. Except as otherwise provided in recommendation 128, the law should provide that an ownership right under a retention-of-title device becomes effective against third parties by registration of a notice of the right in the general security rights registry in the same manner as provided in the recommendations in chapter V with respect to security rights in the same kind of encumbered assets. If the notice is registered not later than [specify a short time period, such as 20 or 30 days] from the time of delivery of the goods to the buyer, financial lessee or grantor, the right is effective against third parties whose rights arose between the time the retention-of-title device was concluded and its registration, as well as against third parties whose rights were registered subsequently. If the notice is registered after the expiration of that period, the ownership right under the retention-of-title device is effective against third parties from the time the notice is registered.

[Note to the Working Group: The Working Group may wish to consider adding to recommendation 127 (non-unitary approach) language along the following lines: “In the case of a retention-of-title device, effectiveness against third parties and priority over competing claimants means that the ownership right of the retention-of-title seller, financial lessor or purchase-money lender to the goods may be asserted against third parties, including competing claimants, claiming through the buyer, lessee or grantor.”]

Exceptions to the requirement of registration (unitary approach)

128. The law should provide that an acquisition security right in consumer goods becomes effective against third parties upon its creation. This recommendation does not affect rights made effective against third parties by delivery of possession of the encumbered assets to the secured creditor under recommendations 38 to 40 or by registration in a specialised title registry or notation on a title certificate under recommendation 40 bis.

Exceptions to the requirement of registration (non-unitary approach)

128. The law should provide that an ownership right under a retention-of-title device relating to consumer goods becomes effective against third parties upon its creation. This recommendation does not affect rights made effective against third parties by delivery of possession of the encumbered assets to the secured creditor under recommendations 38 to 40 or by registration in a specialised title registry or notation on a title certificate under recommendation 40 bis.

[Note to the Working Group: The Working Group may wish to consider whether all security rights in consumer goods (perhaps, with the exception of security rights in consumer goods that are to become fixtures in immovables) should be exempted from the requirement of registration (see A/CN.9/WG.VI/WP.24/Add.3, recommendation 35 bis (h)).]

Priority of acquisition security rights in goods other than inventory or consumer goods over earlier registered non-acquisition security rights in the same goods (unitary approach)

129. In the case of goods other than inventory or consumer goods, the law should provide that an acquisition security right has priority over a non-acquisition security right in the

same goods (even if a notice of that security right was registered in the general security rights registry before registration of a notice of the acquisition security right), if: (i) the acquisition financier retains possession of the goods; or (ii) notice of the acquisition security right was registered within a period of [the same number of days specified in recommendation 127] from the delivery of the goods to the grantor.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that a common situation in which this priority conflict arises is where a pre-existing secured creditor has a security right in all of the grantor's existing and future-acquired goods.]

Priority of ownership rights under retention-of-title devices in goods other than inventory or consumer goods over earlier registered security rights in the same goods (non-unitary approach)

129. In the case of goods other than inventory or consumer goods, the law should provide that an ownership right under a retention-of-title device has priority over a security right in the same goods (even if a notice of that security right was registered in the general security rights registry before registration of a notice of the ownership right under the retention-of-title device), if: (i) the seller, financial lessor or purchase-money lender retains possession of the goods; *[Note to the Working Group: The Working Group may wish to consider whether (i) could apply to a retention-of-title device in view of the fact that normally possession of the goods is delivered to the buyer, financial lessee or grantor.]* (ii) notice of the ownership right under the retention-of-title device was registered within a period of [the same number of days specified in recommendation 127] from the delivery of the goods to the buyer, financial lessee or grantor.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain the impact of recommendations 129 and 130 in non-unitary systems along the lines described in A/CN.9/588, para. 60.]

Priority of acquisition security rights in inventory over earlier registered non-acquisition security rights in inventory of the same kind (unitary approach)

130. The law should provide that an acquisition security right in inventory of the grantor has priority over a non-acquisition security right in the grantor's inventory of the same kind (even if that security right became effective against third parties before the acquisition security right became effective against third parties), if: (i) the acquisition financier retains possession of the goods; or (ii) before delivery of the inventory to the grantor: (a) a notice of the acquisition security right is registered in the general security rights registry; and (b) the holder of the earlier-registered security right is notified in writing that the acquisition financier intends to enter into one or more transactions pursuant to which that person will have an acquisition security right with respect to the additional inventory of the grantor described in the notification sufficiently to inform the holder of an earlier-registered security right of the kind of the inventory being financed.

Priority of ownership rights under retention-of-title devices in inventory over earlier registered security rights in inventory of the same kind (non-unitary approach)

130. The law should provide that an ownership right under a retention-of-title device in inventory has priority over a security right in inventory of the same kind (even if that right became effective against third parties before the ownership right under the retention-of-title device became effective against third parties), if: (i) the seller, the financial lessor or

the purchase-money lender retains possession of the goods; [*Note to the Working Group: The Working Group may wish to consider whether (i) would apply to a retention-of-title transaction or financial lease in view of the fact that normally possession of the goods is delivered to the buyer, financial lessee or grantor.*] or (ii) before delivery of the inventory to the buyer, financial lessee or grantor: (a) a notice of the ownership right under the retention-of-title device is registered in the general security rights registry; and (b) the holder of an earlier registered security right is notified in writing that the seller, financial lessor or purchase-money lender intends to enter into one or more transactions pursuant to which that person will retain title in the inventory with respect to the additional inventory described in the notification sufficiently to inform the holder of an earlier-registered security right of the kind of the inventory being financed.

[Priority of acquisition security rights over the rights of unsecured creditors in encumbered assets (unitary approach)]

130 bis. The law should provide that, notwithstanding recommendation 62, an acquisition security right that is made effective against third parties within the grace period provided in recommendation 127 has priority over the rights of an unsecured creditor that has, under law other than this law, obtained a judgement against a grantor after the creation of the acquisition security right and taken the steps necessary to acquire rights in encumbered assets of the grantor by reason of the judgement.

Priority of ownership rights under retention-of-title devices rights over the rights of unsecured creditors in the relevant assets (non-unitary approach)

130 bis. The law should provide that, notwithstanding recommendation 62, an ownership right under a retention-of-title device that is made effective against third parties within the grace period provided in recommendation 127 has priority over the rights of an unsecured creditor that has, under law other than this law, obtained a judgement against a buyer, financial lessee or grantor after the creation of the ownership rights under the retention-of-title device and taken the steps necessary to acquire rights in the relevant assets of the buyer, financial lessee or grantor by reason of the judgement.

[Note to the Working Group: The Working Group may wish to consider that an acquisition security right that became effective against third parties during the relevant grace period should not lose to the rights of a judgement creditor described in this recommendation, whose interest in the encumbered asset arose after the creation of the acquisition security right but before it became effective against third parties. If this were not the case, utilizing the grace period would be too risky for acquisition financiers. The Working Group may wish to consider this recommendation together with recommendation 62 (see A/CN.9/WG.VI/WP.24/Add.4).]

Priority of acquisition security rights in fixtures in immovables over earlier registered security rights in the immovables (unitary approach)

130 ter. The law should provide that an acquisition security right in goods that are to become fixtures in immovables, with respect to which a notice has been registered in the immovables registry within [...] days after the goods become fixtures, has priority over an existing mortgage in the related immovables (other than a mortgage securing loans financing the construction of an immovable).

Priority of ownership rights under retention-of-title devices with respect to fixtures in immovables over earlier registered security rights in the immovables (non-unitary approach)

130 ter. The law should provide that an ownership right under a retention-of-title device in goods that are to become fixtures in immovables, with respect to which a notice has been registered in the immovables registry within [...] days after the goods become fixtures, has priority over an existing mortgage in the related immovables (other than a mortgage securing loans financing the construction of an immovable).]

[Note to the Working Group: The Working Group may wish to note that the super-priority introduced by this recommendation would probably not prejudice the rights of holder of an existing mortgage on the related immovables because presumably the mortgagee under such a mortgage did not, at the time the mortgage was created, rely upon the subsequently acquired goods becoming fixtures. The super-priority created by this rule should not operate to grant priority over construction lenders, who are presumed to rely upon all goods that become fixtures in immovables during the course of construction.]

One or more acquisition financing transactions (unitary approach)

131. The law should provide that a single notification to holders of earlier-registered non-acquisition security rights may cover encumbered assets acquired through one or more acquisition financing transactions between the same parties (without those transactions having to be identified in the notification). However, the notification should be effective only for acquisition security rights in encumbered assets delivered within a period of [specify time, such as five years] after the notification is given.

One or more retention-of-title devices (non-unitary approach)

131. The law should provide that a single notification to holders of earlier-registered security rights may cover assets acquired through one or more retention-of-title devices between the same parties (without those devices having to be identified in the notification). However, the notification should be effective only for ownership rights in assets delivered within a period of [specify time, such as five years] after the notification is given.

Priority of acquisition security rights in proceeds of goods other than inventory or consumer goods (unitary approach)

132. The law should provide that the priority, provided under recommendation 129 (unitary approach), for an acquisition security right in goods other than inventory or consumer goods over an earlier registered non-acquisition security right in the same goods extends to the proceeds of such goods.

Priority of ownership rights under retention-of-title devices in proceeds of goods other than inventory or consumer goods (non-unitary approach)

132. The law should provide that the priority, provided under recommendation 129 (non-unitary approach), for an ownership right under a retention-of-title device in goods other than inventory extends to the proceeds of such goods.

Priority of acquisition security rights in proceeds of inventory (unitary approach)

133. The law should provide that the priority, provided under recommendation 130 (unitary approach), for an acquisition security right in inventory over an earlier-registered

non-acquisition security right inventory of the same kind extends to the proceeds of such inventory [other than receivables], provided that the acquisition financier notified earlier registered financiers with a security right in inventory of the same kind as the proceeds before delivery of the inventory to the grantor or, at the latest, at the time the proceeds arose.

[Note to the Working Group: The Working Group may wish to note that, although it approved the extension of the super-priority of recommendation 130 to all proceeds, it may wish to give further consideration to whether the super-priority should be extended to proceeds consisting of receivables. The extension of the super-priority to receivables would significantly discourage receivables financing. In most instances, there may be no practical way for a receivables financier to determine which of the grantor's receivables would be subject to the acquisition financier's paramount security right. Also, in situations where a single receivable covers both goods subject to an acquisition financing device and goods that are not subject to an acquisition financing device, there may be no practical way for the receivables financier to allocate proceeds of the receivable to the acquisition financier. The result might be that the receivables financier may simply stop financing when it receives the notice contemplated by this recommendation. That possibility will either discourage receivables financing or, if the receivable financier agrees to continue financing only if there are no inventory acquisition financing devices, it will discourage acquisition financing. Neither possibility is consistent with the objectives of the Guide. A better solution would be for the priority of the inventory financier not to extend to proceeds consisting of receivables so that the receivables financier is encouraged to provide credit against the receivables and the proceeds of that credit may be used by the grantor to pay the inventory financier. The Working Group may wish to note that, in most jurisdictions that recognize retention-of-title arrangements, the property right of the retention-of-title seller in the inventory sold does not extend to receivables arising from the sale of that inventory.]

Priority of ownership rights under retention-of-title devices in proceeds of inventory (non-unitary approach)

133. The law should provide that the priority, provided under recommendation 130 (non-unitary approach), for an ownership right under a retention-of-title device in inventory over an earlier-registered security right in inventory of the same kind extends to the proceeds of such inventory [other than receivables], provided that the retention-of-title seller, financial lessor or purchase-money lender notified earlier-registered financiers with a security right in inventory of the same kind as the proceeds before actual delivery of the inventory to the buyer, financial lessee or grantor, or, at the latest, at the time the proceeds arose.

Enforcement (unitary approach)

134. The law should provide that the recommendations in chapter VIII apply to the enforcement of acquisition security rights.

Enforcement (non-unitary approach)

134. [The law should provide that, in the case of default, a retention-of-title device should be enforced in such a manner that: (i) the same principles and objectives as those governing enforcement of security rights generally are complied with; and (ii) the same results are obtained.]

[Note to the Working Group: The Working Group at its eighth session recommended formulation of the non-unitary approach along the lines set out above.]

[The law should provide that the recommendations in chapter VIII apply to the enforcement of ownership rights under retention-of-title devices to the extent compatible with the regime applicable to the enforcement of ownership rights.]

[Note to the Working Group: The Working Group may wish to note that the last words of the second alternative under a non-unitary would conform the non-unitary approach to the existing law in each State on the enforcement of ownership rights rather than to the enforcement recommendations of the Guide. For example, in some jurisdictions this would mean that, upon default, a seller that retained title and obtained possession of the assets would be permitted to retain, rather than dispose of, the assets and would not have to account to the buyer for any surplus of the value of those assets over the unpaid portion of the purchase price and would not have a claim against the buyer with respect to the unpaid portion of the purchase price (for a discussion of the differences, see A/CN.9/WG.VI/WP.17, paras. 39-42; see also the second alternative of the non-unitary approach recommendation on the enforcement of ownership rights under retention-of-title devices in insolvency proceedings below).

In an effort to achieve the appropriate balance between certainty and uniformity on the one hand, and flexibility on the other hand, the Working Group may wish to consider including in recommendation 134 (non-unitary approach) two alternatives, along the lines of the alternatives in recommendation 135 (non-unitary approach). One alternative could be formulated along the lines of recommendation 134 (unitary approach) and the other alternative could be formulated along the lines of the second alternative of recommendation 134 (non-unitary approach). As a result, in the context of a non-unitary approach, States could choose between a recommendation that would conform the non-unitary approach to the enforcement recommendations of the Guide and a recommendation that would conform the non-unitary approach to the existing law in the enacting State on the enforcement of ownership rights. The commentary could discuss these alternatives to assist States in making a decision.

The Working Group may also wish to consider additional text along the following lines: "In the case of an ownership right under a retention-of-title device, if notice of the right was required to be registered in the security rights registry, but was not registered, or was registered only after the expiration of the time specified in recommendation 127, the retention-of-title seller, financial lessor or purchase-money lender is entitled to repossess the goods only if they are still in the possession of the buyer, financial lessee or grantor and takes the goods back subject to any security rights granted by the buyer, financial lessee or grantor. However, in the case of a late registration, if the notice was registered before the sale of the goods by the original buyer, financial lessee or grantor, the seller, financial lessor or purchase-money lender may repossess the goods in the possession of the subsequent buyer, other than [a buyer of inventory in the ordinary course of business of the seller, and any other person whose rights to the inventory derive from that buyer (even if such buyer or other person has knowledge of the existence of the security right)] [a good faith buyer]".]

Insolvency

[Note to the Working Group: See recommendations A and B in the recommendations of this Guide on Insolvency:]

Unitary approach

A. The insolvency law should provide that, in the case of the insolvency proceedings of the grantor, the acquisition financier has the rights and duties of a holder of a security right.

Non-unitary approach

B. *[The insolvency law should provide that, in the case of insolvency proceedings with respect to a buyer, financial lessee or grantor under a retention-of-title device, the seller, financial lessor or purchase-money lender has the rights and duties of a holder of a security right.] [The insolvency law should provide that, in the case of insolvency proceedings with respect to a buyer, financial lessee or grantor under a retention-of-title device, the seller, financial lessor or purchase-money lender has the rights and duties of a third-party owner of the asset under the UNCITRAL Legislative Guide on Insolvency Law.]*

Conflict of laws (unitary approach)

135. The law should provide that the conflict-of-laws recommendations in chapter XI apply to acquisition security rights.

Conflict of laws (non-unitary approach)

135. The law should provide that the conflict-of-laws recommendations in chapter XI apply to retention-of-title devices.

[Note to the Working Group: The Working Group may wish to refer in this recommendation to the definition of grantor for retention of title devices included in this chapter, i.e. "Grantor" in the context of an acquisition financing device includes a buyer, financial lessee or grantor in a purchase-money lending transaction. "Acquisition financier" includes a retention-of-title seller, financial lessor or purchase-money lender.]

F. Report of the Working Group on Security Interests on the work of its tenth session (New York, 1-5 May 2006)

I. Introduction

1. At its present session, Working Group VI continued its work on the preparation of a legislative guide on secured transactions pursuant to a decision taken by the Commission at its thirty-fourth session, in 2001.²⁶ The Commission's decision to undertake work in the area of secured credit law was taken in response to the need for an efficient legal regime

²⁶ *Official Records of the General Assembly, Fifty-sixth Session, Supplement No. 17* and corrigendum (A/56/17 and Corr.3), paragraph 358. For a history of the project, see A/CN.9/WG.VI/WP.22. The reports of the first to the seventh sessions of the Working Group are contained in documents A/CN.9/512, A/CN.9/531, A/CN.9/532, A/CN.9/543 and A/CN.9/549, A/CN.9/570 and A/CN.9/574. The reports of the first and the second joint sessions of Working Group V (Insolvency Law) and VI (Security Interests) are contained in documents A/CN.9/535 and A/CN.9/550. The consideration of those reports by the Commission is reflected in documents A/57/17 (paras. 202-204), A/58/17 (paras. 217-222), A/59/17 (paras. 75-78) and A/60/17 (paras. 185-187).

that would remove legal obstacles to secured credit and could thus have a beneficial impact on the availability and the cost of credit.²⁷

II. Organization of the session

2. The Working Group, which was composed of all States members of the Commission, held its tenth session in New York from 1 to 5 May 2006. The session was attended by representatives of the following States members of the Working Group: Algeria, Argentina, Austria, Belgium, Benin, Brazil, Canada, China, Colombia, Czech Republic, France, Germany, Guatemala, India, Iran (Islamic Republic of), Italy, Japan, Kenya, Lithuania, Madagascar, Mexico, Poland, Republic of Korea, Russian Federation, Spain, Sri Lanka, Sweden, Switzerland, Thailand, Tunisia, Uganda, United States of America and Uruguay.

3. The session was attended by observers from the following States: Dominican Republic, Guinea, Hungary, Ireland, Maldives, the Philippines and Zambia.

4. The session was also attended by observers from the following international organizations:

(a) *United Nations system*: International Monetary Fund, World Bank and World Intellectual Property Organization;

(b) International non-governmental organizations invited by the Commission: American Bar Association, Center for International Legal Studies, Commercial Finance Association, Forum for International Commercial Arbitration, International Chamber of Commerce, International Federation of Insolvency Practitioners, International Insolvency Institute, International Swaps & Derivatives Association, International Trademark Association, Max-Planck Institute for Foreign and Private International Law, National Law Center for Inter-American Free Trade, New York City Bar Association and European Law Students' Association.

5. The Working Group elected the following officers:

Chairman: Ms. Kathryn SABO (Canada)

Rapporteur: Ms. Margaret Kaggwa KASULE (Uganda)

6. The Working Group had before it the following documents: A/CN.9/WG.VI/WP.24 and Addenda 1, 2 and 5 (Recommendations) and A/CN.9/WG.VI/WP.26 and Addenda 1 to 4 (Recommendations).

7. The Working Group adopted the following agenda:

1. Opening of the session and scheduling of meetings.
2. Election of officers.
3. Adoption of the agenda.
4. Preparation of legislative guide on secured transactions.
5. Other business.

²⁷ Ibid., *Fifty-fifth Session, Supplement No. 17* (A/55/17), paragraph 455, and *Fifty-sixth Session, Supplement No. 17* and corrigendum (A/56/17 and Corr.3), paragraph 347.

6. Adoption of the report.

III. Deliberations and decisions

8. The Working Group considered recommendations on security rights in receivables, negotiable instruments, negotiable documents, rights to payment of funds credited to bank accounts, rights to drawing proceeds from independent undertakings, as well as recommendations on pre-default rights and obligations of the parties, and recommendations 88 to 111 on default and enforcement. The deliberations and decisions of the Working Group are set forth below in chapter IV. The Secretariat was requested to revise those recommendations to reflect the deliberations and decisions of the Working Group.

IV. Preparation of a legislative guide on secured transactions

A. Security rights in receivables (A/CN.9/WG.VI/WP.26)

1. Definitions

9. Subject to substituting the word “attachments” for the word “fixtures” in definition (a) (“security right”), the Working Group approved the substance of definitions (a), (d) (“secured creditor”) and (f) (“grantor”) unchanged, and decided to delete definition (n) (“claim”) (see para. 35). The Working Group also approved the substance of definitions (o) (“receivable”), (p) (“assignment”), (q) (“assignor”), (r) (“assignee”) and (s) (“subsequent assignment”) unchanged.

10. With regard to definition (t) (“account debtor”), it was agreed that the word “account” should be deleted as it was not universally understood and was inconsistent with the terminology used in the United Nations Convention on the Assignment of Receivables in International Trade (“the United Nations Assignment Convention”). As to the distinction between the debtor of the secured obligation and the debtor of the receivable, several suggestions were made, including that the terms “borrower” or “obligor” should be used for the debtor of the secured obligation. Subject to that change, the Working Group approved the substance of the definition (t).

11. With regard to definition (u) (“notification of the assignment”), it was agreed that the commentary should explain that the act of communication was also included (not just the document) and all communications were covered irrespective of whether they took place in the context of judicial or other official service of documents, or not.

12. With respect to definition (v) (“original contract”), the Working Group agreed that the definition might need to be revised to reflect the sources of non-contractual obligations (see para. 36).

13. It was also agreed that the term “writing” should be expanded to include electronic communication as stated in recommendation 11 (see A/CN.9/WG.VI/WP.21) but the issue raised regarding signature should be deferred until the substance of recommendation 12 was agreed upon by the Working Group.

2. Recommendations

Recommendations 3 (d) and (f) (parties, security rights, secured obligations and assets covered)

14. Subject to substituting the word “attachments” for the word “fixtures”, the Working Group approved the substance of recommendation 3 (d). The Working Group approved the substance of recommendation 3 (f) unchanged.

Recommendation 13 (assets and obligations subject to a security right)

15. The Working Group approved the substance of recommendation 13 unchanged.

Recommendation 14 (effectiveness of a bulk assignment and an assignment of future, parts of and undivided interests in receivables)

16. Subject to deleting the word “account” from the references to “the debtor”, the Working Group approved the substance of recommendation 14 unchanged.

Recommendation 15 (effectiveness of an assignment made despite an anti-assignment clause)

17. The Working Group agreed that recommendation 15 (c), limiting the scope of application of recommendation 15 to certain types of receivables, should be retained outside square brackets for the sake of consistency with the United Nations Assignment Convention. Subject to deleting the word “account” from the references to debtor, the Working Group approved the substance of recommendation 15.

Recommendation 16 (creation of a security right in a right that secures an assigned receivable, a negotiable instrument or other obligation)

18. The Working Group considered a proposal to adjust recommendation 16, dealing with the automatic creation (i.e. without a separate act of creation) of a security right in a personal or property right that secured payment of a receivable, negotiable instrument or other obligation when the obligation was an encumbered asset within the scope of the draft Guide, and to add two new recommendations. The first recommendation would deal with the automatic third-party effectiveness of the automatically created right. The second new recommendation would extend the scope of the draft Guide to include a personal or property right otherwise outside of the scope of the Guide to the limited extent that a security right in the personal or property right would be automatically created and would be automatically effective against third parties.

19. Language along the following lines was proposed for recommendation 16:

“The law should provide that upon creation of a security right in a receivable, a negotiable instrument, or any other obligation covered as an encumbered asset by this Guide, a security right is automatically created, without further action by either the grantor or the secured creditor, in any personal or property right that secures payment or performance of that receivable, negotiable instrument, or other obligation. If the personal or property right is an independent undertaking, the law should not provide that a security right in the right to draw under the independent undertaking is automatically created but should provide that a security right in the right to drawing proceeds from the independent undertaking is automatically created. This recommendation does not apply to a right in an immovable that under applicable law

is transferable separately from a receivable, negotiable instrument or other obligation that it may secure.”

20. In addition, language along the following lines was proposed for a new recommendation on third-party effectiveness:

“The law should provide that upon a security right in a receivable, a negotiable instrument, or any other obligation covered as an encumbered asset by this Guide becoming effective against third parties, a security right is automatically effective against third parties, without further action by either the grantor or the secured creditor, in any personal or property right that secures payment or performance of that receivable, negotiable instrument, or other obligation. If the personal or property right is an independent undertaking, the law should not provide that a security right in the right to draw under the independent undertaking is automatically effective against third parties but should provide that a security right in the right to drawing proceeds from the independent undertaking is automatically effective against third parties. This recommendation does not apply to a right in an immovable that under applicable law is transferable separately from a receivable, negotiable instrument or other obligation that it may secure.”

21. Furthermore, to align the first two recommendations with recommendation 4 in A/CN.9/WG.VI/WP.21 addressing the scope of the Guide, language along the following lines was proposed for inclusion in recommendation 4:

“Except to the limited extent provided in recommendations 16 and [...] relating to a personal or property right that secures a receivable, negotiable instrument or other obligation that is within the scope of the Guide, the law should not apply to”

22. It was agreed that automatic creation and automatic third-party effectiveness of a security right securing a receivable, negotiable instrument or other obligation would dispense with unnecessary formalities and facilitate the enhancement of the value of a receivable, negotiable instrument or other obligation as an asset on the basis of which credit might be raised and thus have a beneficial effect on the availability and the cost of credit. It was also agreed that that result should not be achieved at the expense of third-party rights, priority or enforcement.

23. However, while there was agreement as to the economic result to be achieved, diverging views were expressed as to how that result might be achieved. One view was that the secured creditor acquired a security right in the security right in a receivable, negotiable instrument. Another view was that the secured creditor would be substituted in the rights of the grantor of the security right in the receivable, negotiable instrument or other obligation. After discussion, it was agreed that the conceptual analysis or method by which the above-mentioned practical result (automatic creation and automatic third-party effectiveness) would be achieved was not so important as long as that result was achieved and, therefore, neutral terminology should be used that would be suitable for the various legal systems.

24. With respect to independent undertakings in particular, it was agreed that the automatic creation and third-party effectiveness of a security right in a right to drawing proceeds from an independent undertaking should not affect the right to draw under the independent undertaking or the rights and obligations of the guarantor/issuer. With respect to mortgages, it was agreed that the automatic creation and third-party effectiveness of a security right in a mortgage (or the transfer of mortgage rights) should not affect third-party rights, priority or enforcement. The example was given of the securitization of receivables secured by mortgages, in which, under the proposed recommendations, the

secured creditor or transferee would register in the immovable property registry only if there was default on a receivable and wanted to enforce the mortgage that secured payment of the receivable. In that connection, a note of caution was struck to the effect that the commentary should explain that implementation of those recommendations might differ from country to country depending on the general legislation, for example, on securitization of receivables secured by mortgages.

25. After discussion, the Working Group requested the Secretariat to revise recommendation 16 as proposed and to add the two new recommendations proposed. It was also agreed that recommendation 16 should also cover outright assignments of receivables and should include language along the lines of article 10 (2) to (6) of the United Nations Assignment Convention. With respect to the provision that would deal with form requirements, it was agreed that if the security right related to assets within the scope of the draft Guide, reference should be made to the form requirements of the draft Guide, while, if the relevant assets were not covered in the draft Guide, form requirements would be subject to the law governing rights in such assets to the extent that the law did not impair automatic creation and third-party effectiveness.

Recommendations 16 bis to quinquies (pre-default rights and obligations of the assignor and assignee)

26. Subject to the deletion of recommendation 16 bis (c), dealing with international usages that were implicitly made applicable between the parties, which was not thought to be suitable for a domestic regime, the Working Group approved the substance of recommendations 16 bis to quinquies.

Recommendations 17 to 23 (rights and obligations of the account debtor and the assignee)

27. Subject to deleting the word “account” from the references to “the debtor”, the Working Group approved the substance of recommendations 17 to 23. The Working Group also agreed that in recommendation 17 (b)(ii) the reference to “State” should be retained (rather than “place”) of payment in order to provide flexibility with regard to a change in the place of payment within a jurisdiction as a result of an assignment.

Recommendation 37 (third-party effectiveness of a security right in receivables)

28. The Working Group agreed to delete recommendation 37 as its substance was already covered by the general rules of the draft Guide on third-party effectiveness (for the addition of another recommendation, see para. 21).

Recommendation 88 (application of this chapter to outright transfers of receivables)

29. It was agreed that recommendation 88 should be revised to clarify that, with the exception of certain rights, obligations and remedies (e.g. the obligation of the secured creditor to account to the assignor for a surplus or the liability for a deficiency), the rights, obligations and remedies provided for in the chapter on enforcement should be available to an assignee in an outright assignment.

30. In the discussion, the suggestion was made that the qualifications included in recommendation 88 (A/CN.9/WG.VI/WP.26) with respect to outright transfers of receivables without recourse to the transferor might need to be included in the insolvency chapter. While interest was expressed in that suggestion, it was agreed that a decision

would require a careful consideration of the recommendations in the insolvency chapter. After discussion, the Working Group requested the Secretariat to study the matter and prepare a note for consideration by the Working Group at a future session.

Recommendations 102 and 103 (collection of receivables)

31. The Working Group approved the substance of recommendations 102 and 103 unchanged.

Recommendations 137 and 137 bis (law applicable to security rights in intangible property)

32. There was general support for the rule reflected in the first sentence of recommendation 137. As to the second sentence, it was suggested that it be deleted since: (i) the first sentence was sufficient to indicate the general rule, (ii) the commentary could explain that there were exceptions to the general rule (such as, for example, with regard to intellectual property rights as to which the principle of territoriality was applicable) and (iii) in any case, it would be inconsistent with the approach taken in the draft Guide, which did not include special rules for security rights in intellectual property rights, to establish such rules in the context of the chapter on conflict of laws. That suggestion was objected to. It was stated that the fact that the draft Guide did not include special substantive-law rules with regard to security rights in intellectual property rights did not mean that it should not include any conflict-of-laws rules in that regard. After discussion, the Working Group approved the substance of the first sentence of recommendation 137 and agreed to retain the second sentence within square brackets for consideration of the law applicable to security rights in intellectual property rights at a later stage.

33. After discussion, the Working Group approved the substance of recommendation 137 bis unchanged.

Recommendations 146 (law applicable to the obligations of the grantor and the secured creditor) and 147 (law applicable to the rights and obligations of the account debtor, etc.)

34. Subject to deleting the word “account” from the references to “the debtor” in recommendation 147, the Working Group approved the substance of recommendations 146 and 147.

Rights to performance of non-monetary obligations (“claims”)

35. The Working Group considered the question whether the recommendations on receivables should apply to rights to performance of non-monetary obligations. It was generally agreed that the recommendations on receivables could apply to contractual rights to non-monetary performance but not to all rights to performance. It was thus agreed that definition (n) (“claim”) was overly broad and should be deleted. It was also agreed that some special rules might be required to preserve the rights of obligors of intangibles, such as contractual non-monetary obligations.

Non-contractual receivables

36. It was agreed that the recommendations on receivables should apply to contractual and non-contractual receivables. It was also agreed that statutory limitations on the assignability of non-contractual receivables should not be interfered with and that certain recommendations should be adjusted to apply to non-contractual receivables (e.g.

references to “the original contract” might need to be deleted or substituted with more general language to cover the sources of both contractual and non-contractual receivables, and representations of the assignor were not relevant in the context of non-contractual receivables).

Outright transfers of negotiable instruments

37. In the context of its discussion of recommendation 3 (f), which dealt with outright transfers of receivables (see para. 14), the Working Group considered whether outright transfers of negotiable instruments should also be covered in the draft Guide. Differing views were expressed. One view was that they should not be covered as they did not constitute secured transactions and there was no need to subject them to registration and to the same priority rules as those applicable to security transfers, since secured creditors could be protected by taking possession of the instrument.

38. Another view was that outright transfers of negotiable instruments should be covered since they formed part of important financing transactions (e.g. securitization and forfeiting), and, in practice, it was not always easy to distinguish an outright transfer from a security transfer and a receivable from a negotiable instrument. It was pointed out, however, that there was no practice involving the outright transfer of cheques or bills of exchange. In that connection, to distinguish a promissory note from those other instruments, reference was made to promises to pay as opposed to orders to pay. However, the use of that terminology was objected to as it was not universally understood. In addition, the exclusion of outright transfers of bills of exchange was objected to on the ground that such transfers were part of important financing transactions.

39. After discussion, it was provisionally agreed that outright transfers of negotiable instruments (with the exception of cheques) should be covered. At the same time, it was agreed that the issue should be revisited after the Working Group had completed its consideration of the recommendations on negotiable instruments and other relevant recommendations, and determined whether any special rules were necessary (see para. 50).

B. Security rights in negotiable instruments (A/CN.9/WG.VI/WP.26/Add.2)

1. Definitions

40. Subject to the substitution of the word “attachments” for the word “fixtures” in recommendation (i) (“tangibles”), the Working Group approved the substance of definitions (i) and (w) (“negotiable instrument”), noting that it had already approved definition (o) (“receivable”) (see para. 9).

2. Recommendations

Recommendation 3 (d) (parties, security rights, secured obligations and assets covered)

41. The Working Group noted that it had already approved the substance of recommendation 3 (d) (see para. 14).

Creation of a security right in a negotiable instrument

42. The Working Group noted that the general recommendations were sufficient to address the creation of a security right in a negotiable instrument and that the commentary

should explain that creation of a security right would not affect the rights obtained by the transfer of a negotiable instrument by endorsement under negotiable instrument law.

Recommendation 24 (creation of a security right in a right that secures a negotiable instrument)

43. In view of the fact that the revised recommendation 16 would cover security rights in rights that secured negotiable instruments, the Working Group decided that recommendation 24 should be deleted.

Rights and obligations of the obligor under a negotiable instrument

44. The Working Group approved the substance of a new recommendation that read as follows: “The law should provide that as between the secured creditor and (i) the person obligated on the negotiable instrument, or (ii) other persons claiming rights under the law governing negotiable instruments, the obligations and rights of those persons are determined by the law governing negotiable instruments.” It was agreed that that recommendation should be placed in a new chapter dealing with the rights and obligations of third-party obligors.

Third-party effectiveness of a security right in a negotiable instrument

45. The Working Group approved the substance of a new recommendation that read as follows: “The law should provide that, where a security right in a negotiable instrument is effective against third parties, the security right continues to be effective against third parties for a short period of [to be specified] days after the negotiable instrument has been relinquished to the grantor for the purpose of presentation, collection, enforcement, renewal”. It was understood that by returning the encumbered negotiable instrument to the grantor the secured creditor would be exposed, for good reasons, to the risk of losing its security only for a short period of time and only if it had not registered a notice about its security right in the general security rights registry.

46. Accordingly, the Working Group approved the substance of that recommendation but agreed that the recommendation should be limited to situations in which security rights were made effective against third parties “by a method other than registration” or “by dispossession”.

Recommendation 74 (priority of a security right in a negotiable instrument)

47. Subject to clarification that paragraphs (a) and (b) referred to the secured creditor, or the buyer or other transferee, the Working Group approved the substance of recommendation 74.

Recommendations 104 and 105 (enforcement of a security right in a negotiable instrument)

48. It was agreed that the secured creditor should have a right to enforce its security right in the negotiable instrument before default only with the consent of the grantor. It was stated that that rule should apply only if parties had not addressed the matter in the security agreement. It was also observed that a different approach would upset legitimate expectations of third-party creditors of the grantor. However, at the same time, it was agreed that, recommendation 104 should not affect any right the secured creditor might have under negotiable instrument law to collect the instrument upon maturity before default even without the consent of the grantor. It was also agreed that recommendation

104 should make it clear that the enforcement rights of the secured creditor were subject to the rights of obligors of negotiable instruments under law governing negotiable instruments. Subject to those changes, the Working Group approved the substance of recommendations 104 and 105.

Recommendations 136, 140, 146 and 147 (applicable law issues)

49. The Working Group approved the substance of recommendations 136, 140, 146 and 147 unchanged.

Outright transfers of negotiable instruments

50. Recalling its earlier discussion (see paras. 37-39), the Working Group agreed that outright transfers of negotiable instruments should not be addressed in the recommendations. It was stated that such transfers were involved in specialized markets. It was also stated that there were no financial practices that involved, for example, outright transfers of cheques. However, it was also agreed that the commentary should discuss the relevant issues for the benefit of States that might wish to address outright transfers of negotiable instruments in their secured transactions laws. It was stated that the general recommendations on the creation, third-party effectiveness and priority of a security right in a negotiable instrument, as supplemented by the relevant asset-specific recommendations, should equally apply to outright transfers of negotiable instruments. In that connection, it was pointed out that a possible alternative third-party effectiveness rule might provide that an outright transfer could be made effective against third parties automatically upon creation. As a result, it was said, a security right that was created first would have priority over a subsequently registered right (but not over a security right that became effective against third parties by dispossession of the grantor). As to enforcement, it was observed, a different recommendation might be required to provide that the transferee of the negotiable instrument could enforce it freely without first having obtained the consent of the transferor.

C. Security rights in negotiable documents (A/CN.9/WG.VI/WP.26/Add.3)

1. Definitions

51. With respect to the definition (pp) (“possession”), it was stated that reference to the requirement for actual possession might need to be deleted, as possession of goods by the issuer of the negotiable document covering those goods might be constructive (i.e. the issuer might hold possession through another person). In response, it was noted that possession should be defined by reference to actual possession for the purposes of the draft Guide, while the nature of possession of goods by the issuer required for the issuance of a negotiable document should be left to the law governing negotiable documents.

52. Subject to the substitution of the word “attachments” for the word “fixtures” in definition (i) (“tangibles”) and the deletion of references to the secured creditor in definition (pp) (“possession”), the Working Group approved the substance of definitions (i), (x) (“negotiable document”) and (pp).

2. Recommendations

Recommendation 3 (d) (parties, security rights, secured obligations and assets covered)

53. The Working Group noted that it had already approved the substance of recommendation 3 (d) (see para. 14).

Recommendation 28 (creation of a security right in a negotiable document)

54. The Working Group agreed that the general rules relating to creation of a security right applied to negotiable documents as well. With respect to recommendation 28, the concern was expressed that, by requiring that the goods be in the possession of the issuer at the time the security right in the goods was created, recommendation 28 might exclude multi-modal transport documents in which the goods would be in the possession of the issuer at some point of time but would have been shipped at the time the issuer created a security right in the goods. After discussion, the Working Group approved the substance of recommendation 28 unchanged. It was agreed that, as the definition of “negotiable document” referred to the law governing negotiable documents, the issue of negotiability of multi-modal transport documents was appropriately left to that law. It was also agreed that the commentary could explain that a State might wish to address multi-modal transport documents. In addition, it was agreed that the term “issuer” could be defined in a way that would make the definition work whether a multi-modal transport document was negotiable or not.

Rights and obligations of the issuer of a negotiable document

55. The Working Group approved the substance of a new recommendation that read as follows: “The law should provide that as between the secured creditor and the issuer or other person obligated on the negotiable document, the rights and obligations of those persons are determined by the law governing negotiable documents.”

Recommendation 44 (third-party effectiveness of a security right in a negotiable document)

56. The Working Group agreed that the word “only” be deleted as possession was not the only method by which a security right in a negotiable document could be made effective against third parties. It was also agreed that the words “or with respect to the goods” be deleted since, as long as the negotiable document covered the goods they would be in the possession of the issuer and thus logically could not at the same time be in the possession of the grantor. In addition, it was agreed that the commentary should discuss the notion of possession in the context of electronic negotiable documents. Subject to those changes, the Working Group approved the substance of recommendation 44.

Recommendation 44 bis (third-party effectiveness of a security right in a negotiable document)

57. The Working Group agreed recommendation 44 bis should be limited to situations in which a security right was made effective against third parties “by a method other than registration” or “by dispossession”. Subject to those changes, the Working Group approved the substance of recommendation 44 bis.

Recommendations 80 and 81 (priority of security rights in negotiable documents)

58. The Working Group approved the substance of recommendations 80 and 81 unchanged.

Recommendation 109 (enforcement of a security right in a negotiable document)

59. Subject to providing that enforcement could take place before default with the consent of the grantor (rather than the issuer), the Working Group approved the substance of recommendation 109.

Recommendation 136 (law applicable to security rights in tangibles)

60. It was agreed that the creation, third-party effectiveness and priority of a security right in a negotiable document should be subject to the law of the place where the document was held. It was also agreed, however, that application of that rule might create problems where the goods were in another State. The Working Group considered a suggestion that application of the law of the ultimate destination of the goods (see A/CN.9/WG.VI/WP.24, rec. 142) might provide a sufficient solution to that problem but was not able to reach agreement. After discussion, the Working Group requested the Secretariat to prepare a note and possibly alternative recommendations to address that problem.

Recommendation 140 (law applicable to third-party effectiveness of security rights in specified types of asset by registration)

61. It was noted that recommendation 140 referred to the law of the grantor's location only when third-party effectiveness was achieved by registration.

Recommendations 146 (law applicable to the obligations of the grantor and the secured creditor) and 147 (law applicable to the rights and obligations of the account debtor, etc.)

62. The Working Group approved the substance of recommendations 146 and 147 unchanged.

D. Security rights in rights to payment of funds credited to bank accounts (A/CN.9/WG.VI/WP.26/Add.1)**1. Definitions**

63. The Working Group noted that it had already approved the substance of definition (o) ("receivable") (see para. 9). With regard to definition (cc) ("bank account"), the Working Group agreed that it should be revised to refer to the encumbered asset, namely the right to payment of funds credited to a bank account. It was also agreed that the commentary should explain that funds not credited at the time of the creation of a security right (for example interest or commissions) should also be covered. As to the meaning of the term "bank", it was agreed that it should be explained in the commentary by reference to the maintenance of accounts without going into regulatory law issues (e.g. banking licence). It was also agreed that the commentary should explain that accounts maintained by central banks or payment, clearing and settlement systems should not be covered. With respect to the definition of "control", it was agreed that control should refer to the right to payment of funds credited to a bank account (rather than to the funds) and that the third

way of achieving control should be revised to focus on the secured creditor becoming the customer of the bank (i.e. the account holder). Subject to the changes mentioned above, the Working Group approved the substance of definitions (cc) and (hh).

2. Recommendations

Recommendation 3 (d) (parties, security rights, secured obligations and assets covered)

64. The Working Group noted that it had already approved the substance of recommendation 3 (d) (see para. 14).

Recommendation 26 (creation of a security right in a right to payment of funds credited to a bank account)

65. Subject to the deletion of the words “as between the secured creditor and the grantor”, the Working Group approved the substance of recommendation 26.

Recommendations X and Y (rights and obligations of the depositary bank)

66. Subject to the retention of the first set of bracketed language outside square brackets and the deletion of the second set of bracketed language in recommendation X (b), the Working Group approved the substance of recommendations X and Y.

Recommendation 43 (third-party effectiveness of a security right in a right to payment of funds credited to a bank account)

67. Subject to referring to control with respect to the right to payment of funds credited to a bank account and to dealing with the issue of tracing proceeds deposited in a bank account in the context of its discussion on proceeds at a later stage, the Working Group approved the substance of recommendation 43.

Recommendations 76-78 (priority of a security right in a right to payment of funds credited to a bank account)

68. Differing views were expressed as to whether a depositary bank’s security right should have priority even over a security right made effective against third parties by a prior control agreement with the depositary bank, as provided in the second sentence of recommendation 76. One view was that a depositary bank should not have priority over a secured creditor with whom it had concluded a control agreement. It was stated that the control agreement should be respected. In addition, it was observed that, if the bank wanted to have priority, it would provide so in the control agreement. Moreover, it was said that that way would be simpler and more transparent than expecting the secured creditor to later seek to obtain a subordination agreement with the bank. It was also stated that the bank’s rights of set-off would not necessarily justify the super-priority of the bank because whether the bank had set-off rights would be subject to other law.

69. However, the prevailing view was that the bank should have priority even over a creditor with whom it had entered into a control agreement. It was stated that otherwise the bank would not enter into control agreements at all, which would limit the amount of credit available from creditors other than the bank (or would increase its cost), or would enter into control agreements but would limit the amount of credit it would make available to its customers (or would increase its cost). In addition, it was observed that the fact that a secured creditor with control would not have priority over the rights of the depositary bank

did not render the control agreement useless, since it could still protect the secured creditor as against other competing claimants (e.g. the administrator in the insolvency of the grantor). Moreover, it was pointed out that such an approach would be consistent with the rule providing that the bank's rights of set-off would have priority. Furthermore, it was said that the secured creditor with control could always seek to obtain a subordination agreement with the depositary bank.

70. In the discussion, it was noted that, according to recommendation 77, the bank's rights of set-off would have priority over the right of any secured creditor except a secured creditor who acquired control by becoming the bank's customer. After discussion, it was agreed that, for the sake of consistency, that exception should be included in recommendation 76 as well.

71. Subject to that change, the Working Group approved the substance of recommendation 76, on the understanding that the commentary would develop the other option and discuss its implications along the lines mentioned above (for another change to recommendation 76, see para. 86). In addition, subject to referring to a secured creditor acquiring control with respect to the right to payment of funds credited to a bank account by becoming the customer of the bank, the Working Group approved the substance of recommendation 77. Moreover, subject to referring to transfer of funds rather than of the right to payment of the funds and to changing collusion to knowledge that the transfer of funds violated the terms of the security agreement, the Working Group approved the substance of recommendation 78 which was intended to protect the free flow of funds in commerce.

Recommendations 106 bis, 107 and 108 (enforcement of a security right in a right to payment of funds credited to a bank account)

72. Subject to the clarification that the secured creditor would be enforcing the grantor's right to payment of the funds credited to a bank account (except where the secured creditor would acquire control by becoming the bank's customer), the Working Group approved the substance of recommendation 106 bis. Subject to clarifying that control referred to the right to payment of funds rather than to the funds themselves, the Working Group approved the substance of recommendations 107 and 108.

Recommendation 139 (law applicable to a security right in a right to payment of funds credited to a bank account)

73. Differing views were expressed with regard to the alternatives presented in recommendation 139. One view was that the law of the State, in which the branch of the bank that maintained the account was located, should apply (alternative B). It was stated that that rule in alternative B reflected the universally-recognized, dominant and characteristic link between the funds deposited into a bank account and the depositary bank maintaining that account, conformed to the expectations of all parties purporting to assert a security right in a right to payment of funds credited to a bank account, respected the need for transparency and predictability in secured transactions and, as such, furthered the objectives of the draft Guide. In addition, it was observed that the bank account involved a bilateral relationship between the customer and the bank, and raised no problem of localization of the funds credited to a bank account because of the international harmonization of the norms governing the localization and the identification of bank accounts. Moreover, it was said that the Hague Convention on the Law Applicable to Certain Rights in Respect of Securities Held With an Intermediary ("the Hague Convention") was not designed to apply to bank accounts or even to directly-held

securities. Thus, the law applicable to security rights in bank accounts should be different from the law applicable to such rights in securities accounts.

74. In addition, with respect to alternative A, it was stated that it was inconsistent with established banking practice, countered transparency and predictability by creating a trap to unwary creditors, ignored the rules set by banking regulators to control banking activities and, as such, could trigger strong opposition among banks and their national regulators. In addition, it was observed that it would be very difficult for third parties to ascertain the choice of law in an account agreement because the relevant documents were usually confidential. It was further observed that application of the law of the account agreement could have serious adverse effects on banking practice, since the rights and duties of the bank or enforcement would be made subject to a law other than that of the bank's location. It was also said that party autonomy was not appropriate in the case of proprietary law issues.

75. Another view was that the rule applicable to securities under the Hague Convention (i.e. the law governing the account, subject to the depositary bank having an office in the State whose law governed the account agreement) was preferable, since bank accounts and securities accounts were very similar in many respects and their differences did not justify subjecting them to a different law. In addition, it was observed that such an approach would provide certainty and predictability, as lenders would expect to receive a copy of the account agreement (or even obtain a control agreement) before extending credit on the basis of a bank account. Moreover, it was said that alternative B would cause uncertainty, as there was no universally acceptable system to locate bank accounts. It was also mentioned that application of the law governing the bank account would not cause any changes in practice since banks already applied that rule with respect to securities accounts.

76. It was also stated that, whatever the law applicable to bank accounts might be, it would not affect the law applicable to regulatory, tax, accounting or criminal law issues, which would remain subject to the law of the bank's relevant location. It was also said that bank secrecy was not an issue since borrowers were prepared to give lenders copies of the bank account agreements so as to obtain credit on the basis of those agreements, and often lenders would obtain a control agreement with the consent of the depositary bank. In addition, it was observed that analysis based on the principle of party autonomy was not very helpful, since alternative A referred to objective connecting factors and alternative B eventually involved some degree of choice by the parties as to the location of an account.

77. Yet another view was that neither alternative A nor alternative B was satisfactory to the extent that they would result in a transfer of and a security right in a bank account being subjected to different laws. Yet another view was that reference could be made either in alternative A or in alternative B to the law governing the control agreement between the grantor, the secured creditor and the depositary bank. After discussion, the Working Group decided to retain both alternatives.

Recommendation 140 (third-party effectiveness of security rights in specified types of asset by registration)

78. Recalling its earlier discussion of recommendation 140 (see para. 61), the Working Group decided that the reference to negotiable documents should be deleted as the law of the grantor's location did not apply to security rights in negotiable documents.

E. Security rights in rights to drawing proceeds from independent undertakings (A/CN.9/WG.VI/WP.24/Add.2)

1. Definitions

79. Subject to aligning definition (y) (“independent undertaking”) with article 6 (e) of the United Nations Convention on Independent Guarantees and Stand-By Letters of Credit with respect to the confirmation of a letter of credit and definition (z) (“independent undertaking”) with independent undertaking practice, while avoiding terms that might cause confusion, the Working Group approved the substance of definitions (y) and (z). As to definitions, (aa) (“guarantor/issuer”) and (bb) (“nominated person”), subject to reviewing the appropriateness of referring in both to a confirmer, the Working Group approved their substance. With respect to definition (z), it was agreed that the asset subject to these recommendations was the right to proceeds and not the proceeds themselves that would take the form of money, funds in bank accounts and the like and would thus be subject to other recommendations of the draft Guide. It was also agreed that the word “drawing” should be deleted from the term “right to drawing proceeds from an independent undertaking”.

80. As to definition (hh), it was agreed that it should be aligned with the definition of “control” with respect to a right to payment of funds credited to a bank account (A/CN.9/WG.VI/WP.26/Add.1, definition (hh)). Subject to that change, the Working Group approved the substance of definition (hh). While it was suggested that some discussion should be included in the commentary of the general part of the draft Guide to issues of agency, a note of caution was struck that the draft Guide should not go into other areas of law in which there were many divergences among the various legal systems.

Recommendation 3 (d) (parties, security rights, secured obligations and assets covered)

81. The Working Group noted that it had already approved the substance of recommendation 3 (d) (see para. 14).

Recommendation 16 (creation of a security right in a right that secures an assigned receivable, a negotiable instrument or other obligation)

82. The Working Group noted that it had already approved the substance of recommendation 16 (see para. 25).

Recommendation 25 (creation of a security right in a right to drawing proceeds from an independent undertaking)

83. Subject to the retention of the bracketed language outside square brackets, the Working Group approved the substance of recommendation 25.

Recommendations 25 bis, ter and quater (rights and obligations of a guarantor/issuer or nominated person)

84. With respect to recommendation 25 bis, the Working Group agreed that the reference to “the co-beneficiary” should be deleted as it was covered by the reference to “the beneficiary” and that the reference to “prior transferor” should be placed within square brackets as it was not clear whether it was necessary. Subject to those changes, the Working Group approved the substance of recommendations 25 bis, ter and quater.

Recommendation 49 (third-party effectiveness of a security right in a right to drawing proceeds from an independent undertaking)

85. Subject to the changes agreed upon in the context of the discussion of recommendation 16 (see paras. 18-25), the Working Group approved the substance of recommendation 49.

Recommendation 62 (priority of a security right in a right to drawing proceeds from an independent undertaking)

86. It was agreed that the commentary should explain that, depending on the terms of the acknowledgment, the guarantor/issuer might be liable to an acknowledged secured creditor that would lose in a priority contest with the first acknowledged secured creditor. It was also agreed that a similar rule should be inserted in recommendation 76 (see paras. 68-71) to the effect that, among creditors that had obtained a control agreement with respect to the same bank account, priority would be determined on the basis of the time of conclusion of the control agreement, while, depending on the terms of the control agreement, the depositary bank might be liable to the secured creditor that lost the priority contest. Subject to those changes, the Working Group approved the substance of recommendations 62 and 76.

Recommendation 106 (enforcement of a security right in a right to drawing proceeds from an independent undertaking)

87. It was agreed that a security right in a right to drawing proceeds from an independent undertaking should be enforceable even before default if so agreed between the secured creditor and the grantor. Subject to that change, the Working Group approved the substance of recommendation 106.

Recommendations 138 and 138 bis (law applicable to a security right in a right to drawing proceeds from an independent undertaking)

88. Support was expressed for recommendations 138 and 138 bis. At the same time, it was widely felt that they should be explained in the commentary, possibly with the use of examples. The concern was also expressed that application of recommendation 138 bis, which would apply in more cases than recommendation 138 as independent undertakings were typically used to enhance the value of a receivable or other obligation, might be problematic to the extent that a State might not have enacted recommendations 16 and 49 providing for automatic creation and third-party effectiveness. Subject to revising recommendation 138 bis to address that concern, the Working Group approved the substance of recommendations 138 and 138 bis.

**F. Chapter VII. Pre-default rights and obligations of the parties
(A/CN.9/WG.VI/WP.24/Add.1)****Purpose**

89. The Working Group approved the purpose section unchanged.

Recommendation 86 (party autonomy)

90. It was agreed that recommendation 86 reflected a general principle and should be moved to the general provisions of the draft Guide.

Recommendation 87 (suppletive rules)

91. It was agreed that the words “preserve and protect” should be substituted for the word “care” in paragraph (a). With respect to paragraph (d), the Working Group agreed that the discharge of the security right and the return of the encumbered asset (in the case of a possessory security right), required full payment of the secured obligation, as well as termination of all lending commitments. It was also agreed that the structure of the recommendation should be aligned with the structure of the relevant commentary (A/CN.9/WG.VI/WP.9/Add.4). After discussion, the Working Group approved the substance of recommendation 87.

G. Chapter VIII. Default and enforcement (A/CN.9/WG.VI/WP.24/Add.1)**Purpose**

92. The Working Group approved the purpose section unchanged.

Recommendation 88 (application of this chapter to outright transfers of receivables)

93. The Working Group noted that it had already approved the substance of recommendation 88 (see para. 29).

Recommendations 89 (general standard of conduct) and 89 bis (liability for failure to comply with recommendations of this chapter)

94. While the view was expressed that recommendations 89 and 89 bis reflected general principles and should be placed in the general part of the draft Guide, it was agreed that they should be retained in the enforcement chapter until the Working Group had an opportunity to consider the impact of their application to other chapters of the draft Guide. With respect to the term “good faith”, it was suggested that it implied a subjective test of knowledge and should be supplemented by an objective test of “fair dealing”. That suggestion was objected to. It was stated that that matter was within the realm of the law of obligations rather than property law and the reference to “commercial reasonableness” was in that connection more appropriate. After discussion, the Working Group approved the substance of recommendations 89 and 89 bis unchanged.

Recommendations 90 and 91 (party autonomy)

95. The Working Group considered whether recommendation 90 should be moved to the general part of the draft Guide and agreed that the decision be deferred until all the recommendations had been carefully examined. After discussion, the Working Group approved the substance of recommendations 90 and 91 unchanged.

Recommendation 92 (rights and remedies after default)

96. The Working Group approved the substance of recommendation 92 unchanged.

Recommendations 93 (secured creditor remedies) and 94 (judicial and extrajudicial enforcement)

97. The Working Group approved the substance of recommendations 93 and 94 unchanged.

Recommendation 95 (grantor remedies)

98. The suggestion was made that the title of recommendation 95 should be revised to refer to “grantor rights”. It was also suggested that the word “may” in the chapeau of recommendation 95 be replaced by stronger language along the lines “was entitled to”. Subject to those changes, the Working Group approved the substance of recommendation 95.

Recommendations 96 (cumulative remedies) and 97 (other remedies)

99. The Working Group approved the substance of recommendations 96 and 97 unchanged and noted that recommendation 96, read together with recommendations 95 and 97, provided the secured creditor and the grantor with various options in the exercise of their rights and remedies. These included the right of the secured creditor to choose the asset or assets against which enforcement was sought, the right to start exercising one remedy and then change to another and the right to enforce the secured obligation or the security right or both up to full payment of the secured obligation.

Recommendation 98 (release of encumbered assets after full payment)

100. Subject to the inclusion of a reference to termination of any lending commitments, the Working Group approved the substance of recommendation 98.

Recommendation 99 (notice of intention to pursue extrajudicial enforcement)

101. After discussion, the Working Group decided to delete recommendation 99 on the understanding that a reference to a notice of intention to pursue extrajudicial enforcement would be introduced, as an alternative, to recommendation 101.

Recommendation 100 (objections to extrajudicial enforcement)

102. The Working Group approved the substance of recommendation 100 and agreed that the second sentence, in particular, should be clearly explained in the commentary.

Recommendation 101 (secured creditor’s right to take possession of an encumbered asset)

103. The Working Group requested the Secretariat to prepare two alternatives, one along the lines of the first two sentences of recommendation 101 and another providing for a notice of intention to pursue extrajudicial enforcement. In addition, it was agreed that the principle of summary proceedings should be reflected in a recommendation that would apply to all the rights and remedies provided in the chapter on enforcement. Moreover, it was agreed that the commentary should discuss the notice of default, which was typically dealt with in the law of obligations. It was also suggested that the reference to use or threat of force might be expanded to cover illegal or abusive conduct in general.

Recommendations 102-109 (enforcement of security rights in receivables, negotiable instruments, proceeds of independent undertakings, funds credited to bank accounts and negotiable documents)

104. The Working Group noted that it had already approved the substance of recommendations 102 to 109 (see paras. 31, 48, 59, 72 and 87).

Recommendations 110 and 110 bis (disposition of encumbered assets)

105. After discussion, the Working Group approved the substance of recommendations 110 and 110 bis unchanged.

Recommendation 111 (advance notice with respect to extrajudicial disposition of encumbered assets)

106. Subject to positively requiring a notice of extrajudicial disposition, the Working Group approved the substance of recommendation 111.

V. Future work

107. It was widely felt that intellectual property rights (e.g. copyrights, patents or trademarks) were increasingly becoming an extremely important source of credit and should not be excluded from a modern secured transactions law. In that connection, it was stated that financing transactions with respect to equipment or inventory often included security rights in intellectual property rights as an essential and valuable component. It was also observed that significant financing transactions involving security rights in all the assets of a business grantor would typically include intellectual property rights.

108. The Working Group recalled that the recommendations of the draft Guide generally applied to security rights in intellectual property rights to the extent they were not inconsistent with intellectual property law (see A/CN.9/WG.VI/WP.26/Add.7, rec. 3 (h)). The Working Group also recalled that, as the recommendations had not been prepared with the special intellectual property law issues in mind, the draft Guide recommended that enacting States might wish to make any necessary adjustments to the recommendations to address those issues.

109. The Working Group noted that the Commission was expected to approve in principle the substance (i.e. the policy, not the formulation) of the recommendations of the draft Guide at its upcoming thirty-ninth session (New York, 19 June to 7 July 2006). It was noted that the Commission would discuss the recommendations of the draft Guide from 19 to 23 June 2006, with the adoption of the report of that part of the Commission's session scheduled to take place on Monday, 26 June 2006 (see A/CN.9/587, para. 53).

110. The Working Group also noted that its eleventh and twelfth sessions were scheduled to take place in Vienna from 4 to 8 December 2006 and in New York from 12 to 16 February 2007 respectively, those dates being subject to approval by the Commission at its upcoming thirty-ninth session.

**G. Note by the Secretariat on security interests: draft Legislative Guide
on Secured Transactions, submitted to the Working Group
on Security Interests at its tenth session**

Security rights in receivables.	
I. Definitions	
II. Recommendations	

Security rights in receivables

I. Definitions (A/CN.9/WG.VI/WP.22/Add.1, para. 21 (n)-(v))

(a) “Security right” means a consensual property right in movable property and fixtures that secures payment or other performance of one or more obligations. References to a “security right” in this Guide also refer to the “right of an assignee of receivables”.

(d) “Secured creditor” means a creditor that has a security right. References to the “secured creditor” in this Guide also refer to the “assignee”.

(f) “Grantor” means a person that creates a security right in one or more of its assets in favour of a secured creditor to secure either its own obligation or that of another person (see debtor). References to the “grantor” in this Guide also refer to the “assignor”.

[Note to the Working Group: The Working Group may wish to note that the second sentence in the definitions of “security right”, “secured creditor” and “grantor” is intended to ensure that the general recommendations apply to security rights in receivables and to outright transfers of receivables, unless otherwise provided.]

(n) “Claim” means a right to the performance of a non-monetary obligation other than a right in tangibles under a negotiable document.

[Note to the Working Group: The Working Group may wish to consider whether limited special rules are required for transactions in which a “claim” is an encumbered asset.]

As defined in the terminology chapter (see A/CN.9/WG.VI/WP.22/Add.1, para. 21 (n)), “claim” means “a right to the performance of a non-monetary obligation other than a right in tangibles under a negotiable document.” For example, if a grantor has entered into a contract with another party pursuant to which the other party (the “obligor”) has agreed to transfer goods to the grantor or perform services for the grantor, the grantor’s right to the other party’s performance is a “claim.” This definition does not include rights granted by a government or a private party that owes no performance obligation with respect to those rights, such as may be the case with a State-granted licence to sell alcoholic beverages. It is not clear, though, whether this definition covers other rights, such as the right of a franchisee under a franchise agreement in which the

franchisor owes no positive performance of an obligation to the franchisee (but has agreed not to sue the franchisee for using the franchisor's name) or the right of a licensee under an intellectual property licence in which the licensor owes no positive performance of an obligation to the licensee. The Working Group may wish to consider whether, in light of the discussion below concerning issues about security rights in "claims" that might require special rules, the definition of "claim" should include rights as to which the only performance obligation is to refrain from taking an action (as in the case of a franchise or license) or as to which there is no performance obligation owed to the grantor at all (as in the case of a State-granted licence to sell alcoholic beverages).

In determining whether any special rules are required for security rights in claims, several issues must be considered: (i) the rules governing creation of a security right in the claim, (ii) the rules governing the steps required for a security right in the claim to be effective against third parties, (iii) the rules governing priority of a security right in the claim over the rights of competing claimants, (iv) the rules governing enforcement of a security right in the claim as against the grantor and other parties that may have an interest in the claim deriving from the grantor, and (v) the rules governing the right of the secured creditor, or a party to which the claim has been transferred in a disposition under the enforcement procedures, to enforce the claim against the obligor. With respect to issue (v), consideration must also be given to the source of substantive law governing the rights and duties of the obligor on the claim with respect to the enforcing secured creditor or other party. With respect to all of the issues, conflict-of-laws rules that determine the State whose law is applicable must also be considered.

It would appear that the existing recommendations in the draft Guide that address security rights in other intangible movable property are sufficient to govern the first four issues with respect to security rights in claims.

Resolution of the fifth issue: the right of the secured creditor to enforce the claim against the obligor likely depends, in part, on whether, under other law, the claim is assignable (or may be enforced by an assignee). Limitations on assignment of a claim (or on the enforceability of a claim by an assignee) may result from limitations on assignment in a contract between the obligor on the claim and the obligee/grantor that is enforceable under applicable law or may arise directly by rule of law that limits assignment of certain claims even in the absence of a contractual prohibition. It should be noted in this regard that in some cases such rules of law exist for the protection of the obligor while in other cases such rules of law exist for the protection of the obligee. While the draft Guide recommends limits on the effectiveness of certain contractual anti-assignment provisions with respect to receivables, the Working Group may conclude that the economic justifications for limiting the effectiveness of those anti-assignment provisions in the case of receivables are not present when the obligation of the obligor is not monetary. Accordingly, the Working Group may conclude that the ability of the secured creditor to enforce a claim directly against the obligor may be limited by contract.

With respect to the source of substantive law governing the fifth issue, the Working Group may wish to conclude that, as in the case of security rights in other types of movable property consisting of a claim against a third party (such as receivables and negotiable instruments), the body of law that governs the claim determines the nature of the obligations of the obligor (and the extent to which contractual anti-assignment provisions or other legal anti-assignment rules are applicable).

With respect to conflict-of-laws rules, the recommendations in the conflict-of-laws chapter seem well suited to address the first four issues listed above. With respect to the

fifth issue, the Working Group may wish to conclude that the State whose law governs the claim should govern.]

- (o) “Receivable” means a right to the payment of a monetary obligation, excluding, however, rights to payment evidenced by a negotiable instrument, the obligation to pay under an independent undertaking and the obligation of a bank to pay funds credited to a bank account.

[Note to the Working Group: The Working Group may wish to note that the definition of “receivable” in the draft Guide is broader than the definition of “receivable” in article 2 (a) of the Convention in that it covers even non-contractual receivables, such as receivables arising by operation of law (e.g. tort receivables, receivables arising in the context of unjust enrichment or tax receivables), or receivables confirmed in court judgements or arbitral awards (unless incorporated in a settlement agreement). The Working Group may wish to limit the definition of “receivable” in the draft Guide to contractual receivables or consider whether the recommendations in this document should apply, with any necessary modifications, to non-contractual receivables as well.]

- (p) “Assignment” means the creation of a security right in a receivable or the outright transfer of a receivable.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that the creation of a security right in a receivable includes an outright transfer of receivables by way of security, which is treated in the draft Guide as a security right.]

- (q) “Assignor” means the person that makes an assignment of a receivable.

[Note to the Working Group: Article 2 (a) of the United Nations Assignment Convention.]

- (r) “Assignee” means the person to which an assignment of a receivable is made.

[Note to the Working Group: Article 2 (a) of the United Nations Assignment Convention.]

- (s) “Subsequent assignment” means an assignment by the initial or any other assignee. In the case of a subsequent assignment, the person that makes that assignment is the assignor and the person to which that assignment is made is the assignee.

[Note to the Working Group: Article 2 (b) of the United Nations Assignment Convention.]

- (t) “Account debtor” means a person liable for payment of a receivable.

[Note to the Working Group: Article 2 (a) of the United Nations Assignment Convention. “Account debtor” includes a “guarantor”, as an accessory guarantee is a receivable.]

- (u) “Notification of the assignment” means a communication in writing that reasonably identifies the assigned receivables and the assignee.

[Note to the Working Group: Article 5 (d) of the United Nations Assignment Convention. According to recommendations 11 and 12 (see A/CN.9/WG.VI/WP.21), “writing” includes electronic communications and “signature” includes electronic signature. The Working Group may wish to consider including recommendations 11 and 12 in the definitions.]

(v) “Original contract” in the context of an assignment means the contract between the assignor and the account debtor from which the assigned receivable arises.

[Note to the Working Group: Article 5 (a) of the United Nations Assignment Convention.]

II. Recommendations

Parties, security rights, secured obligations and assets covered (A/CN.9/WG.VI/WP.21, recs. 3 (d) and (f))

3.. In particular, the law should provide that it applies to:

(d) All types of movable assets and fixtures, tangible or intangible, present or future, not specifically excluded in the law, including inventory, equipment and other goods, receivables, negotiable instruments, negotiable documents, rights to payment of funds credited to bank accounts, rights to drawing proceeds from independent undertakings, and intellectual property rights;

...

(f) Generally, outright transfers of receivables;

[Note to the Working Group: The Working Group may wish to note that, as the definition of “receivable” in para. 21 (o) of A/CN.9/WG.VI/WP.22/Add.1 excludes rights to payment under a negotiable instrument, the obligation to pay under an independent undertaking and the obligation of a bank to pay funds credited to a bank account, recommendation 3 (f) does not apply to an outright transfer of a negotiable instrument, an independent undertaking or a right to payment of funds credited to a bank account (however, the recommendations apply to transfers of such assets for security purposes, as they are treated as secured transactions; for example, the transfer for security purposes of a right to payment of funds in a bank account is covered as a method of achieving control; see definition of “control” in A/CN.9/WG.VI/WP.26/Add.1). The Working Group may wish to consider whether the outright transfer of a negotiable instrument should be included within the scope of the draft Guide.]

There are several reasons to include such transfers. Providing clear rules for the creation, effectiveness against third parties and priority of an outright transfer of a negotiable instrument might assist financing transactions, securitizations and sales of loan participations that involve the outright transfer of negotiable instruments. Inclusion also recognizes that, since the draft Guide already includes the outright transfer of receivables within its scope, it would be a logical extension to include in the scope rights to payment that would have been receivables had they not been evidenced by negotiable instruments.

However, there are also reasons not to include outright transfers of negotiable instruments within the scope of the draft Guide. The main reason is that the benefits of inclusion may be outweighed by the burdens of adding to the draft Guide rules dealing with outright transfers of negotiable instruments. The benefits of inclusion may not be significant in those States in which the law relating to the outright transfer of negotiable instruments is already clear. The greater the number of States that are satisfied with their current law on this subject, the less the benefits that would be provided by inclusion in the draft Guide. Moreover, the volume of financing transactions actually involving the outright transfer of negotiable instruments and the need to give the transferee sufficient

protective rights in law other than the negotiable instrument law may differ from country to country.

The burdens of inclusion would be several. The Working Group would need to examine the entire draft Guide in order to determine what special rules will need to be added on such issues as creation, effectiveness against third parties and priority. In addressing effectiveness against third parties, the Working Group would need to consider whether, for the outright transfer of a negotiable instrument to be effective against third parties, the buyer must take possession of the negotiable instrument or register in the general security rights registry a notice of the outright transfer, or whether effectiveness against third parties is achieved automatically upon creation. Parties that extend credit secured by security rights in negotiable instruments may favour a possession/registration third-party effectiveness rule, while parties that buy negotiable instruments in bulk and customary buyers and sellers of loans and loan participations, may prefer an automatic third-party effectiveness rule.

A final reason to exclude outright transfers of negotiable instruments is that, as a technical matter, outright transfers of negotiable instruments concern the law of sale more than the law of secured transactions. Although the draft Guide does include outright transfers of receivables within its scope, it does so largely to protect reliance upon the registration system, which would be of little utility in establishing priority for the financing of receivables if outright transfers of receivables were excluded from the registration requirement. Similar concerns may not apply to an outright transfer of a negotiable instrument since the lender or buyer would usually have the option to obtain priority under recommendation 74 (b) (see A/CN.9/WG.VI/WP.24/Add.4) by taking possession of the negotiable instrument.

Even if the Working Group does decide that transfers of negotiable instruments should be included within the scope of the draft Guide as a general matter, the Working Group may nevertheless wish to consider whether certain exclusions are appropriate. For example, it may make sense to exclude transfers of cheques from the scope of the draft Guide even if transfers of other negotiable instruments are included. Financing transactions that involve transfers of cheques may be far less common and may be expected to remain far less common than financing transactions involving transfers of other negotiable instruments.]

Creation of a security right in receivables (see A/CN.9/WG.VI/WP.21, recs. 13, 14 and 15)

Assets and obligations subject to a security agreement

13. The law should specify that a security right may secure all types of obligation, including future, conditional and fluctuating obligations. It should also specify that a security right may be given in all types of asset, including parts of assets and undivided interests in assets and assets which, at the time of the security agreement, the grantor may not yet own or have the power to dispose of, or which may not yet exist, as well as in proceeds. Any exceptions to these rules should be limited and described clearly in the law.

Effectiveness of a bulk assignment and an assignment of future, parts of and undivided interests in receivables

14. The law should provide that:

(a) The assignment of receivables that are not specifically identified, future receivables and parts of or undivided interests in receivables is effective as between the assignor and the assignee and as against the account debtor, as long as, at the time of the assignment or, in the case of future receivables, at the time they arise, they can be identified to the assignment to which they relate; and

(b) Unless otherwise agreed, an assignment of one or more future receivables is effective without a new act of transfer being required to assign each receivable.

[Note to the Working Group: Article 8 of the United Nations Assignment Convention. The Working Group may wish to note that the commentary will explain that the general recommendations apply unless modified by asset-specific recommendations.]

Effectiveness of an assignment made despite an anti-assignment clause

15. The law should provide that:

(a) An assignment is effective as between the assignor and the assignee and as against the account debtor notwithstanding an agreement between the initial or any subsequent assignor and the account debtor or subsequent assignee limiting in any way the assignor's right to assign its receivables;

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that recommendation 15 (a) makes ineffective only an agreement between an obligor and an obligee that limits the obligee's right to assign a receivable owed by the obligor to the obligee. If such a receivable is assigned, the obligor is the "account debtor" and the obligee is the "assignor".

For example, if an agreement for the lease of goods limits the lessor's right to assign the rents due to it under the lease, recommendation 15 (a) makes the limitation on assignment ineffective, because the agreement is between the obligor (the lessee) and the obligee (the lessor) of the receivable (the rent arising from the lease agreement). By way of contrast, if the lease agreement between the lessor and the lessee limits the lessee's right to assign a receivable consisting of the lessee's claim to rents due to the lessee from the sublessee under a sublease, recommendation 15 (a) has no application, and nothing in this Guide makes the limitation ineffective. That is because the agreement limiting the right of the lessee to assign its claim for rents due to it from the sublessee under the sublease is not an agreement between the lessee (sublessor and obligee in a sublease) and the sublessee (obligor in the sublease). Whether the limitation in the lease is enforceable against the lessee would be determined by the law other than the law recommended in this Guide.

The same analysis would apply if the restriction on transfer was contained in a licence of intellectual property. Recommendation 15 (a) would render ineffective a term in the licence agreement that restricted the licensor from assigning fees due from the licensee. However, it would not render ineffective a term in the licence agreement restricting the licensee from assigning sublicense fees. Whether the latter term would be effective would be determined by law other than that recommended in the draft Guide.]

(b) If other law creates any obligation or liability of the assignor for breach of such an agreement, the other party to such an agreement may not avoid the contract from which the assigned receivables arise or the assignment contract on the sole ground of that breach.

A person who is not a party to such an agreement is not liable on the sole ground that it had knowledge of the agreement;

[(c) This recommendation applies only to assignments of receivables:

- (i) Arising from an original contract that is a contract for the supply or lease of goods or services other than financial services, a construction contract or a contract for the sale or lease of real property;
- (ii) Arising from an original contract for the sale, lease or licence of industrial or other intellectual property or of proprietary information;
- (iii) Representing the payment obligation for a credit card transaction;
- (iv) Owed to the assignor upon net settlement of payments due pursuant to a netting agreement involving more than two parties.]

[Note to the Working Group: The Working Group may wish to note that the commentary will clarify that contract avoidance referred to in paragraph (b) means contract termination in general.]

Creation of a security right in a right that secures an assigned receivable, a negotiable instrument or any other obligation (see A/CN.9/WG.VI/WP.24/Add.2)

16. The law should provide that upon creation of a security right in a receivable, a negotiable instrument or any other obligation covered as an encumbered asset by this Guide, a security right is automatically created, without further action by either the grantor or the secured creditor, in any personal or property right that secures payment or performance of that receivable, negotiable instrument, or other obligation. If, under the law governing a right that secures payment of a receivable, negotiable instrument or other obligation covered as an encumbered asset by this Guide, a security right in that securing right may be created only after a separate act of creation, the grantor is obligated to take such action. When an independent undertaking secures payment or performance of a receivable, a negotiable instrument or any other obligation covered as an encumbered asset by this Guide, a security right in a right to drawing proceeds from the independent undertaking is created without a separate act of creation by the grantor.

[Note to the Working Group: The Working Group may wish to note that the second sentence of recommendation 16 refers to “law governing a right”. The law recommended in the draft Guide may be this domestic law. The Working Group may also wish to note that the second sentence of recommendation 16, which is based on the second sentence of article 10 (1) of the United Nations Assignment Convention, was intended to refer to independent rights so as to safeguard the interests of the obligor of an independent right, such as an independent undertaking (see Analytical commentary on the draft Convention, A/CN.9/489, para. 105). This result may be better achieved in a domestic law, such as the law recommended in the draft Guide, by language along the following lines: “This recommendation does not create a security right in an independent right, such as an independent undertaking, and does not affect the rights and obligations of an obligor of an independent right, such as a guarantor/issuer of or nominated person in an independent undertaking.” If the Working Group adopts this wording, the second sentence of recommendation 16 could be deleted. As the third sentence of recommendation 16 is intended to carve out of the second sentence rights to receive payment under an independent undertaking, the third sentence could also be deleted.]

Financing transactions that fall under the first sentence of recommendation 16 would thus be facilitated. Such transactions include securitizations of pools of loans

secured by security rights in movables and immovables. In these cases the buyer of the loans will want to be able to look to the security rights securing the loans but would not want to incur, at the outset of the purchase, the additional expense of a separate act of transfer (if required under law other than the law recommended in the draft Guide) for each loan in the pool of loans, that could number in the hundreds or thousands. Separate acts of transfer, if any, would be necessary (if required under other law) to enforce only those loans that are later in default, typically a small proportion of the loans in the pool actually purchased. The buyer could decide whether to accept the expense of separate acts of transfer at the time of enforcement, whether voluntarily from the seller or with the assistance of a court. But, in deciding whether to purchase the loans and at what price, the buyer would take into account the expense of separate acts of transfer only for the small portion of the loans expected to be in default, not for the entire pool of loans. As a result of the expense savings, the seller should be able to obtain a higher purchase price, thereby making more funds available to the seller.

The Working Group may wish to consider whether: (i) recommendation 16 apply to outright transfers of receivables (but not of negotiable instruments or other obligations as the draft Guide generally applies only to outright transfers of receivables), since, even in the case of an outright transfer of a receivable, rights securing payment of the receivable should follow); and (ii) recommendation 16 should be supplemented by recommendations along the lines of paras. (2) to (6) of article 10 of the Convention (for para. (2) to (4) see rec. 15 above; for paras. (5) and (6), see below).

“The creation of a security right in [or the outright transfer of] a possessory property right under paragraph 1 of this recommendation does not affect any obligations of the assignor to the account debtor or the person granting the property right with respect to the relevant property existing under the law governing that property right.”

According to this wording, if the security right in or the transfer of a security right involves the delivery of possession of an asset and such delivery causes loss or prejudice to the account debtor or the person granting the right, any liability that may exist under law applicable outside the law recommended in the draft Guide is not affected. This may arise, for example, in the case of a delivery of possession of an item of valuable tangible property if the secured creditor or transferee damages or loses the property.

“This recommendation does not affect any requirement under law other than this law relating to the form or registration of the creation of security rights in [or the outright transfer of] any rights securing payment of the assigned receivable, negotiable instrument or other obligation.”

This wording makes it clear that, the form of transfer of a security right in an asset outside the scope of this law (e.g. an immovable) is left to law other than this law. Accordingly, a notarized document and registration may be necessary for the transferee of a mortgage to obtain various rights under immovables law, such the right to enforce the mortgage.]

Pre-default rights and obligations of the assignor and the assignee

[Note to the Working Group: The Working Group may wish to include recommendations dealing with the rights and obligations of the assignor and the assignee in the chapter on the pre-default rights and obligations of the parties. These recommendations could be based on articles 11 to 14 of the United Nations Assignment Convention.]

Rights and obligations of the assignor and the assignee

16 bis The law should provide that:

(a) The mutual rights and obligations of the assignor and the assignee arising from their agreement are determined by the terms and conditions set forth in that agreement, including any rules or general conditions referred to therein;

(b) The assignor and the assignee are bound by any usage to which they have agreed and, unless otherwise agreed, by any practices they have established between themselves[;

(c) In an international assignment, the assignor and the assignee are considered, unless otherwise agreed, implicitly to have made applicable to the assignment a usage that in international trade is widely known to, and regularly observed by, parties to the particular type of assignment or to the assignment of the particular category of receivables].

[Note to the Working Group: The Working Group may wish to consider whether paragraph (c) would fit in a domestic law. If paragraph (c) were to be included, “international assignment” might need to be defined.]

Representations of the assignor

16 ter The law should provide that:

(a) Unless otherwise agreed between the assignor and the assignee, the assignor represents at the time of conclusion of the contract of assignment that:

(i) The assignor has the right to assign the receivable;

(ii) The assignor has not previously assigned the receivable to another assignee; and

(iii) The account debtor does not and will not have any defences or rights of set off;

(b) Unless otherwise agreed between the assignor and the assignee, the assignor does not represent that the account debtor has, or will have, the ability to pay.

Right to notify the account debtor

16 quater The law should provide that:

(a) Unless otherwise agreed between the assignor and the assignee, the assignor or the assignee or both may send the account debtor notification of the assignment and a payment instruction, but after notification has been sent only the assignee may send such an instruction; and

(b) Notification of the assignment or a payment instruction sent in breach of any agreement referred to in paragraph (a) of this recommendation is not ineffective for the purposes of recommendation 19 by reason of such breach. However, nothing in this recommendation affects any obligation or liability of the party in breach of such an agreement for any damages arising as a result of the breach.

Right to payment

16 quinquies The law should provide that:

(a) As between the assignor and the assignee, unless otherwise agreed and whether or not notification of the assignment has been sent:

(i) If payment in respect of the assigned receivable is made to the assignee, the assignee is entitled to retain the proceeds and goods returned in respect of the assigned receivable;

(ii) If payment in respect of the assigned receivable is made to the assignor, the assignee is entitled to payment of the proceeds and also to goods returned to the assignor in respect of the assigned receivable; and

(iii) If payment in respect of the assigned receivable is made to another person over whom the assignee has priority, the assignee is entitled to payment of the proceeds and also to goods returned to such person in respect of the assigned receivable;

(b) The assignee may not retain more than the value of its right in the receivable.

Rights and obligations of the account debtor and the assignee (see A/CN.9/WG.VI/WP.21, recs. 17-23)

Principle of account debtor protection

[Note to the Working Group: Recommendations 17 to 23 are based on articles 15-21 of the United Nations Assignment Convention.]

17. The law should provide that:

(a) Except as otherwise provided in this law, an assignment does not, without the consent of the account debtor, affect the rights and obligations of the account debtor, including the payment terms contained in the original contract;

(b) A payment instruction may change the person, address or account to which the account debtor is required to make payment, but may not change:

(i) The currency of payment specified in the original contract; or

(ii) The State specified in the original contract in which payment is to be made to a State other than that in which the account debtor is located.

[Note to the Working Group: The Working Group may wish to consider whether subparagraph (b)(ii) should refer to "place" rather than "State", so as to preclude a change in the place of payment even in a single State. The Working Group may also wish to note that references to "the original contract" would need to be adjusted if the Working Group decides that these recommendations should apply even to non-contractual receivables (see Note after the definition of "receivable" above).]

Notification of the account debtor

18. The law should provide that:

(a) Notification of the assignment or a payment instruction is effective when received by the account debtor if it is in a language that is reasonably expected to inform the account debtor about its contents. It is sufficient if notification of the assignment or a payment instruction is in the language of the original contract; and

(b) Notification of the assignment or a payment instruction may relate to receivables arising after notification and that notification of a subsequent assignment constitutes notification of all prior assignments.

Discharge of the account debtor by payment

19. The law should provide that:

(a) Until the account debtor receives notification of the assignment, it is entitled to be discharged by paying in accordance with the original contract;

(b) After the account debtor receives notification of the assignment, subject to paragraphs (c) to (h) of this recommendation, it is discharged only by paying the assignee or, if otherwise instructed in the notification of the assignment or subsequently by the assignee in a writing received by the account debtor, in accordance with such payment instruction;

(c) If the account debtor receives more than one payment instruction relating to a single assignment of the same receivable by the same assignor, it is discharged by paying in accordance with the last payment instruction received from the assignee before payment;

(d) If the account debtor receives notification of more than one assignment of the same receivable made by the same assignor, it is discharged by paying in accordance with the first notification received;

(e) If the account debtor receives notification of one or more subsequent assignments, it is discharged by paying in accordance with the notification of the last of such subsequent assignments;

(f) If the account debtor receives notification of the assignment of a part of or an undivided interest in one or more receivables, it is discharged by paying in accordance with the notification or in accordance with this recommendation as if the account debtor had not received the notification. If the account debtor pays in accordance with the notification, it is discharged only to the extent of the part or undivided interest paid.

(g) If the account debtor receives notification of the assignment from the assignee, it is entitled to request the assignee to provide within a reasonable period of time adequate proof that the assignment from the initial assignor to the initial assignee and any intermediate assignment have been made and, unless the assignee does so, the account debtor is discharged by paying in accordance with this recommendation as if the notification from the assignee had not been received. Adequate proof of an assignment includes but is not limited to any writing emanating from the assignor and indicating that the assignment has taken place.

(h) This recommendation does not affect any other ground on which payment by the account debtor to the person entitled to payment, to a competent judicial or other authority, or to a public deposit fund discharges the account debtor.

Defences and rights of set-off of the account debtor

20. The law should provide that:

(a) In a claim by the assignee against the account debtor for payment of the assigned receivable, the account debtor may raise against the assignee all defences and rights of set-off arising from the original contract, or any other contract that was part of the

same transaction, of which the account debtor could avail itself as if the assignment had not been made and such claim were made by the assignor;

(b) The account debtor may raise against the assignee any other right of set-off, provided that it was available to the account debtor at the time notification of the assignment was received by the account debtor;

(c) Notwithstanding paragraphs (a) and (b) of this recommendation, defences and rights of set-off that the account debtor may raise pursuant to recommendations 15 and 16 against the assignor for breach of an agreement limiting in any way the assignor's right to make the assignment are not available to the account debtor against the assignee.

[Note to the Working Group: The Working Group may wish to note that, under recommendation 3 (a) (see A/CN.9/WG.VI/WP.21), the draft Guide applies to consumers but does affect the rights of consumers under consumer-protection law.]

Agreement not to raise defences or rights of set-off

21. The law should provide that:

(a) The account debtor may agree with the assignor in a writing signed by the account debtor not to raise against the assignee the defences and rights of set-off that it could raise pursuant to recommendation 20. Such an agreement precludes the account debtor from raising against the assignee those defences and rights of set-off;

(b) The account debtor may not waive defences:

- (i) Arising from fraudulent acts on the part of the assignee; or
- (ii) Based on the account debtor's incapacity;

(c) Such an agreement may be modified only by an agreement in a writing signed by the account debtor. The effect of such a modification as against the assignee is determined by recommendation 22, paragraph (b).

[Note to the Working Group: Recommendation 21 is based on article 19 of the United Nations Assignment Convention, which refers to a signed writing only for a waiver of defences or its modification. If the Working Group decides not to refer to signature in recommendation 8 (see A/CN.9/WG.VI/WP.21) but rather to evidence that the grantor intended to grant a security right, it may wish to reconsider the reference to signature in recommendation 21. If reference to signature is retained in recommendation 8, an electronic signature should be sufficient (see note after definition (u).]

Modification of the original contract

22. The law should provide that:

(a) An agreement concluded before notification of the assignment between the assignor and the account debtor that affects the assignee's rights is effective as against the assignee, and the assignee acquires corresponding rights;

(b) An agreement concluded after notification of the assignment between the assignor and the account debtor that affects the assignee's rights is ineffective as against the assignee unless:

- (i) The assignee consents to it; or

(ii) The receivable is not fully earned by performance and either the modification is provided for in the original contract or, in the context of the original contract, a reasonable assignee would consent to the modification.

(c) Paragraphs (a) and (b) of this recommendation do not affect any right of the assignor or the assignee arising from breach of an agreement between them.

Recovery of payments

23. The law should provide that failure of the assignor to perform the original contract does not entitle the account debtor to recover from the assignee a sum paid by the account debtor to the assignor or the assignee.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that recommendation 23 does not affect any liability of the assignor towards the account debtor for breach of contract.]

Third-party effectiveness of a security right in receivables (see A/CN.9/WG.VI/WP.24/Add.3, rec. 37)

37. The law should provide that the right of an assignee under an outright assignment of receivables becomes effective against third parties by registration of a notice of the right in the general security rights registry.

[Note to the Working Group: The Working Group will recall that at its ninth session it decided that text of recommendation 37 should be placed in the commentary as it repeats the general third-party effectiveness rule (see A/CN.9/593, para. 18).]

Priority of security rights in receivables (A/CN.9/WG.VI/WP.24/Add.4, recs. 80 and 81)

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that the general priority recommendations apply to security rights in receivables, as well as to outright transfers of receivables.]

Enforcement of a security right in receivables (A/CN.9/WG.VI/WP.24/Add.1, recs. 88, 102 and 103)

Application of this chapter to outright transfers of receivables

88. The law should provide that this chapter applies to the enforcement of the rights of a transferee of receivables acquired by means of an outright transfer only to the extent that, pursuant to the terms of the transfer, there is recourse to the transferor for a payment default of the account debtor.

[Note to the Working Group: The Working Group may wish to note that recommendation 88 is intended to clarify that, although the Guide applies generally to outright transfers of receivables, this chapter applies to transfers of receivables only if there is recourse to the transferor.]

Collection of receivables

102. With respect to a receivable that is an encumbered asset, the law should provide that after default or before default with the agreement of the assignor the secured creditor may collect or otherwise enforce the receivable.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that the secured creditor may, as an alternative, elect to dispose of or retain a receivable pursuant to recommendations 93 (d), (e), 110 and 113 (see A/CN.9/WG.VI/WP.24/Add.1). The commentary will also explain that the assignee may send a notification and a payment instruction even in breach of an agreement with the assignor (see rec. 16 quater bis above).]

103. The law should provide that the secured creditor's right to collect or otherwise enforce a receivable includes the right to collect or otherwise enforce any personal or property right that secures payment of the receivable (such as a guarantee or security right).

[Note to the Working Group: The Working Group may wish to note that the commentary will discuss how other recommendations of the chapter on enforcement may apply to the enforcement of a right securing payment of an assigned receivable.]

Law applicable to security rights in intangible property (A/CN.9/WG.VI/WP.24)

137. The law should provide that the creation, the effectiveness against third parties and the priority over the rights of competing claimants of a security right in intangible property are governed by the law of the State in which the grantor is located. [However, with respect to security rights in intangible property that is subject to a title registration system, the law should provide that such issues are governed by the law of the State in which [...].]

[137 bis The law should provide that the law of the State in which the assignor is located governs the creation, third-party effectiveness and priority of a security right in a receivable arising from a sale or lease of, or a security agreement relating to, an immovable over the rights of competing claimants. However, a priority conflict involving the rights of a competing third party registered in the immovables registry of the State in which the immovable is located is governed by the law of that State.]

[Note to the Working Group: The Working Group may wish to consider adding a new recommendation along the lines of recommendation 137 bis, which is designed to address the law applicable to assignments of receivables owing to the grantor under an agreement for the sale or lease of an immovable or under a security agreement over an immovable. In a number of States, it is not possible to create rights in such receivables independently of the related immovable with the result that the effectiveness as between the parties, the third-party effectiveness and the priority of a security right in the receivables is governed by the law (and, in particular, the registry regime) that applies to the related immovable. In other States, it is possible to grant a security right in such receivables independently of the related immovable but the secured creditor is subordinated to third-party rights that are registered against the related immovable in the immovables registry. The second sentence of recommendation 137 bis is designed to preserve the application of the law of the State where the related immovable is located in order to protect third parties who rely on the registration in the immovables registry of that State. Reference is made to rights of a competing third party as the term "competing claimant" is defined by reference to security rights in movables. Reference is also made to "rights" of such parties, since rights of third parties could include not just competing mortgagees but also assignees or buyers of the immovable or the related intangible and indeed any class of third party right for which the immovables regime makes provision for registration. In addition, reference is made to a right "registered in the immovables registry" rather than "that became effective against third parties by registration", since: (i) some immovables registries do not distinguish between inter-parties and third party effectiveness, and (ii) immovables registries do not necessarily require registration for general third-party effectiveness but

only for effectiveness against third parties whose rights are also registrable in the immovables registry (e.g. registration may not be needed for effectiveness against an insolvency administrator or a judgment creditor.)

Law applicable to the rights and obligations of the grantor and the secured creditor

146. The law should provide that the mutual rights and obligations of the grantor and the secured creditor with respect to the security right, whether arising from the security agreement or by law, are governed by the law chosen by them and, in the absence of a choice of law, by the law governing the security agreement.

Law applicable to the rights and obligations of the account debtor and the assignee, the obligor under a negotiable instrument or the issuer of a negotiable document and the secured creditor

147. The law should provide that the following matters are governed by the law of the State whose law governs an assigned receivable, or a negotiable instrument or a negotiable document in which a security right has been created:

(a) The relationship between an account debtor and an assignee of the receivable, between an obligor under a negotiable instrument and a creditor with a security right in that instrument or between an issuer of a negotiable document and a creditor with a security right in that document;

(b) The conditions under which the assignment of the receivable, the transfer of the negotiable instrument or the transfer of the negotiable document can be invoked against the account debtor, the obligor on the negotiable instrument or the issuer of the negotiable document; and

(c) The determination of whether the obligations of the account debtor, the obligor on the negotiable instrument or the issuer of the negotiable document have been discharged.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that: (i) recommendation 148 applies to the enforcement of a security right in a receivable (A/CN.9/WG.VI/WP.24); and (ii) the recommendations on the impact of insolvency on the law applicable, as well as the other general recommendations in the conflict-of-laws chapter (A/CN.9/WG.VI/WP.24), apply to security rights in receivables.]

A/CN.9/WG.VI/WP.26/Add.1

Security rights in rights to payment of funds credited to bank accounts: definitions and recommendations

ADDENDUM

CONTENTS

	<i>Page</i>
Security rights in rights to payment of funds credited to bank accounts	
I. Definitions	
II. Recommendations	

Security rights in rights to payment of funds credited to bank accounts

I. Definitions (A/CN.9/WG.VI/WP.22/Add.1, para. 21 (o), (cc) and (hh))

(o) “Receivable” means a right to the payment of a monetary obligation, excluding, however, rights to payment evidenced by a negotiable instrument, the obligation to pay under an independent undertaking and the obligation of a bank to pay funds credited in a bank account.

[Note to the Working Group: The Working Group may wish to note that the encumbered asset is described as “the right to payment of funds credited to a bank account” rather than the bank account itself. Therefore, the definition of “bank account” could be placed in the commentary. The commentary will also include a description of institutions covered under the term “bank”. In this connection, the Working Group may wish to consider whether the term “bank” should cover all institutions that have a banking licence under the law of the enacting State, which may include payment institutions, payment, clearing and settlement systems operating cash accounts and central banks. The Working Group may wish to note that the commentary to a previous version of the recommendations on bank accounts is in document A/CN.9/WG.VI/WP.18 and Add.1.]

[(cc) “Bank account” means an account maintained by a bank into which funds may be deposited. The term includes checking, saving and time-deposit accounts.]

Definition of “control” (see A/CN.9/WG.VI/WP.24/Add.3, Note to the Working Group after rec. 43)

(hh) A secured creditor has “control” with respect to funds credited to a bank account: (i) automatically upon the creation of a security right where the depositary bank is the secured creditor; (ii) where the depositary bank has concluded a control agreement with the grantor and the secured creditor, according to which the depositary bank has agreed to follow instructions from the secured creditor with respect to the right to payment of funds credited

to the bank account without further consent of the grantor; or (iii) the right to payment of funds credited to a bank account is transferred to secured creditor.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that: (i) there is no obligation on a depositary bank to enter into a control agreement; (ii) that a secured creditor's rights will be subject to the rights and obligations of the depositary bank under law and practice governing bank accounts; (iii) a control agreement requires the consent of the grantor (as well as of the depositary bank) and the grantor retains the right to deal with the funds in the bank account until the secured creditor instructs the depositary bank otherwise (although in some control agreements, the funds would be blocked from the time of the conclusion of the control agreement).]

II. Recommendations

Scope

Parties, security rights, secured obligations and assets covered (A/CN.9/WG.VI/WP.21, rec. 3 (d))

3. In particular, the law should provide that it applies to:

(d) All types of movable assets and fixtures, tangible or intangible, present or future, not specifically excluded in the law, including inventory, equipment and other goods, receivables, negotiable instruments (such as cheques, bills of exchange and promissory notes), negotiable documents (such as bills of lading), rights to payment of funds credited to bank accounts, rights to drawing proceeds from independent undertakings, and intellectual property rights;

Creation of a security right in a right to payment of funds credited to a bank account (see A/CN.9/WG.VI/WP.21, rec. 26)

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that, pursuant to recommendation 8 (see A/CN.9/WG.VI/WP.21), a security right in a right to payment of funds credited to a bank account may be created by agreement between the grantor and the secured creditor.]

26. The law should provide that a security right in a right to payment of funds credited to a bank account is effective as between the secured creditor and the grantor notwithstanding an agreement between the grantor and the depositary bank limiting in any way the grantor's right to create a security right in its right to payment of funds credited to the bank account. However, the depositary bank has no duty to recognize the secured creditor and no obligation is otherwise imposed on the depositary bank with respect to the security right, without the depositary bank's consent.

[Note to the Working Group: The Working Group may wish to note that the commentary to recommendation 3 (a) (see A/CN.9/WG.VI/WP.21) will clarify that enacting States may wish to take into account any impact that the recommendations in this Guide might have on consumer protection law.]

Rights and obligations of the depositary bank (see A/CN.9/WG.VI/WP.24/ Add.3, Note to the Working Group after rec. 43)

X. The law should provide that:

(a) The creation of a security right in a right to payment of funds credited to a bank account does not affect the rights and obligations of the depositary bank without its consent; and

(b) The rights of set-off of the depositary bank [are not impaired by reason of] [are distinct from] any security rights that the depositary bank may have in a right to payment of funds credited to a bank account.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that recommendations X and Y are supplemented by recommendations 76, 77 (to the extent that there is a priority conflict between a security right or right of set-off of the depositary bank and a security right of another person) and 106 bis, 107 and 108 (enforcement against the depositary bank).]

The commentary will also explain that recommendation X (b) does not deal with a priority conflict but with the situation where the depositary bank itself has both a right of set-off against and a security right in a right to payment of funds credited to a bank account. In this situation, according to recommendation X (b), the bank's rights of set-off are not impaired or subsumed (i.e. they remain distinct from) the bank's security right.]

Y. The law should provide that nothing in these recommendations obligates a depositary bank to:

(a) Pay any person other than a person that has control with respect to funds credited to a bank account; or

(b) Respond to requests for information about whether a control agreement or a security right in its own favour exists and whether the grantor retained the right to dispose of the funds credited in the account.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that recommendation Y does not affect the bank-customer relationship and the rights and obligations arising from other law governing bank accounts (e.g. money-laundering, bank secrecy).]

Third-party effectiveness of a security right in a right to payment of funds credited to a bank account (see A/CN.9/WG.VI/WP.24/Add.3, recs. 42 and 43)

43. The law should provide that a security right in a right to payment of funds credited to a bank account is effective against third parties also if the secured creditor obtains control with respect to the funds credited to the bank account.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that, pursuant to recommendation 35 (see A/CN.9/WG.VI/WP.24/Add.3), a security right in a right to payment of funds credited to a bank account may also become effective against third parties by registration of a notice in the general security rights registry.]

Priority of a security right in a right to payment of funds credited to a bank account (see A/CN.9/WG.VI/WP.24/Add.4, recs. 76-78)

76. The law should provide that a security right in a right to payment of funds credited to a bank account, which has been made effective against third parties by control, has priority over a security right in a right to payment of the funds, which has been made effective against third parties by any other method. If the secured creditor is the depositary bank, the depositary bank's security right has priority over any other security right (including a security right made effective against third parties by a control agreement with the depositary bank even if the depositary bank's security right is later in time).

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that a security right of the depositary bank has always priority even over a security right with respect to which the bank has earlier entered into a control agreement because: (i) a security right of the depositary bank should have the same priority as its set-off right, which has always priority; (ii) if the depositary bank's security right had no priority, the bank would not enter into any control agreement; (iii) a secured creditor could always seek to obtain a subordination agreement from the depositary bank.]

77. The law should provide that any right of the depositary bank to set-off against the right to payment of funds credited to a bank account obligations owed to the depositary bank by the grantor has priority over the security right of any secured creditor other than a secured creditor who has acquired control with respect to the funds credited to the bank account by becoming a transferee of the right to payment of the funds.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that these priority recommendations mean that third parties are taken to know that they cannot rely on a right to payment of funds credited to a bank account as a primary source of security for extensions of credit and can do so only by obtaining a subordination agreement from the depositary bank or having the account entered in their own name. Consequently, the absence of publicity of the security right is not seen as problematic.]

The commentary will also explain that, unlike recommendation X(b), recommendation 77 deals with priority conflicts between rights of set-off of the depositary bank and security rights of other persons. Moreover, the commentary will explain that recommendation 77 does not create any rights of set-off, a matter which remains subject to other law.]

78. In the case of a transfer of the right to payment of funds from a bank account initiated by the grantor, the law should provide that the transferee of the right to payment of the funds takes free of a security right in the right to payment of funds credited to the bank account, unless the transferee acts in collusion with the grantor to deprive the secured creditor of its security right in the right to payment of the funds. This recommendation does not lessen the rights of transferees of rights to payment of funds from bank accounts under law other than this law.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that the general priority recommendations apply to security rights in rights to payment of funds credited to a bank accounts subject to recommendations 76 to 78.]

Enforcement of a security right in a right to payment of funds credited to a bank account (see A/CN.9/WG.VI/WP.24/Add.1, recs. 106 bis, 107 and 108)

106 bis. The law should provide that after default or before default with the consent of the grantor a secured creditor with a security right in a right to payment of funds credited to a bank account may, subject to recommendations X and Y, collect or otherwise enforce its right to payment of the funds.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that the reference to recommendations X and Y is designed to complement recommendations 76 and 77.]

107. The law should provide that after default or before default with the consent of the grantor, a secured creditor that has control with respect to funds credited to a bank account is entitled to enforce its security right without having to resort to a court or other authority.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that, unlike a secured creditor that has to collect the funds to apply them to the secured obligation according to recommendation 116 (see A/CN.9/WG.VI/WP.24/Add.1), a depositary bank as a secured creditor may apply the funds to the secured obligation directly. The commentary will also explain that enforcement of the bank's rights of set-off remains subject to other law.]

108. The law should provide that a secured creditor that does not have control with respect to funds credited to a bank account may collect or otherwise enforce the security right against the depositary bank only pursuant to a court order, unless the depositary bank agrees otherwise.

Law applicable to a security right in a right to payment of funds credited to a bank account (A/CN.9/WG.VI/WP.24, rec. 139)

139. Except as otherwise provided in recommendation 140, the law should provide that the creation, the effectiveness against third parties, the priority over the rights of competing claimants, the rights and duties of the depositary bank with respect to the security right and the enforcement of the security right in a right to payment of funds credited to a bank account are governed by

Alternative A

the law of the State expressly stated in the account agreement as the State whose law governs the account agreement or, if the account agreement expressly provides that another law is applicable to all such issues, that other law. However, the law of the State determined pursuant to the preceding sentence applies only if the depositary bank has, at the time of the conclusion of the account agreement, an office in that State which is engaged in the regular activity of maintaining bank accounts. The law should also specify that, if the applicable law is not determined pursuant to the preceding two sentences, the applicable law is to be determined pursuant to fallback rules based on article 5 of the Hague Convention on the Law Applicable to Certain Rights in Respect of Securities Held with an Intermediary.

[Note to the Working Group: Alternative A is an abbreviated version of the approach followed in articles 4.1 and 5 of the Hague Convention on the Law Applicable to Certain Rights in Respect of Securities Held With An Intermediary ("the Hague Securities Convention"). The commentary will include the detailed fallback rules in article 5 of the Hague Securities Convention with sufficient explanation.]

Alternative B

the law of the State in which the bank that maintains the bank account has its place of business. In the case of more than one place of business, reference should be made to the place where the branch maintaining the account is located.

[Note to the Working Group: The Working Group may wish to consider whether alternative B should address methods for identifying the branch which maintains an account.]

The Working Group may also wish to note that the commentary will explain that the recommendations on the impact of insolvency on the law applicable, as well as the other general recommendations in the conflict-of-laws chapter (A/CN.9/WG.VI/WP.24), apply to security rights in rights to payment of funds credited to bank accounts.]

A/CN.9/WG.VI/WP.26/Add.2

Security rights in negotiable instruments: definitions and recommendations

ADDENDUM

CONTENTS

	<i>Page</i>
Security rights in negotiable instruments	
I. Definitions	
II. Recommendations	

Security rights in negotiable instruments

I. Definitions (A/CN.9/WG.VI/WP.22/Add.1, para. 21 (i), (o) and (w))

(i) “Tangibles” means all forms of corporeal movable property. Among the categories of tangibles are inventory, equipment, fixtures, negotiable instruments and negotiable documents.

(o) “Receivable” means a right to the payment of a monetary obligation, excluding, however, rights to payment evidenced by a negotiable instrument, the obligation to pay under an independent undertaking and the obligation of a bank to payment of funds credited to a bank account.

(w) “Negotiable instrument” means an instrument that embodies a right to payment, such as a cheque, bill of exchange or promissory note, which satisfies the requirements for negotiability under the law governing negotiable instruments.

[Note to the Working Group: The Working Group may wish to note that the commentary will clarify that the phrase “law governing negotiable instruments”, or law governing negotiable documents” or similar expression are intended to encompass all law that applies to negotiable instruments or negotiable documents, including not only negotiable instrument or negotiable document law as such but also bailment law, contract law and other law that might be applicable. Other applicable law might include in particular specialized laws that relate to obligors or negotiable instruments or to issuers of negotiable documents or to particular types of goods that might be covered by a negotiable document. Throughout the draft Guide, the term “law” is intended to include both statutory and non-statutory law.]

II. Recommendations

Parties, security rights, secured obligations and assets covered (see A/CN.9/WG.VI/WP.21, recs. 3 (d) and 16)

3. In particular, the law should provide that it applies to:

(d) All types of movable assets and fixtures, tangible or intangible, present or future, not specifically excluded in the law, including inventory, equipment and other goods, receivables, negotiable instruments (such as cheques, bills of exchange and promissory notes), negotiable documents (such as bills of lading),] rights to payment of funds credited to bank accounts, rights to drawing proceeds from an independent undertakings, and intellectual property rights;

[See A/CN.9/WG.VI/WP.26, rec. 16 and Note to the Working Group.]

Creation of a security right in a negotiable instrument

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that, pursuant to recommendation 8 (see A/CN.9/WG.VI/WP.21), a security right in a negotiable instrument may be created by a written and possibly signed agreement between the grantor and the secured creditor or by even an oral agreement and delivery of possession of the instrument to the secured creditor. The commentary will also explain that creation of a security right or transfer of a negotiable instrument by endorsement under negotiable instrument law would not be affected by this recommendation.]

Creation of a security right in a right that secures a negotiable instrument (see A/CN.9/WG.VI/WP.21, rec. 24)

24. The law should provide that, if a security right has been effectively created in a negotiable instrument, the secured creditor also has a security right in accessory rights with respect to the negotiable instrument without a new act of transfer. Such accessory rights may include:

- (a) Rights against guarantors with respect to the negotiable instrument; and
- (b) Security rights securing the obligation of the obligor on the negotiable instrument.]

[Note to the Working Group: The Working Group may wish to note that, under recommendation 24, if A gets a note from B guaranteed by C and then grants a security right in the note to D, D gets a security right in the guarantee as well. As the matter is addressed in recommendation 16, the Working Group may wish to consider deleting recommendation 24 and placing the examples in the commentary.]

Rights and obligations of the obligor under a negotiable instrument

[Note to the Working Group: The Working Group may wish to consider whether language along the following lines should be included here to address the rights and obligations of the obligor under a negotiable instrument:

“The law should provide that as between the secured creditor and (i) the person obligated on the negotiable instrument, or (ii) other persons claiming rights under the law governing negotiable instruments, the obligations and rights of those persons are determined by the

law governing negotiable instruments.” This text is drawn from recommendation 104 (see rec. 104 below.)

**Third-party effectiveness of a security right in a negotiable instrument
(see A/CN.9/WG.VI/WP.24/Add.3)**

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that, according to the general third-party effectiveness recommendation 35, a security right in a negotiable instrument may be made effective against third parties by registration of a notice in the general security rights registry or by dispossession of the grantor.

The Working Group may also wish to include an additional recommendation along the following lines:

“The law should provide that where a security right in a negotiable instrument is effective against third parties, the security right continues to be effective against third parties for a short period of [to be specified] days after the negotiable instrument has been relinquished to the grantor for the purpose of presentation, collection, enforcement, renewal.”]

**Priority of a security right in a negotiable instrument
(see A/CN.9/WG.VI/WP.24/Add.4, rec. 74)**

74. The law should provide that a security right in a negotiable instrument that has been made effective against third parties by dispossession of the grantor with respect to the instrument has priority over a security right in a negotiable instrument that was made effective against third parties by any other method. The law should also provide that a security right in a negotiable instrument that has been made effective against third parties by a method other than by dispossession of the grantor with respect to the instrument is subordinate to the rights of a buyer, another secured creditor or other transferee in a consensual transaction that either:

(a) Qualifies as a protected holder under the law governing negotiable instruments; or

(b) Takes possession of the negotiable instrument and gives value in good faith and without knowledge that the transfer was in violation of the rights of the holder of the security right.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that the general priority recommendations apply to priority with respect to security rights in negotiable instruments, while recommendation 74 deals with additional priority conflicts.]

**Enforcement of a security right in a negotiable instrument
(A/CN.9/WG.VI/WP.24/Add.1, recs. 104 and 105)**

104. The law should provide that after default or before default with the agreement of the obligor of the negotiable instrument the secured creditor has the right to collect or otherwise enforce a negotiable instrument that is an encumbered asset against a person obligated on that instrument.

[Note to the Working Group: The commentary will explain that as between the secured creditor and (i) the person obligated on the negotiable instrument, or (ii) other

persons claiming rights under the law governing negotiable instruments, the obligations and rights of those persons are determined by the law governing negotiable instruments. The commentary will also include the following examples of such persons:

(a) The person obligated on the negotiable instrument may be obligated to pay only a holder or other person entitled to enforce the instrument under the law governing negotiable instruments; and

(b) The right of the person obligated on the instrument to raise defences to that obligation is determined by the law governing negotiable instruments.]

105. The law should provide that the secured creditor's right to collect or otherwise enforce a negotiable instrument includes the right to collect or otherwise enforce any personal or property right that secures payment of the negotiable instrument (such as a guarantee or security right).

Law applicable to security rights in tangibles (A/CN.9/WG.VI/WP.24, rec. 136)

159. The law should provide that, except as otherwise provided in recommendations 140 and 142, the creation, the effectiveness against third parties and the priority over the rights of competing claimants of a security right in tangible property are governed by the law of the State in which the encumbered asset is located. However, with respect to security rights in tangible property of a type ordinarily used in more than one State, the law should provide that such issues are governed by the law of the State in which the grantor is located. [With respect to security rights in the type of tangible property mentioned in the preceding sentence that is subject to a title registration system, the law should provide that such issues are governed by the law of the State under the authority of which the registry is maintained.]

[Note to the Working Group: The commentary will explain that "tangible property of a type ordinarily used in more than one State" refers to mobile goods, such as motor vehicles.]

Law applicable to third-party effectiveness of security rights in specified types of asset by registration (A/CN.9/WG.VI/WP.24, rec. 140)

140. If the State in which the grantor is located recognizes registration as a method of achieving effectiveness against third parties of a security right in negotiable instruments, negotiable documents and rights to payment of funds credited to bank accounts, the law of that State determines whether the effectiveness against third parties of a security right in such encumbered assets has been achieved by registration under the laws of that State.

Law applicable to rights and obligations of the grantor and the secured creditor (A/CN.9/WG.VI/WP.24, rec. 146)

148. The law should provide that the mutual rights and obligations of the grantor and the secured creditor with respect to the security right, whether arising from the security agreement or by law, are governed by the law chosen by them and, in the absence of a choice of law, by the law governing the security agreement.

Law applicable to the rights and obligations of the account debtor and the assignee, the obligor under a negotiable instrument or the issuer of a negotiable document and the secured creditor (A/CN.9/WG.VI/WP.24, rec. 147)

149. The law should provide that the following matters are governed by the law of the State whose law governs an assigned receivable, or a negotiable instrument or a negotiable document in which a security right has been created:

(a) The relationship between an account debtor and an assignee of the receivable, between an obligor under a negotiable instrument and a creditor with a security right in that instrument or between an issuer of a negotiable document and a creditor with a security right in that document;

(b) The conditions under which the assignment of the receivable, the transfer of the negotiable instrument or the transfer of the negotiable document can be invoked against the account debtor, the obligor on the negotiable instrument or the issuer of the negotiable document; and

(c) The determination of whether the obligations of the account debtor, the obligor on the negotiable instrument or the issuer of the negotiable document have been discharged.

[Note to the Working Group: The Working Group may wish to note that the extension of the scope of the Guide to outright transfers of negotiable instruments is addressed in the Note to the Working Group after recommendation 3(f) in A/CN.9/WG.VI/WP.26). The Working Group may wish to note that the commentary will explain that: (i) recommendation 148 applies to the enforcement of a security right in a negotiable instrument (A/CN.9/WG.VI/WP.24); and (ii) the recommendations on the impact of insolvency on the law applicable, as well as the other general recommendations in the conflict-of-laws chapter (A/CN.9/WG.VI/WP.24), apply to security rights in negotiable instruments.]

Security rights in negotiable documents: definitions and recommendations

ADDENDUM

CONTENTS

	<i>Page</i>
Security rights in negotiable documents	
I. Definitions	
II. Recommendations	

Security rights in negotiable documents

I. Definitions (A/CN.9/WG.VI/WP.22/Add.1, para. 21 (i) and (x))

(i) “Tangibles” means all forms of corporeal movable property. Among the categories of tangibles are inventory, equipment, fixtures, negotiable instruments and negotiable documents.

(x) “Negotiable document” means a document that embodies a right for delivery of tangibles, such as a warehouse receipt or a bill of lading, which satisfies the requirements for negotiability under the law governing negotiable documents.

(pp) “Possession” means the actual possession of tangibles by the secured creditor, or an agent, employee or other person holding on behalf of the secured creditor, or an independent person who acknowledges that it holds for the secured creditor. It does not include constructive, fictive or symbolic possession.

II. Recommendations

Parties, security rights, secured obligations and assets covered (A/CN.9/WG.VI/WP.21, rec. 3 (d))

3. In particular, the law should provide that it applies to:

(d) All types of movable assets and fixtures, tangible or intangible, present or future, not specifically excluded in the law, including inventory, equipment and other goods, receivables, negotiable instruments (such as cheques, bills of exchange and promissory notes), negotiable documents (such as bills of lading),] rights to payment of funds credited to bank accounts, rights to drawing proceeds from an independent undertakings, and intellectual property rights;

Creation of a security right in a negotiable document (see A/CN.9/WG.VI/WP.21, rec. 28)

[Note to the Working Group: The Working Group may wish to note that, pursuant to

recommendation 8 (see A/CN.9/WG.VI/WP.21), a security right in a negotiable document may be created by a written and possibly signed agreement between the grantor and the secured creditor or even by an oral agreement and delivery of possession of the document to the secured creditor. The Working Group may wish to consider whether this rule should be stated explicitly in a recommendation.]

28. The law should provide that the creation of a security right in a negotiable document also gives rise to a security right in the goods represented by the document, provided that the issuer is in possession of the goods at the time the security right in the document is created.

[Note to the Working Group: The Working Group may wish to note that the commentary will clarify that recommendation 28 is intended to negate that a separate security right needs to be created in the goods.]

Rights and obligations of the issuer of a negotiable document

[Note to the Working Group: The Working Group may wish to consider whether language along the following lines should be included here to address the rights and obligations of the issuer of a negotiable document:

“The law should provide that as between the secured creditor and the issuer or other person obligated on the negotiable document, the rights and obligations of those persons are determined by the law governing negotiable documents.” This text is drawn from recommendation 109 (see rec. 109 below).]

Third-party effectiveness of a security right in a negotiable document (see A/CN.9/WG.VI/WP.24/Add.3, rec. 39)

44. The law should provide that, if a security right in a negotiable document is effective against third parties, the corresponding security right in the goods covered by the document is also effective against third parties. The law should also provide that, as long as a negotiable document covers goods, a security right in the goods may be made effective against third parties [only] by dispossession of the grantor with respect to the document [or with respect to the goods].

[Note to the Working Group: The Working Group may wish to recall that the language in square brackets indicates a difference of opinion in the Working Group as to whether allowing alternative methods of achieving third-party effectiveness of a security right in goods covered by a negotiable document undermines the negotiability of the document or the matter can be addressed by giving priority to a right in goods made effective against third parties by dispossession of the grantor with respect to the document (see A/CN.9/593, para. 21); see also A/CN.9/WG.VI/WP.26/Add.3, rec. 80.]

[44 bis. The law should provide that a security right in a negotiable document that is effective against third parties remains effective against third parties for a short period of [to be specified] days after the negotiable document has been relinquished to the grantor for the purpose of ultimate sale or exchange, loading or unloading, or otherwise dealing with the goods covered by the negotiable document.]

Priority of security rights in negotiable documents (A/CN.9/WG.VI/WP.24/Add.4, recs. 80 and 81)

80. The law should provide that, while goods are in the possession of the issuer of a negotiable document with respect to them, a security right in those goods that became

effective against third parties as a result of the security right in the negotiable document becoming effective against third parties has priority over another security right in the goods that was made effective against third parties by a different method while the goods were covered by the document.

81. The law should provide that a security right in a negotiable document and the goods covered thereby is subject to the rights under the law governing negotiable documents of a person to whom the negotiable document has been duly negotiated.

[Note to the Working Group: The Working Group may wish to note that the commentary will clarify that the general priority recommendations apply to security rights in negotiable documents, while recommendations 80 and 81 deal with additional priority conflicts.]

**Enforcement of a security right in a negotiable document
(A/CN.9/WG.VI/WP.24/Add.1, rec. 109)**

109. The law should provide that after default or before default with the agreement of the issuer of the negotiable document the secured creditor has the right to enforce a negotiable document against the issuer or any other person obligated on the negotiable document. However, as between the secured creditor and the issuer or other person obligated on the negotiable document, the rights and obligations of those persons are determined by the law governing negotiable documents.

[Note to the Working Group: The Working Group may wish to note that the commentary will include the example that the issuer may be obligated to deliver the goods only to a holder of the negotiable document with respect to them. The commentary will also explain that the general recommendations on enforcement of security rights apply here as well, while recommendation 109 deals with a special issue.]

Law applicable to security rights in tangibles (A/CN.9/WG.VI/WP.24, rec. 136)

160. The law should provide that, except as otherwise provided in recommendations 140 and 142, the creation, the effectiveness against third parties and the priority over the rights of competing claimants of a security right in tangible property are governed by the law of the State in which the encumbered asset is located. However, with respect to security rights in tangible property of a type ordinarily used in more than one State, the law should provide that such issues are governed by the law of the State in which the grantor is located. [With respect to security rights in the type of tangible property mentioned in the preceding sentence that is subject to a title registration system, the law should provide that such issues are governed by the law of the State under the authority of which the registry is maintained.]

[Note to the Working Group: The commentary will explain that “tangible property of a type ordinarily used in more than one State” refers to mobile goods, such as motor vehicles.]

Law applicable to third-party effectiveness of security rights in specified types of asset by registration (A/CN.9/WG.VI/WP.24, rec. 140)

140. If the State in which the grantor is located recognizes registration as a method of achieving effectiveness against third parties of a security right in negotiable instruments, negotiable documents and rights to payment of funds credited to bank accounts, the law of that State determines whether the effectiveness against third parties of a security right in

such encumbered assets has been achieved by registration under the laws of that State.

Law applicable to rights and obligations of the grantor and the secured creditor (A/CN.9/WG.VI/WP.24, rec. 146)

146. The law should provide that the mutual rights and obligations of the grantor and the secured creditor with respect to the security right, whether arising from the security agreement or by law, are governed by the law chosen by them and, in the absence of a choice of law, by the law governing the security agreement.

Law applicable to the rights and obligations of the account debtor and the assignee, the obligor under a negotiable instrument or the issuer of a negotiable document and the secured creditor (A/CN.9/WG.VI/WP.24, rec. 147)

147. The law should provide that the following matters are governed by the law of the State whose law governs an assigned receivable, or a negotiable instrument or a negotiable document in which a security right has been created:

(a) The relationship between an account debtor and an assignee of the receivable, between an obligor under a negotiable instrument and a creditor with a security right in that instrument or between an issuer of a negotiable document and a creditor with a security right in that document;

(b) The conditions under which the assignment of the receivable, the transfer of the negotiable instrument or the transfer of the negotiable document can be invoked against the account debtor, the obligor on the negotiable instrument or the issuer of the negotiable document; and

(c) The determination of whether the obligations of the account debtor, the obligor on the negotiable instrument or the issuer of the negotiable document have been discharged.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that: (i) recommendation 148 applies to the enforcement of a security right in a negotiable document (A/CN.9/WG.VI/WP.24); and (ii) the recommendations on the impact of insolvency on the law applicable, as well as the other general recommendations in the conflict-of-laws chapter (A/CN.9/WG.VI/WP.24), apply to security rights in negotiable documents.]

III. Security rights in masses or products	
A. Definitions.	
B. Recommendations	

I. Security rights in proceeds

A. Definitions (A/CN.9/WG.VI/WP.22/Add.1, paragraph 21 (ee))

(ee) “Proceeds” means whatever is received in respect of encumbered assets. [For example, proceeds include what is received as a result of sale, or other disposition or collection, lease, licence, proceeds of proceeds, civil and natural fruits, dividends, distributions, insurance proceeds and claims arising from defects, damage or loss.]

[Note to the Working Group: The Working Group may wish to note that assets that are excluded from the scope of the draft Guide as original encumbered assets may be affected by the draft Guide if they are identifiable proceeds of assets that are within the scope of the draft Guide (e.g. securities that are proceeds of bank accounts or proceeds of independent undertakings). However, rights of parties under other law applicable to assets outside the scope of the draft Guide as original encumbered assets are not to be affected (see Note after recommendation 3 (d) in A/CN.9/WG.VI/WP.26/Add.7). The Working Group may wish to note that the definition of proceeds or recommendation 29 may need to be adjusted if recommendation 30 is retained.]

B. Recommendations

Creation of a security right in proceeds (see A/CN.9/WG.VI/WP.21, recommendations 29 and 30)

29. The law should provide that, unless otherwise agreed by the parties to the security agreement, the security right in the encumbered assets extends to the proceeds to the extent that the proceeds are identifiable in accordance with recommendations 29 bis.

29 bis. The law should provide that, when the proceeds are money, receivables or rights to payment of funds credited to a bank account that have been commingled with other property so that the proceeds are not identifiable, the [amount] [value] of proceeds immediately before they were commingled with the other property is to be treated as identifiable proceeds, provided that, at any time after the proceeds were commingled with the other property, the total [amount] [value] of the commingled property was more than the [amount] [value] of the proceeds. If, at any time after the proceeds were commingled with the other property, the total [amount] [value] of the commingled property was less than the [amount] [value] of the proceeds, the total [amount] [value] of the commingled property at the time that the [amount] [value] of the commingled property was lowest, plus the [amount] [value] of any proceeds later commingled with the commingled property, is to be treated as identifiable proceeds.]

[Note to the Working Group: The Working Group may wish to consider whether a recommendation should be prepared for identifying proceeds ("tracing") other than money and the like. The Working Group may also wish to note that the commentary will explain how proceeds that are money, receivables or rights to payment of funds credited to a bank account may be commingled with other property so that the proceeds cannot be separately identified.]

30. [The law should provide that, notwithstanding recommendation 29, the security right extends to civil and natural fruits of encumbered assets, such as [...], only if the parties so provide in the security agreement.]

[Note to the Working Group: The Working Group may wish to note that recommendation 30 introduces a different approach as to civil and natural fruits of encumbered assets from the approach taken in recommendation 29 with respect to other types of proceeds. However, the notion of "proceeds", as defined in the terminology section, includes civil and natural fruits, and the natural expectation may be that the security right will extend automatically to civil and natural fruits. Thus, the Working Group may wish to consider deleting recommendation 30.]

Third party effectiveness of a security right in proceeds (see A/CN.9/WG.VI/WP.24/Add.3, recommendation 44)

41.

Alternative A

The law should provide that, if a security right in an encumbered asset is effective against third parties, a security right in any proceeds of the encumbered asset is effective against third parties when the proceeds arise, provided that: (a) The security right in the encumbered asset was made effective against third parties by registration of a notice in the general security rights registry, registration in a specialized registry or notation on a title certificate and remains effective at that time; or

[Note to the Working Group: The Working Group may wish to note that paragraph (a) would not apply, for example, to a security right which was made effective against third parties by possession. The residual rule in recommendation 41 bis would apply to such a right.]

(b) The proceeds take the form of money, receivables, negotiable instruments or rights to payment of funds credited to a bank account.

41 bis. If recommendation 41 does not apply, the security right in the proceeds is effective against third parties for [...] days after the proceeds arise and continuously thereafter, if it was made effective against third parties by one of the methods referred to in recommendations 35 or 36 before the expiry of that time period.

Alternative B

The law should provide that, if a security right in an encumbered asset is effective against third parties, a security right in any proceeds of the encumbered asset is effective against third parties when the proceeds arise, provided that the proceeds take the form of money, receivables, negotiable instruments or rights to payment of funds credited to a bank account.

41 bis. If recommendation 41 does not apply, the security right in the proceeds is effective against third parties for [...] days after the proceeds arise and continuously thereafter, if it was made effective against third parties by one of the methods referred to in recommendations 35 or 36 before the expiry of that time period.

[Note to the Working Group: The Working Group may wish to note that, in view of the difference of opinion in the Working Group as to whether the right in proceeds should be automatically effective or whether a separate act of third-party effectiveness should take place when the proceeds arose (see A/CN.9/593, paras. 26-32), recommendation 41 includes two alternatives.

Under alternative A, a security right in proceeds is automatically effective against third parties, if the security right in the originally encumbered assets was made effective against third parties by registration or if the security right was in money and the like. If the security right was made effective against third parties by possession, according to recommendation 41 bis, the security right in the proceeds would be effective for a short period of time and thereafter only subject to a separate act of third-party effectiveness.

Under alternative B, automatic third-party effectiveness would be limited to proceeds in the form of money and the like, while recommendation 41 bis would apply to all other cases. As a result of this approach, a security right in proceeds would remain effective against third parties for a few days after the proceeds arose and thereafter only if a notice was registered with respect to the security right in the proceeds or by dispossession of the grantor. The commentary will clarify that civil fruits are covered by receivables, while natural fruits are automatically covered as they are defined as proceeds.

The Working Group may also wish to consider that, to balance the needs to protect a secured creditor and third parties, the time period referred to in recommendation 41 bis should be as short as the grace period in the third-party effectiveness recommendation applicable to acquisition security rights (i.e. 20-30 days, see A/CN.9/WG.VI/WP.24/Add.5, rec. 127).]

Priority of a security right in proceeds (see A/CN.9/WG.VI/WP.24/Add.4, recommendation 66)

67. Except as provided in the recommendations of this chapter [and the chapter on acquisition financing devices], the law should provide that a security right in the proceeds of an encumbered asset that is effective against third parties has the same priority as the security right in the encumbered asset.

[Note to the Working Group: The Working Group may wish to note that the text in square brackets may be necessary if the Working Group decides that the super-priority of an acquisition security right should not extend to proceeds in the form of receivables (see A/CN.9/WG.VI/WP.24/Add.5, rec. 133, text in square brackets).]

Enforcement of a security right in proceeds (see A/CN.9/WG.VI/ WP.21/Add.2, recommendation 106)

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that the general enforcement recommendations apply to proceeds.]

Law applicable to security rights in proceeds (see A/CN.9/WG.VI/WP. 21/Add.5, recommendation 136)

161. The law should provide that:

(a) The creation of a security right in proceeds is governed by the law [of the State whose law governs] [governing] the creation of the security right in the original encumbered asset from which the proceeds arose; and

(b) The effectiveness against third parties and the priority over the rights of competing claimants of a security right in proceeds are governed by the same law as the law [of the State whose law governs] [governing] the effectiveness against third parties and the priority over the rights of competing claimants of a security right in original encumbered assets of the same kind as the proceeds.

II. Security rights in attachments

A. Definitions (A/CN.9/WG.VI/WP.22/Add.1, paragraph 21 (l))

(l) “Attachments to immovable property” means tangibles that are so physically attached to immovable property as to be treated as immovable property without however losing their separate identity as movables under the law of the State where the immovable property is located.

[Note to the Working Group: The Working Group may wish to note that the commentary will set forth examples of attachments to immovable (e.g. air conditioner or furnace but not bricks or cement).]

“Attachments to movable property” means tangibles that are so physically attached to other movable property [as to be treated as part of that movable property], without however losing their separate identity under law other than this law.

[Note to the Working Group: The Working Group may wish to note that the commentary will set forth examples of attachments to movable property (e.g. tires, aircraft engines).]

B. Recommendations

Creation of a security right in attachments (see A/CN.9/WG.VI/WP.21, recommendation 31)

31. The law should provide that a security right may be created in tangibles that are attachments at the time of creation of the security right or continue in tangibles that become attachments subsequently. Security rights in attachments to immovable property may be created under this law or law on immovable property.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that, if the security right in attachments to immovable property is created under the law of immovable property, the security right may be at the same time effective against third parties. The commentary will also explain that, if such a security right is created under the secured transactions law, rights of persons that have rights under immovable property law may not be affected. For example, a security right created under secured transactions law may be enforced only if there are no competing rights created under immovable property law or the former security right has priority over competing rights acquired under immovable property law (see recommendation 83).]

Third party effectiveness of a security right in attachments (see A/CN.9/WG.VI/WP.24/Add.3, recommendations 45 and 46)

45. The law should provide that a security right in a tangible that is an attachment at the time it is made effective against third parties or becomes an attachment only subsequently may be made effective against third parties by registration of a notice in the general security rights registry. The law should also provide that, if a security right in a tangible is effective against third parties at the time when the tangible becomes an attachment, the security right remains effective against third parties thereafter.

46. A security right in an attachment to immovable property may also be made effective against third parties by registration in the immovable property registry.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that recommendation 46 is designed to protect the integrity and reliability of the immovable property registry. This recommendation is supplemented by recommendation 83 in A/CN.9/WG.VI/WP.24/Add.4, under which a security right in tangibles that are or are to become attachments to immovable property, which became effective against third parties by registration of a notice in the immovable property registry under recommendation 45 has priority over a security right in the related immovable that was registered subsequently.

The commentary will also explain that, if a security right in an attachment to immovable property is made effective against third parties under this recommendation, what is registered is, in principle, a matter of immovable property law. However, the attention of the legislator may have to be drawn to the need to amend immovable property law so as to permit registration of a notice about a security right rather than only notarial documents. One difficulty in third parties finding that notice is that registration in the immovable property registry is made against the asset and not the grantor.

The commentary will further explain that the security right will be in the immovable property as a whole but the notice should describe the attachment and priority should be limited to the value of the attachment, if it were detached. The question whether the attachment could be detached and how the secured creditor would be paid would also need to be addressed as a matter of enforcement (see recommendation in enforcement

below). The Working Group may wish to consider whether a creditor with a right acquired under immovable property law should have a right to pay off the debt owed to the secured creditor with a security right acquired under movable property law. This matter may be left to inter-creditor agreements.]

Third-party effectiveness of a security or other right in attachments to movables subject to a specialized registration system or title certificate system

46 bis. A security right or any other right (such as the right of a buyer or lessor) in an attachment to movable property that is subject to registration in a specialized registry or a title notation system may also be made effective against third parties by such registration or notation.

Priority of a security or other right in attachments to immovable (see A/CN.9/WG.VI/WP.24/Add.4, recommendations 82 and 83)

82. The law should provide that a security right or any other right (such as the right of a buyer or lessor) in attachments to immovable property that has been created and made effective against third parties under immovable property law has priority over a secured creditor with a security right in those attachments that has been made effective against third parties by one of the methods referred to in recommendations 35 or 36.

83. A security right in tangibles that are attachments to immovable property at the time the security right is made effective against third parties or that become attachments to immovable property subsequently, which was made effective against third parties by registration in the immovable property registry under recommendation 46 has priority over a security right or any other right (such as the right of a buyer or lessor) in the related immovable that was registered subsequently.

[Note to the Working Group: The Working Group may wish to consider recommendation 83 together with the relevant recommendation in the chapter on acquisition financing devices (see A/CN.9/WG.VI/WP.24/Add.5, recommendation 130 ter. The commentary will explain that the words “any other right” refers to any right registrable in the immovable property law.]

Priority of a security or other right in attachments to movable property subject to a specialized registration system or title certificate system (see A/CN.9/WG.VI/WP.24/Add.4, recommendations 84 and 85(a))

84. The law should provide that a security right or any other right (such as the right of a buyer or lessor) in attachments to movable property that has been created and made effective against third parties under other law by registration in a specialized registry or by notation on a title certificate has priority over a security right or any other right in those attachments that has been made effective against third parties by one of the methods referred to in recommendations 35 or 36.

84 bis. A security right or any other right in tangibles that are attachments to movable property at the time the security right is made effective against third parties or that are to become attachments to movable property subsequently, which was made effective against third parties by registration in a specialized registry or by notation on a title certificate under recommendation 46 bis has priority over a security right or any other right in the related movable property that was registered subsequently.

[Note to the Working Group: The Working Group may wish to note that recommendations 84 and 84 bis track the language of recommendations 82 and 83. The only difference is that recommendations 84 and 84 bis deal with assets that are within the scope of the draft Guide (e.g. automobile engines).]

Enforcement of a security right in attachments (see A/CN.9/WG.VI/WP.24/Add.1)

[Note to the Working Group: The Working Group may wish to consider that the general recommendations apply to the enforcement of a security right in attachments to movable property. As to the enforcement of security rights in attachments to immovable property, the Working Group may wish to consider an additional recommendation along the following lines:

“The law should provide that the secured creditor with a right in an attachment to immovable property (e.g. an elevator) that has priority can enforce its right in the attachment (not in the immovable property). A creditor with a security right in the immovable is entitled to pay off the debt of the creditor with a security right in the attachment (as a general rule, junior creditors should have this right). The creditor with a security right in the attachment has to pay damages for any damage caused by the act of removal of the attachment from the immovable (not the diminution value). If the creditor with a security right in the attachment does not have priority, it cannot enforce-detach (although this may be an issue of valuation that arises generally in the case of enforcement by the junior creditor with a right in part of an asset). If the creditor with a security right in the attachment has an acquisition security right, it has the super-priority provided under recommendation 130, except as against a construction lender who is financing all construction (this rule is part of construction law, see A/CN.9/WG.VI/WP.24/Add.5, rec. 130 ter).”]

Law applicable to security rights in attachments (see A/CN.9/WG.VI/WP.21/Add.5)

[Note to the Working Group: The Working Group may wish to consider that recommendation 136 is sufficient with respect to the law applicable to the creation, third-party effectiveness and priority of a security right in an attachment to movable property, while recommendation 148 is sufficient for the enforcement of a security right in an attachment to movable property. As to the law applicable to the enforcement of a security right in an attachment to immovable property, the Working Group may wish to include an additional recommendation along the following lines: “The enforcement of a security right in an attachment to immovable property is governed by the law of the State where the immovable property is located.”]

III. Security rights in masses or products

A. Definitions (A/CN.9/WG.VI/WP.22/Add.1, paragraph 21 (l))

(l) “Mass or product” means tangibles other than money that are so physically associated or united with each other that they lose their separate identity under law other than this law.

[Note to the Working Group: The Working Group may wish to note that the commentary will give examples of masses or products (e.g. product: cake produced from sugar, eggs, flower and water. Mass: grain in a silo or oil in a tank).]

B. Recommendations

Creation of a security right in a mass or product (see A/CN.9/WG.VI/WP.21, recommendation 32)

[Note to the Working Group: The Working Group may wish to note that the commentary will clarify that a security right may not be created in tangibles that are part of a mass or product as, at the time of creation of the security right, they do not exist as separate tangibles.]

32. The law should also provide that a security right in tangibles that become part of a mass or product after the creation of a security right, continues in the mass or product. [The security right is limited to the value of the tangibles immediately before they became part of the mass or product.]

[Note to the Working Group: The Working Group may wish to note that the second sentence is within square brackets as the valuation issue may be an issue of priority rather than creation. Under this approach, if the value of the flour is 5 and the value of the sugar is 5, while the value of the cake is 20 and there are two secured creditors, each secured creditor will get 5, while the remaining value of 10 will be preserved for the grantor and its unsecured creditors. If the value of the cake is lower than the value of the ingredients, the secured creditors will share the loss proportionately (e.g. if the value of the cake is 8, each secured creditor will get 4). This means that: (i) the security right is still a security right in the separate tangible and the secured creditor cannot get more than owed, (ii) if the value of the mass or product is less, the secured creditor will suffer a proportionate diminution (this is a priority issue), and (iii) the dates of creation do not affect priority.]

Third party effectiveness of a security right in a mass or product (see A/CN.9/WG.VI/WP.24/Add.3, recommendation 47)

47. The law should provide that, if a security right in a tangible is effective against third parties at the time when it becomes part of a mass or product, the security right in the mass or product created as provided in recommendation 32 is effective against third parties thereafter [without the need for any further act] [for [...] days after the mass or product is created, and continuously thereafter if it was made effective against third parties by one of the methods referred to in recommendations 35 or 36 before the expiry of that time period.]

Priority of a security right in a mass or product (see A/CN.9/WG.VI/WP.24/Add.4, recommendation 85)

[Note to the Working Group: The Working Group may wish to note that priority contests between creditors with security rights in property that becomes part of a mass or product and unsecured creditors require no special treatment since the regular priority rules apply once it is determined that the security right continues into the mass or product. There are, however, three types of potential priority contests between creditors each of whom has a security right with respect to the resulting mass or product: (i) contests between security rights taken in the same tangibles that ultimately become part of a mass or product (e.g. sugar and sugar), (ii) contests involving security rights in different tangibles that ultimately become part of a mass or product (e.g. sugar and flower) and (iii) contests involving a security right originally taken in the separate tangibles and a security right in the mass or product (e.g. sugar and cake). In order to deal with all these situations recommendation 85 has been reformulated in three parts. It should be noted

that, as a general matter, priority contests arise only when there is not enough value to satisfy all claims.]

85. The law should provide that a security right in the same separate tangibles that continues in a mass or product as provided in recommendation 32 and that is effective against third parties as provided in recommendation 47 has the same priority in relation to other security rights granted in the separate tangibles immediately before the tangibles became part of the product or mass. A secured creditor may not receive an amount greater than the obligation secured by its security right.

[Note to the Working Group: The Working Group may wish to note that the effect of the first sentence of this recommendation is to treat all security rights in tangibles that becomes commingled as having the same priority vis-à-vis each other as they had in the separate property. The rationale for this suggested rule is that the incorporation of goods into a mass or product should have no bearing on the respective rights of creditors with competing security rights in the separate goods. The Working Group may wish to note that the rule is framed to respect both the general priority rules and to cover the super-priority afforded to creditors who may claim “acquisition security rights”. The second sentence essentially repeats the rule stated (in somehow different formulation) in the second sentence of recommendation 32. The Working Group may wish to consider which formulation is preferable and whether the rule should be stated in both the creation and the priority recommendations.]

85 bis. The law should provide that, if (i) more than one security right in separate tangibles continues in the same mass or product as provided in recommendation 32 and each security right is effective against third parties as provided in recommendation 47, and (ii) the obligations secured by such security rights cannot all be satisfied from those security rights, the secured creditors are entitled to share in the value of their security rights in the mass or product according to the ratio of the value of the separate tangibles immediately before they became part of the mass or product. A secured creditor may not receive an amount greater than the obligation secured by its security right. If there is only one other security right, the secured creditor with respect to that other security right is entitled to the remainder of the value of its security right in the mass or product. If there is more than one other security right, the secured creditors with respect to those other security rights are entitled to share in the remainder of the value of their security rights in the mass or product in the ratio described above.

[Note to the Working Group: The Working Group may wish to note that, according to recommendation 85 bis, if the value of the sugar is 2 and the flower 5, while the value of the cake is 6 and the amount of the secured obligation 7, the creditors will receive 2/7 and 5/7 of 6. In any case, if the value of the mass or product is less than the amount of the secured obligations, there will be no value left for unsecured creditors.]

85 ter. The law should provide that a security right in separate tangibles that continues in a mass or product as provided in recommendation 32 and that is effective against third parties as provided in recommendation 47 has priority over a security right granted by the same debtor in the mass or product, if it is an acquisition security right. A secured creditor may not receive an amount greater than the obligation secured by its security right.

[Note to the Working Group: The Working Group may wish to note that the effect of the first sentence of this recommendation is to apply the general priority rules. Security rights in initial property have priority over all security rights in the mass or product that have been taken so as to cover future property, only if the former are acquisition security rights.]

Enforcement of a security right in a mass or product

[Note by the Working Group: The Working Group may wish to consider that the general enforcement rules should apply to the enforcement of a security right in assets that become part of a mass or product. For example, if the encumbered assets are oil of value 5 in a tank with oil worth 100, the secured creditor should be able to enforce its right only in oil of value 5. If the encumbered asset can be separated the secured creditor should be able to dispose of that part only in a commercially reasonable manner. If the encumbered asset cannot be easily separated, the whole mass or product may have to be sold.]

Law applicable to a security rights in a mass or product

[Note to the Working Group: The Working Group may wish to consider whether the law governing security rights in tangibles that become part of a mass or product should be the general rule applicable with respect to security rights in tangibles (i.e. rec. 136) or the rule applicable to security rights in proceeds (i.e. rec. 141). If rec. 136 applied and the sugar component was in country X, while the cake was in country Y, the law applicable would be the law of country Y (subject to the exceptions for mobile goods and export goods). If rec. 141 applied, the law of country Y would govern creation of the security right, while the law of country X would govern third-party effectiveness and priority. The difference between these two approaches is only about the law governing creation (i.e., law of country X or Y).]

Movables by anticipation and crops

[Note to the Working Group: The draft Guide provides that it is possible to take a security right in attachments either under the draft Guide or under applicable law governing security in immovable property. Similar issues arise in respect of (i) crops, whether renewable (e.g. as apples), annual (e.g. grain crops) or harvested (e.g. timber), (ii) products extracted from the ground (e.g. minerals, hydrocarbons, water, sand, gravel, sod), and (iii) materials that were returned to the status of movables as a result of their removal from a building being demolished or otherwise.

It is always possible to take a security right in each of these assets as future property, with creation of the security right occurring only once the property becomes movable. In such cases, there can never be a priority contest between a security right in the immovable created under other law and a security right in the movable created under the draft Guide, since the security right in the immovable will terminate as soon as the asset becomes mobilized.

Nonetheless it is possible to imagine a regime, like that applicable to attachments, that permits the creation of a security right in movables, which is immediately effective, even while the property remains an immovable. Such a regime would have the advantage of permitting, for example, separate crop financing or financing of extractive industries separate from the financing of the farm or the mining operation.

If the Working Group decides that the draft Guide should include such a regime, additional recommendations should be prepared to address: (i) priority contests between security rights taken in immovable property acquired under other law and security rights in movable property acquired under the draft Guide, (ii) the conditions under which creditors with security rights under the draft Guide may enforce them and the enforcement rights they may exercise, and (iii) the steps that must be taken by the creditor of a security right under the draft Guide in order to make the security right effective as against a creditor with a security right in the immovable property.]

V. Effectiveness of the security right against third parties and registration

Part I. Effectiveness of the security right against third parties

Purpose

The purpose of the provisions of the law on the effectiveness of a security right against third parties is to create a foundation for the predictable, fair and efficient ordering of priorities by:

(a) Requiring registration as a pre-condition to the effectiveness of a security right against third parties, except where exceptions and alternatives to registration are appropriate in the light of countervailing commercial policy considerations; and

(b) Establishing the legal framework to support a simple, cost-efficient and effective public registry system for the registration of notices with respect to security rights.

[Meaning of third-party effectiveness]

34 bis. The law should provide that a security right is effective against third parties if it has been effectively created as provided in recommendation 7 and made effective against third parties as provided in recommendation 35 or 36.]

[Note to the Working Group: The Working Group may wish to note that the meaning of third-party effectiveness is addressed in recommendation 35 (see text in square brackets). However, because of its importance for both the third-party effectiveness and the priority chapter and the fact that these notions will be new to many legal systems, the Working Group may wish to address this matter in a separate recommendation at the beginning of this chapter. If the Working Group decides to retain recommendation 34 bis, which appears within square brackets, the bracketed text in recommendation 35 may be deleted. Recommendation 34 bis is supplemented by recommendations 34 ter to 34 quinquies, which further clarify the meaning of third-party effectiveness.]

Effectiveness of a security right that is not effective against third parties

34 ter. The law should provide that a security right that has been created under recommendation 7 is effective against the grantor even if it is not effective against third parties.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that a security right that is not effective against third parties has no effects as against general creditors or secured creditors whose security rights are not effective against third parties. This approach is consistent with the meaning of third-party effectiveness adopted in the draft Guide. The practical result of this approach is that no issue of priority arises in the case of security rights that are not effective against third parties and, therefore, such rights would be equal between them and with the rights of general creditors (unless they become judgement creditors, see A/CN.9/WG.VI/WP.26/Add.6, rec. 71).]

Effectiveness of a security right that is effective against third parties after a transfer of the encumbered asset

34 quater. The law should provide that, except as provided in recommendations 68 bis, 69 and 69 bis [see A/CN.9/WG.VI/WP.26/Add.6], a security right in an asset continues after transfer of the asset. If the security right was made effective against third parties before the transfer, it does not cease to be effective against third parties solely as a result of the transfer.

[Note to the Working Group: The Working Group may wish to note that the rule stated in rec. 34 quater (droit de suite) is re-stated somewhat differently in rec. 68 (see A/CN.9/WG.VI/WP.26/Add.6). The Working Group may wish to consider whether this rule should be stated in this chapter or in the chapter on priority. The Working Group may also wish to note that the commentary will explain that the second sentence is intended to ensure that the mere transfer does not make a security right ineffective against third parties, unless, for example, the transfer results in a change of location of the asset and the loss of third-party effectiveness due to the application of another law (although, under recommendation 145, third-party effectiveness is preserved for a certain period of time after the change of location) or the secured creditor does not amend its notice to reflect the name of the transferee as a new debtor.]

General method for achieving third-party effectiveness of security rights

35. The law should provide that, except as otherwise provided in the recommendations of this chapter and the chapter on acquisition financing devices, a security right [, created in accordance with the recommendations in the chapter on creation,] is effective against third parties only if a notice with respect to the security right is registered in a general security rights registry, as provided in recommendations 47 ter to 60. Registration of such a notice does not create a security right.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that registration of a notice of a security right is a pre-condition for it to become effective against third parties but does not create the security right. Creation requires an off-registry agreement between the parties as provided in the recommendations of the chapter on creation.]

Alternatives to registration

36. As an alternative to registration, the law should provide that a security right in the following types of asset may be made effective against third parties as follows:

(a) In tangibles, by dispossessing the grantor of the encumbered asset, as provided in recommendations 39 and 44;

(b) [In consumer goods of a value less than [specify value] at the time of creation of the security right, automatically upon creation of a non-acquisition security right (for acquisition security rights in consumer goods, see A/CN.9/WG.VI/WP.24/Add.5, rec. 128) that is not subject to a specialized registration or to a title certificate system, as provided in recommendation 39 bis];

(c) In movable property with respect to which a security right may, by other law, be made effective against third parties by registration in a specialized registry or by notation on a title certificate, by such registration or notation, as provided in recommendation 40;

(d) In proceeds, (i) automatically when the proceeds arise by achieving third-party effectiveness with respect to the original encumbered assets by registration before the proceeds arise[, but only if the proceeds are money, receivables negotiable instruments or rights to the payment of funds credited to a bank account], or (ii) by achieving third-party effectiveness with respect to the proceeds within a specified period after the proceeds arise, as provided in recommendations 41 and 41 bis;

(e) In a personal or property right securing payment or other performance of a receivable, negotiable instrument or other obligation, by achieving third-party effectiveness with respect to the receivable, negotiable instrument or other obligation, as provided in recommendation 41 ter;

(f) In a right to payment of funds credited to a bank account, by control, as provided in recommendation 43;

(g) In tangibles that are attachments at the time third-party effectiveness is achieved or that become attachments only subsequently, by registration with respect to the tangible as provided in recommendations 45, 46 and 46 bis; and

(h) In a mass or product by achieving third-party effectiveness [in a tangible before it becomes part of a mass or product] [in the mass or product within a certain time period after the asset becomes part of the mass or product], as provided in recommendation 47.

Concurrent methods

37. The law should confirm that different methods for achieving third-party effectiveness may be used for different items or kinds of encumbered assets, whether they are encumbered by the same security agreement or not.

Exclusive method

38. The law should provide that, except as provided in recommendation 36 (e), a security right in a right to drawing proceeds from an independent undertaking is made effective against third parties only by control, as provided in recommendation 42.

Continuity in third-party effectiveness

38 bis The law should provide that third-party effectiveness of a security right is continuous notwithstanding a change in the method by which it is made effective against third parties, provided that there is no time when the security right is not effective against third parties.

[Note to the Working Group: The Working Group may wish to note that recommendation 38 bis makes no separate reference to registration (i.e. advance registration before creation), as, if there is a change in the method of third-party effectiveness before registration lapses, the security will have been created and thus made effective against third parties.]

Lapse in registration or third-party effectiveness

38 ter. The law should provide that, if a security right has been registered as provided in recommendations 35 and 54 or made effective against third parties as provided in recommendations 35 and 36 and subsequently there is a period at which the security right is neither registered nor effective against third parties, registration or third-party effectiveness may be re-established. In such a case, registration or third-party effectiveness dates from the earliest time thereafter at which the security right is either registered or made effective against third parties.

[Note to the Working Group: The Working Group may wish to note that recommendations 38 bis and 38 ter track the language of recommendations 66 and 66 bis (see A/CN.9/WG.VI/WP.26/Add.6), under which priority dates from the time when third-party effectiveness is re-established or a notice with respect to the security right is registered. The Working Group may wish to consider whether the first sentence of recommendation 38 ter should be retained in this chapter as it deals with the lapse of registration or third-party effectiveness and the second sentence should be reflected only in the chapter on priority as it essentially deals with priority.]

The Working Group may also wish to note that the commentary will explain that third-party effectiveness may lapse where, for example, the secured creditor does not renew its registration before expiry of its initial term or where third-party effectiveness was obtained by delivery of possession of the encumbered assets to the secured creditor but the secured creditor later returns possession to the grantor. The commentary will also explain that third-party effectiveness does not lapse in such cases if the security right is registered or made effective against third parties before the lapse of the particular method of third-party effectiveness.

The commentary will include the following examples of situations where continuity in third-party effectiveness is preserved notwithstanding lapse in a particular method of third-party effectiveness.

On day 1, the grantor creates a security right in favour of the secured creditor who on the same day takes possession of the encumbered assets. On day 2, the secured creditor registers a notice about its security right and then relinquishes possession. Third-party effectiveness is continuous from day 1.

On day 1, the grantor creates a security right in favour of the secured creditor on day 1 who, on the same day, registers a notice of its security right. On day 2, the secured creditor, takes possession of the encumbered assets while registration lapses on day 3. Third-party effectiveness is continuous from day 1. The result is the same if the secured

creditor registers again on day 4 and surrenders possession of the encumbered assets to the grantor on day 5.]

Third-party effectiveness of a security right in tangibles

39. The law should provide that a security right in tangibles may also be made effective against third parties through dispossession of the grantor.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that, as the term “tangibles” covers negotiable instruments and negotiable documents (see A/CN.9/WG.VI/WP.22/Add.1, para. 21 (i)), recommendation 39 applies to third-party effectiveness of security rights in negotiable instruments and negotiable documents. As a result, a security right in a negotiable instrument or in a negotiable document is made effective against third parties by registration or dispossession of the grantor. Recommendation 44 adds special rules with respect to third-party effectiveness of security rights in negotiable documents and goods covered by negotiable documents. The Working Group may also wish to note that “dispossession” will be defined to mean real objective dispossession.]

[Third-party effectiveness of a non-acquisition security right in low-value consumer goods]

39 bis. A non-acquisition security right in consumer goods of a value less than [specify value] at the time of creation of the security right [for acquisition security rights in consumer goods, see A/CN.9/WG.VI/WP.24/Add.5, rec. 128] that is not subject to a specialized registration or title certificate system is effective against third parties automatically upon creation of the security right.]

[Note to the Working Group: The Working Group may wish to note that there is no significant financing that involves non-acquisition security rights in consumer goods. Accordingly, the Working Group may wish to delete recommendation 39 bis (and recommendation 36 (b)). If this recommendation is retained, the Working Group may wish to consider that, as low value in one country may be high value in another country, the determination of low value should be based on a cost-benefit analysis that compares the potential realization value of an asset to the cost of registration. For the same reasons, the Working Group may also wish to exclude non-acquisition security rights in assets necessary for the livelihood, basic subsistence or health of an individual or a member of his or her household from the security rights covered in the Guide. The commentary could explain that, as a result, the same exceptions that apply typically to execution by judgement creditors would apply to secured creditors. Alternatively, the Working Group could include security rights in such assets in the scope of the Guide but apply to enforcement by secured creditors the same exemptions that apply to enforcement by judgements creditors.]

Third-party effectiveness of a security right in movables with respect to which there is a specialized registration or a title certificate system

40. The law should provide that a security right in movable property with respect to which a security right, by other law, may be made effective against third parties by registration in a specialized registry or by notation on a title certificate is effective against third parties:

- (a) If it is registered in the specialized registry; or

- (b) A notation of it is made on the title certificate.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that registration in the general security rights registry as provided in recommendation 35 or registration in the specialized registry or notation on a title certificate as provided in recommendation 40 are the only available methods for achieving third-party effectiveness (i.e. third-party effectiveness may not be achieved by possession), if so provided in the relevant special legislation. The Working Group may also wish to note that recommendation 40 is supplemented by recommendation 65 in A/CN.9/WG.VI/WP.26/Add.6, under which a security right registered in the specialized registry or with respect to which a notation was made in a title certificate has priority over a security right registered in the general security rights registry. Consequently, to ensure maximum priority over all classes of competing creditors, the security right should be made effective by registration in accordance to recommendation 40 rather than recommendation 35. This approach is justified by the need to preserve the reliability of the specialized registry or title certificate system for buyer of encumbered assets or other secured creditors who rely on these systems to ensure protection of their own rights.]

Third-party effectiveness of security rights in proceeds

41. *[See A/CN.9/WG.VI/WP.26/Add.4, rec. 41.]*

41 bis *[See A/CN.9/WG.VI/WP.26/Add.4, rec. 41 bis.]*

Third-party effectiveness of rights securing a receivable, negotiable instrument or any other obligation

41 ter. A personal or property right securing payment or other performance of a receivable, negotiable instrument or other obligation, is effective against third parties if the security right in the receivable, negotiable instrument or other obligation is effective against third parties.

[Note to the Working Group: The Working Group may wish to consider this recommendation together with recommendation 37 dealing with third-party effectiveness of a security right in a receivable (see A/CN.9/WG.VI/WP.26).]

Third-party effectiveness of security rights in rights to drawing proceeds from independent undertakings

42. *[See A/CN.9/WG.VI/WP.24/Add.2, rec. 49.]*

Third-party effectiveness of security rights in rights to payment of funds credited to bank accounts

43. *[See A/CN.9/WG.VI/WP.26/Add.1, rec. 43.]*

Third-party effectiveness of security rights in negotiable documents

44. *[See A/CN.9/WG.VI/WP.26/Add.3, rec. 40.]*

Third-party effectiveness of security rights in attachments

45. *[See A/CN.9/WG.VI/WP.26/Add.4, rec. 45.]*

46. *[See A/CN.9/WG.VI/WP.26/Add.4, rec. 46.]*

Third-party effectiveness of security rights in masses or products

47. [See A/CN.9/WG.VI/WP.26/Add.4, rec. 47.]

Part II. The registry system**Purpose**

The purpose of the provisions of the law on the registry system is to clarify the functions, requirements and consequences of registration in the general security rights registry.

Functions of registration in the general security rights registry

47 bis. The law should provide that the functions of registration in the general security rights registry are to provide:

- (a) A method by which a security right may be made effective against third parties whether the security exists at that time or is created in the future;
- (b) A basis for applying priority rules based on the time at which a security right was made effective against third parties; and
- (c) An additional source for third parties, such as prospective secured creditors, judgement creditors, the grantor's insolvency representative and buyers of encumbered assets, to obtain information as to whether assets of the grantor may be encumbered then or subsequently by a competing a security right.

47 ter. The law should provide that a notice may be registered in the general security rights registry and may perform the functions mentioned in recommendation 47 bis whether the security right exists at the time of registration or is created subsequently and whether the grantor has a right in the assets covered in the notice at the time of registration or obtains a right in them subsequently.

[Note to the Working Group: The Working Group may wish to note that the commentary will relate recommendations 47 bis and 47 ter to the relevant recommendation on creation, recommendation 34 bis (distinguishing creation from third-party effectiveness), recommendation 35 (making the point that registration does not create a security right), recommendation 54 (pre-registration) and recommendation 40 (registration in a specialized registry).]

The commentary will also explain that that registry systems that require document filing (rather than notice filing as provided in rec. 48 (a) and 49, without any scrutiny or verification by anybody other than the registrant as provided in rec. 48 (b)), have constitutive effects (rather than the effects described in recommendation 47 bis) and require high (e.g. ad valorem) registration fees (rather than nominal fees based on cost recovery as provided in rec. 48 (g)) are not suitable for a speedy, efficient, inexpensive and user-friendly registry (see recs. 47 quater and 48 below), which is crucial for a secured transactions law in movable property that promotes increased access to lower-cost credit.]

Design principles

47 quater. The law should provide that the registry is designed to accomplish the functions set out in recommendation 47 ter, but only in a manner that ensures that registration and

searching are speedy, efficient, inexpensive, user-friendly and publicly accessible. In particular, requirements as to content (specified items of information, not original documents) of the information submitted ("notice") and the method of submission should be no more burdensome than is necessary to ensure that the registry system functions in the manner indicated in this chapter and produce the least possible risk of invalidation of the registration.

Speedy, cost-efficient and effective registration and searching

48. In order to ensure speedy, flexible, cost-efficient and effective registration and searching, the operational and legal framework of the registry should reflect the following characteristics:

(a) Registration is effected by registering a notice, containing the information specified in recommendation 49, as opposed to a copy of the underlying security documentation;

(b) A notice may be registered without verification or scrutiny by anybody other than the registrant;

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that false or misleading notices could be discharged under recommendation 57, while the question whether any penalties for knowingly registering a false or misleading notice should be imposed is left to tort, penal or other law. The commentary will also provide guidance as to the type of possible penalties.]

(c) A search may be made without the need for the searcher to justify the reasons for the search;

(d) The record of the registry is centralized and contains all notices of security rights registered under this law;

(e) Notices are indexed and can be retrieved by searchers according to the name of the grantor or according to some other reliable identifier of the grantor, such as State-issued identification or commercial registration number;

(f) The registry is open to the public;

(g) Fees for registration and searching are set at a level no higher than necessary to permit cost-recovery;

(h) Registrants may choose among multiple modes and points of access to the registry;

(i) Clear and concise guides to registration and searching procedures and are widely available and information about the existence and role of the registry is widely disseminated; and

(j) The registry operates reliable and consistent service hours compatible with the needs of potential registry users;

(k) To the extent the infrastructural capacity of the State permits, the registration system is computer-based. In particular,

(i) Notices are stored in electronic form in a computer database;

(ii) Registrants and searchers have immediate access to the registry record by electronic or similar means, including internet and electronic data interchange;

- (iii) The system is programmed to minimize the risk of entry of incomplete or irrelevant information (e.g. by requiring essential data fields to be completed);
- (iv) The system is programmed to facilitate speedy and complete retrieval of information and to minimize the practical consequences of human error.

Security and integrity of the registry

48 bis. In order to ensure the security and integrity of the registry record, the operational and legal framework of the registry should reflect the following characteristics:

- (a) A registrant can obtain a record of the registration as soon as the registration information is entered so as to verify that the entry is accurate and complete;
- (b) The identity of registrants is verified in advance and evidence of identity is preserved;
- (c) [The registry] [The secured creditor] is obligated to forward a copy of a notice to the grantor named in the notice;
- (d) The registry is obligated to send a copy of any changes to a notice to the secured creditor named in the notice;
- (e) Although the day-to-day operation of the registry may be delegated to a private authority, the State retains the responsibility to ensure that it is operated in accordance with the governing legal framework.
- (f) A back-up copy of the registry record is maintained so as to ensure that it can be reconstructed.

Liability for loss or damage

48 ter. The law should provide for the allocation of liability for loss or damage caused by an error in the administration or operation of the registration and searching system. If the system is designed to permit direct registration and searching by registry users without the intervention of registry personnel, the responsibility of the registry with respect to an inaccurate or incomplete printed registration or search result is limited to a system malfunction.

Required content of notice

49. The law should require the notice to contain only:

- (a) The names or other reliable identifiers of the grantor and the secured creditor, or its representative, as provided in recommendations 50 and 51, and an address for each one of them;
- (b) A description of the asset covered by the notice as provided in recommendation 53;
- (c) The duration of the registration as provided in recommendation 56; and
- [(d) A statement of the maximum monetary amount for which the security right may be enforced [if the State determines that such information is helpful to facilitate subordinate lending.]]

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that, while the meaning of the term representative may be subject

to other law, it included agent, trustee, or other person acting on behalf or in favour of the secured creditor.]

Sufficiency of grantor name in a notice

50. The law should provide that the name or other identifier of the grantor entered on a registered notice is sufficient only if the notice can be retrieved by searching the registry record according to the correct name or other identifier of the grantor.

51. Where the grantor is an individual, the law should provide that the grantor's name for the purposes of effective registration of a notice is the name that appears in specified official documents, such as a birth certificate, identity card, driver's licence or passport. Where the grantor is a legal entity, the law should provide that the grantor's name for the purposes of effective registration is the name that appears in the documents constituting the entity.

[Note to the Working Group: The Working Group may wish to note that the commentary will clarify that where the name of the grantor is listed in separate record maintained by the State, for example, a commercial or company register, the State may wish to set up links between the two registers to facilitate accurate data entry.]

Change in name or other identifier of the grantor

52. The law should provide that if the name of the grantor changes after a notice with respect to a security right is registered:

(a) A security right in an encumbered asset, in which the grantor had rights at the time of the name change remains effective against third parties;

(b) A security right in an asset acquired by the grantor or created within [...] days after the time of the name change, is effective against third parties; and

(c) A security right in an asset acquired by the grantor or created more than [...] days after the time of the name change, is not effective against third parties unless the notice is amended to provide the new name of the grantor.

[Note to the Working Group: The Working Group may wish to note that the commentary will provide guidance as to the length of the time period referred to in recommendation 52 (e.g. 60, 90 or 120 days). The commentary will also discuss various circumstances in which an entity may change its name (e.g. merger or acquisition).]

Sufficiency of description of assets covered by a notice

53. The law should provide that a description of the assets covered by a notice is sufficient if it enables a third person to identify the assets covered by the notice separate from other assets of the grantor. If the assets covered by the notice consist of a generic category or categories of movable property or of all present and after-acquired movable property, a generic description is sufficient.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that descriptions, such as "all inventory" or "all present and future assets", would be sufficient.]

Advance registration

54. The law should provide that a notice with respect to a security right may be registered before or after creation of the security right.

[Note to the Working Group: The Working Group may wish to note that the purpose of this recommendation is to confirm that registration may take place before creation of the security right. The commentary will explain that the purpose of allowing advance registration is to enable secured creditors to ensure their priority position by registering – especially as against potential competing secured creditors – at the earliest time possible in order to facilitate the extension of credit upon conclusion of the formal security agreement (see also A/CN.9/WG.VI/WP.26/Add.6, rec. 66, according to which priority dates back from the time of registration (i.e. before creation of a security right, assuming that a security right comes into existence subsequently) or at the time of third-party effectiveness (i.e. creation plus registration or possession).]

One notice for multiple security agreements between the same parties

55. The law should provide that registration of a single notice is sufficient to ensure the third-party effectiveness of security rights created or to be created by all security agreements entered into between the same parties to the extent they cover items or kinds of movable property that fall within the description contained in the notice.

Duration and extension of notice

56. The law should specify the duration of a notice or permit the registrant to select the duration of a notice at the time of registration and extend it at any time before its expiry.

Time of effectiveness of notice or amendment

56 bis. The law should provide that a notice or its amendment takes effect when the information contained in the notice or its amendment is entered into the registry record so as to be disclosed on a search of the registry record.

[Note to the Working Group: The Working Group may wish to note that, if the registration system permits the submission of paper notices to the registry (as opposed to direct data entry by registrants), there will be some delay between receipt of the notice by the registrar and the time the information on the notice is entered into the record by registry staff so as to become available to searchers. In such circumstances, the question arises as to the time when the registration should be effective, the time of receipt of the notice at the registry or the time the notice is entered into the record and becomes available to searchers. If the registration is effective when received by the registrar, a search will not disclose all legally effective registrations. To protect the information needs of third parties, recommendation 56 bis, therefore, makes the time of registration concomitant with searchability. Although this puts the risk associated with any delay on the secured creditor, the secured creditor is in a better position to take steps to protect itself than third parties. Moreover, the recommendations earlier outlined on the design and operation of the registry should ensure speedy and efficient registration procedures. In a fully electronic system that requires no intervention by registry staff entry of the notice and its availability to searchers is virtually simultaneous and this problem is significantly reduced.

The Working Group may also wish to note that the commentary will explain that an amendment may involve various changes, such as: (i) adding or deleting items or kinds of encumbered assets; (ii) adding or deleting the name of a grantor; (iii) recording a change

in the name of a grantor or secured creditor; (iv) disclosing an assignment of the security right by the secured creditor named in the original registration to a new secured creditor; or (v) disclosing a subordination agreement or undertaking that affects a registered security right.]

Cancellation or amendment of notice

57. The law should provide that, if no security agreement has been completed between the parties or if the security right has been terminated by full payment or performance of all of the secured obligations and termination of any commitment to extend credit or if any information contained in the notice is not authorized by the grantor:

(a) The secured creditor must cancel or amend the notice within [...] days after the request of the grantor;

(b) The grantor is entitled to compel cancellation or amendment of a notice through a summary procedure;

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that the grantor may seek to cancel the notice under paragraph (b) even before expiry of the period under paragraph (a). In such a case, however, the grantor may have to bear any costs involved (see A/CN.9/593, para. 54). The Working Group may also wish to note that the commentary will provide guidance to States as to the length of the time period referred to in recommendation 58 (e.g. 20-30 days).]

(c) The grantor and the secured creditor may agree to cancel or amend the notice.

58. The law should provide that the secured creditor is entitled to cancel or amend a notice at any time.

59. The law should provide that the registrar should remove a notice from the searchable records of the registry within a short period of time after its cancellation, but the information in the cancelled notice and the fact of the cancellation should be archived so as to be capable of retrieval if necessary.

60. [The law should provide that, in the case of an assignment of the secured obligation, [the notice may be amended to indicate the name of the new secured creditor but the unamended notice remains effective] [to remain effective, the notice must be amended to indicate the name of the new secured creditor].]

[Note to the Working Group: The Working Group may wish to consider which of the alternatives reflected in recommendation 60 within square brackets is preferable (see A/CN.9/593, para. 56).]

A/CN.9/WG.VI/WP.26/Add.6

Recommendations of the draft Legislative Guide on Secured Transactions

ADDENDUM

CONTENTS

	<i>Recommendations</i>	<i>Page</i>
VI. Priority of the security right over the rights of competing claimants		61-85 ter

VI. Priority of the security right over the rights of competing claimants

Purpose

Consistent with the purpose of the Guide to encourage the extension of secured credit, the purpose of the provisions of the law on priority is to:

(a) Enable a potential secured creditor to determine, in an efficient manner and with a high degree of certainty prior to extending credit, the priority that its security right would have over the rights of competing claimants; and

(b) Facilitate transactions by which a grantor may create more than one security right in the same asset and thereby use the full value of its assets to obtain credit.

Scope of priority rules

61. The law should have a complete set of priority rules covering priority conflicts with every possible competing claimant.

Scope of priority

62. The law should provide that the priority accorded to a security right extends to all monetary and non-monetary obligations owed to the secured creditor [up to a maximum monetary amount set forth in the notice], including principal, costs, interest and fees, to the extent secured by the security right.

Priority of security rights securing future obligations

62 bis. [Subject to recommendation 71,] the priority of a security right does not depend on the date when the secured obligation was incurred.

[Note to the Working Group: The Working Group may wish to note that the commentary will clarify that if a security right securing a credit facility is made effective against third parties on day 1 and credit is extended on day 2 and then on day 3 and 4, priority dates back from the time the security right was made effective against third parties (i.e. day 1). The commentary will also explain that an exception to this rule is stated in rec. 71, which provides that, if the secured obligation was incurred after a judgement creditor acquires rights in the encumbered asset, the security right is subordinate to the

rights of the judgement creditor. The Working Group may wish to consider whether further exceptions should be introduced (e.g. the super-priority of an acquisition security right should be limited to secured obligations incurred up to the time of the acquisition of the relevant assets by the transferee).]

Priority of security rights in future assets

62 ter. A security right in assets that the grantor acquired or that were created after the time a security right in them became effective against third parties [by registration] has the same priority as the security right in assets in which the grantor had rights at the time the security right was made effective against third parties.

[Note to the Working Group: The Working Group may wish to consider whether the priority in future assets should be the same as the priority in present assets only if a security right was made effective against third parties by registration. Such an approach could be justified, since only in the case of registration would third parties have notice of the possible existence of a security right.]

Subordination agreements

63. The law should provide that a competing claimant entitled to priority may at any time subordinate its priority unilaterally or by agreement in favour of any other existing or future competing claimant.

[Note to the Working Group: The Working Group may wish to note that the commentary will make clear that, under recommendation 63, a subordination agreement would be possible not only between competing claimants with a different priority ranking but also between competing claimants with the same priority ranking (see A/CN.9/593, para. 61). The Working Group may also wish to note that subordination agreements in the case of the grantor's insolvency are addressed in recommendation J in the recommendations of this Guide on Insolvency (A/CN.9/WG.VI/WP.21/Add.3): "The insolvency law should provide that if a holder of a security right in an asset of the insolvency estate has subordinated its priority unilaterally or by agreement in favour of any existing or future competing claimant, such subordination is binding in insolvency proceedings with respect to the grantor."]

Priority between security rights in the same encumbered assets

64. The law should provide that, except as provided in other recommendations in this chapter and in the chapter on acquisition financing devices, a security right in movable property registered as provided in recommendation 40 or 54 [see A/CN.9/WG.VI/WP.26/Add.5] or made effective against third parties as provided in recommendation 35 or 36 [see A/CN.9/WG.VI/WP.26/Add.5], whichever occurs first, has priority over a security right in the same property which was subsequently registered, as provided in recommendation 40 or 54, or made effective against third parties, as provided in recommendation 35 or 36.

[Note to the Working Group: The Working Group may wish to note that the commentary will make clear that issues of priority arise where there are competing rights in the same assets, the debtor defaults on the secured obligation and the value of the encumbered assets is not sufficient to satisfy all secured obligations. The commentary will also make clear that:

(a) As between two security rights registered in the general security rights registry, the first registered wins;

(b) As between two security rights registered in a specialized registry or noted on a title certificate, the first registered wins (the same rule is restated within square brackets in recommendation 65);

(c) As between a security right registered in the general security rights registry and a security right registered in a specialized registry or noted on a title certificate, the latter wins (as a result of rec. 65); and

(d) As between a security right registered (in advance of creation) in the general security rights registry or in a specialized registry or noted on a title certificate and a security right (created and) made effective against third parties, the first registered or made effective against third parties wins.

In addition, the Working Group may wish to note that the commentary will also clarify that, if a security right is not effective against third parties, no issue of priority arises and, therefore, such security rights have the same ranking. The commentary will also explain that recommendation 64 applies to a conflict between two security rights in the same encumbered assets (as to whether it should apply to conflicts with a buyers and judgement creditor, see note after rec. 68 bis).

Moreover, the Working Group may wish to note that the commentary will also explain that the reasons why a security right registered in advance of its creation is given priority as of the time of registration are to encourage advance registration (which provides notice to third parties) and to provide certainty to secured creditors by enabling them to determine the priority of their security rights before they extend credit. This reason does not apply to advance possession. Furthermore, such a rule would not be necessary with respect to negotiable instruments and negotiable documents, since possession of them gives a superior right than is afforded by registration (see A/CN.9/WG.VI/WP.26/Add.2, rec. 74, and A/CN.9/WG.VI/WP.26/Add.3, recs. 80 and 81). As to other tangibles, the assumption is that advance possession is not practiced (delivery of possession will always be based on an agreement about the security right). Accordingly, no general rule along the lines of recommendation 64 is introduced with respect to advance possession. The Working Group may wish to consider whether there are substantial financing practices in which the secured creditor may take possession of the encumbered assets in advance of such agreement and, if so, whether the secured creditor that took advance possession should have priority as of that time (see A/CN.9/593, para. 68).]

Priority of security or other rights registered in a specialized registry or noted on a title certificate

65. The law should provide that a security right in movable property that was made effective against third parties as provided in recommendation 40 [see A/CN.9/WG.VI/WP.26/Add.5] has priority over [(i)] a security right in the same property with respect to which a notice was registered in the general security rights registry or which was made effective against third parties by any other method regardless of the

order[, (ii) a security that was subsequently registered in the specialized registry or noted on a title certificate].

[Note to the Working Group: The Working Group may wish to note that recommendation 65 does not apply to the priority of security rights in attachments. Recommendations 82 and 83 apply to attachments to immovable property, recommendation 84 applies to attachments to movables subject to a specialized registration system and recommendation 84 bis applies to attachments to movables.]

Continuity in priority

66. The law should provide that the priority of a security right is continuous notwithstanding a change in the method by which it is made effective against third parties, provided that there is no time when the security right is not effective against third parties.

66 bis. The law should provide that, if a security right has been registered as provided in recommendations 35 and 54 or made effective against third parties as provided in recommendations 35 or 36 and subsequently there is a period at which the security right is neither registered nor effective against third parties, the priority of that security right dates from the earliest time thereafter at which the security right is either registered or made effective against third parties.

[Note to the Working Group: The Working Group may wish to note that, under recommendations 38 bis and ter (see A/CN.9/WG.VI/WP.26/Add.5), third-party effectiveness is continuous, if it lapses, it dates back from the time it was re-established (see also examples set forth in the note to rec. 38 ter).]

Priority of security rights in proceeds

67. *[See A/CN.9/WG.VI/WP.26/Add.4, rec. 67.]*

Rights of buyers, lessees and licensees of encumbered assets

68. The law should provide that, once a security right is made effective against third parties, the security right continues in the encumbered assets in the hands of a third party except as otherwise specifically provided in recommendations 68 bis, 69 and 69 bis.

[Note to the Working Group: The Working Group may wish to note that recommendation 68 is designed to state the rule that the secured creditor may follow the asset in the hands of a transferee (droit de suite, a rule stated somewhat differently in rec. 34 quater) (see A/CN.9/WG.VI/WP.26/Add.5).]

68 bis. The law should provide that a security right that was made effective against third parties before a sale, lease, licence or other disposition of the encumbered assets does not continue in the assets if the grantor transfers, leases or licences the assets free of the security right with the authority of the secured creditor.

[Note to the Working Group: The Working Group may wish to note that, under recommendation 64, registration of a notice before the creation of a security right gives priority over another security right that was (created and) made effective against third parties later. The Working Group may wish to consider whether this recommendation should apply to priority conflicts between a secured creditor and a buyer, lessees or licensee of encumbered assets acquiring a right in the assets after registration of a notice but before actual creation of a security right in them. It may be considered that the buyer, lessee or licensee should take free of the security right in these circumstances on the basis that by the time the security right is created, the encumbered assets are no longer owned

by the seller or are subject to the possession or use rights of the lessee or licensee. The disadvantage of such an approach would be that the secured creditor would then be able to rely on its act of advance registration to preserve priority only as against other secured creditors. As against intervening transferees, the secured creditor would have to undertake further inquiries before being able to safely advance credit once the security right comes into existence.

A similar issue arises when a judgement creditor acquires rights in the encumbered assets after advance notice of a security right is registered but before the security right is actually created. The considerations are somewhat different in this case since a secured creditor is not subordinated to the rights of the judgement creditor, under the recommendations in this chapter, until it acquires actual knowledge of the judgement creditor's rights and is then subordinated for advances made after receiving knowledge. Consequently, if the security right has not yet been created when the judgement creditor advises the secured creditor of its intervening rights, the secured creditor can protect itself either by requiring the grantor to discharge the judgement or by reducing the credit the secured creditor plans to extend. A similar rule could be adopted for intervening buyers. Under this approach, a buyer, licensee, or lessor of assets would take free of a prior-registered security right that has not yet come into existence provided the secured creditor had knowledge of the sale, lease or licence. Buyers, lessees, and licensees could then protect themselves by giving notice of their transaction rather than having to secure a positive waiver of priority from the secured creditor. The secured creditor would likewise be protected because it would have actual knowledge of the intervening transaction before entering into the security agreement.

The Working Group may also wish to note that application of the rule in recommendation 68 bis requires a comparison of the date at which a security right was made effective against third parties with the date of the sale, lease or license of the encumbered asset. While the date at which the security right was made effective against third parties will usually be obvious (inasmuch as the registry's records will reveal when a notice was filed), it may not be clear when a sale has taken place. For example, a contract to sell goods that are encumbered assets may be entered into between the grantor/seller and the buyer on date 1, they may have been shipped to the buyer on date 2 (either because the contract provided for shipment on that date or otherwise), the goods may have been received by the buyer on date 3, and the buyer may have paid for them on date 4; under applicable law, the sale by the grantor/seller to the buyer may have occurred on any of those dates or on still another date. Application of the rule in recommendation 68 requires knowing which of those dates is the date on which the sale took place because the date that the security right was made effective against third parties might precede some but not all of those dates. The Working Group may thus wish to consider whether recommendation 68 bis (or the commentary accompanying it) should provide additional guidance as to when a sale should be considered to have taken place for purposes of determining the status of the buyer's rights to the goods as against the secured creditor. The commentary will also make clear that, if the grantor of an asset sells it with a retention of title (ROT), the buyer takes free of the ROT when it pays the price. Before that, the ROT seller has the rights of an owner (or secured creditor, depending on whether a unitary or a non-unitary approach is followed (see A/CN.9/WG.VI/WP.24/Add.5).]

69. The law should also provide that:

(a) A buyer of inventory, who buys encumbered inventory in the ordinary course of business of the seller, takes the inventory free of the security right, even if the buyer has knowledge of the existence of the security right;

(b) A lessee of movable property in the ordinary course of business of the lessor takes its rights under the lease free of a security right in that property, even if the lessee has knowledge of the existence of the security right; and

(c) A licensee in the ordinary course of business of the licensor under a non-exclusive license takes its rights under such license free of a security right in the licensed property that is effective against third parties, even if the licensee has knowledge of the existence of the security right.

[Note to the Working Group: The Working Group may wish to also recommend that buyers of consumer goods [of low value] that have no knowledge of a security right in the goods should take free of a security right in the goods. In that connection, the Working Group may wish to take into account that such buyer would have no way of finding out about the existence of a security right in the goods as, under recommendations 36 (b) (see A/CN.9/WG.VI/WP.26/Add.5) and 128 (see A/CN.9/WG.VI/WP.24/Add.5) non-acquisition security rights in low-value consumer goods and acquisition security rights in consumer goods are exempted from registration (see A/CN.9/593, para. 77).]

69 bis. The law should provide that where a person acquires a right in encumbered assets free of a security right, any person who subsequently acquires a right in those assets from that person also takes free of the security right.

Priority of preferential claims

70. The law should limit, both in number and amount, preferential claims arising by operation of law that have priority over security rights, and to the extent preferential claims exist, they should be described in the law in a clear and specific way.

[Note to the Working Group: The Working Group may wish to consider whether buyers, lessees and licensees should take free of any preferential claims. As this question does not involve a priority conflict with a security right, it may be addressed in the commentary.]

Priority of rights of judgement creditors

71. The law should provide that[, except as provided in recommendation 130 bis,] a security right has priority over the rights of an enforcing unsecured creditor, provided that it was made effective against third parties before the enforcing unsecured creditor[, under law other than this law,] obtained a judgement or provisional court order against the grantor and taken the steps necessary to acquire rights in assets of the grantor by reason of the judgement or provisional court order. The priority of the security right extends to credit extended by the secured creditor within a specified period of days after the secured creditor acquired knowledge of the existence of the enforcing unsecured creditor's rights in the assets but does not extend to credit extended after the expiry of that period.

[Note to the Working Group: The Working Group may wish to consider: (i) whether it is possible for a security right in a particular asset to become effective against third parties at the same time that an unsecured creditor acquires, by reason of judgement or provisional court order, a right in that asset and (ii) if so, which of those rights has priority over the other.]

The problem is most important in the case of a security right in future assets of a grantor. The Working Group may wish to consider the following example. A secured creditor takes a security right in all present and future assets of the grantor and advances credit to the grantor. The secured creditor registers a notice that covers present and future

assets. Subsequently, under law other than the secured transactions law, an unsecured creditor of the grantor obtains a judgement or provisional court order entitling the unsecured creditor to a right in the grantor's present and future assets. Still later, the grantor buys and receives delivery of new assets. At that moment, the grantor acquires rights in those assets and the security right in those assets is created and, because of the earlier registration of the notice, the security right is immediately effective against third parties. At the same time, the unsecured creditor obtains a right in those goods because of the previously granted judgement or provisional court order providing for such a right. The current draft of recommendation 71 provides that the unsecured creditor's right has priority over the security right of the secured creditor.

The Working Group may wish to consider whether in such cases the secured creditor should have priority rather than the unsecured creditor. This result would seem to further the goals of the Guide in creating greater certainty for the secured creditor with a view to making more credit available at lower cost. The result could be easily accomplished, without extensive redrafting, by adding in the first sentence of recommendation 71 the words "at the same time as or" immediately prior to the words "before the enforcing unsecured creditor".

The Working Group may also wish to consider whether an exception to this recommendation should be introduced for acquisition security rights that are made effective against third parties within the relevant grace period (see recommendation 130 bis in A/CN.9/WG.VI/WP.24/Add.5). Acquisition security rights that are made effective against third parties during the relevant grace period should not lose to a judgement creditor described in this recommendation whose right in the encumbered asset arose after the creation of the security right but before it was made effective against third parties. If this were not the case, utilizing the grace period would be too risky for acquisition financiers.

In addition, the Working Group may wish to note that the commentary will explain that the priority under recommendation 71 does not extend to credit committed but not extended before the judgement creditor took the necessary steps to acquire rights in the encumbered assets. This approach is based on the assumption that the judgement will be an event of default under the credit facility enabling the secured creditor to cease extending any credit.

The commentary will also explain the implications of this recommendations for certain practices in which the credit facility does not provide for an event of default, such as a commitment consisting of an independent undertaking where the issuer may not revoke the independent undertaking if it does not permit revocation as a result of a judgement against assets securing the grantor's obligation to reimburse the issuer for a payment under the independent undertaking.

Furthermore, the commentary will explain that, if the priority were to be limited to an amount mentioned in the notice registered, the issue might be resolved since the remaining assets of the secured creditor would be available for the payment of claims of unsecured creditors (see A/CN.9/593, para. 80-82). The commentary will also give guidance as to the length of the time period referred to in this recommendation.]

Priority of rights in assets for improving, storing or transporting the assets

72. If law other than this law gives rights equivalent to security rights to a creditor that has added value to goods (e.g. by repairing them) or preserved the value of goods (e.g. by storing or transporting them), such rights are limited to the goods, whose value has been

improved or preserved and which are in the possession of that creditor, up to the value so added or preserved, and have priority over pre-existing security rights in the goods.

[Note to the Working Group: The Working Group may wish to note that limiting the priority given to storage and repair claims over security rights by reference to the extent to which they add to or preserve the value of the encumbered assets may give rise to a difficult and costly evidentiary burden for repairers, storers or transporters. The Working Group may wish to consider referring instead to the value (or the reasonable value) of the repair, transport or storage services rendered in respect of the encumbered assets. Alternatively, reference could be made to the reasonable expenses of the repairer, storer or transporter. These formulations would still ensure that the priority of the repairer, storer or transporter is limited to services rendered with respect to the encumbered assets while avoiding difficult questions of proof as to the relative value of the encumbered assets before and after the services are rendered.]

Priority of reclamation claims

73. If law other than this law provides that suppliers of goods have the right to reclaim the goods, the law should provide that the right to reclaim the goods is subordinate to security rights in such goods.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that recommendation 73 creates a commercial law rule designed to accord priority to secured creditors over reclamation claims. Reclamation claims may arise by operation of law upon default or financial insolvency of the grantor. If an insolvency proceeding has commenced, applicable insolvency law will determine the extent to which the secured creditors and the reclamation claimants would be stayed or their rights would otherwise be affected (see recommendations 39-51 of the UNCITRAL Insolvency Guide). However, the priority rule established by this recommendation would be unaffected by the insolvency proceeding (see A/CN.9/WG.VI/WP.21/Add.3, draft additional recommendation I). The commentary will also explain, for the benefit of States that do adopt a non-unitary approach, that the reclamation claim does not include retention of title.]

Priority of rights of creditors in insolvency proceedings

[Note to the Working Group: See recommendation I in the recommendations of this Guide on Insolvency (A/CN.9/WG.VI/WP.21/Add.3): "The insolvency law should specify that, if a security right is entitled to priority under law other than the insolvency law, that priority continues unimpaired in insolvency proceedings except if, pursuant to the insolvency law, another claim is given priority. Such exceptions should be minimal and clearly set forth in the insolvency law. This recommendation is subject to Recommendation 88 of the Insolvency Guide."]

Priority of security rights in negotiable instruments

74. *[See A/CN.9/WG.VI/WP.26/Add.2, rec. 74.]*

Priority of security rights in rights to drawing proceeds from independent undertakings

75. *[See A/CN.9/WG.VI/WP.24/Add.2, recommendation 62.]*

Priority of security rights in bank accounts

76. [See A/CN.9/WG.VI/WP.26/Add.1, rec. 76.]

77. [See A/CN.9/WG.VI/WP.26/Add.1, rec. 77.]

78. [See A/CN.9/WG.VI/WP.26/Add.1, rec. 78.]

Priority of security rights in money

79. The law should provide that a person that obtains possession of money that is subject to a security right takes the money free of the security right, whether the money constitutes an original encumbered asset or proceeds, unless that person acts in collusion with the transferor to deprive the secured creditor of its security right in the money. This recommendation does not lessen the rights of holders of money under law other than this law.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that recommendation 79 is designed to promote the important policy of maximizing the negotiability of money, limiting negotiability only to the extent necessary to protect the holder of a security right in the money against collusion by a transferee of money and its transferor. It is intended that this recommendation be aligned with recommendation 78 dealing with security rights in funds transferred from a bank account.]

The Working Group may also wish to note that the commentary will clarify that the term “money” in the Guide is intended to refer to, and only to, legal tender, i.e. the currency currently in use as a medium of exchange authorized by a government. Other forms of property are casually spoken of as money, but they are not money for purposes of the Guide. For example, if one deposits currency into one’s bank account, reference is often made to money in the bank (or cash in the bank), but the depositor’s asset is no longer money, it is instead, under the Guide, “funds credited to a bank account”. and the claim of the depositor against the bank is referred to in the Guide as the “right to payment of funds credited to a bank account”. Similarly, the deposit of a check would result in the depositor’s asset no longer being a negotiable instrument, but instead would be funds credited to a bank account. In addition, money held by a coin dealer as part of a collection is not “money” under the Guide.

The Guide addresses security rights in money both as original encumbered assets and as proceeds of another form of encumbered asset. An example of the latter case would be the receipt, by a seller that has granted a security right in its receivables, of payment of its outstanding invoices in currency (not by check or electronic funds transfer). Under the Guide, the money in the seller’s hands would be the proceeds of the seller’s receivable and the secured creditor would have a security right in the money as proceeds. Similarly, if a person that has granted a security right in an item of equipment sells it to a person who pays for it in cash, the money in the seller’s hands constitutes proceeds of the equipment and is subject to the security right.

Like money, funds credited to a bank account may be the subject of security rights either as original encumbered assets or as proceeds. If the currency and the checks were subject to a security right in favour of the depositor’s creditor, the funds credited to the bank account would in both cases be the proceeds of the pre-existing encumbered asset (the money or the negotiable instrument). If the credit to the depositor’s bank account results from an electronic funds transfer from a third party in payment of a receivable

owed by the transmitter to the depositor, the funds credited to the bank account would be the proceeds of the pre-existing encumbered asset (the receivable).

Each provision of the Guide, e.g. rules for creation, effectiveness against third parties, priority, etc., applies to all encumbered assets—except to the extent a special rule is provided for a particular type of asset. Thus, it is always necessary to ascertain whether a special rule exists with respect to money or the right to payment of funds credited to a bank account.

An important example of a special rule is that which governs the rights of a transferee of (i) money that, in the hands of transferor, was subject to a security right, and (ii) funds that were transferred from a bank account in which those funds, while owned by the transferor and credited to that bank account, were subject to a security right. Because of the need to preserve the negotiability of money and funds transferred from bank accounts, special rules are provided in the Guide to protect transferees of such assets.

With respect to money and funds credited to a bank account, it is important to focus on whether the issue under consideration concerns (i) those two assets as property of the grantor or (ii) the rights of third-party transferees from the grantor of money or of funds transferred from the grantor's bank account. The preceding paragraph, which deals with the rule that governs the rights of transferees (the second category), illustrates this distinction. It is separate from the rule (the first category) that governs a priority contest between a security right in money or in funds credited to a bank account vis-à-vis a competing claimant when the grantor still owns (i.e., has not transferred) the encumbered asset.]

Priority of security rights in negotiable documents

Recommendations of the draft Legislative Guide on Secured Transactions

I. Key objectives

Purpose

The purpose of the recommendations on key objectives is to provide a broad policy framework for the establishment and development of an effective and efficient secured transactions law. These recommendations could be included in a preamble of the secured transactions law as a guide to the underlying legislative policies to be taken into account in the interpretation of the law (hereinafter referred to as “the law”).

Key objectives

1. The following key objectives should be considered:
 - (a) Promote secured credit;
 - (b) Allow utilization of the full value inherent in assets to support credit in a broad array of credit transactions;
 - (c) Enable parties to obtain security rights in a simple and efficient manner;
 - (d) Recognize party autonomy;
 - (e) Provide for equal treatment of diverse sources of credit;
 - (f) Validate non-possessory security rights;
 - (g) Encourage responsible behaviour on the part of all parties by enhancing predictability and transparency;
 - (h) Establish clear and predictable priority rules;
 - (i) Facilitate enforcement of creditor’s rights in a predictable and efficient manner;

- (j) Balance the interests of affected persons; and
- (k) Harmonize secured transactions laws, including conflict-of-laws rules.

II. Scope of application

Purpose

The purpose of the scope provisions of the law is to specify the parties, the security rights, the secured obligations and the assets to which the law applies.

Parties, security rights, secured obligations and assets covered

2. The law should apply to all parties and types of security rights, secured obligations and encumbered assets. Any exceptions should be limited and clearly stated in the law.
3. In particular, the law should provide that it applies to:

(a) Legal and natural persons, including consumers, without, however, affecting their rights under consumer-protection legislation;

(b) Property rights created contractually to secure all types of obligations, including future obligations, fluctuating obligations and obligations described in a generic way;

(c) Possessory and non-possessory security rights in movable property and attachments securing payment or other performance of one or more obligations, present or future, determined or determinable;

(d) All types of movable property and attachments, tangible or intangible, present or future, not specifically excluded in the law, including inventory, equipment and other goods, receivables, negotiable instruments, negotiable documents, funds credited to bank accounts, rights to drawing proceeds from an independent undertaking and intellectual property rights;

[Note to the Working Group: The Working Group may wish to consider the terms “independent-undertaking-proceeds-rights” and “bank-account-rights” instead of the terms used presently throughout the draft Guide. The term “independent-undertaking-proceeds-rights” reflects that the encumbered asset is not the right to demand payment under an independent undertaking or the proceeds themselves, and is shorter than the term currently used. Similarly, the term “bank-account-rights” reflects that the encumbered asset is not the bank-customer relationship.]

(e) Security rights acquired by way of transfer of title and all other types of rights securing the payment or other performance of one or more obligations, irrespective of the form of the relevant transaction and whether ownership of the encumbered assets is held by the secured creditor or the grantor, including the various forms of retention of title, financial leases and hire-purchase agreements;

- (f) Generally, outright transfers of receivables;

[Note to the Working Group: The Working Group may wish to note that the definition of “receivable” in para. 21 (o) of A/CN.9/WG.VI/JP.22/Add.1 excludes rights to payment under a negotiable instrument, the obligation to pay under an independent undertaking and the obligation of a bank to pay funds credited to a bank account. As a result, recommendation 3 (f) does not apply to an outright transfer of a negotiable

instrument, an independent undertaking or a right to payment of funds credited to a bank account. However, the recommendations apply to transfers of such assets for security purposes, as they are treated as secured transactions. For example, the transfer for security purposes of a right to payment of funds in a bank account is covered as a method of achieving control (see definition of “control” in A/CN.9/WG.VI/WP.26/Add.1). As to the question whether outright transfers of negotiable instruments should be included within the scope of the draft Guide, see note after rec. 3 (f) in document A/CN.9/WG.VI/WP.26.]

(g) [Types of asset that are subject to a special registration or title certificate system as well as other methods of third-party effectiveness subject to special laws (such as a book entry or a control agreement), including securities, immovable property,] aircraft, ships and attachments thereto to the extent that the recommendations of this law are not inconsistent with existing special laws or international obligations of the State relating to these types of asset. Where a direct inconsistency exists, the State’s secured transactions law should expressly confirm that the other law and international obligations govern those assets to the extent of that inconsistency;

[Note to the Working Group: The Working Group may wish to note that securities and immovable property are excluded from the scope of the draft Guide as original encumbered assets (see rec. 4 (a) and (b) below). However, they may be affected by the recommendations of the draft Guide in two instances.

First, if a security right in securities or a mortgage secures a receivable, negotiable instrument or other obligation and the receivable is assigned, the security right in the securities or the mortgage follows. This rule does not affect any third-party rights, priority or enforcement requirements existing under securities or immovable property law (see rec. 16 in A/CN.9/WG.VI/WP.26, rec. 16). For example, a security right in intermediated securities that was made effective against third parties by a book entry or a control under securities law will have priority. This is the result under art. 5 (3) and 10 (1) of the draft UNIDROIT Convention on Substantive Rules regarding Intermediated Securities (see Study LXXVIII-Doc. 42, March 2006).

In addition, securities and immovable property may be affected by the recommendations of the draft Guide if they constitute proceeds of an asset covered in the draft Guide (e.g. inventory or funds in a bank account). The security right in the original encumbered assets continues in the proceeds (see A/CN.9/WG.VI/WP.26/Add.4, recs. 29 and 30). Whether a separate act is necessary for the security right in the proceeds to be effective against third parties is still an open issue (see A/CN.9/WG.VI/WP.26/Add.4, recs. 41 and 41 bis). However, if the proceeds are a kind of asset that is not covered by the recommendations in the draft Guide, a separate act may be necessary under other law irrespective of the outcome of the debate with respect to recs. 41 and 41 bis.

In order to better reflect the fact that securities and immovable property may be affected by the Guide, the Working Group may wish to consider whether a qualified exclusion along the lines of the text in square brackets in recommendation 3 (g) would be more appropriate than an outright exclusion along the lines of recommendation 4 (a) and (b).

If the Working Group were to adopt this approach, recommendation 40 might need to be expanded to preserve other methods of third-party effectiveness beyond registration in a specialized registry or notation on a title certificate (e.g. a book entry or a control agreement) and a new recommendation along the lines of recommendations 83 and 85 may need to be added to preserve the priority of rights made effective against third parties through one of these special methods.

Such an approach would be consistent with the approach followed in the draft Guide with respect to attachments to immovable property or movable property subject to a specialized registration or title certificate system (see A/CN.9/WG.VI/WP.26/Add.4, recs. 46, 46 bis, 82, 83, 84 and 84 bis), according to which, a security right in attachments to immovable property is subordinate to a security right in the relevant immovable property or in the relevant movable property subject to a specialized registration or title certificate system, unless it is registered first in the immovable registry or in the specialized registry or is noted on the relevant title certificate respectively.

In addition, this approach would be consistent with the draft UNIDROIT Convention. Article 10 (1) of this draft Convention provides that a security right in securities (as original encumbered assets or as proceeds) that was made effective against third parties under the draft Convention has priority over a security right that was made effective against third parties under law outside the draft Convention (e.g. a law based on the recommendations of the draft Guide). The rationale underlying this approach is that the book-entry- or control-related system established by the draft Convention could not be relied upon if a security right in intermediated securities created and perfected under other law had priority over a Convention security right.

Moreover, this approach would avoid excluding from the scope of the draft Guide directly-held securities to the extent they are not subject to any special legislation (even the UNIDROIT draft Convention does not apply to directly-held securities). Thus, no gap would be left with respect to, for example, security rights in shares of a subsidiary all held by the parent company, since such security rights are involved in many commercial loan transactions.

On another matter, the draft Guide deals with security rights in rights to drawing proceeds under an independent undertaking but not with security rights in independent undertakings. The Working Group may wish to consider whether this fact should be explicitly stated in the recommendations. This could be done by way of a qualified exclusion in recommendation 3 (g) along the lines “and independent undertakings to the extent that the recommendations in this law are not inconsistent with special law and practice”. In any case, the commentary should explain that, if an asset otherwise outside the scope of the recommendations of the draft Guide becomes subject to these recommendations because it constitutes proceeds of an asset within the scope of the draft Guide or secures payment or other performance of a receivable, negotiable instrument or other obligation within the scope of the draft Guide, the creation, third-party effectiveness and conflict-of-laws relating to these issues are governed by the recommendations of the draft Guide, while third-party rights, priority, enforcement and conflict-of-laws relating to those issues remain subject to law outside the draft Guide.

If the Working Group decides to retain the outright exclusions of security rights in securities (or indirectly-held securities) and immovable property, and to add to the list in rec. 4 independent undertakings, instead of the qualified exclusions suggested above, it may wish to consider including the text suggested in the last sentence of the preceding paragraph in a recommendation.]

(h) Intellectual property rights to the extent that the recommendations of this law are not inconsistent with existing laws or international obligations of the State relating to these assets. A State enacting secured transactions legislation in accordance with this Guide should consider whether it might be appropriate to adjust certain of the recommendations as they apply to security rights in intellectual property. In this regard, a State should examine its existing intellectual property laws and the State's obligations under intellectual property treaties, conventions and other international agreements and, in

the event that the recommendations of the Guide are directly inconsistent with any such existing laws or obligations, the State's secured transactions law should expressly confirm that those existing intellectual property laws and obligations govern such issues to the extent of the inconsistency. In considering whether any adjustments of the recommendations as they apply to security rights in intellectual property are appropriate, a State should analyse each circumstance on an issue-by-issue basis and should have proper regard both to establishing an efficient secured transactions regime and to ensuring the protection and exercise of intellectual property rights in accordance with international conventions and national laws.

4. [Except to the limited extent provided in recommendations 16 and 37 relating to a personal or property right that secures a receivable, negotiable instrument or other obligation that is within the scope of the Guide,] the law should not apply to security rights in:

- (a) Securities;
- (b) Immovable property, with the exception of attachments to immovable property;
- (c) Wages;
- (d) [Assets necessary for the livelihood, basic subsistence or health of an individual or a member of his or her household].

[Note to the Working Group: With regard to the outright exclusion in recommendation 4 (d), the Working Group may also wish consider, instead of the outright exclusion, a qualified exclusion from the recommendations of the chapter on enforcement. Under such an approach, the enforcement of security rights in such assets should be subject to the same exemptions applying under general procedural law to the enforcement of rights of judgement creditors to such assets (see note after recommendation 3 (g) above and 39 bis in A/CN.9/WG.VI/WP.26/Add.5). Whether the Working Group decides in favour of a qualified or outright exclusion of securities and immovable property, the language in square brackets (see A/CN.9/603, para. 21) may be retained in recommendation 4 and perhaps added in recommendation 3 (g) as well.]

III. Basic approaches to security

Purpose

The purpose of the recommendations on basic approaches to security is to ensure that the law covers in a comprehensive and consistent manner all forms of transactions that function as security.

Comprehensive approach

5. The law should include a comprehensive and consistent set of provisions on security rights in tangibles and intangibles.

Functional approach

6. The law should treat all devices that perform security functions as secured transactions, including the transfer of title to tangibles or the outright assignment of receivables for security purposes, retention of title sales, financial leases and hire-purchase agreements, except to the extent otherwise contemplated in recommendation 125 [see A/CN.9/WG.VI/WP.24/Add.5].

IV. Creation of the security right (effectiveness as between the parties)**Purpose**

The purpose of the provisions of the law dealing with creation is to specify the way in which a security right in movable property is created (i.e. becomes effective as between the parties).

Creation of a security right by agreement

7. The law should specify that a security right is created by agreement between the grantor and the secured creditor, which is in writing [signed by the grantor in accordance with recommendation 10] [that evidences the intent of the grantor to grant a security right] or is accompanied by dispossession of the grantor pursuant to the agreement.

Minimum contents of the security agreement

8. The law should provide that the security agreement must, at a minimum, identify the secured creditor and the grantor, and reasonably describe the secured obligation and the assets to be encumbered. A generic description of the secured obligation and the encumbered assets is sufficient.

Form

9. The law should specify that a writing requirement is met by an electronic communication if the information contained therein is accessible so as to be usable for subsequent reference (see article 6 of the UNCITRAL Model Law on Electronic Commerce).

10. [The law should also specify that, unless the law provides otherwise, where the law requires a signature of a person, that requirement is satisfied in relation to an electronic communication if:

(a) A method is used to identify that person and to indicate that person's approval of the information contained in the electronic communication message; and

(b) That method is as reliable as was appropriate for the purpose for which the electronic communication was generated or communicated, in the light of all the circumstances, including any relevant agreement (see article 7 of the UNCITRAL Model Law on Electronic Commerce).]

Assets and obligations subject to a security agreement

11. The law should specify that a security right may secure all types of obligation, including future, conditional and fluctuating obligations. It should also specify that a

security right may be given in all types of asset, including parts of assets and undivided interests in assets and assets which, at the time of the security agreement, the grantor may not yet own or have the power to dispose of, or which may not yet exist, as well as in proceeds. Any exceptions to these rules should be limited and described clearly in the law.

12. The law should specify that a security right may be granted in all assets of a grantor.

[Note to the Working Group: The Working Group may wish to note that the commentary discusses an approach taken in some legal systems of preserving in the case of insolvency of the grantor of a security right in all its assets (for a discussion of all-asset security, see A/CN.9/WG.VI/WP.11/Add.2, paras. 20-25) a certain percentage of the value of the encumbered assets for unsecured creditors (see A/CN.9/WG.VI/WP.9/Add.6, paras. 33-35). However, for the reasons set forth in the commentary, the draft Guide does not recommend this approach (see A/CN.9/WG.VI/WP.26/Add.6, priority of rights of creditors in insolvency proceedings).]

Creation of a security right in receivables

13. [For the recommendations on receivables, see A/CN.9/WG.VI/WP.26.]

Creation of a security right in a negotiable instrument

24. [For the recommendations on negotiable instruments, see A/CN.9/WG.VI/WP.26/Add.2.]

Creation of a security right in rights to drawing proceeds from independent undertakings

25. [For the recommendations on independent undertakings, see A/CN.9/WG.VI/WP.24.]

Creation of a security right in funds credited to a bank account

26. [For the recommendations on funds credited to bank accounts, see A/CN.9/WG.VI/WP.26/Add.1.]

Creation of a security right in a negotiable document

28. [For the recommendations on negotiable documents, see A/CN.9/WG.VI/WP.26/Add.3.]

Creation of a security right in proceeds

29. [For the recommendations on proceeds, see A/CN.9/WG.VI/WP.26/Add.4.]

Creation of a security right in attachments

31. [For the recommendations on attachments, see A/CN.9/WG.VI/WP.26/Add.4.]

Creation of a security right in masses of goods or products

32. [For the recommendation on masses of goods or products, see A/CN.9/WG.VI/WP.26/Add.4.]

Time of creation

33. The law should provide that, unless the parties otherwise agree, a security right becomes effective as between the parties at the time the security agreement is concluded or at the time the grantor is dispossessed, whichever occurs first.

34. The law should provide that, unless the parties otherwise agree, a security right in future property is created when the grantor acquires rights or the right to transfer rights in such property.

XI. Transition issues**A. General remarks (see A/CN.9/WG.VI/WP.9/Add.8)****1. The need for transition provisions**

1. The rules embodied in new secured transactions legislation will be different from the rules in the law predating the legislation. Those differences will have an obvious impact on secured transactions that take place after the new legislation is enacted. The effect of the new legislation on existing transactions entered into prior to the new legislation must also be considered. In light of the differences between the old and new legal regimes and the continued existence of transactions and security rights created under the old regime, it will be important for the success of the new legislation that it contain fair and efficient rules governing the transition from the old rules to the new rules. A similar need for transition rules is present when, under the conflict-of-laws rules of the old regime, the law of a different State governed the creation, effectiveness against third parties or priority of a security right. Two issues related to the transition from the old regime to the new law must be addressed. First, the new legislation should provide the date as of which it will have legal effect (the “effective date”). Second, the new legislation should also set forth the extent, if any, to which, after the effective date, the new legislation applies to issues relating to transactions or security rights that existed before the effective date.

2. A number of factors require consideration in determining the effective date of the legislation. Prompt realization of the economic advantages of new legislation must be balanced against the need to avoid causing instability in, or disruption of, the markets that will be governed by new legislation and in allowing the market participants adequate time to prepare for conducting transactions under the new legislation, which may be significantly different from the prior law. Accordingly, a State may conclude that the effective date of new legislation should be some period of time after the enactment of the new legislation in order for these markets and their participants to adjust their transactions to the new rules. In determining the effective date, States might consider: the impact of the effective date on credit decisions; maximization of benefits to be derived from the new legislation; the necessary regulatory, institutional, educational and other arrangements or infrastructure improvements to be made by the State; the status of the pre-existing law and other infrastructure; the harmonization of the new secured transaction legislation with other legislation; constitutional limits to the retroactive effect of new legislation; and standard or convenient practice for the entry into force of legislation (e.g. on the first day of a month).

3. As debts that are secured by rights in the grantor's property are often payable over a period of time, it is likely that there will be many rights created before the effective date that will continue to exist on and after the effective date, securing debts that are not yet paid. Therefore, as noted above, another important decision that must be made with respect to any new legislation is the extent, if any, to which the new legislation will govern issues relating to transactions entered into prior to the effective date.

4. One approach would be for the new legislation to apply prospectively only and, therefore, not to govern any transactions entered into prior to the effective date. While there might be some appeal in such a solution, especially with respect to issues that arise between the grantor and the secured creditor, such an approach would create significant problems, especially with respect to priorities. Foremost among those problems would be the necessity of resolving priority disputes between a secured creditor which obtained its security right prior to the effective date and a competing secured creditor which obtained its security right in the same property after the effective date. Because priority is a comparative concept, and the same priority rule must govern the two rights that are being compared, it is not possible for the old rules to govern the priority of the right of the pre-effective date creditor and the new rules to govern the priority of the right of the post-effective date creditor. Of course, determining which priority rule to apply to such priority dispute is not without difficulty. Applying the old rules to such priority disputes would essentially delay the effectiveness of some of the most important aspects of the new legislation, with the result that significant economic benefits of the new legislation could be deferred for a substantial period. On the other hand, applying the new rules to such priority disputes might unfairly prejudice parties which relied on the old law and might also provide an incentive for such parties to object to the new legislation or advocate an unduly delayed effective date.

5. Alternatively, greater certainty and earlier realization of the economic benefits of the new legislation could be promoted by applying the new legislation to all transactions as of the effective date, but with such "transition provisions" as are necessary to assure an effective transition to the new regime without loss of pre-effective date priority status. Such an approach would avoid the problems identified above and would otherwise fairly and efficiently balance the interests of parties that complied with the old law with the interests of parties, which comply with the new law.

2. Issues to be addressed by transition provisions

a. Generally

6. Because many security rights created before the effective date will continue to exist after the effective date and may come into conflict with security rights created after the effective date it is important for the new legislation to provide clear transition provisions to determine the extent to which the rules in the new legislation will apply to those pre-existing rights. These transition provisions should appropriately address both the settled expectations of parties and the need for certainty and predictability in future transactions. The transition provisions must address the extent to which the new rules will apply, after the effective date, as between the parties to a transaction creating a security right before the effective date. They must also address the extent to which the new rules will apply, after the effective date, to resolve priority disputes between holder of a security right and a competing claimant, when either the security right or the right of the competing claimant was created before the effective date.

b. Effectiveness of pre-effective date rights as between the parties

7. When a security right has been created before the effective date of new legislation, two questions arise regarding the effectiveness of that right between the grantor and the creditor. The first is whether a security right that was not effectively created under old law but met all the requirements for creation of a security right under the new law should become effective on the effective date of the new law. The second question is whether a right that was effectively created under the old law but does not fulfil the requirements for creation under the new law should become ineffective on the effective date of the new law. Such an approach would recognize that the new legislation's rules for creation of a security right comprise the State's most current policy choices, taking into account the protections of the transacting parties and that as a general matter the parties themselves would presumably favour effectiveness of a transaction that they entered into. With respect to the first question, consideration should be given to making the right effective as of the effective date of the new law. With respect to the second question, a transition period might be created during which the security right would remain effective between the parties, so that the creditor could take the necessary steps for creation under the new law during the transition period. At the expiration of the transition period, if such steps had not been taken the right would become ineffective under the new law.

c. Effectiveness of pre-effective date rights as against third parties

8. Different issues are raised as to the effectiveness against third parties of a right created before the effective date. As new legislation will embody public policy regarding the proper steps necessary to make a right effective against third parties, it is preferable for the new rules to apply to the greatest extent possible. It may, however, be unreasonable to expect a creditor whose right was effective against third parties under the previous legal regime of the State (or under the law of the State whose law applied to third party effectiveness under the conflict-of-laws rules of the old regime) to comply immediately with any additional requirements of the new law. The expectation would be especially onerous for institutional creditors, which would be required to comply with the additional requirements of the new law simultaneously for large numbers of pre-effective date transactions. A preferable approach would be for a security right that was effective against third parties under the previous legal regime but would not be effective under the new rules to remain effective for a reasonable period of time (as set forth in the new law) so as to give the creditor time to take the necessary steps under the new law. At the expiration of

the transition period, the right would become ineffective against third parties unless it had become effective against third parties under the new law.

9. If the right was not effective against third parties under the previous legal regime, but is nonetheless effective against them under the new rules, the right should be effective against third parties immediately upon the effective date of the new rules. Once again, the presumption is that the parties intended effectiveness as between them, and third parties are protected to the full extent of the new rules.

d. Priority disputes

10. An entirely different set of questions arises in the case of priority disputes because such disputes necessarily involve applying one set of rules to two (or more) different rights created at different times. A legal system cannot simply provide that the priority rule in effect at the time when a right was created governs priority with respect to that right because such a rule would not provide a coherent answer when one of the rights that is being compared was created under the former regime while the other was created under the new regime. Rather, there must be rules that address each of the following situations: (i) where both rights are created after the effective date of the new legislation, (ii) where both rights are created before the effective date, and (iii) where one right is created before the effective date and the other right is created after the effective date.

11. The easiest situation, of course, is a priority dispute between two parties both of whose rights were created after the effective date of the new legislation. In that situation, it is obvious that the priority rules in the new legislation should be applied to resolve that dispute.

12. Conversely, if both of the competing rights were created before the effective date of the new legislation (and, accordingly, the relative priority of the two competing rights in the encumbered assets was established before the effective date of new rules) and, in addition, nothing (other than the effective date having occurred) has happened that would change that relative priority, stability of relationships suggests that the priority established before the effective date should not be changed. If, however, something occurs after the effective date that would have had an effect on priority even under the previous legal regime (such as a security right becoming effective against third parties or ceasing to be effective against third parties), there is less reason to continue to utilize old rules to govern a dispute that has been changed by an action that took place after the effective date. Therefore, there is a much stronger argument for applying the new rules to such a situation.

13. The most difficult transition situation involves a priority dispute between one party whose right was established before the effective date and another party whose right was established after the effective date. In such a case, while it is preferable to have the new rules govern eventually, it is appropriate to provide a transition rule protecting the status of the creditor whose right was acquired under the old regime while that creditor takes whatever steps are necessary to maintain protection under the new regime. If those steps are taken within the requisite time, the new legislation should provide that creditor with priority to the same extent as would have been the case had the new rules been effective at the time of the original transaction and those steps had been taken at that time.

e. Disputes before a court or arbitral tribunal

14. When a dispute is in litigation (or a comparable dispute resolution system, such as arbitration) at the effective date, the rights of the parties have sufficiently crystallized so

that the effectiveness of a new legal regime should not change the outcome of that dispute. Therefore, such a dispute should not be resolved by application of the new legal regime.

B. Recommendations (see A/CN.9/WG.VI/WP.21/Add.5)

Purpose

The purpose of transition provisions of the law is to provide a fair and efficient transition from the regime before the enactment of the law to the regime after the enactment of the law.

Effective date

155. The law should specify a date (or a mechanism by which a date may be specified), subsequent to its enactment, as of which it will enter into force (the “effective date”). In determining the effective date, the State should take into account:

- (a) The impact of the effective date on credit decisions and in particular the maximization of benefits to be derived from the law;
- (b) The necessary regulatory, institutional, educational and other arrangements or infrastructure improvements to be made by the State;
- (c) The status of the pre-existing law and other infrastructure;
- (d) The harmonization of the law with other legislation;
- (e) The content of constitutional rules with respect to pre-effective date transactions;
- (f) Standard or convenient practice for the entry into force of legislation (e.g. on the first day of a month); and
- (g) The need to give affected persons sufficient time to prepare for the law.

Transition period

156. The law should provide a period of time after the effective date (the “transition period”), during which a security right, which was created and made effective against third parties under the previous legal regime, continues to exist and remains effective against third parties and during which the secured creditor may take any necessary steps to ensure that the security right is created and is made effective against third parties under the new law. If those steps are taken during the transition period (or such longer period provided in recommendation 158), the law should provide that the existence and effectiveness against third parties of the security right is continuous.

157. If, under the law of the State (or States) whose law governed creation of a security right and its effectiveness against third parties under the conflict-of-laws rules of the previous legal regime, the security right was created but had not been made effective against third parties, the law should provide that the security right continues to exist during the transition period and if, during the transition period, the secured creditor takes any steps necessary to ensure that the security right is created under the new law, the law should provide that the existence of the security right is continuous.

158. If, under the law of the State (or States) whose law governed creation of a security right and its effectiveness against third parties under the conflict-of-laws rules of the

previous legal regime, the security right was created and had been made effective against third parties by registration of a notice of the security right, the law should provide that the security right remains effective against third parties until the earlier of (i) the date the registration would cease to be effective under the law of that State and (ii) [X] years after the effective date.

Priority

159. Subject to recommendations 160 and 161, the law should provide that priority of a security right as against a competing claimant is governed by the new law.

160. The law should provide that, if both a security right and the right of a competing claimant were created (or, in the case of the right of the competing claimant, otherwise came into existence) before the effective date and, since the effective date the status of neither right has changed, the priority of the security right as against the right of the competing claimant is determined by the law in effect immediately before the effective date in the State whose law governed priority under the conflict-of-laws rules of the prior legal regime. The status of a security right has changed if (i) by application of the rules in recommendations 156–158, it was effective against third parties on the effective date and later ceased to be effective against third parties or (ii) it was not effective against third parties on the effective date and later became effective against third parties.

161. The law should provide that, when a dispute is in litigation (or a comparable dispute resolution system) or the secured creditor has taken steps towards enforcing its rights at the effective date of the law, it does not apply to the rights and obligations of the parties.

162. The law should ensure that the transition should not entail any cost other than the nominal cost of registration.

H. Note by the Secretariat on the draft Legislative Guide on Secured Transactions, submitted to the Working Group on Security Interests at its tenth session

(A/CN.9/WG.VI/WP.27 and Add.1-2) [Original: English]

Background remarks

1. At its thirty-third session in 2000, the Commission considered a report of the Secretary-General on possible future work in the area of secured credit law (A/CN.9/475). At that session, the Commission agreed that security interests was an important subject and had been brought to the attention of the Commission at the right time, in particular in view of the close link of security interests with the work of the Commission on insolvency law. It was widely felt that modern secured credit laws could have a significant impact on the availability and the cost of credit and thus on international trade. It was also widely felt that modern secured credit laws could alleviate the inequalities in the access to lower-cost credit between parties in developed countries and parties in developing countries, and in the share such parties had in the benefits of international trade. A note of caution was struck, however, in that regard to the effect that such laws needed to strike an appropriate balance in the treatment of privileged, secured and unsecured creditors so as to become acceptable to States. It was also stated that, in view of the divergent policies of States, a flexible approach aimed at the preparation of a set of principles with a guide, rather than a model law, would be advisable. Furthermore, in order to ensure the optimal benefits from law reform, including financial-crisis prevention, poverty reduction and facilitation of debt financing as an engine for economic growth, any effort on security interests would need to be coordinated with efforts on insolvency law.¹

2. At its thirty-fourth session in 2001, the Commission considered a further report by the Secretariat (A/CN.9/496). At that session, the Commission agreed that work should be undertaken in view of the beneficial economic impact of a modern secured credit law. It was stated that experience had shown that deficiencies in that area could have major negative effects on a country's economic and financial system. It was also stated that an effective and predictable legal framework had both short- and long-term macroeconomic benefits. In the short term, namely, when countries faced crises in their financial sector, an effective and predictable legal framework was necessary, in particular in terms of enforcement of financial claims, to assist the banks and other financial institutions in controlling the deterioration of their claims through quick enforcement mechanisms and to facilitate corporate restructuring by providing a vehicle that would create incentives for interim financing. In the longer term, a flexible and effective legal framework for security rights could serve as a useful tool to increase economic growth. Indeed, without access to affordable credit, economic growth, competitiveness and international trade could not be fostered, with enterprises being prevented from expanding to meet their full potential.² As to the form of work, the Commission considered that a model law might be too rigid and noted the suggestions made for a set of principles with a legislative guide that would include, where feasible, model legislative provisions.³

¹ *Official Records of the General Assembly, Fifty-fifth Session, Supplement No. 17 (A/55/17)*, para. 459.

² *Ibid.*, *Fifty-sixth Session, Supplement No. 17 (A/56/17)*, para. 351.

³ *Ibid.*, para. 357.

3. After discussion, the Commission decided to entrust a working group with the task of developing “an efficient legal regime for security rights in goods involved in a commercial activity, including inventory, to identify the issues to be addressed, such as the form of the instrument, the exact scope of the assets that can serve as collateral ...”.⁴

Emphasizing the importance of the matter and the need to consult with representatives of the relevant industry and practice, the Commission recommended that a two- to three-day colloquium be held.⁵

4. At its first session (New York, 20-24 May 2002), Working Group VI (Security Interests) had before it a first, preliminary draft legislative guide on secured transactions, prepared by the Secretariat (A/CN.9/WG.VI/WP.2 and Add.1-12), a report on an UNCITRAL-CFA international colloquium, held in Vienna from 20 to 22 March 2002 (A/CN.9/WG.VI/WP.3), and comments by the European Bank for Reconstruction and Development (EBRD) (A/CN.9/WG.VI/WP.4). At that session, the Working Group considered chapters I to V and X (A/CN.9/WG.VI/WP.2 and Add.1-5 and 10), and requested the Secretariat to revise these chapters (A/CN.9/512, para. 12). At the same session, the Working Group considered suggestions for the presentation of modern registration systems in order to provide the Working Group with information necessary to address concerns expressed with respect to registration of security rights in movable property (see A/CN.9/512, para. 65). In addition, the Working Group agreed on the need to ensure, in cooperation with Working Group V (Insolvency Law), that issues relating to the treatment of security rights in insolvency proceedings would be addressed consistently with the conclusions of Working Group V on the intersection of the work of Working Group V and Working Group VI (see A/CN.9/512, para. 88 and A/CN.9/511, paras. 126-127).

5. At its thirty-fifth session in 2002, the Commission had before it the report of Working Group VI (Security Interests) on the work of its first session (A/CN.9/512). The Commission expressed its appreciation to the Working Group for the progress made in its work. It was widely felt that, with that legislative guide, the Commission had a great opportunity to assist States in adopting modern secured transactions legislation, which was generally thought to be a necessary, albeit not sufficient in itself, condition for increasing access to low-cost credit, thus facilitating the cross-border movement of goods and services, economic development and ultimately friendly relations among nations.⁶ In that connection, the Commission noted with satisfaction that the project had attracted the attention of international, governmental and non-governmental organizations and that some of those took an active part in the deliberations of the Working Group. The comments submitted to Working Group VI, in particular by the European Bank on Reconstruction and Development (A/CN.9/WG.VI/WP.4), were mentioned as an indication of that interest.

6. At that session, the feeling was widely shared that the timing of the Commission’s initiative was most opportune both in view of the relevant legislative initiatives under way at the national and the international level and in view of the Commission’s own initiative in the field of insolvency law. In that connection, the Commission noted with particular satisfaction the efforts undertaken by Working Group V (Insolvency Law) and Working Group VI towards coordinating their work on a subject of common interest such as the treatment of security interests in the case of insolvency proceedings. Strong support was expressed for such coordination, which was generally thought to be of crucial importance

⁴ Ibid., para. 358.

⁵ Ibid., para. 359.

⁶ Ibid., *Fifty-seventh Session, Supplement No. 17* (A/57/17), para. 202.

for providing States with comprehensive and consistent guidance with respect to the treatment of security interests in insolvency proceedings. The Commission endorsed a suggestion made to revise the insolvency chapter of the draft legislative guide on secured transactions in light of the core principles agreed by Working Groups V and VI (see A/CN.9/511, paras. 126-127 and A/CN.9/512, para. 88). The Commission stressed the need for continued coordination and requested the Secretariat to consider organizing a joint session of the two Working Groups in December 2002.⁷

7. After discussion, the Commission confirmed the mandate given to the Working Group at its thirty-fourth session to develop an efficient legal regime for security interests in goods, including inventory. The Commission also confirmed that the mandate of the Working Group should be interpreted widely to ensure an appropriately flexible work product, which should take the form of a legislative guide.⁸

8. At its second session (Vienna, 17-20 December 2002), the Working Group considered chapters VI, VII and IX (A/CN.9/WG.VI/WP.2 and Add.6, 7 and 9) of the first preliminary draft guide on secured transactions, prepared by the Secretariat. At that session, the Working Group requested the Secretariat to prepare revised versions of those chapters (see A/CN.9/531, para. 15). In conjunction with that session and in accordance with suggestions made at the first session of the Working Group (see A/CN.9/512, para. 65), an informal presentation of the registration systems of security rights in movable property of New Zealand and Norway was held. Immediately before that session, Working Groups V (Insolvency Law) and VI (Security Interests) held their first joint session (Vienna, 16-17 December 2002), during which the revised version of former chapter X (new chapter IX; A/CN.9/WG.VI/WP.6/Add.5) on insolvency was considered. At that session, the Secretariat was requested to prepare a revised version of that chapter (see A/CN.9/535, para. 8).

9. At its third session (New York, 3-7 March 2003), the Working Group considered chapters VIII, XI and XII of the first preliminary draft guide on secured transactions and chapters II and III of the second version of the draft Guide (A/CN.9/WG.VI/WP.2/Add.8, A/CN.9/WG.VI/WP.2/Add.11, A/CN.9/WG.VI/WP.2/Add.12, A/CN.9/WG.VI/WP.6/Add.2 and A/CN.9/WG.VI/WP.6/Add.3) and requested the Secretariat to prepare revised versions (A/CN.9/532, para. 13). In conjunction with that session, an informal presentation was made of the recently completed secured transactions law in the Slovak Republic, which was supported by the World Bank and by EBRD.

10. At its thirty-sixth session in 2003, the Commission had before it the reports of Working Group VI (Security Interests) on the work of its second and third sessions (A/CN.9/531 and A/CN.9/532), as well as the report of the first joint session of Working Group V and VI (A/CN.9/535). The Commission commended the Working Group for the progress in its work and expressed its appreciation to Working Group V and Working Group VI for the coordination of their work in relation to the treatment of security rights in insolvency proceedings. The Commission also noted with appreciation the presentation of modern registration systems of security rights in movable property and the plan of the Secretariat to prepare a paper addressing technical registration-related issues.⁹

11. In addition, the Commission emphasized the importance of coordination with organizations with interest and expertise in the field of secured transactions law, such as UNIDROIT, the Hague Conference on Private International Law, the World Bank, the

⁷ Ibid., para. 203.

⁸ Ibid., para. 204.

⁹ Ibid., *Fifty-eighth Session, Supplement No. 17* (A/58/17), para. 217.

International Monetary Fund, EBRD and the Asian Development Bank. Reference was made to the current work of UNIDROIT on security rights in securities, to the World Bank's Principles and Guidelines for Effective Insolvency and Creditor Rights Systems to the extent they concerned secured transactions, to the Model Law on Secured Transactions and the Principles of EBRD, to the Asian Development Bank's Guide to Movable Registries and to the Inter-American Model Law on Secured Transactions of 2002 prepared by the Organization of American States. Reference was also made to the need to coordinate with the Hague Conference with respect to the conflict-of-laws chapter of the draft legislative guide on secured transactions, in particular with respect to the law applicable to the enforcement of security rights in the case of insolvency.¹⁰

12. With respect to the scope of work, the Commission noted suggestions that the Working Group should consider covering, in addition to goods (including inventory), trade receivables, letters of credit, deposit accounts and intellectual property rights in view of their economic importance as security for credit. As to the substance of the draft legislative guide, the Commission noted statements that, while the draft guide should discuss various workable approaches, it should also include recommendations and, that if alternative recommendations had to be prepared, their relative merits, in particular for developing countries and for countries with economies in transition, should also be discussed.¹¹

13. After discussion, the Commission confirmed the mandate given to Working Group VI at its thirty-fourth session to develop an efficient legal regime for security rights in goods, including inventory, and its decision at its thirty-fifth session that the mandate should be interpreted widely to ensure an appropriate work product, which should take the form of a legislative guide. The Commission also confirmed that it was up to the Working Group to consider the exact scope of its work and, in particular, whether trade receivables, letters of credit, deposit accounts and intellectual and industrial property rights should be covered in the draft legislative guide.¹²

14. At its fourth session (Vienna, 8-12 September 2003), the Working Group considered chapters I (Introduction), II (Key Objectives), IV (Creation), IX (Insolvency) and paragraphs 1 to 41 of chapter VII (Priority), and requested the Secretariat to prepare revised versions of those chapters (see A/CN.9/543, para. 15).

15. At its fifth session (New York, 22-25 March 2004), the Working Group considered the summary and recommendations of chapters V (Publicity), VI (Priority), X (Conflicts of Laws) and requested the Secretariat to prepare revised versions of those chapters (see A/CN.9/549, para. 16).

16. At their second joint session (New York, 26 and 29 March 2004), Working Groups V (Insolvency Law) and VI (Security Interests) considered the treatment of security interests in the draft Legislative Guide on Insolvency Law on the basis of document A/CN.9/WG.V/WP.71 (see A/CN.9/550, para. 11).

17. At its thirty-seventh session in 2004, the Commission had before it the reports of Working Group VI (Security Interests) on the work of its fourth and fifth sessions (A/CN.9/543 and A/CN.9/549), as well as the report of the second joint session of Working Groups V and VI (A/CN.9/550). The Commission commended the Working Group for the progress achieved so far and expressed its appreciation to Working Groups V and VI for the progress made during their second joint session, at which they

¹⁰ Ibid., para. 218.

¹¹ Ibid., paras. 220-221.

¹² Ibid., para. 222.

had considered pending issues of common interest.¹³

18. In addition, the Commission noted with appreciation the progress made by the Working Group in the coordination of its work on conflict of laws with the Hague Conference on Private International Law and in particular the plans for a joint meeting of experts. The Commission also commended the efforts to coordinate with the International Institute for the Unification of Private Law (UNIDROIT), which was preparing a text on security interests in securities. The Commission also expressed its appreciation for the coordination with the World Bank, which was preparing principles and guidelines for effective insolvency and creditor rights systems, and in particular for the agreement that the World Bank text would form with the draft legislative guide on secured transactions a single international standard.¹⁴

19. The Commission noted with interest that a preliminary consolidated set of recommendations might be ready by early 2005. The Commission also welcomed the preparation of additional chapters on various types of asset, such as negotiable instruments and documents, bank accounts, letters of credit and intellectual property rights. In that connection, while the importance of those types of asset was generally recognized, it was stated that including them in the draft guide should not be at the expense of slowing down work with respect to the core assets within the scope of the draft guide (i.e. goods, including inventory, and receivables).¹⁵

20. After discussion, the Commission confirmed the mandate given to Working Group VI at the thirty-fourth session of the Commission and subsequently confirmed at its thirty-fifth and thirty-sixth sessions. The Commission also requested the Working Group to expedite its work so as to submit the draft guide to the Commission for final adoption as soon as possible and, hopefully, in 2006.¹⁶

21. At its sixth session (Vienna, 27 September-1 October 2004), the Working Group considered chapters I and II (Introduction and key objectives), III (Basic approaches to security), IV (Creation), V (Effectiveness against third parties), VII (Pre-default rights and obligations), VIII (Default and enforcement), X (Conflict of laws) and XI (Transition) and requested the Secretariat to revise those chapters to reflect the deliberations and decisions of the Working Group (see A/CN.9/570, para. 8). At that session, the Working Group noted with appreciation that the conflicts-of-laws chapter of the Guide was being prepared in close cooperation with the Hague Conference on Private International Law (A/CN.9/570, para. 75).

22. At its seventh session (New York, 24-28 January 2005), the Working Group considered chapters X (Conflict of laws), XII (Acquisition financing devices) and XVI (Security rights in bank accounts) and requested the Secretariat to revise those chapters to reflect the deliberations and decisions of the Working Group (see A/CN.9/574, para. 8).

23. At its thirty-eighth session (2005), the Commission had before it the reports of Working Group VI (Security Interests) on the work of its sixth and seventh sessions (A/CN.9/570 and A/CN.9/574 respectively). The Commission commended the Working Group for the progress achieved thus far, noted with interest the progress made by the Working Group in the coordination of its work with the Hague Conference on Private International Law, the International Institute for the Unification of Private Law

¹³ Ibid., *Fifty-ninth Session, Supplement No. 17* (A/59/17), para. 75.

¹⁶ Ibid., para. 78.

(UNIDROIT), the World Bank and the World Intellectual Property Organization and requested the Working Group to expedite its work so as to submit the draft legislative guide to the Commission, at least for approval in principle, in 2006, and for final adoption in 2007.¹⁷

24. At its eighth session (Vienna, 5-9 September 2005), the Working Group considered recommendations in chapters VII (Pre-default rights and obligations), VIII (Default and enforcement), IX (Insolvency), X (Acquisition financing) and XI (Conflict of laws). It also considered terminology and recommendations related to: (i) negotiable instruments and negotiable documents (definitions (w) and (x), as well as recommendations 3 (d) and 24); (ii) proceeds from a drawing under an independent undertaking (definitions (y), (z), (aa) and (bb), as well as recommendations 25, 49, 62, 106 and 138); and intellectual property rights (definition (dd), and recommendation 3 (h)) (see A/CN.9/588, para. 8).

25. At its ninth session (New York, 30 January-3 February 2006), the Working Group considered recommendations in chapters V (Effectiveness against third parties), VI (Priority) and X (Acquisition financing devices) and requested the Secretariat to revise those chapters to reflect the deliberations and decisions of the Working Group (see A/CN.9/593, para. 8). At that session, in view of the expectation of the Commission to approve in principle the substance of the recommendations of the draft Guide at its thirty-ninth session, which was scheduled to take place in New York from 19 June to 7 July 2006, the Working Group agreed to hold an extra session, its tenth session, in New York from 1 to 5 May 2006 (see A/CN.9/593, para. 97).

Draft Legislative Guide on Secured Transactions

ADDENDUM

CONTENTS

	<i>Paragraphs</i>	<i>Page</i>
Draft legislative guide on secured transactions	1-51	
I. Introduction	1-36	
A. Purpose	1-8	
B. Scope	9-20	
C. Terminology	21	
D. Examples of financing practices covered in the Guide	22-32	
1. Inventory and equipment acquisition financing	23-28	
2. Inventory and receivable revolving loan financing	29-31	
3. Securitization	32-34	
4. Term-loan financing	35-37	
5. Transfer of title for security purposes	38	
6. Sale and leaseback transactions	39	
II. Key objectives of an effective and efficient secured transactions regime	40-51	
A. Promote secured credit	41	
B. Allow utilization of the full value inherent in assets to support credit in a broad array of credit transactions	42	
C. Enable parties to obtain security rights in a simple and efficient manner	43	
D. Recognize party autonomy	44	
E. Provide for equal treatment of diverse sources of credit	45	
F. Validate non-possessory security rights	46	
G. Encourage responsible behaviour on the part of all parties by enhancing predictability and transparency	47	
H. Establish clear and predictable priority rules	48	
I. Facilitate enforcement of creditor's rights in a predictable and efficient manner	49	
J. Balance the interests of the affected persons	50	
K. Harmonize secured transactions laws, including conflict-of-laws rules	51	

I. Introduction

A. Purpose

1. The purpose of this Guide is to assist States in the development of modern secured transactions laws with a view to promoting the availability of low-cost secured credit. The Guide is intended to be useful to States that do not currently have efficient and effective secured transactions laws, as well as to States that already have workable laws but wish to review or modernize them, or to harmonize or coordinate their laws with those of other States.

2. The Guide is based on the premise that sound secured transactions laws can have significant economic benefits for States that adopt them, including attracting credit from domestic and foreign lenders and other credit providers, promoting the development and growth of domestic businesses (particularly small and medium-size enterprises), and generally increasing trade. Such laws also benefit consumers by lowering prices for goods and services and making low-cost consumer credit more readily available. To be effective, such laws must be supported by efficient and effective judicial systems and other enforcement mechanisms. They must also be supported by insolvency laws that respect rights derived from secured transactions laws (see UNCITRAL Legislative Guide on Insolvency Law).

3. The Guide seeks to rise above differences among legal regimes to suggest pragmatic and proven solutions that can be accepted and implemented in States having divergent legal traditions. The focus of the Guide is on developing laws that achieve practical economic benefits for States that adopt them. While it is possible that States will have to incur predictable, yet limited, costs to develop and implement these laws, substantial experience suggests that the resulting short- and long-term benefits to such States should greatly outweigh the costs.

4. All businesses, whether manufacturers, distributors, service providers or retailers, require working capital to operate, to grow and to compete successfully in the marketplace. It is well established, through studies conducted by such organizations as the International Bank for Reconstruction and Development (the World Bank), the International Monetary Fund, the Asian Development Bank and the European Bank for Reconstruction and Development (EBRD), that one of the most effective means of providing working capital to commercial enterprises is through secured credit.

5. The key to the effectiveness of secured credit is that it allows businesses to use the value inherent in their assets as a means of reducing risk for the creditor. Risk is reduced because credit secured by assets gives creditors access to the assets as another source of payment in the event of non-payment of the secured obligation. As the risk of non-payment is reduced, the availability of credit increases and the cost of credit falls.

6. A legal system that supports secured credit transactions is critical to reducing the perceived risks of credit transactions and promoting the availability of secured credit. Secured credit is more readily available to businesses in States that have efficient and effective laws that provide for consistent, predictable outcomes for creditors in the event of non-performance by debtors. On the other hand, in States that do not have efficient and effective laws, where creditors perceive the legal risks associated with credit transactions to be high, the cost of credit increases as creditors require increased compensation to evaluate and assume the increased risk. In some States, the absence of an efficient and effective secured transactions regime, or of an insolvency law regime under which security

rights are recognized, has resulted in the virtual elimination of credit for small and medium-size commercial enterprises, as well as for consumers.

7. By aiding in the cultivation and growth of individual businesses, creating a legal regime that promotes secured credit can have a positive effect upon the general economic prosperity of a State. Thus, States that do not have an efficient and effective secured transactions regime may deny themselves a valuable economic benefit.

8. To best promote the availability of low-cost secured credit, the Guide suggests that secured transactions laws should be structured to enable businesses to utilize the value inherent in their property to the maximum extent possible to obtain credit. In this regard, the Guide adopts two of the most essential concepts of successful secured transactions laws, the concepts of priority and effectiveness against third parties. The concept of priority, which allows for the concurrent existence of security rights having different priority status in the same assets, makes it possible for a business to utilize the value of its assets to the maximum extent possible by obtaining secured credit from more than one creditor using the same assets as security with transparent rules allowing each creditor to know the priority of its security right. The concept of effectiveness against third parties, in the form of a system allowing, *inter alia*, the registration of a notice concerning security rights, is designed to promote legal certainty with regard to the relative priority status of creditors and thus to reduce the risks and costs associated with secured transactions.

B. Scope

9. The Guide deals with consensual security rights. However, it contains references to non-consensual rights, such as those provided by statute or judicial process, when the same property is subject to both consensual and non-consensual security rights and the law must provide for the relative priority of such rights (see A/CN.9/WG.VI/WP.14/Add.1, paras. 56-61 and 82-85). The primary focus of the Guide is on core commercial assets, such as commercial goods (inventory and equipment) and trade receivables. However, the Guide proposes that all types of assets are capable of being the object of a security right, including all present and future assets of a business, and covers all assets, both tangible and intangible, with the exception of assets specifically excluded.

10. Immovable property, securities and wages are types of asset that are subject to an outright exclusion. Immovable property (with the exception of fixtures, which are covered by the Guide and can be subjected to security rights) is excluded as it raises different issues and is subject to a special title registration system indexed by asset and not by grantor. In addition, the Guide does not cover security rights in securities as original encumbered assets because the nature of securities and their importance for the functioning of financial markets raise a broad range of issues that merit special legislative treatment. The substantive law issues relating to security and other rights in securities held with an intermediary are dealt with in a draft Convention being prepared by the International Institute for the Unification of Private Law (Unidroit). The private international law issues with respect to that subject matter are not addressed in this Guide since they are dealt with in the Hague Convention on the Law applicable to Certain Rights in Respect of Securities (The Hague, December 2002). The Guide is structured in such a way that the State enacting legislation based on the regime envisaged in the Guide can, at the same time, implement the texts prepared by Unidroit and the Hague Conference, as well as relevant texts prepared by UNCITRAL, such as the United Nations Convention on the Assignment of Receivables in International Trade (New York, December 2001; herein after referred to

as “the United Nations Assignment Convention”) and the UNCITRAL Legislative Guide on Insolvency Law.

[Note to the Working Group: The Working Group may wish to note that, if it adopts a qualified exclusion of securities and immovable property (see A/CN.9/WG.VI/WP.26/Add.7, note to rec. 3 (g)), para. 10 would need to be revised. Similarly, if rec. 4 (d) is adopted, the commentary should include some explanation. Similar amendments may need to be made depending on the decisions of the Working Group on the issues raised in the notes to rec. 3 (d) and (f).]

11. Security rights in wages are excluded based on the policy of protecting individual and family life. Any additional exclusions based on competing policy objectives should be limited in number and in scope, should be clearly stated in the law and should be adopted only after their potential benefit has been carefully weighed against the social and economic policy underlying the secured transactions law of promoting the availability of low-cost credit.

12. Some assets, such as ships, aircraft [and intellectual property rights] are in whole or in part subject to special laws. Security rights in such assets are not excluded but, in the case of any inconsistency between such a special law and secured transactions law, the special law (e.g. the special registration system) prevails.

13. In particular, the Guide does not address issues specific to security rights in intellectual property rights and it does not make recommendations concerning those issues. However, in developing its secured transactions law, a State should take account of the increasing importance and economic value of intellectual property assets to companies seeking to obtain low-cost secured credit. Subject to the limitations discussed in the following paragraph, the secured transactions law would apply to security interests in intellectual property rights.

14. When adopting a secured transaction regime, a State should take into account the particular characteristics of, and national laws applicable to, intellectual property, as well as the State’s obligations under international intellectual property treaties, conventions and other international agreements. Accordingly, when implementing the recommendations of the Guide, a State should give careful consideration to situations in which the existing legal regime and characteristics of intellectual property are sufficiently unique as to justify the adjustment of those recommendations when the encumbered assets include intellectual property rights. If upon examination there is found to be a direct inconsistency between the State’s intellectual property laws or obligations under intellectual property treaties, conventions and other international agreements, in particular insofar as they establish a rule for the creation, effectiveness against third parties, priority or enforcement of security rights in intellectual property, then the State’s secured transactions law should provide that the intellectual property laws and obligations will govern such issues to the extent of any inconsistency.

15. The Guide stresses the need to enable a grantor to create security rights not only in its existing assets but also in its future assets (i.e. assets acquired or created after the conclusion of the security agreement), without requiring the grantor or secured creditor to execute any additional documents or to take any additional action at the time such assets are acquired or created. This approach is consistent, for example, with the United Nations Assignment Convention, which provides for the creation of security rights in future receivables without requiring any additional steps to be taken. In addition, the Guide recommends recognition of a security right in all existing and future assets of a business grantor through a single security agreement such as already exists in some legal systems as an “enterprise mortgage” or as a combination of fixed and floating charges.

16. The Guide also recommends that a broad range of obligations, monetary and non-monetary, may be secured and that both physical and legal persons may be parties to a secured transaction, including consumers, subject to consumer-protection laws. In addition, the Guide is intended to cover a broad range of transactions that serve security functions, including those related to possessory and non-possessory security rights, as well as transactions not denominated as secured transactions (such as retention of title, transfer of title for security purposes, assignment of receivables for security purposes, financial leases, and sale and leaseback transactions and the like).

17. The legal regime envisaged in the Guide is a purely domestic regime. The recommendations of the Guide are addressed to national legislators considering reform of domestic secured transactions laws. However, because secured transactions often involve parties and assets located in different jurisdictions, the Guide also seeks to address the recognition of security rights and title-based security devices, such as retention of title and financial leases, effectively created in other jurisdictions. This would represent a marked improvement for the holders of those rights over the laws currently in effect in many States, under which such rights often are lost once an encumbered asset is transported across national borders, and would go far toward encouraging creditors to extend credit in cross-border transactions (see A/CN.9/WG.VI/WP.14/Add.4, paras. 21-25).

18. Throughout, the Guide seeks to establish a balance among the interests of debtors, creditors (whether secured, privileged or unsecured), affected third persons, buyers and other transferees, and the State. In so doing, the Guide adopts the premise, supported by substantial empirical evidence, that all creditors will accept such a balanced approach, and will thereby be encouraged to extend credit, as long as the laws (and supporting legal and governmental infrastructure) are effective to enable the creditors to assess their risks with a high level of predictability and with confidence that they will ultimately realize the economic value of the encumbered assets. Essential to this balance is a close coordination between the secured transactions and insolvency law regimes, including provisions pertaining to the treatment of security rights in the event of a reorganization or liquidation of a business. Additionally, certain debtors, such as consumer debtors, require additional protections. Thus, although the regime envisioned by the Guide will apply to many forms of consumer transactions, it is not intended to override consumer-protection laws or to discuss consumer-protection policies, since this matter does not lend itself to unification.

19. In the same spirit, the Guide also addresses concerns that have been expressed with respect to secured credit. One such concern is that providing a creditor with a priority claim to all or substantially all of a person's assets may appear to limit the ability of that person to obtain financing from other sources. Another concern is the potential ability of a secured creditor to exercise influence over a business, to the extent that the creditor may seize, or threaten seizure of, the encumbered assets of that business upon default. Yet another concern is that in some cases secured creditors may take most or all of a person's assets in the case of insolvency and leave little for unsecured creditors, some of whom are not in a position to bargain for a security right in those assets. The Guide discusses these concerns and, in those situations where the concerns appear to have merit, suggests solutions.

20. The Guide builds on the work of UNCITRAL and other organizations. Such work includes: the EBRD Model Law on Secured Transactions, completed in 1994; the EBRD General principles of a modern secured transactions law, completed in 1997; the OHADA Uniform Act Organizing Securities, prepared in 1997; the study on Secured Transactions Law Reform in Asia, prepared by the Asian Development Bank in 2000; the United Nations Assignment Convention, adopted in 2001; the Convention on International Interests in Mobile Equipment, adopted in 2001, and the relevant protocols; the

Convention on the Law Applicable to Certain Rights in respect of Securities held with an Intermediary, adopted in 2001; the Organization of American States (OAS) Model Inter-American Law on Secured Transactions, prepared in 2002; the UNCITRAL Legislative Guide on Insolvency Law, completed in 2004; [the UNIDROIT Convention on Substantive Rules regarding Intermediated Securities; and [...]].

C. Terminology

21. This Guide adopts terminology to express the concepts that underlie an effective secured transactions regime. The terms used are not drawn from any particular legal system. Even when a particular term appears to be the same as that found in a particular national law, the meaning given to the term may differ. This approach is taken to provide readers with a common vocabulary and conceptual framework and to encourage harmonization of the law governing security rights. The following paragraphs therefore identify the principal terms used and the core meaning given to them in this Guide. The meaning of those terms is further refined when they are used in subsequent chapters. Those chapters also define and use additional terms (as is the case, for example, with the insolvency and the acquisition finance chapters). “Or” is not intended to be exclusive; use of the singular also includes the plural and vice versa; “include” and “including” are not intended to indicate an exhaustive list; “may” indicates permission and “should” indicates instruction; and “such as” and “for example” are to be interpreted in the same manner as “include” or “including”. [“Creditors” should be interpreted as including both the creditors in the forum State and foreign creditors, unless otherwise specified.] References to “person” should be interpreted as including both natural and legal persons, unless otherwise specified. The term “law” throughout the draft Guide is intended to include both statutory and non-statutory law. The phrase “law governing negotiable instruments” or similar expression encompasses all law that applies to negotiable instruments, including not only negotiable instrument law but also contract and other law that might be applicable.

(a) “Security right” means a consensual property right in movable property and attachments that secure payment or other performance of one or more obligations, regardless of whether the parties have designated it as a security right. With respect to receivables, security right also means an outright transfer of a receivable, as well as a transfer by way of security. It includes acquisition security rights and non-acquisition security rights. [See *A/CN.9/WG.VI/WP.24/Add.5*.] References to a “security right” in this Guide also refer to the “right of an assignee”.

(b) “Acquisition security right” means a security right in an asset that secures the obligation to pay any unpaid portion of the purchase price of the asset or an obligation incurred to enable the grantor to acquire the asset. Acquisition security rights include those that are denominated as security rights, as well as rights acquired under retention-of-title sales, hire and-purchase transactions, financial leases and purchase-money lending transactions. “Grantor” of an acquisition security right includes a buyer, financial lessee or grantor in a purchase-money lending transaction. “Acquisition financier” means the secured creditor with an acquisition security right and includes a retention-of-title seller, financial lessor or purchase-money lender. [See *A/CN.9/WG.VI/WP.24/Add.5*]

(c) “Secured obligation” means the obligation secured by a security right.

(d) “Secured creditor” means a creditor that has a security right. References to the “secured creditor” in this Guide also refer to the “assignee”. [See *A/CN.9/WG.VI/WP.26*]

(e) “Debtor” means a person that owes performance of the secured obligation [and includes secondary obligors, such as guarantors of a secured obligation]. The debtor may or may not be the person that grants the security right to a secured creditor (see grantor).

(f) “Grantor” means a person that creates a security right in one or more of its assets in favour of a secured creditor to secure either its own obligation or that of another person (see debtor of the receivable). References to the “grantor” in this Guide also refer to the “assignor”.

[Note to the Working Group: The Working Group may wish to note that the second sentence in the definitions of “security right”, “secured creditor” and “grantor” is intended to ensure that the general recommendations apply to security rights in receivables and to outright transfers of receivables, unless otherwise provided.]

(g) “Security agreement” means an agreement between a grantor and a creditor, in whatever form or terminology, that creates a security right.

(h) “Encumbered asset” means property that is subject to a security right. The property may be tangible or intangible. Each of these two general types of property includes various categories, some of which fall within particular defined terms used in the Guide.

(i) “Tangibles” means all forms of corporeal movable property. Among the categories of tangibles are inventory, equipment, attachments, negotiable instruments and negotiable documents.

(j) “Inventory” means a stock of tangibles held for sale or lease in the ordinary course of business and also raw and semi-processed materials (work-in-process).

(k) “Equipment” means tangibles used by a person in the operation of its business.

(l) “Attachments to immovable property” means tangibles that are so physically attached to immovable property as to be treated as immovable property without however losing their identity as movables under the law of the State where the immovable property is located. *[See A/CN.9/WG.VI/WP.26/Add.4]*

(m) “Attachments to movable property” means tangibles that are so physically attached to other movable property [as to be treated as part of that movable property], without however losing their identity under law other than this law. *[See A/CN.9/WG.VI/WP.26/Add.4]*

(n) “Mass or product” means tangibles other than money that are so physically associated or united with each other that they lose their separate identity under law other than this law. *[See A/CN.9/WG.VI/WP.26/Add.4]*

(o) “Intangibles” means all forms of movable property other than tangibles. Among the categories of intangibles are claims and receivables.

(p) “Receivable” means a [contractual] right to the payment of a monetary obligation excluding rights to payment evidenced by a negotiable instrument, the obligation to pay under an independent undertaking and the obligation of a bank to pay funds credited to a bank account.

[Note to the Working Group: The Working Group may wish to recall that, at its tenth session, it decided that non-contractual receivables should be covered (see A/CN.9/603, para. 36). This result may be achieved by limiting the definition of receivables to contractual receivables and clarifying in the commentary that the general recommendations apply to non-contractual receivables. Alternatively, the definition of

“receivable” might be retained as is but the definition of “original contract” might need to be revised to address the sources of non-contractual receivables. In addition, new recommendations might need to be added to ensure that: (i) recommendations 13 and 14 (dealing with statutory limitations on assignability) do not affect statutory limitations to the assignability of non-contractual receivables and (ii) that recommendations 16 bis and ter (dealing with representations of the assignor) do not apply to security rights in non-contractual receivables.]

(q) “Assignment” means the creation of a security right in a receivable, including an outright transfer of a receivable. [See article 2 (a) of the United Nations Assignment Convention.]

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that the creation of a security right in a receivable includes an outright transfer of receivables by way of security, which is treated in the draft Guide as a security right.]

(r) “Assignor” means the person that makes an assignment of a receivable. [See article 2 (a) of the United Nations Assignment Convention.]

(s) “Assignee” means the person to which an assignment of a receivable is made. [See article 2 (a) of the United Nations Assignment Convention.]

(t) “Subsequent assignment” means an assignment by the initial or any other assignee. In the case of a subsequent assignment, the person that makes that assignment is the assignor and the person to which that assignment is made is the assignee. [See article 2 (b) of the United Nations Assignment Convention.]

(u) “Debtor of the receivable” means a person liable for payment of a receivable. “Debtor of the receivable” includes a guarantor, as an accessory guarantee is a receivable. [See article 2 (a) of the United Nations Assignment Convention.]

[Note to the Working Group: The Working Group may wish to recall that, at its tenth session, it agreed that the word “account” should be deleted from the references to “the account debtor”. It is suggested that the term “account debtor” should be replaced by the term “debtor of the receivable”. This approach would result in avoiding confusion with the debtor of the secured obligation, as well as a major change to the whole draft Guide that may not be substantively correct (as the word “debtor” should refer to the debtor of the secured obligation). In addition, this approach is not inconsistent with the United Nations Assignment Convention, in which reference was made to “the debtor” rather than to the debtor of the receivable, since, unlike the draft Guide which covers many types of asset, the Convention covers only receivables. If the Working Group approves this change, the references to the “account debtor” throughout the draft Guide will be revised to refer to “the debtor of the receivable”.]

(v) “Notification of the assignment” means a communication in writing that reasonably identifies the assigned receivable and the assignee. [See article 5 (d) of the United Nations Assignment Convention]. The writing requirement is met by an electronic communication if the information contained therein is accessible so as to be usable for subsequent reference (see article 6 of the UNCITRAL Model Law on Electronic Commerce).

[Note to the Working Group: The Working Group may wish to note that the definition of “notification of the assignment” includes the rule contained in recommendation 9 (see A/CN.9/WG.VI/WP.26/Add.7). The Working Group may wish to note that reference to writing is made only in the notification of the assignment and the

notice of a security right, but not in the other notices referred to in the draft Guide (e.g. notice of intention to pursue extrajudicial enforcement).

Depending on whether the reference to signature is retained in recommendation 7 the Working Group may wish to consider whether the rule contained in recommendation 10 (see A/CN.9/WG.VI/WP.26/Add.7) that “signature” includes electronic signature should be reflected in the definitions. The Working Group may wish to note that reference to a “signed writing” is made, apart from recommendation 7, in recommendation 21 dealing with waiver of defences of the debtor of the receivable.]

(w) “Original contract” in the context of an assignment means the contract between the assignor and debtor of the receivable from which the receivable arises. [See article 5 (a) of the United Nations Assignment Convention.]

[Note to the Working Group: The Working Group may wish to note that the recommendations on receivables will make it clear that statutory limitations with respect to non-contractual receivables are not affected and the recommendation on representations of the assignor are not relevant with respect to statutory receivables (see A/CN.9/603, para. 36).]

(x) “Negotiable instrument” means an instrument that embodies a right to payment, such as a cheque, bill of exchange or promissory note which satisfies the requirements for negotiability under the law governing negotiable instruments.

(y) “Negotiable document” means a document that embodies a right for delivery of tangibles, such as a warehouse receipt or a bill of lading, and satisfies the requirements for negotiability under the law governing negotiable documents.

(z) “Independent undertaking” means a letter of credit (commercial or standby), a confirmation of a letter of credit, an independent guarantee (demand, first demand, bank guarantee or counter-guarantee) or any other undertaking recognized as independent by law or practice rules, such as the United Nations Convention on Independent Guarantees and Standby Letters of Credit, the Uniform Customs and Practice for Documentary Credits, the International Standby Practices, and the Uniform Rules for Demand Guarantees.

(aa) “Proceeds under an independent undertaking” means the right to receive a payment due, a draft accepted or deferred payment or another item of value, in each case to be delivered by the guarantor/issuer honouring or by a nominated person giving value for, a draw under an independent undertaking. The term does not include[:] (i) the right to draw (i.e. to request payment) under an independent undertaking, or (ii) what is received upon honour of a drawing from the guarantor/issuer or nominated person or upon disposition of a right to drawing proceeds from an independent undertaking (i.e. the proceeds themselves).

[Note to the Working Group: the commentary will explain that the definition refers to “proceeds under an independent undertaking” to be consistent with terminology generally used in independent undertaking law and practice. The term as used in this Guide means the right of the grantor as beneficiary of an independent undertaking to receive whatever payment or other value is given under the independent undertaking contingent upon the beneficiary’s compliance with the terms and conditions of the independent undertaking. The term does not include the proceeds themselves, i.e. what is actually received upon honour of a drawing from the guarantor/issuer, confirmer or nominated person (a beneficiary’s receipt of value from a negotiating bank should not be characterized as honour or disposition) or upon disposition of a right to proceeds under an independent undertaking.]

The term “proceeds under an independent undertaking” refers to a right to receive even though the term “proceeds” as used in independent undertaking law and practice may refer either to the right to receive or to whatever is received under the independent undertaking, and even though the term “proceeds” as used elsewhere in the draft Guide refers to whatever is received. The commentary will highlight the distinction between a security right in proceeds under an independent undertaking (as an original encumbered asset) and the “proceeds” (a key concept of the draft Guide) of assets covered in the draft Guide. The Working Group will note that the reference to the “beneficiary-grantor” has been deleted as unnecessary. This is in line with the Guide’s treatment of the term “receivable” (the draft Guide does not define “receivable” in terms of the grantor). Moreover, at the time of the grant, the grantor may not yet be a beneficiary; indeed, the independent undertaking may not even exist at that time. The question of who is entitled to receive payment is a matter of other law (in the context of receivables, for example, the Guide does not specify who is entitled to receive payment of the receivable).]

(bb) “Guarantor/issuer” means a bank or other person that issues an independent undertaking.

(cc) “Confirmer” means a bank or other person that adds its own independent undertaking to that of the guarantor/issuer.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that, in line with article 6 (e) of the United Nations Guarantee and Standby Convention, a confirmation provides the beneficiary with the option of demanding payment from the confirmer in conformity with the terms and conditions of the confirmed independent undertaking instead of from the guarantor/issuer.]

(dd) “Nominated person” means a bank or other person that is identified in an independent undertaking by name or type (e.g. “any bank in country X”) as being nominated to give value, i.e. to purchase or pay upon presentation of documents, and that acts pursuant to that nomination.

(ee) A secured creditor has “control” with respect to proceeds under an independent undertaking: (i) automatically upon the creation of the security right if the guarantor/issuer, confirmer or nominated person is the secured creditor, or (ii) if the guarantor/issuer, confirmer or nominated person has made an acknowledgment in favour of the secured creditor. “Acknowledgment” with respect to proceeds under an independent undertaking means that the guarantor/issuer, confirmer or nominated person that will pay or otherwise give value upon a draw under an independent undertaking has, unilaterally or by agreement: (i) acknowledged or consented to (however evidenced) the creation of a security right (whether denominated as an assignment or otherwise) in favour of the secured creditor in the proceeds from an independent undertaking, or (ii) has obligated itself to pay or give value to the secured creditor upon a draw under an independent undertaking.

[Note to the Working Group: The Working Group may wish to note that the commentary will include language that the definitions must be read together with all recommendations relating to independent undertakings (3 (d), 16, 25, 25 bis, 25 ter, 25 quater, 49, 62, 106, 138 and 138 bis).]

(ff) “Bank account” means an account that is maintained by a bank into which funds may be deposited or credited. The term includes a chequing or other current account, as well as a savings or time-deposit account. The term does not include a claim against the bank arising under law governing negotiable instruments.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that the right to payment of funds credited to a bank account covers a right to the payment of funds transferred into an internal account of the bank and not applied to any obligations owing to the bank. The commentary will also explain that funds transferred to the bank by way of anticipated reimbursement of a future payment obligation that the bank has accepted in the ordinary course of its banking business is also covered to the extent that the person that gave the bank instructions has a claim to those funds if the bank does not make the future payment.]

(gg) A secured creditor has “control” with respect to a right to payment of funds credited to a bank account: (i) automatically upon the creation of a security right if the depositary bank is the secured creditor; (ii) if the depositary bank has concluded a control agreement with the grantor and the secured creditor, according to which the depositary bank has agreed to follow instructions from the secured creditor with respect to the right to payment of funds credited to the bank account without further consent of the grantor; or (iii) if the secured creditor is the account holder.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that: (i) there is no obligation on a depositary bank to enter into a control agreement; (ii) that a secured creditor’s rights will be subject to the rights and obligations of the depositary bank under law and practice governing bank accounts; (iii) a control agreement requires the consent of the grantor (as well as of the depositary bank) and the grantor retains the right to deal with the funds in the bank account until the secured creditor instructs the depositary bank otherwise (although in some control agreements, the funds would be blocked from the time of the conclusion of the control agreement). The commentary will also explain that (iii) covers situations where: (i) an existing account is transferred to the secured creditor, (ii) the secured creditor agrees with the grantor that funds should be deposited to an account to be opened later and (iii) the secured creditor is the only account holder (i.e. not merely a joint account holder).]

(hh) “Intellectual property right” includes, subject to law other than the secured transactions law, patents, trademarks, service marks, trade secrets, copyright and related rights and designs. It also includes rights under licences of such rights.

(ii) “Proceeds” means whatever is received in respect of encumbered assets. For example, proceeds include what is received as a result of sale or other disposition or collection, lease, licence, proceeds of proceeds, civil and natural fruits, dividends, distributions, insurance proceeds and claims arising from defects, damage or loss. *[See A/CN.9/WG.VI/WP.26/Add.4, as well as note in A/CN.9/WG.VI/WP.26/Add.7, note to rec. 3 (g).]*

(jj) “Priority” means the right of a person to derive the economic benefit of its security right in an encumbered asset in preference to a competing claimant.

(kk) “Competing claimant” means:

- (i) Another secured creditor with a security right in the same encumbered asset (whether as an original encumbered asset or proceeds);
- (ii) In the context of the non-unitary system for acquisition security rights, the seller or financial lessor of the same encumbered asset that has retained title to it;
- (iii) Another creditor of the grantor asserting a right in the same encumbered asset (e.g. by operation of law, attachment or seizure or a similar process);
- (iv) The insolvency representative in the insolvency of the grantor; or

(v) Any buyer or other transferee (including a lessee or licensee) of the encumbered asset.

(ll) “Possessory security right” means a security right in tangibles that are in the actual possession of the secured creditor or of another person (other than the debtor or other grantor) holding the asset for the secured creditor.

(mm) “Non-possessory security right” means a security right in: (i) tangibles that are not in the actual possession of the secured creditor or another person holding the tangibles for the benefit of the secured creditor, or (ii) intangibles.

[Note to the Working Group: The Working Group may wish to consider whether the (ll) and (mm) are necessary after the decision not to make such a distinction between possessory and non-possessory security rights. The terms are used only in recs. 1 (f) and 3 (c).]

(nn) “Possession”, except as the term is used in recommendations [28 and 80] with respect to the issuer of a negotiable document, means the actual possession of tangibles by a person or an agent or employee of that person, or by another person holding on behalf of that person, or an independent person that acknowledges that it holds for that person. It does not include constructive, fictive or symbolic possession.

(oo) “Issuer” of a negotiable document means the person who is obligated to deliver the tangibles covered by the document under the law governing negotiable documents.

[Note to the Working Group: The Working Group may wish to note that the commentary will explain that, in the case of a so-called multimodal bill of lading (if it qualifies as a negotiable document under the applicable law), the “issuer” may be a person who subcontracts various portions of the transport of the goods to other persons but still takes responsibility for their transport and for any damage that might occur during carriage.]

(pp) “Dispossession of the grantor” means the actual delivery of possession of the assets to be encumbered to the secured creditor or a third person (other than the grantor or an agent or employee of the grantor) that holds the assets on behalf of the secured creditor or to an independent person who acknowledges that it holds for the secured creditor.

(qq) “Insolvency court” means a judicial or other authority competent to control or supervise an insolvency proceeding.

(rr) “Insolvency estate” means assets and rights of the debtor that are controlled or supervised by the insolvency representative and subject to the insolvency proceedings.

(ss) “Insolvency proceedings” means collective judicial or administrative proceedings for the purposes of either reorganization or liquidation of the debtor’s business conducted according to the insolvency law.

(tt) “Insolvency representative” means a person or body responsible for administering the insolvency estate.

(uu) “Buyer in the ordinary course of business” means a person that buys inventory in the ordinary course from a person in the business of selling tangibles of that kind and without knowledge that the sale violates the security rights or other rights of another person in the tangibles.

D. Examples of financing practices covered in the Guide

22. Set forth below are short examples of the types of secured credit transactions that the Guide is designed to encourage, and to which reference will be made throughout the Guide to illustrate specific points. These examples represent only a few of the numerous forms of secured credit transactions currently in use, and an effective secured transactions regime must be sufficiently flexible to accommodate many existing methods of financing, as well as methods that may evolve in the future.

1. Inventory and equipment acquisition financing

23. Businesses often obtain financing for specific purchases of inventory or equipment. In many cases, the financing is provided by the seller of the tangibles (inventory and equipment) purchased. In other cases, the financing is provided by a lender. Sometimes the lender is an independent third party, but in other cases the lender may be an affiliate of the seller. The seller retains title or the lender is granted a security right in the tangibles purchased to secure the repayment of the credit or loan.

24. Here is an illustration of acquisition financing: ABC Manufacturing Company (ABC), a manufacturer of furniture, wishes to acquire certain inventory and equipment for use in manufacturing operations. ABC desires to purchase paint (constituting raw materials and, therefore, inventory) from Vendor A. ABC also wishes to purchase certain drill presses (constituting equipment) from Vendor B and certain conveyor equipment from Vendor C. Finally, ABC wishes to lease certain computer equipment from Lessor A.

25. Under the purchase agreement with Vendor A, ABC is required to pay the purchase price for the paint within thirty days of Vendor's A invoice to ABC, and ABC grants to Vendor A a security right in the paint to secure the purchase price. Under the purchase agreement with Vendor B, ABC is required to pay the purchase price for the drill presses within ten days after they are delivered to ABC's plant. ABC obtains a loan from Lender A to finance the purchase of the drill presses from Vendor B, secured by a security right in the drill presses. ABC also maintains a bank account with Lender A and has granted Lender A a security right in the bank account as additional security for the repayment of the loan.

26. Under the purchase agreement with Vendor C, ABC is required to pay the purchase price for the conveyor equipment when it is installed in ABC's plant and rendered operational. ABC obtains a loan from Lender B to finance the purchase and installation of the conveyor equipment from Vendor C, secured by a security right in the conveyor equipment.

27. Under the lease agreement with Lessor A, ABC leases the computer equipment from Lessor A for a period of two years. ABC is required to make monthly lease payments during the lease term. ABC has the option (but not the obligation) to purchase the equipment for a nominal purchase price at the end of the lease term. Lessor A retains title to the equipment during the lease term but title will be transferred to ABC at the end of the lease term if ABC exercises the purchase option. This type of lease is often referred to as a "financial lease". Under some forms of financial leases, title to the leased property is transferred to the lessee automatically at the end of the lease term. A financial lease is to be distinguished from what is usually called an "operating lease". Under an operating lease, the leased property is expected to have a remaining useful life at the end of the lease term and the lessee does not have an option to purchase the leased property at the end of the

lease term for a nominal price, nor is title to the leased property transferred to the lessee automatically at the end of the lease term.

28. In each of the above four cases, the acquisitions are made possible by means of acquisition financing provided by another person (seller, lender or financial lessor) who holds rights in the acquired property for the purpose of securing the acquisition financing granted. As the illustrations make clear, acquisition financing can occur with respect to both inventory and equipment.

2. Inventory and receivable revolving loan financing

29. Businesses generally have to expend capital before they are able to generate and collect revenues. For example, before a typical manufacturer can generate receivables and collect payments, the manufacturer must expend capital to purchase raw materials, to convert the raw materials into finished goods and to sell the finished goods. Depending on the type of business, this process may take up to several months. Access to working capital is critical to bridge the period between cash expenditures and revenue collections.

30. One highly effective method of providing such working capital is a revolving loan facility. Under this type of credit facility, loans secured by the borrower's existing and future inventory and receivables are made from time to time at the request of the borrower to fund the borrower's working capital needs (see also A/CN.9/WG.VI/WP.11/Add.2, para. 12). The borrower typically requests loans when it needs to purchase and manufacture inventory, and repays the loans when the inventory is sold and the sales price is collected. Thus, borrowings and repayments are frequent (though not necessarily regular) and the amount of the credit is constantly fluctuating. Because the revolving loan structure matches borrowings to the borrower's cash conversion cycle (that is, acquiring inventory, processing inventory, selling inventory, creating receivables, receiving payment and acquiring more inventory to begin the cycle again), this structure is, from an economic standpoint, highly efficient and beneficial to the borrower, and helps the borrower to avoid borrowing more than it actually needs.

31. Here is an illustration of this type of financing: It typically takes four months for ABC to manufacture, sell and collect the sales price for its products. Lender B agrees to provide a revolving loan facility to ABC to finance this process. Under the loan facility, ABC may obtain loans from time to time in an aggregate amount of up to 50 percent of the value of its inventory that Lender B deems to be acceptable for borrowing (based upon its type and quality of the inventory, as well as other criteria) and of up to 80 percent of the value of its receivables that Lender B deems to be acceptable for borrowing (based upon criteria such as the creditworthiness of the account debtors). ABC is expected to repay these loans from time to time as it receives payments from its customers. The loan facility is secured by all of ABC's existing and future inventory and receivables. In this type of financing, it is also common for the lender to obtain a security right in the bank account into which customer payments (i.e. the proceeds of inventory and receivables) are deposited.

3. Securitization

32. Another highly effective form of financing involving the use of receivables is securitization. Securitization is a sophisticated form of financing under which a business enterprise can obtain less-expensive financing based on the value of its receivables by transferring them to a wholly-owned "special purpose vehicle" ("SPV") that will issue commercial paper or other securities in the capital markets secured by the stream of income generated by such receivables. For example, this technique is commonly used in

situations where a company's receivables consist of credit card receivables, rents or home mortgages, though the securitization of many other types of receivables is possible. Securitization transactions are complex financing transactions that are also dependent upon a jurisdiction's securities laws as well as its secured lending laws.

33. Securitization is intended to lower the cost of financing because the SPV is structured in a way to make the risk of its insolvency "remote" (e.g. theoretically not possible). That significantly reduces one risk that the lender has to take into account when deciding what interest rate to charge for the loan. In addition, as the source of credit is capital markets, greater amounts of credit may be generated and at lower costs than the normal bank loan costs.

34. Here is an illustration of a securitization transaction: An SPV is created by a subsidiary of an automobile manufacturer to purchase automobile leases from automobile dealers throughout a geographically defined market. The automobile leases are purchased from the dealers for a discount from the projected value of the payment streams expected to be generated by such leases. The SPV then issues debt securities, under applicable securities laws, to investors in the capital market secured by such income stream. As payments are made under the leases, the SPV will use such proceeds to make payments on the debt securities.

4. Term-loan financing

35. Businesses often need financing for large, non-ordinary-course expenditures, such as the acquisition of equipment or the acquisition of a business. In these situations, businesses generally seek financing whereby loans are repaid over a fixed period of time (with principal being repaid in monthly, quarterly or other periodic instalments pursuant to an agreed-upon schedule or in a single payment at the end of the loan term).

36. As is the case with many other types of financing, businesses that do not have strong, well-established credit ratings will have difficulty obtaining term loan financing, unless the business is able to grant security rights in its assets to secure the financing. The amount of the financing will be based in part on the creditor's estimate of the net realizable value of the assets to be encumbered. In many States, immovable property is the only type of asset that typically is accepted by lenders to secure term-loan financing and, as a result, in such States term-loan financing is often not available for other important asset types, such as equipment or the enterprise value of an entire business. This is most likely the case in States that do not have a modern secured transactions regime. However, many businesses, particularly newly established businesses, do not own any immovable property and, therefore, may not have access to term-loan financing. In other States, term loans secured by movables, such as equipment and even intellectual property and the enterprise value of the business, are common.

37. Here is an illustration of this type of financing: ABC desires to expand its operations and purchase a business in State Y. ABC obtains a loan (predicated on the value of, and secured by, substantially all of the assets of the business being acquired) from Lender C to finance such acquisition. The loan is repayable in equal monthly instalments over a period of ten years and is secured by existing and future assets of ABC and the entity being acquired.

5. Transfer of title for security purposes

38. In States that honour a form of transfer of ownership even when it does not entail a transfer of possession and is done for financing purposes, a transaction denominated as a

transfer of title by way of security (or sometimes as a “fiduciary” transfer of title) is recognized. These transactions are essentially non-possessory security rights, and they are primarily used in States where the secured transactions law has not yet appropriately recognized non-possessory security rights.

6. Sale and leaseback transactions

39. A “sale and leaseback transaction” provides a method by which a company can obtain credit based upon its existing tangibles (usually equipment) while still retaining possession and the right to use the tangibles in the operation of its business. In a sale and leaseback transaction, the company will sell its assets to another person for a specific sum (which it may then use as working capital, to make capital expenditures or for other purposes). Simultaneously with the sale, the company will lease the equipment back from that other person for a lease term and at a rental rate specified in the lease agreement. Often, the lease is a “financial lease” as opposed to an “operating lease” (see para. 27 for a definition of both terms).

II. Key objectives of an effective and efficient secured transactions regime

40. In the spirit of providing practical, effective solutions, the Guide explores and develops the following key objectives and themes of an effective and efficient secured transactions regime.

A. Promote secured credit

41. The primary overall objective of the Guide is to promote low-cost secured credit for persons in jurisdictions that adopt legislation based on the Guide’s recommendations, thereby enabling such persons and the economy as a whole to obtain the economic benefits that flow from access to such credit (see para. 2).

B. Allow utilization of the full value inherent in assets to support credit in a broad array of credit transactions

42. A key to a successful legal regime governing secured transactions is to enable a broad array of businesses to utilize the full value inherent in their assets to obtain credit in a broad array of credit transactions. In order to achieve this objective, the Guide emphasizes the importance of comprehensiveness, by: (i) permitting a broad range of assets to serve as encumbered assets (including present and future assets); (ii) permitting a broad range of obligations (including future and conditional, monetary and non-monetary, obligations) to be secured by security rights in encumbered assets; and (iii) extending the benefits of the regime to a broad array of debtors, creditors and credit transactions.

C. Enable parties to obtain security rights in a simple and efficient manner

43. The cost of credit will be reduced if security rights can be obtained in an efficient manner. For this reason, the Guide suggests methods for streamlining the procedures for obtaining security rights and otherwise reducing transaction costs. These methods include: eliminating unnecessary formalities; providing for a single method for creating security rights rather than a multiplicity of security devices for different kinds of encumbered assets; and permitting security rights in future assets and for future advances of credit without any additional documentation or actions by the parties.

D. Recognize party autonomy

44. Because an effective secured transactions regime should provide maximum flexibility and durability to encompass a broad array of credit transactions, and also accommodate new and evolving forms of credit transactions, the Guide stresses the need to keep mandatory rules to a minimum so that parties may tailor their credit transactions to their specific needs. At the same time, the Guide takes into account that other legislation may protect the legitimate interests of consumers or other persons and specifies that a secured transactions regime should not override such legislation.

E. Provide for equal treatment of diverse sources of credit

45. Because healthy competition among all potential creditors is an effective way of reducing the cost of credit, the Guide recommends that the secured transactions regime apply equally to various creditors, including banks and other financial institutions, as well as domestic and non-domestic creditors.

F. Validate non-possessory security rights

46. Because the granting of a security right should not make it difficult or impossible for the debtor or other grantor to continue to operate its business, the Guide recommends that the legal regime provide for non-possessory security rights in a broad range of assets coupled with mechanisms for publicizing the existence of such security rights.

G. Encourage responsible behaviour on the part of all parties by enhancing predictability and transparency

47. Because an effective secured transactions regime should also encourage responsible behaviour by all parties to a credit transaction, the Guide seeks to promote predictability and transparency to enable the parties to assess all relevant legal issues and to establish appropriate consequences for non-compliance with applicable rules, while at the same time respecting and addressing confidentiality concerns.

H. Establish clear and predictable priority rules

48. A security right will have little or no value to a creditor unless the creditor is able to ascertain, at the time a transaction takes place, its priority in the property relative to other

creditors (including an insolvency representative). Thus, the Guide proposes the establishment of a system for registering public notices with respect to security rights and, based on that system, clear rules that allow creditors to determine the priority of their security rights at the outset of the transaction in a reliable, timely and cost-efficient manner.

I. Facilitate enforcement of creditor's rights in a predictable and efficient manner

49. A security right will also have little or no value to a creditor unless the creditor is able to enforce the security right in a predictable and efficient manner. Thus, the Guide proposes procedures that allow creditors to so enforce their security rights, subject to judicial or other official control, supervision or review when appropriate. The Guide also recommends that there be a close coordination between a State's secured transactions laws and its insolvency laws with a view to respecting the pre-insolvency effectiveness and priority, as well as the economic value, of a security right subject to the appropriate rules of insolvency law.

J. Balance the interests of the affected persons

50. Because secured transactions affect the interests of various persons, including the debtor, other grantors, competing creditors, such as secured, privileged and unsecured creditors, purchasers and other transferees, and the State, the Guide proposes rules that take into account their legitimate interests and seek to achieve, in a balanced way, all the objectives mentioned above.

K. Harmonize secured transactions laws, including conflict-of-laws rules

51. Adoption of legislation based on the recommendations contained in the Guide will result in harmonization of secured transactions laws (through the adoption of similar substantive laws which will facilitate the cross-border recognition of security rights). This result in itself will promote the financing of international trade and the movement of goods and services across national borders. Furthermore, to the extent complete harmonization of national secured transactions laws might not be achieved, conflict rules would be particularly useful to facilitate cross-border transactions. In any event, conflict-of-laws rules would be useful in order, for example, to help secured creditors determine how to make their security rights effective against third parties.

IX. Default and enforcement

A. General remarks

1. Introduction

1. A secured creditor usually expects a grantor¹ to perform its obligations without the need for the secured creditor to have recourse to the encumbered assets. A grantor will also typically expect to perform its secured obligations to the secured creditor. Both will recognize, however, that there will be times when the grantor will not be able to do so. The failure may result from poor management or business misjudgements, but it may also be for reasons beyond the grantor's control, such as an economic downturn in an industry or more general economic conditions.

2. Secured creditors generally will periodically review their grantors' business activities and the encumbered assets and communicate with those grantors who show signs of having financial difficulties. Grantors generally will cooperate with their secured creditors to work out ways to overcome these financial difficulties. A grantor and its creditors working together may enter into a "composition" or "work out" agreement that extends the time for payment, otherwise modifies the grantor's obligation or adds or reduces encumbered assets that secured the grantor's obligations. Negotiations to reach a composition agreement take place in the shadow of two principal legal factors: the secured creditor's right to enforce its security rights in the encumbered assets if the grantor defaults on its secured obligation and the possibility that insolvency proceedings will be initiated by or against the grantor. Even well short of formal processes, however, the grantor is likely to be well aware that it is not performing its obligations and only rarely, if ever, would it be the case that the grantor learns for the first time that it is in default by means of a notice from the secured creditor.

3. At the heart of a secured transactions regime is the right of the secured creditor to look to the amount that can be realized for the encumbered assets to satisfy the secured obligation if the grantor defaults. The availability of efficient and economical enforcement mechanisms that allow creditors accurately to predict the time and cost involved in the realization on the encumbered assets will have a significant impact on the availability and the cost of credit. A secured transactions regime should, therefore, provide efficient, predictable and economical procedural and substantive rules for the enforcement of a security right after a grantor has defaulted. These rules should be clear, simple and transparent to ensure certainty about the ability quickly to enforce a security right and efficiently at low cost to realize on the encumbered assets. At the same time, the rules should provide reasonable safeguards for the interests of the grantor other persons with an interest in the encumbered assets and the grantor's other creditors.

4. This chapter examines the secured creditor's enforcement of its security right if the grantor fails to perform ("defaults on"; see paras. 8-9) the secured obligation prior to the institution of insolvency proceedings or, with the permission of the appropriate body, during insolvency (insolvency is dealt with in chapter IX).

5. This Guide covers outright transfers of receivables. However, in such an outright transfer, the transferor has generally transferred all of its rights in the receivables. Thus,

¹ These general remarks use the term "grantor" as in the vast majority of cases the grantor is also the debtor. When a specific reference is limited to a third-party grantor that is not the debtor, the term "debtor" is used.

the transferor has no continuing right in the receivables and no interest in the realization (usually collection) of the receivables. Accordingly, this chapter applies to the outright transfer of a receivable only when the transferee has some recourse to the transferor for the non-collection of the receivables. It is only in that circumstance that the transferor has an interest in the method and other aspects of the collection or other disposition of the receivables.

6. Recourse to the grantor for the non-collection of receivables that have been the subject of an outright transfer may arise when the grantor has guaranteed some or all of the payment of the receivables by the account debtors. Recourse may also arise from other functionally equivalent arrangements, such as when (i) the grantor agrees to repurchase from the transferee a receivable sold to the transferee if the account debtor on the receivable fails to pay, or (ii) the grantor merely agrees to pay any deficiency between the purchase price for the bulk sale of receivables and the actual collections on the receivables.

7. Recourse to the grantor for “non-collection” as used here refers to non-collection because of the failure of the account debtor to pay for credit reasons, such as its financial inability to pay. Thus, for example, an account debtor’s failure to pay for goods or services because of poor quality or failure of the grantor to comply with the account debtor’s specifications for the goods or services would not be considered as non-collection as the term is referred to here.

2. Default

8. The parties’ agreement and the general law of obligations will determine whether the grantor is in default and what are the consequences of default (e.g. if and how the grantor may cure the default and whether a notice of default is required).²

9. Generally speaking, the grantor is in default if it fails to perform the secured obligation and, upon the grantor’s default, the secured creditor may enforce its security right against the encumbered assets. Normally, the grantor will seek to challenge before a court the secured creditor’s position that the grantor is in default, or the calculation of the amount owing as a result of the default. To avoid unduly delaying rightful enforcement, the judicial review should be expedited. Safeguards should be built into the process to discourage grantors from making unfounded claims to delay enforcement. However, even if the grantor does not challenge the secured creditor on these issues prior to enforcement against the encumbered assets, the grantor is always able to raise these issues afterwards when the secured creditor seeks to collect any deficiency.

3. Enforcement

(a) General considerations

10. It is important that the system take into account the rights of the grantor, other persons with a right in the encumbered assets and the grantor’s other creditors. Many systems impose, as a general and overriding matter, a requirement that the secured creditor in enforcing its rights must act in good faith and follow commercially reasonable standards. Because of the importance of this obligation, the secured creditor and the grantor may not agree at any time to waive or vary this obligation. A secured creditor that does not comply with its obligations under this chapter should be liable to the persons injured by that failure for any damages caused by the failure. For example, if a secured

² This should be distinguished from a requirement that the secured creditor give notice prior to extra-judicial disposition of the encumbered asset.

creditor does not act in a commercially reasonable manner in disposing of the encumbered assets and that results in the secured creditor realizing a smaller amount for the encumbered assets than it would have realized had it acted in a commercially reasonable manner, the secured creditor should be liable to the person damaged for that differential.

11. Other than the obligation to act in good faith and in a reasonably commercial manner, the grantor and the secured creditor may, after the grantor's default, waive the other obligations described in this chapter. This approach protects the grantor from pressure from the secured creditor to waive or modify the obligation at the time the secured transaction is entered into. At the same time, allowing a waiver after the grantor's default would permit the facilitation of the grantor and the secured creditor "working out" in a non-adversarial way a disposition of the encumbered assets in a manner that maximises the amount that can be realized for the benefit of the secured creditor, the grantor, and the other creditors of the grantor. Moreover, at this stage, the secured creditor has already extended the credit, and it is often the case that the grantor, not the secured creditor, knows more about the encumbered assets and how most effectively to realize on the encumbered assets.

12. The key issue for a secured transactions regime is what modifications, if any, should be made to the normal rules for debt collection to facilitate the enforcement of security rights. Some regimes, for example, provide for expedited court proceedings. Other regimes permit the secured creditor, at least on a preliminary basis but subject to judicial intervention at the behest of the grantor and subject also to the obligations described above of good faith and commercial reasonableness, to determine if a breach has occurred, to take possession of the encumbered assets and to dispose of them with no direct judicial or administrative intervention. Expedited judicial and non-judicial procedures, however, should take into account the right of other persons to be heard in protection of their legitimate claims to the encumbered assets. Moreover, the allocation of resources within the judicial system and allowing private persons to take actions that affect others necessarily raise issues of public interest. When determining the role of the judiciary or other administrative authorities in the enforcement of security rights, it is essential to do so in a clear and straightforward manner.

13. All interested parties (i.e. the secured creditor, the debtor or grantor and other creditors) benefit from maximizing the amount that will be realized by disposing of the encumbered assets after the grantor has defaulted. The secured creditor benefits by the potential reduction of any deficiency the grantor may owe as an unsecured debt after application of the proceeds of the disposition or collection on the encumbered assets. At the same time, the grantor and the grantor's other creditors benefit from a smaller deficiency or a larger surplus. A secured transactions regime that decreases the hurdles and transaction costs of the disposition or collection, while obliging the secured creditor to exercise its remedies in good faith and in a commercially reasonable manner, will increase the amount of the proceeds received on disposition of the encumbered assets.

14. A security right is of particular importance to a secured creditor when the grantor is in financial difficulty. A grantor who is in financial difficulty is more likely to default on its obligations and may end up voluntarily or involuntarily in insolvency proceedings. The effect of insolvency proceedings on the rights of the secured creditor and the secured creditor's valuation of the encumbered assets are discussed in Chapter IX.

(b) Notice of intended extra-judicial disposition

15. Secured transactions laws that provide for non-judicial disposition normally require that notice of the intention to dispose of the encumbered assets be given to persons that

may be affected by the disposition (e.g. the debtor, a third-party grantor and any person with rights in the encumbered assets) and specify the intended time and place of the disposition. The principal benefit of a notice of intended disposition to the debtor or grantor is that it alerts them to the need to protect their interests in the encumbered assets (the debtor will not be unaware of its default but the third-party grantor may be), such as by curing the debtor's default, if otherwise allowed, or by seeking potential buyers for the encumbered assets. Notice to other interested parties allows them to monitor subsequent enforcement by the secured creditor and, if they are secured creditors whose rights have priority (and the grantor is in default towards them as well), to participate in or take control of the enforcement process. The disadvantages of notice include its cost, the opportunity it provides an uncooperative grantor to remove the encumbered assets from the creditor's reach and the possibility that other creditors will race to assert claims against the grantor's business and interfere with the disposition process. Moreover, unless requirements with respect to notices are clear and simple, they generate the risk of "technical" non-compliance that generates litigation and inappropriate loss of rights. Many legal systems that require notice of intended disposition of the encumbered assets do not also require a notice of default (see paras. 8-9) or notice of extra-judicial enforcement.

[Note to the Working Group: The Working Group may wish to note that, depending on whether recommendation 99 in document A/CN.9/WG.VI/WP.24/Add.1 dealing with notice of intention to pursue extrajudicial enforcement is retained or not, the commentary may have to be revised.]

16. As with other situations where notice may be required, in those legal systems where a notice of default is required, secured transactions law normally states the minimum contents of a notice, the manner in which it is to be given and its timing. When doing so, the law might distinguish between notice to the debtor, notice to the grantor when the grantor is not the debtor, notice to other creditors and notice to public authorities or the public in general. It is a matter of a cost-benefit analysis whether the secured creditor should be required to give prior written notice to others beyond the debtor and grantor and other secured creditors known to exist, i.e., other secured creditors who have registered a notice of their interests or who have otherwise notified the secured creditor who proposes to dispose of the encumbered assets. Alternatively, the registrar might be required to give such notice to those who have registered (see article 54 of the Inter-American Model Law). As for the information to be included in the notice to the debtor and grantor, likewise a cost-benefit analysis is required. The law might require the inclusion of the secured creditor's calculation of the amount owed as a consequence of default. It might further require advice to the debtor or grantor regarding what steps to take to pay the secured obligation in full or, if such a right exists, to cure the default. The secured creditor might also be required to indicate, at least provisionally, the steps it intends to take to dispose of the encumbered assets. Notice to other interested parties may not need to be as extensive or specific as that to the debtor and grantor.

(c) The extent of court supervision of enforcement

17. A key issue for a secured transactions regime is the extent to which the secured creditor must resort to the courts or other authorities (e.g. bailiffs, notaries or the police) to enforce its security right rather than to make use of out-of-court procedures. In order to protect the grantor and other parties with rights in the encumbered assets, some legal systems require the secured creditor to resort exclusively to the courts or other governmental authorities to enforce its security right. However, because court proceedings often cannot produce a result in a timely and cost-efficient manner or may well be less likely to produce the maximum possible amount for the encumbered assets, the

requirement of court proceedings will negatively impact on the availability and the cost of credit. The time and cost involved reduce the amount that will be realized for the encumbered assets and will be factored into the cost of the financing transaction.

18. In order to avoid these problems, some legal systems do not require the secured creditor to use the courts or other governmental authorities in the enforcement process. Rather, the courts are at all times available at the behest of any interested person but do not intervene unless requested to do so by an interested person. A properly designed system can provide protection to the grantor and other persons with an interest in maximizing the amount that will be realized for the encumbered assets while at the same time providing an efficient system for realizing on the encumbered assets. In these legal systems the secured creditor is often authorized to enforce its security right without any prior intervention of official State institutions, such as courts, bailiffs or the police. In other legal systems, there is only limited prior intervention of official State institutions in the enforcement process. For example, the secured creditor may apply to a court for an order of repossession, which the court issues without a hearing (although the grantor may initiate an independent proceeding to challenge this order; see article 57 of the Inter-American Model Law). In such a case, once the secured creditor is in possession of the asset, it may sell it directly without court intervention following certain prescribed procedures (see article 59 of the Inter-American Model Law). The justification for such an approach lies in the fact that having the secured creditor or a trusted third party take control and dispose of the assets will often be more flexible, quicker and less costly than a State-controlled process. The availability of judicial intervention at the behest of any party and the legal obligations imposed on conduct often is sufficient to obviate the need to resort to the courts. The knowledge that judicial intervention is readily available is often sufficient to create the incentives to cooperative and reasonable conduct.

19. However, even in these legal systems the courts are available to ensure recognition of legitimate claims and defences of the grantor and other parties with rights in the encumbered assets. In order to inform these parties and give them an opportunity to react, the secured creditor may be required to give them a notice of intended disposition and possibly also a notice of default (see paras. 8-9). In addition, the secured creditor may not enforce its right to take possession of the encumbered assets if such enforcement would result in a disturbance of the public order. Moreover, in disposing of the encumbered assets, the secured creditor must act in a “commercially reasonable” manner (see para. 10). The purpose and effect of this requirement is to provide a balance between the interests of both the grantor (and its other creditors) and the secured creditor in enabling flexibility in the methods used to dispose of the encumbered assets toward the end of obtaining an economically effective realization, while at the same time protecting the grantor against actions taken by the secured creditor that, in the commercial context, are not reasonable.

20. Even if permitted to act without official intervention, a secured creditor is normally also entitled to seek to enforce its security right by judicial action. The secured creditor may choose to bring a judicial action, rather than rely on its own actions, for a number of reasons. For example, the secured creditor may wish to avoid the risk of having its private actions challenged after the fact, or may conclude that it will have to bring a judicial action anyway to recover an anticipated deficiency. A secured creditor’s decision to pursue remedies with or without judicial intervention does not prevent the secured creditor from later pursuing a different remedy.

21. Whether or not they require a secured creditor to resort to the courts, many legal systems modify the normal rules of civil procedure when a secured creditor seeks to enforce security rights. These modifications may limit the time within which the court must act or limit the claims or defences that the parties may raise. If the court concludes

that there has been a default by the grantor, the objective of any decision is to satisfy the creditor's secured claim. The court is typically authorized to order the grantor to pay the obligation, to dispose of the encumbered assets under a court proceeding, or to turn over the assets to the secured creditor or to the court for disposition.

(d) Freedom of parties to agree to the enforcement procedure

22. Another key issue is the extent to which the secured creditor and the grantor may agree to modify the statutory framework for the enforcement of the security right. In some legal systems, the enforcement procedure is part of mandatory law that the parties cannot modify by agreement. In other legal systems, the parties are allowed to modify the statutory framework for enforcement as long as public policy, priority, and third-party rights (in particular in the case of insolvency) are not affected. In yet other legal systems, emphasis is placed on efficient enforcement mechanisms in which judicial enforcement is not the exclusive or the primary procedure. Even if a system has limits on the extent to which the secured creditor and the grantor may agree to modify the statutory framework, permitting the parties to agree freely on the consequences of their exchange after a default encourages an efficient allocation of resources. However, such freedom may be the subject of abuse at the time of conclusion of the security agreement. Thus, the law may recognize only those agreements modifying the statutory framework that are reached after the grantor is in default. In any event, an agreement may not modify or waive the secured creditor's obligation to act in a commercially reasonable manner and in good faith (see para. 10).

(e) Acceptance of the encumbered assets in satisfaction of the secured obligation

23. Following default, the secured creditor may propose to the grantor that the secured creditor accept the encumbered assets in full or partial satisfaction of the secured obligation. Most jurisdictions make unenforceable an agreement entered into prior to default that automatically vests ownership of the encumbered assets in the secured creditor upon default, although some laws make an agreement entered into after default enforceable. The advantage of permitting agreements entered into after default is that, as a result of such an agreement, enforcement costs are minimized and the security right is enforced more quickly. This benefits the grantor as well as the secured creditor, since enforcement costs and risks are avoided by both parties. The disadvantage is that there may be a risk of abuse in the rare cases where both (i) the encumbered assets are more valuable than the secured obligation and (ii) the secured creditor has, even in the post-default situation, unusual power over the grantor and interested third persons.

24. The law may guard against abusive behaviour by the secured creditor in connection with such agreements by requiring the consent not only of the grantor but also notice to and failure to object by third parties with rights in the encumbered assets an absolute veto power held by any of the persons whose consent is required or who may lodge an objection should be quite sufficient as a safeguard against abuse. In addition, consent of a court might be required under certain circumstances, such as where the grantor has paid a substantial portion of the secured obligation. The law might also require an official appraisal of the encumbered assets. Again, a cost-benefit analysis should be made to determine whether to impose judicial involvement on this otherwise private process among consenting parties.

(f) Redemption of the encumbered assets

25. Most laws permit a defaulting grantor to redeem the encumbered assets before their disposition by the secured creditor by paying the outstanding amount of the secured

obligation, including interest and the costs of enforcement incurred up to the time of redemption. Redemption brings the transaction to an end. The hope of redemption may encourage the grantor to search for potential buyers to purchase the encumbered assets and to monitor the secured creditor's acts closely. Redemption of the encumbered assets should be distinguished from reinstatement of the secured obligation. Reinstating the secured obligation (e.g. by paying a missed instalment before disposition), if permitted under the general law of obligations, cures a default and the restored obligation continues to be secured by the encumbered assets. Redemption of the encumbered assets occurs only when the secured obligation is discharged in full.

26. The grantor usually retains its right of redemption until (i) disposition of, or the completion of collection by the secured creditor on, the encumbered asset, (ii) the secured creditor entering into a commitment to dispose of the encumbered asset, or (iii) acceptance by the secured creditor of the encumbered asset in total or partial satisfaction of the secured obligation, whichever occurs first.

(g) Authorized disposition by the grantor

27. Following default, the secured creditor will be concerned about obtaining to the extent feasible the highest price possible for the encumbered assets. Frequently, the grantor will be more knowledgeable about the market for the assets than the secured creditor. For this reason, the grantor might be given a very limited period of time following default during which it is entitled to dispose of the encumbered assets. This might best be accomplished by the grantor's bringing the potential buyer to the attention of the secured creditor, rather than establishing a delay period in which the secured creditor cannot proceed with arrangements for the disposition of the encumbered assets. In any event, the regime should be structured so as to give the grantor the incentive to cooperate with the secured creditor.

(h) Removing the encumbered assets from the grantor's control

28. Upon the grantor's default, the secured creditor who is not already in possession of the encumbered assets will be concerned about potential dissipation or misuse of the assets. This may be alleviated by placing the assets in the hands of a court, a State official, a trusted third party or the secured creditor itself. Permitting the secured creditor to take possession without any or only limited recourse to a court or other authority reduces the costs of enforcement (see paras. 17-18). However, even those laws that permit such repossession by the secured creditor recognize the potential for abuse, especially the possibility of public disorder or intimidation. Most of these laws, therefore, condition repossession on avoiding a disturbance of the public order ("breach of the peace"). Some laws require prior notice of default as a precondition to taking possession. Other laws do not do so on the ground that a desperate grantor in default may then seek to hide or transfer the encumbered asset before the secured creditor may take possession of it.

29. In the special case where the encumbered assets threaten to decline rapidly in value, most laws provide for expedited, preliminary relief ordered by a court or other relevant authority to preserve the value of the assets.

(i) Sale or other disposition of the encumbered assets

30. A security right entitles the secured creditor to have the encumbered assets sold or otherwise disposed of. Law should provide additional general procedures for the disposition of the encumbered assets, which may provide for the secured creditor or a judicial authority to control the disposition. These should include the method of

advertising a proposed disposition, whether to have a public auction and permission to sell, lease, license or collect upon the encumbered assets. The objective of the disposition should be to maximize the amount realized for the encumbered assets, while not jeopardizing the legitimate claims and defences of the grantor and other persons.

31. Requirements in existing legal systems range from the less to the more formal. Some legal systems require disposition subject to the same public procedures used to enforce court judgements. Other legal systems permit the secured creditor to control the disposition but prescribe uniform procedures for the disposition by public auction of encumbered assets, with rules on such matters as timing, publicity and minimum price. Yet other legal systems permit the secured creditor to make the disposition (including private disposition) of the encumbered assets—always subject to independent standards, i.e. good faith and commercial reasonableness. The grant of flexibility provides benefits to the grantor, the secured creditor, others with an interest in the encumbered assets, and other creditors of the grantor because a formal public auction will not always be the best way to maximize the net recovery from the encumbered assets. These systems may condition the right of the creditor on the consent of the grantor, whether in the security agreement or after default. A general standard is usually prescribed which the secured creditor must observe (e.g. “commercially reasonable” or “with the care of a prudent business person”). There may also be special rules dealing with the manner by which the proceeds of a disposition are to be held pending distribution.

32. Most secured transactions laws share the requirements that notice must be given to certain parties with respect to a proposed disposition and the sale must be advertised or offers sought from appropriate parties. Due to the finality of any disposition, detailed rules are necessary to alert interested parties to protect their interest. Special procedures may be prescribed for the sale of a business as a going concern.

33. The collection of receivables and negotiable instruments may not fit easily into the procedures for disposition of the encumbered assets. Thus many systems have special rules for this type of encumbered asset, including giving the secured creditor the right to collect directly from the person obligated on the receivable or negotiable document and requiring that person to make any payments owed directly to the secured creditor (see para. 37).

(j) Allocation of proceeds of disposition

34. Secured transactions laws set out rules on the distribution of the proceeds of the disposition. The most common allocation is to pay reasonable enforcement costs first and then the secured obligation. Laws typically include rules prescribing if and when a secured creditor is responsible for distributing proceeds to some or all other secured creditors (such as secured creditors with junior security rights in the encumbered assets) with security rights in the same encumbered assets. These rules often require that notice of these other interests be given to the secured creditor and that any surplus proceeds are to be returned to the grantor.

35. The proceeds distributed to the secured creditor are applied towards the costs of the distribution and the satisfaction of the secured obligation. If there is a deficiency after the distribution, the obligation is discharged only to the extent of the proceeds received. The secured creditor is normally entitled to recover the amount of the deficiency from the grantor. Unless the grantor has created a security right in other assets for the benefit of the creditor, the creditor’s claim for the deficiency is unsecured vis-à-vis the grantor (although the secured creditor may have received security rights from a third party).

(k) Finality

36. Secured transactions laws normally provide finality following disposition of the encumbered assets in favour of the person acquiring the encumbered asset through the disposition by the secured creditor. The secured creditor's security right in the encumbered assets terminates, as does the grantor's rights, and the rights of any junior secured creditor or other person with a lower ranking right in the encumbered assets. The law normally provides that the rights of other persons in the encumbered assets (including other secured creditors) continue notwithstanding disposition of the assets in the enforcement procedure.

(l) Variations on general framework

37. Secured transactions law that includes within its scope many different types of encumbered assets provides, where necessary, special rules for the disposition of some types of asset. This is especially true of receivables, negotiable instruments, funds credited in a bank account or drawing proceeds from an independent undertaking, whether they are the original encumbered assets or they just secure payment or other performance of other obligations (see A/CN.9/WG.VI/WP.26, recs. 102 and 103; A/CN.9/WG.VI/WP.26/Add.1, recs. 106 bis-108). For example, a secured creditor with a security right in a receivable is normally entitled to inform the account debtor on the receivable to make payments directly to the secured creditor following the grantor's default. The notification and payment instruction can be sent by the secured creditor/assignee even in violation of an agreement with the grantor/assignor (see A/CN.9/WG.VI/WP.26, rec. 16 quater (b)). Otherwise, in the case of default on the part of the grantor/assignor (where the grantor/assignor will be reluctant to cooperate with the secured creditor/assignee), the secured creditor/assignee may be prevented from enforcing its security right. A secured creditor is also entitled to dispose of or retain a receivable (see A/CN.9/WG.VI/WP.24/Add.1, recs. 93 (d) and (e), 110 and 113).

38. If the security right is in funds credited to a bank account, the secured creditor may collect or otherwise enforce its right to payment of the funds after default or even before default if so agreed with the grantor. In any case, the depositary bank (i) has the same rights and obligations, (ii) the same rights of set-off, (iii) is not obliged to pay any person other than the person that has control of the account and (iv) respond to any requests for information (see A/CN.9/WG.VI/WP.26/Add.1, recs. X, Y and 106 bis-108). Unlike a secured creditor who has to collect first the funds and then apply them to the secured obligation, a depositary bank acting as a secured creditor may apply the funds directly to the secured obligation. The enforcement of the depositary bank's rights of set-off remains subject to other law.

39. If the security right is a negotiable instrument, the secured creditor may collect or otherwise enforce its security right (see A/CN.9/WG.VI/WP.26/Add.2, rec. 104). However, as between the secured creditor and (i) the person obligated on the negotiable instrument, or (ii) other persons claiming rights under the law governing negotiable instruments, the obligations and rights of those persons are determined by the law governing negotiable instruments. For example, (i) the person obligated on the negotiable instrument may be obligated to pay only a holder or other person entitled to enforce the instrument under the law governing negotiable instruments; and (ii) the right of the person obligated on the instrument to raise defences to that obligation is determined by the law governing negotiable instruments.

40. If the security right is in a negotiable document, the general rules on the enforcement of security rights apply. Special rules may apply to preserve the rights of certain persons protected under law governing negotiable documents (see A/CN.9/WG.VI/WP.26/Add.3,

rec. 109). In particular, the issuer may be obligated to deliver the goods only to a holder of the negotiable document relating to them.

41. The general enforcement rules apply also to the enforcement of security rights in proceeds (except if the proceeds are receivables or other specific assets like the ones mentioned in the preceding paragraphs, in which case the asset-specific enforcement recommendations apply, see A/CN.9/WG.VI/WP.26/Add.4, note on enforcement of a security right in proceeds).

42. The same applies to the enforcement of security rights in attachments to movable property (e.g. automobile engines). As to the enforcement of security rights in attachments to immovable property, special rules apply to preserve the rights of creditors in the immovable property (see A/CN.9/WG.VI/WP.26/Add.4, note on enforcement of a security right in attachments). Such rules deal, for example, with the problem of severing an attachment (e.g. an elevator) from immovable property owned by someone other than the grantor.

43. Similarly, the general enforcement recommendations apply to the enforcement of security rights in masses (e.g. grain in a silo or oil in a tank) or products (e.g. cake produced from sugar, flour, eggs and water). For example, if the encumbered assets are oil of value 5 in a tank with oil worth 100, the secured creditor should be able to enforce its right only in oil of value 5. If the encumbered asset can be separated, the secured creditor should be able to dispose of that part only in a commercially reasonable manner. If the encumbered asset cannot be easily separated, the whole mass or product may have to be sold.

[Note to the Working Group: As to the enforcement of security rights in movables by anticipation or crops, the Working Group may wish to consider first whether these types of asset should be covered at all (see A/CN.9/WG.VI/WP.26/Add.4, note on movables by anticipation and crops).]

(m) Judicial proceedings brought by other creditors

44. Other creditors of the grantor may resort to the courts to enforce their claims against the grantor and procedural law may give these creditors the right to force the disposition of encumbered assets, subject to the interests of the secured creditor. The secured creditor will look to procedural law for rules on intervening in these judicial actions in order to protect its priority. In rare cases, procedural law may provide exceptions to general rules of priority. In some legal systems, for example, a court may order a person who owes money to a judgement debtor to pay the judgement creditor. If the court order may effectively give priority to the judgement creditor in an encumbered asset in which the secured creditor's security right is effective against third parties, the result is bound to affect the availability and cost of credit extended on the basis of encumbered assets.

B. Recommendations

[Note to the Working Group: The Working Group may wish to note that the general recommendations on enforcement are contained in document A/CN.9/WG.VI/WP.24/Add.1, while the asset-specific recommendations on enforcement are contained in documents A/CN.9/WG.VI/WP.24/Add.2, as well as documents A/CN.9/WG.VI/WP.26 and Addenda 1 to 4.]

I. Note by the Secretariat on security interests: draft Legislative Guide on Secured Transactions: security rights in receivables

(A/CN.9/611 and Add.1-3) [Original: English]

Security rights in receivables.	
---	--

Security rights in receivables

[Note to the Commission: In the context of its discussion on security rights in receivables, the Commission may wish to consider the definitions (a) ("security right"), (d) ("secured creditor"), (f) ("grantor"), (p) ("receivable"), (q) ("assignment"), (r) ("assignor"), (s) ("assignee"), (t) ("subsequent assignment"), (u) ("debtor of the receivable"), (v) ("notification of the assignment") and (w) ("original contract") (see A/CN.9/WG.VI/WP.27/Add.1).]

Parties, security rights, secured obligations and assets covered

3. In particular, the law should provide that it applies to:

(d) All types of movable assets and attachments, tangible or intangible, present or future, not specifically excluded in the law, including inventory, equipment and other goods, contractual and non-contractual receivables, contractual non-monetary obligations, negotiable instruments, negotiable documents, rights to payment of funds credited to bank accounts, proceeds under independent undertakings, and intellectual property rights;

[Note to the Commission: As to non-contractual receivables, the Commission may wish to refer to the note after definition (p) ("receivable") in A/CN.9/WG.VI/WP.27/Add.1. As to contractual non-monetary obligations, the Commission may wish to note that the commentary will explain that the general recommendations apply to contractual non-monetary obligations. The commentary will also explain that general law other than the law recommended in the draft Guide applies to the rights of obligors of contractual non-monetary obligations.]

...

(f) Generally, outright transfers of receivables;

[Note to the Commission: The Commission may wish to note that, as the definition of "receivable" excludes rights to payment under a negotiable instrument, the obligation to pay under an independent undertaking and the obligation of a bank to pay funds credited to a bank account, recommendation 3 (f) does not apply to an outright transfer of a negotiable instrument, proceeds under an independent undertaking or a right to payment of funds credited to a bank account. However, the recommendations apply to transfers of such assets for security purposes, as they are treated as secured transactions. For example, the transfer for security purposes of a right to payment of funds credited to a bank account is covered as a method of achieving control (see definition of "control" in A/CN.9/WG.VI/WP.27/Add.1, para. 21 (ee) and (gg)). The commentary will explain that outright transfers of negotiable instruments, proceeds under an independent undertaking

and funds credited to a bank account have been excluded as: (i) they raise different issues and would require special rules, (ii) unlike receivables in which a security transfer and an outright transfer would compete for priority based on the order of registration, with respect to negotiable instruments a secured creditor could always obtain a superior right by taking possession of the instrument, while, in the case of proceeds under an independent undertaking and funds credited to a bank account, a secured creditor could obtain a superior right by control. The commentary will also discuss issues arising in outright transfers of negotiable instruments other than cheques for the benefit of States that may wish to address them in the law.]

4. Except to the limited extent provided in recommendations 16 and 37 relating to a personal or property right that secures a receivable, negotiable instrument or other obligation that is within the scope of the Guide, the law should not apply to security rights in [see A/CN.9/WG.VI/WP.26/Add.7].

Creation of a security right in receivables

[Note to the Commission: The Commission may wish to note that the commentary will explain that the general recommendations apply unless modified by asset-specific recommendations.]

Assets and obligations subject to a security agreement

13. The law should provide that a security right may secure all types of obligation, including future, conditional and fluctuating obligations. It should also provide that a security right may be given in all types of asset, including parts of assets and undivided interests in assets and assets which, at the time of the security agreement, the grantor may not yet own or have the power to dispose of, or which may not yet exist, as well as in proceeds. Any exceptions to these rules should be limited and described clearly in the law.

Effectiveness of a bulk assignment and an assignment of future, parts of and undivided interests in receivables

14. The law should provide that:

(a) The assignment of receivables that are not specifically identified, future receivables and parts of or undivided interests in receivables is effective as between the assignor and the assignee and as against the debtor of the receivable, as long as, at the time of the assignment or, in the case of future receivables, at the time they arise, they can be identified to the assignment to which they relate; and

(b) Unless otherwise agreed, an assignment of one or more future receivables is effective without a new act of transfer being required to assign each receivable. [See article 8 of the United Nations Assignment Convention.]

Effectiveness of an assignment made despite an anti-assignment clause

15. The law should provide that:

(a) An assignment is effective as between the assignor and the assignee and as against the debtor of the receivable notwithstanding an agreement between the initial or any subsequent assignor and the debtor of the receivable or any subsequent assignee limiting in any way the assignor's right to assign its receivables;

[Note to the Commission: The Commission may wish to note that the commentary will explain that recommendation 15 (a) makes ineffective only an agreement between an

obligor and an obligee that limits the obligee's right to assign a receivable owed by the obligor to the obligee. If such a receivable is assigned, the obligor is the "debtor of the receivable" and the obligee is the "assignor".

For example, if an agreement for the lease of goods limits the lessor's right to assign the rents due to it under the lease, recommendation 15 (a) makes the limitation on assignment ineffective, because the agreement is between the obligor (the lessee) and the obligee (the lessor) of the receivable (the rent arising from the lease agreement). By way of contrast, if the lease agreement between the lessor and the lessee limits the lessee's right to assign a receivable consisting of the lessee's claim to rents due to the lessee from the sublessee under a sublease, recommendation 15 (a) has no application, and nothing in this Guide makes the limitation ineffective. That is because the agreement limiting the right of the lessee to assign its claim for rents due to it from the sublessee under the sublease is not an agreement between the lessee (sublessor and obligee in a sublease) and the sublessee (obligor in the sublease). Whether the limitation in the lease is enforceable against the lessee would be determined by the law other than the law recommended in this Guide.

The same analysis would apply if the restriction on transfer was contained in a licence of intellectual property. Recommendation 15 (a) would render ineffective a term in the licence agreement that restricted the licensor from assigning fees due from the licensee. However, it would not render ineffective a term in the licence agreement restricting the licensee from assigning sublicense fees. Whether the latter term would be effective would be determined by law other than that recommended in the draft Guide.]

(b) If other law creates any obligation or liability of the assignor for breach of such an agreement, the other party to such an agreement may not avoid the contract from which the assigned receivables arise or the assignment contract on the sole ground of that breach. A person who is not a party to such an agreement is not liable on the sole ground that it had knowledge of the agreement;

(c) This recommendation applies only to assignments of receivables:

- (i) Arising from an original contract that is a contract for the supply or lease of goods or services other than financial services, a construction contract or a contract for the sale or lease of real property;
- (ii) Arising from an original contract for the sale, lease or licence of industrial or other intellectual property or of proprietary information;
- (iii) Representing the payment obligation for a credit card transaction;
- (iv) Owed to the assignor upon net settlement of payments due pursuant to a netting agreement involving more than two parties.

[Note to the Commission: The Commission may wish to note that the commentary will clarify that contract avoidance referred to in paragraph (b) means contract termination in general.]

Creation of a security right in a right that secures an assigned receivable, a negotiable instrument or any other obligation

16. The law should provide that:

- (a) A security right in a receivable, a negotiable instrument or any other obligation covered as an encumbered asset by this law automatically extends, without further action

by either the grantor or the secured creditor, to any personal or property right that secures payment or performance of the receivable, negotiable instrument or other obligation;

(b) If the personal or property right is an independent undertaking, the security right automatically extends to the proceeds under the independent undertaking but does not extend to the right to draw under the independent undertaking;

(c) This recommendation does not apply to a right in immovable property that under law other than this law is transferable separately from a receivable, negotiable instrument or other obligation that it may secure;

(d) A security right is created under paragraph (a) of this recommendation in any personal or property right securing payment of a receivable, negotiable instrument or other obligation notwithstanding any agreement between the grantor and the debtor of the receivable or the obligor of the negotiable instrument or other obligation limiting in any way the grantor's right to create a security right in the receivable, negotiable instrument or other obligation, or in any personal or property right securing the receivable, negotiable instrument or other obligation;

(e) If other law creates any obligation or liability of the grantor for breach of the agreement mentioned in paragraph (d) of this recommendation, the other party to such an agreement may not avoid the contract from which the receivable, negotiable instrument or other obligation arise, or the security agreement creating the personal or property security right on the sole ground of that breach. A person who is not a party to such an agreement is not liable on the sole ground that it had knowledge of the agreement;

(f) Paragraphs (d) and (e) of this recommendation apply only to security rights in receivables, negotiable instruments or other obligations:

(i) Arising from an original contract that is a contract for the supply or lease of goods or services other than financial services, a construction contract or a contract for the sale or lease of immovable property;

(ii) Arising from an original contract for the sale, lease or licence of industrial or other intellectual property or of proprietary information;

(iii) Representing the payment obligation for a credit card transaction;

(iv) Owed to the assignor upon net settlement of payments due pursuant to a netting agreement involving more than two parties.

(g) The creation of a security right in a possessory property right under paragraph (a) of this recommendation does not affect any obligations of the grantor to the debtor of the receivable or the obligor of the negotiable instrument or other obligation with respect to the relevant property existing under the law governing that property right;

(h) To the extent that the automatic creation under paragraph (a) of this recommendation and the automatic third-party effectiveness under recommendation 37 of a security right in any personal or property security right securing payment of a receivable, negotiable instrument or other obligation is not impaired, this recommendation does not affect any requirement under law other than this law relating to the form or registration of the creation of security rights in any assets, securing payment of a receivable, negotiable instrument or other obligation, that are outside the scope of this law.

[Note to the Commission: The Commission may wish to note that the commentary will explain that the purpose of recommendation 16 is to facilitate financing transactions, such as securitizations of pools of loans secured by security rights in movables and immovables. In these cases the buyer of the loans will want to be able to look to the

security rights securing the loans but would not want to incur, at the outset of the purchase, the additional expense of a separate act of transfer (if required under law other than the law recommended in the draft Guide) for each loan in the pool of loans, that could number in the hundreds or thousands. Separate acts of transfer, if any, would be necessary (if required under other law) to enforce only those loans that are later in default, typically a small proportion of the loans in the pool actually purchased. The buyer could decide whether to accept the expense of separate acts of transfer at the time of enforcement, whether voluntarily from the seller or with the assistance of a court. But, in deciding whether to purchase the loans and at what price, the buyer would take into account the expense of separate acts of transfer only for the small portion of the loans expected to be in default, not for the entire pool of loans. As a result of the expense savings, the seller should be able to obtain a higher purchase price, thereby making more funds available to the seller.

The commentary will also make it clear that recommendation 16 applies to outright transfers of receivables (but not of negotiable instruments or other obligations) as the draft Guide generally applies only to outright transfers of receivables.

The commentary will also clarify that paragraphs (a) to (c) track the language of article 10 (1) of the United Nations Assignment Convention with appropriate adjustments necessary in view of the nature of the law in the draft Guide as domestic law, while paragraphs (d) to (f) track the language of recommendation 15 and article 10 (2) to (4) of the United Nations Assignment Convention.

In addition, the commentary will clarify that paragraph (g) tracks the language of article 10 (5) of the United Nations Assignment Convention, according to which, if the security right involves the delivery of possession of an asset and such delivery causes damage to the debtor of the receivable or the obligor of the negotiable instrument or other obligation, any liability that may exist under law applicable outside the law recommended in the draft Guide is not affected. This may arise, for example, in the case of a delivery of possession of an item of valuable tangible property if the secured creditor or transferee damages or loses the property.

Furthermore, the commentary will clarify that paragraph (h), which tracks the language of article 10 (6) of the United Nations Assignment Convention, makes it clear that, the form of transfer of a security right in an asset outside the scope of this law (e.g. an immovable) is left to law other than this law, at least to the extent that the automatic creation and third-party effectiveness of a security right is not impaired. Accordingly, a notarized document and registration may be necessary for the transferee of a mortgage to obtain various rights under immovables law, such as the right to enforce the mortgage. The commentary will further explain that the form of transfer of a security right in an asset within the scope of this law will be subject to this law.]

Pre-default rights and obligations of the assignor and the assignee

[Note to the Commission: The Commission may wish to note that the following recommendations, based on articles 11 to 14 of the United Nations Assignment Convention, will be included in the new chapter on pre-default rights and obligations of the parties.]

Rights and obligations of the assignor and the assignee

16 bis. The law should provide that:

(a) The mutual rights and obligations of the assignor and the assignee arising from their agreement are determined by the terms and conditions set forth in that agreement, including any rules or general conditions referred to therein;

(b) The assignor and the assignee are bound by any usage to which they have agreed and, unless otherwise agreed, by any practices they have established between themselves.

Representations of the assignor

16 ter. The law should provide that:

(a) Unless otherwise agreed between the assignor and the assignee, the assignor represents at the time of conclusion of the contract of assignment that:

(i) The assignor has the right to assign the receivable;

(ii) The assignor has not previously assigned the receivable to another assignee; and

(iii) The debtor of the receivable does not and will not have any defences or rights of set-off;

(b) Unless otherwise agreed between the assignor and the assignee, the assignor does not represent that the debtor of the receivable has, or will have, the ability to pay.

Right to notify the debtor of the receivable

16 quater. The law should provide that:

(a) Unless otherwise agreed between the assignor and the assignee, the assignor or the assignee or both may send the debtor of the receivable notification of the assignment and a payment instruction, but after notification has been sent only the assignee may send such an instruction; and

(b) Notification of the assignment or a payment instruction sent in breach of any agreement referred to in paragraph (a) of this recommendation is not ineffective for the purposes of recommendation 19 by reason of such breach. However, nothing in this recommendation affects any obligation or liability of the party in breach of such an agreement for any damages arising as a result of the breach.

Right to payment

16 quinquies. The law should provide that:

(a) As between the assignor and the assignee, unless otherwise agreed and whether or not notification of the assignment has been sent:

(i) If payment in respect of the assigned receivable is made to the assignee, the assignee is entitled to retain the proceeds and goods returned in respect of the assigned receivable;

(ii) If payment in respect of the assigned receivable is made to the assignor, the assignee is entitled to payment of the proceeds and also to goods returned to the assignor in respect of the assigned receivable; and

- (iii) If payment in respect of the assigned receivable is made to another person over whom the assignee has priority, the assignee is entitled to payment of the proceeds and also to goods returned to such person in respect of the assigned receivable;
- (b) The assignee may not retain more than the value of its right in the receivable.

Rights and obligations of the debtor of the receivable and the assignee

Protection of the debtor of the receivable

[Note to the Commission: The Commission may wish to note that recommendations 17 to 23, which are based on articles 15-21 of the United Nations Assignment Convention, will be placed in a separate chapter dealing with rights and obligations of third-party obligors, along with the recommendations dealing with the rights and obligations of an obligor under a negotiable instrument, a depositary bank, the issuer of a negotiable document and the guarantor/issuer, confirmer or nominated person under an independent undertaking.]

17. The law should provide that:

- (a) Except as otherwise provided in this law, an assignment does not, without the consent of the debtor of the receivable, affect the rights and obligations of the debtor of the receivable, including the payment terms contained in the original contract;
- (b) A payment instruction may change the person, address or account to which the debtor of the receivable is required to make payment, but may not change:
 - (i) The currency of payment specified in the original contract; or
 - (ii) The State specified in the original contract in which payment is to be made to a State other than that in which the debtor of the receivable is located.

Notification of the debtor of the receivable

18. The law should provide that:

- (a) Notification of the assignment or a payment instruction is effective when received by the debtor of the receivable if it is in a language that is reasonably expected to inform the debtor of the receivable about its contents. It is sufficient if notification of the assignment or a payment instruction is in the language of the original contract; and
- (b) Notification of the assignment or a payment instruction may relate to receivables arising after notification and that notification of a subsequent assignment constitutes notification of all prior assignments.

Discharge of the debtor of the receivable by payment

19. The law should provide that:

- (a) Until the debtor of the receivable receives notification of the assignment, it is entitled to be discharged by paying in accordance with the original contract;
- (b) After the debtor of the receivable receives notification of the assignment, subject to paragraphs (c) to (h) of this recommendation, it is discharged only by paying the assignee or, if otherwise instructed in the notification of the assignment or subsequently by the assignee in a writing received by the debtor of the receivable, in accordance with such payment instruction;

(c) If the debtor of the receivable receives more than one payment instruction relating to a single assignment of the same receivable by the same assignor, it is discharged by paying in accordance with the last payment instruction received from the assignee before payment;

(d) If the debtor of the receivable receives notification of more than one assignment of the same receivable made by the same assignor, it is discharged by paying in accordance with the first notification received;

(e) If the debtor of the receivable receives notification of one or more subsequent assignments, it is discharged by paying in accordance with the notification of the last of such subsequent assignments;

(f) If the debtor of the receivable receives notification of the assignment of a part of or an undivided interest in one or more receivables, it is discharged by paying in accordance with the notification or in accordance with this recommendation as if the debtor of the receivable had not received the notification. If the debtor of the receivable pays in accordance with the notification, it is discharged only to the extent of the part or undivided interest paid;

(g) If the debtor of the receivable receives notification of the assignment from the assignee, it is entitled to request the assignee to provide within a reasonable period of time adequate proof that the assignment from the initial assignor to the initial assignee and any intermediate assignment have been made and, unless the assignee does so, the debtor of the receivable is discharged by paying in accordance with this recommendation as if the notification from the assignee had not been received. Adequate proof of an assignment includes but is not limited to any writing emanating from the assignor and indicating that the assignment has taken place;

(h) This recommendation does not affect any other ground on which payment by the debtor of the receivable to the person entitled to payment, to a competent judicial or other authority, or to a public deposit fund discharges the debtor of the receivable.

Defences and rights of set-off of the debtor of the receivable

20. The law should provide that:

(a) In a claim by the assignee against the debtor of the receivable for payment of the assigned receivable, the debtor of the receivable may raise against the assignee all defences and rights of set-off arising from the original contract, or any other contract that was part of the same transaction, of which the debtor of the receivable could avail itself as if the assignment had not been made and such claim were made by the assignor;

(b) The debtor of the receivable may raise against the assignee any other right of set-off, provided that it was available to the debtor of the receivable at the time notification of the assignment was received by the debtor of the receivable;

(c) Notwithstanding paragraphs (a) and (b) of this recommendation, defences and rights of set-off that the debtor of the receivable may raise pursuant to recommendations 15 (b) and 16 (d) against the assignor for breach of an agreement limiting in any way the assignor's right to make the assignment are not available to the debtor of the receivable against the assignee.

[Note to the Commission: The Commission may wish to note that, under recommendation 3 (a) (see A/CN.9/WG.VI/WP.26/Add.7), the draft Guide applies to consumers but does affect the rights of consumers under consumer-protection law.]

Agreement not to raise defences or rights of set-off

21. The law should provide that:

(a) The debtor of the receivable may agree with the assignor in a writing signed by the debtor of the receivable not to raise against the assignee the defences and rights of set-off that it could raise pursuant to recommendation 20. Such an agreement precludes the debtor of the receivable from raising against the assignee those defences and rights of set-off;

(b) The debtor of the receivable may not waive defences:

(i) Arising from fraudulent acts on the part of the assignee; or

(ii) Based on the debtor of the receivable's incapacity;

(c) Such an agreement may be modified only by an agreement in a writing signed by the debtor of the receivable. The effect of such a modification as against the assignee is determined by recommendation 22, paragraph (b).

[Note to the Commission: The Commission may wish to note that recommendation 21 is based on article 19 of the United Nations Assignment Convention, which refers to a signed writing only for a waiver of defences or its modification. If the Commission decides not to refer to signature in recommendation 8 (see A/CN.9/WG.VI/WP.26/Add.7) but rather to evidence that the grantor intended to grant a security right, it may wish to reconsider the reference to signature in recommendation 21. If reference to signature is retained in recommendation 8, an electronic signature should be sufficient (see note after definition (v) ("notification of the assignment") in A/CN.9/WG.VI/WP.27/Add.1.)]

Modification of the original contract

22. The law should provide that:

(a) An agreement concluded before notification of the assignment between the assignor and the debtor of the receivable that affects the assignee's rights is effective as against the assignee, and the assignee acquires corresponding rights;

(b) An agreement concluded after notification of the assignment between the assignor and the debtor of the receivable that affects the assignee's rights is ineffective as against the assignee unless:

(i) The assignee consents to it; or

(ii) The receivable is not fully earned by performance and either the modification is provided for in the original contract or, in the context of the original contract, a reasonable assignee would consent to the modification.

(c) Paragraphs (a) and (b) of this recommendation do not affect any right of the assignor or the assignee arising from breach of an agreement between them.

Recovery of payments

23. The law should provide that failure of the assignor to perform the original contract does not entitle the debtor of the receivable to recover from the assignee a sum paid by the debtor of the receivable to the assignor or the assignee.

[Note to the Commission: The Commission may wish to note that the commentary will explain that recommendation 23 does not affect any liability of the assignor towards the debtor of the receivable for breach of contract.]

Third-party effectiveness of a security right in receivables

37. The law should provide that, if a security right in a receivable, negotiable instrument or any other obligation covered as an encumbered asset by this law is effective against third parties, the security right is automatically effective against third parties with respect to any personal or property right that secures payment or performance of the receivable, negotiable instrument or other obligation, without further action by either the grantor or the secured creditor. If the personal or property right is an independent undertaking, a security right in the proceeds under the independent undertaking is automatically effective against third parties (but, as provided in recommendation 16, the security right does not extend to the right to draw under the independent undertaking). This recommendation does not apply to a right in immovable property that under applicable law is transferable separately from a receivable, negotiable instrument or other obligation that it may secure.

[Note to the Commission: The Commission may wish to note that the commentary will explain that the general third-party effectiveness recommendations apply to security rights in receivables, as well as to outright transfers of receivables. The language in parenthesis in the second sentence explains that the security right does not extend to the right to draw. Thus there is no issue of third-party effectiveness in that regard.]

Priority of security rights in receivables

[Note to the Commission: The Commission may wish to note that the commentary will explain that the general priority recommendations apply to security rights in receivables as well as to outright transfers of receivables.]

Enforcement of a security right in receivables

Application of this chapter to outright transfers of receivables

88. The law should provide that, with the following exceptions, this chapter does not apply to an outright transfer of receivables:

- (a) Recommendation 89 in the case of an outright transfer with recourse; and
- (b) Recommendations 102 and 103.

General standard of conduct

89. The law should provide that all parties must exercise their rights and perform their obligations under the recommendations of this chapter in good faith and in a commercially reasonable manner.

Collection of receivables

102. The law should provide that, in the case of an outright transfer of a receivable, the assignee has the right to collect or otherwise enforce the receivable. In the case of a transfer of a receivable by way of security, the assignee is entitled, subject to recommendations 17 to 23, to collect or otherwise enforce the receivable only after default or before default with the agreement of the assignor.

[Note to the Commission: The Commission may wish to note that the commentary will explain that the secured creditor may, as an alternative to collection, elect to dispose of or retain a receivable pursuant to recommendations 93 (d), (e), 110 and 113 (see A/CN.9/611/Add.2). The commentary will also explain that the assignee may send a notification and a payment instruction even in breach of an agreement with the assignor (see rec. 16 quater above).]

103. The law should provide that the assignee's right to collect or otherwise enforce a receivable includes the right to collect or otherwise enforce any personal or property right that secures payment of the receivable (such as a guarantee or security right).

[Note to the Commission: The Commission may wish to note that the commentary will discuss how other recommendations of the chapter on enforcement may apply to the enforcement of a right securing payment of an assigned receivable.]

Law applicable to security rights in intangible property

137. The law should provide that the creation, the effectiveness against third parties and the priority over the rights of competing claimants of a security right in intangible property are governed by the law of the State in which the grantor is located. [However, with respect to security rights in intangible property that is subject to a title registration system, the law should provide that such issues are governed by the law of the State in which [...].]

137 bis. The law should provide that the law of the State in which the assignor is located governs the creation, third-party effectiveness and priority of a security right in a receivable arising from a sale or lease of, or a security agreement relating to, an immovable over the rights of competing claimants. However, a priority conflict involving the rights of a competing third party registered in the immovables registry of the State in which the immovable is located is governed by the law of that State.

[Note to the Commission: The Commission may wish to note that the commentary will explain that recommendation 137 bis is designed to address the law applicable to assignments of receivables owing to the grantor under an agreement for the sale or lease of an immovable or under a security agreement over an immovable. In a number of States, it is not possible to create rights in such receivables independently of the related immovable with the result that the effectiveness as between the parties, the third-party effectiveness and the priority of a security right in the receivables is governed by the law (and, in particular, the registry regime) that applies to the related immovable. In other States, it is possible to grant a security right in such receivables independently of the related immovable but the secured creditor is subordinated to third-party rights that are registered against the related immovable in the immovables registry. The second sentence of recommendation 137 bis is designed to preserve the application of the law of the State where the related immovable is located in order to protect third parties who rely on the registration in the immovables registry of that State. Reference is made to rights of a competing third party as the term "competing claimant" is defined by reference to security rights in movables. Reference is also made to "rights" of such parties, since rights of third parties could include not just competing mortgagees but also assignees or buyers of the immovable or the related intangible and indeed any class of third party right for which the immovables regime makes provision for registration. In addition, reference is made to a right "registered in the immovables registry" rather than "that became effective against third parties by registration", since: (i) some immovables registries do not distinguish between inter-parties and third party effectiveness, and (ii) immovables registries do not necessarily require registration for general third-party effectiveness but only for effectiveness against third parties whose rights are also registrable in the immovables

registry (e.g. registration may not be needed for effectiveness against an insolvency administrator or a judgement creditor.)

Law applicable to the rights and obligations of the grantor and the secured creditor

146. The law should provide that the mutual rights and obligations of the grantor and the secured creditor with respect to the security right, whether arising from the security agreement or by law, are governed by the law chosen by them and, in the absence of a choice of law, by the law governing the security agreement.

Law applicable to the rights and obligations of the debtor of the receivable and the assignee, the obligor under a negotiable instrument or the issuer of a negotiable document and the secured creditor

147. The law should provide that the following matters are governed by the law of the State whose law governs an assigned receivable, or a negotiable instrument or a negotiable document in which a security right has been created:

(a) The relationship between an debtor of the receivable and an assignee of the receivable, between an obligor under a negotiable instrument and a creditor with a security right in that instrument or between an issuer of a negotiable document and a creditor with a security right in that document;

(b) The conditions under which the assignment of the receivable, the transfer of the negotiable instrument or the transfer of the negotiable document can be invoked against the debtor of the receivable, the obligor on the negotiable instrument or the issuer of the negotiable document; and

(c) The determination of whether the obligations of the debtor of the receivable, the obligor on the negotiable instrument or the issuer of the negotiable document have been discharged.

[Note to the Commission: The Commission may wish to note that the commentary will explain that: (i) recommendation 148 applies to the enforcement of a security right in a receivable (A/CN.9/WG.VI/WP.24), and (ii) the recommendations on the impact of insolvency on the law applicable, as well as the other general recommendations in the conflict-of-laws chapter (A/CN.9/WG.VI/WP.24), apply to security rights in receivables.]

A/CN.9/611/Add.1

**Security rights in rights to payment of funds credited to a bank account,
proceeds under an independent undertaking,
negotiable instruments and negotiable documents**

ADDENDUM

II.	Security rights in proceeds under an independent undertaking.	
III.	Security rights in negotiable instruments	
IV.	Security rights in negotiable documents	

I. Security rights in rights to payment of funds credited to a bank account

[Note to the Commission: In the context of its discussion of security rights in rights to payment of funds credited to a bank account, the Commission may wish to consider definitions (ff) (“bank account”) and (gg) (“control”) (see A/CN.9/WG.VI/WP.27/Add.1). The Commission may also wish to note that the commentary will explain that the term “bank account” does not include accounts held by central banks or payment, clearing and settlement institutions. The commentary will also explain that the secured creditor has control by becoming the account holder where: (i) an existing account is transferred to the secured creditor, (ii) the secured creditor agrees with the grantor that funds should be deposited to an account to be opened later, and (iii) the secured creditor is the only account holder (i.e. not merely a joint account holder).]

Creation of a security right in a right to payment of funds credited to a bank account

[Note to the Commission: The Commission may wish to note that the commentary will explain that, pursuant to recommendation 8 (see A/CN.9/WG.VI/WP.26/Add.7), a security right in a right to payment of funds credited to a bank account may be created by agreement between the grantor and the secured creditor.]

26. The law should provide that a security right in a right to payment of funds credited to a bank account is effective notwithstanding an agreement between the grantor and the depositary bank limiting in any way the grantor’s right to create a security right in its right to payment of funds credited to the bank account. However, the depositary bank has no duty to recognize the secured creditor and no obligation is otherwise imposed on the depositary bank with respect to the security right, without the depositary bank’s consent.

[Note to the Commission: The Commission may wish to note that the commentary to recommendation 3 (a) (see A/CN.9/WG.VI/WP.26/Add.7) will clarify that enacting States

may wish to take into account any impact that the recommendations in this Guide might have on consumer-protection law.]

Rights and obligations of the depositary bank

V. The law should provide that:

(a) The creation of a security right in a right to payment of funds credited to a bank account does not affect the rights and obligations of the depositary bank without its consent; and

(b) The rights of set-off of the depositary bank are not impaired by reason of any security right that the depositary bank may have in a right to payment of funds credited to a bank account.

[Note to the Commission: The Commission may wish to note that the commentary will explain that recommendations V and W are supplemented by recommendations 76, 77 (to the extent that there is a priority conflict between a security right or right of set-off of the depositary bank and a security right of another person) and 106 bis, 107 and 108 (enforcement against the depositary bank).]

The commentary will also explain that recommendation V (b) does not deal with a priority conflict but with the situation where the depositary bank itself has both a right of set-off against and a security right in a right to payment of funds credited to a bank account. In this situation, according to recommendation V (b), the bank's rights of set-off are not impaired or subsumed into (i.e. they remain distinct from) the bank's security right.]

W. The law should provide that nothing in these recommendations obligates a depositary bank to:

(a) Pay any person other than a person that has control with respect to funds credited to a bank account; or

(b) Respond to requests for information about whether a control agreement or a security right in its own favour exists and whether the grantor retains the right to dispose of the funds credited in the account.

[Note to the Commission: The Commission may wish to note that the commentary will explain that recommendation W does not affect the bank-customer relationship and the rights and obligations arising from other law governing bank accounts (e.g. money-laundering and bank secrecy).]

Third-party effectiveness of a security right in a right to payment of funds credited to a bank account

43. The law should provide that a security right in a right to payment of funds credited to a bank account is effective against third parties also if the secured creditor obtains control with respect to the right to payment of the funds credited to the bank account.

[Note to the Commission: The Commission may wish to note that the commentary will explain that, pursuant to recommendation 35 (see A/CN.9/WG.VI/WP.26/Add.5), a security right in a right to payment of funds credited to a bank account may also become effective against third parties by registration of a notice in the general security rights registry.]

Priority of a security right in a right to payment of funds credited to a bank account

76. The law should provide that a security right in a right to payment of funds credited to a bank account, which has been made effective against third parties by control, has priority over a security right in a right to payment of the funds, which has been made effective against third parties by any other method. If a depositary bank has concluded more than one control agreement, among those secured creditors, priority is determined according to the order in which the control agreements were concluded. If the secured creditor is the depositary bank, the depositary bank's security right has priority over any other security right (including a security right made effective against third parties by a control agreement with the depositary bank even if the depositary bank's security right is later in time) other than a security right of a secured creditor who has acquired control with respect to the right to payment of the funds credited to the bank account by becoming the account holder.

[Note to the Commission: The Commission may wish to note that the commentary will explain that a security right of the depositary bank always has priority even over a security right with respect to which the depositary bank has earlier entered into a control agreement because: (i) a security right of the depositary bank should have the same priority as its set-off right, which has always priority; (ii) if the depositary bank's security right had no priority, the bank would not enter into any control agreement; (iii) a secured creditor could always seek to obtain a subordination agreement from the depositary bank. The commentary will also explain that, depending on the terms of the control agreement, the depositary bank may have a contractual obligation to a secured creditor with a control agreement even though the secured creditor might not have priority.]

In addition, the Commission may wish to note that, at its tenth session, the Working Group agreed that tracing of funds credited to a bank account will be discussed together with the issue of tracing of proceeds (see A/CN.9/603, para. 67). The Commission may wish to deal with that issue as an issue of priority. The commentary to recommendation 76 will make clear that, if a secured creditor has control of a right to payment of funds credited to a bank account, its security right has priority over a security right in cash proceeds of an encumbered asset of another secured creditor that are credited to the same bank account, even if the other secured creditor is able to trace proceeds to the bank account. This is the case even if the competing security right became effective against third parties earlier than the security right held by the secured creditor with control.]

77. The law should provide that any right of the depositary bank to set-off against the right to payment of funds credited to a bank account obligations owed to the depositary bank by the grantor has priority over the security right of any secured creditor other than a secured creditor that has acquired control with respect to the funds credited to the bank account by becoming the account holder.

[Note to the Commission: The Commission may wish to note that the commentary will explain that these priority recommendations mean that third parties are taken to know that they cannot rely on a right to payment of funds credited to a bank account as a primary source of security for extensions of credit and can do so only by obtaining a subordination agreement from the depositary bank or having the account entered in their own name. Consequently, the absence of publicity of the security right is not seen as problematic. The commentary will also explain that, unlike recommendation V (b), recommendation 77 deals with priority conflicts between rights of set-off of the depositary bank and security rights of other persons. In addition, the commentary will explain that recommendation 77 does not create any rights of set-off, a matter which remains subject to other law. Moreover, the commentary will explain that the exception in

recommendation 77 refers to a secured creditor that acquired control by becoming the sole account holder. Where the secured creditor would be just a joint account holder, the grantor will still be able to dispose of the funds credited to the account and thus the secured creditor would not have control (see definition of “control” in A/CN.9/WG.VI/WP.27/Add.1).]

78. In the case of a transfer of funds from a bank account initiated by the grantor, the law should provide that the transferee of the funds takes free of a security right in the right to payment of funds credited to the bank account, unless the transferee had knowledge that the transfer violated the terms of the security agreement. This recommendation does not lessen the rights of transferees of funds from bank accounts under law other than this law.

[Note to the Commission: The Commission may wish to note that the commentary will explain that the general priority recommendations apply to security rights in rights to payment of funds credited to a bank account subject to recommendations 76 to 78. The Commission may wish to note that recommendation 79 (see A/CN.9/WG.VI/WP.26/Add.6) may have to be aligned with recommendation 78 to refer to knowledge rather than collusion.]

Enforcement of a security right in a right to payment of funds credited to a bank account

106 bis. The law should provide that after default, or before default with the agreement of the grantor, a secured creditor with a security right in a right to payment of funds credited to a bank account is entitled, subject to recommendations V and W, to collect or otherwise enforce its right to payment of the funds.

107. The law should provide that after default, or before default with the agreement of the grantor, a secured creditor that has control with respect to a right to payment of funds credited to a bank account is entitled, subject to recommendations V and W, to enforce its security right without having to apply to a court or other authority.

[Note to the Commission: The Commission may wish to note that the commentary will explain that, unlike a secured creditor that has to collect the funds to apply them to the secured obligation according to recommendation 116 (see A/CN.9/611), a depositary bank as a secured creditor may apply the funds to the secured obligation directly. The commentary will also explain that enforcement of the bank’s rights of set-off remains subject to other law.]

108. The law should provide that a secured creditor that does not have control with respect to funds credited to a bank account is entitled, subject to recommendations V and W, to collect or otherwise enforce the security right against the depositary bank only pursuant to a court order, unless the depositary bank agrees otherwise.

Law applicable to a security right in a right to payment of funds credited to a bank account

139. Except as otherwise provided in recommendation 140, the law should provide that the creation, the effectiveness against third parties, the priority over the rights of competing claimants, the rights and duties of the depositary bank with respect to the security right and the enforcement of the security right in a right to payment of funds credited to a bank account are governed by

Alternative A

the law of the State expressly stated in the account agreement as the State whose law governs the account agreement or, if the account agreement expressly provides that another law is applicable to all such issues, that other law. However, the law of the State determined pursuant to the preceding sentence applies only if the depositary bank has, at the time of the conclusion of the account agreement, an office in that State which is engaged in the regular activity of maintaining bank accounts. The law should also specify that, if the applicable law is not determined pursuant to the preceding two sentences, the applicable law is to be determined pursuant to fallback rules based on article 5 of the Hague Convention on the Law Applicable to Certain Rights in Respect of Securities Held with an Intermediary.

[Note to the Commission: Alternative A is an abbreviated version of the approach followed in articles 4.1 and 5 of the Hague Convention on the Law Applicable to Certain Rights in Respect of Securities Held With An Intermediary (“the Hague Securities Convention”). The commentary will include the detailed fallback rules in article 5 of the Hague Securities Convention with sufficient explanation.]

Alternative B

the law of the State in which the bank that maintains the bank account has its place of business. In the case of more than one place of business, reference should be made to the place where the branch maintaining the account is located.

[Note to the Commission: The Commission may wish to consider, as an alternative or supplementary provision, the law governing the control agreement (see A/CN.9/603, para. 77). The Commission may also wish to note that the commentary will explain that the recommendations on the impact of insolvency on the law applicable, as well as the other general recommendations in the conflict-of-laws chapter (A/CN.9/WG.VI/WP.24), apply to security rights in rights to payment of funds credited to a bank account.]

II. Security rights in proceeds under an independent undertaking

[Note to the Commission: In the context of its discussion of security rights in proceeds under an independent undertaking, the Commission may wish to consider definitions (z) (“independent undertaking”), (aa) (“proceeds under an independent undertaking”), (bb) (“guarantor/issuer”), (cc) (“confirmer”), (dd) (“nominated person”) and (ee) (“control”) (see A/CN.9/WG.VI/WP.27/Add.1).]

Creation of a security right in proceeds under an independent undertaking

25. The law should provide that a beneficiary may grant a security right in proceeds under an independent undertaking, even if the right to draw under the independent undertaking is not itself transferable under law and practice governing independent undertakings. The grant of a security right in proceeds under an independent undertaking is not a transfer of the right to draw under an independent undertaking.

[Note to the Commission: The Commission may wish to note that the commentary will make clear that the second part of the first sentence makes clear the important point that transferability of an independent undertaking itself (i.e. the right to draw) is irrelevant to the right to create a security right in the proceeds under the independent undertaking.]

The commentary will also explain that the second sentence distinguishes a right to request payment under an independent undertaking from a right to receive the proceeds under an independent undertaking.]

Rights and obligations of the guarantor/issuer, confirmer or nominated person of an independent undertaking

25 bis. The law should provide that:

(a) A secured creditor's rights in proceeds under an independent undertaking are subject to the rights, under the law and practice that govern independent undertakings, of the guarantor/issuer, confirmer or nominated person and of any other beneficiary named in the undertaking or to whom a transfer of drawing rights has been effected;

(b) The rights of a transferee-beneficiary of an independent undertaking are superior to a security right in proceeds under the independent undertaking acquired from the transferor [or any prior transferor]; and

(c) The independent rights of a guarantor/issuer, confirmer, nominated person or transferee-beneficiary under an independent undertaking are not impaired by reason of any security rights it may have in proceeds under the independent undertaking, including any right in proceeds under the independent undertaking that may result from a transfer of drawing rights to a transferee-beneficiary.

[Note to the Commission: The Commission may wish to note that the commentary will make clear that this recommendation is intended to ensure that the rights of holders of independent rights to payment, notably nominated persons that have given value and transferee-beneficiaries to whom a transfer has been effected, are superior to mere assignees of rights to proceeds under a drawing by the original beneficiary. The commentary will also explain that their independent rights are distinct and are not impaired because of their rights as secured creditors of the original beneficiary (in other terms, their status as protected holders of independent rights should not be confused with their status as secured creditors). When a nominated person gives value and obtains reimbursement from the guarantor/issuer, it does so on the basis of its independent reimbursement rights and not as an acquirer of the rights of the beneficiary.]

25 ter. Neither a guarantor/issuer nor a confirmer nor a nominated person is obligated to pay any person other than a named beneficiary, an acknowledged transferee-beneficiary or an acknowledged assignee of proceeds under an independent undertaking.

25 quater. The law should provide that, if a secured creditor has obtained control with respect to proceeds under an independent undertaking by becoming an acknowledged assignee of the proceeds, the secured creditor has the right to enforce the acknowledgement against the guarantor/issuer, confirmer or nominated person that made the acknowledgement

Third-party effectiveness of a security right in proceeds under an independent undertaking

49. The law should provide that a security right in proceeds under an independent undertaking is made effective against third parties by control with respect to the proceeds under the independent undertaking.

[Note to the Commission: The Commission may wish to note that recommendation 49 has been revised on the basis of the assumption that neither possession of an independent undertaking nor registration of a notice should be a method

of achieving third-party effectiveness of a security right in a right to proceeds under an independent undertaking. Possession of an independent undertaking (even when it is in tangible form) plays only a limited role in the modern use of independent undertakings. In addition, if possession were included in this Guide as a method of achieving effectiveness against third parties, there would be a need for complex rules dealing with priority and conflict of laws. It should be noted, however, that, although possession does not constitute a method of achieving effectiveness against third parties, as a practical matter, possession would give protection to a secured creditor when the terms of the independent undertaking require the physical presentation of the independent undertaking to make a draw under the independent undertaking. In such a circumstance, the beneficiary could not make an effective draw without the secured creditor's cooperation, so the secured creditor could take steps to assure itself of payment (e.g. the secured creditor could require the beneficiary to obtain an acknowledgement that would achieve control for the secured creditor before surrendering the independent undertaking and allowing it to be presented to the guarantor/issuer or nominated person that gave the acknowledgement).]

Priority of a security right in proceeds under an independent undertaking

62. The law should provide that a security right in proceeds under an independent undertaking, which has been made effective against third parties by control has, with respect to a particular guarantor/issuer, confirmer or nominated person agreeing to give value under an independent undertaking, priority over the rights of all other secured creditors who have not, with respect to that person, made their security right effective against third parties by control. If control has been achieved by acknowledgement and inconsistent acknowledgements have been given to more than one secured creditor by a person, among those secured creditors, priority is determined according to the order in which the acknowledgements were given.

[Note to the Commission: The Commission may wish to note that the commentary will explain that, as the typical method of achieving control is by obtaining an acknowledgment, in the case of several potential payors (e.g. the guarantor/issuer, confirmer and several nominated persons), control is achieved only vis-à-vis the particular guarantor/issuer(s), confirmer(s) or nominated person(s) who gave the acknowledgment(s). Thus, the priority rule must focus on the particular person who is the payor. The basic priority rule makes clear that a secured creditor that has control of the right to proceeds under an independent undertaking has priority over a secured creditor whose security right became effective against third parties automatically. The commentary will also explain that the guarantor/issuer may have a contractual obligation to an acknowledged secured creditor even though the secured creditor might not have priority.]

Enforcement of a security right in proceeds under an independent undertaking

106. The law should provide that effectiveness against third parties of a security right in proceeds under an independent undertaking (whether achieved by control or automatically) is not a prerequisite to enforcing the security right. However, as against the guarantor/issuer, confirmer, nominated person or beneficiary other than the grantor, the security right must be exercised in accordance with recommendations 25 bis, 25 ter and 25 quater.

[Note to the Commission: The Commission may wish to note that the commentary will make clear that no separate act of transfer by the grantor is necessary for the secured creditor to enforce a security right in a right to proceeds under an independent undertaking when the security right is created automatically under recommendation 16. The commentary will also explain that any obligations of the guarantor/issuer or

nominated person to the secured creditor are governed by recommendations 25 bis, 25 ter and 25 quater. Furthermore, the commentary will explain that recommendation 106 is not intended to disturb any pre-default arrangements agreed upon between the grantor and the secured creditor by which, prior to the grantor's default, the secured creditor may receive the proceeds under an independent undertaking.]

Law applicable to security rights in proceeds under an independent undertaking

138. The law should provide that: (i) the rights and duties of a guarantor/issuer, confirmer or nominated person that has received a request for an acknowledgement or that has or may pay or otherwise give value under an independent undertaking; (ii) the right to enforce a security right in proceeds under an independent undertaking against a guarantor/issuer, confirmer or nominated person; and (iii) except to the extent otherwise provided in recommendation 138 bis, the effectiveness against third parties and the priority over the rights of competing claimants of a security right in proceeds under the independent undertaking are governed, separately with respect to a particular guarantor/issuer, confirmer or nominated person, by the law of the State determined as follows:

(a) If the guarantor/issuer has issued an independent undertaking, the confirmer has issued a confirmation or the nominated person has issued an acknowledgement that specifies that it is governed by the law of a State, the applicable law is the law of the specified State;

(b) If the applicable law is not determined under the preceding paragraph, the applicable law is the law of the State of the location of the branch or office of the guarantor/issuer, confirmer or nominated person indicated in the independent undertaking of the guarantor/issuer, confirmer or nominated person. However, in the case of a nominated person that has not issued an independent undertaking, the applicable law is the law of the State of the location of the nominated person's branch or office that has or may pay or otherwise give value under the independent undertaking.

138 bis. The law should provide that, if a security right in proceeds under an independent undertaking is created and is made effective against third parties automatically as a result of the effectiveness against third parties of a security right in a receivable, negotiable instrument or other obligation which the independent undertaking secures, the creation and the effectiveness against third parties of the security right in the proceeds under the independent undertaking is governed by the law of the State whose law governs the creation and the effectiveness against third parties of the security right in the secured receivable, negotiable instrument or other obligation.

[Note to the Commission: The Commission may wish to note that the commentary will explain that recommendation 138 follows the conflict-of-laws rules applicable with respect to the rights and obligations of guarantor/issuers, confirmers or nominated persons. The only exception to the principle embodied in recommendation 138 is recommendation 138 bis for the limited issues of creation and third-party effectiveness in the cases where a security right arises or is made effective against third parties automatically.]

In addition, the commentary will explain that each bank (or sometimes non-bank) filling one of these roles acts pursuant to the law where it is located, meaning where its relevant branch or office is located (or the law it chooses, which is typically the law of the State where its relevant branch or office is located). Accordingly, different laws govern the different banks involved, and a choice of law in an independent undertaking governs only the particular issuer's obligations (see URDG article 27, UCC 5-116 (b), and United Nations Assignment Convention article 29). The commentary will also explain that what

recommendation 138 strives to do is be clear that a request for acknowledgement or for payment (without prior acknowledgement) made by a secured creditor (or the beneficiary on its behalf) is to be handled by the affected bank branch under its local law.

Under recommendation 138, all priority conflicts are subject to the law chosen by a guarantor/issuer, confirmer or nominated person or, in the absence of a choice of law, to the law of the relevant branch or office. The Commission may wish to consider the question whether: (i) if that bank branch pays (or gives value to) that secured creditor, then that same law should apply to that secured creditor's priority contest with third parties; and (ii), if the payment is to the beneficiary and the priority contest is among third parties, recommendation 138 should be inapplicable and residual conflict-of-laws rules apply (i.e. recommendation 137).

The commentary will further explain that: (i) creation of the security right is governed by the general conflict-of-laws rule in recommendation 137 for security rights in intangibles (except as provided in recommendation 138 bis for automatic creation); and (ii) enforcement of the security right is governed by the general conflict-of-laws rule in recommendation 148, except to the extent otherwise provided in recommendation 138.]

III. Security rights in negotiable instruments

[Note to the Commission: In the context of its discussion of security rights in negotiable instruments, the Commission may wish to consider definitions (i) ("tangibles") and (x) ("negotiable instrument") (see A/CN.9/WG.VI/WP.27/Add.1).]

Parties, security rights, secured obligations and assets covered

3. In particular, the law should provide that it applies to:

...

(f) Generally, outright transfers of receivables;

[Note to the Commission: The Commission may wish to note that, at its tenth session, the Working Group agreed that, while outright transfers of negotiable instruments should not be covered in the draft Guide, a discussion of the relevant issues might be included in the commentary for the benefit of States that might wish to address outright transfers of negotiable instruments because of their importance to financing practices (see A/CN.9/603, para. 50).

In that connection, the Commission may wish to note that the commentary will explain that, while principles of secured transactions law can easily be made to apply to the outright transfer of promissory notes and, perhaps, bills of exchange other than cheques, in a manner similar to this Guide's coverage of the outright transfer of receivables, those principles do not apply well to the outright transfer of cheques. The latter topic is sufficiently covered by the law of negotiable instruments and the law of bank collections.

The commentary will also explain that an enacting State that wishes to expand the scope of its secured transactions law to apply to outright transfers of negotiable instruments that are either promissory notes or bills of exchange (and to expand its definition of "security right" to cover the right of the transferee in such a transaction) might wish to consider providing that a security right that is an outright transfer of such a negotiable instrument is automatically effective against third parties upon the transfer. Such a rule would avoid disrupting existing financial practices.

In addition, the commentary will explain that, with respect to the priority of such a security right, the general principles of priority would apply. Most particularly, the general principle in recommendation 63 (see A/CN.9/WG.VI/WP.26/Add.6), as qualified by recommendation 74, would govern. As in the case of an outright transfer of a receivable, the outright transferee of such a negotiable instrument should be able to enforce the instrument without further consent of the assignor subject, of course, to the rights of the obligors on the negotiable instrument as described in the chapter on enforcement.]

Creation of a security right in a negotiable instrument

[Note to the Commission: The Commission may wish to note that the commentary will explain that, pursuant to recommendation 8 (see A/CN.9/WG.VI/WP.26/Add.7), a security right in a negotiable instrument may be created by a written and possibly signed agreement between the grantor and the secured creditor or by even an oral agreement and delivery of possession of the instrument to the secured creditor. The commentary will also explain that creation of a security right under this recommendation will not affect rights obtained by endorsement of the negotiable instrument under the law governing negotiable instruments.]

Rights and obligations of the obligor under a negotiable instrument

X. The law should provide that, as between the secured creditor and (i) the person obligated on the negotiable instrument or (ii) other persons claiming rights under the law governing negotiable instruments, the obligations and rights of those persons are determined by the law governing negotiable instruments.

Third-party effectiveness of a security right in a negotiable instrument

[Note to the Commission: The Commission may wish to note that the commentary will explain that, according to the general third-party effectiveness recommendation 35 (see A/CN.9/WG.VI/WP.26/Add.5), a security right in a negotiable instrument may be made effective against third parties by registration of a notice in the general security rights registry. Recommendation X addresses a special issue.]

Y. The law should provide that a security right in a negotiable instrument that was made effective against third parties by dispossession continues to be effective against third parties for a short period of [to be specified] days after the negotiable instrument has been relinquished to the grantor for the purpose of presentation, collection, enforcement or renewal.

[Note to the Commission: The Commission may wish to note that a secured creditor may have to return an encumbered negotiable instrument to the grantor for presentation, collection, enforcement or renewal, if the secured creditor does not have that right. The commentary will also explain that, by returning the encumbered negotiable instrument to the grantor, the secured creditor would be exposed to the risk of losing its security only for a short period of time and only if it had not registered a notice about its security right in the general security rights registry.]

Priority of a security right in a negotiable instrument

[Note to the Commission: The Commission may wish to note that the commentary will explain that the general priority recommendations (see A/CN.9/WG.VI/WP.26/Add.6)

apply to priority with respect to security rights in negotiable instruments, while recommendations 74 and 74 bis deals with additional priority conflicts.]

74. The law should provide that a security right in a negotiable instrument that was made effective against third parties by dispossession of the grantor with respect to the instrument has priority over a security right in a negotiable instrument that was made effective against third parties by any other method.

74 bis. The law should provide that a security right in a negotiable instrument that was made effective against third parties by a method other than by dispossession of the grantor with respect to the instrument is subordinate to the rights of another secured creditor, buyer or other transferee (in a consensual transaction) that either:

(a) Qualifies as a protected holder under the law governing negotiable instruments; or

(b) Takes possession of the negotiable instrument and gives value in good faith and without knowledge that the transfer was in violation of the rights of the holder of the security right.

Enforcement of a security right in a negotiable instrument

104. The law should provide that after default, or before default with the agreement of the grantor, the secured creditor, is entitled, subject to recommendation X, to collect or otherwise enforce a negotiable instrument that is an encumbered asset against a person obligated on that instrument.

[Note to the Commission: The Commission may wish to note that commentary will explain that as between the secured creditor and (i) the person obligated on the negotiable instrument, or (ii) other persons claiming rights under the law governing negotiable instruments, the enforcement rights of the secured creditor are subject to the law governing negotiable instruments. The commentary will also include the following examples of such persons:

(a) *The person obligated on the negotiable instrument may be obligated to pay only a holder or other person entitled to enforce the instrument under the law governing negotiable instruments; and*

(b) *The right of the person obligated on the instrument to raise defences to that obligation is determined by the law governing negotiable instruments.]*

105. The law should provide that the secured creditor's right to collect or otherwise enforce a negotiable instrument includes the right to collect or otherwise enforce any personal or property right that secures payment of the negotiable instrument (such as a guarantee or security right).

Law applicable to security rights in tangibles

136. The law should provide that, except as otherwise provided in recommendations 140 and 142, the creation, the effectiveness against third parties and the priority over the rights of competing claimants of a security right in tangible property are governed by the law of the State in which the encumbered asset is located. However, with respect to security rights in tangible property of a type ordinarily used in more than one State, the law should provide that such issues are governed by the law of the State in which the grantor is located. [With respect to security rights in the type of tangible property mentioned in the preceding sentence that is subject to a title registration system, the law should provide that

such issues are governed by the law of the State under the authority of which the registry is maintained.]

[Note to the Commission: The Commission may wish to note that the commentary will explain that “tangible property of a type ordinarily used in more than one State” refers to mobile goods, such as motor vehicles. The same term in the bracketed sentence in recommendation 136 refers to mobile goods, such as ships and aircraft.]

Law applicable to third-party effectiveness of security rights in specified types of asset by registration

140. If the State in which the grantor is located recognizes registration as a method of achieving effectiveness against third parties of a security right in a negotiable instrument and rights to payment of funds credited to a bank account, the law of that State determines whether the effectiveness against third parties of a security right in such encumbered assets has been achieved by registration under the laws of that State.

Law applicable to the rights and obligations of the grantor and the secured creditor

146. *[See A/CN.9/611.]*

Law applicable to the rights and obligations of the debtor of the receivable and the assignee, the obligor under a negotiable instrument or the issuer of a negotiable document and the secured creditor

147. *[See A/CN.9/611.]*

[Note to the Commission: The Commission may wish to note that the commentary will explain that: (i) recommendation 148 applies to the enforcement of a security right in a negotiable instrument (A/CN.9/WG.VI/WP.24); and (ii) the recommendations on the impact of insolvency on the law applicable, as well as the other general recommendations in the conflict-of-laws chapter (A/CN.9/WG.VI/WP.24), apply to security rights in negotiable instruments.]

IV. Security rights in negotiable documents

[Note to the Commission: In the context of its discussion of security rights in negotiable documents, the Commission may wish to consider definitions (y) (“negotiable document”), (nn) (“possession”) and (oo) (“issuer”) (see A/CN.9/WG.VI/WP.27/Add.1).]

Creation of a security right in a negotiable document

[Note to the Commission: The Commission may wish to note that, the commentary will explain that, pursuant to recommendation 8 (see A/CN.9/WG.VI/WP.26/Add.7), a security right in a negotiable document may be created by a written and possibly signed agreement between the grantor and the secured creditor or even by an oral agreement and delivery of possession of the document to the secured creditor. For the benefit of enacting States that may wish to consider addressing multi-modal transport documents, the commentary will explain that, as the definition of a negotiable document in the draft Guide is left to the law governing negotiable documents, the negotiability of multi-modal transport documents is also left to that law.]

28. The law should provide that the creation of a security right in a negotiable document also gives rise to a security right in the goods represented by the document, provided that

the issuer is in possession of the goods, directly or indirectly, at the time the security right in the document is created.

[Note to the Commission: The Commission may wish to note that the commentary will clarify that a security right in goods covered by a negotiable document may be created pursuant to recommendation 8 directly in the goods or pursuant to recommendation 28 through the creation of a security right in the negotiable document covering the goods. The commentary will also clarify that recommendation 28 is intended to negate that, in situations where a security right exists in a negotiable document, a separate security right needs to be created in the goods covered by the document. Moreover, the commentary will explain that neither recommendation 8 nor recommendation 28 nor any other recommendation affects rights in negotiable documents acquired under the law governing negotiable documents.]

Rights and obligations of the issuer of a negotiable document

Z. The law should provide that as between the secured creditor and the issuer or other person obligated on the negotiable document, the rights and obligations of those persons are determined by the law governing negotiable documents.

[Note to the Commission: The Commission may wish to note that this recommendation will be placed in a separate chapter dealing with the rights and obligations of third-party obligors.]

Third-party effectiveness of a security right in a negotiable document

44. The law should provide that a security right in a negotiable document is made effective against third parties by delivery of possession of the document to the secured creditor.

44 bis. The law should provide that, if a security right in a negotiable document is effective against third parties, the corresponding security right in the goods covered by the document is also effective against third parties. As long as a negotiable document covers goods, a security right in the goods may be made effective against third parties by dispossession of the grantor with respect to the document.

44 ter. The law should provide that a security right in a negotiable document that was made effective against third parties by dispossession of the grantor remains effective against third parties for a short period of [to be specified] days after the negotiable document has been relinquished to the grantor or other person for the purpose of ultimate sale or exchange, loading or unloading, or otherwise dealing with the goods covered by the negotiable document.

Priority of a security right in a negotiable document

[Note to the Commission: The Commission may wish to note that the commentary will clarify that the general priority recommendations apply to security rights in negotiable documents, while recommendations 80 and 81 deal with additional priority conflicts.]

80. The law should provide that, while goods are in the possession of the issuer of a negotiable document with respect to them, a security right in those goods that became effective against third parties as a result of the security right in the negotiable document becoming effective against third parties has priority over another security right in the

goods that was made effective against third parties by a different method while the goods were covered by the document.

81. The law should provide that a security right in a negotiable document and the goods covered thereby is subject to the rights under the law governing negotiable documents of a person to whom the negotiable document has been duly negotiated.

Enforcement of a security right in a negotiable document

[Note to the Commission: The Commission may wish to note that the commentary will also explain that the general recommendations on enforcement of security rights apply here as well, while recommendation 109 deals with a special issue.]

109. The law should provide that after default, or before default with the agreement of the grantor, the secured creditor is entitled, subject to recommendation Z, to enforce a security right in negotiable document against the issuer or any other person obligated on the negotiable document.

[Note to the Commission: The Commission may wish to note that the commentary will explain that, under law governing negotiable documents, the issuer may be obligated to deliver the goods only to a holder of the negotiable document with respect to them.]

Law applicable to security rights in tangibles

136. *[See recommendation 136 under III above.]*

[Note to the Commission: The Commission may wish to note that a security right may be created in goods either pursuant to recommendation 8 or by the creation of a security right in a negotiable document representing those goods pursuant to recommendation 28 (see above). In either case, recommendation 136 provides that the creation, third-party effectiveness and priority of the security right are governed by the law of State of the location of the goods or document, as applicable. Because goods in transit and export goods, by their nature, move from State to State and, therefore, the location of the goods at any particular moment might be fortuitous and temporary, recommendation 142 provides an alternative method for creation and third-party effectiveness of a security right in such goods referring to the law of the State of the ultimate destination of the goods, provided that the goods reach that destination within a reasonable period of time. Recommendation 142 thus addresses the problems that could result from unwavering adherence to the “location of the tangible asset rule” in the context of goods whose location will certainly change as a result of the very nature of the financing transaction.]

The Commission may also wish to note, though, that, at its tenth session, the Working Group considered that, in many financing transactions involving negotiable documents it is also the nature of the transaction that the location of the negotiable document changes, as, for example, a bill of lading may move from the consignor to the consignee to the secured creditor or other financier (see A/CN.9/603, para. 60). In addition, the Working Group noted that, in such transactions, at any particular time the negotiable document might be located in a different State than the goods that it represents, even though the goods and the negotiable document will ultimately be located in the same State. Accordingly, at that session, the suggestion was made that the practical issue with respect to the goods that is addressed by recommendation 142 might also be present for the negotiable documents representing those goods and that, accordingly, there may be some advantage in broadening the rule in recommendation 142 to cover negotiable documents. Thus, the Commission may wish to consider extending the application of

recommendation 142 to negotiable documents. In that connection, the Commission may wish to take into consideration that, under recommendations 136 and 142, the priority of a security right in goods covered by a negotiable document is always subject to the law of the location of the document. If the applicable law is the law of a State that has enacted the recommendations of this Guide, under recommendation 80, the security right in the goods that became effective against third parties as a result of the security right in the negotiable document becoming effective against third parties will have priority over a security right in the goods that became effective against third parties by another method. The Commission may also wish to note that, under recommendation 148, the enforcement of the security right in the goods or the document is always subject to the law of the State where enforcement takes place or the law governing the security agreement (depending on which alternative is retained).]

Law applicable to third-party effectiveness of security rights in specified types of asset by registration

140. *[See recommendation 140 under III above.]*

Security rights in goods in transit and export goods

142. The law should provide that a security right in tangible property (other than negotiable instruments or negotiable documents) in transit or to be exported from the State in which it is located at the time of the creation of the security right may also be created and made effective against third parties under the law of the State of the ultimate destination, provided that the property reaches that State within a short time period of [to be specified] days after the time of creation of the security right.

[Note to the Commission: The Commission may wish to note that the commentary will explain that a security right in goods in transit and export goods can be created and made effective against third parties, under recommendation 136, in accordance with the law of the State of their location at the time of creation, or, under recommendation 142, in accordance with the law of the State of their ultimate destination. The commentary will also explain that the law of the State of the ultimate destination that governs creation and third-party effectiveness will apply even in the case of a contest with competing rights that were created and made effective against third parties while the export goods were located in the State of origin. In addition, the commentary will explain that the rule in this recommendation: (i) is applicable to encumbered assets that travel whether or not negotiable documents relating to the goods accompany the goods; (ii) is not applicable to encumbered goods that do not travel, whether or not negotiable documents relating to the goods do travel; and (iii) is not applicable to encumbered negotiable documents whether or not they travel.]

Law applicable to the rights and obligations of the grantor and the secured creditor

146. *[See A/CN.9/611.]*

Law applicable to the rights and obligations of the debtor of the receivable and the assignee, the obligor under a negotiable instrument or the issuer of a negotiable document and the secured creditor

147. *[See A/CN.9/611.]*

[Note to the Commission: The Commission may wish to note that the commentary will explain that: (i) recommendation 148 applies to the enforcement of a security right in a negotiable document (A/CN.9/WG.VI/WP.24); and (ii) the recommendations on the

impact of insolvency on the law applicable, as well as the other general recommendations in the conflict-of-laws chapter (A/CN.9/WG.VI/WP.24), apply to security rights in negotiable documents.]

A/CN.9/611/Add.2

Recommendations of the draft Legislative Guide on Secured Transactions

ADDENDUM

CONTENTS

	<i>Recommendations</i>	<i>Page</i>
VII. Pre-default rights and obligations of the parties	86-87	
VIII. Default and enforcement.	88-124	

VII. Pre-default rights and obligations of the parties

Purpose

The purpose of the provisions of the law on pre-default rights and obligations of the parties is to enhance efficiency of secured transactions and reduce transaction costs and potential disputes by:

- (a) Providing rules on additional terms for the security agreement;
- (b) Eliminating the need to negotiate and draft terms to be included in the security agreement where the rules provide an acceptable basis for agreement;
- (c) Providing a drafting aid or checklist of issues the parties may wish to address at the time of negotiation and conclusion of the security agreement; and
- (d) Encouraging party autonomy.

Party autonomy

86. The law should provide that, except as otherwise provided in [specify the provisions that may not be derogated from or varied by agreement, e.g. standard of conduct in the context of enforcement], the secured creditor and the grantor may derogate from or vary by agreement its provisions relating to their respective rights and obligations. Such an agreement does not affect the rights of any person that is not a party to the agreement.

[Note to the Commission: The Commission may wish to note that, at its tenth session, the Working Group agreed that recommendation 86 should be moved to the general part of the draft Guide (see A/CN.9/603, para. 90). As that part had already been issued before the tenth session of the Working Group, this decision will be implemented at the next version of the general part.]

Additional terms for the security agreement

87. The law should include rules that provide, in particular, for:

- (a) An obligation of the secured creditor or the grantor in possession of the encumbered assets to take any steps necessary to preserve, insure and pay taxes for the encumbered assets;

- (b) A right of the secured creditor to make reasonable use of the encumbered assets in its possession or to inspect encumbered assets in the possession of the grantor;
- (c) A right of the secured creditor to receive any proceeds derived from the encumbered assets in its possession or to have the security right extended in any proceeds of encumbered assets in the possession of the grantor;
- (d) A right of the secured creditor to freely assign the secured obligation in which case the security right follows, unless otherwise provided by law;
- (e) A right of the secured creditor to be reimbursed for reasonable expenses for the preservation of encumbered assets in its possession;
- (f) An obligation of the grantor to make up for an unexpected devaluation of the encumbered assets;
- (g) An obligation of the secured creditor to return the encumbered assets in its possession or terminate the notice registered upon full payment of the secured obligation and termination of all commitments to extent credit.

VIII. Default and enforcement

Purpose

The purpose of the provisions of the law on default and enforcement is to:

- (a) Provide clear and simple procedures for the enforcement of security rights after debtor default in a predictable and efficient manner;
- (b) Provide procedures that maximize the potential realization value of the encumbered assets for the benefit of the grantor, the debtor or any other person that owes payment of the secured obligation, the secured creditor and other creditors with a right in the encumbered assets;
- (c) Provide for expeditious judicial and, subject to appropriate safeguards, non-judicial methods for the secured creditor to realize the value of the encumbered assets;
- (d) Coordinate the secured transactions enforcement regime with other law governing the enforcement of claims in encumbered assets, including insolvency law.

Application of this chapter to outright transfers of receivables

88. [See A/CN.9/611]

General standard of conduct

89. The law should provide that all parties must exercise their rights and perform their obligations under the recommendations of this chapter in good faith and in a commercially reasonable manner.

Liability for failure to comply with recommendations of this chapter

90. The law should provide that any party that fails to comply with the obligations arising under the recommendations of this chapter is liable for any damages caused by that failure.

Limitations to party autonomy in the context of the enforcement of a security right

91. The law should provide that rights arising under recommendation 89 cannot be waived unilaterally or varied by agreement at any time. Subject to that exception: (i) the grantor and any other person that owes payment or other performance of the secured obligation may waive unilaterally or vary by agreement any of their rights and remedies under the recommendations of this chapter only after default, and (ii) the secured creditor may waive unilaterally or by agreement any of its rights and remedies under the recommendations of this chapter at any time. A variation by agreement does not affect the rights of any person not a party to the agreement. A person challenging an agreement has the burden of showing that it was made prior to default or is inconsistent with recommendation 90.

[Note to the Commission: The Commission may wish to consider whether a waiver or variation of the liability arising under recommendation 90 should be addressed in recommendation 91 or left to other law.]

Rights and remedies after default

92. As more specifically provided in other recommendations of this chapter, the law should provide that after default the grantor and the secured creditor have the rights and remedies provided in the recommendations of this chapter, in the security agreement (except to the extent inconsistent with the mandatory recommendations of this chapter) and in any other law.

Secured creditor rights and remedies

93. As more specifically provided in other recommendations of this chapter, the law should provide that after default the secured creditor is entitled to:

- (a) Obtain possession of a tangible encumbered asset;
- (b) Collect on an encumbered asset that is a receivable, negotiable instrument, right to payment of funds credited to a bank account or proceeds under an independent undertaking;
- (c) Enforce rights under a negotiable document;
- (d) Sell or otherwise dispose of, lease or license an encumbered asset;
- (e) Propose to the grantor that the secured creditor accept an encumbered asset in total or partial satisfaction of the secured obligation; and
- (f) Exercise any other right or remedy provided in the security agreement (except to the extent inconsistent with the mandatory recommendations of this chapter) or any other law.

Judicial and extrajudicial enforcement

94. As more specifically provided in other recommendations of this chapter, the law should provide that after default the secured creditor is entitled to exercise the rights and remedies described in recommendation 93:

- (a) By applying to a court or other authority; or
- (b) Without applying to a court or other authority.

Grantor rights and remedies

95. As more specifically provided in other recommendations of this chapter, the law should provide that after default the grantor is entitled to:

(a) Pay in full the secured obligation after default and until the disposition, acceptance or collection of an encumbered asset by the secured creditor, and thereby obtain a release from the security right of all encumbered assets securing that obligation, provided that all commitments of the secured creditor to extend credit have terminated;

(b) Apply to a court or other authority for relief if the secured creditor has not complied or is not complying with its obligations under the recommendations of this chapter with respect to extrajudicial enforcement;

(c) Reject the proposal of the secured creditor to accept an encumbered asset in total or partial satisfaction of the secured obligation within the time limits prescribed by the recommendations of this chapter; and

(d) Exercise any other right or remedy provided in the security agreement (except to the extent inconsistent with the mandatory recommendations of this chapter) or any other law.

Summary judicial proceedings

96. The law should provide for summary judicial proceedings with respect to the exercise of rights and remedies of the secured creditor, the grantor, and any other person who owes performance of the secured obligation or claims to have a right in the encumbered assets.

Cumulative rights and remedies

97. The law should provide that the exercise of a right or remedy does not prevent the exercise of another right or remedy.

Rights and remedies with respect to the secured obligation

98. The law should provide that the exercise of rights or remedies with respect to an encumbered asset under this law does not prevent the secured creditor from exercising its rights or remedies with respect to the obligation secured by that encumbered asset. The exercise of rights or remedies with respect to a secured obligation does not prevent the secured creditor from exercising its rights or remedies with respect to an encumbered asset that secures that obligation.

Release of the encumbered assets after full payment

99. The law should provide that, after default and until the disposition, acceptance or collection of an encumbered asset by the secured creditor, the debtor, the grantor or any other interested party (e.g. a secured creditor whose security right has lower priority than that of the enforcing secured creditor, a guarantor or a co-owner of the encumbered assets) is entitled to pay the secured obligation in full. If all commitments to extend credit have terminated, the effect of such payment is to release from the security right all encumbered assets securing that obligation or, to the extent provided in other law, to subrogate any other interested party that makes the payment to the rights of the secured creditor.

Relief with respect to extrajudicial enforcement

100. The law should provide that the debtor, the grantor or other interested parties (e.g. a secured creditor, a guarantor or a co-owner of the encumbered assets) are entitled to apply to a court or other authority for relief if the secured creditor has not complied or is not complying with its obligations under the recommendations of this chapter. The law should build safeguards into the process to discourage unfounded applications and to prevent any improper interference with or undue delay of the secured creditor's ability to enforce its security right.

Secured creditor's right to possession of an encumbered asset

101. The law should provide that after default the secured creditor is entitled to possession of a tangible encumbered asset.

Alternative A

The secured creditor is entitled to take possession of the encumbered asset without applying to a court or other authority if: (i) it has given the grantor and any person in possession of the encumbered asset notice of default and (ii) possession can be taken without the use or threat of force.

Alternative B

The secured creditor is entitled to take possession of the encumbered asset without applying to a court or other authority, if: (i) it has given the grantor and any person in possession of the encumbered asset notice of default and of its intention to pursue extrajudicial enforcement and (ii) possession can be taken without the use or threat of force, or other similar illegal act.

Collection of receivables

102. [*For recommendations 102 and 103, see A/CN.9/611.*]

Negotiable instruments

104. [*For recommendations 104 and 105, see A/CN.9/611/Add.1.*]

Proceeds under an independent undertaking

106. [*See A/CN.9/611/Add.1.*]

Rights to payment of funds credited to a bank account

106 bis. [*For recommendations 106 bis, 107 and 108, see A/CN.9/611/Add.1.*]

Negotiable documents

109. [*See A/CN.9/611/Add.1.*]

Disposition of encumbered assets

110. As more specifically provided in other recommendations of this chapter, the law should provide that after default a secured creditor is entitled to sell or otherwise dispose of, lease or license an encumbered asset pursuant to recommendation 93 (d).

110 bis. The law should provide that a secured creditor that disposes of encumbered assets without applying to a court or other authority may select the method, manner, time, place, and other aspects of the disposition.

[Note to the Commission: The Commission may wish to note that the commentary will explain that this recommendation is subject to the standard of good faith and commercial reasonableness set out in recommendation 89. It will also explain that the purpose and effect of this recommendation is to provide a balance between the interests of both the grantor (and its other creditors) and the secured creditor in enabling flexibility in the methods used to dispose of the encumbered assets toward the end of obtaining an economically effective enforcement, while at the same time protecting the grantor against actions taken by the secured creditor that, in the commercial context, are not reasonable. The commentary will also explain that the secured creditor need not be in possession of the encumbered assets to exercise its rights and remedies under this chapter.]

Advance notice with respect to extrajudicial disposition of encumbered assets

111. The law should require the secured creditor to give notice with respect to extrajudicial disposition of an encumbered asset after default. The law should:

(a) Specify that the notice should be given to: (i) the grantor, the debtor and any other person that owes payment of the secured obligation, (ii) any person with rights in the encumbered asset that, prior to the sending of the notice by the secured creditor to the grantor, has notified in writing the secured creditor of those rights, and (iii) any other secured creditor that, more than [...] days before the notice is sent to the grantor, has registered a notice of a security right in the encumbered asset under the name of the grantor or that was in possession of the encumbered asset at the time it was seized by the secured creditor;

(b) State the manner in which the notice is to be given, its timing, and its minimum contents, including whether the notice to the grantor should contain an accounting of the amount then owed and a reference to the right of the debtor or the grantor to obtain the release of the encumbered assets from the security right under recommendation 98;

(c) Provide that the notice should be in a language that is reasonably expected to inform its recipients about its contents (notice to the grantor is sufficient if it is in the language of the security agreement and, if the security right was made effective against third parties by registration, notice to all other persons is sufficient if it is in the language of the registry);

(d) Address the legal consequences of failure to comply with the recommendations governing the notice; and

(e) List circumstances in which the notice need not be given either because the time delay associated with requiring advance notice could have a negative effect on the realization value of the encumbered assets (as in the case of perishable tangibles or other assets whose value may decline speedily) or because the encumbered assets are of a sort sold on a recognized market (thereby obviating the need for advance notice).

112. The law should provide rules ensuring that the notice referred to in recommendation 111 can be given in an efficient, timely and reliable way so as to protect the grantor or other interested parties, while, at the same time, avoiding having a negative effect on the secured creditor's remedies and the potential realization value of the encumbered assets.

[Note to the Commission: The Commission may wish to note that the commentary will explain that these rules should balance the interest of the secured creditor in having the flexibility to dispose of the encumbered asset promptly in order to take advantage of favourable market conditions (an interest that also benefits the grantor and other interested parties) with the interest of the grantor and those other parties in obtaining notice of the disposition sufficiently before the disposition in order to take actions that might further protect their interests (such as locating potential buyers for the encumbered asset or attending a public disposition of the encumbered asset to verify the secured creditor's compliance with its obligations under this chapter. The commentary will also explain that the recommendation does not require registration of the notice because the notice meets the policy goals that could be served by registration. The Working Group may wish to define notice as written notice, except where otherwise provided in the law.]

Acceptance of encumbered assets in satisfaction of the secured obligation

113. The law should provide that after default a secured creditor may propose to accept, without applying to a court or other authority, one or more of the encumbered assets in total or partial satisfaction of the secured obligation.

114. The law should provide that a secured creditor that proposes to accept an encumbered asset in total or partial satisfaction of the secured obligation must send the proposal, specifying the amount owed as of the date the proposal is sent and the amount of the obligation that is proposed to be satisfied by accepting the encumbered asset to:

(a) The grantor, the debtor and any other person that owes payment of the secured obligation (e.g. a guarantor);

(b) Any person with rights in the encumbered asset that, more than [...] days prior to the sending of the proposal by the secured creditor to the grantor, has notified in writing the secured creditor of those rights; and

(c) Any other secured creditor that, more than [...] days before the proposal is sent to the grantor, has registered a notice of a security right in the encumbered asset in the name of the grantor or that was in possession of the encumbered asset at the time it was seized by the secured creditor.

115. The law should provide that, if a person to which a proposal to accept an encumbered asset in total or partial satisfaction of the secured obligation must be sent under recommendation 114 objects in writing to such a proposal within [a short time, such as 20 days] after the proposal is sent, the secured creditor may not proceed with the proposal.

Distribution of proceeds of enforcement

116. The law should provide that, in the case of extrajudicial enforcement, the enforcing secured creditor must apply the net proceeds of its enforcement (after deducting costs of enforcement) to the secured obligations. Except as provided in recommendation 117, the enforcing secured creditor must pay any surplus remaining after such application to subordinate competing claimants, that, prior to any distribution of the surplus, gave written notice of their claims to any surplus to the enforcing secured creditor. Any balance remaining must be remitted to the grantor.

117. The law should also provide that, in the case of extrajudicial enforcement, whether or not there is any dispute as to the entitlement of any competing claimant or as to the priority of payment, the enforcing secured creditor may, in accordance with generally

applicable procedural rules, pay the surplus to a competent judicial or other authority or to a public deposit fund for distribution. In the case of such payment, the surplus should be applied in accordance with the priority rules of this law.

118. The law should provide that distribution of the proceeds realized by a judicial disposition or other officially administered process is to be made in accordance with general rules of the State governing execution proceedings, but in accordance with the priority rules of this law.

119. The law should provide that the debtor and any other person that owes payment of the secured obligation are liable for any shortfall still owing after application of the net proceeds of enforcement to the secured obligation.

Right of prior-ranking secured creditor to take over enforcement

120. The law should provide that, at any time before final disposition, acceptance or collection of an encumbered asset, a secured creditor whose security right has priority over that of the enforcing secured creditor or judgement creditor is entitled to take control of the enforcement process. The right to take control includes the right to continue enforcement, enforce by a different method provided in the recommendations of this chapter, and choose whether or not any remedy under the recommendations of this chapter will be administered by a court or other authority.

[Note to the Commission: The Commission may wish to note that the commentary will explain that the secured creditor with priority has the right to substitute its own enforcement process under this law for judgement enforcement proceedings initiated by a subordinate judgement creditor under other law but does not have the right to continue the enforcement process initiated by the judgement creditor under that other law.]

Title or other right acquired through non-judicial disposition

121. The law should provide that, if a secured creditor disposes of an encumbered asset without applying to a court or other authority, the person that acquires the asset in good faith pursuant to the disposition (i) acquires the grantor's right in the asset subject to rights that had priority over the security right of the enforcing secured creditor and (ii) takes free of the rights of, the enforcing secured creditor and any competing claimant whose right has a lower priority than that of the enforcing secured creditor. The same rule applies to an encumbered asset acquired by a secured creditor that has accepted the encumbered asset in total or partial satisfaction of the secured obligation.

122. The law should provide that, if a secured creditor disposes of a partial right in an encumbered asset or leases or licenses an encumbered asset without applying to a court or other authority, the person that acquires the partial right, lease or licence in good faith pursuant to the disposition, lease or licence (i) acquires the grantor's right in the asset to the extent of the disposition, lease or licence subject to rights that had priority over the security right of the enforcing secured creditor and (ii) takes free of the rights of the enforcing secured creditor and any competing claimant whose right has a lower priority than that of the enforcing secured creditor.

Title or other right acquired through judicial disposition

123. The law should provide that, if a secured creditor disposes of an encumbered asset through a judicial or other officially administered process, the title or other right acquired by the transferee is determined by the general rules of the State governing execution proceedings.

Intersection of movable and immovable property enforcement regimes

124. The law should provide that:

(a) A security right in attachments to immovable property may be enforced in accordance with either this law or the law governing enforcement of encumbrances on immovable property; and

(b) If an obligation to a secured creditor is secured by both a security right in an encumbered asset of the grantor and by an encumbrance on an immovable property of the grantor, the secured creditor may enforce: (i) both the security right and the encumbrance under the law governing enforcement of encumbrances on immovable property or (ii) the security right under this law and the encumbrance under the law governing enforcement of encumbrances on immovable property.

[Note to the Commission: The Commission may wish to note that the law should be coordinated with general civil procedure law to provide a right for secured creditors to intervene in court proceedings initiated by other creditors of the grantor so as to protect security rights and to ensure the same priority status of security rights as under the law.]

A/CN.9/611/Add.3**Draft Legislative Guide on Secured Transactions****ADDENDUM**

1. At its current session, the Commission is expected to consider and approve in principle the substance (i.e. the policy rather than the formulation) of the recommendations of the draft UNCITRAL Legislative Guide on Secured Transactions (“the draft Guide”).
2. The recommendations and the commentaries thereto are contained in various documents. In order to assist the Commission in identifying the document in which each chapter is contained, the Secretariat has included in an annex to this note a list of the chapters of the draft Guide indicating in which document the recommendations and the commentary relating to each chapter may be found.

ANNEX

I. Recommendations**

Chapter I. Key objectives	A/CN.9/WG.VI/WP.26/Add.7
Chapter II. Scope of application	A/CN.9/WG.VI/WP.26/Add.7
Chapter III. Basic approaches to security	A/CN.9/WG.VI/WP.26/Add.7
Chapter IV. Creation of the security right (effectiveness as between the parties)	A/CN.9/WG.VI/WP.26/Add.7
Chapter V. Effectiveness of the security right against third parties and registration	A/CN.9/WG.VI/WP.26/Add.5
Chapter VI. Priority of the security right over the rights of competing claimants	A/CN.9/WG.VI/WP.26/Add.6
Chapter VII. Pre-default rights and obligations of the parties	A/CN.9/611/Add.2
Chapter VIII. Default and enforcement	A/CN.9/611/Add.2
Chapter IX. Insolvency	A/CN.9/WG.VI/WP.21/Add.3
Chapter X. Acquisition financing devices	A/CN.9/WG.VI/WP.24/Add.5
Chapter XI. Conflict of laws	A/CN.9/WG.VI/WP.24
Chapter XII. Transition	A/CN.9/WG.VI/WP.26/Add.8
Security rights in proceeds, attachments, masses of goods and products	A/CN.9/WG.VI/WP.26/Add.4
Security rights in receivables	A/CN.9/611
Security rights in rights to payment of funds credited to a bank account	A/CN.9/611/Add.1
Security rights in proceeds under an independent undertaking	A/CN.9/611/Add.1
Security rights in negotiable instruments	A/CN.9/611/Add.1
Security rights in negotiable documents	A/CN.9/611/Add.1

II. Commentaries***

Background remarks	A/CN.9/WG.VI/WP.27
Chapter I. Introduction	A/CN.9/WG.VI/WP.27/Add.1
Chapter II. Key objectives	A/CN.9/WG.VI/WP.27/Add.1

** The numbering of the chapters may not correspond to the numbering on the documents above, as chapters were merged or moved at different points of time. The titles, however, of the chapters remain essentially the same.

*** With the exception of A/CN.9/WG.VI/WP.27 and Addenda 1 and 2, which have already been updated, the commentaries need to be updated.

Chapter III. Basic approaches to security	A/CN.9/WG.VI/WP.9/Add.1
Chapter IV. Creation	A/CN.9/WG.VI/WP.11/Add.2
Chapter V. Effectiveness against third parties	A/CN.9/WG.VI/WP.14
Chapter VI. Priority	A/CN.9/WG.VI/WP.14/Add.1
Chapter VII. Pre-default rights and obligations of the parties	A/CN.9/WG.VI/WP.9/Add.4
Chapter VIII. Default and enforcement	A/CN.9/WG.VI/WP.27/Add.2
Chapter IX. Insolvency	A/CN.9/WG.VI/WP.9/Add.6
Chapter X. Acquisition financing devices	A/CN.9/WG.VI/WP.17 and Add.1
Chapter XI. Conflict of laws	A/CN.9/WG.VI/WP.19
Chapter XII. Transition issues	A/CN.9/WG.VI/WP.26/Add.8
Security rights in proceeds, attachments, masses of goods and products	commentaries in the relevant chapters
Security rights in receivables	not issued yet
Security rights in rights to payment of funds credited to a bank account	A/CN.9/WG.VI/WP.18 and Add.1
Security rights in proceeds under an independent undertaking	not issued yet
Security rights in negotiable instruments	not issued yet
Security rights in negotiable documents	not issued yet

II. INTERNATIONAL COMMERCIAL ARBITRATION AND CONCILIATION

A. Report of the Working Group on Arbitration on the work of its forty-third session (Vienna, 3-7 October 2005)

Annex. Report of the drafting group	

I. Introduction

1. At its thirty-second session (Vienna, 17 May-4 June 1999), the Commission considered that the time had come to, *inter alia*, evaluate in the universal forum of the Commission the acceptability of ideas and proposals for the improvement of arbitration laws, rules and practices. The Commission entrusted the work to Working Group II (Arbitration and Conciliation) and decided that the priority items for the Working Group should include, among other matters, enforceability of interim measures of protection and the requirement that an arbitration agreement be in writing.
2. The most recent summary of the discussions of the Working Group on interim measures of protection and the written form requirement for the arbitration agreement is contained in document A/CN.9/WG.II/WP.135, paragraphs 5 to 24. The Secretariat was asked to prepare revised versions of draft article 17 of the UNCITRAL Model Law on International Commercial Arbitration (“the Arbitration Model Law”) relating to the power of an arbitral tribunal to order interim measures of protection, of a new article to the Arbitration Model Law relating to the recognition and enforcement of interim measures of protection (tentatively numbered article 17 bis), of a new article to the Arbitration Model Law relating to court-ordered interim measures (tentatively numbered article 17 ter), as well as of draft article 7 of the Arbitration Model Law relating to the definition and form of the arbitration agreement, for consideration by the Working Group at its forty-third session.
3. The Working Group, which was composed of all States members of the Commission, held its forty-third session in Vienna, from 3-7 October 2005. The session was attended by the following States members of the Working Group: Algeria, Argentina, Australia, Austria, Belarus, Belgium, Cameroon, Canada, China, Croatia, Czech Republic, France, Germany, Guatemala, Iran (Islamic Republic of), Italy, Japan, Lithuania, Mexico, Nigeria, Poland, Republic of Korea, Russian Federation, Singapore, Spain, Sweden, Switzerland, Thailand, Tunisia, Turkey, United Kingdom of Great Britain and Northern Ireland, United States of America and Venezuela (Bolivarian Republic of).
4. The session was attended by observers from the following States: Finland, Indonesia, Iraq, Ireland, Latvia, Malaysia, Netherlands, New Zealand, Philippines, Romania, Slovakia, United Arab Emirates and Viet Nam.
5. The session was also attended by observers from the following international intergovernmental organizations invited by the Commission: NAFTA Article 2022 Advisory Committee (NAFTA) and Permanent Court of Arbitration.
6. The session was also attended by observers from the following international non-governmental organizations invited by the Commission: American Arbitration Association (AAA), Asia Pacific Regional Arbitration Group (APRAG), Association Suisse de l'Arbitrage (ASA), Club of Arbitrators of the Milan Chamber of Arbitration, Council of Bars and Law Societies of Europe (CCBE), Forum for International Commercial Arbitration (FICA), International Chamber of Commerce (ICC), International Council for Commercial Arbitration (ICCA), Kuala Lumpur Regional Centre for Arbitration (KLRC), the Chartered Institute of Arbitrators, the European Law Students Association (ELSA), the London Court of International Arbitration (LCIA), Regional Centre for International Commercial Arbitration (Lagos) and Vienna International Arbitral Centre (VIAC).

7. The Working Group elected the following officers:

Chairman: Mr. José María ABASCAL ZAMORA (Mexico);

Rapporteur: Ms. Izabela WERESNIAK (Poland).

8. The Working Group had before it the following documents: (a) provisional agenda (A/CN.9/WG.II/WP.135); (b) a note by the Secretariat containing a newly revised draft of article 7, paragraph (2), of the Arbitration Model Law prepared by the Secretariat pursuant to the decisions made by the Working Group at its thirty-sixth session (A/CN.9/WG.II/WP.136); (c) a note by the Secretariat containing a proposal made by a delegation for a revision of article 7, paragraph (2) of the Arbitration Model Law (A/CN.9/WG.II/WP.137); (d) a note by the Secretariat containing newly revised draft provisions on interim measures of protection pursuant to the decisions made by the Working Group at its fortieth, forty-first and forty-third sessions (A/CN.9/WG.II/WP.138); and (e) the report of the Working Group on the work of its forty-second session (A/CN.9/573).

9. The Working Group adopted the following agenda:

1. Opening of the session;
2. Election of officers;
3. Adoption of the agenda;
4. Preparation of uniform provisions on interim measures of protection and on the requirement that an arbitration agreement be in writing;
5. Other business;
6. Adoption of the report.

II. Deliberations and decisions

10. The Working Group discussed agenda item 4 on the basis of the text contained in the notes prepared by the Secretariat (A/CN.9/WG.II/WP.136, A/CN.9/WG.II/WP.137 and A/CN.9/WG.II/WP.138). The deliberations and conclusions of the Working Group with respect to those items are reflected in chapters III to VIII. The Secretariat was requested to prepare revised draft provisions on interim measures of protection and the written form requirement for arbitration agreements, based on the deliberations and conclusions of the Working Group.

III. Draft article 17 of the UNCITRAL Model Law on International Commercial Arbitration regarding the power of an arbitral tribunal to grant interim measures of protection

General remarks

11. The Working Group noted that the Commission, at its thirty-eighth session (Vienna, 4-15 July 2005), had expressed its expectation that the Working Group would be able to present its proposals for the revision of both articles 7 and 17 of the Arbitration Model Law for final review and adoption to the Commission at its thirty-ninth session in 2006 (A/60/17, paras. 175-177).

12. The Working Group recalled that, at its fortieth session (New York, 23-27 February 2004), it had undertaken a detailed review of the text of the revised version of article 17 (“draft article 17”) regarding the power of an arbitral tribunal to grant interim measures of protection. The Working Group resumed discussions on draft article 17, on the basis of the text prepared by the Secretariat to reflect the discussions of the Working Group as set out in A/CN.9/WG.II/WP.138.

Paragraph (1)

13. A proposal was made to add the words “or modify them” at the end of paragraph (1) and to delete paragraph (6). In support of the proposal, it was suggested that these additional words were intended to extend the scope of paragraph (1) to encompass the situation provided for in paragraph (6) where a party requested an arbitral tribunal to modify, suspend or terminate an interim measure. The other situation covered by paragraph (6) namely, the power of an arbitral tribunal to modify, suspend or terminate an interim measure upon its own initiative was said to be inherent to the arbitral process and therefore that part of paragraph (6) was said to be unnecessary.

14. While some support was expressed for that proposal, it was said that paragraphs (1) and (6) dealt with the power of an arbitral tribunal to grant interim measures at the request of the parties at different stages of the arbitral process and therefore both paragraphs should be retained.

15. It was pointed out that the reference to modification, suspension or termination of an interim measure by an arbitral tribunal on its own initiative, as provided for under paragraph (6), was necessary to address the situation of non-participating respondents.

16. In the context of that discussion, it was also stated that the terms “suspend” or “terminate” would not necessarily be encompassed within the term “modify”.

17. After discussion, the Working Group agreed to adopt paragraph (1) without modification. It was agreed that the questions raised in relation to paragraph (6) might need to be further discussed (see below, paras. 45 and 46).

Paragraph (2)

Chapeau

18. The Working Group adopted the substance of the chapeau of paragraph (2) without modification.

Subparagraph (a)

19. The Working Group adopted the substance of subparagraph (a) without modification.

Subparagraph (b)

“[, or to prejudice the arbitral process itself]”

20. The Working Group considered whether the bracketed words “or to prejudice the arbitral process itself”, at the end of subparagraph (b), should be retained in order to clarify that an arbitral tribunal has the power to prevent obstruction or delay of the arbitral process, including by issuing anti-suit injunctions.

21. The Working Group recalled its earlier discussions on the question whether paragraph (2) of draft article 17 should be interpreted as encompassing a power of an

arbitral tribunal to order an anti-suit injunction (i.e., an interim measure by which an arbitral tribunal would order a party not to pursue court proceedings or separate arbitral proceedings) (A/CN.9/547, paras. 84-92). It was suggested, however, that the bracketed text should not be understood as merely covering injunctions against suits but rather as more broadly covering injunctions against the large variety of actions that existed and were used in practice to obstruct the arbitral process.

22. Reservations were expressed against draft article 17 directly or indirectly allowing the use of anti-suit injunctions given that these types of injunctions were unknown or unfamiliar in many legal systems and that there was no uniformity in practice relating thereto. As well it was said that such anti-suit injunctions did not always have the provisional nature of interim measures and related to the question of the competence of the arbitral tribunal, which was a matter not to be confused with the granting of an interim measure.

23. However, in favour of dealing with anti-suit injunctions under draft article 17, it was stated that these injunctions were becoming more common and served an important purpose in international trade. It was stated that, notwithstanding the fact that, in a number of countries, the law did not recognize these injunctions, there was evidence that arbitral tribunals sitting in such countries were increasingly faced with tactics aimed at obstructing or undermining the arbitral process. It was also stated that it was legitimate for arbitral tribunals to seek to protect their own process.

24. It was stated that, at previous sessions, the Working Group had expressed preference for inclusion of anti-suit injunctions in draft article 17. It was suggested that, even if no express words were included in paragraph (2) (b) regarding the power to issue anti-suit injunctions, there would nevertheless be implicit support for the existence of such a power. In that respect, it was noted that some State courts had identified the power to order anti-suit injunctions and to prevent other obstructions of the arbitral process as an inherent power of the arbitral tribunal. It was said that paragraph (2) (a) of draft article 17 was flexible, open-ended and probably broad enough to encompass anti-suit injunctions but for the sake of clarity, it would be preferable to include the proposed words.

25. It was said that that interpretation had been strengthened by the fact that the requirement that the interim measure be connected to the subject matter of the dispute (as contained in the original version of article 17 of the Arbitration Model Law) had been deleted from draft article 17 at a previous session. It was noted that the requirement that interim measures should be linked to the subject matter of the dispute also appeared in article 26 of the UNCITRAL Arbitration Rules and had been understood in some jurisdictions as limiting the availability of anti-suit injunctions.

26. After discussion, the Working Group agreed to retain the bracketed words at the end of paragraph (2) (b) and to delete the brackets, so that paragraph (2) (b) would, in substance, read: "Take action that would prevent, or refrain from taking action that is likely to cause, current or imminent harm, or to prejudice the arbitral process itself".

Subparagraph (c)

27. The Working Group adopted the substance of subparagraph (c) without modification.

Subparagraph (d)

28. It was proposed that subparagraph (d) be deleted. It was said that the reference to evidence that "may be relevant and material" was too broadly cast and could open the

floodgates of legal arguments relating to whether a matter was relevant but not material or material but not relevant. As well, it was suggested that the question of evidence was already covered by article 19 (2) of the Arbitration Model Law, which provided that the power conferred upon the arbitral tribunal included a power to determine the admissibility, relevance, materiality and weight of any evidence. It was said that the arbitral tribunal should not be requested to prejudge the relevance and materiality of evidence at the stage of a granting of an interim measure.

29. However, the Working Group observed that the phrase “relevant and material” was already included in the IBA Rules on the Taking of Evidence in International Commercial Arbitration (adopted by resolution of the IBA Council, June 1999), which had been the product of much debate. It was noted that the phrase had taken on a meaning such that the term “relevant” required that the evidence be connected to the dispute and the term “material” referred to the significance of the evidence. In support of its retention, it was said that the phrase was commonly used and understood in international arbitration.

30. It was said that subparagraph (d) did not in any way diminish the power contained in article 19 (2) in the Arbitration Model Law but rather dealt with different issues. While article 19 (2) dealt with the power of an arbitral tribunal to assess the admissibility and value of evidence, subparagraph (d) dealt with the right of an arbitral tribunal at an earlier stage to grant an order to preserve evidence.

31. After discussion, the Working Group agreed to retain the text of subparagraph (d) unchanged.

Paragraph (3)

Chapeau—interplay with paragraph (2) (d)

32. A proposal was made that the general requirements contained in paragraph (3) should not apply to all types of interim measures described in paragraph (2). For example, it was said that it would not be appropriate in all circumstances that a party applying for an interim measure to preserve evidence under subparagraph (d) necessarily demonstrate that exceptional harm would be caused if the interim measure was not ordered or to require the requesting party to otherwise meet the very high threshold established in paragraph (3) (A/CN.9/547, para. 91). For that reason, a proposal was made to add, as opening words to paragraph (3), the words: “Except with respect to the measure referred to in subparagraph (d) of paragraph (2),”. Support was expressed for that proposal for the reason that the preservation of evidence should not be subject to the tests contained in paragraph (3). An alternative proposal was to phrase the chapeau of paragraph (3) in an affirmative form, so that it would read as follows: “The party requesting the interim measure of protection under subparagraphs (2) (a), (b) and (c) shall satisfy the arbitral tribunal that:”. That proposal was agreed to in substance by the Working Group.

33. It was suggested that explanatory material accompanying article 17 could indicate that the fact that the type of measure contained in subparagraph (d) was not subject to paragraph (3) did not mean that an arbitral tribunal would not examine and weigh the circumstances in determining the appropriateness of ordering the measure.

34. An arbitral tribunal having to decide on the granting of an interim measure to preserve evidence would likely engage in balancing the degree of harm suffered by the applicant if the interim measure was not granted with the degree of harm suffered by the party opposing the measure if that measure was granted. It was generally felt by the Working Group that that matter should be dealt with in article 17, instead of being left to explanatory material accompanying article 17. Therefore, it was proposed to add a new

paragraph, after paragraph (3) providing as follows: “With regard to requests for interim measures of protection under paragraph (2) (d), the requirements in paragraphs (3) (a) and (3) (b) shall apply only to the extent the arbitral tribunal considers appropriate.” That proposal was agreed to, in substance, by the Working Group.

35. It was pointed out that the granting of interim measures to preserve evidence might have a negative effect, and the conditions defined under paragraph (3) (b) should nevertheless apply in relation to the granting of an interim measure of protection on the preservation of evidence. An alternative proposal was to add the proposed opening words “Except with respect to the measure referred to in subparagraph (d) of paragraph (2),” in paragraph (3) (a) instead of adding these words in the chapeau. That proposal did not receive support.

Subparagraph (a)

36. The Working Group recalled that, at its fortieth session, concern had been expressed that subparagraph (a) could be narrowly interpreted as excluding from the field of interim measures any loss that might be cured by an award of damages.

37. The Working Group agreed to retain the word “adequately” and to clarify, in any explanatory material accompanying paragraph (3), that the paragraph should be interpreted in a flexible manner requiring a balancing of the degree of harm suffered by the applicant if the interim measure was not granted against the degree of harm suffered by the party opposing the measure if that measure was granted.

38. Taking account of these views, the Working Group agreed to retain the substance of subparagraph (a) without modification.

Subparagraph (b)

39. Concern was expressed that subparagraph (b) did not sufficiently guard against the danger or the perception that an arbitral tribunal might prejudge the merits of the dispute at the stage of granting an interim measure. In order to address that concern, various proposals were made.

40. A proposal was made to delete the words “provided that” and express the two limbs as two separate sentences. An alternative proposal was to replace the words “provided that” with the word “but” in order to clarify that a determination as to the possible success on the merits of the requesting party should not be considered as a condition for the granting of an interim measure but rather as a conclusion in respect thereof. Those proposals were not widely supported.

41. Yet another proposal was to clarify that the words “any subsequent determination” related to a determination on the merits and therefore to replace the words “any subsequent determination” by words along the following lines: “determination as to the merits”.

42. However, it was pointed out that the words “any subsequent determination” did not only refer to an award as to the merits but also a procedural order. After discussion, it was agreed to retain subparagraph (b) as drafted.

Paragraph (4)

43. The substance of paragraph (4) was adopted without modification.

Paragraph (5)

44. A proposal was made to add as opening words to paragraph (5): “If so ordered by the arbitral tribunal” for the reason that, given the divergent rules in civil and common law systems with respect to the duty of disclosure, it would be unwise to provide for a general rule on that question. That proposal was not supported and the Working Group adopted the substance of paragraph (5) without modification.

Paragraph (6)

45. Taking account of its earlier related discussions under paragraph (1) (see above, paras. 13 to 17), the Working Group agreed that “suspension” or “termination” while possibly encompassed by the term “modification” were special types of modification and thus should be expressly mentioned.

46. In the interests of clarity, it was proposed that paragraph (6) be restructured as follows: “The arbitral tribunal may modify, suspend or terminate an interim measure of protection it has granted, at any time: (a) upon application of any party; or (b) in exceptional circumstances, on the arbitral tribunal’s own initiative, upon prior notice to the parties.” That proposal was adopted by the Working Group.

Paragraph (6 bis)

47. It was pointed out that, as drafted, the text did not appear to envisage liability in the situation where the requirements for the granting of the interim measure had been met but the measure was ultimately found to be unjustified. It was proposed that the words “the interim measure should not have been granted” be replaced by the words “the interim measure was unjustified”. That proposal was objected to on the ground that it might be seen as inviting discussion about whether or not the arbitral tribunal had been justified in granting the interim measure and potentially creating liability for the arbitral tribunal itself. After discussion, the proposal was not adopted.

48. Another proposal was made to replace the words “order an award of” in the second sentence of paragraph (6 bis) with the words “award” so that it would be clear that the action was an award not an order. The sentence would read: “The arbitral tribunal may award costs and damages at any point during the proceedings”. It was said that, in order to permit a challenge of a decision of an arbitral tribunal regarding costs and damages it should be made clear that such a decision should be rendered in the form of an award. That proposal was adopted.

Paragraph (7)**General discussion**

49. The Working Group recalled that, at its forty-first (Vienna, 13-17 September 2004), and forty-second (New York, 10-14 January 2005) sessions, it undertook a detailed review of the text of paragraph (7) of draft article 17 regarding the power of an arbitral tribunal to grant protective measures on an ex parte basis. The Working Group also recalled that, notwithstanding a wide divergence of views, it had reached agreement upon a compromise text of paragraph (7) (referred to as “the compromise”) on the basis of the principles that, that paragraph would apply unless otherwise agreed by the parties, that it should be made clear that preliminary orders had the nature of procedural orders and not of awards, that no enforcement procedure would be provided for preliminary orders in article 17 bis, and that no footnote would be added (A/CN.9/573, para. 27). That compromise was reflected in the

note by the Secretariat (A/CN.9/WG.II/WP.138, para. 5) (referred to as “the compromise text”).

50. The Working Group observed that, at its thirty-eighth session, the Commission had noted that the issue of *ex parte* interim measures remained contentious. While some delegations had expressed the hope that the compromise text reached was the final one, other delegations had expressed doubts as to the value of that compromise, in particular in view of the fact that it did not provide for enforcement of preliminary orders (A/60/17, para. 175).

51. Repeating a proposal that had been made at that session, it was suggested that paragraph (7) be redrafted in the form of an opt-in provision, applying only where the parties had expressly agreed to its application (A/60/17, para. 175). Another proposal was to place the provision on preliminary orders, including any aspect of an enforcement regime applicable to those measures, in a separate article to draft article 17. It was said that that proposal would also facilitate the adoption of draft article 17 by States that did not wish to adopt provisions relating to preliminary orders (A/60/17, para. 176). In addition to the proposals made at the Commission, it was suggested that paragraph (7) be optional for States, for example, providing for an opt-in mechanism modelled on article X as appended to article 4 of the UNCITRAL Model Law on Conciliation (A/CN.9/WG.II/WP.138, para. 68).

52. Some delegations urged the Working Group to reconsider whether it was still appropriate to retain the compromise text. It was said that there remained strong and enduring opposing views on the notion of interim measures being granted on an *ex parte* basis and that the Working Group should be careful not to create a controversy in the Commission on that matter, which might be harmful to the reputation of the Arbitration Model Law and that of UNCITRAL. It was also felt that the compromise text might create potential disharmony or confusion for countries having adopted or wishing to adopt the Arbitration Model Law. It was also stated that key bodies, active in the field of arbitration, had voiced concerns on the compromise text.

53. The largest number of delegations who spoke expressed strong opposition to any proposal which sought to revisit and reopen discussion on the compromise text. It was recalled that the compromise text was the result of lengthy discussions, and of significant efforts from both those opposing and those supporting *ex parte* measures. It was observed that the compromise text represented an innovative approach and provided carefully drafted safeguards, including limiting the availability and duration of measures granted under paragraph (7) which were characterized as preliminary orders rather than as interim measures granted on an *ex parte* basis. It was said that the doubts and concerns expressed at the Commission, as well as the proposals made at that session reflected debate that had already taken place in the Working Group, but did not raise any new developments or compelling reasons to revisit the compromise.

54. In response to the suggestion that that provision be presented as an “opt-in” provision for States, it was said that it would be unnecessary given that the very nature of a model law provided States with the freedom to adopt certain provisions or not and that such an opt-in format had been discussed and rejected in reaching the compromise.

55. Following a lengthy discussion, the Working Group agreed that the compromise should be retained without modification. The Working Group also agreed that questions relating to the placement of paragraph (7) and the overall structure of draft article 17 would be further considered in the context of the discussion regarding the form in which the revised provisions (comprising draft articles 17, 17 bis and 17 ter) could be presented in the Arbitration Model Law. In determining the final structure of draft article 17 and the

placement of paragraph (7), it was suggested that the Working Group keep in mind that the terms “interim measures” and “preliminary orders” represented different legal concepts, and, therefore, it would be advisable to place the provisions dealing with those concepts in separate articles. On the other hand, it was said by some delegations that the provisions regarding preliminary orders should not be separated from the rest of draft article 17 in a way that made them a target for deletion.

Subparagraph (a)

56. To reflect the principle contained in the compromise text that a preliminary order could only be issued as a procedural order and not as an award, a proposal was made that subparagraph (a) should expressly clarify that a preliminary order could only be issued in the form of a procedural order. It was suggested that wording along the lines of “in the form of a procedural order” should be inserted in subparagraph (a). It was said that that clarification would distinguish preliminary orders from interim measures, which, according to draft article 17 (2), could be issued in the form of an award or in another form (eventually inserted in subparagraph (c) by the drafting group: see Annex).

57. It was recalled that the Working Group, at its thirty-second session, already pointed out that the distinction between a procedural order and an interim measure was not only a matter of form but also a matter of substance, since it was said by some that procedural decisions were not enforceable under the 1958 New York Convention on the Recognition and Enforcement of Foreign Arbitral Awards (“the New York Convention”) or article 36 of the Arbitration Model Law, and that it was difficult to rule on procedural matters (A/CN.9/573, para. 36). Also, it was pointed out that the meaning of “procedural” was often disputed and therefore the use of that term should be avoided. After discussion, the Working Group agreed that, to avoid any uncertainty regarding the scope and nature of procedural orders, subparagraph (a) should indicate that a preliminary order should not be issued in the form of an award.

Subparagraph (b)

58. The Working Group adopted the substance of subparagraph (b) without modification.

Subparagraph (c)

59. The Working Group noted that, as presently drafted, subparagraph (c) appeared to duplicate the test that the interim measure would be frustrated. To address that concern, a proposal was made to amend subparagraph (c) along the following lines: “The arbitral tribunal may grant a preliminary order provided it considers that there is a reasonable concern that the purpose of the requested interim measure will be frustrated by prior disclosure of the interim measure to the party against whom it is directed.” That proposal did not receive support. Another proposal was made to redraft subparagraph (c) to remove the words: “that there is a reasonable concern that the purpose of the requested interim measure will be frustrated where” such that subparagraph (c) would then read: “The arbitral tribunal may grant a preliminary order provided it considers that prior disclosure of the request for the interim measure to the party against whom it is directed risks frustrating the purpose of the measure.” After discussion, that proposal was adopted by the Working Group.

Subparagraph (d)

60. The Working Group adopted the substance of subparagraph (d) without modification.

Subparagraph (e)

“at the same time”

61. A proposal was made to delete the words “at the same time” for the reason that the formulation appeared to be redundant in light of the words “at the earliest practicable time,” at the end of the first sentence in subparagraph (e). In response, the Working Group was reminded that, when this provision had been discussed at its forty-second session, a distinction had been made between the obligation of the arbitral tribunal to decide on the preliminary order as promptly as required under the circumstances and the obligation of the party against whom the preliminary order was directed to present its case at the earliest practicable time (A/CN.9/573, para. 48). After discussion, the Working Group agreed to retain the words “at the same time”.

“any party”—“a preliminary order”

62. For the sake of consistency with subparagraph (d), which referred to “any party”, it was proposed that the reference in the first sentence to “the party” should be changed to “any party”. Also, given that subparagraph (d) envisaged that an arbitral tribunal might not have granted the preliminary order, it was proposed that the reference to “the preliminary order” be changed to refer to “a preliminary order”. Both proposals were agreed to by the Working Group.

“The arbitral tribunal shall decide as promptly as required under the circumstances”

63. It was noted that, as drafted, subparagraph (e) was ambiguous in that it was not clear, in the second sentence, to what decision the words “the arbitral tribunal shall decide as promptly as required under the circumstances” referred. It was widely felt that that matter ought to be clarified. The view was expressed that that sentence was intended to refer to the decision of the arbitral tribunal to adopt or modify the preliminary order after the party against whom it is directed had been given notice and an opportunity to be heard, as provided for under subparagraph (f). Consistent with that view, it was proposed to either include in the second sentence of subparagraph (e) a reference to subparagraph (f) or to merge the second sentence of subparagraph (e) with the second sentence of subparagraph (f). Those proposals did not receive support.

64. The prevailing view was that the words “the arbitral tribunal shall decide as promptly as required under the circumstances” was intended to refer to the decision to be made by the arbitral tribunal in response to any objection that might be raised by the party affected by the preliminary order. In accordance with that view, it was suggested that the second sentence of subparagraph (e) should be expanded in a separate subparagraph and reworded as follows: “The arbitral tribunal shall decide on any objection to the preliminary order as promptly as required under the circumstances.”

65. It was pointed out that the drafting of that proposed new subparagraph could be simplified by removing the words “as promptly as required under the circumstances” as, in any case, a decision on a preliminary order ought to be prompt, as shown by the time limit of twenty days for the validity of a preliminary order provided under the existing subparagraph (f). The Working Group adopted the following text as a new subparagraph: “The arbitral tribunal shall decide promptly on any objection to the preliminary order.”

Multi-party arbitration

66. It was suggested that paragraph (7) appeared to contemplate only situations where there were two parties to the arbitration proceedings and thus did not accommodate multi-party arbitrations. For that reason, it was proposed that, for example, in subparagraph (a), the reference to “the other party” could be changed to “any other party”. As well, it was pointed out that the communication of information as contemplated under subparagraph (d) only referred to the party against whom the preliminary order was requested. It was pointed out that, in the case of multi-party arbitrations, all parties might have an interest in receiving such information. Similarly, it was said that subparagraph (e) only provided the party against whom the measure was requested the opportunity to be heard and thus did not accommodate multi-party situations. It was suggested that the drafting pattern followed by the text of the Arbitration Model Law, as adopted in 1985, appeared to refer to two-party arbitrations, leaving the question of multi-party arbitrations to the enacting jurisdictions to decide upon. It was suggested that the issues raised by multi-party arbitrations might need to be resolved uniformly in the text of the Arbitration Model Law as a whole and not just in provisions relating to interim measures.

67. While the Working Group agreed that an arbitral tribunal had no jurisdiction to bind parties that were not party to the arbitration agreement, it noted that that matter was of particular importance in the context of granting of preliminary orders. It was highlighted that there had been developments, for example, in a case involving investment arbitration where standing had been given to third parties that might be affected by a decision of the arbitral tribunal. The Working Group agreed that these matters could be considered as items for future work of the Working Group.

Subparagraph (f)

68. The Working Group adopted the substance of subparagraph (f) without modification.

Subparagraph (g)

“shall”—“may”

69. In response to a question as to whether the rules contained in paragraph (4) and subparagraph (g) led to different results in practice, it was explained that there was a difference of emphasis between paragraph (4) and subparagraph (g). Whereas subparagraph (g) provided that the arbitral tribunal “shall” require the provision of security, paragraph (4) provided that the arbitral tribunal “may” require the provision of security. To explain that difference, it was recalled that the Working Group had, in earlier discussions, concluded that the provision of security should be a mandatory requirement, and was an important safeguard, to the granting of a preliminary order (A/CN.9/569, para. 35). It was recalled as well that the Working Group agreed to add discretionary language to subparagraph (g), namely “unless the arbitral tribunal considers it inappropriate to do so” in order to address the concern that, in some circumstances, requiring security in connection with the granting of a preliminary order would not be feasible (A/CN.9/569, paras. 36 and 37). While it was widely recognized that in practice the two rules might produce largely similar results, it was agreed that the two provisions should be maintained.

“any other party”

70. It was noted that, whereas paragraph (4) of draft article 17 referred to the arbitral tribunal requiring the requesting party “or any other party” to provide appropriate security, subparagraph (g) merely referred to “the requesting party”. It was suggested that the words “or any other party” be included following the words “requesting party” in subparagraph (g) to cover situations where it would be appropriate to seek security from a party other than the requesting party, for example, where the requesting party had no funds, was a shell company or was insured. After discussion, that proposal was withdrawn as it was agreed that a decision of the arbitral tribunal could only bind the requesting party regardless of whether a third party, such as a bank or an insurance company, provided that security on behalf of the requesting party.

Subparagraph (h)

Interplay between paragraph (5) and subparagraph (h)

71. The view was expressed that paragraph (5) and subparagraph (h) contained overlapping obligations and that, therefore, subparagraph (h) might be redundant. In response, it was observed that subparagraph (h) established a broad obligation requiring disclosure of all circumstances that the arbitral tribunal was likely to find relevant to its determination, whether or not related to the application, whereas paragraph (5) only referred to any material change in the circumstances on the basis of which the request was made or the interim measure was granted. In addition, it was said that, while paragraph (5) as incorporated by paragraph (7) (b) addressed any material change in the circumstances after the interim measure had been granted, subparagraph (h) provided a broader duty of disclosure that applied from the time the preliminary order was sought until the responding party had presented its case. Given the different purpose and scope of these provisions, the Working Group agreed that subparagraph (h) should be retained to ensure that the requesting party was obliged to provide full disclosure until the other party had been heard (A/CN.9/569, para. 68).

72. It was observed that there appeared to be a lack of clarity concerning the obligation to disclose in that the obligation under subparagraph (h) was described as only applying until the party against whom the preliminary order had been requested had presented its case without stating when the obligation began. As well, it was said that subparagraph (h) did not contemplate the situation where the party against whom the preliminary order was requested was a non-participating party.

73. In order to address those concerns, a proposal was made to amend subparagraph (h) as follows: “Any party applying for a preliminary order shall disclose to the arbitral tribunal all circumstances that are likely to be relevant to the arbitral tribunal in reaching its determination whether to grant a preliminary order and such obligation shall continue until the party against whom the preliminary order has been requested has had an opportunity to present its case.” It was said that the proposal did not intend to effect any substantive change in the purpose and scope of subparagraph (h) and paragraph (5) but was intended merely to determine precisely the time when the disclosure obligation in relation to a preliminary order began and ended. As well, the proposal acknowledged the reality that, in certain circumstances, a party might choose not to present its case, and for that reason it would be more appropriate to refer to that party being given an opportunity to present its case. A further proposal was made to include the word “or maintain” after the word “grant”.

74. It was suggested that, to better address the uncertainties raised by the interaction between paragraph (5) and subparagraph (h), the following text could be added to the end

of the proposal: “Thereafter, the applying party shall have the same disclosure obligation with respect to the preliminary order that the requesting party has with respect to an interim measure under paragraph (5).” It was explained that the term “applying party” had been used in the proposal to be consistent with the fact that the draft provisions referred to an “application” for a preliminary order but referred to a “request” in relation to an interim measure. It was suggested that a consequential amendment flowing from that proposal would be the deletion of the reference to paragraph (5) in paragraph (7) (b).

75. Those proposals were accepted in substance. Subparagraph (h) would therefore read as follows: “Any party applying for a preliminary order shall disclose to the arbitral tribunal all circumstances that are likely to be relevant to the arbitral tribunal in reaching its determination whether to grant or maintain a preliminary order and such obligation shall continue until the party against whom the preliminary order has been requested has had an opportunity to present its case. Thereafter, the applying party shall have the same disclosure obligation with respect to the preliminary order that the requesting party has with respect to an interim measure under paragraph (5).”

IV. Draft provision on the recognition and enforcement of interim measures of protection (for insertion as a new article of the UNCITRAL Model Law on International Commercial Arbitration, tentatively numbered 17 bis)

Paragraph (1)

76. It was proposed that, having regard to the language used in article 36 (1)(a)(v) of the Arbitration Model Law, paragraph (1) should indicate that an interim measure granted by an arbitral tribunal was binding upon the parties only and the words “on the parties” should therefore be inserted after the term “binding”. However, it was pointed out that paragraph (1) of article 17 bis was drafted so as to be consistent with article 35 (1) of the Arbitration Model Law, which did not include any reference to the parties. For that reason, it was agreed that that proposal should not be adopted. The Working Group adopted the substance of paragraph (1) without modification.

Interplay between paragraph 1 and articles 35 and 36

77. A proposal was made to expressly clarify the relationship between the enforcement regime created by article 17 bis and that set out in articles 35 and 36 of the Arbitration Model Law. Diverging views were expressed on the question whether the regime of enforcement under chapter VIII of the Arbitration Model Law could still apply in the context of recognition and enforcement of an interim measure granted by an arbitral tribunal in the form of an award.

78. A view was that, despite the fact that article 17 bis was designed specifically as a regime for recognition and enforcement of interim measures, an award that included an interim measure could nevertheless be subject to enforcement subject to the grounds in articles 35 and 36. It was said that the question whether interim measures granted in the form of an award were included in the scope of the New York Convention had been the subject of diverging opinions in different jurisdictions. Another view was that the form in which an interim measure was issued did not affect its nature and irrespective as to the form, in the area of recognition and enforcement, it would still be considered to be an interim measure to which article 17 bis applied.

79. It was said that the recognition and enforcement regime of interim measures set out in article 17 bis was autonomous but that it might be necessary to expressly exclude the application of articles 35 and 36 to avoid confusion by users. To address that matter, a proposal was made to add, at the end of paragraph (1), the following words: “and excluding the application of articles 35 and 36”. It was said that, if that proposal were to be adopted, the provision contained under article 35 (2) should be expressly included under article 17 bis. Some support was expressed for that proposal on the basis that it clarified the understanding that article 17 bis applied to interim measures to the exclusion of chapter VIII. However, it was said that articles 35 and 36 dealt with recognition and enforcement of awards whereas article 17 bis dealt expressly with recognition and enforcement of interim measures and adding the proposed words might create further ambiguity. The Working Group agreed not to adopt that proposal but noted that the question it raised might need to be further considered at a later stage.

Paragraph (2)

Subparagraph (a)

Chapeau

80. For the sake of consistency with article 36 (1), a proposal was made to replace the chapeau of paragraph (2) by the following words: “Recognition and enforcement of an interim measure may be refused only:”. That proposal was adopted in substance.

Subparagraph (a)(i)

81. The Working Group adopted the substance of subparagraph (a)(i) without modification.

Subparagraph (a)(ii)

82. The Working Group adopted the substance of subparagraph (a)(ii) without modification.

Subparagraph (a)(iii)

83. It was proposed to delete the words “where so empowered” for the reason that it introduced an element that was self-evident and might give the impression that State courts were empowered to review an interim measure *de novo*. However, that proposal did not receive support as it was considered necessary to retain those words, which limited the possibility of intervention of State courts to situations where they were specifically empowered to revise an interim measure issued by the arbitral tribunal.

84. A proposal was made to delete the words “or where so empowered, by the court of the State in which the arbitration takes place or under the law of which that interim measure was granted”. In support of that proposal, it was said that, in the absence of a specific treaty between States, there might be no legal basis for a State court to refuse to recognize an interim measure of protection issued by an arbitral tribunal, which had been terminated or suspended, by the court of another State. That proposal did not receive support.

“modified, terminated or suspended”

85. A proposal was made to add the word “modified” after the word “suspended” for the sake of consistency with the language used under paragraph (4). That proposal did not

receive support for the reason that, once an arbitral tribunal had modified an interim measure, the original measure was terminated expressly or impliedly and could no longer be recognized and enforced. However, the Working Group agreed that any explanatory material accompanying article 17 bis should clarify that the enforcement regime set out in article 17 bis applied in respect of any interim measure, whether or not it was modified by the arbitral tribunal.

Subparagraph (b)

Subparagraph (b)(i)

86. The Working Group adopted the substance of subparagraph (b)(i) without modification.

Subparagraph (b)(ii)

87. The Working Group adopted the substance of subparagraph (b)(ii) without modification.

Paragraph (3)

88. A proposal was made to replace the phrase “in exercising that power” with words along the following lines: “in making its determination”, so as to be consistent with the language used earlier in that paragraph which referred to “any determination made by the court”. That proposal was adopted in substance.

Paragraph (4)

89. The Working Group adopted the substance of paragraph (4) without modification.

Paragraph (5)

90. It was proposed that the conditions to be satisfied in relation to a request for security set out in paragraph (5) be cumulative rather than alternative conditions by replacing “, or” when appearing after the word “security” by the word “and”. That proposal was not adopted and the Working Group recalled that it was intended that satisfaction of either of these conditions would permit a request for security.

91. For the sake of consistency with paragraph (4) of draft article 17, which provided that an arbitral tribunal might require not only the requesting party but also any other party to provide security, it was suggested that the words “or any other party” should be added after the words “requesting party” in paragraph (5). That proposal was withdrawn for the reasons set out above in paragraph 70.

Paragraph (6)

92. It was suggested that paragraph (6) could be shortened to reflect the principle, which it was recalled had been agreed as an integral part of the compromise text, that a preliminary order was not enforceable by a State court rather than referring to an interim measure that was issued under standards substantially equivalent to those set forth in paragraph (7). Alternatively, it was proposed that paragraph (6) should simply provide that article 17 bis only applied to interim measures made by an arbitral tribunal under paragraphs (1) to (6) of draft article 17. It was said that that approach respected the principle that preliminary orders would be binding as between the parties and also did not exclude the application of other enforcement regimes to preliminary orders. Yet another

approach suggested that inclusion of a statement that preliminary orders were not enforceable sat uncomfortably in article 17 bis, which dealt with recognition and enforcement of interim measures. For that reason it was suggested that that matter be addressed under a new subparagraph to be inserted in paragraph (7) of draft article 17. In addition, it was suggested that in order to deal with an interim measure issued on an ex parte basis which a party sought to enforce in a State that had enacted the Model Law as revised, a new paragraph could be added at the end of article 17 bis along the following lines: “interim measures issued on an ex parte basis will not be enforced”.

93. A proposal was made to delete paragraph (6) from article 17 bis and add a new paragraph following paragraph (7) of draft article 17 along the following lines: “a preliminary order made under article 17 (7) shall be binding on the parties but shall not be subject to enforcement by a court”. It was suggested that that formulation had the benefit of recognizing that a preliminary order would not be enforceable whether on the basis of the Arbitration Model Law or on any other grounds and avoided the use of the word “unenforceable”, which had a further connotation that might undermine the concept of “binding”.

94. Various comments of a drafting nature were made on that proposal. It was suggested that the reference to “a court” be changed to “any court” so as to encompass a preliminary order whether made by an arbitral tribunal in the jurisdiction of the court in which enforcement was sought or in any other jurisdiction. In response, it was said that such a provision could potentially give rise to complex private international law issues and might, in practice, have a very limited effect. Another comment was that the use of the phrase “shall not be subject to enforcement by a court” might have a different meaning from the use of the phrase “shall not be enforceable”, namely that that amendment could be interpreted as meaning that the parties had the obligation not to seek enforcement of the preliminary order, but that the preliminary order, of its nature, remained enforceable. It was pointed out that the non-enforceability of preliminary measures was a central feature of the compromise that should be maintained.

95. Concerns were raised that, as drafted, the provision exceeded the competence of the Arbitration Model Law, in that it sought to rule on procedural matters pertaining to State courts and it was said that it was unlikely that the jurisdiction of State courts could be impacted upon by paragraph (6). It was suggested that a better approach would be simply to omit paragraph (6) altogether, which would still have the effect that the preliminary order was not enforceable. A number of delegations stated that this was their preferred solution but that, in the interests of consensus and joint position of all members of the Working Group, they were prepared to accept wording in draft article 17 (7) or article 17 bis (6) by which enforcement of a preliminary order was expressly excluded. It was observed that there was evidence that parties to arbitration agreements were often reluctant to disobey orders of the arbitral tribunal and that there were a series of practical problems in drafting enforcement provisions for a preliminary order, which was expected, in practice, to have a very short lifespan that, in any event, could not exceed 20 days. An alternative proposal was made to include under article 17 bis a provision clarifying that “the provisions of this article are not applicable to preliminary orders issued in accordance with paragraph (7) of article 17”. It was said that inclusion of that express language under article 17 bis remained important for the sake of clarity. The Working Group took note of that suggestion.

96. After discussion, the Working Group agreed to delete paragraph (6) from article 17 bis and add a new paragraph following paragraph (7) of draft article 17 along the following lines: “a preliminary order made under article 17 (7) shall be binding on the parties but shall not be subject to enforcement by a court”.

Footnote to article 17 bis

97. The footnote was adopted, in substance, by the Working Group.

V. Draft provision on court-ordered interim measures in support of arbitration (for insertion as a new article of the UNCITRAL Model Law on International Commercial Arbitration, tentatively numbered 17 ter)

98. The Working Group recalled that there had been an exchange of views, at its forty-second session, on a possible draft provision expressing the power of State courts to order interim measures of protection in support of arbitration (tentatively numbered article 17 ter). The Working Group resumed discussions on draft article 17, on the basis of the text contained in A/CN.9/WG.II/WP.138.

99. A concern was expressed that the text, as drafted, only empowered a State court to issue an interim measure in support of arbitration if that State court was situated in the same jurisdiction as the place of arbitration. It was said that article 17 ter should be broadened to encompass the situation where a State court was asked to order an interim measure in respect of an arbitration that took place in another jurisdiction. It was stated that it was important from a practical point of view to broaden article 17 ter to clarify that an interim measure could be granted by a State court in a jurisdiction other than that of the place of the arbitration. It was noted that it was a feature of modern practice in international arbitration to seek to secure assets, follow a vessel, preserve evidence, or ask for actions to be taken in a different jurisdiction from that where the arbitration took place.

100. In order to address that concern, a proposal was made to amend article 17 ter by adding the words: “taking place in the country of the court or in another country” after the words “arbitration proceedings”. That proposal received support.

101. It was noted that article 1, paragraph (2), of the Arbitration Model Law provided that: “The provisions of this Law, except articles 8, 9, 35 and 36, apply only if the place of arbitration is in the territory of this State.” It was further noted that, given the intention that article 17 ter should apply to arbitrations occurring in a jurisdiction different to that of the State court, article 17 ter should be added to the list contained under article 1, paragraph (2). However, it was pointed out that article (1), paragraph (2), of the Arbitration Model Law defined the scope of the Arbitration Model Law and the Working Group had not been specifically requested by the Commission to work on revisions of that part of the Arbitration Model Law. It was suggested that consistency between article 17 ter and article 1, paragraph (2), of the Arbitration Model Law could still be achieved by adding to the opening words of article 17 ter the following words: “Notwithstanding article 1, paragraph (2)”. That proposal was supported.

102. After discussion, the Working Group agreed to adopt, in substance, the following revised version of article 17 ter: “The court shall have the same power of issuing interim measures of protection for the purposes of and in relation to arbitration proceedings taking place in the country of the court or in another country as it has for the purposes of and in relation to proceedings in the courts, and shall exercise that power in accordance with its own rules and procedures insofar as these are relevant to the specific features of an international arbitration. This article shall apply notwithstanding the provisions of article 1, paragraph (2).”

103. A view was expressed that article 17 bis might not fully address the potential problems which might arise with respect to the relationship between the power of State courts to issue interim measures and the power of arbitral tribunals to issue interim orders. It was said that it was unclear whether these powers were coextensive or the exercise of the State court power overrode the power of the arbitral tribunal. That uncertainty could allow parties to defeat the power of arbitral tribunals to issue interim measures by seeking such measures from the State courts. It was suggested that to better delineate the interaction of these powers, article 17 ter could provide that a State court could only act in circumstances where, and to the extent that, the arbitral tribunal did not have the power to so act or was unable to act effectively, for example, if an interim measure was needed to bind a third party or the arbitral tribunal was not yet constituted or the arbitral tribunal had only made a preliminary order. The principle upon which that proposal was based received some support but it was agreed that that proposal had far-reaching legal and practical implications and raised complex issues that the Working Group might wish to consider at a later stage.

VI. Possible options on the issue of the form in which the current and revised provisions could be presented in the UNCITRAL Model Law on International Commercial Arbitration

104. At its forty-second session, the Working Group requested the Secretariat to consider the issue of the form in which the current and the revised provisions on interim measures could be presented, with possible variants to be considered by the Working Group at a future session (A/CN.9/573, para. 99).

105. The Working Group agreed that the provisions of articles 17, 17 bis and 17 ter be placed in a new chapter, numbered chapter IV bis. Diverging views were expressed on whether the title of that new chapter should refer to “interim measures” only or include as well the words “preliminary orders”.

106. It was suggested that paragraph (7) of draft article 17 on preliminary orders be dealt with in a separate article. Another suggestion was that draft articles 17 and 17 bis should be restructured by grouping paragraphs relating to similar issues under separate articles. It was said that the advantage of that presentation would be that the drafting style of the Arbitration Model Law could thereby be preserved and it would allow for a more logical presentation of the provisions. Cautioning that restructuring of these provisions could prove to be a time-consuming exercise, the Working Group requested the Secretariat to prepare a revised draft of articles 17 and 17 bis taking account of these comments and agreed to consider that presentation at its next session.

VII. Report of the drafting group

107. The Working Group having completed its deliberations regarding draft articles 17, 17 bis and 17 ter, a drafting group was established by the Secretariat to implement decisions by the Working Group and ensured consistency between the various language versions of the text. The report of the drafting group, as adopted by the Working Group is annexed to this report.

VIII. Preparation of a model legislative provision on written form for the arbitration agreement

108. The Working Group recalled that it had considered, at its thirty-sixth session (New York, 4-8 March 2002), a draft model legislative provision revising article 7 of the Arbitration Model Law and had discussed a draft interpretative instrument regarding article II, paragraph (2), of the New York Convention. The Working Group agreed to resume discussions with respect to the preparation of that draft legislative provision and had before it a text prepared by the Secretariat on the basis of the discussions in the Working Group held at its thirty-sixth session (A/CN.9/508, paras. 18-39) (“the revised draft article 7”). The Working Group also considered a proposal by a delegation regarding that issue reproduced in A/CN.9/WG.II/WP.137, as modified by A/CN.9/WG.II/WP.137/Add.1 (“the proposed new text”).

109. The proposed new text suggested that the writing requirement for arbitration agreements be omitted from article 7 (2). It was said that, if the proposed new text were adopted, the question of the conclusion of the arbitration agreement and its content would be solely a matter of proof. It was suggested that the proposed new text established a more favourable regime for recognition and enforcement of arbitral awards than was provided for under the New York Convention. It was said that, therefore, by virtue of the “more favourable law provision” contained in article VII of the New York Convention, the Arbitration Model Law would apply instead of article II of the New York Convention. It was noted that, in several jurisdictions that had removed the written form requirement for arbitration agreements, oral arbitration agreements were rarely used and had not given rise to significant disputes as to their validity.

110. While the proposed new text was considered useful to highlight the problems raised by the written form requirements, it was said that removal of the form requirement and of every reference to “writing” could create uncertainty. It was said that the revised draft article 7 reflected the Working Group’s understanding of the minimum requirements that should apply in respect of the form of an arbitration agreement, whereas the proposed new text went much further including recognition of the validity of oral arbitration agreements.

111. It was suggested that promoting or recognizing oral agreements too broadly could lead to the generation of awards that would not be capable of being recognized and enforced under the New York Convention for the reason that the arbitration agreement in respect of which the award was made would not fulfil the written form required under article II (2) of that Convention. Another argument was that article VII of the New York Convention expressly referred to “arbitral awards” and, therefore, it was uncertain whether article VII would universally be interpreted as applying in respect of arbitration agreements. It was also suggested that retention of a very flexible type of form requirement mirrored similar provisions that existed in respect of litigation, for example, article 3 (c) of the Convention on Choice of Court Agreements (adopted 30 June 2005) which provided that “an exclusive choice of court agreement is required to be concluded or documented in writing or by any other means of communication which renders information accessible so as to be usable for subsequent reference”. As well, it was recalled that the Commission had recently agreed to include the New York Convention in a list of international instruments to which the Convention on the Use of Electronic Communications in International Contracting would apply.

112. Views were expressed that both the proposed new text and the revised draft article 7 provided useful options to address concerns relating to the writing requirement. It was suggested that both options might be presented to the Commission as alternative variants.

However, it was said that, since both alternatives had the same function to relax the form requirements, it might be possible to reconcile them. One way to achieve that purpose was to amend paragraph (2) of the revised draft by restricting the form requirement to the question of proof rather than validity. That proposal was to include text along the following lines: “The arbitration agreement may be evidenced in writing”. Another proposal was made to amend the revised draft article 7 so that it reflected the wording used in the Convention on Choice of Court Agreements as set out above.

ANNEX

Report of the drafting group

Chapter IV bis. Interim measures and preliminary orders

Draft article 17

(1) Unless otherwise agreed by the parties, the arbitral tribunal may, at the request of a party, grant interim measures.

(2) An interim measure is any temporary measure, whether in the form of an award or in another form, by which, at any time prior to the issuance of the award by which the dispute is finally decided, the arbitral tribunal orders a party to:

- (a) Maintain or restore the status quo pending determination of the dispute;
- (b) Take action that would prevent, or refrain from taking action that is likely to cause, current or imminent harm or prejudice to the arbitral process itself;
- (c) Provide a means of preserving assets out of which a subsequent award may be satisfied; or
- (d) Preserve evidence that may be relevant and material to the resolution of the dispute.

(3) The party requesting the interim measure under paragraphs (2) (a), (b) and (c) shall satisfy the arbitral tribunal that:

- (a) Harm not adequately reparable by an award of damages is likely to result if the measure is not ordered, and such harm substantially outweighs the harm that is likely to result to the party against whom the measure is directed if the measure is granted; and
- (b) There is a reasonable possibility that the requesting party will succeed on the merits, provided that any determination on this possibility shall not affect the discretion of the arbitral tribunal in making any subsequent determination.

(4) With regard to requests for interim measures under paragraph (2) (d), the requirements in paragraphs (3) (a) and (b) shall apply only to the extent the arbitral tribunal considers appropriate.

(5) The arbitral tribunal may require the requesting party to provide appropriate security in connection with such interim measure.

(6) The requesting party shall promptly disclose any material change in the circumstances on the basis of which the party made the request for, or the arbitral tribunal granted, the interim measure.

(7) The arbitral tribunal may modify, suspend or terminate an interim measure it has granted, upon application of any party or, in exceptional circumstances and upon prior notice to the parties, on the arbitral tribunals own initiative.

(8) The requesting party shall be liable for any costs and damages caused by the interim measure to the party against whom it is directed if the arbitral tribunal later determines that, in the circumstances, the interim measure should not have been granted. The arbitral tribunal may award such costs and damages at any point during the proceedings.

(9) (a) Unless otherwise agreed by the parties, a party may file, without notice to any other party, a request for an interim measure together with an application for a preliminary order directing a party not to frustrate the purpose of the interim measure requested;

(b) The provisions of paragraphs (3), (4), (7) and (8) of this article relating to interim measures also apply to any preliminary order that the arbitral tribunal may grant pursuant to this paragraph;

(c) The arbitral tribunal may grant a preliminary order provided it considers that prior disclosure of the request for the interim measure to the party against whom it is directed risks frustrating the purpose of the measure. Such preliminary order does not constitute an award;

(d) Immediately after the arbitral tribunal has made a determination in respect of an application for a preliminary order, the arbitral tribunal shall give notice to all parties of the request for the interim measure, the application for the preliminary order, the preliminary order, if any, and all other communications, including indicating the content of any oral communication, between any party and the arbitral tribunal in relation thereto;

(e) At the same time, the arbitral tribunal shall give an opportunity to any party against whom a preliminary order is directed to present its case at the earliest practicable time;

(f) The arbitral tribunal shall decide promptly on any objection to the preliminary order;

(g) A preliminary order under this paragraph shall expire after twenty days from the date on which it was issued by the arbitral tribunal. However, the arbitral tribunal may issue an interim measure adopting or modifying the preliminary order, after the party against whom the preliminary order is directed has been given notice and an opportunity to present its case;

(h) The arbitral tribunal shall require the applying party to provide security in connection with such preliminary order unless the arbitral tribunal considers it inappropriate or unnecessary to do so;

(i) Any party applying for a preliminary order shall disclose to the arbitral tribunal all circumstances that are likely to be relevant to the arbitral tribunals determination whether to grant or maintain a preliminary order, and such obligation shall continue until the party against whom the preliminary order has been requested has had an opportunity to present its case. Thereafter, the applying party shall have the same disclosure obligation with respect to the preliminary order that a requesting party has with respect to an interim measure under paragraph (6);

(j) A preliminary order made under this paragraph shall be binding on the parties, but shall not be subject to enforcement by a court.

Draft article 17 bis

(1) An interim measure issued by an arbitral tribunal shall be recognized as binding and, unless otherwise provided by the arbitral tribunal, enforced upon application to the competent court, irrespective of the country in which it was issued, subject to the provisions of this article.*

(2) Recognition or enforcement of an interim measure may be refused only:

(a) At the request of the party against whom it is invoked if the court is satisfied that:

(i) Such refusal is warranted on the grounds set forth in article 36, paragraphs (1) (a)(i), (ii), (iii) or (iv); or

(ii) The arbitral tribunal's decision with respect to the provision of security in connection with the interim measure issued by the arbitral tribunal has not been complied with; or

(iii) The interim measure has been terminated or suspended by the arbitral tribunal or, where so empowered, by the court of the State in which the arbitration takes place or under the law of which that interim measure was granted; or

(b) If the court finds that:

(i) The interim measure is incompatible with the powers conferred upon the court unless the court decides to reformulate the interim measure to the extent necessary to adapt it to its own powers and procedures for the purposes of enforcing that interim measure and without modifying its substance; or

(ii) Any of the grounds set forth in article 36, paragraphs (1) (b)(i) or (ii) apply to the recognition and enforcement of the interim measure.

(3) Any determination made by the court on any ground in paragraph (2) of this article shall be effective only for the purposes of the application to recognize and enforce the interim measure. The court where recognition or enforcement is sought shall not, in making that determination, undertake a review of the substance of the interim measure.

(4) The party who is seeking or has obtained recognition or enforcement of an interim measure shall promptly inform the court of any termination, suspension or modification of that interim measure.

(5) The court of the State where recognition or enforcement is sought may, if it considers it proper, order the requesting party to provide appropriate security if the arbitral tribunal has not already made a determination with respect to security or where such a decision is necessary to protect the rights of third parties.

Draft article 17 ter

The court shall have the same power of issuing interim measures for the purposes of and in relation to arbitration proceedings whose place is in the country of the court or in another country as it has for the purposes of and in relation to proceedings in the courts and shall exercise that power in accordance with its own rules and procedures insofar as these are

* The conditions set forth in this article are intended to limit the number of circumstances in which the court may refuse to enforce an interim measure. It would not be contrary to the level of harmonization sought to be achieved by these model provisions if a State were to adopt fewer circumstances in which enforcement may be refused.

relevant to the specific features of an international arbitration. This article shall apply notwithstanding the provisions of article 1, paragraph (2).

**B. Note by the Secretariat on settlement of commercial disputes:
preparation of a model legislative provision on written form
for the arbitration agreement, submitted to the Working Group
on Arbitration at its forty-third session**

I. Draft text of model legislative provision on written form for the arbitration agreement, revising article 7 of the UNCITRAL Model Law on International Commercial Arbitration.	4	
II. Remarks on the draft text of model legislative provision on written form for the arbitration agreement, revising article 7 of the UNCITRAL Model Law on International Commercial Arbitration.	5-13	

Introduction

1. At its thirty-fifth session (New York, 17-28 June 2002), the Commission noted that the Working Group had considered, at its thirty-sixth session (New York, 4-8 March 2002), a draft model legislative provision revising article 7 of the UNCITRAL Model Law on International Commercial Arbitration ("the Model Law") and discussed a draft interpretative instrument regarding article II, paragraph (2), of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards¹ ("the New York Convention").² The Commission noted that the Working Group had not reached consensus on whether to prepare an amending protocol or an interpretative instrument to the New York Convention and that both options should be kept open for consideration by the Working Group or the Commission at a later stage. The Commission was of the view that member and observer States participating in the Working Group's deliberations should have ample time for consultations on those important issues. For that purpose, the Commission considered that it might be preferable for the Working Group to postpone its discussions regarding the requirement of written form for the arbitration agreement.

2. At its thirty-seventh session (New York, 14-25 June 2004), the Commission noted that the Working Group had yet to complete its work in relation to the requirement of written form for the arbitration agreement contained in article 7, paragraph (2), of the Model Law and article II, paragraph (2), of the New York Convention.³ At its forty-second session (New York, 10-14 January 2005), the Working Group agreed that discussions on that matter would be resumed at its next two coming sessions, with a view to presenting a model legislative provision revising article 7 of the Model Law, for adoption by the Commission at its thirty-ninth session, in 2006 (A/CN.9/573, para. 98).

² *Official Records of the General Assembly, Fifty-seventh session, Supplement No. 17 (A/57/17)*, para. 183.

³ *Ibid.*, *Fifty-ninth session, Supplement No. 17 (A/59/17)*, para. 59.

3. The present note has been prepared on the basis of the discussions in the Working Group held at its thirty-sixth session, with respect to the preparation of a model legislative provision on written form for the arbitration agreement, revising article 7 of the Model Law (A/CN.9/508, paras. 18-39).⁴

I. Draft text of model legislative provision on written form for the arbitration agreement, revising article 7 of the UNCITRAL Model Law on International Commercial Arbitration

4. The Working Group may wish to use the following revised text as a basis for its deliberations:

“Article 7. Definition and form of the arbitration agreement

“(1) ‘Arbitration agreement’ is an agreement by the parties to submit to arbitration all or certain disputes which have arisen or which may arise between them in respect of a defined legal relationship, whether contractual or not. An arbitration agreement may be in the form of an arbitration clause in a contract or in the form of a separate agreement.

⁴ Previous discussions regarding that topic may be found in the following documents published by UNCITRAL:

- Report of the Commission on the work of its thirty-seventh session (New York, 14-25 June 2004): *Official Records of the General Assembly, Fifty-ninth session, Supplement No. 17, A/59/17*, para. 59;
- Report of the Commission on the work of its thirty-fifth session (New York, 17-28 June 2002): *Official Records of the General Assembly, Fifty-seventh session, Supplement No. 17, A/57/17*, paras. 182-183;

- Working paper: A/CN.9/WG.II/WP.118 (February 2002, paras. 8-24);
- Report of the Commission on the work of its thirty-fourth session (Vienna, 25 June-13 July 2001): *Official Records of the General Assembly, Fifty-sixth session, Supplement No. 17, A/56/17*, paras. 312-313;
- Report of Working Group on the work of its thirty-fourth session (New York, 21 May-1 June 2001): A/CN.9/487, paras. 22-41;
- Working paper: A/CN.9/WG.II/WP.113 (March 2001);
- Report of Working Group on the work of its thirty-third session (Vienna, 20 November-1 December 2000): A/CN.9/485, paras. 21-59;
- Working paper: A/CN.9/WG.II/WP.110 (September 2000, paras. 10-26);
- Report of the Commission on the work of its thirty-third session (New York, 12 June-7 July 2000): *Official Records of the General Assembly, Fifty-fifth session, Supplement No. 17, A/55/17*, paras. 389-399;
- Report of Working Group on the work of its thirty-second session (Vienna, 20-31 March 2000): A/CN.9/468, paras. 88-106;
- Working paper: A/CN.9/WG.II/WP.108/Add.1 (January 2000, paras. 1-40);
- Report of the Commission on the work of its thirty-second session (17 May-4 June 1999): *Official Records of the General Assembly, Fifty-fourth session, Supplement No. 17, A/54/17*, paras. 344-350;
- Note on possible future work in the area of international commercial arbitration: A/CN.9/460 (April 1999, paras. 20-31).

These documents may also be found on the UNCITRAL website (www.uncitral.org) under “Working Groups” and “Working Group on Arbitration”.

“(2) The arbitration agreement shall be in writing. ‘Writing’ means any form, including, without limitation, a data message, that provides a record of the arbitration agreement or is otherwise accessible so as to be useable for subsequent reference.

“(3) ‘Data message’ means information generated, sent, received or stored by electronic, optical or similar means, including, but not limited to, electronic data interchange (EDI), electronic mail, telegram, telex or telecopy.

“(4) Furthermore, an arbitration agreement is in writing if it is contained in an exchange of statements of claim and defence in which the existence of an agreement is alleged by one party and not denied by the other.

“(5) For the avoidance of doubt, the reference in a contract or a separate arbitration agreement to a writing containing an arbitration clause constitutes an arbitration agreement in writing, provided that the reference is such as to make that clause part of the contract or the separate arbitration agreement, notwithstanding that the contract or the separate arbitration agreement has been concluded orally, by conduct or by other means not in writing. In such a case, the writing containing the arbitration clause constitutes the arbitration agreement for the purposes of article 35.”

II. Remarks on the draft text of model legislative provision on written form for the arbitration agreement, revising article 7 of the UNCITRAL Model Law on International Commercial Arbitration

Paragraph (1)

5. Paragraph (1) reproduces the unchanged text of article 7, paragraph (1), of the Model Law. The Working Group approved the substance of paragraph (1), noting that the provision itself was not controversial (A/CN.9/508, para. 20).

Paragraph (2)

6. Drafting comments were essentially concerned with refining the provision to make it unambiguously clear that arbitration agreements could be validly concluded by means other than in the form of paper-based documents, for example, by electronic communications (A/CN.9/508, para. 21). A prevailing view held in the Working Group was that it was important to combine the traditional notion of “record” with the newer concept of “data message” (as defined in article 2 (a) of the UNCITRAL Model Law on Electronic Commerce) in order to clarify that records other than traditional paper documents were included among the acceptable forms of recording an arbitration agreement (A/CN.9/508, para. 23).

7. The Working Group also agreed that it was necessary to retain the qualifying phrase, “accessible so as to be usable for subsequent reference” (inspired from article 6, paragraph (1), of the UNCITRAL Model Law on Electronic Commerce) in order to set out the conditions whereby any message, including data messages, might meet writing requirements established by the law (A/CN.9/508, para. 24).

8. Paragraph (2) has been redrafted along the lines agreed to by the Working Group (A/CN.9/508, para. 25).

Paragraph (3)

9. Given that the term “data message” is used in paragraph (2), the Working Group agreed to retain that definition (A/CN.9/508, para. 26), which reproduces article 2 (a) of the UNCITRAL Model Law on Electronic Commerce.

Paragraph (4) (formerly paragraph (5) of the draft model legislative provision contained in A/CN.9/508, para. 18)

10. The Working Group agreed to retain paragraph (4) notwithstanding some reservations that it appeared to be misleading and already covered by articles 4 and 16 (2) of the Model Law (A/CN.9/508, paras. 32 and 33). It was said that draft paragraph (4) was needed, since the narrow scope of article 4 of the Model Law did not allow it to be construed as a positive presumption of the existence of an arbitration agreement, in the absence of material evidence thereof, by virtue of the exchange of statements of claim and defence (A/CN.9/508, para. 34).

Paragraph (5) (formerly paragraph (6) of the draft model legislative provision contained in A/CN.9/508, para. 18)

11. It is recalled that one of the main purposes of a revision of article 7 of the Model Law is to recognize the formal validity of arbitration agreements that come into existence in certain factual situations as to which courts or commentators have differing views on whether the form requirement set forth in the current text of article 7, paragraph (2), of the Model Law was met. The Working Group agreed that a purely oral arbitration agreement should not be regarded as formally valid under the Model Law (A/CN.9/508, para. 27). However, it was also agreed that, as a matter of general policy, the reference or other link to a written contractual document containing an arbitration clause should be sufficient to establish the formal validity of the arbitration agreement (ibid.). Examples were given of situations where such a reference in an oral contract to a set of arbitration rules should be accepted as expressing sufficiently the existence and contents of the arbitration agreement, particularly when the set of rules includes a model arbitration clause (ibid.). To accommodate the objection that the mere reference in an oral contract to a set of arbitration rules should not always be regarded as sufficient to meet the written form requirement, since a set of procedural rules should not be regarded, in and of itself, as equivalent to a contractual document containing an arbitration clause (ibid.), the Working Group agreed to the insertion of a proviso, the effect of which is to rely on domestic or other applicable law to determine whether the reference is such as to make that clause part of the contract or the separate arbitration agreement, notwithstanding that the contract or the separate arbitration agreement has been concluded orally, by conduct or by other means not in writing.

12. In that context, the Working Group agreed to delete paragraph (4) of the draft model legislative provision contained in A/CN.9/508, para. 18, and to redraft paragraph (5) so as to better reflect the above-mentioned general policy (A/CN.9/508, para. 31). It is recalled that the Working Group agreed to delete paragraph (7) of the draft model legislative provision contained in A/CN.9/508, para. 18, and, instead, include an extra sentence at the end of paragraph (5) in order to clarify that the writing referred to under paragraph (5), containing the arbitration clause, constitutes the arbitration agreement for the purposes of article 35 of the Model Law. It was stated as well that this sentence was consistent with the New York Convention (A/CN.9/508, para. 39).

A/CN.9/WG.II/WP.137**C. Settlement of commercial disputes: preparation of uniform provisions on written form for arbitration agreements, proposal by the Mexican delegation, submitted to the Working Group on Arbitration at its forty-third session**

(A/CN.9/WG.II/WP.137 and Add.1) [Original: Spanish]

Note by the Secretariat

In preparation for the forty-third session of Working Group II (Arbitration and Conciliation), during which the Working Group is expected to proceed with its review of a revised draft article 7 of the UNCITRAL Model Law on International Commercial Arbitration (see the report of the forty-second session, A/CN.9/573, para. 98), the Government of Mexico, on 15 February 2005, submitted the text of a proposed revised version of article 7 for consideration by the Working Group. The text of that proposal is reproduced as an annex to this note in the form in which it was received by the Secretariat.

ANNEX**Proposal by the Government of Mexico regarding written form for arbitration agreements, to be submitted to the UNCITRAL Working Group on Commercial Arbitration****I. Introduction**

- I.1. The United Nations Convention on the Recognition and Enforcement of Foreign Arbitral Awards (New York Convention) requires arbitration agreements to be in writing.
- I.2. Written form is required for a number of purposes:
 - (i) For the validity of the arbitration agreement (New York Convention, article II (1) and (2);
 - (ii) To request a court before which an action has been brought relating to a dispute forming the subject of an arbitration agreement to refer the parties to arbitration (New York Convention, article II(3)); and
 - (iii) To comply with the essential requirement that the arbitration agreement be supplied when application is made to a court or competent authority for recognition and enforcement of an award (New York Convention, article IV(1)).
- I.3. Articles 7, 8(1) and 35 of the UNCITRAL Model Law on International Commercial Arbitration (MAL) contain provisions similar to those of the New York Convention. They differ only in that the MAL gives a broader definition of what is meant by “in writing”.
- I.4. UNCITRAL has identified various contemporary practices that do not correspond to the literal definition of “writing” either in the New York Convention or in the MAL (see A/CN.9/WG.II/WP.108/Add.1)
- I.5. In addition to the above, the practice exists whereby arbitration agreements are concluded by electronic means.

I.6. Some courts have interpreted the New York Convention and the MAL flexibly, holding such cases that the written form requirement has been met. Others—apparently a minority—have ruled to the contrary.

I.7. UNCITRAL tasked the Working Group on Arbitration with examining the possibility of resolving the problems created by these practices, which give rise to uncertainty. The literal application of the New York Convention and the MAL may, because of a formality, frustrate the legitimate expectations of the parties.

I.8. The view prevailing within the Working Group is that it is not recommendable to make any amendment to the New York Convention, since this would create more problems than benefits:

- (i) Uncertainty would arise regarding agreements in which there is doubt as to whether the written form requirement has been met;
- (ii) It would take a great deal of time to incorporate the amendment and even longer for countries to ratify or accede to it (there are currently 134 parties to the New York Convention).

I.9. The Working Group prepared a draft declaration calling upon courts and authorities to interpret the New York Convention flexibly (A/CN.9/487, paragraph 63).

I.10. The Working Group drafted an amendment to article 7 of the MAL (A/CN.9/487, paragraphs 22-41).

I.11. However, there is a widely held view in the Working Group that neither draft is satisfactory. The interpretative declaration of the New York Convention is not considered to have binding force. As regards the MAL, some believe that the draft definition takes the written form into consideration, which it plainly does not.

I.12. The Working Group suspended its deliberations in order to complete the UNCITRAL Model Law on International Commercial Conciliation and the draft provisions relating to interim measures in arbitration. The Working Group is expected to re-examine the question of written form at its next session, provisionally scheduled for October 2005 in Vienna.

II. Reasons for the proposal

II.1. Arbitration is now more widely accepted than when the New York Convention and the MAL were negotiated. The written form requirement is for many a formality that is no longer justified. This formality may frustrate the legitimate expectations of the other parties. The form of the arbitration agreement is more restrictive than the freedom of form in commercial contracts; a contract involving a transaction worth a hundred million dollars may be concluded verbally, but the arbitration agreement relating to that contract must be in writing. There are some countries in which the arbitration agreement is no longer required to be in writing.⁵ In others, the definition is so broad that the requirement has practically disappeared.⁶

⁵ For example, in France, Belgium, Sweden, Switzerland, the Netherlands and Italy, the written form requirement has been dropped, since no formal requirement is established for the arbitration agreement.

⁶ For example, in England, “in writing” covers verbal agreements (see *Zambia Steel v. James Clark*, Court of Appeal [1986], 2 Lloyd’s Rep. 225, followed by *Abdullah M. Fahem v. Mareb*

II.2. Consequently, the Government of Mexico proposes that the written form requirement for arbitration agreements be omitted from the MAL. If this amendment were adopted, the question of the conclusion of the arbitration agreement and its content would become a problem of proof.

II.3. The problem of the legal validity of the arbitration agreement would disappear in countries adopting the amendment to the MAL. With regard to recognition and enforcement, since there would be no requirement to submit the arbitration agreement, by application of the principle of most favourable regime as provided for in article VII of the New York Convention the problem in that Convention would be resolved.

III. Proposal

A. Article 7. Definition of arbitration agreement⁷

It is proposed that the references to written form be omitted. The article would read as follows:

“An arbitration agreement is an agreement by the parties to submit to arbitration all or certain disputes which have arisen or which may arise between them in respect of a defined legal relationship, whether contractual or not. [An arbitration agreement may be in the form of an arbitration clause in a contract or in the form of a separate agreement.]”⁸

B. Article 35. Recognition and enforcement

It is proposed that article 35(2) be amended to omit the requirement to supply the arbitration agreement. The proposed text would read as follows:

“(2) The party relying on an award or applying for its enforcement shall supply the duly authenticated original award or a certified copy thereof. If the award is not made in Spanish, the party relying on it shall supply a translation thereof into such language done by an official expert.”

Yemen Insurance and Tomen, Queen’s Bench Reports [1997] 2 Lloyd’s Rep. 738, Yearbook of Commercial Arbitration, 1998, p. 789).

⁷ The proposed text replaces the draft of article 7 considered by the Working Group (A/CN.9/508).

⁸ The second sentence is proposed within square brackets as it may prove unnecessary since the first sentence provides that the arbitration agreement may cover disputes that have arisen or that may arise between the parties. The distinction between “arbitration clause” and “arbitration agreement” is no longer relevant.

A/CN.9/WG.II/WP.137/Add.1**Amendment to proposal by the Mexican delegation****ADDENDUM****Note by the Secretariat**

In preparation for the forty-third session of Working Group II (Arbitration and Conciliation), during which the Working Group is expected to proceed with its review of a revised draft article 7 of the UNCITRAL Model Law on International Commercial Arbitration (see the report of the forty-second session, A/CN.9/573, para. 98), the Government of Mexico, on 15 February 2005, submitted the text of a proposed revised version of article 7 for consideration by the Working Group. The text of that proposal is contained in A/CN.9/WG.II/WP.137. On 31 August 2005, the Government of Mexico submitted an amendment to that proposed revised version of article 7. That amendment is reproduced as an annex to this note in the form in which it was received by the Secretariat.

ANNEX**Amendment to Proposal by the Government of Mexico regarding written form for arbitration agreements, to be submitted to the UNCITRAL Working Group on Commercial Arbitration**

The Permanent Mission of Mexico would like to inform the Secretariat of the Commission of an amendment to article 35, paragraph 2, of the proposal formulated by Mexico, which reads: "If the award is not made in Spanish, the party relying on it shall supply a translation thereof into such language done by an official expert", and which should read: "*If the award is not made in an official language of this State, the party shall supply a duly certified translation into such language.*"

As can be seen from reading this new wording, it has a more general nature than the proposal originally formulated and the Mexican Mission accordingly requests the Secretariat to notify the Member States of UNCITRAL of the amendment set out in the preceding paragraph and to inform the Mexican Mission of the publication of the amended text.

**D. Note by the Secretariat on settlement of commercial disputes:
interim measures of protection, submitted to the Working
Group on Arbitration at its forty-third session
(A/CN.9/WG.II/WP.138) [Original: English]**

Introduction

1. At its fortieth session (New York, 23-27 February 2004), the Working Group discussed draft article 17 of the UNCITRAL Model Law on International Commercial Arbitration (“the Model Law”) relating to the power of an arbitral tribunal to order interim measures of protection, based on a draft contained in A/CN.9/WG.II/WP.128 and considered various proposals for a revision of that article. A revised version of draft article 17, taking account of the discussions and decisions of the Working Group at its fortieth session, is contained in A/CN.9/WG.II/WP.131, paragraph 4. At its forty-first session, the Working Group took note of a text proposed by one delegation as a possible alternative to draft article 17 (A/CN.9/569, para. 22).¹

2. At its forty-first (Vienna, 13-17 September 2004) and forty-second (New York, 10-14 January 2005) sessions, the Working Group discussed the text of paragraph (7) of draft article 17 relating to preliminary orders, based on drafts prepared by the Secretariat (as reproduced in documents A/CN.9/WG.II/WP.131, para. 4 and A/CN.9/WG.II/WP.134, respectively). The Working Group recalled that paragraph (7) had been the subject of earlier discussions in the Working Group.² It was noted that the Commission, at its thirty-seventh session (New York, 14-25 June 2004), expressed the hope that consensus could be reached on that issue by the Working Group at its forthcoming session (A/59/17, para. 58). At its thirty-eighth session (Vienna, 4-15 July 2005), the Commission noted that, notwithstanding the wide divergence of views, the Working Group agreed, at its forty-second session, to include a compromise text of the revised draft of paragraph (7) in draft article 17. The Commission expressed doubts as to the value of the proposed compromise text, particularly in light of the fact that it did not provide for enforcement of preliminary orders. Concerns were also expressed that the inclusion of such a provision was contrary to the principle of equal access of the parties to the arbitral tribunal and could expose the revised text of the Model Law to criticism (A/60/17, para. 175). In respect of the structure of draft article 17, it was proposed that the issue of preliminary orders should be dealt with in a separate article in order to facilitate the adoption of draft article 17 by States that did not wish to adopt provisions relating to preliminary orders (A/60/17, para. 176).

3. At its forty-second session (New York, 10-14 January 2005), the Working Group considered a draft provision on recognition and enforcement of interim measures of protection (tentatively numbered article 17 bis), as reproduced in document A/CN.9/WG.II/WP.131, paragraph 46.³ The Working Group also exchanged views on a possible draft provision expressing the power of State courts to order interim measures of

³ For earlier discussions on draft article 17 bis, see A/CN.9/545, paras. 93-112; A/CN.9/524, paras. 16-75; A/CN.9/523, paras. 78-80; A/CN.9/487, paras. 76-87; A/CN.9/485, paras. 78-103; A/CN.9/468, paras. 60-79.

protection in support of arbitration (tentatively numbered article 17 ter), on the basis of variants reproduced in A/CN.9/WG.II/WP.125, paragraph 42.⁴

4. To facilitate the resumption of discussions, this note sets out newly revised versions of draft articles 17, 17 bis and 17 ter of the Model Law, contained in parts I, II and III of this note, respectively. Part IV contains proposals from the Secretariat on the issue of the form in which the current and the revised provisions could be presented in the Model Law, with possible variants to be considered by the Working Group, as requested by the Working Group at its forty-second session (A/CN.9/573, para. 99).

Part I

Draft article 17 of the UNCITRAL Model Law on International Commercial Arbitration regarding the power of an arbitral tribunal to grant interim measures of protection

A. Text of draft article 17

5. The following text sets out a newly revised version of draft article 17 of the Model Law (herein referred to as “draft article 17”). Paragraphs (1) to (6 bis) of draft article 17 are based on discussions and decisions made by the Working Group at its fortieth session (A/CN.9/547, paras. 68-116). Paragraph (7) of draft article 17 is based on discussions and decisions made by the Working Group at its forty-second session (A/CN.9/573, paras. 11-69):

“(1) Unless otherwise agreed by the parties, the arbitral tribunal may, at the request of a party, grant interim measures of protection.

“(2) An interim measure of protection is any temporary measure, whether in the form of an award or in another form, by which, at any time prior to the issuance of the award by which the dispute is finally decided, the arbitral tribunal orders a party to:

“(a) Maintain or restore the status quo pending determination of the dispute;

“(b) Take action that would prevent, or refrain from taking action that is likely to cause, current or imminent harm [, or to prejudice the arbitral process itself];

“(c) Provide a means of preserving assets out of which a subsequent award may be satisfied; or

“(d) Preserve evidence that may be relevant and material to the resolution of the dispute.

“(3) The party requesting the interim measure of protection shall satisfy the arbitral tribunal that:

“(a) Harm not adequately reparable by an award of damages is likely to result if the measure is not ordered, and such harm substantially outweighs the harm that is likely to result to the party against whom the measure is directed if the measure is granted; and

⁴ For earlier discussions on draft article 17 ter, see A/CN.9/524, paras. 76-78; A/CN.9/523, para. 77; A/CN.9/WG.II/WP.125, para. 44; A/CN.9/WG.II/WP.119, paras. 19-33, 37-40, 44-48 and 75-82.

“(b) There is a reasonable possibility that the requesting party will succeed on the merits, provided that any determination on this possibility shall not affect the discretion of the arbitral tribunal in making any subsequent determination.

“(4) The arbitral tribunal may require the requesting party or any other party to provide appropriate security in connection with such interim measure of protection.

“(5) The requesting party shall promptly make disclosure of any material change in the circumstances on the basis of which the party made the request for, or the arbitral tribunal granted, the interim measure of protection.

“(6) The arbitral tribunal may modify, suspend or terminate an interim measure of protection it has granted, at any time, upon application of any party or, in exceptional circumstances, on the arbitral tribunal’s own initiative, upon prior notice to the parties.

“(6 bis) The requesting party shall be liable for any costs and damages caused by the interim measure of protection to the party against whom it is directed, if the arbitral tribunal later determines that, in the circumstances, the interim measure should not have been granted. The arbitral tribunal may order an award of costs and damages at any point during the proceedings.

“(7) (a) Unless otherwise agreed by the parties, a party may file, without notice to the other party, a request for an interim measure of protection together with an application for a preliminary order directing the other party not to frustrate the purpose of the interim measure requested.

“(b) The provisions of paragraphs (3), (5), (6) and (6 bis) of this article relating to interim measures also apply to any preliminary order that the arbitral tribunal may grant pursuant to this paragraph.

“(c) The arbitral tribunal may grant a preliminary order provided it considers that there is a reasonable concern that the purpose of the requested interim measure will be frustrated where prior disclosure of the interim measure to the party against whom it is directed risks frustrating the purpose of the measure.

“(d) Immediately after the arbitral tribunal has made a determination in respect of an application for a preliminary order, the arbitral tribunal shall give notice to the party against whom the preliminary order is requested of the request for the interim measure, the application for the preliminary order, the preliminary order, if any, and all other communications, including indicating the content of any oral communication, between any party and the arbitral tribunal in relation thereto.

“(e) At the same time, the arbitral tribunal shall give an opportunity to the party against whom the preliminary order is directed to present its case at the earliest practicable time. The arbitral tribunal shall decide as promptly as required under the circumstances.

“(f) A preliminary order under this paragraph shall expire after twenty days from the date on which it was issued by the arbitral tribunal. However, the arbitral tribunal may issue an interim measure of protection adopting or modifying the preliminary order, after the party against whom the preliminary order is directed has been given notice and an opportunity to present its case.

“(g) The arbitral tribunal shall require the requesting party to provide security in connection with such preliminary order, unless the arbitral tribunal considers it inappropriate or unnecessary to do so.

“(h) Until the party against whom the preliminary order has been requested has presented its case, the requesting party shall have a continuing obligation to disclose to the arbitral tribunal all circumstances that the arbitral tribunal is likely to find relevant to its determination whether to grant a preliminary order.”

B. Notes on draft article 17

Paragraph (1)

6. At the fortieth session of the Working Group, the text of paragraph (1) as contained in document A/CN.9/547, paragraph 68 was adopted (A/CN.9/547, para. 69).⁵

7. At the forty-first session of the Working Group (A/CN.9/569, para. 22), a proposal was made to add at the end of paragraph 1 the words “or modify them”, so that the paragraph would read:

“Unless otherwise agreed by the parties, the arbitral tribunal may, at the request of a party, grant interim measures of protection or modify them.”

That proposal was not discussed by the Working Group.

Paragraph (2)⁶

Chapeau—“whether in the form of an award or in another form”

8. After discussing the form in which an interim measure might be issued by an arbitral tribunal, the Working Group reiterated its decision not to modify the chapeau of paragraph (2) (A/CN.9/547, paras. 70-72). The Working Group agreed that any explanatory material to be prepared at a later stage, possibly in the form of a guide to enactment of draft article 17, should make it clear that the wording used to describe the form in which an interim measure might be issued should not be misinterpreted as taking a stand in respect of the controversial issue as to whether or not an interim measure issued in the form of an award would qualify for enforcement under the New York Convention (A/CN.9/547, para. 72).⁷

Subparagraph (a)

9. Subparagraph (a) is reproduced without modification from the draft contained in document A/CN.9/547, paragraph 68.

Subparagraph (b)—Anti-suit injunction

10. Subparagraph (b) reflects the decision of the Working Group that, in the interests of clarity, the power to issue anti-suit injunctions should expressly be conferred upon arbitral tribunals and that, for that purpose, the words “or to prejudice the arbitral process itself” should be added at the end of subparagraph (b). Noting that the implications of the proposed amendment had not been fully considered, the Working Group agreed to insert

⁵ A/CN.9/569, para. 22; A/CN.9/545, para. 20; A/CN.9/523, para. 34; A/CN.9/508, paras. 52-54.

⁶ A/CN.9/545, paras. 21-27; A/CN.9/523, paras. 35-38; A/CN.9/508, paras. 64-76.

⁷ A/CN.9/523, para. 36; A/CN.9/508, paras. 65-68.

that proposal in square brackets, for further consideration by the Working Group at a future session (A/CN.9/547, para. 83).

Subparagraph (c)—[preliminary]; [securing]—[preserving]

11. The word “preliminary” has been deleted for the reason that it was considered to be confusing and added nothing to the meaning of the provision (A/CN.9/547, para. 73; for earlier discussion on that matter, see A/CN.9/545, para. 26) and the term “preserving” has been retained instead of the term “securing” because it was considered that the latter term could be interpreted narrowly as indicating a particular method for protecting assets (A/CN.9/547, para. 74).⁸

Subparagraph (d)

12. Subparagraph (d) is reproduced without modification from the draft contained in document A/CN.9/547, paragraph 68.

Paragraph (3)⁹

Subparagraph (a)—interplay with paragraph (2)

13. The Working Group might wish to further consider whether or not the general requirements set forth in paragraph (3) adequately apply to all types of interim measures listed under paragraph (2). It is recalled that, at the fortieth session of the Working Group, it was stated, for example, that it would not be appropriate to require in all circumstances that a party applying for an interim measure to preserve evidence under paragraph (2) (d) should necessarily demonstrate that exceptional harm would be caused if the interim measure was not ordered, or to require that requesting party to otherwise meet the very high threshold established in paragraph (3) (A/CN.9/547, para. 91).

14. At the forty-first session of the Working Group (A/CN.9/569, para. 22), a proposal was made to add as opening words to paragraph 3 the words “Except with respect to the measure referred to in subparagraph (d) of paragraph (2),” so that the chapeau of paragraph 3 would read:

“Except with respect to the measure referred to in subparagraph (d) of paragraph (2), the party requesting the interim measure of protection shall satisfy the arbitral tribunal that:”

That proposal was not discussed by the Working Group.

Subparagraph (a)—interplay with paragraph (2) (b)

15. At the fortieth session of the Working Group, a view was expressed that the reference to “harm” in subparagraph (a) of paragraph (3) might lend itself to confusion with the words “current or imminent harm” in subparagraph (b) of paragraph (2), thus creating the risk that the criteria set forth in paragraph (3) might be read as applying only to those measures granted for the purposes of subparagraph (b) of paragraph (2) (A/CN.9/547, para. 90). It is however submitted that the broad definition of interim measures under paragraph (2) does not conflict with the need for the party requesting the

⁸ A/CN.9/545, para. 26.

⁹ A/CN.9/569, para. 22; A/CN.9/545, paras. 28-32; A/CN.9/523, paras. 39-44; A/CN.9/508, paras. 55-58.

interim measure to show evidence of “harm not adequately reparable by an award of damages” (see A/CN.9/WG.II/WP.123, para. 15).¹⁰

Subparagraph (a)—“Irreparable harm”

16. Subparagraph (a) follows the proposal made by the Working Group to replace the words “irreparable harm” with the words “harm not adequately reparable by an award of damages” (A/CN.9/547, para. 89). It was stated that that proposal addressed the concerns that irreparable harm might present too high a threshold and would more clearly establish the discretion of the arbitral tribunal in deciding upon the issuance of an interim measure (A/CN.9/547, paras. 84-89).¹¹ At its fortieth session, the Working Group expressed concerns that that provision could be interpreted in a very restrictive manner, potentially excluding from the field of interim measures any loss that might be cured by an award of damages. The Working Group also noted that, in current practice, it was not uncommon for an arbitral tribunal to issue an interim measure merely in circumstances where it would be comparatively complicated to compensate the harm with an award of damages. The Working Group might wish to further consider whether the word “adequately” addresses those concerns or whether to clarify, in any explanatory material accompanying paragraph (3), that the paragraph should be interpreted in a flexible manner, keeping in mind balancing the degree of harm suffered by the applicant if the interim measure was not granted against the degree of harm suffered by the party opposing the measure if that measure was granted.

Subparagraph (b)

17. Subparagraph (b) is reproduced without modification from the draft contained in document A/CN.9/547, paragraph 68.¹²

Paragraph (4)¹³

18. Paragraph (4) takes account of the proposal made by the Working Group at its fortieth session that the provision of security should not be considered as a condition precedent to the granting of an interim measure (A/CN.9/547, para. 92), but rather as a free-standing provision allowing the tribunal to order security at any time during the procedure, or as limiting the ordering of security only at the time that the application was brought (A/CN.9/547, para. 94).

“in connection with”

19. The Working Group clarified its understanding that, in paragraph (4), as adopted, the term “in connection with” should be interpreted in a narrow manner to ensure that the fate of the interim measure was linked to the provision of security (A/CN.9/547, para. 94).

“or”

20. As a matter of drafting, it was stated that the use of the word “or” was more appropriate than the word “and” to indicate that the arbitral tribunal could require either the requesting party or any other party to provide appropriate security (A/CN.9/547, para. 95).

¹⁰ A/CN.9/523, para. 42.

¹¹ A/CN.9/545, para. 29 and A/CN.9/508, para. 56.

¹² A/CN.9/545, paras. 31 and 32.

¹³ A/CN.9/545, paras. 33-34; A/CN.9/523, paras. 45-48; A/CN.9/508, paras. 59-63.

Paragraph (5)¹⁴

21. At the forty-first session of the Working Group (A/CN.9/569, para. 22), a proposal was made to add as opening words to paragraph 5 the words “If so ordered by the arbitral tribunal,” so that paragraph 5 would read:

“If so ordered by the arbitral tribunal, the requesting party shall promptly make disclosure of any material change in the circumstances on the basis of which the party made the request for, or the arbitral tribunal granted, the interim measure of protection.”

That proposal was not discussed by the Working Group.

Obligation to inform

22. Paragraph (5) reflects the decision of the Working Group that the obligation to inform be expressed in a more neutral way to avoid any inference being drawn that the paragraph excluded the obligation under article 24 (3) of the Model Law (A/CN.9/547, paras. 97-98).¹⁵

Sanction for non-compliance

23. At its fortieth session, the Working Group agreed that the express inclusion of a sanction under paragraph (5) in case of non-compliance with the obligation to disclose any material change in the circumstances of paragraph (6) was not necessary, as in any case the usual sanction for non-compliance with that obligation was either suspension or termination of the measure, or the award of damages (A/CN.9/547, paras. 99-100).¹⁶

Paragraph (6)¹⁷*“it has granted”*

24. The words “it has granted” have been retained without square brackets, to reflect that the arbitral tribunal may only modify or terminate the interim measure issued by that arbitral tribunal (A/CN.9/547, paras. 102-104).

25. At the forty-first session of the Working Group (A/CN.9/569, para. 22), an alternative proposal was made, and not discussed, to delete paragraph 6.

Paragraph (6 bis)

26. In order to assist deliberations on paragraph (6 bis), the Secretariat had prepared a note (A/CN.9/WG.II/WP.127) containing information received from States on the liability regimes that applied under their national laws in respect of interim measures of protection. It was observed that, of the legislation contained therein, the national laws did not distinguish between inter partes and ex parte measures in relation to the liability regimes that applied. It was suggested that, for that reason, the square brackets around that

¹⁴ A/CN.9/545, paras. 44-48; A/CN.9/523, para. 49.

¹⁵ A/CN.9/454, para. 45.

¹⁶ A/CN.9/523, para. 49.

¹⁷ A/CN.9/454, paras. 35-43; A/CN.9/523, paras. 50-52.

paragraph should be deleted and the Working Group should consider possible improvements to the text (A/CN.9/547, para. 105).¹⁸

27. Paragraph (6 bis) contains the proposal which was adopted by the Working Group at its fortieth session (A/CN.9/547, paras. 106-108) and reflects the agreement of the Working Group that the final decision on the merits should not be an essential element in determining whether the interim measure was justified or not.

28. It was also agreed that any explanatory material accompanying paragraph (6 bis) should clarify that the reference to “proceedings” referred to the arbitral proceedings and not to the proceedings relating to the interim measure (A/CN.9/547, para. 108).

29. At the forty-first session of the Working Group (A/CN.9/569, para. 22), a proposal was made to replace the words “the interim measure should not have been granted” at the end of the first sentence of paragraph 6 bis by the words, “the interim measure was unjustified”, so that paragraph 6 bis would read:

“The requesting party shall be liable for any costs and damages caused by the interim measure of protection to the party against whom it is directed, if the arbitral tribunal later determines that, in the circumstances, the interim measure was unjustified. The arbitral tribunal may order an award of costs and damages at any point during the proceedings.”

Paragraph 7

30. At its forty-first (Vienna, 13-17 September 2004), and forty-second (New York, 10-14 January 2005) sessions, the Working Group undertook a detailed review of the text of paragraph (7) of draft article 17 regarding the power of an arbitral tribunal to grant interim relief on an ex parte basis. In draft article 17, the notion of interim relief being granted on an ex parte basis is generally reflected by the term “preliminary order(s)”.

31. Notwithstanding the wide divergence of views, the Working Group agreed to include the revised draft of paragraph (7) in draft article 17, on the basis of the principles that that paragraph would apply unless otherwise agreed by the parties, that it should be made clear that preliminary orders had the nature of procedural orders and not of awards, that no enforcement procedure would be provided for preliminary orders in article 17 bis, and that no footnote would be added (A/CN.9/573, para. 27).

32. The Working Group might wish to note that, at the thirty-eighth session of the Commission, a proposal was made that, in respect of the structure of draft article 17, the issue of preliminary orders should be dealt with in a separate article in order to facilitate the adoption of draft article 17 by States that would not wish to adopt provisions relating to preliminary orders (A/60/17, para. 76). As well, it was said that if paragraph (7) were to be included in draft article 17, it should be drafted in the form of an opting-in provision, applying only where the parties had expressly agreed to its application (A/60/17, para. 175).

33. As well, the Working Group might wish to consider whether interim measures ordered ex parte by an arbitral tribunal would still present any practical value to practitioners if the revised text of the Model Law made them unenforceable. In that respect, the Working Group might wish to recall that it was observed, at the thirty-sixth session of the Working Group that, in certain countries where the court system would experience difficulties in reacting expeditiously to a request for a preliminary order, it

¹⁸ A/CN.9/545, paras. 48, 60-61, 64-66, A/CN.9/524, paras. 32-34.

would be essential to establish the enforceable character of such an interim measure when ordered by an arbitral tribunal (A/CN.9/508, paragraph 79).

Subparagraph (a)

Opt-out option

34. In order to reflect the decision made by the Working Group concerning the retention of the opt-out option for the parties, the words “unless otherwise agreed by the parties” have been retained and the words “if expressly agreed by the parties” deleted (A/CN.9/573, paragraph 28). In light of the comments made by the Commission at its thirty-eighth session (see paragraph 32 above), the Working Group might wish to give further consideration to that issue.

“take no action”

35. The revised draft reflects the decision of the Working Group to substitute the words “take no action” with the word “not” in order to clarify that a preliminary order might be aimed not only at preventing a party from taking an action but also at requiring a party to take an action such as, for instance, to protect goods from deterioration or some other threat (A/CN.9/573, paragraph 29).

Subparagraph (b)

36. As agreed by the Working Group, the words “relating to interim measures also” have been included after the word “article” on the basis that those words clarified that the intention of subparagraph (b) was to make the obligations set out in paragraphs (3), (4), (5), (6) and (6 bis) applicable to preliminary orders (A/CN.9/573, paragraph 31).

Subparagraph (c)

Power of the arbitral tribunal to grant preliminary orders

37. The revised draft reflects the decision of the Working Group that, in order to expressly empower the arbitral tribunal to grant preliminary orders, the word “only” appearing before the word “grant” be deleted, and the word “if” be replaced by the word “provided” (A/CN.9/573, paragraph 32).

“reasonable basis for concern”

38. The Working Group agreed to simplify the existing language by deleting the words “basis for” (A/CN.9/573, paras. 33 and 34).

Definition of the risk

39. It was suggested that the risk defined under subparagraph (c) that the measure be frustrated before all the parties could be heard did not include the risk that the preliminary order be disclosed to the party against whom it was made, and it was therefore proposed to amend subparagraph (c) to better reflect that risk. Accordingly, it was suggested that the words “before all parties can be heard” should be deleted. In that connection, it was said that the formulation contained in a previous draft of paragraph 7 (a), reproduced in A/CN.9/WG.II/WP.131, paragraph 4 and A/CN.9/569, paragraph 12, stating that “where prior disclosure of an interim measure to the party against whom it is directed risks frustrating the purpose of the measure”, was preferable. The revised draft takes that suggestion into account (A/CN.9/573, para. 35).

Subparagraph (d)*Communication of information*

40. A concern was expressed that giving notice of oral communications to the party against whom the preliminary order was directed might not be easily discharged. In order to clarify that the arbitral tribunal was obliged to disclose not only the existence of the oral communications but also to indicate their contents, the words “including indicating the content of any oral communication” have been added after the words “all other communications” (A/CN.9/573, para. 37).

“A determination in respect of a preliminary order”

41. The revised draft takes account of the suggestion to add the words “in respect of an application for” after the words “a determination” for the sake of providing consistency with paragraph 7 (a), which referred to “an application for a preliminary order” (A/CN.9/573, para. 38).

“the party against whom the preliminary order is directed”

42. The Working Group agreed that it might be more appropriate to refer to “the party against whom the preliminary order is requested” or “is sought”, rather than to “the party against whom the preliminary order is directed”, as a determination might be for or against the granting of a preliminary order (A/CN.9/573, para. 39).

Notice

43. The revised draft makes it clear that, as decided by the Working Group, the arbitral tribunal, in receipt of the request for a preliminary order, was under an obligation to give notice of the documents and information to the other party (A/CN.9/573, para. 40).

[“unless the arbitral tribunal...whichever occurs earlier”]

44. The Working Group agreed to delete the bracketed text appearing at the end of subparagraph (d) to reflect its earlier decision (see above, paragraph 31) that no judicial enforcement regime should be provided for in the Model Law for preliminary orders.

Subparagraph (e)*Time limitation*

45. Subparagraph (e) reflects the decision of the Working Group not to include any time limitation expressed in hours or days. It was further agreed by the Working Group that a commentary or explanatory note that might be prepared at a later stage in respect of article 17 could refer to two days as an illustration to indicate the intention of the provision (A/CN.9/573, paras. 43-50) .

Notice

46. In order to clarify when the notice should be given, the Working Group agreed to add, as the opening words of subparagraph (e), the words “at the same time” (A/CN.9/573, para. 51).

Subparagraph (f)

47. With a view to preventing any confusion as to the purpose of subparagraph (f), a proposal was made to clarify that, as a matter of principle, a preliminary order should not have a life span beyond twenty days, but that certain relief granted under the preliminary order might be included in an inter partes interim measure of protection. The revised draft therefore reflects the decision of the Working Group to reverse the order of the two sentences of paragraph (f) (A/CN.9/573, para. 58). The Working Group also agreed to replace the words “confirming, extending” by the word “adopting”, on the basis that that term better expressed the fact that the preliminary order had to be converted into an inter partes interim measure (A/CN.9/573, paras. 57-58).

Subparagraph (g)

“appropriate security”

48. The revised draft reflects the decision of the Working Group to retain the text of subparagraph (g), with the deletion of the term “appropriate”.

Subparagraph (h)

Cross references to subparagraphs (c) and (e) and footnote

49. The cross-references to subparagraphs (c) and (e) have been deleted for the reason that these references were no longer necessary (A/CN.9/573, para. 65). As well, as agreed by the Working Group, the footnote has been deleted for the reason that it was unnecessary and that the reference to “less onerous conditions” was considered to provide an awkward standard to apply in respect of an obligation to disclose (A/CN.9/573, para. 68).

“is directed”

50. A proposal was made and agreed to replace the words “is directed” appearing after the words “the preliminary order is” by the words “has been requested” to clarify that the obligation of disclosure of the requesting party applied from the moment that the request for a preliminary order was lodged by the requesting party, and not from the moment the arbitral tribunal made a determination thereon (A/CN.9/573, para. 67).

Part II**Draft provision on the recognition and enforcement of interim measures of protection (for insertion as a new article of the UNCITRAL Model Law on International Commercial Arbitration, tentatively numbered 17 bis)****A. Text of draft article 17 bis**

51. The following text sets out a newly revised version of article 17 bis of the Model Law (hereinafter referred to as “draft article 17 bis”) based on the discussions and decisions of the Working Group at its forty-second session (A/CN.9/573, paras. 70-89):

“(1) An interim measure of protection issued by an arbitral tribunal shall be recognized as binding and, unless otherwise provided by the arbitral tribunal,

enforced upon application to the competent court, irrespective of the country in which it was issued, subject to the provisions of this article.*

“(2) The court may refuse to recognize or enforce an interim measure of protection, only:

“(a) at the request of the party against whom it is invoked, if the court is satisfied that:

“(i) such refusal is warranted on the grounds set forth in article 36, paragraphs (1) (a)(i), (ii), (iii) or (iv); or

“(ii) the arbitral tribunal’s decision with respect to the provision of security in connection with the interim measure issued by the arbitral tribunal has not been complied with; or

“(iii) the interim measure has been terminated or suspended by the arbitral tribunal or, where so empowered, by the court of the State in which, the arbitration takes place or under the law of which, that interim measure was granted; or

“(b) if the court finds that:

“(i) the interim measure is incompatible with the powers conferred upon the court, unless the court decides to reformulate the interim measure to the extent necessary to adapt it to its own powers and procedures for the purposes of enforcing that interim measure and without modifying its substance; or

“(ii) any of the grounds set forth in article 36, paragraphs (1) (b)(i) or (ii) apply to the recognition and enforcement of the interim measure.

“(3) Any determination made by the court on any ground in paragraph (2) of this article shall be effective only for the purposes of the application to recognize and enforce the interim measure of protection. The court where recognition or enforcement is sought shall not, in exercising that power, undertake a review of the substance of the interim measure.

“(4) The party who is seeking or has obtained recognition or enforcement of an interim measure of protection shall promptly inform the court of any termination, suspension or modification of that interim measure.

“(5) The court of the State where recognition or enforcement is sought may, if it considers it proper, request the requesting party to provide appropriate security, if the arbitral tribunal has not already made a determination with respect to security, or where such a decision is necessary to protect the rights of third parties.

“[(6) An interim measure issued by an arbitral tribunal under standards substantially equivalent to those set forth in paragraph (7) of article 17 shall not be enforceable.]”

* The conditions set forth in this article are intended to limit the number of circumstances in which the court may refuse to enforce an interim measure of protection. It would not be contrary to the level of harmonization sought to be achieved by these model provisions if a State were to adopt fewer circumstances in which enforcement may be refused.

B. Notes on draft article 17 bis

Paragraph 1¹⁹

52. The Working Group adopted paragraph 1 without change (A/CN.9/573, para. 71).

Paragraph 2²⁰

Subparagraph (a)(i) (subparagraph (a)(i) and (ii) of the previous draft contained in A/CN.9/WG.II/WP.131)

53. The draft reflects the decision of the Working Group to retain the language “such refusal is warranted on the grounds” and to combine subparagraphs (a)(i) and (ii) of the previous draft (A/CN.9/573, para. 74).

Subparagraph (a)(ii) (subparagraph (a)(iii) of the previous draft contained in A/CN.9/WG.II/WP.131)

54. The words “the requirement to provide appropriate security” have been replaced by the words “the arbitral tribunal’s decision with respect to the provision of security” in order to better reflect that the arbitral tribunal has a discretion not to require any security or that the security might have been ordered and its provision deferred (A/CN.9/573, para. 76).

Subparagraph (a)(iii) (subparagraph (a)(iv) of the previous draft contained in A/CN.9/WG.II/WP.131)

[or under the law of which, that interim measure was granted] [the arbitration takes place]

55. To achieve consistency between draft article 17 bis (2) (a)(iii) and article 36 (1) (a)(v) of the Model Law, the two bracketed texts of the previous draft have been retained, but their order reversed (A/CN.9/573, para. 79).

Subparagraph (b)(i)

56. The words “by the law” are omitted from subparagraph (b)(i), since the Working Group agreed that they could be misinterpreted to mean that a court could operate on a law other than that from which it drew its powers (A/CN.9/573, para. 82).

Subparagraph (b)(ii)

57. The Working Group adopted the substance of subparagraph (b)(ii) without change (A/CN.9/573, para. 83).

Paragraph (3)²¹

58. It is recalled that the Working Group took note of various proposals relating to paragraph (3), which were to be further discussed in the context of draft article 17 ter. Due to lack of time, the Working Group did not reconsider them. The Working Group might wish to further discuss those proposals, which are reflected in A/CN.9/573, para. 84.

¹⁹ A/CN.9/545, paras. 95-102; A/CN.9/524, paras. 32-34, 64-66.

²⁰ A/CN.9/545, paras. 103-110; A/CN.9/524, paras. 35-39, 42-52, 57-63.

²¹ A/CN.9/524, paras. 40-41, 55-56.

Paragraph (4)²²

59. The Working Group adopted the substance of paragraph (4) without change (A/CN.9/573, para. 85).

Paragraph (5)²³

60. Paragraph 5, as revised, seeks to clarify the intention that the court might order a requesting party to provide security if the court is of the opinion that it is appropriate and the tribunal had not already made such an order or such an order was necessary to protect the rights of third parties (A/CN.9/573, para. 86). As agreed, the reference to “order”, which appeared twice in paragraph (5) of the previous draft, has been replaced by the verb “require” or by the substantive term “decision” to avoid limiting the effect of the provision to procedural decisions. (A/CN.9/573, para. 86)

Paragraph (6)²⁴*Preliminary orders and enforcement*

61. Consistent with its earlier decision that a preliminary order would not be judicially enforceable, the Working Group agreed to delete paragraph (6). (A/CN.9/573, para. 87).

62. The Working Group then proceeded to consider whether or not draft article 17 bis should include an express statement that it did not apply to preliminary orders. After discussion, the Working Group agreed that the Secretariat should prepare a draft paragraph for inclusion in article 17 bis, based upon the principle that preliminary orders were not enforceable by State courts, and ensuring that any proposed formulation would not undercut the binding nature of preliminary orders (A/CN.9/573, paras. 87-89).

Part III

Draft provision on court-ordered interim measures in support of arbitration (for insertion as a new article of the UNCITRAL Model Law on International Commercial Arbitration, tentatively numbered 17 ter²⁵

A. Text of draft article 17 ter

63. The following text sets out a newly revised version of article 17 ter of the Model Law (hereinafter referred to as “draft article 17 ter”) based on the discussions and decisions of the Working Group at its forty-second session (A/CN.9/573, paras. 90-95):

“The court shall have the same power of issuing interim measures of protection for the purposes of and in relation to arbitration proceedings as it has for the purposes of and in relation to proceedings in the courts and shall exercise that power in accordance with its own rules and procedures insofar as these are relevant to the specific features of an international arbitration.

²² A/CN.9/524, paras. 67-71.

²³ A/CN.9/524, paras. 72-75.

²⁴ A/CN.9/545, para. 111.

²⁵ A/CN.9/573, paras. 90-95; A/CN.9/524, paras. 76-78; A/CN.9/523, para. 77.

B. Notes on draft article 17 ter

64. It is recalled that, after discussion, the Working Group adopted Variant 1 of draft article 17 ter as it appeared in A/CN.9/WG.II/WP.125, paragraph 42 (A/CN.9/573, para. 95).

Part IV**Possible options on the issue of the form in which the current and revised provisions could be presented in the Model Law**

65. At its forty-second session, the Working Group requested the Secretariat to consider the issue of the form in which the current and the revised provisions could be presented, with possible variants to be considered by the Working Group at a future session (A/CN.9/573, para. 99).

66. The Working Group might wish to consider two different issues in relation to the form in which the current and the revised provisions could be presented. The first one relates to the structuring of the provisions, the second one to the placement of those provisions in the Model Law.

A. Structuring of the revised provisions*(1) Placement of definition*

67. Article 17, paragraph (2), contains a definition of interim measures of protection. One approach could be to include that definition under article 2 of the Model Law, which relates to the definitions and rules of interpretation of the Model Law. That approach would simplify the drafting of article 17. However, the Working Group might wish to further consider whether the definition of “interim measures” currently contained in article 17, paragraph (2), which applies in respect of interim measures granted by arbitral tribunals, should be redrafted so as to apply also to interim measures granted by State courts under article 9 and article 17 ter of the Model Law.

(2) Preliminary orders

68. At its thirty-eighth session, the Commission heard a proposal that the issue of preliminary orders should be dealt with in a separate article to facilitate the adoption of draft article 17 by States that would not wish to adopt provisions relating to preliminary orders (A/60/17, para. 176). If that proposal were to be accepted by the Working Group, then the following options for the presentation of that new article might be considered by the Working Group:

- The article on preliminary orders might be included following article 17, and articles 17 bis and 17 ter would then be renumbered accordingly; or
- Due to the wide divergence of views expressed in the discussions on that matter, the Working Group might wish to consider whether the article should appear as a footnote along the lines adopted, for example, in article X as appended to article 4 of the UNCITRAL Model Law on International Commercial Conciliation.

B. Placement of the revised provisions in the Model Law

69. Concerning the placement of the revised provisions in the text of the Model Law, various options might be considered, as follows.

(1) *Placement of the revised provisions under chapter IV or IV bis of the Model Law*

70. A first option would be to replace the current article 17 by the revised provisions on interim measures of protection and include articles 17, 17 bis and 17 ter in the current chapter IV of the Model Law. That option presents the advantage of simplicity. However, it should be noted that, whilst chapter IV deals with the jurisdiction of arbitral tribunal, articles 17 bis and 17 ter relate to State court intervention and, for that reason, might be better placed in a new chapter.

71. If a new chapter entitled “Interim Measures of Protection” (possibly numbered chapter IV bis) and containing articles 17 to 17 ter were created, that chapter could include an indication of the date at which that chapter was adopted by the Commission. A similar approach was taken in respect of article 5 bis of the Model Law on Electronic Commerce. Inclusion of the date at which the chapter was adopted by the Commission would give an indication to enacting States of the reason why the drafting style of the revised provisions differs from the remaining provisions of the Model Law. If the Working Group agreed to include a new chapter, the current chapter IV would only contain article 16 and the question of whether or not to renumber both the chapters and the articles of the Model Law might need to be considered.

(2) *Placement of the revised provisions as ancillary text to the Model Law*

72. Another option would be to include the revised provisions on interim measures as a footnote to the current article 17 or in an annex to the Model Law. Explanatory material should then clarify that the revised provisions should be read as replacing the current provision on interim measures. One advantage of that option would be to avoid any restructuring of the Model Law. That annex might also be used to insert additional revisions that might be made to the Model Law. However, the Working Group may wish to consider whether such a presentation would not create the false impression that there are two classes of provisions, namely those contained in the annex being of secondary importance compared to those contained in the text of the Model Law itself.

(3) *Presentation of the revised provisions as a separate set of model legislative provisions on interim measures of protection in international commercial arbitration*

73. Another option would be to present the revised provisions on interim measures of protection as a discrete set of provisions, formally distinct from the Model Law, and dealing with a specific procedural aspect of arbitration. Indication could be made that those provisions are intended to build upon the current article 17 of the Model Law. Such an approach would offer an advantage to enacting States that deal with interim measures of protection in legislation separate from that dealing with international arbitration.

C. Explanatory material

74. The Working Group expressed the wish that explanatory material be prepared in relation to the revised provisions. The Working Group might wish to consider various options for the presentation of the explanatory material. The explanatory material could be drafted along the lines of the current explanatory note, which accompanies the Model Law,

and replace paragraph 26 of the current explanatory note. Another option would be to provide more detailed information on interim measures of protection to enacting States and to prepare a legislative guide on the revised provisions. The Working Group might wish to further consider whether it would be appropriate to also prepare a legislative guide for the remaining provisions of the Model Law.

**E. Report of the Working Group on Arbitration on the work
of its forty-fourth session (New York, 23-27 January 2006)**

Annexes

I.	Revised legislative provisions on interim measures and preliminary orders.
II.	Revised legislative provisions on the form of arbitration agreement
III.	Draft declaration regarding the interpretation of article II, paragraph (2), and article VII, paragraph (1), of the New York Convention

I. Introduction

1. At its thirty-second session (Vienna, 17 May-4 June 1999), the Commission considered that the time had come to, *inter alia*, evaluate in the universal forum of the Commission the acceptability of ideas and proposals for the improvement of arbitration laws, rules and practices. The Commission entrusted the work to Working Group II (Arbitration and Conciliation) and decided that the priority items for the Working Group should include, among other matters, enforceability of interim measures and the requirement of written form for the arbitration agreement contained in article 7, paragraph (2), of UNCITRAL Model Law on International Commercial Arbitration (“the Arbitration Model Law”) and article II, paragraph (2), of the 1958 New York Convention on the Recognition and Enforcement of Foreign Arbitral Awards (“the New York Convention”).

2. The most recent summary of the discussions of the Working Group on interim measures, preliminary orders and the form of arbitration agreement is contained in document A/CN.9/WG.II/WP.140, paragraphs 5 to 26. The Secretariat was asked to prepare proposals on the form in which the revised versions of draft article 17 of the Arbitration Model Law relating to the power of an arbitral tribunal to order interim measures, of a new article to the Arbitration Model Law relating to the recognition and enforcement of interim measures (tentatively numbered article 17 bis), of a new article to the Arbitration Model Law relating to court-ordered interim measures (tentatively numbered article 17 ter) could be presented, for consideration by the Working Group at its forty-fourth session. The Secretariat was also asked to prepare a revised version of draft article 7 of the Arbitration Model Law relating to the definition and form of arbitration agreement as well as a note considering how State courts have interpreted the form requirement in article II, paragraph (2), of the New York Convention and exploring the extent to which article VII, paragraph (1), of the New York Convention might assist in modernizing the form requirement for arbitration agreement, for consideration by the Working Group at its forty-fourth session.

II. Organization of the session

3. The Working Group, which was composed of all States members of the Commission, held its forty-fourth session in New York, from 23 to 27 January 2006. The session was attended by the following States members of the Working Group: Algeria, Argentina, Australia, Austria, Belarus, Belgium, Cameroon, Canada, China, Croatia, Czech Republic, France, Germany, Guatemala, Iran (Islamic Republic of), Italy, Japan, Lebanon, Madagascar, Mexico, Nigeria, Pakistan, Republic of Korea, Russian Federation, Sierra Leone, Singapore, South Africa, Spain, Sri Lanka, Sweden, Switzerland, Thailand, Tunisia, Turkey, Uganda, United Kingdom of Great Britain and Northern Ireland, United States of America and Uruguay.

4. The session was attended by observers from the following States: Azerbaijan, Bangladesh, Dominican Republic, Finland, Guinea, Indonesia, Iraq, Ireland, Kyrgyzstan, Malaysia, Netherlands, New Zealand, Philippines and Ukraine.

5. The session was also attended by observers from the following international intergovernmental organizations invited by the Commission: African Union, European Community, NAFTA Article 2022 Advisory Committee (NAFTA) and Permanent Court of Arbitration.

6. The session was also attended by observers from the following international non-governmental organizations invited by the Commission: American Arbitration Association (AAA), American Bar Association (ABA), Arab Association for International Arbitration, Asia Pacific Regional Arbitration Group (APRAG), Association of the Bar of the City of New York (ABCNY), Center for International Legal Studies, Association Suisse de l'Arbitrage (ASA), Club of Arbitrators of the Milan Chamber of Arbitration, Forum for International Commercial Arbitration (FICA), International Chamber of Commerce (ICC), International Cotton Advisory Committee (ICAC), International Law Institute (ILI), Kuala Lumpur Regional Centre for Arbitration (KLRC), School of International Arbitration (Queen Mary University of London), the Chartered Institute of Arbitrators, the European Law Students Association (ELSA), the London Court of International Arbitration (LCIA) and Union Internationale des Avocats (UIA).

7. The Working Group elected the following officers:

Chairman: Mr. José María Abascal Zamora (Mexico);

Rapporteur: Mr. Mostafa Dolatyar (Islamic Republic of Iran).

8. The Working Group had before it the following documents: (a) provisional agenda (A/CN.9/WG.II/WP.140 and A/CN.9/WG.II/WP.140/Add.1); (b) a note by the Secretariat containing a newly revised draft of article 7 of the Arbitration Model Law prepared by the Secretariat pursuant to the decisions made by the Working Group at its thirty-sixth session (A/CN.9/WG.II/WP.136); (c) a note by the Secretariat containing a proposal made by a delegation for a revision of article 7 of the Arbitration Model Law (A/CN.9/WG.II/WP.137 and A/CN.9/WG.II/WP.137/Add.1); (d) a note by the Secretariat regarding the interpretation and application of the writing requirement contained in article II, paragraph (2), of the New York Convention (A/CN.9/WG.II/WP.139); (e) a note by the Secretariat on newly revised drafts of articles 17, 17 bis and 17 ter, for insertion in the Arbitration Model Law, prepared by the Secretariat pursuant to the decisions made by the Working Group at its forty-third session (A/CN.9/WG.II/WP.141); and (f) the report of the Working Group on the work of its forty-third session (A/CN.9/589).

9. The Working Group adopted the following agenda:
 1. Opening of the session.
 2. Election of officers.
 3. Adoption of the agenda.
 4. Preparation of uniform provisions on interim measures and on the requirement that an arbitration agreement be in writing.
 5. Possible future work in the field of settlement of commercial disputes.
 6. Other business.
 7. Adoption of the report.

III. Deliberations and decisions

10. The Working Group resumed its deliberations on agenda item 4 on the basis of the texts contained in the notes prepared by the Secretariat (A/CN.9/WG.II/WP.136, A/CN.9/WG.II/WP.137, A/CN.9/WG.II/WP.137/Add.1, A/CN.9/WG.II/WP.139 and A/CN.9/WG.II/WP.141). The deliberations and conclusions of the Working Group with respect to those items are reflected in chapters IV to VII. The Secretariat was requested to prepare a revised draft of a number of provisions, based on the deliberations and conclusions of the Working Group. The Working Group discussed agenda items 5 and 6. The deliberations and conclusions of the Working Group with respect to those items are reflected in chapters VIII and IX, respectively.

11. The Working Group adopted the revised version of draft legislative provisions on interim measures, preliminary orders and the form of arbitration agreement as well as a text of a draft declaration regarding the interpretation of article II, paragraph (2), and article VII, paragraph (1), of the New York Convention. The Secretariat was requested to circulate the revised version of those draft provisions and the text of the draft interpretative declaration to Governments for their comments, with a view to consideration and adoption of the draft provisions and draft interpretative declaration by the Commission at its thirty-ninth session, scheduled to be held in New York, from 19 June to 7 July 2006.

IV. Draft legislative provisions on interim measures and preliminary orders

12. The Working Group recalled that, at its forty-third session (Vienna, 3-7 October 2005), it had undertaken a detailed review of the text of the revised version of article 17 regarding the power of an arbitral tribunal to grant interim measures and preliminary orders, article 17 bis regarding the recognition and enforcement of interim measures issued by an arbitral tribunal and article 17 ter on court-ordered interim measures. At that session, the Working Group requested the Secretariat to consider the issue of the form in which the current and the revised provisions on interim measures and preliminary orders could be presented, with possible variants to be considered by the Working Group at a future session (A/CN.9/589, paras. 104-106). The Secretariat was also requested to take account of the suggestions that those provisions be placed in a new chapter, numbered

chapter IV bis of the Arbitration Model Law, and be restructured by grouping paragraphs relating to similar issues under separate articles (A/CN.9/589, para. 106).

13. The Working Group resumed discussions on the draft legislative provisions on interim measures and preliminary orders on the basis of the text prepared by the Secretariat to reflect the discussions of the Working Group, as set out in A/CN.9/WG.II/WP.141.

Location and structure of chapter IV bis

14. The Working Group agreed that the draft legislative provisions on interim measures and preliminary orders should be located in a new chapter of the Arbitration Model Law and agreed that the articles could be grouped into sections as suggested in A/CN.9/WG.II/WP.141.

Numbering of provisions

15. A comment was made that the Latin numbering of articles could be problematic for users unfamiliar with such numbering. In response, it was noted that the Latin numbering was consistent with the approach taken in other UNCITRAL instruments, such as, for example, article 5 bis of the UNCITRAL Model Law on Electronic Commerce.

16. After discussion, the Working Group agreed to retain the numbering of the draft legislative provisions, as set out in A/CN.9/WG.II/WP.141.

Article 17

Paragraph (1)

17. The substance of paragraph (1) was adopted by the Working Group without modification.

Paragraph (2)

18. Reservations were expressed about paragraph (2) (b) directly or indirectly allowing the use of anti-suit injunctions given that such injunctions were unknown or unfamiliar in many legal systems and that there was no uniformity in practice relating thereto. As well, it was said that anti-suit injunctions did not always have the provisional nature of interim measures. It was suggested that there were already a number of rules that protected the arbitral process and that a reference to anti-suit injunctions under paragraph (2) (b) was therefore unnecessary.

19. The Working Group recalled that it had already considered that matter at its forty-third session and agreed to adopt the text of paragraph (2) (b) (A/CN.9/589, paras. 20-26). It was observed that the provisions as contained in A/CN.9/WG.II/WP.141 represented a package and the Working Group should not reopen discussions on substantive issues that might affect that package.

20. The substance of paragraph (2) was adopted without modification.

Article 17 bis

Paragraphs (1) and (2)

21. The substance of paragraphs (1) and (2) was adopted without modification by the Working Group.

Article 17 ter*Title*

22. A proposal was made to amend the title of article 17 ter so that it would read: “applications for preliminary orders and conditions for granting preliminary orders” in order to better reflect the content of the provision. That proposal was adopted by the Working Group.

Paragraphs (1) and (2)

23. The substance of paragraphs (1) and (2) was adopted without modification.

Paragraph (3)

24. For linguistic reasons, the Working Group agreed to reformulate paragraph (3) along the following lines:

“(3) The conditions defined under article 17 bis apply to any preliminary order, provided that the harm to be assessed under article 17 bis, paragraph (1) (a), is the harm likely to result from the order being granted or not.”

Article 17 quater*Paragraphs (1), (2), (3) and (4)*

25. The substance of paragraphs (1), (2), (3) and (4) was adopted without modification.

Paragraph (5)

26. It was suggested that the reference to “preliminary order binding on the parties” was ambiguous in that it appeared to require all parties to comply with the preliminary order rather than only the party against whom the order was requested. It was further observed that, if the intention was to bind all parties, that formulation did not sufficiently clarify the nature of the obligations of the parties. In response, it was said that the plural reference to “the parties” should be retained to reflect the fact that an order would be binding not only on the party against whom the measure was directed but also on the party applying for the measure (for example, in relation to providing information or security).

27. Another proposal was made to add the following text to paragraph (5), “a party shall not be prevented from seeking any relief in a court because it has obtained such a preliminary order from the arbitral tribunal.” It was suggested that that proposal would be better dealt with in article 17 undecies, which related to court-ordered interim measures. As well, it was suggested that article 9 of the Arbitration Model Law already protected the right of a party to arbitral proceedings to request from a court an interim measure. In response, it was observed that article 9 dealt with interim measures and not preliminary orders. It was suggested that this proposal merely clarified the operation of provisions and did not seek to reopen substantive questions relating thereto. The Working Group took note of that proposal.

28. After discussions, the Working Group retained the text of paragraph (5), without modification.

Article 17 quinquies

29. The substance of article 17 quinquies was adopted without modification.

Article 17 sexies*Title*

30. A proposal was made to delete the words “by the arbitral tribunal” from the title of article 17 sexies. That proposal was adopted.

Paragraphs (1) and (2)

31. The substance of paragraphs (1) and (2) was adopted without modification.

Article 17 septies*Paragraphs (1) and (2)*

32. The substance of paragraphs (1) and (2) was adopted without modification.

Article 17 octies

33. It was decided to replace the words, “the party against whom it is directed” with the words, “any party” for the reason that the measure could impact upon any party.

Article 17 novies*Title*

34. A proposal was made to delete the words “of interim measures” in order to avoid repetition of the Section title. That proposal was adopted.

Paragraph 1

35. The Working Group agreed that paragraph (1) should refer to article 17 decies instead of article 17 novies.

Paragraphs (2) and (3)

36. The substance of paragraphs (2) and (3) was adopted without modification.

Article 17 decies*Title*

37. Consistent with the modification to the title of article 17 novies, the Working Group agreed to delete the words “of interim measures” from the title of article 17 decies.

Paragraphs (1) and (2)

38. The substance of paragraphs (1) and (2) was adopted without modification

Footnote

39. The Working Group agreed that the footnote to article 17 decies should refer to article 17 decies instead of article 17 novies.

Article 17 undecies

Placement of article 17 undecies

40. The Working Group considered whether article 17 undecies should be located in another part of the Arbitration Model Law for the reason that it dealt with court-ordered interim measures which might not easily fit in a chapter intended to deal mostly with interim measures granted by arbitral tribunals.

41. One suggestion was to place article 17 undecies following provisions enacting article 9 of the Arbitration Model Law, which dealt with interim measures granted by courts. However, given that article 9 was located within chapter II of the Arbitration Model Law, which related to arbitration agreement, that option was not considered appropriate.

42. The Working Group agreed that wording along the lines of the text suggested in the note by the Secretariat (A/CN.9/WG.II/WP.141, para. 13) for a footnote to article 17 undecies could be included in explanatory material accompanying that provision. Such a text could draw the attention of States to the issue of placing article 17 undecies in the most appropriate part of their enacting legislation.

43. The substance of article 17 undecies was adopted without modification.

Reference to articles 17 novies, 17 decies and 17 undecies in article 1, paragraph 2 of the Arbitration Model Law

44. At its forty-third session, the Working Group noted that, given the intention that the provision on court-ordered interim measure should apply irrespective of the country where the arbitration took place, that provision should be added to the list of articles contained under article 1, paragraph (2), of the Arbitration Model Law. That article provided that, in respect of the listed articles, the Arbitration Model Law, as enacted in a given State, would apply even if the place of the arbitration was not in the territory of that State (A/CN.9/589, paras. 101-103). It was also suggested that a reference to articles 17 novies and 17 decies (which dealt with recognition and enforcement of interim measures and the grounds for refusal thereof, respectively) should be included within the list of excepted articles so that article 1, paragraph (2) of the Arbitration Model Law would read as follows:

“The provisions of this Law, except articles 8, 9, 17 novies, 17 decies, 17 undecies, 35 and 36, apply only if the place of arbitration is in the territory of this State.”

45. That proposal was adopted in substance by the Working Group.

V. Draft legislative provisions on the form of arbitration agreement

46. The Working Group recalled that, at its forty-third session, it had resumed discussions on a draft model legislative provision revising article 7 of the Arbitration Model Law on the basis of a text prepared by the Secretariat (“the revised draft article 7”) following discussions in the Working Group held at its thirty-sixth session (New York, 4-8 March 2002) (A/CN.9/508, paras. 18-39) and had also considered a proposal by the Mexican delegation regarding that issue reproduced in A/CN.9/WG.II/WP.137, as modified by A/CN.9/WG.II/WP.137/Add.1 (“the alternative proposal”) (A/CN.9/589, paras. 108-112). It was further recalled that the Working Group had considered that both

texts provided useful options to address concerns relating to the form of arbitration agreement. The Working Group agreed to further consider both options.

The alternative proposal

47. It was noted that the alternative proposal omitted entirely the writing requirement. It was said that, if that text were adopted, the question of the conclusion of the arbitration agreement and its content would be solely a matter of proof rather than of validity. It was said that the revised draft article 7 established the minimum requirements that should apply in respect of the form of arbitration agreement, whereas the alternative proposal went much further and did away with all form requirements to recognize, for example, oral arbitration agreements. In support of the alternative proposal, it was said that many national laws contained requirements as to form for arbitration agreements that could be regarded as outdated. While the alternative proposal was met with considerable interest, the view was expressed that it might depart too radically from traditional legislation, including the New York Convention, to be readily acceptable in many countries. It was also stated that the purpose of the revision of paragraph (2) of article 7 of the Arbitration Model Law was to harmonise existing domestic laws in that respect and it was suggested that that purpose would be better achieved by the revised draft article 7 than the alternative proposal (for discussion on the alternative proposal, see also below, paragraphs 74 and 75).

48. The Working Group continued its discussion based on the revised draft article 7, as contained in A/CN.9/WG.II/WP.136. The Working Group was reminded that, whatever formulation was accepted in relation to paragraph (2) of article 7 of the Arbitration Model Law, it would be necessary to consider the impact of that provision upon article 35, given that that article included a cross-reference to article 7 in its requirement in paragraph (2), which provided that the party relying on an award or applying for its enforcement “supply the original arbitration agreement referred to in article 7 or a duly certified copy thereof” (for discussion on that matter, see below, paragraphs 76 to 80).

Revised draft article 7

Paragraph (1) of the revised draft article 7

49. The substance of paragraph (1) was adopted without modification.

Paragraphs (2) and (3) of the revised draft article 7

50. Support was expressed for retaining the substance of paragraph (2) as it gave a clear indication, consistent with article II, paragraph (2), of the New York Convention, that arbitration agreements had to be in writing and provided examples regarding the meaning of the writing requirement. However, it was noted that paragraph (2) of the revised draft article 7 sought by way of a definition to clarify that the term “writing” covered modern means of communications that might not be considered, in some countries, as meeting the writing requirement. A concern was expressed that this approach would be inconsistent with the approach taken in UNCITRAL texts on electronic commerce, which relied not on a definition but on a functional equivalence approach to “writing”.

Compliance of paragraph (2) of the revised draft article 7 with the UN Convention on the Use of Electronic Communications in International Contracts (“the Convention on Electronic Contracts”)

51. It was observed that the revised draft article 7 had been prepared before the UNCITRAL Working Group on Electronic Commerce finalized its work on the Convention on Electronic Contracts and that it should be revised to ensure consistency with that Convention. In addition, it was observed that article 20 of that Convention included the New York Convention in the list of international instruments to which it applied and that, to the extent the Arbitration Model Law might be used to assist with the interpretation of the New York Convention, it would be important to ensure compatibility between the three instruments.

52. It was suggested that the formulation in paragraph (2) of article 9 of the Convention on Electronic Contracts, which provided that an electronic communication met a requirement under law that it be in writing “if the information contained therein is accessible so as to be useable for subsequent reference” could be used in the revised draft article 7 as follows: “A data message satisfies the requirement for writing if the information contained therein is accessible so as to be useable for subsequent reference.” That proposal received some support.

“concluded or documented”

53. With a view to achieving the required level of flexibility, it was said that the form requirement for arbitration agreements should mirror similar provisions that existed in respect of litigation in national courts, for example, article 3 (c) of the Convention on Exclusive Choice of Court Agreements prepared by the Hague Conference on Private International Law and adopted on 30 June 2005, which provided that “an exclusive choice of court agreement is required to be concluded or documented in writing or by any other means of communication which renders information accessible so as to be useable for subsequent reference”. It was also said that a similar reference to “concluded or documented in writing” was reflected in article 76 of the draft convention on the carriage of goods [wholly or partly] [by sea] currently being developed by the UNCITRAL Working Group on Transport Law (see, A/CN.9/WG.II/WP.140/Add.1, annex).

54. It was suggested that the words “concluded or documented” be considered for insertion under paragraph (2) of the revised draft article 7, as these words would clarify that the form requirement applied not necessarily at the stage of the formation of the arbitration agreement, but could also apply at the subsequent stage of evidencing the existence of the arbitration agreement. In support of that proposal, it was said that these words would be useful to encourage a liberal interpretation of the form requirement under article II, paragraph (2), of the New York Convention. A proposal was made that paragraph (2) of the revised draft article 7 should read: “The arbitration agreement shall be in writing. ‘An agreement in writing’ means an agreement concluded or documented in any form, including, without limitation, a data message, that provides a record of the arbitration agreement or is otherwise accessible so as to be useable for subsequent reference.” That proposal received some support. A proposal was made to simplify that text, as follows: “The arbitration agreement shall be in writing. An agreement is ‘in writing’ if it is concluded or documented in any form or is accessible so as to be useable for subsequent reference, including in the form of a data message.” In support of that proposal, it was stated that it would cover both situations where writing was required for validity or for evidentiary purposes.

55. Questions were raised as to whether the terms “concluded” and “documented” were both needed as it was widely felt that the term “documented” encompassed the term “concluded”. In response, it was said that if only the term “documented” were used, that provision might be interpreted in a very restrictive way as only applying where an agreement was concluded in writing. For that reason, it was suggested that both terms were needed.

56. Objections were raised on the ground that inclusion of those terms introduced issues related to proving the existence of an arbitration agreement that fell outside the intended purpose of paragraph (2) of the revised draft article 7, which related to the requirement that an arbitration agreement be in writing. A proposal was made to delete any reference to those words so that the revised paragraph would read: “The arbitration agreement shall be in writing. An agreement is “in writing” if it is in any form or is accessible so as to be useable for subsequent reference, including in the form of a data message”. The Working Group took note of that proposal.

Proposals for restructuring paragraphs (2) and (3) the revised draft article 7

57. It was observed that paragraph (2) of the revised draft article 7 sought to deal with different issues, namely:

- To state the principle that an arbitration agreement shall be in writing;
- To determine whether the purpose of the writing requirement was to provide certainty as to the consent of the parties to arbitrate or as to the contents of the arbitration agreement; and
- To clarify how the writing requirement could be fulfilled.

58. A proposal was made to address each of these issues by including text along the following lines: “The arbitration agreement shall be in writing. An arbitration agreement is in writing if it can be evidenced in writing. A data message meets the requirement of a writing if the information contained therein is accessible so as to be useable for subsequent reference. ‘Data message’ means information generated, sent, received or stored by electronic, magnetic, optical or similar means, including but not limited to, electronic data interchange (EDI), electronic mail, telegram, telex or telecopy.” That proposal received some support.

59. A related proposal was made to replace paragraphs (2) and (3) of the revised draft article 7 by the following restructured provision: “(2) The arbitration agreement shall be in writing. (3) An arbitration agreement is in writing if its terms are recorded in any form, whether or not the arbitration agreement or contract has been concluded orally, by conduct, or by other means. (4) The requirement that an arbitration agreement be in writing is met by an electronic communication if the information contained therein is accessible so as to be useable for subsequent reference.” It was explained that the latter proposal had the following advantages:

- The language used in paragraph (2) of that proposal was consistent with article II, paragraph (2), of the New York Convention and therefore, that sentence maintained “the friendly bridge” between the texts;
- Paragraph (3) of that proposal by referring to “its terms are recorded” made it clear that only the terms of the arbitration agreement were required to be recorded and not the actual will of the parties to enter into the arbitration agreement. In that context, it was pointed out that the question whether the parties actually reached an agreement

to arbitrate should be left to national legislation;

- The language used in paragraph (4) of the proposal was consistent with that used in paragraph (2) of article 9 of the Convention on Electronic Contracts.

60. That proposal was widely supported. However, clarification was sought on a number of aspects thereof.

61. Questions were raised as to whether the words “its terms” in paragraph (3) of the above proposal (see above, paragraph 59) were necessary given that the existence of an agreement to arbitrate assumed the existence of terms relating thereto. After discussion, the Working Group was generally of the view that some reference to the contents of the arbitration agreement should be retained to make it clear that what was to be recorded was the content or terms of the arbitration agreement as opposed to the meeting of the minds of the parties or any other information regarding the formation of the agreement. In response to questions regarding the scope of the words “its terms”, divergent views were expressed. One view was that the reference to the “terms” of the contract could be interpreted as covering all of the contractual stipulations applying between the parties. Another view was that the “terms” of the agreement could be read more broadly to encompass, for example, the arbitration rules agreed upon by the parties or the law governing the arbitral procedure to the extent the parties did not agree on any procedural rules. It was also explained that “its terms” was not restricted to terms agreed by the parties expressly but could also cover agreements concluded by conduct, for example where one party sent an offer to conclude a contract to the other party which contained an arbitration agreement and the other party, without expressly accepting the offer, performed its part of the bargain (for example, it shipped the goods and paid the price).

62. To avoid a possible unclear or overly broad interpretation that could flow from the use of the word “terms”, a proposal was made to replace that word with a more generic one such as “content”. That proposal received some support. However, it was suggested that the phrase “its content is” might be improved upon. In order to provide a better formulation, it was proposed to redraft paragraph (3) of the above proposal (see above, paragraph 59) to read as follows: “an arbitration agreement is in writing if there is a record of the agreement in any form whether or not the arbitration agreement or contract has been concluded orally, by conduct, or by any other means”. It was suggested that that text should be accompanied by explanatory material in a guide to enactment and use. Another proposal was made that paragraph (3) be redrafted as follows: “an arbitration agreement is in writing if the rules applicable thereto are embodied in a recorded text”. The Working Group did not agree that either of these formulations should be adopted but agreed that further clarification might be needed to be included in a guide to enactment and use in respect to the factual situations that were intended to be covered by paragraph (3), such as those listed in A/CN.9/WG.II/WP.110, paras. 16 to 26. The Working Group requested the Secretariat to revise the text taking account of those suggestions, with appropriate explanations being provided in a guide to enactment and use of article 7.

63. In response to a question, it was explained that the words “or contract” in paragraph (3) of the above proposal (see above, paragraph 59) were intended to address the issue of incorporation by reference in a contract of an arbitration agreement. It was noted that the question of incorporation by reference was a matter to be further considered when discussing paragraph (5) of the revised draft article 7 (see below, paragraphs 69 to 73).

64. A suggestion was made that the words “electronic communication” contained in paragraph (4) of the above proposal (see above, paragraph 59) should be replaced by the

words “electronic means” for the reason that the latter formulation was broader and covered a wider range of factual situations. After discussion, the Working Group agreed to retain the words “electronic communication” and to include under paragraph (4) of the above proposal the definition of “electronic communication” and “data message” as contained in paragraphs (b) and (c) of article 4 of the Convention on Electronic Contracts.

Paragraph (4) of the revised draft article 7

65. A proposal was made that, in order to meet the variety of submissions that were used in modern arbitration practice in addition to the statement of claim and defence, paragraph (4) of the revised draft article 7 should be redrafted as follows: “Furthermore, an arbitration agreement is in writing if it is contained in an exchange of written submissions in arbitral or legal proceedings in which the existence of an agreement is alleged by one party and not denied by the other party in such submissions”. In response, it was stated that the term “submission” might be too vague and a source of ambiguity. As well, it was said that the terms “statement of claim” and “statement of defence” had well established and broad meaning in arbitral and litigation practice. Doubts were also expressed as to whether the reference to “written” submissions was appropriate and whether the words “arbitral or legal” sufficiently differentiated arbitral practice from court litigation.

66. Questions were raised whether paragraph (4) should be maintained, given that paragraph (3) of the above proposal (see above, paragraph 59), already included arbitration agreements concluded by conduct. In support of its retention, it was said that paragraph (4) provided an illustration of a specific situation, namely where the arbitration agreement was alleged by one party and not denied by the other. The view was expressed that at least the situation where an exchange of statements would evidence an arbitration agreement concluded elsewhere was not covered by paragraph (3) of the above proposal (see above, paragraph 59).

67. A suggestion was made that paragraph (4) should include more generic language to cover situations where parties communicated on the merits of the dispute. It was suggested that paragraph (4) should be redrafted in order to cover cases where no arbitration agreement existed but a party nevertheless submitted a claim to arbitrate which was not opposed by the other party.

68. After discussion, the Working Group agreed to retain paragraph (4) of the revised draft article 7 without modification notwithstanding some reservations that it might cover some of the situations dealt with under articles 4 and 16, paragraph (2) of the Arbitration Model Law as well as paragraph (3) of the above proposal (see above, paragraph 59). It was said that paragraph (4) was useful, since the narrow scope of article 4 of the Arbitration Model Law did not allow it to be construed as a positive presumption of the existence of an arbitration agreement, in the absence of material evidence merely by virtue of the exchange of statements of claim and defence and since paragraph (4) was more specific than article 16, paragraph (2) of the Arbitration Model Law.

Paragraph (5) of the revised draft article 7

69. The Working Group recalled that one of the main purposes of paragraph (5) was to address factual situations such as the case where a maritime salvage contract was concluded orally by radio with reference to a pre-existing standard contract form containing an arbitration clause, such as the Lloyd’s Open Form or a contract concluded orally but subsequently confirmed in writing or otherwise linked to a written document

containing an arbitration clause, such as the general sale or purchase conditions or reference to existing rules of arbitration proposed unilaterally by a party and communicated to the other. The Working Group agreed to maintain the provision on the basis that it corresponded to modern practices.

70. Taking account of the decision of the Working Group to amend paragraph (2) of the revised draft article 7 (see above, paragraphs 50 to 64), which addressed a number of situations already covered by paragraph (5) of the revised draft article 7, a proposal was made to simplify the drafting of paragraph (5) to deal only with the issue of incorporation by reference as follows: “The reference in a contract to any document containing an arbitration clause constitutes an arbitration agreement in writing, if the reference incorporates that clause into the contract.” That proposal received some support.

71. A comment was made that the words “if the reference incorporates that clause into the contract” might be understood as requiring stricter conditions for a valid conclusion of an arbitration agreement than the 1985 text of the Arbitration Model Law and that therefore the existing language on that point should be maintained. To that end, the following text was proposed: “provided that the reference is such as to make that clause part of the contract”. It was said that it was preferable to avoid departure from the wording of the Arbitration Model Law, which was widely understood as deferring to applicable law to determine what linkage between the reference and the clause was needed to incorporate the clause into the contract. After discussion, the Working Group agreed to maintain the original wording of the 1985 text of the Arbitration Model Law.

72. It was said that the scope of application of paragraph (5) should be limited. To that end, a proposal was made to add at the end of paragraph (5) the words “and if arbitration agreements are customary for such contracts”. That proposal was objected to on the basis that it was too restrictive and created different categories of contracts, which might be unfamiliar in certain jurisdictions. The use of the word “customary” was considered to be vague and open to potentially diverging interpretations. It was recalled that the Arbitration Model Law did not provide a substantive rule as to the application of incorporation by reference but rather left its determination to national laws.

73. After discussion, the Working Group agreed that paragraph (5) would read as follows: “The reference in a contract to any document containing an arbitration clause constitutes an arbitration agreement in writing, provided that the reference is such as to make that clause part of the contract.”

Reconciling the conflicting approaches on the form of arbitration agreement

74. It was recalled that the Working Group’s intention in revising article 7 of the Arbitration Model Law had been to update domestic laws on the question of the writing requirement for the arbitration agreement, while ensuring access to enforcement under the New York Convention. To achieve that purpose, two options had been presented, the first gave a detailed description of how the writing requirement could be satisfied (the revised draft article 7) and the other deleted the writing requirement altogether (the alternative proposal, see above, paragraph 47). A suggestion was made and adopted that both the revised draft article 7, as amended by the Working Group, and the alternative proposal would be offered to States as alternative texts.

75. The Working Group agreed to further consider the drafting of the alternative proposal, based on the text contained in A/CN.9/WG.II/WP.137 and A/CN.9/WG.II/WP.137/Add.1. It was said that the main purpose of the alternative

proposal was to delete paragraph (2) and only retain paragraph (1) of article 7 of the Model Law. The Working Group agreed that the last sentence of paragraph (1) which read: “[An arbitration agreement may be in the form of an arbitration clause in a contract or in the form of a separate agreement.]” should be deleted and the alternative proposal would read as follows: “‘An arbitration agreement’ is an agreement by the parties to submit to arbitration all or certain disputes which have arisen or which may arise between them in respect of a defined legal relationship, whether contractual or not.”

Article 35, paragraph (2) of the Arbitration Model Law

76. The Working Group considered whether revision of article 7 impacted on paragraph (2) of article 35 of the Arbitration Model Law (see above, paragraph 48). It was proposed that paragraph (2) of article 35 of the Arbitration Model Law be amended to omit the requirement to submit the original arbitration agreement, a duly certified copy or any translation thereof such that the provision would read: “The party relying on an award or applying for its enforcement shall supply the duly authenticated original award or a certified copy thereof. If the award is not made in an official language of this State, the party shall supply a translation thereof into such language.” It was stated that, irrespective of the option chosen by an enacting State in respect of revisions to article 7, the amendment to article 35 should be effected.

77. Some concerns were expressed with the proposed deletion of the requirement to provide the arbitration agreement in paragraph (2) of article 35. It was said that that modification could introduce inconsistency between the Arbitration Model Law and article IV of New York Convention, which required that the arbitration agreement or a certified copy thereof be presented. On the other hand, it was noted that article VII, paragraph (1), of the New York Convention recognized the right of a party to enforce an arbitral award in the manner allowed by applicable national law. It was also stated that deleting the requirement to provide the arbitration agreement would impact negatively on article 36 of the Arbitration Model Law where the grounds upon which enforcement of an award might be refused rested on the terms of the arbitration agreement. It was noted that the 1985 text of the Arbitration Model Law already included a footnote to paragraph (2) of article 35, which explained that the conditions set forth in that paragraph were intended to set maximum standards and thus left it open to a State to impose less onerous conditions to be met by a party seeking enforcement. The view was expressed that it was therefore unnecessary to delete the reference to the arbitration agreement from the text of paragraph (2) of article 35.

78. Nevertheless, after discussion, the Working Group agreed that the requirement to provide the arbitration agreement could be dispensed with under paragraph (2) of article 35 and that if the award was not made in an official language of the State, then the court might, but was not obliged to, require the requesting party to provide a duly certified translation thereof.

79. It was further proposed to delete from the revised draft paragraph (2) of article 35 the words “duly authenticated” used in relation to the award as these words had given rise to problems in practice and were open to different interpretations. That proposal was adopted by the Working Group.

80. It was agreed that paragraph (2) of article 35 be redrafted as follows: “The party relying on an award or applying for its enforcement shall supply the original award or a certified copy thereof. If the award is not made in an official language of this State, the

court may request the party to supply a certified translation thereof into such language.” It was agreed that the existing footnote to paragraph (2) of article 35 should be maintained without modification. It was noted that flexibility with respect to the submission of the translation into the language of the court existed in a number of legal systems and that it was desirable to recommend that national legislators consider adopting such a flexible approach.

VI. Explanatory material in relation to the legislative provisions on interim measures, preliminary orders and the form of arbitration agreement

81. The Working Group agreed that explanatory material in relation to the legislative provisions on interim measures, preliminary orders and the form of arbitration agreement could be drafted along the lines of the existing explanatory note to the Arbitration Model Law and that such text could replace the current paragraphs 18, 19, 26 and other affected paragraphs of that explanatory note. In addition, the Secretariat was requested to provide more detailed information on interim measures, preliminary orders and the form of arbitration agreement to enacting States in a guide to enactment and use of the revised provisions.

VII. Draft interpretative instruments regarding article II, paragraph (2), and article VII, paragraph (1), of the New York Convention

82. The Working Group recalled that, at its thirty-sixth session, it discussed a draft interpretative instrument regarding article II, paragraph (2), of the New York Convention, in order to offer guidance on the interpretation and application of the writing requirement contained in article II, paragraph (2), of the New York Convention and to achieve a higher degree of uniformity. At its thirty fourth session (Vienna, 25 June-13 July 2001) (A/56/17, para. 313), the Commission agreed that member and observer States participating in the Working Group’s deliberations should have ample time for consultations on those important issues, including the possibility of examining further the meaning and effect of the more-favourable-right provision set out in article VII, paragraph (1), of the New York Convention. For that purpose, the Working Group had agreed to postpone its discussions regarding the writing requirement and the New York Convention.

83. In view of the progress that had been made at the current session in connection with the writing requirement under the Arbitration Model Law, the Working Group considered the draft interpretative instrument on article II, paragraph (2), of the New York Convention, reproduced in A/CN.9/508, para. 41 as well as the draft interpretative instrument on article VII, paragraph (1), of the New York Convention contained in A/CN.9/WG.II/WP.139, para. 37.

84. Questions were raised as to the legal status in international law of an interpretative instrument. It was questioned whether a non-binding interpretative instrument would be of practical effect in achieving the objective of uniform interpretation of the New York Convention. In that respect, it was suggested that an interpretative instrument was not sufficient to deal with the practical problems and the existing disharmony in the

application of article II, paragraph (2), of the New York Convention and that the Working Group should focus instead on the preparation of an amending protocol to the New York Convention. On the other hand, the view was expressed that, in order to increase the persuasive value of the instrument, the interpretative declaration should be endorsed by the General Assembly of the United Nations. The view was also expressed that UNCITRAL, as the core legal body in the United Nations system in the field of international trade law, would be the best body to adopt such a declaration.

85. Concerns were expressed that declarations interpreting either article II, paragraph (2), or article VII, paragraph (1), of the New York Convention would give an indication that article II, paragraph (2), did not already provide for a liberal, flexible and broad approach to the form requirement and that adopting such a declaration ran the risk of upsetting such interpretation that article II, paragraph (2), of the New York Convention already enjoyed in some jurisdictions. However, taking account of the diverging and sometimes conflicting interpretations that existed in relation to the application of article II, paragraph (2), the Working Group agreed that guidance on that matter would be helpful.

86. The Working Group proceeded to consider the text of the draft interpretative declaration on article VII, paragraph (1), of the New York Convention. In support of adopting that declaration, it was said that that approach would encourage the development of rules favouring the validity of arbitration agreements in a wider variety of situations. It was explained that the declaration on article VII, paragraph (1), of the New York Convention would encourage States to adopt the revised version of article 7 of the Arbitration Model Law and pro-enforcements laws and it was observed that the recommendation contained in paragraph 13 of the draft declaration was not limited to the question of the arbitration agreement, but was broad enough to encompass any aspect of the enforcement procedure.

87. A suggestion was made that it would be preferable to include, in the draft declaration on article VII, paragraph (1), of the New York Convention, provisions clarifying the meaning of article II, paragraph (2), of the New York Convention. It was recalled that article II, paragraph (2), had been the subject of different interpretations in State courts, resulting from the differences of expression between the five equally authentic texts of the Convention. Such differences were partly due to the fact that, for example, in the English version, the definition of “agreement in writing” (by using the word “includes”) appeared to provide a non-exhaustive list of examples whereas some of the other equally authentic language versions appeared to provide an exhaustive list of elements of the definition.

88. In order to address those concerns, it was said that the draft interpretative declaration on article VII, paragraph (1), of the New York Convention should include a statement on the interpretation of article II, paragraph (2), of the New York Convention. It was decided that the draft interpretative declaration regarding article VII, paragraph (1), of the Convention, as it was reproduced in A/CN.9/WG.II/WP.139, should be retained subject to two amendments. First, paragraph 10 of the declaration should be amended by adding the words “particularly with respect to article 7” after the words “as subsequently revised”. Paragraph 10 of the draft declaration would therefore read: “Taking into account international legal instruments, such as the 1985 UNCITRAL Model Law on International Commercial Arbitration, as subsequently revised, particularly with respect to article 7, the UNCITRAL Model Law on Electronic Commerce, the UNCITRAL Model Law on Electronic Signatures and the United Nations Convention on the Use of Electronic Communications in International Contracts,” Secondly, a new paragraph, numbered paragraph 13, could be inserted, as follows: “Recommends that article II, paragraph (2), of

the Convention be applied recognizing that the circumstances described therein are not exhaustive.” It was noted that that amendment would require that paragraph 13 be renumbered as paragraph 14 and the title of the declaration should be revised to refer to the interpretation of articles II, paragraph (2) and VII, paragraph (1). Those amendments were agreed to by the Working Group.

VIII. Possible future work in the field of settlement of commercial disputes

89. The Working Group undertook preliminary discussions regarding the desirability and feasibility of undertaking work on various issues, outlined in previous documents (A/CN.9/468, paras. 107-109; A/55/17, para. 396; A/60/17, para. 178) and the priority consideration that might be given to those issues.

90. The possible new topics upon which the Working Group was invited to focus its attention, included: possible revision of the UNCITRAL Arbitration Rules; arbitrability of intra-corporate disputes (and possibly other issues relating to arbitrability, for example, arbitrability in the fields of intellectual property rights, investment disputes, insolvency or unfair competition); online dispute resolution (ODR); and State immunity in light of the recently adopted International Law Commission Convention on Jurisdictional Immunities of States and their Property (hereafter “the Jurisdictional Immunities Convention”).

91. It was stated that all the listed topics were worthy of consideration and that topics such as sovereign immunity and arbitrability might require the development of a binding instrument to be effectively addressed. A broader suggestion was made that UNCITRAL should not confine itself to a piecemeal approach to individual issues but work instead on the preparation of an international binding instrument on international commercial arbitration, bearing in mind previous instruments such as the 1961 European Convention on International Commercial Arbitration and other similar texts. It was suggested that work on such a project should not seek to revise arbitration regimes that worked well in practice such as the New York Convention. While interest was expressed in such a larger project, the Working Group was cautioned not to include in its work programme unnecessarily time-consuming projects, and to focus on issues of practical interest to the arbitration community.

92. On the question of State immunity, the Working Group noted that, in December 2004, the General Assembly adopted the Jurisdictional Immunities Convention (see resolution A/RES/59/38). The Working Group was invited to consider whether, taking account of the application of that Convention to the immunity of a State and its property from the jurisdiction of the courts of another State, the question of immunity was a matter that needed to be addressed in the context of arbitration from the perspective of an agreement by the State to participate in arbitration and the enforcement of arbitral awards against a State. Concern was expressed that the topic of sovereign immunity should be limited to the point of enforcement and that work on that topic in the area of arbitration could create confusion. Nonetheless, support was expressed for work to be undertaken on that topic, particularly noting that there was growing case law where States that participated in investment arbitrations failed to comply with arbitral awards. It was also cautioned that the topic of sovereign immunity raised questions of public policy, which did not easily lend itself to harmonisation.

93. On the topic of revision of the UNCITRAL Arbitration Rules, it was noted that these Rules would have their thirtieth anniversary in 2006 and that conferences were to be convened by the Secretariat to discuss ideas and areas for possible revision of those Rules. Although reservation was expressed as to whether there was an immediate need to revise the UNCITRAL Arbitration Rules, support was expressed for their revision to be taken up as a matter of priority. It was suggested that, given the wide use of the UNCITRAL Arbitration Rules, any needed revision would be of positive benefit to practitioners in international arbitration. In that respect, it was noted that a number of arbitration institutions had undertaken a revision of their arbitration rules based on the UNCITRAL Arbitration Rules. The work of those arbitration institutions could be made available to assist the Working Group in any review of the UNCITRAL Arbitration Rules. It was proposed that to better facilitate a review of the UNCITRAL Arbitration Rules, preliminary consultations could be undertaken with practitioners to develop a list of topics on which updating or revision was necessary.

94. Another possible topic suggested for consideration to the Working Group was the revision of article 27 of the Arbitration Model Law, which currently permitted an arbitral tribunal or a party to request a court to assist in the taking of evidence in an arbitration but allowed the court to execute that request “within its competence and according to its rules on taking evidence”. It was suggested that article 27 could be revised to oblige a court to render such assistance. Yet another suggestion was made to address the impact of anti-suit injunctions on international arbitration by appropriately amending the Arbitration Model Law. It was observed that those injunctions were impacting negatively on international arbitration and increased both the cost and complexity thereof. In addition, it was suggested that the Working Group could consider the impact of arbitration on third parties as well as multi-party arbitrations.

95. The Working Group took note of the above suggestions.

IX. Other business

96. The Working Group took note of the discussions in Working Group III (Transport Law) at its sixteenth session (Vienna, 28 November-9 December 2005) as to the compatibility of the New York Convention and the Arbitration Model Law with the draft article 83 (Arbitration Agreements) of its draft convention on the carriage of goods [wholly or partly] [by sea] and a suggestion that the opinion of the Working Group on Arbitration should be sought (see paras. 101-103 of A/CN.9/591).

97. As a result, the Working Group requested the Secretariat to convene an informal joint group of experts drawn from both Working Groups to assist the Secretariat to report on these matters as a matter of urgency at the next sessions of the two Working Groups.

Annex I

Revised legislative provisions on interim measures and preliminary orders

Chapter IV bis. Interim measures and preliminary orders

Section 1—Interim measures

Article 17—Power of arbitral tribunal to order interim measures

(1) Unless otherwise agreed by the parties, the arbitral tribunal may, at the request of a party, grant interim measures.

(2) An interim measure is any temporary measure, whether in the form of an award or in another form, by which, at any time prior to the issuance of the award by which the dispute is finally decided, the arbitral tribunal orders a party to:

- (a) Maintain or restore the status quo pending determination of the dispute;
- (b) Take action that would prevent, or refrain from taking action that is likely to cause, current or imminent harm or prejudice to the arbitral process itself;
- (c) Provide a means of preserving assets out of which a subsequent award may be satisfied; or
- (d) Preserve evidence that may be relevant and material to the resolution of the dispute.

Article 17 bis—Conditions for granting interim measures

(1) The party requesting an interim measure under article 17 (2)(a), (b) and (c) shall satisfy the arbitral tribunal that:

(a) Harm not adequately reparable by an award of damages is likely to result if the measure is not ordered, and such harm substantially outweighs the harm that is likely to result to the party against whom the measure is directed if the measure is granted; and

(b) There is a reasonable possibility that the requesting party will succeed on the merits of the claim, provided that any determination on this possibility shall not affect the discretion of the arbitral tribunal in making any subsequent determination.

(2) With regard to a request for an interim measure under article 17 (2)(d), the requirements in paragraphs (1)(a) and (b) of this article shall apply only to the extent the arbitral tribunal considers appropriate.

Section 2—Preliminary orders

Article 17 ter—Applications for preliminary orders and conditions for granting preliminary orders

(1) Unless otherwise agreed by the parties, a party may, without notice to any other party, make a request for an interim measure together with an application for a preliminary order directing a party not to frustrate the purpose of the interim measure requested.

(2) The arbitral tribunal may grant a preliminary order provided it considers that prior disclosure of the request for the interim measure to the party against whom it is directed risks frustrating the purpose of the measure.

(3) The conditions defined under article 17 bis apply to any preliminary order, provided that the harm to be assessed under article 17 bis, paragraph (1)(a), is the harm likely to result from the order being granted or not.

Article 17 quater—Specific regime for preliminary orders

(1) Immediately after the arbitral tribunal has made a determination in respect of an application for a preliminary order, the arbitral tribunal shall give notice to all parties of the request for the interim measure, the application for the preliminary order, the preliminary order, if any, and all other communications, including by indicating the content of any oral communication, between any party and the arbitral tribunal in relation thereto.

(2) At the same time, the arbitral tribunal shall give an opportunity to any party against whom a preliminary order is directed to present its case at the earliest practicable time.

(3) The arbitral tribunal shall decide promptly on any objection to the preliminary order.

(4) A preliminary order shall expire after twenty days from the date on which it was issued by the arbitral tribunal. However, the arbitral tribunal may issue an interim measure adopting or modifying the preliminary order, after the party against whom the preliminary order is directed has been given notice and an opportunity to present its case.

(5) A preliminary order shall be binding on the parties but shall not be subject to enforcement by a court. Such a preliminary order does not constitute an award.

Section 3—Provisions applicable to interim measures and preliminary orders

Article 17 quinquies—Modification, suspension, termination

The arbitral tribunal may modify, suspend or terminate an interim measure or a preliminary order it has granted, upon application of any party or, in exceptional circumstances and upon prior notice to the parties, on the arbitral tribunal's own initiative.

Article 17 sexies—Provision of security

(1) The arbitral tribunal may require the party requesting an interim measure to provide appropriate security in connection with the measure.

(2) The arbitral tribunal shall require the party applying for a preliminary order to provide security in connection with the order unless the arbitral tribunal considers it inappropriate or unnecessary to do so.

Article 17 septies—Disclosure

(1) The party requesting an interim measure shall promptly disclose any material change in the circumstances on the basis of which the measure was requested or granted.

(2) The party applying for a preliminary order shall disclose to the arbitral tribunal all circumstances that are likely to be relevant to the arbitral tribunal's determination whether to grant or maintain the order, and such obligation shall continue until the party

against whom the order has been requested has had an opportunity to present its case. Thereafter, the applying party shall have the same disclosure obligation with respect to the preliminary order that a requesting party has with respect to an interim measure under paragraph (1) of this article.

Article 17 octies—Costs and damages

The party requesting an interim measure or applying for a preliminary order shall be liable for any costs and damages caused by the measure or the order to any party if the arbitral tribunal later determines that, in the circumstances, the measure or the order should not have been granted. The arbitral tribunal may award such costs and damages at any point during the proceedings.

Section 4 - Recognition and enforcement of interim measures

Article 17 novies—Recognition and enforcement

(1) An interim measure issued by an arbitral tribunal shall be recognized as binding and, unless otherwise provided by the arbitral tribunal, enforced upon application to the competent court, irrespective of the country in which it was issued, subject to the provisions of article 17 decies.

(2) The party who is seeking or has obtained recognition or enforcement of an interim measure shall promptly inform the court of any termination, suspension or modification of that interim measure.

(3) The court of the State where recognition or enforcement is sought may, if it considers it proper, order the requesting party to provide appropriate security if the arbitral tribunal has not already made a determination with respect to security or where such a decision is necessary to protect the rights of third parties.

Article 17 decies—Grounds for refusing recognition or enforcement*

- (1) Recognition or enforcement of an interim measure may be refused only:
 - (a) at the request of the party against whom it is invoked if the court is satisfied that:
 - (i) such refusal is warranted on the grounds set forth in article 36, paragraphs (1) (a)(i), (ii), (iii) or (iv); or
 - (ii) the arbitral tribunal's decision with respect to the provision of security in connection with the interim measure issued by the arbitral tribunal has not been complied with; or
 - (iii) the interim measure has been terminated or suspended by the arbitral tribunal or, where so empowered, by the court of the State in which the arbitration takes place or under the law of which that interim measure was granted; or

* The conditions set forth in article 17 decies are intended to limit the number of circumstances in which the court may refuse to enforce an interim measure. It would not be contrary to the level of harmonization sought to be achieved by these model provisions if a State were to adopt fewer circumstances in which enforcement may be refused.

(b) if the court finds that:

(i) the interim measure is incompatible with the powers conferred upon the court unless the court decides to reformulate the interim measure to the extent necessary to adapt it to its own powers and procedures for the purposes of enforcing that interim measure and without modifying its substance; or

(ii) any of the grounds set forth in article 36, paragraphs (1)(b)(i) or (ii) apply to the recognition and enforcement of the interim measure.

(2) Any determination made by the court on any ground in paragraph (1) of this article shall be effective only for the purposes of the application to recognize and enforce the interim measure. The court where recognition or enforcement is sought shall not, in making that determination, undertake a review of the substance of the interim measure.

Section 5—Court-ordered interim measures

Article 17 undecies—Court-ordered interim measures

The court shall have the same power of issuing interim measures for the purposes of and in relation to arbitration proceedings whose place is in the country of the court or in another country as it has for the purposes of and in relation to proceedings in the courts and shall exercise that power in accordance with its own rules and procedures insofar as these are relevant to the specific features of an international arbitration.

Other provision of the Arbitration Model Law to be amended

Article 1, paragraph (2) of the Model Law

(2) The provisions of this Law, except articles 8, 9, 17 novies, 17 decies, 17 undecies, 35 and 36, apply only if the place of arbitration is in the territory of this State.

Annex II

Revised legislative provisions on the form of arbitration agreement

(1) Revised draft article 7

Article 7. Definition and form of arbitration agreement

(1) ‘Arbitration agreement’ is an agreement by the parties to submit to arbitration all or certain disputes which have arisen or which may arise between them in respect of a defined legal relationship, whether contractual or not. An arbitration agreement may be in the form of an arbitration clause in a contract or in the form of a separate agreement.

(2) The arbitration agreement shall be in writing.

(3) An arbitration agreement is in writing if its [terms are] [content is] recorded in any form, whether or not the arbitration agreement or contract has been concluded orally, by conduct, or by other means.

(4) The requirement that an arbitration agreement be in writing is met by an electronic communication if the information contained therein is accessible so as to be useable for subsequent reference; “Electronic communication” means any communication that the parties make by means of data messages; “Data message” means information generated, sent, received or stored by electronic, magnetic, optical or similar means, including, but not limited to, electronic data interchange (EDI), electronic mail, telegram, telex or telecopy .

(5) Furthermore, an arbitration agreement is in writing if it is contained in an exchange of statements of claim and defence in which the existence of an agreement is alleged by one party and not denied by the other.

(6) The reference in a contract to any document containing an arbitration clause constitutes an arbitration agreement in writing, provided that the reference is such as to make that clause part of the contract

(2) Alternative proposal

Article 7. Definition of arbitration agreement

‘Arbitration agreement’ is an agreement by the parties to submit to arbitration all or certain disputes which have arisen or which may arise between them in respect of a defined legal relationship, whether contractual or not.

Other provision of the Arbitration Model Law to be amended

Article 35, paragraph (2) of the Model Law

The party relying on an award or applying for its enforcement shall supply the original award or a certified copy thereof. If the award is not made in an official language of this State, the court may request the party to supply a certified translation thereof into such language.

Annex III

Draft declaration regarding the interpretation of article II, paragraph (2), and article VII, paragraph (1), of the New York Convention

“Declaration regarding interpretation of article II, paragraph (2), and article VII, paragraph (1), of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards, done at New York, 10 June 1958

“The United Nations Commission on International Trade Law,

“[1] *Recalling* resolution 2205 (XXI) of the General Assembly of 17 December 1966, which established the United Nations Commission on International Trade Law with the object of promoting the progressive harmonization and unification of the law of international trade,

“[2] *Conscious* of the fact that the different legal, social and economic systems of the world, together with different levels of development are represented in the Commission,

“[3] *Recalling* successive resolutions of the General Assembly reaffirming the mandate of the Commission as the core legal body within the United Nations system in the field of international trade law to coordinate legal activities in this field,

“[4] *Conscious* of its mandate to further the progressive harmonization and unification of the law of international trade by, inter alia, promoting ways and means of ensuring a uniform interpretation and application of international conventions and uniform laws in the field of the law of international trade,

“[5] *Convinced* that the wide adoption of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards has been a significant achievement in the promotion of the rule of law, particularly in the field of international trade,

“[6] *Recalling* that the Conference of Plenipotentiaries which prepared and opened the Convention for signature adopted a resolution, which states, inter alia, that the Conference ‘considers that greater uniformity of national laws on arbitration would further the effectiveness of arbitration in the settlement of private law disputes’,

“[7] *Bearing in mind* differing interpretations of the form requirements under the Convention that result in part from differences of expression as between the five equally authentic texts of the Convention,

“[8] *Taking into account* article VII, paragraph (1), of the Convention, a purpose of which is to enable the enforcement of foreign arbitral awards to the greatest extent, in particular by recognizing the right of any interested party to avail itself of law or treaties of the country where the award is sought to be relied upon, including where such law or treaties offer a regime more favourable than the Convention,

“[9] *Considering* the wide use of electronic commerce,

“[10] *Taking into account* international legal instruments, such as the 1985 UNCITRAL Model Law on International Commercial Arbitration, as subsequently revised, particularly with respect to article 7, the UNCITRAL Model Law on Electronic Commerce, the UNCITRAL Model Law on Electronic Signatures and the United Nations Convention on the Use of Electronic Communications in International Contracts,

“[11] *Also taking into account* enactments of domestic legislation, including case law, more favourable than the Convention in respect of form requirement governing arbitration agreements, arbitration proceedings and the enforcement of arbitral awards,

“[12] *Considering* that, in interpreting the Convention, regard is to be had to the need to promote recognition and enforcement of arbitral awards,

“[13] *Recommends* that article II, paragraph (2), of the Convention be applied recognizing that the circumstances described therein are not exhaustive,

“[14] *Recommends* that article VII, paragraph (1), of the Convention should be applied to allow any interested party to avail itself of rights it may have, under the law or treaties of the country where an arbitration agreement is sought to be relied upon, to seek recognition of the validity of such an arbitration agreement.”

Introduction

1. At its thirty-second session (Vienna, 17 May-4 June 1999), the Commission had before it a note entitled “Possible future work in the area of international commercial arbitration” (A/CN.9/460; this document is available, along with all other documents of UNCITRAL listed hereafter, on the UNCITRAL website at www.uncitral.org). One of the topics raised for consideration was the extent to which modernization of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards (New York, 1958) (hereafter referred to as “the New York Convention”) was needed in respect of the formation of the arbitration agreement.¹ The Commission decided that future work on article II(2)² (hereafter referred to as “article II(2)”) of the New York Convention which required that the arbitration agreement be in written form “in a contract or an arbitration agreement signed by the parties or contained in an exchange of letters or telegrams” needed to be modernized.³ The Commission felt that work might be needed on two general issues addressed in the note by the Secretariat (A/CN.9/460, paras. 22-31), namely the issue of the written form requirement and its implications with respect to modern means of communication and electronic commerce, and the issue of consent by the parties to an arbitration agreement where the arbitration agreement was not embodied in an exchange of letters or telegrams.⁴ As well, the Commission pointed out that special attention might need to be given to specific fact situations that posed serious problems under the New York Convention, including tacit or oral acceptance of a written purchase order or a written sales confirmation, an orally concluded contract referring to written general conditions or certain brokers’ notes and other instruments or contracts transferring rights or obligations to non-signing third parties.⁵

2. Various views were expressed as to the means through which modernization of the New York Convention could be sought,⁶ including: by way of additional protocol;⁷ indirectly revising article II(2) by adopting model legislation to supersede that article in

¹ *Official Records of the General Assembly, Fifty-fourth Session, Supplement No. 17, A/54/17*, para. 344.

² Article II of the New York Convention reads as follows:

“1. Each Contracting State shall recognize an agreement in writing under which the parties undertake to submit to arbitration all or any differences which have arisen or which may arise between them in respect of a defined legal relationship, whether contractual or not, concerning a subject matter capable of settlement by arbitration.

“2. The term ‘agreement in writing’ shall include an arbitral clause in a contract or an arbitration agreement, signed by the parties or contained in an exchange of letters or telegrams.

“3. The court of a Contracting State, when seized of an action in a matter in respect of which the parties have made an agreement within the meaning of this article, shall, at the request of one of the parties, refer the parties to arbitration, unless it finds that the said agreement is null and void, inoperative or incapable of being performed.”

³ *Official Records of the General Assembly, Fifty-fourth Session, Supplement No. 17, A/54/17*, para. 344.

⁴ *Ibid.*, para. 345.

⁵ *Ibid.*, para. 346.

⁶ *Ibid.*, paras. 347-349.

⁷ *Ibid.*, para. 347; some concern was expressed as to the status of such a protocol and the possibility that any attempt to revise the New York Convention might jeopardize the results achieved to date by the New York Convention. In response to that concern, it was pointed out that the very success of the New York Convention (...) should make it possible for UNCITRAL to undertake a limited overhaul of the text if such work was needed to adapt its provisions to changing business realities.

reliance of the more favourable law provision of article VII(1)⁸ (hereafter referred to as “article VII(1)”) of the New York Convention;⁹ additionally to such model legislation, by preparing guidelines or other non-binding materials to guide State courts in the application of the New York Convention;¹⁰ or by drafting a new convention separate from the New York Convention to deal with those situations which arose outside the sphere of application of the New York Convention, including (but not necessarily limited to) situations where the arbitration agreement failed to meet the form requirement established in article II(2).¹¹

3. The Commission referred the issues to the Working Group on Arbitration,¹² which studied the issues at its thirty-second session (Vienna, 20-31 March 2000).

4. At its thirty-second session, the Working Group discussed possible alternative ways of achieving a broader interpretation of article II(2), as had been outlined by the Commission, by either: (a) adopting a declaration, resolution or statement addressing the interpretation of the New York Convention and providing that, for the avoidance of doubt, article II(2) was intended to cover certain situations or to have a certain effect; or (b) encouraging a broader interpretation of the New York Convention by following the approach of some State courts of interpreting article II(2) in the light of the UNCITRAL Model Law on International Commercial Arbitration¹³ (hereafter “the UNCITRAL Arbitration Model Law”); or (c) preparing practice guidelines or notes which could set out the use of article 7 of the UNCITRAL Arbitration Model Law as an interpretation tool to

⁸ Article VII of the New York Convention reads as follows:

“1. *The provisions of the present Convention shall not affect the validity of multilateral or bilateral agreements concerning the recognition and enforcement of arbitral awards entered into by the Contracting States nor deprive any interested party of any right he may have to avail himself of an arbitral award in the manner and to the extent allowed by the law or the treaties of the country where such award is sought to be relied upon.*

“2. *The Geneva Protocol on Arbitration Clauses of 1923 and the Geneva Convention on the Execution of Foreign Arbitral Awards of 1927 shall cease to have effect between Contracting States on their becoming bound and to the extent that they become bound, by this Convention.*”

⁹ Ibid., para. 348; it was noted that such a solution could be pursued only if article II(2) were no longer to be interpreted as a uniform rule establishing the minimum requirement of writing, but would instead be understood as establishing the maximum requirement of form. It was also suggested that any model legislation that might be prepared with respect to the formation of the arbitration agreement might include a provision along the lines of article 7 of the United Nations Convention on Contracts for the International Sale of Goods (Vienna, 1980) to facilitate interpretation by reference to internationally accepted principles (see as well paras. 26 to 30 and footnote 59 of this document).

¹⁰ Ibid.

¹¹ Ibid., para. 349; whilst some support was expressed in favour of this suggestion, another view was that experience indicated that the process of adopting and securing widespread ratification of a new convention could take many years and that, meanwhile, there would be an undesirable lack of uniformity. It was stated that the suggested approach might be particularly suited to deal with a number of specific fact situations that posed serious problems under the New York Convention (see para. 1 of this document). However, with respect to a number of these situations (for example, transfer of rights or obligations to non-signing third parties), it was widely felt that the issues at stake went to general questions regarding the substance and validity of the underlying transaction. Accordingly, doubts were expressed as to whether it would be desirable and feasible to attempt to deal with those issues in the context of a set of provisions geared primarily to the formation of the arbitration agreement.

¹² Ibid., paras. 344-350 and para. 380.

¹³ A/CN.9/WG.II/WP.108/Add.1, para. 36, and its footnote 9.

clarify the application of article II(2), along the lines discussed in paragraphs 33 and 34 of document A/CN.9/WG.II/WP.108/Add.1.

5. The view that prevailed at the thirty-second session of the Working Group was that, since formally amending or creating a protocol to the New York Convention was likely to exacerbate the existing lack of harmony in interpretation and that adoption of such a protocol or amendment by a number of States would take a significant number of years and, in the interim, create more uncertainty, that approach was essentially impractical. Taking the view that guidance on interpretation of article II(2) would be useful in achieving the objective of ensuring uniform interpretation that responded to the needs of international trade, the Working Group decided that a declaration, resolution or statement addressing the interpretation of the New York Convention that would reflect a broad understanding of the form requirement should be further studied to determine the optimal approach.¹⁴

6. At its thirty-third (Vienna, 20 November-1 December 2000) and thirty-fourth (New York, 21 May-1 June 2001) sessions, the Working Group discussed preliminary drafts of an interpretative declaration relating to article II(2).¹⁵

7. At its thirty-sixth session (New York, 4-8 March 2002), the Working Group had before it the text of the draft declaration as adopted at its thirty-fourth session¹⁶ and reassessed the various options available to deal with difficulties that had arisen in the practical application of article II(2), before considering the revised draft interpretative declaration.

8. The Working Group considered at length the various arguments that were put forward in support of proposals to amend the New York Convention and the adoption of the interpretative declaration.¹⁷ The Working Group acknowledged that it could not, at that stage, reach a consensus on whether to prepare an amending protocol or an interpretative declaration to the New York Convention and that both options should be kept open for consideration by the Working Group or the Commission at a later stage. In the meantime, the Working Group agreed that it would be useful to offer guidance on interpretation and application of the form requirement in the New York Convention with a view to achieving a higher degree of uniformity. A valuable contribution to that end could be made in the guide to enactment of the draft text revising article 7 of the UNCITRAL Arbitration Model Law, which the Secretariat was requested to prepare for future consideration by the Working Group, by establishing a “friendly bridge” between the new provisions of the UNCITRAL Arbitration Model Law and the New York Convention, pending a final decision by the Working Group on how to best deal with the application of article II(2).¹⁸

9. While no objections were raised to that course of action, the view was expressed that the mere fact of attempting to address the matter in a guide to enactment of the new draft article 7 of the UNCITRAL Arbitration Model Law could prejudice the consideration of a possible amending protocol to the New York Convention. Raising issues related to the New York Convention in a guide to enactment, i.e., an ancillary text of questionable legal value, appended to a new provision of the UNCITRAL Arbitration Model Law, which

itself was not a mandatory instrument, was said to be a counterproductive exercise. It was stated that it would be preferable not to attempt to address in any way the issues raised by the interpretation of the form requirement under the New York Convention. The Working Group took note of those comments.¹⁹

10. Exploring how courts have defined what constitutes an agreement in writing in the New York Convention may assist in identifying divergent court interpretations regarding the form of an arbitration agreement. This note considers how State courts have interpreted the form requirements in article II(2) and explores the extent to which article VII(1) of the New York Convention might assist in modernising the form requirement for arbitration agreements.

I. Interpretation of article II(2) of the New York Convention by State courts

A. Interpretation of the terms “signature”, “exchange of documents”

General remark

11. Article II(2) provides a definition of a term included in article II(1) of the New York Convention, which requires that Contracting States recognize “an agreement in writing”. Article II(2) provides for two possible ways of satisfying the requirement of “writing”, also known as the “form requirement”. The first is where an arbitration clause in a contract or an arbitration agreement is signed by the parties. The second is where an arbitration clause in a contract or an arbitration agreement is contained in an exchange of letters or telegrams. By requiring either a signature or an exchange of documents, the form requirement ensures that the parties’ assent to arbitration is expressly recorded.

Signature or exchange of documents strictly required

12. In a number of cases, State courts strictly applied the requirements defined under article II(2) and granted enforcement of arbitral awards only when either the contract containing the arbitration clause or the arbitration agreement was signed by the parties²⁰ or was contained in an exchange of letters or telegrams.²¹ In a series of cases, State courts strictly required express acceptance, either by signature or exchange of documents by both parties.²² However, the principle did not appear to require that the arbitration clause be separately approved in writing²³ or be specifically discussed by the parties.²⁴ At least one court concluded that the form requirement must not be derogated from, even in situations where a finding that an arbitration agreement did not satisfy the form requirement of article II(2) would be contrary to principles of good faith.²⁵ These requirements prevailed over more or less demanding requirements of national laws (see below, paragraph 32).²⁶

¹⁹ Ibid., para. 50.

²⁰ Norway, Halogaland Court of Appeal, 16 August 1999, (Stockholm Arbitration Report, (1999), Vol 2, at 121): *the court considered that a contract concluded by an exchange of e-mails by reference to the GENCON charter party did not constitute an arbitration agreement in writing in accordance to article II(2) of the New York Convention. The court concluded that the e-mails exchanged together with the copy of the GENCON charter, which was not signed, failed to meet the “basic requirements of legal protection set up by the Convention”*; The Netherlands, Court of First Instance of Dordrecht, North American Soccer League Marketing, Inc. (USA) v. Admiral International Marketing and Trading BV (Netherlands) and Frisol Eurosport BV

- (Netherlands), 18 August 1982, (Yearbook Commercial Arbitration X (1985), p. 490); Germany, Brandenburg Court of Appeal, 13 June 2002, (No. 8, Sch 2/01); Spain, Supreme Court, Delta Cereales España SL (Spain) v. Barredo Hermanos SA, 6 October 1998, (Yearbook Commercial Arbitration XXVI (2001), p. 854): *the enforcement of the arbitral award was not granted as the document supplied by the parties, containing the arbitration clause, was not signed.*
- ²¹ The Netherlands, Court of Appeal, Hertogenbosh, Sneek Hardhout Import BV (Netherlands) v. Karl Schlueter KG (GmbH & Co) (Germany), 14 July 1995, (Yearbook Commercial Arbitration XXI (1996), p. 643): *an arbitration agreement, contained in general terms of contract, signed by one party and faxed to the other party, who signed and faxed the document back, was held to be valid*; Austria, Supreme Court, 22 May 1991, (OGH 22.5.1991, 3 Ob 73/91, SZ 64/61): *in relation to article V(1), a court found that enforcement might (upon application of the party opposing enforcement) be denied if the form requirements "exclusively and exhaustively contained in article II(2)" were not met*; United States, District Court for the Southern District of New York, Sen Mar, Inc. v. Tiger Petroleum Corporation (1991) (774 F Supp. 879): *the court decided that an arbitration clause was enforceable under the New York Convention only if it was found in a signed written document or an exchange of letters; there was no enforceable agreement in that case because the arbitration agreement was contained only in a telex that was objected to in its entirety by the other party.*
- ²² United States, District Court for the Western District of Washington, Richard Bothell and Justin Bothell, d/b/a Atlas Technologies and Atlas Bimetals Labs Inc. v. Hitachi Zosen Corp et al, 19 May 2000 (97 F Supp 2d 1048): *the court considered that there was no indication on the face of the purchase orders or any other document exchanged between the parties of an agreement to arbitrate.*
- ²³ Italy, Supreme Court, Krauss Maffei Verfahrenstechnik GmbH (Germany) v. Bristol Myers Squibb (Italy), 10 March 2000, (Yearbook Commercial Arbitration XXVI (2001), p. 816): *the court declared that it was not necessary for the arbitration clause to be separately approved in writing but that such clause was valid when contained in a document signed by both contracting parties: "once it is clear that the parties must sign the arbitration clause and that their unequivocal intention to refer the dispute to arbitrators must appear unambiguously, it follows that an arbitration clause is not valid when it is contained (...) in the documents (...) signed by the foreign seller, and it does not appear in the document (...) by which the buyer accepted the seller's offer".*
- ²⁴ Korea, Supreme Court, Kukje Sangsa Co Ltd (Korea) v. GKN International Trading (London) Ltd (UK), 10 April 1990, (Yearbook Commercial Arbitration XVII (1992), p. 568): *the court held that the form requirement of article II(2) was fulfilled when a sales contract was concluded by accepting purchase orders in accordance with the terms as stated therein including an arbitration clause; the court denied the argument of the defendant that the arbitration clause was not accepted because it was printed in smaller letters than the other terms and conditions and was not discussed by the parties.*
- ²⁵ Italy, Supreme Court, Robobar Limited (UK) v. Finncold sas (Italy) 28 October 1993, (Yearbook Commercial Arbitration XX (1995), p. 739): *the argument that it would be contrary to good faith to contest the validity of the arbitration clause was rebutted on the basis that formal requirements could not be derogated from.*
- ²⁶ Austria, Supreme Court, 22 May 1991, (OGH 22.5.1991, 3 Ob 73/91, SZ 64/61): *in relation to article V(1), a court found that enforcement might (upon application of the party opposing enforcement) be denied if the writing requirements which were "exclusively and exhaustively contained in article II(2)" were not met*; Germany, OLG Schleswig, 30 March 2000, (16 SchH 05/99): *the court stated that article II(2) superseded any national law with respect to formal requirements and the principle of autonomous interpretation meant that national law could not be applied to the interpretation and scope of the arbitration agreement*; Switzerland, Supreme Court, Insurance Company (Sweden) v. Reinsurance Company (Switzerland), 21 March 1995 (Yearbook Commercial Arbitration XXII (1997), p. 800): *the court stated that formal requirements were to be exclusively determined by article II(2), which should be interpreted independently, without assistance of national law*; Germany, OLG Koeln, 22 June 1999, (9 Sch 08/99): *the court held that the form requirement of article II(2) was fulfilled when*

Combination of alternative form requirements

13. Besides situations where both parties had signed the same document,²⁷ State courts have also concluded there to be a signature where there was a combination of alternative form requirements, recognizing the validity of an arbitration agreement when both parties had fulfilled either the signature or the exchange requirement but not to be met where only one party complied with the writing requirement.²⁸ Based on the notion that there must be a mutual agreement to arbitrate, either by signature or by exchange of documents, courts generally ruled out oral arbitration agreements,²⁹ even if confirmed by the other party in writing, or even if there was subsequent appearance by both parties before the arbitrator,³⁰ tacit acceptance³¹ or performance of the contract.³² As well, it did not allow for recognition of an arbitration agreement by regular prior use of general conditions of trade.³³

Diverging interpretations of the signature requirement

14. The requirement of signatures under article II(2) has not been interpreted consistently by State courts. Diverging interpretations in that respect may be found in decisions of State courts in the United States, which considered, in certain cases, that the requirement for signature or exchange, contained in article II(2), applied only to an arbitration agreement as distinct from the contract and not to an arbitration clause in a

parties signed a contract containing an arbitration clause.

²⁷ Austria, Supreme Court (OGH), 21 February 1978, 3 Ob 120/77, SZ 51/18 (Yearbook Commercial Arbitration X (1985), p. 418).

²⁸ Austria, Supreme Court, 7 November 1979, (OGH 7.11.1979, 3 Ob 144/79, SZ 52/160); Italy, Supreme Court, Universal Peace Shipping Enterprises SA (Panama) v. Montedipe SpA (Italy), 28 March 1991 (Yearbook Commercial Arbitration XVII (1992) p. 562): *the court held that an oral contract for sale and a bill of lading which included an arbitration clause sent by one party but not signed did not satisfy the form requirement of article II(2) of the New York Convention.*

²⁹ Italy, Supreme Court, Marc Rich & Co AG v. Societa Italiana Impianti SpA, 25 January 1991, (Yearbook Commercial Arbitration XVII (1992), p. 554 and decision of the Court of Justice of the European Community, dated 25 July 1991, p. 233): *the contract was concluded by an exchange of telexes; since a later telex by Marc Rich stating further terms of the contract including an arbitration clause was not replied to, and accepted by, Impianti, the court found that there was no proof of a mutual written agreement to arbitrate and thus the Italian courts had jurisdiction to hear the case; the Court held that "as far as arbitration clauses for foreign arbitration are concerned, the written form is always required under the New York Convention."*

³⁰ Germany, OLG Duesseldorf (1971) (Yearbook Commercial Arbitration II (1977), p. 237).

³¹ Germany, OLG Rostock, 22 November 2001, (1 Sch 03/2000); Italy, Supreme Court, Marc Rich & Co AG v. Societa Italiana Impianti SpA, 25 January 1991, (Yearbook Commercial Arbitration XVII (1992), p. 554).

³² Italy, Supreme Court, Robobar Limited (UK) v. Finncold sas (Italy) 28 October 1993, (Yearbook Commercial Arbitration XX (1995), p. 739).

³³ The Netherlands, Court of Appeal at The Hague, James Allen (Ireland) Ltd v. Marea Producten B.V. (Netherlands), 17 February 1984, (Yearbook Commercial Arbitration X (1985), p. 485): *the parties had conducted at least 25 prior transactions in accordance with standard conditions which included an arbitration clause; the last transaction, subject to the dispute, did not refer to those standard conditions and the court decided that regular prior use of general conditions of trade (containing an arbitration clause) could not constitute an enforceable arbitration agreement in a case where those general conditions had not specifically been referred to; the court stated that the requirement of the "agreement in writing" referred to in the New York Convention foreclosed the possibility of invoking such continuous use.*

contract.³⁴ According to that interpretation, article II(2) would consist of two separate regimes, one being “an arbitration clause in a contract” and the other “an arbitration agreement (a) signed by the parties or (b) contained in an exchange of letters or telegrams”. That reasoning had been subsequently followed in a first instance judgement, where the court considered that unsigned purchase orders represented an “arbitral clause in a contract” and as such, were not caught by the requirements of signature or exchange.³⁵ However, it should be noted that that interpretation was reversed on appeal,³⁶ and had not been widely followed in the United States, or by courts of other States. In other cases, State courts affirmed that the definition of “agreement in writing” required that such an agreement, whether it was an arbitration clause or agreement contained in a contract, be signed by the parties or contained in a series of letters or telegrams exchanged by the parties.³⁷

³⁴ United States, Court of Appeals for the fifth Circuit, *Sphere Drake Insurance plc v. Marine Towing, Inc.*, 23 March 1994, (16 F 3d 666, Yearbook Commercial Arbitration XX (1995), p. 937): *that case involved an insurance contract that was not signed by the insured party. The insured contended that because it did not sign the contract, there was no “agreement in writing” within the meaning of the New York Convention; to be enforceable under the New York Convention, either the contract containing the arbitration clause had to be signed by the parties, or the parties had to demonstrate their assent thereto by an exchange of correspondence. The court rejected that interpretation and ruled that the New York Convention’s definition of “agreement in writing” included either (1) an arbitration clause in a contract or (2) an arbitration agreement (a) signed by the parties or (b) contained in an exchange of letters or telegrams. In reaching its decision, the court cited, but declined to follow the decision from the US District Court for the Southern District of New York, Sen Mar, Inc v. Tiger Petroleum Corporation (1991)(774 F Supp. 879), which had taken a contrary view of the interpretation of article II(2).*

The Sphere Drake (1994) interpretation was followed in Stony Brook Marine Transportation Corporation v. Leslie Wilton, Compagnie d’Assurances Maritimes Aeriennes et Terrestres and Lev A. Osman (1996) 94 CV 5880 (JS) involving an arbitration clause contained in an insurance certificate issued after the loss occurred and unsigned by the insured, but referred to in a written order slip prepared by the insured’s agent and signed by the underwriter. The Sphere Drake (1994) interpretation apparently also influenced the US District Court of Minnesota in Polytek Engineering v. Jacobson Companies and Jacobson Inc. (1997) 984 F Supp 1238 (although it did not explicitly mention the case, it came to the conclusion that an unsigned purchase order that twice referred to an attached contract containing an arbitration clause, which was partially performed by the party trying to avoid arbitration, fulfilled the writing requirement).

³⁵ United States, District Court, *Kahn Lucas Lancaster, Inc. v. Lark International Ltd* (11 August 1997) (No. 95 CIV 10506): *the court followed Sphere Drake Insurance plc v. Marine Towing, Inc. and declined to follow Sen Mar Inc. v. Tiger Petroleum Corp. : the case involved purchase orders performed by the defendant but not signed by it; the court considered that “an arbitral clause in a contract is sufficient to implicate the New York Convention; an ‘agreement in writing’ does not necessarily have to be either signed by the parties or contained in an exchange of letters or telegrams, as long as the court is otherwise able to find an arbitral clause in a contract.” On appeal (see footnote 36 below), that interpretation of article II(2) was rejected.*

³⁶ United States, Court of Appeals for the second Circuit, *Kahn Lucas Lancaster, Inc. v. Lark International Ltd*, 29 July 1999 (186 F 3d 210): *the court stated that the definition of “agreement in writing” required that such an agreement, whether it was an arbitration agreement or an arbitration clause in a contract, be signed by the parties or contained in a series of letters or telegrams exchanged by the parties.*

³⁷ *The reasoning in the Kahn Lucas appeal case has been followed in subsequent cases by the US District Court of Connecticut, Coutinho Caro & Co USA Inc v. Marcus Trading Inc.,*

Diverging interpretations of the exchange of documents requirement

15. The requirement of exchange of documents between the parties has not been interpreted consistently by State courts. Certain State courts interpreted strictly the word “exchange” to mean that the document containing the arbitration clause or agreement should be returned by the party to which it was sent to the party, which sent it initially.³⁸ According to that trend of case law, the requirement that there be an “exchange”, and therefore a written offer of a contract containing an arbitration clause, or of an arbitration agreement and a written acceptance excluded a wide range of fact situations.³⁹ In other cases, a reference to the arbitration clause or agreement in subsequent correspondence emanating from the party to which the arbitration clause or agreement was sent was considered as sufficient to meet the form requirement of article II(2).⁴⁰

B. Application of other legal principles where the form requirements are otherwise not satisfied

Reliance on the conduct of the parties (“estoppel”)

16. The question arose whether, in the case where a party acted specifically in respect of an arbitration agreement, without objection, that party was subsequently barred, for reasons of good faith, from invoking non-compliance of the arbitration agreement with the written form, as required by article II(2). No leading approach is evident from the case law.

17. In a number of decisions, State courts have recognised an arbitration agreement in the absence of writing, based on the conduct of the parties, either by reference to domestic contract law principles,⁴¹ or by considering that the permissive language in article V(1) “may be refused” allowed the courts some flexibility in the determination of whether an arbitration agreement has been validly concluded.⁴² As well, a court found that the lack of

14 March 2000, *Judy Tien Lo v. Aetna International* (2000) WL 565465 and the US District Court for the Southern District of California, in *Chloe Z Fishing Co., Inc v. Odyssey Re (London) Ltd*, 29 April 2000, 109 F Supp 2d 1236, *where the court noted the different interpretations and expressed its preference for the Kahn Lucas (1999) interpretation (as opposed to Sphere Drake (1994)), noting however that the facts of Kahn Lucas could not be transposed to the current case. A number of other cases have expressly followed the Kahn Lucas interpretation*: US District Court for the Western District of Washington, *Bothell and Bothell v. Hitachi Rosen Corporation*, 19 May 2000, (97 F Supp 2d 1048), *where the court denied a motion to stay legal proceedings on the basis of a very restrictive interpretation of exchange; the reasoning in the Kahn Lucas appeal case has been mentioned as well in the case from United Kingdom, Queen’s Bench Division, Commercial Court, XL Insurance Ltd v. Owens Corning*, 28 July 2000, 2 Lloyd’s Rep 500, (Yearbook Commercial Arbitration XXVI (2001) p. 869).

³⁸ Italy, Court of Appeal of Naples (1974) (Yearbook Commercial Arbitration I, (1976) Case No. 11, p. 193).

³⁹ A/CN.9/WG.II/WP.108/Add.1, para. 12.

⁴⁰ Italy, Court of Appeal of Florence (1977), (Yearbook Commercial Arbitration IV (1979), Case No. 29, p. 289).

⁴¹ United States, Court of Appeals, Seventh Circuit, *Mary D. Slaney (US) v. International Amateur Athletic Federation (Monaco)*, 27 March 2001, (Yearbook Commercial Arbitration XXVI (2001), p. 1091): *the court stated that non-signatories to an arbitration agreement might nevertheless be bound according to ordinary principles of contract and agency, including estoppel*.

⁴² Hong Kong, High Court, *China Nanhai Oil Joint Service Corporation Shenzhen Branch*

written form was cured by participation in arbitration without objection.⁴³ The limits of the application of this principle were however less clear with some court decisions suggesting that the acts of performance must refer directly to the arbitration agreement or allow a court to deduce that a party wished to accept the arbitration agreement.⁴⁴

Incorporation of arbitration clause or agreement by mere reference or usual commercial relations

18. The New York Convention did not address the issue of recognition of an arbitration clause or agreement that, whilst not satisfying the form requirement, was found to be incorporated into a contract or exchange of letters or telegrams by mere reference.

19. In respect of incorporation by reference, State courts found that article II(2) required that the arbitration agreement must be referred to in the main contract,⁴⁵ unless the parties had an ongoing business relation.⁴⁶ In the case of an ongoing relation, an arbitration clause was considered to be incorporated by reference even if the other party did not receive the actual term on the basis that the party was presumed to have knowledge of the arbitration clause.⁴⁷

(PR China) v. Gee Tai Holdings Co Ltd, 13 July 1994, (Yearbook Commercial Arbitration XX (1995), p. 671): *the Supreme Court analysed the doctrine of estoppel and held that the doctrine was inherent to the New York Convention.*

⁴³ Greece, Court of Appeal of Athens, Greek Company v. FR German Company, Decision No. 4458, (1984) (Yearbook Commercial Arbitration XIV (1989), p. 638): *the lack of written form was cured by participation in arbitration without objection; to reach that conclusion, the court applied the domestic law governing the arbitration proceedings (without referring to article VII(1) of the New York Convention).*

⁴⁴ Spain, Supreme Court, Delta Cereales Espana SL (Spain) v. Barredo Hermanos SA (Spain), 6 October 1998, (Yearbook Commercial Arbitration XXVI (2001), p. 854): *“the court’s interpretation aims at ascertaining, from the communications and acts of the parties, whether they wished to include the arbitral clause in their contract or, in general, to submit their dispute to arbitration”; however, in that case, neither the documents supplied by Delta nor by Barredo contained an arbitration clause satisfying the requirements of article II(2) since they were not signed by the other party; Switzerland, Court of Appeal, Geneva, C Import and Export Company (PR China) v. G SA (Switzerland), 11 December 1997, (Yearbook Commercial Arbitration XXIII (1998), p. 764): *the court stated that the New York Convention allowed, apart from written and signed acts, those acts which had a less strict form but were accepted by the trade usages of the parties.**

⁴⁵ Italy, Supreme Court, Molini Lo Presti SpA (Italy) v. Continentale Italiana SpA (Italy), 2 March 1996, (Yearbook Commercial Arbitration XXII (1997), p. 734): *the reference in a contract to an arbitration clause contained in a standard agreement was considered sufficient to incorporate the arbitration clause per relationem.*

⁴⁶ France, Supreme Court, Bomar Oil N.V. (Neth. Antilles) v. Entreprise Tunisienne d’Activités Pétrolières ETAP (Tunisia), 9 November 1993 (Yearbook Commercial Arbitration XX (1995), p. 660): *exchange of telexes, which referred to “Standard Industry Practice”, “the standard contract” and “the practice in International Trade” established proof of consent to arbitration; Germany, The BayObLG, 17 September 1998 (4 Z Sch 01/98): *a contract of sale signed by the parties, which expressly incorporated “the terms and conditions printed on the other side”, including an arbitration clause, satisfied the form requirement of article II(2) since it did not refer to a separate document.**

⁴⁷ Germany, Schleswig, 30 March 2000, 16 SchH 05/99: *a contract, which referred to terms and conditions on reverse side of standard contract form, used by the parties for several years, was found to satisfy the written form notwithstanding that the reverse page of the contract never reached the other party; Switzerland, Federal Supreme Court, Tradax Export S.A. (Panama) v*

20. A number of cases have taken an even broader approach finding that incorporation by reference might be found even if the arbitration clause was not in the main contract, provided there was some written reference to the document containing that clause and that the party against whom it was invoked was aware of the contents of the document when concluding the contract and accepted the incorporation of the document in the contract.⁴⁸

In another case, noting that the New York Convention reinforced a strong policy in favour of arbitration over litigation and that this policy applied with special force in the field of international commerce, the court stated that, despite the fact that the parties did not sign

Amoco Iran Oil Company (US), 7 February 1984, (Yearbook Commercial Arbitration XI (1986), p. 532): *the Court stated that article II(2) was silent on the question of incorporation by reference and that there was no harmonised solutions to that question; a charter party contained a valid arbitration clause and the question was whether the arbitration clause was also incorporated by the reference to the charter party in the bill of lading; in the case at hand, well-established commercial companies were involved, which were familiar with the use of standard terms of charter parties; thus, the court came to the conclusion that, since the bill of lading referred to the totality of the clauses and conditions contained in the charter party to which also the arbitration clause belonged and due to the experience of the parties involved, it could be assumed that the defendant (belonging to the Amoco group) knew or should have known the respective aspects of the carriage contract; the court held that the arbitration clause was therefore valid.*

- ⁴⁸ France, Supreme Court, Bomar Oil N.V. (Neth. Antilles) v. Entreprise Tunisienne d'Activités Pétrolières ETAP (Tunisia), 11 October 1989, (Yearbook Commercial Arbitration XV (1990), p. 447): *the court stated that although the New York Convention did not exclude the recognition of an arbitration agreement incorporated by reference, article II(2) required "that the existence of the clause be mentioned in the main contract, unless there exists between the parties a longstanding business relationship which insures that they are properly aware of the written conditions normally governing their commercial relationships."* France, Supreme Court, Bomar Oil N.V. (Neth. Antilles) v. Entreprise Tunisienne d'Activités Pétrolières ETAP (Tunisia), 9 November 1993, (Yearbook Commercial Arbitration XX (1995), p. 660): *the court, without referring to the New York Convention, stated that: "in the field of international arbitration, an arbitration clause, if not mentioned in the main contract, may be validly stipulated by written reference to a document which contains it, for instance, general conditions or a standard contract, when the party against which the clause is invoked was aware of the contents of this document at the moment of concluding the contract and when it has, albeit tacitly, accepted the incorporation of the document in the contract";* Australia, Supreme Court of Queensland, Court of Appeal Division, 27 June 2000, Austin John Montague v. Commonwealth Development Corporation (UK), Appeal No. 8159, (Yearbook Commercial Arbitration XXVI (2001), p. 744): *the Supreme Court of Queensland found that signature of terms of reference as part of ICC arbitration proceedings amounted to an agreement in writing;* United States, District Court for the Eastern District of New York, USA, Stony Brook Marine Transportation Corp v. Leslie Wilton et al (1996): *the order slip drawn up by one party's agent and signed by other party's agent, which referred to an arbitration clause was considered, in the context of custom and practice of marine insurers, as incorporating by reference the arbitration clause;* Spain, Supreme Court, Consmaemma (Italy) v. Hermanos Madrid SA (Spain), 20 February 2001, (Yearbook Commercial Arbitration XXVI (2001), p. 858): *a sales confirmation document containing an ICC arbitration clause and a reference to a form, which also contained an ICC arbitration clause, was only signed by one party. The Supreme Court found that the New York Convention was applicable and that the requirements of article II(2) were met because the original contract containing an arbitration clause, together with a subsequent contract was said to show that the parties intended to submit to arbitration disputes arising under their contract.* Switzerland, Supreme Court, G S.A. (Switzerland) v. T Ltd (UK), 12 January 1989, (Yearbook Commercial Arbitration XV (1990), p. 509): *an agreement resulting from an exchange of written documents did not need to mention the arbitration clause and a general reference to a contract containing an arbitral clause was considered sufficient to meet the form requirement of article II(2).*

an arbitration agreement, the incorporation of the arbitration clause by reference in letters exchanged between the parties was sufficient.⁴⁹

21. In other cases, State courts held that the reference need not to relate specifically to the arbitration clause but rather to the contract as a whole provided that the parties had the possibility to examine the general terms, i.e. when they were printed on the back side or were known due to the regular business contact between the parties or where the parties should have known about the document due to trade usages.⁵⁰ In some cases, incorporation by reference had not been accepted because the reference was not explicit or was ambiguous according to usual practice of trade. According to other cases, if an arbitration agreement was incorporated in a document and if it was proven that the parties were bound by a contract, which included the terms of that document, no further proof of the arbitration agreement was required.⁵¹

C. New means of communication

22. The express reference to “letter or telegram” in article II(2) raised the issue of whether new means of generating and recording communications would (in addition to letters and telegrams) be considered as meeting the form requirements of article II(2). This question was answered in the affirmative by most of the State courts in respect of telexes⁵²

⁴⁹ United States Court of Appeals, Third Circuit, 20 June 2003, NO. 02-2169, (Yearbook Commercial Arbitration XXIX (2004), p. 978).

⁵⁰ Switzerland, Court of Appeal, Basel-Land, DIETF Ltd v. RF AG, 5 July 1994, (Yearbook Commercial Arbitration XXI (1996) p. 685): *a seller had sent a confirmation order to a buyer containing reference to the overleaf general business regulations which included an arbitration clause; the buyer replied by fax referring to the confirmation order and made certain requests as to the packaging of the goods etc.; the Court found that the form requirements of article II(2) were met by stating that the written acceptance did not need to refer especially to the arbitration clause but may concern the contract as a whole.*

⁵¹ United Kingdom, Court of Appeal, Zambia Steel & Building Supplies Ltd. V. James Clark & Eaton Ltd, May 16, 1986 ((1986) 2 Lloyd’s Rep. 225): *the court, referring to the 1975 English Arbitration Act stated that “once it is clear that the assent to the written terms is not required to be contained in the written agreement, but that assent to the written terms may be proven by other evidence, then (...) any evidence which proves that the party has agreed to be bound by an [arbitration] agreement (...) contained in a document or documents is sufficient to make the document or documents an [arbitration] agreement in writing (...)” The reasoning of Zambia Steel (1986) was followed in a decision by the Queen’s Bench Division of the Commercial Court, Abdullah M Fahem and Co (Yemen) v. Mareb Yemen Insurance Co and Tomen (UK) Ltd (1997) (Yearbook Commercial Arbitration XXIII (1998) p. 789) where a stay of court proceedings was sought invoking an arbitration agreement; the court cited the English Arbitration Act and held that the Act provided for a very wide meaning of the words “in writing”, which was even wider than article 7(2) of the UNCITRAL Arbitration Model Law but was said to be still consonant with article II(2); the court held that if an arbitration agreement was incorporated in a document and if it was proven that the parties were bound by a contract which included the terms of that document, no further proof of the arbitration agreement was required.*

⁵² United States, District Court for the Southern District of New York, Oriental Commercial and Shipping Co Ltd (Saudi Arabia) and Oriental Commercial and Shipping Co (UK) Ltd (UK) v. Rosseel N.V. (Belgium), 4 March 1985, (609 F Supp 75); France, Court of Appeal, Paris, Bomar Oil NV v. ETAP, 20 January 1987, (1987, rev. arb. 482); Switzerland, Federal Tribunal, G.S.A. v. T. Ltd, 12 January 1989, (Yearbook Commercial Arbitration XV (1990)); Italy, Court of Savona, Dimitros Varverakis v. Companis de Navigacion Artico SA, 26 March 1981 (Yearbook

and telefaxes.⁵³ One court stated that article II(2) could not have intended to exclude all other forms of written communications regularly utilized to conduct commerce.⁵⁴ In some cases, State courts found that, even though the form requirement meant that the arbitration agreement must exist in written form, it sufficed that the agreement was contained in a document allowing for a written proof and confirmation of the common intent of the parties.⁵⁵

23. In another case, a State court found that article II(2) should be interpreted and applied in the light of the less restrictive requirements of article 7(2) of the UNCITRAL Arbitration Model Law and article 178 of the Swiss Private International Law Act.⁵⁶ That court stated that, in the light of modern means of communication, unsigned writings play an increasingly important role and signature requirements are becoming less important and, in particular cases, specific conduct might, by virtue of the rules of good faith, substitute the form requirement. However, that interpretation was not universally accepted, and at least one court considered that an exchange of e-mail messages did not satisfy the form requirement of article II(2).⁵⁷

II. Interplay between article II(2) and article VII(1) of the New York Convention

24. The New York Convention has been described as having a “pro-enforcement” bias in that it seeks to encourage enforcement of awards in the greatest number of cases as possible. That purpose was achieved through article VII(1) by removing conditions for recognition and enforcement in national laws that were more stringent than the conditions in the New York Convention, while allowing the continued application of any national

Commercial Arbitration, X (1985)); Austria, Supreme Court, 2 May 1972, (Yearbook Commercial Arbitration X (1985)); Switzerland, Federal Supreme Court, Tracom SA v. Sudan Oil Seeds Co, 1987, (Yearbook Commercial Arbitration XII (1987)).

⁵³ United States, Court of Appeals for the Second Circuit, Titan Inc v. Guangzhou Zhen Hua Shipping Co Ltd, 15 February 2001 (241 F 3d 135); Germany, OLG Hamburg, 30 July 1998 (Yearbook Commercial Arbitration XXV (2000), p. 714): *the court found that in the light of technological developments, telexes and faxes like telegrams were to be treated as letters within the meaning of article II(2)*; Switzerland, Federal Supreme Court, Tracom S.A. (Switzerland) v. Sudan Oil Seeds Co Ltd (UK), 5 November 1985 (Yearbook Commercial Arbitration XII (1987), p. 511): *the Supreme Court found that telexes and letters to settle disputes by arbitration and appointment of an arbitrator in a telex satisfied the form requirement of article II(2)*.

⁵⁴ United States, District Court for the Southern District of California, Chloe Z Fishing Co Inc et al v. Odyssey Re (London) Ltd (2000) (109 F Supp 2d 1236).

⁵⁵ Switzerland, Court of Appeal in Basel, DIETF Ltd v RF AG (1994).

⁵⁶ Switzerland, Federal Tribunal, Compagnie de Navigation de Transports SA v. MSC Mediterranean Shipping Company SA (1995) BGE 121 III 38, ASA Bulletin 3/1995 503: *article 178 of the Federal Act of Private International Law provides as follows: “As regards form, the arbitration agreement shall be valid if made in writing, by telegram, telex, telecopy or any other means of communication which permits it to be evidenced by a text. (...)”*.

⁵⁷ Norway, Halogaland Court of Appeal, 16 August 1999, (Stockholm Arbitration Report, (1999), Vol 2, at 121): *the court considered that a contract concluded by an exchange of e-mails by reference to the GENCON charter party did not constitute an arbitration agreement in writing in accordance to article II(2) of the New York Convention. The court concluded that the e-mails exchanged together with the copy of the GENCON charter, which was not signed, failed to meet the “basic requirements of legal protection set up by the Convention”*.

provisions that gave special or more favourable rights to a party seeking to enforce an award (A/CN.9/WG.II/WP.108/Add.1, para. 21).

25. To the extent that many national laws also regulate the formal validity of the agreement to arbitrate, State courts have had to determine how such national rules relate to the form requirements of article II(2). The question whether State courts might apply their own more liberal laws under article VII(1) rather than the stricter requirements of the New York Convention raises several questions.

A. Uniform or maximum form requirement

26. The first question is whether the New York Convention should be interpreted as providing a unified form requirement with which arbitration agreements must comply under the New York Convention⁵⁸ or whether article II(2) of the New York Convention establishes a maximum requirement of form (thus leaving States free to adopt less stringent requirements)⁵⁹ (A/CN.9/WG.II/WP.108/Add.1, paras. 21-22).

27. Many domestic laws have taken a broader approach in respect of the requirements in article II(2). Also, there are indeed instances in which State courts have applied domestic law in preference to the New York Convention in order to uphold an arbitration clause,⁶⁰

⁵⁸ Switzerland, Federal Supreme Court, Tradax Export S.A. (Panama) v. Amoco Iran Oil Company (US), 7 February 1984 (Yearbook Commercial Arbitration XI (1986), p. 532) and Switzerland, Federal Supreme Court, Tracom S.A. (Switzerland) v. Sudan Oil Seeds Co. Ltd. (UK), 5 November 1985, (Yearbook Commercial Arbitration, XII (1987), p. 511): *in those cases, the court emphasized the uniform rule character of article II, stating that "article II contains rules of uniform applicability which, in cases where the Convention is applicable, replaces national law"*; OLG Schleswig, 30 March 2000, 16 SchH 05/99: *article II(2) superseded any national law with respect to formal requirements and the principle of autonomous interpretation meant that national law could not be applied for the interpretation and scope of the arbitration agreement, whether more or less strict than article II(2) concerning formal requirements*.

⁵⁹ Germany, Court of Appeal of Cologne, Danish buyer vs. German seller, 16 December 1992, (Yearbook Commercial Arbitration XXI (1996), p. 535): *the court stated that "article II(2) of the Convention does not provide for a uniform rule, as it can be deduced from article VII(1) of the Convention (...)" (See as well footnote 8 of this document.)*

⁶⁰ The Netherlands, Court of First Instance, Rotterdam, 28 September 1995, Petrasol BV (Netherlands), v. Stolt Spur Inc. (Liberia) (Yearbook Commercial Arbitration, XXII, pp. 762-765): *the Court affirmed that "the provisions of the New York Convention (particularly article II) do not preclude the application of article 1074 CCP, because of the more-favourable-law provision in article VII of the Convention, to be applied by analogy"*; India, Delhi High Court, 15 October 1993 (Suit No. 1440 of 1990 and I.A No. 5206 of 1990, D – 15-10-1993), Gas Authority of India, Ltd v. SPIE-CAPAG, SA (France), Nippon Kokan Corporation (Japan), Toyo Engineering Corporation (Japan), International Chamber of Commerce (Yearbook Commercial Arbitration XXIII, pp. 688 – 712): *the court affirmed that "the parties to an international commercial arbitration agreement can seek enforcement of an arbitral award on the basis of the domestic law instead of the Convention, notwithstanding the fact that they may have agreed to enforce the arbitration agreement under article II of the Convention. When the arbitration agreement does not result in an arbitral award capable of enforcement under the Convention, it can still be enforced under parallel domestic law of India, the Indian Arbitration Act"*; France, Supreme Court, Bomar Oil NV (Neth. Antilles) v. Entreprises Tunisiennes d'Activité Pétrolière, 9 November 1993 (Yearbook Commercial Arbitration XX (1995) p. 660); France, Court of Appeal Versailles, Bomar Oil NV (Neth. Antilles) v. Entreprises Tunisiennes d'Activité Pétrolière, 23 January 1991 (Yearbook

and a number of court decisions have, by relying on article VII(1), upheld the validity of an arbitration agreement under domestic law, which would not have been considered as valid under the New York Convention.⁶¹ In one case, the court found that “ordinary contract principles dictate when the parties are bound by a written arbitration provision absent their signatures.”⁶² In another case, the court enforced an arbitral award based on article VII(1) of the New York Convention because the form requirements of article II(2) were not met.⁶³

28. In a number of cases involving international arbitration, State courts have cited the New York Convention but then applied domestic legal principles to the question whether the arbitration agreement was valid and enforceable.⁶⁴

Commercial Arbitration XVII (1992), pp. 488-490): *the issue was addressed in the 1987 decision of the Paris Court of Appeal in Bomar Oil, in which it was held that article II(2) of the New York Convention expressed a “substantive rule which must be applied in all cases”.* That decision was then reversed by the Cour de Cassation, but this issue was not directly addressed.

⁶¹ Supreme Court (Germany), 25 May 1970, (Yearbook Commercial Arbitration 1977, p. 237); The Netherlands, Court of Appeal, The Hague, Owerri commercial Inc. (Panama) v. Dielle Srl. (Italy), 4 August 1993, (Yearbook Commercial Arbitration XIX, p. 703).

⁶² United States, District Court for the Southern District of New York, Beromun Aktiengesellschaft v. Societa Industriale Agricola “Tresse” di Dr. Domenico e Dr. Antonio dal Ferro, 3 April 1979, (41 F Supp 1163).

⁶³ Germany, OLG Koeln (1992) (Yearbook Commercial Arbitration XXI (1996), p. 535).

⁶⁴ United States, District Court for the Southern District of New York, Beromun Aktiengesellschaft v. Societa Industriale Agricola “Tresse” di Dr. Domenico e Dr. Antonio dal Ferro, 3 April 1979, (41 F Supp 1163); United States, Court of Appeals for the Second Circuit, Genesco Inc v. Kakiuchi & Co, 1 April 1987, (815 F 2d 840): *similar approaches of applying domestic law were adopted by courts:* in Jamaica Commodity Trading Company Limited v. Connell Rice & Sugar Co, Inc., United States District Court for the Southern District of New York, 24 May 1985, (85 Civ 1210) *where the court decided that, while the arbitration agreement must be in writing to be enforced, there was no requirement for a signature;* in Astor Chocolate Corporation v. Mikroverk Ltd, 20 January 1989, (704 F Supp 30 (EDNY)), *the US District Court for the Eastern District of New York held that while federal law governed the issue of the scope of an arbitration clause, state law governed the issue of whether or not the clause was part of the contract.* In Progressive Casualty Insurance Co. v. C.A. Reaseguradora Nacional de Venezuela (1993) (991 F Supp 2d 42): *the Court of Appeals for the second Circuit ignored the New York Convention and, by citing only domestic cases, found that, under New York law, the arbitration agreement was binding because it was incorporated by reference;* in Overseas Cosmos Inc v. NR Vessel Corp (1997) (97 Civ 5898), *the US District Court for the Southern District of California cited Genesco (1987) and held that it was well established that a party may be bound by an arbitration agreement even without having signed such agreement. In the absence of signatures, ordinary contract principles dictate whether the parties are bound by the agreement;* United Kingdom, Queen’s Bench Division XL Insurance Ltd v. Owens Corning, 28 July 2000 (2 Lloyd’s Rep 500, Yearbook Commercial Arbitration, XXVI (2001) p. 869); United Kingdom, Court of Appeal, Zambia Steel & Building supplies Ltd. V. James Clark & Eaton Ltd, May 16, 1986 ((1986) 2 Lloyd’s Rep. 225): *the court, referring to the 1975 English Arbitration Act, stated that “once it is clear that the assent to the written terms is not required to be contained in the written agreement, but that assent to the written terms may be proven by other evidence, then (...) any evidence which proves that the party has agreed to be bound by an [arbitration] agreement (...) contained in a document or documents is sufficient to make the document or documents an [arbitration] agreement in writing (...).”* The reasoning of Zambia Steel (1986) was followed in a decision by the Queen’s Bench Division of the Commercial Court, Abdullah M Fahem and Co (Yemen) v. Mareb Yemen Insurance Co and Tomen (UK) Ltd (1997) (Yearbook Commercial Arbitration XXIII (1998) p. 789) *where a stay of court proceedings was sought invoking an arbitration agreement; the court cited the English*

29. State courts have not always looked at the New York Convention as superseding domestic law, and certain courts applied domestic law without referring to article VII(1) of the New York Convention,⁶⁵ finding that, while an arbitration agreement must be in writing, there was no requirement for a signature and, in the absence of signature, ordinary contract principles would govern whether or not parties were bound by the arbitration agreement.⁶⁶ On that basis, a number of State courts have held that specific incorporation by reference to an arbitration clause would satisfy the form requirement by relying on principles established by the Convention on Contracts for the International Sale of Goods (Vienna, 1980)⁶⁷ or domestic legal principles⁶⁸ or the UNCITRAL Arbitration Model Law.⁶⁹ At least one court considered that an arbitration agreement existed despite the fact that none of the parties signed a written contract, “which is common practice in the trade in question”.⁷⁰

30. Where State courts have applied domestic laws instead of the New York Convention in determining the validity of an arbitration agreement, another area of uncertainty relates to the determination of the law applicable to that question. On that issue, the solutions provided by courts have varied. The formal validity of the agreement to arbitrate would be judged by applying the uniform rule of article II(2), whereas the substantive validity of the

Arbitration Act and held that the Act provided for a very wide meaning of the words “in writing” which was even wider than article 7(2) of the UNCITRAL Arbitration Model Law but was said to be still consonant with article II(2); the court held that, if an arbitration clause was incorporated in a document and if it was proven that the party was bound by an agreement which included the terms of that document, no further proof of the arbitration agreement was required.

⁶⁵ France, Supreme Court, *Societe Britannia v. Societe Jezequel et Maury*, 15 July 1987, (Rev arb. 1990, p. 627); France, Court of Appeal, Paris, France, *Societe Abilio Rodriguez v. Societe Vigelor* (1990) (Rev. arb. 1990, p. 691): *the court applied domestic law to consider valid an arbitration clause incorporated by reference in a sales confirmation letter issued by a broker.*

⁶⁶ United States, District Court for the Eastern District of New York, *Astor Chocolate Corporation v. Mikroverk Ltd* (1989) (704 F Supp 30 (EDNY)); United States, District Court for the Southern District of California, *Overseas Cosmos Inc. v. NR Vessel Corp* (1997) 97 Civ 5898 *cited Genesco* (1987); France, Supreme Court, *Bomar Oil N.V. (Neth. Antilles) v. Entreprise Tunisienne d'Activités Pétrolières ETAP* (Tunisia), 9 November 1993, (Yearbook Commercial Arbitration XX (1995) p. 660).

⁶⁷ United States, District Court for the Southern District of New York, *Filanto SpA v. Chilewich International Corp.*, 14 April 1992, (789 F Supp 1229, Yearbook Commercial Arbitration XVIII (1993), p. 530): *the court stated that any dispute falling within the New York Convention, whether brought in state or federal court, must be resolved with reference to that instrument; however, it then stated that courts in interpreting the writing requirement had generally started with the plain language of the New York Convention and had then applied the language in light of federal law, which consisted of generally accepted principles of contract law; it refused however to apply the Uniform Commercial Code but applied the United Nations Convention on Contracts for the International Sale of Goods (Vienna, 1980).*

⁶⁸ United States, Court of Appeals, Seventh circuit, *Mary D. Slaney (US) v. International Amateur Athletic Federation (Monaco)*, 27 March 2001, (Yearbook Commercial Arbitration XXVI (2001), p. 1091); United States, Court of Appeals for the Second Circuit, *Square v. Bombay*, 23 August 1999.

⁶⁹ Hong Kong, High Court, *Jiangxi Provincial Metal and Minerals Import and Export Corp v. Sulanser Company Ltd*, 6 April 1995, (Yearbook Commercial Arbitration XXI (1996), p. 546): *the court held that the definition of writing in article II(2) was not exclusive and did not bar the application of article 7(2) of the UNCITRAL Arbitration Model Law.*

⁷⁰ France, Court of Appeal, Paris SARL *Centro Stoccaggio Grani v. SA Granit*, 8 June 1995, (Rev. Arb. 89).

agreement to arbitrate might, under article V(1)(a) of the New York Convention, be determined in accordance with national laws. In certain cases, State courts have not differentiated between the formal requirement (written form) for the validity of the arbitration agreement governed by the New York Convention and the substantive requirements governed by national law, and have applied the latter to both requirements.⁷¹ Other State courts have taken the view that the validity of arbitration agreements should be determined under the law of the country where the award was made in the absence of an agreement by the parties.⁷²

B. Self-contained regime

31. The question whether the New York Convention's provisions might be combined with provisions of domestic laws had been raised mainly in relation to the application of article II(2) of the New York Convention.

32. Certain State courts have adopted the view that the New York Convention is a self-contained regime and ruled that it would be contrary to the intentions of the authors of the New York Convention if awards made on the basis of an agreement that did not comply with the New York Convention's requirements would nevertheless benefit from its regime. Applying this view, article VII(1) would not allow a party to combine the provisions of the New York Convention with those of domestic law on the enforcement of foreign award. It was said that a choice must be made to rely either on the New York Convention or on domestic law.⁷³

⁷¹ Switzerland, Swiss Federal Tribunal, *Compagnie de Navigation de Transports SA v. MSC Mediterranean Shipping Company SA* (1995) BGE 121 III 38, (ASA Bulletin 3/1995 503): *the court found that article II(2) should be interpreted and applied in the light of the less restrictive requirements of article 7(2) of the UNCITRAL Arbitration Model Law and article 178 of the Swiss Private International Law Act. It stated that, in light of modern means of communication, unsigned writings play an important role and signature requirements were becoming less important. In particular cases, specific conduct may, by virtue of the rules of good faith, substitute the writing requirement*; Italy, Supreme Court, *Lanificio Walter Banci SaS (Italy) v. Bobbie Brooks Inc (US)* (1980) (Yearbook Commercial Arbitration VI (1981) p. 233): *the court discussed the relation between article II and article V in enforcement proceedings and came to the conclusion that, in case of enforcement, article V and not article II was applicable; as a consequence, it held that the written form of the arbitral clause was in conformity with applicable domestic law, stating that under article V(1)(a), the validity of the arbitration agreement had to be determined under the law of the country where the award was made in the absence of an agreement by the parties; the court did not ascertain whether the arbitration agreement was in conformity with article II; this view was somehow affirmed in a decision of the Supreme Court, Italy, in *Conceria G De Maio & F snc (Italy) v. EMAG AG (Switzerland)* (1995) (Yearbook Commercial Arbitration XXI (1996) p. 602): *the court held that, in enforcement proceedings, article V and not article II applied, and that the validity of the arbitration clause was to be ascertained under the applicable law.**

⁷² Italy, Supreme Court, *Lanificio Walter Banci SaS (Italy) v. Bobbie Brooks Inc. (US)*, 15 April 1980, (Yearbook Commercial Arbitration VI (1981), p. 233); Italy, Supreme Court, *Conceria G De Maio & F snc (Italy) v. EMAG AG (Switzerland)*, 20 January 1995, (Yearbook Commercial Arbitration XXI (1996), p. 602); *Universal Peace Shipping Enterprises SA (Panama) v. Montipe SpA (Italy)* (1991), (Yearbook Commercial Arbitration XVII (1992) p. 562).

⁷³ Germany, Court of Appeal of Cologne, *Danish buyer v. German seller*, 16 December 1992, (Yearbook Commercial Arbitration XXI (1996), p. 535).

33. However, certain State courts have found that the New York Convention contained nothing to prevent the use of some of its provisions in conjunction with other more liberal provisions in national law.⁷⁴

C. Article VII(1) and the reference to arbitration agreements

34. Another question is whether article VII(1), which applies to the enforcement of arbitral awards, might also be applied in relation to arbitration agreements. Certain State courts applied domestic law in determining the question of enforceability of an arbitration agreement, therefore considering that article VII(1), which referred in its text to the enforcement of arbitral awards, should be interpreted as also applying in relation to arbitration agreements.⁷⁵

III. Concluding remarks

A. General remarks

35. There remains a wide divergence of interpretation by State courts on the form requirement defined under article II(2). In particular, what is meant by the term “signature”, whether the signature requirement applies to both the arbitration clause in a contract as well as the arbitration agreement and what is required by an “exchange of letters or telegrams” are all matters on which there have been different and sometimes conflicting interpretations. Different judicial interpretations of the form requirement and a trend to avoid the form requirement by reference to other legal doctrines may undermine the principles of the New York Convention and the harmonisation of the law regarding recognition and enforcement of arbitration agreements.

36. Courts, in many States, have established a clear position as to the circumstances in which article VII(1) may be applied to uphold arbitration agreements where the form requirement set out in article II(2) would otherwise not be met, but those positions diverge from one State to another. The advantage of applying article VII(1) would be to avoid the application of article II(2) and, as States would enact more favourable provisions on the form requirement for arbitration agreements, would allow the development of rules favouring the validity of arbitration agreements in a wider variety of situations. Encouraging the wide adoption by States of article 7(2) of the UNCITRAL Arbitration Model Law, currently being revised by the Working Group, could provide a useful means of achieving greater uniformity as to the form requirement, which was more responsive to the needs of modern arbitration.

⁷⁴ Germany, Oberlandesgericht of Hamm, 2 November 1983, (Yearbook Commercial Arbitration XIV (1989), p. 629) : *the court simultaneously applied the provisions of both the German New Code of Civil Procedure and the New York Convention to the enforcement of a foreign award*; The Netherlands, Court of First Instance, Rotterdam, Isaac Glecer (Israel) v. Moses Asrael Glecer and Estera Glecer-Nottman (Belgium), 24 November 1994 (Yearbook Commercial Arbitration XXI (1996), p. 635): *the court granted enforcement, finding, inter alia, that Article 1076 of the Dutch CCP applied to the enforcement under article VII(1) the New York Convention*.

⁷⁵ United States, Court of Appeals for the Second Circuit, Genesco, Inc v. Kakiuchi & Co., 1 April 1987, (815 F 2d 840); United Kingdom, Queen’s Bench Division, Commercial Court, XL Insurance Ltd v. Owens Corning, 28 July 2000, 2 Lloyd’s Rep 500, (Yearbook Commercial Arbitration XXVI (2001) p. 869).

B. Draft declaration regarding the interpretation of article VII(1) of the Convention

37. As indicated above (paragraphs 24 to 34), there are areas of uncertainty in the application of article VII(1). Given the current work of the Working Group on article II(2), and the draft model provision revising article 7(2) of the UNCITRAL Arbitration Model Law, the Working Group might wish to consider whether the preparation of guiding principles on article VII(1) of the New York Convention would also be useful in achieving greater uniform application. The text of a declaration interpreting article VII(1) of the Model Law could read as follows:

“Declaration regarding interpretation of article VII(1) of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards, done at New York, 10 June 1958

“The United Nations Commission on International Trade Law,

“[1] Recalling resolution 2205 (XXI) of the General Assembly of 17 December 1966, which established the United Nations Commission on International Trade Law with the object of promoting the progressive harmonization and unification of the law of international trade,

“[2] Conscious of the fact that the different legal, social and economic systems of the world, together with different levels of development are represented in the Commission,

“[3] Recalling successive resolutions of the General Assembly reaffirming the mandate of the Commission as the core legal body within the United Nations system in the field of international trade law to coordinate legal activities in this field,

“[4] Conscious of its mandate to further the progressive harmonization and unification of the law of international trade by, inter alia, promoting ways and means of ensuring a uniform interpretation and application of international conventions and uniform laws in the field of the law of international trade,

“[5] Convinced that the wide adoption of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards has been a significant achievement in the promotion of the rule of law, particularly in the field of international trade,

“[6] Recalling that the Conference of Plenipotentiaries which prepared and opened the Convention for signature adopted a resolution, which states, inter alia, that the Conference ‘considers that greater uniformity of national laws on arbitration would further the effectiveness of arbitration in the settlement of private law disputes’,

“[7] Bearing in mind differing interpretations of the form requirements under the Convention that result in part from differences of expression as between the five equally authentic texts of the Convention,

“[8] Taking into account article VII(1) of the Convention, a purpose of which is to enable the enforcement of foreign arbitral awards to the greatest extent, in particular by recognizing the right of any interested party to avail itself of law or treaties of the country where the award is sought to be relied upon, including where such law or treaties offer a regime more favourable than the Convention,

“[9] Considering the wide use of electronic commerce,

“[10] *Taking into account* international legal instruments, such as the 1985 UNCITRAL Model Law on International Commercial Arbitration, as subsequently revised, the UNCITRAL Model Law on Electronic Commerce, the UNCITRAL Model Law on Electronic Signatures and the United Nations Convention on the Use of Electronic Communications in International Contracts,

“[11] *Also taking into account* enactments of domestic legislation, including case law, more favourable than the Convention in respect of form requirement governing arbitration agreements, arbitration proceedings and the enforcement of arbitral awards,

“[12] *Considering* that, in interpreting the Convention, regard is to be had to the need to promote recognition and enforcement of arbitral awards,

“[13] *Recommends* that article VII(1) of the Convention should be applied to allow any interested party to avail itself of rights it may have, under the law or treaties of the country where an arbitration agreement is sought to be relied upon, to seek recognition of the validity of such an arbitration agreement.”

**G. Note by the Secretariat on settlement of commercial disputes:
interim measures of protection, submitted to the Working
Group on Arbitration at its forty-fourth session
(A/CN.9/WG.II/WP.141) [Original: English]**

	<i>Paragraphs</i>	<i>Page</i>
Introduction	1-3	
I. Proposal on the form in which the legislative provisions on interim measures and preliminary orders could be presented in the Model Law	4	
II. Notes on the form in which the legislative provisions on interim measures and preliminary orders could be presented in the Model Law	5-15	
Annex. Table of concordance		

Introduction

1. At its forty-second session (New York, 10-14 January 2005), the Working Group requested the Secretariat to consider the issue of the form in which the legislative provisions on interim measures and preliminary orders could be presented in the UNCITRAL Model Law on International Commercial Arbitration (“the Model Law”) and present possible variants for consideration by the Working Group at a future session (A/CN.9/573, para. 99).

2. At its forty-third session (Vienna, 3-7 October 2005), the Working Group agreed that the legislative provisions on interim measures and preliminary orders be placed in a new chapter, numbered chapter IV bis of the Model Law, and requested the Secretariat to prepare a new draft of the provisions, taking account of the suggestion to restructure the provisions by grouping paragraphs relating to similar issues under separate articles (A/CN.9/589, para. 106).

3. To facilitate the resumption of discussions, this note contains a proposal on the form in which the legislative provisions on interim measures and preliminary orders could be presented in the Model Law.

I. Proposal on the form in which the legislative provisions on interim measures and preliminary orders could be presented in the Model Law

4. The following text sets out a proposal as to the presentation of the draft legislative provisions on interim measures and preliminary orders, recognition and enforcement of interim measures and court-ordered interim measures. Modifications to the earlier draft contained in the annex to the report of the Working Group on the work of its forty-third session (annex to A/CN.9/589) have been underlined in the text below. As well, a

comparative table outlining the concordance of the numbering between articles of the earlier draft and articles of the text below has been annexed to this note.

Chapter IV bis. Interim measures and preliminary orders

Section 1—Interim measures

Article 17—Power of arbitral tribunal to order interim measures

- (1) Unless otherwise agreed by the parties, the arbitral tribunal may, at the request of a party, grant interim measures.
- (2) An interim measure is any temporary measure, whether in the form of an award or in another form, by which, at any time prior to the issuance of the award by which the dispute is finally decided, the arbitral tribunal orders a party to:
 - (a) Maintain or restore the status quo pending determination of the dispute;
 - (b) Take action that would prevent, or refrain from taking action that is likely to cause, current or imminent harm or prejudice to the arbitral process itself;
 - (c) Provide a means of preserving assets out of which a subsequent award may be satisfied; or
 - (d) Preserve evidence that may be relevant and material to the resolution of the dispute.

Article 17 bis—Conditions for granting interim measures

- (1) The party requesting an interim measure under article 17 (2)(a), (b) and (c) shall satisfy the arbitral tribunal that:
 - (a) Harm not adequately reparable by an award of damages is likely to result if the measure is not ordered, and such harm substantially outweighs the harm that is likely to result to the party against whom the measure is directed if the measure is granted; and
 - (b) There is a reasonable possibility that the requesting party will succeed on the merits of the claim, provided that any determination on this possibility shall not affect the discretion of the arbitral tribunal in making any subsequent determination.
- (2) With regard to a request for an interim measure under article 17 (2)(d), the requirements in paragraphs (1)(a) and (b) of this article shall apply only to the extent the arbitral tribunal considers appropriate.

Section 2—Preliminary orders

Article 17 ter—Applications for preliminary orders

- (1) Unless otherwise agreed by the parties, a party may, without notice to any other party, make a request for an interim measure together with an application for a preliminary order directing a party not to frustrate the purpose of the interim measure requested.

(2) The arbitral tribunal may grant a preliminary order provided it considers that prior disclosure of the request for the interim measure to the party against whom it is directed risks frustrating the purpose of the measure.[]

(3) The conditions defined under article 17 bis apply to any preliminary order [], provided that the harm to be assessed under article 17 bis, paragraph (1)(a), is the harm likely to result from the order's being granted or not.

Article 17 quater—Specific regime for preliminary orders

(1) Immediately after the arbitral tribunal has made a determination in respect of an application for a preliminary order, the arbitral tribunal shall give notice to all parties of the request for the interim measure, the application for the preliminary order, the preliminary order, if any, and all other communications, including by indicating the content of any oral communication, between any party and the arbitral tribunal in relation thereto.

(2) At the same time, the arbitral tribunal shall give an opportunity to any party against whom a preliminary order is directed to present its case at the earliest practicable time.

(3) The arbitral tribunal shall decide promptly on any objection to the preliminary order.

(4) A preliminary order [] shall expire after twenty days from the date on which it was issued by the arbitral tribunal. However, the arbitral tribunal may issue an interim measure adopting or modifying the preliminary order, after the party against whom the preliminary order is directed has been given notice and an opportunity to present its case.

(5) A preliminary order [] shall be binding on the parties but shall not be subject to enforcement by a court. Such a preliminary order does not constitute an award.

Section 3—Provisions applicable to interim measures and preliminary orders

Article 17 quinquies—Modification, suspension, termination

The arbitral tribunal may modify, suspend or terminate an interim measure or a preliminary order it has granted, upon application of any party or, in exceptional circumstances and upon prior notice to the parties, on the arbitral tribunal's own initiative.

Article 17 sexies—Provision of security by the arbitral tribunal

(1) The arbitral tribunal may require the party requesting an interim measure to provide appropriate security in connection with the [] measure.

(2) The arbitral tribunal shall require the party applying for a preliminary order to provide security in connection with the [] order unless the arbitral tribunal considers it inappropriate or unnecessary to do so.

Article 17 septies—Disclosure

(1) The party requesting an interim measure shall promptly disclose any material change in the circumstances on the basis of which the measure was requested or granted.

(2) The party applying for a preliminary order shall disclose to the arbitral tribunal all circumstances that are likely to be relevant to the arbitral tribunal's determination whether to grant or maintain the [] order, and such obligation shall continue until the party against whom the [] order has been requested has had an opportunity to present its case. Thereafter, the applying party shall have the same disclosure obligation with respect to the preliminary order that a requesting party has with respect to an interim measure under paragraph (1) of this article.

Article 17 octies—Costs and damages

The party requesting an interim measure or applying for a preliminary order shall be liable for any costs and damages caused by the measure or the order to the party against whom it is directed if the arbitral tribunal later determines that, in the circumstances, the measure or the order should not have been granted. The arbitral tribunal may award such costs and damages at any point during the proceedings.

Section 4 - Recognition and enforcement of interim measures

Article 17 novies—Recognition and enforcement of interim measures

(1) An interim measure issued by an arbitral tribunal shall be recognized as binding and, unless otherwise provided by the arbitral tribunal, enforced upon application to the competent court, irrespective of the country in which it was issued, subject to the provisions of article 17 novies.

(2) The party who is seeking or has obtained recognition or enforcement of an interim measure shall promptly inform the court of any termination, suspension or modification of that interim measure.

(3) The court of the State where recognition or enforcement is sought may, if it considers it proper, order the requesting party to provide appropriate security if the arbitral tribunal has not already made a determination with respect to security or where such a decision is necessary to protect the rights of third parties.

Article 17 decies—Grounds for refusing recognition or enforcement of interim measures*

- (1) Recognition or enforcement of an interim measure may be refused only:
 - (a) at the request of the party against whom it is invoked if the court is satisfied that:
 - (i) such refusal is warranted on the grounds set forth in article 36, paragraphs (1) (a)(i), (ii), (iii) or (iv); or
 - (ii) the arbitral tribunal's decision with respect to the provision of security in connection with the interim measure issued by the arbitral tribunal has not been complied with; or
 - (iii) the interim measure has been terminated or suspended by the arbitral tribunal or, where so empowered, by the court of the State in which the

* The conditions set forth in article **novies** are intended to limit the number of circumstances in which the court may refuse to enforce an interim measure. It would not be contrary to the level of harmonization sought to be achieved by these model provisions if a State were to adopt fewer circumstances in which enforcement may be refused.

arbitration takes place or under the law of which that interim measure was granted; or

(b) if the court finds that:

(i) the interim measure is incompatible with the powers conferred upon the court unless the court decides to reformulate the interim measure to the extent necessary to adapt it to its own powers and procedures for the purposes of enforcing that interim measure and without modifying its substance; or

(ii) any of the grounds set forth in article 36, paragraphs (1)(b)(i) or (ii) apply to the recognition and enforcement of the interim measure.

(2) Any determination made by the court on any ground in paragraph (1) of this article shall be effective only for the purposes of the application to recognize and enforce the interim measure. The court where recognition or enforcement is sought shall not, in making that determination, undertake a review of the substance of the interim measure.

Section 5—Court-ordered interim measures

Article 17 undecies—Court-ordered interim measures

The court shall have the same power of issuing interim measures for the purposes of and in relation to arbitration proceedings whose place is in the country of the court or in another country as it has for the purposes of and in relation to proceedings in the courts and shall exercise that power in accordance with its own rules and procedures insofar as these are relevant to the specific features of an international arbitration.[]

II. Notes on the form in which the legislative provisions on interim measures and preliminary orders could be presented in the Model Law

Structure of the provisions

5. As agreed by the Working Group, the provisions on interim measures, preliminary orders, recognition and enforcement of interim measures and court-ordered interim measures are placed in a new chapter, numbered chapter IV bis (A/CN.9/589, para. 105). As suggested by the Working Group, those provisions have been restructured by grouping paragraphs relating to similar issues under separate articles (A/CN.9/589, para. 106). In order to better clarify the proposed structure of the revised text, section headings have been included. This structure has the advantage of providing a logical presentation of the provisions, and avoids creating an article on interim measures that is of inordinate length as compared to other articles in the Model Law.

Article 17 bis, paragraph (1)(b)

6. The Working Group might wish to note that the words “of the claim” have been added after the word “merits” in order to clarify that the merits to be considered might relate to the main claim and not to the interim measure requested. Clarifying that what is being considered is the main claim of the dispute may limit unnecessary arguments as to whether there exists a reasonable possibility of success in respect of the granting of the interim measure (or the preliminary order under article 17 ter (3)). However, the reasonable possibility of success on the merits of the claim will be assessed differently in

view of the different information available to the arbitral tribunal at different stages of the arbitral proceedings, ranging from the early stage where the preliminary order is being applied for until the time when the issuance of the interim measure is discussed *inter partes*.

Article 17 ter, paragraph (1)

7. The word “file” has been deleted from article 17 ter, paragraph 1, and replaced by the word “make”. The Working Group might wish to consider whether this word provides a more neutral requirement in relation to application for preliminary orders.

Article 17 ter, paragraph (2)—Article 17 quater, paragraph (5)

8. The words “such preliminary order does not constitute an award” have been removed from article 17 ter, paragraph (2) and relocated under article 17 quater, paragraph (5). The Working Group might wish to consider whether these words are more appropriately located within article 17 quater, paragraph (5) given that paragraph (5) deals with the nature and effect of a preliminary order.

Article 17 ter, paragraph (3)

9. Article 17 ter, paragraph (3) provides that the provisions of article 17 bis (relating to interim measures) also apply to preliminary orders. The Working Group might wish to consider whether the proposed revised draft of that paragraph clarifies how article 17 bis is to be applied in the context of preliminary orders, namely that the harm to be assessed by the arbitral tribunal in that context is the harm resulting if the preliminary order is not granted, and not the harm resulting if the interim measure is not granted.

Article 17 septies, paragraph (2)

10. The word “any” appearing before “party” has been replaced by the word “the” for the sake of consistency with paragraph (1) of the same article.

Article 17 decies

11. A footnote has been added to the title of article 17 decies (formerly that footnote appeared under article 17 bis (1) as contained in the annex to the report of the Working Group on the work of its forty-third session (annex to A/CN.9/589)). The content of the footnote applies to the grounds for refusing recognition and enforcement and therefore relates to the content of article 17 decies.

Article 17 undecies

Placement

12. In enacting article 17 undecies, States might wish to consider the placement of that provision since article 17 undecies, which deals with court-ordered interim measures might not easily fit in a chapter that is intended to deal mostly with interim measures granted by arbitral tribunals.

13. Among the options to be considered, one possibility would be to place article 17 undecies following provisions enacting article 9 of the Model Law, which deals with interim measures granted by courts. However, given that article 9 is contained within chapter 2 of the Model Law, which relates to the definition and form of arbitration agreement, that option might not be considered appropriate. The Working Group might

wish to consider whether a footnote to article 17 undecies should draw the attention of States to the issue of placing article 17 undecies in the most appropriate part of their enacting legislation. Such footnote could read as follows:

“In enacting article 17 undecies, States might wish to consider grouping this provision with other provisions in the enacting legislation relating to certain functions of arbitration assistance and supervision performed by courts or other authority.”

Reference to article 1, paragraph 2 of the Model Law

14. At its forty-third session, the Working Group noted that, given the intention that the provision on court-ordered interim measure should apply irrespective of the country where the arbitration takes place, that provision should be added to the list of articles contained under article 1, paragraph (2). That article provides that, in respect of the listed articles, the Model Law, as enacted in a given State, would apply even if the place of the arbitration were not in the territory of that State (A/CN.9/589, paras. 101-103). It is also suggested that a reference to articles 17 novies and 17 decies (which deal with recognition and enforcement of interim measures and the grounds for refusal thereof) be included within the list of excepted articles so that article 1, paragraph (2) of the Model Law would read as follows:

“The provisions of this Law, except articles 8, 9, 17 novies, 17 decies, 17 undecies, 35 and 36, apply only if the place of arbitration is in the territory of this State.”

15. Including all excepted articles within article 1, paragraph (2), which establishes the territorial scope of application of the Model Law, appears to provide a simpler and more user-friendly approach than including such an exception within each of the revised articles. Taking that approach into account, the words “This article shall apply notwithstanding the provisions of article 1, paragraph 2”, which appeared at the end of article 17 ter of the earlier draft (contained in the annex to A/CN.9/589) have been deleted.

Introduction

1. At its thirty-second session (Vienna, 17 May-4 June 1999), the Commission decided that one of the priority items for the Working Group should be enforceability of interim measures of protection.¹

2. The Working Group considered the possible preparation of harmonized texts on interim measures at its thirty-second (Vienna, 20-31 March 2000),² thirty-third (Vienna, 20 November-1 December 2000),³ thirty-fourth (New York, 21 May-1 June 2001),⁴ thirty-sixth (New York, 4-8 March 2002),⁵ thirty-seventh (Vienna, 7-11 October 2002),⁶ thirty-eighth (New York, 12-16 May 2003),⁷ thirty-ninth (Vienna, 10-14 November 2003),⁸ fortieth (New York, 23-27 February 2004),⁹ forty-first (Vienna, 13-17 September

2004),¹⁰ forty-second (New York, 10-14 January 2005),¹¹ forty-third (Vienna, 3-7 October 2005)¹² and forty-fourth (New York, 23-27 January 2006)¹³ sessions.

3. At its forty-fourth session, the Working Group agreed that the legislative provisions on interim measures and preliminary orders be placed in a new chapter, numbered chapter IV bis of the UNCITRAL Model Law on International Commercial Arbitration (“the Arbitration Model Law”).¹⁴

I. Draft legislative provisions on interim measures and preliminary orders

4. The text of chapter IV bis on interim measures and preliminary orders, as adopted by the Working Group at its forty-fourth session,¹⁵ reads as follows:

Chapter IV bis. Interim measures and preliminary orders

Section 1—Interim measures

Article 17—Power of arbitral tribunal to order interim measures

(1) Unless otherwise agreed by the parties, the arbitral tribunal may, at the request of a party, grant interim measures.

(2) An interim measure is any temporary measure, whether in the form of an award or in another form, by which, at any time prior to the issuance of the award by which the dispute is finally decided, the arbitral tribunal orders a party to:

- (a) Maintain or restore the status quo pending determination of the dispute;
- (b) Take action that would prevent, or refrain from taking action that is likely to cause, current or imminent harm or prejudice to the arbitral process itself;
- (c) Provide a means of preserving assets out of which a subsequent award may be satisfied; or
- (d) Preserve evidence that may be relevant and material to the resolution of the dispute.

Article 17 bis—Conditions for granting interim measures

(1) The party requesting an interim measure under article 17 (2)(a), (b) and (c) shall satisfy the arbitral tribunal that:

- (a) Harm not adequately reparable by an award of damages is likely to result if the measure is not ordered, and such harm substantially outweighs the harm that is likely to result to the party against whom the measure is directed if the measure is granted; and

¹⁰ A/CN.9/569, paras. 12-68.

¹¹ A/CN.9/573, paras. 11-95.

¹² A/CN.9/589, paras. 11-107.

¹³ A/CN.9/592, paras. 12-45 and annex I.

¹⁴ Ibid., para. 14.

¹⁵ Ibid., paras. 12-45 and annex I.

(b) There is a reasonable possibility that the requesting party will succeed on the merits of the claim, provided that any determination on this possibility shall not affect the discretion of the arbitral tribunal in making any subsequent determination.

(2) With regard to a request for an interim measure under article 17 (2)(d), the requirements in paragraphs (1)(a) and (b) of this article shall apply only to the extent the arbitral tribunal considers appropriate.

Section 2—Preliminary orders

Article 17 ter—Applications for preliminary orders and conditions for granting preliminary orders

(1) Unless otherwise agreed by the parties, a party may, without notice to any other party, make a request for an interim measure together with an application for a preliminary order directing a party not to frustrate the purpose of the interim measure requested.

(2) The arbitral tribunal may grant a preliminary order provided it considers that prior disclosure of the request for the interim measure to the party against whom it is directed risks frustrating the purpose of the measure.

(3) The conditions defined under article 17 bis apply to any preliminary order, provided that the harm to be assessed under article 17 bis, paragraph (1)(a), is the harm likely to result from the order being granted or not.

Article 17 quater—Specific regime for preliminary orders

(1) Immediately after the arbitral tribunal has made a determination in respect of an application for a preliminary order, the arbitral tribunal shall give notice to all parties of the request for the interim measure, the application for the preliminary order, the preliminary order, if any, and all other communications, including by indicating the content of any oral communication, between any party and the arbitral tribunal in relation thereto.

(2) At the same time, the arbitral tribunal shall give an opportunity to any party against whom a preliminary order is directed to present its case at the earliest practicable time.

(3) The arbitral tribunal shall decide promptly on any objection to the preliminary order.

(4) A preliminary order shall expire after twenty days from the date on which it was issued by the arbitral tribunal. However, the arbitral tribunal may issue an interim measure adopting or modifying the preliminary order, after the party against whom the preliminary order is directed has been given notice and an opportunity to present its case.

(5) A preliminary order shall be binding on the parties but shall not be subject to enforcement by a court. Such a preliminary order does not constitute an award.

Section 3—Provisions applicable to interim measures and preliminary orders

Article 17 quinquies—Modification, suspension, termination

The arbitral tribunal may modify, suspend or terminate an interim measure or a preliminary order it has granted, upon application of any party or, in exceptional

circumstances and upon prior notice to the parties, on the arbitral tribunal's own initiative.

Article 17 sexies—Provision of security

- (1) The arbitral tribunal may require the party requesting an interim measure to provide appropriate security in connection with the measure.
- (2) The arbitral tribunal shall require the party applying for a preliminary order to provide security in connection with the order unless the arbitral tribunal considers it inappropriate or unnecessary to do so.

Article 17 septies—Disclosure

- (1) The party requesting an interim measure shall promptly disclose any material change in the circumstances on the basis of which the measure was requested or granted.
- (2) The party applying for a preliminary order shall disclose to the arbitral tribunal all circumstances that are likely to be relevant to the arbitral tribunal's determination whether to grant or maintain the order, and such obligation shall continue until the party against whom the order has been requested has had an opportunity to present its case. Thereafter, the applying party shall have the same disclosure obligation with respect to the preliminary order that a requesting party has with respect to an interim measure under paragraph (1) of this article.

Article 17 octies—Costs and damages

The party requesting an interim measure or applying for a preliminary order shall be liable for any costs and damages caused by the measure or the order to any party if the arbitral tribunal later determines that, in the circumstances, the measure or the order should not have been granted. The arbitral tribunal may award such costs and damages at any point during the proceedings.

Section 4—Recognition and enforcement of interim measures

Article 17 novies—Recognition and enforcement

- (1) An interim measure issued by an arbitral tribunal shall be recognized as binding and, unless otherwise provided by the arbitral tribunal, enforced upon application to the competent court, irrespective of the country in which it was issued, subject to the provisions of article 17 decies.
- (2) The party who is seeking or has obtained recognition or enforcement of an interim measure shall promptly inform the court of any termination, suspension or modification of that interim measure.
- (3) The court of the State where recognition or enforcement is sought may, if it considers it proper, order the requesting party to provide appropriate security if the arbitral tribunal has not already made a determination with respect to security or where such a decision is necessary to protect the rights of third parties.

Article 17 decies—Grounds for refusing recognition or enforcement*

- (1) Recognition or enforcement of an interim measure may be refused only:
- (a) At the request of the party against whom it is invoked if the court is satisfied that:
 - (i) Such refusal is warranted on the grounds set forth in article 36, paragraphs (1) (a)(i), (ii), (iii) or (iv); or
 - (ii) The arbitral tribunal's decision with respect to the provision of security in connection with the interim measure issued by the arbitral tribunal has not been complied with; or
 - (iii) The interim measure has been terminated or suspended by the arbitral tribunal or, where so empowered, by the court of the State in which the arbitration takes place or under the law of which that interim measure was granted; or
 - (b) If the court finds that:
 - (i) The interim measure is incompatible with the powers conferred upon the court unless the court decides to reformulate the interim measure to the extent necessary to adapt it to its own powers and procedures for the purposes of enforcing that interim measure and without modifying its substance; or
 - (ii) Any of the grounds set forth in article 36, paragraphs (1)(b)(i) or (ii), apply to the recognition and enforcement of the interim measure.
- (2) Any determination made by the court on any ground in paragraph (1) of this article shall be effective only for the purposes of the application to recognize and enforce the interim measure. The court where recognition or enforcement is sought shall not, in making that determination, undertake a review of the substance of the interim measure.

Section 5—Court-ordered interim measures**Article 17 undecies—Court-ordered interim measures**

The court shall have the same power of issuing interim measures for the purposes of and in relation to arbitration proceedings whose place is in the country of the court or in another country as it has for the purposes of and in relation to proceedings in the courts and shall exercise that power in accordance with its own rules and procedures insofar as these are relevant to the specific features of an international arbitration.

* The conditions set forth in article 17 decies are intended to limit the number of circumstances in which the court may refuse to enforce an interim measure. It would not be contrary to the level of harmonization sought to be achieved by these model provisions if a State were to adopt fewer circumstances in which enforcement may be refused.

II. Remarks on the draft legislative provisions on interim measures and preliminary orders

Remarks on section 1—Interim measures

Article 17, paragraph (2)

Form of issuance of an interim measure

5. At its thirty-sixth (New York, 4-8 March 2002),¹⁶ thirty-seventh (Vienna, 7-11 October 2002)¹⁷ and fortieth (New York, 23-27 February 2004)¹⁸ sessions, the Working Group considered at length the form in which an interim measure should be issued by an arbitral tribunal. The Working Group agreed that the phrase “whether in the form of an award or in another form”, which was inspired from the UNCITRAL Arbitration Rules, was sufficiently neutral to reflect the intention of the Working Group not to create any preferred form in which an interim measure should be issued. It was said that it would be undesirable for the draft paragraph to be overly prescriptive in respect of the form that an interim measure should take. The Commission might wish to note the suggestion that any explanatory material to be prepared, possibly in the form of a guide to enactment and use of the new legislative provisions, make it clear that the wording adopted should not be misinterpreted as taking a stand in respect of the issue as to whether or not an interim measure issued in the form of an award would qualify for enforcement under the New York Convention (see below, para. 17).¹⁹

Exhaustive nature of the list of functions characteristic of interim measures

6. At its thirty-sixth (New York, 4-8 March 2002)²⁰ and thirty-ninth (Vienna, 10-14 November 2003)²¹ sessions, the Working Group considered whether all possible grounds for which an interim measure might need to be granted were covered by the current formulation under article 17, paragraph (2). After discussion, the Working Group agreed that, to the extent that all the purposes for interim measures were generically covered by the revised list contained in paragraph (2), the list could be expressed as an exhaustive one.²² The Commission might wish to note the decision of the Working Group to provide explanation on that matter in any explanatory material accompanying that provision.

Article 17 bis

7. At its forty-third session (Vienna, 3-7 October 2003), the Working Group agreed to retain the word “adequately” in subparagraph (a) of article 17 bis (1) and to clarify, in any explanatory material, that the subparagraph should be interpreted in a flexible manner by balancing the degree of harm suffered by the applicant if the interim measure was not

¹⁶ A/CN.9/508, paras. 65-68.

¹⁷ A/CN.9/523, para. 36.

¹⁸ A/CN.9/547, paras. 70-72.

¹⁹ Ibid.

²⁰ A/CN.9/508, para. 71.

²¹ A/CN.9/545, para. 21.

²² Ibid.

granted against the degree of harm suffered by the party opposing the measure if that measure was granted.²³

8. It was suggested as well that explanatory material accompanying article 17 bis could indicate that the fact that the requirements in paragraphs (1)(a) and (b) of article 17 bis only applied to the type of measure contained in paragraph (2)(d) of article 17 to the extent the arbitral tribunal considered appropriate did not mean that an arbitral tribunal would not examine and weigh the circumstances in determining the appropriateness of ordering the measure.²⁴

“Urgent need for the measure”

9. The Working Group considered, after discussion, that the need for urgency should not be a general feature of interim measures.²⁵ The Commission might wish to decide whether guidance should be provided in explanatory material indicating how urgency impacts upon the operation of the provisions in Section 1.

Remarks on section 2—Preliminary orders

General remarks

10. At its forty-first (Vienna, 13-17 September 2004),²⁶ and forty-second (New York, 10-14 January 2005)²⁷ sessions, the Working Group undertook a detailed review of the provisions regarding the power of an arbitral tribunal to grant interim relief on an ex parte basis. In the legislative provisions, the term “preliminary order” is used, instead of “interim measure”, to describe a measure issued on an ex parte basis. This term emphasizes the temporary and extraordinary nature of the order, as well as its distinct scope and purpose.

11. At its forty-second session (New York, 10-14 January 2005), after extended discussion, the Working Group agreed to include a compromise text of the provisions on preliminary orders, on the basis of the principles that: those provisions would apply unless otherwise agreed by the parties; it be made clear that preliminary orders had the nature of procedural orders and not of awards; and no enforcement procedure would be provided for such orders in section 4.²⁸

Article 17 ter

Purpose, function and legal regime of preliminary orders

12. At the forty-first session of the Working Group (Vienna, 13-17 September 2004), doubts were expressed as to whether or not the notion of “preliminary order” should be regarded as a subset of the broader notion of “interim measure”. It was suggested that, if a preliminary order was understood to be a subset of an interim measure, then the distinction between them might be regarded as artificial and might lead to difficulties in implementation and practice.²⁹ The Working Group noted that, although a preliminary

²³ A/CN.9/589, para. 37.

²⁴ Ibid., para. 33.

²⁵ A/CN.9/523, para. 41.

²⁶ A/CN.9/569.

²⁷ A/CN.9/573.

²⁸ Ibid., para. 27.

²⁹ A/CN.9/569, para. 24.

order might be regarded as a subset of an interim measure, it should be distinguished from an interim measure in view of its narrower purpose, which was limited to preventing the frustration of the specific interim measure being applied for. Another distinctive feature of a preliminary order was that it was subject to strict time limits as set out in article 17 quater. It was stated that a preliminary order was effectively to provide a “bridging device” until an inter partes hearing could take place in respect of the requested interim measure.³⁰ The Commission might wish to decide whether explanatory material accompanying article 17 ter should include an explanation of the distinction between an interim measure and a preliminary order.

13. At the forty-second session of the Working Group (New York, 10-14 January 2005), it was said that article 17 ter could be misunderstood as providing that the arbitral tribunal could only direct the parties in general terms not to frustrate the purpose of the interim measure. Notwithstanding that view, it was understood that the arbitral tribunal had a more general discretion to issue a preliminary order that was appropriate and was in keeping with the circumstances of the case and that such an understanding should be made clear in any explanatory material.³¹

Article 17 quater

Obligation of arbitral tribunal to give notice (article 17 quater, paragraph (1))

14. At the forty-second session of the Working Group (New York, 10-14 January 2005), it was noted that the arbitral tribunal had an obligation to communicate documents and information to the party against whom the preliminary order was sought and it was suggested that it be clarified that that obligation applied whether the arbitral tribunal issued or refused to issue the order. The Commission might wish to note that the Working Group agreed that clarification of that obligation might be included in any explanatory material accompanying article 17 quater.³²

Non-enforceability of preliminary orders (article 17 quater, paragraph (5))

15. The Working Group considered at length whether an enforcement regime should be provided in respect of preliminary orders. The need for including such a regime was questioned given the temporary nature of a preliminary order³³ and the fact that it could raise practical difficulties, such as whether notification to the other party of the preliminary order should be deferred until after the order had been enforced by a court.³⁴ The Commission might wish to note that non-enforceability of preliminary orders was central to the compromise reached at the forty-second session of the Working Group (see above, paragraph 11).

Recourse to courts

16. The Commission might wish to consider a proposal made at the forty-fourth session of the Working Group (New York, 23-27 January 2006) to add the following text to paragraph (5) of article 17 quater: “a party shall not be prevented from seeking any relief in a court because it has obtained such a preliminary order from the arbitral tribunal”. The

³⁰ Ibid., para. 26.

³¹ A/CN.9/573, para. 30.

³² Ibid., para. 41.

³³ A/CN.9/547, para. 66.

³⁴ A/CN.9/569, paras. 46-51.

Working Group took note of that proposal. It was suggested that this proposal merely clarified the operation of the provision and did not seek to reopen substantive questions relating thereto.³⁵

Remarks on section 4—Recognition and enforcement of interim measures

Interplay between section 4 and articles 35 and 36

17. Article 17 decies, which deals with the grounds for refusing recognition and enforcement of interim measures, refers to article 36, paragraph (1), of the Arbitration Model Law which is expressed to apply to awards. It is recalled that the Working Group decided not to define the form in which an interim measure should be issued (see above, para. 5), and the purpose of article 17 decies is to define the grounds for non-enforcement of interim measures, whether issued in the form of an award or in another form. The Commission might wish to consider whether it is necessary to clarify that the reference in article 17 decies to article 36, paragraph (1) should be understood as a reference to the grounds for non-enforcement, regardless of the form of issuance of the interim measure.³⁶

Article 17 decies, paragraph 1

Burden of proof

18. In contrast to article 36, paragraph (1)(a), of the Arbitration Model Law which places the burden of proof on the party against whom the award is invoked, article 17 decies, paragraph (1)(a) reflects the decision of the Working Group that no provision should be made regarding the allocation of the burden of proof and that that matter should be left to applicable law.³⁷ The Commission might wish to note the decision of the Working Group to provide explanation on that matter in any explanatory material accompanying that provision.

“modified, terminated or suspended”

19. The Commission might wish to note that the Working Group agreed that any explanatory material accompanying article 17 decies should clarify that the enforcement regime set out in section 4 applied in respect of any interim measure, whether or not it was modified by the arbitral tribunal.³⁸

Interplay between article 17 decies, paragraph (1)(a)(iii) and article 34

20. The Commission might wish to decide whether clarification is needed on the issue of whether an interim measure issued in the form of an award could be set aside under article 34 of the Arbitration Model Law. It is recalled that that question was raised at the fortieth session of the Working Group (New York, 23-27 February 2004) in the context of a discussion on whether the effect of article 17 decies, paragraph (1)(a)(iii) would be to allow a State court to set aside an interim measure issued by an arbitral tribunal. The Working Group agreed that article 17 decies, paragraph (1)(a)(iii) should not be

³⁵ A/CN.9/592, para. 27.

³⁶ A/CN.9/547, para. 43.

³⁷ Ibid., paras. 35-36, 42, 58 and 60; A/CN.9/573, para. 73.

³⁸ A/CN.9/589, para. 85.

misinterpreted as creating a ground for State courts to set aside an interim measure issued by an arbitral tribunal.³⁹

Article 17 decies, paragraph 2

21. The Commission might wish to recall that concerns were expressed in the Working Group that, when a court was called upon to enforce an interim measure, under article 17 decies, paragraph (1)(a)(i) (which refers to the grounds set forth in article 36, paragraphs (1)(a)(i), (ii), (iii) or (iv)), its decision could have an effect beyond the limited sphere of recognition and enforcement of the interim measure and, for example, impact on the recognition and enforcement of the arbitral award that determines the merits of the case. The purpose of article 17 decies, paragraph (2) is to confine the power of a court to the determination of recognition and enforcement of the interim measure only.⁴⁰

Remarks on section 5—Court-ordered interim measures

Article 17 undecies

Placement of article 17 undecies

22. The Commission might wish to note that the Working Group considered whether article 17 undecies should be located in another part of the Arbitration Model Law given that it deals with court-ordered interim measures which might not easily fit into a chapter intended to deal mostly with interim measures granted by arbitral tribunals. The Working Group agreed that a text suggesting that States place article 17 undecies in the most appropriate part of their enacting legislation⁴¹ could be included in explanatory material accompanying that provision along the lines of the text suggested in the note by the Secretariat.⁴²

III. Amendment to article 1, paragraph (2), of the Arbitration Model Law

23. At its forty-third session (Vienna, 3-7 October 2005), the Working Group noted that, given the intention that the provision on court-ordered interim measures should apply irrespective of the State where the arbitration took place, that provision should be added to the list of articles contained under article 1, paragraph (2), of the Arbitration Model Law. That article provides that, in respect of the listed articles, the Arbitration Model Law, as enacted in a given State, applies even if the place of the arbitration is not in the territory of that State.⁴³ It was also suggested that a reference to articles 17 novies and 17 decies (which deal with recognition and enforcement of interim measures and the grounds for refusal thereof, respectively) should be included within the list of excepted articles so that article 1, paragraph (2), of the Arbitration Model Law would read as follows:

³⁹ A/CN.9/547, para. 26.

⁴⁰ Ibid., para. 24.

⁴¹ A/CN.9/592, paras. 40-42.

⁴² A/CN.9/WG.II/WP.141, para. 13. The footnote reads as follows: "In enacting article 17 undecies, States might wish to consider grouping this provision with other provisions in the enacting legislation relating to certain functions of arbitration assistance and supervision performed by courts or other authority."

⁴³ A/CN.9/589, paras. 101-103.

“(2) The provisions of this Law, except articles 8, 9, 17 novies, 17 decies, 17 undecies, 35 and 36, apply only if the place of arbitration is in the territory of this State.”

IV. Explanatory material

24. The Commission might wish to discuss the decision of the Working Group that explanatory material in relation to the legislative provisions on interim measures and preliminary orders could be drafted along the lines of the existing explanatory note to the Arbitration Model Law and that such text could replace the current paragraph 26 and other affected paragraphs of that explanatory note. In addition, the Secretariat was requested to provide more detailed information on interim measures and preliminary orders to enacting States in a guide to enactment and use of the revised provisions.⁴⁴

⁴⁴ A/CN.9/592, para. 81.

Introduction

1. At its thirty-second session (Vienna, 17 May-4 June 1999), the Commission decided that one of the priority items for the Working Group should be the requirement of written form for the arbitration agreement contained in article 7, paragraph (2), of the UNCITRAL Model Law on International Commercial Arbitration ("the Arbitration Model Law").¹ The Working Group considered the possible preparation of a harmonized text on the writing requirement at its thirty-second (Vienna, 20-31 March 2000),² thirty-third (Vienna, 20 November-1 December 2000),³ thirty-fourth (New York, 21 May-1 June 2001),⁴ thirty-sixth (New York, 4-8 March 2002),⁵ forty-third (Vienna, 3-7 October 2005),⁶ and forty-fourth (New York, 23-27 January 2006)⁷ sessions.

2. When the Working Group considered the issue of the requirement of written form for the arbitration agreement at its thirty-second session, it was generally observed that there was a need for provisions which conformed to current practice in international trade.

¹ *Official Records of the General Assembly, Fifty-fourth Session, Supplement No. 17 (A/54/17)*, paras. 344-350 and para. 380.

² A/CN.9/468, paras. 88-106.

³ A/CN.9/485, paras. 21-59.

⁴ A/CN.9/487, paras. 22-41.

⁵ A/CN.9/508, paras. 18-39.

⁶ A/CN.9/589, paras. 108-112.

⁷ A/CN.9/592, paras. 46-81.

It was also noted that national courts increasingly adopted a liberal interpretation of those provisions in accordance with international practice and the expectations of parties in international trade.⁸

3. It is recalled as well that the Working Group's intention in revising article 7 of the Arbitration Model Law has been to update domestic laws on the question of the writing requirement for the arbitration agreement, while preserving enforceability of such agreements as foreseen in the New York Convention. To achieve that purpose, two options had been presented, the first gave a detailed description of how the writing requirement could be satisfied (the revised draft article 7) and the other deleted the writing requirement altogether (the alternative proposal). Views were expressed that both the alternative proposal and the revised draft article 7 provided useful options to address concerns relating to the writing requirement.⁹ A suggestion was made and adopted by the Working Group at its forty-fourth session that both the revised draft article 7, as amended by the Working Group, and the alternative proposal would be offered to States as alternative texts.¹⁰

I. Draft legislative provisions on the form of arbitration agreement

4. The texts of the revised draft article 7 and the alternative proposal, as adopted by the Working Group at its forty-fourth session, read as follows.¹¹

1. Revised draft article 7 of the Arbitration Model Law

Article 7. Definition and form of arbitration agreement

(1) "Arbitration agreement" is an agreement by the parties to submit to arbitration all or certain disputes which have arisen or which may arise between them in respect of a defined legal relationship, whether contractual or not. An arbitration agreement may be in the form of an arbitration clause in a contract or in the form of a separate agreement.

(2) The arbitration agreement shall be in writing.

(3) An arbitration agreement is in writing if its content is recorded in any form, whether or not the arbitration agreement or contract has been concluded orally, by conduct, or by other means.

(4) The requirement that an arbitration agreement be in writing is met by an electronic communication if the information contained therein is accessible so as to be useable for subsequent reference; "electronic communication" means any communication that the parties make by means of data messages; "data message" means information generated, sent, received or stored by electronic, magnetic, optical or similar means, including, but not limited to, electronic data interchange (EDI), electronic mail, telegram, telex or telecopy.

⁸ A/CN.9/468, para. 88.

⁹ A/CN.9/589, paras. 110-112.

¹⁰ A/CN.9/592, para. 74.

¹¹ Ibid., paras. 46-75 and annex II.

(5) Furthermore, an arbitration agreement is in writing if it is contained in an exchange of statements of claim and defence in which the existence of an agreement is alleged by one party and not denied by the other.

(6) The reference in a contract to any document containing an arbitration clause constitutes an arbitration agreement in writing, provided that the reference is such as to make that clause part of the contract.

2. Alternative proposal

Article 7. Definition of arbitration agreement

“Arbitration agreement” is an agreement by the parties to submit to arbitration all or certain disputes which have arisen or which may arise between them in respect of a defined legal relationship, whether contractual or not.

II. Notes on the draft legislative provisions on the form of arbitration agreement

1. Notes on the revised draft article 7 of the Arbitration Model Law

Paragraph (1)

5. Paragraph (1) reproduces article 7, paragraph (1), of the Arbitration Model Law.¹²

Paragraph (2)

6. Paragraph (2) reproduces the first sentence of article 7, paragraph (2), of the Arbitration Model Law, and is consistent with the language of article II, paragraph (2), of the New York Convention.¹³

Paragraph (3)

7. Paragraph (3) defines the writing requirement.¹⁴

General remarks

8. Paragraph (3) of the revised draft article 7 sought by way of a definition to clarify how the writing requirement could be fulfilled. At its forty-fourth session (New York, 23-27 January 2006), the Working Group discussed whether the purpose of the writing requirement was to provide a record as to the consent of the parties to arbitrate or as to the content of the arbitration agreement.¹⁵ After discussion, the Working Group was generally of the view that what was to be recorded was the content of the arbitration agreement as opposed to the meeting of the minds of the parties or any other information regarding the formation of the agreement, and therefore, reference to the content of the arbitration agreement would be appropriate in the text of paragraph (3).¹⁶ In that context, it was pointed out that paragraph (3) dealt with the definition of the form of the arbitration

¹² Ibid., para. 49.

¹³ Ibid., paras. 50-59.

¹⁴ Ibid., para. 59.

¹⁵ Ibid., para. 57.

¹⁶ Ibid., paras. 61 and 62.

agreement and the question whether the parties actually reached an agreement to arbitrate was a substantive issue to be left to national legislation.

9. It might be recalled that the intention of the Working Group was to ensure that the revised provision on the definition of the form of the arbitration agreement would encompass a variety of situations, including the case where a maritime salvage contract was concluded orally through radio with a reference to a pre-existing standard contract form containing an arbitration clause, such as the Lloyd's Open Form; contracts concluded by performance or by conduct (for example, a sale of goods under article 18 of the United Nations Convention on Contracts for the International Sale of Goods), with reference to a standard form containing an arbitration clause, such as documents established by the Grain and Food Trade Association (GAFTA); and contracts concluded orally but subsequently confirmed in writing. A mere reference in an oral contract to a set of arbitration rules or to a law governing the arbitral procedure to the extent the parties did not agree on any procedural rules are cases which are not intended to be addressed by that paragraph.

10. The Working Group agreed that further clarification in any explanatory material accompanying that provision, such as a guide to enactment and use, might be needed as to the factual situations that were intended to be covered by paragraph (3).¹⁷ The Commission might wish to discuss the revised draft article 7 in the light of the factual situations listed below with a view to determining whether the draft adequately covers them, to the extent the Commission intends them to be covered.

Factual situations

11. At its thirty-second session¹⁸ (Vienna, 20-31 March 2000), the Working Group considered several typical examples of situations where the parties agreed on the content of a contract containing an arbitration agreement and where there was written evidence of the contract, but where, nevertheless, current law, if interpreted narrowly, might be construed as invalidating or calling into question the validity of the arbitration agreement.¹⁹

12. The situations in (a) to (h) below are those where the parties have entered into a contract containing an arbitration clause but the form of that clause might be considered as not meeting the statutory requirement:

(a) A contract containing an arbitration clause is formed by one party sending written terms to another party, and that latter party fulfils its obligations under the contract without returning or making any other "exchange" in writing in relation to the terms of the contract;

(b) A contract containing an arbitration clause is formed on the basis of a text proposed by one party, which is not explicitly accepted in writing by the other party, but

¹⁷ Ibid., para. 62.

¹⁸ A/CN.9/468, para. 95; A/CN.9/WG.II/WP. 108/Add.1, para. 12 and A/CN.9/WG.II/WP.110, paras. 16-26.

¹⁹ These fact situations were listed in para. 12 of document A/CN.9/WG.II/WP.108/Add.1 and paras. 16-26 of document A/CN.9/WG.II/WP.110. Among them was also the case where a claimant seeks to initiate an arbitration against an entity not originally party to the arbitration agreement, or where an entity not originally party to the arbitration agreement seeks to rely on it to initiate an arbitration, for example, by relying on the "group of companies" theory. However, the Working Group considered that that situation raised difficult issues and the idea of a harmonised rule did not gain wide acceptance. (A/CN.9/468, para. 95).

that latter party refers in writing to a contract in subsequent correspondence, invoice or letter of credit by mentioning, for example, its date or contract number;

(c) A contract is concluded through a broker who issues the text evidencing what the parties have agreed upon, including the arbitration clause, without there being any direct written communications between the parties;

(d) A reference is made in an oral agreement to a written set of terms, which may be in standard form, that contain an arbitration agreement;

(e) Bills of lading incorporate the terms of the underlying charter party by reference;

(f) A series of contracts are concluded between the same parties in a course of dealing, where previous contracts have included arbitration agreements but the contract in question has not been evidenced by a signed writing or there has been no exchange of writings for the contract;

(g) The original contract contains an arbitration clause, but there is no arbitration clause in an addendum to the contract, an extension of the contract, a contract novation or a settlement agreement relating to the contract (such a “further” contract may have been concluded orally or in writing);

(h) A bill of lading contains an arbitration clause that is not signed by the shipper or the subsequent holder.

13. The situations in (a) to (d) below refer to cases where it may be assumed that the arbitration agreement has been validly entered into by one set of parties and the question relates to the substantive issue of whether that arbitration agreement has become binding on a third party who later becomes party to the contract or assumes certain rights and obligations arising out of the contract:

(a) Third party rights and obligations under arbitration agreements contained in contracts which bestow benefits on third party beneficiaries or stipulation in favour of a third party (*stipulation pour autrui*);

(b) Third party rights and obligations under arbitration agreements following the assignment or novation of the underlying contract to the third party;

(c) Third party rights and obligations contained in arbitration agreements where the third party exercises subrogated rights;

(d) Rights and obligations contained in arbitration agreements where interests in contracts are asserted by successors to parties, following the merger or demerger of companies, so that the corporate entity is no longer the same.

14. It might be noted that the Working Group considered that the fact that the oral conclusion of certain types of contracts may be a customary practice in certain fields of trade or that arbitration agreements in certain types of contracts may be customary had more to do with substantive conditions for finding that an agreement to arbitrate had been reached than with its form. Since it was desirable that the model provision limits itself to issues of form and not deal with substantive conditions for the validity of arbitration agreements, the question of what was customary and how agreement between the parties was reached was considered as falling outside the model provision.²⁰

²⁰ A/CN.9/485, paras. 39-41 and A/CN.9/592, para. 72.

Paragraph (4)

15. The language used in paragraph (4) was consistent with that used in paragraph (2) of article 9 of the United Nations Convention on the Use of Electronic Communications in International Contracts (“the Convention on Electronic Contracts”) and the definitions of “electronic communication” and “data message” reproduced the definitions contained under subparagraphs (b) and (c) of article 4 of the Convention on Electronic Contracts.²¹

Paragraph (5)

16. The provisions of paragraph (5) were included under article 7, paragraph (2), of the Arbitration Model Law, and the Working Group agreed to retain that paragraph.²²

Paragraph (6)

17. The Working Group recalled that a principal purpose of paragraph (6) was to confirm the formal validity of arbitration agreements incorporated by reference. For example, parties might conclude by performance a contract whose terms were established in a standard form but that form might, in turn, not contain within it an arbitration clause but might, instead, incorporate an arbitration clause by reference to another document that contained its terms.²³ The Working Group agreed that, as a matter of general policy, the reference or other link to a written contractual document containing an arbitration clause should be sufficient to establish the formal validity of the arbitration agreement, and that domestic or other applicable law should determine whether the reference was such as to make that clause part of the contract or the separate arbitration agreement, notwithstanding that the contract or the separate arbitration agreement had been concluded orally, by conduct or by other means not in writing.²⁴

2. Notes on the alternative proposal

18. The alternative proposal omitted entirely the writing requirement. Under that provision, oral arbitration agreements would be recognised as valid. In support of the alternative proposal, it was said that many national laws contained requirements as to form for arbitration agreements that could be regarded as outdated. It was noted that, in several jurisdictions that had removed the written form requirement for arbitration agreements, oral arbitration agreements were rarely used and had not given rise to significant disputes as to their validity.²⁵

19. That alternative proposal was seen as establishing a more favourable regime for recognition and enforcement of arbitral awards than was provided for under the New York Convention, and therefore, by virtue of the “more favourable law provision” contained in article VII, paragraph (1), of the New York Convention, the Arbitration Model Law would apply instead of article II, paragraph (2), of the New York Convention.

²¹ A/CN.9/592, para. 64.

²² Ibid., paras. 65-68.

²³ Ibid., para. 69.

²⁴ Ibid., and A/CN.9/508, paras. 27-31.

²⁵ A/CN.9/592, para. 47.

20. While the proposed new text was considered useful to highlight the problems raised by the written form requirements, it was said that removal of the form requirement and of every reference to “writing” could create uncertainty.²⁶

21. The Commission might wish to consider whether the alternative proposal should be retained and, in the affirmative, the form in which the revised draft article 7 and the alternative proposal might be presented in the Arbitration Model Law.

III. Amendment to article 35, paragraph (2), of the Arbitration Model Law

22. Article 35, paragraph (2), of the Arbitration Model Law, modelled on article IV of the New York Convention, provides that the party relying on an award or applying for its enforcement should supply the duly authenticated original award or a duly certified copy thereof, and the original arbitration agreement or a duly certified copy thereof. In considering the drafts regarding the writing requirement for an arbitration agreement, the Working Group considered it necessary to ensure that a modified understanding of the writing requirement (article 7, paragraph (2), of the Arbitration Model Law and article II, paragraph (2), of the New York Convention) be reflected in article 35, paragraph (2), of the Arbitration Model Law, by amending that article as follows:²⁷

Article 35, paragraph (2), of the Arbitration Model Law

The party relying on an award or applying for its enforcement shall supply the original award or a certified copy thereof. If the award is not made in an official language of this State, the court may request the party to supply a certified translation thereof into such language.

IV. Explanatory material

23. At its forty-fourth session (New York, 23-27 January 2006), the Working Group agreed that explanatory material in relation to the legislative provisions on the form of arbitration agreement could be drafted along the lines of the existing explanatory note to the Arbitration Model Law and that such text could replace the current paragraphs 18, 19 and other affected paragraphs of that explanatory note. In addition, the Secretariat was requested to provide more detailed information on the form of arbitration agreement to enacting States in a guide to enactment and use of the revised provisions.²⁸ The Commission might wish to provide further guidance on that matter.

24. When the Commission considered the possibility of preparing model legislation, it was suggested that any model legislation that might be prepared with respect to the form of arbitration agreement might include a provision along the lines of article 7 of the United Nations Convention on Contracts for the International Sale of Goods, which is designed to facilitate interpretation by reference to internationally accepted principles. Similar

²⁶ A/CN.9/589, para. 110.

²⁷ A/CN.9/592, paras. 76-80 and annex II.

²⁸ Ibid., para. 81.

provisions were included in the UNCITRAL Model Law on Electronic Commerce²⁹ and the UNCITRAL Model Law on Cross-Border Insolvency.³⁰ It was said that such a non-binding commentary formulated by the Commission along with the model legislative provision could speed up the process of harmonization of law and its interpretation. The Commission might wish to decide whether such provision needs to be included.³¹

²⁹ Article 3:“(1) In the interpretation of this Law, regard is to be had to its international origin and to the need to promote uniformity in its application and the observance of good faith. (2) Questions concerning matters governed by this Law which are not expressly settled in it are to be settled in conformity with the general principles on which this Law is based.”

³⁰ Article 8: “In the interpretation of this Law, regard is to be had to its international origin and to the need to promote uniformity in its application and the observance of good faith.”

³¹ *Official Records of the General Assembly, Fifty-fourth Session, Supplement No. 17 (A/54/17)*, para. 348 and A/CN.9/WG.II/WP.108/Add.1, para. 23.

**J. Note by the Secretariat on settlement of commercial disputes:
Draft declaration regarding the interpretation of article II,
paragraph (2), and article VII, paragraph (1),
of the New York Convention
(A/CN.9/607) [Original: English]**

II. Notes on the draft declaration regarding the interpretation of article II, paragraph (2), and article VII, paragraph (1), of the New York Convention	5-12	

Introduction

1. At its thirty-second session (Vienna, 17 May-4 June 1999), the Commission decided that one of the priority items for the Working Group should be the requirement of written form for the arbitration agreement contained in article 7, paragraph (2), of the UNCITRAL Model Law on International Commercial Arbitration (“the Arbitration Model Law”) and article II, paragraph (2), of the 1958 New York Convention on the Recognition and Enforcement of Foreign Arbitral Awards (“the New York Convention”).¹ At its thirty-fourth session (Vienna, 25 June-13 July 2001), the Commission noted that, while the Working Group should not lose sight of the importance of providing certainty as to the intent of the parties to arbitrate, it was also important to work towards facilitating a more flexible interpretation of the strict form requirement contained in the New York Convention, so as not to frustrate the expectations of the parties when they agreed to arbitrate. In that respect, the Commission took note of the possibility that the Working Group examine further the meaning and effect of the more-favourable-law provision of article VII, paragraph (1), of the New York Convention.²

2. At its thirty-fifth session (New York, 17-28 June 2002), the Commission noted that the Working Group had discussed a draft interpretative instrument regarding article II, paragraph (2), of the New York Convention. The Commission noted that the Working Group could not, at that stage, reach a consensus on whether to prepare an amending protocol or an interpretative instrument to the New York Convention. The Commission was of the view that member and observer States participating in the Working Group’s deliberations should have time to consult on those important issues, including the possibility of examining further the meaning and effect of the more-favourable-law provision of article VII, paragraph (1), of the New York Convention, as noted by the

¹ *Official Records of the General Assembly, Fifty-fourth Session, Supplement No. 17 (A/54/17)*, paras. 344-350 and para. 380.

² *Ibid.*, *Fifty-sixth Session, Supplement No. 17 (A/56/17)*, para. 313.

Commission at its thirty-fourth session.³

3. The Working Group considered the topic of the written form requirement contained in article II, paragraph (2), of the New York Convention and the preparation of an interpretative instrument at its thirty-second (Vienna, 20-31 March 2000),⁴ thirty-third (Vienna, 20 November-1 December 2000),⁵ thirty-fourth (New York, 21 May-1 June 2001),⁶ thirty-sixth (New York, 4-8 March 2002),⁷ and forty-fourth (New York, 23-27 January 2006)⁸ sessions.

I. Draft declaration regarding the interpretation of article II, paragraph (2), and article VII, paragraph (1), of the New York Convention

4. The text of the draft declaration regarding the interpretation of article II, paragraph (2), and article VII, paragraph (1), of the New York Convention, as agreed by the Working Group at its forty-fourth session,⁹ reads as follows:

“Declaration regarding interpretation of article II, paragraph (2), and article VII, paragraph (1), of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards, done at New York, 10 June 1958

“The United Nations Commission on International Trade Law,

“[1] Recalling resolution 2205 (XXI) of the General Assembly of 17 December 1966, which established the United Nations Commission on International Trade Law with the object of promoting the progressive harmonization and unification of the law of international trade,

“[2] Conscious of the fact that the different legal, social and economic systems of the world, together with different levels of development are represented in the Commission,

“[3] Recalling successive resolutions of the General Assembly reaffirming the mandate of the Commission as the core legal body within the United Nations system in the field of international trade law to coordinate legal activities in this field,

“[4] Conscious of its mandate to further the progressive harmonization and unification of the law of international trade by, inter alia, promoting ways and means of ensuring a uniform interpretation and application of international conventions and uniform laws in the field of the law of international trade,

“[5] Convinced that the wide adoption of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards has been a significant achievement in the promotion of the rule of law, particularly in the field of international trade,

“[6] Recalling that the Conference of Plenipotentiaries which prepared and opened

the Convention for signature adopted a resolution, which states, *inter alia*, that the Conference ‘considers that greater uniformity of national laws on arbitration would further the effectiveness of arbitration in the settlement of private law disputes’,

“[7] *Bearing in mind* differing interpretations of the form requirements under the Convention that result in part from differences of expression as between the five equally authentic texts of the Convention,

“[8] *Taking into account* article VII, paragraph (1), of the Convention, a purpose of which is to enable the enforcement of foreign arbitral awards to the greatest extent, in particular by recognizing the right of any interested party to avail itself of law or treaties of the country where the award is sought to be relied upon, including where such law or treaties offer a regime more favourable than the Convention,

“[9] *Considering* the wide use of electronic commerce,

“[10] *Taking into account* international legal instruments, such as the 1985 UNCITRAL Model Law on International Commercial Arbitration, as subsequently revised, particularly with respect to article 7, the UNCITRAL Model Law on Electronic Commerce, the UNCITRAL Model Law on Electronic Signatures and the United Nations Convention on the Use of Electronic Communications in International Contracts,

“[11] *Also taking into account* enactments of domestic legislation, including case law, more favourable than the Convention in respect of form requirement governing arbitration agreements, arbitration proceedings and the enforcement of arbitral awards,

“[12] *Considering* that, in interpreting the Convention, regard is to be had to the need to promote recognition and enforcement of arbitral awards,

“[13] *Recommends* that article II, paragraph (2), of the Convention be applied recognizing that the circumstances described therein are not exhaustive,

“[14] *Recommends* that article VII, paragraph (1), of the Convention should be applied to allow any interested party to avail itself of rights it may have, under the law or treaties of the country where an arbitration agreement is sought to be relied upon, to seek recognition of the validity of such an arbitration agreement.”

II. Notes on the draft declaration regarding the interpretation of article II, paragraph (2), and article VII, paragraph (1), of the New York Convention

5. The discussions in the Working Group initially focussed on article II, paragraph (2), of the New York Convention and on the various options available to deal with difficulties that had arisen in its interpretation. The Working Group was generally of the view that there was a need for provisions which conformed to current practice in international trade with regard to requirements for written form, and that the practice in some respects was no longer reflected by the position set forth in article II, paragraph (2) (and other international legislative texts modelled on that article), if interpreted narrowly.¹⁰ The Working Group discussed possible alternative ways of achieving a broader interpretation of article II,

¹⁰ A/CN.9/468, para. 88.

paragraph (2).¹¹ These included a protocol amending the terms of article II, paragraph (2); adoption of a declaration, resolution or statement addressing the interpretation of the New York Convention and providing that, for the avoidance of doubt, article II, paragraph (2) was intended to cover certain situations or to have a certain effect; encouraging a liberal interpretation of the New York Convention by following the approach of some courts of interpreting article II, paragraph (2) in the light of the Arbitration Model Law;¹² and preparing practice guidelines or notes proposing that article 7 of the Arbitration Model Law could be used as an interpretation tool to clarify the application of article II, paragraph (2).¹³

6. The prevailing view was that, since formally amending or creating a protocol to the New York Convention was likely to exacerbate the existing lack of harmony in interpretation and that adoption of such a protocol or amendment by a number of States would take a significant number of years and, in the interim, create more uncertainty, that approach was essentially impractical. Taking the view that guidance on interpretation of article II, paragraph (2) would be useful in achieving the objective of ensuring uniform interpretation that responded to the needs of international trade, the Working Group decided that a declaration, resolution or statement addressing the interpretation of the New York Convention that would reflect a broad understanding of the form requirement could be further studied to determine the optimal approach.¹⁴

7. At its thirty-sixth session (New York, 4-8 March 2002), the Working Group discussed a draft interpretative instrument regarding article II, paragraph (2), of the New York Convention, in order to offer guidance on the interpretation and application of the writing requirement contained in that article and to achieve a higher degree of uniformity. Article II, paragraph (2) has been the subject of different interpretations in State courts. In particular, what is meant by the term “signature”, whether the signature requirement applies to both the arbitration clause in a contract as well as the arbitration agreement and what is required by an “exchange of letters or telegrams” are all matters on which there have been different and sometimes conflicting interpretations.¹⁵ A/CN.9/WG.II/WP.139. The differing interpretations in State courts originated as well from the differences of expression between the five equally authentic texts of the New York Convention. Such differences were partly due to the fact that, for example, in the English version, the definition of “agreement in writing” (by using the word “includes”) appeared to provide a non-exhaustive list of examples whereas some of the other equally authentic language versions appeared to provide an exhaustive list of elements of the definition.¹⁶

8. The draft declaration considered by the Working Group at its thirty-sixth session (New York, 4-8 March 2002) contained the recommendation or declaration that the definition of ‘agreement in writing’ in article II, paragraph (2), of the New York Convention should be interpreted to include [wording inspired from the revised text of article 7 of the UNCITRAL Model Law on International Commercial Arbitration].¹⁷ Views were expressed in the Working Group that the draft legislative provisions revising article 7 of the Arbitration Model Law being considered by the Working Group differed

¹¹ A/CN.9/468, paras. 88-99.

¹² A/CN.9/WG.II/WP.108/Add.1, para. 36 and footnote 9.

¹³ A/CN.9/WG.II/WP.108/Add.1, paras. 33 and 34.

¹⁴ A/CN.9/468, paras. 88-99.

¹⁵ A/CN.9/WG.II/WP.139.

¹⁶ A/CN.9/592, para. 87.

¹⁷ A/CN.9/508, paras. 40-50.

significantly from article II, paragraph (2), of the New York Convention in that, for example, under the draft legislative provision, an oral agreement that referred to written arbitration terms and conditions would be regarded as valid, whereas under article II, paragraph (2), of the New York Convention, as interpreted in many legal systems, it would not be so regarded.¹⁸ Views were therefore expressed that it might not be appropriate to use an interpretative instrument to declare that article II, paragraph (2), of the New York Convention should be interpreted as having the meaning of the revised draft article 7 of the Arbitration Model Law. In considering the possibility of amending the Arbitration Model Law as a tool for interpreting article II, paragraph (2), of the New York Convention (without amending the New York Convention), the Working Group noted as well that national legislation might operate in the context of the more-favourable-law provision of article VII, paragraph (1), of the New York Convention.

9. At its forty-fourth session (New York, 23-27 January 2006), the Working Group proceeded to consider the text of a draft interpretative declaration on the interpretation of article VII, paragraph (1), of the New York Convention. That approach was considered as encouraging the development of rules favouring the validity of arbitration agreements in a wider variety of situations and encouraging States to adopt the revised version of article 7 of the Arbitration Model Law and pro-enforcement laws.¹⁹ At that session, the Working Group agreed to include in the draft declaration provisions clarifying the meaning of article II, paragraph (2), of the New York Convention.²⁰

10. It should be noted that the acceptability of allowing less restrictive form requirements to operate through article VII, paragraph (1), of the New York Convention would depend on whether article II, paragraph (2), of the New York Convention was regarded as establishing a requirement of form from which States may depart when their national law on the form requirement is more favourable (thus leaving States free to adopt less stringent requirements) or whether the New York Convention was interpreted as providing a unified form requirement which arbitration agreements must comply with under the New York Convention. Courts, in many States, have established a clear position as to the circumstances in which article VII, paragraph (1) might be applied to uphold arbitration agreements where the form requirement set out in article II, paragraph (2) would otherwise not be met. The advantage of applying article VII, paragraph (1) would be to avoid the application of article II, paragraph (2) and, as States would enact more favourable provisions on the form requirement for arbitration agreements, would allow the development of rules favouring the validity of arbitration agreements in a wider variety of situations. Encouraging the wide adoption by States of article 7, paragraph (2), of the Arbitration Model Law, as proposed to be revised, could provide a useful means of achieving greater uniformity as to the form requirement. A declaration encouraging the application of more favourable legislation would have the added advantage of overcoming the requirement in article IV of the New York Convention regarding the presentation of an original of the arbitration agreement or a certified true copy. The Working Group had already proposed the deletion of that requirement from article 35, paragraph (2), of the Arbitration Model Law.²¹

11. The Commission might also wish to discuss the extent to which these considerations relating to article VII, paragraph (1), of the New York Convention might have an impact on future work regarding the Arbitration Model Law. Certain provisions of the Arbitration

¹⁸ A/CN.9/508, para. 45.

¹⁹ A/CN.9/592, paras. 85-86.

²⁰ *Ibid.*, para. 88.

²¹ A/CN.9/592, paras. 76-80.

Model Law, which mirror the text of the New York Convention, such as for example, articles 7 and 35, paragraph (2), are proposed to be amended, so as to create more liberal rules, consistent with modern practice. The Commission might wish to discuss the extent to which the Arbitration Model Law might become the instrument through which the enforcement regime would be modernised. An alternative would be to further the modernization efforts by preparing an international binding instrument on international commercial arbitration, which would consist in developing the principles of the Arbitration Model Law into a convention, still allowing the existing instruments to operate in harmony.

12. When the Commission considered the possibility of preparing model legislation with a view to superseding article II, paragraph (2), of the New York Convention by relying on article VII, paragraph (1), of the New York Convention, it was suggested to establish (in addition to model legislation) guidelines or other non-binding material to be used by courts as guidance from the international community in the application of the New York Convention. It was said that such a non-binding commentary formulated by the Commission could speed up the process of harmonization of law and its interpretation.²² The Commission might wish to provide further guidance on that matter.

I. Introduction

1. At its thirty-second session (Vienna, 17 May-4 June 1999), the Commission decided that priority items for the Working Group should be: the requirement of written form for the arbitration agreement contained in article 7 (2) of the UNCITRAL Model Law on International Commercial Arbitration (“the Arbitration Model Law”) and article II (2) of the 1958 New York Convention on the Recognition and Enforcement of Foreign Arbitral Awards (“the New York Convention”),¹ as well as enforceability of interim measures of protection.²

2. The Working Group finalised its work on the draft legislative provisions regarding interim measures and the form of arbitration agreement as well as on the draft declaration regarding the interpretation of article II (2), and article VII (1), of the New York Convention at its forty-fourth session (New York, 23-27 January 2006). By a note verbale dated 21 March 2006, the Secretary-General transmitted the texts of the draft legislative provisions on interim measures and the form of arbitration agreement as well as the draft declaration regarding the interpretation of articles II (2) and VII (1) of the New York Convention, as annexed to the report of the Working Group on that session (A/CN.9/592) to States and to intergovernmental and international non-governmental organizations that are invited to attend the meetings of the Commission and its working groups as observers. Short notes on each text were issued separately (A/CN.9/605 on the draft legislative provisions on interim measures, A/CN.9/606 on the draft legislative provisions on the form of arbitration agreement, A/CN.9/607 on the draft declaration regarding the interpretation of articles II (2), and VII (1), of the 1958 New York Convention).

¹ *Official Records of the General Assembly, Fifty-fourth Session, Supplement No. 17 (A/54/17)*, paras. 344-350 and 380.

² *Ibid.*, paras. 371-373 and 380.

3. The present document reproduces the first comments received by the Secretariat on draft legislative provisions on interim measures and the form of arbitration agreement as well as on the draft declaration regarding the interpretation of articles II (2) and VII (1) of the New York Convention. Comments received by the Secretariat after the issuance of the present document will be published as addenda thereto in the order in which they are received.

Comments from Guatemala on the amendments to the UNCITRAL Model Law on Arbitration

I have the honour to transmit below comments on the draft provisions to be included in the amendments to the UNCITRAL Model Law on Arbitration (the Model Law). It was my understanding that the comments should be as concrete as possible, and they are that. However, if the Permanent Mission considers that some comments should be more detailed, I stand ready to assist.

In the first place, it should be recognized that interim measures and preliminary orders have attracted particular interest and gained special significance as an area where progress could be made with arbitration regulations that offer greater possibilities to arbitrators and arbitral tribunals as regards the power to decree or prescribe such measures or orders. That is one of the main reasons why for the past two years or so work has been under way in Guatemala on a draft law, submitted by the Supreme Court, whose purpose it is to assign greater coercive powers to arbitrators as regards the capacity to decree or prescribe such measures.

It should be mentioned that this exercise has been criticized by the person who is preparing this report, on the grounds that it aims to give direct coercive powers to arbitrators, enabling them to decree such measures without any judicial support or help; in other words, it aims to confer "*jus imperium*" on arbitrators with regard to interim measures or anticipatory measures or preliminary orders. It would seem that the proposal prepared by the relevant working group during the forty-fourth session (held in New York from 3 to 27 January 2006) is not only more reasonable in that respect but also more in line with the overall contents of the Model Law.

That having been said, there follow detailed comments on the analysed text.

Article 17 (1)

The following wording is suggested: (1) Unless otherwise agreed by the parties, the arbitral tribunal may, at the request of any party, grant interim measures (it is suggested that the word A be replaced by ANY).

This semantic change creates a broader or more balanced impression of the situation for all parties to the arbitral process.

Article 17 (2)

No actual change in wording is suggested, but it is suggested that thought be given to the use of the word “laudo” [award] to denote the means by which an interim measure might be granted. Although the reason for using that word is clear, being linked principally to the executive force of the word when used in a State’s jurisdictional tribunals, in some jurisdictions it may give rise to confusion insofar as it refers to the final conclusion of legal proceedings (“laudo” is equivalent to “sentencia” [judgement], and in ordinary or jurisdictional proceedings interim measures are granted through preliminary orders or decisions). Perhaps the expression “laudo interino” [interim award] could be used, as, I believe, it is in other jurisdictions, and, if it were used, perhaps a definition of this type of “laudo” [award] could be added to the article of the Model Law containing the definitions.

If the use of the expression “laudo interino” [interim award] were accepted, where reference is made in Article 17 (2) to “a subsequent award” the expression “laudo definitivo” [final award] would have to be used in the subparagraph in question.

Article 17 bis**Subparagraph (1) (a)**

It is suggested that, instead of the words “no resarcible” [not reparable], use be made of “no reversible” [irreversible] or “irreparable”.

Subparagraph (1) (b)

It is suggested that this subparagraph be deleted. In the Guatemala jurisdiction it could be used as a means of impugning or discrediting the arbitrators on the grounds that they had advanced in some way or other an opinion about the claims of one of the parties. Perhaps it would be better simply to indicate, in this or some other provision of the Model Law amendment proposal, that the arbitrators shall decide on the measures in respect of which they are competent, or to establish a higher standard of care for the arbitrators as regards their decision whether or not to grant such measures.

Section 2

It is suggested that in the first line “a toda demanda” [to a request] be replaced by “a todo requerimiento” [the English version would probably not be affected]. If this change were acceptable, it would have to be made in other provisions as well—for example, in Article 17 ter. Similarly, it is suggested that in various articles of the proposal the word “demandante” in the phrase “demandante de una medida cautelar” [party requesting an interim measure] or “demandante de una orden preliminar” [party requesting a preliminary order]* be replaced by “solicitante” or “requirente”.

* *Translator’s note:* The phrase “demandante de una orden preliminar” does not appear to occur in A/CN.9/592.

Article 17 ter

As the term “Órdenes preliminares” [Preliminary orders] is not used in all jurisdictions in their laws relating to legal procedure,³ perhaps, as with “medidas cautelares”, a definition of that term should be included.

It would be useful to know more about the relationship, in the case in question, between preliminary orders and interim measures, in order to decide whether it is necessary to make further comments regarding this and other articles.

Further to the previous comment, the regulation relating to the recognition and enforcement of interim measures should be examined more thoroughly, as it would appear that these are thought of principally in the context of international arbitrations, whereas in some jurisdictions, such as that of Guatemala, the Model Law has been adopted as domestic legislation covering both international and national arbitrations. It will be necessary to determine whether the proposed regulation applies equally to national arbitrations. Finally, as regards the revised legal provisions relating to the form of the arbitral agreement there is only one comment, as follows.

Article 7 (3)

The following wording is suggested:

“An arbitration agreement shall be in writing if there exists any record or documentary evidence of its contents, regardless of whether the agreement or the contract of which it is a part was concluded orally, through the execution of certain legal documents or by some other means.”

Italy

[Original: English]
[3 May 2006]

Comments on Draft legislative provisions on interim measures and preliminary orders (Annex I)

Under the present status of Italian law on arbitration, arbitrators are not granted the power to issue interim measures or preliminary orders. The Italian view of the matter is that such power ought to be reserved to the exclusive benefit of the Court of competent jurisdiction. This fundamental choice of the Italian legal system is not expected to change in the near or foreseeable future. Thus, the proposed new UNCITRAL rules on interim measures and preliminary orders are unlikely to be adopted, in whole or in part, by the Republic of Italy. This would be even more stringent for interim measures recognized *inaudita altera parte*. The Italian Delegation had already submitted in the past comments and proposals on the above, that are reiterated and recalled here.

Assuming however that, notwithstanding the above, the Commission may still find it useful to receive comments from an Italian perspective on such proposed new rules, the following comments are offered.

³ In Guatemala at least, the term is not used in laws relating to civil and trade law procedure. Instead, the terms “medidas cautelares”, “medida’s preventivas” or “medidas de garantia” are used.

1. The entire Chapter IV bis (from Article 17 to Article 17 undecies) is drafted in a very detailed and analytical form and in a legal style that, it is submitted, is likely to be accepted without difficulties only by countries which belong to the common law tradition.

Adoption by countries, such as Italy, belonging to the civil law tradition would encounter less difficulties, if a more concise style were adopted and more reliance were placed on the traditional gap-filling function of national procedural rules governing in each country the exercise of summary jurisdiction on grounds of urgency.

2. It would be appropriate to make it clear (whether in the text of the Draft provisions or in an official Commentary or in the Guide to Enactment) that in Chapter IV bis the word “party” may only mean a “party to the arbitration agreement”, not a third party whose position may be affected by the interim measure or the preliminary order, but whose consent to being subjected to the jurisdiction of the arbitral tribunal is lacking.

Article 17 quater (2) provides a good illustration of a provision whose legal certainty would benefit, it is submitted, from the insertion of the above suggested clarification.

3. In the light of the strong opposition that was voiced by a number of delegations within the Working Group against the opt-out formula which was ultimately selected in Article 17 (1) and Article 17 ter (1), the Commission may wish to reconsider the advisability of offering a final text, in which an opt-in formula may be added as an alternative solution.

Thus, as an alternative to “Unless otherwise agreed by the parties”, the final text could also offer the possibility of choosing, as an opening statement of Article 17 (1) and Article 17 ter (1), the words “If so agreed by the parties” or any other equivalent wording.

Comments on Draft legislative provisions on the form of arbitration agreement (Annex II)

Annex II offers a new revised “long” text of Article 7 (“Definition and form of arbitration agreement”) and an alternative “short” text (“Definition of arbitration agreement”).

A preference is expressed for the “long” main proposal, whose underlying intent is to introduce an important distinction, deserving approval.

Concisely stated, the distinction is between the certainty of the parties’ will to arbitrate and the certainty of the rules designed to govern the conduct of the arbitration proceedings.

Whilst in many national legal systems the written form of the arbitration agreement is still required for the purposes of achieving the first type of certainty (i.e., the certainty of the will to arbitrate), the proposed revision of Article 7 (long text) intends to achieve a radical change of perspective, by shifting the focus on the second type of certainty (i.e., by aiming at securing the certainty of the rules designed to govern the conduct of the arbitration proceedings).

In substance, the proposed revision of Article 7 (long text) liberalizes the manner in which the parties may express their will or consent to arbitrate (this may be done even “orally, by conduct or by other means”), whilst the form requirement is still imposed for the different purpose of making sure that there is a “recorded” certainty of the rules, by which the arbitration will be conducted.

The key provision is Article 7 (3), in respect of which the Commission is called to assess whether the underlying intent of achieving certainty of the arbitration rules would be

better served by defining the form requirement by reference to a record of the “terms” (first option in square brackets) or by reference to a record of the “content” (second option in square brackets) of the arbitration agreement.

A strong preference is expressed herein for the use of the word “content” as opposed to “terms”, since “content” appears to better describe the prescriptive internal substance of an agreement for which the law requires the use of an external form.

However, this is merely the indication of the preferable choice between “terms” and “content”. The Commission may well wish to consider the advisability of adopting a different and more satisfactory wording of the entire Article 7 (3), provided always that the fundamental choice of prescribing the form requirement for the sole purpose of the certainty of the arbitration rules is preserved in its substance.

Comments on Draft declaration regarding the interpretation of article II, paragraph (2) and article IV, paragraph (1), of the New York Convention (Annex III)

A favourable opinion is expressed in support of this Draft declaration.

Although it may be difficult to assess in precise legal terms how effective, if adopted, the declaration may be in reducing the present lack of uniformity in the interpretation of the New York Convention, it would be unrealistic to assume that a different and more ambitious solution would have greater chances to succeed.

MC/DTL Administrative letter No.26[2006]

**Comments in response to the relevant draft documents of Working Group II of the
United Nations Commission on International Trade Law**

The three draft documents prepared by Working Group II (Arbitration and Conciliation) and as forwarded by UNCITRAL have been duly received. After consideration, we hereby submit the following comments:

**I. Revised Legislative Provisions on Interim Measures and
Preliminary Orders****(I) General comments on the text as a whole**

The present draft represents an extensive expansion of the provisions in Article 17 of the 1985 UNCITRAL Model Law on International Commercial Arbitration regarding the power of the arbitral tribunal to order interim measures. The terms “interim measures” and “preliminary orders” are similar in meaning to “preservative measures” known in China’s legal system, which include preservative measures towards property and preservative measures with regard to evidence. The Arbitration Law of China states in its Article 28 that “... If one of the parties applies for property preservation, the arbitration commission

shall submit to a people's court the application of the party in accordance with the relevant provisions of the Civil Procedure Law"; and in its Article 46 that "... If the parties apply for such preservation, the arbitration commission shall submit the application to the basic-level people's court of the place where the evidence is located." In other words, the Chinese law has not accorded the arbitral tribunal the power to order preservative measures, nor the power to order interim measures or issue preliminary orders. In this connection, therefore, the present draft is in conflict with the relevant provisions of the Chinese civil procedure law and the arbitration law. There is no legal basis for courts in China to recognize and enforce interim measures and preliminary orders from foreign arbitral tribunals.

(II) Comments on specific provisions

Within the extent of our general views as above, we make the following suggestions for amendment of specific provisions:

1. For paragraph (1)(b), Article 17 bis—Conditions for granting interim measures in Annex I, Revised legislative provisions on interim measures and preliminary orders, it is suggested that subparagraph (b) "There is a reasonable possibility that the requesting party will succeed on the merits of the claim, ..." be deleted in its entirety, as it is no easy task to make an accurate prejudgement on the likelihood of success of the claim at the time of application for interim measures. Besides, who is going to determine such likelihood and how should it be determined remains a tough issue. It takes time to make such determinations. And interim measures are of such an urgent nature that does not allow for longer periods of time to decide on the possible existence of the likelihood of success. Delay in time will defeat the purpose of the provisions on interim measures.
2. For paragraph (5), Article 17 quater—Specific regime for preliminary orders, it is suggested that the clause "but shall not be subject to enforcement by a court" be deleted from the paragraph "A preliminary order shall be binding on the parties but shall not be subject to enforcement by a court ..." for a preliminary order that is not subject to enforcement by a court will bring about no real effect.
3. For the second line in Article 17 quinquies—Modification, suspension, termination, it is suggested to insert the words "if it is justified" after "upon application of any party", since it is unacceptable for an application not to be justified.
4. For paragraph (1), Article 17 novies—Recognition and enforcement, it is suggested to delete the phrase "unless otherwise provided by the arbitral tribunal", since there should be no provision otherwise by the arbitral tribunal once it has issued an order for "interim measures". The phrase lends little room for reasonable understanding.

II. Revised legislative provisions on the form of arbitration agreement

(I) General comments on the text as a whole

The text is an attempt, in the light of technological developments, for revision by way of expanded understanding of the requirement for “writing” in Article 7 of the Model Law regarding the definition and form of an arbitration agreement. The Arbitration Law in effect in China contains similar requirements for arbitration agreements to be “in writing”. With technological advancement, inter-personal communications and the conclusion of contracts are being done increasingly by verified means, which undoubtedly calls for a corresponding expansion in the interpretation of the requirement for “writing”, hence the necessity to revise Article 7 of the Model Law. For this purpose, we prefer the first alternative text which describes in specific terms the forms of “writing” and lends itself to easier operation, while being consistent with the understanding of written forms of contracts in China’s current practice.

(II) Comments on specific provisions

1. For paragraph (3), Article 7—Definition and form of arbitration agreement under (1) Revised draft article 7 in Annex II, Revised legislative provisions on the form of arbitration agreement, it is suggested to substitute in the second line the word “established” for the word “recorded”, the reason being that “recorded” is narrower in its meaning than the word “established”.
2. For Article 7— Definition of arbitration agreement under (2) Alternative proposal, the text is less than satisfactory and therefore is to be discarded.

III. Draft declaration regarding the interpretation of article II, paragraph (2), and article VII, paragraph (1), of the New York Convention

The draft declaration is intended to express the desire that States would give at an earlier date their valid interpretation of the form requirements for arbitration agreements so as to keep pace with the development in the forms of writing in the modern society. The ultimate goal is to lead to recognition and enforcement of international commercial arbitration awards in various States to the greatest possible extent. The declaration is in correspondence with the revision and improvement of Article 7 of the Model Law. We find the current text of the declaration to be appropriate and, therefore, fully acceptable.

IV. Expressions in the Chinese and English texts

With regard to individual cases of inconsistency in the expressions between the Chinese and the English texts, we propose to delay our examination and finalization until after the meetings later this year or next year when the English texts are finalized.

3. Germany

[Original: English]

[8 May 2006]

The German Government would like to express its thanks for the excellent Draft. Our comments are as follows:

1. Interim measures, article 17 et seq.

The German Government welcomes the Draft of article 17 et seq. now put forward. We therefore do not intend to make any suggestions regarding changes.

2. Written form requirement, article 7

The German Government favours the alternative proposal, which does not contain any provisions concerning the form of the communication. It is above all actual circumstances in practice which speak for this solution, since such agreements are often not set out in writing.

Further, the “warning function” of the written form will probably have become obsolete by now since arbitration is viewed as equal to national jurisdiction. As, in addition, the first solution also provides for the possibility of setting the agreement out in writing in retrospect, the written form can no longer be seen as having a warning function; both models thus produce the same result. The fact that the written form can be used as evidence merely has practical implications for the presentation of evidence and, as a result, also justifies omitting any form requirements. It was, not least, statements by those delegations who already have freedom of form and who unanimously reported only positive experience which were convincing.

3. Relationship to article II (2) of the New York Convention

The declaration on article II (2) of the New York Convention is to be welcomed as an interim solution. However, a revision of the New York Convention should be seriously considered for the future. This may involve a great deal of work, but the result should be favoured on account of its higher degree of legal certainty. If the New York Convention itself is not amended, this will merely lead to the mitigation of resulting problems caused by legal instruments such as the proposed declaration. The problem itself will remain, nonetheless. Against this background, an attempt should be made to tackle this problem, too.

4. Belgium

[Original: French]
[12 May 2006]

These comments are limited to the draft legislative provisions on the written form of the arbitration agreement and to the draft declaration regarding the interpretation of the New York Convention on the Recognition and Enforcement of Foreign Arbitral Awards.

1. As regards the draft legislative provisions on the written form of the arbitration agreement, three comments may be made.

1.1. The first relates to the fact that these draft legislative provisions set out two different proposals for revising Article 7 of the Model Law on International Commercial Arbitration and that it seems to be envisaged that these two proposals could be approved simultaneously by the Commission.

However, these two proposals would appear to be irreconcilable as the first one aims to soften the requirement in Article 7 that the arbitration agreement be in writing, whereas the second one aims to suppress it.

Belgium therefore considers that a choice should be made and that the first proposal, which aims to soften the requirement, is preferable.

The requirement that the arbitration agreement be in writing is a legitimate requirement given the impact of the agreement on the basic right of access to the courts. While it is reasonable to soften this requirement and thereby adapt it to the needs of international trade, Belgium considers that simply suppressing it would be excessive.

1.2. The second comment relates to the content of the first aforementioned proposal for revising Article 7 of the Model Law, and particularly to the formulation of its paragraph 3.

Belgium believes that this provision should not be interpreted in the sense that a written document which has nothing at all to do with the parties, such as a copy of the rules of an arbitration body, could be considered to constitute an arbitration agreement in written form.

On the contrary, paragraph 3 of Article 7 should be interpreted in the sense that, on the one hand, in all cases there must be a written document emanating from at least one of the parties, such as a written proposal, even in a simplified form, to conclude an arbitration agreement, but that, on the other hand, there is no need for the finalization of the contractual process to be documented as such by a contract “in due form”, since it will be possible to prove its finalization on the basis of the existing written document.

An explanatory comment should make this point clearer.

1.3. Further to the preceding comment, Belgium wishes to make it clear that it is not in favour of the modification to Article 35.2 of the Model Law proposed with a view to suppressing the requirement that the party calling for the enforcement of an arbitral award must supply the original of the arbitration agreement.

Such a modification would create an undesirable disparity between the Model Law and the New York Convention.

2. As regards the draft declaration relating to the interpretation of the New York Convention, it would seem reasonable to consider that the purpose of this interpretative declaration is to establish a link between the proposed modifications to Article 7 of the Model Law and the New York Convention.

Belgium therefore considers that, if the revision of Article 7 of the Model Law aims to soften the requirement in this article that the arbitration agreement be in writing (see point 1.1 above), the purpose of the interpretative declaration should be to recommend that account be taken of such softening in interpretations of the same writing requirement formulated in Article II of the New York Convention.

Belgium therefore questions the appropriateness of including in the declaration a reference to Article VII of the New York Convention, since recourse to this article in the present context presupposes the disregarding of Article II of the Convention.

United Kingdom comments on Article 17 of the Model Law and the future work of UNCITRAL

Following the last meeting of the Working Group in New York, we agreed to send comments on the work of UNCITRAL, in light of its recent project on interim measures and in particular “preliminary orders”.

As we noted at the meeting, the United Kingdom has mixed feelings about the completion of this project.

On the one hand, we are of course happy that the Working Group has finally arrived at an agreed draft, which can go forward to the Commission next month, leaving the way clear, at last, for new projects. We would particularly like to congratulate the Chairman and the Secretariat for the tireless work and drafting skills in arriving at a final solution after many difficult sessions.

On the other hand, however, it is the nature of this process itself that gives rise to serious concerns—quite apart from the United Kingdom’s reservations on the substance of the new provision (which are now a matter of record, and need not be restated).

On any view, the Working Group’s draft on “preliminary orders” has been the subject of extraordinary controversy inside and (more troublingly) outside UNCITRAL. Even ahead of the Commission’s consideration, it is already apparent that the new provision will be met with a substantial body of criticism in the international field. This is not to say that it does not also have a body of support, but the key question for us is whether this is really a position in which UNCITRAL should ever find itself. We cannot

think of any previous project (short of the Model Law itself) that has had such a difficult gestation, and required so many resources for what, so far as “preliminary orders” are concerned, may be considered a somewhat modest result.

Early on in this particular project, it became manifest that there was no international consensus on “*ex parte*” measures. On the contrary there was—and remains—profound disagreement amongst specialists. The result was inevitable: lengthy debates; difficult Working Group sessions; and a final draft that has the weaknesses of any hard fought compromise.

Our fear, which we have expressed previously, is that the end result may damage UNCITRAL’s international standing and future influence. UNCITRAL has a unique reputation worldwide in the development of commercial law. In our view, a key element in its success has been its acceptance as a neutral and expert body, able to express an international consensus, and therefore of significant influence across diverse cultures and legal traditions. It has been and should be a source of innovation, but within careful bounds. As soon as its work is perceived as controversial, or a vehicle for the interests of a few dominant delegations, it may lose this standing. Equally, as soon as its processes are seen as inefficient in terms of cost and time, it may be that much harder to attract and maintain international participation.

This is all the more regrettable in this case, given that the relatively minor “*ex parte*” element of our work has been allowed to overshadow the rest of the project, and what is certainly a commendable draft on “*inter partes*” measures.

Our suggestion is that this experience be borne in mind in structuring UNCITRAL’s future work. In particular, it is our hope that UNCITRAL will continue to innovate, and to push the international consensus as far as it will go. At the same time, however, it is vital that UNCITRAL avoids “trouble spots”, internal division, and the expenditure of disproportionate resources where this is avoidable.

The United Kingdom strongly supports the work of UNCITRAL, and will continue to do so. We hope that these few observations will be understood, as they are intended, as constructive comments, and we look forward to working closely with UNCITRAL in its future work in this area.

[Original: French]
[29 May 2006]

General remarks

1. The French delegation notes with regret that the Working Group's method of functioning did not fully meet its expectations. It felt that, on numerous occasions, every effort had not been made to reach truly consensus solutions. For example, the Working Group unfortunately did not take into account the reservations expressed—by a majority at the last plenary session—regarding “preliminary orders” and preferred to make no amendments whatsoever to the provisions drafted on this issue. Also, it adopted a provision on “anti-suit injunctions” despite the reservations expressed by many delegations. The reports of the Working Group are sometimes elliptical on these matters and do not sufficiently make the point that a compromise could be achieved only under particularly difficult conditions.

2. As to substance, the French delegation gives a mixed appraisal of the work of the Working Group, in which it nonetheless participated positively and constructively. While the definitions of interim measures that can be ordered by an international arbitrator are generally welcome, many provisions are overly cumbersome—as a comparison with the original provisions of the Model Law reveals—if not questionable from the perspective of arbitration practice.

3. From the viewpoint of France, all of this compromises the quality and desired universal scope of the new model legislative provisions. A symposium held last February at the Senate in Paris on the UNCITRAL project showed that for a good many French legal writers and arbitration practitioners the model provisions gave rise to numerous,

strong reservations, which are largely in line with those formulated by the French delegation during the course of the work.

Interim measures of protection

Draft article 17 (2) (b): anti-suit injunctions

4. The French delegation is opposed to the inclusion of “anti-suit” measures among ordinary interim measures. Measures of this type do not fall into the category of interim measures. Also, they are alien to the continental law tradition. Anti-suit injunctions are questionable since they deny a party the legal remedies to which it is normally entitled. Hence such a course of action is challengeable within the European Union.¹

5. The French delegation wishes to request the deletion of this provision, which was inserted in the revised provisions without any extensive discussion of the potential consequences on the structure of the provisions as a whole (cf. point 1 above).

Draft article 17 ter: preliminary orders

6. A large group of countries shared the French delegation’s major objections to such measures, believing that they ran counter to party autonomy, the foundation of international commercial arbitration. These measures might also infringe the principle of equal treatment of parties. The French delegation thus proposes once again—this suggestion having received the support of many delegations at the previous session—that such measures be permitted only if they have previously been accepted by the parties in their arbitration agreement. This positive option would not in any way preclude the possibility of the effective use of these measures since it could be inserted in a model arbitration agreement to which the parties may refer for the settlement of their disputes. It therefore constitutes a genuine compromise arrangement which could make acceptable the introduction in arbitration law of ex parte measures which have been accepted in the form of preliminary orders.

Draft article 17 quater, paragraph (4): unenforceable nature of preliminary orders

7. Somewhat illogically, given the Working Group’s interest in this innovative extension of the arbitrator’s powers, it has been stipulated that “[a] preliminary order shall be binding on the parties but shall not be subject to enforcement by a court”. This would rob these measures of much of their effectiveness since juridical persons, in particular banking establishments, which the arbitrator will approach to obtain the execution of such orders, would be unable to comply without a writ of enforcement. It would therefore be desirable to delete that sentence while retaining the following one, which states that a preliminary order does not constitute an award.

Draft article 17 decies: grounds for refusing recognition/enforcement

8. The French delegation can only reiterate its position on this matter. The proposed text, which combines provisions based on the New York Convention and relating to arbitral awards with provisions stemming more specifically from requirements concerning

¹ See, on this point, the judgement of the European Court of Justice of 27 April 2004 in Case C-159/02 (Turner), which ruled that the Brussels Convention precludes “*the grant of an injunction whereby a court of a contracting State prohibits a party to proceedings pending before it from commencing or continuing legal proceedings before a court of another contracting State*”.

interim measures, constitutes a set of clauses incorporating excessive and disproportionate double conditions.²

Written form of arbitration agreement

9. The French delegation agrees with the substance of the draft provisions prepared by the Working Group. However, it proposes that their wording be more succinct. In particular, the revised draft article 7 contains a paragraph (4) on electronic communication, which could be deleted or abridged since it constitutes a definition and not a prescriptive rule. Reference might simply be made to UNICTRAL documents dealing with electronic commerce.

10. Surprisingly, the omission of the writing requirement has also been proposed as an alternative. The French delegation does not wish this other arrangement to appear in the revised provisions. It would greatly weaken the provisions adopted by the Working Group with a view to embracing as closely as possible the current situation regarding arbitration law on this matter. In general, it is desirable to make as limited use as possible of variants, the aim being to guide States towards solutions that appear the most appropriate. Most importantly, the proposal to totally remove the requirement of written form had not received the Working Group's agreement.

² It is recalled that the French delegation had proposed a more concise wording:

- (1) An interim measure of protection issued by an arbitral tribunal shall be recognized as binding on the parties and [unless otherwise provided by the arbitral tribunal] enforced upon application by the party which obtained it [or by the arbitral tribunal] to the competent court, irrespective of the country in which it was issued.
- (2) The court may refuse to recognize [and] [or] enforce an interim measure of protection only if:
 - (a) Upon the request of a party the court is satisfied that:
 - That party was not given notice of the appointment of an arbitrator or of the arbitral proceedings;
 - The party against whom the measure is directed was unable to present its case under the conditions of article 17;
 - The arbitral tribunal did not have [was deprived of] the powers to order any such interim measure of protection;
 - (b) The court finds that:
 - The requested measure is incompatible with the powers conferred upon the court by its laws unless the interim measure can be reformulated to adapt it to those laws;
 - The recognition or enforcement of the interim measure would be contrary to the public policy recognized by the court.

**Comments on draft legislative provisions on interim measures and on the form
requirement for arbitration agreements**

The Austrian Ministry of Justice thanks UNCITRAL for giving it the opportunity to comment on the draft text which was so meritoriously developed by the Secretariat taking into consideration the discussion of Working Group II at its forty-fourth session in New York. As requested by the Secretary-General our comment will be straight to the point and very concise.

In general Austria can go along with the draft text as it currently stands and avails itself of this opportunity to congratulate the secretariat for its excellent work in the course of and in between the Working Group meetings related to this topic.

There are, however, two elements in the draft text Austria is not really content with:

First, Austria would like to reiterate its position that it is neither desirable nor appropriate to confer on arbitral tribunals the power to grant preliminary orders on an ex parte basis. The party against which an interim measure is invoked should always be given the possibility to present its position prior to the issuance of such a measure.

Therefore, Austria remains critical of draft article 17 ter of the Model Law even taking into account the specific precautions set out by article 17 quater, in particular paragraph 5 of this article. The opt-out solution in article 17 ter (1) seems to be not sufficient to protect the rights of the parties. As a rule parties to an arbitration agreement might not be aware of

the danger of being later faced by a preliminary order directed against them and might therefore not be prepared to opt-out via a respective clause in their arbitration agreement.

Secondly, as Austria already pointed out during the meetings of the Working Group, this delegation is highly sceptical as to the exposure of the form requirement laid down in article 7 of the Model Law and therefore strongly opposed to the idea that an arbitration agreement could validly be concluded orally or even by mere conduct of the persons involved. Austria proposes to stick to the current wording of article 7 of the Model Law as neither of the two variants for a revised article 7 is able to meet our concerns and there is, in our view, no urgent need for abandoning the current requirements laid down in article 7 as it currently stands.

Introduction

1. At its thirty-first session (New York, 1-12 June 1998), the Commission, with reference to discussions at the special commemorative New York Convention Day held in June 1998 to celebrate the fortieth anniversary of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards (New York, 1958) (“the New York Convention”), considered that it would be useful to engage in a discussion of possible future work in the area of arbitration. It requested the Secretariat to prepare a note that would serve as a basis for the consideration of the Commission at its next session.¹

2. At its thirty-second session (Vienna, 17 May-4 June 1999), the Commission had before it a note entitled “Possible future work in the area of international commercial arbitration” (A/CN.9/460). Welcoming the opportunity to discuss the desirability and feasibility of further development of the law of international commercial arbitration, the Commission generally considered that the time had come to assess the extensive and favourable experience with national enactments of the UNCITRAL Model Law on International Commercial Arbitration (1985) (“the Arbitration Model Law”), as well as the

¹ *Official Records of the General Assembly, Fifty-third Session, Supplement No. 17 (A/53/17)*, para. 235.

use of the UNCITRAL Arbitration Rules and the UNCITRAL Conciliation Rules, and to evaluate, in the universal forum of the Commission, the acceptability of ideas and proposals for improvement of arbitration laws, rules and practices.²

3. After concluding the discussion on its future work in the area of international commercial arbitration, the Commission entrusted the work to one of its working groups, which it established as Working Group II (Arbitration and Conciliation), and decided that the priority items for the Working Group should be conciliation,³ requirement of written form for the arbitration agreement contained in article 7, paragraph (2), of the Arbitration Model Law and article II, paragraph (2), of the New York Convention (“the writing requirement”),⁴ enforceability of interim measures of protection⁵ and possible enforceability of an award that had been set aside in the State of origin.⁶

4. Work on the UNCITRAL Model Law on International Commercial Conciliation was completed by the Working Group at its thirty-fifth session in 2001, and work in relation to both the question of interim measures and the form requirement for arbitration agreements was completed at the forty-fourth session of the Working Group in 2006.

5. To facilitate discussions of the Commission on topics to be considered in priority by the Working Group, this note contains a list of topics, which were discussed at previous sessions of the Commission and suggestions made in the Working Group.

I. List of topics initially mentioned as possible future work

1. List of topics considered by the Commission

6. At its thirty-second session (Vienna, 17 May-4 June 1999), the Commission considered possible topics for future work.⁷ The list of those topics, excluding conciliation and the requirement that an arbitration agreement be in writing was as follows:

(a) Arbitrability:⁸ it was observed that uncertainties as to whether the subject matters of certain disputes are capable of settlement by arbitration caused problems in international commercial arbitration. To the extent that the issue should be considered, the purpose should not be to strive for uniformity, but to stimulate transparency of solutions on that question. Work might be geared, for example, towards formulating a uniform provision setting out three or four issues that were generally considered non-arbitrable and calling upon States to list any other issues that are regarded as non-arbitrable by the State. At the same time, concerns were expressed that any national listing of non-arbitrable issues might be inflexible and therefore counter-productive. It was said that the question of arbitrability was subject to constant development (including through case law) and that some States might find it undesirable to interfere with that development (see below, para. 13).

² Ibid., *Fifty-fourth Session, Supplement No. 17* (A/54/17), para. 337.

³ Ibid., paras. 340-343 and para. 380.

⁴ Ibid., paras. 344-350 and para. 380.

⁵ Ibid., paras. 371-373 and para. 380.

⁶ Ibid., paras. 374-376 and para. 380.

⁷ Ibid., paras 340-380; A/CN.9/WG.II/WP.108, para. 6; A/CN.9/468, para. 107.

⁸ A/CN.9/460, paras. 32-34 and *Official Records of the General Assembly, Fifty-fourth Session, Supplement No. 17* (A/54/17), paras. 351-353.

(b) Sovereign immunity:⁹ support was expressed in favour of preparatory work by the Secretariat of that item on the basis that it was of significant practical importance. That matter was noted as causing uncertainty and, potentially, delay in a number of States (see below, para. 15).

(c) Consolidation of cases before arbitral tribunals:¹⁰ it was pointed out that consolidation of arbitration cases into a single proceeding was not a novel issue and that it had practical significance in international arbitration, in particular where a number of interrelated contracts or a chain of contracts were entered into. It was also suggested that it might be useful for the Commission to prepare guidelines to assist parties in drafting arbitration agreements that envisaged consolidation of proceedings.

(d) Confidentiality of information in arbitral proceedings:¹¹ it was explained that parties involved in arbitral proceedings were becoming increasingly concerned over the absence of any rule in respect of confidentiality.

(e) Raising claims for the purpose of set-off:¹² views were expressed that it was generally well accepted that an arbitral tribunal could only take-up a claim if that claim was covered by the arbitration agreement. It was decided that the consideration of the matter was therefore unlikely to be productive.

(f) Decisions by “truncated” arbitral tribunals:¹³ it was felt that it would be inadvisable to attempt to legislate on this matter because it raised sensitive issues, had implications in the context of recognition and enforcement of an award made by a truncated tribunal, and acceptable solutions would be difficult to achieve.

(g) Liability of arbitrators:¹⁴ it was said that there were many countries that did not have legislation on this matter, and it would be valuable if the Commission would provide model solutions. Another view was that, in light of different approaches in legal systems, the matter should not be considered by the Commission because it was unlikely that a consensus could be achieved on a workable solution.

(h) Power of the arbitral tribunal to award interest:¹⁵ it was noted that the power of an arbitral tribunal to award interest was a matter of great practical importance that arose often and potentially involved large amounts of money. It was suggested that providing guidance and model solutions would facilitate arbitration.

(i) Costs of arbitral proceedings:¹⁶ it was widely considered that the question of various matters relating to the costs of arbitration was not urgent.

(j) Possible enforceability of an award that has been set aside in the State of origin:¹⁷ the view was expressed that this issue was not expected to raise many problems and that the case law that gave rise to the issue should not be regarded as a trend.¹⁸ It was

¹⁸ *Official Records of the General Assembly, Fifty-fifth Session, Supplement No. 17 (A/55/17)*, para. 396.

suggested, however, that that item involved a broader spectrum of issues, such as, the question of the discretionary power to enforce an award even where a ground for refusal existed (such as a minor procedural defect or a defect that did not influence the outcome of the arbitration).

2. Other topics mentioned

7. At its thirty-second session (Vienna, 17 May-4 June 1999), the following topics were mentioned as potentially worthy of being taken up by the Commission at an appropriate future time:¹⁹

(a) Gaps in contracts left by the parties and filling of those gaps by a third person or an arbitral tribunal on the basis of an authorization of the parties.

(b) Changed circumstances after the conclusion of a contract and the possibility that the parties entrusted a third person or an arbitral tribunal with the adaptation of the contract to changed circumstances.

(c) Freedom of parties to be represented in arbitral proceedings by persons of their choice and the issue of limits to that freedom based on, for example, nationality or membership in a professional association.

(d) Questions relating to the interpretation of legislative provisions such as those in article II (3) of the New York Convention (or article 8 (1) of the Arbitration Model Law), which in practice led to divergent results, in particular the question of the court's terms of reference (i) in deciding whether to refer the parties to arbitration, (ii) in considering whether the arbitration agreement was null and void, inoperative or incapable of being performed, and (iii) where the defendant invoked the fact that an arbitration proceeding was pending or that an arbitral award had been issued.

(e) Questions relating to cases where a foreign court judgement was presented with a request for its recognition or enforcement, but where the respondent, by way of defence, invoked (i) the existence of an arbitration agreement, or (ii) the fact that an arbitration proceeding was pending, or (iii) the fact that an arbitral award had been issued in the same matter. Those instances were often not addressed by treaties dealing with recognition and enforcement of foreign court judgements. Difficulties arose in particular where the applicable treaty was designed to facilitate recognition and enforcement of court judgements, but the treaty itself did not allow recognition or enforcement to be refused on the ground that the dispute dealt with by the judgement was covered by an arbitration agreement, was being considered in a pending arbitral proceeding, or was the subject matter of an arbitral award.

¹⁹ Ibid., *Fifty-fourth session, Supplement No. 17* (A/54/17), para. 339; A/CN.9/468, para. 108.

3. Topics proposed by arbitration experts

8. A number of other topics concerning the New York Convention, proposed by arbitration experts at the special commemorative New York Convention Day held in June 1998 to celebrate the fortieth anniversary of the New York Convention, were raised for possible consideration by the Working Group at its thirty-second session (Vienna, 20-31 March 2000).²⁰ These included:

(a) The meaning and effect of a non-domestic award, that is an award not considered as a domestic award in the State where its recognition and enforcement was sought (article I (1), second sentence).

(b) Clarification of what constituted an arbitral award under the Convention. Did it cover, for example, awards on agreed terms; “Treaty awards”; a-national awards; award-like decisions in proceedings akin to arbitration, such as *arbitrato irrituale*.

(c) Determination of the law applicable to arbitrability under article II (1).

(d) Field of application of article II (3) concerning the enforcement of the arbitration agreement.

(e) Law applicable to agreements that might be “null and void, inoperative, or incapable of being performed” under article II (3).

(f) Compatibility of court-ordered interim measures with arbitration agreements falling under the Convention.

(g) Enforcement conditions and procedure referred to in article III, as implementing legislation showed diverging solutions.

(h) Period of limitation for enforcement of a Convention award where again implementing legislation showed a range of different periods.

(i) Residual discretionary power to grant enforcement of an award notwithstanding the existence of a ground for refusal listed in article V.

(j) Meaning and effect of the suspension of an arbitral award in the country of origin (article V (i)(e)).

(k) Meaning and effect of the more-favourable-law provision of article VII (1).

9. Recalling the discussion of increased use of electronic commerce and the question whether electronic messages complied with formal requirements for arbitration agreements, the Commission took note of suggestions that it would be useful to review the implications of “on-line” arbitrations, i.e. arbitrations in which significant parts or even all of arbitral proceedings were conducted by using electronic means of communications. It was also agreed that the Working Group on Arbitration would cooperate with the Working Group on Electronic Commerce on that matter (see below, paragraph 14).²¹

4. Conclusion by the Commission

10. When the Commission discussed its future work at its thirty-second session (Vienna, 17 May-4 June 1999), it left open the question of what form that future work might take. It was agreed that decisions on that matter should be taken later as the substance of proposed

²⁰ A/CN.9/468, para. 109.

²¹ *Official Records of the General Assembly, Fifty-fifth Session, Supplement No. 17 (A/55/17)*, para. 396; A/CN.9/468, para 113.

solutions became clearer. Uniform provisions might, for example, take the form of a legislative text (such as model legislative provisions or a treaty) or a non-legislative text (such as a model contractual rule or a practice guide).²² At its thirty-third session (New York, 12 June-7 July 2000), the Commission reaffirmed the mandate of the Working Group to decide on the time and manner of dealing with the topics identified for future work. Several statements were made to the effect that, in general, the Working Group, in deciding the priorities of the future items on its agenda, should pay particular attention to what was feasible and practical and to issues where court decisions left the legal situation uncertain or unsatisfactory. Topics that were mentioned in the Commission as potentially worthy of consideration, in addition to those which the Working Group might identify as such, were the meaning and effect of the more-favourable-law provision of article VII (1) of the 1958 New York Convention; raising claims in arbitral proceedings for the purpose of set-off and the jurisdiction of the arbitral tribunal with respect to such claims; freedom of parties to be represented in arbitral proceedings by persons of their choice; residual discretionary power to grant enforcement of an award notwithstanding the existence of a ground for refusal listed in article V of the 1958 New York Convention; and the power by the arbitral tribunal to award interest.²³

II. Topics most recently mentioned as possible future work

11. The following topics were mentioned, either by the Commission or the Working Group, as possible future topics to be considered by the Working Group in priority.

1. UNCITRAL Arbitration Rules

12. At its thirty-sixth (Vienna, 30 June-11 July 2003), thirty-seventh (New York, 14-25 June 2004) and thirty-eighth sessions (Vienna, 4-15 July 2005), the Commission heard proposals that a revision of the UNCITRAL Arbitration Rules (1976) and the UNCITRAL Notes on Organizing Arbitral Proceedings (1996) could be considered for inclusion in future work.²⁴ Although reservations were expressed as to whether there was an immediate need to revise the UNCITRAL Arbitration Rules, support was expressed for their revision to be taken up as a matter of priority. It was suggested that, given the wide use of the UNCITRAL Arbitration Rules, any necessary revision would be of positive benefit to practitioners in international arbitration. The view was expressed that particular caution should be exercised in determining the scope of such a revision, which should be precisely defined in order to avoid undermining the stability of the reference offered by the UNCITRAL Arbitration Rules over 30 years of existence of that instrument. It was proposed that to better facilitate a review of the UNCITRAL Arbitration Rules, preliminary consultations could be undertaken with practitioners to develop a list of topics on which updating or revision was necessary. The view was also expressed that preliminary consideration of a possible revision of the Rules should not prevent the Working Group from envisaging other possible topics for future work, such as the use of arbitration in corporate governance or the use of on-line dispute resolution mechanisms.

²² *Official Records of the General Assembly, Fifty-fourth Session, Supplement No. 17 (A/54/17)*, para. 338.

²³ *Ibid.*, *Fifty-fifth Session, Supplement No. 17 (A/55/17)*, para. 396.

²⁴ *Ibid.*, *Fifty-eighth Session, Supplement No. 17 (A/58/17)*, para. 204; *ibid.*, *Fifty-ninth Session, Supplement No. 17 (A/59/17)*, para. 60; *ibid.*, *Sixtieth Session, Supplement No. 17 (A/60/17)*, para. 178; A/CN.9/573, para. 100; A/CN.9/592, paras. 90 and 93.

2. Arbitrability

13. At its thirty-sixth (Vienna, 30 June-11 July 2003), thirty-seventh (New York, 14-25 June 2004) and thirty-eighth (Vienna, 4-15 July 2005) sessions, the Commission noted that priority consideration might be given to the issue of arbitrability of intra-corporate disputes and other issues relating to arbitrability, for example, arbitrability in the fields of immovable property, insolvency or unfair competition (see above, para. 6).²⁵

3. On-line dispute resolution (ODR)

14. The Commission took note of a proposal that priority consideration might be given to the issues of on-line dispute resolution (see above, para. 9).²⁶

4. Sovereign immunity

15. On the question of sovereign immunity, the Working Group noted at its forty-fourth session (New York, 23-27 January 2006) that, in December 2004, the General Assembly adopted the Jurisdictional Immunities Convention (see resolution A/RES/59/38). The Working Group was invited to consider whether, taking account of the application of that Convention to the immunity of a State and its property from the jurisdiction of the courts of another State, the question of immunity was a matter that needed to be addressed in the context of arbitration from the perspective of an agreement by the State to participate in arbitration and the enforcement of arbitral awards against a State. Concern was expressed that the topic of sovereign immunity should be limited to the point of enforcement and that work on that topic in the area of arbitration could create confusion. Nonetheless, support was expressed for work to be undertaken on that topic, particularly noting that there was growing case law where States that participated in investment arbitrations failed to comply with arbitral awards. It was also cautioned that the topic of sovereign immunity raised questions of public policy, which did not easily lend itself to harmonisation (see above, para. 6).²⁷

5. Other topics

16. Another possible topic suggested for consideration to the Working Group at its forty-fourth session (New York, 23-27 January 2006) was the revision of article 27 of the Arbitration Model Law, which currently permitted an arbitral tribunal or a party to request a court to assist in the taking of evidence in an arbitration but allowed the court to execute that request “within its competence and according to its rules on taking evidence”. It was suggested that article 27 could be revised to oblige a court to render such assistance.²⁸

17. Yet another suggestion was made to address the impact of anti-suit injunctions on international arbitration by appropriately amending the Arbitration Model Law. It was observed that those injunctions were impacting negatively on international arbitration and increased both the cost and complexity thereof.

²⁵ *Official Records of the General Assembly, Fifty-eighth Session, Supplement No. 17 (A/58/17)*, para. 204; *Fifty-ninth Session, Supplement No. 17 (A/59/17)*, para. 60; *Sixtieth Session, Supplement No. 17 (A/60/17)*, para. 178; A/CN.9/573, para. 100, A/CN.9/592, paras. 90.

²⁶ *Official Records of the General Assembly, Fifty-ninth Session, Supplement No. 17 (A/59/17)*, para. 60; *Sixtieth Session, Supplement No. 17 (A/60/17)*, para. 178; A/CN.9/573, para. 100; A/CN.9/592, para. 90.

²⁷ A/CN.9/592, paras. 90 and 92.

²⁸ A/CN.9/592, para. 94.

18. In addition, it was suggested that the Working Group could consider the impact of arbitration on third parties as well as multi-party arbitrations. Whilst the Working Group agreed that an arbitral tribunal had no jurisdiction to bind parties that were not party to the arbitration agreement, it noted that that matter was of particular importance in the context of granting of preliminary orders. It was highlighted that there had been developments, for example, in a case involving investment arbitration where standing had been given to third parties that might be affected by a decision of the arbitral tribunal. The Working Group agreed that these matters could be considered as items for future work by the Working Group.²⁹

19. A broader suggestion was made that UNCITRAL should not confine itself to a piecemeal approach to individual issues but work instead on the preparation of an international binding instrument on international commercial arbitration, bearing in mind previous instruments such as the 1961 European Convention on International Commercial Arbitration and other similar texts. It was suggested that work on such a project should not seek to revise arbitration regimes that worked well in practice such as the New York Convention. While interest was expressed in such a larger project, the Working Group was cautioned not to include in its work programme unnecessarily time-consuming projects, and to focus on issues of practical interest to the arbitration community.³⁰

Introduction

1. At its thirty-sixth (Vienna, 30 June-11 July 2003), thirty-seventh (New York, 14-25 June 2004) and thirty-eighth sessions (Vienna, 4-15 July 2005), the Commission heard proposals that a revision of the UNCITRAL Arbitration Rules (1976) and the UNCITRAL Notes on Organizing Arbitral Proceedings (1996) (“the UNCITRAL Notes”) could be considered for inclusion in future work.¹ At the forty-fourth session of the Working Group (New York, 23-27 January 2006), although reservations were expressed as to whether there was an immediate need to revise the UNCITRAL Arbitration Rules, support was expressed for their revision to be taken up as a matter of priority.² It was proposed that to better facilitate a review of the UNCITRAL Arbitration Rules, preliminary consultations could be undertaken with practitioners to develop a list of topics on which updating or revision was necessary.³

² A/CN.9/592, para. 93.

³ *Ibid.*

2. At its thirty-eighth session (Vienna, 4-15 July 2005), the Commission was informed that 2006 would mark the thirtieth anniversary of the UNCITRAL Arbitration Rules and that conferences to celebrate that anniversary were expected to be organized in different regions to exchange information on the application and possible areas of revision of the UNCITRAL Arbitration Rules.⁴ A conference was held in Vienna on 6 and 7 April 2006 in cooperation with the International Arbitral Centre of the Austrian Federal Economic Chamber. Suggestions were made to amend a number of articles of the UNCITRAL Arbitration Rules in order to better align the Rules with current international arbitration practice and the relevant provisions of the UNCITRAL Model Law on International Commercial Arbitration ("the Model Law"). To facilitate discussions of the Commission on that topic, this note contains a brief overview of some suggestions made by practitioners during that conference. Such an overview shall not be regarded as an exhaustive list of topics to be considered by the Commission. Should the Commission decide that a revision of the UNCITRAL Arbitration Rules should be considered by Working Group II (Arbitration), a more detailed annotated list of possible areas of revision could be presented by the Secretariat to the Working Group at its next session to assist it in considering the areas of possible revision and the policies to be adopted in revising the Rules.

Suggestions for a revision of the UNCITRAL Arbitration Rules

Multiparty arbitration

3. When a single arbitration involves more than two parties (multi-party arbitration), proceedings can be more complicated to manage and rules of various arbitration institutions have been amended so as to accommodate multi-party arbitration.⁵ Amendments to the UNCITRAL Arbitration Rules could be considered to address that situation. The areas of possibly increased complexity in multi-party arbitration are listed in the UNCITRAL Notes.⁶

Consolidation of cases before arbitral tribunals

4. In situations where several distinct disputes arise between the same parties under separate contracts (e.g., related contracts or a chain of contracts) containing separate arbitration clauses, one of the parties might refuse that all such disputes be resolved in the same proceedings. A party might also initiate a separate arbitration in respect of a distinct claim under the same contract in order to gain a tactical advantage. Consolidation in such situations might provide a more efficient resolution of the disputes between the parties and also reduce the possibility of inconsistent awards in parallel arbitrations. Under the UNCITRAL Arbitration Rules, consolidation is possible only where the parties specifically so agree.⁷

Truncated arbitral tribunals and obstructing arbitrators

5. A review of the UNCITRAL Arbitration Rules might address the situation where the arbitral tribunal decides to proceed with the arbitration notwithstanding the absence in bad

⁴ Ibid., *Sixtieth Session, Supplement No. 17* (A/60/17), para. 179.

⁵ For instance, the ICC Rules (article 10), the LCIA Rules (article 8.1), and the WIPO Rules (article 18).

⁶ UNCITRAL Notes on Organizing Arbitral Proceedings, paras. 86-88.

⁷ Article 19 (3) of the UNCITRAL Arbitration Rules states that the respondent can bring a counter claim arising out of the same contract.

faith of one of its members or where the arbitral tribunal considers that one of its members is obstructing the progress of the case, including the arbitral tribunal's deliberations.⁸ The Commission might wish to discuss the potential detrimental consequences of bad-faith withdrawals of arbitrators from arbitral proceedings on the practice of international commercial arbitration and, in that context, consider the extent to which the parties should be able, by agreement, to put beyond doubt the validity of an award issued by a truncated arbitral tribunal.⁹

Confidentiality of information in arbitral proceedings

6. Articles 25, paragraph (4), and 32, paragraph (5), of the UNCITRAL Arbitration Rules deal with the confidentiality of hearings and awards respectively, but there are no rules regarding the confidentiality of the proceedings as such, or of the materials (including pleadings) before the arbitral tribunal. A suggestion was made that an explicit provision to that effect be included in a revised version of the UNCITRAL Arbitration Rules.

Interim measures

7. Article 26 of the UNCITRAL Arbitration Rules, which deals with interim measures is not consistent with the revised model legislative provisions on interim measures proposed to be inserted under a new chapter IV bis of the Model Law and scheduled for adoption by the Commission at its thirty-ninth session.¹⁰ The question to be considered is whether, and if so, to what extent, article 26 should mirror the revised legislative provisions on interim measures of the Model Law.

Liability of arbitrators

8. The Commission might wish to consider whether the question of liability of arbitrators needs to be further examined in the context of the UNCITRAL Arbitration Rules. At present, neither the UNCITRAL Arbitration Rules or the Model Law address that question.¹¹

Raising claims for the purpose of set-off

9. The UNCITRAL Arbitration Rules provide that the respondent may rely on a claim for the purpose of a set-off if the claim arises out of the same contract (article 19). Views have been expressed that the arbitral tribunal's competence to consider claims by way of a set-off should, under certain conditions, extend beyond the contract from which the principal claim arises. The reasons cited are procedural efficiency and the desirability of eliminating disputes between the parties.¹²

Third-party intervention in arbitral proceedings

10. Third parties, for example non-governmental organizations, often ask for an opportunity to explain their positions, particularly in investment treaty arbitrations. Article 15, paragraph (1), of the UNCITRAL Arbitration Rules, providing that "the arbitral

⁸ In that respect, article 13 of the UNCITRAL Arbitration Rules deals with substitute arbitrators; and article 32, paragraph (4), of the UNCITRAL Arbitration Rules requires the majority of the tribunal to state the reasons for the absence of one arbitrator's signature from an award.

¹¹ A/CN.9/460, paras 92-100.

¹² A/CN.9/460, paras. 72-79.

tribunal may conduct the arbitration in such manner as it considers appropriate”, could be interpreted as conferring power on the arbitral tribunal to accept *amicus curiae* briefs in written form. The Commission might wish to consider whether an express provision on third-party intervention should be included in any revised version of the UNCITRAL Arbitration Rules.

Other suggestions

11. Article 3 of the UNCITRAL Arbitration Rules requires the claimant’s notice of arbitration to indicate the “general nature” of its claim as well as the “remedy or relief sought”. Thereafter, the arbitral tribunal is constituted without the respondent having an opportunity (or being required) to state its position with respect to (i) jurisdiction, (ii) the claim, or (iii) any counterclaim. In order to promote a more streamlined efficient arbitral procedure, article 3 might be modified to include provision permitting the respondent to submit a response to the claimant’s notice of arbitration.

12. Article 35 of the UNCITRAL Arbitration Rules currently provides that either party might request the arbitral tribunal to give an interpretation of the award. The question raised was whether that provision should only apply where there is a dispute as to what the award orders the parties to do.

13. Article 39, paragraph (1), of the UNCITRAL Arbitration Rules provides that fees be “reasonable in amount”. The Commission might wish to consider whether more guidance on that question should be included in any revision of the UNCITRAL Arbitration Rules.

III. PROCUREMENT

A. Report of the Working Group on Procurement on the work of its eighth session (Vienna, 7-11 November 2005) (A/CN.9/590) [Original: English]

B. Drafting suggestions	17-111
1. General introductory remarks in the Guide to Enactment on the use of electronic communications in procurement (A/CN.9/WG.I/WP.38, Chapter II, section B, subsection 2 (b))	17-18
2. Functional equivalence (A/CN.9/WG.I/WP.38, paras. 24-29)	19-27
3. Accessibility standards (A/CN.9/WG.I/WP.38, paras. 30-32)	28-33
4. Form of communication—proposed revisions to article 9 of the Model Law (A/CN.9/WG.I/WP.38/Add.1, paras. 1-5)	34-42
5. Notion of “electronic” and related terms (A/CN.9/WG.I/WP.38/Add.1, paras. 6-12)	43
6. Legal value of procurement contracts concluded electronically (A/CN.9/WG.I/WP.38/Add.1, paras. 13-15)	44
7. Requirement to maintain a record of the procurement proceedings (A/CN.9/WG.I/WP.38/Add.1, paras. 16-18)	45
8. Electronic submission of tenders, proposals and quotations (A/CN.9/WG.I/WP.38/Add.1, paras. 19-27)	46-49
9. Electronic opening of tenders (A/CN.9/WG.I/WP.38/Add.1, paras. 28-32)	50-51
10. Electronic publication of procurement-related information (A/CN.9/WG.I/WP.39 and Add.1)	52-63
(a) General remarks	52-54
(b) Public accessibility of procurement-related information—proposed revisions to article 5 of the Model Law (A/CN.9/WG.I/WP.39 and A/CN.9/WG.I/WP.39/Add.1, paras. 34-39)	55-59

(c)	Publication of information on forthcoming opportunities (A/CN.9/WG.I/WP.39/Add.1, paras. 1-17, 38 and 40-41)	60-62
(d)	Other issues (A/CN.9/WG.I/WP.39/Add.1, paras. 18-33).	63
11.	Electronic reverse auctions (A/CN.9/WG.I/WP.40 and Add.1, paras. 1-20).	64-105
(a)	General remarks (A/CN.9/WG.I/WP.40, paras. 4-8).	64-66
(b)	Conditions for use of electronic reverse auctions (article 19 bis) (A/CN.9/WG.I/WP.40, paras. 9-17)	67-80
(c)	Pre-auction period (article 47 bis) (A/CN.9/WG.I/WP.40, paras. 18-25)	81-86
(d)	Auction phase (article 47 ter) (A/CN.9/WG.I/WP.40, paras. 26-35).	87-93
(e)	Revisions to the Model Law to enable the use of electronic reverse auctions (A/CN.9/WG.I/WP.40/Add.1, paras. 1-20).	94-102
(f)	Location of provisions on electronic reverse auctions.	103-105
12.	Abnormally low tenders (A/CN.9/WG.I/WP.40/Add.1, paras. 21-29).	106-111

I. Introduction

1. At its thirty-seventh session, in 2004, the United Nations Commission on International Trade Law (the “Commission”) entrusted the drafting of proposals for the revision of the 1994 UNCITRAL Model Law on Procurement of Goods, Construction and Services (the “Model Law”, A/49/17 and Corr.1, annex I) to its Working Group I (Procurement). The Working Group began its work on the elaboration of proposals for the revision of the Model Law at its sixth session (Vienna, 30 August-3 September 2004) (A/CN.9/568). At that session, it decided to proceed at its future sessions with the in-depth consideration of topics in documents A/CN.9/WG.I/WP.31 and 32 in sequence (A/CN.9/568, para. 10).

2. At its seventh session (New York, 4-8 April 2005) (A/CN.9/575), the Working Group started in-depth consideration of the use of electronic communications and technologies in the procurement process, being: (a) electronic publication and communication of procurement-related information; (b) the use of and controls over electronic means of communication in the procurement process and the electronic submission of tenders; (c) electronic reverse auctions; and (d) abnormally low tenders (A/CN.9/WG.I/WP.34 and Add.1-2, A/CN.9/WG.I/WP.35 and Add.1 and A/CN.9/WG.I/WP.36). The Working Group decided to accommodate the use of electronic communications and technologies (including electronic reverse auctions) as well as the investigation of abnormally low tenders in the Model Law and to continue at its eighth session the in-depth consideration of those topics and consequential revisions to the Model Law, on the basis of drafting materials that the Secretariat would prepare (A/CN.9/575, para. 9).

3. At its thirty-eighth session, in 2005, the Commission commended the Working Group for the progress made in its work and reaffirmed its support for the review being undertaken and for the inclusion of novel procurement practices in the Model Law (A/60/17, para. 172).

II. Organization of the session

4. The Working Group, which was composed of all States members of the Commission, held its eighth session in Vienna from 7 to 11 November 2005. The session was attended by representatives of the following States members of the Working Group: Algeria, Brazil, Cameroon, Canada, China, Colombia, Czech Republic, France, Germany, Iran (Islamic Republic of), Italy, Jordan, Lithuania, Mexico, Morocco, Nigeria, Republic of Korea, Russian Federation, Singapore, Spain, Sweden, Thailand, Tunisia, Turkey, Uganda, United States of America, Venezuela (Bolivarian Republic of) and Zimbabwe.

5. The session was attended by observers from the following States: Democratic Republic of the Congo, Greece, Haiti, Indonesia, Iraq, Ireland, Oman, Peru, Philippines and Romania. The session was also attended by observers from the following international organizations:

(a) *United Nations system*: Food and Agriculture Organization of the United Nations (FAO), United Nations Educational, Scientific and Cultural Organization (UNESCO), United Nations Secretariat and World Bank;

(b) *Intergovernmental organizations*: African Development Bank, European Commission and European Space Agency (ESA);

(c) *International non-governmental organizations invited by the Commission*: International Bar Association (IBA), International Development Law Organization (IDLO) and the European Law Students' Association (ELSA).

6. The Working Group elected the following officers:

Chairman: Mr. Stephen R. KARANGIZI (Uganda)

Acting Chairman: Mr. Olawale MAIYEGUN (Nigeria)
(Friday afternoon session, 11 November 2005)

Rapporteur: Mr. Gonzalo SUÁREZ BELTRÁN (Colombia)

7. The Working Group had before it the following documents:

(a) Annotated provisional agenda (A/CN.9/WG.I/WP.37 and Corr.1);

(b) A note concerning the use of electronic communications in the procurement process, including drafting materials (A/CN.9/WG.I/WP.38 and Add.1);

(c) A note concerning electronic publication of procurement-related information, including a comparative study and drafting materials (A/CN.9/WG.I/WP.39 and Add.1); and

(d) A note concerning electronic reverse auctions and abnormally low tenders, including drafting materials (A/CN.9/WG.I/WP.40 and Add.1).

8. The Working Group adopted the following agenda:

1. Opening of the session.
2. Election of officers.
3. Adoption of the agenda.
4. Consideration of proposals for the revision of the UNCITRAL Model Law on Procurement of Goods, Construction and Services.

5. Other business.
6. Adoption of the report of the Working Group.

III. Deliberations and decisions

9. At its eighth session, the Working Group continued its work on proposals for the revision of the Model Law. The Working Group used the notes by the Secretariat referred to in paragraph 7 above (A/CN.9/WG.I/WP.38, 39 and 40 and their addenda) as a basis for its deliberations.

10. The Working Group agreed that the consideration at its ninth session would focus on the following aspects: (a) the use of electronic means of communication in the procurement process, including exchange of communications by electronic means, the electronic submission of tenders, opening of tenders, holding meetings and storing information, as well as controls over their use, such as “accessibility standards”, and the related principle of “functional equivalence” of all means of communication; (b) aspects of the publication of procurement-related information, including possibly expanding the current scope of article 5 and referring to the publication of forthcoming procurement opportunities; (c) electronic reverse auctions, including whether they should be treated as an optional phase in other procurement methods or a stand-alone method, criteria for their use, types of procurement to be covered and their procedural aspects; and (d) abnormally low tenders, including their early identification in the procurement process and the prevention of negative consequences of such tenders. The Secretariat was requested to present revised drafting materials on these topics for consideration by the Working Group at its next session and to undertake a study on the following practical aspects of the functioning of electronic reverse auctions: (i) pre-qualification, qualification and ranking of bidders in the context of Model 2 electronic reverse auctions (see para. 85 below) and (ii) the use of tender securities in the context of electronic reverse auctions (see para. 100 below). The Working Group decided to take up the topics of framework agreements and suppliers’ lists at its next session, time permitting.

11. On Friday morning, the Secretariat summarized its understanding of the changes required to be made to the drafting materials that were before the Working Group at its current session. The Working Group also heard presentations by the Secretariat on the progress made in the preparation of studies on the topics of framework agreements and suppliers’ lists, to be submitted for the consideration by the Working Group at its next session. Some delegates shared information on the experience in their respective jurisdictions with framework agreements and suppliers’ lists.

IV. Consideration of proposals for the revision of the UNCITRAL Model Law on Procurement of Goods, Construction and Services

A. Scope and extent of revisions of the Model Law and the Guide to Enactment (A/CN.9/WG.I/WP.38, paras. 4-23)

12. The Working Group considered the scope and extent of its revisions to the Model Law and the Guide to Enactment.

13. The Working Group acknowledged the importance of appropriate procurement planning and contract administration for overall effective functioning of procurement and fulfilling the objectives of the Model Law. Some delegations considered that the current scope of the Model Law, which covered the phase of the selection of a successful supplier or contractor only, should be broadened to address the procurement planning and contract administration phases (A/CN.9/WG.I/WP.38, paras. 12 and 13). The general view in the Working Group, however, was that the scope of the Model Law in that respect should remain unchanged and that it would be more appropriate for paragraph 10 of the Guide to be expanded as regards good practice in procurement planning and contract administration. On the other hand, some support was expressed for formulating at least minimum general principles applicable to those additional phases in the Model Law itself. The Working Group, recognizing the broader context in which that issue should be considered, decided to address the issue further at a later stage, in conjunction with revisions to relevant articles of the Model Law.

14. As regards the scope and nature of the revised Guide to Enactment (A/CN.9/WG.I/WP.38, paras. 9-11 and 19-23), the Working Group agreed to defer the consideration of those issues until after reviewing the Model Law in its entirety. Such an approach, it was said, was necessary taking into consideration the interplay between various provisions of the Model Law and the Guide, to ensure the appropriate content and level of detail, and to avoid unnecessary repetition in the Guide.

15. Some support was expressed for the suggestion that the Guide should provide greater detail of matters to be addressed in regulations or even draft regulations themselves, especially in the light of the value that such regulations could have for harmonization of procurement law (A/CN.9/WG.I/WP.38, para. 9). On the other hand, the view was expressed that the harmonization of procurement regulations should be facilitative and should not remove all flexibility from enacting States, and the regulations themselves should not be overly prescriptive.

16. The view was reiterated that revisions to the Model Law and the Guide addressing the use of electronic means of communication and publication in public procurement should be drafted with the objective of enabling and, where appropriate, promoting such use without, however, discriminating against the use of other means, such as paper-based ones, in the procurement process.

B. Drafting suggestions

1. General introductory remarks in the Guide to Enactment on the use of electronic communications in procurement (A/CN.9/WG.I/WP.38, Chapter II, section B, subsection 2 (b))

17. The Working Group agreed to introduce the following amendments to the text: (i) delete the words “other socio-economic” in paragraph 3; (ii) replace the words “where possible” with the words “where appropriate” in paragraph 4; and (iii) redraft paragraphs 6 and 13 in a positive tone, stressing the need for States that would choose to enact the revised Model Law to adopt general electronic commerce legislation that provided for the legal recognition, validity and enforceability of electronic communications generated in the procurement process.

18. Views varied as regards the need for the text of articles 5, 6 and 8 of the UNCITRAL Model Law on Electronic Commerce (A/51/17, annex I) to be quoted in paragraph 9. Some delegations were of the view that the full quotation of the text of the relevant articles was justified to ensure that the revised Model Law with its Guide to Enactment could be used as a self-contained and stand-alone document, addressing all relevant aspects of the use of electronic communications in public procurement. Other delegations were of the view that the current level of detail in paragraph 9 was unnecessary in that part of the Guide (which contained general introductory remarks on the use of electronic communications), but that the points raised could be made elsewhere in the Guide. It was therefore suggested that paragraph 9 be deleted, and that cross-references to the UNCITRAL Model Law on Electronic Commerce were sufficient, though some additional explanation of the provisions of that Model Law might be required. The Working Group requested the Secretariat in redrafting paragraph 9 and referring to provisions from other texts in other parts of the Guide, as appropriate, to try to reconcile considerations of economy, clarity and efficiency.

2. Functional equivalence (A/CN.9/WG.I/WP.38, paras. 24-29)

19. The Working Group recalled its earlier decision that it would provide for a general principle of “functional equivalence” regarding the use of communications in the procurement process, and that it would approach the drafting from a technologically neutral perspective (A/CN.9/575, para. 12).

20. The Working Group proceeded to consider drafting suggestions for a new article 4 bis of the Model Law (proposed to be entitled “Functional equivalence of all methods of communicating, publishing, exchanging or storing information or documents”), considering Variants A, B and C (A/CN.9/WG.I/WP.38, paras. 24-29).

21. It was noted that each of the three variants contained three main elements. The first was a description of the methods of communicating, publishing, exchanging or storing information or documents, and holding meetings, the second, a statement that electronic means of so doing would be sufficient, and the third, controls over the use of means of communications (A/CN.9/WG.I/WP.38, para. 26).

22. As to the first element, it was observed that the difference between the variants was that Variants A and C contained a list of the types of communications to which the article applied, and Variant B contained a generic description of the types of communication referred to, without a list. The Working Group decided that Variant B would be the better formulation, as it was the clearest and easiest to apply, and avoided the risk that procuring entities might seek to avoid the application of the provision through rigid construction of the items on the list. However, it was pointed out that the generic description might not be sufficiently wide to encompass all the items present in the list, including the opening of tenders electronically, the publication of procurement-related information, and a requirement for a document to be in a sealed envelope.

23. As to the second element, it was observed that the aim of the provision was to address all forms of communication, and to ensure their functional equivalence. While the relative novelty of electronic forms of communication might require greater explanation than traditional forms of communication, the Working Group stressed that the text should be drafted in a manner that encompassed any form of communication.

24. As to the third element, it was recalled that the controls concerned were the “accessibility standards” that the Working Group decided at its seventh session should

apply to the means of communication chosen (A/CN.9/575, para. 14). It was noted that one aspect of the controls stated that any means of communication could be used “provided that the enacting State or procuring entity is satisfied that such use complies with the [accessibility standards]”. It was observed that the provision as drafted conferred a wide discretion on the procuring entity, and that at the same time the procuring entity was not required to reduce to writing the justification for its decision as to the means of communication chosen, nor to include that decision in the record of the procurement under article 11 of the Model Law. Accordingly, it was proposed that the text should state “provided that such use complies with the [accessibility standards]”, a purely objective standard, and that the issue of requiring the procuring entity to record its selection of the means of communication should be revisited when the Working Group considered the formulation of the “accessibility standards”.

25. It was proposed, in the alternative, that the “accessibility standards” might be set out elsewhere in the Model Law, and therefore that the text of the proposed article 4 bis could address the first two elements alone.

26. The Working Group decided that it would continue its deliberations on the basis of Variant B for draft article 4 bis, and requested the Secretariat to reformulate Variant B to take account of these proposals, in particular to revise the text expressly to accommodate all forms of communication, and without a statement of the accessibility standards within that article.

27. As regards the description of the communications, the Working Group noted that the draft text before it referred to both the “methods” and the “means” of communication (A/CN.9/WG.I/WP.38, para. 28). The Working Group considered the advantages and disadvantages of both terms, and agreed to continue its deliberations on this question at a future date.

3. Accessibility standards (A/CN.9/WG.I/WP.38, paras. 30-32)

28. The general view was that the provisions on the “accessibility standards” currently contained in article 4 bis should be dealt with as a separate consideration, and that they should clearly address all forms of communication, and not just electronic ones.

29. With respect to the draft provisions on the “accessibility standards” (A/CN.9/WG.I/WP.38, para. 30), it was noted that the aim of subparagraph (a) was to ensure, inter alia, that procuring entities duly consider cost implications in the choice of means of communication, and therefore the phrase “generally available” should be changed to “reasonably available”. Another suggestion was to use the phrase “compatible (or interoperable) with those in common or general use”. Reference was also made to paragraph 5 of A/CN.9/WG.I/WP.38/Add.1, in which the latter phrase was used, and it was also noted that similar wording appeared in the European Union procurement directives 2004/17/EC and 2004/18/EC.¹ Concern was expressed, however, that in practice it was difficult to comply with the requirement for “interoperability”, as it was often impossible to achieve, and therefore excessive reviews of procurement decisions could result. Another suggestion was to replace the word “generally” with “commonly”. As regards

¹ Directives 2004/17/EC and 2004/18/EC of the European Parliament and of the Council of 31 March 2004 (*Official Journal of the European Union*, No. L 134, 30 April 2004, pp. 1 and 114, respectively). Both available at http://europa.eu.int/comm/internal_market/publicprocurement/legislation_en.htm).

subparagraph (b), it was considered that the subparagraph should be deleted, as its content was not relevant to “accessibility standards.”

30. Some delegations concurred with the observation of the Secretariat (A/CN.9/WG.I/WP.38, para. 31) that there was a degree of inconsistency between subparagraphs (a) and (c) in that a procuring entity could choose a method of communication that may be generally available but the choice could still be discriminatory. It was suggested that the entire provision could be replaced with the following text: “The procuring entity shall ensure that its method of communicating, publishing, exchanging or storing information or documents shall not unreasonably discriminate among or against potential suppliers or contractors or otherwise substantially limit competition.”

31. It was noted that (i) the proposed alternative text did not address the use of electronic means of communication in public procurement per se, (ii) the addition of a reference to “holding meetings” might be warranted, (iii) the phrase “shall not unreasonably discriminate” was susceptible to different interpretations across jurisdictions, and an alternative to the notion of “reasonableness” would be preferable, and (iv) all discrimination on the part of the procuring entity should be prohibited, and that therefore the word “substantially” should be deleted.

32. The Working Group noted that there was a difference between the notion of “general availability” in subparagraph (a) and “non-discrimination” in subparagraph (c) (A/CN.9/WG.I/WP.38, para. 31), and considered whether both concepts should be expressly provided for, or whether a requirement that the means of communication be generally available could be regarded as encompassed within the requirement for non-discrimination. The Working Group decided that it would revisit that issue at a later date.

33. Noting that no final determination on the question had been made, the Working Group requested the Secretariat to prepare a revised draft for the “accessibility standards”, based on the text set out in paragraph 30 above, incorporating the comments made at the current session, and to revise the proposed Guide to Enactment text accordingly. The Working Group deferred the decision on the location of these provisions in the text of the Model Law, and requested the Secretariat to make proposals on the question for its consideration at its next session.

4. Form of communication—proposed revisions to article 9 of the Model Law (A/CN.9/WG.I/WP.38/Add.1, paras. 1-5).

34. Noting the close interaction between the topics of “functional equivalence” of all means of communication, and “accessibility standards” considered earlier in the session (see paras. 19-33 above), and the provisions on the form of communication in revised article 9 (A/CN.9/WG.I/WP.38/Add.1, para. 3), some views were expressed that the relevant provisions should be located together. Other delegations considered that article 9 of the Model Law was restricted in scope to the form of communications between the procuring entity and suppliers and that provisions addressing matters beyond that specific topic should be located elsewhere in the text.

35. As regards paragraph (1) bis of the revised article 9, it was noted that the proposed text might be superfluous in the light of provisions in article 4 bis (addressing “functional equivalence”), which gave the procuring entity the discretion to select the means of communication.

36. As regards paragraph (1) ter, it was noted that “accessibility standards” as they apply to the submission of tenders could be accommodated in article 30 of the Model Law. However, the Working Group noted that the “accessibility standards” should apply to all procurement phases, and that one article should address all phases.

37. The Working Group agreed provisionally to delete paragraphs (1) bis and ter pending finalization of its deliberations on “functional equivalence” and the electronic submission of tenders, respectively. However, if the formulation of article 9, paragraph (1) bis, were retained in the ultimate provision on “functional equivalence”, it was observed that the text should address all communications in the procurement process, and so the reference to “communications with” suppliers or contractors should be to “communications between the procuring entity and suppliers or contractors”.

38. As regards paragraph (1) quater, it was suggested that the provisions could alternatively be included in the article addressing “accessibility standards”. The alternative text for “accessibility standards” (see para. 30 above), as redrafted, could either replace paragraph (1) quater, or could be located elsewhere in the text.

39. It was further observed that the formulation of the “accessibility standards” and proposed article 9, paragraph (1) quater, should be considered in the context of proposed article 9, paragraph (1) quinquies. The latter paragraph provided that enacting States might wish to issue regulations addressing technical issues raised by the use of electronic communications and the accessibility of those communications. The Working Group considered whether the issue of such regulations should be mandatory or non-mandatory. Certain delegations noted that an obligation to regulate such matters might be onerous.

40. After deliberations, the Working Group considered that regulations proposed in article 9, paragraph (1) quinquies, addressing the technical issues should not be mandatory, but that those on the question of accessibility should be mandatory, subject to resolution of the drafting issues outstanding on the “accessibility standards” themselves. The Working Group also agreed that the text of the Guide should explain the aims of the regulations, and underscore the objective of functional equivalence of all forms of communication so that higher standards of authenticity, integrity, interoperability and confidentiality should not be imposed more on electronic than paper-based communications. It was also suggested that the text of the Guide could usefully alert enacting States on the need for accessibility and interoperability requirements as necessary safeguards, especially in the context of international procurement, to ensure non-domestic suppliers’ access to procurement markets.

41. The Working Group also considered the question of whether the provision of software by the procuring entity to potential suppliers should be made without charge (A/CN.9/WG.I/WP.38/Add.1, para. 5). The Working Group noted that procuring entities would be required to obtain a licence to use software, and to specify the numbers of users for that purpose (a requirement that might be impossible to satisfy), and also that there were circumstances in which it would be appropriate to charge for software provided. Consequently, the Working Group concluded that it would not be appropriate to require procuring entities to provide all software without charge, but that the Guide should provide that procuring entities should not use a charging facility to levy disproportionate charges or to restrict access to the procurement.

42. The Working Group requested the Secretariat to prepare a revised draft of article 9, and accompanying text for the Guide accordingly.

5. Notion of “electronic” and related terms (A/CN.9/WG.I/WP.38/Add.1, paras. 6-12)

43. The Working Group considered whether a definition of the term “electronic” or “electronic means of communication” should be provided for in the text of the Model Law, noting that although some procurement regimes and electronic commerce legislation included equivalent definitions, other systems had no such definition (A/CN.9/WG.I/WP.38/Add.1, para. 9 and endnote 5). Included in the latter category was the Model Law on Electronic Commerce, which defined the terms “data message” and “electronic data interchange” from a functional perspective. As electronic communications was an evolving area, it was also observed that as broad an interpretation as possible would be required, and that any definition might become obsolete, the Working Group concluded that the text of the Model Law should not include a definition of these terms. Nonetheless, the Working Group considered that the Guide to Enactment should describe the concepts, referring to “functional equivalence” provisions in the Model Law as necessary.

6. Legal value of procurement contracts concluded electronically (A/CN.9/WG.I/WP.38/Add.1, paras. 13-15)

44. The Working Group agreed to the proposed text (A/CN.9/WG.I/WP.38/Add.1, the section following para. 14), with a note that citations from the Model Law on Electronic Commerce were to be replaced by appropriate cross-references.

7. Requirement to maintain a record of the procurement proceedings (A/CN.9/WG.I/WP.38/Add.1, paras. 16-18)

45. The Working Group recalled its previous decision that the form of the record should not be prescribed, but made subject to the “accessibility standards” described above (A/CN.9/575, paras. 43-46). The Working Group considered that the proposed requirement for the procuring entity to keep electronically stored information in the record accessible even as technologies changed would be technically difficult. It was agreed that this requirement should continue only until the time for review under article 52 of the Model Law had elapsed. The Secretariat was requested to amend the proposed text of paragraph (1) bis of the Guide to Enactment addressing article 11 of the Model Law accordingly.

8. Electronic submission of tenders, proposals and quotations (A/CN.9/WG.I/WP.38/Add.1, paras. 19-27)

46. The Working Group based its deliberations on proposed revisions to article 30 of the Model Law (A/CN.9/WG.I/WP.38/Add.1, para. 24). The aim of the revisions, it was noted, was to remove the previous right of a supplier under article 30 (5)(b) to submit a tender in writing, in a sealed envelope. The Working Group deferred consideration of the extent to which the provisions should be addressed in the Model Law, Guide to Enactment in the form of narrative text, or in draft regulations.

47. As regards the revisions to article 30 (5)(a), it was decided that the text should remove any possibility that the supplier could insist on the submission of a paper-based tender. Accordingly, it was proposed that the Secretariat revise the provision to provide that a tender must be submitted in the form as required in the solicitation documents. It was also agreed that controls equivalent to those set out in the current article 30 (5)(b), requiring that the form of the tender provided a record of its content and at least a similar

degree of authenticity, security and confidentiality, should be included (to the extent that they were not set out elsewhere in the Model Law, in particular in the “accessibility standards” set out above). The Working Group also noted that the provisions of article 27 (Contents of solicitation documents) should include an obligation on the part of the procuring entity to set out in those documents the form in which tenders should be submitted, with appropriate cross-references to the “functional equivalence” provisions, so as to encompass all forms in which tenders might be submitted.

48. The Working Group deferred its consideration of the accompanying Guide to Enactment text (A/CN.9/WG.I/WP.38/Add.1, paras. 26-27), and the issue of whether further provision addressing the modification of tenders would be required, pending its finalization of the revisions to article 30 (5)(a) of the Model Law.

49. It was also observed that the question of tender securities might need specific provision, in the light of the experience of certain delegations and observers that tender securities remained paper-based documents, and simultaneous submission with electronic tenders might not be possible. It was noted that tenders had been rejected for failure to furnish tender securities when required in these circumstances. The Secretariat was requested to provide the Working Group with further information and proposals on this question at its next session, for example considering whether there was any practice allowing for a short period for post-tender submission of securities (see also para. 100 below).

9. Electronic opening of tenders (A/CN.9/WG.I/WP.38/Add.1, paras. 28-32)

50. The Working Group considered the technical issues raised by the electronic opening of tenders, and the level of detail regarding those issues that should be set out in the revised Model Law and Guide to Enactment. The Working Group recalled its earlier conclusions that an electronic equivalent to the physical presence of suppliers and contractors contemplated by the current article 33 (2) of the Model Law (A/CN.9/575, paras. 37-42) should be provided for. It was suggested that proposed paragraphs (4) and (5) of article 33 could be combined by inserting the words “in accordance with the requirements of article 33 (2)” before the words “to be present at the opening of the tenders” in paragraph (4), and deleting paragraph (5).

51. The Working Group deferred its consideration of the accompanying Guide to Enactment text (A/CN.9/WG.I/WP.38/Add.1, para. 32) pending its finalization of the revisions to article 33 (2) of the Model Law.

10. Electronic publication of procurement-related information (A/CN.9/WG.I/WP.39 and Add.1)

(a) General remarks

52. It was recalled that, when article 5 of the Model Law was drafted, the then Working Group did not have sufficient exposure to national practices regarding the public availability of procurement-related information to provide a scope of article 5 beyond the legal texts referred to in the current text of that article. An expanded scope of article 5 might be evidenced by a reference to a broader range of “laws and regulations directly pertinent to the procurement proceedings” found in article 27 (t) of the Model Law. It was suggested that it might be proper for the Working Group to reconsider the scope of article 5.

53. The Working Group noted that caution should be exercised in transposing such concepts as “publication” and “systematic maintenance” from the paper-based to the electronic environment, where those concepts may have different connotations. For example, did the requirement for “systematic maintenance” pre-suppose ongoing maintenance of information for future reference? Did the term “publication” mean continuous or one time posting on the Internet? The terms to be used in the revised article 5 required careful consideration, it was said, in order for the article to achieve its intended purposes. In addition, it was noted that, in trying to achieve transparency in the procurement process, the Working Group should not overlook the legitimate interests of States to keep some information (such as that regarding national security and defence) out of the public domain.

54. With reference to publication of regulatory texts under some domestic procurement regimes (A/CN.9/WG.I/WP.39, paras. 20-28), it was suggested that the Guide should draw a distinction between information intended to bind procuring entities vis-à-vis suppliers or contractors, and other information that by its nature was intended for the internal use of procuring entities only. It was observed that different publicity requirements would apply to each category of information. In response, it was noted that the intended recipients of information and the form that the information took were of less importance than its substance so that information would cover all important aspects of national procurement practices and procedures relevant to suppliers. Reference in that regard was made to the consideration of a similar issue in the World Trade Organization (A/CN.9/WG.I/WP.39, para. 19).

(b) Public accessibility of procurement-related information—proposed revisions to article 5 of the Model Law (A/CN.9/WG.I/WP.39 and A/CN.9/WG.I/WP.39/Add.1, paras. 34-39)

55. The Working Group had before it the text of the revised article 5 (A/CN.9/WG.I/WP.39/Add.1, para. 35) and recalled its deliberations on the article at its seventh session (A/CN.9/575, paras. 24-28).

56. It was noted that the revised draft dealt with several types of information: (i) regulatory texts, (ii) procurement-specific information required to be published under the Model Law, such as solicitation of tenders and award notices; and (iii) other information not required to be published under the Model Law, such as information on forthcoming opportunities, and internal controls or guidance (optional types of information). Divergent views were expressed on whether all three types of information should be dealt with in the same article. It was noted that the publicity requirement might differ for various types of information. For example, a requirement that the publication of information should be centralized and standardized might be justified for information required to be published under the Model Law, while for other types of information the same requirement might be onerous.

57. It was suggested that paragraph 1 of article 5 should be restricted to legal texts as per the current article 5 of the Model Law, with an addition of a reference to judicial decisions of general application to align the text with the respective text in the Agreement on Government Procurement of the World Trade Organization (GPA).²

² See annex 4 (b) to the Final Act embodying the results of the Uruguay round of multilateral trade negotiations, available at http://www.wto.org/english/docs_e/legal_e/gpr-94_e.pdf, article XIX (1).

58. Caution was expressed as regards expanding the scope of the article to cover other types of information, such as to type (ii) information set out in paragraph 56 above. A suggestion was made that regulations might be a more appropriate place to discuss the publicity requirements for that type of information. Otherwise, it was noted, the Model Law would become less flexible and could give rise to possibly frivolous protests on the basis of non-compliance with publicity requirements.

59. On the other hand, it was suggested that article 5, paragraph 2, might also deal with the publication of information on forthcoming opportunities, and be merged with the provisions on that subject contained in paragraph 40 of A/CN.9/WG.I/WP.39/Add.1 (see also paragraph 62 below).

**(c) Publication of information on forthcoming opportunities
(A/CN.9/WG.I/WP.39/Add.1, paras. 1-17, 38 and 40-41)**

60. The Working Group had before it the revised article on publication of information on forthcoming opportunities (A/CN.9/WG.I/WP.39/Add.1, para. 40) and recalled its deliberations on the subject at its seventh session (A/CN.9/575, paras. 29-31).

61. The Working Group noted the advantages of publishing information on forthcoming procurement opportunities, such as transparency in the procurement process through reducing cases of “ad hoc” and “emergency” procurements, and, consequently, less frequent recourse to less competitive methods of procurement. The Working Group also considered the opportunities for cost saving and an increase in competition by enabling more suppliers to be informed about procurement opportunities, to assess their interest in participating and accordingly to plan in advance (A/CN.9/WG.I/WP.39/Add.1, paras. 5 and 41). The Working Group noted that, under some procurement regimes, the publication of such information enabled procuring entities to shorten the minimum time limit for the receipt of tenders (A/CN.9/WG.I/WP.39/Add.1, para. 14).

62. The general preference was for optional publication of information on forthcoming procurement opportunities (A/CN.9/WG.I/WP.39/Add.1, para. 17). Views varied as to whether the Model Law or regulations would be the appropriate place to deal with the issue. The Working Group agreed on a preliminary basis to include provisions relating to forthcoming procurement opportunities in the Model Law, and to define a clear timeline for publication of that type of information using words to the effect of “as promptly as possible”.

(d) Other issues (A/CN.9/WG.I/WP.39/Add.1, paras. 18-33)

63. The Working Group noted that electronic publication, besides bringing potential benefits for interested suppliers or contractors and the public in general, such as by providing easier access of broader audience to more procurement-related information, had enabled practices that raised a number of concerns not found in paper-based environment, and that might necessitate specific regulation. The attention of the Working Group was brought to the concerns arising from unsystematic, non-standardized and non-centralized ways of posting procurement-related information on the Internet, the absence of systematic maintenance of information posted and charging fees for the provision of information. These issues indicated that the retrieval of procurement-related information that was necessary, useful and accurate might be impeded. The Working Group noted that regulations did not often adequately deal with those and other issues arising from the

publication of procurement-related information by electronic means. It decided to defer the consideration of these issues to a future session.

11. Electronic reverse auctions (A/CN.9/WG.I/WP.40 and Add.1, paras. 1-20)

(a) General remarks (A/CN.9/WG.I/WP.40, paras. 4-8)

64. Recalling its request to the Secretariat made at its seventh session to draft enabling provisions on electronic reverse auctions (A/CN.9/575, para. 67), the Working Group took note of the parameters for the draft, which were as follows: (i) the provisions should allow for electronic reverse auctions as a procurement method rather than as a phase in other procurement methods, (ii) they should address the general conditions for use of electronic reverse auctions (of which the most important was that the specifications could be drafted with precision and the criteria to be subject to auction easily and objectively quantified), and (iii) they should not exclude any category of procurement per se. Finally, the provisions should take account of other international procurement regimes on the topic (A/CN.9/575, paras. 51-67).

65. Some delegations noted that the decision of the Working Group at its seventh session leading to the first parameter should be revisited. Other delegations noted that the decision had been taken on the basis that allowing electronic reverse auctions as a phase in other procurement methods would undermine the principle of tendering that was the preferred procurement method under the Model Law. However, noting that the extent of current use of auctions under other procurement regimes required the Model Law to address them, the Working Group agreed to consider the text of the draft provisions before it, pending resolution of the first parameter.

66. The Working Group agreed that the Guide to Enactment should address the benefits of ensuring as wide a participation as possible, although noted that it might not be desirable for suppliers to participate in the electronic reverse auction through a proxy and over the telephone, as such participation might give rise to a risk of abuse. It was observed that the use of the Internet would ensure the traceability of the proceedings, which telephone systems might not.

**(b) Conditions for use of electronic reverse auctions (article 19 bis)
(A/CN.9/WG.I/WP.40, paras. 9-17)**

67. The Working Group observed that as a general matter the draft should allow for the evolution of electronic reverse auctions, and should not exclude any type of auction pending decisions on the first parameter set out above.

68. As regards paragraph (1) of article 19 bis, which provided for an organ of the enacting State other than the procuring entity to approve the use of electronic reverse auctions, some delegations noted that the decision as to whether an electronic reverse auction was an appropriate procurement tool in each case was complicated, and the involvement of a party other than the procuring entity would be beneficial. However, it was noted that such third-party authorization might not be possible under the constitutions of all enacting States. Other delegations expressed the view that such decisions should not be taken other than by the procuring entity itself.

69. As regards subparagraph (1) (a), it was observed that the main issue for consideration was whether it would be appropriate to procure construction and services through an electronic reverse auction, given that such procurement tended to be complex in nature,

involve qualitative evaluation criteria, and experience had indicated that electronic reverse auctions where permitted for such procurements might have been inappropriately used and overused.

70. As to construction, it was noted that not all construction procurement was complex (such as paving roads) and that developments over time might mean that what was viewed today as complex would not be so viewed in the future. On the other hand, it was observed that for the electronic reverse auction to function correctly and ensure that bidders priced their bids realistically and provided their best offers, bidders would be required to know the cost structure of their bids in detail. Prime contractors in complex construction contracts would not have such knowledge as regards the subcontracted elements of their bid. As a result, artificial prices could result. It was also observed that over the medium term, small- and medium-sized enterprises would tend to be excluded in favour of larger suppliers.

71. As regards services, it was observed that although some services might be capable of precise specification and purely objective evaluation, the class of services known as intellectual services would not be appropriately procured through this mechanism.

72. It was observed that in some jurisdictions, electronic reverse auctions were conducted on the basis of lists or catalogues that set out items that could be procured through the mechanism.

73. Accordingly, the Working Group decided that neither construction nor services procurement in their entirety should be excluded from the provisions governing electronic reverse auctions, pending further deliberations as to which type of procurement would be suitable for electronic reverse auction.

74. As regards the text of subparagraph (1) (a), it was agreed that the words “and accurate” and “such that homogeneity in the procurement can be achieved” should be deleted.

75. As regards paragraph (1) (b), it was observed that the aim of the provision was to ensure that electronic reverse auctions should be contemplated in competitive markets, but that it would not be appropriate to specify the number of potential suppliers or contractors that would constitute a competitive market. Accordingly, the Working Group decided to delete the words “at least [ten]” from the proposed text, and to reformulate the provision to provide that the number of suppliers should be such that effective competition would be ensured.

76. As regards paragraph (1) (c), it was agreed that the main issue for consideration was whether the price alone, or price and other evaluation criteria should be subject to the electronic reverse auction. Some delegations considered that only the price should be subject to auction, so as to ensure transparency in the process. Other delegations expressed the view that allowing non-price criteria to be auctioned would confer a benefit, for example, should technical issues (such as energy consumption, and others that may not be quantifiable) be included in the evaluation criteria, noting that the weighting accorded to each such criterion should be disclosed in the solicitation documents.

77. Yet other delegations considered that any non-price criteria should in any event be capable of quantification and objective evaluation, in order to preserve transparency in the process and the benefits of the auction. Certain delegations cautioned that the requirement that criteria be capable of quantification meant that they should be readily and objectively quantifiable.

78. The Working Group considered the functional approach of the text, and noted that providing that auctions should include only items that could be precisely specified, and for which the evaluation criteria in addition to price could be objectively quantified, would exclude by itself some categories of construction and services not suitable for the electronic reverse auction. However, it was also observed that this formulation would not address the question of costs structures noted in paragraph 70 above. On the other hand, the attention of the Working Group was drawn to the fact that drafting the text so as to exclude “construction” and “services” would raise complex issues of definition, and therefore that one solution might be to leave the text with those terms included, with appropriate guidance in the Guide to Enactment. It was agreed that the criteria issue would also determine the complexity of the electronic reverse auction, and the Working Group decided that its deliberations on the question should continue at its next session.

79. As regards the text of paragraph (1) (c), it was agreed that the words “standard products” and “commodities” should be deleted, but the remainder of the text would remain pending finalization of the Working Group’s deliberations on the above issues.

80. The Working Group requested the Secretariat to revise the text for the Model Law and to make consequential changes to the proposed text of the Guide to Enactment, taking into account the above matters.

(c) Pre-auction period (article 47 bis) (A/CN.9/WG.I/WP.40, paras. 18-25)

81. The Working Group noted that it would not be possible to finalize its deliberations on the proposed text of article 47 bis (A/CN.9/WG.I/WP.40, the section following para. 20) pending resolution of the issues regarding the conditions of use of electronic reverse auctions set out in paragraphs 65 to 80 above. The desirability of keeping the provisions as concise as possible was also stressed.

82. It was noted that the aim of the provisions was that competition would be unrestricted, so the provisions governing tender proceedings would be followed, save that the bids submitted, and their evaluation, would be “initial”. It was noted that “initial” in this context meant that all criteria would be presented and evaluated against the stipulated selection criteria in the normal manner, but the price (and any other criteria to be determined through the auction) would be submitted to the electronic reverse auction, so as to determine the successful supplier.

83. It was noted that the draft text enabled the number of participants invited to participate in the auction to be restricted, and that the Guide to Enactment should note that the conditions of use for restricted tendering would normally not apply to procurement suitable for an electronic reverse auction. Accordingly, it was considered that the number of participants should not, in normal circumstances, be restricted other than as a result of the initial evaluation as set out above.

84. It was observed that paragraph (4) of the draft article in particular required the Working Group to consider the models of electronic reverse auctions that should be provided for. It was recalled that the Working Group, at its seventh session, had considered two models that could be provided for in the text. In Model 1, all aspects of tenders that were to be compared in selecting the winning supplier, and which could be the price alone, would be submitted through the auction itself. In Model 2, there would be a prior assessment of all elements of the initial bid or of those not to be submitted to the auction, and suppliers would be provided with information on their ranking based on the initial evaluation. All evaluation criteria would be factored in a mathematical formula, which

would then re-rank the bidders on the submission of each bid during the auction itself. In both models, the auction would determine the successful supplier (unlike other possible models, which the Working Group had provisionally decided not to address in the Model Law).

85. As regards Model 2, certain delegations noted that it was difficult to understand how non-quantifiable criteria could be included in the procedure, since such criteria might be considered to undermine the logic of the procedure itself. It was also observed that the higher-ranking suppliers, whose products might be produced on a higher cost basis than those of lower-ranking suppliers, might submit unrealistically low prices during the auction itself, and therefore a performance risk might arise. It was observed that a way of avoiding this possibility would be to permit only the price to be subject to the auction, and not other criteria, that is a restricted version of Model 1.

86. The Working Group requested the Secretariat to produce two alternative provisions addressing the pre-auction period, one on the basis of Model 1, and one on the basis of Model 2, noting that the main issue for consideration was whether the electronic reverse auction should include non-price criteria that were qualitative and not quantifiable. The Working Group decided that it would be appropriate to consider the text of the Guide to Enactment and any draft regulations once the draft text of the Model Law, as revised, had been considered.

(d) Auction phase (article 47 ter) (A/CN.9/WG.I/WP.40, paras. 26-35)

87. It was noted that the Working Group would not be able to finalize its deliberations on the proposed text of article 47 ter (A/CN.9/WG.I/WP.40, the section following para. 27) until the issues set out above had been resolved. However, the Working Group provided preliminary commentary on the text as follows.

88. As regards subparagraph (1) (b), it was noted that the word “provide” and the alternative phrases “whether it has the top ranking in the auction” and “to establish the changes needed to any bid to give it the top ranking in the auction” should be deleted.

89. As regards paragraph (2), it was proposed that the text following the words “participate in the auction” in subparagraphs (a) and (b) considered procedural matters that could be addressed in regulations or the Guide to Enactment, and should be deleted from the draft text.

90. As regards subparagraph (2) (c), it was suggested that the text should form a separate paragraph.

91. As regards paragraph (3), it was suggested that the procuring entity might also need to terminate the electronic reverse auction under the circumstances referred to in the paragraph and it was proposed therefore that the words “or terminate” should be added to the paragraph after the word “suspend” (and that this matter should receive detailed treatment in the Guide).

92. As regards paragraph (6), it was noted that the second part of the paragraph addressed options available should the successful bidder fail to enter into a procurement contract. They included that a further electronic reverse auction should be held, that the second-best bidder should receive the contract (noting that identifying the second best bidder would not necessarily be possible), and that negotiations with other bidders might be permitted. It was also observed that, where the rules would award the contract to the second best bidder, there had been instances observed in practice of a bidder placing an artificially low but

winning bid, in the knowledge that the second-best bidder would receive the contract. The Working Group agreed to consider this issue further at a future session.

93. The Working Group decided that it would be appropriate to consider the text of the Guide and any draft regulations once the draft text of the Model Law had been revised in accordance with the above points, but noted in the interim that the text of the Guide and any draft regulations should be drafted so as to prevent obsolescence as much as possible.

**(e) Revisions to the Model Law to enable the use of electronic reverse auctions
(A/CN.9/WG.I/WP.40/Add.1, paras. 1-20)**

94. With respect to the proposed revisions to article 11 of the Model Law (Record of procurement proceedings) (A/CN.9/WG.I/WP.40/Add.1, para. 3) it was suggested that the proposed wording in paragraph 1, subparagraph (i) bis, of the article should be replaced with the following wording: “[i]n procurement proceedings involving the use of electronic reverse auctions pursuant to article 19 bis, a statement to that effect”, to ensure consistency with the wording in other parts of the same article.

95. No comments were made with respect to the proposed revisions to article 18 of the Model Law (Methods of procurement) (A/CN.9/WG.I/WP.40/Add.1, para. 4).

96. With respect to the proposed revisions to article 25 (Contents of invitation to tender and invitation to prequalify) and article 27 (Contents of solicitation documents) (A/CN.9/WG.I/WP.40/Add.1, paras. 6 and 7, respectively), the point was made that reference to “tendering proceedings” might be inappropriate as “tendering proceedings” had a specific meaning and scope under chapter III of the Model Law, which was considerably more comprehensive than electronic reverse auctions. It was also suggested that the term “opening” should be replaced with the term “start” as the former had particular connotations in procurement proceedings.

97. It was considered that the level of detail in the proposed revisions to article 27 should be reviewed: those provisions that did not require regulation by the Model Law should be removed to regulations or the Guide. The need for subparagraph (n) bis (i) was questioned as its content could be encompassed in subparagraph (q) of the same article. It was suggested that the term “lowest evaluated tender” in subparagraph n (bis) (v) should be replaced with the term “most economically advantageous tender” (as used in EU public procurement directive 2004/18/EC, article 53), as the former term might imply the “offer with the lowest price”. The understanding of the Working Group with respect to the latter suggestion, however, was that the term “lowest evaluated tender” used in the Model Law (see, in particular, article 34 (4) (b) (ii)) corresponded in meaning to the term “most economically advantageous tender”. In response to an inquiry, it was confirmed that subparagraphs (a) to (n) of article 27, including the provisions on the treatment of alternatives contained in subparagraph (g), would apply in the context of electronic reverse auctions, and the Guide would explain, where necessary, how those provisions operated in that context.

98. No comments were made with respect to the proposed revisions to article 28 of the Model Law (Clarification and modifications of solicitation documents) (A/CN.9/WG.I/WP.40/Add.1, para. 11).

99. The Working Group acknowledged the connection between the proposed revisions to article 31 (Period of effectiveness of tenders; modification and withdrawal of tenders) (A/CN.9/WG.I/WP.40/Add.1, para. 12), the provisions regulating cancellation and

suspension of electronic reverse auctions addressed in proposed article 47 ter (see para. 91 above), and the provisions on tender securities addressed in the proposed revisions to article 32 (see next paragraph). It was also observed that if suppliers could withdraw their bids before the electronic reverse auction itself, the impact on the level of competition that would be required for an effective auction should be considered. The Secretariat was requested to address this issue when revising the draft provisions.

100. With respect to the proposed revisions to article 32 of the Model Law (Tender securities) (A/CN.9/WG.I/WP.40/Add.1, para. 13), the Working Group noted that allowing for tender securities in the context of electronic reverse auctions might be problematic, as banks generally required a fixed price for the security documents. It was observed that little experience on the use of tender securities in electronic reverse auctions had been accumulated so far around the world and that existing practices were highly diverse (A/CN.9/WG.I/WP.40/Add.1, para. 13, discussing article 32 of the Model Law (Tender securities)). It was also noted that at least in one jurisdiction no tender securities were used at all in electronic reverse auctions. The view was expressed that it would be difficult therefore for the Working Group to formulate any strict rules on that issue. It was suggested that the Guide should note that practices might continue to evolve, as more relevant experience was accumulated. The Working Group deferred the consideration of the proposed revisions and asked the Secretariat to present to the Working Group at its next session a study on practical experiences with the use of tender securities in the context of electronic reverse auctions.

101. With respect to the proposed revisions to article 34 of the Model Law (Examination, evaluation and comparison of tenders) (A/CN.9/WG.I/WP.40/Add.1, paras. 14-17), it was suggested that the proposed addition to the end of subparagraph 1 (a) might enable a non-responsive tender to be amended so as to become responsive, and the addition should therefore be rephrased so as to ensure that it enabled the items that were to be presented in the auction alone to be amended after the submission of the initial tender.

102. The Secretariat was requested, in redrafting the articles, not to distort the way other procurement methods were handled in the Model Law, carefully to choose terminology to prevent confusion and to try to avoid repetition, especially in the light of the “functional equivalence” principle. At the same time, it was acknowledged that the ultimate drafting of those provisions would depend on resolution of the unsettled issue as to whether electronic reverse auctions should be treated in the Model Law as a separate procurement method or a phase in tendering proceedings.

(f) Location of provisions on electronic reverse auctions

103. It was suggested that all provisions related to electronic reverse auctions could be dealt with in a separate part, either within chapter V or as a chapter V bis, rather than piecemeal in revisions to relevant articles of the Model Law. This would assist, it was said, in determining which provisions should remain in the Model Law and which should be subject to regulations or addressed in the Guide, and in making the relevant provisions in the Model Law more workable and user-friendly. A further suggestion was made that a separate part of the Model Law would contain only those provisions relevant to electronic reverse auctions that derogate from the provisions in other parts of the Model Law and, to avoid repetition, where necessary, cross-references could be used.

104. Concerns were expressed about this suggestion, in that it presupposed that the issue of whether electronic reverse auctions were treated as a separate method or a phase in other

procurement methods had already been resolved in favour of the former resolution. In response, it was noted that provisions could be drafted in such a way as to encompass both options.

105. Another concern expressed was that additional amendments might be required to address the fact that the principle of “functional equivalence” made electronic procurement of all kinds possible and not only electronic reverse auctions. Some suggested that the Secretariat should follow the approach of amending each relevant article of the Model Law and refine what was proposed in A/CN.9/WG.I/WP.40/Add.1. The Working Group’s attention was also drawn to the fact that, with constantly evolving technological solutions and their introduction to procurement processes, it would be difficult to place electronic reverse auctions in a fixed structure and therefore sufficient flexibility in that regard should be retained. It was noted that caution should be exercised in taking a final decision on the issue of structure, and to focus on the resolution of substantive issues in the first instance.

12. Abnormally low tenders (A/CN.9/WG.I/WP.40/Add.1, paras. 21-29)

106. Views varied as to whether the provisions on abnormally low tenders should be included in the Model Law. On the one hand, strong support was expressed for inclusion of provisions in the Model Law. When reviewing tenders, procuring entities, it was said, should be allowed to seek justification of prices if they suspected abnormally low tenders. It was observed that the consequences of not doing so would be extremely disruptive for procurement process. Not only was there a performance risk, but also experience, particularly in the construction sector, indicated that businesses submitting abnormally low tenders subsequently tended to use all possible means to contest procurement proceedings and to improve the terms of the contract, with attendant upward pressure on the contract price. Addressing the issue in the Guide only would not be sufficient. It was also noted that the Working Group should look at the problem with abnormally low tenders in a broader context of public policy since the submission of abnormally low tenders often involved criminal acts (e.g., money-laundering) or illegal practices (e.g., non-compliance with minimum wage or social security obligations). It was also observed that where there were such obligations, an abnormally low tender whose price would not allow the minimum wage or social security obligations to be paid could be seen as clearly and objectively low.

107. On the other hand, some delegates were of the view that express provision should not be included in the Model Law because: (i) in practice, the right given to procuring entities to reject tenders on the basis that their tender price was abnormally low would be open to abuse (the tenders could be rejected as abnormally low without justification); (ii) what constituted an abnormally low tender could be a very subjective criterion, especially in international procurement; and (iii) there were other ways of dealing with the abnormally low tenders. Further, it was observed that although the subjectivity might be most apparent in international procurement, as what is an abnormally low price in one country may be perfectly normal in another, in the domestic procurement context such techniques as selling old stock below cost or below cost pricing to keep the workforce occupied were legitimate. Therefore, prices could be low but not abnormally low. Accordingly, and instead of addressing the subject in the Model Law, it was suggested that the Guide should provide guidance to the following effect: “if an enacting State chooses to introduce the right of a procuring entity to reject tenders on the basis that their tender price was abnormally low, the State has to ensure that proper procedures are in place to prevent arbitrary decisions and abusive practices.” The point was made that this approach would be

preferable in the light of the fact that the multilateral development banks did not accept the rejection of tenders on the basis that their tender price was abnormally low.

108. In response to some of those concerns, it was noted that risks of contract non-performance would be mitigated through the proper implementation of articles 6 (Qualifications of suppliers and contractors) and 32 (Tender securities) of the Model Law, which would enable the qualifications of the supplier and the resources available to undertake the contract to be assessed. A particular emphasis was placed on the qualification criteria that the suppliers had to meet to participate in procurement proceedings listed in article 6 (1) (b), such as professional and technical qualifications and financial resources. It was also noted that the concerns regarding possible abuse of procedures designed to address abnormally low tenders could be met if safeguards ensuring transparency and clarity were put in place: for example, if it were noted in the solicitation documents that a price realism analysis could be conducted should it be suspected that the tender price was abnormally low. Objectivity in the process could also be improved if procuring entities were to compare prices received with pre-tender estimates based on market prices. Finally, it was observed, many possible abnormally low tenders when closely examined would turn out to be non-responsive tenders that would be rejected as such.

109. The Working Group decided to proceed on the basis that some minimum provisions would be included in the Model Law, supplemented by detailed discussion in the Guide, in particular as regards the necessary safeguards to prevent arbitrary decisions and abusive practices. The Secretariat, in preparing the revised provisions, was asked to apply the following considerations: (i) the procuring entity should be allowed but not required to reject abnormally low tenders; (ii) introducing in the Model Law a possibility of assessing bid prices on the basis of cost rather than price (noting that the draft texts before the Working Group were based on a price assessment) was undesirable since cost assessment was cumbersome and complicated; (iii) only the procuring entity, and not a third party, should be able to take measures where an abnormally low tender was suspected, and the assessment of the tender concerned must be carried out on a purely objective basis; and (iv) it was important to address possible abnormally low tenders before the relevant contract had been concluded, as measures thereafter might lead to even higher prices and disruption to the procurement concerned.

110. As regards the proposed changes to article 34 (A/CN.9/WG.I/WP.40/Add.1, paras. 23 and 26), the general view was that: (i) the proposed addition to article 34 (4) (b) (A/CN.9/WG.I/WP.40/Add.1, para. 23) should be deleted so that the question of qualification was not confused with the evaluation of tenders. However, the Working Group considered that the principle set out in the draft addition could be included in the proposed text for article 34 (3) (d) bis (A/CN.9/WG.I/WP.40/Add.1, para. 26); (ii) the language of the proposed text for article 34 (4) (b) should be amended so as to provide that before a procuring entity could reject a tender on the basis that its price was abnormally low, the procuring entity had to follow certain procedures such as those that were set out in the proposed article 34 (3) (d) bis; and (iii) in the proposed article 34 (3) (d) (bis), the phrase in the chapeau “and raises concerns as to the ability of the tenderer to perform the contract” should be deleted.

111. The Secretariat was requested to reflect the above issues when proposing revised text for the Guide to Enactment.

**B. Note by the Secretariat on possible revisions to the UNCITRAL
Model Law on Procurement of Goods, Construction and Services,
submitted to the Working Group on Procurement
at its eighth session**

I. Introduction

1. The background to the current work of Working Group I (Procurement) on the revision of the UNCITRAL Model Law on Procurement of Goods, Construction and Services (the “Model Procurement Law” or the “Model Law”)¹ is set out in paragraphs 5 to 33 of document A/CN.9/WG.I/WP.37, submitted to the Working Group for its consideration at this session. The main task of the Working Group is to update and revise the Model Law as necessary, so as to take account of recent developments in public procurement, including the use of electronic communications and technologies in procurement.

2. At its seventh session (New York, 4-8 April 2005) the Working Group addressed the following topics: electronic publication and communication of procurement-related information, other aspects arising from the use of electronic means of communication in the procurement process (such as controls over their use), electronic reverse auctions, and abnormally low tenders (see, further, document A/CN.9/575). The Working Group requested the Secretariat to prepare drafting materials for consideration on these topics at its eighth session, and also to present a comparative study on the use of framework agreements (A/CN.9/568, para. 78 and A/CN.9/575, para. 9).

3. This working paper will present for the Working Group’s consideration drafting materials for provisions to govern the use of electronic means of communication in the procurement process, including controls over such use. Further working papers will present drafting materials on the topics of electronic publication of procurement-related information, and electronic reverse auctions and abnormally low tenders respectively (A/CN.9/WG.I/WP.39 and A/CN.9/WG.I/WP.40). As also requested by the Working Group at its seventh session, the Secretariat will address the question of framework agreements in two further working papers (A/CN.9/WG.I/WP.41 and A/CN.9/WG.I/WP.42 respectively).

¹ For the text of the Model Law, see *Official Records of the General Assembly, Forty-ninth Session, Supplement No. 17* and corrigendum (A/49/17 and Corr.1), annex I (also published in the *Yearbook of the United Nations Commission on International Trade Law*, vol. XXV:1994 (United Nations publication, Sales No. E.95.V.20), part three, annex I. The Model Law is available in electronic form at the UNCITRAL website (<http://www.uncitral.org/english/texts/procure/ml-procure.htm>).

II. Guidance given by the Working Group for drafting revisions to the text of the Model Law and in the Guide to Enactment to provide for the use of electronic communications and technologies in the procurement process

A. Scope and extent of revisions to the Model Law and Guide to Enactment

1. General remarks

4. The Working Group has reaffirmed that principles governing public procurement should be located in the text of the revised Model Law, and appropriate guidance on their application should be set out in its accompanying Guide to Enactment (A/CN.9/568, para. 24, A/CN.9/575, para. 11).

5. This approach is a continuation of that adopted when the Model Law and its accompanying Guide to Enactment were promulgated in 1994. Paragraph 12 of the Guide, under the heading “A ‘framework’ law to be supplemented by procurement regulations”, notes that:

“The Model Law is intended to provide all the essential procedures and principles for conducting procurement proceedings in the various types of circumstances likely to be encountered by procuring entities. However, it is a ‘framework’ law that does not itself set forth all the rules and regulations that may be necessary to implement those procedures in an enacting State. Accordingly, the Model Law envisages the issuance by enacting States of ‘procurement regulations’ to fill in the procedural details for procedures authorized by the Model Law and to take account of the specific, possibly changing circumstances at play in the enacting State—without compromising the objectives of the Model Law.”

6. In considering the scope of revisions to be made to the text of the Model Law, the Working Group has taken into account its twin goals of updating and simplifying the text, and rendering it more precise, and the impact that those revisions would have on those countries that have based their procurement legislation on the current Model Law (A/CN.9/575, para. 10). Accordingly, the Working Group has expressed the wish not to revise the text of the current Model Law beyond the extent reasonably necessary to achieve its goals.

7. Paragraph 7 of the Guide to Enactment, under the heading “Purpose of this Guide”, notes that:

“The information presented in the Guide is intended to explain why the provisions in the Model Law have been included as essential minimum features of a modern procurement law designed to achieve the objectives set forth in the Preamble to the Model Law. Such information might assist States also in exercising the options provided for in the Model Law and in considering which, if any, of the provisions of the Model Law might have to be varied to take into account particular national circumstances... taking into account that the Model Law is a ‘framework’ law providing only a minimum skeleton of essential provisions and envisaging the issuance of procurement regulations, the Guide identifies and discusses possible areas to be addressed by regulation rather than by statute.”

8. As to the nature and level of detail in the guidance to be provided, and in the context of its consideration of electronic procurement, the Working Group has noted the importance of guidelines from UNCITRAL to ensure consistency in regulations governing procurement in various jurisdictions. The Working Group has also expressed concern that practices could otherwise be developed that would be divergent and inconsistent with the principles of the Model Law (A/CN.9/575, para. 61).

9. The Working Group may therefore wish to consider whether to broaden the scope of the Guide to Enactment, so as not only to continue to fulfil its functions as set out in paragraph 7 above, but also to address the concern set out in the preceding paragraph. The Working Group may consider that the Guide may usefully provide greater detail of the regulations that enacting States may wish to promulgate in the form of a narrative or even draft regulations themselves, for example when introducing or enabling electronic communications in public procurement (A/CN.9/568, para. 38). A Guide of such type may also require more prescriptive language than is found in the current text (see, further, para. 23 below). The Guide would then be addressing practical procedures in some detail, and may need to allow for the possibility of changes to procedures, as new technologies and modes of operation arise.

10. The Working Group may consider, for the assistance of procurement officials in enacting States, that the practical procedures included in the Guide to Enactment should address issues that arise for procuring entities as contracting parties in procurement. In this regard, the International Chamber of Commerce (ICC) has issued a Guide to Electronic Contracting and the ICC e-Terms 2004,² the aim of which is to enhance the legal certainty of contracts made by electronic means. Although strictly beyond the scope of the Model Law, therefore, the Working Group may wish to consider whether reference could be made to other publications that discuss such issues, such as the ICC Guide.

11. Given the possible substantial additions to the text of the Guide, the Working Group may wish to consider whether to produce a new Guide to Enactment (perhaps entitled “Guide to Enactment and Use”), or to make additions to the current text by way of addenda. In order to assist the Working Group in considering the form that the revised Guide to Enactment should take, the Secretariat has set out below drafting suggestions as regards the text that might appear in the Guide on the topic of the use of electronic communications in the procurement process (the text following para. 20 below). The Working Group may wish to consider this text as an example of how the revised Guide may be presented.

2. Contract administration and implementation phase in procurement

12. The Model Law addresses the procedures to be followed when awarding a procurement contract. As the text of the current Guide to Enactment notes, at paragraph 10:

“The Model Law sets forth procedures to be used by procuring entities in selecting the supplier or contractor with whom to enter into a given procurement contract. The Model Law does not purport to address the contract performance or implementation phase. Accordingly, one will not find in the Model Law provisions on issues arising in the contract implementation phase, issues such as contract administration, resolution of performance disputes or contract termination. The

² Available at <http://www.iccwbo.org/law/econtracting/>.

enacting State would have to ensure that adequate laws and structures are available to deal with the implementation phase of the procurement process.”

13. In the light of the general comments made regarding the scope of the Model Law and Guide to Enactment above, the Working Group may wish to consider whether to address the contract administration and implementation phase in the texts (see, further, para. 78 of A/CN.9/WG.I/WP.36), also so as to address the concern expressed in paragraph 8 above. This Note does not suggest any changes to the text of the Model Law and Guide to Enactment that may be necessary if this aspect of procurement is to be addressed, a matter that may be necessary.

B. General legislative principles and policy approaches for dealing with electronic communications and technologies in the procurement process – interaction with electronic commerce and other law

1. General remarks

14. At its seventh session, the Working Group decided to base its future deliberations on the form of communications in the procurement process to provide for a general principle of functional equivalence in the use of communications in procurement (A/CN.9/WG.I/WP.34, para. 13, A/CN.9/575, para. 11).³ These principles are those upon which the UNCITRAL Model Law on Electronic Commerce (1996)⁴ (the Model Law on Electronic Commerce) is based.

15. The Guide to Enactment accompanying the Model Law on Electronic Commerce sets out the functions of a document in paragraph 16, as follows: “[a document should] be legible by all; [should] remain unaltered over time; [should] allow for the reproduction of a document so that each party would hold a copy of the same data; [should] allow for the authentication of data by means of a signature; and [should] be in a form acceptable to public authorities and courts”.

16. The functional equivalent approach is based on the recognition that legal requirements for paper-based documentation, which have satisfied the above functions of a document, constitute the main obstacle to the use of electronic communications, in that the latter may not enjoy the same degree of contractual certainty and legal recognition as their paper counterparts. Examples include requirements for documents to be in “writing”, to be “original”, or to be “documentary evidence”. The functional equivalent approach aims to ensure that all documents have the same degree of contractual certainty and legal recognition.

³ The functional equivalent approach is entirely consistent with the provisions of the current text of the UNCITRAL Model Procurement Law as regards the use of communications in the procurement process. Article 9 (1) of the UNCITRAL Model Procurement Law provides that, subject to any requirement of form specified by the procuring entity when first soliciting participation, communications are to be in a form that “provides a record of the content of the communication” and there is no definition of the methods or means of communication.

⁴ For the text of the Model Law, see *Official Records of the General Assembly, Fifty-first session, Supplement No. 17 (A/51/17)*, annex I (also published in the *UNCITRAL Yearbook*, vol. XXVII:1996 (United Nations publication, Sales No. E.98.V.7), part three, annex I). The Model Law and its accompanying Guide to Enactment have been published as United Nations publication, Sales No. E.99.V.4, and are available in electronic form at the UNCITRAL website <http://www.uncitral.org/english/texts/electcom/ml-ecomm.htm>.

17. The Working Group has also expressed the wish that the Model Procurement Law's provisions should be technologically neutral, for the same reasons as are set out in paragraph 24 of the Guide to Enactment that accompanies the Model Law on Electronic Commerce:

"The approach used in the Model Law [on Electronic Commerce] is to provide in principle for the coverage of all factual situations where information is generated, stored or communicated, irrespective of the medium on which such information may be affixed. It was felt during the preparation of the Model Law [on Electronic Commerce] that exclusion of any form or medium by way of a limitation in the scope of the Model Law [on Electronic Commerce] might result in practical difficulties and would run counter to the purpose of providing truly "media-neutral" rules [that purpose is set out in paragraph 6 of that Guide]."

18. However, the Working Group has also noted that in some enacting States, provision has already been made to address issues arising from the use of electronic communications and technologies in procurement in States' general body of law. Additionally, there may be specific rules for the use of electronic communications in government activities, including in the procurement process (A/CN.9/WG.I/WP.34, para. 12). Consequently, the Working Group has decided that such issues as are questions of the general law on electronic commerce and not of procurement law should not be addressed in the Model Law itself. Rather, an enacting State's general body of law should govern the issues raised by electronic commerce generally, and the Working Group will not recommend provisions regarding electronic communications in the Model Law unless the procurement context strictly requires such provision (A/CN.9/575, para. 50).

19. Nonetheless, the Working Group's recommendations as to the contents of the Guide to Enactment indicate that its text should provide guidance for enacting States on requirements for relevant legislation, such as discussing the rules that enacting States may wish to ensure are in place in order to ensure effective procurement contracting using electronic communications and technologies. These general rules may in some cases be supplemented by regulations, addressing such issues as those set out in Chapters II and III of the Model Law on Electronic Commerce, under the titles: "Application of legal requirements to data messages" (Chapter II) and "Communication of data messages" (Chapter III) (the term "data message" is equivalent to an electronic communication).⁵ The Working Group may therefore wish to consider the extent to which the guidance to be provided should address these issues and make reference to other documents, such as the Model Law on Electronic Commerce, where solutions are to be found.

⁵ Chapter II addresses the following issues: "Legal recognition of data messages", "Incorporation by reference", "Writing", "Signature", "Original", "Admissibility and evidential weight of data messages", "Retention of data messages", and Chapter III the following issues: "Formation and validity of contracts", "Recognition by parties of data messages", "Attribution of data messages", "Acknowledgement of receipt", and "Time and place of dispatch and receipt of data messages". The Working Group may be aware that UNCITRAL's Working Group on Electronic Commerce has made recommendations to the Commission as to draft provisions for a Convention on Electronic Contracting. The Commission approved the text at its thirty-eighth session, held in Vienna from 4 to 15 July 2005. The draft provisions do not differ materially from those in the Model Law on Electronic Commerce and it is anticipated that, if adopted by the Commission, the process of ratification of the Convention and its coming into force will take a considerable period of time. Thus the Working Group may wish to base its deliberations for the time being on the provisions of the Model Law on Electronic Commerce, but to update them if need be, before its work is completed.

2. Possible Guide to Enactment text on the use of electronic communications in the procurement process

(a) General remarks

20. The Working Group may find it useful to address the substance of the anticipated revisions to the text of the Model Law in a new section in the introduction to the Guide to Enactment, though the appropriate location of the text will depend to some extent on the solutions chosen by the Working Group for the principles governing the use of electronic communications to be included in the revised Model Law. In addition, and as it is from those principles that the proposed revisions to the text of the Model Law are drawn, proposed text that could form the basis of the guidance on this issue to be provided in the Guide to Enactment is found in the following paragraphs, with the proposed revisions to the text of the Model Law itself and article-specific commentary thereafter.

21. The Working Group may care to note the following points as regards the drafting of the proposed text. First, where reference is made to the Model Law, and to avoid any confusion during the course of the Working Group's deliberations, the Model Law is referred to as the "1994 Model Law". Secondly, the text includes the full text of quotations from the Model Law on Electronic Commerce, but the Working Group may wish to consider whether and how to make reference to its provisions when the Guide is produced. Thirdly, stylistic and other minor changes may be required (including new terminology to distinguish between the 1994 Model Law and revised Model Law) so as to ensure internal consistency in the Guide when finalized. Fourthly, references to working papers and reports of the Working Group would be deleted, but are included in the suggestions below for ease of reference during the Working Group's deliberations. For the same reason, the draft appears with sub-headings footnotes, which could also be deleted in the final text. Finally, and according to whether the Working Group decides to revise the Guide using addenda or by producing a new Guide, the paragraph numbering will need to be revised.

22. The text does not seek to address more than the main issues raised by the use of electronic communications in the procurement process. The Working Group may wish to consider, therefore, the appropriate level for such a discussion (see, for example, draft paragraph 11, on the question of electronic signatures).

23. If the Guide to Enactment is to operate as a guide to both enactment and use of the Model Law, the Working Group may wish to consider whether some of its guidance should have a fairly prescriptive character. Accordingly, the Working Group will find alternative text for its consideration, addressing the question of sufficiency of general electronic commerce law in enacting States, for example, presented as "Enacting States [will also] [may] wish to consider [whether the law is adequate]" in the proposed text for the Guide to Enactment below.

(b) Proposed text

(i) Introduction to provisions introducing the use of electronic communications in the procurement process

(1) The UNCITRAL Model Procurement Law (1994 version) was adopted at a time at which the use of information technology and electronic communications was anticipated, but not yet widespread. Although some of its provisions may allow for the use of electronic communications and technologies in the procurement process, the Model Law was not primarily concerned with legal issues related to the use of

these technologies, and a number of its provisions reflect a background of communications, record-keeping and evidentiary systems that were largely based on information recorded on paper. Examples include references to “documentary evidence” and similar concepts set out in articles 6 (2), 7 (3)(a)(iii), 10, 27 (c), 36, 38 (f) of the current 1994 Model Law, the rules on preparation, modification, withdrawal, submission and opening of tenders, and the conclusion of a procurement contract.

(2) Since the adoption of the Model Law in 1994, the use of electronic communications and technologies in public procurement, including the use of procurement methods based on the Internet, to which this Guide will refer generally as “electronic procurement”, has increased rapidly. Electronic procurement has been observed to offer many potential benefits, including improved value for money from more rigorous competition in a broader procurement market, better information for suppliers and contractors and more competitive techniques, savings in time and costs, improved administration of contracts awarded, and, in some cases, improved compliance with rules and policies and fewer opportunities for corruption and abuse. Further, electronic procurement provides valuable opportunities to enhance public confidence and transparency in the procurement process. UNCITRAL therefore considers that the Model Law should make provision so as to enable the use of electronic procurement.

(3) However, concerns have also been expressed that controls on the use of electronic procurement may be needed to address the relative novelty of electronic communications, possible discrimination where access to the necessary infrastructure may be lacking, issues of security, confidentiality and authenticity in electronic communications, and the impact of modern procurement methods on other socio-economic policy goals. The revisions to the original Model Law seek to address these concerns, and this Guide sets out the objectives of the revisions themselves.

(4) Although some of the issues raised by electronic procurement can be accommodated within the Model Law’s existing provisions (or through the interpretation of existing laws and rules, including as set out in the Guide to Enactment), UNCITRAL has revised the text of the Model Law so as to make appropriate provision or provide clarification where necessary and, where possible, to promote the use of electronic procurement as a means of enhancing the achievement of the objectives of the Model Law itself.

(ii) Interaction between legislation concerning electronic procurement and electronic commerce legislation

- (5) Electronic procurement has a natural dependence on the existing level of use and regulation of electronic commerce in general. This Guide will also, therefore, make reference to the interaction between the legislation governing electronic commerce and that governing procurement where appropriate. It will not be appropriate for a procurement law to govern electronic commerce generally in an enacting State, and for this reason, the Model Law will not address issues that fall to be treated as a matter of general electronic commerce law. However, provision is made where the procurement context requires additional measures (such as the submission of tenders). In the light of the above, enacting States may wish to ensure that their existing legislation governing the use of electronic commerce indeed provides adequate recognition of electronic communications, and that it addresses the issues set out in the following paragraphs. For ease of reference of enacting States, the

solutions to the issues that UNCITRAL has provided in its main electronic commerce text (the UNCITRAL Model Law on Electronic Commerce (1996)) are also set out.⁶

(6) One of the main fetters on the use of electronic communications is a legal obstacle: that is, uncertainty as to the legal recognition, validity or enforceability of electronic communications generated in the contractual process. These obstacles may arise in requirements for “written” or “original” communications and documents, the formalities of contract formation and the admissibility of evidence in court (A/CN.9/568, para. 30 and A/CN.9/WG.I/WP.34/Add.1, para. 44). The UNCITRAL Model Law on Electronic Commerce seeks to enable commercial transactions to be conducted electronically, by removing these legal obstacles and so providing certainty in the use of electronic communications.

(7) The approach of the UNCITRAL Model Law on Electronic Commerce is to provide a general principle of functional equivalence in communications, such that electronic communications are afforded the same degree of recognition as traditional paper-based documents. The functions of documents, including communications, are more fully described in paragraph 16 of the Guide to Enactment accompanying that Model Law, which notes that they should, inter alia, fulfil the following functions: “to ... be legible by all; to provide that a document would remain unaltered over time; to allow for the reproduction of a document so that each party would hold a copy of the same data; to allow for the authentication of data by means of a signature; and to provide that a document would be in a form acceptable to public authorities and courts.”

(8) Articles 5, 6 and 8 of the UNCITRAL Model Law on Electronic Commerce in material part provide for the functional equivalence of paper-based and electronic communications, addressing the “legal recognition of data messages [electronic communications]”, and the notions of “writing”, and “original”. The combined effect of these provisions, which should be read together, is that electronic communications have the same degree of legal recognition and validity as paper-based ones—that is, the two types of communications are functionally equivalent.

(9) The UNCITRAL Model Law on Electronic Commerce addresses these issues as follows:

(a) Article 5: “[I]nformation shall not be denied legal effect, validity or enforceability solely on the grounds that it is in the form of a data message”. The commentary to that article in the Guide to Enactment of the Model Law on Electronic Commerce notes that “article 5 merely indicates that the form in which certain information is presented or retained cannot be used as the only reason for which that information would be denied legal effectiveness, validity or enforceability. However, article 5 should not be misinterpreted as establishing the legal validity of any given data message or of any information contained therein”;

(b) Article 6: “[w]here the law requires information to be in writing, that requirement is met by a data message if the information contained therein is

⁶ For the text of the Model Law, see *Official Records of the General Assembly, Fifty-first Session, Supplement No. 17 (A/51/17)*, annex I (also published in the *UNCITRAL Yearbook*, vol. XXVII:1996 (United Nations publication, Sales No. E.98.V.7), part three, annex I). The Model Law and its accompanying Guide to Enactment have been published as United Nations publication, Sales No. E.99.V.4, and are available in electronic form at the UNCITRAL website <http://www.uncitral.org/english/texts/electcom/ml-ecomm.htm>.

accessible so as to be usable for subsequent reference.” The commentary notes that “article 6 is intended to define the basic standard to be met by a data message in order to be considered as meeting a requirement ... that information be retained or presented “in writing” (or that the information be contained in a “document” or other paper-based instrument)”; and

(c) Article 8: “[w]here the law requires information to be presented or retained in its original form, that requirement is met by a data message if: (a) there exists a reliable assurance as to the integrity of the information from the time when it was first generated in its final form, as a data message or otherwise; and (b) where it is required that information be presented, that information is capable of being displayed to the person to whom it is to be presented.” The commentary explains that although the adjective “original” normally refers to documents of title and negotiable instruments, the provision may be needed in some jurisdictions in certain additional transactions.

(10) [The specific considerations arising when documents are signed electronically, and those arising in the conclusion of contracts by electronic means are addressed in the commentary to article 36 (“Acceptance of tender and entry into force of procurement contract”) below.] [As regards the electronic signature of documents, article 7 of the UNCITRAL Model Law on Electronic Commerce, provides as follows: “[w]here the law requires a signature of a person, that requirement is met by a data message if (a) a method is used to identify that person and to indicate that person’s approval of the information contained in the data message; and (b) that method is as reliable as was appropriate for the purpose for which the data message was generated or communicated, in the light of all the circumstances, including any relevant agreement ...”.]

(11) Enacting States may also wish to issue regulations covering such matters as technical disruptions, disclaimers of liability and practical issues such as time zones, issue of receipts, etc.

(iii) Approach to enabling the use of electronic communications in the revised Model Law

(12) This revised Model Procurement Law addresses the use of electronic communications in the procurement process adopting the functional equivalent approach from the UNCITRAL Model Law on Electronic Commerce, but, as noted above, will not make provision for matters addressed in the general law of electronic commerce unless the procurement context requires additional provisions. Consequently, the Model Procurement Law does not address the following topics: the general legal recognition of electronic communications, what is meant by “writing”, what is an “original” document, electronic or digital signatures, the general admissibility and evidential weight of electronic communications, the formation, validity and operation of contracts, the attribution of electronic communications, and acknowledgements of receipt of electronic communications other than tenders.

(13) The provisions presented in this revised Model Procurement Law set out that any requirement for writing, for a record or to a meeting in the Model Law itself can be met by using electronic communications. (In the context of a meeting, using electronic communications means that the participants can follow and participate in the proceedings by electronic means of communication.) It does not provide that such communications are of themselves legally valid, a matter that will be provided

for in an enacting State's general electronic commerce legislation. However, the procurement context requires specific provision in areas such as regarding the submission of tenders under the provisions of articles 27 (h), (q), (r), and (z), 30, 31 (2) and 33 of the current Model Law. In such cases, the reasons for the need and objectives of the provisions are set out in the relevant section of this Guide (A/CN.9/WG.I/WP.34, para. 13, A/CN.9/575, para. 11).

(14) The revised Model Law also, where possible, encourages (but does not require) the use of electronic communications and technologies in public procurement (A/CN.9/575, para. 10, A/CN.9/568, para. 33), save in the case of [cross reference to electronic procurement, such as ERA and dynamic purchasing systems].

(15) The use of electronic communications raises issues of authenticity, confidentiality and integrity of communications, documents and data, as noted above. Enacting States [will also] [may] wish to consider the extent to which their domestic electronic commerce law provides adequate controls over communications that could be generated in the procurement context. This topic is further addressed in the sections of this Guide addressing the form of communications (under article 9 of the 1994 Model Law) and the submission of tenders by electronic means (under article 30 of the 1994 Model Law).

(16) The principle of flexibility in method of communicating, based on functional equivalence, applies not only to general communications in procurement, but equally to the publication of opportunities and procurement-related information, the exchanging of information concerning procurement, the submission and opening of tenders, holding pre-tender conferences, the maintenance, storage and dissemination of information and documents (including the record of the procurement proceedings required under article 11 of the Model Procurement Law), and the conclusion of contracts. Accordingly, proposed article 4 bis [or proposed article 5 bis] are drafted in broad fashion, so as to cover all aspects of the generation, transfer and storage of information in communications and documents, and the controls and accessibility standards described in the preceding paragraphs should apply equally to these broader notions.

III. Proposed draft text for the revised Model Procurement Law to accommodate the use of electronic communications during the procurement process

A. Functional equivalence of all methods of communicating, publishing, exchanging or storing information or documents

1. General remarks

24. The Working Group has addressed drafting the new provisions to provide for the use of electronic communications from two angles. First, the Working Group has decided to include a new provision setting out the principle of functional equivalence of methods of communication as described above (including the notions of certainty in the use of and legal recognition of electronic communications), and, secondly, it wishes to ensure that the Model Law's overall provisions regarding the form of communications are sufficient to

allow for the principle to operate (which may require additional changes to the current text).

2. Proposed new text for the Model Law: new article 4 bis to address functional equivalence

25. The Working Group decided at its seventh session to continue its deliberations taking into account the following alternative drafts of a new article 4 bis of the Model Law, to set out the principle of functional equivalence:

(a) Variant A

Article 4 bis. Functional equivalence of all methods of communicating, publishing, exchanging or storing information or documents

(1) Any [provision] [requirement] under this Law for:

- (a) A document to be in writing;
- (b) A document to be signed;
- (c) A document to be in a sealed envelope;
- (d) A document to be published or provided or made accessible;
- (e) A record to be created or maintained;
- (f) Meeting of persons to take place; and
- (g) The opening of tenders

or any other requirement implying physical presence or a paper-based environment may be met by the use of electronic, optical or comparable means [, including, but not limited to, electronic data interchange (EDI), electronic mail, telegram, telex or telecopy], [provided that the enacting State or procuring entity is satisfied that such use:

- (a) [Does not represent an obstacle to the procurement process] [uses means of communication generally available];
- (b) Promotes economy and efficiency in the procurement process; and
- (c) Will not result in discrimination among or against potential suppliers or contractors or otherwise substantially limit competition] [provided that the enacting State or procuring entity is satisfied that such use complies with the accessibility standards contained in [article 4 bis or 5 bis].]⁷

(b) Variant B

Article 4 bis. Functional equivalence of all methods of communicating, publishing, exchanging or storing information or documents

(1) Any provision of this Law related to writing, to a record or to a meeting shall be interpreted to include electronic, optical or comparable means, [including, but not limited to, electronic data interchange (EDI), electronic mail, telegram, telex or

⁷ As regards the proposed article 5 bis, see paragraph 30 below.

telecopy] [provided that the enacting State or procuring entity is satisfied that such use:

- (a) [Does not represent an obstacle to the procurement process] [uses means of communication generally available];
- (b) Promotes economy and efficiency in the procurement process; and
- (c) Will not result in discrimination among or against potential suppliers or contractors or otherwise substantially limit competition] [provided that the enacting State or procuring entity is satisfied that such use complies with the accessibility standards contained in article [article 4 bis or 5 bis].] [with the inclusion of the list found in Variant A in the Guide to Enactment.] (A/CN.9/568, para. 13).

3. Commentary

26. Each variant includes three notions:

- (a) Some description of the methods of communicating, publishing, exchanging or storing information or documents, and holding meetings referred to;
- (b) A statement that electronic “means” of so doing will be sufficient, though the word “means” is neither defined nor further refined;
- (c) The inclusion of a control over the use of electronic “means”, such that they serve the objectives of the Model Law and, particularly, do not operate as a barrier to access to procurement (these are the notions set out paragraphs (a), (b) and (c) of the proposed article 4 bis or 5 bis, the “accessibility standards” that the Working Group has decided should apply to any means of communication chosen (A/CN.9/575 (paras. 14, 25, 32, 33, 39, 45 and 50)).⁸

27. The difference between the variants arises in the location of the description “all methods of communicating, publishing, exchanging or storing information or documents”. Variant A provides a non-exhaustive list of methods and Variant B presents the description in a generic manner, with examples to be provided in the Guide to Enactment. The Working Group may wish to consider whether the enhanced understanding that may be provided by setting out examples in the text may be outweighed by the risk of confusion should other situations in which information or documents are communicated, published, exchanged or stored arise and as business modalities change.

28. The Working Group may also wish to consider whether the word “methods” in the heading should be changed to “means”, so as to conform to the use of “means” in the text. Secondly, the Working Group may consider that the words “physical presence” should be followed by the words “of a person”. Thirdly, as the word “means” is not itself defined in the text, the words “of communicating, publishing, exchanging or storing information or documents” could be inserted after the word “means” in either variant. Alternatively, a phrase such as “of so doing” (Variant A) or “of such notions” (Variant B) could be inserted after the word “means”, thus making clear that the word “means” refers to the manner of description of the items set out immediately preceding it. Finally, the Working Group may wish to place the obligation to address the accessibility standards on the procuring entity

⁸ The means of communication imposed should not present an unreasonable barrier to participation in the procurement proceedings (a principle that would allow a requirement for paper-based or electronic communications in appropriate circumstances).

rather than the enacting State in the alternative. In this regard, the Working Group may wish to consider the following further Variant C for the proposed article 4 bis, which is based on Variant A above but could equally be presented in the form of Variant B, *mutatis mutandis*:

Variant C

Article 4 bis. Functional equivalence of all methods of communicating, publishing, exchanging or storing information or documents

(1) Any [provision] [requirement] under this Law for:

- (a) A document to be in writing;
- (b) A document to be signed;
- (c) A document to be in a sealed envelope;
- (d) A document to be published or provided or made accessible;
- (e) A record to be created or maintained;
- (f) Meeting of persons to take place; and
- (g) The opening of tenders

or any other requirement implying physical presence or a paper-based environment may be met by the use of electronic, optical or comparable means [of communicating, publishing, exchanging or storing information or documents]. [Such means may include, but are not limited to, electronic data interchange (EDI), electronic mail, telegram, telex or telecopy], [provided that procuring entity is satisfied that such use:

- (a) [Does not represent an obstacle to the procurement process] [uses means of communication generally available];
- (b) Promotes economy and efficiency in the procurement process; and
- (c) Will not result in discrimination among or against potential suppliers or contractors or otherwise substantially limit competition] [provided that the procuring entity is satisfied that such use complies with the accessibility standards contained in [article 4 bis or 5 bis].]⁹

29. Proposed guidance on this issue to be provided in Guide to Enactment is addressed in the draft general guidance set out following paragraph 23 above.

B. Accessibility standards

1. Proposed new text for the Model Law: new article 5 bis, to address accessibility standards

30. As to the “accessibility standards” described in the proposed draft article 4 bis above,¹⁰ the Working Group decided at its seventh session that the standards were a critical part of the introduction of provisions enabling flexibility in the form of

⁹ As regards the proposed article 5 bis, see paragraph 30 below.

¹⁰ Which standards apply equally to the publication and storage of information, further discussed in A/CN.9/WG.I/WP.39.

communications to be chosen, and that the location of the description of those standards should be considered in the light of all the revisions addressing this issue (A/CN.9/575, para. 14). The Working Group may wish to consider, therefore, whether the standards should be located in the proposed article 4 bis, the revisions to article 9 (set out in the following section), or perhaps as a new article 5 bis, which could take the following form:

Article 5 bis. Accessibility standards

- (1) The procuring entity shall ensure that its use of any method of communication for publishing, exchanging or storing information or documents or holding a meeting during the procurement process:
 - (a) [Shall not represent an obstacle to the procurement process] [shall use means of communication generally available];
 - (b) Should promote economy and efficiency in the procurement process; and
 - (c) Shall not result in discrimination among or against potential suppliers or contractors or otherwise substantially limit competition.

2. Commentary

31. The Working Group may wish to consider whether the formulation of the accessibility standards as currently drafted may contain some degree of internal inconsistency. A reference to a means of communication that is “generally available” in subparagraph (a) may be regarded as potentially in conflict with subparagraph (c), in that a means of communication may be generally available but nonetheless discriminatory as regards some suppliers or contractors.

3. Proposed new text for the Guide to Enactment regarding article 4 bis or 5 bis of the Model Law, to address accessibility standards

32. The Working Group may wish to consider whether the Guide to Enactment should address the concept of accessibility standards, for example in the following terms:

Article [4][5] bis. Accessibility standards

- (1) The new provisions attach conditions to the use of electronic means of communication to safeguard the objectives of the Model Law, so as to prevent the means of communication chosen from operating as a barrier to access (A/CN.9/568, para. 30). The criteria set out in subparagraphs (a), (b) and (c) of the proposed article 4 bis [or 5 bis] are referred to as “accessibility standards” that should apply to any means of communication chosen (A/CN.9/575 (paras. 14, 25, 32, 33, 39, 45 and 50)). Their aim is to ensure that a procuring entity does not discriminate among suppliers or contractors in the manner of communication, as currently provided in article 9 (3) of the 1994 Model Law.
- (2) Electronic means of communication typically rely upon a network able to handle and transmit digital signals, which must be open and generally available to any person, such as the Internet, which is (at the time of writing) widely if not universally available. However, given the rapid pace of technological advancement, new technologies may emerge that, for a period of time, may not be sufficiently accessible (whether for technical reasons, reasons of cost or otherwise). The “accessibility standards” therefore require procuring entities to be satisfied when commencing a procurement process that the means of communication chosen must not only be non-discriminatory and accessible to all

at that time, but should [fulfil the objectives of the Model Law as set out in its preamble]
[not obstruct the procurement process].

III. Proposed draft text for the revised Model Procurement Law to accommodate the use of electronic communications during the procurement process

C. Form of communication—proposed revisions to article 9 of the Model Law¹

1. General remarks

1. The form of communication is a sub-category of the general means of communication proposed to be addressed in a new article 4 bis of the Model Law, as discussed in paragraphs 24-29 of document A/CN.9/WG.I/WP.38. The Working Group has agreed to provide for a general principle as to the form of communication in article 9

¹ See, further, A/CN.9/WG.I/WP.34/Add.1, paras. 18-43, and A/CN.9/WG.I/WP.34/Add.2. The form of communication applies to documents and communications generated in prequalification proceedings (article 7 of the Model Law), Form of communications (article 9), Rules concerning documentary evidence provided by suppliers or contractors (article 10), Contents of invitation to tender and invitation to prequalify (article 25), Provision of solicitation documents (article 26), Clarification and modification of solicitation documents (article 28), Submission of tenders (article 30), Notice of solicitation of proposals (article 37), and Clarification and modification of requests for proposals (article 40).

of the Model Law (A/CN.9/575, paras. 32 and 33), which would apply to all types of communications dealt with in the Model Law. The principle would enable the procuring entity to choose any form of communication with suppliers and others, without being required to justify its choice, provided that the chosen form meets the “accessibility standards” set out in draft article 5 bis. The choice is also subject to the current provisions or article 9 that communications must contain a record of their content.

2. The Working Group may wish to consider whether, in the light of the interaction between the current article 9 and the proposed article 4 bis and accessibility standards, all three provisions should appear sequentially in the Model Law. For example, the Working Group may consider that the notion of access to communications as reflected in the draft accessibility standards is an issue that is closely linked to the current article 5 (“Public accessibility of legal texts”) and therefore that the articles governing the use of communications should immediately precede or follow it.

2. Proposed additional text for the Model Law: revisions to article 9 of the Model Law, to address the form of communication

3. The Working Group may wish to consider the following proposed revisions to article 9, the aim of which is to enable the procuring entity to choose the communication method. The text of paragraph (1) in the 1994 Model Law is restated below (in normal font), so as to introduce the proposed additional text, which is underlined.

Article 9. Form of communications

(1) Subject to other provisions of this Law and any requirement of form specified by the procuring entity when first soliciting the participation of suppliers or contractors in the procurement proceedings, documents, notifications, decisions and other communications referred to in this Law to be submitted by the procuring entity or administrative authority to a supplier or contractor or by a supplier or contractor to the procuring entity shall be in a form that provides a record of the content of the communication.

(1) bis. The procuring entity may stipulate in the solicitation documents the form that all communications with suppliers or contractors shall take, provided that the means of communication chosen by the procuring entity shall comply with the accessibility standards contained in [article 4 bis or 5 bis].

(1) ter. The procuring entity may stipulate in the solicitation documents that tenders submitted under article 30 must be submitted in electronic form [, provided that the means of submission chosen by the procuring entity shall comply with the accessibility standards contained in article [article 4 bis or 5 bis].

(1) quater. Without prejudice to the right of a procuring entity to stipulate the form of communications in the solicitation documents, the procuring entity shall not discriminate against or among suppliers or contractors on the basis of the form in which they transmit or receive documents, notifications, decisions or other communications.

(1) quinquies. The procurement regulations may establish measures to ensure the authenticity, integrity, accessibility and confidentiality of communications, and to ensure the interoperability of the systems used to transmit and receive them.

3. Proposed additional text for the Guide to Enactment regarding article 9 of the Model Law, to address the form of communication

4. The Working Group may wish to consider whether the following paragraphs could form the basis of the guidance on this issue, using the text in the 1994 version of the Guide to Enactment as a basis. The text of paragraph (1) in the 1994 Guide is restated below (in normal font), so as to introduce the proposed additional text (with text to be removed struck through, and proposed additional new text underlined):

Article 9. Form of communications

1. Article 9 is intended to provide certainty as to the required form of communications between the procuring entity and suppliers and contractors provided for under the Model Law. The essential requirement, subject to other provisions of the Model Law, is that a communication must be in a form that provides a record of its content. ~~This approach is designed not to tie communication to the use of paper, taking into account that communications are increasingly carried out through means such as electronic data interchange ("EDI"). In view in particular of the as yet uneven availability and use of non-traditional means of communication such as EDI, paragraph (3) has been included as a safeguard against discrimination against or among suppliers and contractors on the basis of the form of communication that they use.~~

2. Obviously, article 9 does not purport to answer all the technical and legal questions that may be raised by the use of EDI or other non-traditional methods of communication in the context of procurement proceedings, and different areas of the law would apply to ancillary questions such as the electronic issuance of a tender security and other matters that are beyond the sphere of "communications" under the Model Law.

3. In order to permit the procuring entity and suppliers and contractors to avoid unnecessary delays, paragraph (2) permits certain specified types of communications to be made on a preliminary basis through means, in particular telephone, that do not leave a record of the content of the communication, provided that the preliminary communication is immediately followed by a confirming communication in a form that leaves a record of the content of the confirming communication.

3 bis. The revised article 9 of the Model Law provides that the procuring entity may choose the method by which it will communicate with suppliers or contractors in the procurement process. The objective of this provision is to afford the procuring entity the option of insisting on a particular means of communication, such as electronic means, without having to justify its choice. However, that option is subject to two elements of control: first, that the means of communication chosen must serve the objectives of the Model Law (that is, those objectives set out in the preamble to the Model Law) and, secondly, that the means of communication do not operate as a barrier to access to procurement (the "accessibility standards" described in paragraphs ** above, which will apply to any means of communication chosen). In this regard, the revised paragraphs (1) bis, (1) ter and (1) quarter have been included so as to strengthen the safeguards contained in the article against discriminatory or otherwise exclusionary practices by the procuring entities (A/CN.9/575, para. 33). The obligation on the procuring entity to be satisfied that the accessibility standards are met will be open to review under article 54, and the requirements of the record of the procurement proceedings to be maintained pursuant to article 11 will enable the procuring entity's decision and how it was arrived at to be reviewed.

3 ter. Paragraphs (1) bis and (1) ter are also designed to ensure that suppliers and contractors do not have the right to insist on any particular means of communication with a procuring entity, that no such right can be construed (A/CN.9/575, para. 33).

3 quater. The proposed text as regards paragraph 1 ter has been inserted in order to provide for the electronic submission of tenders, currently prohibited under article 30 of the Model Law (see, further, A/CN.9/568, para. 32 and A/CN.9/WG.I/WP.34/Add.1, paras. 22-37).²

3 quinquies. The proposed new paragraph (1) quinquies has been inserted so as to draw the attention of enacting States that:

(a) There should be appropriate procedures and systems to establish the authenticity of communications;

(b) The means used to send and receive electronic communications should be sufficient to ensure that the integrity of data is preserved;

(c) The confidentiality of information submitted by or relating to other suppliers is maintained;

(d) The tools or systems used to send and receive electronic communications are fully compatible (or interoperable);

(e) The means used to send and receive electronic communications should enable the time of receipt of documents to be established, if the time of receipt is significant in applying the rules of the procurement process (for example, the submission of requests to participate and tenders/proposals); and

(f) The means used to send and receive electronic communications should be secure, that is, they ensure that tenders and other significant documents cannot be accessed by the procuring entity or other persons prior to any deadline, to prevent procuring entities' passing information on other tenders to favoured suppliers and to prevent competitors from gaining access to that information themselves (security) (A/CN.9/568, para. 41).

3 sexiens. Items (a), (b) and (c) fall to be addressed in general electronic commerce law, and as noted in paragraph [cross refer to general guidance section] above, enacting States [will] [may]³ wish to consider the extent to which their existing laws provide adequate controls over the communications that may be generated in the procurement process, whether further regulation is needed, and whether to make reference to the need for such controls in their procurement regulations. One example in domestic legislation requires the heads of procuring entities before using electronic commerce to "ensure that the [entity's] systems are capable of ensuring authentication and confidentiality commensurate with the risk and magnitude of the harm from loss, misuse, or unauthorized access to or modification of the information".⁴

² Consequential proposed revisions and commentary to article 30 are set out in the text following paragraphs 23 and 24.

³ See paragraph 23 of document A/CN.9/WG.I/WP.38.

⁴ The United States Federal Acquisition Regulations, sect. 4.502, available at <http://www.arnet.gov/far/loadmainre.html>.

3 septiens. Items (d), (e) and (f) require procurement-specific solutions, arising most notably in connection with the submission of tenders electronically, and are addressed in paragraphs [cross reference] below.

4. Commentary

5. The Working Group may be aware that electronic means of communication may involve the use of particular tools or software. If a procuring entity wishes to use specialised software, for example, the Working Group may wish to provide that the procuring entity should provide it openly and without charge, and that the procuring entity should ensure that any electronic systems it uses are fully compatible (or interoperable) with those in common or general use. (The term interoperability is used to denote systems that can communicate between themselves without technical or functional hindrance, and general electronic commerce law or practice may establish appropriate measures or systems in a particular enacting State.) The Working Group may also wish to consider whether a description of what is meant by “common or general use” would be warranted, perhaps with reference to the accessibility standards discussed earlier in this Note.

D. Notion of “electronic” and related terms⁵

1. General remarks

6. There is no definition of the notion “electronic optical or comparable means of communicating [, including, but not limited to, electronic data interchange (EDI), electronic mail, telegram, telex or telecopy” set out in the alternative draft provisions for functional equivalence under consideration by the Working Group.

7. At its seventh session, the Working Group considered whether a definition of the term “electronic” or of “electronic means” should be included in article 2 of the Model Law, perhaps based on the definitions found in the European Union procurement directives of 31 March 2004 (Directive 2004/17/EC and Directive 2004/18/EC) (A/CN.9/575, para. 20). The definitions in these Directives provides as follows: “Electronic means” means using electronic equipment for the processing (including digital compression) and storage of data which is transmitted, conveyed and received by wire, by radio, by optical means or by other electromagnetic means.”⁶

2. Proposed additional text for the Model Law: addition to article 2 of the Model Law, to provide definitions of the notion “electronic” and related terms

8. In the light of the references to the term “electronic means” and other related terms in the proposed articles 4 bis and 9, the Working Group agreed that further deliberations regarding proposed definitions of these items should be held at a future session (A/CN.9/575, para. 22), taking the following alternative proposals into account:

(a) Variant A

“‘Electronic means’ of communicating, publishing, exchanging or storing

⁵ See, further, A/CN.9/WG.I/WP.34, paras. 17-22, and A/CN.9/WG.I/WP.34/Add.2, article 2. Definitions.

⁶ See article 1, para. 13, of the EU Directive 2004/18/EC.

information or documents means the generation, exchange, sending, receipt or storage of information or documents by electronic, optical or comparable means including, but not limited to, electronic data interchange (EDI), electronic mail, telegram, telex or telecopy.

‘Electronic means’ of assembly of persons for any purpose under this Law means any method of assembly whereby those assembled can follow and participate in the proceedings by electronic means of communication.”

(b) Variant B

“‘Electronic means’ of communicating, publishing, exchanging or storing information or documents, and of holding meetings, means the generation, exchange, sending, receipt or storage of information or documents by electronic, optical or comparable means including, but not limited to, electronic data interchange (EDI), electronic mail, telegram, telex or telecopy.”

3. Commentary

9. The Working Group may wish to bear in mind that electronic commerce legislation in certain systems defines the term “electronic”, or “electronic means”, or provide equivalent definitions, with varying levels of specificity. Common elements include references to electrical, digital, magnetic, wireless, optical, electromagnetic, biometric and photonic technology, and references to the form in which information can be transmitted or stored (e.g. using telecommunications technology).⁷

⁷ Examples of provisions found include:

- a. “‘Electronic’ means relating to technology having electrical, digital, magnetic, wireless, optical, electromagnetic, or similar capabilities (United States Electronic Signatures in Global and National Commerce Act of 2000; Sect. 106 (2));
- b. “‘Electronic’ includes created, recorded, transmitted or stored in digital form or in other intangible form by electronic, magnetic or optical means or by any other means that has capabilities for creation, recording, transmission or storage similar to those means and “electronically” has a corresponding meaning. (Canada: draft “Uniform Electronic Commerce Act” Part 1, 1 (a));
- c. “‘Electronic mail means any text, voice, sound or image message sent over a public communications network which can be stored in the network or in the recipient’s terminal equipment until it is collected by the recipient (EU Directive 2002/58/EC).
- d. “‘Electronic communication means: (a) a communication of information in the form of data, text or images by means of guided and/or unguided electromagnetic energy; or (b) a communication of information in the form of speech by means of guided and/or unguided electromagnetic energy, where the speech is processed at its destination by an automated voice recognition system.” (Australia, The Electronic Transactions Act 1999, Sect 5, (1));
- e. “‘Electronic communication’ means a communication transmitted (whether from one person to another, from one device to another or from a person to a device or vice versa (a) by means of a telecommunication system (within the meaning of the Telecommunications Act 1984); (b) by other means but while in an electronic form (UK Electronic Communications Act 2000, Sect. 15);
- f. “‘Electronic’ includes electrical, digital, magnetic, optical, electromagnetic, biometric, photonic and any other form of related technology; “‘electronic communication’ means information communicated or intended to be communicated to a person or public body, other than its originator, that is generated, communicated, processed, sent, received, recorded, stored or displayed by electronic means or in electronic form, but does not include information communicated in the form of speech unless the speech is processed at its destination by an automatic voice recognition system (Republic of Ireland Electronic

10. However, the Model Law on Electronic Commerce does not define the adjective “electronic” itself, again approaching the question of electronic communications from a functional standpoint. It provides, in the definitions section, that:

“(a) ‘Data message’ means information generated, sent, received or stored by electronic, optical or similar means including, but not limited to, electronic data interchange (EDI), electronic mail, telegram, telex or telecopy;

(b) ‘Electronic data interchange (EDI)’ means the electronic transfer from computer to computer of information using an agreed standard to structure the information;”

11. These definitions are similar to those of the proposed new article 4 bis and revised article 9, set out in the text following paragraph 25 of document A/CN.9/WG.I/WP.38 and paragraph 3 above.

12. It was also suggested that it would be possible not to include a definition of the term “electronic means” or related items, on the basis that one would be superfluous in the light of the proposed article 4 bis (see the text following para. 25 of document A/CN.9/WG.I/WP.38). Further, the Working Group may consider that not including a definition would be consistent with the general principle of addressing only procurement-specific electronic commerce issues in the Model Law. If the Working Group concludes that no definition is necessary, it may consider a description of what is meant by “electronic means” of communication in the introductory text for the Guide to Enactment proposed in the text following paragraph 23 of document A/CN.9/WG.I/WP.38, so as to address the concern that the Guide to Enactment should encourage consistency in the use of terminology by enacting States, in order to avoid conflict with other legislative acts (A/CN.9/575, para. 20).

E. Legal value of procurement contracts concluded electronically⁸

1. General remarks

13. Articles 36 (2)(a) and (b) of the Model Law provide that the solicitation documents may require the supplier or contractor whose tender has been accepted to “sign a written procurement contract” conforming to the tender. Consistent with its general stance on the inclusion of electronic commerce issues in the Model Law, the Working Group has decided that the ability to conclude a contract electronically, including to sign an electronic contract, is a matter that falls to be addressed in general laws governing electronic commerce and therefore that the Model Law should not make provision for the electronic

Commerce Act 2000, Sect. 2);

g. “Electronic record” means a record generated, communicated, received or stored by electronic, magnetic, optical or other means in an information system or for transmission from one information system to another (Singapore, Electronic Transactions Act (Chapter 88), Art. 2).

The Secretariat found that other jurisdictions, notably those in continental Europe and Latin America, typically did not define the term “electronic”.

⁸ See, further, A/CN.9/WG.I/WP.34, paras. 44-58, and A/CN.9/WG.I/WP.34/Add.2. The legal recognition of electronic communications arises in connection with the acceptance of tender and entry into force of procurement contract (article 36), and also raises issues of procurement contracts and electronic signatures.

conclusion of contracts (A/CN.9/575, para 50).⁹ However, the Working Group expressed the view that the Guide to Enactment might usefully address the issues raised by electronic contracting (see, further, A/CN.9/WG.I/WP.34/Add.1, para. 44). Suggestions for that text are set out below.

2. Proposed additional text for the Guide to Enactment regarding article 36 of the Model Law, addressing the acceptance of tender and entry into force of procurement contract

14. The Working Group may wish to consider whether the following proposed text may usefully be added following paragraph 1 of the Guide to Enactment addressing article 36 of the Model Law. As noted above, the text appears under headings and sub-headings, but these could be removed for consistency of style when the Guide is produced.

Formalities regarding the procurement contract

(1) bis. Articles 27 (y) and 38 (u) of the Model Law refer to a “written” procurement contract, and article 36 (2)(a) and (b) provide that the solicitation documents may require the supplier or contractor whose tender has been accepted to “sign a written procurement contract” [, which may be signed in the traditional manner, or electronically]. [Enacting States will wish to ensure that their existing legislation recognizes procurement contracts that are executed electronically.]

(a) Electronic contracting

(1) ter. The solution provided by the UNCITRAL electronic commerce texts, found in article 11 of the Model Law on Electronic Commerce, does not seek to interfere in the general rules of contract formation. Rather, its stated aim is to “promote international trade by providing increased legal certainty as to the conclusion of contracts by electronic means. It deals not only with the issue of contract formation but also with the form in which an offer and an acceptance may be expressed. In certain countries, [the provision] ... might be regarded as merely stating the obvious, namely that an offer and an acceptance, as any other expression of will, can be communicated by any means, including data messages. However, the provision is needed in view of the remaining uncertainties in a considerable number of countries as to whether contracts can validly be concluded by electronic means. Such uncertainties may stem from the fact that, in certain cases, the data messages expressing offer and acceptance are generated by computers without immediate human intervention, thus raising doubts as to the expression of intent by the parties. Another reason for such uncertainties is inherent in the mode of communication and results from the absence of a paper document.” Article 11 itself provides that “[w]here a data message [electronic communication] is used in the formation of a contract, that contract shall not be denied validity or enforceability on the sole ground that a data message [electronic communication] was used for that purpose.”

(b) Electronic signatures

(1) quater. In practical terms, enacting States may wish to prescribe the manner in

⁹ The UNCITRAL Model Law on Electronic Signatures (2001) addresses the issue, as its name suggests. For the text of the Model Law, see *Official Records of the General Assembly, Fifty-sixth Session, Supplement No. 17 (A/56/17)*, annex II. The Model Law and its accompanying Guide to Enactment have been published as United Nations publication, Sales No. E.02.V.8, and are available in electronic form at the UNCITRAL web site (<http://www.uncitral.org/english/texts/electcom/ml-elecsig-e.pdf>).

which the parties will sign or otherwise authenticate a procurement contract concluded electronically, in accordance with their laws on electronic commerce. Some States may have requirements for digital or other authenticated forms of electronic signatures in electronic commerce, which may be applied to procurement provided that they do not operate so as to restrict access to the procurement.

(1) quinquies. The solution provided by the UNCITRAL electronic commerce texts is found in article 7 of the Model Law. The Guide to Enactment text discussing the latter article notes that its aim is to promote reliance on electronic signatures for producing legal effect where such electronic signatures are functionally equivalent to handwritten signatures. The provisions themselves address the issue of electronic signature of documents using the principle of functional equivalence, by providing that: “[w]here the law requires a signature of a person, that requirement is met in relation to a data message if: [the signature] is as reliable as was appropriate for the purpose for which the data message was generated or communicated, in the light of all the circumstances, including any relevant agreement.”

3. Commentary

15. The Working Group will note that proposed paragraph 1 bis contains alternative text addressing the issue of electronic signatures, addressing the question of the degree of prescription to be given in the Guide (see, further, paragraph 23 of document A/CN.9/WG.I/WP.38).

F. Requirement to maintain a record of the procurement proceedings

1. General remarks

16. Article 11 of the Model Procurement Law requires the procuring entity to maintain a record of the procurement proceedings containing certain minimum information, and provides for that information to be made accessible. However, recognizing that article 11 addresses the storage but not the dissemination of information, and that it does not prescribe the form in which it should be maintained, the Working Group has requested the Secretariat to include the concepts of both storage and dissemination in the “accessibility standards” set out in the text following paragraph 30 of document A/CN.9/WG.I/WP.38. The draft article 4 bis and alternative article 5 bis, and the draft text for the Guide to Enactment addressing accessibility standards, reflect these issues. Further, the Working Group has decided that article 11 should not address the form of the record, but that the Guide to Enactment should consider the issues raised (see, further, A/CN.9/575, paras. 43-46).

2. Proposed additional text for the Model Law: revisions to article 11 of the Model Law, to enable the maintenance of the record of the procurement proceedings in any form

17. The Working Group has also requested the Secretariat to re-draft proposed new paragraph 6 of article 11, so as to ensure that its provisions apply to all methods of storage of documents (A/CN.9/575, para. 47). The proposed revisions to the provision are set out below.

Article 11. Record of procurement proceedings

...

(6) Procurement regulations may establish procedures for maintaining and accessing the record of the procurement proceedings, including measures to ensure the integrity, authenticity, accessibility and, where appropriate, confidentiality of information, the traceability of steps in the procurement process, and the interoperability of record retention systems.

3. Proposed additional text for the Guide to Enactment regarding article 11 of the Model Law, to enable the maintenance of the record of the procurement proceedings in any form

18. The Working Group may wish to consider whether the following paragraphs could form the basis of the guidance on this issue, using the 1994 version of the Guide text as a basis:

Article 11. Record of procurement proceedings

1. One of the most important ways to promote transparency and accountability is to include provisions requiring that the procuring entity maintain a record of the procurement proceedings. A record summarizes key information concerning the procurement proceedings. It facilitates the exercise of the right of aggrieved suppliers and contractors to seek review. That in turn will help to ensure that the procurement law is, to the extent possible, self-policing and self-enforcing. Furthermore, adequate record requirements in the procurement law will facilitate the work of Government bodies exercising an audit or control function and promote the accountability of procuring entities to the public at large as regards the disbursement of public funds...

[additional text proposed to be inserted in current paragraph (1), to be paragraph (1) bis, thus separating the original paragraph (1) into two new paragraphs¹⁰

(1) bis. Article 11, however, focuses on the accessibility and availability of information forming the record, and does not contain requirements as to the form of the record, nor the conditions to be in place for a record to be maintained electronically (A/CN.9/575, para. 45). The accessibility standards set out in [article 4 bis or 5 bis], however, require the procuring entity, when maintaining the record, to select a means of storage of information that will enable the information concerned to remain accessible even as technologies advance, and to be non-discriminatory. Further, enacting States may wish to pass regulations that ensure that record retention systems are fully compatible (interoperable), and that they allow each communication in the procurement process to be verified, such that the sender, recipient and time and duration of each communication can be established (and automatic data processing or calculations can be reconstituted) (traceability). Further, the regulations may address whether access to the record and contract documents should be recorded and any data protection issues that would arise, to ensure the integrity and security of data, and confidentiality of communications and information, as more fully set out in [cross reference to commentary to article 9 above].]

¹⁰ The remainder of paragraph (1) and of the commentary on the article addresses the issue of disclosure of information. The Working Group may consider that a new paragraph (1) bis could be inserted, before the disclosure discussion, to address the continued accessibility and interoperability of record retention systems, any required period of retention of records, confidentiality and integrity and security of electronic records (A/CN.9/WG.I/WP.34/Add.1, para. 57).

G. Electronic submission of tenders, proposals and quotations¹¹

1. General remarks

19. Under article 30 (5)(a) of the Model Law, tenders are to be submitted “in writing, signed and in a sealed envelope”, or under article 30 (5)(b) “in any other form specified in the solicitation documents”, subject to certain conditions. Article 30 (5)(b) also gives a supplier an overriding right to submit a tender in writing, signed and in a sealed envelope. According to the 1994 Guide to Enactment, this latter is an “important safeguard against discrimination in view of the uneven availability of non-traditional means of communication such as [Electronic Data Interchange (EDI)]”. (Those provisions are incorporated by cross-reference to chapter III of the Model Law in articles 46 (1) (two-stage tendering) and 47 (3) (restricted tendering), and similar provisions are implied in article 48 (6) (request for proposals).) However, and in the light of more widespread availability of the relevant technology, the Working Group has decided to amend these provisions in order to enable tenders and other offers to be submitted electronically (A/CN.9/586, para. 32).

20. Applying the principle of functional equivalence to the electronic submission of tenders, electronic tenders require the same legal value as tenders submitted in writing, signed and in a sealed envelope. Article 30 (5)(b) provides that the form of any tender should provide “a record of the content of the tender and at least a similar degree of authenticity, security and confidentiality” as one submitted in writing, signed and in a sealed envelope. The Guide to Enactment refers to additional “rules and techniques” that might be needed, for instance “to guard the confidentiality of tenders and prevent ‘opening’ of the tenders prior to the deadline for submission of tenders”.¹²

21. In the electronic context, such rules and regulations may need to address the following matters. First, security: tenders must be protected from unauthorized access or interference (for example, via firewalls). Secondly, integrity: the system should prevent any reading or alteration of the contents of tenders submitted before the time stipulated for opening (for example, by using encryption technologies, locking all tenders, ensuring that tenders cannot be decrypted before the scheduled opening time, ensuring that only authorized persons can set or change the opening time, perhaps requiring two authorized persons). Thirdly, the authenticity of tenders must be established. Fourthly, the confidentiality of information must be protected, including intellectual property rights. Fifthly, interoperability—procuring entities should ensure that the systems used are fully compatible with those of potential suppliers or contractors. Finally, systems should be checked periodically to assist in protection of the system against outside interference (including viruses, worms and hackers).

22. For the purposes of the record of the procurement proceedings required under article 11 of the Model Law, the traceability of the communications concerned should also be verified (see, further, the text following paragraph 18 above). In practical terms, this may involve creating a record of all access to the system before tenders are opened and detecting any unauthorized access.

¹¹ See, further, A/CN.9/WG.I/WP.34/Add.1, para. 33, and A/CN.9/WG.I/WP.34/Add.2.

¹² Guide to Enactment of the UNCITRAL Model Law on Procurement of Goods, Construction and Services, remarks to article 30, para. 3. For the text of the Guide to Enactment, see document A/CN.9/403, reproduced in the UNCITRAL Yearbook, vol. XXV:1994 (United Nations publication, Sales No. E.95.V.20), part three, annex II.

23. The Working Group may wish to consider whether the Guide to Enactment should propose draft regulations or narrative text to address these matters, such as that set out in the preceding paragraphs.

2. Proposed additional text for the Model Law: revisions to article 30 of the Model Law, to enable the submission of tenders in electronic form

24. The text of paragraph (5) in the 1994 Model law is restated below (in normal font), so as to introduce the proposed additional text (with text to be removed struck through, and proposed additional new text underlined):

Article 30. Submission of tenders

(5) (a) ~~Subject to subparagraph (b),~~ A tender shall be submitted in writing, signed and in a sealed envelope ~~(b) Without prejudice to the right of a supplier or contractor to submit a tender in the form referred to in subparagraph (a), a tender may alternatively be submitted in or in any other form specified in the solicitation documents, provided that the means of submission chosen by the procuring entity shall comply with the accessibility standards contained in [article 4 bis or 5 bis];~~

(b) The procuring entity shall, on request, provide to the supplier or contractor a receipt showing the date and time when its tender was received.

3. Commentary

25. The proposed revisions would enable the procuring entity to insist on the submission of tenders in electronic format, by removing the previous option for a supplier to submit its tender in a sealed envelope. The Working Group may note that there is no provision for an electronic equivalent of a sealed envelope in the proposed revisions (questions of confidentiality, security and integrity of data are examined further in paragraphs 26 to 27 below). The procuring entity is required, under the proposed article, to apply the accessibility standards discussed earlier in this Note to the selection of the submission method, consistent with the choice to be made in any form of communication in the procurement.

4. Proposed additional text for the Guide to Enactment regarding article 30 of the Model Law, to enable the submission of tenders in electronic form

26. In the light of the above, paragraph 3 of the current text of the Guide to Enactment addressing article 30 of the Model Law could therefore be amended to provide as follows, with a new paragraph 3 bis (with text to be removed struck through, and proposed additional new text underlined):

Article 30. Submission of tenders

(3) ~~The requirement in Paragraph (5) (a) that tenders provides that tenders are to be submitted in writing is subject to the exception in subparagraph (b) permitting the use of a form of communication other than writing, such as electronic data interchange (EDI), including submission by electronic means as [defined in article 2] [described in the commentary to article 9], provided that the form used is one that provides a record of the content of the communication. Additional safeguards are included to protect the integrity of the procurement proceedings, as well as the particular interests of the procuring entity and of suppliers and contractors: that the use of a form other than writing must be permitted by the solicitation documents;~~

~~that suppliers and contractors must always be given the right to submit tenders in writing, an important safeguard against discrimination in view of the uneven availability of non-traditional means of communication such as EDI; and that the alternative form must be one that provides at least a similar degree of authenticity, security and confidentiality. It may be further noted that the implementation of paragraph (5) to accommodate the submission of tenders in non-traditional forms that the form must be set out in the solicitation documents; and that the form must be one that provides at least a similar degree of authenticity, security and confidentiality as submission in paper-based format. Enacting States or procuring entities may consider that the submission of tenders in non-paper forms would necessitate elaboration of special rules and techniques to guard the confidentiality of tenders and to prevent “opening” of the tenders prior to the deadline for submission of tenders, and to deal with other issues that might arise when a tender is submitted other than in paper (e.g., the form that the tender security would take).~~

(3) bis. Enacting States or procuring entities may therefore wish to enact regulations that address the origin and authenticity of communications, documents and tenders (and proposals or quotations) received from suppliers or contractors; the integrity of communications, documents and tenders received from suppliers or contractors, the date and time of receipt of communications, documents and tenders; that prevent communications, documents and tenders from being accessed by the procuring entity or other persons prior to any deadline, that provide that any unauthorized access or attempt to access communications, documents and tenders prior to the deadline referred to in paragraph (1) above is detectable; that ensure the ongoing confidentiality of communications, documents and tenders received from or relating to other suppliers or contractors; and that ensure that communications are traceable and systems interoperable.

27. The Working Group may, as noted above, wish to provide further detail or draft regulations addressing these issues, for example along the following lines, in proposed paragraph (3) ter:

(3) ter. Systems for the electronic receipt of tenders must ensure at a minimum that:

- (a) [The authenticity of] electronic signatures relating to tenders [can be established][comply with relevant electronic signature legislation, e.g. that based on the Model Law on Electronic Signatures];
- (b) The system is interoperable with those in [general]¹³ use in [the enacting State];
- (c) The exact time and date of the receipt of tenders can be established;
- (d) No person can have access to a tender prior to the time and date specified in the solicitation documents, or any extension thereto as the deadline for submission of tenders, and at which tenders are to be opened;
- (e) If that access prohibition is infringed, the infringement is clearly detectable;
- (f) Only [two] authorized persons may set or change the time and date specified in the solicitation documents or any extension thereto as the deadline for submission of tenders, and at which tenders are to be opened;
- (g) Authorized persons may have access to the tender only after the deadline;

¹³ As regards the notion of “general use”, see paragraph 5 above.

(h) Data received and opened in accordance with these requirements must remain accessible only to such authorized persons.¹⁴

H. Electronic opening of tenders

1. General remarks

28. Article 33 (1) of the UNCITRAL Model Procurement Law provides that tenders “shall be opened at the time specified in the solicitation documents as the deadline for the submission of tenders [...], at the place and in accordance with the procedures specified in the solicitation documents.” Article 33 (2) provides further that “all suppliers or contractors that have submitted tenders, or their representatives, shall be permitted by the procuring entity to be present at the opening of tenders.”

29. The Working Group has noted that while article 33 (1) may be sufficiently broad to accommodate any system for opening tenders, article 33 (2) suggests the physical presence of suppliers and contractors at a given place and time (A/CN.9/575, para. 36). The Working Group decided that the Model Law should include an enabling provision to permit the opening of electronic tenders. Such opening may be achieved through an electronic information system, which would automatically release and open the tenders at the date and time provided in the solicitation documents, and automatically transmit the information that would usually be publicly announced at the opening of tenders. Alternatively, authorized persons may open tenders on-line and publish the relevant information.

30. The electronic opening of tenders may require security-related controls additional to those for other electronic procurement. For example, even automatic release and opening of tenders will require human authorization at some point, and individuals will have to be designated for that purpose. If tenders are to be opened by individuals, they may need to be issued with decryption keys. The controls may also include only simultaneous action by at least two authorized persons (e.g. unlocking of data), logging each access to the system and step taken, and the prevention of virus-checking steps from compromising the integrity of data. Finally, the system must allow the sequential opening of both elements of a two stage tender submitted under article 46 of the Model Law, without the security of the second stage being compromised. The Working Group may wish to consider whether it is appropriate to address these detailed technical issues in the Guide to Enactment, or merely to make reference to the general controls set out in paragraphs 21 and 22 above.

2. Proposed additional text for the Model Law: revisions to article 33 of the Model Law, to address the opening of tenders submitted electronically

31. The Working Group has decided that article 33 of the Model Law should be revised to contain the following draft text, as new paragraphs 4 (A/CN.9/575, paras. 37-42):

Article 33. Opening of tenders

...

¹⁴ These regulations are based on those found in Directive 2004/17/EC of the European Parliament and of the Council of 31 March 2004 coordinating the procurement procedures of entities operating in the water, energy, transport and postal services sectors (Official Journal of the European Union, No. L 134, 30 April 2004, p. 1).

(4) Where the procurement proceedings were conducted electronically in accordance with [insert provisions dealing with electronic communications, reverse auctions and other fully automated procedures, if any], suppliers or contractors shall be deemed to have been permitted to be present at the opening of the tenders if they are allowed to follow the opening of the tenders through electronic means of communication used by the procuring entity.

(5) Where suppliers or contractors are permitted to follow the opening of the tenders through electronic means of communication used by the procuring entity in accordance with article 33 (4), they shall be deemed to have been permitted to be present at the opening of tenders in accordance with the requirements of article 33 (2).

3. Proposed additional text for the Guide to Enactment regarding the opening of tenders submitted electronically

In the light of the above, the Working Group may wish to include guidance to the opening of tenders electronically, setting out the solutions adopted to the matters discussed in paragraphs 29 and 30 above.

**C. Note by the Secretariat on possible revisions to the UNCITRAL
Model Law on Procurement of Goods, Construction and Services,
submitted to the Working Group on Procurement its eighth session

I. Introduction

1. The background to the current work of Working Group I (Procurement) on the revision of the UNCITRAL Model Law on Procurement of Goods, Construction and Services (the “UNCITRAL Model Procurement Law” or the “Model Law”)¹ is set out in paragraphs 5 to 34 of document A/CN.9/WG.I/WP.37.

2. As regards electronic publication of procurement-related information, at its sixth and seventh sessions (Vienna, 30 August-3 September 2004, and New York, 4-8 April 2005, respectively), the Working Group, inter alia, considered whether any additional information relevant to potential suppliers, which the Model Law did not currently require to be published, might be brought within the scope of any existing or new provisions of the Model Law or guidance given. It agreed to study the usefulness of publication, in

¹ For the text of the Model Law, see *Official Records of the General Assembly, Forty-ninth Session, Supplement No. 17 and corrigendum* (A/49/17 and Corr.1), annex I (also published in the *Yearbook of the United Nations Commission on International Trade Law* (hereinafter referred to as “*UNCITRAL Yearbook*”), vol. XXV:1994 (United Nations publication, Sales No. E.95.V.20), part three, annex I. The Model Law is available in electronic form at the UNCITRAL website (<http://www.uncitral.org/english/texts/procure/ml-procure.htm>).

particular of (i) regulatory acts pertinent to procurement not covered by current article 5 of the Model Law, such as internal guidelines or instructions of administrative bodies, and (ii) information on general forthcoming procurement opportunities. The Working Group requested the Secretariat to review the relevant practices under domestic procurement regimes and present the results of such a review for its consideration at a future session. (A/CN.9/568, paragraph 28 and A/CN.9/575, paragraphs 24 and 31).

3. This note and addendum thereto (A/CN.9/WG.I/WP.39/Add.1) are submitted, pursuant to that request, for consideration by the Working Group at its eighth session.

II. Publication of procurement-related information not covered by the Model Law: study of national, regional and international practices

A. General remarks

4. Some information not required to be published under the Model Law is required, encouraged or permitted to be published or is published in practice in some jurisdictions reviewed. Issues such as the content of the published information, whether the publication is mandatory or optional, and whether the means of publication is specified vary greatly from jurisdiction to jurisdiction. For the purpose of this study, a distinction should be drawn between information that has historically been required to be published, and further information, the publication of which has been enabled by electronic means of communication.

1. Information historically required to be published

5. Most of the information that has historically been required to be published was considered by the Working Group when the Model Law was prepared. Some such information, such as invitations to tender and notices on contract awards, was included in the Model Law's provisions on publication, while the inclusion of other information was ultimately rejected for various reasons, for instance because of concerns over confidentiality, collusion of suppliers or market manipulation.² The type of information that was ultimately included in the Model Law's provisions was not necessarily considered in depth by the Working Group.

6. For example, the then Working Group did not spend much time in the consideration of article 5 of the Model Law (public accessibility of legal texts), analysed in more detail in section B below. Nor did it substantially consider the publication of information on procurement contract awards (article 14 of the Model Law).³ As a result, practices with the

² See e.g., documents A/CN.9/331, para. 211, reproduced in the *UNCITRAL Yearbook*, vol. XXI:1990 (United Nations publication, Sales No. E.91.V.6), part two, II, A; A/CN.9/343, paras. 153-155, reproduced in the *UNCITRAL Yearbook*, vol. XXII:1991 (United Nations publication, Sales No. E.93.V.2), part two, II, A; and A/CN.9/359, para. 71, reproduced in the *UNCITRAL Yearbook*, vol. XXIII:1992 (United Nations publication, Sales No. E.94.V.7), part two, III, C.

³ The requirement on the publication of a notice on contract awards was included in the 1993 Model Law on Procurement of Goods and Construction only upon its adoption. See *Official Records of the General Assembly, Forty-eighth Session, Supplement No. 17 (A/48/17)*, paras. 184-186. See further documents A/CN.9/376/Add.1, comments by Japan with respect to article 32 of the draft Model Law, and A/CN.9/377, proposed amendments as regards

publication of similar information under domestic, regional and international regimes were not considered by the then Working Group.⁴ Some information considered by the then Working Group to be useful for disclosure to the public in general was not ultimately subjected to mandatory publication under the Model Law, as is the case in legislation of some of the jurisdictions reviewed, but rather was dealt with in the provisions of the Model Law on the records of procurement proceedings⁵ or in the provisions that require making available certain types of information to any member of the public upon request.⁶ The then

article 32 (6) of the draft Model Law, both reproduced in the *UNCITRAL Yearbook*, vol. XXIV:1993 (United Nations publication, Sales No. E.94.V.16), part two, I. These documents, in the relevant parts, referred to the provisions of the draft Model Law on Procurement of Goods and Construction, under which the notice of contract awards was supposed to be given only to suppliers and contractors that participated in the tendering proceedings (draft article 32 (6)). The provisions, as adopted, extended the notice to the general public and to other procurement methods. See article 12 of the 1993 Model Law on Procurement of Goods and Construction (*Official Records of the General Assembly, Forty-eighth Session, Supplement No. 17 (A/48/17)*, annex I (also published in the *UNCITRAL Yearbook*, vol. XXIV:1993 (United Nations publication, Sales No. E.94.V.16), part three, annex I). The Model Law is available in electronic form at the UNCITRAL website (<http://www.uncitral.org/pdf/english/texts/procurem/proc93/proc93.pdf>). This article was not changed when the Model Law on Procurement of Goods, Construction and Services was adopted in 1994 (it became article 14 of the Model Law).

⁴ For example, while the publication of a notice on contract awards is generally required under domestic, regional and international regimes, the content of the notice varies greatly. For the current practices, see, e.g., article 35 (4) of Directive 2004/18/EC of the European Parliament and of the Council of 31 March 2004 on the coordination of procedures for the award of public works contracts, public supply contracts and public service contracts (Official Journal of the European Union, No. L 134, 30 April 2004, p. 114, also available at http://europa.eu.int/comm/internal_market/publicprocurement/legislation_en.htm) (hereinafter the “EU Public Procurement Directive”), and article XVIII (1) of the World Trade Organization’s (WTO) Agreement on Government Procurement (hereinafter the “GPA”) (see annex 4 (b) to the Final Act embodying the results of the Uruguay round of multilateral trade negotiations, available at http://www.wto.org/english/docs_e/legal_e/gpr-94_e.pdf). Some jurisdictions, in addition, require the publication of a summary of the awarded procurement contract as a pre-condition for its effectiveness.

⁵ The Model Law, for example, requires a procuring entity to include in the record of procurement proceedings a statement of the grounds and circumstances on which it relied to justify the use of non-tendering methods (article 18 (4)) and any decision taken by a procuring entities in connection with suspension of procurement proceedings and grounds and circumstances therefore (article 56 (5)). Similar information is required to be published in some jurisdictions reviewed. For example, the publication of a notice that a single-source procurement or procurement without a competitive method in case of emergency is utilized has to be published under the Virginia Public Procurement Act (VPPA), as amended, article 2, § 2.2-4303, paras. E and F (available at <http://www.eva.state.va.us/dps/Manuals/docs/VPPA.pdf>). The notice has to state that only one source was determined to be practicably available or that the contract is being awarded on an emergency basis, as applicable, and identify what is being procured, the contractor selected, and the date on which the contract was or will be awarded. The notice is to be published on the day the procuring entity awards or announces its decision to award the contract, whichever occurs first. As regards suspension of procurement proceedings, the publication of the notice to that effect is required for instance under article 6.3 of the Law on Public Procurement of the Republic of Lithuania, No. IX-1217, 3 December 2002, available at <http://www.vpt.lt/admin/uploaded/lawonPP.pdf>.

⁶ See, for example, article 7 (6) of the Model Law regarding the names of all prequalified suppliers or contractors. For the consideration of the matter in the Working Group, see document A/CN.9/359, paras. 71 and 101, reproduced in the *UNCITRAL Yearbook*,

Working Group considered that some other information required to be published in some jurisdictions should be disclosed to interested suppliers or contractors only.⁷

7. On the other hand, some other information required to be published in some jurisdictions reviewed was not considered for publication by the then Working Group at all, for example, a notice on complaints filed with a supervisory body about procurement proceedings.⁸ Some information was not considered by the Working Group at that time probably because it was considered that such information fell outside the scope of the Model Law or was linked to procurement procedures that the then Working Group did not consider, for example, framework agreements, or decided from the outset not to include in the Model Law, for example, suppliers' lists.⁹

8. Overall, the drafting history and some provisions in the Guide to Enactment of the Model Law¹⁰ indicate that drafters of the Model Law were cautious of the costs and efforts of publishing procurement-related information, preserving its integrity and keeping it up to date. Those concerns were understandably present at that time, as the Model Law was drafted primarily for a paper-based environment and "the procedures in the Model Law reflected a practice that was rooted in paper-based documentation."¹¹ As a result, the Model Law requires the publication of the minimum information necessary to achieve transparency in the procurement process and at the same time to avoid what was thought at that time the disproportionately onerous burden on an enacting State generally and on a procuring entity in particular.

vol. XXIII:1992 (United Nations publication, Sales No. E.94.V.7), part two, III, C. The requirement to publish the list of all prequalified suppliers or contractors is found in some jurisdictions.

⁷ See, e.g., article 12 (3) of the Model Law which provides that the notice of the rejection of all tenders, etc., shall be given promptly to all suppliers or contractors that submitted tenders, proposals, offers or quotations. The same type of information is required to be published, for example, under article 80 of the Public Procurement Law of the Republic of Serbia, published in the *Official Herald of the Republic of Serbia*, No. 39/2002, 43/2003 - the other Law, and 55/2004, available at <http://www.oecd.org/dataoecd/34/12/35016323.pdf>.

⁸ See, e.g., article 54 (1) of the Procurement Law of the Republic of Armenia, of 6 December 2004. Published in the *Official Bulletin* # 2004/72 (371), 28 December 2004.

⁹ For the publication requirements in connection with the maintenance of suppliers' lists, see, for example, article XI (9) of the GPA. For the consideration of the issue of suppliers' lists in the draft Model Law, see document A/CN.9/315, para. 44, reproduced in the *UNCITRAL Yearbook*, vol. XX:1989 (United Nations publication, Sales No. E.90.V.9), part two, II, A, and document A/CN.9/331, para. 62, reproduced in the *UNCITRAL Yearbook*, vol. XXI:1990 (United Nations publication, Sales No. E.91.V.6), part two, II, A.

¹⁰ See, e.g., commentary to article 14 in the Guide to Enactment, para. 2, that inter alia reads: "in order to avoid the disproportionately onerous effects that such a publication requirement might have on the procuring entity were the notice requirement to apply to all procurement contracts no matter how low their value, the enacting State is given the option in paragraph (3) of setting a monetary-value threshold below which the publication requirement would not apply." For the text of the Guide to Enactment, see document A/CN.9/403, reproduced in the *UNCITRAL Yearbook*, vol. XXV:1994 (United Nations publication, Sales No. E.95.V.20), part three, annex II. The Guide is available in electronic form at the UNCITRAL website (<http://www.uncitral.org/english/texts/procurem/ml-procure.htm>).

¹¹ See document A/CN.9/359, para. 107, reproduced in the *UNCITRAL Yearbook*, vol. XXIII:1992 (United Nations publication, Sales No. E.94.V.7), part two, III, C.

2. Information, publication of which has been enabled by electronic means of communication

9. The above trend has been reversed in those jurisdictions where electronic means of communication are widely used for the publication of procurement-related information. Savings in costs, time and effort resulting from such use have led to a trend of making available as much information for the benefit of suppliers as possible.

10. Additional procurement-related information usually required, enabled or encouraged to be published by electronic means includes (i) solicitation documents, including specifications and modifications, encouraged to be published in their entirety on the Internet;¹² (ii) information on forthcoming procurement opportunities, analysed in more detail in document A/CN.9/WG.I/WP.39/Add.1, section I; (iii) various lists of standardized goods;¹³ (iv) various types of statistical reports inter alia on the results of procurement and contracts concluded;¹⁴ (v) information on the status of ongoing procurement proceedings, including notices on suspension; (vi) procedures cancelled; (vii) records of procurement proceedings; and (viii) any useful general information, such as information on a contact point for general inquiries. In practice, more information than required or authorized by law is usually made available to the public. Apart from various additional information, new features and services also appear.¹⁵

11. The publication of some additional information is encouraged, for example, in the EU public procurement directive (the “EU directive”).¹⁶ The EU directive provides that if

¹² See, e.g., the EU Public Procurement Directive, annex VIII.

¹³ See, e.g., article 51 of the Public Procurement Law of the Republic of Montenegro, published in the Official Gazette of the Republic of Montenegro, No. 40/2001, also available at <http://www.rszz.cg.yu/procurement.doc>.

¹⁴ See e.g., article 35 (4), subpara. 4, and article 77 (2), of the EU Public Procurement Directive that requires the publication of statistical reports on the results of award procedures in lieu of the publication of an award notice for certain types of contracts for which the publication of award notice is not mandatory. See also, in Australia, article 6 and appendix C of the Procurement Guidance on Procurement Publishing Obligations, January 2005, available at http://www.finance.gov.au/ctc/austender-annual_procurement_p.html (hereinafter the “Australian Procurement Publishing Guidance”), and article 70 of the Public Procurement Law of the Republic of Montenegro (see endnote 13 above), mandating the publication of information on public contracts with value equal to or over the established threshold (in Australia, the relevant information has to be posted at the government procurement website within six weeks of entering into the arrangement; in the Republic of Montenegro, the Public Procurement Commission is required to publish such information at least once a year. In both countries, reports are to contain procuring agency details, contract details (such as start and end dates, procurement method, value, description sufficient to identify the nature and the quantity of goods or services procured or the period of standing offer) and supplier details (such as name, address and registration numbers)). Also in Australia, under article 8.1 of the Australian Procurement Publishing Guidance, Financial Management Guidance No. 15, January 2005, available at http://www.finance.gov.au/ctc/docs/Procurement_Publishing_Obligations_-_January_2005.pdf (hereinafter the “Australian Procurement Publishing Guidance”), it is required to publish lists of public contracts with the value equal to or above the defined threshold which have not been fully performed or which have not been entered into in the previous 12 months. See also article 72 of the Public Procurement Law of the Republic of Montenegro requiring the publication of annual public procurement assessment reports.

¹⁵ For instance, in Chile, the official procurement website offers the Normative Orientation Service (Servicio Orientación Formativa) that provides legal advice on procurement rules. See http://www.chilecompra.cl/portal/centro_informaciones/fr_ley_compras.html.

¹⁶ See above, endnote 4.

the specifications and additional documents related to procurement are published in their entirety on the Internet from the date of publication of the contract notice and the contract notice specifies the Internet address at which this documentation is accessible, procuring entities are allowed to shorten the time limits for receipt of tenders.¹⁷ Similar provisions are also found in some national legislation of EU countries.¹⁸

12. Publication of some additional information may be necessitated by new electronic procurement techniques and features, such as e-catalogues, dynamic purchasing systems or electronic reverse auctions (ERAs). Although in the jurisdictions reviewed, most of the needs for disclosure of information to the public arising from the use of those techniques and features have been accommodated by information traditionally made public, such as notices of contracts and notices of contract awards, as well as records of procurement proceedings, provision of further information to the public may be necessary. Some specific publication requirements are found, for example, with respect to the records of ERA proceedings in Brazil (see A/CN.9/WG.1/WP.35/Add.1, paragraph 37).

B. Publication of additional regulatory texts not covered by article 5 of the Model Law

1. Scope of article 5 of the Model Law

13. When the Model Law was prepared in the 1990s, the then Working Group worked on the basis that clear and readily accessible laws and regulations relating to procurement would promote transparency and create predictability and confidence in the procurement process.¹⁹ Several articles, primarily article 5 (public accessibility of legal texts), were intended to promote public accessibility of rules regulating public procurement.

14. The original text of article 5 was broadly based on article VI (1) of the 1981 GATT Agreement of Government Procurement,²⁰ except that the latter, apart from referring to laws, regulation and administrative ruling of general application, also referred to judicial decisions and any procedures (including standard contract clauses) regarding government procurement.²¹ The then Working Group did not spend much time in the consideration of the original text of article 5 and made only one substantive change in it by adding the requirement of “systematic maintenance” of the texts referred to in the article.²²

¹⁷ The EU Public Procurement Directive, article 38 (6).

¹⁸ See, e.g., article 22 (1)(3) of the Law on Public Procurement of the Republic of Lithuania, No. IX-1217, 3 December 2002, available at <http://www.vpt.lt/admin/uploaded/lawonPP.pdf>.

¹⁹ See document A/CN.9/315, para. 20, reproduced in the *UNCITRAL Yearbook*, vol. XX:1989 (United Nations publication, Sales No. E.90.V.9), part two, II, A.

²⁰ As stated in paragraph 1 of the original commentary to article 5 in document A/CN.9/WG.1/WP.25, reproduced in the *UNCITRAL Yearbook*, vol. XXI:1990 (United Nations publication, Sales No. E.91.V.6), part two, II, C.

²¹ The text of the 1981 GATT Agreement on Government Procurement is available at http://www.wto.org/english/docs_e/legal_e/tokyo_gpr_e.pdf.

²² For the drafting history of article 5 of the Model Law, see documents: A/CN.9/331, para. 35, reproduced in the *UNCITRAL Yearbook*, vol. XXI:1990 (United Nations publication, Sales No. E.91.V.6), part two, II, A; A/CN.9/343, para. 65, reproduced in the *UNCITRAL Yearbook*, vol. XXII:1991 (United Nations publication, Sales No. E.93.V.2), part two, II, A; A/CN.9/359, para. 44, reproduced in the *UNCITRAL Yearbook*, vol. XXIII:1992 (United Nations publication, Sales No. E.94.V.7), part two, III, C; and A/CN.9/371, paras. 39-40, reproduced in the *UNCITRAL Yearbook*, vol. XXIV:1993 (United Nations publication, Sales No. E.94.V.16),

15. Under article 5, as its title “Public accessibility of legal texts” suggests, the requirement of public accessibility and systematic maintenance applies to legal texts regulating procurement. The commentary to the article in the Guide to Enactment also states that the article “is intended to promote transparency in the laws, regulations and other legal texts relating to procurement by requiring public accessibility to those legal texts.” Legal texts listed in article 5 are “this Law, procurement regulations and administrative rulings and directives of general application in connection with procurement covered by this Law, and all amendments thereof.”

16. “Procurement regulations” are defined in article 4 of the Model Law as those to be promulgated by an authorized organ to fulfil the objectives and to carry out the provisions of the Law. The need to ensure public availability of procurement regulations was specifically highlighted as such regulations may be used to exclude the application of the Model Law under its article 1 (2)(c).²³ In the context of article 4, an attempt was made to expand the scope of “procurement regulations” referred to in that article to include administrative directives, rulings and guidelines issued not only by organs authorized to promulgate procurement regulations but also by organs authorized to promulgate such directives, rulings and guidelines. The then Working Group, however, rejected that suggestion, proposing instead for the commentary to note that in addition to the law, various types of directives, rulings and guidelines might be applicable in particular procurement proceedings.²⁴ No such wording was included in the Guide to Enactment, and article 5, by referring to “administrative rulings and directives of general application” alongside “procurement regulations”, makes it clear that these two categories of documents are distinct.

17. The reference to “administrative rulings and directives of general application” appears only in article 5, and the term is not further defined. Except for the note in the original commentary that article 5 does not intend to cover administrative rulings and directives directed or concern individual contractors or suppliers,²⁵ no further guidance was given by the then Working Group as to the scope of the term. (On the other hand, references to “laws” and “procurement regulations” are also found in articles 27 (t) and 38 (s) of the Model Law that require the procuring entity to refer to the law, the procurement regulations and other laws and regulations directly pertinent to the procurement proceedings in the solicitation documents/requests for proposals for services).²⁶

part two, I, A.

²³ See document A/CN.9/359, para. 20, reproduced in the *UNCITRAL Yearbook*, vol. XXIII:1992 (United Nations publication, Sales No. E.94.V.7), part two, III, C.

²⁴ See document A/CN.9/331, para. 34, reproduced in the *UNCITRAL Yearbook*, vol. XXI:1990 (United Nations publication, Sales No. E.91.V.6), part two, II, A.

²⁵ See document A/CN.9/WG.V/WP.25, article 5, para. 3, reproduced in the *UNCITRAL Yearbook*, vol. XXI:1990 (United Nations publication, Sales No. E.91.V.6), part two, II, C.

²⁶ For the drafting history of the relevant provisions in the Model Law, see A/CN.9/331, paras. 93-97, reproduced in the *UNCITRAL Yearbook*, vol. XXI:1990 (United Nations publication, Sales No. E.91.V.6), part two, II, A; A/CN.9/343, paras. 181-183, reproduced in the *UNCITRAL Yearbook*, vol. XXII:1991 (United Nations publication, Sales No. E.93.V.2), part two, II, A; and A/CN.9/371, para. 110, reproduced in the *UNCITRAL Yearbook*, vol. XXIV:1993 (United Nations publication, Sales No. E.94.V.16), part two, I, A.

2. Practices under international systems

18. Most procurement-related international instruments require the publication of “any law, regulation, judicial decision, administrative ruling of general application, and any procedure (including standard contract clauses) regarding government procurement.” This wording is found in article XIX (1) of the current Agreement on Government Procurement (GPA)²⁷ of the World Trade Organization (WTO) and, in a slightly amended version, in particular with a reference to precedential judicial decisions, in article 1019 (1) of NAFTA (Chapter 10).²⁸ Similar wording has been considered for inclusion in article 10 of Chapter XVIII (Government Procurement) of the draft FTAA agreement.²⁹ The APEC non-binding Principles on Government Procurement refer in paragraph 5 to transparency of “the laws, regulations, judicial decisions, administrative rulings, policies (including any discriminatory or preferential treatment such as prohibitions against or set aside for certain categories of suppliers), procedures and practices (including the choice of procurement method) related to [government procurement],” and in paragraph 61 to establishing and making know clear “procurement laws/regulations/policies, practices and procedures.”³⁰

19. In the context of the negotiations of an agreement on transparency in government procurement in WTO, two approaches to the scope of information on procurement-related legislation and procedures to be required for publication under a future agreement were considered: (i) a formal approach that would require, for example, all laws, ministerial ordinances, administrative guides or internal rules and procedures to be published; and (ii) an approach that would consist of determining the substance of the information that should be made available, irrespective of the legal form. It was argued in WTO that preference should be given to the latter approach since what was of importance was the substance of the information to be made available; the objective of transparency would not be achieved if the publications that contained the relevant laws and regulations did not cover important aspects of national procurement practices and procedures.³¹

3. Practices under some domestic procurement regimes

20. The amount of information regulating public procurement that is made available to the public varies from jurisdiction to jurisdiction depending on legal systems and traditions, in particular the sources, form and nature of domestic rules and procedures regulating procurement, as well as the level of transparency in public procurement in a given jurisdiction. States parties to the relevant international instruments, like the GPA and NAFTA,³² are bound by requirements on transparency of procurement-related regulatory

²⁹ The draft of 21 November 2003 is available at http://www.ftaa-alca.org/FTAADraft03/ChapterXVIII_e.asp.

³⁰ Available at http://www.apec.org/content/apec/apec_groups/committees/committee_on_trade/government_procurement.html.

³¹ See, e.g., reports of the WTO Working Group on Transparency in Government Procurement to the General Council (1998 and 1999), annex, para. 27 in the 1998 report, and para. 29 in the 1999 report. Both reports are available under “Annual reports” at http://www.wto.org/english/tratop_e/gproc_e/gptran_e.htm.

³² The following States are currently parties to the GPA: Canada, European Communities (including its 25 member States: Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Slovak Republic, Slovenia, Spain, Sweden, United Kingdom), Hong Kong SAR of China, Iceland, Israel, Japan, Korea, Liechtenstein, Netherlands

texts that may be broader than those applicable domestically to the public disclosure of other regulatory texts.³³

21. As regards the sources, form and nature of domestic rules and procedures regulating procurement, the attention of the Working Group is drawn to the report of the Secretary-General on procurement (A/CN.9/WG.V/WP.22)³⁴ submitted in 1989 to the then Working Group that drafted the Model Law, which in its paragraphs 7 and 30 to 38 addresses these issues. The relevant findings in the report remain pertinent and are reflected below.

22. In jurisdictions where procurement is regulated by binding and mandatory legal norms, comprising a majority of those reviewed for the present study, most rules regulating public procurement would be encompassed by article 5 of the Model Law as they would be considered “legal” or “normative” acts. As such, they are subject to the general principle of publicity of normative acts, usually enshrined in the Constitution and further elaborated in the administrative law, under which to be legally binding a normative act has to be published in the specified media. Procurement-related laws and regulations are usually published in the Official Gazette, while administrative rulings and directives may be published in the same or a different medium. In some jurisdictions, administrative rulings of only some bodies are subject to mandatory publication.³⁵

23. In some countries, public procurement is essentially regulated by internal rules and directives for financial and economic control of government administration adopted under a legislative act, for example a general finance administration act.³⁶ The disclosure of

with respect to Aruba, Norway, Singapore, Switzerland, and United States. The following States are negotiating accession: Albania, Bulgaria, Georgia, Jordan, Kyrgyz Republic, Moldova, Oman, Panama, and Chinese Taipei. Information is available at http://www.wto.org/english/tratop_e/gproc_e/memobs_e.htm. The NAFTA members are Canada, Mexico and the United States.

³³ In the context of WTO, government procurement is subject to transparency obligations not only under the GPA but also article X.1 of GATT and article III.1 of GATS, with the result that the number of States obliging to publish measures relating to government procurement is not limited to the States parties to the GPA.

³⁴ Reproduced in the *UNCITRAL Yearbook*, vol. XX:1989 (United Nations publication, Sales No. E.90.V.9), part two, II, B.

³⁵ See, e.g., appendix IV to the GPA listing publications utilized by States parties to the GPA for the publication of texts under paragraph 1 of article XIX of the GPA.

³⁶ For example, in Australia, public procurement is largely governed by government procurement policies, consisting of Commonwealth Procurement Guidelines, Finance Circulars and Procurement Guidance, the latter including a range of web-based and printed guidance documents developed by the Department of Finance and Administration to assist agencies and officials to implement the Government’s procurement policy. See article 2.7 of the Commonwealth Procurement Guidelines (CPG), January 2005 (hereinafter the “CPG”), available at http://www.finance.gov.au/ctc/commonwealth_procurement_guide.html. In the United States, federal government procurement is regulated by a detailed code of common procurement policies and rules (the Federal Acquisition Regulations (FAR)), available at http://farsite.hill.af.mil/reghtml/regs/far2afmcfars/fardfars/far/01.htm#P52_10741, issued jointly by the General Services Administration, Department of Defense and the National Aeronautics and Space Administration. It prescribes different procedures, offers procuring entities alternative techniques and sets recommended and mandatory contract clauses and attached forms. See also the World Bank’s OECS countries procurement assessment report, as revised in April 2003, available at <http://unpan1.un.org/intradoc/groups/public/documents/CARICAD/UNPAN010037.pdf>.

those rules is usually required by specific acts.³⁷ Under those rules, substantial discretion as regards the conduct of procurement process is often given to the heads of procuring entities. Such a broad delegation of authority enables heads of a procuring entity to formulate procurement rules on an ad hoc basis.³⁸ No specific requirement on their publication may exist,³⁹ although a general requirement of transparency in public administration may apply. Whether such rules are “legal texts” within the meaning of article 5 of the Model Law is open to question.

24. The conduct of procurement in some countries may also be regulated by internal memoranda, circulars, letters of information from ministers and instructions issued within ministries or procuring entities. Some of them could be addressed to state officials rather than to the public in general; however, they may still have bearing on the procurement process as a whole. In addition, generic and topic-specific procurement handbooks and manuals are often prepared by central or local authorities, but could also be issued by procuring entities or agencies responsible for maintaining government procurement websites.⁴⁰ The use of some manuals or handbooks by all procuring entities could be

³⁷ See, for example, the Freedom of Information Act of Australia, 1982, available at [http://www.comlaw.gov.au/comlaw/Legislation/ActCompilation1.nsf/0/833CC604CCEF2A25CA25702600029E3A/\\$file/FreedmInfo1982_WD02.pdf](http://www.comlaw.gov.au/comlaw/Legislation/ActCompilation1.nsf/0/833CC604CCEF2A25CA25702600029E3A/$file/FreedmInfo1982_WD02.pdf). In the United States, under FAR 1.105-1, FAR is to be issued as Chapter 1 of Title 48 of the United States Code of Federal Regulations (CFR). Subsequent chapters are reserved for agency acquisition regulations that implement or supplement FAR. In addition, under FAR 1.301 (b), agency acquisition regulations are required to be published for comment in the Federal Register when “they have a significant effect beyond the internal operating procedures of the agency or have a significant cost or administrative impact on contractors or offerors.”

³⁸ See, e.g., in Australia, under article 3 of the CPG, the agency chief may issue executive instructions, internal procedures and operational guidelines providing the detailed operational guidance to an agency’s officials on financial management, including procurement. In the United States, under FAR, procuring entities’ competent persons assume substantial regulatory functions: heads of procuring agencies “may issue or authorize the issuance of agency acquisition regulations that implement or supplement FAR and incorporate, together with FAR, agency policies, procedures, contract clauses, solicitation provisions, and forms that govern the contracting process or otherwise control the relationship between the agency, including any of its sub-organizations, and contractors or prospective contractors.” FAR 1.301 (a) (1); and also “may issue or authorize the issuance of internal agency guidance at any organizational level (e.g. designations and delegations of authority, assignments of responsibilities, work-flow procedures, and internal reporting requirements).” (FAR 1.301 (a) (2)).

³⁹ For example, under FAR 1.301 (b), internal agency guidance is not subject to the same public disclosure requirements as agency acquisition regulations (see above, endnote 37).

⁴⁰ See, e.g., the “Handbook on IT-Procurement” at the website of the Federal Chancellor of Austria (IT-Beschaffungshandbuch); a number of reference materials on procurement at the website of the Bundeskartellamt of Germany, a federal government body supervising activities of monopolies (<http://www.bundeskartellamt.de/wDeutsch/merkblaetter/Vergaberecht/MerkblVergabe.shtml>), and the “handbook on procurement” providing assistance for the completing of electronic forms issued by the Ministry of Traffic and Construction of Germany (<http://www.bmvbw.de/Bauwesen/Bauauftragsvergabe-1535/Vergabehandbuch.htm>); and a series of manuals that clarify the procurement process, such as “Manual on Projects”, “Manual on Public Construction”, “Manual on Maintenance”, “Electronic Reverse Auction: Supplier’s Manual”, available at the official procurement website of the Brazilian Government (www.comprasnet.gov.br).

mandatory,⁴¹ most however are issued only for reference and guidance. Those documents are generally not considered to be “legal texts” and are therefore not covered by article 5 of the Model Law. They are usually not subject to the same rules of publicity that are applicable to “legal texts” in their domestic jurisdictions. In practice, it has been usually difficult to locate them. Some of them may be commercially published although in some jurisdictions ministerial circulars could be published in the same medium where laws and regulations are.⁴² Some of these texts have been made available to the public through the Internet usually free of charge but in some instances a fee is charged.

25. In another group of countries, where a binding and mandatory legal procurement framework does not exist,⁴³ public procuring entities have the flexibility to contract with other parties through procedures and upon terms they deem appropriate guided by such general principles as equal treatment of suppliers,⁴⁴ promotion of public interests and good governance. There may sometimes exist rules and regulations regulating public procurement issued by various agencies handling public procurement. In at least one jurisdiction, it has been found that such rules could be easily overridden or amended by ministers or officials in those agencies, the rules do not create legal rights and obligations, and it is unlikely that they will be enforceable in the courts.⁴⁵ As such, they are not “legal texts” and thus not covered by article 5 of the Model Law. They may be required to be made available to the public under the general principle of transparency of governance or under a specific act.⁴⁶

⁴¹ See, e.g., in the Philippines, the Act providing for the Modernization, Standardization and Regulation of the Procurement Activities of the Government and for Other Purposes, Republic Act No. 9184 (the “Government Procurement Reform Act”), section 6, which states that the Government Procurement Policy Board shall pursue the development of generic procurement manuals, the use of which once issued shall be mandatory upon all procuring entities. The Act is available at http://www.tag.org.ph/phillaw/Gov_Pro_Ref_%20Act.pdf.

⁴² See, e.g., appendix IV to the GPA listing publications utilized by States parties to the GPA for the publication of texts under paragraph 1 of article XIX of the GPA.

⁴³ In New Zealand, for example, heads of procuring entities are free to manage their departments’ procurement operations. They do it within general principles of good governance and probity requirements found in acts regulating public finance and state sector in general as well as within a broad policy framework for procurement with such general procurement principles as life-cycle best value for money, open and effective competition, and full and fair opportunity for domestic suppliers. See the report of New Zealand to APEC in 2002, available at http://www.apec.org/apec/documents_reports/government_procurement_experts_group/2002.html.

⁴⁴ See, e.g., article 298 of the Constitution of India, 1950, available at <http://indiacode.nic.in/coiweb/coifiles/p12.htm>.

⁴⁵ See, e.g., the findings in the Country Procurement Assessment Report of India by the World Bank, 2003, available at http://www-wds.worldbank.org/servlet/WDS_IBank_Servlet?pcont=details&eid=000012009_20040402111746.

⁴⁶ In India, no explicit requirement under law for the publication of internal rules of public authorities existed until recently. On 11 May 2005, the Parliament of India (Lok Sabha) adopted the Right to Information Act, 2005, that requires the public authorities to disseminate regularly and widely in a form and manner easily accessible to the public materials related to discharge of their functions, including “rules, regulations, instructions, manuals and records, held by it or under its control or used by its employees for discharging its functions.” See article 4 of the Right to Information Bill, 2005, as passed by Lok Sabha of India on 11 May 2005, available at http://www.freedominfo.org/news/india/20050516/THE_RIGHT_TO_INFORMATION_ACT_2005-Final.pdf

26. In the legal systems where laws in part are developed on the basis of case law, precedents set out in judicial decisions and opinions could play a central role in defining national legislation and procedures, including in the field of public procurement. In some other legal systems, judicial decisions and opinions of higher courts may have value for interpretation and application of legislative rules and procedures. Under domestic regimes, such information may or may not be required to be published. The criteria for publishing judicial decisions and opinions are usually established by a court.⁴⁷ Those required to be published are published in a specifically designated official publication, although in some jurisdictions no official publication for judicial decisions may exist.⁴⁸ Some decisions and opinions of courts not published officially could be commercially published and made available online. In at least one jurisdiction reviewed, a specific requirement is found to publish in the electronic system court orders issued in relation to the litigation arising from public acquisitions.⁴⁹

27. An obligation may explicitly be imposed by law on an entity posting texts regulating public procurement to keep them up to date.⁵⁰ In most jurisdictions reviewed, such an obligation is implicit, as amendments to normative acts are not effective until published.

28. In some jurisdictions reviewed, provisions are found on the publication of decisions or conclusions made by an administrative body with supervisory functions over public procurement proceedings. Procurement legislation in some jurisdictions explicitly requires the publication of final rulings of such bodies taken in the course of procurement review

⁴⁷ The Handbook of Practice and Internal Procedures of the United States Court of Appeals for the District of Columbia Circuit, for instance, sets out the following criteria that the Court employs in determining whether to publish an opinion: “(1) the opinion resolves a substantial issue of first impression generally or an issue presented for the first time in this Court; (2) the opinion alters, modifies or significantly clarifies a rule of law previously announced by the Court; (3) the opinion calls attention to an existing rule of law that appears to have been generally overlooked; (4) the opinion criticizes or questions existing law; (5) the opinion resolves a conflict in decisions within the Circuit or creates a conflict with another circuit; (6) the opinion reverses a published district court or agency decision, or affirms it on grounds different from those in a published opinion of the district court; or (7) the opinion warrants publication in light of other factors that gave it general public interest.” See *USCS Ct App D.C. Cir, Appx § XII (2005)*. Most of these criteria are also found, for instance, in the Rules of the United States Court of Appeals for the Fifth Circuit where they are preceded by a general statement that “the publication of opinions that merely decide particular cases on the basis of well-settled principles of law imposes needless expense on the public and burdens on the legal profession. However, opinion that may in any way interest persons other than parties to a case should be published.” See *USCS Ct App 5th Cir, Loc R 47 (2005)*.

⁴⁸ See, e.g., appendix IV to the GPA listing publications utilized by States parties to the GPA for the publication of texts under paragraph 1 of article XIX of the GPA.

⁴⁹ Article 63 of Ordinance No. 20 of Romania of 24 January 2002 concerning public acquisitions by means of electronic bids. Published in the Official Journal of Romania, No. 86, of 1 February 2002. Available at <http://www.riti-internews.ro/og20.htm>.

⁵⁰ See, for example, section 8 (1)(b) of the Freedom of Information Act of Australia, 1982, available at [http://www.comlaw.gov.au/comlaw/Legislation/ActCompilation1.nsf/0/833CC604CCEF2A25CA25702600029E3A/\\$file/FreedmInfo1982_WD02.pdf](http://www.comlaw.gov.au/comlaw/Legislation/ActCompilation1.nsf/0/833CC604CCEF2A25CA25702600029E3A/$file/FreedmInfo1982_WD02.pdf); and article 4 of the Right to Information Bill of India, of 11 May 2005, available at http://www.freedominfo.org/news/india/20050516/THE_RIGHT_TO_INFORMATION_ACT_2005-Final.pdf.

proceedings.⁵¹ In some other jurisdictions, it is left to a supervisory body to decide on the publication of its decisions and conclusions.⁵² In some other jurisdictions, the obligation to disclose such information to the public may exist or be implied under general rules on public access to documents and information in the public administration.⁵³

4. Conclusion

29. Some texts regulating public procurement, notably judicial decisions that the Model Law, unlike the GPA and NAFTA, does not require to be published, are not covered by article 5 of the Model Law. The Working Group may wish to subject some of them to the mandatory publication requirement under revised article 5 of the Model Law, for example, along the lines of article XIX of the GPA (see paragraph 18 above). The publication of other additional texts, such as procurement manuals, handbooks and guidance that are usually of a reference character, could be enabled in the revised Model Law, and a note in the Guide to Enactment may elaborate on the value of publication of such texts as well as all other texts that cover important aspects of domestic procurement practices and procedures. For drafting suggestions, see document A/CN.9/WG.I/WP.39/Add.1, section III.

⁵¹ See, e.g., § 108 of the Act of the Czech Republic on Public Contracts providing that “the supervisory body shall make known its final rulings awarded in the past calendar year in the Collection of Rulings of the Supervisory Body in the field of the award of public contracts and on Internet site of the supervisory body.” The Act is available at <http://www.oecd.org/dataoecd/54/21/35013316.pdf>.

⁵² See, e.g., article 7 (2) of the Act on the State Commission for Supervision over Public Procurement Procedure of the Republic of Croatia, 2003, providing that “major decisions or conclusions may be published in an anonymous form in the Official Gazette, should the State Commission so decide.” The Act is available at <http://www.oecd.org/dataoecd/54/63/35013282.pdf>.

⁵³ See, e.g., § 7a of the Public Procurement Act of Norway, available at <http://odin.dep.no/nhd/norsk/p10002767/p10002770/024081-990048/index-dok000-b-n-a.html>.

I. Publication of information on forthcoming procurement opportunities

A. Scope of the study

1. The present study deals with the publication of information on forthcoming procurement opportunities presented as a list of procurements that a procuring agency intends to engage in within a certain forthcoming period of time, usually a budgetary year.¹ The study does not cover advance notices about a specific procurement or summaries of an invitation to tender required to be published in some jurisdictions reviewed before an invitation to tender.² Nor does it analyse provisions of international instruments, like the Agreement on Government Procurement (GPA)³ of the World Trade Organization (WTO), that do not specifically address the subject but contain provisions that may be construed as implying the publication of such information.⁴

2. Unlike invitations to tender or various notices about a specific procurement that are binding on a procuring entity posting them and that inform potential suppliers or contractors about a specifically identified procurement, information on forthcoming procurement opportunities is neither binding nor specific.⁵ The former forms the basis for the conduct of procurement proceedings and gives rise to enforceable rights and obligations, both to procuring entities and suppliers. The latter serves only an informative purpose and contains only general information about forthcoming opportunities available at the time the relevant information is published. In practice, the information on forthcoming procurement opportunities is often accompanied by a disclaimer where some or all of the following are usually stated: (i) all planned procurements are subject to revision or cancellation; (ii) that data is for planning purposes only; (iii) the indicative notice does not represent a pre-solicitation or constitute an invitation to tender or request

¹ See, e.g., in Chile, article 2.19 of the Regulation of Law 19.886 of 29 August 2003 (known as “Ley de Compras”, available at http://www.chilecompra.cl/portal/centro_informaciones/fr_ley_compras.html), that defines the “annual procurement and contracting plan” as a list of “goods and/or services of reference character that a certain entity plan to procure or contract in a given calendar year”. The Regulation is available in Spanish at <https://www.chilecompra.cl/Portal/InicioPortal.aspx>.

² For example, in Brazil, provisions are found requiring a procuring entity to publish in advance at least once before the invitation to a specific procurement an advertisement containing a summary of the upcoming invitation to tender. The advertisements are to indicate only the object of procurement and place, date and time where and when prospective participants can read and obtain the full text of the invitation to tender and all other information about the specific procurement. They are to be published in the Official Gazette and in other widely circulated newspapers and in addition can be disseminated by other means “in order to broaden the area of competition.” See article 21 of federal Law No. 8.666 of 21 June 1993 as amended. The text in Portuguese is available at <https://www.planalto.gov.br/> and <http://www.COMPRASNET.gov.br/legislacao/leis/lei8666.pdf>.

³ Annex 4(b) to the Final Act embodying the results of the Uruguay round of multilateral trade negotiations, available at http://www.wto.org/english/docs_e/legal_e/gpr-94_e.pdf.

⁴ See, e.g., the reference to “options for further procurement” in article IX, 6 (a), of the GPA.

⁵ This is specifically stated, for example, in article 10 of the Public Procurement Law of the Republic of Bulgaria of 25 June 1999, published in the State Gazette, No. 56 of 22 June 1999, available also at http://www.wto.org/english/tratop_e/gproc_e/49.doc, as well as in article 15 (4) of Ordinance No. 20 of Romania of 24 January 2002 concerning public acquisitions by means of electronic bids.

for proposals, nor is it a commitment by the procuring entity to purchase the described suppliers, services or works; and (iv) the notice is not a fully exhaustive list.

B. Extent and purpose of publication of information on forthcoming procurement opportunities

3. References to forthcoming procurement opportunities are found in those jurisdictions where systematic procurement planning exists. Such procurement planning has long existed in many countries while in some countries it is just being introduced. The publication of forthcoming opportunities in turn is a recent phenomenon enabled in some countries by the use of electronic means of communication for publication of procurement-related information.

4. Provisions requiring or encouraging the publication of information on forthcoming procurement opportunities are found, in particular, in Australia, Chile and EU countries.⁶ The EU public procurement directive (the “EU directive”)⁷ and legislation in a number of EU countries reviewed refer in that context to the publication of a “prior information or indicative notice (PIN)”.⁸ In Australia and Chile, reference is made to the publication of

⁶ See, in Australia, sub-clauses 7.16-7.17 of the Commonwealth Procurement Guidelines, January 2005 (hereinafter the “CPG”), available at http://www.finance.gov.au/ctc/commonwealth_procurement_guide.html, and article 12 of the Procurement Guidance on Procurement Publishing Obligations, January 2005, available at http://www.finance.gov.au/ctc/austender-annual_procurement_p.html (hereinafter the “Australian Procurement Publishing Guidance”); in Chile, article 12 of Ley de Compras; and in the EU, article 35 (1) of Directive 2004/18/EC of the European Parliament and of the Council of 31 March 2004 on the coordination of procedures for the award of public works contracts, public supply contracts and public service contracts (Official Journal of the European Union, No. L 134, 30 April 2004, p. 114, also available at http://europa.eu.int/comm/internal_market/publicprocurement/legislation_en.htm), and in EU countries, e.g. in Austria, para. 38 of the Federal Act on the Award of Purchase Contracts (Purchase Contracts Award Act 2002), available at <http://wko.at/rp/vergabe/gesetzestextbvergg2002.pdf>; in Germany, para. 18(a) of Ordinance on the procurement of supplies by the Minister of Economy (Verdingungsordnung für Leistungen (VOL)) of 17 September 2002, available in German at http://www.bmwa.bund.de/Redaktion/Inhalte/Pdf/Homepage_2Fdownload_2Fwirtschaftspolitik_2FVOL.pdf,property=pdf.pdf, para. 9 (a) of Ordinance on the procurement of services by the Minister of Economy (Verdingungsordnung für freiberufliche Leistungen (VOF)), available in German at <http://www.bmwa.bund.de/Redaktion/Inhalte/Pdf/V/verdingungsordnung-fuer-freiberufliche-leistungen,property=pdf.pdf>, and Part A, Section 2, para. 17 (a) of Ordinance on the procurement of construction contracts by the Minister of Traffic and Construction (Vergabe- und Vertragsordnung für Bauleistungen (VOB)), available in German at http://www.bmvbw.de/Anlage/original_13076/VOB-2002-Teile-A-und-B.pdf; and in Lithuania, article 18.2 of the Law on Public Procurement of the Republic of Lithuania, No. IX-1217, 3 December 2002, available at <http://www.vpt.lt/admin/uploaded/lawonPP.pdf>.

⁷ Directive 2004/18/EC of the European Parliament and of the Council of 31 March 2004 on the coordination of procedures for the award of public works contracts, public supply contracts and public service contracts (Official Journal of the European Union, No. L 134, 30 April 2004, p. 114, also available at http://europa.eu.int/comm/internal_market/publicprocurement/legislation_en.htm) (hereinafter the “EU Public Procurement Directive”).

⁸ See, e.g., article 35 (1) of the EU Public Procurement Directive, and article 13 of the Public Procurement Law of Poland of 29 January 2004.

annual procurement plans (APPs).⁹ Other terms, such as “order books”, “preliminary notices,” “informative notices”, or “announcement of intent” are also used.

5. Whereas procurement planning is aimed at disciplining procuring entities, the publication of information on forthcoming procurement opportunities is primarily effected to increase competition and save costs during the procurement by drawing suppliers’ early attention to potential procurement opportunities, which enables them to plan their bids in advance. Both procurement planning and publication of information on forthcoming procurement opportunities are strongly promoted by multilateral development banks (the “MDBs”), in particular through their e-GP initiatives, as being conducive, *inter alia*, to the elimination of “ad hoc” and “emergency” procurements and thus of recourses to less competitive methods of procurement.¹⁰

C. Terms of publication

1. Mandatory or optional

6. Most EU jurisdictions make the publication of PINs mandatory if the estimated total value of the covered procurements is equal to or exceeds a certain threshold.¹¹ It is also the case under the EU directive, but only when a procuring entity takes the option of shortening the time limits for the receipt of tenders.¹² The publication of PINs with respect to other procurements is optional.¹³ Some types of procurements are excluded from the application of the provisions on PINs.¹⁴

7. In contrast, in Australia, a threshold for mandatory publication of APPs is established only for some private entities that are subject to the Commonwealth

⁹ See sub-clause 7.16 of the Australian CPG, and article 12 of the Chilean Ley de Compras.

¹⁰ See, in particular, the Electronic Government Procurement Portal launched by the Asian Development Bank, the Inter-American Development Bank and the World Bank in November 2004 (available at <http://www.mdb-egp.org/data/default.asp>). It contains a number of documents prepared by the MDBs and used by many countries in designing their e-government procurement portals. One of the sections of the portal provides an e-GP Roadmap, in which the posting of procurement plans is addressed (p. 32).

¹¹ See, e.g., para. 38 of the Federal Act on the Award of Purchase Contracts of Austria (Purchase Contracts Award Act 2002), available at <http://wko.at/rp/vergabe/gesetzestextbvergg2002.pdf>; § 29 of the Act of the Czech Republic on Public Contracts, available at <http://www.oecd.org/dataoecd/54/21/35013316.pdf>; para. 9(a) of the Ordinance on the procurement of services by the Minister of Economy of Germany (Verdingungsordnung für freiberufliche Leistungen (VOF)), available in German at <http://www.bmwa.bund.de/Redaktion/Inhalte/Pdf/V/verdingungsordnung-fuer-freiberufliche-leistungen,property=pdf.pdf>; section 22 (1) of the Law on Procurement for State or Local Government Needs of Latvia of 5 June 2003, available at <http://www.oecd.org/dataoecd/53/19/35014924.pdf>; article 18.2 of the Law on Public Procurement of the Republic of Lithuania, No. IX-1217, 3 December 2002, available at <http://www.vpt.lt/admin/uploaded/lawonPP.pdf>; article 13 of the Public Procurement Law of Poland of 29 January 2004, available at <http://www.oecd.org/dataoecd/52/53/35015461.pdf>; and article 67 of the Public Procurement Act of the Republic of Slovenia of 5 May 2000.

¹² Article 35 (1) of the EU Public Procurement Directive.

¹³ See, e.g., section 22 (2) of the Law on Procurement for State or Local Government Needs of Latvia of 5 June 2003.

¹⁴ See, e.g., article 35 (1) of the EU Public Procurement Directive, for instance, exempting negotiated procedures without the prior publication of a contract notice from the application of the provisions on the publication of PINs.

Government procurement policy framework.¹⁵ For public procuring entities, except for those excluded from the application of the relevant provisions, publication of APPs is mandatory regardless of the estimated total value of expected procurements. Procuring agencies with no significant procurements planned in the forthcoming year should publish either APPs with no detail of planned procurement or a notice in the government procurement website (AusTender)¹⁶ that they expect to have no significant procurement over the coming year.¹⁷ For all entities, the publication of APPs on any procurement that would benefit from the early notice is explicitly encouraged “as a matter of better practice.”¹⁸

2. Deadline for publication

8. It is common to establish the time frame for the publication of PINs and APPs usually linked to the beginning of the budgetary year. For instance, in Austria, the publication is to be made at the beginning of each fiscal or budgetary year.¹⁹ In Australia, procuring agencies are to publish APPs annually by the beginning of the financial year, that is by 1 July, but not earlier than 1 June, but this is without prejudice to procuring entities’ obligation to make their APPs available on request.²⁰ Under the EU directive, where supplies and services are concerned, the publication is to be made as soon as possible after the beginning of the budgetary year; it is different as regards works, the publication in this case is to be made after the decision approving the planning of the works contracts or the framework agreement that the contracting authority intends to award is taken.²¹ In Romania, the announcement of intent to procure is to be published not later than 30 days from the date of the approval of the contracting authority’s budget.²² In some jurisdictions, except for the indication that PINs are to be published at least once a year, no specific deadline for the publication of PINs is found.²³

3. Procurements covered

9. Flexibility is given to procuring entities to exercise their judgment as to which anticipated procurements to include in the PINs and APPs. The Australian procurement guidelines draw the attention of procuring entities in this context to the objectives of APPs’

¹⁵ Those are bodies legally and financially separate from the State who nevertheless could be subject to the CPG. See article 1.3 of the CPG. For them, the requirement to publish APPs only applies to covered procurements which are non-construction procurements above \$400,000 and construction services procurements above \$6 million (in Australian dollars). See article 4.1 of the Australian Procurement Publishing Guidance and articles 3-4 of the Finance Minister’s (CAC Act Procurement) Directions 2004, available at http://www.finance.gov.au/ctc/finance_minister_s__cac_act_pr.html.

¹⁶ See <https://www.tenders.gov.au/federal/index.shtml>.

¹⁷ Article 4.1 of the Australian Procurement Publishing Guidance.

¹⁸ Ibid.

¹⁹ See § 38 (1) of the Federal Act on the Award of Purchase Contracts of Austria (Purchase Contracts Award Act 2002), available at <http://wko.at/rp/vergabe/gesetzestextbvergg2002.pdf>.

²⁰ Article 4.1 of the Australian Procurement Publishing Guidance.

²¹ Similar provisions are found, for example, in article 18.4 of the Law on Public Procurement of the Republic of Lithuania.

²² Article 15 (2) of Ordinance No. 20 of 24 January 2002 concerning public acquisitions by means of electronic bids.

²³ See, e.g., article 71 of the Public Procurement Law of the Republic of Serbia (available at <http://www.oecd.org/dataoecd/34/12/35016323.pdf>), and article 67 (1) of the Public Procurement Act of the Republic of Slovenia of 5 May 2000.

publication, such as to facilitate procurement planning, increase competitiveness, and save costs during the procurement proceedings, and provide a set of factors that a procuring entity may wish to consider when deciding which procurement to publish in APPs. Although no value threshold is specified, the importance of drawing suppliers' early attention to major projects is particularly highlighted. Among other suggested factors bearing on publication are (i) expiration of existing contractual arrangements in the forthcoming financial year, (ii) the likelihood of the procurement actually occurring, (iii) the method of procurement, and (iv) additional value of the APP publication to the agency's relationship with industry, suppliers and contractors.²⁴

4. Period covered

10. In most jurisdictions, a specific reference is made to a certain period of time that PINs or APPs have to cover, usually a calendar or budgetary year.²⁵ In Australia, the APP must cover agencies' planned procurement for the forthcoming financial year, but may also have an outlook for more than the mandatory 12 months. The Australian procurement guidance explicitly provides that in the latter case APPs must still be published annually. In some jurisdictions, regulations imply that PINs may cover shorter periods.²⁶ In practice, PINs found on the websites of procuring entities may stretch beyond the term of one year.

5. Information published

11. Apart from a few required fields, flexibility is given to procuring entities to decide what information and level of detail they should include to meet disclosure and transparency requirements and encourage competition while maintaining the integrity of information.²⁷ Information commonly required to be provided in the publication is: (i) the subject matter of any planned procurement with basic specifications, such as the nature and quantity or value of expected purchases and the place of execution; (ii) the estimated date of the publication of the invitation to tender; and (iii) information about where additional information could be obtained.²⁸ In addition, under the EU directive, it is necessary to indicate whether a framework agreement is involved.²⁹ In Chile, it is also required to indicate any procuring method that will be adopted.³⁰ In Australia, an APP has also to contain a strategic procurement outlook statement for the forthcoming financial year, which "should broadly discuss any key, major or strategic initiatives from which the agency expects procurement to arise."³¹

²⁴ Article 4.2 of the Australian Procurement Publishing Guidance.

²⁵ See, e.g., article 2.19 of the Regulation of Ley de Compras (see above, endnote 1).

²⁶ For example, under article 71 of Public Procurement Law of the Republic of Serbia and article 67 (1) of the Public Procurement Act of the Republic of Slovenia of 5 May 2000, PINs are to be published at least once a year.

²⁷ See, e.g., in Australia, article 7.17 of the CPG and article 4.2 of the Procurement Publishing Guidance.

²⁸ See, e.g., annex 1 of Directive 2001/78/EC of the European Parliament and of the Council of 13 September 2001 on the use of standard forms in the publication of public contract notices (Official Journal of the European Union, No. L 285, 29 October 2001, p. 1) (hereinafter the "EU Public Contract Notices Directive"), available at http://europa.eu.int/eur-lex/pri/en/oj/dat/2001/L_285/L_28520011029en00010162.pdf; and article 22 (3) of the Law on Procurement for State or Local Government Needs of Latvia of 5 June 2003.

²⁹ The EU Public Procurement Directive, annex VII A, under "Prior information notice".

³⁰ See article 98 of Regulation of Ley de Compras (see above, endnote 1).

³¹ See article 4.2 of the Australian Procurement Publishing Guidance.

6. Updating information published

12. Provisions on updating information published with respect to forthcoming procurement opportunities are found in Australia where procuring entities are explicitly encouraged to amend APPs by inserting details of new planned procurements and amending or deleting inaccurate information to keep the indicative notices current and potential suppliers up to date.³² In other jurisdictions reviewed, although no explicit provisions addressing the matter have been found, the objectives of the publication of PINs and APPs and taking advantage of the benefits of such publication (see paragraphs 14 and 15 below) may necessitate keeping information up to date. In some jurisdictions, an obligation to keep information on forthcoming opportunities up to date and accurate may be implied as the PIN is a constituent part of the solicitation documents and a reference thereto, i.e. where it was published, is to be included in the solicitation documents.³³

7. Form and manner of publication

13. Standard forms for the publication of PINs are prescribed by the EU directive.³⁴ In Australia, the form is attached to procurement guidance for reference only. As regards the means and place of the publication of PINs and APPs, in all jurisdictions reviewed, they are to be published by electronic means in the same media where other procurement-related information is published.

D. Value of publication

14. It is common to find provisions allowing procuring entities to shorten time frames for submission of tenders if their PINs or APPs meet requirements as to their minimum content and time of publication.³⁵ To satisfy the minimum content requirement in Australia, APPs must include a description of the procurement, estimated date of the invitation to tender and the procedure to obtain documents, while under the EU directive PINs must contain all the information required for the contract notice insofar as that information is available at the time the PIN is published. To satisfy the requirement as regards the time of publication, APPs, including any amendments thereof, are to be published in Australia between 30 days and 12 months, and under the EU directive, PINs are to be published between 52 days and 12 months before the invitation to tender.³⁶

³² Ibid., article 4.4.

³³ See, e.g., articles 20 (2) (21) and 20 (3) of the Law on Public Procurement of the Republic of Lithuania, No. IX-1217, 3 December 2002, available at <http://www.vpt.lt/admin/uploaded/lawonPP.pdf>.

³⁴ See the EU Public Procurement Directive, annex VIII, 1 (a). A standard form is annexed to the EU Public Contract Notices Directive (see above, endnote 28).

³⁵ In Australia, the time frame may be shortened to not less than ten days in lieu of the standard 25-day minimum time limit, provided reasonable time is still available for potential suppliers to prepare their tenders (see article 4.3 of the Australian Procurement Publishing Guidance). Under article 38 (4) of the EU Public Procurement Directive, the time frame could be shortened to 36 days up to 22 days from usual 52-day time limit applicable in open procedures, and 37- and 40-day time limits applicable in other methods of procurement. See also section 25 (9) of the Law on Procurement for State or Local Government Needs of Latvia of 5 June 2003; articles 38, 39 and 48 of the Law on Public Procurement of the Republic of Lithuania; and articles 60 (3) and 63 of the Public Procurement Act of Slovenia of 5 May 2000.

³⁶ See article 4.3 of the Australian Procurement Publishing Guidance and article 38(4) of the EU

15. In some jurisdictions, procurement law allows procuring entities not to repeat in the invitations to tender or solicitation documents information provided in the PIN unless requested by the suppliers.³⁷

E. Conclusion

16. The UNCITRAL Model Law on Procurement of Goods, Construction and Services (the “UNCITRAL Model Procurement Law” or the “Model Law”)³⁸ does not address the publication of forthcoming opportunities. Nor does it address procurement planning in general. The subjects were not discussed when the Model Law was prepared. As the Guide to Enactment states, the Model Law sets forth procedures to be used by procuring entities in selecting the supplier or contractor with whom to enter into a given procurement contract and does not purport to address other procurement phases.³⁹ The publication of forthcoming procurement opportunities could be considered as a step in the procurement phase preceding those dealt with in the Model Law and therefore falling outside its current scope.

17. If the Working Group decides that the Model Law should promote the publication of information on forthcoming procurement opportunities, it shall consider (i) whether the Model Law should require the publication of such information or treat it as optional; (ii) whether there should be a threshold for the publication of such information; (iii) other terms of publication, such as the content of information published, the period covered and time frame for publication; and (iv) any other special conditions imposed on publication of such information. For the drafting suggestions, see section III below.

II. Other issues suggested for consideration by the Working Group in connection with electronic publication of procurement-related information

18. Legislative provisions regulating publication of procurement-related information in jurisdictions reviewed do not often adequately deal with the publication of procurement-related information by electronic means. Electronic publication, besides bringing potential benefits for interested suppliers or contractors and the public in general, such as by providing easier access of broader audience to more procurement-related information, has enabled practices that raise a number of concerns, not found in paper-based environment, that may necessitate specific regulation. Some of them are described in subsections A to C below. Subsection D below intends to bring to the attention of the Working Group the issue of fees charged for access to procurement-related information posted online, deferred

Public Procurement Directive.

³⁷ See, e.g., article 20 (3) of the Law on Public Procurement of the Republic of Lithuania, No. IX-1217, 3 December 2002, available at <http://www.vpt.lt/admin/uploaded/lawonPP.pdf>.

³⁸ For the text of the Model Law, see *Official Records of the General Assembly, Forty-ninth Session, Supplement No. 17* and corrigendum (A/49/17 and Corr.1), annex I (also published in the *Yearbook of the United Nations Commission on International Trade Law* (hereinafter referred to as “*UNCITRAL Yearbook*”), vol. XXV:1994 (United Nations publication, Sales No. E.95.V.20), part three, annex I. The Model Law is available in electronic form at the UNCITRAL website (<http://www.uncitral.org/english/texts/procurem/ml-procure.htm>).

³⁹ Part I, paragraph 10, of the Guide to Enactment.

by the Working Group for consideration at a future session.

A. Content of information and its presentation and systematic maintenance

19. As was noted in paragraphs 9 and 10 of document A/CN.9/WG.I/WP.39, in practice, more information than required to be published by legislation is made available to the public through electronic means of communication, usually by posting on the Internet. Some of such information may be authorized to be published by law while some is published at the discretion of various public bodies, including procuring entities and entities in charge of maintaining government procurement electronic systems. While the content and manner of publication of information required to be published by law are usually regulated, no similar regulation may exist with respect to information enabled or encouraged to be published or published in practice.

20. Unless some guidance is given as regards the scope and manner of publication, publication of abundant information may impede retrieval of procurement-related information that is necessary and useful. Systematic maintenance of such information and therefore its accuracy, consistency and relevance may also be jeopardized. As a result, although more procurement-related information may be made available in practice, easy public access to information of practical use and importance may be impeded considerably. The content of disclosure may also raise other concerns, including over legitimate commercial interests of the parties, law enforcement and fair competition.

21. These potential problems may be mitigated if the requirement for centralized, systematized and standardized posting of procurement-related information found in some jurisdictions reviewed were to apply to all procurement-related information published. However, in most jurisdictions reviewed, such a requirement extends only to procurement-related information required to be published by law (see sections B and C below).

22. The Working Group, in drafting the relevant provisions of the Model Law on publication of procurement-related information, may wish to consider formulating general rules with respect to the content and manner of publication of procurement-related information. In particular, guidance could be given that no information could be made available to the general public if such a disclosure would be contrary to law, would impede law enforcement, would not be in the public interest, would prejudice legitimate commercial interests of the parties or would inhibit fair competition (see, for instance, a similar wording in article 55 (3) of the Model Law). Furthermore, the advantages of systematic and standardized presentation of information may be highlighted, in particular for ease of access, retrieval and systematic maintenance of procurement-related information.

23. With the increasing volume of information made available to the public through online publication, the need for systematic maintenance of information posted becomes more apparent to ensure its accuracy, relevance and consistency. Under the Model Law, the obligation of systematic maintenance extends only to legal texts published under its article 5. The obligation was incorporated in the article without in-depth consideration upon the adoption of the Model Law by the Working Group in 1993. The Working Group may wish to consider extending the obligation of systematic maintenance to all information published, and this could be reflected in the revised article 5 (see section III below), with the Guide to Enactment noting that in a non-paper-based environment, achieving systematic maintenance has become significantly less time- and cost-consuming. Alternatively, the Working Group may wish to decide to limit the obligation of systematic

maintenance only to information required to be published under the Model Law.

24. The obligation of systematic maintenance of information published is closely linked to the issue of liability of procuring entities for the failure to provide accurate and up-to-date information to potential suppliers or contractors. The latter issue was discussed when the Model Law was prepared in the context of including references to laws and regulations directly pertinent to the procurement proceedings in solicitation documents (see article 27 (t) of the Model Law).⁴⁰ The conclusion reached at that time, as reflected in article 27 (t), was that the omission of reference to laws and regulations pertinent to the procurement proceedings should not constitute grounds for review or give rise to liability on the part of the procuring entity. The Working Group may wish to consider the issue of liability for inaccurate or outdated information in the context of revised article 5 or defer the consideration of that issue until its consideration of the subject of “review of procurement proceedings”.

B. Involvement of intermediaries in electronic publication

25. Procuring entities may be authorized to post information directly without intermediaries or to send it to a designated advertising agent. The first method is practiced in Australia,⁴¹ the second exists, for example, in the EU.⁴² The latter, while ensuring standardization and consistency in posting the information, may result in delays and mistakes. The MDBs in the context of their e-government procurement (e-GP) initiatives⁴³ recommend that “from the very beginning, the procuring entities themselves must publish their information—directly, without third-party intervention—on the single website, abiding by its rules.”⁴⁴

26. The Working Group may wish to consider elaborating on advantages and disadvantages of those options in the Guide to Enactment.

⁴⁰ For the consideration of the issue, see documents: A/CN.9/315, paras. 46-47, reproduced in the *Yearbook of the United Nations Commission on International Trade Law* (hereinafter referred to as the “*UNCITRAL Yearbook*”), vol. XX:1989 (United Nations publication, Sales No. E.90.V.9), part two, II, A; A/CN.9/331, paras. 93-97, reproduced in the *UNCITRAL Yearbook*, vol. XXI:1990 (United Nations publication, Sales No. E.91.V.6), part two, II, A; and A/CN.9/343, paras. 181-183, reproduced in the *UNCITRAL Yearbook*, vol. XXII:1991 (United Nations publication, Sales No. E.93.V.2), part two, II, A.

⁴¹ See AusTender User Guide, December 2004, available at http://www.contracts.gov.au/docs/GaPSUserGuide_20040401.pdf.

⁴² The European Union operates a centralized publication and translation system for all member States that must be used for all regulated contracts, notice of which appears in the Official Journal of the European Union, available only in electronic form (Internet and on CD-ROM). However, entities may publish additional notices in other publications and usually do so (often in hard-copy form and in additional electronic media).

⁴³ See, in particular, the Electronic Government Procurement Roadmap, pp. 32-40, available in the MDBs’ Electronic Government Procurement Portal (<http://www.mdb-egp.org/data/default.asp>).

⁴⁴ *Ibid.*, p. 32.

C. Multi-posting of procurement-related information

27. Procurement-related information is frequently posted on a centralized government procurement website as well as on the websites of procuring entities. Even where a centralized system for publication of procurement-related information exists, procuring entities may still be allowed to use other media for publication.⁴⁵

28. Multi-posting of procurement-related information on the Internet may have a negative impact on reliability and integrity of procurement-related information and the procurement process as a whole. In particular, it may cause the fragmentation of procurement-related information and confusion as regards authenticity and authoritativeness of procurement-related information. In addition, it may unintentionally put some potential suppliers getting access to the “correct” website to a more beneficial position than the others, as not the same information posted through the Internet is made available instantaneously to all interested suppliers.

29. These concerns are being addressed in legislation of some jurisdictions. Most of them prohibit the publication of various procurement-related information in different media before it is published in the specifically designated central medium.⁴⁶ Some of them specifically state that the same notices published in different media must contain the same information.⁴⁷

30. The MDBs as well address those concerns and recommend that information be published on a single website, according to the rules applicable to the maintenance of the website. MDGs’ e-GP guidelines state that “a single website implies that all the information on procurement must disappear from the websites of the procuring entities. There is no reason why suppliers should visit many different physical or electronic sites in order to reach public sector procurement opportunities, or to establish an interoperability mechanism to substitute for the lack of basic standards. The disappearance of procurement information from individual sites may be gradual, inversely proportional to the development of the single website, but respecting the primacy of the single website, which must contain the original, legally binding information, as well as define the standards and general rules.”⁴⁸

31. The Working Group may consider it useful to address these issues, either in the context of its consideration of the “accessibility standards” in draft article 4 bis (see A/CN.9/WG.I/WP.38 and addendum) or in revised article 5 (see section III below).

⁴⁵ See e.g., articles 3-A and 3-B of Law No. 8.666, of 21 June 1993 of Brazil; and article 19.2 of the Law on Public Procurement of the Republic of Lithuania. Article 3-A of the Brazilian Law, for example, read that “all organs of the Public Administration, autonomous entities and public foundations shall publish at the appropriate time through their own Internet sites or through specific sites of the Federal, State or Municipal Administration, data and information relating to procurement proceedings in course, and their results”. Article 3-B further states that State governments shall create specific Internet sites for the publication, under standing agreements, of information relating to procurement carried out by municipalities with less than 100,000 (one hundred thousand) inhabitants that do not possess the technical or financial resources necessary to comply with article 3-A.

⁴⁶ See, e.g., article 23 (1) of the Public Procurement Act of the Republic of Croatia of 14 December 2001, available at <http://www.oecd.org/dataoecd/54/62/35013293.pdf>.

⁴⁷ See, e.g., articles 35 and 36 of the EU Public Procurement Directive, and article 19.5 of the Law on Public Procurement of the Republic of Lithuania.

⁴⁸ See the Electronic Government Procurement Roadmap, available in the MDBs’ Electronic Government Procurement Portal (<http://www.mdb-egp.org/data/default.asp>), p. 32.

Alternatively, it may be decided that provisions in the Guide could sufficiently address those issues. Subject to the Working Group's position on the issue, the Guide could elaborate on desirability of a single centralized medium where all legally-binding, authentic and authoritative procurement-related information is to be consistently and in a timely manner made available to the public and systematically maintained, and a desirability of discontinuing websites of various procuring entities. Alternatively, it may provide specific guidance as regards multi-posting of procurement-related information on the Internet, in particular regarding the need of (i) establishing a clear hierarchy of existing websites and making such a hierarchy known in all websites where procurement-related information is posted by procuring entities or other authorities, (ii) including a mandatory disclaimer about unofficial nature of information posted in websites other than centrally designated website, (iii) providing an obligatory link to the central website, and (iv) defining timing for posting procurement-related information on various websites (e.g. no information could be posted on individual websites before its appearance on the central website).

D. Fees charged

32. The information disseminated through electronic means is usually made available to the public free of charge. Nevertheless, in some instances, subscription or other types of access fees may be charged that may hinder access to information.⁴⁹

33. The Model Law envisages a possibility of charging a fee only for the provision of prequalification and solicitation documents and requests for proposals (articles 7, 26 and 37) and provides that the price that the procuring entity may charge in such cases must reflect only the cost of printing and providing information to suppliers or contractors, although the term "providing" is not defined. The issue of charging fees for information generally made available to the public was before the Working Group at its seventh session (see A/CN.9/WG.I/WP.34 and addenda). The Working Group deferred consideration of the issue. The Working Group may wish to consider whether the Guide to Enactment should contain a discussion regarding negative consequences that charging fees may have for access to general procurement-related information.

III. Drafting suggestions

A. Article 5

34. At its seventh session, the Working Group agreed that general principles regulating the publication of procurement-related information under the Model Law should be consolidated in a revised article 5 of the Model Law, which as revised would apply not only to the publication of legal texts as article 5 currently does but also to the publication of information currently dealt with in other articles of the Model Law, such as invitations to participate in specific procurement (articles 24, 37, 46, 47 and 48 of the Model Law), and notices of contract awards (article 14 of the Model Law), as well as to other information, the publication of which may be envisaged in the revised Model Law. It was further agreed that revised article 5 would be based on the general principles that any means of publication or combination thereof could be chosen, and that the chosen means had not to be justified, provided that the chosen means of publication complied with

⁴⁹ See, e.g., South Africa (http://origin.sundayobserver.lk/2001/pix/gov_gazette.html).

certain “accessibility standards”, such as they should not unreasonably restrict access to procurement proceedings and should not discriminate against and among suppliers (A/CN.9/575, paragraphs 25-26). These general principles and the “accessibility standards” are dealt with in draft article 4 bis discussed in a note by the Secretariat (A/CN.9/WG.I/WP.38 and addendum).

35. At its seventh session, the Working Group also agreed that in the continuation of its deliberations regarding draft article 5 at a future session, the following text would be considered:

“Article 5. Public accessibility of procurement-related information

“(1) The text of this Law, procurement regulations and all administrative rulings and directives of general application in connection with procurement covered by this Law, and all amendments thereto, as well as any other documents and information required to be published [or being published under this Law] shall be promptly made accessible to the public and systematically maintained.

“[(2) Any further information, such as regarding forthcoming opportunities, internal controls or guidance, that an enacting State or procuring entity chooses to publish shall be promptly made accessible to the public [and systematically maintained].]”

36. As regards paragraph 1 of the revised article, the wording in square brackets intends to cover the information that, for example, although not required to be published under the Model Law, is nevertheless required to be made available for inspection by the general public and is made available for such purpose through the publication (see article 55 (3) of the Model Law as regards the decisions taken in the course of procurement review proceedings). The Working Group may wish to consider adding a specific reference in the paragraph to judicial decisions and policies, procedures and practices related to procurement and expanding the commentary in the Guide to Enactment by drawing from the wording of paragraph 68 of the UNCITRAL Model Law on Electronic Commerce⁵⁰ that defines “the law” as encompassing not only statutory or regulatory law but also judicially-created law and other procedural law, including common law rules.

37. Paragraph 2 of the revised article has not been considered by the Working Group. It is intended to cover other information that is made available to the public at the discretion of public authorities, including procuring entities. The Guide could elaborate on the value of publicizing all regulatory texts related to procurement specifying that, while such requirement might be too onerous when only paper means are available, this might not be the case when electronic means are used. It is expected that the advantages of the use of electronic means of communication in procurement, including for the publication of procurement-related information and its systematic maintenance, would be discussed in the Guide in the context of functional equivalence of all means of communicating, publishing, exchanging or storing information or documents, which is now addressed in draft article 4 bis. The commentary to revised article 5 could usefully cross-refer to the relevant discussions in the Guide.

⁵⁰ For the text of the Model Law, see *Official Records of the General Assembly, Fifty-first Session, Supplement No. 17 (A/51/17)*, annex I (also published in the *UNCITRAL Yearbook*, vol. XXVII:1996 (United Nations publication, Sales No. E.98.V.7), part three, annex I). The Model Law and its accompanying Guide to Enactment have been published as United Nations publication, Sales No. E.99.V.4, and are available in electronic form at the UNCITRAL website (<http://www.uncitral.org/english/texts/electcom/ml-ecomm.htm>).

38. A reference to information on forthcoming procurement opportunities in paragraph 2 of the revised article should be considered together with a proposed article 5 bis (see subsection B below). The way of treating such information in the revised article 5 will depend on whether the Model Law would deal with the subject at all and, if so, under what terms, in particular whether the publication of such information would be optional or mandatory (see paragraphs 16 and 17 above).

39. The Working Group, in conjunction with its consideration of the revised article 5, may wish to consider formulating general rules of publication of information, as discussed in section II above (see, in particular, paragraphs 22-24, 26 and 31 above), and its position as regards the charging of fees for information generally made available to the public (see paragraph 33 above), for inclusion in the Model Law or the Guide to Enactment. It may also wish to assess whether the same general principles of the publication of procurement-related information (see paragraph 34 above), any rules of publication that the Working Group may wish to formulate, “accessibility standards” (see A/CN.9/WG.I/WP.38 and addendum) and the obligation of “systematic maintenance” (see paragraphs 23-24 above) would equally apply to the information required to be published under paragraph 1 and information referred to in paragraph 2 of the revised article 5.

B. Article 5 bis (publication of information on forthcoming opportunities)

40. At its seventh session, the Working Group expressed a preference for Variant B of the proposed article 5 bis “Notice of procurement opportunities”, as contained in A/CN.9/WG.I/WP.34/Add.2, which provided as follows:

“Within [the enacting State specifies a time-limit] after the begin of a fiscal year, procuring entities may publish notice of their expected procurement requirements for the following [the enacting State specifies a period].”

41. Subject to the Working Group’s decision on the publication of information on forthcoming procurement opportunities under the Model Law, Variant B could be expanded, in particular, to address other terms of publication of such information, or relevant guidance could be given in the Guide to Enactment (see paragraphs 16 and 17 above). The Guide could also draw the enacting State’s attention to the value of publication of such information. In particular, it could state that such information, while not being binding on procuring entities and therefore not having negative interference with the budgeting process, disciplines procuring entities in procurement planning, diminishes cases of “ad hoc” and “emergency” procurements and consequently, recourses to less competitive methods of procurement. The Guide could also elaborate that publication of such information enables more suppliers to learn about procurement opportunities, assess their interest in participation and plan their bids in advance accordingly, which also positively affects competition, transparency and cost-saving in procurement. The positive impact such information could have in a broader governance context, in particular in opening procurement for general public review and local community participation, could also be highlighted.

C. New provisions

42. The Working Group may wish to consider publication of additional information, necessitated by specific procurement techniques and features, such as suppliers lists, framework agreements and electronic reverse auctions (see document A/CN.9/WG.I/WP.39, paragraph 12), together with other substantive issues involved in such procurement techniques and features that the Working Group will take up in due course.

**D. Note by the Secretariat on possible revisions to the UNCITRAL
Model Law on Procurement of Goods, Construction and Services:
drafting materials for the use of electronic reverse auctions
and addressing abnormally low tenders in public procurement,
submitted to the Working Group on Procurement at its eighth session

I. Introduction

1. The background to the current work of Working Group I (Procurement) on the revision of the UNCITRAL Model Law on Procurement of Goods, Construction and Services (the “Model Law”)¹ is set out in paragraphs 5 to 33 of document A/CN.9/WG.I/WP.37, submitted to the Working Group for its consideration at the current session.

2. At its seventh session (New York, 4-8 April 2005), the Working Group addressed the following topics: electronic publication and communication of procurement-related information, other aspects arising from the use of electronic means of communication in the procurement process (such as controls over their use), electronic reverse auctions, and abnormally low tenders (see, further, document A/CN.9/575). The Working Group requested the Secretariat to prepare drafting materials for consideration on these topics at its eighth session (as regards the Working Group’s conclusions regarding electronic reverse auctions in particular, see A/CN.9/575, paras. 60-67).

3. This note will present for the Working Group’s consideration the drafting materials requested for provisions to govern the use of electronic reverse auctions and to address abnormally low tenders. It draws on, and should be read in conjunction with, the related notes by the Secretariat presented to the Working Group on the topics at its seventh session (A/CN.9/WG.I/WP.35 and Add.1 and A/CN.9/WG.I/WP.36).

II. General remarks

4. At its seventh session, the Working Group noted that electronic reverse auctions were increasingly used as a method of procurement in those countries where e-commerce had become a norm. The prevailing view of the Working Group at that session was that, taking account of their increasing use and the twin aims of harmonization and promotion of best practice, provisions governing the use of electronic reverse auctions should be included in the text of the Model Law (A/CN.9/575, para. 60). The Working Group also decided at its seventh session to consider the more detailed aspects of electronic reverse auctions, such as conditions for their use and their modalities, at its eighth session (A/CN.9/575, paras. 9 and 67).

5. The Working Group therefore requested the Secretariat to draft general enabling provisions for the Model Law to provide for the use of electronic reverse auctions, and to set out the key principles for their use. The Working Group requested that the related draft text of the Guide to Enactment should address the use of electronic reverse auctions in detail, in particular their advantages and disadvantages, and how to address any risks that they pose.

¹ For the text of the Model Law, see *Official Records of the General Assembly, Forty-ninth Session, Supplement No. 17 and corrigendum* (A/49/17 and Corr.1), annex I (also published in the *Yearbook of the United Nations Commission on International Trade Law, Volume XXV: 1994* (United Nations publication, Sales No. E.95.V.20), part three, annex I. The Model Law is available in electronic form at the UNCITRAL website (<http://www.uncitral.org/english/texts/procurem/ml-procure.htm>).

6. The Working Group has also given the Secretariat the following additional guidance when drafting these materials for its consideration:

(a) The enabling provisions should be based on the use of electronic reverse auctions as a procurement method rather than a phase in other procurement methods;

(b) The enabling provisions should address the general conditions for use of electronic reverse auctions, and should not exclude any category of procurement (goods, construction or services) per se;

(c) It should be made clear that the main condition as regards the suitability of electronic reverse auctions as a procurement method is whether or not the specifications can be drafted with precision and the criteria to be subject to auction easily and objectively quantified; and

(d) The materials should take account of the approach on the same subject taken by the parties currently revising the plurilateral Government Procurement Agreement of the World Trade Organization (GPA) as regards the use of electronic reverse auctions (A/CN.9/575, paras. 62, 66 and 67).²

7. The Secretariat has presented the drafting materials so that the provisions are consistent with those applied by the Model Law to other methods of procurement. Consequently, as tendering is the general procurement method for goods and construction, the provisions enable an electronic reverse auction procedure that follows the pattern of the standard tendering method, adapted to provide for an electronic reverse auction. The conduct of the auction itself would under the draft text below be governed by the principles and objectives of the rules governing tendering. The Secretariat has also identified the articles of the current text of the Model Law that would require consequential amendment so as to enable the use of electronic reverse auctions, and those consequential amendments are set out in chapter V of the addendum to this Note (A/CN.9/WG.I/WP.40/Add.1).

8. As electronic reverse auctions may also be appropriate in the circumstances in which the Model Law allows use of restricted tendering under article 20 (in cases in which the time and costs of a tendering procedure would be disproportionate, or in cases of a limited number of suppliers because of highly complex or specialized goods), the materials also include an option to provide for an equivalent to a restricted tendering procedure (see, further, para. 24 below).

III. Draft provisions to enable the use of electronic reverse auctions under the Model Law and to establish conditions for their use

A. General remarks

9. Proposed article 19 bis for the Model Law offers options for the Working Group to consider as to the conditions for use of electronic reverse auctions, and operates as the general enabling provision requested. As to its location, the Working Group may consider

² The Secretariat has been advised in consultations with the World Trade Organization that there is as yet no decision as to whether electronic reverse auctions will be included in the revised text of the GPA.

that the draft article should be presented as part of chapter II (“Methods of procurement and their conditions for use”) and, as a form of tendering, after the current article 19 (“Conditions for use of two-stage tendering, requests for proposals or competitive negotiation”).

10. Commentary on the proposed text for the Model Law, and outstanding issues for the Working Group to address follow the draft itself. Suggestions for the Guide to Enactment text, which explains the features of the draft article appear thereafter. Amendments and additions to the drafting suggestions, notably to the Guide to Enactment text, will therefore be required to reflect the Working Group’s conclusions as to the outstanding issues. This format will be followed for each of the draft articles presented in this Note.

B. Proposed new text for the Model Law: new article 19 bis

Article 19 bis. Conditions for use of electronic reverse auctions

(1) (Subject to approval by ... (the enacting State designates an organ to issue the approval),) a procuring entity may engage in procurement by means of an electronic reverse auction in accordance with article 47 bis and ter,* in the following circumstances:

(a) Where it is feasible for the procuring entity to formulate detailed [, and] precise [and accurate] specifications for the goods [construction or services] such that homogeneity in the procurement can be achieved [;

(b) Where there is a competitive market of at least [ten] suppliers or contractors [that are anticipated to be qualified to participate in the electronic reverse auction]; and]

[(c) The goods [, construction or services] to be procured are [standardized] [standard products] [commodities], [[such that] [and] the price [and other quantifiable criteria expressed in figures or percentages] thereof [is] [are] the only [criterion] [criteria] to be used in determining the successful bid] [[such that] [and] all criteria that are to be submitted and evaluated in the auction can be evaluated automatically].

C. Commentary and further issues for consideration by the Working Group and eventual inclusion in the Guide to Enactment regarding article 19 bis

11. There are no definitions of the terms “electronic”, “reverse”, and “auction” provided for in the draft articles of the Model Law. The Working Group is to consider at its eighth session whether or not to include a definition of the term “electronic” in the context of the use of electronic communications in the procurement process (see, section III.D of A/CN.9/WG.I/WP.38/Add.1). The Working Group may wish to consider whether any definition of an “electronic reverse auction” in the text of the Model Law is necessary, or whether the definition proposed in the Guide to Enactment text will be sufficient.

12. The description of an electronic reverse auction assumes that all participants will use electronic means of communication in the auction itself (see para. 23 of

* See chapter IV below for the proposed draft text of that article.

A/CN.9/WG.I/WP.38, the drafting suggestions following which allow the compulsory use of electronic means of communication). It is possible for entities to facilitate the participation of suppliers that do not have Internet access by setting up a proxy (possibly in the offices of the procuring entity) to bid on the supplier's behalf during the auction, based on telephone instructions from the supplier. The draft article does not address this point,³ and the Guide to Enactment could refer to this possibility. The Guide could also address issues arising from the relative novelty of electronic reverse auctions, such as the provision of training and holding simulated auctions.

13. The main issue from the drafting perspective is the extent to which the Model Law should prescribe the conditions for the use of electronic reverse auctions, such as the level of detail and accuracy in the specification of the items to be procured (para. 1 (a) of the draft article), and the degree of competitiveness in the market (para. (1) (b)).

14. Paragraph (1) (c) presents options that would enable the procuring entity to use electronic reverse auctions for the procurement of construction and services as well as goods, sets out the extent to which appropriate goods must be specified in order to use electronic reverse auctions, and presents options for the presentation of only price criteria, or both price and non-price criteria through the auction. Paragraphs 20 to 25 of A/CN.9/WG.I/WP.35 discuss equivalent conditions for use that are in current use under various procurement systems. Most systems limit the use of electronic reverse auctions to items for which precise specification is possible, and exclude most construction procurement, but in other respects, there is some variation in the degree of prescription to be found. The Working Group may wish to consider the extent to which the article should be prescriptive or facilitative, and the level of guidance on these questions that should be included in the Guide to Enactment.

15. Also, as regards paragraph (1) (c), the Working Group may wish to consider the extent to which the conditions for use of electronic reverse auctions should be specified. For example, should auctions be used only for standardized products, for those whose variable criteria can be expressed in figures or percentages, for products whose variable criteria can be expressed in price equivalents, or a combination of these features? An example of a product whose variable criteria can be expressed in price equivalents may arise as follows: the aesthetics of a building or product design can be given a score out of 100 that can be expressed in price terms (for every extra design point the procuring entity would be willing to pay an extra, say, 5,000 euros). Thus, design could be taken into account as an award criterion, by allocating points that have a price equivalent before the auction is held, and these points can then be taken into account automatically in the auction itself.⁴ However, the design itself is not itself evaluated during the auction. The Working Group may care to note that the draft text for the conduct of the auction itself, set out in chapter IV below, implicitly requires that all criteria that are to be submitted and evaluated in the auction can be evaluated automatically.

16. A final issue that the Working Group may wish to consider is whether only electronic reverse auctions (as opposed to reverse auctions in their conventional, non-electronic form) are to be provided for in the Model Law (see, further, para. 63 of A/CN.9/575, in which are recorded the strong reservations expressed at the Working Group's seventh session as to

³ If enacting States' domestic systems allow suppliers to operate through agents, explicit provision may not be needed.

⁴ An auction with such a criterion would be a Model 2 electronic reverse auctions as described in paragraph 33 of A/CN.9/WG.I/WP.35.

whether the use of conventional reverse auctions constitutes the best practice that the Model Law should promote). The draft provisions and commentary above are presented on the basis of providing for electronic reverse auctions alone.

D. Proposed text for the Guide to Enactment regarding article 19 bis

17. The Working Group may wish to consider the following draft text for the Guide to Enactment, noting that stylistic and other minor changes may be needed to ensure internal consistency in the Guide when finalized.

Article 19 bis. Conditions for use of electronic reverse auctions

(1) An electronic reverse auction (electronic reverse auction) can be defined as an online, real-time dynamic auction between a buying organization and a number of suppliers who compete against each other to win the contract by submitting successively lower-priced or better-ranked bids during a scheduled time period. Such auctions have been increasing in use since the text of the original Model Law was adopted in 1994. It has been observed that electronic reverse auctions have many potential benefits. First, they can improve value for money (in that better value for money can be achieved through a competitive market price, and substantial cost savings can be realized through dynamic and real-time trading). Secondly, they can enhance the efficient allocation of resources (reducing the time required to conduct a procurement, and reducing the administrative costs of the traditional open tendering procedure). Thirdly, they can enhance transparency in the procurement process, in that information on other bids is available and the outcome of the procedure visible to participants, matters that also disfavour abuse and corruption. Electronic technologies have facilitated the use of reverse auctions by greatly reducing the transaction costs. However, concerns have been expressed that electronic reverse auctions can encourage an excessive focus on price, and their ease of operation can tend to overuse and use in inappropriate situations.

(2) In order to allow procuring entities in enacting States to take advantage of this new procurement method in an appropriate way, the Model Law has been revised so as expressly to authorize the use of electronic reverse auctions as a procurement method, but subject to the conditions set out in articles 19 bis, and 47 bis and ter. Further guidance on the various aspects of the provisions is set out in the article-by-article commentary below.

(3) *[insert guidance on conditions in paragraph (1)(c)—see paragraphs 13 and 14 above].*

(4) In the light of the matters set out above, enacting States may wish to specify further conditions for the use of electronic reverse auctions in regulations. For example, their use may be restricted to [standardized goods] [standard products] [commodities], [and some simple types of construction and services], such as commodities (fuel, standard information technology equipment, office supplies and primary building products), and items with no or limited impact from post-acquisition costs and without services or added benefits after the initial contract is completed. Although illustrative lists may be used to identify goods [construction and services] that may be procured using electronic reverse auctions, enacting States should be aware that such lists will require periodic updating as new commodities or other appropriate items appear. It has been observed that some construction works and services (e.g. road maintenance) may be appropriately procured through

electronic reverse auctions, but the requirement for detailed [, and] precise [and accurate] specifications will exclude most services and construction from the use of this procurement method.

(5) In order to minimize the risk of collusive practices, including price signalling, and to preserve bidders' anonymity during the electronic reverse auction, enacting States may wish to specify the minimum number of suppliers or contractors in the appropriate market [that are anticipated to participate in the electronic reverse auction]. Article 47 bis* provides that the electronic reverse auction is to be [suspended/abrogated] should the number of bidders drop below that minimum before the opening of the electronic reverse auction itself.

IV. Draft provisions addressing the conduct of electronic reverse auctions under the Model Law—proposed new article 47 bis and ter

18. For the ease of the Working Group during its deliberations, the proposed text to provide for the conduct of electronic reverse auctions has been separated into two periods—the pre-auction period and the auction itself, presented as new articles 47 bis and ter respectively—and with suggested Guide to Enactment text and additional commentary thereafter. The Working Group may wish to consider whether the final version of the provision should be combined into a single article, for the ease of use of enacting States.

A. Pre-auction period

1. General remarks

19. The Working Group may wish to address the conduct of the electronic reverse auction itself entirely in the Model Law or in draft regulations, or some combination thereof, with appropriate commentary in the Guide to Enactment in each case. The draft below is presented as a draft article for the Model Law, but some of the text could equally take the form of draft regulations. For example, and given their specificity, regulations may be more suitable for the items in paragraph (4) (e) (i) to (xi) (which are accordingly presented in square brackets).

20. Paragraphs 7 to 21 of A/CN.9/WG.I/WP.35/Add.1 describe equivalent provisions under other existing procurement systems.

2. Proposed new text for the Model Law: new article 47 bis

Article 47 bis. Conduct of electronic reverse auctions in the pre-auction period

(1) The provisions of chapter III of this Law shall apply to procurement by means of electronic reverse auctions except to the extent that those provisions are derogated from in this article.

[(2) In any procurement by means of an electronic reverse auction, the procuring entity [shall] [may] engage in prequalification proceedings in accordance with article 7].

* See chapter IV below for the proposed draft text of that article.

(3) Suppliers or contractors shall, prior to the auction, submit initial tenders that are complete in all respects, except that the tenders need not include the features that are to be presented through the auction. [The procuring entity may, however, require that tenders include such features.]
