

SOURCE

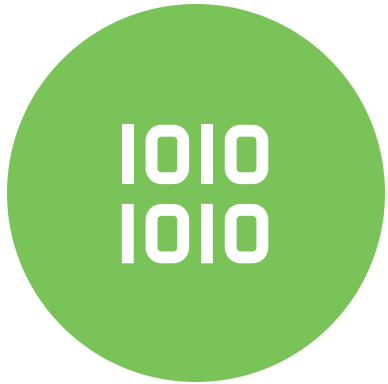

EMPOWERING GOVERNMENTS

Why SOURCE

Support the development of projects to bridge the infrastructure gap

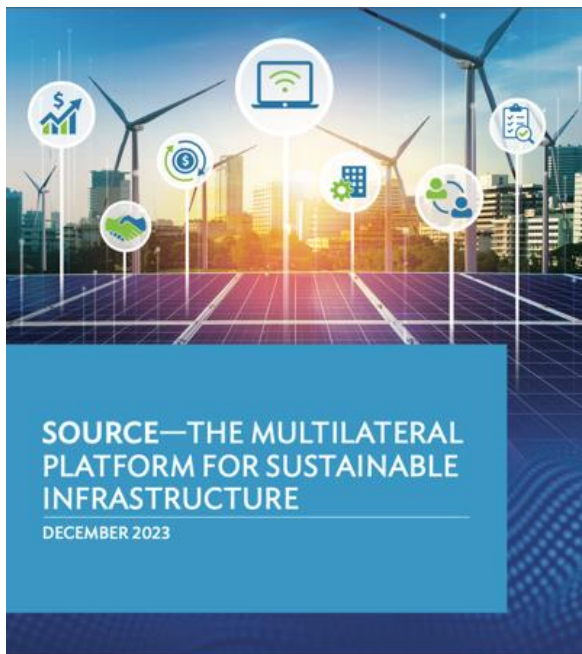

Advance governments digitalisation agenda

Mobilise public and private finance

Multilateral Platform for Sustainable Infrastructure

ASIAN DEVELOPMENT BANK

“SOURCE is a global and scalable information technology platform, hosted by the United Nations, acting as a unique **delivery system** for the world’s **best practices in infrastructure project development**.

It’s structured data-based approach is designed to strengthen accountability and transparency and support informed decisions that meet local, regional, and global standards”

- *Asian Development Bank’s publication*
December 2023

SOURCE key benefits

Project development Management

- Secured collaborative workspace
- Standardised approach for decision making
- Customisable process workflow

Infrastructure Intelligence Solution

- Delivery of international tools and standards
- Structured project data for reporting and benchmarking
- Project information and knowledge management

Well-prepared pipelines of projects

- “Common language” with private sector
- Standardised, transparent pipeline of projects
- Connection to other project promotion platforms

SOURCE Featured on International Platforms

G20 Infrastructure Working Group

July 18th, 2020, the G20 Finance Ministers and Central Bank Governors (FMCBG) have highlighted the key role the multilateral platform SOURCE.

G7 Partnership for Global Infrastructure Investment

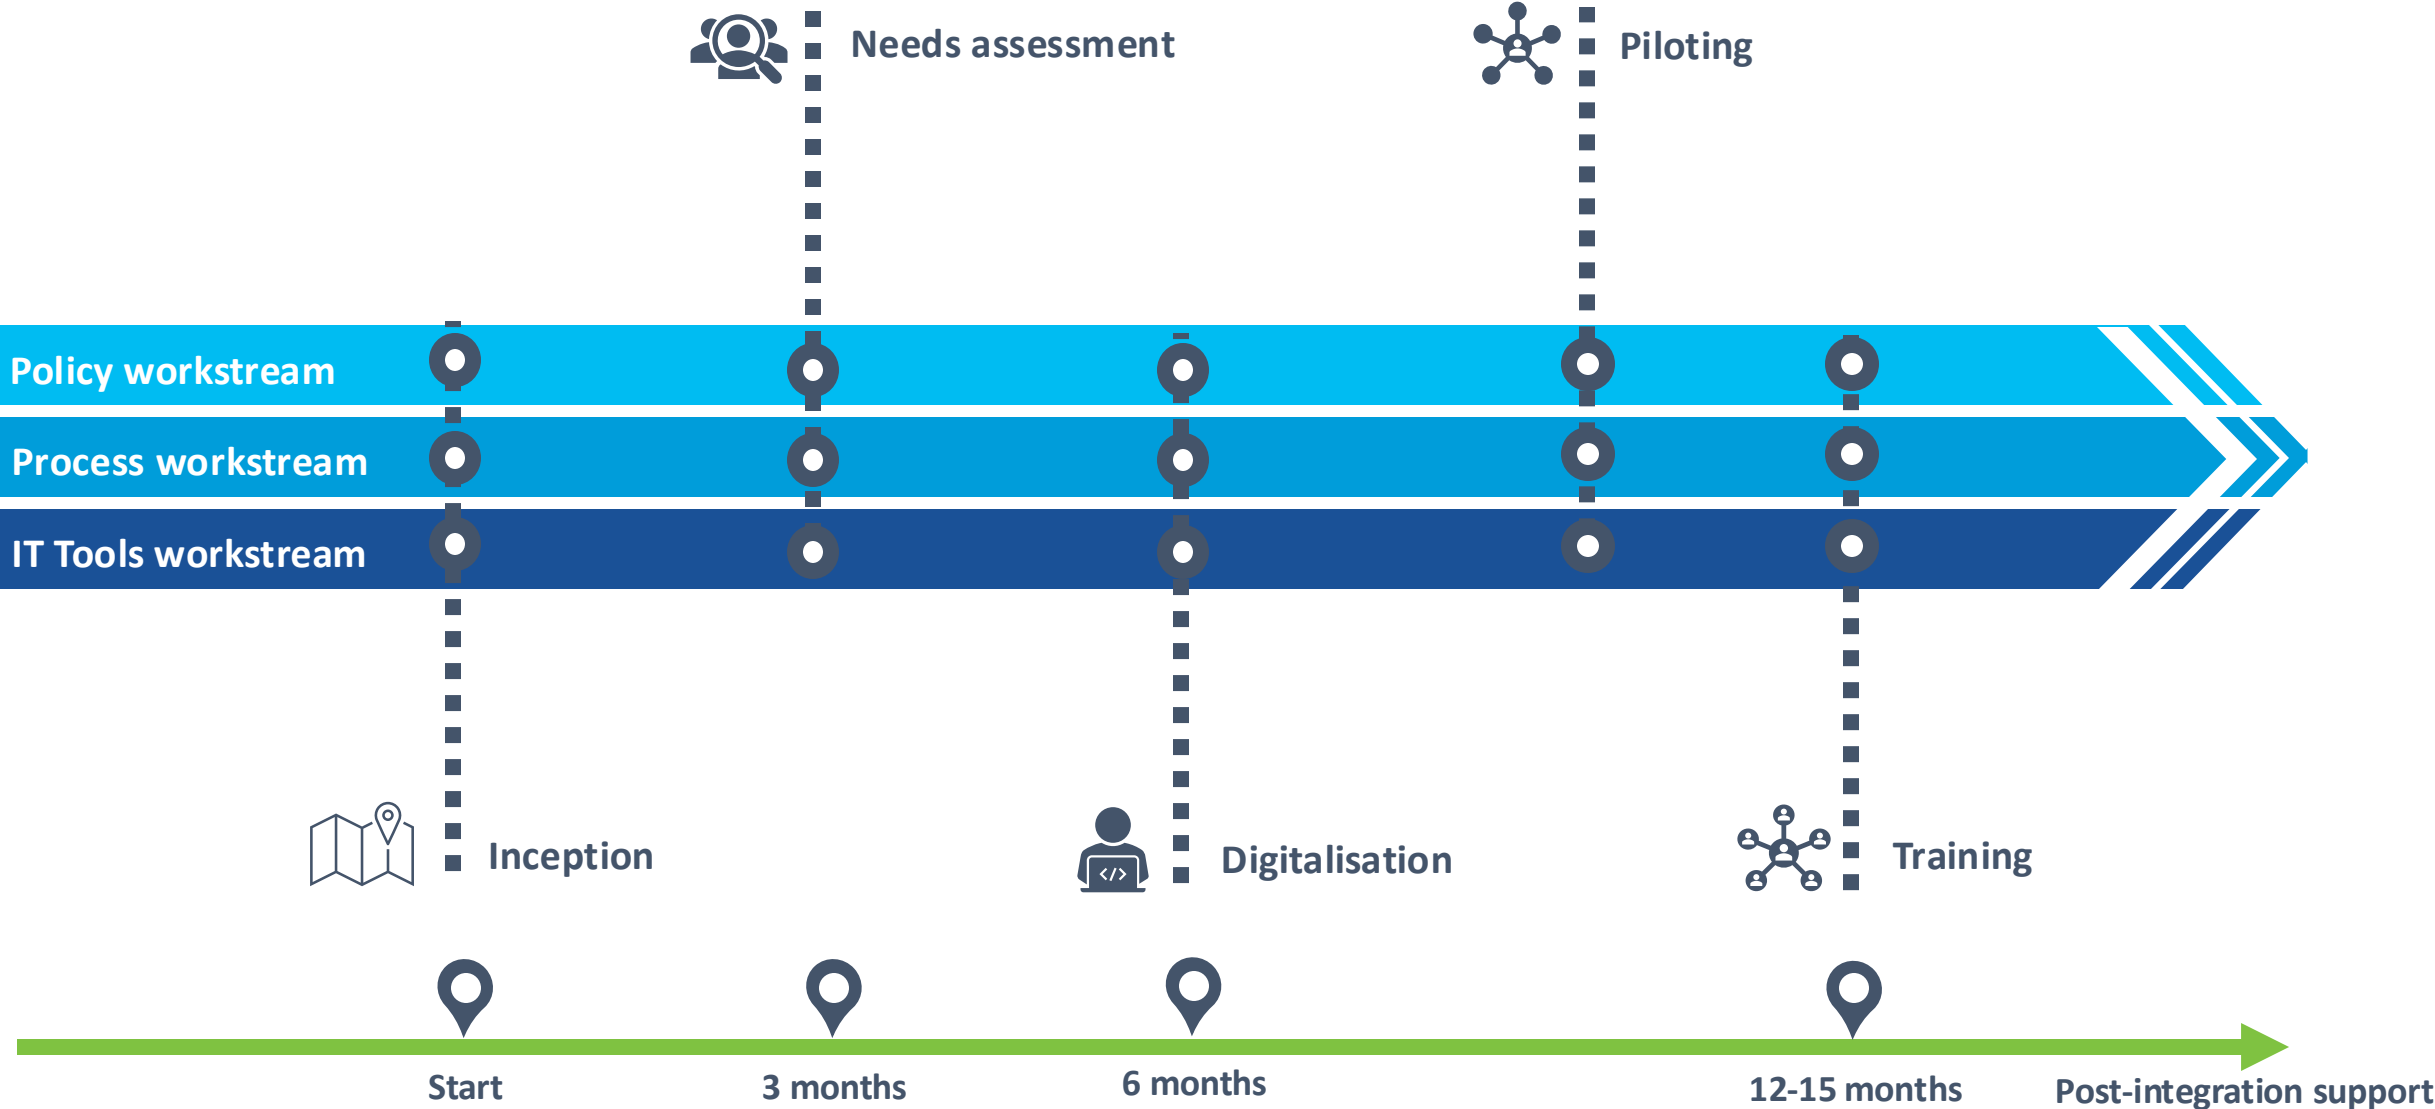

May 21st, 2023, the G7 PGII recognised SOURCE as an important tool to improve the quality, standards, and governance of infrastructure projects.

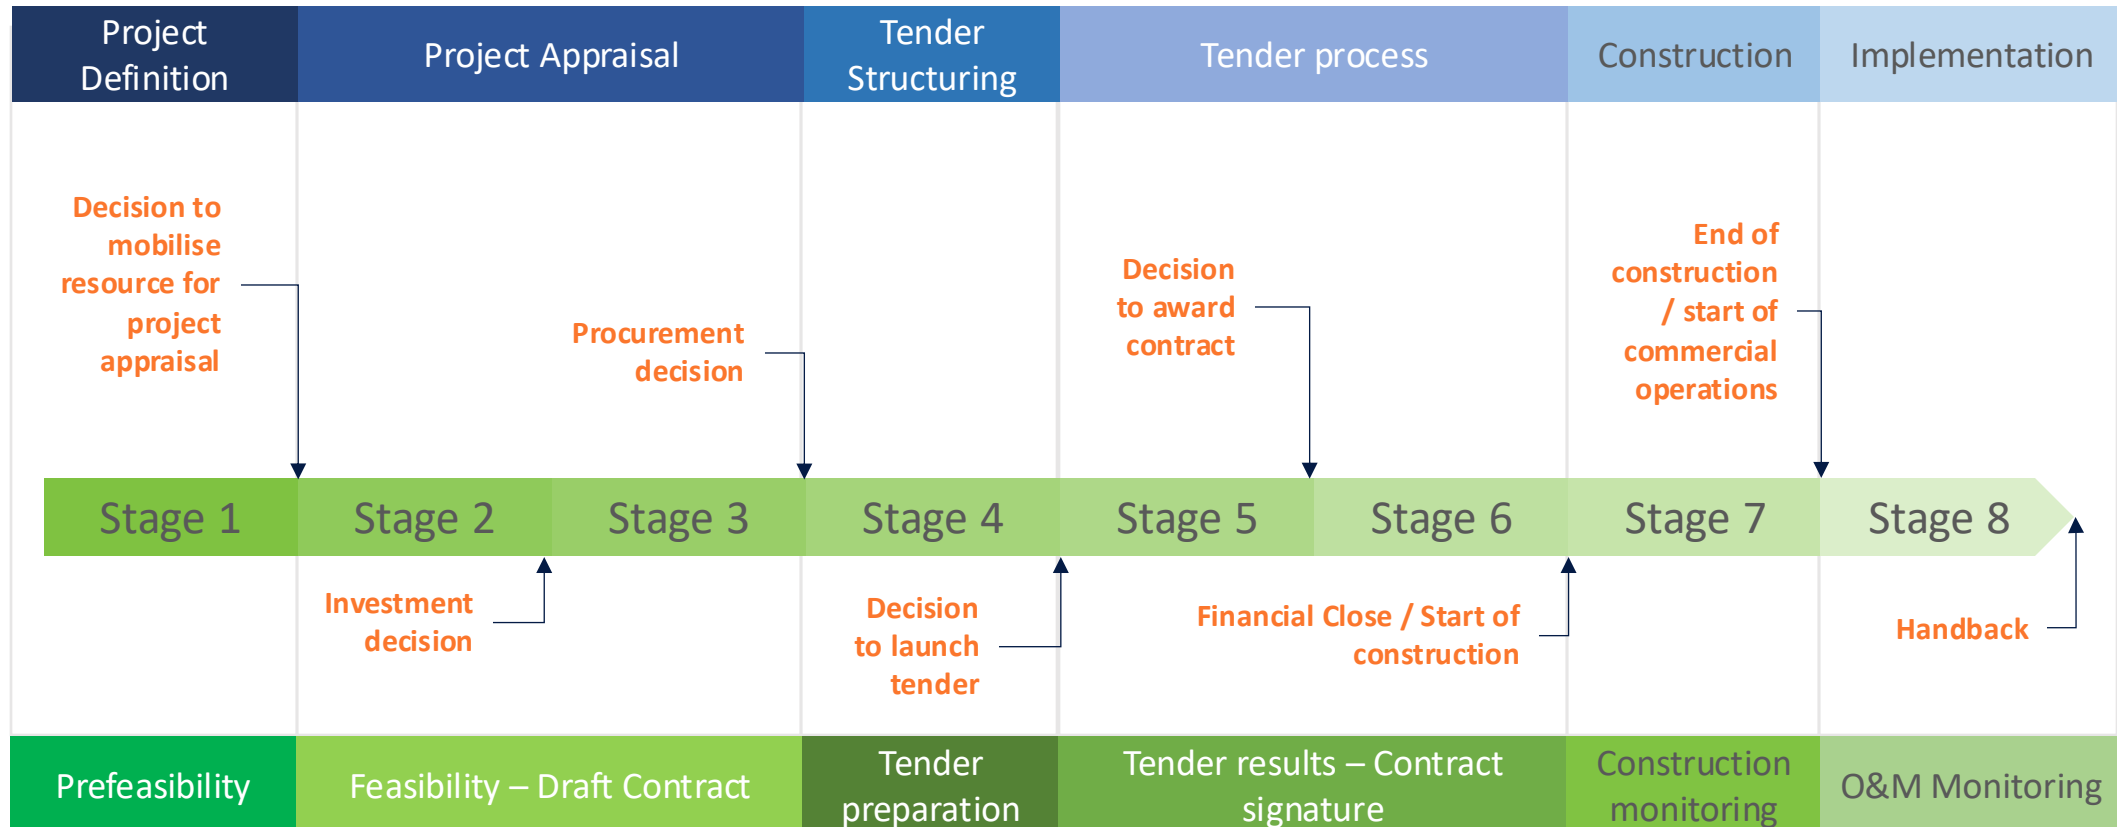

BRICS Infrastructure Investment Symposium

September, 2023, SOURCE was featured at the BRICS to showcase the use digital technologies to advance infrastructure pipeline development.

Standard Integration | Phased approach

SOURCE's Project Cycle

SOURCE covers all infrastructure sectors

ENERGY

- Battery Storage
- Biomass
- Dam
- Geothermal High Temp
- Geothermal Low Temp
- Geothermal Medium Temp
- Transmission Line
- Hydro Run-of-River
- Solar Array
- Wind Farm Offshore
- Wind Farm

TRANSPORT

- Airport
- Bridge
- Bus Rapid Transit
- Car Park
- Dry Port
- E-bus
- Highway
- Intercity Rail
- Light Rail Transit
- Mass Rapid Transit
- Metro
- River Ferry
- Road
- Seaport
- Tunnel

SOCIAL

- Hospital
- Housing
- Prison
- School
- Tourist Facility

URBAN SERVICES

- District cooling and heating network
- Energy Efficiency in Buildings
- Urban retrofitting
- Street Lighting

Other

WATER & WASTE

- Desalination
- Irrigation
- Solid Waste Facility
- Waste-Water Treatment
- Water Supply Infrastructure

International best practices in SOURCE

- G20 Quality Infrastructure Investment principles
- Inter-American Development Bank's Sustainable Infrastructure Criteria;
- Definition from IFC Performance Standards on ESG aspects;
- Paris Agreement climate aspects and NDCs;
- Project Readiness Assessment (PRA);
- APMG PPP Guide's gateway approach,
- World Bank PPPI Database and benchmarking reports;
- Knowledge products from OECD PPP Principles;
- Equator Principles;
- IMF P-FRAM tool;
- GIH PPP risk allocation matrix;
- World Bank's Guidance on PPP Contractual Provisions;
- UNEP FI Positive Finance

UNCITRAL recommendations embedded in SOURCE structuring stage

58. What measures have been identified to mitigate the possible risk of corruption during the tender process? ⓘ

- Adoption of codes of ethics for public officials, including conflict of interest policies
- Adoption of robust information confidentiality and data security practices
- Appointment of probity auditor or fairness advisor
- Establishment of clear and transparent lines of reporting and responsibility across public stakeholders
- Systematic due diligence on bidders to avoid direct and indirect conflicts of interest
- Disqualification of bidders identified as breaching the terms and conditions of the tender process
- Transparent system of review and evaluation of bidders
- Clear evaluation processes with checks and balances to prevent undue influence by individual(s)
- Implementation of a framework for whistleblowing
- Other

Additional Information

It is particularly important for the host country to take effective and concrete action to combat bribery and related illicit practices, in particular to pursue effective enforcement of existing laws prohibiting bribery. The enactment of laws that incorporate international agreements and standards on integrity in the conduct of public business may represent a significant step in that direction. In that respect, the only legally binding universal anticorruption instrument is the United Nations Convention against Corruption [...] which requires countries to establish criminal and other offences to cover a wide range of acts of corruption, notably bribery, if these are not already crimes under domestic law. [...] Furthermore, it is important that the rules covering the functioning of contracting authorities and the monitoring of public contracts ensure the required degree of transparency and integrity, permitting notably the publication of contract opportunities and awarded contracts, but also of the performance evaluation reports. Licenses and permits regulation may also be included in the list of information to be disclosed. Where such rules do not exist, appropriate legislation and regulations should be developed and adopted. Simplicity and consistency, coupled with the elimination of unnecessary procedures that prolong the administrative procedures or make them cumbersome, are additional elements to be taken into consideration in this context.
