YEARBOOK

Volume XLII: 2011

UNITED NATIONS  
New York, 2014

## NOTE

Symbols of United Nations documents are composed of capital letters combined with figures. Mention of such a symbol indicates a reference to a United Nations document.

The footnote numbering follows that used in the original documents on which this *Yearbook* is based. Any footnotes added subsequently are indicated by lower-case letters.

Changes of and additions to wording that appeared in earlier drafts of conventions, model laws and other legal texts are in italics, except in the case of headings to articles, which are in italics as a matter of style.

IV. LIST OF DOCUMENTS OF THE UNITED NATIONS COMMISSION ON INTERNATIONAL TRADE LAW REPRODUCED IN PREVIOUS VOLUMES OF THE <i>YEARBOOK</i> .....	1461

## INTRODUCTION

This is the forty-second volume in the series of *Yearbooks* of the United Nations Commission on International Trade Law (UNCITRAL).<sup>1</sup>

The present volume consists of three parts. Part one contains the Commission's report on the work of its forty-fourth session, which was held in Vienna, from 27 June - 8 July 2011, and the action thereon by the United Nations Conference on Trade and Development (UNCTAD) and by the General Assembly.

In part two, most of the documents considered at the forty-fourth session of the Commission are reproduced. These documents include reports of the Commission's Working Groups as well as studies, reports and notes by the Secretary-General and the Secretariat. Also included in this part are selected working papers that were prepared for the Working Groups.

Part three contains summary records, the bibliography of recent writings related to the Commission's work, a list of documents before the forty-fourth session and a list of documents relating to the work of the Commission reproduced in the previous volumes of the *Yearbook*.

## **I. Introduction**

1. The present report of the United Nations Commission on International Trade Law (UNCITRAL) covers the forty-fourth session of the Commission, held in Vienna from 27 June to 8 July 2011.
2. Pursuant to General Assembly resolution 2205 (XXI) of 17 December 1966, this report is submitted to the Assembly and is also submitted for comments to the United Nations Conference on Trade and Development.

## **II. Organization of the session**

### **A. Opening of the session**

3. The forty-fourth session of the Commission was opened on 27 June 2011.

### **B. Membership and attendance**

4. The General Assembly, in its resolution 2205 (XXI), established the Commission with a membership of 29 States, elected by the Assembly. By its resolution 3108 (XXVIII) of 12 December 1973, the Assembly increased the membership of the Commission from 29 to 36 States. By its resolution 57/20 of 19 November 2002, the Assembly further increased the membership of the Commission from 36 States to 60 States. The current members of the Commission, elected on 22 May 2007, on 3 November 2009 and on 15 April 2010, are the following States, whose term of office expires on the last day prior to the beginning of the annual session of the Commission in the year indicated:<sup>1</sup> Algeria (2016), Argentina (2016), Armenia (2013), Australia (2016), Austria (2016), Bahrain (2013), Benin (2013), Bolivia (Plurinational State of) (2013), Botswana (2016), Brazil (2016), Bulgaria (2013), Cameroon (2013), Canada (2013), Chile (2013), China (2013), Colombia (2016), Czech Republic (2013), Egypt (2013), El Salvador (2013), Fiji (2016), France (2013), Gabon (2016), Georgia (2015), Germany (2013), Greece (2013), Honduras (2013), India (2016), Iran (Islamic Republic of) (2016), Israel (2016), Italy (2016), Japan (2013), Jordan (2016), Kenya (2016), Latvia (2013), Malaysia (2013), Malta (2013), Mauritius (2016), Mexico (2013), Morocco (2013), Namibia (2013), Nigeria (2016), Norway (2013), Pakistan (2016), Paraguay (2016), Philippines (2016), Poland (2012), Republic of Korea (2013),

---

<sup>1</sup> Pursuant to General Assembly resolution 2205 (XXI), the members of the Commission are elected for a term of six years. Of the current membership, 30 were elected by the Assembly at its sixty-first session, on 22 May 2007 (decision 61/417), 28 were elected by the Assembly at its sixty-fourth session, on 3 November 2009 and two were elected by the Assembly at its sixty-fourth session, on 15 April 2010. By its resolution 31/99, the Assembly altered the dates of commencement and termination of membership by deciding that members would take office at the beginning of the first day of the regular annual session of the Commission immediately following their election and that their terms of office would expire on the last day prior to the opening of the seventh regular annual session following their election. The following six States members elected by the Assembly on 3 November 2009 agreed to alternate their membership among themselves until 2016 as follows: Belarus (2010-2011, 2013-2016), Czech Republic (2010-2013, 2015-2016), Poland (2010-2012, 2014-2016), Ukraine (2010-2014), Georgia (2011-2015) and Croatia (2012-2016).

Russian Federation (2013), Senegal (2013), Singapore (2013), South Africa (2013), Spain (2016), Sri Lanka (2013), Thailand (2016), Turkey (2016), Uganda (2016), Ukraine (2014), United Kingdom of Great Britain and Northern Ireland (2013), United States of America (2016) and Venezuela (Bolivarian Republic of) (2016).

5. With the exception of Armenia, Bahrain, Benin, Botswana, Fiji, Gabon, Georgia, Greece, Latvia, Malta, Morocco, Pakistan, Senegal, South Africa and Uganda, all the members of the Commission were represented at the session.

6. The session was attended by observers from the following States: Afghanistan, Angola, Belarus, Belgium, Costa Rica, Croatia, Cuba, Democratic Republic of the Congo, Dominican Republic, Ecuador, Finland, Guatemala, Indonesia, Iraq, Kuwait, Panama, Peru, Portugal, Qatar, San Marino, Saudi Arabia, Slovakia, Slovenia, Sweden, Switzerland, the former Yugoslav Republic of Macedonia, Uruguay and Yemen.

7. The session was also attended by observers from Palestine and the European Union.

8. The session was also attended by observers from the following international organizations:

(a) *United Nations system*: United Nations Conference on Trade and Development (UNCTAD), United Nations Economic Commission for Europe and the World Bank;

(b) *Intergovernmental organizations*: Asian-African Legal Consultative Organization, Inter-Parliamentary Assembly of the Eurasian Economic Community, International Development Law Organization, International Institute for the Unification of Private Law (Unidroit), Organization for Security and Cooperation in Europe (OSCE) and the World Customs Organization;

(c) *Invited non-governmental organizations*: Asociación Americana de Derecho Internacional Privado, Association droit et méditerranée (Jurimed), China International Economic and Trade Arbitration Commission, Comité Maritime International, European Company Lawyers Association, Forum for International Conciliation and Arbitration, International Air Transport Association, International Chamber of Commerce, International Credit Insurance and Surety Association, International Law Institute, Moot Alumni Association and New York State Bar Association.

9. The Commission welcomed the participation of international non-governmental organizations with expertise in the major items on the agenda. Their participation was crucial to the quality of texts formulated by the Commission, which requested the Secretariat to continue to invite such organizations to its sessions.

### C. Election of officers

10. The Commission elected the following officers:

*Chair:* Salim MOOLLAN (Mauritius)

*Vice-Chairs:* Marek JEZEWSKI (Poland)  
Carlos SÁNCHEZ MEJORADA Y VELASCO (Mexico)  
Tore WIWEN-NILSSON (Sweden) (elected in his personal capacity)

*Rapporteur:* Mr. Kah Wei CHONG (Singapore)

### D. Agenda

11. The agenda of the session, as adopted by the Commission at its 925th meeting, on 27 June 2011, was as follows:

1. Opening of the session.
2. Election of officers.
3. Adoption of the agenda.
4. Finalization and adoption of the UNCITRAL Model Law on Public Procurement.
5. Finalization and adoption of judicial materials on the UNCITRAL Model Law on Cross-Border Insolvency.
6. Arbitration and conciliation:
  - (a) Progress reports of Working Group II; and
  - (b) Mediation in the context of settlement of investor-State disputes.
7. Online dispute resolution: progress reports of Working Group III.
8. Insolvency law: progress report of Working Group V.
9. Security interests: progress reports of Working Group VI.
10. Current and possible future work in the area of electronic commerce.
11. Possible future work in the area of microfinance.
12. Endorsement of texts of other organizations: 2010 revision of the Uniform Rules for Demand Guarantees published by the International Chamber of Commerce.
13. Monitoring implementation of the New York Convention.
14. Technical assistance to law reform.
15. Promotion of ways and means of ensuring a uniform interpretation and application of UNCITRAL legal texts.
16. Status and promotion of UNCITRAL legal texts.

17. Coordination and cooperation:
  - (a) General;
  - (b) Coordination in the field of security interests;
  - (c) Reports of other international organizations;
  - (d) International governmental and non-governmental organizations invited to sessions of UNCITRAL and its Working Groups.
18. Role of UNCITRAL in promoting the rule of law at the national and international levels.
19. International commercial arbitration moot competitions.
20. Relevant General Assembly resolutions.
21. Other business.
22. Date and place of future meetings.
23. Adoption of the report of the Commission.

#### **E. Adoption of the report**

12. At its 941st and 942nd meetings, on 8 July 2011, the Commission adopted the present report by consensus.

### **III. Finalization and adoption of the UNCITRAL Model Law on Public Procurement**

#### **A. Introduction**

13. The Commission recalled its previous discussions on the UNCITRAL Model Law on Procurement of Goods, Construction and Services<sup>2</sup> of 1994 and its decision to entrust the drafting of proposals for revision of the 1994 Model Law to Working Group I (Procurement).<sup>3</sup> The Commission noted that the Working Group had begun its work on the revision at its sixth session, held in Vienna from 30 August to 3 September 2004, and completed its work at its nineteenth session, held in Vienna from 1 to 5 November 2010. At its twentieth session, held in New York from 14 to 18 March 2011, the Working Group had commenced work on the preparation of a revised Guide to Enactment.<sup>4</sup>

14. The Commission had before it at the current session: (a) the draft revised text of the Model Law on Public Procurement resulting from the nineteenth session of

<sup>3</sup> *Official Records of the General Assembly, Fifty-ninth Session, Supplement No. 17 (A/59/17)*, paras. 81 and 82.

<sup>4</sup> For the reports of the Working Group on the work of its sixth to twentieth sessions, see A/CN.9/568, A/CN.9/575, A/CN.9/590, A/CN.9/595, A/CN.9/615, A/CN.9/623, A/CN.9/640, A/CN.9/648, A/CN.9/664, A/CN.9/668, A/CN.9/672, A/CN.9/687, A/CN.9/690, A/CN.9/713 and A/CN.9/718, respectively.

the Working Group, with an accompanying note by the Secretariat (A/CN.9/729 and Add.1-8); (b) a compilation of comments from Governments on that draft Model Law received by the Secretariat before the forty-fourth session of the Commission (A/CN.9/730 and Add.1 and 2); (c) a working draft of the Guide to Enactment to accompany the draft Model Law (A/CN.9/731 and Add.1-9 and A/CN.9/WG.I/WP.77 and Add.1-9); and (d) the reports on the nineteenth and twentieth sessions of the Working Group (A/CN.9/713 and A/CN.9/718).

15. The Commission proceeded with the consideration of the draft Model Law. The Commission noted that the working draft of the Guide to Enactment was not to be considered during the session but was to be used only for reference to assist the Commission in consideration of the provisions of the draft Model Law. The Commission agreed to consider substantive issues first and drafting issues thereafter.

## **B. Consideration of the draft UNCITRAL Model Law on Public Procurement**

16. It was agreed that references throughout the Model Law to “the member of the public”, the “general public” and the like should be replaced with references to “any person”.

### **Preamble**

*Subparagraph (b): the phrase “regardless of nationality”*

17. Concern was expressed about the wording of the subparagraph in that it did not reflect the primary purpose of public procurement in many developing countries: to promote development of the domestic market and to encourage participation in the procurement proceedings of national suppliers or contractors. It was noted that the Guide explained the flexibility of the Model Law in that regard.

*Subparagraph (d): the term “equitable”*

18. It was proposed to change the term “equitable” to “equal”. It was explained that the term “equitable” encompassed the same concept as “fair”, which was already in the subparagraph and different in substance from the term “equal”. Concern was also expressed that the term “equitable” was open to different interpretations and possible misuse, such as favouritism, and that difficulties would be encountered in the enforcement of the concept of “equity” (from which the principle “equitable treatment” derived).

19. Opposition was expressed to changing the term as it appeared in the draft and in the 1994 text, in particular because the term “equitable” was considered to be more flexible and already encompassed the principle of “equal treatment”. Concern was also expressed that a greater number of challenges might ensue from suppliers or contractors claiming that they were treated unequally. Other delegations urged flexibility as regards the use of either term, on the condition that the Guide would explain that participants in procurement proceedings ought to be treated equally in identical situations but might be treated differently in different circumstances.

20. The Commission agreed to refer in the subparagraph to “fair, equal and equitable treatment” of all suppliers and contractors and explain in the Guide the meaning of that phrase.

## **Chapter I. General provisions**

### *Article 2*

21. The understanding was that all definitions in the article would be listed in alphabetical order in all language versions of the final text.

22. It was agreed that the beginning of definition (e) should read “‘framework agreement procedure’ means a procedure”.

23. It was further agreed that the article should contain new definitions of “pre-qualification” and “pre-selection”, which would read as follows: “‘Pre-qualification’ means the procedure set out in article 17 to identify, prior to solicitation, suppliers or contractors that are qualified;” and “‘Pre-selection’ means the procedure set out in article 48 (3) to identify, prior to solicitation, a limited number of suppliers or contractors that best meet the qualification criteria for the procurement concerned.”

24. It was proposed and agreed to delete the words in parentheses (“the ‘subject matter of the procurement’”) in definition (h). While the broadly held view was that there should be a definition of the subject matter of the procurement, which should be drafted so as to allow the appropriate use of the term throughout the Model Law, views varied on the wording. The proposal was made that such a definition should draw on article 36, subparagraph (b), with the addition of the words “if appropriate” after the word “including”.

25. The alternative view was expressed that no such definition should be included, since the term was to be defined in each procurement, not in the law. It was believed that the subject matter of a procurement was a question of fact which could not easily fall under a generic definition and that it was therefore better to leave such a definition open and to include the discussion on that subject in the Guide.

26. The Commission deferred its decision on the proposal to a later stage.

27. After subsequent discussion, it was agreed that no definition of the subject matter of the procurement should be included in the Model Law. It was understood that the Guide would explain the term “subject matter of the procurement” used throughout the Model Law, including by drawing on provisions of article 36, subparagraph (b), or by stating that the “subject matter of the procurement” was what the procuring entity described as such at the outset of the procurement proceedings.

28. The Commission agreed that definition (o), “solicitation”, should be expanded to refer to an invitation to tender, present submissions or participate in request-for-proposals proceedings or an electronic reverse auction but should not cover invitations for pre-qualification or for pre-selection.

### *Article 5, paragraph 1*

29. The Commission agreed to delete the following words: “Except as provided for in paragraph (2) of this article, the text of”. It was the understanding that the

Guide would clarify that paragraph 1 dealt with legal texts that did not encompass any internal documents (not being of general application) or case law (being covered by paragraph 2 of the article).

*Article 8, paragraph 4*

30. A query was raised as to whether the phrase “reasons and circumstances” referred to factual and legal justifications for the decision of the procuring entity. The discussion of that term in the Working Group was recalled, and it was noted that the decision of the Working Group to use that term should not be reopened.

31. It was agreed that the current wording would be retained, with the Guide explaining that in some jurisdictions the procuring entity would need to substantiate the reasons and circumstances with legal justifications, which would be reflected in relevant domestic enactments as necessary.

*Article 9, paragraphs 2 (f) and 8 (a)*

32. It was agreed that consistency between paragraphs 2 (f) and 8 (a) as regards references to “false statements” and “misrepresentations” should be ensured. It was agreed to add a reference to “misrepresentation” in paragraph 8 (a).

*Article 9, paragraph 8 (b)*

33. Views differed on whether the phrase “may disqualify” should be replaced with “shall disqualify”. One view was that the procuring entity ought to be required to disqualify suppliers or contractors if they presented materially inaccurate or materially incomplete information; the other view was that such flexibility should be preserved, in particular to allow for clarifying whether an error or omission was deliberate or a simple mistake. Concerns were raised about the negative impact of automatic disqualification on competition and an increased number of challenges if the proposed change was introduced.

34. The Commission agreed that the term “materially inaccurate or materially incomplete” should be clarified in all language versions and the concept explained in the Guide. The need for a clarification procedure in the context of ascertainment of the qualifications of suppliers or contractors (similar to the one that existed in the context of abnormally low submissions under article 19 and in tendering proceedings under article 42 was considered in that context. (For further consideration of this issue, see paras. 48-53 below.)

35. Accordingly, the Commission agreed to retain the wording of article 9, paragraph 8 (b).

*Article 10*

36. It was agreed that paragraph 1 should be redrafted as follows: “(a) The pre-qualification or pre-selection documents, if any, shall set out a description of the subject matter of the procurement; (b) The procuring entity shall set out in the solicitation documents the detailed description of the subject matter of the procurement that it will use in the examination of submissions, including the minimum requirements that submissions must meet in order to be considered responsive and the manner in which those minimum requirements are to be

applied.” It was proposed that the Guide would highlight that paragraphs 1 (a) and 2 (a) of article 29 catered for situations in which there was no such detailed description.

37. It was further agreed to make the following changes: in paragraph 3 the words “including concerning” should be deleted, and paragraph 3 should read as follows: “(3) The description of the subject matter of the procurement may include, inter alia, specifications, plans, drawings, designs, requirements, testing and test methods, packaging, marking or labelling or conformity certification, and symbols and terminology.”; the beginning of paragraph 4 should read “To the extent practicable, the description of the subject matter”; and the phrase “the relevant technical, quality and performance characteristics” should be used in paragraph 4 and elsewhere in the text of the Model Law as appropriate.

38. It was proposed that the second sentence in paragraph 4 should also prohibit the use of “specific production methods” in descriptions, so as to avoid the use of discriminatory requirements for prescribed methods in order to favour certain suppliers.

39. Views varied as regards the proposal. It was suggested that, if the reference to “specific production methods” were included, the accompanying Guide text should state as follows: “With regard to specified production methods, and with due regard to paragraph (5), which calls for standardized technical requirements, in some cases there may be no equivalent production methods and the solicitation may so note.”

40. The proposal was subsequently withdrawn. It was noted in particular that the original wording as appeared in the draft and in the 1994 text was traced back to the wording of equivalent provisions of the 1994 Agreement on Government Procurement of the World Trade Organization (WTO)<sup>5</sup> and that in some procurement methods specification of the production method was essential for ensuring quality.

41. The Commission agreed that the Guide text would discuss the risks of discrimination where specific production methods were mentioned by drawing attention to the prohibition against discriminatory treatment in paragraph 2 of article 10.

#### *Article 11*

42. It was proposed that the phrase in paragraph 3 “and expressed in monetary terms” should be replaced with “and/or expressed in monetary terms”, since it would not always be possible to express all evaluation criteria in monetary terms. The understanding of some delegations was that the words “to the extent practicable”, if applied to all three requirements in the provision (that the evaluation criteria must be objective, quantifiable and expressed in monetary terms), would achieve the same result as the proposed redraft. Concern was expressed, however, that such a caveat should not apply to evaluation criteria in electronic reverse auctions where it was required that all evaluation criteria should be quantifiable and expressed in monetary terms for such auctions to be held. (The relevant provision

---

<sup>5</sup> Agreement on Government Procurement, article VI, para. 3; available from [www.wto.org/english/tratop\\_e/gproc\\_e/gp\\_gpa\\_e.htm](http://www.wto.org/english/tratop_e/gproc_e/gp_gpa_e.htm).

requiring a formula in electronic reverse auctions would be explained in the Guide.) The Commission deferred its decision on the wording of the article to a later stage.

43. After subsequent discussion, it was agreed that: paragraph 2 chapeau and subparagraph (a) should read as follows: “The evaluation criteria relating to the subject matter of the procurement may include: (a) Price”; paragraph 3 should be redrafted as follows: “To the extent practicable, all non-price evaluation criteria shall be objective, quantifiable and expressed in monetary terms,” with the Guide explaining that the expression “in monetary terms” would not be applicable to all cases; in paragraph 4 (b), after the words “domestically produced goods,” the words “or any other preference” should be added; paragraph 5 (b) should be redrafted as follows: “All evaluation criteria established pursuant to this article, including price as modified by any preference;” and paragraph 5 (c) should be redrafted as follows: “The relative weights of all evaluation criteria, except where the procurement is conducted under article 48, in which case the procuring entity may list all evaluation criteria in descending order of importance.”

#### *Article 13*

44. It was agreed that the wording of the article should not change but that the Guide should discuss the options in the text regarding the languages to be used in the pre-qualification, pre-selection and solicitation documents.

#### *Article 14*

45. It was agreed to add in paragraph 1 the word “in” before the words “the pre-qualification or pre-selection documents”.

46. It was understood that any changes made to the solicitation, pre-qualification or pre-selection documents in accordance with article 14 would be material and therefore covered by paragraph 3 of article 15; the link between the provisions would be highlighted in the Guide.

#### *Article 15, paragraph 1*

47. It was agreed to replace the phrase “such time as will” with the phrase “a time period that will” in the third sentence.

#### *New article 15 bis on clarification of qualification information and of submissions*

48. The attention of the Commission was drawn to the provisions in document A/CN.9/730 on clarification of qualification data and submissions. The Commission considered whether a generic article on clarification of qualification data and submissions should be added in chapter I of the Model Law or whether the subject should be dealt with in all relevant articles. While some delegations preferred the former approach, others preferred the latter, in particular because it allowed adapting provisions on clarification to suit the various procedures, taking into account, in particular, points of time when the need to request clarification might arise.

49. In discussion of articles 45 and 46, the point was made that any provisions providing for the right of the procuring entity to seek clarification should be coupled with a prohibition against entering into negotiations during such clarification

procedures. It was noted that such a prohibition would be in addition to the prohibition of negotiations included in the context of some methods of procurement, such as under article 45.

50. It was also pointed out that certain paragraphs of article 46 illustrated the varying points of time in request-for-proposals-without-negotiation proceedings at which the procuring entity might wish to ask for clarification. It was noted that the generic article on clarification of qualification data and submissions should take into account that such points of time would vary depending on procurement methods and when qualifications were assessed.

51. It was subsequently agreed that paragraph 1 of article 42 should be used as a basis for drafting a generic article on clarification of qualification data and submissions to be included in chapter I. It was also agreed that that generic article would in addition reflect: (a) that the procedure involved a clarification procedure, and not negotiations; and (b) that a complete record of the exchange of all information during the clarification procedure ought to be included in the record of the procurement proceedings under article 24. The Commission agreed to consider the draft provision at a later stage.

52. Later in the session, it was agreed to include the following new article in the Model Law:

**“Article 15 bis. Clarification of qualification information and of submissions**

1. At any stage of the procurement proceedings, the procuring entity may ask a supplier or contractor for clarifications of its qualification information or of its submission, in order to assist in the ascertainment of qualifications or the examination and evaluation of submissions.
2. The procuring entity shall correct purely arithmetical errors that are discovered during the examination of submissions. The procuring entity shall give prompt notice of any such correction to the supplier or contractor that presented the submission concerned.
3. No substantive change to qualifications information, and no substantive change to a submission (including changes aimed at making an unqualified supplier or contractor qualified or an unresponsive submission responsive), shall be sought, offered or permitted.
4. No negotiations shall take place between the procuring entity and a supplier or contractor with respect to qualification information or submissions, nor shall any change in price be made, pursuant to a clarification that is sought under this article.
5. Paragraph (4) of this article shall not apply to proposals submitted under article 48, 49, 50 or 51.
6. All communications generated under this article shall be included in the record of the procurement proceedings.”

53. It was understood that the Guide should elaborate on the difference between a change in price and a correction of the price.

*Article 16, paragraph 1 (c)*

54. The need for subparagraph (ii) was questioned given the similar wording in paragraph 1 (b). The Commission deferred the consideration of the wording of paragraph 1 (c) to a later stage.

55. After subsequent discussion, it was agreed to delete subparagraph (ii) and merge subparagraph (i) with the chapeau provisions of subparagraph (c).

*Article 17, paragraph 2*

56. It was proposed that the procurement regulations, not the Law, should identify a publication in which an invitation to pre-qualify should be published. The Commission agreed with the proposed wording to that end in document A/CN.9/730. The understanding was that the same change would be made throughout the Model Law to equivalent provisions.

57. Reflecting that agreement, as well as the agreement reached at the session as regards the revisions to be made in paragraph 2 of article 32 of the draft (see paras. 92-99 below), the Commission agreed to revise paragraph 2 as follows: “(2) If the procuring entity engages in pre-qualification proceedings, it shall cause an invitation to pre-qualify to be published in the publication identified in the procurement regulations. Unless decided otherwise by the procuring entity in the circumstances referred to in article 32 (4) of this Law, the invitation to pre-qualify shall also be published internationally, so as to be widely accessible to international suppliers or contractors.”

*Article 17, paragraph 3 (b)*

58. The Commission deferred the consideration of a proposal to replace the word “timetable” with the phrase “envisaged or indicative timetable”. The view was expressed that the wording already allowed for sufficient flexibility.

59. After subsequent discussion, it was agreed to replace the phrase “as the desired or required time for the supply of the goods or for the completion of the construction, or the timetable for the provision of the services” with the phrase “as the desired or required time for the supply of the goods, for the completion of the construction, or for the provision of the services;”.

*Article 19, paragraphs 1 (c) and 2*

60. It was agreed that subparagraph (c) should be deleted and the following wording should replace paragraph 2: “The decision of the procuring entity to reject a submission in accordance with this article and the reasons for that decision, and all communications with the supplier or contractor under this article shall be included in the record of the procurement proceedings. The decision of the procuring entity and the reasons therefor shall be promptly communicated to the supplier or contractor concerned.” It was the understanding that, as a consequence, changes would be introduced in paragraph 1 as follows: “and” would be added after subparagraph (a), and “and” after subparagraph (b) would be deleted.

*Article 20*

61. Regarding a comment in document A/CN.9/730/Add.1, the prevailing view was that no *de minimis* threshold should be introduced in paragraph 1, in order to be consistent with international anti-corruption regulations that linked, as did paragraph 1 of the draft, the relevant act of the supplier or contractor to its intention to influence an act or decision of the procuring entity. The understanding was that the Guide would explain the relevant issues, with reference to national provisions and practices, and should indicate that even small items could constitute inducements in some circumstances.

62. Regarding another comment in document A/CN.9/730/Add.1, it was agreed that no additional language to clarify the notion of “unfair competitive advantage” in paragraph 1 (b) should be added. Support was expressed for the current approach in the draft Guide encouraging enacting States to consider the issue in the light of the prevailing circumstances (and the use of examples was suggested, such as that a supplier or contractor that had drafted a description should not be permitted to participate because it would have such an unfair advantage, an example also referred to in the 1994 WTO Agreement on Government Procurement. The importance of considering competition issues not only in the context of a particular procurement proceeding but also in the light of the competition policies of States at a macroeconomic level was highlighted.

*Article 21, paragraph 2 (c)*

63. The Commission agreed that the duration of the standstill period was to be established by the procuring entity in the solicitation documents and in accordance with the requirements of the procurement regulations. It was the understanding that the procurement regulations might fix different minimums for different types of procurement and that the Model Law would require the procurement regulations to address the standstill period(s).

*Article 21, paragraph 3 (b)*

64. It was agreed that the paragraph should be replaced with the following wording: “Where the contract price is less than the threshold amount set out in the procurement regulations; or”. It was noted that that change would make the wording consistent with the drafting of the relevant part of paragraph 2 of article 28.

*Article 21, paragraph 7*

65. The proposal was made to include at the end of the last sentence the phrase “unless the extension has been granted to the procuring entity by suppliers or contractors that presented submissions and the entities that provided the tender security.” The Commission noted the related provisions in article 40 of the draft and deferred its decision on the drafting to a later stage.

66. After subsequent discussion, it was ultimately agreed that the following provision (or its equivalent) should be introduced: “unless extended under article 40 (2)”.

*Article 22, paragraph 2*

67. The Commission recalled its decision as regards article paragraph 3 (b) of article 21 (see para. 64 above) and agreed that a similar change would be made in paragraph 2 of article 22.

*Article 23, paragraph 3*

68. Concern was expressed about the reference to solicitation documents in the second sentence of the paragraph. Requiring suppliers or contractor to grant blanket ex ante consent to disclose confidential information during the procurement proceedings was considered to facilitate manipulation by the procuring entity. The Commission agreed to delete the phrase “or permitted in the solicitation documents” and to explain in the Guide that requiring consent to disclose such information should be carefully considered in the light of the potentially anti-competitive effect of doing so.

69. A question was also raised about the intended scope of the second sentence, and it was agreed to revise the draft to make it clear that the provisions applied only in the context of the procurement methods referred to in the first sentence.

70. After subsequent discussion, it was agreed that the paragraph should read as follows: “Any discussions, communications, negotiations and dialogue between the procuring entity and a supplier or contractor pursuant to paragraph 3 of article 47 and to articles 48 to 50 of this Law shall be confidential. Unless required by law or ordered by the [*name of the court or courts*] or the [*name of the relevant organ designated by the enacting State*], no party to any such discussions, communications, negotiations or dialogue shall disclose to any other person any technical, price or other information relating to these discussions, communications, negotiations or dialogue without the consent of the other party.”

*Article 24*

71. It was proposed to add in the first sentence of paragraph 3 after the words “on request” the words “unless such information has not arisen in the procurement proceedings”, with the explanation in the Guide that certain information listed in paragraph 1 of the article would not be available in all procurement proceedings, e.g., if they were cancelled. After discussion, it was decided that this proposal would not be retained.

72. The Commission considered the extent of disclosure of information listed in paragraph 1 (s) and 1 (t) and under paragraphs 3 and 4 (b) of the article and recalled that the aim was to provide for a general principle of transparency, which should be modified only to the extent necessary to prevent future collusion or other risks to competition. The Commission agreed to revise the provisions to ensure an appropriate balance and to consider the drafting at a later stage.

73. In further discussion, the Commission heard proposals to retain paragraph 1 (s) as drafted, to insert the phrase “for each submission” at the beginning of that paragraph and delete the words “of each submission” at the end, and to remove the reference to “the basis for determining the price” from the text.

74. It was subsequently suggested that reference to “the basis for determining the price” might be listed separately under paragraph 1. The importance of retaining

such a reference in paragraph 1 was emphasized in the light of the explanations in the 1994 “Guide to Enactment of UNCITRAL Model Law on Procurement of Goods, Construction and Services”<sup>6</sup> regarding that provision and the importance of such information for the procuring entity, for example in investigating abnormally low submissions. It was further emphasized that this type of information was always commercially sensitive and therefore should not be accessible to competitors.

75. Subject to any further drafting changes to paragraph 1 (s), it was agreed that reference to paragraph 1 (s) would be retained in paragraph 3.

76. Views varied as regards the need to refer in paragraph 3 to cancellation of the procurement. The Commission decided to delete that reference. It was understood that, in the case of cancellation of the procurement, suppliers or contractors would not have an automatic right but rather would need to seek a court order to access the part of the record specified in paragraph 3.

77. After deliberation, the Commission decided to retain paragraph 4 unchanged, noting that it provided essential safeguards against improper disclosure of information contained in the record. Concern was nevertheless expressed about the reference to submission prices in paragraph 4 (b), which, it was suggested, should be reconsidered, taking into account the differences among various procurement methods, some of which, such as tendering, involved the disclosure of tender prices to all suppliers or contractors that submitted tenders. The Commission agreed to consider that point later in the session.

78. After subsequent discussion, it was agreed that the phrase in paragraph 1 (r) “the written procurement contract” should read “a written procurement contract”, that the words “or the basis for determining the price” in paragraph 1 (s) should be deleted and that the words in paragraph 4 (b) “and submission prices” should be deleted.

79. It was proposed that paragraph 3 should read as follows: “Except as disclosed pursuant to article 41 (3) of this Law, the portion of the record referred to in subparagraphs (p) to (t) shall, on request, be made available to suppliers or contractors that presented submissions after the decision on acceptance of the successful submission of the procurement has become known to them, unless the procuring entity determines that disclosure of such information would impede fair competition. Disclosure of the portion of the record referred to in subparagraphs (s) and (t) may be ordered at an earlier stage only by the [*name of the court or courts*] or [*name of the relevant organ designated by the enacting State*].”

80. The inclusion of the words “of the procurement” in the proposal was questioned. It was also suggested that it would be advisable to add a reference to paragraph 1 after the reference to subparagraphs (p) to (t). The need for the phrase “unless the procuring entity determines that disclosure of such information would impede fair competition” was queried in the light of the content of paragraph 4 (a) of the article. The Commission deferred its decision on the proposal to a later stage.

---

<sup>6</sup> For the text of the Guide, see document A/CN.9/403, which was reproduced in the *Yearbook of the United Nations Commission on International Trade Law*, vol. XXV: 1994 (United Nations publication, Sales No. E.95.V.20), part three, annex II. The Guide is available in electronic form from the UNCITRAL website at [www.uncitral.org/pdf/english/texts/procurem/ml-procurement/ml-procure.pdf](http://www.uncitral.org/pdf/english/texts/procurem/ml-procurement/ml-procure.pdf).

81. After subsequent discussion, the Commission agreed to replace paragraph 3 with the following wording: “Subject to paragraph (4) of this article, or except as disclosed pursuant to article 41 (3) of this Law, the portion of the record referred to in subparagraphs (p) to (t) of paragraph (1) of this article shall, after the decision on acceptance of the successful submission has become known to them, be made available, on request, to suppliers or contractors that presented submissions.”

82. It was agreed to reflect in the Guide the content of the deleted sentence of paragraph 3 as contained in document A/CN.9/729/Add.2 and that the procuring entity should notify suppliers or contractors of the disclosure of information from the record relevant to them.

#### *Article 25*

83. Concern was expressed about the scope of the article, which dealt only with the conduct of the procuring entity and not with the conduct of suppliers and contractors and was therefore considered to be too narrow. In the light of developments in the regulation of those issues at the national, regional and international levels, it was said to be essential for UNCITRAL to undertake work in that area so that the article could be supplemented by pertinent materials of UNCITRAL on that subject. The Commission agreed to consider the issue at a future session in the context of its consideration of future work of UNCITRAL in the area of public procurement.

### **Chapter II. Methods of procurement and their conditions for use. Solicitation and notices of the procurement**

#### *Article 26*

84. In response to a query as to whether open framework agreements should be listed as a separate procurement method in paragraph 1 of the article, the Commission decided to retain the article unchanged.

#### *Article 29, paragraph 1 (a)*

85. It was proposed that the provision should read: “It is not feasible for the procuring entity to formulate a detailed description of the subject matter of the procurement in accordance with article 10 of this Law, and the procuring entity assesses that discussions with suppliers or contractors are needed to refine aspects of the description of the subject matter of the procurement and to formulate them with the precision required under article 10 of this Law and in order to allow the procuring entity to obtain the most satisfactory solution to its procurement needs.” Concern was expressed about the wording, since it did not fully reflect the conditions for use of two-stage tendering (in which a detailed description of the subject matter of the procurement might be provided at the outset of the procurement proceedings). The need for alignment of the text with paragraphs 2 and 3 of article 47 was highlighted. The Commission deferred a decision on the proposal to a later stage.

86. In subsequent discussion, it was agreed that the provision as drafted in document A/CN.9/729/Add.3 should be retained with a small drafting change: “The procuring entity assesses that discussions with suppliers or contractors are needed to refine aspects of the description of the subject matter of the procurement and to

formulate them with the detail required under article 10 of this Law, and in order to allow the procuring entity to obtain the most satisfactory solution to its procurement needs.”

*Article 29, paragraph 2 (c)*

87. A query was raised as regards the interaction of paragraph 3 of article 27 and paragraph 2 (c) of article 29. The understanding was that referring only to national security would not be sufficient to fulfil the requirement of paragraph 3 of article 27 in such cases and that more explanation of the reasons and circumstances would be required in the record.

*Article 30, paragraph 1 (a)*

88. The Commission agreed to delete the words “and precise” from the paragraph, as article 10 as amended at the current session (see para. 36 above) referred only to a “detailed” and not to a “precise” description of the subject matter of the procurement.

*Article 31, paragraph 1 (a)*

89. It was suggested that the phrase “on an indefinite basis” should be replaced with the phrase “on an indefinite or repeated basis” or alternatively that the Guide should explain that the term “indefinite” encompassed the concept of repeated purchases. The alternative view was that a resort to framework agreements would always be justified in cases of indefinite demands, which might not necessarily arise on a repeated basis.

90. The Commission agreed to replace the phrase “on an indefinite basis” with the phrase “on an indefinite or repeated basis.” It was also noted that the Guide would include a comment to the effect that indefinite needs would include circumstances in which the framework agreement was used to ensure security of supply.

*Article 32, paragraph 1, and article 33, paragraph 5*

91. The Commission recalled its decision in paragraph 57 above as regards paragraph 2 of article 17 and confirmed its understanding that it would also apply to paragraph 1 of article 32 and paragraph 5 of article 33.

*Article 32, paragraph 2*

92. Concern was expressed about the requirement in the paragraph to publish the invitation in a language customarily used in international trade, as that requirement would impose an unreasonable translation burden on developing countries (whose local languages were not customarily used in international trade). The point was made that the 1994 WTO Agreement on Government Procurement imposed the equivalent requirement only as regards publication of summary information about the procurement and not the solicitation documents. It was clarified that the provisions in the draft referred to the invitation rather than the solicitation documents.

93. The Commission agreed with the proposals that references to the language and any media (such as a newspaper or journal) should be removed from the provision

and that it should instead focus on the goal to be achieved: publication internationally so as to be accessible to international suppliers or contractors. The Commission deferred its consideration of revised wording to a later stage.

94. A representative of a multilateral development bank expressed concern about the proposed changes since they might result in provisions that would be inconsistent with the relevant requirements of the multilateral development banks.

95. After subsequent discussion, the Commission agreed that paragraph 2 should be replaced with the following wording: “The invitation shall also be published internationally, so as to be widely accessible to international suppliers or contractors.”

96. Concern was expressed by the observers from a multilateral development bank and a development assistance organization about the change made to paragraph 2 of article 32 and paragraph 2 of article 17 regarding the language of publication, since the resulting wording, it was said, did not promote the participation of suppliers or contractors regardless of nationality, which was one of the objectives of the Model Law as stated in its preambular subparagraph (b). It was proposed that, if the new wording were to be retained, the Guide should clearly state why the changes were made.

97. The alternate view was expressed that the previous wording implied the use of the English language, which would not be appropriate, and that the revised wording reflected modern practices, such as the use of Internet-based communications.

98. To address the concerns of the observers, it was agreed that the Guide would explain that the revised text was technologically neutral (whereas the previous wording implied the use of paper-based media, by referring to a newspaper or a journal of wide international circulation) and was intended to accommodate modern methods of publication. It was also agreed that the Guide would describe the different ways in which the requirements for international publication could be fulfilled, in particular for those jurisdictions in which electronic publication was not possible, which would include the methods specified in the 1994 text.

99. The Commission agreed that the Guide should: (a) note that the provision would require that the publication be in a language that would in fact make it accessible to all potential suppliers or contractors in the context of the procurement concerned; and (b) alert enacting States that in WTO the provisions on the language of publication of procurement-related information (article XVII of the 1994 Agreement on Government Procurement) were considered to be an important safeguard with respect to achieving transparency and competition.

#### *Article 32, paragraph 4*

100. It was proposed that the words “in view of the low value” should be deleted. Objection was raised to the proposal on the basis that the resulting wording would allow unrestricted use of domestic procurement by the procuring entity. The alternative view was expressed that the provision should be redrafted to reflect that the costs of international publication (e.g. translation) would be disproportionate to the value of the procurement and that this was the reason to allow the procuring entity not to publish internationally.

101. Concern was expressed about the proposed changes. It was recalled that international and regional regulations usually referred to a certain threshold value below which the procurement was considered to be of no interest to international suppliers or contractors.

102. The Commission discussed whether to delete the reference to “low” in the provision to avoid confusion with other provisions of the Model Law that referred to a low value threshold but agreed to retain the current wording, noting that the provision would be explained in the Guide.

*Article 33, paragraph 6*

103. A query was raised as to whether a reference to paragraph 4 (a) of article 29 should be added to the provision. The discussion of that issue in the Working Group was recalled, in particular that the intention of the Working Group had been to exclude references to simple urgency in order to avoid abusive use of competitive negotiations and single-source procurement. It was proposed that, to avoid confusion, the word “urgency” should be replaced with the phrase “catastrophic events”.

104. After discussion, the Commission agreed to add a reference to paragraph 4 (a) of article 29 in the provision.

**Chapter III. Open tendering**

*Article 36, paragraph (c)*

105. It was suggested that the provision should begin with the wording “A summary of”.

106. The Commission agreed that the provision should read as follows: “A summary of the criteria and procedures to be used for ascertaining the qualifications of suppliers or contractors, and of any documentary evidence or other information that must be submitted by suppliers or contractors to demonstrate their qualifications, in conformity with article 9 of this Law.”

*Article 41, paragraph 2*

107. The Commission agreed to replace paragraph 2 with the following wording: “All suppliers or contractors that have presented tenders, or their representatives, shall be permitted by the procuring entity to participate in the opening of tenders.” It was the understanding that the Guide would explain that the participation could be physical or virtual, and that both were covered by the provision, consistent with the technologically neutral approach to revising the Model Law.

*Article 42*

108. As a consequence of introducing new article 15 bis (see para. 52 above), the Commission agreed to delete paragraph 1 of article 42, to renumber subsequent paragraphs and to amend cross-references in article 42, including by inserting a cross-reference to the new article in what would become paragraph 2 (b).

**Chapter IV. Procedures for restricted tendering, request for quotations and request for proposals without negotiation***Article 46, paragraph 2 (b)*

109. The Commission agreed that the provision should begin with the words “A detailed description”.

*Article 46, paragraph 4 (d), and article 48, paragraph 5 (d)*

110. The Commission agreed to replace in those paragraphs and in similar instances throughout the Model Law the phrase “formulated or expressed” with the phrase “formulated and expressed”.

**Chapter V. Procedures for two-stage tendering, request for proposals with dialogue, request for proposals with consecutive negotiations, competitive negotiations and single-source procurement***Article 47, paragraph 4 (b)*

111. The Commission agreed that the provision should prohibit the procuring entity from modifying the subject matter of the procurement, drawing on the same prohibition found in paragraph 9 of article 48. It was agreed that the Guide would explain what would be considered to be a modification of the subject matter of the procurement.

112. Accordingly, the Commission agreed to revise the provision as follows:

“(b) In revising the relevant terms and conditions of the procurement, the procuring entity may not modify the subject matter of the procurement but may refine aspects of the description of the subject matter of the procurement by:

- (i) Deleting or modifying any aspect of the technical or quality characteristics of the subject matter of the procurement initially provided and by adding any new characteristics that conform to the requirements of this Law;
- (ii) Deleting or modifying any criterion for examining or evaluating tenders initially provided, and by adding any new criterion that conforms to the requirements of this Law, to the extent only that the deletion, modification or addition is required as a result of changes made in the technical or quality characteristics of the subject matter of the procurement.”

*Article 47, paragraph 4 (e)*

113. The Commission agreed to update the cross-reference to paragraph 4 (b) of article 42 in the light of the revisions agreed to be made in article 42 (see para. 108 above).

## Chapter VI. Electronic reverse auctions

### *Articles 52 and 53, titles*

114. The Commission agreed that the title of article 52 should read “Electronic reverse auction as a stand-alone method of procurement” and the title of article 53 should read “Electronic reverse auction as a phase preceding the award of the procurement contract”.

### *Article 52, paragraph 1 (c)*

115. A query was raised as regards the reference to the “contract form, if any, to be signed by the parties”. Objection was expressed to deleting the reference in the provision and in other relevant provisions, which were considered essential for transparency reasons; references to the terms and conditions of the procurement contract were not considered sufficient.

116. The Commission agreed to retain the current wording, with the Guide clarifying that it was not contemplated that any contract was to be signed at the outset of procurement proceedings.

### *Article 52, paragraphs 1 (k) and 2*

117. It was agreed that paragraph 1 (k) of article 52 should read: “[k] If any limitation on the number of suppliers or contractors that can be registered for the auction is imposed in accordance with paragraph (2) of this article, the relevant maximum number and the criteria and procedure, in conformity with paragraph (2) of this article, that will be followed in selecting it;]”.

118. It was agreed that the following words should be added at the end of the first sentence of paragraph 2 of article 52: “and shall select the suppliers or contractors to be so registered in a non-discriminatory manner.”

### *Article 52, footnote*

119. It was proposed that paragraph 2 should be accompanied by the same footnote that accompanied paragraph 1 (k). The alternative view was that the footnote should be deleted on the understanding that all provisions of the Model Law were optional for enactment by States. Support was expressed for the latter proposal, as well as for the deletion of other footnotes in the text of the Model Law.

120. The view was expressed that, if the footnote were to be deleted, the provisions of paragraphs 1 (k) and 2 should also be deleted and perhaps placed in the Guide.

121. The Commission decided to retain the text of both paragraphs 1 (k) and 2 in brackets without any accompanying footnotes, but to include an explanation in the Guide of why the provisions appeared in brackets.

122. A general objection was raised to that approach, as well as to putting any text in the Model Law in square brackets or parentheses, except in cases where provisions called for enacting States to insert missing information, such as the name of a competent body. It was pointed out that the explanation in the Guide as regards the enactment of provisions of the Model Law should be sufficient. The alternative view was that it was common to use parentheses, square brackets and footnotes, when required, in UNCITRAL model laws. The Commission deferred its decision as

regards the use of parentheses and square brackets in the text to a later stage. (For further consideration of those issues, see paras. 175-178 below.)

*Article 53, new paragraph 3*

123. The Commission agreed to add the following new paragraph 3: “Where an evaluation of initial bids has taken place, each invitation to the auction shall also be accompanied by the outcome of the evaluation as relevant to the supplier or contractor to which the invitation is addressed.”

**Chapter VII. Framework agreements procedures**

*Article 57*

124. A query was raised as regards the absence of a reference in article 57 to a declaration pursuant to article 8, given that such reference appeared in article 59. It was clarified that, in the context of closed framework agreements, the requirement to include such a reference could already be found in provisions regulating the procurement methods by means of which the closed framework agreement was to be awarded.

125. The Commission agreed that paragraph 2 should start with the following wording: “The provisions of this Law regulating pre-qualification and the contents of ...”.

*Article 58, paragraph 1, new subparagraph (f)*

126. The Commission agreed to add the following subparagraph (f): “The manner in which the procurement contract will be awarded.”

*Article 59*

127. The Commission recalled its decision as regards the footnote and the provisions to which it related in article 52 (see para. 121 above) and confirmed that that decision would also apply to the footnote and the provisions to which it related in article 59.

128. The Commission agreed to revise paragraph 2 as follows: “The procuring entity shall solicit participation in the open framework agreement by causing an invitation to become a party to the open framework agreement to be published following the requirements of article 32 of this Law”; to delete paragraph 3 (c), its provisions being superfluous in the light of paragraph 3 (b), with consequent renumbering of the remaining subparagraphs under paragraph 3 of that article; to replace the phrase in paragraph 3 (e) (ii) “in conformity with this Law” with the phrase “in conformity with paragraph 7 of this article”; and to add the following phrase in the end of the first sentence of paragraph 7: “and shall select the suppliers or contractors to be parties to the open framework agreement in a non-discriminatory manner.”

*Article 61, paragraph 4 (a)*

129. It was proposed that the phrase “or only to each of those parties of the framework agreement then capable of meeting the needs of that procuring entity in the subject matter of the procurement” should be deleted. It was explained that the

provision might otherwise lead to misuse, as unlimited discretion was given to the procuring entity to decide which suppliers or contractors parties to the framework agreement were capable of delivering the subject matter of the procurement. The point was made that in non-electronic framework agreements there would not be such a large number of suppliers or contractors parties to the framework agreement that it would become burdensome for the procuring entity to notify all such suppliers or contractors of procurement opportunities and that, in the context of framework agreements maintained electronically, which might have many suppliers parties, electronic means of communication would allow notifying all of them without significant cost and time.

130. The alternative view was that in some jurisdictions suppliers or contractors parties to the framework agreement were required to participate in the competition if they received an invitation from the procuring entity to do so. Reference was also made to the practical use of framework agreements by central purchasing agencies, which might face high costs if required to invite numerous suppliers parties to the framework agreement and to deal with large numbers of submissions from those that were not capable of meeting the procuring entity's needs. It was further explained that, if some suppliers or contractors parties to the framework agreement indicated to the procuring entity from the outset of the procurement proceedings their limited capacity to deliver certain parts of the subject matter of the procurement, it would be inappropriate for the procuring entity to invite them. The point was made that safeguards against abuse should therefore be balanced against the considerations of efficiency and practicality. The Commission deferred its consideration of the issue to a later stage.

131. After subsequent discussion, the following proposal was made for a new subparagraph (a):

“(a) The procuring entity shall issue a written invitation to present submissions simultaneously:

- (i) To each supplier or contractor party to the framework agreement; or
- (ii) Only to each of those parties of the framework agreement then capable of meeting the needs of that procuring entity in the subject matter of the procurement, provided that, at the same time, notice of the second-stage competition is given to all parties to the framework agreement so that they have the opportunity to participate in the second-stage competition;”.

132. The view was expressed that subparagraph (ii) was unnecessary, and that only the provisions of the chapeau and subparagraph (i) should be included. In support of that view, it was emphasized that otherwise the provisions would open the door to corruption by giving the procuring entity unlimited discretion in the selection of capable suppliers or contractors.

133. The view prevailed that the wording as proposed in paragraph 131 above achieved the desired compromise by addressing both transparency and efficiency and should therefore be included as a new subparagraph (a).

134. It was agreed that the Guide would note that, in order to prevent the procuring entity from being confronted by a large number of challenges related to its assessment of suppliers' or contractors' capability to supply, the framework

agreement ought to set out clear procedures and criteria that would enable the procuring entity to identify which suppliers or contractors were capable.

135. It was agreed that the means of fulfilling the notice requirement would be explained in the Guide, highlighting various considerations, such as costs and the availability of electronic means of communication, and that the nature of the notice might vary as communication methods improved over time.

#### *Article 62, title*

136. It was proposed that the title of the article should read: “[Possible] Changes during the operation of the framework agreement”. The alternative view was that the title should retain the notion that no material change, in particular to the subject matter of the procurement, should occur during the operation of a framework agreement. The point was made that the title should reflect the content of the article, which did not refer to material change. The discussion of “material change” in the Working Group was recalled, in particular that it had been decided at that time to avoid any reference to such a concept in the Model Law, as it was not easy to define. The alternative view was that “material change” should be understood as any change that would affect the group of competitors that would be interested in participating in any given procurement proceeding, and that this should be consistently understood in the implementation of the Model Law. The Commission deferred its consideration of the title of the article to a later stage.

137. After subsequent discussion, the Commission agreed that the title should read as follows: “Changes during the operation of a framework agreement”.

### **Chapter VIII. Challenges and appeals**

#### *Title*

138. The Commission agreed that the title of the chapter should be: “Challenge proceedings”.

#### *Terminology*

139. It was agreed that the use of terminology should be streamlined throughout the chapter. In particular, the term “reconsideration” should be used in the context of the consideration of complaints by the procuring entity under article 65; the term “review” should be used in the context of the consideration of complaints by the independent body under article 66; and the term “appeal” should be used only in the context of judicial review.

140. It was also pointed out that, to the extent possible, consistency in the references to the group of persons to be notified of the decisions or actions under chapter VIII was desirable. The consideration and decisions of the Working Group as regards different groups of persons to be notified depending on decisions and actions in question were recalled.

#### *Article 63*

141. Strong opposition was expressed to retaining the provisions of article 63 as drafted. Concern was expressed that the article did not provide a clear idea to aggrieved suppliers or contractors as regards their options to challenge and seek

appeal and did not describe the sequence of steps that they could take. It was also observed that the article reflected a parallel system of review, while many jurisdictions followed a hierarchical system of review. It was considered doubtful that, in jurisdictions that would choose to invest in the establishment of an independent administrative body, suppliers or contractors would be allowed to seek recourse, as a general rule rather than as an exception, directly to the courts (i.e. bypassing the administrative body). It was therefore suggested that either the article should be redrafted to provide for several options, without preference being given to any one specific option, that could be considered by the enacting State, or that the article should be deleted altogether. In the latter case, it was suggested, text in square brackets could be inserted in its place inviting enacting States to consider which challenge and appeal system should be put in place in their jurisdiction, considering in particular whether an administrative body existed in their jurisdiction and the efficacy of their court system.

142. In response, doubts were expressed that the Model Law could set out all potential scenarios that might exist in challenge and appeal proceedings under chapter VIII of the draft. It was considered more appropriate to retain the text of article 63 as drafted and to describe all possible scenarios in the Guide. It was observed that the chapter reflected the consensus reached in the Working Group. Support was also expressed for the current approach in drafting chapter VIII, as it ensured, in the view of some delegations, the effectiveness of the review system. Concerns were expressed that requiring remedies to be exhausted in one body before going to the other might lead to negative consequences for both the procuring entity and suppliers or contractors: from the point of view of suppliers or contractors, they might be forced to deal with less efficient or more corrupt bodies before being able to have resort to the most effective body, and that could nullify the effectiveness of the review system; from the point of view of the procuring entity, requiring suppliers or contractors to take steps in sequence might lead to longer suspension periods and bring additional costs to the procurement process.

143. Others urged flexibility as long as the chapter reflected the minimum standards of the challenge and appeal system found in applicable international instruments, such as the United Nations Convention against Corruption<sup>7</sup> and the 1994 WTO Agreement on Government Procurement. It was recalled that the view had been clearly expressed at an earlier session of the Commission that it was not within the scope of the Model Law to dictate to enacting States which review system they should follow. A preference was therefore expressed for leaving all options open for consideration by enacting States.

144. In subsequent discussion, the suggestion was made to split paragraph 1 into two parts: the first dealing with the requirements that suppliers or contractors ought to meet to be able to bring challenges or appeals (that part would continue to reflect in essence article 52 of the 1994 text); and the second dealing with the organization of a challenge and appeal system in an enacting State, including whether it should be parallel or hierarchical. As regards the latter, it was suggested that footnotes 7 and 14 in the current draft could accompany the resulting second part. The need for retaining the second part in the Model Law was questioned. The suggestion was

---

<sup>7</sup> United Nations, *Treaty Series*, vol. 2349, No. 42146.

made to reflect its content in a footnote that would accompany article 63 or be placed in the Guide.

145. In further discussion, it was proposed that the text in paragraph 1 ending with the words “action concerned” should be retained in the Model Law, together with paragraph 2, while the remaining provisions of the article would be deleted. It was understood that the Guide would explain the options available to enacting States, including as regards hierarchical applications and sequencing.

146. After subsequent discussion, the Commission agreed that the title of the article should be “Right to challenge and appeal” and that the article should read as follows:

“1. A supplier or contractor that claims to have suffered or claims that it may suffer loss or injury because of alleged non-compliance of a decision or action of the procuring entity with the provisions of this Law may challenge the decision or action concerned.

2. Challenge proceedings may be made by way of [an application for reconsideration to the procuring entity under article 65 of this Law, an application for review to the [*name of the independent body*] under article 66 of this Law or an appeal to the [*name of the court or courts*].]”

147. In subsequent discussion, it was agreed that paragraph 2 of article 63 as proposed in paragraph 146 above should also contain a reference to applications to courts so as to allow a first-instance review by the courts of decisions or actions taken by the procuring entity in the procurement proceedings.

148. It was agreed that the Guide should include provisions along the following lines, subject to clarification of the terminology: “The enacting State may add provisions addressing the sequence of applications, if desired, and to allow an independent body or court to hear an appeal from an application for review; the application for reconsideration can be followed by an application for review or for judicial review, according to the domestic enactment of the Model Law.”

149. The point was made that, if paragraph 2 as contained in document A/CN.9/729/Add.8 were to be deleted, article 69 should remain in the text. (For further consideration of that point and the Commission’s decision to add a new paragraph 3 to article 63, see paras. 171-174 below.)

#### *Article 64, paragraph 1, and article 65, paragraph 3*

150. Concerns were raised about the impact of the above provisions on the entry into force of the procurement contract, in particular that they might involve lengthy delays to the procurement at issue. The consideration in the Working Group of policy issues underlying the drafting of chapter VIII was recalled.

151. A query was raised as regards a particular step or steps intended to be covered by the term “enter into a procurement contract” in paragraph 1 of article 64, whether the intention was to cover only the dispatch of the notice of acceptance of the successful submission or to cover also the request or receipt of approval from a competent body and the signature of the procurement contract. It was proposed that the drafting of paragraph 1 of article should be clarified in that respect, for example by stating that the “procuring entity shall not take any action to bring the contract

into force”, to encompass all actions leading to the entry into force of the procurement contract under article 21 of the draft. The Commission deferred its decision on the final wording of those provisions to a later stage. (For the decision on the final wording of article 64, see para. 152 below.)

#### *Article 64*

152. The Commission agreed that the title of the article should be: “Effect of a challenge” and that paragraphs 1 and 2 of the article should read as follows:

“1. The procuring entity shall not take any step that would bring a procurement contract or framework agreement in the procurement proceedings concerned into force:

(a) Where it receives an application for reconsideration within the time-limits specified in article 65 (2); or

(b) Where it receives notice of an application for review from the [*name of the independent body*] under article 66 (5)(b); or

(c) Where it receives notice of an application or of an appeal from the [*name of the court or courts*].

2. The prohibition referred to in paragraph (1) shall lapse ... working days (*the enacting State specifies the period*) after the decision of the procuring entity, the [*name of the independent body*] or the [*name of the court or courts*] has been communicated to the applicant or appellant, as the case may be, to the procuring entity, where applicable, and to all other participants in the challenge proceedings.”

153. It was agreed that the Guide would explain the term “participants in the challenge proceedings” and would note that enacting States might choose to use another term to refer to the entities that would have the requisite interest to take part in the proceedings.

154. The Commission agreed to delete the words “or appeal” and “or appellant, as the case may be” in paragraph 3 (b) of the article.

#### *Article 65, paragraphs 4 and 7*

155. It was agreed that the following provisions should appear in square brackets in both paragraphs as follows: “[in the [*name of the independent body*] under article 66 of this Law or in the [*name of the court or courts*]]”.

#### *Article 66*

156. It was agreed that:

(a) Reference to “appeal(s)” and “appellant, as the case may be” should be deleted in the title and throughout the article;

(b) Paragraph 1 should read: “A supplier or contractor may apply to the [*name of the independent body*] for review of a decision or an action taken by the procuring entity in the procurement proceedings, or of the failure of the procuring entity to take a decision under article 65 of this Law within the time limits prescribed in that article”; and

(c) The following words should be deleted in paragraph 2 (d): “Appeals against decisions of the procuring entity taken under article 65 of this Law, or” and that the word “appellant” would be replaced with the word “applicant”.

157. It was suggested that paragraphs 4 and 5 were excessively detailed and that some provisions therein could be deleted. The need to retain the provisions addressing “urgent public interest considerations” was emphasized, however.

158. The Commission agreed to retain paragraphs 4 and 5 with the following wording added at the end of paragraph 5 (a): “in accordance with paragraphs (3) and (4) of this article.”

159. The proposal was made to redraft paragraph 8, which currently implied a physical transfer by the procuring entity of the relevant documents to the independent body. It was explained that it might not be possible to implement such an obligation where classified information was concerned or when a large volume of information was involved. It was therefore proposed that the provision should read: “The procuring entity shall provide the [*name of the independent body*] with all documents or grant access to all documents related to the procurement.”

160. The opposing view was that the proposed changes might put the independent body in a disadvantaged and inappropriate position since they implied that the independent body would be required physically to visit the procuring entity’s premises and to request access to the documents. According to that view, the provisions in the draft were considered appropriate. A further view was that the provisions might be redrafted in broader terms to refer, for example, to the obligation of the procuring entity to provide documents to the independent body in a manner that ensured effective access by the independent body to all documents.

161. It was suggested that the drafting of the opening phrase in English could be clarified to make it clear that reference was being made to the appeal by the supplier or contractor, not the independent body.

162. The Commission deferred its decision on the wording of paragraph 8 to a later stage.

163. After subsequent discussion, it was agreed that paragraph 8 should read as follows: “Promptly upon receipt of a notice under paragraph (5) (b) of this article, the procuring entity shall provide the [*name of the independent body*] with effective access to all documents relating to the procurement proceedings in its possession, in a manner appropriate to the circumstances.” It was agreed that the Guide should explain how access (physical or virtual) to documents could be granted in practice and that the relevant documents could be provided in steps. (For example, a list of all documents could be provided to the independent body first so that the independent body could identify those documents relevant to the proceedings before it.)

164. Concerns were raised as regards the use of the adjectives “lawful” and “unlawful” in paragraph 9. The use of alternative qualifying terms, such as “in violation of law” or “deemed/found/decided to be unlawful/lawful”, was proposed. The Commission deferred its decision on the wording to a later stage.

165. After subsequent discussion, it was agreed that subparagraphs (a) to (e) and (h) of paragraph 9 should read:

“(a) Prohibit the procuring entity from acting, taking a decision or following a procedure that is not in compliance with the provisions of this Law;

(b) Require the procuring entity that has acted or proceeded in a manner that is not in compliance with the provisions of this Law, to act, take a decision or to proceed in a manner that is in compliance with the provisions of this Law;

[(c) Overturn in whole or in part an act or a decision of the procuring entity that is not in compliance with the provisions of this Law [other than any act or decision bringing the procurement contract or the framework agreement into force];

(d) Revise a decision by the procuring entity that is not in compliance with the provisions of this Law [other than any act or decision bringing the procurement contract or the framework agreement into force];

(d bis) Confirm a decision of the procuring entity;

(e) Overturn the award of a procurement contract or a framework agreement that has entered into force in a manner that is not in compliance with the provisions of this Law and, if notice of the award of the procurement contract or the framework agreement has been published, order the publication of notice of the overturning of the award;]

...

(h) Require the payment of compensation for any reasonable costs incurred by the supplier or contractor submitting an application as a result of an act or decision of, or procedure followed by, the procuring entity in the procurement proceedings, which is not in compliance with the provisions of this Law, and for any loss or damages suffered[, which shall be limited to costs for the preparation of the submission, or the costs relating to the application, or both];  
or “

166. It was agreed that in paragraph 10 the words “challenge or appeal proceedings” should be replaced with the words “application for review”.

#### *Article 67*

167. The Commission agreed to delete references to “appeal” in the title and throughout the article and to delete in paragraph 3 the words “relevant challenge or appeal”. It also agreed to add the words “duly notified of the proceedings” after the words “a supplier or contractor” at the beginning of the second sentence of paragraph 1.

168. A query was raised as regards the reference to “any governmental authority” in the text. The understanding was that this reference would be explained in the Guide.

*Article 68*

169. It was proposed to reflect in the article that restricted access to classified information might be possible. The understanding was that no changes to that end in the article were needed.

170. The Commission agreed to delete references to “appeal” in the title and in the article.

*Article 69 and consequent changes in article 63 (addition of a new paragraph 3)*

171. A query was raised as to whether article 69 was needed. The broadly held view was that retaining a reference to judicial review in chapter VIII, either in article 69 or by expanding article 63, was essential. The Commission deferred its decision on that issue to a later stage.

172. In further discussion, the view was expressed that article 69 should be deleted. The deletion of that article was supported on the condition that additional wording would be included in article 63, as a new paragraph 3, reflecting the need under international instruments for an enacting State to have a two-stage appeal system. Such additional wording, it was said, would draw on paragraph 2 of draft article 63 in document A/CN.9/729/Add.8 and could read: “A supplier or contractor may appeal any decision taken in challenge proceedings in [*name of the court or courts*].”

173. Concern was expressed about the proposed wording since it implied requirements for appeals against court judgements, which were considered to be outside the scope of the Model Law.

174. After discussion, it was agreed that article 69 would be deleted and a new paragraph 3 would be included in article 63 that would read: “A supplier or contractor may appeal any decision taken in challenge proceedings under article 65 or 66 of this Law in [*name of the court or courts*].”

*Footnotes, the use of parentheses and square brackets*

175. The view was expressed that some footnotes in chapter VIII should be deleted. The Commission recalled its earlier considerations as regards the desirability of including any footnotes in the Model Law (see paras. 119-122 above) and decided to defer its consideration of the issue as a whole to a later stage of the session.

176. After subsequent discussion, it was agreed that all footnotes currently in chapter VIII should be removed, that their contents should be reflected in the Guide and that a new footnote to the title to the chapter would be inserted to direct enacting States to consider the various options for the text that were explained in the Guide.

177. It was agreed that all other footnotes in the draft revised text of the Model Law, other than those expressly agreed to be deleted during the current session of the Commission, were to be retained in the text of the Model Law.

178. It was also agreed that parentheses were to be used when necessary for grammatical reasons, while square brackets were to be used where it was necessary to signal to enacting States that the text was optional. In the latter case, it was pointed out, the square brackets were intended to draw the attention of States to the

particular considerations discussed in the Guide that might affect their decisions on how to enact the text.

#### *Finalization of the Model Law*

179. The Commission authorized the Secretariat to prepare the final text of the Model Law by incorporating changes agreed to be made at the session to document A/CN.9/729 and its addenda, renumbering the articles as a result of the introduction of new article 15 bis, amending cross-references and making other necessary editorial changes throughout the Model Law.

#### *General comments*

180. While acknowledging the efforts made to prepare the revised Model Law, a view was expressed that some of its provisions focused excessively on the use of public procurement as a tool for promotion of international trade. According to that view, public procurement in many developing countries was used as a tool for building local capacities, developing local small and medium-sized enterprises and implementing other socio-economic and environmental policies of States. The Commission was urged to take into account the social and economic realities of various countries in preparing the Guide and to avoid indicating that the text should be directly implemented into domestic legislation without amendment to take account of such matters.

### **C. Preparation of a Guide to Enactment to the revised Model Law**

181. The importance of a Guide to Enactment to the revised Model Law as an indispensable accompaniment to that Model Law was stressed. Recalling that the Guide was expected to contain recommendations to enacting States on how to implement the Model Law, it was understood that the Guide should be approved by the Commission at its next session. It was therefore agreed that work on finalizing the Guide should be undertaken in as efficient and practical manner as possible. Views varied, however, on whether the Working Group should reconvene to finalize the Guide. The view of some delegations was that this was not necessary; the core policy issues had been agreed and reflected in the Model Law, so the Secretariat, in consultation with experts, would be able to finalize the Guide. In support of that view, it was stated that: (a) the final Guide should be presented by the Secretariat for adoption of the Commission at its forty-fifth session, in 2012; (b) a sufficient number of days should be allocated to the Commission for that purpose; and (c) if any session of the Working Group were to be held before the Commission's forty-fifth session, only one session, preferably in the spring of 2012, should be held. Another view was that, in the light of budgetary uncertainties, a Working Group session before the Commission's session in 2012 would be undesirable. Alternatives to Working Group sessions were considered, such as meetings of a working party, informal meetings before the Commission session or expert group meetings in the manner usually convened by the Secretariat.

182. The alternative view was that it was essential for the Working Group to continue working on the Guide, particularly as a number of policy issues (some of which might be difficult to resolve) had been referred to the Guide for elaboration.

The involvement of all delegations in resolving them was considered important. Support was therefore expressed for holding at least one session of the Working Group before the next session of the Commission. It was added that the draft Guide was a long document, which the Commission would not be in a position during its session to consider in sufficient detail in full in order to ensure the quality of the text.

183. The differences between formal intergovernmental sessions and informal expert group meetings convened by the Secretariat, from budgetary and other perspectives, were recalled. Informal alternatives to a session of the Working Group alone were not considered viable, in part because the expectation was that the Guide would be finalized in a formal intergovernmental setting. It was emphasized that experts at expert group meetings acted in their individual capacity rather than as representatives of Governments; since the Guide was expected to be an UNCITRAL document, it was considered essential that all States had a chance to participate. In addition, concerns were expressed that availability of resources for interpretation and translation in all six official United Nations languages in the context of informal meetings, unlike formal intergovernmental sessions, could not be ensured. It was considered essential that the text of the Guide should be made available in all official languages of the United Nations well before the session of the Commission for comment by States and interested organizations.

184. The Commission preliminarily agreed that holding one session of the Working Group before the next session of the Commission, in either late autumn 2011 or early 2012, would be appropriate; the final decision on that issue was deferred, however, until the Commission had a chance to consider all issues related to future meetings of UNCITRAL. (For further consideration of the issue, see paras. 334-350 below.) The Secretariat was instructed to advance work on the Guide as much as possible for that session of the Working Group, through informal consultations with experts. The prevailing view was that, during the preparation of the revised Model Law, in-person expert group meetings had proved to be more efficient than teleconferences or exchanges of comments and documents.

185. It was proposed that the Commission should consider at a later session whether some topics addressed in the Guide (such as defence procurement) and other issues that might be of interest to users or in certain regions could be discussed in detail in supporting papers, rather than in the Guide.

186. In response to a query on how to ensure that the Guide would be a living document, the suggestion was made that it could be updated electronically on the UNCITRAL website. The need for regular contacts by the Secretariat with experts to monitor developments in the regulation of public procurement was emphasized. It was suggested that the Commission might receive periodic reports of the Secretariat with the relevant information and proposals and that it would be for the Commission to authorize making the proposed changes in the Guide. The significant expertise that had been built up in the preparation of the revised Model Law and a revised Guide could be harnessed through such a mechanism without the need to engage a working group.

187. The creation of a blog on the “UNCITRAL Model Procurement Law”, and the principles of operation of that blog, were announced. The goal was to create an open

platform for the exchange of comments on the implementation of the revised Model Law and the use of its Guide.

#### **D. Promotion of the revised Model Law**

188. The Commission heard an oral report from the Secretariat on its efforts to promote the work of UNCITRAL in the area of public procurement and the instruments resulting from that work. It was reported that the main activities were through conferences and publications and technical assistance projects. A joint project with the European Bank for Reconstruction and Development and OSCE for countries of the Commonwealth of Independent States and Mongolia that was intended to start in September 2011 was cited as an example. The project, it was explained, had as its goal the promotion and use of the revised Model Law in those countries, some of which had based their procurement law on the 1994 text.

189. The need for States to take a more active role in promoting the use of the revised Model Law and its effective implementation and uniform interpretation, in particular through the donor agencies of States, was stressed, also given resource constraints in the Secretariat for such work. In that regard, reference was made to the CLOUT (case law on UNCITRAL texts) system for collecting and disseminating information about UNCITRAL texts (see paras. 271-274 below), which did not currently contain reported case law on UNCITRAL texts in the area of public procurement. Information about enactment of UNCITRAL instruments in that area was also lacking as a result of the absence of reports from States to the Commission. Inherent differences with respect to monitoring the enactment of UNCITRAL texts in the area of public procurement, including because enactments were generally adapted to suit local circumstances, were recalled. It was generally agreed that coordination among the various procurement reform agencies and other mechanisms to promote effective implementation and uniform interpretation of the revised Model Law should be considered. The benefits of those approaches for achieving a greater harmonization of public procurement laws in various jurisdictions were highlighted.

#### **E. Future work in the area of public procurement**

190. The Commission considered the desirability of work in the area of public-private partnerships and privately financed infrastructure projects. The Commission recalled its instruments on privately financed infrastructure projects and heard a view that those instruments might need to be updated in the light of the work accomplished in the area of public procurement. In the view of some delegations, however, the issue should be considered in the broader context of the future work programme of UNCITRAL as a whole and in the light of financial and human resource constraints faced by UNCITRAL and its secretariat so as to prioritize the work in various fields appropriately.

191. The Commission requested the Secretariat to prepare a study on possible future work of UNCITRAL in the area of public-private partnerships and privately financed infrastructure projects for consideration by the Commission at a future

session. It was noted that this topic could include many aspects, of which public procurement was only one.

## F. Adoption of the UNCITRAL Model Law on Public Procurement

192. The Commission, after consideration of the text of the draft UNCITRAL Model Law on Public Procurement and other procurement-related topics, adopted the following decision at its 933rd meeting, on 1 July 2011:

*“The United Nations Commission on International Trade Law,*

*“Recalling its mandate under General Assembly resolution 2205 (XXI) of 17 December 1966 to further the progressive harmonization and unification of the law of international trade and in that respect to bear in mind the interests of all peoples, and in particular those of developing countries, in the extensive development of international trade,*

*“Noting that procurement constitutes a significant portion of public expenditure in most States,*

*“Recalling the adoption of its Model Law on Procurement of Goods, Construction and Services at its twenty-seventh session, in 1994,<sup>8</sup>*

*“Observing that the 1994 Model Law, which has become an important international benchmark in procurement law reform, contains procedures aimed at achieving competition, transparency, fairness, economy and efficiency in the procurement process,*

*“Observing also that, despite the widely recognized value of the 1994 Model Law, new issues and practices have arisen since its adoption that have justified revision of the text,*

*“Recalling that, at its thirty-seventh session, in 2004, it agreed that the 1994 Model Law would benefit from being updated to reflect new practices, in particular those resulting from the use of electronic communications in public procurement, and the experience gained in the use of the 1994 Model Law as a basis for law reform, taking care, however, not to depart from the basic principles behind it and not to modify the provisions whose usefulness had been proven,<sup>9</sup>*

*“Recalling also that at that session it decided to entrust the drafting of proposals for the revision of the 1994 Model Law to its Working Group I (Procurement), which was given a flexible mandate to identify the issues to be addressed in its considerations,<sup>10</sup>*

*“Expressing appreciation to the Working Group for having prepared the draft UNCITRAL Model Law on Public Procurement,*

---

<sup>8</sup> *Official Records of the General Assembly, Forty-ninth Session, Supplement No. 17 and corrigendum (A/49/17 and Corr.1)*, para. 97.

<sup>9</sup> *Ibid.*, *Fifty-ninth Session, Supplement No. 17 (A/59/17)*, para. 81.

<sup>10</sup> *Ibid.*, para. 82.

“*Noting* that the revisions to the 1994 Model Law were the subject of due deliberation and extensive consultations with Governments and interested international organizations, and thus it can be expected that the revised Model Law, to be called ‘the UNCITRAL Model Law on Public Procurement’, would be acceptable to States with different legal, social and economic systems,

“*Noting also* that the revised Model Law is expected to contribute significantly to the establishment of a harmonized and modern legal framework for public procurement that promotes economy, efficiency and competition in procurement and at the same time fosters integrity, confidence, fairness and transparency in the procurement process,

“*Being convinced* that the revised Model Law will significantly assist all States, in particular developing countries and States whose economies are in transition, in enhancing their existing procurement laws and formulating procurement laws where none presently exist, and will lead to the development of harmonious international economic relations and increased economic development,

“1. *Adopts* the UNCITRAL Model Law on Public Procurement as it appears in annex I to the report of its current session;

“2. *Requests* the Secretary-General to disseminate broadly, including through electronic means, the text of the UNCITRAL Model Law on Public Procurement to Governments and other interested bodies;

“3. *Recommends* that all States use the UNCITRAL Model Law on Public Procurement in assessing their public procurement legal regime and give favourable consideration to the UNCITRAL Model Law on Public Procurement when they enact or revise their laws;

“4. *Requests* all States to support the promotion and implementation of the UNCITRAL Model Law on Public Procurement;

“5. *Calls for* closer cooperation and coordination among the Commission and other international organs and organizations, including regional organizations, active in the field of procurement law reform, in order to avoid undesirable duplication of efforts and inconsistent, incoherent or conflicting results in the modernization and harmonization of public procurement law;

“6. *Endorses* the efforts and initiatives of the Commission’s secretariat aimed at increasing coordination of, and cooperation on, legal activities concerned with public procurement reform.”

#### **IV. Finalization and adoption of judicial materials on the UNCITRAL Model Law on Cross-Border Insolvency**

193. The Commission noted that Working Group V (Insolvency Law) had considered at its thirty-ninth session, held in Vienna from 6 to 10 December 2010, a draft text of the judicial materials on the Model Law (A/CN.9/WG.V/WP.97 and Add.1 and 2), which responded to a mandate given to the Secretariat by the Commission and was developed in consultation with judges and insolvency experts (A/CN.9/715, paras. 110-116). The Commission further noted that the draft text had

been considered at the Ninth Multinational Judicial Colloquium, held in Singapore on 12 and 13 March 2011 (see paras. 220-221 below)<sup>11</sup> and that, pursuant to the Working Group's request (A/CN.9/715, para. 116), it had been circulated to Governments for comment in February 2011.

194. The draft judicial materials were revised on the basis of the decisions made by the Working Group at its thirty-ninth session, the comments received from Governments and those made at the judicial colloquium.

195. The Commission had before it the revised version of the draft judicial materials (A/CN.9/732 and Add.1-3), the comments from Governments (A/CN.9/733 and Add.1) and the report of the thirty-ninth session of the Working Group (A/CN.9/715). The Commission heard an oral introduction to the draft text.

196. The Commission expressed its appreciation for the draft judicial materials and emphasized their usefulness for practitioners and judges, as well as creditors and other stakeholders in insolvency proceedings, particularly in the context of the current financial crisis. In that regard, the judicial materials were viewed as very timely. The Commission also expressed its appreciation for the incorporation of the suggestions made by Governments following circulation of the draft judicial materials and agreed that the document should be entitled "The UNCITRAL Model Law on Cross-Border Insolvency: the judicial perspective".

197. The Commission also agreed that, in order to recognize the significant contribution of Justice Paul Heath of the High Court of New Zealand in preparing the first draft of the judicial materials and contributing to its further development, an appropriate acknowledgement should be included in a preface that would be prepared by the Secretariat.

198. At its 934th meeting, on 1 July 2011, the Commission adopted the following decision:

*The United Nations Commission on International Trade Law,*

*Noting* that increased trade and investment leads to a greater incidence of cases where business is conducted on a global basis and enterprises and individuals have assets and interests in more than one State,

*Noting also* that, where the subjects of insolvency proceedings are debtors with assets in more than one State, there is generally an urgent need for cross-border cooperation in, and coordination of, the supervision and administration of the assets and affairs of those debtors,

*Considering* that cooperation and coordination in cross-border insolvency cases has the potential to significantly improve the chances for rescuing financially troubled debtors,

*Believing* that the UNCITRAL Model Law on Cross-Border Insolvency<sup>12</sup> (the Model Law) contributes significantly to the establishment of a harmonized legal framework for addressing cross-border insolvency and facilitating coordination and cooperation,

<sup>11</sup> The report of the colloquium is available from [www.uncitral.org/pdf/english/news/NinthJC.pdf](http://www.uncitral.org/pdf/english/news/NinthJC.pdf).

<sup>12</sup> United Nations publication, Sales No. E.99.V.3.

*Acknowledging* that familiarity with cross-border cooperation and coordination and the means by which it might be implemented in practice is not widespread,

*Convinced* that providing readily accessible information on the interpretation of and current practice with respect to the Model Law for reference and use by judges in insolvency proceedings has the potential to promote wider use and understanding of the Model Law and facilitate cross-border judicial cooperation and coordination, avoiding unnecessary delay and costs,

1. *Adopts* the UNCITRAL Model Law on Cross-Border Insolvency: the Judicial Perspective, as contained in document A/CN.9/732 and Add.1-3 and authorizes the Secretariat to edit and finalize the text in the light of the deliberations of the Commission;
2. *Requests* the Secretariat to establish a mechanism for updating the Judicial Perspective on an ongoing basis in the same flexible manner as it was developed, ensuring that its neutral tone is maintained and that it continues to meet its stated purpose;
3. *Requests* the Secretary-General to publish, including electronically, the text of the Judicial Perspective, as updated/amended from time to time in accordance with paragraph 2 of this decision, and to transmit it to Governments with the request that the text be made available to relevant authorities so that it becomes widely known and available;
4. *Recommends* that the Judicial Perspective be given due consideration, as appropriate, by judges, insolvency practitioners and other stakeholders involved in cross-border insolvency proceedings;
5. *Also recommends* that all States continue to consider implementation of the Model Law.

## **V. Arbitration and conciliation**

### **A. Progress reports of Working Group II**

199. At its current session, the Commission had before it the reports of the Working Group on its fifty-third session, held in Vienna from 4 to 8 October 2010 (A/CN.9/712), and on its fifty-fourth session, held in New York from 7 to 11 February 2011 (A/CN.9/717). The Commission commended the Working Group for the progress made regarding the preparation of a legal standard on transparency in treaty-based investor-State arbitration and the Secretariat for the quality of the documentation prepared for the Working Group.

200. The Commission noted that the Working Group had considered matters of content, form and applicability of the legal standard on transparency to both future and existing investment treaties. It was confirmed that the question of applicability of the legal standard on transparency to existing investment treaties was part of the mandate of the Working Group and a question with great practical interest, taking account of the high number of treaties already concluded. The Commission also

reiterated its commitment expressed at its forty-first session, in 2008, regarding the importance of ensuring transparency in investor-State arbitration.<sup>13</sup>

201. The Commission noted that the Working Group had discussed at its fifty-third session the matter of submissions by third parties (*amicus curiae*) in arbitral proceedings. In that context, the question of intervention in the arbitration by a non-disputing State party to the investment treaty was raised. At that session, the Working Group had agreed to seek guidance from the Commission on whether that topic could be dealt with by the Working Group in the context of its current work (A/CN.9/712, para. 103). That agreement was reiterated by the Working Group at its fifty-fourth session (A/CN.9/717, para. 153). It was explained that, at its fifty-third session, the Working Group had noted that two possible types of *amicus curiae* should be distinguished and perhaps considered differently. The first type could be any third party that would have an interest in contributing to the solution of the dispute. A second type could be another State party to the investment treaty at issue that was not a party to the dispute. It was noted that such a State often had important information to provide, such as information on *travaux préparatoires*, thus preventing one-sided treaty interpretation. It was also noted that an intervention by a non-disputing State party of which the investor was a national could raise issues of diplomatic protection and was to be given careful consideration (A/CN.9/712, para. 49).

202. After discussion, the Commission agreed that the question of possible intervention in the arbitration by a non-disputing State party to the investment treaty should be regarded as falling within the mandate of the Working Group. Whether the legal standard on transparency should deal with such a right of intervention and, if so, the determination of the scope and modalities of such intervention should be left for further consideration by the Working Group.

203. With respect to future work in the field of settlement of commercial disputes, the Commission recalled that the issue of arbitrability should be maintained by the Working Group on its agenda, as decided by the Commission at its thirty-ninth session.<sup>14</sup> Further, the Commission heard a suggestion that the issue of confidentiality might need to be further examined. It was said that, where confidentiality was specifically protected under legislation, there was no single approach to the scope of the obligation of confidentiality in terms of the information that was to be treated as confidential, the persons to whom the obligation attached or permissible exceptions to prohibitions on disclosure and communication. The Commission agreed that the options for dealing with confidentiality in commercial arbitration should be considered as a matter for future work of the Working Group.

204. The Commission was informed that recommendations to assist arbitral institutions and other interested bodies with regard to arbitration under the UNCITRAL Arbitration Rules, as revised in 2010,<sup>15</sup> were under preparation by the Secretariat in accordance with the decision of the Commission at its forty-third session, in 2010.<sup>16</sup> It was recalled that the purpose of such

<sup>13</sup> *Official Records of the General Assembly, Sixty-third Session, Supplement No. 17* and corrigendum (A/63/17 and Corr.1), para. 314.

<sup>14</sup> *Ibid.*, *Sixty-first Session, Supplement No. 17* (A/61/17), para. 187.

<sup>15</sup> *Ibid.*, *Sixty-fifth Session, Supplement No. 17* (A/65/17), annex I.

<sup>16</sup> *Ibid.*, para. 189.

recommendations was to promote the use of the Rules and that arbitral institutions in all parts of the world would be more inclined to accept acting as appointing authorities if they had the benefit of such recommendations. Subject to the availability of resources, the Secretariat was requested to prepare draft recommendations for consideration by the Commission at a future session, preferably as early as 2012.

205. The Commission agreed that the 1996 UNCITRAL Notes on Organizing Arbitral Proceedings<sup>17</sup> needed to be updated pursuant to the adoption of the UNCITRAL Arbitration Rules, as revised in 2010, and entrusted the Secretariat with the preparation of the revised Notes.

206. The Commission heard an oral report on progress regarding the preparation of a guide to enactment and use of the UNCITRAL Model Law on International Commercial Arbitration as amended in 2006.<sup>18</sup> The Commission requested the Secretariat to pursue its efforts towards the preparation of the guide. It was agreed that a more substantive presentation on progress made in the preparation of the guide should be made at a future session of the Commission.

207. Noting the various projects referred to in paragraphs 204-206 above, as well as the preparation of a guide on the Convention on the Recognition and Enforcement of Foreign Arbitral Awards, done at New York on 10 June 1958 (see paras. 250-252 below), the Commission discussed the priorities to be given to those projects. The Commission agreed on the importance of each of those projects and took note of the fact that, resources permitting, the Secretariat should work as a matter of priority on the preparation of recommendations on the use of the UNCITRAL Arbitration Rules, as revised in 2010, and on revising the UNCITRAL Notes on Organizing Arbitral Proceedings. The elaboration of a guide on the New York Convention (see para. 252 below), which might take longer than the other two projects, was seen as a particularly important goal.

## **B. Mediation in the context of settlement of investor-State disputes**

208. The Commission noted that, following consultations between the secretariats of UNCITRAL and UNCTAD, a proposal had been received by the UNCITRAL secretariat from UNCTAD on the question of mediation in the context of settlement of investor-State disputes (transmitted to the Commission in a note by the Secretariat (A/CN.9/734)).

209. The Commission heard a presentation by the secretariat of UNCTAD on the use of mediation in the context of investor-State dispute settlement. The work of UNCTAD on international investment law was said to pursue the overall objective of harnessing foreign investment as a tool for sustainable development. It was said that, in recent years, there had been an increasing interest in the possibility of using alternative methods for managing disputes effectively. Effective recourse to mediation or conciliation as part of investor-State dispute settlement mechanisms

---

<sup>17</sup> Ibid., *Fifty-first Session, Supplement No. 17* (A/51/17), part II.

<sup>18</sup> Ibid., *Fortieth Session, Supplement No. 17* (A/40/17), annex I; and *ibid.*, *Sixty-first Session, Supplement No. 17* (A/61/17), annex I. For previous discussions on the issue, see *ibid.*, *Sixty-first Session, Supplement No. 17* (A/61/17), para. 176.

might improve the efficiency of dispute resolution and have several advantages, such as enhancing flexibility, consuming fewer resources and being favourable to the long-term working relationship between the parties, while simultaneously improving good governance and regulatory practices of States.<sup>19</sup> Overall, mediation/conciliation as an alternative approach to international arbitration under investment treaties was said to offer a promising alternative to the settlement of investment disputes through international arbitration; hence various actors should be encouraged to give such methods further consideration.

210. It was said that UNCITRAL had already adopted well-known texts in the field of mediation/conciliation. The 1980 UNCITRAL Conciliation Rules<sup>20</sup> contained a set of rules to be applied by agreement of the parties to conciliation of disputes arising out of, or relating to, a contractual or other legal relationship where the parties were seeking an amicable settlement of their dispute. The UNCITRAL Model Law on International Commercial Conciliation, adopted in 2002,<sup>21</sup> which provided uniform rules in respect of the conciliation process, used a broad notion of the term “conciliation” for referring to proceedings in which a third person or a panel of persons (“the conciliator”) assisted the parties in their attempt to reach an amicable settlement of their dispute. The Model Law on Conciliation addressed procedural aspects of conciliation, including the appointment of conciliators, the commencement and termination of conciliation, the conduct of conciliation, communication between the conciliator and other parties, confidentiality and the admissibility of evidence in other proceedings, as well as post-conciliation issues, such as the conciliator acting as arbitrator and the enforceability of settlement agreements.

211. The Commission considered steps that might need to be taken to foster the use of mediation in the context of investor-State dispute settlement. It was suggested that the UNCITRAL and UNCTAD secretariats should combine forces to increase awareness among the community of States, investors, legal practitioners, and arbitration and international organizations about mediation/conciliation as an alternative approach to investor-State dispute resolution that would complement sustainable and responsible investment.

212. After discussion, the Commission expressed its appreciation to its secretariat for establishing close cooperation with UNCTAD over the previous years. The secretariat was encouraged to continue such cooperation, resources permitting. The Commission agreed that the proposal to foster the use of mediation in the context of investor-State dispute settlement was worthy of further consideration. It was suggested that conciliation/mediation with respect to the settlement of treaty-based investor-State disputes should be considered as a topic for future work by the Working Group.

## VI. Online dispute resolution: progress reports of Working Group III

213. The Commission recalled its previous discussions of online dispute resolutions.<sup>22</sup> At its current session, the Commission noted that Working Group III (Online Dispute Resolution) had commenced its deliberations on the preparation of legal standards, in particular procedural rules on online dispute resolution for cross-border electronic transactions, at its twenty-second session, held in Vienna from 13 to 17 December 2010, and continued its work at its twenty-third session, held in New York from 23 to 27 May 2011. The Commission also noted that, in addition to the procedural rules, the Working Group had requested the Secretariat, subject to the availability of resources, to prepare documentation for its next session addressing the issues of guidelines for neutrals, guidelines for online dispute resolution providers, substantive legal principles for resolving disputes and a cross-border enforcement mechanism.

214. The Commission expressed its appreciation to the Working Group for the progress made, as reflected in the reports on its twenty-second (A/CN.9/716) and twenty-third sessions (A/CN.9/721) and commended the Secretariat for the working papers and reports prepared for those sessions.

215. The Commission took note of a concern raised that, given that online dispute resolution was a somewhat novel subject for UNCITRAL and that it related at least in part to transactions involving consumers, the Working Group should adopt a prudent approach in its deliberations, bearing in mind the Commission's direction at its forty-third session that the Working Group's work should be carefully designed not to affect the rights of consumers.<sup>23</sup>

216. The view was expressed that the Working Group should bear in mind the need to conduct its work in the most efficient manner, which included prioritizing its tasks and reporting back with a realistic time frame for their completion.

217. Differing views were expressed as to whether the mandate of the Working Group should be interpreted to include consumer-to-consumer transactions. One view was that such a further emphasis on the inclusion of consumer-related transactions might make it more difficult to reach consensus on the work of the Working Group as a whole. Another view was that, in practice, it was often difficult, if not impossible, to determine whether a party to a transaction was a consumer or a business.

218. After discussion, the Commission reaffirmed the mandate of Working Group III relating to cross-border electronic transactions, including business-to-business and business-to-consumer transactions. The Commission decided that, while the Working Group should be free to interpret that mandate as covering consumer-to-consumer transactions and to elaborate possible rules governing consumer-to-consumer relationships where necessary, it should be particularly mindful of the need not to displace consumer protection legislation. The Commission also decided that, in general terms, in the implementation of its

---

<sup>22</sup> *Official Records of the General Assembly, Sixty-fourth Session, Supplement No. 17 (A/64/17)*, paras. 338 and 341-343; and *ibid.*, *Sixty-fifth Session, Supplement No. 17 (A/65/17)*, paras. 252 and 257.

<sup>23</sup> *Ibid. Sixty-fifth Session, Supplement No. 17 (A/65/17)*, para. 256.

mandate, the Working Group should also consider specifically the impact of its deliberations on consumer protection and that it should report to the Commission at its next session.

## **VII. Insolvency law: progress report of Working Group V**

### **A. Progress report of Working Group V**

219. The Commission recalled its previous discussions on activity undertaken by Working Group V (Insolvency Law) on the following two topics: (a) guidance on the interpretation and application of selected concepts of the UNCITRAL Model Law on Cross-Border Insolvency relating to centre of main interests and possible development of a model law or provisions on insolvency law addressing selected international issues, such as jurisdictions, access and recognition, in a manner that would not preclude the development of a convention; and (b) responsibility and liability of directors and officers of an enterprise in insolvency and pre-insolvency cases.<sup>24</sup> The Commission expressed its appreciation for the progress made by the Working Group as reflected in the report of its thirty-ninth session, held in Vienna from 6 to 10 December 2010 (A/CN.9/715), and commended the Secretariat for the working papers and reports prepared for that session.

### **B. Ninth Multinational Judicial Colloquium**

220. The Commission heard a brief report on the Ninth Multinational Judicial Colloquium, held in Singapore on 12 and 13 March 2011.<sup>25</sup> The colloquium, organized jointly by UNCITRAL, the International Association of Restructuring, Insolvency and Bankruptcy Professionals (INSOL International) and the World Bank, was attended by approximately 80 judges from 44 States, who discussed issues of cross-border insolvency coordination and cooperation, including in the context of enterprise groups, as well as the draft text of the UNCITRAL Model Law on Cross-Border Insolvency: the judicial perspective, the preparation of which was widely supported by judges as a valuable source of information on current issues and practice. The colloquium was once again judged by participants to be a very useful event and a welcome opportunity for judges from different jurisdictions to meet and discuss cross-border insolvency-related issues and share their experiences. The Commission noted that a short report on the colloquium had been prepared and made available on the respective websites of the three organizations.

221. The Commission expressed its satisfaction to the Secretariat for organizing the colloquium and requested the Secretariat to continue cooperating actively with INSOL International and the World Bank, with a view to organizing further colloquiums in the future, resources permitting.

---

<sup>24</sup> Ibid., para. 259.

<sup>25</sup> The report of the colloquium is available from [www.uncitral.org/pdf/english/news/NinthJC.pdf](http://www.uncitral.org/pdf/english/news/NinthJC.pdf).

### C. World Bank: treatment of natural persons in insolvency

222. The Commission heard an oral presentation from the World Bank on work to be undertaken by its Insolvency and Creditor/Debtor Regimes Task Force to study key regulatory aspects underlying natural person insolvency, the variation in legal treatment under national legal regimes and the implications of those divergences for international collaboration and coordination. One of the lessons from the recent financial crisis, the World Bank advised, was the recognition of the problem of consumer insolvency as a systemic risk and the consequent need for the modernization of domestic laws and institutions to enable jurisdictions to deal effectively and efficiently with the risks of individual overindebtedness. The World Bank emphasized the importance of the participation of UNCITRAL in that work, particularly in the light of the possibility that it might lead to additions to the existing insolvency standard, comprising the recommendations of the UNCITRAL Legislative Guide on Insolvency Law<sup>26</sup> and the World Bank's Principles for Effective Insolvency and Creditor Rights Systems.<sup>27</sup> The Commission encouraged the Secretariat to participate actively in the work of the Task Force and to partner with the World Bank in any further work that might contribute to establishing best practice on that topic.

## VIII. Security interests: progress reports of Working Group VI

223. The Commission recalled its previous discussions on the preparation of a text on the registration of security rights in movable assets.<sup>28</sup> At its current session, the Commission had before it the reports of Working Group VI (Security Interests) on the work of its eighteenth session, held in Vienna from 8 to 12 November 2010, and nineteenth session, held in New York from 11 to 15 April 2011 (A/CN.9/714 and A/CN.9/719, respectively). The Commission noted that, at its eighteenth session, the Working Group had adopted the working assumption that the text it had been entrusted to prepare would take the form of a guide on the implementation of a registry of notices with respect to security rights in movable assets. In addition, the Commission noted that, at that session, the Working Group had generally agreed that the text could include principles, guidelines, commentary and possibly recommendations with respect to registration regulations. Moreover, the Commission noted that the Working Group had agreed that the text should be consistent with the UNCITRAL Legislative Guide on Secured Transactions,<sup>29</sup> at the same time taking into account the approaches taken in modern security rights registration systems, both national and international (A/CN.9/714, para. 13). The Commission also noted that, having agreed that the Secured Transactions Guide was consistent with the guiding principles of UNCITRAL texts on e-commerce, the Working Group considered certain issues arising from the use of electronic communications in security rights registries to ensure that, like the Secured

<sup>27</sup> Available from [www.worldbank.org](http://www.worldbank.org).

<sup>28</sup> *Official Records of the General Assembly, Sixty-fifth Session, Supplement No. 17 (A/65/17)*, paras. 265-268.

<sup>29</sup> United Nations publication, Sales No. E.09.V.12.

Transactions Guide, the text on registration would also be consistent with those principles (A/CN.9/714, paras. 34-47).

224. The Commission also noted that, at the nineteenth session of the Working Group, differing views had been expressed as to the form and content of the text to be prepared. One view noted was that the text should be a stand-alone guide that would include an educational part introducing the secured transactions law recommended in the Secured Transactions Guide and a practical part that would include model regulations and commentary thereon. Another view noted was that the text should place more emphasis on model regulations and commentary thereon, which should provide States that had enacted the secured transactions law recommended in the Secured Transactions Guide with practical advice as to the issues to be addressed in the context of the establishment and operation of a general security rights registry (A/CN.9/719, paras. 13-15). The Commission also noted that differing views had also been expressed at that session of the Working Group as to whether the regulations should be formulated as model regulations or as recommendations (A/CN.9/719, para. 46). The Commission further noted that, at its nineteenth session, the Working Group had completed the first reading of the draft Security Rights Registry Guide and draft Model Regulations (A/CN.9/WG.VI/WP.46 and Add.1-3) and had requested the Secretariat to prepare a revised version reflecting the deliberations and decisions of the Working Group (A/CN.9/719, para. 12).

225. The Commission expressed its appreciation to the Working Group for the significant progress achieved in its work and to the Secretariat for the efficient assistance provided to the Working Group. The significance of the work undertaken by Working Group VI was emphasized in particular in view of the efforts currently being undertaken by several States with a view to establishing a general security rights registry and the significant beneficial impact the operation of such a registry would have on the availability and cost of credit. With respect to the form and content of the text to be prepared, it was stated that, following the approach used with respect to the Secured Transactions Guide, the text should be formulated as a guide with commentary and recommendations rather than as a text with model regulations and commentary thereon. In that connection, it was noted that the next version of the text before the Working Group would be formulated in a way that would leave the matter open until the Working Group had made a decision. After discussion, the Commission agreed that, leaving aside the decision on the form and content of the text to be prepared for the Working Group, the mandate of the Working Group did not need to be modified and that, in any case, a final decision would be made by the Commission once the Working Group had completed its work and submitted the text to the Commission.

226. Noting the significant progress made by the Working Group in its work and the guidance urgently needed by a number of States, the Commission requested the Working Group to proceed with its work expeditiously and to try to complete its work, hopefully in time for the text to be submitted to the Commission for final approval and adoption at its forty-fifth session, in 2012.

227. As to the future work of the Working Group, it was generally agreed that it was premature for the Commission to consider the matter and make any decision at the current session. The Commission left it to the Working Group to discuss its possible future work and make proposals to the Commission. In that connection, the

suggestion was made that, after completing its text on registration, the Working Group should embark on a project aimed at converting the recommendations in the Secured Transactions Guide into a model law.

228. The Commission next turned to the question of whether a joint set of principles on effective secured transactions regimes should be prepared in cooperation with the World Bank on the basis of the recommendations of the Secured Transactions Guide. It was noted that, based on the precedent of the coordination between the World Bank Principles for Effective Insolvency and Creditor/Debtor Regimes and the UNCITRAL Legislative Guide on Insolvency Law, a draft of those principles could be prepared by the Secretariat in cooperation with the World Bank, through its Legal Vice-Presidency, and outside experts, within existing resources and without utilizing Working Group resources. The Commission welcomed the preparation of such principles. It was widely felt that, as the Secured Transactions Guide became the general reference material in secured transactions law reform efforts, principles reflecting the recommendations of the Secured Transactions Guide would promote law reform based on generally acceptable international standards. After discussion, the Commission requested the Secretariat to proceed with the preparation, in cooperation with the World Bank and outside experts, of a joint set of principles on effective secured transactions regimes. It was agreed that such efforts would be aimed at preparing a text that would be approved by both the Commission and the World Bank and could include consultations and meetings with experts from the public and private sector, within existing resources.

229. The Commission next considered the question of whether efforts should be undertaken with a view to ensuring consistency between a proposed European Union instrument on the law applicable to the third-party effects of assignments of receivables and the United Nations Convention on the Assignment of Receivables in International Trade,<sup>30</sup> which addressed that issue.

230. The Commission noted that the European Commission had adopted a regulation on the law applicable to contractual obligations (Rome I)<sup>31</sup> and that article 14 of the Rome I Regulation dealt with the law applicable to the relationship between an assignor and an assignee under a voluntary assignment or contractual subrogation of a claim and the relationship between the assignee and the debtor in a way that was consistent with the United Nations Assignment Convention and the Secured Transactions Guide. As to the law applicable to the proprietary effects of assignments, the Commission noted that the Rome I Regulation had not addressed the matter and that the European Commission was currently preparing a study.

231. The Commission agreed that a coordinated approach to the matter was in the interest of all States, as otherwise a different conflict-of-laws rule would apply depending on whether a dispute was brought before a court in a European Union member State or not. It was widely felt that such a result would undermine certainty as to the law applicable to the proprietary effects of assignments and create unnecessary obstacles to international receivables financing, which could not be distinguished from regional receivables financing. After discussion, the Commission requested the Secretariat to cooperate closely with the European Commission with a

---

<sup>30</sup> General Assembly resolution 56/81, annex.

<sup>31</sup> Regulation (EC) No. 593/2008 of the European Parliament and of the Council of the European Union of 17 June 2008.

view to ensuring a coordinated approach to the matter, taking into account the approach followed in the United Nations Assignment Convention and the Secured Transactions Guide. The Commission also encouraged the European Commission to consider removing any obstacle to wide adoption of the United Nations Assignment Convention and the Secured Transactions Guide by States, including by European Union member States that wished to adopt them on the understanding that a future European Union instrument on the matter might limit their application.

## **IX. Current and possible future work in the area of electronic commerce**

232. The Commission had before it a note by the Secretariat (A/CN.9/728 and Add.1) summarizing the discussions that had taken place at the colloquium on electronic commerce, held in New York from 14 to 16 February 2011.<sup>32</sup> The Commission was informed that the Secretariat received regular requests for expert input from other bodies in the United Nations system, as well as from other intergovernmental organizations, and that some of those requests called for a comprehensive discussion in a specialized forum and might therefore best be addressed in Working Group IV (Electronic Commerce).

233. The Commission took note of the information contained in the note prepared by the Secretariat. Broad consensus was expressed on the desirability of reconvening Working Group IV. In particular, it was noted that the past work of UNCITRAL in the field of electronic commerce offered a particularly significant contribution to the advancement of the use of electronic communications in international trade and that too long a lapse in the meetings of that Working Group might erode that leadership, as well as prevent UNCITRAL from updating and complementing existing legal standards in that rapidly evolving field. The view was also expressed, however, that none of the topics under consideration was ripe for discussion at the working group level and that therefore a decision on future meetings of Working Group IV should be further postponed.

234. The need to give a clear mandate to the Working Group was stressed; however, it was also indicated that many of the topics under consideration were, in practice, intersecting. It was further noted that that was particularly the case for electronic single-window facilities. It was suggested that, time and resources permitting, a reconvened Working Group should consider a recommendation pending in the United Nations Centre for Trade Facilitation and Electronic Business (CEFACT) that raised issues under UNCITRAL instruments.

235. Support was expressed for dealing on a priority basis with legal issues relating to the use of electronic transferable records. In particular, it was recalled that such work would be beneficial not only for the generic promotion of electronic communications in international trade but also for addressing some specific issues such as assisting in the implementation of the United Nations Convention on Contracts for the International Carriage of Goods Wholly or Partly by Sea

---

<sup>32</sup> Information about the colloquium is also available from [www.uncitral.org/uncitral/en/commission/colloquia/electronic-commerce-2010.html](http://www.uncitral.org/uncitral/en/commission/colloquia/electronic-commerce-2010.html).

(the Rotterdam Rules).<sup>33</sup> Similarly, it was noted, other areas of the transport business, such as aviation, could benefit directly from the formulation of uniform legal standards in the field. It was also noted that the work regarding electronic transferable records might include certain aspects of the other topics discussed in document A/CN.9/728 and Add.1.

236. Some support was also expressed for dealing with legal issues relating to identity management; however, particular caution was recommended when discussing matters touching upon issues, such as privacy and data protection, that had important regulatory aspects. In that regard, it was added, it might be beneficial to wait for further developments so as to better define the terms of a possible future mandate for the Working Group.

237. The importance of mobile commerce, in particular for those countries where connectivity to the information and communication infrastructure was achieved mostly through mobile devices, was also mentioned. In that respect, it was recalled that most legal issues relating to the use of mobile devices were not different in nature from those posed by the use of other electronic devices. It was further said that, while certain mobile commerce practices might call for further study, caution should be used in order to avoid touching upon, on the one hand, issues relating to consumer protection and, on the other hand, issues relating to privacy and data protection.

238. After discussion, the Commission agreed that Working Group IV (Electronic Commerce) should be convened to undertake work in the field of electronic transferable records.

239. The Commission also agreed that the extension of the mandate of Working Group IV to other topics discussed in document A/CN.9/728 and Add.1 as discrete subjects (as opposed to their incidental relation to electronic transferable records) would be further considered at a future session.

240. With respect to legal issues relating to electronic single-window facilities, the Commission welcomed the ongoing cooperation between the Secretariat and other relevant organizations, including the World Customs Organization, and asked the Secretariat to contribute as appropriate, with a view to discussing relevant matters at the working group level when the progress of joint work offered a sufficient level of detail.

## **X. Possible future work in the area of microfinance**

241. The Commission recalled its previous discussions on possible work in the area of microfinance.<sup>34</sup> At its current session, the Commission had before it a note by the Secretariat containing a summary of the proceedings of and the key issues identified at the international colloquium on microfinance, held in Vienna from 12 to 13 January 2011 (A/CN.9/727). The Commission was informed that at the colloquium it was highlighted that, although there had been initiatives, often successful, in a number of States to address issues surrounding microfinance, there

---

<sup>33</sup> General Assembly resolution 63/122, annex.

<sup>34</sup> *Official Records of the General Assembly, Sixty-fourth Session, Supplement No. 17 (A/64/17)*, paras. 432 and 433; and *ibid.*, *Sixty-fifth Session, Supplement No. 17 (A/65/17)*, paras. 275-276 and 280.

was no coherent set of global legal and regulatory measures that could serve as a standard for States wishing to legislate in accordance with international best practice. As noted by some participants, many States were now struggling to find an appropriate regulatory framework to promote financial inclusion through microfinance institutions. UNCITRAL legislative texts were mentioned as instrumental in strengthening a legislative and regulatory framework that could accommodate the needs of the microfinance industry. Subjects indicated included cross-border funding; secured transactions in microfinance, in order to enhance the availability of credit, in particular to small and medium-sized enterprises or clients that did not have sufficient capital or access to other kinds of credit; use of electronic money (e-money); and dispute resolution mechanisms to address the complaints of microfinance users.

242. It was said that conceiving a favourable legal and regulatory framework for microfinance raised various issues for consideration, which included:

- (a) The nature and quality of the regulatory environment;
- (b) The appropriateness of setting limits on interest rates chargeable on microfinance loans;
- (c) Measures to address the problem of overindebtedness;
- (d) The establishment and regulation of credit bureaux;
- (e) Overcollateralization and the use of collateral with no economic value;
- (f) Abusive collection practices;
- (g) Foreign exchange risk where microfinance institutions obtained loan capital from abroad;
- (h) Facilitating the handling of international remittances of funds by microfinance institutions on a cheaper and more efficient basis;
- (i) E-money, including its status as savings; whether “issuers” of e-money were engaged in banking and hence what type of regulation they were subject to; and the coverage of such funds by deposit insurance schemes;
- (j) Enhancing the predictability of the legal status of transactions conducted with mobile devices (for example, in the area of payment services);
- (k) Facilitating the use of agent banking and other forms of branchless banking as a means to make financial services more accessible;
- (l) Measures to promote financial literacy and increase the protection of clients against abusive or unscrupulous lending practices;
- (m) Provision for fair, rapid, transparent and inexpensive processes for the resolution of disputes arising from microfinance transactions;
- (n) Facilitating the use of, and ensuring transparency in, secured lending to microenterprises and small and medium-sized enterprises.

243. The Commission took note of the Secretariat’s involvement in a United Nations inter-agency mechanism for the promotion of inclusive finance, and of the fact that UNCITRAL was the only participant therein focusing on the legal and regulatory aspects of microfinance. The Secretariat was encouraged to continue its

participation in that initiative and to keep abreast of developing legal and regulatory issues with respect to microfinance in order to contribute to the overall effort.

244. The Commission commended the Secretariat for the work done so far in the field of microfinance and expressed unanimous support for continuing work in that field. It was said that microfinance was an important tool for poverty alleviation and that in some countries it was a significant element of the national economy; hence developing a legislative framework for microfinance would prove extremely useful. It was generally felt that UNCITRAL could make a substantial contribution to that matter, as the existing legislative frameworks were not seen as fully adequate. It was explained that some States had recently adopted legislation in that field, and it was proposed that the experience of such States should be shared with others.

245. It was suggested that the work that could be implemented needed to be focused on certain well-defined matters and that the boundaries of the contemplated work should be further determined. It was therefore proposed to identify areas where specific work could be implemented and where further research would be needed as a result, keeping in mind the scope of the mandate of UNCITRAL and its traditional areas of work. It was also suggested that the relations established between UNCITRAL and international organizations active in the field of microfinance should continue to be developed. In particular, the UNCITRAL secretariat was encouraged to pursue the development of its relations with other United Nations bodies and agencies active in the field, as well as with the group responsible for financial inclusion in the Group of 20 Finance Ministers and Central Bank Governors, namely the Global Partnership for Financial Inclusion. The Secretariat was urged to be cautious with regard to unnecessary overlap or interference with matters of banking regulation, including matters of prudential regulation such as those addressed by the Basel Core Principles for Effective Banking Supervision.<sup>35</sup>

246. After discussion, the Commission agreed to include microfinance as an item for the future work of UNCITRAL and to further consider that matter at its next session, in 2012. In order to assist the Commission in defining the areas where work was needed, the Commission requested the Secretariat to circulate to all States a short questionnaire regarding their experience with the establishment of a legislative and regulatory framework for microfinance, including any obstacles they might have encountered in that regard, for consideration by the Commission at its next session. Further, the Commission agreed that, among the topics identified by the Secretariat and listed in paragraph 242 above, the Secretariat should, resources permitting, undertake research for consideration by the Commission at a later session on the items mentioned in subparagraphs (e), (i), (m) and (n) of paragraph 242. That work should be done bearing in mind the need for States to have in place an effective overall legal and regulatory framework for microfinance. The Secretariat was invited to consider further the areas of secured finance, dispute resolution and electronic commerce, in connection with microfinance. It was emphasized that the Secretariat should take account of work already carried out by other institutions in that field in order to avoid duplication of efforts.

---

<sup>35</sup> Available from [www.bis.org/publ/bcbs129.htm](http://www.bis.org/publ/bcbs129.htm).

## **XI. Endorsement of texts of other organizations: 2010 revision of the Uniform Rules for Demand Guarantees published by the International Chamber of Commerce**

247. The International Chamber of Commerce requested the Commission to consider recommending the use of the 2010 revision of the Uniform Rules for Demand Guarantees (URDG 758), as it had done most recently with respect to the 2007 revision of the Chamber's Uniform Customs and Practice for Documentary Credits (UCP 600).<sup>36</sup>

248. The Commission recognized that the Uniform Rules for Demand Guarantees provided a new set of rules applicable to demand guarantees securing monetary and performance obligations in a wide array of international and domestic contracts. It was also noted that the Uniform Rules were fully compatible with the United Nations Convention on Independent Guarantees and Stand-by Letters of Credit<sup>37</sup> prepared by the Commission in 1995 and endorsed by the International Chamber of Commerce in 1999.

249. Taking note of the significant revisions made to the previous version of the Uniform Rules and their usefulness in facilitating international trade, the Commission, at its 937th meeting, on 5 July 2011, agreed to recommend the use of the Uniform Rules in international trade and adopted the following decision:

*The United Nations Commission on International Trade Law,*

*Expressing* its appreciation to the International Chamber of Commerce for transmitting to it the revised text of the Uniform Rules for Demand Guarantees, which was approved by the Executive Board of the International Chamber of Commerce on 3 December 2009, with effect from 1 July 2010,

*Congratulating* the International Chamber of Commerce on having made a further contribution to the facilitation of international trade by making its rules on demand guarantees clearer, more precise and more comprehensive while including innovative features reflecting recent practices,

*Noting* that the Uniform Rules for Demand Guarantees constitute a valuable contribution to the facilitation of international trade,

*Commends* the use of the 2010 revision of the Uniform Rules for Demand Guarantees, as appropriate, in transactions involving demand guarantees.

## **XII. Monitoring implementation of the 1958 New York Convention**

250. The Commission recalled its previous discussions on monitoring implementation of the 1958 New York Convention.<sup>38</sup> At its current session, the

<sup>36</sup> *Official Records of the General Assembly, Sixty-fourth Session, Supplement No. 17 (A/64/17)*, paras. 356-357.

<sup>37</sup> United Nations, *Treaty Series*, vol. 2169, No. 38030.

<sup>38</sup> *Official Records of the General Assembly, Fiftieth Session, Supplement No. 17 (A/50/17)*, paras. 401-404; and *ibid.*, *Sixty-third Session, Supplement No. 17* and corrigendum (A/63/17 and Corr.1), paras. 355 and 356.

Commission was informed that the Secretariat was carrying out two complementary projects in that regard.

251. One project related to the publication on the UNCITRAL website of information contributed by States on their legislative implementation of the New York Convention. The Commission expressed its appreciation to States that had already contributed information and urged all States to continue providing the Secretariat with accurate information to ensure that the data published on the UNCITRAL website remained up to date.

252. The other project related to the preparation of a guide on the New York Convention. The Commission was informed that the preparation of the guide was currently being carried out by the Secretariat, in close cooperation with G. Bermann and E. Gaillard, who had established research teams to work on the project. The Commission expressed its appreciation for the steps taken so far and requested the Secretariat to pursue its efforts towards the preparation of the guide on the New York Convention. It was agreed that a more substantive presentation on progress made in the preparation of the guide would be made at a future session of the Commission (see also para. 207 above).

### **XIII. Technical assistance: law reform**

#### **A. General discussion**

253. The Commission had before it a note by the Secretariat (A/CN.9/724) describing the technical cooperation and assistance activities undertaken subsequent to the date of the note on that topic submitted to the Commission at its forty-third session, in 2010 (A/CN.9/695 and Add.1). The Commission stressed the importance of such technical cooperation and assistance and expressed its appreciation for the activities undertaken by the Secretariat referred to in document A/CN.9/724. It was explained that legislative technical assistance, in particular to developing countries, was no less important an activity than the formulation of uniform rules itself. For that reason, the Secretariat was encouraged to continue to provide such assistance to the broadest extent possible and to improve its outreach, in particular to developing countries.

254. The Commission agreed on the need for a comprehensive approach to the furtherance of its mandate, based on a life cycle for uniform legislative texts comprised of four steps: identification of adequate topics of work; preparation of texts; adequate promotion of the adoption and use of those texts; and monitoring their uniform interpretation and application. It was noted that, while UNCITRAL had prepared a number of legislative standards, their rate of adoption varied significantly, and therefore the promotion of the adoption and use of those standards seemed to call for specific attention.

255. The Commission took note of the strategic framework for technical assistance suggested by the Secretariat (A/CN.9/724, paras. 10-48) and endorsed its priority lines of action, which included the following: stressing a regional and subregional approach in order not only to achieve economies of scale but also to complement ongoing regional integration initiatives; promoting the universal adoption of those international trade law texts already enjoying wide acceptance, namely the

New York Convention (a United Nations convention adopted prior to the establishment of the Commission but actively promoted by the Commission) and the United Nations Convention on Contracts for the International Sale of Goods;<sup>39</sup> and making particular efforts to disseminate information on recently adopted texts, with a view, if such texts were treaties, to fostering their early adoption and entry into force. In that respect, the benefits relating to further academic and training activities, in particular for members of the judiciary and of the bar, were illustrated.

256. In relation to the promotion of recently adopted texts, the Commission heard a statement from the Comité Maritime International. The Comité commended UNCITRAL for its work and, in particular, for the preparation of the Rotterdam Rules. The Comité illustrated the number of benefits arising from the adoption of the Rotterdam Rules, which were described as a modern and comprehensive treaty that was able to address the needs of all operators involved in maritime transport. In reiterating its readiness to contribute to the promotion and implementation of the Rotterdam Rules, the Comité stressed the need for an early adherence to the Rotterdam Rules by all States so as to establish that text firmly and as soon as possible as the sole global standard in its field.

257. The desirability of ensuring better communication on the mandate and work of UNCITRAL between the Commission and the Secretariat on the one hand and the Commission and decision makers on trade law reform on the other hand was noted. It was suggested that UNCITRAL delegates and experts might be in a position to further contribute to the mandate of UNCITRAL by assisting in identifying those decision makers in the respective capitals.

258. The Commission noted that the continuing ability to respond to requests from States and regional organizations for technical cooperation and assistance activities was dependent upon the availability of funds to meet associated costs. The Commission further noted that, despite efforts by the Secretariat to solicit new donations, funds available in the UNCITRAL Trust Fund for Symposia were very limited. Accordingly, requests for technical cooperation and assistance activities continued to be very carefully considered, and the number of such activities, which of late had mostly been carried out on a cost-share or no-cost basis, was limited. The Commission requested the Secretariat to continue exploring alternative sources of extrabudgetary funding, in particular by more extensively engaging permanent missions, as well as other possible partners in the public and private sectors.

259. The Commission appealed to all States to assist the Secretariat in identifying sources of available funding in their States or organizations that might partner with UNCITRAL to support technical cooperation and assistance activities to promote the use and adoption of UNCITRAL texts, as well as wider participation in the development of such activities. In particular, the Commission asked the Secretariat to circulate, both formally and informally, a questionnaire to take stock of existing and possible sources of funding for technical cooperation and assistance activities.

260. The Commission also reiterated its appeal to all States, international organizations and other interested entities to consider making contributions to the UNCITRAL Trust Fund for Symposia, if possible in the form of multi-year contributions or as specific-purpose contributions, in order to facilitate planning and

---

<sup>39</sup> United Nations, *Treaty Series*, vol. 1489, No. 25567.

enable the Secretariat to meet the increasing number of requests from developing countries and countries with economies in transition for technical cooperation and assistance activities. The Commission expressed its appreciation to Indonesia for contributing to the Trust Fund since the Commission's forty-third session and to organizations that had contributed to the programme by providing funds or by hosting seminars.

261. The Commission appealed to the relevant bodies of the United Nations system, organizations, institutions and individuals to make voluntary contributions to the trust fund established to provide travel assistance to developing countries that were members of the Commission. The Commission expressed its appreciation to Austria for contributing to the UNCITRAL Trust Fund since the Commission's forty-third session, thereby enabling travel assistance to be granted to developing countries that were members of UNCITRAL.

## **B. Establishing a regional presence of UNCITRAL**

262. The Commission recalled that, at its forty-second session, in 2009, it had requested the Secretariat to explore the possibility of establishing a presence in regions or specific countries by, for example, having dedicated staff in United Nations field offices, collaborating with such existing field offices or establishing Commission country offices, with a view to facilitating the provision of technical assistance, in particular to developing countries, with respect to the use and adoption of UNCITRAL texts.<sup>40</sup> The General Assembly, in paragraph 10 (e) of its resolution 64/111, had noted that request.

263. The Commission was informed that the options available for establishing such a presence were limited because the regular budget of the Secretariat did not include funds for such activities and currently available extrabudgetary funds for technical assistance projects were scarce. Therefore, the Secretariat, in a note verbale dated 18 March 2011, had invited Member States of the United Nations to express their interest in establishing UNCITRAL regional centres in different parts of the world. States were asked to consider providing substantive financial contributions and necessary privileges and immunities, as well as office premises and facilities, to enable UNCITRAL regional centres to perform their functions.

264. The Commission was also informed that UNCITRAL regional centres, envisaged as project-based offices, would enhance international trade and development by disseminating international trade norms and standards, in particular those elaborated by UNCITRAL, by providing bilateral and multilateral technical assistance, by undertaking coordination activities with international and regional organizations active in the region and by collecting relevant information about UNCITRAL-related activities, including enactments by States in the region. Regional centres would also function as a channel of communication between States in the region and UNCITRAL. Broad support was expressed for the establishment of regional centres, which was considered a novel yet important step for the Commission in reaching out and providing technical assistance to developing

---

<sup>40</sup> *Official Records of the General Assembly, Sixty-fourth Session, Supplement No. 17 (A/64/17)*, para. 363.

countries. Broad support was also expressed for the initiative undertaken by the Secretariat to that end.

265. As to the funding of UNCITRAL regional centres, it was understood that, under the limited resources currently available to the Secretariat, the establishment of a regional presence would have to rely entirely on extrabudgetary sources, including but not limited to voluntary contributions from States. In that context, the concern was raised that, while expansion of technical assistance through the establishment of regional centres would be beneficial to recipient States, it should not entail a burden on the already limited resources of the Secretariat. In response to that concern, it was explained that sources of funding would remain completely separate, since the Secretariat was entirely funded by the regular budget of the United Nations. While the Secretariat staff would obviously need to invest some of its time in establishing and monitoring the activities of the regional centres, including in the training of project personnel, a balanced approach would be taken to ensure that the benefits resulting from the establishment of a regional centre would outweigh any related cost associated with the time spent by the Secretariat staff on such activities. It was also indicated that the Commission would be regularly informed about the activities of regional centres. In that context, it was noted that regional centres would need to engage actively in fund-raising activities so as to maintain a self-sustaining budget.

266. The Commission noted that, as at 24 June 2011, the Dominican Republic, El Salvador, Kenya, Malaysia, the Republic of Korea and Singapore had formally expressed an interest in hosting an UNCITRAL regional centre. It also noted that several other States had expressed their support for the initiative. At the current session, Argentina also expressed an interest in hosting an UNCITRAL regional centre.

267. The Commission was informed of the specific offer received from the Republic of Korea for a pilot project whereby the Government of the Republic of Korea, through its Ministry of Justice and the Incheon Metropolitan City Office, had pledged the following for the establishment and operation of the “UNCITRAL Regional Centre for Asia and the Pacific”:

- An annual financial contribution of \$500,000 to the UNCITRAL Trust Fund for Symposia for an initial five-year period
- Office premises in Incheon, Republic of Korea, and other in-kind contributions, including equipment and furniture
- One loaned, non-reimbursable staff member (a legal expert) to engage in technical cooperation and assistance activities.

268. As Malaysia and Singapore also expressed a general interest in hosting an UNCITRAL regional centre in Asia and the Pacific, the Commission noted the possibility of establishing additional regional centres in that region. In that context, the Secretariat was requested to consult further with the relevant authorities of Malaysia and Singapore to ensure that a comprehensive and integrated approach would be implemented to maximize efficiency in providing technical assistance in Asia and the Pacific.

269. After discussion, the Commission expressed its appreciation to the Secretariat for taking the initiative to establish a regional presence of UNCITRAL and its

gratitude to the Government of the Republic of Korea for its generous contribution to the pilot project. Accordingly, the Commission approved the establishment of an UNCITRAL Regional Centre for Asia and the Pacific in the Republic of Korea, subject to the relevant rules and regulations of the United Nations and the internal approval process in the Office of Legal Affairs.

270. The Secretariat was requested to keep the Commission informed of developments regarding the establishment of UNCITRAL regional centres, including the UNCITRAL Regional Centre for Asia and the Pacific, and in particular their funding and budget situations.

#### **XIV. Promotion of ways and means of ensuring a uniform interpretation and application of UNCITRAL legal texts**

271. The Commission considered a note by the Secretariat on the promotion of ways and means of ensuring a uniform interpretation and application of UNCITRAL legal texts (A/CN.9/726), which provided information on the current status of the CLOUT system and an update on work undertaken by the Secretariat on digests of case law relating to the United Nations Sales Convention and the Model Law on Arbitration. The Commission also drew attention to the resource-intensive nature of such work and the need for further resources to sustain it.

272. The Commission noted with appreciation the continuing work under the CLOUT system. As at 6 May 2011, 107 issues of compiled case-law abstracts from the CLOUT system had been prepared for publication, dealing with 1,055 cases relating mainly to the United Nations Sales Convention and the Model Law on Arbitration. The Commission noted the increase in the number of abstracts on the UNCITRAL Model Law on Cross-Border Insolvency and on the New York Convention, as well as the publication of abstracts related to the Convention on the Limitation Period in the International Sale of Goods.<sup>41</sup> The Commission also noted that a majority of the published abstracts concerned cases from Western European and other States and that the remainder concerned cases from other regions (Asia and the Pacific, Eastern Europe, Africa and Latin America and the Caribbean). A few abstracts referred to International Chamber of Commerce awards. The Commission expressed its appreciation to the national correspondents and other contributors for their work in developing the CLOUT system. The Secretariat was encouraged to continue its efforts to extend the composition and vitality of the network of contributors to the CLOUT system.

273. The Commission was informed that a meeting of national correspondents would be held on 7 July 2011 and that it would discuss, among other issues, the revised digest of case law on the United Nations Sales Convention and the advanced work on the digest on the Model Law on Arbitration.

274. There was broad agreement that the CLOUT system, including the digests, continued to be an important aspect of the work undertaken by UNCITRAL for promoting the awareness, harmonization and uniform interpretation of UNCITRAL

---

<sup>41</sup> *Official Records of the United Nations Conference on Prescription (Limitation) in the International Sale of Goods, New York, 20 May-14 June 1974* (United Nations publication, Sales No. E.74.V.8), part I.

texts. The Commission thanked the Secretariat for its work in that area and expressed its full support for a call for increased resources to support and enlarge that work.

## XV. Status and promotion of UNCITRAL legal texts

275. The Commission considered the status of the conventions and model laws emanating from its work and the status of the New York Convention, on the basis of a note by the Secretariat (A/CN.9/723) and information obtained by the Secretariat subsequent to the submission of that note. The Commission noted with appreciation the information on the following treaty actions and legislative enactments received since its forty-third session regarding the following instruments:

(a) Convention on the Limitation Period in the International Sale of Goods, as amended, of 1980:<sup>42</sup> accession by the Dominican Republic (21 States parties);

(b) Convention on the Recognition and Enforcement of Foreign Arbitral Awards of 1958:<sup>43</sup> accession by Fiji (145 States parties);

(c) UNCITRAL Model Law on International Commercial Arbitration of 1985, with amendments as adopted in 2006:<sup>44</sup> new legislation based on the Model Law as amended in 2006 had been adopted in Australia (2010), Brunei Darussalam (2010), Costa Rica (2011), Georgia (2009), Malaysia (2005) and Hong Kong, China (2010);

(d) UNCITRAL Model Law on International Commercial Conciliation of 2002:<sup>45</sup> new legislation based on the Model Law had been adopted in Montenegro (2005) and in Canada, in the Province of Ontario (2010);

(e) United Nations Convention on Contracts for the International Carriage of Goods Wholly or Partly by Sea of 2008:<sup>46</sup> new signatures by the Democratic Republic of the Congo and Luxembourg and ratification by Spain (one State party);

(f) UNCITRAL Model Law on Electronic Commerce of 1996:<sup>47</sup> new legislation based on the Model Law had been adopted in Bahrain (2002), Fiji (2008), Ghana (2008), Paraguay (2010), Qatar (2010), Rwanda (2010), Samoa (2008), Vanuatu (2000) and Zambia (2009);

(g) UNCITRAL Model Law on Electronic Signatures of 2001:<sup>48</sup> new legislation based on the Model Law had been adopted in Ghana (2008), Paraguay (2010), Qatar (2010), Rwanda (2010) and Zambia (2009); legislation influenced by

<sup>42</sup> *Official Records of the United Nations Conference on Contracts for the International Sale of Goods, Vienna, 10 March-11 April 1980* (United Nations publication, Sales No. E.81.IV.3), part I.

<sup>43</sup> United Nations, *Treaty Series*, vol. 330, No. 4739.

<sup>44</sup> *Official Records of the General Assembly, Fortieth Session, Supplement No. 17* (A/40/17), annex I; and *ibid.*, *Sixty-first Session, Supplement No. 17* (A/61/17), annex I.

<sup>45</sup> *Ibid.*, *Fifty-seventh Session, Supplement No. 17* (A/57/17), annex I.

<sup>46</sup> General Assembly resolution 63/122, annex. The Convention has not yet entered into force; it requires 20 States parties for entry into force.

<sup>47</sup> *Official Records of the General Assembly, Fifty-first Session, Supplement No. 17* (A/51/17), annex I.

<sup>48</sup> *Ibid.*, *Fifty-sixth Session, Supplement No. 17* and corrigendum (A/56/17 and Corr.3), annex II.

the principles on which the Model Law was based had been adopted in Nicaragua (2010).

276. The Commission took note of the bibliography of recent writings related to the work of UNCITRAL (A/CN.9/722) and noted with appreciation the influence of UNCITRAL legislative guides, practice guides and contractual texts. In that context, it was noted that Colombia had passed legislation responding to part three of the UNCITRAL Legislative Guide on Insolvency Law, on the treatment of enterprise groups in insolvency.<sup>49</sup>

## **XVI. Coordination and cooperation**

### **A. General**

277. The Commission had before it a note by the Secretariat (A/CN.9/725) providing information on the activities of other international organizations active in the field of international trade law in which the UNCITRAL secretariat had participated since the last note to the Commission on that topic (A/CN.9/707 and Add.1).<sup>50</sup>

278. The Commission noted with appreciation that, pursuant to General Assembly resolution 65/21,<sup>51</sup> the Secretariat had engaged in a dialogue with a number of organizations, including the European Union, the Hague Conference on Private International Law (the Hague Conference), the Organization for Economic Cooperation and Development, the UNCTAD-led Inter-Agency Cluster on Trade and Productive Capacity of the United Nations System Chief Executives Board for Coordination, Unidroit, the World Bank and the World Intellectual Property Organization. The Secretariat principally participated in expert groups, working groups and plenary meetings of those organizations, with the purpose of sharing information and expertise and avoiding duplication of work in the resultant work products. The Commission noted that that work often involved travel to meetings of those organizations and the expenditure of funds allocated for official travel of its secretariat. The Commission reiterated the importance of coordination work being undertaken by UNCITRAL as the core legal body in the United Nations system in the field of international trade law and expressed its support for the use of travel funds for that purpose.

279. By way of example of current efforts at coordination, the Commission took note in particular of the activities involving the Hague Conference and Unidroit.

---

<sup>49</sup> Available in pre-release form from [www.uncitral.org/uncitral/en/uncitral\\_texts/insolvency.html](http://www.uncitral.org/uncitral/en/uncitral_texts/insolvency.html).

<sup>50</sup> The notes by the Secretariat under the present agenda item are prepared pursuant to paragraph 5 (b) of General Assembly resolution 34/142 and in accordance with the mandate of UNCITRAL. In that resolution, the Assembly requested the Secretary-General to place before the Commission, at each of its sessions, a report on the legal activities of the international organs, organizations and bodies concerned with international trade law, together with recommendations as to the steps to be taken by the Commission to fulfil its mandate of coordinating the work of organizations active in the field of international trade law and encouraging cooperation among them.

<sup>51</sup> See para. 7 of the resolution.

## **B. Coordination and cooperation in the field of security interests**

280. The Commission had before it a paper prepared jointly by the Permanent Bureau of the Hague Conference and the secretariats of UNCITRAL and Unidroit with the assistance of outside experts (in particular, Neil Cohen and Steven Weise) and entitled “Comparison and analysis of major features of international instruments relating to secured transactions” (A/CN.9/720). It was noted that the Permanent Bureau of the Hague Conference and the secretariats of UNCITRAL and Unidroit planned to give that paper the widest possible dissemination, including by way of a United Nations sales publication to be issued in line with the relevant United Nations publication rules and the terms agreed upon with the Permanent Bureau of the Hague Conference and the secretariat of Unidroit.

281. The Commission welcomed the paper and expressed its appreciation to its secretariat, the Permanent Bureau of the Hague Conference and the secretariat of Unidroit, as well as to all experts involved in preparing the paper. It was widely felt that the paper was reflective of the kind of cooperation that the Commission had been supporting for years. It was also stated that, by summarizing the scope of application of the various instruments, showing how they could interact with one another and providing a comparative understanding of the basic themes covered by each instrument, the paper would be highly useful in assisting policymakers in States that wished to adopt all of those instruments. It was observed that the paper might pave the way for possible future papers explaining the interrelationship of texts prepared by the three organizations mentioned. In that context, however, it was noted that caution should be exercised to avoid creating uncertainty as to the relationship between the various texts that might be involved.

282. The suggestion was made that, in the context of the discussion of the Unidroit Model Law on Leasing,<sup>52</sup> reference should be made to the 1988 Unidroit Convention on International Financial Leasing<sup>53</sup> and to the fact that there was no overlap between the Unidroit Model Law and the 2001 Protocol to the Convention on International Interests in Mobile Equipment on Matters specific to Aircraft Equipment,<sup>54</sup> as the Unidroit Model Law excluded leasing of large aircraft equipment, unless otherwise agreed by the parties. The suggestion was also made that, in the context of the description of the assets covered by the 2009 Unidroit Convention on Substantive Rules for Intermediated Securities,<sup>55</sup> reference should also be made to certain aspects relating to non-intermediated securities that were also covered.

283. After discussion, subject to addressing the above-mentioned suggestions in cooperation with the secretariat of Unidroit, the Commission approved the paper and requested that it be given the widest possible dissemination, including by way of a United Nations sales publication with proper recognition of the contribution of the Permanent Bureau of the Hague Conference and the secretariat of Unidroit.

## C. Reports of other international organizations

284. The Commission took note of statements made on behalf of the following international organizations.

### 1. International Institute for the Unification of Private Law (Unidroit)

285. The Commission heard a statement on behalf of Unidroit. Unidroit welcomed the current coordination and cooperation with UNCITRAL and reaffirmed its commitment to cooperating closely with the Commission with a view to ensuring consistency, avoiding overlap and duplication in the work of the two organizations and making the best use of the resources made available by the respective member States. Mention was made of the document on the work of UNCITRAL, Unidroit and the Hague Conference in the area of secured transactions (see paras. 280-283 above) as a concrete joint product of that tripartite collaboration. Unidroit expressed its appreciation to UNCITRAL for having coordinated and sponsored that project and expressed the hope that a series of joint projects could follow.

286. Unidroit reported that:

(a) At the ninetieth session of the Unidroit Governing Council, held in Rome from 9 to 11 May 2011, the Council had adopted by acclamation the third edition of the Unidroit Principles of International Commercial Contracts (to be known as “Unidroit Principles 2010”). The new edition included four new chapters dealing with the unwinding of failed contracts, illegality, plurality of obligors and obligees, and conditional obligations. The Council authorized the publication and promotion of the Unidroit Principles 2010 worldwide and mandated the Unidroit secretariat to take the necessary steps to secure their formal endorsement by UNCITRAL;

(b) Unidroit was preparing the third protocol, dealing with space assets, of the 2001 Convention on International Interests on Mobile Equipment (the “Cape Town Convention”). As at 1 July 2011, there were 46 Contracting States to the Cape Town Convention and 40 Contracting States to the Aircraft Protocol. The Governing Council had authorized the Unidroit secretariat to transmit the text of the draft Protocol to a diplomatic conference for adoption. The Government of Germany had agreed to host such a conference, which would take place in Berlin from 27 February to 9 March 2012;

(c) Publication of the revised final version of the Official Commentary to the 2009 Unidroit Convention on Substantive Rules for Intermediated Securities should occur during the third quarter of 2011. In September 2010, the Unidroit secretariat organized a colloquium on financial markets law, with a view to identifying possible topics suitable for insertion in a future legislative guide on principles and rules that could enhance trading in securities in emerging markets. The presentations made at the colloquium were published in a special issue of the *Uniform Law Review* that had appeared earlier in 2011. Groundwork on the legislative guide on the principles and rules was under way and was expected to be reviewed at the second meeting of the Emerging Markets Committee (tentatively scheduled for 28 and 29 March 2012);

(d) Preparation of uniform principles and rules on the netting of financial instruments had been assigned the highest level of priority. The first meeting of the

study group, composed of regulators, scholars and industry representatives, was held in Rome in April 2011. The next meeting would be held in September 2011;

(e) The Unidroit Governing Council had authorized the Unidroit secretariat to continue its consultations with relevant sectors so as to further develop an understanding of the potential scope and advantages of a possible fourth protocol to the Cape Town Convention, on agricultural, construction and mining equipment. The Unidroit secretariat intended to hold an industry consultation meeting in November 2011;

(f) In agreement with the Unidroit Governing Council, consultations with intergovernmental organizations, in particular the Food and Agriculture Organization of the United Nations and the International Fund for Agricultural Development, in the area of agricultural investment and production were being carried out to better explore synergies and develop joint projects. As follow-up, the Unidroit secretariat intended to organize a colloquium, which would also involve external experts, representatives of Governments of member States and representatives from professional circles, in particular from agribusiness and the finance industry, that were interested in private law issues and agricultural development. The colloquium was tentatively scheduled to be held from 8 to 10 November 2011 and should include a discussion on selection procedures for the award of agricultural projects to potential investors. The participation of UNCITRAL to address that topic would be appreciated;

(g) The Unidroit Governing Council had asked the Unidroit secretariat to conduct informal consultations with Governments and other organizations concerned, with a view to ascertaining the scope and feasibility of a possible international instrument on third-party liability for the malfunctioning of services supported by global navigation satellite systems. The Unidroit secretariat had already held an informal consultation meeting in October 2010, at which participants, while expressing differing views on the topic, had conveyed their general interest in continuing consultations;

(h) At its ninetieth session, the Governing Council requested the Unidroit secretariat to proceed with the convening of a follow-up committee of the 1995 Unidroit Convention on Stolen or Illegally Exported Cultural Objects,<sup>56</sup> which as at 1 July 2011 had 32 contracting States.

## 2. World Bank

287. The Commission heard a statement on behalf of the World Bank, in which appreciation was expressed to UNCITRAL and its secretariat for the continuing cooperation conducted with the World Bank. It was noted that over the past year the work of the World Bank in supporting the modernization of the legal enabling environment for economic growth and trade had been significantly enhanced by the work of UNCITRAL. In particular, the observer for the World Bank highlighted the work being done by the two organizations in establishing uniform legal frameworks for public procurement, arbitration and conciliation, insolvency and security interests. The adoption at the current session of the UNCITRAL Model Law on Cross-Border Insolvency: the judicial perspective (see para. 198 above), the

---

<sup>56</sup> Available from [www.unidroit.org/english/conventions/1995culturalproperty/main.htm](http://www.unidroit.org/english/conventions/1995culturalproperty/main.htm).

ongoing work on the regulatory environment for registries and the exploratory work regarding the legal environment for microfinance were welcomed. Particular appreciation was expressed for UNCITRAL cooperation in the effort to develop a brief statement of standards for effective secured transactions regimes based on the Secured Transactions Guide and for the support offered to the World Bank Insolvency Task Force, which was beginning to consider the appropriateness and feasibility of identifying common principles across jurisdictions for addressing the problem of individual bankruptcy in the light of the emphasis on broad and inclusive access to finance (see para. 222 above). The World Bank also expressed its appreciation for the readiness of the UNCITRAL secretariat to help identify and marshal technical expertise to support the implementation of the Commission's legislative texts.

**D. International governmental and non-governmental organizations invited to sessions of UNCITRAL and its working groups**

288. The Commission recalled that, at its forty-third session, in 2010, it had adopted the summary of conclusions on UNCITRAL rules of procedure and methods of work.<sup>57</sup> By paragraph 9 of the summary, the Commission had decided to draw up and update as necessary a list of international organizations and non-governmental organizations with which UNCITRAL entertained a long-standing cooperation and which had been invited to Commission sessions.

289. The Commission noted that the lists of intergovernmental and non-governmental organizations invited to sessions of UNCITRAL and its working groups were made available to Member States online. The lists contained the full and abbreviated names of organizations, in English, French and/or Spanish, as appropriate, and provided a link to the websites, if any, of the listed organizations. The Commission further noted that the Secretariat systematically maintained the lists, in particular by including new organizations once it was decided to invite them to sessions of UNCITRAL or to sessions of any UNCITRAL working group.

290. The Commission was informed that since December 2010, when the lists had been first made available to the Member States online, six new non-governmental organizations had been added: Association droit et méditerranée (Jurimed), Fondation pour le droit continental/Civil Law Initiative, International Federation of Purchasing and Supply Management, International Technology Law Association, National Center for Technology and Dispute Resolution and Tehran Regional Arbitration Centre.

291. Concern was expressed by some delegations that they had not received information about the lists and the procedure for obtaining access to them. In response to queries, it was explained that access to the lists was given to all United Nations Member States and that the relevant information had been communicated by the Secretariat to all Member States in a note verbale of 14 December 2010. It was agreed that the relevant information should be circulated again to all Member States. A number of delegations were of the view that it would

---

<sup>57</sup> *Official Records of the General Assembly, Sixty-fifth Session, Supplement No. 17 (A/65/17), annex III.*

be effective also to circulate that information to members of delegations to UNCITRAL.

292. The Secretariat confirmed that the lists contained the names of all organizations currently being invited to sessions of the Commission and its working groups. A suggestion was made that the lists should be made more user-friendly by grouping organizations to indicate the body whose sessions they were invited to attend. The Commission requested the Secretariat to restructure the lists to make it clear which organizations were being invited to which working group and which organizations were being invited to sessions of the Commission.

293. Concern was expressed by some delegations that the States members of the Commission were generally not consulted before new non-governmental organizations were added to the list. In response, the Secretariat observed that, while invitations were issued on behalf of the Commission or the working group, it would be too time-consuming and thus impractical to require that the Secretariat always consult member States before deciding to invite non-governmental organizations to sessions of the Commission or its working groups. It was recalled that there had been extensive discussion of that same issue at the previous four sessions of the Commission.

294. The suggestion was made that the Secretariat should circulate information about new non-governmental organizations that were being considered for invitation by way of a formal communication (i.e. a note verbale to permanent missions or permanent representatives) or an informal communication (e.g. an e-mail to representatives of States attending UNCITRAL sessions) before a working group began work on the newly assigned project. In response, concern was expressed about the practical consequences of the suggestion for the Secretariat, the Commission and its working groups, in particular if an invitation to an organization being objected to by a single State would result in preventing the invitation being issued until after the Commission had considered the matter at its annual session. It was generally agreed that cumbersome consultations by the Secretariat with all States before the decision to extend an invitation to any new non-governmental organization should be avoided.

295. The Secretariat explained the way in which it had proceeded on that matter since the end of the forty-third session of the Commission, in 2010: (a) the Secretariat made the preliminary decision to invite new organizations to sessions, on behalf of the Commission and its working groups; (b) at the same time that the invitation was extended to each such organization, the relevant list of invited organizations accessible to Member States was updated; and (c) the Commission was informed at its annual session of any new organization added to the lists (see para. 290 above). It was noted that, if objections were raised to inviting any new organizations, such objections were expected to be addressed at the session by all member States of the Commission.

296. Some delegations suggested that the Secretariat should specifically draw the attention of States to each time a new organization was added to the list of invitees. After discussion, it was agreed that referring States to the updated lists available online should be sufficient. It was agreed that States should be reminded of the availability of the list as compiled and updated in accordance with paragraphs 292 and 295 above in the standard note verbale circulated to invite Governments to

attend each session of UNCITRAL and its working groups. It was understood that any State willing to record an objection to any new organization being invited could communicate its objection to the Secretariat at any time.

297. A widely supported suggestion was that all documents related to the working methods of UNCITRAL should be made available on a dedicated web page of the UNCITRAL website. The Commission requested the Secretariat to update the website, as appropriate.

298. Another suggestion was that, with a view to increasing awareness of the standard-setting and technical assistance work of the Commission, the Secretariat should investigate the possibility of inviting a small number of prominent specialized law reviews to attend sessions of the Commission or its working groups as observers, on the understanding that those reviews would then disseminate information about new projects and existing standards. After discussion, that suggestion was adopted.

## **XVII. Role of UNCITRAL in promoting the rule of law at the national and international levels**

### **A. Introduction**

299. In paragraph 3 of its resolution 62/70, paragraph 7 of resolution 63/128 and paragraph 9 of resolution 64/116, the General Assembly invited the Commission to comment in its report to the Assembly on its current role in promoting the rule of law. The Commission recalled that it had subsequently transmitted its comments, as requested, in its annual reports to the Assembly.<sup>58</sup>

### **B. Actions as regards relevant General Assembly resolutions at the current session**

300. The Sixth Committee of the General Assembly had reached the understanding that comments related to the sub-topic of “rule of law and transitional justice in conflict and post-conflict situations”, under the agenda item on the rule of law, should address, among other things, the role and future of national and international transitional justice and accountability mechanisms and informal justice systems. The Commission therefore decided that at its current session its comments to the General Assembly would focus on that sub-topic and the issues identified by the Sixth Committee from the perspective of the work of UNCITRAL.

301. The Commission held a panel discussion on that sub-topic, with the participation of UNCITRAL partners active in the implementation of commercial law reforms in the Balkan region. The panellists were requested to provide real-life examples of successful achievements and challenges so that such first-hand information could be relied upon in formulating the Commission’s comments on its

---

<sup>58</sup> *Official Records of the General Assembly, Sixty-third Session, Supplement No. 17* and corrigendum (A/63/17 and Corr.1), paras. 385-386; *ibid.*, *Sixty-fourth Session, Supplement No. 17* (A/64/17), paras. 412-420; and *ibid.*, *Sixty-fifth Session, Supplement No. 17* (A/65/17), paras. 313-336.

role in the promotion of the rule of law at the national and international levels in the relevant context to the General Assembly.

**C. Summary of the panel discussion on the role of UNCITRAL in the promotion of the rule of law in conflict and post-conflict societies**

302. The panellists emphasized that UNCITRAL instruments and resources, if properly used, could facilitate and expedite the transition from post-conflict recovery towards a more stable and inclusive economy. They also pointed to the unique nature of UNCITRAL and its expertise: no other organization was better equipped to provide internationally acceptable model laws and rules in the field of commercial law, support for enactments of uniform commercial laws and, especially, much-needed education and training. The point was made by all panellists that UNCITRAL should use the full range of its technical assistance and cooperation activities to assist post-conflict societies by providing technical assistance to organizations and Governments at the earliest possible time.

303. In the cross-border context, it was in particular emphasized that UNCITRAL provided a neutral, impartial and apolitical forum for the discussion of technical legal issues, which often enabled parties in cross-border conflicts to restart a dialogue. The impact of the work of UNCITRAL on facilitating regional economic integration, which was widely considered to be an effective deterrent against conflict (including by preventing post-conflict societies from sliding back into conflict), was also noted.

304. In the internal reconstruction context, the use of UNCITRAL instruments and other resources for local commercial law and institutional reforms was considered essential in order to quickly regain the trust of the international business community and donors, without which no flow of the finances needed for reconstruction was possible. In that context, reference was made in particular to UNCITRAL instruments in the areas of public procurement, commercial dispute settlement and contracts for the international sale of goods. It was reported that the fact that local commercial laws were based on internationally acceptable standards elaborated by UNCITRAL constituted sufficient assurance for investors and donors as regards their quality. The need for the increased involvement of UNCITRAL in assistance with the enactment of laws based on its texts and with their interpretation and application was emphasized. Also stressed was the importance of translating UNCITRAL texts into the local languages of post-conflict societies to ensure better outreach to and understanding by intended end-users.

305. It was a well-known fact, it was said, that the judiciary in many countries, not only in post-conflict societies, was understaffed, experienced backlogs and lacked skilled personnel. It was acknowledged that judicial reform was neither easy nor fast to implement. Arbitration had proved to be a viable alternative for the resolution of disputes in societies, including post-conflict societies, facing problems with the judicial system. It was noted that, since arbitration centres as a rule were created by private initiative and administered privately, they were considerably easier and faster to set up and administer than courts. It was reported that some arbitration centres might in fact already have a grass-roots foundation in traditional

dispute resolution mechanisms. The role of UNCITRAL instruments in facilitating the use of arbitration was emphasized.

306. Aspects of the work of UNCITRAL in the area of mediation and conciliation were also touched upon. The positive impact of mediation and conciliation on the general culture of dispute resolution in post-conflict societies, resulting in parties shifting from the position of adversaries to one of aiming at the amicable settlement of a dispute, was in particular noted. For such a positive change to occur, UNCITRAL instruments in that field alone were not considered sufficient. The active engagement of UNCITRAL and its partners in raising public awareness of such alternative means of dispute resolution, assisting in creating necessary mediation centres and building necessary skills was considered vital.

307. It was felt that, although it was obvious that arbitration and mediation and conciliation as regulated by UNCITRAL instruments were relevant in a commercial relations context, when experience with their use in that context proved to be positive, they also affected the way in which non-commercial disputes were resolved.

308. The role of such UNCITRAL resources as the CLOUT system (see paras. 271-274 above) in the context of the training of judges and judicial reforms was emphasized. Apart from being considered an important tool for facilitating the uniform interpretation and application of international commercial law standards by judges and arbitrators, the CLOUT system, it was reported, had an impact on the quality of judgements and arbitral awards delivered: where judges and arbitrators were aware that their judgements or awards would be used by CLOUT national correspondents for preparing abstracts for the CLOUT system, the quality of the judgements or awards that they delivered improved considerably.

309. The potential of some UNCITRAL instruments, for example in the area of public procurement, to facilitate the reintegration of some groups affected by conflict (such as aggrieved minorities, internally displaced persons, refugees and former combatants) into normal economic activity was noted. Such reintegration, it was explained, could be possible through margin-of-preference mechanisms and set-aside programmes, which, if applied in a transparent and strictly regulated manner, were allowed under UNCITRAL public procurement instruments. The different nature of those instruments compared with other international instruments in that area (such as those formulated under the auspices of WTO or the European Union) that aimed primarily at opening local markets to international competition was noted, in particular that such UNCITRAL instruments were to be used as templates for national public procurement laws and thus balanced the goals of promoting international competition with the need to build local capacities and address other socio-economic policies of the State. By regulating both large- and small-scale procurement, such instruments would prove to be useful in post-conflict reconstruction contexts, where both types of procurement were highly relevant.

310. The impact of UNCITRAL on bringing informal sectors of the economy into the formal sector was emphasized. It was reported that a typical situation in post-conflict societies characterized by mistrust and dysfunctional legal enforcement mechanisms was for parties to commercial transactions to turn to informal ways of doing business (e.g. oral transactions on the spot between partners that knew each other). While that type of transaction could satisfy the daily basic

needs of people, it did not create employment and was not conducive to economic progress. UNCITRAL instruments, in particular in the areas of contracts for the sale of goods and commercial dispute settlement, proved to be useful in creating (or recreating) a favourable legal environment for more regulated contract-based commercial relations, including in a cross-border context.

311. Specific examples of the use of UNCITRAL texts and other forms of UNCITRAL engagement in post-conflict societies were given. It was noted that the UNCITRAL Model Law on International Commercial Arbitration was the model for the Kosovo<sup>59</sup> Law on Arbitration adopted in January 2007. It was reported that the Kosovo Chamber of Commerce and the American Chamber of Commerce in Kosovo had endorsed the Kosovo Arbitration Rules patterned after the UNCITRAL Arbitration Rules and would soon consider the UNCITRAL Conciliation Rules when drafting their procedural rules for commercial mediation and amendments to the Kosovo Law on Mediation. It was noted that UNCITRAL had recently provided the United States Agency for International Development/Kosovo Systems for Enforcing Agreements and Decisions programme in Kosovo with materials used in the training of arbitrators in May and June of 2011.

312. With reference to document A/CN.9/724, which was before the Commission at the current session under agenda item 14 (see para. 253 above), it was noted that some technical assistance and cooperation activities of the UNCITRAL secretariat in recent years had been undertaken in cooperation with regional economic integration organizations that included as members post-conflict countries and had had a direct impact on those countries. For example, activities had been held on a regular basis in States parties to the Dominican Republic-Central America-United States Free Trade Agreement. Those activities were related, *inter alia*, to the adoption of UNCITRAL texts by the Dominican Republic, El Salvador and Honduras. Another example given was the UNCITRAL secretariat's contribution to the work of the East African Community Task Force on Cyberlaws, a joint initiative of the East African Community secretariat and UNCTAD aimed at the adoption of uniform laws on electronic transactions in the member States of the Community, based, *inter alia*, on relevant UNCITRAL texts. It was noted that the UNCITRAL secretariat interacted with the Task Force on a regular basis. The legislation of Rwanda on electronic commerce (Law No. 18/2010 of 12 May 2010 relating to electronic messages, electronic signatures and electronic transactions) was prepared within that framework.

313. It was also reported that the UNCITRAL secretariat participated in the private sector development programme for Iraq, where, under the leadership of the United Nations Industrial Development Organization, support was being provided for the preparation of new Iraqi legislation on, *inter alia*, public procurement and alternative dispute resolution (arbitration and conciliation). That programme was aimed at creating and enabling an effective, coherent and comprehensive framework for private sector development in Iraq. Its goals included the enhancement of the legal and regulatory framework to foster economic growth. In particular, in March and April 2011, technical assistance was provided with regard to the drafting of public procurement legislation.

---

<sup>59</sup> All references to Kosovo in the present document should be understood to be in compliance with Security Council resolution 1244 (1999).

314. The Commission noted that the UNCITRAL secretariat had also provided comments and assistance to various international institutions that engaged in technical assistance activities in conflict and post-conflict societies. For example, it had provided comments on laws on mediation to the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) as part of its efforts to promote alternative dispute settlement in the Balkans, as well as to the International Finance Corporation, which provided technical assistance to numerous States in the field of dispute settlement, on various arbitration and mediation laws. The Commission noted with appreciation that the involvement of secretariat members in some of those projects was considered key to their successful conclusion. The UNCITRAL secretariat was also providing technical assistance to the World Bank in an effort to promote the adoption in Africa of the New York Convention.

315. The Commission noted the concern expressed in document A/CN.9/724 that the urgent need to counter global threats had attracted attention on a priority basis and demanded significant resources, to the detriment of other areas of work, including international trade law, whose role as an important development tool was often overlooked. International and internal conflicts had weakened the capacity of affected States, including their ability to engage in trade law reform. That had happened in spite of the fact that trade might provide an important contribution to post-conflict recovery, both by fostering economic development and by building mutual trust.

#### **D. Conclusions**

316. The Commission identified the relevance of its current work, in particular in the fields of arbitration and conciliation, public procurement and security rights registries, and its possible future work in the area of microfinance to post-conflict reconstruction in general and to some of the specific subjects identified by the Sixth Committee under that sub-topic (see para. 300 above).

317. The Commission noted the particular relevance of its instruments and resources for creating an environment conducive to post-conflict reconstruction and preventing societies from sliding back into conflict. Its instruments, if used for the enactment of commercial laws in post-conflict societies, contributed to regaining the trust of the business community and donors that was lost or negatively affected as a result of the conflict. Its programmes and resources were also conducive to organizing institutions that supported economic activity, legal education and skills-building, such as chambers of commerce, bar associations and arbitration centres. Its instruments and resources also contributed to strengthening the judiciary (e.g. through the CLOUT system, which helped judges to better understand international commercial law standards and apply them in a uniform way). They could also make positive changes to dispute settlement strategies and behaviour in affected societies.

318. While acknowledging the need for UNCITRAL and its secretariat to be more actively engaged in post-conflict reconstruction, the Commission was of the view that, since it faced a lack of sufficient resources, its contribution in that context would remain modest or might even diminish unless innovative ways were found for the early engagement of UNCITRAL instruments and resources in post-conflict

recovery operations by the United Nations and other donors (such as through the Department of Peacekeeping Operations, the Peacebuilding Commission, the United Nations Development Programme, the World Bank, the European Union and OSCE). The secretariat was encouraged to seek and develop partnerships to that end. It was noted that the establishment of UNCITRAL regional centres, discussed earlier at the current session (see paras. 262-270 above), should also facilitate achieving that goal.

319. It was considered necessary to achieve increased awareness about the work of UNCITRAL, in particular recognition that UNCITRAL dealt not only with complex sophisticated trade practices (such as the assignment of receivables) but also with the basic building blocks of any commercial activity (such as the sale of goods) and thus could make a real and immediate contribution in societies emerging from conflict. Such awareness should be achieved not only in the United Nations system but also among bilateral and multilateral donors, as well as in recipient countries and affected societies. The role of non-governmental organizations and academia in publicizing the relevance of the work of UNCITRAL in that context was noted. It was also suggested that means should be explored for more broadly disseminating UNCITRAL instruments, including by translating them into local languages in post-conflict societies.

320. The Commission reiterated its conviction that promotion of the rule of law in commercial relations should be an integral part of the broader agenda of the United Nations to promote the rule of law at the national and international level, including through the Rule of Law Coordination and Resource Group, supported by the Rule of Law Unit in the Executive Office of the Secretary-General. The Commission was looking forward to being part of strengthened and coordinated rule-of-law activities of the Organization.

#### **E. High-level meeting of the General Assembly on the rule of law at the national and international levels in 2012**

321. The attention of the Commission was drawn to paragraph 13 of General Assembly resolution 65/32. The Commission noted that it would be informed by the Secretariat in due course of the agreed modalities of the high-level segment of the Assembly's sixty-seventh session on the rule of law at the national and international levels so that the Commission could explore at its next session, in 2012, ways and means of ensuring that aspects of the work of UNCITRAL were duly reflected in that meeting. The importance of not overlooking such aspects in discussions during that high-level meeting was noted.

### **XVIII. International commercial arbitration moot competitions**

#### **A. General remarks**

322. The Commission noted with satisfaction that the Willem C. Vis International Commercial Arbitration Moot competition, which involved participants from all over the world, was a very successful educational initiative, having contributed both to the dissemination of information about UNCITRAL instruments and to the

development of university courses dedicated to international commercial arbitration. Special appreciation was expressed to Eric Bergsten, former secretary of the Commission, for developing the moot competition and giving it direction since its inception during the 1993/94 academic year. Appreciation was also expressed to all institutions and persons involved in the preparation and conduct of the moot competitions.

323. The Commission took note with appreciation and expressed support for the continuation of preliminary consultations between the Secretariat, universities and other institutions in various parts of the world regarding the possibility of developing a moot court specifically designed to promote UNCITRAL insolvency standards. In that connection, it was suggested that future inspiration for moot courts could also be derived from UNCITRAL standards on security interests.

## **B. Willem C. Vis International Commercial Arbitration Moot 2011**

324. It was noted that the Association for the Organization and Promotion of the Willem C. Vis International Commercial Arbitration Moot had organized the Eighteenth Moot. The oral arguments phase had taken place in Vienna from 15 to 21 April 2011. As in previous years, the Moot had been co-sponsored by the Commission. It was noted that the legal issues dealt with by the teams of students participating in the Eighteenth Moot had been based on the United Nations Sales Convention and the Arbitration Rules of the Chamber of Arbitration of Milan. A total of 254 teams from law schools in 63 countries had participated in the Eighteenth Moot. The best team in oral arguments was that of the University of Ottawa (Canada). The oral arguments of the Nineteenth Willem C. Vis International Commercial Arbitration Moot would be held in Vienna from 30 March to 5 April 2012.

325. It was also noted that the Eighth Willem C. Vis (East) International Commercial Arbitration Moot had been organized by the Vis East Moot Foundation with the Chartered Institute of Arbitrators, East Asia Branch, and also co-sponsored by the Commission. The final phase had been organized in Hong Kong, China, from 4 to 10 April 2011. A total of 85 teams from 19 countries had taken part in the Eighth (East) Moot. The winning team in the oral arguments was from Bond University (Australia). The Ninth (East) Moot would be held in Hong Kong, China, from 19 to 25 March 2012.

## **C. Madrid Commercial Arbitration Moot 2011**

326. It was noted that Carlos III University of Madrid had organized the Third International Commercial Arbitration Competition in Madrid from 20 to 25 June 2011. The Madrid Moot had also been co-sponsored by the Commission. The legal issues involved in the competition were the international sale of goods (the United Nations Sales Convention), international transport (the Rotterdam Rules) and international commercial arbitration under the Model Law on Arbitration and the New York Convention. A total of nine teams from law schools or masters programmes in five countries had participated in the Madrid Moot in Spanish. The

best team in oral arguments was from the University of Versailles (France). The Fourth Madrid Moot would be held in 2012 on dates yet to be confirmed.

## **XIX. Relevant General Assembly resolutions**

327. The Commission took note with appreciation of the following four General Assembly resolutions adopted on 6 December 2010: resolution 65/21 on the report of the United Nations Commission on International Trade Law on the work of its forty-third session; resolution 65/22 on the UNCITRAL Arbitration Rules as revised in 2010; resolution 65/23 on the UNCITRAL Legislative Guide on Secured Transactions: Supplement on Security Rights in Intellectual Property; and resolution 65/24 on part three of the UNCITRAL Legislative Guide on Insolvency Law.

## **XX. Other business**

### **A. Internship programme**

328. An oral report was presented on the internship programme at the UNCITRAL secretariat. It was in particular noted that, since the secretariat's oral report to the Commission at its forty-third session, in July 2010, 17 new interns had undertaken an internship with the UNCITRAL secretariat.

329. The Commission noted that the secretariat, in selecting interns from the roster of interns maintained and administered by the United Nations Office at Vienna, kept in mind the needs of UNCITRAL and its secretariat at any given period, in particular the need to maintain the UNCITRAL website in the six official languages of the United Nations. The Commission further noted that, when a sufficient pool of qualified candidates was available, the secretariat tried to ensure a balanced gender representation and representation from various geographical regions, paying particular attention to the needs of developing countries and countries with economies in transition.

330. During the period under review, the secretariat received, out of a total of 17 interns, 11 female interns and 12 interns from developing countries and countries with economies in transition. The Commission noted that during the period under review the secretariat faced difficulties in finding on the roster of interns eligible and qualified candidates from African and Latin American and Caribbean States, as well as candidates with Arabic language skills.

### **B. Evaluation of the role of the Secretariat in facilitating the work of the Commission**

331. It was recalled that, as indicated to the Commission at its fortieth session, in 2007,<sup>60</sup> the programme budget for the biennium 2008-2009 listed among the "expected accomplishments of the Secretariat" its contribution to facilitating the

---

<sup>60</sup> *Official Records of the General Assembly, Sixty-second Session, Supplement No. 17 (A/62/17)*, part I, para. 243.

work of UNCITRAL. The performance measure of that expected accomplishment was the level of satisfaction of UNCITRAL with the services provided, as evidenced by a rating on a scale ranging from 1 to 5 (5 being the highest rating).<sup>61</sup> The Commission agreed to provide feedback to the Secretariat. It was recalled that a similar question regarding the level of satisfaction of UNCITRAL with the services provided by the Secretariat had been asked at the close of the forty-third session of the Commission.<sup>62</sup> It was further recalled that, at that session, the question had elicited replies from six delegations, with an average rating of 4.66.

### C. Entitlement to summary records

332. At the request of the Conference Management Service at the United Nations Office at Vienna, the Commission was informed by the Chief of the Conference Management Service of proposals to substitute the production of summary records of UNCITRAL meetings with either: (a) unedited transcripts of proceedings, in all six official languages of the United Nations; or (b) digital recordings of proceedings, which would be searchable to some degree and could be made available on the UNCITRAL website. The objective of those changes would be to respond to calls for the reduction of expenditure on documentation throughout the United Nations. The Chief of the Conference Management Service indicated a possible range of savings that could be achieved as a result of the measures suggested. It was understood that none of the proposed changes would affect the record of proceedings of the current Commission session.

333. While acknowledging the need to address the issue of reducing costs throughout the United Nations Secretariat, the Commission emphasized the importance of records of its meetings being as comprehensive as possible to facilitate subsequent research of the legislative history of the legal standards prepared by UNCITRAL. The Commission noted that, under General Assembly resolution 49/221, it was entitled to summary records. Furthermore, the Commission noted that it had previously addressed the issue of the necessity of those summary records at its thirty-seventh session, in 2004. On that occasion, the Commission had been presented with the options of unedited verbatim transcripts or digital sound recordings and had determined that summary records were essential for its work.<sup>63</sup> From that perspective, the Commission's entitlement to summary records should not be parted with lightly. After discussion, the Commission expressed its willingness to discuss the matter again and agreed to revisit the matter at its next session, on the basis of a report to be prepared by the Secretariat setting out the issues and options involved.

<sup>63</sup> *Ibid.*, *Fifty-ninth Session, Supplement No. 17 (A/59/17)*, paras. 129-130.

## **XXI. Date and place of future meetings**

### **A. Consideration of a budget proposal made by the Secretary-General affecting the alternating pattern of UNCITRAL meetings in New York and Vienna**

334. The Commission was informed of a proposal made by the Secretary-General with the aim of reducing administrative costs involved in servicing UNCITRAL sessions by cutting the travel budget of Secretariat staff to service UNCITRAL meetings in New York. It was noted that the effect of the Secretary-General's proposal would be that the long-established practice of holding sessions of the Commission and its working groups alternately in New York and Vienna would be discontinued and thus, as from 2012, all sessions of the Commission and its Working Groups would be held in Vienna. It was also noted that, for that proposal to come into effect, decisions must be made by the Commission and the General Assembly. The Commission was also informed that the Secretary-General's budget proposal for 2012-2013 involved cutting not only travel funds required for the servicing of meetings in New York (a proposed reduction of \$274,200 for the biennium 2012-2013, or 94.3 per cent of the 2010-2011 appropriation) but also resources budgeted for the following: hiring of consultants (a reduction of \$20,000, or 23.6 per cent); travel of experts (a reduction of \$39,100, or 17.8 per cent); other travel of Secretariat staff (a reduction of \$22,800, or 20 per cent); and furniture and equipment (a reduction of \$17,200, or 44.9 per cent), among other things. Altogether, the budget reduction proposed for UNCITRAL and its secretariat would amount to \$364,700 for the biennium 2012-2013, or 5.2 per cent of the 2010-2011 appropriation. Bearing in mind that 84.2 per cent of the aggregate budget of the UNCITRAL secretariat was spent on staff posts, the proposed reduction would amount to 33 per cent of the non-post appropriation for 2010-2011.

335. The Commission took note of the proposal. Unanimous support was expressed for efforts to achieve savings across the United Nations.

336. The Commission recalled that the alternating pattern of meetings between New York and a European city (Geneva from 1969 to 1977 and Vienna since 1978) had been a feature of UNCITRAL throughout its existence. Among the reasons for such a changing venue that were put forward by States when the Commission was established and when its secretariat was transferred from New York to Vienna were the following: the proportionate distribution of travel costs among delegations; the influence and presence of UNCITRAL globally; and the needs of developing countries, many of which did not have representation in Vienna. The Commission confirmed that those reasons remained as valid today as ever. It was recalled that, throughout the history of UNCITRAL, proposals had been made for holding some meetings of the Commission and its working groups in other regions of the world, so as to increase the visibility of UNCITRAL in those regions and worldwide. From that perspective, the current alternating pattern was already the result of a compromise that should not be unravelled. The Commission also recalled its decisions as regards ways and means of achieving better integration of UNCITRAL resources into other United Nations activities, such as joint rule-of-law programmes, development programmes and post-conflict reconstruction (see paras. 318-320 above). Implementing those decisions would require closer cooperation and

coordination between the UNCITRAL secretariat and the relevant parts of the United Nations system located in New York.

337. Member States attending the current session unanimously felt that abolishing the alternating pattern of meetings would entail detrimental consequences to the ability of UNCITRAL to continue its work on the harmonization and unification of the law of international trade. That work, it was said, presupposed the fullest possible participation of States in sessions of the Commission and its working groups so that UNCITRAL standards achieved universal acceptability. It was emphasized that the special interests of developing countries should be taken into account to ensure their continued or increased representation in the work of UNCITRAL. In terms of perception, it was also important that the uniform instruments of UNCITRAL should be seen to be the result of worldwide consensus based on proper representation. Concern was expressed that the proposed change would contradict General Assembly resolution 2205 (XXI) on the establishment of UNCITRAL, as well as Assembly resolutions 2609 (XXIV) and 31/140, all of which dealt with the pattern of UNCITRAL conferences. In view of the above, the Commission expressed its unanimous support for the continuation of the current alternating pattern of meetings held by UNCITRAL.

338. Bearing in mind the current financial crisis, the Commission generally agreed that, while the proposed abolition of the alternating pattern of meetings should be avoided, every effort should be made to identify alternatives that would achieve an equal amount of savings. In response to a question, the Commission was informed that, according to a recent estimate, the costs of servicing a one-week meeting within the entitlement to conference services support for regular calendar meetings of UNCITRAL or its working groups amounted to \$132,654, regardless of whether the meeting was held in New York or Vienna. That amount was approximately the same as the annual cost (\$137,100) of Secretariat staff travelling to New York to service sessions of UNCITRAL and its working groups. The Commission was generally of the view that reducing its entitlement to conference services support by one week per year, while disruptive to its work programme, would constitute an acceptable alternative to abolishing its alternating pattern of meetings. In that context, the Commission noted that its current entitlement to conference services support amounted to 12 weeks per year for working group sessions and 3 weeks per year for the Commission session — a total of 15 weeks of conference services support per year. The possible savings would result in a reduction of that entitlement from 15 to 14 weeks of meetings per year.

339. The Commission understood that abolishing the alternating pattern of meetings, as opposed to eliminating one week of conference services support, although substantially equivalent for the overall budget of the United Nations, would not be equally reflected in the budget of the Office of Legal Affairs and, in particular, of the UNCITRAL secretariat. It was explained that savings achieved by eliminating one week of conference services support would appear under the budget of the Department for General Assembly and Conference Management, while savings achieved by eliminating the alternating pattern of meetings of UNCITRAL would appear under the budget of the Office of Legal Affairs. Concern was expressed as to whether the link between the proposed alternative savings in the Department for General Assembly and Conference Management budget and the operation of UNCITRAL would be sufficiently visible to the Fifth Committee of the

General Assembly to be credited to the Office of Legal Affairs. A number of delegations expressed their confidence that compensation between two lines of the regular budget should be acceptable provided that sufficient explanations were given.

340. The Commission decided to propose the alternative to the General Assembly. It appealed to members of delegations represented at the forty-fourth session of the Commission to coordinate closely with representatives of their delegations in the Fifth and Sixth Committees when the proposal and reasons therefor were considered in those bodies. The understanding was that the final decision of the Commission on the date and place of sessions of UNCITRAL and its working groups in 2012 (see paras. 345, 349 and 350 below) would be deferred until the decision of the Assembly on the Secretary-General's proposal and the alternative proposal of the Commission was taken, which was expected to be in December 2011.

341. The Commission exchanged ideas as to possible additional ways of achieving savings on the budget of its secretariat. One delegation suggested reducing the number of personnel travelling to New York to service sessions. Other delegations were of the view that micromanagement should be avoided and flexibility should be preserved in that regard since some projects might require the involvement of more staff than others. Holding back-to-back sessions with mostly the same personnel servicing two or more sessions was also suggested. While there was general agreement that this might constitute a desirable goal, practical difficulties were highlighted, in particular since the dates were not always available for holding back-to-back sessions and the lack of expertise of the Secretariat staff in the topics considered in different working groups might detrimentally affect substantive secretariat services provided during sessions. As to the possibility of cutting posts in the UNCITRAL secretariat, the view was strongly held by a number of delegations that this should not be considered an acceptable way forward.

342. The Commission was invited to reconsider the frequency with which working groups met and the desirability of undertaking new projects. The view was shared that servicing six working groups stretched the resources of the UNCITRAL secretariat to the maximum and increased the risk that the quality of services would be negatively affected. Holding one session of a working group per year instead of the traditional two sessions (as was decided at the current session as regards Working Group I (see para. 184 above)) and temporarily suspending the activities of one working group were considered as options. For example, it was suggested that the Commission might decide at its next session to suspend the work of Working Group VI once that working group completed work on its current project. Nevertheless, concerns about long suspensions of working group activities were expressed, since the prolonged inactivity might create doubt about the ability of UNCITRAL to maintain its level of expertise in a particular field. Electronic commerce and transport law were cited as examples.

343. Some delegations expressed the view that, in the light of the shortage of resources and the budgetary cuts faced by the UNCITRAL secretariat, the time was ripe for the Commission to engage in strategic planning by holding a comprehensive review of its current and future work programmes and more efficient ways to implement them. Prioritizing work on the various topics, clearly defining a time frame for a working group to complete its work and rationalizing the Commission's work, in particular the volume and contents of documentation, were considered to

be among the issues worth considering in that context. More extensive resort to informal consultations for resolving controversial issues and to drafting groups for finalizing text, as had successfully been done during the current session in respect of the Model Law on Public Procurement, was suggested as a pattern to be considered to expedite decision-taking at plenary meetings of the Commission. Nevertheless, a note of caution was struck and it was generally agreed that any proposed changes should not negatively affect the flexibility of the methods by which the Commission had successfully operated and proved its effectiveness and efficiency. After discussion, the Commission requested the Secretariat to prepare for the next session of the Commission a note on strategic planning, with possible options and an assessment of their financial implications.

344. A number of delegations expressed concern over the fact that the full range of financial information, including existing documents containing budget proposals that might have a decisive impact on the work of the Commission and require policy decisions on its part, was not made available to the Commission as a matter of course.

## **B. Forty-fifth session of the Commission**

345. The Commission approved the holding of its forty-fifth session in New York from 18 June to 6 July 2012 (or in Vienna from 9 to 27 July 2012). The Secretariat was requested to consider shortening the duration of the session by one week if the expected workload of the session would justify doing so.

## **C. Sessions of working groups**

346. At its thirty-sixth session, in 2003, the Commission had agreed that: (a) working groups should normally meet for a one-week session twice a year; (b) extra time, if required, could be allocated from the unused entitlement of another working group provided that such arrangement would not result in an increase of the total number of 12 weeks of conference services per year currently allotted to sessions of all six working groups of the Commission; and (c) if any request by a working group for extra time would result in an increase of the 12-week allotment, that request should be reviewed by the Commission, with proper justification being given by that working group regarding the reasons for which a change in the meeting pattern was needed.<sup>64</sup>

347. At the current session, in view of the extraordinary constraints placed on the Commission and its secretariat to reduce regular budget expenditures during the 2012-2013 biennium, the Commission agreed that its entitlement to 12 weeks of conference services per year for sessions of six working groups, together with its entitlement to three weeks of conference services per year for its own session, should be reduced so as not to exceed a total of 14 weeks of conference services instead of the habitual 15-week total entitlement per year. The Commission emphasized that its agreement to such a reduction in its use of conference services was conditional on the continued availability of a venue to hold sessions in

---

<sup>64</sup> Ibid., *Fifty-eighth Session, Supplement No. 17 (A/58/17)*, para. 275.

New York, with full servicing by the Commission's secretariat as per established practice (see paras. 338-340 above).

348. The Secretariat was requested to consider cancelling working group sessions if the expected availability of resources or the workload of the session would justify doing so.

## **1. Sessions of working groups before the forty-fifth session of the Commission**

349. The Commission approved the following schedule of meetings for its working groups:

(a) Working Group I (Procurement) would hold its twenty-first session in New York from 16 to 20 April 2012 (or in Vienna from 27 February to 2 March 2012);

(b) Working Group II (Arbitration and Conciliation) would hold its fifty-fifth session in Vienna from 3 to 7 October 2011 and its fifty-sixth session in New York from 6 to 10 February 2012 (or in Vienna from 30 January to 3 February 2012);

(c) Working Group III (Online Dispute Resolution) would hold its twenty-fourth session in Vienna from 14 to 18 November 2011 and its twenty-fifth session in New York from 28 May to 1 June 2012 (or in Vienna from 7 to 11 May 2012);

(d) Working Group IV (Electronic Commerce) would hold its forty-fifth session in Vienna from 10 to 14 October 2011 and its forty-sixth session in New York from 13 to 17 February 2012 (or in Vienna from 9 to 13 January 2012);

(e) Working Group V (Insolvency Law) would hold its fortieth session in Vienna from 31 October to 4 November 2011 and its forty-first session in New York from 9 to 13 April 2012 (or in Vienna from 20 to 24 February 2012);

(f) Working Group VI (Security Interests) would hold its twentieth session in Vienna from 12 to 16 December 2011, and its twenty-first session in New York from 14 to 18 May 2012 (or in Vienna from 5 to 9 March 2012).

## **2. Sessions of working groups in 2012 after the forty-fifth session of the Commission**

350. The Commission noted that tentative arrangements had been made for working group meetings in 2012 after its forty-fifth session (the arrangements were subject to the approval of the Commission at its forty-fifth session) as follows:

(a) Working Group II (Arbitration and Conciliation) would hold its fifty-seventh session in Vienna from 1 to 5 October 2012;

(b) Working Group III (Online Dispute Resolution) would hold its twenty-sixth session in Vienna from 10 to 14 December 2012;

(c) Working Group IV (Electronic Commerce) would hold its forty-seventh session in Vienna from 3 to 7 December 2012;

(d) Working Group V (Insolvency Law) would hold its forty-second session in Vienna from 26 to 30 November 2012;

(e) Working Group VI (Security Interests) would be expected to hold its twenty-second session in Vienna from 5 to 9 November 2012, unless it completed its work on the finalization of a text by the Commission at its forty-fifth session, in 2012.

## Annex I

### UNCITRAL Model Law on Public Procurement

#### *Preamble*

WHEREAS the [Government] [Parliament] of ... considers it desirable to regulate procurement so as to promote the objectives of:

- (a) Maximizing economy and efficiency in procurement;
- (b) Fostering and encouraging participation in procurement proceedings by suppliers and contractors regardless of nationality, thereby promoting international trade;
- (c) Promoting competition among suppliers and contractors for the supply of the subject matter of the procurement;
- (d) Providing for the fair, equal and equitable treatment of all suppliers and contractors;
- (e) Promoting the integrity of, and fairness and public confidence in, the procurement process;
- (f) Achieving transparency in the procedures relating to procurement.

Be it therefore enacted as follows:

### Chapter I. General provisions

#### *Article 1*

##### *Scope of application*

This Law applies to all public procurement.

#### *Article 2*

##### *Definitions*

For the purposes of this Law:

- (a) “Currency” includes the monetary unit of account;
- (b) “Direct solicitation” means solicitation addressed directly to one supplier or contractor or a restricted number of suppliers or contractors. This excludes solicitation addressed to a limited number of suppliers or contractors following pre-qualification or pre-selection proceedings;
- (c) “Domestic procurement” means procurement limited to domestic suppliers or contractors pursuant to article 8 of this Law;
- (d) “Electronic reverse auction” means an online real-time purchasing technique utilized by the procuring entity to select the successful submission, which involves the presentation by suppliers or contractors of successively lowered bids during a scheduled period of time and the automatic evaluation of bids;

(e) “Framework agreement procedure” means a procedure conducted in two stages: a first stage to select a supplier (or suppliers) or a contractor (or contractors) to be a party (or parties) to a framework agreement with a procuring entity, and a second stage to award a procurement contract under the framework agreement to a supplier or contractor party to the framework agreement:

(i) “Framework agreement” means an agreement between the procuring entity and the selected supplier (or suppliers) or contractor (or contractors) concluded upon completion of the first stage of the framework agreement procedure;

(ii) “Closed framework agreement” means a framework agreement to which no supplier or contractor that is not initially a party to the framework agreement may subsequently become a party;

(iii) “Open framework agreement” means a framework agreement to which a supplier (or suppliers) or a contractor (or contractors) in addition to the initial parties may subsequently become a party or parties;

(iv) “Framework agreement procedure with second-stage competition” means a procedure under an open framework agreement or a closed framework agreement with more than one supplier or contractor in which certain terms and conditions of the procurement that cannot be established with sufficient precision when the framework agreement is concluded are to be established or refined through a second-stage competition;

(v) “Framework agreement procedure without second-stage competition” means a procedure under a closed framework agreement in which all terms and conditions of the procurement are established when the framework agreement is concluded;

(f) “Pre-qualification” means the procedure set out in article 18 of this Law to identify, prior to solicitation, suppliers or contractors that are qualified;

(g) “Pre-qualification documents” means documents issued by the procuring entity under article 18 of this Law that set out the terms and conditions of the pre-qualification proceedings;

(h) “Pre-selection” means the procedure set out in paragraph 3 of article 49 of this Law to identify, prior to solicitation, a limited number of suppliers or contractors that best meet the qualification criteria for the procurement concerned;

(i) “Pre-selection documents” means documents issued by the procuring entity under paragraph 3 of article 49 of this Law that set out the terms and conditions of the pre-selection proceedings;

(j) “Procurement” or “public procurement” means the acquisition of goods, construction or services by a procuring entity;

(k) “Procurement contract” means a contract concluded between the procuring entity and a supplier (or suppliers) or a contractor (or contractors) at the end of the procurement proceedings;

(l) “Procurement involving classified information” means procurement in which the procuring entity may be authorized by the procurement regulations or by

other provisions of law of this State to take measures and impose requirements for the protection of classified information;

(m) “Procurement regulations” means regulations enacted in accordance with article 4 of this Law;

(n) “Procuring entity” means:

*Option I*

(i) Any governmental department, agency, organ or other unit, or any subdivision or multiplicity thereof, that engages in procurement, except ...; [and]

*Option II*

(i) Any department, agency, organ or other unit, or any subdivision or multiplicity thereof, of the [Government] [*other term used to refer to the national Government of the enacting State*] that engages in procurement, except ...; [and]

(ii) [*The enacting State may insert in this subparagraph and, if necessary, in subsequent subparagraphs other entities or enterprises, or categories thereof, to be included in the definition of “procuring entity”*];

(o) “Socio-economic policies” means environmental, social, economic and other policies of this State authorized or required by the procurement regulations or other provisions of law of this State to be taken into account by the procuring entity in the procurement proceedings. [*The enacting State may expand this subparagraph by providing an illustrative list of such policies.*];

(p) “Solicitation” means an invitation to tender, present submissions or participate in request-for-proposals proceedings or an electronic reverse auction;

(q) “Solicitation document” means a document issued by the procuring entity, including any amendments thereto, that sets out the terms and conditions of the given procurement;

(r) “Standstill period” means the period starting from the dispatch of a notice as required by paragraph 2 of article 22 of this Law, during which the procuring entity cannot accept the successful submission and during which suppliers or contractors can challenge, under chapter VIII of this Law, the decision so notified;

(s) “A submission (or submissions)” means a tender (or tenders), a proposal (or proposals), an offer (or offers), a quotation (or quotations) and a bid (or bids) referred to collectively or generically, including, where the context so requires, an initial or indicative submission (or submissions);

(t) “Supplier or contractor” means, according to the context, any potential party or any party to the procurement proceedings with the procuring entity;

(u) “Tender security” means a security required from suppliers or contractors by the procuring entity and provided to the procuring entity to secure the fulfilment of any obligation referred to in paragraph 1 (f) of article 17 of this Law and includes such arrangements as bank guarantees, surety bonds, standby letters of credit,

cheques for which a bank is primarily liable, cash deposits, promissory notes and bills of exchange. For the avoidance of doubt, the term excludes any security for the performance of the contract.

### *Article 3*

#### *International obligations of this State relating to procurement [and intergovernmental agreements within [this State]]<sup>65</sup>*

To the extent that this Law conflicts with an obligation of this State under or arising out of any:

(a) Treaty or other form of agreement to which it is a party with one or more other States; [or]

(b) Agreement entered into by this State with an intergovernmental international financing institution[, ] [; or]

[(c) Agreement between the federal Government of [name of federal State] and any subdivision or subdivisions of [name of federal State] or between any two or more such subdivisions,]

the requirements of the treaty or agreement shall prevail, but in all other respects the procurement shall be governed by this Law.

### *Article 4*

#### *Procurement regulations*

The [name of the organ or authority authorized to promulgate the procurement regulations] is authorized to promulgate procurement regulations to fulfil the objectives and to implement the provisions of this Law.

### *Article 5*

#### *Publication of legal texts*

1. This Law, the procurement regulations and other legal texts of general application in connection with procurement covered by this Law, and all amendments thereto, shall be promptly made accessible to the public and systematically maintained.

2. Judicial decisions and administrative rulings with precedent value in connection with procurement covered by this Law shall be made available to the public.

### *Article 6*

#### *Information on possible forthcoming procurement*

1. Procuring entities may publish information regarding planned procurement activities for forthcoming months or years.

2. Procuring entities may also publish an advance notice of possible future procurement.

---

<sup>65</sup> The text in brackets in this article is relevant to, and intended for consideration by, federal States.

3. Publication under this article does not constitute a solicitation, does not oblige the procuring entity to issue a solicitation and does not confer any rights on suppliers or contractors.

#### *Article 7*

##### *Communications in procurement*

1. Any document, notification, decision or other information generated in the course of a procurement and communicated as required by this Law, including in connection with challenge proceedings under chapter VIII or in the course of a meeting, or forming part of the record of procurement proceedings under article 25 of this Law shall be in a form that provides a record of the content of the information and that is accessible so as to be usable for subsequent reference.

2. Direct solicitation and communication of information between suppliers or contractors and the procuring entity referred to in article 16, paragraph 1 (d) of article 17, paragraphs 6 and 9 of article 18, paragraph 2 (a) of article 41 and paragraphs 2 to 4 of article 50 of this Law may be made by means that do not provide a record of the content of the information, on the condition that immediately thereafter confirmation of the communication is given to the recipient of the communication in a form that provides a record of the content of the information and that is accessible so as to be usable for subsequent reference.

3. The procuring entity, when first soliciting the participation of suppliers or contractors in the procurement proceedings, shall specify:

(a) Any requirement of form;

(b) In procurement involving classified information, if the procuring entity considers it necessary, measures and requirements needed to ensure the protection of classified information at the requisite level;

(c) The means to be used to communicate information by or on behalf of the procuring entity to a supplier or contractor or to any person, or by a supplier or contractor to the procuring entity or other entity acting on its behalf;

(d) The means to be used to satisfy all requirements under this Law for information to be in writing or for a signature; and

(e) The means to be used to hold any meeting of suppliers or contractors.

4. The procuring entity may use only those means of communication that are in common use by suppliers or contractors in the context of the particular procurement. In any meeting held with suppliers or contractors, the procuring entity shall use only those means that ensure in addition that suppliers or contractors can fully and contemporaneously participate in the meeting.

5. The procuring entity shall put in place appropriate measures to secure the authenticity, integrity and confidentiality of information concerned.

*Article 8**Participation by suppliers or contractors*

1. Suppliers or contractors shall be permitted to participate in procurement proceedings without regard to nationality, except where the procuring entity decides to limit participation in procurement proceedings on the basis of nationality on grounds specified in the procurement regulations or other provisions of law of this State.
2. Except when authorized or required to do so by the procurement regulations or other provisions of law of this State, the procuring entity shall establish no other requirement aimed at limiting the participation of suppliers or contractors in procurement proceedings that discriminates against or among suppliers or contractors or against categories thereof.
3. The procuring entity, when first soliciting the participation of suppliers or contractors in the procurement proceedings, shall declare whether the participation of suppliers or contractors in the procurement proceedings is limited pursuant to this article and on which ground. Any such declaration may not later be altered.
4. A procuring entity that decides to limit the participation of suppliers or contractors in procurement proceedings pursuant to this article shall include in the record of the procurement proceedings a statement of the reasons and circumstances on which it relied.
5. The procuring entity shall make available to any person, upon request, its reasons for limiting the participation of suppliers or contractors in the procurement proceedings pursuant to this article.

*Article 9**Qualifications of suppliers and contractors*

1. This article applies to the ascertainment by the procuring entity of the qualifications of suppliers or contractors at any stage of the procurement proceedings.
2. Suppliers or contractors shall meet such of the following criteria as the procuring entity considers appropriate and relevant in the circumstances of the particular procurement:
  - (a) That they have the necessary professional, technical and environmental qualifications, professional and technical competence, financial resources, equipment and other physical facilities, managerial capability, reliability, experience and personnel to perform the procurement contract;
  - (b) That they meet ethical and other standards applicable in this State;
  - (c) That they have the legal capacity to enter into the procurement contract;
  - (d) That they are not insolvent, in receivership, bankrupt or being wound up, their affairs are not being administered by a court or a judicial officer, their business activities have not been suspended and they are not the subject of legal proceedings for any of the foregoing;

(e) That they have fulfilled their obligations to pay taxes and social security contributions in this State;

(f) That they have not, and their directors or officers have not, been convicted of any criminal offence related to their professional conduct or the making of false statements or misrepresentations as to their qualifications to enter into a procurement contract within a period of ... years [*the enacting State specifies the period of time*] preceding the commencement of the procurement proceedings, or have not been otherwise disqualified pursuant to administrative suspension or debarment proceedings.

3. Subject to the right of suppliers or contractors to protect their intellectual property or trade secrets, the procuring entity may require suppliers or contractors participating in procurement proceedings to provide appropriate documentary evidence or other information to satisfy itself that the suppliers or contractors are qualified in accordance with the criteria referred to in paragraph 2 of this article.

4. Any requirement established pursuant to this article shall be set out in the pre-qualification or pre-selection documents, if any, and in the solicitation documents and shall apply equally to all suppliers or contractors. A procuring entity shall impose no criterion, requirement or procedure with respect to the qualifications of suppliers or contractors other than those provided for in this Law.

5. The procuring entity shall evaluate the qualifications of suppliers or contractors in accordance with the qualification criteria and procedures set out in the pre-qualification or pre-selection documents, if any, and in the solicitation documents.

6. Other than any criterion, requirement or procedure that may be imposed by the procuring entity in accordance with article 8 of this Law, the procuring entity shall establish no criterion, requirement or procedure with respect to the qualifications of suppliers or contractors that discriminates against or among suppliers or contractors or against categories thereof, or that is not objectively justifiable.

7. Notwithstanding paragraph 6 of this article, the procuring entity may require the legalization of documentary evidence provided by the supplier or contractor presenting the successful submission so as to demonstrate its qualifications for the particular procurement. In doing so, the procuring entity shall not impose any requirements as to the legalization of the documentary evidence other than those provided for in the laws of this State relating to the legalization of documents of the type in question.

8. (a) The procuring entity shall disqualify a supplier or contractor if it finds at any time that the information submitted concerning the qualifications of the supplier or contractor was false or constituted a misrepresentation;

(b) A procuring entity may disqualify a supplier or contractor if it finds at any time that the information submitted concerning the qualifications of the supplier or contractor was materially inaccurate or materially incomplete;

(c) Other than in a case to which subparagraph (a) of this paragraph applies, a procuring entity may not disqualify a supplier or contractor on the ground that information submitted concerning the qualifications of the supplier or contractor was inaccurate or incomplete in a non-material respect. The supplier or contractor

may, however, be disqualified if it fails to remedy such deficiencies promptly upon request by the procuring entity;

(d) The procuring entity may require a supplier or contractor that was pre-qualified in accordance with article 18 of this Law to demonstrate its qualifications again in accordance with the same criteria used to pre-qualify such supplier or contractor. The procuring entity shall disqualify any supplier or contractor that fails to demonstrate its qualifications again if requested to do so. The procuring entity shall promptly notify each supplier or contractor requested to demonstrate its qualifications again as to whether or not the supplier or contractor has done so to the satisfaction of the procuring entity.

#### *Article 10*

##### *Rules concerning description of the subject matter of the procurement and the terms and conditions of the procurement contract or framework agreement*

1. (a) The pre-qualification or pre-selection documents, if any, shall set out a description of the subject matter of the procurement;

(b) The procuring entity shall set out in the solicitation documents the detailed description of the subject matter of the procurement that it will use in the examination of submissions, including the minimum requirements that submissions must meet in order to be considered responsive and the manner in which those minimum requirements are to be applied.

2. Other than any criterion, requirement or procedure that may be imposed by the procuring entity in accordance with article 8 of this Law, no description of the subject matter of a procurement that may restrict the participation of suppliers or contractors in or their access to the procurement proceedings, including any restriction based on nationality, shall be included or used in the pre-qualification or pre-selection documents, if any, or in the solicitation documents.

3. The description of the subject matter of the procurement may include specifications, plans, drawings, designs, requirements, testing and test methods, packaging, marking or labelling or conformity certification, and symbols and terminology.

4. To the extent practicable, the description of the subject matter of the procurement shall be objective, functional and generic. It shall set out the relevant technical, quality and performance characteristics of that subject matter. There shall be no requirement for or reference to a particular trademark or trade name, patent, design or type, specific origin or producer unless there is no sufficiently precise or intelligible way of describing the characteristics of the subject matter of the procurement and provided that words such as “or equivalent” are included.

5. (a) Standardized features, requirements, symbols and terminology relating to the technical, quality and performance characteristics of the subject matter of the procurement shall be used, where available, in formulating the description of the subject matter of the procurement to be included in the pre-qualification or pre-selection documents, if any, and in the solicitation documents;

(b) Due regard shall be had for the use of standardized trade terms and standardized conditions, where available, in formulating the terms and conditions of

the procurement and the procurement contract or the framework agreement to be entered into in the procurement proceedings, and in formulating other relevant aspects of the pre-qualification or pre-selection documents, if any, and solicitation documents.

#### *Article 11*

##### *Rules concerning evaluation criteria and procedures*

1. Except for the criteria set out in paragraph 3 of this article, the evaluation criteria shall relate to the subject matter of the procurement.
2. The evaluation criteria relating to the subject matter of the procurement may include:
  - (a) Price;
  - (b) The cost of operating, maintaining and repairing goods or of construction; the time for delivery of goods, completion of construction or provision of services; the characteristics of the subject matter of the procurement, such as the functional characteristics of goods or construction and the environmental characteristics of the subject matter; and the terms of payment and of guarantees in respect of the subject matter of the procurement;
  - (c) Where relevant in procurement conducted in accordance with articles 47, 49 and 50 of this Law, the experience, reliability and professional and managerial competence of the supplier or contractor and of the personnel to be involved in providing the subject matter of the procurement.
3. In addition to the criteria set out in paragraph 2 of this article, the evaluation criteria may include:
  - (a) Any criteria that the procurement regulations or other provisions of law of this State authorize or require to be taken into account;
  - (b) A margin of preference for the benefit of domestic suppliers or contractors or for domestically produced goods, or any other preference, if authorized or required by the procurement regulations or other provisions of law of this State. The margin of preference shall be calculated in accordance with the procurement regulations.
4. To the extent practicable, all non-price evaluation criteria shall be objective, quantifiable and expressed in monetary terms.
5. The procuring entity shall set out in the solicitation documents:
  - (a) Whether the successful submission will be ascertained on the basis of price or price and other criteria;
  - (b) All evaluation criteria established pursuant to this article, including price as modified by any preference;
  - (c) The relative weights of all evaluation criteria, except where the procurement is conducted under article 49 of this Law, in which case the procuring entity may list all evaluation criteria in descending order of importance;
  - (d) The manner of application of the criteria in the evaluation procedure.

6. In evaluating submissions and determining the successful submission, the procuring entity shall use only those criteria and procedures that have been set out in the solicitation documents and shall apply those criteria and procedures in the manner that has been disclosed in those solicitation documents. No criterion or procedure shall be used that has not been set out in accordance with this provision.

#### *Article 12*

##### *Rules concerning estimation of the value of procurement*

1. A procuring entity shall neither divide its procurement nor use a particular valuation method for estimating the value of procurement so as to limit competition among suppliers or contractors or otherwise avoid its obligations under this Law.
2. In estimating the value of procurement, the procuring entity shall include the estimated maximum total value of the procurement contract or of all procurement contracts envisaged under a framework agreement over its entire duration, taking into account all forms of remuneration.

#### *Article 13*

##### *Rules concerning the language of documents*

1. The pre-qualification or pre-selection documents, if any, and the solicitation documents shall be formulated in [*the enacting State specifies its official language or languages*] [and in a language customarily used in international trade, unless decided otherwise by the procuring entity in the circumstances referred to in paragraph 4 of article 33 of this Law].
2. Applications to pre-qualify or for pre-selection, if any, and submissions may be formulated and presented in the language of the pre-qualification or pre-selection documents, if any, and solicitation documents, respectively, or in any other language permitted by those documents.

#### *Article 14*

##### *Rules concerning the manner, place and deadline for presenting applications to pre-qualify or applications for pre-selection or for presenting submissions*

1. The manner, place and deadline for presenting applications to pre-qualify or for pre-selection shall be set out in the invitation to pre-qualify or for pre-selection and in the pre-qualification or pre-selection documents, as applicable. The manner, place and deadline for presenting submissions shall be set out in the solicitation documents.
2. Deadlines for presenting applications to pre-qualify or for pre-selection or for presenting submissions shall be expressed as a specific date and time and shall allow sufficient time for suppliers or contractors to prepare and present their applications or submissions, taking into account the reasonable needs of the procuring entity.
3. If the procuring entity issues a clarification or modification of the pre-qualification, pre-selection or solicitation documents, it shall, prior to the applicable deadline for presenting applications to pre-qualify or for pre-selection or for presenting submissions, extend the deadline if necessary or as required under

paragraph 3 of article 15 of this Law in order to afford suppliers or contractors sufficient time to take the clarification or modification into account in their applications or submissions.

4. The procuring entity may, at its absolute discretion, prior to a deadline for presenting applications to pre-qualify or for pre-selection or for presenting submissions, extend the applicable deadline if it is not possible for one or more suppliers or contractors to present their applications or submissions by the deadline initially stipulated because of any circumstance beyond their control.

5. Notice of any extension of the deadline shall be given promptly to each supplier or contractor to which the procuring entity provided the pre-qualification, pre-selection or solicitation documents.

#### *Article 15*

##### *Clarifications and modifications of solicitation documents*

1. A supplier or contractor may request a clarification of the solicitation documents from the procuring entity. The procuring entity shall respond to any request by a supplier or contractor for clarification of the solicitation documents that is received by the procuring entity within a reasonable time prior to the deadline for presenting submissions. The procuring entity shall respond within a time period that will enable the supplier or contractor to present its submission in a timely fashion and shall, without identifying the source of the request, communicate the clarification to all suppliers or contractors to which the procuring entity has provided the solicitation documents.

2. At any time prior to the deadline for presenting submissions, the procuring entity may for any reason, whether on its own initiative or as a result of a request for clarification by a supplier or contractor, modify the solicitation documents by issuing an addendum. The addendum shall be communicated promptly to all suppliers or contractors to which the procuring entity has provided the solicitation documents and shall be binding on those suppliers or contractors.

3. If as a result of a clarification or modification issued in accordance with this article, the information published when first soliciting the participation of suppliers or contractors in the procurement proceedings becomes materially inaccurate, the procuring entity shall cause the amended information to be published in the same manner and place in which the original information was published and shall extend the deadline for presentation of submissions as provided for in paragraph 3 of article 14 of this Law.

4. If the procuring entity convenes a meeting of suppliers or contractors, it shall prepare minutes of the meeting containing the requests submitted at the meeting for clarification of the solicitation documents and its responses to those requests, without identifying the sources of the requests. The minutes shall be provided promptly to all suppliers or contractors to which the procuring entity provided the solicitation documents, so as to enable those suppliers or contractors to take the minutes into account in preparing their submissions.

*Article 16**Clarification of qualification information and of submissions*

1. At any stage of the procurement proceedings, the procuring entity may ask a supplier or contractor for clarification of its qualification information or of its submission, in order to assist in the ascertainment of qualifications or the examination and evaluation of submissions.
2. The procuring entity shall correct purely arithmetical errors that are discovered during the examination of submissions. The procuring entity shall give prompt notice of any such correction to the supplier or contractor that presented the submission concerned.
3. No substantive change to qualification information or to a submission, including changes aimed at making an unqualified supplier or contractor qualified or an unresponsive submission responsive, shall be sought, offered or permitted.
4. No negotiations shall take place between the procuring entity and a supplier or contractor with respect to qualification information or submissions, nor shall any change in price be made pursuant to a clarification that is sought under this article.
5. Paragraph 4 of this article shall not apply to proposals submitted under articles 49, 50, 51 and 52 of this Law.
6. All communications generated under this article shall be included in the record of the procurement proceedings.

*Article 17**Tender securities*

1. When the procuring entity requires suppliers or contractors presenting submissions to provide a tender security:
  - (a) The requirement shall apply to all suppliers or contractors;
  - (b) The solicitation documents may stipulate that the issuer of the tender security and the confirmer, if any, of the tender security, as well as the form and terms of the tender security, must be acceptable to the procuring entity. In cases of domestic procurement, the solicitation documents may in addition stipulate that the tender security shall be issued by an issuer in this State;
  - (c) Notwithstanding the provisions of subparagraph (b) of this paragraph, a tender security shall not be rejected by the procuring entity on the grounds that the tender security was not issued by an issuer in this State if the tender security and the issuer otherwise conform to requirements set out in the solicitation documents, unless the acceptance by the procuring entity of such a tender security would be in violation of a law of this State;
  - (d) Prior to presenting a submission, a supplier or contractor may request the procuring entity to confirm the acceptability of a proposed issuer of a tender security or of a proposed confirmer, if required; the procuring entity shall respond promptly to such a request;
  - (e) Confirmation of the acceptability of a proposed issuer or of any proposed confirmer does not preclude the procuring entity from rejecting the tender security

on the ground that the issuer or the confirmer, as the case may be, has become insolvent or has otherwise ceased to be creditworthy;

(f) The procuring entity shall specify in the solicitation documents any requirements with respect to the issuer and the nature, form, amount and other principal terms and conditions of the required tender security. Any requirement that refers directly or indirectly to the conduct of the supplier or contractor presenting the submission may relate only to:

- (i) Withdrawal or modification of the submission after the deadline for presenting submissions, or before the deadline if so stipulated in the solicitation documents;
- (ii) Failure to sign a procurement contract if so required by the solicitation documents; and
- (iii) Failure to provide a required security for the performance of the contract after the successful submission has been accepted or failure to comply with any other condition precedent to signing the procurement contract specified in the solicitation documents.

2. The procuring entity shall make no claim to the amount of the tender security and shall promptly return, or procure the return of, the security document after the earliest of the following events:

- (a) The expiry of the tender security;
- (b) The entry into force of a procurement contract and the provision of a security for the performance of the contract, if such a security is required by the solicitation documents;
- (c) The cancellation of the procurement;
- (d) The withdrawal of a submission prior to the deadline for presenting submissions, unless the solicitation documents stipulate that no such withdrawal is permitted.

#### *Article 18*

##### *Pre-qualification proceedings*

1. The procuring entity may engage in pre-qualification proceedings with a view to identifying, prior to solicitation, suppliers and contractors that are qualified. The provisions of article 9 of this Law shall apply to pre-qualification proceedings.
2. If the procuring entity engages in pre-qualification proceedings, it shall cause an invitation to pre-qualify to be published in the publication identified in the procurement regulations. Unless decided otherwise by the procuring entity in the circumstances referred to in paragraph 4 of article 33 of this Law, the invitation to pre-qualify shall also be published internationally, so as to be widely accessible to international suppliers or contractors.
3. The invitation to pre-qualify shall include the following information:
  - (a) The name and address of the procuring entity;

(b) A summary of the principal required terms and conditions of the procurement contract or the framework agreement to be entered into in the procurement proceedings, including the nature, quantity and place of delivery of the goods to be supplied, the nature and location of the construction to be effected or the nature of the services and the location where they are to be provided, as well as the desired or required time for the supply of the goods, the completion of the construction or the provision of the services;

(c) The criteria and procedures to be used for ascertaining the qualifications of suppliers or contractors, in conformity with article 9 of this Law;

(d) A declaration as required by article 8 of this Law;

(e) The means of obtaining the pre-qualification documents and the place where they may be obtained;

(f) The price, if any, to be charged by the procuring entity for the pre-qualification documents and, subsequent to pre-qualification, for the solicitation documents;

(g) If a price is to be charged, the means of payment for the pre-qualification documents and, subsequent to pre-qualification, for the solicitation documents, and the currency of payment;

(h) The language or languages in which the pre-qualification documents and, subsequent to pre-qualification, the solicitation documents are available;

(i) The manner, place and deadline for presenting applications to pre-qualify and, if already known, the manner, place and deadline for presenting submissions, in conformity with article 14 of this Law.

4. The procuring entity shall provide a set of pre-qualification documents to each supplier or contractor that requests them in accordance with the invitation to pre-qualify and that pays the price, if any, charged for those documents. The price that the procuring entity may charge for the pre-qualification documents shall reflect only the cost of providing them to suppliers or contractors.

5. The pre-qualification documents shall include the following information:

(a) Instructions for preparing and presenting pre-qualification applications;

(b) Any documentary evidence or other information that must be presented by suppliers or contractors to demonstrate their qualifications;

(c) The name, functional title and address of one or more officers or employees of the procuring entity who are authorized to communicate directly with and to receive communications directly from suppliers or contractors in connection with the pre-qualification proceedings without the intervention of an intermediary;

(d) References to this Law, the procurement regulations and other laws and regulations directly pertinent to the pre-qualification proceedings, and the place where those laws and regulations may be found;

(e) Any other requirements that may be established by the procuring entity in conformity with this Law and the procurement regulations relating to the preparation and presentation of applications to pre-qualify and to the pre-qualification proceedings.

6. The procuring entity shall respond to any request by a supplier or contractor for clarification of the pre-qualification documents that is received by the procuring entity within a reasonable time prior to the deadline for presenting applications to pre-qualify. The procuring entity shall respond within a time period that will enable the supplier or contractor to present its application to pre-qualify in a timely fashion. The response to any request that might reasonably be expected to be of interest to other suppliers or contractors shall, without identifying the source of the request, be communicated to all suppliers or contractors to which the procuring entity has provided the pre-qualification documents.
7. The procuring entity shall take a decision with respect to the qualifications of each supplier or contractor presenting an application to pre-qualify. In reaching that decision, the procuring entity shall apply only the criteria and procedures set out in the invitation to pre-qualify and in the pre-qualification documents.
8. Only suppliers or contractors that have been pre-qualified are entitled to participate further in the procurement proceedings.
9. The procuring entity shall promptly notify each supplier or contractor presenting an application to pre-qualify whether or not it has been pre-qualified. It shall also make available to any person, upon request, the names of all suppliers or contractors that have been pre-qualified.
10. The procuring entity shall promptly communicate to each supplier or contractor that has not been pre-qualified the reasons therefor.

#### *Article 19*

##### *Cancellation of the procurement*

1. The procuring entity may cancel the procurement at any time prior to the acceptance of the successful submission and, after the successful submission is accepted, under the circumstances referred to in paragraph 8 of article 22 of this Law. The procuring entity shall not open any tenders or proposals after taking a decision to cancel the procurement.
2. The decision of the procuring entity to cancel the procurement and the reasons for the decision shall be included in the record of the procurement proceedings and promptly communicated to any supplier or contractor that presented a submission. The procuring entity shall in addition promptly publish a notice of the cancellation of the procurement in the same manner and place in which the original information regarding the procurement proceedings was published, and return any tenders or proposals that remain unopened at the time of the decision to the suppliers or contractors that presented them.
3. Unless the cancellation of the procurement is a consequence of irresponsible or dilatory conduct on the part of the procuring entity, the procuring entity shall incur no liability, solely by virtue of its invoking paragraph 1 of this article, towards suppliers or contractors that have presented submissions.

*Article 20**Rejection of abnormally low submissions*

1. The procuring entity may reject a submission if the procuring entity has determined that the price, in combination with other constituent elements of the submission, is abnormally low in relation to the subject matter of the procurement and raises concerns with the procuring entity as to the ability of the supplier or contractor that presented that submission to perform the procurement contract, provided that the procuring entity has taken the following actions:

(a) The procuring entity has requested in writing from the supplier or contractor details of the submission that gives rise to concerns as to the ability of the supplier or contractor to perform the procurement contract; and

(b) The procuring entity has taken account of any information provided by the supplier or contractor following this request and the information included in the submission, but continues, on the basis of all such information, to hold concerns.

2. The decision of the procuring entity to reject a submission in accordance with this article, the reasons for that decision, and all communications with the supplier or contractor under this article shall be included in the record of the procurement proceedings. The decision of the procuring entity and the reasons therefor shall be promptly communicated to the supplier or contractor concerned.

*Article 21**Exclusion of a supplier or contractor from the procurement proceedings on the grounds of inducements from the supplier or contractor, an unfair competitive advantage or conflicts of interest*

1. A procuring entity shall exclude a supplier or contractor from the procurement proceedings if:

(a) The supplier or contractor offers, gives or agrees to give, directly or indirectly, to any current or former officer or employee of the procuring entity or other governmental authority a gratuity in any form, an offer of employment or any other thing of service or value, so as to influence an act or decision of, or procedure followed by, the procuring entity in connection with the procurement proceedings; or

(b) The supplier or contractor has an unfair competitive advantage or a conflict of interest, in violation of provisions of law of this State.

2. Any decision of the procuring entity to exclude a supplier or contractor from the procurement proceedings under this article and the reasons therefor shall be included in the record of the procurement proceedings and promptly communicated to the supplier or contractor concerned.

*Article 22**Acceptance of the successful submission and entry into force of the procurement contract*

1. The procuring entity shall accept the successful submission unless:
  - (a) The supplier or contractor presenting the successful submission is disqualified in accordance with article 9 of this Law;
  - (b) The procurement is cancelled in accordance with paragraph 1 of article 19 of this Law;
  - (c) The submission found successful at the end of evaluation is rejected as abnormally low under article 20 of this Law; or
  - (d) The supplier or contractor presenting the successful submission is excluded from the procurement proceedings on the grounds specified in article 21 of this Law.
2. The procuring entity shall promptly notify each supplier or contractor that presented submissions of its decision to accept the successful submission at the end of the standstill period. The notice shall contain, at a minimum, the following information:
  - (a) The name and address of the supplier or contractor presenting the successful submission;
  - (b) The contract price or, where the successful submission was ascertained on the basis of price and other criteria, the contract price and a summary of other characteristics and relative advantages of the successful submission; and
  - (c) The duration of the standstill period as set out in the solicitation documents and in accordance with the requirements of the procurement regulations. The standstill period shall run from the date of the dispatch of the notice under this paragraph to all suppliers or contractors that presented submissions.
3. Paragraph 2 of this article shall not apply to awards of procurement contracts:
  - (a) Under a framework agreement procedure without second-stage competition;
  - (b) Where the contract price is less than the threshold amount set out in the procurement regulations; or
  - (c) Where the procuring entity determines that urgent public interest considerations require the procurement to proceed without a standstill period. The decision of the procuring entity that such urgent considerations exist and the reasons for the decision shall be included in the record of the procurement proceedings.
4. Upon expiry of the standstill period or, where there is none, promptly after the successful submission was ascertained, the procuring entity shall dispatch the notice of acceptance of the successful submission to the supplier or contractor that presented that submission, unless the [name of court or courts] or the [name of the relevant organ designated by the enacting State] orders otherwise.
5. Unless a written procurement contract and/or approval by another authority is/are required, a procurement contract in accordance with the terms and conditions

of the successful submission enters into force when the notice of acceptance is dispatched to the supplier or contractor concerned, provided that the notice is dispatched while the submission is still in effect.

6. Where the solicitation documents require the supplier or contractor whose submission has been accepted to sign a written procurement contract conforming to the terms and conditions of the accepted submission:

(a) The procuring entity and the supplier or contractor concerned shall sign the procurement contract within a reasonable period of time after the notice of acceptance is dispatched to the supplier or contractor concerned;

(b) Unless the solicitation documents stipulate that the procurement contract is subject to approval by another authority, the procurement contract enters into force when the contract is signed by the supplier or contractor concerned and by the procuring entity. Between the time when the notice of acceptance is dispatched to the supplier or contractor concerned and the entry into force of the procurement contract, neither the procuring entity nor that supplier or contractor shall take any action that interferes with the entry into force of the procurement contract or with its performance.

7. Where the solicitation documents stipulate that the procurement contract is subject to approval by another authority, the procurement contract shall not enter into force before the approval is given. The solicitation documents shall specify the estimated period of time following dispatch of the notice of acceptance that will be required to obtain the approval. A failure to obtain the approval within the time specified in the solicitation documents shall not extend the period of effectiveness of submissions specified in the solicitation documents or the period of effectiveness of the tender security required under article 17 of this Law, unless extended under the provisions of this Law.

8. If the supplier or contractor whose submission has been accepted fails to sign any written procurement contract as required or fails to provide any required security for the performance of the contract, the procuring entity may either cancel the procurement or decide to select the next successful submission from among those remaining in effect, in accordance with the criteria and procedures set out in this Law and in the solicitation documents. In the latter case, the provisions of this article shall apply *mutatis mutandis* to such submission.

9. Notices under this article are dispatched when they are promptly and properly addressed or otherwise directed and transmitted to the supplier or contractor or conveyed to an appropriate authority for transmission to the supplier or contractor by any reliable means specified in accordance with article 7 of this Law.

10. Upon the entry into force of the procurement contract and, if required, the provision by the supplier or contractor of a security for the performance of the contract, notice of the procurement contract shall be given promptly to other suppliers or contractors, specifying the name and address of the supplier or contractor that has entered into the contract and the contract price.

*Article 23**Public notice of the award of a procurement contract or framework agreement*

1. Upon the entry into force of the procurement contract or conclusion of a framework agreement, the procuring entity shall promptly publish notice of the award of the procurement contract or the framework agreement, specifying the name of the supplier (or suppliers) or contractor (or contractors) to which the procurement contract or the framework agreement was awarded and, in the case of procurement contracts, the contract price.
2. Paragraph 1 is not applicable to awards where the contract price is less than the threshold amount set out in the procurement regulations. The procuring entity shall publish a cumulative notice of such awards from time to time but at least once a year.
3. The procurement regulations shall provide for the manner of publication of the notices required under this article.

*Article 24**Confidentiality*

1. In its communications with suppliers or contractors or with any person, the procuring entity shall not disclose any information if non-disclosure of such information is necessary for the protection of essential security interests of the State or if disclosure of such information would be contrary to law, would impede law enforcement, would prejudice the legitimate commercial interests of the suppliers or contractors or would impede fair competition, unless disclosure of that information is ordered by the [name of the court or courts] or the [name of the relevant organ designated by the enacting State] and, in such case, subject to the conditions of such an order.
2. Other than when providing or publishing information pursuant to paragraphs 2 and 10 of article 22 and to articles 23, 25 and 42 of this Law, the procuring entity shall treat applications to pre-qualify or for pre-selection and submissions in such a manner as to avoid the disclosure of their contents to competing suppliers or contractors or to any other person not authorized to have access to this type of information.
3. Any discussions, communications, negotiations or dialogue between the procuring entity and a supplier or contractor pursuant to paragraph 3 of article 48 and to articles 49 to 52 of this Law shall be confidential. Unless required by law or ordered by the [name of the court or courts] or the [name of the relevant organ designated by the enacting State], no party to any such discussions, communications, negotiations or dialogue shall disclose to any other person any technical, price or other information relating to these discussions, communications, negotiations or dialogue without the consent of the other party.
4. Subject to the requirements in paragraph 1 of this article, in procurement involving classified information, the procuring entity may:
  - (a) Impose on suppliers or contractors requirements aimed at protecting classified information; and

(b) Demand that suppliers or contractors ensure that their sub-contractors comply with requirements aimed at protecting classified information.

*Article 25*

*Documentary record of procurement proceedings*

1. The procuring entity shall maintain a record of the procurement proceedings that includes the following information:

- (a) A brief description of the subject matter of the procurement;
- (b) The names and addresses of suppliers or contractors that presented submissions, the name and address of the supplier (or suppliers) or contractor (or contractors) with which the procurement contract is entered into and the contract price (and, in the case of a framework agreement procedure, the name and address of the supplier (or suppliers) or contractor (or contractors) with which the framework agreement is concluded);
- (c) A statement of the reasons and circumstances relied upon by the procuring entity for the decision as regards means of communication and any requirement of form;
- (d) In procurement proceedings in which the procuring entity, in accordance with article 8 of this Law, limits the participation of suppliers or contractors, a statement of the reasons and circumstances relied upon by the procuring entity for imposing such a limit;
- (e) If the procuring entity uses a method of procurement other than open tendering, a statement of the reasons and circumstances relied upon by the procuring entity to justify the use of such other method;
- (f) In the case of procurement by means of an electronic reverse auction or involving an electronic reverse auction as a phase preceding the award of the procurement contract, a statement of the reasons and circumstances relied upon by the procuring entity for the use of the auction and information about the date and time of the opening and closing of the auction;
- (g) In the case of a framework agreement procedure, a statement of the reasons and circumstances upon which it relied to justify the use of a framework agreement procedure and the type of framework agreement selected;
- (h) If the procurement is cancelled pursuant to paragraph 1 of article 19 of this Law, a statement to that effect and the reasons and circumstances relied upon by the procuring entity for its decision to cancel the procurement;
- (i) If any socio-economic policies were considered in the procurement proceedings, details of such policies and the manner in which they were applied;
- (j) If no standstill period was applied, a statement of the reasons and circumstances relied upon by the procuring entity in deciding not to apply a standstill period;
- (k) In the case of a challenge or appeal under chapter VIII of this Law, a copy of the application for reconsideration or review and the appeal, as applicable,

and a copy of all decisions taken in the relevant challenge or appeal proceedings, or both, and the reasons therefor;

(l) A summary of any requests for clarification of the pre-qualification or pre-selection documents, if any, or of the solicitation documents and the responses thereto, as well as a summary of any modifications to those documents;

(m) Information relative to the qualifications, or lack thereof, of suppliers or contractors that presented applications to pre-qualify or for pre-selection, if any, or submissions;

(n) If a submission is rejected pursuant to article 20 of this Law, a statement to that effect and the reasons and circumstances relied upon by the procuring entity for its decision;

(o) If a supplier or contractor is excluded from the procurement proceedings pursuant to article 21 of this Law, a statement to that effect and the reasons and circumstances relied upon by the procuring entity for its decision;

(p) A copy of the notice of the standstill period given in accordance with paragraph 2 of article 22 of this Law;

(q) If the procurement proceedings resulted in the award of a procurement contract in accordance with paragraph 8 of article 22 of this Law, a statement to that effect and of the reasons therefor;

(r) The contract price and other principal terms and conditions of the procurement contract; where a written procurement contract has been concluded, a copy thereof. (In the case of a framework agreement procedure, in addition a summary of the principal terms and conditions of the framework agreement or a copy of any written framework agreement that was concluded);

(s) For each submission, the price and a summary of the other principal terms and conditions;

(t) A summary of the evaluation of submissions, including the application of any preference pursuant to paragraph 3 (b) of article 11 of this Law, and the reasons and circumstances on which the procuring entity relied to justify any rejection of bids presented during the auction;

(u) Where exemptions from disclosure of information were invoked under paragraph 1 of article 24 or under article 69 of this Law, the reasons and circumstances relied upon in invoking them;

(v) In procurement involving classified information, any requirements imposed on suppliers or contractors for the protection of classified information pursuant to paragraph 4 of article 24 of this Law; and

(w) Other information required to be included in the record in accordance with the provisions of this Law or the procurement regulations.

2. The portion of the record referred to in subparagraphs (a) to (k) of paragraph 1 of this article shall, on request, be made available to any person after the successful submission has been accepted or the procurement has been cancelled.

3. Subject to paragraph 4 of this article, or except as disclosed pursuant to paragraph 3 of article 42 of this Law, the portion of the record referred to in

subparagraphs (p) to (t) of paragraph 1 of this article shall, after the decision on acceptance of the successful submission has become known to them, be made available, upon request, to suppliers or contractors that presented submissions.

4. Except when ordered to do so by the [*name of court or courts*] or the [*name of the relevant organ designated by the enacting State*], and subject to the conditions of such an order, the procuring entity shall not disclose:

(a) Information from the record of the procurement proceedings if its non-disclosure is necessary for the protection of essential security interests of the State or if its disclosure would be contrary to law, would impede law enforcement, would prejudice the legitimate commercial interests of the suppliers or contractors or would impede fair competition;

(b) Information relating to the examination and evaluation of submissions, other than the summary referred to in subparagraph (t) of paragraph 1 of this article.

5. The procurement entity shall record, file and preserve all documents relating to the procurement proceedings, according to procurement regulations or other provisions of law of this State.

#### *Article 26*

##### *Code of conduct*

A code of conduct for officers or employees of procuring entities shall be enacted. It shall address, inter alia, the prevention of conflicts of interest in procurement and, where appropriate, measures to regulate matters regarding personnel responsible for procurement, such as declarations of interest in particular procurements, screening procedures and training requirements. The code of conduct so enacted shall be promptly made accessible to the public and systematically maintained.

## **Chapter II. Methods of procurement and their conditions for use; solicitation and notices of the procurement**

### **Section I. Methods of procurement and their conditions for use**

#### *Article 27*

##### *Methods of procurement*<sup>66</sup>

1. The procuring entity may conduct procurement by means of:

- (a) Open tendering;
- (b) Restricted tendering;
- (c) Request for quotations;

---

<sup>66</sup> States may choose not to incorporate all the methods of procurement listed in this article into their national legislation, although an appropriate range of options, including open tendering, should be always provided for. On this question, see the Guide to Enactment of the UNCITRAL Model Law on Public Procurement (A/CN.9/...). States may consider whether, for certain methods of procurement, to include a requirement for high-level approval by a designated organ. On this question, see the Guide to Enactment.

- (d) Request for proposals without negotiation;
  - (e) Two-stage tendering;
  - (f) Request for proposals with dialogue;
  - (g) Request for proposals with consecutive negotiations;
  - (h) Competitive negotiations;
  - (i) Electronic reverse auction; and
  - (j) Single-source procurement.
2. The procuring entity may engage in a framework agreement procedure in accordance with the provisions of chapter VII of this Law.

#### *Article 28*

##### *General rules applicable to the selection of a procurement method*

1. Except as otherwise provided for in articles 29 to 31 of this Law, a procuring entity shall conduct procurement by means of open tendering.
2. A procuring entity may use a method of procurement other than open tendering only in accordance with articles 29 to 31 of this Law, shall select the other method of procurement to accommodate the circumstances of the procurement concerned and shall seek to maximize competition to the extent practicable.
3. If the procuring entity uses a method of procurement other than open tendering, it shall include in the record required under article 25 of this Law a statement of the reasons and circumstances upon which it relied to justify the use of that method.

#### *Article 29*

##### *Conditions for the use of methods of procurement under chapter IV of this Law (restricted tendering, requests for quotations and requests for proposals without negotiation)*

1. The procuring entity may engage in procurement by means of restricted tendering in accordance with article 45 of this Law when:
  - (a) The subject matter of the procurement, by reason of its highly complex or specialized nature, is available only from a limited number of suppliers or contractors; or
  - (b) The time and cost required to examine and evaluate a large number of tenders would be disproportionate to the value of the subject matter of the procurement.
2. A procuring entity may engage in procurement by means of a request for quotations in accordance with article 46 of this Law for the procurement of readily available goods or services that are not specially produced or provided to the particular description of the procuring entity and for which there is an established market, so long as the estimated value of the procurement contract is less than the threshold amount set out in the procurement regulations.

3. The procuring entity may engage in procurement by means of request for proposals without negotiation in accordance with article 47 of this Law where the procuring entity needs to consider the financial aspects of proposals separately and only after completion of examination and evaluation of the quality and technical aspects of the proposals.

#### *Article 30*

*Conditions for the use of methods of procurement under chapter V of this Law (two-stage tendering, requests for proposals with dialogue, requests for proposals with consecutive negotiations, competitive negotiations and single-source procurement)*

1. A procuring entity may engage in procurement by means of two-stage tendering in accordance with article 48 of this Law where:

(a) The procuring entity assesses that discussions with suppliers or contractors are needed to refine aspects of the description of the subject matter of the procurement and to formulate them with the detail required under article 10 of this Law, and in order to allow the procuring entity to obtain the most satisfactory solution to its procurement needs; or

(b) Open tendering was engaged in but no tenders were presented or the procurement was cancelled by the procuring entity pursuant to paragraph 1 of article 19 of this Law and where, in the judgement of the procuring entity, engaging in new open-tendering proceedings or a procurement method under chapter IV of this Law would be unlikely to result in a procurement contract.

2. [Subject to approval by the *[name of the organ designated by the enacting State to issue the approval]*],<sup>67</sup> a procuring entity may engage in procurement by means of request for proposals with dialogue in accordance with article 49 of this Law where:

(a) It is not feasible for the procuring entity to formulate a detailed description of the subject matter of the procurement in accordance with article 10 of this Law, and the procuring entity assesses that dialogue with suppliers or contractors is needed to obtain the most satisfactory solution to its procurement needs;

(b) The procuring entity seeks to enter into a contract for the purpose of research, experiment, study or development, except where the contract includes the production of items in quantities sufficient to establish their commercial viability or to recover research and development costs;

(c) The procuring entity determines that the selected method is the most appropriate method of procurement for the protection of essential security interests of the State; or

(d) Open tendering was engaged in but no tenders were presented or the procurement was cancelled by the procuring entity pursuant to paragraph 1 of article 19 of this Law and where, in the judgement of the procuring entity, engaging

---

<sup>67</sup> The enacting State may consider enacting the provisions in brackets if it wishes to subject the use of this procurement method to a measure of ex ante control.

in new open-tendering proceedings or a procurement method under chapter IV of this Law would be unlikely to result in a procurement contract.

3. A procuring entity may engage in procurement by means of request for proposals with consecutive negotiations in accordance with article 50 of this Law where the procuring entity needs to consider the financial aspects of proposals separately and only after completion of examination and evaluation of the quality and technical aspects of the proposals, and it assesses that consecutive negotiations with suppliers or contractors are needed in order to ensure that the financial terms and conditions of the procurement contract are acceptable to the procuring entity.

4. A procuring entity may engage in competitive negotiations, in accordance with the provisions of article 51 of this Law, in the following circumstances:

(a) There is an urgent need for the subject matter of the procurement, and engaging in open-tendering proceedings or any other competitive method of procurement, because of the time involved in using those methods, would therefore be impractical, provided that the circumstances giving rise to the urgency were neither foreseeable by the procuring entity nor the result of dilatory conduct on its part;

(b) Owing to a catastrophic event, there is an urgent need for the subject matter of the procurement, making it impractical to use open-tendering proceedings or any other competitive method of procurement because of the time involved in using those methods; or

(c) The procuring entity determines that the use of any other competitive method of procurement is not appropriate for the protection of essential security interests of the State.

5. A procuring entity may engage in single-source procurement in accordance with the provisions of article 52 of this Law in the following exceptional circumstances:

(a) The subject matter of the procurement is available only from a particular supplier or contractor, or a particular supplier or contractor has exclusive rights in respect of the subject matter of the procurement, such that no reasonable alternative or substitute exists, and the use of any other procurement method would therefore not be possible;

(b) Owing to a catastrophic event, there is an extremely urgent need for the subject matter of the procurement, and engaging in any other method of procurement would be impractical because of the time involved in using those methods;

(c) The procuring entity, having procured goods, equipment, technology or services from a supplier or contractor, determines that additional supplies must be procured from that supplier or contractor for reasons of standardization or because of the need for compatibility with existing goods, equipment, technology or services, taking into account the effectiveness of the original procurement in meeting the needs of the procuring entity, the limited size of the proposed procurement in relation to the original procurement, the reasonableness of the price and the unsuitability of alternatives to the goods or services in question;

(d) The procuring entity determines that the use of any other method of procurement is not appropriate for the protection of essential security interests of the State; or

(e) [Subject to approval by the *[name of the organ designated by the enacting State to issue the approval]* and,] following public notice and adequate opportunity to comment, procurement from a particular supplier or contractor is necessary in order to implement a socio-economic policy of this State, provided that procurement from no other supplier or contractor is capable of promoting that policy.

#### *Article 31*

##### *Conditions for use of an electronic reverse auction*

1. A procuring entity may engage in procurement by means of an electronic reverse auction in accordance with the provisions of chapter VI of this Law, under the following conditions:

(a) It is feasible for the procuring entity to formulate a detailed description of the subject matter of the procurement;

(b) There is a competitive market of suppliers or contractors anticipated to be qualified to participate in the electronic reverse auction, such that effective competition is ensured; and

(c) The criteria to be used by the procuring entity in determining the successful submission are quantifiable and can be expressed in monetary terms.

2. A procuring entity may use an electronic reverse auction as a phase preceding the award of the procurement contract in a procurement method, as appropriate under the provisions of this Law. It may also use an electronic reverse auction for award of a procurement contract in a framework agreement procedure with second-stage competition in accordance with the provisions of this Law. An electronic reverse auction under this paragraph may be used only where the conditions of paragraph 1 (c) of this article are satisfied.

#### *Article 32*

##### *Conditions for use of a framework agreement procedure*

1. A procuring entity may engage in a framework agreement procedure in accordance with chapter VII of this Law where it determines that:

(a) The need for the subject matter of the procurement is expected to arise on an indefinite or repeated basis during a given period of time; or

(b) By virtue of the nature of the subject matter of the procurement, the need for that subject matter may arise on an urgent basis during a given period of time.

2. The procuring entity shall include in the record required under article 25 of this Law a statement of the reasons and circumstances upon which it relied to justify the use of a framework agreement procedure and the type of framework agreement selected.

## Section II. Solicitation and notices of the procurement

### *Article 33*

#### *Solicitation in open tendering, two-stage tendering and procurement by means of an electronic reverse auction*

1. An invitation to tender in open tendering or two-stage tendering and an invitation to an electronic reverse auction under article 53 of this Law shall be published in the publication identified in the procurement regulations.
2. The invitation shall also be published internationally, so as to be widely accessible to international suppliers or contractors.
3. The provisions of this article shall not apply where the procuring entity engages in pre-qualification proceedings in accordance with article 18 of this Law.
4. The procuring entity shall not be required to cause the invitation to be published in accordance with paragraph 2 of this article in domestic procurement and in procurement proceedings where the procuring entity decides, in view of the low value of the subject matter of the procurement, that only domestic suppliers or contractors are likely to be interested in presenting submissions.

### *Article 34*

#### *Solicitation in restricted tendering, request for quotations, competitive negotiations and single-source procurement: requirement for an advance notice of the procurement*

1. (a) When the procuring entity engages in procurement by means of restricted tendering on the grounds specified in paragraph 1 (a) of article 29 of this Law, it shall solicit tenders from all suppliers and contractors from which the subject matter of the procurement is available;  
  
(b) When the procuring entity engages in procurement by means of restricted tendering on the grounds specified in paragraph 1 (b) of article 29 of this Law, it shall select suppliers or contractors from which to solicit tenders in a non-discriminatory manner, and it shall select a sufficient number of suppliers or contractors to ensure effective competition.
2. Where the procuring entity engages in procurement by means of request for quotations in accordance with paragraph 2 of article 29 of this Law, it shall request quotations from as many suppliers or contractors as practicable, but from at least three.
3. Where the procuring entity engages in procurement by means of competitive negotiations in accordance with paragraph 4 of article 30 of this Law, it shall engage in negotiations with a sufficient number of suppliers or contractors to ensure effective competition.
4. Where the procuring entity engages in single-source procurement in accordance with paragraph 5 of article 30 of this Law, it shall solicit a proposal or price quotation from a single supplier or contractor.

5. Prior to direct solicitation in accordance with the provisions of paragraphs 1, 3 and 4 of this article, the procuring entity shall cause a notice of the procurement to be published in the publication identified in the procurement regulations. The notice shall contain at a minimum the following information:

- (a) The name and address of the procuring entity;
- (b) A summary of the principal required terms and conditions of the procurement contract or the framework agreement to be entered into in the procurement proceedings, including the nature, quantity and place of delivery of the goods to be supplied, the nature and location of the construction to be effected or the nature of the services and the location where they are to be provided, as well as the desired or required time for the supply of the goods, the completion of the construction or the provision of the services;
- (c) A declaration pursuant to article 8 of this Law; and
- (d) The method of procurement to be used.

6. The requirements of paragraph 5 of this article shall not apply in cases of urgent need as referred to in paragraphs 4 (a), 4 (b) and 5 (b) of article 30 of this Law.

#### *Article 35*

##### *Solicitation in request-for-proposals proceedings*

1. An invitation to participate in request-for-proposals proceedings shall be published in accordance with paragraphs 1 and 2 of article 33 of this Law, except where:

- (a) The procuring entity engages in pre-qualification proceedings in accordance with article 18 of this Law or in pre-selection proceedings in accordance with paragraph 3 of article 49 of this Law;
- (b) The procuring entity engages in direct solicitation under the conditions set out in paragraph 2 of this article; or
- (c) The procuring entity decides not to cause the invitation to be published in accordance with paragraph 2 of article 33 of this Law in the circumstances referred to in paragraph 4 of article 33 of this Law.

2. The procuring entity may engage in direct solicitation in request-for-proposals proceedings if:

- (a) The subject matter to be procured is available from only a limited number of suppliers or contractors, provided that the procuring entity solicits proposals from all those suppliers or contractors;
- (b) The time and cost required to examine and evaluate a large number of proposals would be disproportionate to the value of the subject matter to be procured, provided that the procuring entity solicits proposals from a sufficient number of suppliers or contractors to ensure effective competition and selects suppliers or contractors from which to solicit proposals in a non-discriminatory manner; or
- (c) The procurement involves classified information, provided that the procuring entity solicits proposals from a sufficient number of suppliers or contractors to ensure effective competition.

3. The procuring entity shall include in the record required under article 25 of this Law a statement of the reasons and circumstances upon which it relied to justify the use of direct solicitation in request-for-proposals proceedings.

4. The procuring entity shall cause a notice of the procurement to be published in accordance with the requirements set out in paragraph 5 of article 34 of this Law when it engages in direct solicitation in request-for-proposals proceedings.

### **Chapter III. Open tendering**

#### **Section I. Solicitation of tenders**

##### *Article 36*

##### *Procedures for soliciting tenders*

The procuring entity shall solicit tenders by causing an invitation to tender to be published in accordance with the provisions of article 33 of this Law.

##### *Article 37*

##### *Contents of invitation to tender*

The invitation to tender shall include the following information:

- (a) The name and address of the procuring entity;
- (b) A summary of the principal required terms and conditions of the procurement contract to be entered into as a result of the procurement proceedings, including the nature, quantity and place of delivery of the goods to be supplied, the nature and location of the construction to be effected or the nature of the services and the location where they are to be provided, as well as the desired or required time for the supply of the goods, the completion of the construction or the provision of the services;
- (c) A summary of the criteria and procedures to be used for ascertaining the qualifications of suppliers or contractors, and of any documentary evidence or other information that must be submitted by suppliers or contractors to demonstrate their qualifications, in conformity with article 9 of this Law;
- (d) A declaration pursuant to article 8 of this Law;
- (e) The means of obtaining the solicitation documents and the place where they may be obtained;
- (f) The price, if any, to be charged by the procuring entity for the solicitation documents;
- (g) If a price is to be charged for the solicitation documents, the means and currency of payment;
- (h) The language or languages in which the solicitation documents are available;
- (i) The manner, place and deadline for presenting tenders.

*Article 38**Provision of solicitation documents*

The procuring entity shall provide the solicitation documents to each supplier or contractor that responds to the invitation to tender in accordance with the procedures and requirements specified therein. If pre-qualification proceedings have been engaged in, the procuring entity shall provide a set of solicitation documents to each supplier or contractor that has been pre-qualified and that pays the price, if any, charged for those documents. The price that the procuring entity may charge for the solicitation documents shall reflect only the cost of providing them to suppliers or contractors.

*Article 39**Contents of solicitation documents*

The solicitation documents shall include the following information:

- (a) Instructions for preparing tenders;
- (b) The criteria and procedures, in conformity with the provisions of article 9 of this Law, that will be applied in the ascertainment of the qualifications of suppliers or contractors and in any further demonstration of qualifications pursuant to paragraph 5 of article 43 of this Law;
- (c) The requirements as to documentary evidence or other information that must be presented by suppliers or contractors to demonstrate their qualifications;
- (d) A detailed description of the subject matter of the procurement, in conformity with article 10 of this Law; the quantity of the goods; the services to be performed; the location where the goods are to be delivered, construction is to be effected or services are to be provided; and the desired or required time, if any, when goods are to be delivered, construction is to be effected or services are to be provided;
- (e) The terms and conditions of the procurement contract, to the extent that they are already known to the procuring entity, and the form of the contract, if any, to be signed by the parties;
- (f) If alternatives to the characteristics of the subject matter of the procurement, the contractual terms and conditions or other requirements set out in the solicitation documents are permitted, a statement to that effect and a description of the manner in which alternative tenders are to be evaluated;
- (g) If suppliers or contractors are permitted to present tenders for only a portion of the subject matter of the procurement, a description of the portion or portions for which tenders may be presented;
- (h) The manner in which the tender price is to be formulated and expressed, including a statement as to whether the price is to cover elements other than the cost of the subject matter of the procurement itself, such as any applicable transportation and insurance charges, customs duties and taxes;
- (i) The currency or currencies in which the tender price is to be formulated and expressed;

- (j) The language or languages, in conformity with article 13 of this Law, in which tenders are to be prepared;
- (k) Any requirements of the procuring entity with respect to the issuer and the nature, form, amount and other principal terms and conditions of any tender security to be provided by suppliers or contractors presenting tenders in accordance with article 17 of this Law, and any such requirements for any security for the performance of the procurement contract to be provided by the supplier or contractor that enters into the procurement contract, including securities such as labour and material bonds;
- (l) If a supplier or contractor may not modify or withdraw its tender prior to the deadline for presenting tenders without forfeiting its tender security, a statement to that effect;
- (m) The manner, place and deadline for presenting tenders, in conformity with article 14 of this Law;
- (n) The means by which, pursuant to article 15 of this Law, suppliers or contractors may seek clarification of the solicitation documents and a statement as to whether the procuring entity intends to convene a meeting of suppliers or contractors at this stage;
- (o) The period of time during which tenders shall be in effect, in conformity with article 41 of this Law;
- (p) The manner, place, date and time for the opening of tenders, in conformity with article 42 of this Law;
- (q) The criteria and procedure for examining tenders against the description of the subject matter of the procurement;
- (r) The criteria and procedure for evaluating tenders in accordance with article 11 of this Law;
- (s) The currency that will be used for the purpose of evaluating tenders pursuant to paragraph 4 of article 43 of this Law and either the exchange rate that will be used for the conversion of tender prices into that currency or a statement that the rate published by a specified financial institution and prevailing on a specified date will be used;
- (t) References to this Law, the procurement regulations and other laws and regulations directly pertinent to the procurement proceedings, including those applicable to procurement involving classified information, and the place where those laws and regulations may be found;
- (u) The name, functional title and address of one or more officers or employees of the procuring entity who are authorized to communicate directly with and to receive communications directly from suppliers or contractors in connection with the procurement proceedings without the intervention of an intermediary;
- (v) Notice of the right provided under article 64 of this Law to challenge or appeal decisions or actions taken by the procuring entity that are allegedly not in compliance with the provisions of this Law, together with information about the duration of the applicable standstill period and, if none will apply, a statement to that effect and the reasons therefor;

(w) Any formalities that will be required, once a successful tender has been accepted, for a procurement contract to enter into force, including, where applicable, the execution of a written procurement contract and approval by another authority pursuant to article 22 of this Law, and the estimated period of time following the dispatch of the notice of acceptance that will be required to obtain the approval;

(x) Any other requirements established by the procuring entity in conformity with this Law and the procurement regulations relating to the preparation and presentation of tenders and to other aspects of the procurement proceedings.

## **Section II. Presentation of tenders**

### *Article 40*

#### *Presentation of tenders*

1. Tenders shall be presented in the manner, at the place and by the deadline specified in the solicitation documents.
2. (a) A tender shall be presented in writing, signed and:
  - (i) If in paper form, in a sealed envelope; or
  - (ii) If in any other form, according to the requirements specified by the procuring entity in the solicitation documents, which shall ensure at least a similar degree of authenticity, security, integrity and confidentiality;
- (b) The procuring entity shall provide to the supplier or contractor a receipt showing the date and time when its tender was received;
- (c) The procuring entity shall preserve the security, integrity and confidentiality of a tender and shall ensure that the content of the tender is examined only after it is opened in accordance with this Law.
3. A tender received by the procuring entity after the deadline for presenting tenders shall not be opened and shall be returned unopened to the supplier or contractor that presented it.

### *Article 41*

#### *Period of effectiveness of tenders; modification and withdrawal of tenders*

1. Tenders shall be in effect during the period of time specified in the solicitation documents.
2. (a) Prior to the expiry of the period of effectiveness of tenders, the procuring entity may request suppliers or contractors to extend the period for an additional specified period of time. A supplier or contractor may refuse the request without forfeiting its tender security;
- (b) Suppliers or contractors that agree to an extension of the period of effectiveness of their tenders shall extend or procure an extension of the period of effectiveness of tender securities provided by them or provide new tender securities to cover the extended period of effectiveness of their tenders. A supplier or contractor whose tender security is not extended, or that has not provided a new

tender security, is considered to have refused the request to extend the period of effectiveness of its tender.

3. Unless otherwise stipulated in the solicitation documents, a supplier or contractor may modify or withdraw its tender prior to the deadline for presenting tenders without forfeiting its tender security. The modification or notice of withdrawal is effective if it is received by the procuring entity prior to the deadline for presenting tenders.

### **Section III. Evaluation of tenders**

#### *Article 42*

##### *Opening of tenders*

1. Tenders shall be opened at the time specified in the solicitation documents as the deadline for presenting tenders. They shall be opened at the place and in accordance with the manner and procedures specified in the solicitation documents.

2. All suppliers or contractors that have presented tenders, or their representatives, shall be permitted by the procuring entity to participate in the opening of tenders.

3. The name and address of each supplier or contractor whose tender is opened and the tender price shall be announced to those persons present at the opening of tenders, communicated on request to suppliers or contractors that have presented tenders but that are not present or represented at the opening of tenders, and included immediately in the record of the procurement proceedings required by article 25 of this Law.

#### *Article 43*

##### *Examination and evaluation of tenders*

1. (a) Subject to subparagraph (b) of this paragraph, the procuring entity shall regard a tender as responsive if it conforms to all requirements set out in the solicitation documents in accordance with article 10 of this Law;

(b) The procuring entity may regard a tender as responsive even if it contains minor deviations that do not materially alter or depart from the characteristics, terms, conditions and other requirements set out in the solicitation documents or if it contains errors or oversights that can be corrected without touching on the substance of the tender. Any such deviations shall be quantified, to the extent possible, and appropriately taken account of in the evaluation of tenders.

2. The procuring entity shall reject a tender:

- (a) If the supplier or contractor that presented the tender is not qualified;
- (b) If the supplier or contractor that presented the tender does not accept a correction of an arithmetical error made pursuant to article 16 of this Law;
- (c) If the tender is not responsive;
- (d) In the circumstances referred to in article 20 or 21 of this Law.

3. (a) The procuring entity shall evaluate the tenders that have not been rejected in order to ascertain the successful tender, as defined in subparagraph (b) of this paragraph, in accordance with the criteria and procedures set out in the solicitation documents. No criterion or procedure shall be used that has not been set out in the solicitation documents;

(b) The successful tender shall be:

(i) Where price is the only award criterion, the tender with the lowest tender price; or

(ii) Where there are price and other award criteria, the most advantageous tender ascertained on the basis of the criteria and procedures for evaluating tenders specified in the solicitation documents in accordance with article 11 of this Law.

4. When tender prices are expressed in two or more currencies, for the purpose of evaluating and comparing tenders, the tender prices of all tenders shall be converted to the currency specified in the solicitation documents according to the rate set out in those documents, pursuant to subparagraph (s) of article 39 of this Law.

5. Whether or not it has engaged in pre-qualification proceedings pursuant to article 18 of this Law, the procuring entity may require the supplier or contractor presenting the tender that has been found to be the successful tender pursuant to paragraph 3 (b) of this article to demonstrate its qualifications again, in accordance with criteria and procedures conforming to the provisions of article 9 of this Law. The criteria and procedures to be used for such further demonstration shall be set out in the solicitation documents. Where pre-qualification proceedings have been engaged in, the criteria shall be the same as those used in the pre-qualification proceedings.

6. If the supplier or contractor presenting the successful tender is requested to demonstrate its qualifications again in accordance with paragraph 5 of this article but fails to do so, the procuring entity shall reject that tender and shall select the next successful tender from among those remaining in effect, in accordance with paragraph 3 of this article, subject to the right of the procuring entity to cancel the procurement in accordance with paragraph 1 of article 19 of this Law.

#### *Article 44*

##### *Prohibition of negotiations with suppliers or contractors*

No negotiations shall take place between the procuring entity and a supplier or contractor with respect to a tender presented by the supplier or contractor.

### **Chapter IV. Procedures for restricted tendering, requests for quotations and requests for proposals without negotiation**

#### *Article 45*

##### *Restricted tendering*

1. The procuring entity shall solicit tenders in accordance with the provisions of paragraphs 1 and 5 of article 34 of this Law.

2. The provisions of chapter III of this Law, except for articles 36 to 38, shall apply to restricted-tendering proceedings.

#### *Article 46*

##### *Request for quotations*

1. The procuring entity shall request quotations in accordance with the provisions of paragraph 2 of article 34 of this Law. Each supplier or contractor from which a quotation is requested shall be informed whether any elements other than the charges for the subject matter of the procurement itself, such as any applicable transportation and insurance charges, customs duties and taxes, are to be included in the price.
2. Each supplier or contractor is permitted to give only one price quotation and is not permitted to change its quotation. No negotiations shall take place between the procuring entity and a supplier or contractor with respect to a quotation presented by the supplier or contractor.
3. The successful quotation shall be the lowest-priced quotation meeting the needs of the procuring entity as set out in the request for quotations.

#### *Article 47*

##### *Request for proposals without negotiation*

1. The procuring entity shall solicit proposals by causing an invitation to participate in the request-for-proposals-without-negotiation proceedings to be published in accordance with paragraph 1 of article 35 of this Law, unless an exception provided for in that article applies.
2. The invitation shall include:
  - (a) The name and address of the procuring entity;
  - (b) A detailed description of the subject matter of the procurement, in conformity with article 10 of this Law, and the desired or required time and location for the provision of such subject matter;
  - (c) The terms and conditions of the procurement contract, to the extent that they are already known to the procuring entity, and the form of the contract, if any, to be signed by the parties;
  - (d) The criteria and procedures to be used for ascertaining the qualifications of suppliers or contractors and any documentary evidence or other information that must be presented by suppliers or contractors to demonstrate their qualifications, in conformity with article 9 of this Law;
  - (e) The criteria and procedures for opening the proposals and for examining and evaluating the proposals in accordance with articles 10 and 11 of this Law, including the minimum requirements with respect to technical, quality and performance characteristics that proposals must meet in order to be considered responsive in accordance with article 10 of this Law, and a statement that proposals that fail to meet those requirements will be rejected as non-responsive;
  - (f) A declaration pursuant to article 8 of this Law;

(g) The means of obtaining the request for proposals and the place where it may be obtained;

(h) The price, if any, to be charged by the procuring entity for the request for proposals;

(i) If a price is to be charged for the request for proposals, the means and currency of payment;

(j) The language or languages in which the request for proposals is available;

(k) The manner, place and deadline for presenting proposals.

3. The procuring entity shall issue the request for proposals:

(a) Where an invitation to participate in the request-for-proposals-without-negotiation proceedings has been published in accordance with the provisions of paragraph 1 of article 35 of this Law, to each supplier or contractor responding to the invitation in accordance with the procedures and requirements specified therein;

(b) In the case of pre-qualification, to each supplier or contractor pre-qualified in accordance with article 18 of this Law;

(c) In the case of direct solicitation under paragraph 2 of article 35 of this Law, to each supplier or contractor selected by the procuring entity;

that pays the price, if any, charged for the request for proposals. The price that the procuring entity may charge for the request for proposals shall reflect only the cost of providing it to suppliers or contractors.

4. The request for proposals shall include, in addition to the information referred to in subparagraphs (a) to (e) and (k) of paragraph 2 of this article, the following information:

(a) Instructions for preparing and presenting proposals, including instructions to suppliers or contractors to present simultaneously to the procuring entity proposals in two envelopes: one envelope containing the technical, quality and performance characteristics of the proposal, and the other envelope containing the financial aspects of the proposal;

(b) If suppliers or contractors are permitted to present proposals for only a portion of the subject matter of the procurement, a description of the portion or portions for which proposals may be presented;

(c) The currency or currencies in which the proposal price is to be formulated and expressed, the currency that will be used for the purpose of evaluating proposals and either the exchange rate that will be used for the conversion of proposal prices into that currency or a statement that the rate published by a specified financial institution and prevailing on a specified date will be used;

(d) The manner in which the proposal price is to be formulated and expressed, including a statement as to whether the price is to cover elements other than the cost of the subject matter of the procurement itself, such as reimbursement for transportation, lodging, insurance, use of equipment, duties or taxes;

(e) The means by which, pursuant to article 15 of this Law, suppliers or contractors may seek clarification of the request for proposals, and a statement as to whether the procuring entity intends to convene a meeting of suppliers or contractors at this stage;

(f) References to this Law, the procurement regulations and other laws and regulations directly pertinent to the procurement proceedings, including those applicable to procurement involving classified information, and the place where those laws and regulations may be found;

(g) The name, functional title and address of one or more officers or employees of the procuring entity who are authorized to communicate directly with and to receive communications directly from suppliers or contractors in connection with the procurement proceedings without the intervention of an intermediary;

(h) Notice of the right provided under article 64 of this Law to challenge or appeal decisions or actions taken by the procuring entity that are allegedly not in compliance with the provisions of this Law, together with information about the duration of the applicable standstill period and, if none will apply, a statement to that effect and the reasons therefor;

(i) Any formalities that will be required, once the successful proposal has been accepted, for a procurement contract to enter into force, including, where applicable, the execution of a written procurement contract and approval by another authority pursuant to article 22 of this Law, and the estimated period of time following the dispatch of the notice of acceptance that will be required to obtain the approval;

(j) Any other requirements that may be established by the procuring entity in conformity with this Law and the procurement regulations relating to the preparation and presentation of proposals and to the procurement proceedings.

5. Before opening the envelopes containing the financial aspects of the proposals, the procuring entity shall examine and evaluate the technical, quality and performance characteristics of proposals in accordance with the criteria and procedures specified in the request for proposals.

6. The results of the examination and evaluation of the technical, quality and performance characteristics of the proposals shall immediately be included in the record of the procurement proceedings.

7. The proposals whose technical, quality and performance characteristics fail to meet the relevant minimum requirements shall be considered to be non-responsive and shall be rejected on that ground. A notice of rejection and the reasons for the rejection, together with the unopened envelope containing the financial aspects of the proposal, shall promptly be dispatched to each respective supplier or contractor whose proposal was rejected.

8. The proposals whose technical, quality and performance characteristics meet or exceed the relevant minimum requirements shall be considered to be responsive. The procuring entity shall promptly communicate to each supplier or contractor presenting such a proposal the score of the technical, quality and performance characteristics of its respective proposal. The procuring entity shall invite all such

suppliers or contractors to the opening of the envelopes containing the financial aspects of their proposals.

9. The score of the technical, quality and performance characteristics of each responsive proposal and the corresponding financial aspect of that proposal shall be read out in the presence of the suppliers or contractors invited, in accordance with paragraph 8 of this article, to the opening of the envelopes containing the financial aspects of the proposals.

10. The procuring entity shall compare the financial aspects of the responsive proposals and on that basis identify the successful proposal in accordance with the criteria and the procedure set out in the request for proposals. The successful proposal shall be the proposal with the best combined evaluation in terms of: (a) the criteria other than price specified in the request for proposals; and (b) the price.

## **Chapter V. Procedures for two-stage tendering, requests for proposals with dialogue, requests for proposals with consecutive negotiations, competitive negotiations and single-source procurement**

### *Article 48*

#### *Two-stage tendering*

1. The provisions of chapter III of this Law shall apply to two-stage-tendering proceedings, except to the extent that those provisions are derogated from in this article.

2. The solicitation documents shall call upon suppliers or contractors to present, in the first stage of two-stage-tendering proceedings, initial tenders containing their proposals without a tender price. The solicitation documents may solicit proposals relating to the technical, quality or performance characteristics of the subject matter of the procurement, as well as to contractual terms and conditions of supply and, where relevant, the professional and technical competence and qualifications of the suppliers or contractors.

3. The procuring entity may, in the first stage, engage in discussions with suppliers or contractors whose initial tenders have not been rejected pursuant to provisions of this Law concerning any aspect of their initial tenders. When the procuring entity engages in discussions with any supplier or contractor, it shall extend an equal opportunity to participate in discussions to all suppliers or contractors.

4. (a) In the second stage of two-stage-tendering proceedings, the procuring entity shall invite all suppliers or contractors whose initial tenders were not rejected in the first stage to present final tenders with prices in response to a revised set of terms and conditions of the procurement;

(b) In revising the relevant terms and conditions of the procurement, the procuring entity may not modify the subject matter of the procurement but may refine aspects of the description of the subject matter of the procurement by:

- (i) Deleting or modifying any aspect of the technical, quality or performance characteristics of the subject matter of the procurement initially provided and adding any new characteristics that conform to the requirements of this Law;
- (ii) Deleting or modifying any criterion for examining or evaluating tenders initially provided and adding any new criterion that conforms to the requirements of this Law, only to the extent that the deletion, modification or addition is required as a result of changes made in the technical, quality or performance characteristics of the subject matter of the procurement;
- (c) Any deletion, modification or addition made pursuant to subparagraph (b) of this paragraph shall be communicated to suppliers or contractors in the invitation to present final tenders;
- (d) A supplier or contractor not wishing to present a final tender may withdraw from the tendering proceedings without forfeiting any tender security that the supplier or contractor may have been required to provide;
- (e) The final tenders shall be evaluated in order to ascertain the successful tender as defined in paragraph 3 (b) of article 43 of this Law.

#### *Article 49*

##### *Request for proposals with dialogue*

1. The procuring entity shall solicit proposals by causing an invitation to participate in the request-for-proposals-with-dialogue proceedings to be published in accordance with paragraph 1 of article 35 of this Law, unless an exception provided for in that article applies.
2. The invitation shall include:
  - (a) The name and address of the procuring entity;
  - (b) A description of the subject matter of the procurement, to the extent known, and the desired or required time and location for the provision of such subject matter;
  - (c) The terms and conditions of the procurement contract, to the extent that they are already known to the procuring entity, and the form of the contract, if any, to be signed by the parties;
  - (d) The intended stages of the procedure;
  - (e) The criteria and procedures to be used for ascertaining the qualifications of suppliers or contractors and any documentary evidence or other information that must be presented by suppliers or contractors to demonstrate their qualifications, in conformity with article 9 of this Law;
  - (f) The minimum requirements that proposals must meet in order to be considered responsive in accordance with article 10 of this Law and a statement that proposals that fail to meet those requirements will be rejected as non-responsive;
  - (g) A declaration pursuant to article 8 of this Law;
  - (h) The means of obtaining the request for proposals and the place where it may be obtained;

(i) The price, if any, to be charged by the procuring entity for the request for proposals;

(j) If a price is to be charged for the request for proposals, the means and currency of payment;

(k) The language or languages in which the request for proposals is available;

(l) The manner, place and deadline for presenting proposals.

3. For the purpose of limiting the number of suppliers or contractors from which to request proposals, the procuring entity may engage in pre-selection proceedings. The provisions of article 18 of this Law shall apply *mutatis mutandis* to the pre-selection proceedings, except to the extent that those provisions are derogated from in this paragraph:

(a) The procuring entity shall specify in the pre-selection documents that it will request proposals from only a limited number of pre-selected suppliers or contractors that best meet the qualification criteria specified in the pre-selection documents;

(b) The pre-selection documents shall set out the maximum number of pre-selected suppliers or contractors from which the proposals will be requested and the manner in which the selection of that number will be carried out. In establishing such a limit, the procuring entity shall bear in mind the need to ensure effective competition;

(c) The procuring entity shall rate the suppliers or contractors that meet the criteria specified in the pre-selection documents according to the manner of rating that is set out in the invitation to pre-selection and the pre-selection documents;

(d) The procuring entity shall pre-select suppliers or contractors that acquired the best rating, up to the maximum number indicated in the pre-selection documents but at least three, if possible;

(e) The procuring entity shall promptly notify each supplier or contractor whether it has been pre-selected and shall, upon request, communicate to suppliers or contractors that have not been pre-selected the reasons therefor. It shall make available to any person, upon request, the names of all suppliers or contractors that have been pre-selected.

4. The procuring entity shall issue the request for proposals:

(a) Where an invitation to participate in the request-for-proposals-with-dialogue proceedings has been published in accordance with the provisions of paragraph 1 of article 35 of this Law, to each supplier or contractor responding to the invitation in accordance with the procedures and requirements specified therein;

(b) In the case of pre-qualification, to each supplier or contractor pre-qualified in accordance with article 18 of this Law;

(c) Where pre-selection proceedings have been engaged in, to each pre-selected supplier or contractor in accordance with the procedures and requirements specified in the pre-selection documents;

(d) In the case of direct solicitation under paragraph 2 of article 35 of this Law, to each supplier or contractor selected by the procuring entity;

that pays the price, if any, charged for the request for proposals. The price that the procuring entity may charge for the request for proposals shall reflect only the cost of providing it to suppliers or contractors.

5. The request for proposals shall include, in addition to the information referred to in paragraphs 2 (a) to (f) and (l) of this article, the following information:

(a) Instructions for preparing and presenting proposals;

(b) If suppliers or contractors are permitted to present proposals for only a portion of the subject matter of the procurement, a description of the portion or portions for which proposals may be presented;

(c) The currency or currencies in which the proposal price is to be formulated and expressed, the currency that will be used for the purpose of evaluating proposals and either the exchange rate that will be used for the conversion of proposal prices into that currency or a statement that the rate published by a specified financial institution and prevailing on a specified date will be used;

(d) The manner in which the proposal price is to be formulated and expressed, including a statement as to whether the price is to cover elements other than the cost of the subject matter of the procurement itself, such as reimbursement for transportation, lodging, insurance, use of equipment, duties or taxes;

(e) The means by which, pursuant to article 15 of this Law, suppliers or contractors may seek clarification of the request for proposals and a statement as to whether the procuring entity intends to convene a meeting of suppliers or contractors at this stage;

(f) Any element of the description of the subject matter of the procurement or term or condition of the procurement contract that will not be the subject of dialogue during the procedure;

(g) Where the procuring entity intends to limit the number of suppliers or contractors that it will invite to participate in the dialogue, the minimum number of suppliers or contractors, which shall be not lower than three, if possible, and, where appropriate, the maximum number of suppliers or contractors and the criteria and procedure, in conformity with the provisions of this Law, that will be followed in selecting either number;

(h) The criteria and procedure for evaluating the proposals in accordance with article 11 of this Law;

(i) References to this Law, the procurement regulations and other laws and regulations directly pertinent to the procurement proceedings, including those applicable to procurement involving classified information, and the place where those laws and regulations may be found;

(j) The name, functional title and address of one or more officers or employees of the procuring entity who are authorized to communicate directly with and to receive communications directly from suppliers or contractors in connection with the procurement proceedings without the intervention of an intermediary;

(k) Notice of the right provided under article 64 of this Law to challenge or appeal decisions or actions taken by the procuring entity that are allegedly not in compliance with the provisions of this Law, together with information about the duration of the applicable standstill period and, if none will apply, a statement to that effect and the reasons therefor;

(l) Any formalities that will be required, once the successful offer has been accepted, for a procurement contract to enter into force, including, where applicable, the execution of a written procurement contract and approval by another authority pursuant to article 22 of this Law, and the estimated period of time following dispatch of the notice of acceptance that will be required to obtain the approval;

(m) Any other requirements that may be established by the procuring entity in conformity with this Law and the procurement regulations relating to the preparation and presentation of proposals and to the procurement proceedings.

6. (a) The procuring entity shall examine all proposals received against the established minimum requirements and shall reject each proposal that fails to meet these minimum requirements on the ground that it is non-responsive;

(b) Where a maximum limit on the number of suppliers or contractors that can be invited to participate in the dialogue has been established and the number of responsive proposals exceeds that limit, the procuring entity shall select the maximum number of responsive proposals in accordance with the criteria and procedure specified in the request for proposals;

(c) A notice of rejection and the reasons for the rejection shall be promptly dispatched to each respective supplier or contractor whose proposal was rejected.

7. The procuring entity shall invite each supplier or contractor that presented a responsive proposal, within any applicable maximum, to participate in the dialogue. The procuring entity shall ensure that the number of suppliers or contractors invited to participate in the dialogue, which shall be at least three, if possible, is sufficient to ensure effective competition.

8. The dialogue shall be conducted by the same representatives of the procuring entity on a concurrent basis.

9. During the course of the dialogue, the procuring entity shall not modify the subject matter of the procurement, any qualification or evaluation criterion, any minimum requirements established pursuant to paragraph 2 (f) of this article, any element of the description of the subject matter of the procurement or any term or condition of the procurement contract that is not subject to the dialogue as specified in the request for proposals.

10. Any requirements, guidelines, documents, clarifications or other information generated during the dialogue that is communicated by the procuring entity to a supplier or contractor shall be communicated at the same time and on an equal basis to all other participating suppliers or contractors, unless such information is specific or exclusive to that supplier or contractor or such communication would be in breach of the confidentiality provisions of article 24 of this Law.

11. Following the dialogue, the procuring entity shall request all suppliers or contractors remaining in the proceedings to present a best and final offer with

respect to all aspects of their proposals. The request shall be in writing and shall specify the manner, place and deadline for presenting best and final offers.

12. No negotiations shall take place between the procuring entity and suppliers or contractors with respect to their best and final offers.

13. The successful offer shall be the offer that best meets the needs of the procuring entity as determined in accordance with the criteria and procedure for evaluating the proposals set out in the request for proposals.

#### *Article 50*

##### *Request for proposals with consecutive negotiations*

1. The provisions of paragraphs 1 to 7 of article 47 of this Law shall apply mutatis mutandis to procurement conducted by means of request for proposals with consecutive negotiations, except to the extent that those provisions are derogated from in this article.

2. Proposals whose technical, quality and performance characteristics meet or exceed the relevant minimum requirements shall be considered to be responsive. The procuring entity shall rank each responsive proposal in accordance with the criteria and procedure for evaluating proposals as set out in the request for proposals and shall:

(a) Promptly communicate to each supplier or contractor presenting a responsive proposal the score of the technical, quality and performance characteristics of its respective proposal and its ranking;

(b) Invite the supplier or contractor that has attained the best ranking, in accordance with those criteria and procedure, for negotiations on the financial aspects of its proposal; and

(c) Inform other suppliers or contractors that presented responsive proposals that their proposals may be considered for negotiation if negotiations with the supplier (or suppliers) or contractor (or contractors) with a better ranking do not result in a procurement contract.

3. If it becomes apparent to the procuring entity that the negotiations with the supplier or contractor invited pursuant to paragraph 2 (b) of this article will not result in a procurement contract, the procuring entity shall inform that supplier or contractor that it is terminating the negotiations.

4. The procuring entity shall then invite for negotiations the supplier or contractor that attained the second-best ranking; if the negotiations with that supplier or contractor do not result in a procurement contract, the procuring entity shall invite the other suppliers or contractors still participating in the procurement proceedings for negotiations on the basis of their ranking until it arrives at a procurement contract or rejects all remaining proposals.

5. During the course of the negotiations, the procuring entity shall not modify the subject matter of the procurement; any qualification, examination or evaluation criterion, including any established minimum requirements; any element of the description of the subject matter of the procurement; or term or condition of the

procurement contract other than financial aspects of proposals that are subject to the negotiations as specified in the request for proposals.

6. The procuring entity may not reopen negotiations with any supplier or contractor with which it has terminated negotiations.

#### *Article 51*

##### *Competitive negotiations*

1. Paragraphs 3, 5 and 6 of article 34 of this Law shall apply to the procedure preceding the negotiations.

2. Any requirements, guidelines, documents, clarifications or other information relative to the negotiations that is communicated by the procuring entity to a supplier or contractor before or during the negotiations shall be communicated at the same time and on an equal basis to all other suppliers or contractors engaging in negotiations with the procuring entity relative to the procurement, unless such information is specific or exclusive to that supplier or contractor or such communication would be in breach of the confidentiality provisions of article 24 of this Law.

3. Following completion of negotiations, the procuring entity shall request all suppliers or contractors remaining in the proceedings to present, by a specified date, a best and final offer with respect to all aspects of their proposals.

4. No negotiations shall take place between the procuring entity and suppliers or contractors with respect to their best and final offers.

5. The successful offer shall be the offer that best meets the needs of the procuring entity.

#### *Article 52*

##### *Single-source procurement*

Paragraphs 4 to 6 of article 34 of this Law shall apply to the procedure preceding the solicitation of a proposal or price quotation from a single supplier or contractor. The procuring entity shall engage in negotiations with the supplier or contractor from which a proposal or price quotation is solicited unless such negotiations are not feasible in the circumstances of the procurement concerned.

## **Chapter VI. Electronic reverse auctions**

#### *Article 53*

##### *Electronic reverse auction as a stand-alone method of procurement*

1. The procuring entity shall solicit bids by causing an invitation to the electronic reverse auction to be published in accordance with article 33 of this Law. The invitation shall include:

- (a) The name and address of the procuring entity;

- (b) A detailed description of the subject matter of the procurement, in conformity with article 10 of this Law, and the desired or required time and location for the provision of such subject matter;
- (c) The terms and conditions of the procurement contract, to the extent they are already known to the procuring entity, and the form of the contract, if any, to be signed by the parties;
- (d) A declaration pursuant to article 8 of this Law;
- (e) The criteria and procedures to be used for ascertaining the qualifications of suppliers or contractors and any documentary evidence or other information that must be presented by suppliers or contractors to demonstrate their qualifications in conformity with article 9 of this Law;
- (f) The criteria and procedure for examining bids against the description of the subject matter of the procurement;
- (g) The criteria and procedure for evaluating bids in accordance with article 11 of this Law, including any mathematical formula that will be used in the evaluation procedure during the auction;
- (h) The manner in which the bid price is to be formulated and expressed, including a statement as to whether the price is to cover elements other than the cost of the subject matter of the procurement itself, such as any applicable transportation and insurance charges, customs duties and taxes;
- (i) The currency or currencies in which the bid price is to be formulated and expressed;
- (j) The minimum number of suppliers or contractors required to register for the auction in order for the auction to be held, which shall be sufficient to ensure effective competition;
- [(k) If any limit on the number of suppliers or contractors that can be registered for the auction is imposed in accordance with paragraph 2 of this article, the relevant maximum number and the criteria and procedure, in conformity with paragraph 2 of this article, that will be followed in selecting it;]
- (l) How the auction can be accessed, including appropriate information regarding connection to the auction;
- (m) The deadline by which suppliers or contractors must register for the auction and the requirements for registration;
- (n) The date and time of the opening of the auction and the requirements for identification of bidders at the opening of the auction;
- (o) The criteria governing the closing of the auction;
- (p) Other rules for the conduct of the auction, including the information that will be made available to the bidders in the course of the auction, the language in which it will be made available and the conditions under which the bidders will be able to bid;
- (q) References to this Law, the procurement regulations and other laws and regulations directly pertinent to the procurement proceedings, including those

applicable to procurement involving classified information, and the place where those laws and regulations may be found;

(r) The means by which suppliers or contractors may seek clarification of information relating to the procurement proceedings;

(s) The name, functional title and address of one or more officers or employees of the procuring entity who are authorized to communicate directly with and to receive communications directly from suppliers or contractors in connection with the procurement proceedings before and after the auction without the intervention of an intermediary;

(t) Notice of the right provided under article 64 of this Law to challenge or appeal decisions or actions taken by the procuring entity that are allegedly not in compliance with the provisions of this Law, together with information about the duration of the applicable standstill period and, if none will apply, a statement to that effect and the reasons therefor;

(u) Any formalities that will be required after the auction for a procurement contract to enter into force, including, where applicable, ascertainment of qualifications or responsiveness in accordance with article 57 of this Law and the execution of a written procurement contract pursuant to article 22 of this Law;

(v) Any other requirements established by the procuring entity in conformity with this Law and the procurement regulations relating to the procurement proceedings.

[2. The procuring entity may impose a maximum limit on the number of suppliers or contractors that can be registered for the electronic reverse auction only to the extent that capacity constraints in its communications system so require, and shall select the suppliers or contractors to be so registered in a non-discriminatory manner. The procuring entity shall include a statement of the reasons and circumstances upon which it relied to justify the imposition of such a maximum limit in the record required under article 25 of this Law.]

3. The procuring entity may decide, in the light of the circumstances of the given procurement, that the electronic reverse auction shall be preceded by an examination or evaluation of initial bids. In such case, the invitation to the auction shall, in addition to information listed in paragraph 1 of this article, include:

(a) An invitation to present initial bids, together with instructions for preparing initial bids;

(b) The manner, place and deadline for presenting initial bids.

4. Where the electronic reverse auction has been preceded by an examination or evaluation of initial bids, the procuring entity shall promptly after the completion of the examination or evaluation of initial bids:

(a) Dispatch the notice of rejection and reasons for rejection to each supplier or contractor whose initial bid was rejected;

(b) Issue an invitation to the auction to each qualified supplier or contractor whose initial bid is responsive, providing all information required to participate in the auction;

(c) Where an evaluation of initial bids has taken place, each invitation to the auction shall also be accompanied by the outcome of the evaluation, as relevant to the supplier or contractor to which the invitation is addressed.

#### *Article 54*

##### *Electronic reverse auction as a phase preceding the award of the procurement contract*

1. Where an electronic reverse auction is to be used as a phase preceding the award of the procurement contract in a procurement method, as appropriate, or in a framework agreement procedure with second-stage competition, the procuring entity shall notify suppliers or contractors when first soliciting their participation in the procurement proceedings that an auction will be held, and shall provide, in addition to other information required to be included under provisions of this Law, the following information about the auction:

(a) The mathematical formula that will be used in the evaluation procedure during the auction;

(b) How the auction can be accessed, including appropriate information regarding connection to the auction.

2. Before the electronic reverse auction is held, the procuring entity shall issue an invitation to the auction to all suppliers or contractors remaining in the proceedings, specifying:

(a) The deadline by which the suppliers or contractors must register for the auction and requirements for registration;

(b) The date and time of the opening of the auction and requirements for the identification of bidders at the opening of the auction;

(c) Criteria governing the closing of the auction;

(d) Other rules for the conduct of the auction, including the information that will be made available to the bidders during the auction and the conditions under which the bidders will be able to bid.

3. Where an evaluation of initial bids has taken place, each invitation to the auction shall also be accompanied by the outcome of the evaluation as relevant to the supplier or contractor to which the invitation is addressed.

#### *Article 55*

##### *Registration for the electronic reverse auction and the timing of the holding of the auction*

1. Confirmation of registration for the electronic reverse auction shall be communicated promptly to each registered supplier or contractor.

2. If the number of suppliers or contractors registered for the electronic reverse auction is insufficient to ensure effective competition, the procuring entity may cancel the auction. The cancellation of the auction shall be communicated promptly to each registered supplier or contractor.

3. The period of time between the issuance of the invitation to the electronic reverse auction and the auction shall be sufficiently long to allow suppliers or contractors to prepare for the auction, taking into account the reasonable needs of the procuring entity.

#### *Article 56*

##### *Requirements during the electronic reverse auction*

1. The electronic reverse auction shall be based on:
  - (a) Price, where the procurement contract is to be awarded to the lowest-priced bid; or
  - (b) Price and other criteria specified to suppliers or contractors under articles 53 and 54 of this Law, as applicable, where the procurement contract is to be awarded to the most advantageous bid.
2. During the auction:
  - (a) All bidders shall have an equal and continuous opportunity to present their bids;
  - (b) There shall be automatic evaluation of all bids in accordance with the criteria, procedure and formula provided to suppliers or contractors under articles 53 and 54 of this Law, as applicable;
  - (c) Each bidder must receive, instantaneously and on a continuous basis during the auction, sufficient information allowing it to determine the standing of its bid vis-à-vis other bids;
  - (d) There shall be no communication between the procuring entity and the bidders or among the bidders, other than as provided for in subparagraphs (a) and (c) of this paragraph.
3. The procuring entity shall not disclose the identity of any bidder during the auction.
4. The auction shall be closed in accordance with the criteria specified to suppliers or contractors under articles 53 and 54 of this Law, as applicable.
5. The procuring entity shall suspend or terminate the auction in the case of failures in its communication system that put at risk the proper conduct of the auction or for other reasons stipulated in the rules for the conduct of the auction. The procuring entity shall not disclose the identity of any bidder in the case of suspension or termination of the auction.

#### *Article 57*

##### *Requirements after the electronic reverse auction*

1. The bid that at the closure of the electronic reverse auction is the lowest-priced bid or the most advantageous bid, as applicable, shall be the successful bid.
2. In procurement by means of an auction that was not preceded by examination or evaluation of initial bids, the procuring entity shall ascertain after the auction the responsiveness of the successful bid and the qualifications of the supplier or

contractor submitting it. The procuring entity shall reject that bid if it is found to be unresponsive or if the supplier or contractor submitting it is found unqualified. Without prejudice to the right of the procuring entity to cancel the procurement in accordance with paragraph 1 of article 19 of this Law, the procuring entity shall select the bid that was the next lowest-priced or next most advantageous bid at the closure of the auction, provided that that bid is ascertained to be responsive and the supplier or contractor submitting it is ascertained to be qualified.

3. Where the successful bid at the closure of the auction appears to the procuring entity to be abnormally low and gives rise to concerns on the part of the procuring entity as to the ability of the bidder that presented it to perform the procurement contract, the procuring entity may follow the procedures described in article 20 of this Law. If the procuring entity rejects the bid as abnormally low under article 20, it shall select the bid that at the closure of the auction was the next lowest-priced or next most advantageous bid. This provision is without prejudice to the right of the procuring entity to cancel the procurement in accordance with paragraph 1 of article 19 of this Law.

## **Chapter VII. Framework agreement procedures**

### *Article 58*

#### *Award of a closed framework agreement*

1. The procuring entity shall award a closed framework agreement:

(a) By means of open-tendering proceedings, in accordance with provisions of chapter III of this Law, except to the extent that those provisions are derogated from in this chapter; or

(b) By means of other procurement methods, in accordance with the relevant provisions of chapters II, IV and V of this Law, except to the extent that those provisions are derogated from in this chapter.

2. The provisions of this Law regulating pre-qualification and the contents of the solicitation in the context of the procurement methods referred to in paragraph 1 of this article shall apply *mutatis mutandis* to the information to be provided to suppliers or contractors when first soliciting their participation in a closed framework agreement procedure. The procuring entity shall in addition specify at that stage:

(a) That the procurement will be conducted as a framework agreement procedure, leading to a closed framework agreement;

(b) Whether the framework agreement is to be concluded with one or more than one supplier or contractor;

(c) If the framework agreement will be concluded with more than one supplier or contractor, any minimum or maximum limit on the number of suppliers or contractors that will be parties thereto;

(d) The form, terms and conditions of the framework agreement in accordance with article 59 of this Law.

3. The provisions of article 22 of this Law shall apply mutatis mutandis to the award of a closed framework agreement.

#### *Article 59*

##### *Requirements for closed framework agreements*

1. A closed framework agreement shall be concluded in writing and shall set out:
  - (a) The duration of the framework agreement, which shall not exceed the maximum duration established by the procurement regulations;
  - (b) The description of the subject matter of the procurement and all other terms and conditions of the procurement established when the framework agreement is concluded;
  - (c) To the extent that they are known, estimates of the terms and conditions of the procurement that cannot be established with sufficient precision when the framework agreement is concluded;
  - (d) Whether, in a closed framework agreement concluded with more than one supplier or contractor, there will be a second-stage competition to award a procurement contract under the framework agreement and, if so:
    - (i) A statement of the terms and conditions of the procurement that are to be established or refined through second-stage competition;
    - (ii) The procedures for and the anticipated frequency of any second-stage competition, and envisaged deadlines for presenting second-stage submissions;
    - (iii) The procedures and criteria to be applied during the second-stage competition, including the relative weight of such criteria and the manner in which they will be applied, in accordance with articles 10 and 11 of this Law. If the relative weights of the evaluation criteria may be varied during the second-stage competition, the framework agreement shall specify the permissible range;
  - (e) Whether the award of a procurement contract under the framework agreement will be to the lowest-priced or to the most advantageous submission; and
  - (f) The manner in which the procurement contract will be awarded.
2. A closed framework agreement with more than one supplier or contractor shall be concluded as one agreement between all parties unless:
  - (a) The procuring entity determines that it is in the interests of a party to the framework agreement that a separate agreement with any supplier or contractor party be concluded;
  - (b) The procuring entity includes in the record required under article 25 of this Law a statement of the reasons and circumstances on which it relied to justify the conclusion of separate agreements; and
  - (c) Any variation in the terms and conditions of the separate agreements for a given procurement is minor and concerns only those provisions that justify the conclusion of separate agreements.

3. The framework agreement shall contain, in addition to information specified elsewhere in this article, all information necessary to allow the effective operation of the framework agreement, including information on how the agreement and notifications of forthcoming procurement contracts thereunder can be accessed and appropriate information regarding connection, where applicable.

*Article 60*

*Establishment of an open framework agreement*

1. The procuring entity shall establish and maintain an open framework agreement online.

2. The procuring entity shall solicit participation in the open framework agreement by causing an invitation to become a party to the open framework agreement to be published following the requirements of article 33 of this Law.

3. The invitation to become a party to the open framework agreement shall include the following information:

(a) The name and address of the procuring entity establishing and maintaining the open framework agreement and the name and address of any other procuring entities that will have the right to award procurement contracts under the framework agreement;

(b) That the procurement will be conducted as a framework agreement procedure leading to an open framework agreement;

(c) The language (or languages) of the open framework agreement and all information about the operation of the agreement, including how the agreement and notifications of forthcoming procurement contracts thereunder can be accessed and appropriate information regarding connection;

(d) The terms and conditions for suppliers or contractors to be admitted to the open framework agreement, including:

(i) A declaration pursuant to article 8 of this Law;

[(ii) If any maximum limit on the number of suppliers or contractors that are parties to the open framework agreement is imposed in accordance with paragraph 7 of this article, the relevant number and the criteria and procedure, in conformity with paragraph 7 of this article, that will be followed in selecting it;]

(iii) Instructions for preparing and presenting the indicative submissions necessary to become a party to the open framework agreement, including the currency or currencies and the language (or languages) to be used, as well as the criteria and procedures to be used for ascertaining the qualifications of suppliers or contractors and any documentary evidence or other information that must be presented by suppliers or contractors to demonstrate their qualifications in conformity with article 9 of this Law;

(iv) An explicit statement that suppliers or contractors may apply to become parties to the framework agreement at any time during the period of its operation by presenting indicative submissions, subject to any maximum limit

on the number of suppliers or contractors and any declaration made pursuant to article 8 of this Law;

(e) Other terms and conditions of the open framework agreement, including all information required to be set out in the open framework agreement in accordance with article 61 of this Law;

(f) References to this Law, the procurement regulations and other laws and regulations directly pertinent to the procurement proceedings, including those applicable to procurement involving classified information, and the place where those laws and regulations may be found;

(g) The name, functional title and address of one or more officers or employees of the procuring entity who are authorized to communicate directly with and to receive communications directly from suppliers or contractors in connection with the procurement proceedings without the intervention of an intermediary.

4. Suppliers or contractors may apply to become a party or parties to the framework agreement at any time during its operation by presenting indicative submissions to the procuring entity in compliance with the requirements of the invitation to become a party to the open framework agreement.

5. The procuring entity shall examine all indicative submissions received during the period of operation of the framework agreement within a maximum of ... working days [*the enacting State specifies the maximum period of time*], in accordance with the procedures set out in the invitation to become a party to the open framework agreement.

6. The framework agreement shall be concluded with all qualified suppliers or contractors that presented submissions unless their submissions have been rejected on the grounds specified in the invitation to become a party to the open framework agreement.

[7. The procuring entity may impose a maximum limit on the number of parties to the open framework agreement only to the extent that capacity limitations in its communications system so require, and shall select the suppliers or contractors to be parties to the open framework agreement in a non-discriminatory manner. The procuring entity shall include in the record required under article 25 of this Law a statement of the reasons and circumstances upon which it relied to justify the imposition of such a maximum limit.]

8. The procuring entity shall promptly notify the suppliers or contractors whether they have become parties to the framework agreement and of the reasons for the rejection of their indicative submissions if they have not.

#### *Article 61*

##### *Requirements for open framework agreements*

1. An open framework agreement shall provide for second-stage competition for the award of a procurement contract under the agreement and shall include:

(a) The duration of the framework agreement;

(b) The description of the subject matter of the procurement and all other terms and conditions of the procurement known when the open framework agreement is established;

(c) Any terms and conditions of the procurement that may be refined through second-stage competition;

(d) The procedures and the anticipated frequency of second-stage competition;

(e) Whether the award of procurement contracts under the framework agreement will be to the lowest-priced or the most advantageous submission;

(f) The procedures and criteria to be applied during the second-stage competition, including the relative weight of the evaluation criteria and the manner in which they will be applied, in accordance with articles 10 and 11 of this Law. If the relative weights of the evaluation criteria may be varied during second-stage competition, the framework agreement shall specify the permissible range.

2. The procuring entity shall, during the entire period of operation of the open framework agreement, republish at least annually the invitation to become a party to the open framework agreement and shall in addition ensure unrestricted, direct and full access to the terms and conditions of the framework agreement and to any other necessary information relevant to its operation.

#### *Article 62*

##### *Second stage of a framework agreement procedure*

1. Any procurement contract under a framework agreement shall be awarded in accordance with the terms and conditions of the framework agreement and the provisions of this article.

2. A procurement contract under a framework agreement may be awarded only to a supplier or contractor that is a party to the framework agreement.

3. The provisions of article 22 of this Law, except for paragraph 2, shall apply to the acceptance of the successful submission under a framework agreement without second-stage competition.

4. In a closed framework agreement with second-stage competition and in an open framework agreement, the following procedures shall apply to the award of a procurement contract:

(a) The procuring entity shall issue a written invitation to present submissions, simultaneously to:

(i) Each supplier or contractor party to the framework agreement; or

(ii) Only to those suppliers or contractors parties to the framework agreement then capable of meeting the needs of that procuring entity in the subject matter of the procurement, provided that at the same time notice of the second-stage competition is given to all parties to the framework agreement so that they have the opportunity to participate in the second-stage competition;

(b) The invitation to present submissions shall include the following information:

- (i) A restatement of the existing terms and conditions of the framework agreement to be included in the anticipated procurement contract, a statement of the terms and conditions of the procurement that are to be subject to second-stage competition and further detail regarding those terms and conditions, where necessary;
  - (ii) A restatement of the procedures and criteria for the award of the anticipated procurement contract, including their relative weight and the manner of their application;
  - (iii) Instructions for preparing submissions;
  - (iv) The manner, place and deadline for presenting submissions;
  - (v) If suppliers or contractors are permitted to present submissions for only a portion of the subject matter of the procurement, a description of the portion or portions for which submissions may be presented;
  - (vi) The manner in which the submission price is to be formulated and expressed, including a statement as to whether the price is to cover elements other than the cost of the subject matter of the procurement itself, such as any applicable transportation and insurance charges, customs duties and taxes;
  - (vii) Reference to this Law, the procurement regulations and other laws and regulations directly pertinent to the procurement proceedings, including those applicable to procurement involving classified information, and the place where those laws and regulations may be found;
  - (viii) The name, functional title and address of one or more officers or employees of the procuring entity who are authorized to communicate directly with and to receive communications directly from suppliers or contractors in connection with the second-stage competition without the intervention of an intermediary;
  - (ix) Notice of the right provided under article 64 of this Law to challenge or appeal decisions or actions taken by the procuring entity that are allegedly not in compliance with the provisions of this Law, together with information about the duration of the applicable standstill period and, if none will apply, a statement to that effect and the reasons therefor;
  - (x) Any formalities that will be required once a successful submission has been accepted for a procurement contract to enter into force, including, where applicable, the execution of a written procurement contract pursuant to article 22 of this Law;
  - (xi) Any other requirements established by the procuring entity in conformity with this Law and the procurement regulations relating to the preparation and presentation of submissions and to other aspects of the second-stage competition;
- (c) The procuring entity shall evaluate all submissions received and determine the successful submission in accordance with the evaluation criteria and the procedures set out in the invitation to present submissions;
- (d) The procuring entity shall accept the successful submission in accordance with article 22 of this Law.

*Article 63**Changes during the operation of a framework agreement*

During the operation of a framework agreement, no change shall be allowed to the description of the subject matter of the procurement. Changes to other terms and conditions of the procurement, including to the criteria (and their relative weight and the manner of their application) and procedures for the award of the anticipated procurement contract, may occur only to the extent expressly permitted in the framework agreement.

**Chapter VIII. Challenge proceedings<sup>68</sup>***Article 64**Right to challenge and appeal*

1. A supplier or contractor that claims to have suffered or claims that it may suffer loss or injury because of the alleged non-compliance of a decision or action of the procuring entity with the provisions of this Law may challenge the decision or action concerned.
2. Challenge proceedings may be made by way of [an application for reconsideration to the procuring entity under article 66 of this Law, an application for review to the [*name of the independent body*] under article 67 of this Law or an application or appeal to the [*name of the court or courts*]].
- [3. A supplier or contractor may appeal any decision taken in challenge proceedings under article 66 or 67 of this Law in the [*name of the court or courts*]].

*Article 65**Effect of a challenge*

1. The procuring entity shall not take any step that would bring into force a procurement contract or framework agreement in the procurement proceedings concerned:
  - (a) Where it receives an application for reconsideration within the time limits specified in paragraph 2 of article 66;
  - (b) Where it receives notice of an application for review from the [*name of the independent body*] under paragraph 5 (b) of article 67; or
  - (c) Where it receives notice of an application or of an appeal from the [*name of the court or courts*].
2. The prohibition referred to in paragraph 1 shall lapse ... working days [*the enacting State specifies the period*] after the decision of the procuring entity, the [*name of the independent body*] or the [*name of the court or courts*] has been communicated to the applicant or appellant, as the case may be, to the procuring entity, where applicable, and to all other participants in the challenge proceedings.

<sup>68</sup> Certain options are presented in this Chapter in square brackets. See the Guide to Enactment of the UNCITRAL Model Law on Public Procurement (A/CN.9/...) for guidance on those options.

3. (a) The procuring entity may at any time request the [*name of the independent body*] or the [*name of the court or courts*] to authorize it to enter into the procurement contract or framework agreement on the ground that urgent public interest considerations so justify;

(b) The [*name of the independent body*], upon consideration of such a request [, or of its own motion,] may authorize the procuring entity to enter into the procurement contract or framework agreement where it is satisfied that urgent public interest considerations so justify. The decision of the [*name of the independent body*] and the reasons therefor shall be made part of the record of the procurement proceedings, and shall promptly be communicated to the procuring entity, to the applicant, to all other participants in the challenge proceedings and to all other participants in the procurement proceedings.

#### *Article 66*

##### *Application for reconsideration before the procuring entity*

1. A supplier or contractor may apply to the procuring entity for a reconsideration of a decision or an action taken by the procuring entity in the procurement proceedings.

2. Applications for reconsideration shall be submitted to the procuring entity in writing within the following time periods:

(a) Applications for reconsideration of the terms of solicitation, pre-qualification or pre-selection or decisions or actions taken by the procuring entity in pre-qualification or pre-selection proceedings shall be submitted prior to the deadline for presenting submissions;

(b) Applications for reconsideration of other decisions or actions taken by the procuring entity in the procurement proceedings shall be submitted within the standstill period applied pursuant to paragraph 2 of article 22 of this Law, or, where none has been applied, prior to the entry into force of the procurement contract or the framework agreement.

3. Promptly after receipt of the application, the procuring entity shall publish a notice of the application and shall, not later than three (3) working days after receipt of the application:

(a) Decide whether the application shall be entertained or dismissed and, if it is to be entertained, whether the procurement proceedings shall be suspended. The procuring entity may dismiss the application if it decides that the application is manifestly without merit, the application was not submitted within the deadlines set out in paragraph 2 of this article or the applicant is without standing. Such a dismissal constitutes a decision on the application;

(b) Notify all participants in the procurement proceedings to which the application relates about the submission of the application and its substance;

(c) Notify the applicant and all other participants in the procurement proceedings of its decision on whether the application is to be entertained or dismissed;

- (i) If the application is to be entertained, the procuring entity shall in addition advise whether the procurement proceedings are suspended and, if so, the duration of the suspension;
  - (ii) If the application is to be dismissed or the procurement proceedings are not suspended, the procuring entity shall in addition advise the applicant of the reasons for its decision.
4. If the procuring entity does not give notice to the applicant as required in paragraphs 3 (c) and 8 of this article within the time-limit specified in paragraph 3 of this article, or if the applicant is dissatisfied with the decision so notified, the applicant may immediately thereafter commence proceedings [in the *[name of the independent body]* under article 67 of this Law or in the *[name of the court or courts]*]. Where such proceedings are commenced, the competence of the procuring entity to entertain the application ceases.
5. In taking its decision on an application that it has entertained, the procuring entity may overturn, correct, vary or uphold any decision or action taken in the procurement proceedings to which the application relates.
6. The decision of the procuring entity under paragraph 5 of this article shall be issued within ... working days [*the enacting State specifies the period*] after receipt of the application. The procuring entity shall immediately thereafter communicate the decision to the applicant, to all other participants in the challenge proceedings and to all other participants in the procurement proceedings.
7. If the procuring entity does not communicate its decision to the applicant in accordance with the requirements of paragraphs 6 and 8 of this article, the applicant is entitled immediately thereafter to commence proceedings [in the *[name of the independent body]* under article 67 of this Law or in the *[name of the court or courts]*]. Where such proceedings are commenced, the competence of the procuring entity to entertain the application ceases.
8. All decisions of the procuring entity under this article shall be in writing, shall state the action taken and the reasons therefor, and shall promptly be made part of the record of the procurement proceedings, together with the application received by the procuring entity under this article.

#### *Article 67*

##### *Application for review before an independent body*

1. A supplier or contractor may apply to the *[name of the independent body]* for review of a decision or an action taken by the procuring entity in the procurement proceedings, or of the failure of the procuring entity to issue a decision under article 66 of this Law within the time limits prescribed in that article.
2. Applications for review shall be submitted to the *[name of the independent body]* in writing within the following time periods:
  - (a) Applications for review of the terms of solicitation, pre-qualification or pre-selection or of decisions or actions taken by the procuring entity in pre-qualification or pre-selection proceedings shall be submitted prior to the deadline for presenting submissions;

(b) Applications for review of other decisions or actions taken by the procuring entity in the procurement proceedings shall be submitted:

(i) Within the standstill period applied pursuant to paragraph 2 of article 22 of this Law; or

(ii) Where no standstill period has been applied, within ... working days [*the enacting State specifies the period*] after the time when the applicant became aware of the circumstances giving rise to the application or when the applicant should have become aware of those circumstances, whichever is earlier, but not later than ... working days [*the enacting State specifies the period*] after the entry into force of the procurement contract or the framework agreement [or a decision to cancel the procurement];

(c) Notwithstanding subparagraph (b) (i) of this paragraph, a supplier or contractor may request the [*name of the independent body*] to entertain an application for review filed after the expiry of the standstill period, but not later than ... working days [*the enacting State specifies the period*] after the entry into force of the procurement contract or the framework agreement [or a decision to cancel the procurement], on the ground that the application raises significant public interest considerations. The [*name of the independent body*] may entertain the application where it is satisfied that significant public interest considerations so justify. The decision of the [*name of the independent body*] and the reasons therefor shall promptly be communicated to the supplier or contractor concerned;

(d) Applications for review of the failure of the procuring entity to issue a decision under article 66 of this Law within the time limits prescribed in that article shall be submitted within ... working days [*the enacting State specifies the period*] after the decision of the procuring entity should have been communicated to the applicant in accordance with the requirements of paragraphs 3, 6 and 8 of article 66 of this Law, as appropriate.

3. Following receipt of an application for review, the [*name of the independent body*] may, subject to the requirements of paragraph 4 of this article:

[(a)] Order the suspension of the procurement proceedings at any time before the entry into force of the procurement contract; [and

(b) Order the suspension of the performance of a procurement contract or the operation of a framework agreement that has entered into force;]

if and for as long as it finds such a suspension necessary to protect the interests of the applicant unless the [*name of the independent body*] decides that urgent public interest considerations require the procurement proceedings[, the procurement contract or the framework agreement, as applicable,] to proceed. The [*name of the independent body*] may also order that any suspension applied be extended or lifted, taking into account the aforementioned considerations.

4. The [*name of the independent body*] shall:

(a) Order the suspension of the procurement proceedings for a period of ten (10) working days where an application is received prior to the deadline for presenting submissions; and

(b) Order the suspension of the procurement proceedings [or the performance of a procurement contract or the operation of a framework agreement, as the case may be] where an application is received after the deadline for presenting submissions and where no standstill period has been applied;

unless the [*name of the independent body*] decides that urgent public interest considerations require the procurement proceedings[, the procurement contract or the framework agreement, as applicable,] to proceed.

5. Promptly upon receipt of the application, the [*name of the independent body*] shall:

(a) Suspend or decide not to suspend the procurement proceedings [or the performance of a procurement contract or the operation of a framework agreement, as the case may be] in accordance with paragraphs 3 and 4 of this article;

(b) Notify the procuring entity and all identified participants in the procurement proceedings to which the application relates of the application and its substance;

(c) Notify all identified participants in the procurement proceedings to which the application relates of its decision on suspension. Where the [*name of the independent body*] decides to suspend the procurement proceedings [or the performance of a procurement contract or the operation of a framework agreement, as the case may be], it shall in addition specify the period of the suspension. Where it decides not to suspend them, it shall provide the reasons for its decision to the applicant and to the procuring entity; and

(d) Publish a notice of the application.

6. The [*name of the independent body*] may dismiss the application and shall lift any suspension applied, where it decides that:

(a) The application is manifestly without merit or was not presented in compliance with the deadlines set out in paragraph 2 of this article; or

(b) The applicant is without standing.

The [*name of the independent body*] shall promptly notify the applicant, the procuring entity and all other participants in the procurement proceedings of the dismissal and the reasons therefor and that any suspension in force is lifted. Such a dismissal constitutes a decision on the application.

7. The notices to the applicant, the procuring entity and other participants in the procurement proceedings under paragraphs 5 and 6 of this article shall be given no later than three (3) working days after receipt of the application.

8. Promptly upon receipt of a notice under paragraph 5 (b) of this article, the procuring entity shall provide the [*name of the independent body*] with effective access to all documents relating to the procurement proceedings in its possession, in a manner appropriate to the circumstances.

9. In taking its decision on an application that it has entertained, the [*name of the independent body*] may declare the legal rules or principles that govern the subject matter of the application, shall address any suspension in force and shall take one or more of the following actions, as appropriate:

(a) Prohibit the procuring entity from acting, taking a decision or following a procedure that is not in compliance with the provisions of this Law;

(b) Require the procuring entity that has acted or proceeded in a manner that is not in compliance with the provisions of this Law to act, to take a decision or to proceed in a manner that is in compliance with the provisions of this Law;

[(c) Overturn in whole or in part an act or a decision of the procuring entity that is not in compliance with the provisions of this Law [other than any act or decision bringing the procurement contract or the framework agreement into force];

(d) Revise a decision by the procuring entity that is not in compliance with the provisions of this Law [other than any act or decision bringing the procurement contract or the framework agreement into force];

(e) Confirm a decision of the procuring entity;

(f) Overturn the award of a procurement contract or a framework agreement that has entered into force in a manner that is not in compliance with the provisions of this Law and, if notice of the award of the procurement contract or the framework agreement has been published, order the publication of notice of the overturning of the award;]

(g) Order that the procurement proceedings be terminated;

(h) Dismiss the application;

(i) Require the payment of compensation for any reasonable costs incurred by the supplier or contractor submitting an application as a result of an act or decision of, or procedure followed by, the procuring entity in the procurement proceedings that is not in compliance with the provisions of this Law, and for any loss or damages suffered[, which shall be limited to the costs of the preparation of the submission or the costs relating to the application, or both]; or

(j) Take such alternative action as is appropriate in the circumstances.

10. The decision of the [*name of the independent body*] under paragraph 9 of this article shall be issued within ... working days [*the enacting State specifies the period*] after receipt of the application. The [*name of the independent body*] shall immediately thereafter communicate the decision to the procuring entity, to the applicant, to all other participants in the application for review and to all other participants in the procurement proceedings.

11. All decisions of the [*name of the independent body*] under this article shall be in writing, shall state the action taken and the reasons therefor and shall promptly be made part of the record of the procurement proceedings, together with the application received by the [*name of the independent body*] under this article.

#### *Article 68*

##### *Rights of participants in challenge proceedings*

1. Any supplier or contractor participating in the procurement proceedings to which the application relates, as well as any governmental authority whose interests are or could be affected by the application, shall have the right to participate in challenge proceedings under articles 66 and 67 of this Law. A supplier or contractor

duly notified of the proceedings that fails to participate in such proceedings is barred from subsequently challenging under articles 66 and 67 of this Law the decisions or actions that are the subject matter of the application.

2. The procuring entity shall have the right to participate in challenge proceedings under article 67 of this Law.

3. The participants in challenge proceedings under articles 66 and 67 of this Law shall have the right to be present, represented and accompanied at all hearings during the proceedings; the right to be heard; the right to present evidence, including witnesses; the right to request that any hearing take place in public; and the right to seek access to the record of the challenge proceedings subject to the provisions of article 69 of this Law.

#### *Article 69*

##### *Confidentiality in challenge proceedings*

No information shall be disclosed in challenge proceedings and no public hearing under articles 66 and 67 of this Law shall take place if so doing would impair the protection of essential security interests of the State, would be contrary to law, would impede law enforcement, would prejudice the legitimate commercial interests of the suppliers or contractors or would impede fair competition.

## Annex II

## List of documents before the Commission at its forty-fourth session

<i>Symbol</i>	<i>Title or description</i>
A/CN.9/711 and Corr.1	Provisional agenda, annotations thereto and scheduling of meetings of the forty-fourth session
A/CN.9/712	Report of Working Group II (Arbitration and Conciliation) on the work of its fifty-third session (Vienna, 4-8 October 2010)
A/CN.9/713	Report of Working Group I (Procurement) on the work of its nineteenth session (Vienna, 1-5 November 2010)
A/CN.9/714	Report of Working Group VI (Security Interests) on the work of its eighteenth session (Vienna, 8-12 November 2010)
A/CN.9/715	Report of Working Group V (Insolvency Law) on the work of its thirty-ninth session (Vienna, 6-10 December 2010)
A/CN.9/716	Report of Working Group III (Online Dispute Resolution) on the work of its twenty-second session (Vienna, 13-17 December 2010)
A/CN.9/717	Report of Working Group II (Arbitration and Conciliation) on the work of its fifty-fourth session (New York, 7-11 February 2011)
A/CN.9/718	Report of Working Group I (Procurement) on the work of its twentieth session (New York, 14-18 March 2011)
A/CN.9/719	Report of Working Group VI (Security Interests) on the work of its nineteenth session (New York, 11-15 April 2011)
A/CN.9/720	Note by the Secretariat on comparison and analysis of major features of international instruments relating to secured transactions
A/CN.9/721	Report of Working Group III (Online Dispute Resolution) on the work of its twenty-third session (New York, 23-27 May 2011)
A/CN.9/722	Note by the Secretariat on bibliography of recent writings related to the work of UNCITRAL
A/CN.9/723	Note by the Secretariat on the status of conventions and model laws
A/CN.9/724	Note by the Secretariat on technical cooperation and assistance
A/CN.9/725	Note by the Secretariat on coordination activities
A/CN.9/726	Note by the Secretariat on the promotion of ways and means of ensuring a uniform interpretation and application of UNCITRAL legal texts
A/CN.9/727	Note by the Secretariat on legal and regulatory issues surrounding microfinance
A/CN.9/728 and Add.1	Note by the Secretariat on present and possible future work on electronic commerce
A/CN.9/729 and Add.1-8	Note by the Secretariat on the draft revised text of the Model Law
A/CN.9/730 and Add.1 and 2	Note by the Secretariat on the finalization and adoption of the UNCITRAL Model Law on Public Procurement: compilation of comments by Governments and international organizations on the draft Model Law on Public Procurement
A/CN.9/731 and Add.1-9	Note by the Secretariat on the revised Guide to Enactment to accompany the UNCITRAL Model Law on Public Procurement

**B. United Nations Conference on Trade and Development (UNCTAD): extract from  
the report of the Trade and Development Board  
on its fifty-eighth session**

**(TD/B/58/9)**

**Progressive development of the law of international trade: forty-third  
annual report of the United Nations Commission  
on International Trade Law**

At its 1078th plenary meeting, the Board took note of the forty-fourth annual report of the  
United Nations Commission on International Trade Law (A/66/17).

**C. General Assembly: Report of the Sixth Committee on the report of the United Nations Commission on International Trade Law on the work of its forty-fourth session (A/66/471)**

**[Original: English]**

*Rapporteur:* Ms. Jacqueline Kemunto **Moseti** (Kenya)

**I. Introduction**

1. At its 2nd plenary meeting, on 16 September 2011, the General Assembly, on the recommendation of the General Committee, decided to include in the agenda of its sixty-sixth session the item entitled “Report of the United Nations Commission on International Trade Law on the work of its forty-fourth session” and to allocate it to the Sixth Committee.
2. The Sixth Committee considered the item at its 10th, 22nd, 25th and 30th meetings, on 10, 27 and 31 October and on 11 November 2011. The views of the representatives who spoke during the Committee’s consideration of the item are reflected in the relevant summary records (A/C.6/66/SR.10, 22, 25 and 30).
3. For its consideration of the item, the Committee had before it the report of the United Nations Commission on International Trade Law on the work of its forty-fourth session (A/66/17).
4. At the 10th meeting, on 10 October, the Chair of the United Nations Commission on International Trade Law at its forty-fourth session introduced the report of the Commission on the work of its forty-fourth session.

**II. Consideration of proposals**

**A. Draft resolution A/C.6/66/L.10**

5. At the 22nd meeting, on 27 October, the representative of Austria, on behalf of Albania, Argentina, Armenia, Australia, Austria, Belarus, Belgium, Brazil, Bulgaria, Canada, Chile, China, Croatia, Cyprus, the Czech Republic, Denmark, El Salvador, Estonia, Finland, France, Germany, Greece, Guatemala, Hungary, India, Ireland, Israel, Italy, Japan, Jordan, Latvia, Lithuania, Luxembourg, Madagascar, Malta, Mexico, Montenegro, the Netherlands, New Zealand, Norway, Poland, Portugal, the Republic of Moldova, Romania, the Russian Federation, Slovakia, Slovenia, Spain, Sweden, Switzerland, Thailand, Trinidad and Tobago, Ukraine, the United Kingdom of Great Britain and Northern Ireland and Venezuela (Bolivarian Republic of), subsequently joined by Liechtenstein and Uganda, introduced a draft resolution entitled “Report of the United Nations Commission on International Trade Law on the work of its forty-fourth session” (A/C.6/66/L.10).
6. At the 25th meeting, on 31 October, Malaysia, the former Yugoslav Republic of Macedonia, Turkey and the United States of America joined in sponsoring the

draft resolution. The Committee adopted draft resolution A/C.6/66/L.10 without a vote.

7. At its 30th meeting, on 11 November, the Committee decided to reopen the agenda item. On behalf of the Bureau, the Chair orally proposed an amendment to draft resolution A/C.6/66/L.10, by which, in operative paragraph 20, the words “endorses the Commission’s agreement to achieve that result by reducing its allocation for conference services, and” would be deleted before the words “encourages Member States”.

8. At the same meeting, the Committee adopted draft resolution A/C.6/66/L.10, as orally amended, without a vote (see para. 14, draft resolution I).

9. Also at the same meeting, the representatives of France, Cuba, Iran (Islamic Republic of) and Venezuela (Bolivarian Republic of) made statements in explanation of position after the adoption of the draft resolution.

#### **B. Draft resolution A/C.6/66/L.11**

10. At the 22nd meeting, on 27 October, the representative of Austria, on behalf of the Bureau, introduced a draft resolution entitled “United Nations Commission on International Trade Law Model Law on Public Procurement” (A/C.6/66/L.11).

11. At its 25th meeting, on 31 October, the Committee adopted draft resolution A/C.6/66/L.11 without a vote (see para. 14, draft resolution II).

#### **C. Draft resolution A/C.6/66/L.12**

12. At the 22nd meeting, on 27 October, the representative of Austria, on behalf of the Bureau, introduced a draft resolution entitled “United Nations Commission on International Trade Law Model Law on Cross-Border Insolvency: The Judicial Perspective” (A/C.6/66/L.12).

13. At its 25th meeting, on 31 October, the Committee adopted draft resolution A/C.6/66/L.12 without a vote (see para. 14, draft resolution III).

### III. Recommendations of the Sixth Committee

14. The Sixth Committee recommends to the General Assembly the adoption of the following draft resolutions:

#### **Draft resolution I**

#### **Report of the United Nations Commission on International Trade Law on the work of its forty-fourth session**

*The General Assembly,*

*Recalling* its resolution 2205 (XXI) of 17 December 1966, by which it established the United Nations Commission on International Trade Law with a mandate to further the progressive harmonization and unification of the law of international trade and in that respect to bear in mind the interests of all peoples, in particular those of developing countries, in the extensive development of international trade,

*Reaffirming its belief* that the progressive modernization and harmonization of international trade law, in reducing or removing legal obstacles to the flow of international trade, especially those affecting developing countries, would contribute significantly to universal economic cooperation among all States on a basis of equality, equity, common interest and respect for the rule of law, to the elimination of discrimination in international trade and, thereby, to peace, stability and the well-being of all peoples,

*Having considered* the report of the Commission,<sup>69</sup>

*Reiterating its concern* that activities undertaken by other bodies in the field of international trade law without adequate coordination with the Commission might lead to undesirable duplication of efforts and would not be in keeping with the aim of promoting efficiency, consistency and coherence in the unification and harmonization of international trade law,

*Reaffirming* the mandate of the Commission, as the core legal body within the United Nations system in the field of international trade law, to coordinate legal activities in this field, in particular to avoid duplication of efforts, including among organizations formulating rules of international trade, and to promote efficiency, consistency and coherence in the modernization and harmonization of international trade law, and to continue, through its secretariat, to maintain close cooperation with other international organs and organizations, including regional organizations, active in the field of international trade law,

1. *Takes note with appreciation* of the report of the United Nations Commission on International Trade Law;<sup>1</sup>

2. *Commends* the Commission for the finalization and adoption of the United Nations Commission on International Trade Law Model Law on Public

---

<sup>69</sup> Official Records of the General Assembly, Sixty-sixth Session, Supplement No. 17 (A/66/17).

Procurement<sup>70</sup> and the United Nations Commission on International Trade Law Model Law on Cross-Border Insolvency: The Judicial Perspective;<sup>71</sup>

3. *Takes note with interest* of the progress made by the Commission in its work on the preparation of legal standards on transparency in treaty-based investor-State arbitration, online dispute resolution for cross-border electronic transactions and electronic commerce, in particular at the colloquium held in February 2011, the interpretation and application of selected concepts of the United Nations Commission on International Trade Law Model Law on Cross-Border Insolvency<sup>72</sup> relating to centre of main interests, and a draft text on the registration of security rights in movable assets;<sup>73</sup>

4. *Welcomes* the decisions of the Commission to prepare a guide to enactment of the Model Law on Public Procurement, in as efficient and practical a manner as possible, and a study on possible future work of the Commission in the area of public-private partnerships and privately financed infrastructure projects, to undertake work in the field of electronic transferable records, to prepare, in cooperation with the World Bank, draft principles on effective secured transactions regimes, within existing resources and without utilizing working group resources, and to include microfinance as an item for the future work of the Commission and to further consider that matter at its next session, in 2012;<sup>74</sup>

5. *Notes with appreciation* the decision of the Commission to commend the use of the 2010 revision of the Uniform Rules for Demand Guarantees, published by the International Chamber of Commerce, as appropriate, in transactions involving demand guarantees;<sup>75</sup>

6. *Also notes with appreciation* the progress made in the ongoing project of the Commission on monitoring the implementation of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards, done in New York on 10 June 1958,<sup>76</sup> and the decision of the Commission to request the Secretariat to pursue its efforts towards the preparation of a guide on the Convention;<sup>77</sup>

7. *Endorses* the efforts and initiatives of the Commission, as the core legal body within the United Nations system in the field of international trade law, aimed at increasing coordination of and cooperation on legal activities of international and regional organizations active in the field of international trade law and at promoting the rule of law at the national and international levels in this field, and in this regard appeals to relevant international and regional organizations to coordinate their legal activities with those of the Commission, to avoid duplication of efforts and to promote efficiency, consistency and coherence in the modernization and harmonization of international trade law;

<sup>77</sup> *Official Records of the General Assembly, Sixty-sixth Session, Supplement No. 17 (A/66/17)*, chap. XII.

8. *Notes with appreciation* the significant progress in the Commission's coordination and cooperation activities in the field of security interests and in particular the approval by the Commission of a paper prepared jointly by the Permanent Bureau of the Hague Conference on Private International Law and the secretariats of the Commission and the International Institute for the Unification of Private Law, with the assistance of outside experts, entitled "Comparison and analysis of major features of international instruments relating to secured transactions",<sup>78</sup> as well as the request that it be given the widest possible dissemination, including as a United Nations sales publication, with proper recognition of the contribution of the Permanent Bureau of the Hague Conference on Private International Law and the secretariat of the International Institute for the Unification of Private Law;<sup>79</sup>

9. *Notes* the agreement of the Commission that a coordinated approach to the matter of the law applicable to the proprietary effects of assignments of receivables is in the interest of all States and its request to the Secretariat to cooperate closely with the European Commission with a view to ensuring a coordinated approach to the matter, taking into account the approach followed in the United Nations Convention on the Assignment of Receivables in International Trade<sup>80</sup> and the *UNCITRAL Legislative Guide on Secured Transactions*;<sup>81</sup>

10. *Reaffirms* the importance, in particular for developing countries, of the work of the Commission concerned with technical cooperation and assistance in the field of international trade law reform and development, and in this connection:

(a) Welcomes the initiatives of the Commission towards expanding, through its secretariat, its technical cooperation and assistance programme, and in that respect encourages the Secretary-General to seek partnerships with State and non-State actors to increase awareness about the work of the Commission and facilitate the effective implementation of legal standards resulting from its work;

(b) Expresses its appreciation to the Commission for carrying out technical cooperation and assistance activities and for providing assistance with legislative drafting in the field of international trade law, and draws the attention of the Secretary-General to the limited resources that are made available in this field;

(c) Takes note with interest of the comprehensive approach to technical cooperation and assistance, based on the strategic framework for technical assistance suggested by the Secretariat to promote universal adoption of the texts of the Commission and to disseminate information on recently adopted texts;<sup>82</sup>

(d) Expresses its appreciation to the Governments whose contributions enabled the technical cooperation and assistance activities to take place, and appeals to Governments, the relevant bodies of the United Nations system, organizations, institutions and individuals to make voluntary contributions to the United Nations Commission on International Trade Law Trust Fund for Symposia and, where

<sup>78</sup> See A/CN.9/720.

<sup>79</sup> *Official Records of the General Assembly, Sixty-sixth Session, Supplement No. 17 (A/66/17)*, paras. 278-283.

<sup>80</sup> Resolution 56/81, annex.

<sup>81</sup> United Nations publication, Sales No. E.09.V.12.

<sup>82</sup> *Official Records of the General Assembly, Sixty-sixth Session, Supplement No. 17 (A/66/17)*, chap. XIII.

appropriate, for the financing of special projects, and otherwise to assist the secretariat of the Commission in carrying out technical cooperation and assistance activities, in particular in developing countries;

(e) Reiterates its appeal to the United Nations Development Programme and other bodies responsible for development assistance, such as the World Bank and regional development banks, as well as to Governments in their bilateral aid programmes, to support the technical cooperation and assistance programme of the Commission and to cooperate and coordinate their activities with those of the Commission, in the light of the relevance and importance of the work and programmes of the Commission for the promotion of the rule of law at the national and international levels and for the implementation of the United Nations development agenda, including the achievement of the Millennium Development Goals;

11. *Calls upon* Member States, non-member States, observer organizations and the Secretariat to apply the rules of procedure and methods of work of the Commission, taking into account the summary of conclusions as reproduced in annex III to the report on the work of its forty-third session,<sup>83</sup> with a view to ensuring the high quality of the work of the Commission and international acceptability of its instruments, and in this regard recalls its previous resolutions related to this matter;

12. *Welcomes* the decision by the Commission to establish, subject to the relevant rules and regulations of the United Nations and the internal approval process in the Office of Legal Affairs of the Secretariat, a Regional Centre for Asia and the Pacific, in the Republic of Korea, as a novel yet important first step for the Commission in reaching out and providing technical assistance to developing countries in the region, it being understood that the establishment of a regional presence would have to rely entirely on extrabudgetary resources, including but not limited to voluntary contributions from States, expresses its appreciation to the Government of the Republic of Korea for its generous contribution to the pilot project, and requests the Secretary-General to keep the General Assembly informed of developments regarding the establishment of such regional centres, including the Regional Centre for Asia and the Pacific in the Republic of Korea and, in particular, their funding and budgetary situation;<sup>84</sup>

13. *Appeals* to Governments, the relevant bodies of the United Nations system, organizations, institutions and individuals to make voluntary contributions to the trust fund established to provide travel assistance to developing countries that are members of the Commission, at their request and in consultation with the Secretary-General, in order to enable renewal of the provision of that assistance and to increase expert representation from developing countries at sessions of the Commission and its working groups, necessary to build local expertise and capacities in the field of international trade law in those countries to facilitate the development of international trade and the promotion of foreign investment;

14. *Decides*, in order to ensure full participation of all Member States in the sessions of the Commission and its working groups, to continue, in the competent Main Committee during the sixty-sixth session of the General Assembly, its

<sup>83</sup> Ibid., *Sixty-fifth Session, Supplement No. 17 (A/65/17)*.

<sup>84</sup> Ibid., *Sixty-sixth Session, Supplement No. 17 (A/66/17)*, paras. 262-270.

consideration of granting travel assistance to the least developed countries that are members of the Commission, at their request and in consultation with the Secretary-General;

15. *Endorses* the conviction of the Commission that the implementation and effective use of modern private law standards on international trade are essential for advancing good governance, sustained economic development and the eradication of poverty and hunger and that the promotion of the rule of law in commercial relations should be an integral part of the broader agenda of the United Nations to promote the rule of law at the national and international levels, including through the Rule of Law Coordination and Resource Group, supported by the Rule of Law Unit in the Executive Office of the Secretary-General;

16. *Welcomes*, in this regard, the panel discussion on the role of the Commission in the promotion of the rule of law in conflict and post-conflict societies, held during the forty-fourth session of the Commission, and takes note of the particular relevance of the instruments and resources of the Commission for creating an environment of sustainable economic activity conducive to post-conflict reconstruction and preventing societies from sliding back into conflict;

17. *Takes note* of the views expressed by the Commission at the end of the panel discussion that, owing to a lack of sufficient resources, innovative ways need to be found for the early engagement of the instruments and resources of the Commission in post-conflict recovery operations of the United Nations and other donors, and that awareness needs to be increased of the fact that the Commission deals also with the basic building blocks for commercial activity and thus makes a real and immediate contribution in societies emerging from conflict;<sup>85</sup>

18. *Reiterates its request* to the Secretary-General, in conformity with General Assembly resolutions on documentation-related matters,<sup>86</sup> which, in particular, emphasize that any invitation to limit, where appropriate, the length of documents should not adversely affect either the quality of the presentation or the substance of the documents, to bear in mind the particular characteristics of the mandate and functions of the Commission in the progressive development and codification of international trade law when implementing page limits with respect to the documentation of the Commission;<sup>87</sup>

19. *Requests* the Secretary-General to continue providing summary records of the meetings of the Commission, including committees of the whole established by the Commission for the duration of its annual session, relating to the formulation of normative texts, and encourages the Commission to discuss the matter at its next session, on the basis of a report to be prepared by the Secretariat;<sup>88</sup>

20. *Reaffirms* the need to ensure the broadest possible participation in meetings of the Commission, and in this connection notes the existing rationale for the historical alternating pattern of sites for meetings of the Commission, that is, the proportionate distribution of travel costs among delegations, the global influence

<sup>85</sup> Ibid., paras. 318 and 319.

<sup>86</sup> Resolutions 52/214, sect. B, 57/283 B, sect. III, and 58/250, sect. III.

<sup>87</sup> Resolutions 59/39, para. 9, and 65/21, para. 18; see also *Official Records of the General Assembly, Fifty-ninth Session, Supplement No. 17 (A/59/17)*, paras. 124-128.

<sup>88</sup> *Official Records of the General Assembly, Sixty-sixth Session, Supplement No. 17 (A/66/17)*, para. 333.

and presence of the Commission and the needs of developing countries, many of which do not have representation in Vienna, also notes the agreement of the Commission that every effort should be made to identify alternatives to abolishing the alternating pattern of meetings that would achieve a similar result, and in this respect encourages Member States, jointly with the Secretariat, to continue to review current working practices to achieve increased efficiency, and with a view to identifying budgetary savings;<sup>89</sup>

21. *Stresses* the importance of promoting the use of texts emanating from the work of the Commission for the global unification and harmonization of international trade law, and to this end urges States that have not yet done so to consider signing, ratifying or acceding to conventions, enacting model laws and encouraging the use of other relevant texts;

22. *Welcomes* the preparation of digests of case law relating to the texts of the Commission, such as a digest of case law relating to the United Nations Convention on Contracts for the International Sale of Goods,<sup>90</sup> a digest of case law relating to the United Nations Commission on International Trade Law Model Law on International Commercial Arbitration,<sup>91</sup> and a digest of case law relating to the Model Law on Cross-Border Insolvency, with the aim of assisting in the dissemination of information on those texts and promoting their use, enactment and uniform interpretation.

**Draft resolution II**  
**United Nations Commission on International Trade Law Model Law**  
**on Public Procurement**

*The General Assembly,*

*Recalling* its resolution 2205 (XXI) of 17 December 1966, by which it established the United Nations Commission on International Trade Law with the purpose of furthering the progressive harmonization and unification of the law of international trade in the interests of all peoples, in particular those of developing countries,

*Noting* that procurement constitutes a significant portion of public expenditure in most States,

*Recalling* its resolution 49/54 of 9 December 1994 recommending the use of the United Nations Commission on International Trade Law Model Law on Procurement of Goods, Construction and Services,<sup>1</sup>

*Observing* that the 1994 Model Law, which has become an important international benchmark in procurement law reform, sets out procedures aimed at achieving competition, transparency, fairness, economy and efficiency in the procurement process,

*Observing also* that, despite the widely recognized value of the 1994 Model Law, new issues and practices have arisen since its adoption that have justified revision of the text,

*Recognizing* that at its thirty-seventh session, in 2004, the Commission agreed that the 1994 Model Law would benefit from being updated to reflect new practices, in particular those resulting from the use of electronic communications in public procurement, and the experience gained in the use of the 1994 Model Law as a basis for law reform, not departing, however, from the basic principles behind it and not modifying the provisions whose usefulness had been proved,

*Noting* that the revisions to the 1994 Model Law were the subject of due deliberation and extensive consultations with Governments and interested international organizations, and that thus it can be expected that the revised Model Law, to be called the “United Nations Commission on International Trade Law Model Law on Public Procurement”, would be acceptable to States with different legal, social and economic systems,

*Noting also* that the revised Model Law is expected to contribute significantly to the establishment of a harmonized and modern legal framework for public procurement that promotes economy, efficiency and competition in procurement and, at the same time, fosters integrity, confidence, fairness and transparency in the procurement process,

*Convinced* that the revised Model Law will significantly assist all States, in particular developing countries and countries with economies in transition, in enhancing their existing procurement laws and formulating procurement laws where

---

<sup>1</sup> *Official Records of the General Assembly, Forty-ninth Session, Supplement No. 17 and corrigendum (A/49/17 and Corr.1), annex I.*

none presently exist, and will lead to the development of harmonious international economic relations and increased economic development,

1. *Expresses its appreciation* to the United Nations Commission on International Trade Law for developing and adopting the draft United Nations Commission on International Trade Law Model Law on Public Procurement;<sup>2</sup>

2. *Requests* the Secretary-General to transmit the text of the Model Law to Governments and other interested bodies;

3. *Recommends* that all States use the Model Law in assessing their legal regimes for public procurement and give favourable consideration to the Model Law when they enact or revise their laws;

4. *Calls for* closer cooperation and coordination among the Commission and other international organs and organizations, including regional organizations, active in the field of procurement law reform, in order to avoid undesirable duplication of efforts and inconsistent, incoherent or conflicting results in the modernization and harmonization of public procurement law;

5. *Endorses* the efforts and initiatives of the secretariat of the Commission aimed at increasing the coordination of, and cooperation on, legal activities concerned with public procurement reform.

**Draft resolution III**  
**United Nations Commission on International Trade Law Model Law**  
**on Cross-Border Insolvency: The Judicial Perspective**

*The General Assembly,*

*Recalling* its resolution 2205 (XXI) of 17 December 1966, by which it established the United Nations Commission on International Trade Law with the purpose of furthering the progressive harmonization and unification of the law of international trade in the interests of all peoples, in particular those of developing countries,

*Noting* that, where individuals and enterprises conduct their businesses on a global basis and have assets and interests in more than one State, the efficient conduct of the insolvency of those individuals and enterprises requires cross-border cooperation in, and coordination of, the supervision and administration of those assets and affairs,

*Considering* that the United Nations Commission on International Trade Law Model Law on Cross-Border Insolvency<sup>1</sup> contributes significantly to the establishment of a harmonized legal framework for effectively administering cross-border insolvency and facilitating cooperation and coordination,

*Acknowledging* that familiarity with cooperation and coordination in cross-border insolvency cases and how the Model Law may be implemented in practice is not widespread,

*Convinced* that providing readily accessible information on the interpretation of and current practice with respect to the Model Law for reference and use by judges in insolvency proceedings has the potential to promote wider use and understanding of the Model Law and facilitate cross-border judicial cooperation and coordination, avoiding unnecessary delay and costs,

*Noting with satisfaction* the completion and adoption on 1 July 2011 of the United Nations Commission on International Trade Law Model Law on Cross-Border Insolvency: The Judicial Perspective by the Commission at its forty-fourth session,<sup>2</sup>

*Noting* that the preparation of the Model Law on Cross-Border Insolvency: The Judicial Perspective was the subject of consultation with Governments, judges and other insolvency professionals,

1. *Expresses its appreciation* to the United Nations Commission on International Trade Law for the completion and adoption of the United Nations Commission on International Trade Law Model Law on Cross-Border Insolvency: The Judicial Perspective;<sup>2</sup>

2. *Requests* the establishment by the Secretariat of the United Nations of a mechanism for updating the Model Law on Cross-Border Insolvency: The Judicial Perspective on an ongoing basis in the same flexible manner as that in which it was

developed, ensuring that it maintains a neutral tone and continues to meet its stated purpose;

3. *Requests* the Secretary-General to publish, including electronically, the text of the Model Law on Cross-Border Insolvency: The Judicial Perspective, as updated or amended from time to time in accordance with paragraph 2 of the present resolution, and to transmit it to Governments with the request that the text be made available to relevant authorities so that it becomes widely known and available;

4. *Recommends* that the Model Law on Cross-Border Insolvency: The Judicial Perspective be given due consideration, as appropriate, by judges, insolvency practitioners and other stakeholders involved in cross-border insolvency proceedings;

5. *Also recommends* that all States consider the implementation of the United Nations Commission on International Trade Law Model Law on Cross-Border Insolvency.<sup>1</sup>

## **D. General Assembly resolutions 66/94, 65/95, 66/96, and 66/102**

### **Resolutions adopted by the General Assembly on the report of the Sixth Committee (A/66/471)**

#### **66/94. Report of the United Nations Commission on International Trade Law on the work of its forty-fourth session**

*The General Assembly,*

*Recalling* its resolution 2205 (XXI) of 17 December 1966, by which it established the United Nations Commission on International Trade Law with a mandate to further the progressive harmonization and unification of the law of international trade and in that respect to bear in mind the interests of all peoples, in particular those of developing countries, in the extensive development of international trade,

*Reaffirming its belief* that the progressive modernization and harmonization of international trade law, in reducing or removing legal obstacles to the flow of international trade, especially those affecting developing countries, would contribute significantly to universal economic cooperation among all States on a basis of equality, equity, common interest and respect for the rule of law, to the elimination of discrimination in international trade and, thereby, to peace, stability and the well-being of all peoples,

*Having considered* the report of the Commission,<sup>1</sup>

*Reiterating its concern* that activities undertaken by other bodies in the field of international trade law without adequate coordination with the Commission might lead to undesirable duplication of efforts and would not be in keeping with the aim of promoting efficiency, consistency and coherence in the unification and harmonization of international trade law,

*Reaffirming* the mandate of the Commission, as the core legal body within the United Nations system in the field of international trade law, to coordinate legal activities in this field, in particular to avoid duplication of efforts, including among organizations formulating rules of international trade, and to promote efficiency, consistency and coherence in the modernization and harmonization of international trade law, and to continue, through its secretariat, to maintain close cooperation with other international organs and organizations, including regional organizations, active in the field of international trade law,

1. *Takes note with appreciation* of the report of the United Nations Commission on International Trade Law;<sup>1</sup>

2. *Commends* the Commission for the finalization and adoption of the United Nations Commission on International Trade Law Model Law on Public Procurement<sup>2</sup> and the United Nations Commission on International Trade Law Model Law on Cross-Border Insolvency: The Judicial Perspective;<sup>3</sup>

---

<sup>1</sup> *Official Records of the General Assembly, Sixty-sixth Session, Supplement No. 17 (A/66/17).*

<sup>2</sup> *Ibid.*, chap. III and annex I.

<sup>3</sup> *Ibid.*, chap. IV.

3. *Takes note with interest* of the progress made by the Commission in its work on the preparation of legal standards on transparency in treaty-based investor-State arbitration, online dispute resolution for cross-border electronic transactions and electronic commerce, in particular at the colloquium held in February 2011, the interpretation and application of selected concepts of the United Nations Commission on International Trade Law Model Law on Cross-Border Insolvency<sup>4</sup> relating to centre of main interests, and a draft text on the registration of security rights in movable assets;<sup>5</sup>

4. *Welcomes* the decisions of the Commission to prepare a guide to enactment of the Model Law on Public Procurement, in as efficient and practical a manner as possible, and a study on possible future work of the Commission in the area of public-private partnerships and privately financed infrastructure projects, to undertake work in the field of electronic transferable records, to prepare, in cooperation with the World Bank, draft principles on effective secured transactions regimes, within existing resources and without utilizing working group resources, and to include microfinance as an item for the future work of the Commission and to further consider that matter at its next session, in 2012;<sup>6</sup>

5. *Notes with appreciation* the decision of the Commission to commend the use of the 2010 revision of the Uniform Rules for Demand Guarantees, published by the International Chamber of Commerce, as appropriate, in transactions involving demand guarantees;<sup>7</sup>

6. *Also notes with appreciation* the progress made in the ongoing project of the Commission on monitoring the implementation of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards, done in New York on 10 June 1958,<sup>8</sup> and the decision of the Commission to request the Secretariat to pursue its efforts towards the preparation of a guide on the Convention;<sup>9</sup>

7. *Endorses* the efforts and initiatives of the Commission, as the core legal body within the United Nations system in the field of international trade law, aimed at increasing coordination of and cooperation on legal activities of international and regional organizations active in the field of international trade law and at promoting the rule of law at the national and international levels in this field, and in this regard appeals to relevant international and regional organizations to coordinate their legal activities with those of the Commission, to avoid duplication of efforts and to promote efficiency, consistency and coherence in the modernization and harmonization of international trade law;

8. *Notes with appreciation* the significant progress in the Commission's coordination and cooperation activities in the field of security interests and in particular the approval by the Commission of a paper prepared jointly by the Permanent Bureau of the Hague Conference on Private International Law and the

secretariats of the Commission and the International Institute for the Unification of Private Law, with the assistance of outside experts, entitled “Comparison and analysis of major features of international instruments relating to secured transactions”,<sup>10</sup> as well as the request that it be given the widest possible dissemination, including as a United Nations sales publication, with proper recognition of the contribution of the Permanent Bureau of the Hague Conference on Private International Law and the secretariat of the International Institute for the Unification of Private Law;<sup>11</sup>

9. *Notes* the agreement of the Commission that a coordinated approach to the matter of the law applicable to the proprietary effects of assignments of receivables is in the interest of all States and its request to the Secretariat to cooperate closely with the European Commission with a view to ensuring a coordinated approach to the matter, taking into account the approach followed in the United Nations Convention on the Assignment of Receivables in International Trade<sup>12</sup> and the *UNCITRAL Legislative Guide on Secured Transactions*;<sup>13</sup>

10. *Reaffirms* the importance, in particular for developing countries, of the work of the Commission concerned with technical cooperation and assistance in the field of international trade law reform and development, and in this connection:

(a) Welcomes the initiatives of the Commission towards expanding, through its secretariat, its technical cooperation and assistance programme, and in that respect encourages the Secretary-General to seek partnerships with State and non-State actors to increase awareness about the work of the Commission and facilitate the effective implementation of legal standards resulting from its work;

(b) Expresses its appreciation to the Commission for carrying out technical cooperation and assistance activities and for providing assistance with legislative drafting in the field of international trade law, and draws the attention of the Secretary-General to the limited resources that are made available in this field;

(c) Takes note with interest of the comprehensive approach to technical cooperation and assistance, based on the strategic framework for technical assistance suggested by the Secretariat to promote universal adoption of the texts of the Commission and to disseminate information on recently adopted texts;<sup>14</sup>

(d) Expresses its appreciation to the Governments whose contributions enabled the technical cooperation and assistance activities to take place, and appeals to Governments, the relevant bodies of the United Nations system, organizations, institutions and individuals to make voluntary contributions to the United Nations Commission on International Trade Law Trust Fund for Symposia and, where appropriate, for the financing of special projects, and otherwise to assist the secretariat of the Commission in carrying out technical cooperation and assistance activities, in particular in developing countries;

<sup>10</sup> See A/CN.9/720.

<sup>11</sup> *Official Records of the General Assembly, Sixty-sixth Session, Supplement No. 17 (A/66/17)*, paras. 278-283.

<sup>12</sup> Resolution 56/81, annex.

<sup>13</sup> United Nations publication, Sales No. E.09.V.12.

<sup>14</sup> *Official Records of the General Assembly, Sixty-sixth Session, Supplement No. 17 (A/66/17)*, chap. XIII.

(e) Reiterates its appeal to the United Nations Development Programme and other bodies responsible for development assistance, such as the World Bank and regional development banks, as well as to Governments in their bilateral aid programmes, to support the technical cooperation and assistance programme of the Commission and to cooperate and coordinate their activities with those of the Commission, in the light of the relevance and importance of the work and programmes of the Commission for the promotion of the rule of law at the national and international levels and for the implementation of the United Nations development agenda, including the achievement of the Millennium Development Goals;

11. *Calls upon* Member States, non-member States, observer organizations and the Secretariat to apply the rules of procedure and methods of work of the Commission, taking into account the summary of conclusions as reproduced in annex III to the report on the work of its forty-third session,<sup>15</sup> with a view to ensuring the high quality of the work of the Commission and international acceptability of its instruments, and in this regard recalls its previous resolutions related to this matter;

12. *Welcomes* the decision by the Commission to establish, subject to the relevant rules and regulations of the United Nations and the internal approval process in the Office of Legal Affairs of the Secretariat, a Regional Centre for Asia and the Pacific, in the Republic of Korea, as a novel yet important first step for the Commission in reaching out and providing technical assistance to developing countries in the region, it being understood that the establishment of a regional presence would have to rely entirely on extrabudgetary resources, including but not limited to voluntary contributions from States, expresses its appreciation to the Government of the Republic of Korea for its generous contribution to the pilot project, and requests the Secretary-General to keep the General Assembly informed of developments regarding the establishment of such regional centres, including the Regional Centre for Asia and the Pacific in the Republic of Korea and, in particular, their funding and budgetary situation;<sup>16</sup>

13. *Appeals* to Governments, the relevant bodies of the United Nations system, organizations, institutions and individuals to make voluntary contributions to the trust fund established to provide travel assistance to developing countries that are members of the Commission, at their request and in consultation with the Secretary-General, in order to enable renewal of the provision of that assistance and to increase expert representation from developing countries at sessions of the Commission and its working groups, necessary to build local expertise and capacities in the field of international trade law in those countries to facilitate the development of international trade and the promotion of foreign investment;

14. *Decides*, in order to ensure full participation of all Member States in the sessions of the Commission and its working groups, to continue, in the competent Main Committee during the sixty-sixth session of the General Assembly, its consideration of granting travel assistance to the least developed countries that are members of the Commission, at their request and in consultation with the Secretary-General;

<sup>15</sup> Ibid., *Sixty-fifth Session, Supplement No. 17 (A/65/17)*.

<sup>16</sup> Ibid., *Sixty-sixth Session, Supplement No. 17 (A/66/17)*, paras. 262270.

15. *Endorses* the conviction of the Commission that the implementation and effective use of modern private law standards on international trade are essential for advancing good governance, sustained economic development and the eradication of poverty and hunger and that the promotion of the rule of law in commercial relations should be an integral part of the broader agenda of the United Nations to promote the rule of law at the national and international levels, including through the Rule of Law Coordination and Resource Group, supported by the Rule of Law Unit in the Executive Office of the Secretary-General;

16. *Welcomes*, in this regard, the panel discussion on the role of the Commission in the promotion of the rule of law in conflict and post-conflict societies, held during the forty-fourth session of the Commission, and takes note of the particular relevance of the instruments and resources of the Commission for creating an environment of sustainable economic activity conducive to post-conflict reconstruction and preventing societies from sliding back into conflict;

17. *Takes note* of the views expressed by the Commission at the end of the panel discussion that, owing to a lack of sufficient resources, innovative ways need to be found for the early engagement of the instruments and resources of the Commission in post-conflict recovery operations of the United Nations and other donors, and that awareness needs to be increased of the fact that the Commission deals also with the basic building blocks for commercial activity and thus makes a real and immediate contribution in societies emerging from conflict;<sup>17</sup>

18. *Reiterates its request* to the Secretary-General, in conformity with General Assembly resolutions on documentation-related matters,<sup>18</sup> which, in particular, emphasize that any invitation to limit, where appropriate, the length of documents should not adversely affect either the quality of the presentation or the substance of the documents, to bear in mind the particular characteristics of the mandate and functions of the Commission in the progressive development and codification of international trade law when implementing page limits with respect to the documentation of the Commission;<sup>19</sup>

19. *Requests* the Secretary-General to continue providing summary records of the meetings of the Commission, including committees of the whole established by the Commission for the duration of its annual session, relating to the formulation of normative texts, and encourages the Commission to discuss the matter at its next session, on the basis of a report to be prepared by the Secretariat;<sup>20</sup>

20. *Reaffirms* the need to ensure the broadest possible participation in meetings of the Commission, and in this connection notes the existing rationale for the historical alternating pattern of sites for meetings of the Commission, that is, the proportionate distribution of travel costs among delegations, the global influence and presence of the Commission and the needs of developing countries, many of which do not have representation in Vienna, also notes the agreement of the Commission that every effort should be made to identify alternatives to abolishing the alternating pattern of meetings that would achieve a similar result, and in this

<sup>17</sup> Ibid., paras. 318 and 319.

<sup>18</sup> Resolutions 52/214, sect. B, 57/283 B, sect. III, and 58/250, sect. III.

<sup>19</sup> Resolutions 59/39, para. 9, and 65/21, para. 18; see also *Official Records of the General Assembly, Fifty-ninth Session, Supplement No. 17 (A/59/17)*, paras. 124-128.

<sup>20</sup> *Official Records of the General Assembly, Sixty-sixth Session, Supplement No. 17 (A/66/17)*, para. 333.

respect encourages Member States, jointly with the Secretariat, to continue to review current working practices to achieve increased efficiency, and with a view to identifying budgetary savings;<sup>21</sup>

21. *Stresses* the importance of promoting the use of texts emanating from the work of the Commission for the global unification and harmonization of international trade law, and to this end urges States that have not yet done so to consider signing, ratifying or acceding to conventions, enacting model laws and encouraging the use of other relevant texts;

22. *Welcomes* the preparation of digests of case law relating to the texts of the Commission, such as a digest of case law relating to the United Nations Convention on Contracts for the International Sale of Goods,<sup>22</sup> a digest of case law relating to the United Nations Commission on International Trade Law Model Law on International Commercial Arbitration,<sup>23</sup> and a digest of case law relating to the Model Law on Cross-Border Insolvency, with the aim of assisting in the dissemination of information on those texts and promoting their use, enactment and uniform interpretation.

## **66/95. United Nations Commission on International Trade Law Model Law on Public Procurement**

*The General Assembly,*

*Recalling* its resolution 2205 (XXI) of 17 December 1966, by which it established the United Nations Commission on International Trade Law with the purpose of furthering the progressive harmonization and unification of the law of international trade in the interests of all peoples, in particular those of developing countries,

*Noting* that procurement constitutes a significant portion of public expenditure in most States,

*Recalling* its resolution 49/54 of 9 December 1994 recommending the use of the United Nations Commission on International Trade Law Model Law on Procurement of Goods, Construction and Services,<sup>1</sup>

*Observing* that the 1994 Model Law, which has become an important international benchmark in procurement law reform, sets out procedures aimed at achieving competition, transparency, fairness, economy and efficiency in the procurement process,

*Observing also* that, despite the widely recognized value of the 1994 Model Law, new issues and practices have arisen since its adoption that have justified revision of the text,

*Recognizing* that at its thirty-seventh session, in 2004, the Commission agreed that the 1994 Model Law would benefit from being updated to reflect new practices, in particular those resulting from the use of electronic communications in public procurement, and the experience gained in the use of the 1994 Model Law as a basis for law reform, not departing, however, from the basic principles behind it and not modifying the provisions whose usefulness had been proved,

*Noting* that the revisions to the 1994 Model Law were the subject of due deliberation and extensive consultations with Governments and interested international organizations, and that thus it can be expected that the revised Model Law, to be called the “United Nations Commission on International Trade Law Model Law on Public Procurement”, would be acceptable to States with different legal, social and economic systems,

*Noting also* that the revised Model Law is expected to contribute significantly to the establishment of a harmonized and modern legal framework for public procurement that promotes economy, efficiency and competition in procurement and, at the same time, fosters integrity, confidence, fairness and transparency in the procurement process,

*Convinced* that the revised Model Law will significantly assist all States, in particular developing countries and countries with economies in transition, in enhancing their existing procurement laws and formulating procurement laws where none presently exist, and will lead to the development of harmonious international economic relations and increased economic development,

---

<sup>1</sup> *Official Records of the General Assembly, Forty-ninth Session, Supplement No. 17 and corrigendum (A/49/17 and Corr.1), annex I.*

1. *Expresses its appreciation* to the United Nations Commission on International Trade Law for developing and adopting the draft United Nations Commission on International Trade Law Model Law on Public Procurement;<sup>2</sup>
2. *Requests* the Secretary-General to transmit the text of the Model Law to Governments and other interested bodies;
3. *Recommends* that all States use the Model Law in assessing their legal regimes for public procurement and give favourable consideration to the Model Law when they enact or revise their laws;
4. *Calls for* closer cooperation and coordination among the Commission and other international organs and organizations, including regional organizations, active in the field of procurement law reform, in order to avoid undesirable duplication of efforts and inconsistent, incoherent or conflicting results in the modernization and harmonization of public procurement law;

<sup>2</sup> *Official Records of the General Assembly, Sixty-sixth Session, Supplement No. 17 (A/66/17)*, para. 198.

3. *Requests* the Secretary-General to publish, including electronically, the text of the Model Law on Cross-Border Insolvency: The Judicial Perspective, as updated or amended from time to time in accordance with paragraph 2 of the present resolution, and to transmit it to Governments with the request that the text be made available to relevant authorities so that it becomes widely known and available;

4. *Recommends* that the Model Law on Cross-Border Insolvency: The Judicial Perspective be given due consideration, as appropriate, by judges, insolvency practitioners and other stakeholders involved in cross-border insolvency proceedings;

5. *Also recommends* that all States consider the implementation of the United Nations Commission on International Trade Law Model Law on Cross-Border Insolvency.<sup>1</sup>

*82nd plenary meeting  
9 December 2011*

**66/102. The rule of law at the national and international levels**

*The General Assembly,*

*Recalling* its resolution 65/32 of 6 December 2010,

*Reaffirming its commitment* to the purposes and principles of the Charter of the United Nations and international law, which are indispensable foundations of a more peaceful, prosperous and just world, and reiterating its determination to foster strict respect for them and to establish a just and lasting peace all over the world,

*Reaffirming* that human rights, the rule of law and democracy are interlinked and mutually reinforcing and that they belong to the universal and indivisible core values and principles of the United Nations,

*Reaffirming also* the need for universal adherence to and implementation of the rule of law at both the national and international levels and its solemn commitment to an international order based on the rule of law and international law, which, together with the principles of justice, is essential for peaceful coexistence and cooperation among States,

*Convinced* that the advancement of the rule of law at the national and international levels is essential for the realization of sustained economic growth, sustainable development, the eradication of poverty and hunger and the protection of all human rights and fundamental freedoms, and acknowledging that collective security depends on effective cooperation, in accordance with the Charter and international law, against transnational threats,

*Reaffirming* the duty of all States to refrain in their international relations from the threat or use of force in any manner inconsistent with the purposes and principles of the United Nations and to settle their international disputes by peaceful means in such a manner that international peace and security, and justice, are not endangered, in accordance with Chapter VI of the Charter, and calling upon States that have not yet done so to consider accepting the jurisdiction of the International Court of Justice in accordance with its Statute,

*Convinced* that the promotion of and respect for the rule of law at the national and international levels, as well as justice and good governance, should guide the activities of the United Nations and of its Member States,

*Recalling* paragraph 134 (e) of the 2005 World Summit Outcome,<sup>1</sup>

1. *Takes note* of the annual report of the Secretary-General on strengthening and coordinating United Nations rule of law activities;<sup>2</sup>

2. *Reaffirms* the role of the General Assembly in encouraging the progressive development of international law and its codification, and reaffirms further that States shall abide by all their obligations under international law;

3. *Reaffirms also* the imperative of upholding and promoting the rule of law at the international level in accordance with the principles of the Charter;

4. *Welcomes* the dialogue initiated by the Rule of Law Coordination and Resource Group and the Rule of Law Unit with Member States on the topic

<sup>1</sup> See resolution 60/1.

<sup>2</sup> A/66/133.

“Promoting the rule of law at the international level”, and calls for the continuation of this dialogue with a view to fostering the rule of law at the international level;

5. *Stresses* the importance of adherence to the rule of law at the national level and the need to strengthen support to Member States, upon their request, in the domestic implementation of their respective international obligations through enhanced technical assistance and capacity-building, based on greater coordination and coherence within the United Nations system and among donors, and reiterates its call for greater evaluation of the effectiveness of such activities, including possible measures to improve the effectiveness of those capacity-building activities;

6. *Calls*, in this context, for dialogue to be enhanced among all stakeholders with a view to placing national perspectives at the centre of rule of law assistance in order to strengthen national ownership;

7. *Calls upon* the United Nations system to systematically address, as appropriate, aspects of the rule of law in relevant activities, including the participation of women in rule of law-related activities, recognizing the importance of the rule of law to virtually all areas of United Nations engagement;

8. *Expresses full support* for the overall coordination and coherence role of the Rule of Law Coordination and Resource Group within the United Nations system within existing mandates, supported by the Rule of Law Unit in the Executive Office of the Secretary-General, under the leadership of the Deputy Secretary-General;

9. *Requests* the Secretary-General to submit, in a timely manner, his next annual report on United Nations rule of law activities, in accordance with paragraph 5 of its resolution 63/128 of 11 December 2008;

10. *Recognizes* the importance of restoring confidence in the rule of law as a key element of transitional justice;

11. *Encourages* the Secretary-General and the United Nations system to accord high priority to rule of law activities;

12. *Invites* the International Court of Justice, the United Nations Commission on International Trade Law and the International Law Commission to continue to comment, in their respective reports to the General Assembly, on their current roles in promoting the rule of law;

13. *Invites* the Rule of Law Coordination and Resource Group and the Rule of Law Unit to continue to interact with Member States on a regular basis, in particular in informal briefings;

14. *Stresses* the need to provide the Rule of Law Unit with the necessary funding and staff in order to enable it to carry out its tasks in an effective and sustainable manner, and urges the Secretary-General and Member States to continue to support the functioning of the Unit;

15. *Recalls* its decision to convene a high-level meeting of the General Assembly on the topic “The rule of law at the national and international levels” during the high-level segment of its sixty-seventh session, and decides that the organizational arrangements for the high-level meeting should be as follows:

(a) The high-level meeting will be held as a one-day plenary on Monday, 24 September 2012;

(b) The President of the General Assembly, the Secretary-General, the President of the International Court of Justice, the President of the Security Council, the United Nations High Commissioner for Human Rights, the Administrator of the United Nations Development Programme, the Executive Director of the United Nations Office on Drugs and Crime, the Chair of the International Law Commission, Member States and observers, as well as a limited number of representatives of non-governmental organizations active in the field of the rule of law,<sup>3</sup> will be invited to speak at the plenary;

(c) The President of the General Assembly shall draw up a list of representatives of non-governmental organizations in consultative status with the Economic and Social Council who will participate in the high-level meeting;

(d) The President of the General Assembly shall draw up a list of representatives of civil society organizations, including non-governmental organizations active in the field of the rule of law and, taking into account the principle of equitable geographical representation, submit the list to Member States for consideration on a no-objection basis, for participation in the high-level meeting;

16. *Decides* that the high-level meeting will result in a concise outcome document, and requests the President of the General Assembly to produce a draft text, in consultation with Member States, and to convene inclusive informal consultations at an appropriate date in order to enable sufficient consideration and agreement by Member States prior to the meeting;

17. *Requests* the President of the General Assembly, in consultation with Member States, to finalize the organizational arrangements of the meetings, including the list of speakers for the plenary, taking into account the length of the high-level meeting, the level of representation, equitable geographical representation and the need to ensure that all listed speakers will have the opportunity to speak;

18. *Requests* the Secretary-General to submit a report for the consideration of Member States in preparation for the high-level meeting, no later than March 2012;

19. *Decides* to include in the provisional agenda of its sixty-seventh session the item entitled “The rule of law at the national and international levels”;

---

<sup>3</sup> To speak on a non-objection basis in accordance with past practice.

20. *Invites* Member States as well as the Secretary-General to suggest possible sub-topics for future Sixth Committee debates for inclusion in the forthcoming annual report, with a view to assisting the Sixth Committee in choosing future sub-topics.

*82nd plenary meeting  
9 December 2011*

## I. Introduction

1. The Commission considered the question of transparency in treaty-based investor-State arbitration at its forty-first session (New York, 16 June-3 July 2008). At that session, the Commission agreed that it would not be desirable to include at that time specific provisions on treaty-based arbitration in the UNCITRAL Arbitration Rules (“UNCITRAL Arbitration Rules” or “Rules”) themselves and that any work on treaty-based investor-State arbitration that the Working Group might have to undertake in the future should not delay the completion of the revision of the UNCITRAL Arbitration Rules in their generic form. As to timing, the Commission agreed that the topic of transparency in treaty-based investor-State arbitration was worthy of future consideration and should be dealt with as a matter of priority immediately after completion of the current revision of the UNCITRAL Arbitration Rules. As to the scope of such future work, the Commission agreed by consensus on the importance of ensuring transparency in treaty-based investor-State arbitration. Written observations regarding that issue were presented by one delegation (A/CN.9/662) and a statement was also made on behalf of the Special Representative of the Secretary-General on human rights and transnational corporations and other business enterprises. The Commission was of the view that, as noted by the Working Group at its forty-eighth session (A/CN.9/646, para. 57), the issue of transparency was a desirable objective in treaty-based investor-State arbitration and should be addressed by future work. As to the form that any future work product might take, the Commission noted that various possibilities had been envisaged by the Working Group (*ibid.*, para. 69) in the field of treaty-based investor-State arbitration, including the preparation of instruments such as model clauses, specific rules or guidelines, an annex to the UNCITRAL Arbitration Rules in their generic form, separate arbitration rules or optional clauses for adoption in specific treaties. The Commission decided that it was too early to make a decision on the form of a future instrument on treaty-based investor-State arbitration and that broad discretion should be left to the Working Group in that respect. With a view to facilitating consideration of the issues of transparency in treaty-based investor-State arbitration by the Working Group at a future session, the Commission requested the Secretariat, resources permitting, to undertake preliminary research and compile information regarding current practices. The Commission urged member States to contribute broad information to the Secretariat regarding their practices with respect to transparency in treaty-based investor-State arbitration. It was emphasized that, when composing delegations to the Working Group sessions that would be devoted to that project, member States and observers should seek to achieve the highest level of expertise in treaty law and treaty-based investor-State arbitration.<sup>1</sup>

2. At its forty-third session (New York, 21 June-9 July 2010), with respect to future work in the field of settlement of commercial disputes, the Commission recalled the decision made at its forty-first session that the topic of transparency in treaty-based investor-State arbitration should be dealt with as a matter of priority immediately after completion of the current revision of the UNCITRAL Arbitration Rules. The Commission entrusted its Working Group II with the task of preparing a legal standard on that topic. The Commission was informed that, pursuant to the

---

<sup>1</sup> *Official records of the General Assembly, Sixty-third session, Supplement No. 17 (A/63/17)*, para. 314.

request received from the Commission at its forty-first session, the Secretariat had circulated a questionnaire to States with regard to their practice on transparency in treaty-based investor-State arbitration and that replies thereto would be made available to the Working Group.<sup>2</sup> Those replies are reproduced in document A/CN.9/WG.II/WP.159 and its addenda.

3. At the forty-third session of the Commission, support was expressed for the view that the Working Group could also consider undertaking work in respect of those issues that arose more generally in treaty-based investor-State arbitration and that would deserve additional work. The prevailing view, in line with the decision previously made by the Commission, was that it was too early to make a decision on the precise form and scope of a future instrument on treaty-based investor-State arbitration and that the mandate of the Working Group should be limited to the preparation of rules of uniform law on transparency in treaty-based investor-State arbitration. However, it was agreed that, while operating within that mandate, the Working Group might identify any other topic with respect to treaty-based investor-State arbitration that might also require future work by the Commission. It was agreed that any such topic might be brought to the attention of the Commission at its next session, in 2011.<sup>3</sup>

4. The most recent compilation of historical references regarding the consideration by the Commission of works of the Working Group can be found in document A/CN.9/WG.II/WP.158, paragraphs 5-11.

## II. Organization of the session

5. The Working Group, which was composed of all States members of the Commission, held its fifty-third session in Vienna, from 4 to 8 October 2010. The session was attended by the following States members of the Working Group:<sup>4</sup> Argentina (2016), Armenia (2013), Australia (2016), Austria (2016), Belarus (2011), Bolivia (Plurinational State of) (2013), Botswana (2016), Brazil (2016), Canada (2013), Chile (2013), China (2013), Colombia (2016), Czech Republic (2013), Egypt (2013), France (2013), Germany (2013), Greece (2013), India (2016), Iran (Islamic Republic of) (2016), Israel (2016), Italy (2016), Japan (2013), Malaysia (2013), Mauritius (2016), Mexico (2013), Norway (2013), Paraguay (2016), Philippines (2016), Poland (2012), Republic of Korea (2013), Russian Federation (2013), Senegal (2013), Singapore (2013), South Africa (2013), Spain (2016), Sri Lanka (2013), Thailand (2016), Turkey (2016), Uganda (2016), Ukraine (2014), United Kingdom of Great Britain and Northern Ireland (2013), United States of America (2016) and Venezuela (Bolivarian Republic of) (2016).

6. The session was attended by observers from the following States: Belgium, Croatia, Democratic Republic of the Congo, Dominican Republic, Ecuador, Finland,

<sup>2</sup> Ibid., *Sixty-fifth session, Supplement No. 17* (A/65/17), para. 190.

<sup>3</sup> Ibid., para. 191.

<sup>4</sup> The following six State members elected by the General Assembly on 3 November 2009 agreed to alternate their membership among themselves until 2016 as follows: Belarus (2010-2011, 2013-2016), Czech Republic (2010-2013, 2015-2016), Poland (2010-2012, 2014-2016), Ukraine (2010-2014), Georgia (2011-2015) and Croatia (2012-2016).

Hungary, Indonesia, Iraq, Netherlands, Portugal, Romania, Slovakia, Slovenia, Sweden, Switzerland, Togo and Yemen.

7. The session was attended by observers from the following organizations of the United Nations System: International Centre for Settlement of Investment Disputes (ICSID), the World Bank, United Nations Conference on Trade and Development (UNCTAD) and United Nations Educational, Scientific and Cultural Organization (UNESCO).

8. The session was attended by observers from the following international intergovernmental organizations invited by the Commission: Asian-African Legal Consultative Organization (AALCO), *Centre du Commerce International* (CNUCED/OMC), European Union, Permanent Court of Arbitration (PCA) and Permanent Observer Office of the League of Arab States in Vienna.

9. The session was also attended by observers from the following international non-governmental organizations invited by the Commission: Alumni Association of the Willem C. Vis International Commercial Arbitration Moot (MAA), American Arbitration Association (AAA), American Bar Association (ABA), Arab Association for International Arbitration (AAIA), Arbitration Institute of the Stockholm Chamber of Commerce, Asia Pacific Regional Arbitration Group (APRAG), Association for the Promotion of Arbitration in Africa (APAA), *Barreau de Paris*, Belgian Center for Arbitration and Mediation (CEPANI), Center for International Environmental Law (CIEL), China International Economic Trade and Arbitration Commission (CIETAC), *Comité Français de l'Arbitrage* (CFA), Construction Industry Arbitration Council (CIAC), Corporate Counsel International Arbitration Group (CCIAG), Council of Bars and Law Societies of Europe (CCBE), European Law Students' Association (ELSA), Forum for International Conciliation and Arbitration C.I.C. (FICACIC), Inter-American Bar Association (IABA), Inter-American Commercial Arbitration Commission (IACAC), International Arbitration Institute (IAI), International Bar Association (IBA), International Insolvency Institute (III), International Institute for Sustainable Development (IISD), International Law Institute (ILI), London Court of International Arbitration (LCIA), Milan Club of Arbitrators, Queen Mary University of London School of International Arbitration (QMUL), Regional Centre for International Commercial Arbitration — Lagos (RCICAL), Swiss Arbitration Association (ASA) and Vienna International Arbitral Centre of the Austrian Federal Economic Chamber (VIAC).

10. The Working Group elected the following officers:

*Chairman:* Mr. Salim Moollan (Mauritius)

*Rapporteur:* Ms. Isabel Soares da Costa (Brazil)

11. The Working Group had before it the following documents: (a) provisional agenda (A/CN.9/WG.II/WP.158); (b) notes by the Secretariat regarding the preparation of a legal standard on transparency in treaty-based investor-State arbitration (A/CN.9/WG.II/WP.159 and its addenda; and A/CN.9/WG.II/WP.160 and its addendum).

12. The Working Group adopted the following agenda:

1. Opening of the session.

2. Election of officers.
3. Adoption of the agenda.
4. Preparation of a legal standard on transparency in treaty-based investor-State arbitration.
5. Other business.
6. Adoption of the report.

### **III. Deliberations and decisions**

13. The Working Group commenced its work on agenda item 4 on the basis of the notes prepared by the Secretariat (A/CN.9/WG.II/WP.159 and its addenda; and A/CN.9/WG.II/WP.160 and its addendum). The deliberations and decisions of the Working Group with respect to this item are reflected in chapter IV. The deliberations and decisions of the Working Group with respect to agenda item 5 on other business are reflected in chapter V.

### **IV. Preparation of a legal standard on transparency in treaty-based investor-State arbitration**

14. The Working Group recalled the discussion at the forty-first session of the Commission where the Commission agreed by consensus on the importance of ensuring transparency in treaty-based investor-State arbitration.<sup>5</sup> The Working Group also recalled that its mandate, as defined by the Commission at its forty-third session and referred to in paragraphs 2 and 3 above, was to focus on the preparation of a legal standard on transparency in treaty-based investor-State arbitration.<sup>6</sup>

15. The discussion of the Working Group at its current session took place on a preliminary and general basis, without any attempt to reach consensus yet. That was done in order to delineate the issues for discussion at the next session of the Working Group.

#### **A. General remarks**

16. General remarks were made regarding the policy context in which the matter of transparency in treaty-based investor-State arbitration arose. It was said that discussion on the need of ensuring transparency in treaty-based investor-State arbitration should be considered in the context of foreign direct investment as a tool for the long-term sustainable growth of developing countries. Amongst others, foreign direct investment was said to contribute to building productive capacities and improve infrastructure of countries; to enhance access to essential services such as water, education, and health care — including for the poor and marginalized; and it could also generate spill-over effects by increasing demand and encouraging

<sup>6</sup> *Ibid.*, *Sixty-fifth Session, Supplement No. 17 (A/65/17)*, paras. 190 and 191.

domestic entrepreneurship. That, it was further said, could lead to a virtuous cycle of an increase in domestic employment, in domestic demand and, ultimately, to sustained economic growth.

17. In addition to the broader objective of promoting sustainable development through international investment law, ensuring transparency and meaningful opportunity for public participation in treaty-based investor-State arbitration was said to constitute a means to promote the rule of law, good governance, due process, fairness, equity and rights to access information. It was also seen as an important step to respond to the increasing challenges regarding the legitimacy of international investment law and arbitration as such. Those challenges were said to include, among others: an increasing number of treaty-based investor-State arbitrations, including an increasing number of frivolous claims; increasing amounts of awarded damages; increasing inconsistency of awards and concerns about lack of predictability and legal stability; and uncertainties regarding how the investor-State dispute settlement system interacted with important public policy considerations. It was said that legal standards on increased transparency would enhance the public understanding of the process and its overall credibility.

18. The fact that United Nations organs, agencies and entities, including the Special Representative of the United Nations Secretary-General on human rights and transnational corporations and other business enterprises, were working to promote transparency and address legitimacy concerns arising from the investment dispute settlement system was said to illustrate transparency and inclusiveness as expressions of core United Nations values such as human rights, good governance and the rule of law.

19. General agreement was expressed by the Working Group regarding the desirability of dealing with transparency in treaty-based investor-State arbitration, which differed from purely private arbitration, where confidentiality was an essential feature. According to principles of good governance, government activities might be subject to basic requirements of transparency and public access. A view was expressed that treaty-based investor-State arbitration might involve consideration of public policy and could lead to large potential monetary liability for public treasuries. In that light, it was said that certain investment treaties already contained provisions on transparency.

20. It was pointed out that the UNCITRAL Arbitration Rules were the second most widely used rules for resolving treaty-based investor-State disputes (after the rules of the International Centre for Settlement of Investment Disputes (ICSID)). It was said that the regulations and rules of ICSID were amended in 2006 to incorporate greater transparency and opportunity for public access to treaty-based investor-State arbitrations.

21. Views were expressed that a central feature of arbitration was its consensual nature, and that element should be kept in mind when discussing the form and content of a standard on transparency. Reservations were expressed on any standard that would seek to impose transparency as a mandatory rule, in particular, taking account of the ad hoc nature of arbitration under the UNCITRAL Arbitration Rules. Some delegations also noted that the efficiency and efficacy of the dispute settlement process needed to be borne in mind when discussing the issue of transparency in treaty-based investor-State arbitration in substance.

## **B. Form of a legal standard on transparency**

22. The Working Group proceeded with a general discussion on the possible nature of a legal standard on transparency in treaty-based investor-State arbitration, and the various forms it might take. Further discussions on that matter took place at a later stage of the session (see below, paras. 76 to 100).

23. It was said that settlement of disputes arising in the context of multilateral or bilateral investment treaties (“investment treaties”) had particular features that might lead arbitral tribunals to scrutinize the legislative, administrative or even judicial activities of a State. In addition, no appeal of decisions made by arbitral tribunals was generally allowed. Outside arbitration under the Convention on the Settlement of Investment Disputes between States and Nationals of Other States (“ICSID Convention”), arbitral awards were enforceable under the conditions laid out by the New York Convention on the Recognition and Enforcement of Foreign Arbitral Awards (“New York Convention”). It was pointed out that treaty-based investor-State arbitration had far reaching effects and was therefore different in nature as compared to other instances of international commercial arbitration. It was further said that, when considering the form of the legal standard on transparency, it should be borne in mind that there were two different levels of consent to be considered when dealing with treaty-based investor-State arbitration: the consent between States, parties to the investment treaty, and the consent between the host State and the investor, parties to the arbitration.

### **1. At the level of multilateral or bilateral investment treaties**

24. One of the possibilities mentioned was that the Working Group could consider defining a set of rules on transparency with a normative effect for inclusion in investment treaties concluded between States. It was said that, at that level, experience had shown that, notwithstanding the existence of model investment treaties, clauses were negotiated on a case-by-case basis, and usually differed from the initial model. Consequently, it was said that it might be appropriate to draft model clauses for States to include in their investment treaties. Following that approach, any standard on transparency would only apply if States consented to it. Therefore, it would be left to the discretion of States to decide whether to amend their existing investment treaties to include those standards, and to include the relevant provisions in their future investment treaties.

25. Some delegations proposed to limit the consideration of a legal standard on transparency to a set of rules or model clauses for possible inclusion in investment treaties, while others considered that that option should be replaced or complemented by the adoption of a legal standard, for instance in the form of guidelines, applicable once a dispute arose between an investor and a State.

26. One suggestion was to prepare an annex to the UNCITRAL Arbitration Rules that would apply if the investor and the host State party to the arbitration agreed upon, or the investment treaty provided for, its application. It was said that legal standards on transparency would have more effect if associated to the Rules. The Working Group heard different views on whether such an annex should be optional or mandatory, and whether an opting-in or opting-out mechanism should be provided. It was agreed that those matters would need further consideration.

27. Questions were raised as to the binding effect legal standards on transparency might have on arbitration provisions referring to the UNCITRAL Arbitration Rules in existing investment treaties, in particular for those arbitration provisions that did not specify the applicable version of the Rules. It was said that most investment treaties referred to the application of the UNCITRAL Arbitration Rules, without any additional reference. In that context, it was said that an automatic application of any legal standard on transparency to investment treaties entered into prior to the adoption of such standards might be contrary to public international law, and the basic principle of consent in international arbitration.

28. Another view was that it was important to ensure that any legal standard on transparency applied to all existing investment treaties, and it was suggested that creative solutions should be developed to ensure a universal application of that standard. In that context, it was noted that article 1 (2) of the UNCITRAL Arbitration Rules as revised in 2010 provided for a presumption that the 2010 Rules would apply to an arbitration agreement concluded after 15 August 2010, but that that presumption would not apply where the arbitration agreement had been concluded by accepting after 15 August 2010 an offer made before that date. It was further noted that that modification had been inserted in article 1 (2) in order to cater for the effect of an unintended retroactive application (see document A/CN.9/646, para. 76) and the Working Group noted the need to provide for consistent solutions in that respect.

29. It was said that designing an annex to the UNCITRAL Arbitration Rules applying only to investment arbitration might raise difficult issues regarding the definition of investment arbitration (covered by that annex) as opposed to other types of arbitration (to which that annex would not apply), and that that matter would also need further consideration.

## **2. At the level of the relation between the host State and the investor**

30. With respect to the relation between the host State and the investor, the Working Group considered that a policy decision should be taken at a later stage as to whether the investor should be given an opportunity to refuse an offer to arbitrate under legal standards of transparency.

## **C. Possible content of a legal standard on transparency**

31. The Working Group commenced its discussion on the possible content of a legal standard to be prepared on transparency in treaty-based investor-State arbitration. There was general agreement that the substantive issues to be considered in that respect would be as follows: publicity regarding the initiation of arbitral proceedings; documents to be published (such as pleadings, procedural orders, supporting evidence); submissions by third parties (“amicus curiae”) in proceedings; public hearings; publication of arbitral awards; possible exceptions to the transparency rules; and repository of published information (“registry”).

### **1. Publicity regarding the initiation of arbitral proceedings**

32. Some delegations said that the publication of initiation of arbitral proceedings was an important step for ensuring transparency and for making other provisions on

transparency meaningful. The Working Group heard a preliminary exchange of views regarding the conditions for publicity of the initiation of proceedings.

33. Different views were expressed regarding the information to be made public at that early stage of the proceedings, in particular, whether it should be limited to the existence of a dispute, or also include publication of the notice of arbitration. It was suggested that the notice of arbitration, that triggered the commencement of arbitration under article 3 of the UNCITRAL Arbitration Rules, should be made public. A concern was expressed that publicizing the notice of arbitration might not provide balanced information on the case. In turn, that might give rise to various issues such as protection of confidential or sensitive information and risks of frivolous claims. It was suggested that providing only preliminary information regarding the parties involved, their nationality, and the economic sector concerned might be sufficient. The example of publication by the ICSID Secretariat was given. It was highlighted that for arbitration under the ICSID Convention, the Secretariat did not make the notice of arbitration public and posted on its website, after registration, the name and subject matter of the case as well as the date of registration of the case in accordance with the ICSID Convention.

34. As to timing, different views were expressed on whether the information should be made public once the arbitration started at the time the notice of arbitration was received, or when the arbitral tribunal was constituted. Providing early information to the public on the existence of proceedings was said to be important in order to allow public awareness of procedural steps of the arbitration. A practical concern was expressed that the publication at a premature stage of the proceedings would not be advisable, as at the time of the notice of arbitration, no arbitral tribunal had yet been constituted and there existed a possibility that the arbitral proceedings would never take place. Also, views were expressed that it might be preferable to provide for publication of information once the arbitral tribunal had been constituted, in order to ensure the reliability of the information published.

35. As to the person responsible for taking the initiative of publication regarding the initiation of the proceedings, various views were expressed on whether the host State or the investor should be responsible for the publication. Views were expressed that the publication of information could be undertaken jointly by the parties, based on their consent to do so.

36. The Working Group agreed to further consider whether publication of information at that stage should be made mandatory, and if so, whether there should be any sanction in case of non-compliance. It was suggested that in case the obligation of publicity would rest with the parties, and the parties did not comply with that obligation, that responsibility could then be transferred to the arbitral tribunal. In response to that suggestion, it was said that the arbitral tribunal would not have the practical means to do so. Another question raised was the treatment of the situation where the parties agreed to refrain from disclosing information, despite their obligation to do so under applicable provisions.

37. With respect to the manner in which publicity could be organized, various suggestions were made, such as leaving it to the States to publish information on the website of their relevant ministries, or other appropriate channels in the countries concerned or establishing a central registry. Regarding the first option, it was said

that there was divergence in the experience of States with treaty-based investor-State arbitration. Experienced States would have the right channels in place to publicize such information, whereas for less experienced States, that option would be practically difficult to implement. Concerning the option of establishing a central registry, it was mentioned that possible institutions for carrying out that task could be the UNCITRAL secretariat, the Permanent Court of Arbitration at The Hague, or the appointing authorities. The Working Group agreed to further consider that matter when dealing with the question of repository of published information (see below, paras. 73-75).

38. It was also highlighted that publication of information on websites of international organizations would not necessarily be sufficient to achieve the desirable level of public awareness and that information might need to be made available in other forms.

39. A general remark was made regarding the drafting of provisions on publicizing the initiation of the arbitral proceedings. The Working Group was cautioned against providing too detailed procedures as their non-fulfilment might open the door to challenges on the basis of an arbitral procedure not being in compliance with the agreement of the parties. It was suggested that the Working Group should consider using only general language in provisions on publication, with the aim of allowing publication by any appropriate and effective means. It was also pointed out that provisions on transparency should provide for a default rule in case of disagreement between the parties in order to avoid lengthy debates on that matter during the arbitral proceedings.

## **2. Documents to be published**

40. The Working Group considered the question of documents that could be published. Different views were expressed on whether and, if so, which documents should be published, and the persons responsible for publication.

41. The view was expressed that all documents submitted to, and issued by, the arbitral tribunal should be made available to the public, so as to ensure that the public was informed of the arbitral proceedings and to facilitate submission by third parties of amicus curiae briefs. An order in the case *Chemtura Corporation v. Government of Canada*<sup>7</sup> and the Canada Model Foreign Investment Protection Agreement were given as examples of documents containing provisions on publication. It was suggested that mechanisms could be designed to provide opportunity for protection of confidential or sensitive information and to resolve any dispute that might arise between the parties in relation to information to be protected from publication. The purpose of such mechanisms would be to ensure that transparency would not unduly prejudice one party. As an example of such mechanisms, it was explained that where full disclosure of documents was generally allowed, a twenty day notice of the intent to disclose a document by one party would be given to the other party. The document would be disclosed only if both parties would find an agreement on how protected information should be dealt with or the arbitral tribunal had resolved the issue. The Working Group agreed to further consider protection of confidential or sensitive information, as well as the issue of

---

<sup>7</sup> *Chemtura Corporation v. Government of Canada, Confidentiality Order, January 21, 2008.*

privileged information that could not be published under applicable laws at a later stage of its discussion (see below, paras. 67-72).

42. It was said that not all documents would need to be published, in particular in view of the necessity to find the right balance between the requirements of public interest and the legitimate need to ensure manageability and efficiency of the arbitral procedure. In that respect, the publication of briefs was viewed as burdensome but still manageable, whereas the publication of witness testimonies and expert reports was viewed as potentially costly. Consequently, it was proposed to differentiate between briefs of the parties and orders by arbitral tribunals, which could be published; and other evidentiary materials or exhibits which could be excluded from publication. It was pointed out that other documents were produced by the parties or the arbitral tribunal during the proceedings. Consequently, it would also be possible to classify the relevant documents as (a) formal submissions to the arbitral tribunal; (b) exhibits, written statements, expert reports and documentation submitted in support of the formal submissions; (c) decisions and orders from the arbitral tribunal; (d) records of live testimony and submissions; and (e) communications between the parties. Therefore, it was suggested that it might be preferable to refrain from establishing a list of documents subject to publication, and instead to provide for full disclosure of documents, accompanied with a discretionary power of the arbitral tribunal to decide which documents not to publish, considering such factors as the burden on the parties of reviewing all such documents to identify information that should not be disclosed.

43. Different views were expressed on whether the parties or the arbitral tribunal should be the ones to decide on publication of documents. It was suggested that the parties were in the best position to judge the appropriateness of publication of documents, so that they should be the ones deciding on that issue. In that regard, it was further said that the consent of the parties should be the prerequisite for the publication of documents. However, it was pointed out that, as shown in document A/CN.9/WG.II/WP.159 and its addenda, a number of States did not have experience in that field and that matter should be taken into account in designing provisions on transparency.

44. Other views were expressed that the arbitral tribunal should decide the issue of publication of documents on a case-by-case basis. Therefore, any provision on that matter could provide that publication of all materials submitted to, or issued by, the arbitral tribunal, should be as directed by the arbitral tribunal. Concerns were expressed that leaving the matter fully in the hands of the arbitral tribunal would give too much discretion and power to the arbitral tribunal in the absence of any guidelines. Another concern expressed was that it might be too burdensome for the arbitral tribunal to undertake that task. It was also suggested that parties could assist the arbitral tribunal in identifying documents to be published and information to be protected.

45. Another question raised referred to the practical aspects of the publication of documents, such as the language of publication.

### **3. Submissions by third parties (“amicus curiae”) in arbitral proceedings**

46. Many delegations expressed strong support for allowing submissions by third parties, also known as *amicus curiae* submissions, in arbitral proceedings between

an investor and a State. It was said that amicus curiae submissions could be useful for the arbitral tribunal in resolving the dispute and promoted legitimacy of the arbitral process.

47. It was widely felt that there should be certain restricting criteria in place for such submissions, including the subject matter of the submission, expertise of the amicus curiae, relevance for the proceedings, appropriate page limits, and the time when such submissions would be allowed. To that end, it was proposed that it should be left to the parties to decide whether such submissions should be allowed, as they could result in additional costs and delay of the proceedings. In response, it was said that leaving the decision to the parties would not be advisable, as often amicus curiae submissions were done in favour of one side or even, as had already been the case, in favour of neither side. It was noted that the purpose of amicus curiae submissions was to enlighten the arbitral tribunal in its decision-making process. Therefore, support was expressed for the view that the arbitral tribunal itself should play a “gate-keeping” role and decide on whether to allow amicus curiae submissions based on certain criteria. It was said that there had been sufficient experience with such criteria, including in the context of the North American Free-Trade Agreement (NAFTA) with the Statement of the Free Trade Commission on Non-Disputing Party Participation and various model bilateral investment treaties.

48. The Working Group left open the question whether the arbitral tribunal would have full discretion to decide on amicus curiae submissions or whether it would have to consult the parties, in accordance with the consensual nature of arbitral proceedings.

49. It was observed that two possible types of amicus curiae should be distinguished and perhaps considered differently. The first type could be any third party that would have an interest in contributing to the solution of the dispute. A second type could be another State party to the investment treaty at issue that was not a party to the dispute. It was noted that such State often had important information to provide, such as information on *travaux préparatoires*, thus preventing one-sided treaty interpretation. In response, it was said that an intervention by a non-disputing State, of which the investor was a national, could raise issues of diplomatic protection and was to be given careful consideration. It was suggested that third parties who could contribute to the resolution of the dispute could be identified and invited by the arbitral tribunal to assist it. The home State of the investor could be one such third party.

50. It was also said that the role of amicus curiae should be considered from the point of view of domestic legal systems that were not familiar with the concept of amicus curiae. In that regard, the issue was raised whether an amicus curiae could be considered as an expert; that would in turn raise questions of the possibility of cross-examination of the amicus curiae. In response, it was said that the role of an amicus curiae was different from that of an expert, as experts were usually appointed by the arbitral tribunal in compliance with certain conditions such as impartiality and independence. The Working Group took note of the suggestion to define the term “amicus curiae” and the intended role of amicus curiae, including the issues of who could be accepted to appear as an amicus, whether it should be a person or an entity, the criteria for participation, and whether participation should be left to the arbitral tribunal’s decision or agreed to by the parties, the form of amicus

briefs, and other practical matters, such as the determination and allocation of the cost of amicus interventions.

51. In the general framework of allowing amicus curiae submissions, the importance of access to documents was emphasized, as the quality of any amicus curiae submissions would depend on the permitted level of access to documents. With respect to the role of amicus curiae, it was questioned whether there should be different levels of access to documents provided for the general public on the one hand and amicus curiae on the other hand.

#### **4. Hearings**

##### **(a) Public hearings**

52. The Working Group considered whether hearings should be opened to the public. It was clarified that the notion of “open” or “public” hearings was understood by the Working Group as allowing the public to attend the hearings, but not to actively participate in them.

53. Many delegations expressed support for public hearings for various reasons. It was said that public hearings were a fundamental feature of a transparent system that should be promoted in international investment arbitration. It was further said that the same logic that might justify public access to documents should also apply in respect of hearings. Public hearings were seen as essential for enhancing awareness and confidence of the public regarding treaty-based investor-State arbitration.

54. It was suggested that a provision on open hearings in any legal standard to be prepared on transparency should reverse the default rule contained in article 25 (4) of the 1976 UNCITRAL Arbitration Rules and article 28 (3) of the Rules as revised in 2010, and provide that hearings should be held in public, unless the parties agreed otherwise. The Working Group agreed that the question of consent by the parties to open hearings was a matter to be further discussed at a later stage.

55. A question was raised whether public hearings would encompass media attendance, and the possibility that the arbitral proceedings would be broadcast worldwide. It was said that the ability to attend public hearings would depend on the geographical location of the interested public, and broadcasting would ensure the widest public access. A view was expressed that, should the media be allowed to attend the hearings, they should, as in ordinary court proceedings, not be allowed to record or broadcast the hearings.

56. It was noted that hearings could also touch upon confidential or sensitive information, so that access by the public was not desirable as a general rule, and should not be accepted in all instances. In that regard, it was said that, in some circumstances, mechanisms should be put in place to limit public access to hearings, and logistical arrangements could be made to allow for hearings in camera when dealing with confidential or sensitive information. There was general agreement that it would be best to leave the decision to the arbitral tribunal on closed hearings in exceptional circumstances on a case-by-case basis. In support, it was said that the arbitral tribunal was best placed to balance the public interest with countervailing interests such as the need to ensure that the hearings remained manageable, and avoid aggravation of the dispute. A suggestion was made that decisions of the

arbitral tribunal on organizing open or closed hearings should be made in consultation with the parties. It was noted that reasons for holding a closed hearing could be treated as part of the possible exceptions to the transparency rules (see below, paras. 67-72).

57. Reservations of a general nature were expressed regarding public hearings, a concept that was viewed to be contrary to the very nature of arbitration, which was said to be confidential and not to allow for third-parties' access to hearings. It was said that treaty-based investor-State arbitration would often raise issues of a political nature and open hearings were likely to put additional pressure on the participating State, thus creating the risk that the involvement of the general public would not facilitate but adversely affect the settlement of the dispute. Some views were expressed in favour of keeping the general default rule as contained in the UNCITRAL Arbitration Rules, which provided that hearings were to "be held in camera unless the parties otherwise agreed". Under a different view, hearings should not be opened to public access, but the transcripts of such hearings should be made publicly available, after confidential or sensitive information had been redacted.

**(b) Transcripts of hearings**

58. There was general agreement that the decision to be made regarding transcripts should depend upon the solution adopted in respect of public access to hearings. It was suggested that transcripts would be publicly available in cases where hearings had taken place in camera only in the exceptional circumstances where the closure was decided for logistical reasons and not for reasons of protection of confidential or sensitive information. In such circumstances, the publication of transcripts would allow the public that had been unable to attend hearings to nevertheless be informed about their content. It was observed that making the transcripts publicly available would positively reinforce the effect of making the hearings public. In that regard, one delegation explained that in a reported case of public hearings, it had been its practice to publish transcripts of the hearings on the Internet.

59. The Working Group was informed that, for arbitrations under the rules of ICSID, the decision to hold open hearings was left to the arbitral tribunal, unless either party objected. In contrast, to make transcripts publicly available, the consent of the parties was needed. It was further said that the publication of transcripts was a question usually left to the respondent State at least for cases under NAFTA and that ICSID so far had not published any transcripts on its website.

**(c) Participation of third parties ("amicus curiae") in hearings**

60. It was noted that the general practice with *amicus curiae* had been to allow submissions by *amicus curiae*, but not to permit appearance or active participation in hearings. However, the view was expressed that *amicus curiae* participation should not be precluded since arbitral tribunals might in some cases wish to question an *amicus* at a hearing, and that therefore any provision on that matter should provide for a certain level of discretion. As reasons for permitting participation of *amicus curiae* in hearings, it was said that an *amicus curiae* often had special knowledge of the subject matter underlying the dispute. It was further explained that written submissions might, in certain instances, need to be complemented with oral explanations. It was further said that participation of

*amicus curiae* in hearings would give more weight to such interventions in the process, thereby positively impacting the perception of treaty-based investor-State arbitration. On the other hand, it was noted that in NAFTA proceedings, where written amici submissions could be accepted by the arbitral tribunal, no need for such participation at hearings had been found.

## **5. Publication of arbitral awards**

61. The Working Group considered the question of publication of awards and took note of the provisions on that matter contained in article 32 (5) of the 1976 UNCITRAL Arbitration Rules, and in article 34 (5) of the Rules, as revised in 2010. Both versions of the Rules required, in substance, the consent of all parties for the publication of an award.

62. Many delegations expressed support for the establishment of a general provision under which awards rendered by arbitral tribunals in treaty-based investor-State arbitration should be published, thus departing from the principle contained in the UNCITRAL Arbitration Rules. It was said that if other documents were to be released, awards should obviously also be published. Even if no other documents were published, it was said that the publication of awards would be a decisive step towards enhancing the legitimacy of the process and collecting accessible and consistent jurisprudence. Publication of awards would also contribute to providing information on treaty interpretation, which might be useful to parties to the treaty that were not parties to the dispute, or even to parties to other treaties.

63. The view was expressed that a provision on that matter could also provide that awards should be made public, unless all parties to the arbitration agreed otherwise. Should that case arise, it was suggested that, as done by the ICSID Secretariat, it might still be possible to publish excerpts of awards containing the relevant legal reasoning. It was pointed out that any agreement between the parties to keep awards confidential would raise suspicion in the public, and unless there would be reasons of public security, refusing publication of awards would not be advisable.

64. It was said that a provision on publication of awards should also contain rules for the protection of confidential or sensitive information. It was explained that difficulties could arise if the arbitral tribunal were to consult with the parties regarding information of a confidential nature that should be deleted from the award, and publication might therefore have an impact on the manner in which awards would be drafted, and their content. It was noted that the reasons for redacting or not publishing an award could be treated as part of the possible exceptions to the transparency rules (see below, paras. 67-72).

65. It was suggested to differentiate among awards rendered at different stages of the proceedings by the arbitral tribunal and to make the publication of the last award mandatory, while leaving the publication of the other awards optional at the arbitral tribunal's or the parties' initiative. In response, it was said that it was not unusual for a tribunal to render awards on different matters at different times, and the public might have an interest in any or all of them. It was also suggested that together with the publication of awards, provisions on that matter might allow publication of documents referred to in the awards, in particular if such documents were not released at an earlier stage, and were not of a sensitive nature any more.

66. As a matter of drafting, it was pointed out that there were a number of provisions dealing with awards in the UNCITRAL Arbitration Rules, and a legal standard on that matter should be made consistent with those provisions.

## **6. Possible exceptions to transparency rules**

67. The Working Group turned its attention to the possible exceptions to the transparency rules for the protection of confidential and sensitive information (referred to during the discussion as “carve outs”). The view was expressed that any provision on that matter should be drafted in a generic manner, thus circumventing the need to envisage all possible circumstances, but rather leaving a large degree of discretion to the arbitral tribunal. It was further suggested that generic definition of “confidential information” could be found in existing investment treaties. For example, “confidential information” could be defined as “any sensitive factual information not available in the public domain”. Such a definition would cover information that might be identified as sensitive by either disputing party. It was said that other categories of information might need to be protected while they were not included by such notion of “confidential information”, for example information that might be used to impede law enforcement and information otherwise protected from disclosure by the law of a party. The view was expressed that, while it was difficult to develop a comprehensive definition of confidential information, it would be useful to provide guidance to arbitral tribunals in the form of examples.

68. Another model which was said to provide useful guidance in investor-State arbitration were the IBA Rules on the Taking of Evidence in International Arbitration (2010) which contained provisions on confidentiality in paragraphs (3) and (4) of article 9 on admissibility and assessment of evidence.

69. The view was expressed that the determination of confidential and sensitive information should be handled by the arbitral tribunal. It was explained that, in the practice of certain States, it was the responsibility of a disputing party to identify confidential or other protected information to the arbitral tribunal, and that that identification to the tribunal was the trigger for the tribunal to consider the issue and make a decision.

70. General comments were made to the effect that while exceptions for reasons of protecting confidential or sensitive information were necessary, they should not be so wide as to weaken the main rules on transparency. It was also suggested that exceptions to transparency to protect confidential or sensitive information should provide clarity and guidance, in order to avoid disputes between the parties on that matter.

71. A question was raised on the conditions of enforcement of those exceptions and whether a sanction should be provided in case a party would breach confidentiality obligations. It was suggested that State immunities could be invoked as a defence. One possible sanction mentioned was related to costs. Article 9 (7) of the IBA Rules on the Taking of Evidence in International Arbitration (2010) was given as an example of a provision containing such sanction. It provided that “If the Arbitral Tribunal determines that a Party has failed to conduct itself in good faith in the taking of evidence, the Arbitral Tribunal may, in addition to any other measures available under these Rules, take such failure into account in its assignment of the

costs of the arbitration, including costs arising out of or in connection with the taking of evidence”.

72. A question was raised whether specific exceptions should be contemplated to deal with the question of protection of the integrity of the arbitral process. It was generally recognized that that matter was important to take into account as part of the discussions on transparency, but did not necessarily fall under the subject matter of exceptions for protection of confidential and sensitive information. It was generally agreed that protection of the integrity of the arbitral process was to be handled by the arbitral tribunal, which in any case already enjoyed a wide discretion in that respect under article 15 of the 1976 UNCITRAL Arbitration Rules and article 17 of the Rules, as revised in 2010. The general question of case management was said to be an important one, to be further considered in respect of each substantive matter.

#### **7. Repository of published information (“registry”)**

73. The Working Group recalled that a number of suggestions had been made regarding the mechanisms to be put in place to ensure the public availability of the information that might be publicized to ensure transparency in treaty-based investor-State arbitration. It was recalled that in the course of its deliberations on substantive matters, the Working Group had heard suggestions that information could be made publicly available by the parties, either the host State or the investor, or by a neutral registry. It was pointed out that the publication of information pertaining to arbitration under the UNCITRAL Arbitration Rules could be handled by the UNCITRAL secretariat and posted on its website. The Permanent Court of Arbitration at The Hague (“PCA”) was also mentioned, among other institutions, as a possible entity that could provide that service (see above, para. 37).

74. It was generally felt that there was first a need to better delineate the role that such registry would play before deciding whether parties or other entities should be entrusted with that task. It was questioned whether, with respect to the publication on the initiation of arbitral proceedings, the registry would also have to make a *prima facie* examination of the information received, in particular in case a legal standard on that matter would provide that information had to be posted before an arbitral tribunal was constituted. In that case, the registry would have to determine whether the case fell under the scope of application of the legal standard on transparency to be prepared, and for instance whether there was indeed an arbitration agreement. Other matters included whether beside cases arising from treaty-based investor-State arbitration, those resulting from contracts between States and investors, arising under investment law and other cases, would also fall in the competence of the registry. In that regard, it was further questioned whether the registry would be in a position to refuse publication of such cases.

75. The Working Group was informed that, as the UNCITRAL Arbitration Rules were an instrument of the United Nations, it would be logical for the United Nations Secretariat to provide such services to States. It was further noted that the Office of Legal Affairs of the United Nations, to which the UNCITRAL secretariat belongs, had experience in handling comparable types of services, including the publication of instruments of deposits of ratifications, access or acceptance of international conventions. The PCA confirmed its readiness to provide such services in case the UNCITRAL secretariat would not do so.

## **D. Form of a legal standard on transparency**

76. The Working Group recalled its prior discussion on the possible nature of a legal standard on transparency in treaty-based investor-State arbitration, and the various forms it might take (see above, paras. 22 to 30). As to form, many delegations expressed support for including legal standards on transparency as a supplement to the UNCITRAL Arbitration Rules, whether as an annex or, noting that the UNCITRAL Arbitration Rules did not make reference to an annex, stand-alone rules on transparency. Suggestions were made that provisions on transparency could also take the form of guidelines or model clauses.

77. With a view to facilitating discussion on the applicability of rules on transparency, it was proposed to draw a distinction between the offer to arbitrate made by State parties to a treaty, and the subsequent consent of the investor to arbitrate, at the investor-State level.

### **1. At the level of the multilateral or bilateral investment treaties**

78. In relation to the first level of consent (treaty level), a further distinction was suggested to be made between future and existing investment treaties.

#### **(a) Future multilateral or bilateral investment treaties**

79. The Working Group considered whether an express reference in future investment treaties to rules on transparency would be necessary for their application beside a reference to the UNCITRAL Arbitration Rules. Views were expressed that, in order to avoid legal uncertainty and diverging interpretations that might result from the absence of reference to rules on transparency, a preferable solution would be to provide for an express consent of the parties. It was said that States would have knowledge of the existence of new rules on transparency, and the lack of an explicit reference to them in an investment treaty should be interpreted as an agreement not to apply such rules. In particular, it was highlighted that the UNCITRAL Arbitration Rules did not contain provisions on the publication of documents, open hearings, and third parties' participation and, therefore, it would be difficult to deduce from a reference to the Rules an implied agreement also to apply additional rules on transparency.

80. However, it was pointed out that requiring a specific reference for the rules on transparency to apply in the context of future investment treaties would undermine the importance of the work currently undertaken by the Working Group. Another view expressed was that including in the rules on transparency provisions on their applicability would enhance clarity as to their application and use. For instance, it could be provided that the rules on transparency applied once reference to the UNCITRAL Arbitration Rules, as revised in 2010, was made.

81. It was suggested that a possible solution to conciliate different views expressed could consist in drafting rules reflecting a high level of transparency, but which would be applicable only if parties had expressly opted into transparent arbitration. It was generally felt that those matters should be further examined at a future session.

82. It was recalled that the mandate given by the Commission to the Working Group at its forty-third session was to provide an instrument that ensured transparency in treaty-based investor-State arbitration (see above, para. 2), leaving to the Working Group discretion how to implement that objective. It was further said that, if the instrument to be drafted would only be applicable if expressly referred to in the investment treaty, it would amount to a significant failure in the implementation of the mandate. Further, it was said that there was a need to address criticisms under which the current investor-State arbitration system was sometimes described as being closed, and not serving the public interest. It was further said that it might be timely to respond to those criticisms by adopting provisions on transparency that received the widest application in treaty-based investor-State arbitration. In that regard, the view was expressed that the Working Group should provide in any instrument it would draft on transparency, a presumption that the rules on transparency would apply in investment arbitration in the future. It was suggested that the Working Group should consider how best to create that presumption.

83. In support of that view, it was said that a presumption on application of the rules on transparency could be structured in a way that provided the needed level of certainty to parties as to whether or not they were operating under the transparency provisions in a given arbitration. For instance, it was suggested that the part of the rules on transparency dealing with their applicability could include wording along the lines of “these rules will be incorporated in the UNCITRAL Arbitration Rules for any arbitration initiated under those rules pursuant to an investment treaty hereafter ratified unless the treaty expressly provides that these rules will not apply”. It was said that such wording would have the benefit of creating a presumption in favour of transparency under the UNCITRAL Arbitration Rules.

84. There was a general agreement that the provisions to be drafted regarding application of the rules on transparency to future treaties should be clear, and provide the necessary level of certainty as to the existence of consent of parties to adopt such rules as part of their arbitration process under the UNCITRAL Arbitration Rules. It was also suggested that language adopted in respect of future treaties should be considered under the perspective of its impact on already concluded investment treaties.

**(b) Existing multilateral or bilateral investment treaties**

85. With respect to existing treaties, the Working Group considered the application of any new standard to existing investment treaties. That question was said to have an important practical impact as there were more than 2,500 investment treaties in force to date,<sup>8</sup> but less than 10 treaties had been concluded in 2010.

86. Many delegations expressed the view that it would be desirable for rules on transparency also to apply to existing investment treaties. Such application was viewed as furthering the mandate by the Commission to enhance transparency in treaty-based investor-State arbitration. However, it was questioned whether such application was practically feasible, for example, due to the wide variety of treaty

---

<sup>8</sup> For an online compilation of all investment treaties, see the database of the United Nations Conference on Trade and Development (UNCTAD), available on 28 July 2010 at [www.unctadxi.org/templates/Startpage\\_718.aspx](http://www.unctadxi.org/templates/Startpage_718.aspx).

provisions referring to arbitration under the UNCITRAL Arbitration Rules, and could be achieved through any instrument prepared by the Working Group and adopted by the Commission.

87. The attention of the Working Group was drawn on the impact of article 1 (2) of the UNCITRAL Arbitration Rules, as revised in 2010, which provided that: “The parties to an arbitration agreement concluded after 15 August 2010 shall be presumed to have referred to the Rules in effect on the date of commencement of the arbitration, unless the parties have agreed to apply a particular version of the Rules. That presumption does not apply where the arbitration agreement has been concluded by accepting after 15 August 2010 an offer made before that date.” Further, it was recalled that the 1976 version of the Rules did not contain any presumption that the Rules would be subject to amendments.

88. The Working Group discussed various possible means to achieve certainty as to the application of rules on transparency to existing investment treaties. It was suggested that application of rules on transparency to already existing investment treaties should not imply any retroactive application of those standards.

89. It was said that the consent in the investment treaty of the State parties to investor-State arbitration under the UNCITRAL Arbitration Rules could be interpreted as consent to a system of arbitration that would develop over time. Under that view, rules on transparency would automatically apply, as they would be part of that evolving system of UNCITRAL arbitration. Under another view, it was uncertain whether it could be derived from a mere reference to the UNCITRAL Arbitration Rules in investment treaties that parties agreed automatically to be bound by any amendments thereto. It was further said that automatic application of rules on transparency to existing investment treaties referring to the UNCITRAL Arbitration Rules would be impossible, unless there were joint declarations by the State parties pursuant to article 31 of the Vienna Convention on the Law of Treaties (1969). In that regard, it was also noted that the UNCITRAL Arbitration Rules did not contain any reference to an annex or any instrument that should be read together with them.

90. The Working Group explored the question of the form that an express consent by States would take. Procedures for amendments to existing investment treaties were said to be burdensome and time-consuming.

91. It was said that UNCITRAL’s mandate included preparing or promoting the adoption of new international conventions, model laws and uniform laws,<sup>9</sup> but that UNCITRAL had no authority to create by itself legislative obligations for States without their consent. Consequently, it was said that the only possibility for the Working Group to enhance transparency in treaty-based investor-State arbitration was to formulate provisions and to encourage States to use them.

92. The view was expressed that if a legal standard on transparency would take the form of a non-binding instrument, such as guidelines, the question of applicability would not arise. The Working Group felt that it might be premature to take a firm decision on the form of the legal standard to be prepared at that stage of the discussion.

---

<sup>9</sup> See General Assembly resolution 2205 (XXI), sect. II, para. 8.

93. With a view to enhancing certainty as to the applicability of the rules on transparency with respect to existing treaties, various suggestions were made, including unilateral declarations by Governments, a joint interpretation by Governments, an instrument open to signature or ratification whereby States could express consent or agree to apply the transparency rules under existing treaties. It was further said that, though unilateral declarations were possible, joint declarations would be preferable to ensure equal treatment and would correspond to existing treaty practice. The legal value of interpretative instruments was said to be limited.

94. The Working Group agreed that all suggestions would require further legal analysis, and that that matter should be further discussed at a future session.

## **2. At the level of the relation between the host State and the investor**

95. As for the second level of consent (investor-State level), it was noted that a policy decision should be made as to whether an investor would be bound by an offer by a State to arbitrate under the UNCITRAL Arbitration Rules, including the rules on transparency, or whether the investor would have discretion to refuse the offer of transparent arbitration.

96. It was said that in arbitral practice, it was possible to negotiate the applicable arbitration rules. However, it was widely felt that providing the investor with the last word on the application of the rules on transparency would unduly privilege the investor and lead to a decrease of transparency. It was said that such approach would be contrary to the Commission's mandate to enhance transparency in treaty-based investor-State arbitration. It was further pointed out that, in contrast to commercial arbitration, treaty-based investor-State arbitration was conducted on the basis of an underlying treaty between State parties, which limited the ability of the investor to depart from offers made by the host State. However, it was said that, for the purpose of ensuring the equality of parties in treaty-based investor-State arbitration, it might be advisable to provide the right for an investor to react to the host State's offer of transparent arbitration.

97. A question arose as to the extent to which the disputing parties should be allowed to depart from certain provisions of the rules on transparency, and whether they could legally be prevented from doing so. The view was expressed that the underlying treaty between State parties would prevent one State party and the investor to depart from the transparency rules. A contrary view expressed was that the disputing parties could, as a matter of law, always amend their arbitration agreements (including the reference to the transparency rules contained therein) and that it was accordingly not possible to entrench non-derogable provisions in the transparency rules. Another view expressed was that the decision on departure from the rules on transparency should be formally made by the arbitral tribunal upon the request of the parties. In response, it was said that such approach would place the arbitral tribunal in a delicate position at an early stage of the proceedings.

98. It was suggested to make certain provisions of the rules on transparency non-derogable, for example, by omitting from the transparency rules any right for the parties to amend the transparency rules by subsequent agreement, such as that contained in article 1 (1) of the UNCITRAL Arbitration Rules. In support of that suggestion, it was said that also the UNCITRAL Arbitration Rules themselves

contained non-derogable provisions. It was suggested to specify for each provision of the rules on transparency, which ones would be derogable, bearing in mind the fact that given rules might be said to confer rights on third parties.

99. The view was reiterated that those difficulties could be avoided by preparing non-binding recommendations or guidelines.

100. The Working Group agreed that all those suggestions would require further legal analysis, and that those matters should be further discussed at a future session.

## **V. Other business**

### **A. Preparation of the next session of the Working Group**

101. The Working Group requested the Secretariat to prepare for its next session working papers that would set out an analysis of the matters on form and substance discussed at its current session, including examples of provisions on transparency in treaty-based investor-State arbitration. The Working Group further requested the Secretariat to prepare, to the extent feasible and advisable, model provisions for discussion. Delegations were encouraged to provide information, including written contributions or proposals, they would deem relevant to the Secretariat on the matters discussed at the current session.

### **B. Matters for consideration by the Commission as possible work in the field of treaty-based investor-State arbitration**

102. In accordance with the decision of the Commission at its forty-third session (see above, para. 3), the Working Group proceeded on a discussion to identify other topics which arose more generally in treaty-based investor-State arbitration that would deserve additional work and thus might be brought to the attention of the Commission at a future session.

103. It was suggested to bring to the attention of the Commission at a future session the topic of the possible intervention of a non-disputing State party referred to in paragraph 49 above. After discussion, the Working Group agreed to seek guidance from the Commission on whether that topic could be dealt with by the Working Group in the context of its current work. Another suggestion was made regarding the matter of impartiality and independence of arbitrators. There was no support to report that topic to the Commission.

**B. Note by the Secretariat on settlement of commercial disputes: Transparency in treaty-based investor-State arbitration — Compilation of comments by Governments, submitted to the Working Group on Arbitration and Conciliation at its fifty-third session**

## **I. Introduction**

1. At its forty-first session (New York, 16 June-3 July 2008), the Commission agreed that the topic of transparency in treaty-based investor-State arbitration was worthy of future consideration and should be dealt with by Working Group II (Arbitration and Conciliation) as a matter of priority immediately after completion of the current revision of the UNCITRAL Arbitration Rules. As to the scope of such future work, the Commission agreed by consensus on the importance of ensuring transparency in investor-State dispute resolution. The Commission was of the view that, as noted by the Working Group at its forty-eighth session (A/CN.9/646, para. 57), the issue of transparency as a desirable objective in investor-State arbitration should be addressed by future work. As to the form that any future work product might take, the Commission noted that various possibilities had been envisaged by the Working Group (*ibid.*, para. 69) in the field of treaty-based arbitration, including the preparation of instruments such as model clauses, specific rules or guidelines, an annex to the UNCITRAL Arbitration Rules in their generic form, separate arbitration rules or optional clauses for adoption in specific treaties. The Commission decided that it was too early to make a decision on the form of a future instrument on treaty-based arbitration and that broad discretion should be left

to the Working Group in that respect. With a view to facilitating consideration of the issues of transparency in treaty-based arbitration by the Working Group at a future session, the Commission requested the Secretariat, resources permitting, to undertake preliminary research and compile information regarding current practices. The Commission urged member States to contribute broad information to the Secretariat regarding their practices with respect to transparency in investor-State arbitration.<sup>1</sup>

2. At its forty-third session (New York, 21 June–9 July 2010), with respect to future work in the field of settlement of commercial disputes, the Commission entrusted the Working Group with the task of preparing a legal standard on the topic of transparency in treaty-based investor-State arbitration. The Commission was informed that, pursuant to the request received from the Commission at the forty-first session, the Secretariat had circulated a questionnaire to States with regard to their practice on transparency in investor-State arbitration and that replies thereto would be made available to the Working Group. The questionnaire as circulated to States is reproduced in part II of this note. The present document and its addenda contain in part III replies received by the Secretariat from States.<sup>2</sup>

## II. Questionnaire

### A. Questions regarding current practices with respect to transparency in treaty-based investor-State arbitration

- (1) Could you provide examples of treaty-based investor-State arbitration cases in your country involving instances of publicity or transparency of the arbitral proceedings (for example, cases where information regarding the existence of the arbitral proceedings would be made publicly available, or where the possibility would exist for the public or specific interest groups to obtain access to documents used in the arbitral proceedings, or to be present at hearings)?
- (2) Are there any examples in your country of cases where third parties have presented statements in the course of treaty-based investment arbitration (such as *amicus curiae* briefs) or have otherwise intervened in the proceedings?
- (3) Is there any provision concerning transparency or publicity regarding treaty-based investment arbitration in bilateral or multilateral treaties or agreements entered into by your country? If so, could you please provide us with the texts of such treaties or agreements, or any information relating thereto?
- (4) Is there any provision for third parties to become involved in treaty-based investment arbitration in bilateral or multilateral treaties or agreements entered into by your country? If so, could you please provide us with the texts of such treaties or agreements, or any information relating thereto?

---

<sup>1</sup> *Official Records of the General Assembly, Sixty-third Session, Supplement No. 17 (A/63/17)*, para. 314.

<sup>2</sup> Report of the Commission on the work of its forty-third session (in preparation).

- (5) Do you have any comments regarding current practices with respect to publicity or transparency in treaty-based investor-State arbitration involving your country?

## **B. Reference to the questionnaire**

3. In the remainder of this note and in the addenda, the above questions are referred as follows:

Question 1: Examples of publicity or transparency of arbitral proceedings; Access to documents or hearings

Question 2: Amicus curiae briefs or other interventions

Question 3: Provision in treaties on transparency or publicity

Question 4: Provision in treaties on third parties' involvement

Question 5: Any other comment

## **III. Comments received from Governments on transparency in treaty-based investor-State arbitration**

### **1. Algeria**

[Original: French]

Question 1: Examples of publicity or transparency of arbitral proceedings; Access to documents or hearings

The answer to this question lies with the Algerian Chamber of Commerce and Industry. Article 6 of Executive Decree No. 64-96 of 3 March 1996, establishing the Statute of the Algerian Chamber of Commerce and Industry, states that the Chamber may establish a conciliation and arbitration committee at the request of contracting parties for the settlement of their commercial disputes. In this regard, the Algerian Chamber of Commerce and Industry may engage in arbitration at both the national and the international level.

Question 2: Amicus curiae briefs or other interventions

There is no provision in bilateral agreements for intervention by third parties in arbitral proceedings between States and investors. Algeria has thus not mentioned or referred to such a procedure in the bilateral or multilateral agreements that it has concluded, nor in settlement mechanisms or processes. This position applies also to dispute settlement mechanisms in order to ensure that the State is not forced to deal with multiple parties in the same case.

Question 3: Provision in treaties on transparency or publicity

Bilateral investment protection treaties concluded by Algeria contain a provision referring in a general way to transparency. The provision requires the contracting parties to ensure that investors are provided with any legislation, regulations, procedures, administrative decisions and international

conventions that may benefit any of the investors or any of the contracting parties in the territory of the other party.

Algeria model agreements on the promotion and protection of investments do not, however, spell out these stages of arbitration. They simply mention the arbitration regime concerned — the International Centre for Settlement of Investment Disputes (ICSID), the United Nations Commission on International Trade Law (UNCITRAL) or the International Chamber of Commerce (ICC) — but do not go into detail as to the procedures to be followed.

**Question 4: Provision in treaties on third parties' involvement**

The reply to this question is the same as that given for question 2.

**Question 5: Any other comment**

With regard to publicizing arbitral decisions, they are generally available on the websites of the arbitration bodies mentioned above. As for the conduct of arbitral hearings, only the advisers representing the parties to the conflict can comment on their transparency, in view of the fact that the hearings are not open to the public.

## **2. Argentina**

[Original: Spanish]

**Question 1: Examples of publicity or transparency of arbitral proceedings; Access to documents or hearings**

The bilateral treaties on the promotion and reciprocal protection of investments to which the Argentine Republic is a party generally contain — with regard to the settlement of disputes — an option whereby the investor may have recourse to (1) local courts, (2) the jurisdiction of the International Centre for Settlement of Investment Disputes (ICSID) and (3) arbitration under the UNCITRAL Rules.

Most investors have opted for the jurisdiction of ICSID. Pursuant to the ICSID Convention, the arbitration rules of ICSID and the practices developed by ICSID officials, after a dispute has been registered ICSID makes known, on its website and in its written publications, the existence of the dispute, the parties involved, the number of the arbitration case and the composition of the arbitral tribunal. Recently, it has begun publishing also certain procedural provisions and its decisions relating to jurisdiction and to the merits of the dispute, thereby ensuring transparency with regard to (1) the existence of the dispute and (2) the publication of decisions on matters of jurisdiction and merits. An example of such publications can be found on the website <http://icsid.worldbank.org/ICSID>.

As regards the latter, even before the revision of the arbitration rules that entered into force on 10 April 2006, ICSID used to request from both parties to a dispute their agreement to publication of its decision. Following the aforementioned revision, when the parties do not agree to publication of the decision, ICSID shall then publish a summary of the legal arguments contained in the decision.

Question 2: Amicus curiae briefs or other interventions

Two arbitration cases involving the Argentine Republic are essential links in the evolution of amicus curiae participation in arbitration proceedings. In both cases, Argentina supported the participation of the amici. The cases are AASA, Suez, Aguas de Barcelona y Vivendi v. Argentine Republic, ICSID case No. ARB/3/19 and APSF, Suez, Aguas de Barcelona e Interagua v. Argentine Republic, ICSID case No. ARB/3/17.

In the case APSF, Suez, Aguas de Barcelona e Interagua v. Argentine Republic, ICSID case No. ARB/3/17, the arbitration tribunal rejected participation of the amici.

In the case AASA, Suez, Aguas de Barcelona y Vivendi v. Argentine Republic, ICSID case No. ARB/3/19, the arbitration tribunal allowed the participation of third parties, although it limited such participation to the presentation of documents setting forth the position of the amicus. The tribunal ruled out the possibility of the third party having access to the documents of the dispute and/or participating in the hearings of the case. Also, it established a number of procedural requirements that are now reflected in Rule 37 of ICSID's arbitration rules of 2006.

This was the first case where — despite the gap in the law that existed at the time when the request for amici participation was submitted — an arbitration tribunal agreed to the participation of third parties in ICSID proceedings. As indicated earlier, this case permitted the participation of third parties and preceded a revision of ICSID's procedural rules.

Question 3: Provision in treaties on transparency or publicity

There are no specific provisions regarding transparency in the bilateral treaties entered into by the Argentine Republic.

Question 4: Provision in treaties on third parties' involvement

There are no specific provisions regarding the participation of third parties in arbitration proceedings relating to investments in the bilateral treaties entered into by the Argentine Republic.

Question 5: Any other comment

In the Argentine Republic, there are no particular rules about transparency and publication in investor-State arbitration cases. By Decree No. 1172/2003, however, the Executive has provided for the fullest possible public access to governmental papers through clear, specific mechanisms such as: public hearings involving the Executive (Art. 1); publicity with regard to the representation of interests (Art. 2); the participatory elaboration of rules (Art. 3); access to public information regarding organizations, entities, enterprises, companies, departments and any other body operating under the jurisdiction of the Executive, and also private organizations that are receiving subsidies or other financial support from the public sector, foundations or other institutions for whose administration, maintenance or preservation the State (through its judicial authorities or other entities) is responsible and private enterprises to which has been granted — by permit, licence or

concession or in some other contractual form — the right to provide a public service or exploit some property in the public domain (Art. 4).

In all cases, brief formalities have to be completed before public hearings are arranged or access is granted to governmental papers. The only exceptions as regards access are those specifically stated in the Decree, which are limited — *inter alia* — to information expressly classified as confidential, especially information relating to security, defence or foreign policy, information that could jeopardize the correct functioning of the financial or banking system, information that compromises the legitimate rights of a third party and was obtained through confidential sources, data protected by professional secrecy or that would endanger the life or safety of a person, etc.

In addition, the same Decree provides for access free of charge to the daily edition of all sections of the Official Gazette of the Argentine Republic. Lastly, it provides for the repeal of all rules running counter to the directives arising out of it.

For their part, all official organizations have announced measures for adapting their structures in order to ensure free access to public information in accordance with the Decree.

### 3. Armenia

[Original: English]

Question 1: Examples of publicity or transparency of arbitral proceedings; Access to documents or hearings

The public was informed about arbitral proceedings by mass media. There is no example of treaty-based investor-State cases where it was possible for the public or specific interest groups to obtain access to documents used in the arbitral proceedings, or to be present at hearings.

Question 2: Amicus curiae briefs or other interventions

No.

Question 3: Provision in treaties on transparency or publicity

No.

Question 4: Provision in treaties on third parties' involvement

No.

Question 5: Any other comment

No.

### 4. Australia

[Original: English]

Question 1: Examples of publicity or transparency of arbitral proceedings; Access to documents or hearings

Australia has not been a party to an investor-State arbitration.

Question 2: Amicus curiae briefs or other interventions

Australia has not been a party to an investor-State arbitration.

Question 3: Provision in treaties on transparency or publicity

The Chile-Australia FTA contains investor-State dispute settlement provisions (“ISDS”), which provide for a significant degree of transparency in investor-State arbitration (see article 10.22). The Chile-Australia FTA has been signed by the parties but has not yet entered into force. The text of the Chile FTA is publicly available through the website of the Department of Foreign Affairs and Trade: [http://www.dfat.gov.au/geo/chile/fta/FTA\\_Text\\_10.html](http://www.dfat.gov.au/geo/chile/fta/FTA_Text_10.html).<sup>3</sup>

Question 4: Provision in treaties on third parties’ involvement

The ISDS provisions in the Chile-Australia FTA allow the arbitral tribunal to accept written submissions from third parties that may assist the tribunal in evaluating the submissions and arguments of the disputing parties (see article 10.20.2).

Question 5: Any other comment

Australia supports transparency in treaty-based investor-State arbitration and welcomes the Commission's decision to undertake work on the issue as a matter of priority immediately after completion of the current revision of the UNCITRAL Arbitration Rules.

## 5. Bahrain

[Original: English]

Question 1: Examples of publicity or transparency of arbitral proceedings; Access to documents or hearings

Bahrain has to date had no treaty-based investor-State arbitration cases involving instances of publicity or transparency of the arbitral proceedings.

Question 2: Amicus curiae briefs or other interventions

There are no examples of cases in Bahrain where third parties have presented statements in the course of treaty-based investment arbitration or have otherwise intervened in the proceedings.

Question 3: Provision in treaties on transparency or publicity

There is no provision concerning transparency or publicity regarding treaty-based investment arbitration in bilateral or multilateral treaties or agreements entered into by Bahrain.

Question 4: Provision in treaties on third parties’ involvement

There is no provision for third parties to become involved in treaty-based investment arbitration in bilateral or multilateral treaties or agreements entered into by Bahrain.

<sup>3</sup> Note by the Secretariat: A copy of the Chile-Australia Free Trade Agreement was attached to the reply by the Government of Australia. Relevant excerpts can be found in part II of document A/CN.9/WG.II/WP.160 and its addendum.

## Question 5: Any other comment

Bahrain is a party to a number of important bilateral investment treaties which are expressions of national economic policy to encourage international investment. These treaties are negotiated carefully, one by one, in light of the nature and development of our relations with individual States. Some of them open the possibility of arbitration under the UNCITRAL Rules.

Bahrain also pursues a strong policy of promoting international commercial arbitration, and the UNCITRAL Rules in particular.

If the UNCITRAL Rules were to incorporate provisions concerning transparency, publicity, and third party interventions, or to include them in a generic annex, this would be a departure from the nature of the Rules, which have never purported to establish matters of national policy. This would be prejudicial both to Bahrain's treaty practice and to our policy of promoting UNCITRAL arbitration arising generally from contracts:

(A) Our bilateral treaties are negotiated individually with regard to relations with individual States. If the UNCITRAL Rules contained provisions on such sensitive matters, Bahrain would be unlikely to refer to them. It would regret the loss of that valuable option.

(B) Contract-based arbitrations may also involve investor-State relations and indeed treaty-based arbitrations often involve contracts. This raises definitional issues of some complexity before one can even determine the scope of any proposed rules, depending on how individual States have chosen to organize the public sector. If the UNCITRAL Rules were to depart from their established framework and purport to legislate such a definition for worldwide use, the consequences would be:

- (i) possible conflict with national law,
- (ii) unpredictability, and
- (iii) a regrettable disinclination to refer to the UNCITRAL Rules.

Accordingly, in order to prevent the gradual irrelevance and desuetude of the UNCITRAL Rules, Bahrain would resist any attempt to incorporate transparency provisions into the UNCITRAL Rules, or in a generic annex to them, but would welcome the opportunity (but only after the new Rules have been finally adopted) to consider model clauses for possible use in individual instruments.

## 6. Belarus

[Original: Russian]

Courts of arbitration in the Republic of Belarus have heard no investor-State arbitration cases, whether arising out of an investment agreement (article 45 of the Investment Code) or a concession agreement (article 50 of the Investment Code) or having some other basis.

It may, however, be noted that disputes involving foreign investors, which are heard in accordance with the procedure laid down in international agreements and national legislation, generally relate to cases arising out of normal economic investment

activity under actions brought against supervisory bodies or against persons engaged in commercial activity.

In bilateral international investment protection agreements, the parties generally agree to settle disputes by conciliation or arbitration through the International Centre for Settlement of Investment Disputes, in accordance with the 1965 Convention on the Settlement of Investment Disputes between States and Nationals of Other States. Under international treaties, such disputes may be referred to any arbitration tribunal, including ad hoc tribunals set up to deal with a specific dispute. This is the position as regards agreements with Austria, the United Kingdom, Latvia, the Republic of Korea, Israel, Finland, Viet Nam, the United States, Turkey, Romania and other countries. Other arbitration centres may also be designated as having jurisdiction. Thus the agreement with Turkey designates the Court of Arbitration of the International Chamber of Commerce (ICC) as also having jurisdiction in investment disputes. In addition, where disputes arise, the parties may engage in the conciliation procedure laid down in the UNCITRAL Arbitration Rules or the ICC Rules of Arbitration.

An investment dispute may be heard in a commercial court in Belarus on the basis of an action by an investor who prefers such a court to an international arbitration body.

With regard to the procedural rules governing the procedure for hearings in arbitration and commercial courts in Belarus involving investment and other disputes, it should be noted that the legal procedure is based on the principles of openness and transparency. The legal rules governing the activities of foreign investors are freely available, while bilateral international treaties on investment protection containing provisions on the arbitral settlement of investor-State disputes are published as official documents and are available to interested parties.

## (A/CN.9/WG.II/WP.159/Add.1) (Original: Chinese/English/French)

**Note by the Secretariat on settlement of commercial disputes:  
Transparency in treaty-based investor-State arbitration — Compilation of  
comments by Governments, submitted to the Working Group on Arbitration and  
Conciliation at its fifty-third session**

**ADDENDUM****CONTENTS***Chapter*

- III. Comments received from Governments on transparency in treaty-based investor-State arbitration . . . . .
1. Canada . . . . .
  2. China . . . . .
  3. Czech Republic . . . . .
  4. Denmark . . . . .

**III. Comments received from Governments on transparency  
in treaty-based investor-State arbitration**

**1. Canada**

[Original: English/French]

1. All of the documents referred to in Canada's response below are publicly available on the Internet.<sup>1</sup>

Question 1: Examples of publicity or transparency of arbitral proceedings; Access to documents or hearings

2. Canada is committed to ensuring that any treaty-based investor-State arbitration in which it is involved is as transparent and open to the public as possible. As it clearly expressed in its Statement on Open Hearings in NAFTA Chapter Eleven Arbitrations in October 2003, Canada makes every effort to ensure "that hearings in Chapter Eleven disputes [are] open to the public, except [as needed] to ensure the protection of confidential information, including business confidential information."

3. As such, in all of the cases in which it is a party, whether under the UNCITRAL Arbitration Rules, or the ICSID Additional Facility Rules,<sup>2</sup>

<sup>1</sup> Note by the Secretariat: A "Book of Documents" containing documents referred to by the Government of Canada in its reply was attached to the comments received from the Government of Canada. Relevant excerpts can be found in part II of document A/CN.9/WG.II/WP.160 and its addendum.

<sup>2</sup> The investor-State dispute settlement provisions in Canada's investment treaties also typically provide for the submission of disputes pursuant to the ICSID Convention, provided that both the

Canada strives to ensure (a) that the public is given notice of the existence of the arbitration; (b) that documents submitted to the tribunal or issued by it are publicly available; (c) that hearings are open to the public; and (d) that confidential or privileged information is adequately protected.

4. In total, 10 investor-State arbitrations have been submitted against Canada pursuant to Chapter 11 of NAFTA. Four of those arbitrations have been concluded<sup>3</sup> and the remaining six are currently pending at various stages.<sup>4</sup> Canada has also received an additional 14 Notices of Intent to Submit a Claim to Arbitration pursuant to Chapter 11 of NAFTA. Seven of those are inactive or have been formally withdrawn.<sup>5</sup> In the remaining seven, the investor has yet to submit a Notice of Arbitration.<sup>6</sup>

5. Since approximately 2000, Canada has provided public notice of the existence of all of the above matters via the website of the Department of Foreign Affairs and International Trade.<sup>7</sup> This website contains a page listing all of the above matters and providing a link (titled “Archive of Legal Documents”) to relevant documents and information for each case.

6. The specific documents which Canada is permitted to publish on its website vary pursuant to each Tribunal’s Procedural Orders. In the earlier arbitrations brought against Canada pursuant to NAFTA, such as *Ethyl Corporation* (1997), *S.D. Myers* (1998), and *Pope and Talbot* (1999), the Tribunals permitted, subject to the protection of confidential information, the publication of the constitutive pleadings, including the Notice of Intent, Notice of Arbitration, Statement of Claim and Statement of Defence, as well as any decisions or awards of the Tribunal. In addition, in *Pope and Talbot*, following the submissions on damages, the Tribunal issued a revised order reflecting amendments agreed by the parties, which permitted the publication of the

---

State in the dispute and the State of the investor are party to the ICSID Convention. At this time, Canada has signed but not yet ratified the ICSID Convention.

<sup>3</sup> *Ethyl Corporation v. Government of Canada*; *Pope & Talbot Inc. v. Government of Canada*; *S.D. Myers Inc. v. Government of Canada*; and *United Parcel Service of America, Inc. (UPS) v. Government of Canada*.

<sup>7</sup> See [www.international.gc.ca/trade-agreements-accords-commerciaux/disp-diff/gov.aspx?lang=en](http://www.international.gc.ca/trade-agreements-accords-commerciaux/disp-diff/gov.aspx?lang=en). Canada has yet to have an arbitration brought against it pursuant to any other of its investment treaties, but should such an arbitration be brought, it would likely publish relevant information and documents, to the extent permitted, on a similar website.

written and oral submissions of the parties and all the evidence submitted by the parties.

7. In UPS, the most recent NAFTA arbitration concluded against Canada, the Tribunal, in an April 2003 Procedural Order, permitted the public disclosure by either disputing party of the

[p]leadings and submissions of any disputing party or NAFTA Party, together with their appendices and attached exhibits, including the notice of intent, notice of arbitration, amended statement of claim, statement of defence, memorials, affidavits, responses to tribunal questions, transcripts of public hearings, correspondence to or from the Tribunal, and any awards, including procedural orders, rulings, preliminary and final awards.

In order to ensure adequate protection of confidential information, each party was given the opportunity to designate information as confidential or restricted and to produce a public version of the submission with that information redacted.

8. Subsequent to the UPS Order, NAFTA Tribunals have continued to further open investor-State arbitrations to the public. In Chemtura, the Tribunal followed the approach of UPS and ordered that either party could publicly disclose any pleadings or submissions to the Tribunal, together with any appendices thereto, all correspondence to or from the Tribunal, transcripts of public hearings, and any awards including orders, rulings and preliminary and final awards. In Merrill & Ring Forestry L.P., the Tribunal ordered, in addition to the above, that hearings be open to the public unless necessary to protect confidential business information. Similarly, in V.G. Gallo, the Tribunal left open the possibility of the disclosure of hearing transcripts despite the fact that the investor elected to proceed under the UNCITRAL Rules, and elected to have in camera hearings. In all of these cases, the Tribunal ensured that confidential information was protected by requiring that each party file a public version of all of its submissions with all information claimed to be confidential redacted.

9. Canada's experience over the past decade of NAFTA arbitrations is clear evidence that public and transparent investor-State arbitration proceedings are possible without delaying the proceedings, unduly burdening the parties or the process, or imposing excessive costs on the parties. Further, Canada's experience shows that transparency in treaty-based investor-State arbitration can be achieved without creating a danger that confidential business information will be disclosed. Indeed, Tribunals have become increasingly adept at ensuring that proceedings are transparent while at the same time ensuring that this transparency does not interfere with an orderly proceeding or jeopardize confidential or privileged information.

#### Question 2: Amicus curiae briefs or other interventions

10. In two arbitrations brought against Canada pursuant to Chapter 11 of NAFTA, amicus curiae submissions by public interest organizations have been submitted to the Tribunal.

11. In UPS, the Canadian Union of Postal Workers and the Council of Canadians, and subsequently the US Chamber of Commerce, petitioned the Tribunal for the right to participate in the arbitration, either as parties or as *amicus curiae*. The Tribunal decided that it had the power to accept *amicus curiae* submissions, but would do so only to the extent that it would not be unduly burdensome for the parties and would not unnecessarily complicate matters. In particular, the Tribunal explained that *amicus curiae* briefs were to provide assistance beyond that provided by the disputing parties and that they were to relate only to issues already raised by the disputing parties. Further, the Tribunal placed a number of important limits on the participation of *amicus curiae*, including that they could make only written submissions of not more than 20 pages in length, they could not call witness, and their submissions could only concern the merits of the dispute.

12. Subsequent to the decisions of the Tribunal in UPS described above, the NAFTA Free Trade Commission (the “FTC”), the body charged with interpretation of NAFTA, issued a Statement on Non-Disputing Party participation. That Statement provided guidelines for Tribunal’s considering *amicus curiae* briefs in Chapter 11 arbitrations similar to those established in UPS: submissions are to be written, no longer than 20 pages and concern issues within the scope of the arbitration.

13. In Merrill & Ring Forestry, the Communication, Energy and Paperworkers Union of Canada, the United Steelworkers and the British Columbia Federation of Labour all filed petitions to submit *amicus curiae* briefs. The Tribunal expressly noted its discretion to accept *amicus curiae* submissions and requested that the petitioners file a formal application, along with their submission, in the form required by the 2003 Statement of the Free Trade Commission on Non-Disputing Party Participation. Petitioners filed their application and *amicus curiae* submissions on September 26, 2008. The Tribunal is currently considering the request.

14. Canada’s experience with *amicus curiae* submissions establishes that public participation in treaty-based investor-State arbitration can be effectively managed by a Tribunal to ensure that it benefits rather than burdens the process.

15. It should also be noted that, in addition to the ability of third parties to participate as *amicus curiae*, Article 1128 of NAFTA (and similar provisions in Canada’s other investment treaties) expressly permits the non-disputing States to make submissions on matters of treaty interpretation. As such submissions are expressly contemplated by treaty, they are not *amicus curiae* submissions. Such submissions are, however, common. In each of the Chapter 11 arbitrations to which Canada has been a party, there has been at least one such submission by either the United States or Mexico.

#### Question 3: Provision in treaties on transparency or publicity

16. Canada’s Foreign Investment Promotion and Protection Agreements (FIPAs) and Free Trade Agreements (FTAs) contain provisions protecting and promoting investment. Over time, these treaties have included increasingly explicit provisions concerning the transparency of treaty-based investor-State arbitration.

17. Canada now has in force 23 FIPAs. In 2003 and 2004, Canada revised its FIPA model to update and modernize it with the goal of, in particular, bringing it into line with Canada's experience in treaty-based investor-State arbitration.

18. With respect to dispute settlement, the model was revised to promote transparency. Article 38 of the updated model requires that all documents submitted to or issued by the Tribunal, including hearing transcripts, be made public subject to redaction for confidential, privileged or third party business information. Further, all hearings are to be open to the public, subject only to closure when necessary to protect confidential business, privileged or third party information.

19. Specifically, Canada's FIPA model, Article 38: Public Access to Hearings and Documents, provides:

1. Hearings held under this Section shall be open to the public. To the extent necessary to ensure the protection of confidential information, including business confidential information, the Tribunal may hold portions of hearings in camera.
2. The Tribunal shall establish procedures for the protection of confidential information and appropriate logistical arrangements for open hearings, in consultation with the disputing parties.
3. All documents submitted to, or issued by, the Tribunal shall be publicly available, unless the disputing parties otherwise agree, subject to the deletion of confidential information.
4. Notwithstanding paragraph 3, any Tribunal award under this Section shall be publicly available, subject to the deletion of confidential information.
5. A disputing party may disclose to other persons in connection with the arbitral proceedings such unredacted documents as it considers necessary for the preparation of its case, but it shall ensure that those persons protect the confidential information in such documents.
6. The Parties may share with officials of their respective federal and sub-national governments all relevant unredacted documents in the course of dispute settlement under this Agreement, but they shall ensure that those persons protect any confidential information in such documents.
7. As provided under Article 10 (4) and (5), the Tribunal shall not require a Party to furnish or allow access to information the disclosure of which would impede law enforcement or would be contrary to the Party's law protecting Cabinet confidences, personal privacy or the financial affairs and accounts of individual customers of financial institutions, or which it determines to be contrary to its essential security.
8. To the extent that a Tribunal's confidentiality order designates information as confidential and a Party's law on access to information requires public access to that information, the Party's law on access to information shall prevail. However, a Party should endeavour to apply its

law on access to information so as to protect information designated confidential by the Tribunal.

20. Canada's updated FIPA model was used for the FIPA signed with Peru in 2007, and is the basis for Canada's position in all of its FIPA negotiations initiated since 2003. Currently, Canada is involved in the negotiation of 7 FIPAs,<sup>8</sup> with 2 additional negotiations having just concluded.<sup>9</sup>

21. In addition to its FIPAs, Canada has four FTAs in force.<sup>10</sup> In 2008, it signed three more.<sup>11</sup> Of those FTAs, NAFTA, which came into force nearly 15 years ago, is the oldest agreement. Chapter 11 of NAFTA provides for the settlement of investor-State disputes by arbitration. Article 1127 of NAFTA requires that the non-disputing NAFTA Parties receive notice of any arbitration and that they receive copies of all pleadings. Further, Article 1129 provides that the non-disputing NAFTA parties also have the right to receive all of the evidence tendered to the Tribunal as well as the written arguments of the disputing parties.

22. NAFTA also contains additional provisions providing for further publicity. Annex 1137.4 provides that "either Canada or a disputing investor that is a party to the arbitration may make an award public." Moreover, in 2001, the FTC released binding Notes of Interpretation which affirmed the commitment of the NAFTA governments to the principle of transparency generally and created a presumption of public disclosure and openness. In 2003, Canada and the United States both issued Statements supporting open hearings in NAFTA Arbitration. In 2004, the FTC again affirmed the NAFTA parties' commitment to transparency and welcomed Mexico's support of open hearings.

23. The above-described NAFTA approach towards transparency in investor-State arbitration was followed, including the Notes of Interpretation, in Canada's FTA with Chile, in force as of July 5, 1997.

24. In Canada's more recent FTAs, the model language of the FIPA has been used as the basis for negotiations concerning transparency in investor-State arbitration. For example, in the Investment chapter of the FTA with Peru, signed earlier this year, on May 29, 2008, Article 835: Public Access to Hearings and Documents, provides:

1. Hearings held under this Section shall be open to the public. To the extent necessary to ensure the protection of confidential information, the Tribunal may hold portions of hearings in camera.
2. The Tribunal shall establish procedures for the protection of confidential information and appropriate logistical arrangements for open hearings, in consultation with the disputing parties.

---

<sup>8</sup> United Republic of Tanzania, Indonesia, Madagascar, Viet Nam, Mongolia, China and Kuwait.

<sup>9</sup> India and Jordan.

<sup>10</sup> United States of America/Mexico (NAFTA), Costa Rica, Chile and Israel.

<sup>11</sup> Colombia, Peru, the European Free Trade Association.

3. All documents submitted to, or issued by, the Tribunal shall be publicly available, unless the disputing parties otherwise agree, subject to the deletion of confidential information.
  4. Notwithstanding paragraph 3, any Tribunal award under this Section shall be publicly available, subject to the deletion of confidential information.
  5. A disputing party may disclose to other persons in connection with the arbitral proceedings such unredacted documents as it considers necessary for the preparation of its case, but it shall ensure that those persons protect the confidential information in such documents.
  6. The Parties may share with officials of their respective national and sub-national governments all relevant unredacted documents in the course of dispute settlement under this Agreement, but they shall ensure that those persons protect any confidential information in such documents.
  7. As provided under Article 2202 (Exceptions — National Security) and Article 2204 (Exceptions — Disclosure of Information), the Tribunal shall not require a Party to furnish or allow access to information the disclosure of which would impede law enforcement or would be contrary to the Party's law protecting the deliberative and policy-making processes of the executive branch of government at the cabinet level, personal privacy or the financial affairs and accounts of individual customers of financial institutions, or which it determines to be contrary to its essential security.
  8. To the extent that a Tribunal's confidentiality order designates information as confidential and a Party's law on access to information requires public access to that information, the Party's law on access to information shall prevail. However, a Party should endeavour to apply its law on access to information so as to protect information designated confidential by the Tribunal.
25. Similarly, the Investment chapter of the FTA Canada signed with Colombia just over one month ago, on November 21, 2008, provides in Article 830: Public Access to Hearings and Documents that:
1. Any Tribunal award under this Section shall be publicly available, subject to the deletion of confidential information. All other documents submitted to, or issued by, the Tribunal shall be publicly available, unless the disputing parties otherwise agree, subject to the deletion of confidential information. A disputing party providing information that it claims is confidential has the burden of designating it as confidential.
  2. Hearings held under this Section shall be open to the public. The Tribunal may hold portions of hearings in camera to the extent necessary to ensure the protection of confidential information. The Tribunal shall establish procedures for the protection of confidential information and appropriate logistical arrangements for open hearings, in consultation with the disputing parties.

3. A disputing party may disclose to other persons in connection with the arbitral proceedings such unredacted documents as it considers necessary for the preparation of its case, but it shall ensure that those persons protect the confidential information in such documents.

4. The Parties may share with officials of their respective national and sub-national governments all relevant unredacted documents in the course of dispute settlement under this Agreement, but they shall ensure that those persons protect any confidential information in such documents.

5. To the extent that a Tribunal's confidentiality order designates information as confidential and a Party's law on access to information requires public access to that information, the Party's law on access to information shall prevail. However, a Party should endeavour to apply its law on access to information so as to protect information designated confidential by the Tribunal.

6. Nothing in this Section requires a disputing Party to disclose, furnish or allow access to information that it may withhold in accordance with Article 2202 (Exceptions — National Security) or Article 2205 (Exceptions — Disclosure of Information).

26. Canada's recent experience with drafting and negotiating treaty provisions providing for transparency in investor-State arbitration establishes that such provisions need not be complicated. Transparency in treaty-based investor-State arbitration can be provided for in a relatively simple manner consisting of only several paragraphs.

#### Question 4: Provision in treaties on third parties' involvement

27. Canada's more recent FIPAs and FTAs specifically provide for the participation of third parties as *amicus curiae*. NAFTA does not address submissions by such third parties in the text of the treaty. However, in 2003, the FTC issued a statement clarifying that nothing in NAFTA prohibited submissions by non-parties as *amicus curiae*, and that the decision whether or not to accept any such submission was a matter within the Tribunal's discretion. The FTC statement also provided detailed procedural guidelines for the submissions of any *amicus curiae* materials.

28. Canada's model FIPA provides that third parties are permitted to submit *amicus curiae* briefs in investor-State arbitrations. Specifically, Article 39, Submissions by a Non-Disputing Party, of the updated model FIPA provides:

1. Any non-disputing party that is a person of a Party, or has a significant presence in the territory of a Party, that wishes to file a written submission with a Tribunal (the "applicant") shall apply for leave from the Tribunal to file such a submission, in accordance with Annex C.39. The applicant shall attach the submission to the application.

2. The applicant shall serve the application for leave to file a non-disputing party submission and the submission on all disputing parties and the Tribunal.

3. The Tribunal shall set an appropriate date for the disputing parties to comment on the application for leave to file a non-disputing party submission.
4. In determining whether to grant leave to file a non-disputing party submission, the Tribunal shall consider, among other things, the extent to which:
  - (a) The non-disputing party submission would assist the Tribunal in the determination of a factual or legal issue related to the arbitration by bringing a perspective, particular knowledge or insight that is different from that of the disputing parties;
  - (b) The non-disputing party submission would address a matter within the scope of the dispute;
  - (c) The non-disputing party has a significant interest in the arbitration; and
  - (d) There is a public interest in the subject-matter of the arbitration.
5. The Tribunal shall ensure that:
  - (a) Any non-disputing party submission does not disrupt the proceedings; and
  - (b) Neither disputing party is unduly burdened or unfairly prejudiced by such submissions.
6. The Tribunal shall decide whether to grant leave to file a non-disputing party submission. If leave to file a non-disputing party submission is granted, the Tribunal shall set an appropriate date for the disputing parties to respond in writing to the non-disputing party submission. By that date, the non-disputing Party may, pursuant to Article 34 (Participation by the Non-Disputing Party), address any issues of interpretation of this Agreement presented in the non-disputing party submission.
7. The Tribunal that grants leave to file a non-disputing party submission is not required to address the submission at any point in the arbitration, nor is the non-disputing party that files the submission entitled to make further submissions in the arbitration.
8. Access to hearings and documents by non-disputing parties that file applications under these procedures shall be governed by the provisions pertaining to public access to hearings and documents under Article 38 (Public Access to Hearings and Documents).
29. This provision was incorporated into Canada's FIPA with Peru as Article 39 of that FIPA.
30. It has also been incorporated into certain FTAs. For example, in Canada's FTA with Peru, Article 836: Submissions by Other Persons, provides:
  1. Any person, other than a disputing party, that wishes to file a written submission with a Tribunal (the "applicant") shall apply for leave

from the Tribunal to file such a submission, in accordance with Annex 836.1. The applicant shall attach the submission to the application.

2. The applicant shall serve its application for leave to file a submission, as well as its submission, on all disputing parties and the Tribunal.

3. The Tribunal shall set an appropriate date for the disputing parties to comment on the application for leave.

4. In determining whether to grant the leave the Tribunal shall consider, among other things, the extent to which:

(a) The applicant's submission would assist the Tribunal in the determination of a factual or legal issue related to the arbitration by bringing a perspective, particular knowledge or insight that is different from that of the disputing parties;

(b) The applicant's submission would address a matter within the scope of the dispute;

(c) The applicant has a significant interest in the arbitration; and

(d) There is a public interest in the subject-matter of the arbitration.

5. The Tribunal shall ensure that:

(a) Any applicant's submission does not disrupt the proceedings; and

(b) Neither disputing party is unduly burdened or unfairly prejudiced by such submissions.

6. The Tribunal shall decide whether to grant leave to an applicant to file a submission. If the Tribunal grants leave, it shall set an appropriate date for the disputing parties to respond in writing to the submission. By that date, the non-disputing Party may, pursuant to Article 832, address any issues of interpretation of this Agreement presented in the submission.

7. The Tribunal that grants leave to file a submission to an applicant is not required to address the submission at any point in the arbitration, nor is the person that files the submission entitled to make further submissions in the arbitration.

8. Access to hearings and documents by persons that file applications under these procedures shall be governed by the provisions pertaining to public access to hearings and documents under Article 835.

31. Canada's FTA with Colombia follows an overall substantively similar approach, though it provides less detail than the FTA with Peru, including with respect to the factors that are to guide the Tribunal in determining whether to accept an *amicus curiae* submission. Specifically, Article 831: Submissions by a Non-Disputing Party, of the FTA with Colombia provides:

1. A Tribunal shall have the authority to consider and accept written submissions from a person or entity that is not a disputing party and that has a significant interest in the arbitration. The Tribunal shall ensure that any non-disputing party submission does not disrupt the proceedings and that neither disputing party is unduly burdened or unfairly prejudiced by it.

2. An application to the Tribunal for leave to file a non-disputing party submission, and the filing of a submission, if allowed by the Tribunal, shall be made in accordance with Annex 831.

32. Similar to Canada's experience drafting and negotiating provisions to make investor-State arbitration transparent, Canada's experience also shows that provisions allowing for public participation in investor-State arbitration can be drafted without unnecessary complication.

Question 5: Any other comment

33. Canada strives to make transparency in investor-State arbitration a foundational principle of any treaties into which it enters and an indispensable part of any arbitration in which it is involved. In all of its practices, Canada seeks to achieve the greatest openness to the public possible, while recognizing the legitimate needs of the parties to protect certain types of information and to proceed to resolve disputes quickly and efficiently.

34. Canada believes that UNCITRAL must somehow provide for transparency in investor-State arbitration, and that it must do so as soon as possible. These views have been clearly expressed in Canada's previous submissions to UNCITRAL, particularly in UN Doc. A/CN.9/662, and need not be repeated here.

35. Canada's support for transparency in investor-State arbitration is borne of principle, but shaped and guided by experience — experience both drafting treaties based on the principles of open and transparent investor-State arbitration and in participating in investor-State arbitrations governed by such principles. Canada's experience makes it clear that increased openness and transparency is a significant benefit and, if effectively managed, imposes little cost or burden on either the process or the parties.

## 2. China

[Original: Chinese]

Question 1: Examples of publicity or transparency of arbitral proceedings; Access to documents or hearings

China acceded to the Convention on the Settlement of Investment Disputes Between States and Nationals of Other States in 1992, and has the obligation under the treaty to solve the above-mentioned disputes in

accordance with the Convention. However, so far there has been no treaty-based arbitration of investment disputes, and therefore no such cases in evidence to publicity or transparency in respect of treaty-based investor-State arbitration proceedings.

Question 2: Amicus curiae briefs or other interventions

There has been no case of treaty-based investor-State arbitration in China where third parties have presented their statements or become involved in the proceedings.

Question 3: Provision in treaties on transparency or publicity

There is no provision on transparency or publicity regarding treaty-based investment arbitration in bilateral or multi-lateral treaties entered into by China.

Question 4: Provision in treaties on third parties' involvement

There is no provision on third-party involvement in treaty-based investment arbitration in bilateral or multi-lateral treaties entered into by China.

Question 5: Any other comment

There is currently no such practice of treaty-based investor-State arbitration in China. Given the confidentiality of arbitration, we do not consider it appropriate to impose provisions of publicity and transparency on treaty-based settlement of investor-State investment disputes.

### 3. Czech Republic

[Original: English]

Question 1: Examples of publicity or transparency of arbitral proceedings; Access to documents or hearings

There is only one case where information regarding the existence of the arbitral proceedings between the Czech Republic and a foreign investor is publicly available — the arbitration between Phoenix Action Ltd. and the Czech Republic under the Rules of Arbitration of the International Centre for Settlement of Investment (ICSID Case No. ARJB/06/5). With respect to the treaty-based arbitration between a foreign investor and the Czech Republic, there is no example of the arbitral proceedings where the public or specific interest groups would have possibility to obtain access to documents used in the proceedings or to be present at hearings.

Question 2: Amicus curiae briefs or other interventions

In the Czech Republic, there are no examples of cases where third parties have presented statements in the course of treaty-based investment arbitration or have otherwise intervened in the proceedings.

Question 3: Provision in treaties on transparency or publicity

In the bilateral investment treaties concluded by the Czech Republic, there are no provisions concerning transparency or publicity in relation to the treaty-based investment arbitration.

Question 4: Provision in treaties on third parties' involvement

In the bilateral investment treaties concluded by the Czech Republic, there are no provisions for third parties to become involved in treaty-based investment arbitration.

Question 5: Any other comment

With respect to the current Czech Republic's practice regarding publicity or transparency in treaty-based investment arbitration, it is possible to add that the Czech State has published several arbitral awards on the websites of the Ministry of Finance (e.g. final award in the UNCITRAL arbitration between Ronald S. Lauder and the Czech Republic, partial award in the UNCITRAL arbitration between CME Czech Republic B.V. and the Czech Republic, final award in the UNCITRAL arbitration between SALUKA Investments B.V. and the Czech Republic). In accordance with the principle of confidentiality, the publication of these awards is possible only with the approval of the other party in the dispute.

#### 4. Denmark

[Original: English]

Question 1: Examples of publicity or transparency of arbitral proceedings; Access to documents or hearings

No. There have been no such cases in Denmark to our knowledge.

Question 2: Amicus curiae briefs or other interventions

Not to our knowledge.

Question 3: Provision in treaties on transparency or publicity

No.

Question 4: Provision in treaties on third parties' involvement

The Danish Bilateral Investment Treaties (BIT) do not have any special provision for third parties to become involved in arbitration proceedings.

The Danish BIT contain provisions relating to disputes between a Contracting Party and an investor and disputes between the Contracting Parties.

Question 5: Any other comment

No comments because we are not aware that Denmark has been involved in such cases.

**(A/CN.9/WG.II/WP.159/Add.2) (Original: Arabic/English/French/Spanish)****Note by the Secretariat on settlement of commercial disputes: Transparency in treaty-based investor-State arbitration — Compilation of comments by Governments, submitted to the Working Group on Arbitration and Conciliation at its fifty-third session****ADDENDUM****CONTENTS***Chapter*

**III. Comments received from Governments on transparency in treaty-based investor-State arbitration****1. Dominican Republic**

[Original: Spanish]

Question 1: Examples of publicity or transparency of arbitral proceedings; Access to documents or hearings

So far only the case between the Dominican Republic and TCW has been made public.

Question 2: Amicus curiae briefs or other interventions

No.

Question 3: Provision in treaties on transparency or publicity

Articles 10.14 and 10.21 of the Dominican Republic-Central America-United States Free Trade Agreement (CAFTA-DR) contain provisions relating to

transparency. Also, Article IX of the free trade agreement between the Dominican Republic and the Caribbean Community (CARICOM); Article 9.12 of the free trade treaty between Central America and the Dominican Republic; Article XI of the bilateral agreement on investments between the Dominican Republic and the Netherlands; Article 15 of the bilateral agreement between the Dominican Republic and Finland; Article XIII of the bilateral agreement between Chile and the Dominican Republic; Article IX of the bilateral agreement between the Dominican Republic and Argentina; Article XI of the bilateral agreement between Switzerland and the Dominican Republic; Article XI of the bilateral agreement between the Dominican Republic and Panama; and Article 14 of the bilateral agreement between Ecuador and the Dominican Republic.

Question 4: Provision in treaties on third parties' involvement

Article 10.20, para. 3, of CAFTA-DR.

Question 5: Any other comment

All procedures relating to the resolution of investor-State disputes should be conducted in a transparent manner.

## 2. El Salvador

[Original: Spanish]

Question 1: Examples of publicity or transparency of arbitral proceedings; Access to documents or hearings

There was investor-State arbitration pursuant to a request that the Spanish company Inceysa Vallisoletana submitted to the International Centre for Settlement of Investment Disputes (ICSID) of the World Bank, Washington D.C., citing the treaty on reciprocal investment protection concluded between Spain and El Salvador (ICSID Case No. ARB/03/26). Ultimately, the tribunal concluded that an investment made in a manner contrary to the laws of El Salvador was not protected by the treaty and therefore did not fall within the tribunal's competence. It stated that the activities of the investor had run counter to those general principles, concluding that an investment made illegally could not benefit from the protection afforded by the treaty concluded between Spain and El Salvador.

In El Salvador, this case was widely publicized in the press and on television.

Question 2: Amicus curiae briefs or other interventions

So far there have been no known cases of a third party presenting statements in the course of arbitral proceedings.

Question 3: Provision in treaties on transparency or publicity

There are transparency provisions in the free trade treaties concluded by our country. For example, Article 10.21 in Chapter Ten (Investment) of the Dominican Republic-Central America-United States Free Trade Agreement contains provisions relating to transparency in investment arbitration proceedings. In the other free trade treaties concluded by El Salvador there is a specific chapter regarding transparency that applies across the board to all

other chapters, so that the question of transparency in relation to investment is covered.

As regards the request for treaty texts, they are very voluminous, but they can be consulted on the website of the Ministry for the Economy ([www.minec.gob.sv](http://www.minec.gob.sv)).

In addition, there are reciprocal investment protection agreements (APRIs) concluded by El Salvador that, although not specifically regulating the arbitral proceedings, contain a clause providing that, in the event of arbitration, it shall be conducted in accordance with the UNCITRAL Model Law and/or the norms that it establishes.

**Question 4: Provision in treaties on third parties' involvement**

As regards the participation of third parties in investment arbitration, the issue of the involvement and rights of "a Party" that is not a disputing party is covered in the free trade treaties concluded by El Salvador except for the treaty concluded with Chile. In the case of the Dominican Republic-Central America-United States Free Trade Agreement, it is covered in Article 10.20, which provides for the acceptance and consideration of "amicus curiae submissions from a person or entity that is not a disputing party".

**Question 5: Any other comment**

Owing to our very limited experience in the matter, we have no additional comments to make.

**3. Finland**

[Original: English]

**Question 1: Examples of publicity or transparency of arbitral proceedings; Access to documents or hearings**

No. In fact, there are no such arbitration cases in Finland.

**Question 2: Amicus curiae briefs or other interventions**

No.

**Question 3: Provision in treaties on transparency or publicity**

No.

**Question 4: Provision in treaties on third parties' involvement**

No.

**Question 5: Any other comment**

No. As already mentioned, treaty based investor-State arbitration does not, in practice, involve Finland.

#### 4. France

[Original: French]

Question 1: Examples of publicity or transparency of arbitral proceedings; Access to documents or hearings

There has, to date, been no arbitration case against France based on investment protection treaties.

There have, however, been at least three cases against other States, where the plaintiffs were based in Paris and the decisions were published:

- Consortium RFCC v. Kingdom of Morocco (International Centre for Settlement of Investment Disputes (ICSID) Case No. ARB/00/6)
- Champion Trading Company and Ameritrade International, Inc., v. Arab Republic of Egypt (ICSID Case No. ARB/02/9)
- Parkerings-Campagniet AS v. Republic of Lithuania (ICSID Case No. ARB/05/8)

It has also frequently been the case that ICSID arbitration proceedings or at least the first sitting, and sometimes hearings also, have been held at the headquarters of the World Bank in Paris.

Question 2: Amicus curiae briefs or other interventions

There have been no cases, to our knowledge, of third parties having presented statements in the course of arbitration or otherwise intervened in the proceedings. Such practices are, however, of very recent date.

Question 3: Provision in treaties on transparency or publicity —

Question 4: Provision in treaties on third parties' involvement

Bilateral agreements entered into by France do not themselves contain provisions concerning publicity or transparency but refer to ICSID Arbitration Rules. France is party to the Washington Convention, which established ICSID, and, where the other State party is not party to the Washington Convention, a bilateral treaty refers to the UNCITRAL Arbitration Rules. The ICSID Arbitration Rules, as amended in 2006, contain provisions relating to transparency and publicity. The 2006 Rules also contain provisions relating to participation by third parties.

It should be noted that France expressed some reservations concerning the amendments to the ICSID Arbitration Rules made in 2006.

Question 5: Any other comment

The arbitration system established by the 1965 Washington Convention differs markedly from classic arbitration. Although it recognizes the authority of the traditional rules of international commercial arbitration, it also uses procedures that are of a more pronounced judicial nature. ICSID also gives the arbitrator powers of initiative and discretion, exceeding those available under ordinary arbitration law.

The justification given for this is the specific nature of investment arbitration. France nonetheless remains attached to the basic principles of arbitration,

including the consensual approach. Unlike a national court, an arbitration tribunal owes its authority only to the common will of the parties to the case. Where there is no such will, no arbitration is possible.

It may therefore seem appropriate to establish rules for publicity or transparency in investment arbitration, but this should not be allowed to detract from the principle that the will of the parties is paramount. To be more precise:

1. With regard to access to hearings by third parties:

The parties should be able to reserve the right to object.

2. With regard to the use of *amicus curiae*:

This procedure can be useful for the parties and for the judge, if the intervention of the *amicus curiae* clarifies the subject under discussion and thus contributes to the quality of the arbitration process and the settlement of the case. The procedure is, however, alien to the French legal tradition. It may, moreover, give rise to abuse and inequalities. Its use should therefore be strictly limited. The intervention of *amicus curiae* may actually extend a dispute to people not parties to the case. Such an intervention will also entail additional costs, which may be borne by both parties, even though only one party will benefit from the submissions concerned.

It would thus be appropriate for the filing of written submissions to be restricted and not left to the sole discretion of the tribunal. Thus, for example:

- The conditions for admissibility should be spelt out;
- There should be an obligation on the tribunal to maintain the progress of proceedings and to protect the parties;
- Third parties should justify the reasons for the filing of their submissions, the relevance of the issues contained in their submissions and their interest in the case, in order to avoid overloading the proceedings with an excessive number of irrelevant written submissions;
- A time limit should be set for the filing of submissions;
- The scope of submissions should be set out in detail: third parties should in no circumstances submit evidence, since this would distort the proceedings and change the number of protagonists;
- Entitlement to interventions should be restricted to private individuals: a State should not be permitted to file written submissions, for fear of upsetting the balance of forces between the parties and putting the arbitration tribunal in the position of passing judgement on a dispute between States.

Lastly, the parties should, in all cases, be entitled to object to such submissions.

3. With regard to publicity:

It is in the interests of States and investors to have at their disposal information on the results of a case and to know the legal reasoning adopted

by arbitration tribunals, if only to avoid subsequent litigation. The principle of agreement between the parties on the publication of decisions in full, however, should not be compromised.

## 5. Germany

[Original: English]

Question 1: Examples of publicity or transparency of arbitral proceedings; Access to documents or hearings

We are not aware of any such cases. To the best of our knowledge, to date the parties have published their written observations on the ICSID website in only one ICSID arbitral proceeding in Germany. The proceeding in question was an arbitral proceeding in Frankfurt am Main for distribution of proceeds from the sale of 18 tons of valuable antique Chinese porcelain recovered by a British company from the wreck of a ship (“Diana”) which sank in the Strait of Malacca in 1817. However, the jurisdiction of the ICSID Arbitration Court was rejected in that case because the salvage work did not constitute an investment within the meaning of Article 25 of the ICSID Convention (decision of 17 May 2007).

Question 2: Amicus curiae briefs or other interventions

We are not aware of any examples of such cases.

Question 3: Provision in treaties on transparency or publicity

For investment protection treaties, Germany usually uses model contracts that do not contain any express provisions concerning transparency or publicity. However, the model contract does, inter alia, refer to the ICSID rules, which themselves contain relevant provisions (ICSID Arbitration Rule 32 in the version of 10 April 2006).

Question 4: Provision in treaties on third parties’ involvement

The German model contract for investment protection treaties does not contain any provision for third parties to become involved in arbitration. However, the model contract does refer to the ICSID rules, which contain a provision on the presence of third parties (ICSID Arbitration Rule 32 in the version of 10 April 2006).

Question 5: Any other comment

First of all, clarification would be needed as to what exactly is meant by the terms “transparency” and “publicity” in connection with investor-State arbitration.

The question then arises as to what interest exists in additional rules on transparency and publicity and for what reasons such rules could be necessary. Arbitral proceedings are primarily determined by agreement between the parties. This should also be the case for provisions regarding transparency and publicity. Arbitral proceedings in the field of investor-State arbitration also mainly deal with investors’ interests that are worthy of protection. In light of this, a provision on transparency and publicity should be made subject to the consent of the investor. The investor could, for example, be given a right to

choose whether to apply or waive special provisions on transparency and publicity in an arbitral proceeding.

## 6. Greece

[Original: French]

Question 1: Examples of publicity or transparency of arbitral proceedings; Access to documents or hearings

We are not aware of any arbitration cases between the Greek State and an investor in which the proceedings and record were open or publicized. It has therefore not been possible for third parties not parties to the case or their legal counsel to observe arbitration proceedings or obtain access to the court record. Although the parties may adopt such measures, the provisions governing arbitration under Greek law (arts. 867 ff. of the Greek Code of Civil Procedure and Act No. 2735/1999 on international commercial arbitration, which is based on the UNCITRAL Model Law) are of a non-prescriptive nature. This means that it is open to the parties to agree otherwise; and such measures have never been requested by parties to a dispute, including investors, the main reason being that entrepreneurs do not like disclosing to the public the characteristics or secrets of their economic activities, for fear of helping their rivals.

The record of an arbitration case is therefore not available to third parties, without the consent of the parties, even after it has been deposited with the registry of the district court, according to article 893 of the Code of Civil Procedure; the contents of a file are considered to be personal information, protected under article 9a of the Greek and European Union Constitution (Act No. 2472/1997, which incorporated Directive 95/46/EC of the European Parliament and of the Council).

Question 2: Amicus curiae briefs or other interventions

This is not ruled out, but the consent of the parties must always be obtained. We know of no arbitration cases, for the reasons just given above.

Question 3: Provision in treaties on transparency or publicity

Greece has ratified (under Decree Law No. 608 of 1968, published in the Official Gazette No. 263/1968, Part A) the Convention on the Settlement of Investment Disputes between States and Nationals of Other States (the Washington Convention), which provides for mediation and arbitration proceedings to be held by the International Centre for the Settlement of Investment Disputes (known under its English acronym as ICSID) as part of the International Bank for Reconstruction and Development. Under article 44 of the Convention, any arbitration proceeding heard by ICSID is conducted, except as the parties otherwise agree, in accordance with the Arbitration Rules currently in force. As far as we know, even the arbitration cases involving the Greek State and foreign investors heard at ICSID have not followed procedures that were open to third parties or transparent.

Question 4: Provision in treaties on third parties' involvement

No, there is no provision whereby third parties can interfere in an arbitration proceeding to which they are not party.

## Question 5: Any other comment

In addition to the 1968 Washington Convention mentioned above, arbitration as a way of settling disputes between the State (Greece) and investors (national or foreign) is also provided for under domestic Greek law, and specifically by Decree Law No. 2687/1953 relating to the protection of foreign capital invested in Greece. This text has additional force — it cannot be repealed by a single law — owing to the fact that it was adopted in implementation of article 112 of the 1952 Greek Constitution and continues to be reinforced by article 107 of the current Constitution, which dates from 2007. Under this legislation, the parties may agree on any ad hoc or institutional arbitration proceeding, according to their preference. No arbitration proceeding relating to investments, however, has opted for publicity or transparency.

In conclusion, we can state that, in virtually every case, publicity and transparency in arbitration proceedings are not the current practice in Greece. The only possible way for a third party to gain knowledge of an arbitration record is to contest a decision by an action for annulment before the Court of Appeal, pleading a specific legal interest (Code of Civil Procedure, arts. 898 and 899).

**7. Iraq**

[Original: Arabic]

Question 1: Examples of publicity or transparency of arbitral proceedings; Access to documents or hearings

There are no treaty based arbitration cases between Iraq and investors.

Question 2: Amicus curiae briefs or other interventions

There are no examples of cases where third parties have presented statements in the course of treaty-based investment arbitration (such as amicus curiae briefs).

Question 3: Provision in treaties on transparency or publicity

The Law on Investment number 13/2006 stipulates that arbitration is exercised in the following cases:

- (a) At the time a contract is concluded with an investor, agreement may be reached on a conflict resolution mechanism involving arbitration according to Iraqi law or any other internationally recognized entity (m/17/14);
- (b) Any trade conflict arising between the Iraqi National Investment Organization or any non-governmental Iraqi entity and investors who are subject to the Law on Investment number 13/2006 is subject to arbitration if the contract regulating the relationship between the two parties so stipulates (m/27/5).

## 8. Lebanon

[Original: Arabic]

After perusal of the above-mentioned letter, we found out that it contained general questions relating to the transparency of arbitration between investors and States. We wish to refer in this regard to the fact that an inventory was carried out on arbitration agreements between the Lebanese State and other States, in order to find out if such treaties contained answers to the questions raised. We did not find any answers for those questions.

It is worth mentioning, however, that the Lebanese legislator had paid special attention to arbitration. It is provided for in the Lebanese Civil Procedure Law, which is in conformity with the applicable international agreements. The Lebanese law permits resorting to arbitration in matters concerning international trade; it permits, as well, internal arbitration according to article 762 and the subsequent articles.

In international arbitration, the legislator grants freedom in choosing the method of appointing arbitrators and freedom in choosing the law to be applied to settle the dispute. He also recognizes arbitration awards issued abroad or in international arbitration and established the bases for that.

## 9. Luxembourg

[Original: French]

Question 1: Examples of publicity or transparency of arbitral proceedings; Access to documents or hearings

No, there have been no such cases, to our knowledge.

Question 2: Amicus curiae briefs or other interventions

No, there have been no such cases, to our knowledge.

Question 3: Provision in treaties on transparency or publicity

There is no evidence that any such provision exists.

A reference list of publications since May 1944 in *Le Mémorial*, the official gazette of Luxembourg, containing the words “treaty” and “arbitration” may be consulted via the Internet on the site [www.legilux.public.lu](http://www.legilux.public.lu). In view of the number of publications involved (over 200), a detailed scrutiny of all the relevant provisions could not be made. It may be noted that Luxembourg has ratified the European Convention on International Commercial Arbitration, done at Geneva on 21 April 1961, the Agreement relating to Application of the European Convention on International Commercial Arbitration, done at Paris on 17 December 1962, and the New York Convention on the Recognition and Enforcement of Foreign Arbitral Awards, of 10 June 1958.

Question 4: Provision in treaties on third parties’ involvement

See reply to question 3.

Question 5: Any other comment

We have no comments to make on this topic.

## 10. Mauritius

[Original: English]

Question 1: Examples of publicity or transparency of arbitral proceedings; Access to documents or hearings

There are no investor-state arbitration cases involving Mauritius as at present.

Question 2: Amicus curiae briefs or other interventions

In light of the answer to query 1 above, there have been no such cases to date.

Question 3: Provision in treaties on transparency or publicity

Mauritius has ratified several bilateral treaties in relation to this subject matter but none of these provide specifically for transparency or publicity of arbitral instances. Further article 25 (4) of the UNCITRAL Arbitration Rules ensures that hearings shall be held in camera unless the parties agree otherwise. The arbitral tribunal may require the retirement of any witness or witnesses during the testimony of other witnesses.

Question 4: Provision in treaties on third parties' involvement

Mauritius has ratified numerous bilateral investment promotion and protection agreements (IPPA) these however do not specifically cater for the participation of third parties to arbitral proceedings.

These IPPA only make provisions for the designation and setting up of the arbitral tribunal. It is common to find, within the body of these IPPA to which Mauritius is a Party, reference to international arbitration bodies such as the ad hoc arbitration instances under the UNCITRAL (Arbitration Rules/Model Law) and the ICSID. The provisions in these respective texts cater to a certain extent for the Intervention of third parties and are therefore part of our law.

For instance in the ICSID Rules of Procedure for Arbitration Proceedings (Arbitration Rules) we may find the following relevant provisions:

1. Rule 18 provides for the presence of persons other than the parties themselves. The latter may bring along different representatives or "assistants" namely agents, counsel or advocates. However their "... names and authority shall be notified by that party to the Secretary-General, who shall promptly inform the Tribunal and the other party,"
2. Rule 32 relates to the oral procedure before the tribunal which "shall consist of the hearing by the Tribunal of the parties, their agents, counsel and advocates, and of witnesses and experts".

Rule 32 (2) reads that "Unless either party objects, the Tribunal, after consultation with the Secretary-General, may allow other persons, besides the parties, their agents, counsel and advocates, witnesses and experts during their testimony, and officers of the Tribunal, to attend or observe all or part of the hearings, subject to appropriate logistical arrangements. The Tribunal shall for such cases establish procedures for the protection of proprietary or privileged information."

3. Rule 37 (Submissions of Non-disputing Parties)

(1) If the Tribunal considers it necessary to visit any place connected with the dispute or to conduct an inquiry there, it shall make an order to this effect. The order shall define the scope of the visit or the subject of the inquiry, the time limit, the procedure to be followed and other particulars. The parties may participate in any visit or inquiry.

(2) After consulting both parties, the Tribunal may allow a person or entity that is not a party to the dispute (in this Rule called the “non-disputing party”) to file a written submission with the Tribunal regarding a matter within the scope of the dispute.

Question 5: Any other comment

It is common ground that confidentiality is one of the most appealing and advantageous traits of arbitral instances. This point of view is still very much present in relation to arbitration procedures although to date Mauritius has not been directly involved in treaty-based investor-state arbitration.

## 11. Norway

[Original: English]

Question 1: Examples of publicity or transparency of arbitral proceedings; Access to documents or hearings

There have been or are no pending cases involving the State of Norway which provide instances of publicity or transparency of the arbitral proceedings.

Question 2: Amicus curiae briefs or other interventions

There are no examples in Norway where third parties have presented statements in the course of treaty-based investment arbitration.

Question 3: Provision in treaties on transparency or publicity

There is no provision concerning transparency or publicity regarding treaty-based investment arbitration in bilateral or multilateral treaties or agreements entered into by Norway.

Question 4: Provision in treaties on third parties' involvement

There is no provision for third parties to become involved in treaty-based investment arbitration in bilateral or multilateral treaties or agreements entered into by Norway.

Question 5: Any other comment

Norway is positive to the introduction of elements of transparency and the possibility for third parties to become involved in treaty-based arbitration. A draft Model Investment Agreement that was sent to public review on 28 January 2008 contains two provisions in this respect.

## (A/CN.9/WG.II/WP.159/Add.3) (Original: English/French/Russian/Spanish)

4.	Tunisia .....	
5.	Turkey .....	
6.	United States of America .....	

### **III. Comments received from Governments on transparency in treaty-based investor-State arbitration**

#### **1. Poland**

[Original: English]

Question 1: Examples of publicity or transparency of arbitral proceedings; Access to documents or hearings

All current arbitration cases between private investors and the Republic of Poland are based on the UNCITRAL Arbitration Rules. In these cases the parties did not decide to hold the hearings publicly available (as possible according to art. 25.4 of the Rules). In the closed cases the hearings were held in camera and the exhaustive information or documents used in the arbitral proceedings were not made available to the public. The general information relating to the case, as the parties or the subject, is usually published by the press. Other information is confidential.

Question 2: Amicus curiae briefs or other intervention

There is one example where a third party wished to join the arbitration dispute as amicus curiae. The question of its participation in the proceedings has not been settled yet.

Question 3: Provision in treaties on transparency or publicity

The treaties and agreements entered into by the Republic of Poland do not include the provisions concerning transparency or publicity in the arbitration

disputes. The majority of the treaties and agreements provide that all the cases will be settled by the arbitration tribunal *ad hoc*, established according to the UNCITRAL Arbitration Rules. Only in five treaties there are the provisions concerning the alternative or exclusive jurisdiction of the International Centre for Settlement of International Disputes (ICSID).

Question 4: Provision in treaties on third parties' involvement

There are no such provisions.

Question 5: Any other comment

The current UNCITRAL Arbitration Rules enable the parties (which wish so) to hold the hearings publicly available (art. 25.4) or/and to make public an award (art. 32.5). With the consent of both parties also the institution of *amicus curiae* can be used in the arbitral proceedings.

The possible change of the UNCITRAL Arbitration Rules can cause the risk that the parties will have to follow the revised Rules although the treaty has not been changed. The introduction of the new provisions to the Rules could mean the indirect revision of the treaty without the consent of its parties. It could cause the necessity of the quick renegotiation of the treaties if the parties do not agree with the transparency policy.

## 2. Russian Federation

[Original: Russian]

Under the Foreign Investments in the Russian Federation Act, matters relating to the settlement of disputes raised by foreign investors in connection with their investments and business activities in the Russian Federation may, in accordance with the international agreements entered into by the Russian Federation, be regulated and resolved in an ordinary court or arbitration tribunal or in an international arbitration tribunal.

The international agreements, setting out the conditions and various procedures for the settlement of investment disputes, consist mainly of bilateral intergovernmental agreements on the promotion and mutual protection of capital investments.

These agreements, concluded by the Government of the Russian Federation since June 1992, contain a number of standard provisions regarding the settlement of disputes between one Contracting Party and an investor of the other Contracting Party. The rules on the procedure for dealing with investment disputes in the agreements, also standard in nature, contain no provisions on transparency or publicity in arbitration proceedings or on the participation of third parties in such proceedings. The agreements do, however, contain a provision whereby, if a dispute cannot be settled by negotiation, the investor may opt for it to be referred for consideration to a competent court or arbitration tribunal of the Contracting Party within the territory of which the investments were made, to an *ad hoc* arbitration tribunal in accordance with the UNCITRAL Arbitration Rules, to the International Centre for Settlement of Investment Disputes, to the Arbitration Institute of the Stockholm Centre of Commerce, etc. Thus, the dispute is addressed in accordance with the legislation of a Contracting Party or under the rules of one of the aforementioned institutions.

According to the information available, in the Russian Federation there have been no investor-State arbitration proceedings involving publicity or transparency features and no cases of third-party participation in such proceedings.

This is largely due to the fact that the international agreements entered into by the Russian Federation do not contain provisions on transparency in investment dispute arbitration or on the participation of third parties in such arbitration.

The investment dispute arbitration practices in the Russian Federation show that the principle of confidentiality is observed.

The purpose of the principle of confidentiality, which is one of the basic procedural principles of arbitration, is to protect the parties' trade secrets and business reputations. This principle takes on particular significance in investor-State arbitration, since cases often involve matters of public order and national interests of the State in which the investment was made.

Accordingly, it may be argued that, when, within the UNCITRAL framework, a model law or some other instrument regulating questions relating to arbitration in connection with possible disputes between a State and a foreign investor is being developed, careful consideration should be given to the question of the advisability of replacing (or supplementing) the principle of confidentiality by the principle of transparency in investment dispute arbitration, in view of the importance of maintaining a balance between public and private interests.

### 3. Spain

[Original: Spanish]

Question 1: Examples of publicity or transparency of arbitral proceedings; Access to documents or hearings

There is no case involving investors and the Spanish State covered by treaties entered into by Spain in which elements of publication or transparency of the proceedings are included.

According to the website of the International Centre for Settlement of Investment Disputes (ICSID), the Kingdom of Spain has been involved in only one case: Emilio Agustín Maffezini (claimant) v. Kingdom of Spain (respondent), Case No. ARB. 97/7, in which, in accordance with Article 48.5 of the Convention on the Settlement of Investment Disputes between States and Nationals of Other States (the ICSID Convention), the parties agreed to the publication of the decision.

Question 2: Amicus curiae briefs or other intervention

There has been no case in Spain where third parties have made statements during treaty-based arbitration with respect to investments.

Question 3: Provision in treaties on transparency or publicity

In none of the bilateral treaties entered into by Spain is there any provision relating to the transparency or publication of treaty-based arbitration procedures with respect to investments.

Question 4: Provision in treaties on third parties' involvement

In none of the bilateral treaties entered into by Spain is there any provision relating to the participation of third parties in treaty-based arbitration with respect to investments.

#### 4. Tunisia

[Original: French]

Question 1: Examples of publicity or transparency of arbitral proceedings; Access to documents or hearings

In response to the questionnaire from the United Nations Commission on International Trade Law (UNCITRAL) on arbitration practices in the event of disputes between States and foreign investors, it should be recalled that Tunisia was the first State to sign the 18 March 1965 Convention on the Settlement of Investment Disputes between States and Nationals of Other States (“the Washington Convention”), which established the arbitration system of the International Centre for Settlement of Investment Disputes (ICSID). Also, it has signed a significant number of agreements, both regional (inter-Arab and covering the Maghreb region) and bilateral (almost 60). Foreign investors from every continent have invested in Tunisia, the traditional ones being from European and Arab countries. Tunisia has, however, had very few disputes with foreign investors. Amicable settlements are preferred, differences of point of view generally being resolved thanks to the understanding attitude of the Tunisian party. The few disputes that have arisen and gone before ICSID or an ad hoc arbitration tribunal are as follows:

A. *Ghaith R. Pharaon v. Tunisia and National Tourism Office*. This case, which was initiated by a Saudi Arabian investor in 1986, was heard by ICSID, where it was registered as case No. ARB/86/1. An arbitration tribunal was set up, but the dispute was settled amicably. The case is mentioned on the ICSID website, <http://icsid.worldbank.org/ICSID/FrontServlet?requestType=GenCaseDtIsRH&actionVal=ListConcluded>. The case was heard on the basis of the provisions of the Washington Convention and the bilateral investment agreement between Tunisia and Saudi Arabia.

Outcome of Proceeding: Settlement agreed by the parties and proceeding discontinued at their request (Order taking note of the discontinuance issued by the Tribunal on November 21, 1988 pursuant to Arbitration Rule 43(1)).

B. *Tanmiah for Management & Marketing Consultancy v. Tunisia and the Organizing Committee of the Tunis 2001 Mediterranean Games*. The claimant instituted proceedings before an ad hoc arbitration board, but the suit was dismissed. The claimant instituted fresh proceedings before the Arab Investment Court, which operates under the auspices of the League of Arab States. The case, which was registered as case No. 1/1 Q, IIC 238 (2006), was dismissed on 12 October 2006. See [http://www.investmentclaims.com/IIC\\_238\\_\(2006\).pdf](http://www.investmentclaims.com/IIC_238_(2006).pdf). Decision: dismissal of the case. “The Court has decided: first: to reject the request of the First Defendant (the State of Tunisia represented in the person of its Government the Prime Minister) for it to be removed from the action; second: to reject the pleas advanced by the Second Defendant (the Organizing Committee of the Tunis 2001 Mediterranean Games); third: to reject in its entirety the action of

the Claimant against the First and the Second Defendants, and to hold the Claimant liable for the costs of the action before the Arab Investment Court; fourth: to hold inadmissible the interlocutory request put forward by the Second Defendant (the Organizing Committee of the Tunis 2001 Mediterranean Games); fifth: each party to bear its own attorneys' fees."

It should, however, be pointed out that the Arab Investment Court is officially an inter-State court established by an international agreement and not an arbitration institution.

C. ABCI Investments N.V. v. Republic of Tunisia (ICSID No. ARB/04/12). Subject matter: acquisition of shares in a bank; registration date: 6 April 2004; date of constitution of the Tribunal: 5 October 2007. The case is still pending. On 2 July 2008, the Tribunal issued a procedural order concerning the respondent's representation (right of the Head of a State's Litigation Department to represent the State) and the validity of the respondent's nomination of an arbitrator. On the same day, the Tribunal issued a procedural order concerning the parties' requests for bank guarantees.

The suit is based on the provisions of the Arab League Convention on the Investment of Arab Capital in Arab Countries (1980).

#### Question 2: Amicus curiae briefs or other interventions

There have been no cases in which third parties have presented statements in the course of treaty-based investment arbitration as amicus curiae or intervened in the proceedings in any way.

#### Question 3: Provision in treaties on transparency or publicity

Tunisia was the first country to sign the Washington Convention, which established a transparent arbitration proceedings system, with the publication of information on proceedings as they moved forward and the posting online of all decisions by arbitral tribunals, including final awards.

At the bilateral and the regional level (Maghreb and inter-Arab), Tunisia has opted for a standard bilateral agreement on the protection and promotion of investments that does not contain special provisions for ensuring the publicity of proceedings.

#### Question 4: Provision in treaties on third parties' involvement

The Tunisian standard bilateral agreement on the protection and promotion of investments does not provide for third parties to become involved in investment arbitration.

#### Question 5: Any other comment

The publication of arbitral awards by institutions such as ICSID is important for enabling States to follow the development of a case and get to know the interpretations put on the provisions of treaties, including the Washington Convention (18 March 1965), by international arbitrators. States are able to foresee the results of litigation and, possibly, avoid engaging in useless litigation. On the other hand, the case law of ICSID is not entirely consistent, with the result that those who study its judgements in an attempt to gain a clear understanding of the state of positive law and ICSID's jurisprudential

position on the issues submitted to it are unable to obtain sufficient guidance. This failing has nothing to do with publicity of arbitral proceedings, but arises out of the arbitral proceedings system itself.

## 5. Turkey

[Original: English]

Question 1: Examples of publicity or transparency of arbitral proceedings; Access to documents or hearings

As Turkey has recourse mainly to the International Centre for Settlement of Investment Disputes (ICSID) regarding treaty-based investor-State arbitration, publicity and transparency issues are considered within the framework of the aforementioned arbitration system. Public access to the information on the cases involving Turkey, through the website (<http://icsid.worldbank.org/ICSID/Index.jsp>) of the Centre is possible. On the other hand, in accordance with Law No. 4982 of 09.10.2003, on Obtaining Information, individuals can obtain information from relevant authorities on the cases involving Turkey, upon their written request.

Question 2: Amicus curiae briefs or other intervention

There are no examples in Turkey of cases where third parties have presented statements in the course of treaty-based investment arbitration or have otherwise intervened in the proceedings.

Question 3: Provision in treaties on transparency or publicity

Bilateral or multilateral treaties or agreements to which Turkey is a Party, do not contain provisions concerning transparency or publicity, regarding treaty-based investment arbitration. However, as these agreements refer to the institutional arbitration such as ICSID or International Chamber of Commerce (ICC), Turkey is committed to the principle of confidentiality as foreseen by these systems.

Question 4: Provision in treaties on third parties' involvement

There is no provision for third parties to become involved in treaty-based investment arbitration in bilateral and multilateral treaties or agreements to which Turkey is a Party. However, as these treaties generally refer to institutional arbitration such as ICSID or sometimes ICC, proceedings involving third parties are applied, as provided by these institutions.

Question 5: Any other comment

Even though we consider that the current practices of the Centre for Settlement of Investment Disputes constitute a good example of publicity and transparency in treaty-based investor-State arbitration, we are of the view that, since the party autonomy is a prevailing rule in arbitral proceedings, these issues (publicity and transparency) should be determined in accordance with the common consent of the parties.

## 6. United States of America

[Original: English]

Question 1: Examples of publicity or transparency of arbitral proceedings; Access to documents or hearings

The United States is committed to ensuring the transparency of its investor-State arbitrations. The United States makes available to the public all documents submitted in disputes against it under Chapter Eleven of the North American Free Trade Agreement (“NAFTA”), subject to the redaction of protected information. Information protected from disclosure under Chapter Eleven includes, as set out in the interpretation of the NAFTA Free Trade Commission (“FTC”), confidential business information as well as information otherwise protected from disclosure under a Party’s domestic law or the relevant arbitral rules.<sup>1</sup> As a practical matter, the U.S. Department of State posts to its website submissions, orders, and decisions in disputes against the United States under Chapter Eleven.<sup>2</sup>

The United States also supports open hearings in its NAFTA Chapter Eleven disputes. As stated in 2003, the United States “will consent, and will request the consent of disputing investors and, as applicable, tribunals, that hearings in Chapter Eleven disputes to which it is a party be open to the public, except to ensure the protection of confidential information, including business confidential information.”<sup>3</sup>

The United States participated in the first NAFTA Chapter Eleven merits hearing to be open to the public in the landmark case of *Methanex v. United States*. In *Methanex* and in two subsequent NAFTA Chapter Eleven cases brought against the United States, *Glamis Gold Ltd. v. United States* and the consolidated *Cases Regarding the Border Closure due to BSE Concerns*, proceedings were open to the public via closed-circuit television feed.<sup>4</sup> Transcripts of the *Methanex*, *Glamis*, and *BSE* hearings are available on the U.S. Department of State website.<sup>5</sup>

Question 2: Amicus curiae briefs or other intervention

Third parties have presented amicus curiae briefs in three cases against the United States under NAFTA Chapter Eleven. First, in *Methanex v. United States*, the International Institute for Sustainable Development and Earthjustice (on behalf of Bluewater Network, Communities for a Better Environment

<sup>1</sup> See Interpretation of the Free Trade Commission of Certain Chapter 11 Provisions (July 31, 2001), available at <http://www.state.gov/documents/organization/38790.pdf>. See also NAFTA Article 2105 (protecting against the disclosure of information which would impede law enforcement or be contrary to a Party’s law protecting personal privacy or certain financial information).

<sup>2</sup> See <http://www.state.gov/s/l/c3741.htm>.

<sup>3</sup> See Statement on Open Hearings in NAFTA Chapter Eleven Arbitrations (Oct. 7, 2003), available at [http://www.ustr.gov/assets/Trade\\_Agreements/Regional/NAFTA/asset\\_upload\\_file143\\_3602.pdf](http://www.ustr.gov/assets/Trade_Agreements/Regional/NAFTA/asset_upload_file143_3602.pdf).

<sup>4</sup> Arrangements were made in the *Glamis* hearing to close the proceedings for brief periods to accommodate the presentation of confidential information.

<sup>5</sup> See <http://www.state.gov/s/l/c5818.htm> (*Methanex*), <http://www.state.gov/s/l/c10986.htm> (*Glamis*), and <http://www.state.gov/s/l/c14683.htm> (*BSE*).

and the Center for International Environmental Law) were granted leave to file written submissions. The submissions are available at [www.state.gov/s/l/c5818.htm](http://www.state.gov/s/l/c5818.htm).

In *Glamis Gold, Ltd. v. United States*, the Quechan Indian Nation, the National Mining Association, Friends of the Earth, Sierra Club and Earthworks were granted leave by the Tribunal in that arbitration to file amicus submissions. The submissions are available at <http://www.state.gov/s/l/c10986.htm>.

More recently, the Office of the National Chief of the Assembly of First Nations presented an amicus curiae submission, without an accompanying application for leave to file, in *Grand River Enterprises v. United States*, which is available at <http://www.state.gov/documents/organization/117812.pdf>. The Grand River Tribunal has not decided whether to accept the Assembly of First Nations submission, and has invited the parties to comment on the proposed submission in their respective reply and rejoinder briefs, which are due in the next few months.

### Question 3: Provision in treaties on transparency or publicity

In Annex 1137.4 of the NAFTA, United States specified that where it “is the disputing Party, either the United States or a disputing investor that is a party to the arbitration may make an award public.” Additionally, the NAFTA Free Trade Commission (“FTC”) in 2003 adopted the following interpretation of Chapter Eleven of the NAFTA:

Nothing in the NAFTA imposes a general duty of confidentiality on the disputing parties to a Chapter Eleven arbitration, and, subject to the application of Article 1137(4), nothing in the NAFTA precludes the Parties from providing public access to documents submitted to, or issued by, a Chapter Eleven tribunal.<sup>6</sup>

The NAFTA Parties also have agreed “to make available to the public in a timely manner all documents submitted to, or issued by, a Chapter Eleven tribunal, subject to redaction of: (1) confidential business information; (2) information which is privileged or otherwise protected from disclosure under the Party’s domestic law; and (3) information which the Party must withhold pursuant to the relevant arbitral rules, as applied.”<sup>7</sup>

Similarly, the 2004 U.S. Model Bilateral Investment Treaty (“U.S. Model BIT”) requires a respondent to make available to the public “pleadings, memorials, and briefs submitted to the tribunal” by disputing or non-disputing parties, as well as amicus submissions.<sup>8</sup> A respondent is also required, under the U.S. Model BIT, to make available to the public “orders, awards, and decisions of the tribunal,” as well as hearing transcripts “where available.”<sup>9</sup> In addition, under the U.S. Model BIT, hearings must be “open to the public,”

<sup>6</sup> Interpretation of the Free Trade Commission of Certain Chapter 11 Provisions (July 31, 2001), available at <http://www.state.gov/documents/organization/38790.pdf>.

<sup>7</sup> *Id.*

<sup>8</sup> See U.S. Model BIT Art. 29(1), available at [http://www.ustr.gov/assets/Trade\\_Sectors/Investment/Model\\_BIT/asset\\_upload\\_file\\_847\\_6897.pdf](http://www.ustr.gov/assets/Trade_Sectors/Investment/Model_BIT/asset_upload_file_847_6897.pdf).

<sup>9</sup> See U.S. Model BIT Art. 29(1).

subject to “appropriate arrangements” for the non-disclosure of protected information.<sup>10</sup>

Concerning the non-disclosure of protected information generally, Article 29(3) of the U.S. Model BIT provides that “[n]othing in this Section requires a respondent to disclose protected information or to furnish or allow access to information that it may withhold in accordance with Article 18 [Essential Security Article] or Article 19 [Disclosure of Information Article].”<sup>11</sup> Under the U.S. Model BIT, when a disputing party submits a document containing (in the party’s view) protected information, the disputing party must also submit a redacted version of the document.<sup>12</sup> Under such circumstances, only the redacted version of the document is made available to the public.<sup>13</sup> Also under the U.S. Model BIT, any objection concerning the designation of certain information as protected would be decided by the tribunal.<sup>14</sup>

The investment agreements negotiated by the United States since 2002 reflect the provisions of the U.S. Model BIT with respect to transparency.<sup>15</sup>

#### Question 4: Provision in treaties on third parties’ involvement

Article 28 (3) of the U.S. Model BIT provides that “The tribunal shall have the authority to accept and consider amicus curiae submissions from a person or entity that is not a disputing party.” Like the transparency provisions discussed in the response to Question 3 above, the investment agreements negotiated by the United States since 2002 reflect the provisions of the U.S. Model BIT with respect to amicus curiae submissions.<sup>16</sup>

<sup>10</sup> See U.S. Model BIT Art. 29(2).

<sup>11</sup> The U.S. Model BIT defines “protected information” as “confidential business information or information that is privileged or otherwise protected from disclosure under a Party’s law.” See U.S. Model BIT Art. 1. Article 18 of the U.S. Model BIT provides, in relevant part, that nothing in the treaty shall be construed “to require a Party to furnish or allow access to any information the disclosure of which it determines to be contrary to its essential security interests.” Article 19 of the U.S. Model BIT protects against disclosure of information which would “impede law enforcement or otherwise be contrary to the public interest, or which would prejudice the legitimate commercial interests of particular enterprises, public or private.”

<sup>12</sup> U.S. Model BIT Art. 29(4).

<sup>13</sup> U.S. Model BIT Art. 29(4).

<sup>14</sup> U.S. Model BIT Art. 29(4).

<sup>15</sup> See, e.g., U.S. – Uruguay Bilateral Investment Agreement, Art. 29; U.S. – Rwanda Bilateral Investment Agreement, Art. 29 (both available at [http://www.ustr.gov/Trade\\_Agreements/BIT/Section\\_Index.html](http://www.ustr.gov/Trade_Agreements/BIT/Section_Index.html)). The investment chapters of the following free trade agreements, available at [http://www.ustr.gov/Trade\\_Agreements/Section\\_Index.html](http://www.ustr.gov/Trade_Agreements/Section_Index.html), include similar transparency provisions: Dominican Republic – Central America – United States Free Trade Agreement (CAFTA-DR), Article 10.21; United States – Chile Free Trade Agreement, Art. 10.20; United States – Colombia Trade Promotion Agreement, Art. 10.21; United States – Peru Trade Promotion Agreement, Art. 10.21; United States – Korea Free Trade Agreement (KORUS FTA), Art. 11.21; United States – Morocco Free Trade Agreement, Art. 10.20; U.S. – Oman Free Trade Agreement, Art. 10.20; United States – Panama Trade Promotion Agreement, Art. 10.21; United States – Singapore Free Trade Agreement, Art. 15.20.

<sup>16</sup> See, e.g., U.S. – Uruguay Bilateral Investment Agreement, Art. 28; U.S. – Rwanda Bilateral Investment Agreement, Art. 28. The investment chapters of the following free trade agreements include similar provisions on amicus curiae submissions: Dominican Republic – Central

In addition, the NAFTA FTC has stated, with respect to third-party participation in NAFTA Chapter Eleven arbitrations, that “[n]o provision of the [NAFTA] limits a Tribunal’s discretion to accept written submissions from a person or entity that is not a disputing party.”<sup>17</sup>

The FTC has recommended that specific guidelines be adopted by Chapter Eleven tribunals when considering proposed amicus submissions.<sup>18</sup> The FTC guidelines provide that any proposed amicus submission be accompanied by an application for leave to file, specify the information that is to be included in the application, impose limitations on the length and scope of amicus submissions, and set out various factors to be considered by Chapter Eleven tribunals when deciding whether to grant a third party leave to file. In addition, under the FTC guidelines, a tribunal should ensure that an amicus submission does not disrupt the proceedings and does not unduly burden or unfairly prejudice a disputing party.

Question 5: Any other comment

The United States favours the transparent conduct of investor-State arbitration, as reflected in U.S. practice. Such transparency includes timely publication of submissions and decisions in investor-State arbitration, as well as conducting hearings that are open to the public, subject to the non-disclosure of protected information. Such transparency also includes the participation of third parties, where such participation is appropriate and so long as it does not disrupt the proceedings or unduly burden or unfairly prejudice a disputing party.

- III. Comments received from Governments on transparency in treaty-based investor-State arbitration .....
1. Chile .....

**III. Comments received from Governments on transparency in treaty-based investor-State arbitration**

**1. Chile**

[Original: Spanish]

Question 1: Examples of publicity or transparency of arbitral proceedings; access to documents or hearings

The three requests for arbitration submitted by a foreign investor against Chile invoked bilateral agreements relating to investment protection and promotion. Those agreements, unlike some of the free trade agreements signed recently by Chile, contained no provisions relating to the publicity or transparency of proceedings. There are therefore no examples of such requirements with regard to international arbitration proceedings brought against Chile in connection with foreign investment. However, Chile maintains a policy of making public the awards made in such cases.

Question 2: *Amicus curiae* briefs or other interventions

For the same reason as is indicated in the response above, Chile has no experience of intervention by third parties in international arbitration proceedings relating to foreign investment.

Question 3: Provision in treaties on transparency or publicity

Yes. All investment-related chapters negotiated as part of a free trade agreement contain such provisions. Chile has concluded such agreements with Canada (1997), Mexico (1999), the United States of America (2003), the Republic of Korea (2004), Japan (2007), Peru (2009), Australia (2009) and Colombia (2009).

The texts of the agreements can be viewed at <http://rc.direcon.cl/acuerdo/list> or at [www.direcon.cl/acuerdo/list](http://www.direcon.cl/acuerdo/list).

Question 4: Provision in treaties on third parties' involvement

Yes. All investment-related chapters negotiated as part of a free trade agreement contain *amicus curiae* provisions. Chile has concluded such agreements with Canada (1997), Mexico (1999), the United States of America (2003), the Republic of Korea (2004), Japan (2007), Peru (2009), Australia (2009) and Colombia (2009).

Question 5: Any other comment

Chile considers it appropriate to retain clauses of this type in international investment agreements. Within the framework of the mechanism for the settlement of investor-State disputes, it is established that, among other documents, the following should be made available to the public: the pleadings, statements of claim and files submitted to the tribunal by a disputing party, the records or transcripts of the tribunal's hearings and the orders, decisions and awards issued by the tribunal. It is also established that the tribunal's hearings shall be open to the public except where a disputing party intends to use during a hearing information that is protected from disclosure under the party's domestic law. That requirement is set out in the following agreements: United States, article 10.20; Australia, article 10.22; Colombia, article 9.21; and Peru, article 11.2.

Furthermore, in both statements issued by the North American Free Trade Agreement (NAFTA) Free Trade Commission in relation to public hearings of investor-State arbitration proceedings, it is established that the parties shall consent, and shall request the consent of disputing investors and, as applicable, that of the tribunal, that hearings to which they are parties be open to the public, except to ensure the protection of confidential information, including business confidential information.

### I. Introduction

1. At its forty-first session (New York, 16 June-3 July 2008), the Commission agreed that the topic of transparency in treaty-based investor-State arbitration was worthy of future consideration and should be dealt with as a matter of priority immediately after completion of the revision of the UNCITRAL Arbitration Rules. As to the scope of such work, the Commission agreed by consensus on the importance of ensuring transparency in investor-State dispute resolution. The Commission was of the view that, as noted by the Working Group at its forty-eighth session (A/CN.9/646, para. 57), the issue of transparency as a desirable objective in investor-State arbitration should be addressed by future work. As to the form that any future work product might take, the Commission noted that various possibilities had been envisaged by the Working Group (*ibid.*, para. 69) in the field of treaty-based arbitration, including the preparation of instruments such as model clauses, specific rules or guidelines, an annex to the UNCITRAL Arbitration Rules in their generic form, separate arbitration rules or optional clauses for adoption in specific treaties. The Commission decided that it was too early to make a decision on the form of a future instrument on treaty-based arbitration and that broad discretion should be left to the Working Group in that respect. With a view to facilitating consideration of the issues of transparency in treaty-based arbitration by the Working Group at a future session, the Commission requested the Secretariat, resources permitting, to undertake preliminary research and compile information regarding current practices. The Commission urged member States to contribute broad information to the Secretariat regarding their practices with respect to transparency in investor-State arbitration.<sup>1</sup> Replies by States to a questionnaire circulated by the Secretariat on States' practices with respect to transparency in investor-State arbitration pursuant to the request of the Commission can be found in document A/CN.9/WG.II/WP.159 and its addenda (see paragraph 6 below).

<sup>1</sup> *Official Records of the General Assembly, Sixty-third Session, Supplement No. 17 (A/63/17)*, para. 314.

2. At its forty-third session (New York, 21 June-9 July 2010), with respect to future work in the field of settlement of commercial disputes, the Commission entrusted the Working Group with the task of preparing a legal standard on the topic of transparency in treaty-based investor-State arbitration.<sup>2</sup> Support was expressed for the view that the Working Group could also consider undertaking work in respect of those issues that arose more generally in treaty-based investor-State arbitration, and that would deserve additional work. The prevailing view, in line with the decision previously made by the Commission, was that it was too early to make a decision on the precise form and scope of a future instrument on treaty-based arbitration and that the mandate of the Working Group should be limited to the preparation of rules of uniform law on transparency in treaty-based investor-State arbitration. However, it was agreed that, while operating within that mandate, the Working Group might identify any other topic with respect to treaty-based investor-State arbitration that might also require future work by the Commission. It was agreed that any such topic might be brought to the attention of the Commission at its next session, in 2011.<sup>3</sup>

3. An international investment agreement is a treaty between States for the reciprocal encouragement, promotion and protection of investments. International investment agreements include, for example, bilateral treaties for the promotion and protection of investment (or bilateral investment treaties (“BITs”)), treaties for the avoidance of double taxation (or double taxation treaties), other bilateral and regional trade and investment agreements as well as various multilateral agreements that contain a commitment to liberalize, protect and/or promote investment. The provisions contained in chapters on investment protection of international investment agreements typically cover the following areas: scope and definition of investment and the investor, rules on admission and establishment referring either to the domestic laws and regulations of the host State or to special rights of establishment granted by the treaty, most-favoured treatment provisions and protection provisions such as fair and equitable treatment, compensation in the event of expropriation or damage to the investment, guarantees of free transfers of funds, stabilization clauses and mechanisms for the settlement of both State-State and investor-State disputes. There are at present more than 2,500 international investment agreements.<sup>4</sup>

4. Investor-State dispute settlement provisions in international investment agreements aim at establishing a mechanism for the settlement of disputes allowing an investor from a State party to a treaty to submit to international arbitration a claim against another State party for the breach of an obligation under the treaty. International investment arbitration is one of the fastest growing areas of international dispute settlement. The United Nations Conference on Trade and Development (UNCTAD) reported that, as of the end of 2009, 350 treaty-based

---

<sup>2</sup> Report of the 43rd session of the Commission, in preparation.

<sup>3</sup> Ibid.

<sup>4</sup> For an online compilation of all international investment agreements, see the database of the United Nations Conference on Trade and Development (UNCTAD), available on 28 July 2010 at [http://www.unctadxi.org/templates/Startpage\\_\\_\\_\\_718.aspx](http://www.unctadxi.org/templates/Startpage____718.aspx).

investment arbitration claims had been initiated. Seventy per cent of treaty-based investor-State claims had been filed since 2000 (see annex I).<sup>5</sup>

5. International investment agreements traditionally did not include transparency provisions. A majority of international investment agreements, particularly bilateral investment treaties were concluded in the 1990s and the issue of procedural transparency was not discussed at that time. Furthermore, many international investment agreements refer to mechanisms inspired by international commercial arbitration as the main option for investor-State dispute settlement, which is by nature based on confidentiality of the proceedings. With the increase of cases involving investor-State disputes under international investment agreements, and particularly with the first cases under the North American Free-Trade Agreement (NAFTA) in early 2000, issues such as availability of information regarding cases, access to investor-State dispute settlement awards, access of the public to hearings were raised. States started addressing issues relating to procedural transparency in their national legislation and in investor-State dispute settlement provisions of their investment agreements, while international arbitration institutions began discussing how to address the matter of transparency in arbitration rules and arbitral proceedings. It is only in the international investment agreements negotiated after 2004 that these issues have been addressed.<sup>6</sup>

6. For the purpose of this note, transparency in treaty-based investor-State dispute settlement is understood as a general principle that may pertain to various aspects of the arbitral proceedings. The source for transparency obligations in treaty-based investor-State arbitration may be found in different legal texts, such as the dispute settlement provisions contained in international investment agreements, designated arbitration rules, legislation on arbitration at the place of arbitration and arbitral tribunals' decisions. This note and its addendum seek to provide the Working Group with information on the extent to which transparency is addressed under those legal texts. In order to assist the Working Group in its determination of the possible content and form of its work on transparency in treaty-based investor-State dispute settlement, the concluding remarks, contained in the addendum to this note, provide questions and suggestions for the Working Group's consideration. This note complements document A/CN.9/WG.II/WP.159 and its addenda, which contain a compilation of comments by Governments on their practices or experience with respect to transparency in treaty-based investor-State arbitration received pursuant to the questionnaire circulated by the Secretariat on that matter (see paragraph 1 above).

---

<sup>5</sup> United Nations Conference on Trade and Development, *International Investment Arrangements: World Investment Report, 2010*, United Nations publication, Sales No. E.10.II.D.2.; at p. 84, available on 28 July 2010 at: [http://www.unctad.org/en/docs/wir2010\\_en.pdf](http://www.unctad.org/en/docs/wir2010_en.pdf). This statistic included only claims that had actually been submitted to arbitration. It did not include cases in which only a notice of an intention to submit a claim to arbitration had been filed. It should be noted that there is no complete public record of such cases.

<sup>6</sup> See *International Investment Arrangements: Trends and emerging issues*, UNCTAD Series on International Investment Policies for Development, Part II. Key Issues in New Generations IIAs, J. Investor States Dispute settlement (New York and Geneva 2006), pp. 46-54; available on 28 July 2010 at [http://www.unctad.org/en/docs/iteiit200511\\_en.pdf](http://www.unctad.org/en/docs/iteiit200511_en.pdf).

## **II. Transparency in treaty-based investor-State dispute settlement**

### **A. Dispute settlement provisions in international investment agreements**

7. As discussed in this section, where dispute settlement provisions in international investment agreements address transparency, they usually contain provisions on matters of public access to procedural documents and hearings, and publication of awards. Examples of such provisions that can be found in model international investment agreements or in international investment agreements actually concluded are contained in this section. It may be noted that a number of international investment agreements are silent on that question and do not contain any provision on transparency, leaving that matter to be resolved by applicable rules.

#### **1. Public access to procedural documents and arbitral awards**

##### **(a) General remarks**

8. Dispute resolution clauses in international investment agreements that deal with public access to procedural documents and awards usually provide that documents submitted to, or issued by, the arbitral tribunal shall be publicly available, unless the disputing parties agree otherwise, subject to the deletion of confidential information. Confidential information is usually described as information that is not generally known or accessible to the public and, if disclosed, would cause or threaten to cause prejudice to an essential interest of any individual or entity, or to the interest of a party or would be contrary to personal privacy.

9. Provisions on public access to procedural documents most often include either a general statement on publicity of all procedural documents or a list of procedural documents that should be made publicly available. In that latter case, the following documents have been listed: request for arbitration, notice of arbitration, pleadings, briefs submitted to the tribunal by a disputing party and any written submissions, minutes or transcripts of hearings of the tribunal, where available; and orders, awards, and decisions of the tribunal. Some international investment agreements leave the decision on publication of documents to the parties to the dispute.<sup>7</sup>

10. The responsibility for making that information available to the public lies in certain instances with the arbitral tribunal, in others with the parties. Where parties are authorized to make information public, certain international investment agreements provide that either party may make all information public whereas others limit the right of a party to publicize only its own statements or submissions.

---

<sup>7</sup> See, for instance, the Agreement between the United Mexican States and the Government of the Republic of Iceland on the Promotion and Reciprocal Protection of Investments, signed 24 June 2005, which states the following:

“Article 17 — Awards and Enforcement (...) (4) The final award will only be published with the written consent of both parties to the dispute.”; available on 28 July 2010 at [http://www.unctad.org/sections/dite/ia/docs/bits/Mexico\\_Iceland.PDF](http://www.unctad.org/sections/dite/ia/docs/bits/Mexico_Iceland.PDF).

In general, agreements do not provide details on the manner in which the information is to be conveyed to the public.

11. Concerning the timing for publication, certain international investment agreements provide that the information shall be made available “immediately” or “in a timely manner”, whereas others are silent on that question.

**(b) Examples of dispute settlement provisions in international investment agreements addressing public access to procedural documents and awards**

*(i) Energy Charter Treaty*

12. The 1994 Energy Charter Treaty<sup>8</sup> contains a comprehensive system for settling disputes on matters covered by the Treaty. Article 26 provides various options for investors to have recourse to international arbitration in the event of an alleged breach of the Treaty’s investment provisions. It does not contain specific provisions on public disclosure of the existence of proceedings. The Model Host Government Agreement (HGA) for agreements between an individual State and the project investors for cross-border pipelines presented to the Energy Charter Conference in 2007 contains in its article 19 (11) a provision on dispute settlement, which states that “A copy of the award shall be deposited with the Energy Charter Secretariat, which shall make it generally available.”<sup>9</sup>

*(ii) Model international investment agreements proposed by States*

13. Article 38, paragraphs (3) to (8), of Canada’s Model Foreign Investment Promotion and Protection Agreement 2004 (FIPA),<sup>10</sup> which has also been used in concluded BITs,<sup>11</sup> provides that:

“(3) All documents submitted to, or issued by, the Tribunal shall be publicly available, unless the disputing parties otherwise agree, subject to the deletion of confidential information. (4) Notwithstanding paragraph 3, any Tribunal award under this Section shall be publicly available, subject to the deletion of confidential information. (5) A disputing party may disclose to other persons in connection with the arbitral proceedings such unredacted documents as it considers necessary for the preparation of its case, but it shall ensure that those persons protect the confidential information in such documents. (6) The Parties may share with officials of their respective federal and sub-national governments all relevant unredacted documents in the course of dispute settlement under this Agreement, but they shall ensure that those persons protect any confidential information in such documents. (7) [...] the Tribunal shall not require a Party to furnish or allow access to information the

<sup>8</sup> Available on 28 July 2010 at <http://www.encharter.org/>.

<sup>9</sup> Ibid.

<sup>10</sup> Available on 28 July 2010 at <http://www.international.gc.ca/trade-agreements-accords-commerciaux/assets/pdfs/2004-FIPA-model-en.pdf>. See also the comments of Canada in document A/CN.9/WG.II/WP.159/Add.1.

<sup>11</sup> See for instance the agreement between Canada and the Republic of Peru for the Promotion and Protection of Investment, signed on 14 November 2006 which contains, in its article 38 on “Public Access to Hearings and Documents” provisions similar to Canada’s FIPA. Available on 28 July 2010 at [http://www.unctad.org/sections/dite/ia/docs/bits/canada\\_peru.pdf](http://www.unctad.org/sections/dite/ia/docs/bits/canada_peru.pdf). See also the comments of Canada in document A/CN.9/WG.II/WP.159/Add.1.

disclosure of which would impede law enforcement or would be contrary to the Party's law protecting Cabinet confidences, personal privacy or the financial affairs and accounts of individual customers of financial institutions, or which it determines to be contrary to its essential security. (8) To the extent that a Tribunal's confidentiality order designates information as confidential and a Party's law on access to information requires public access to that information, the Party's law on access to information shall prevail. However, a Party should endeavour to apply its law on access to information so as to protect information designated confidential by the Tribunal."

14. The United States of America Model Treaty concerning the Encouragement and Reciprocal Protection of Investment ("US Model BIT"),<sup>12</sup> adopted in 2004 contains, in its section B, specific provision on transparency of arbitral proceedings. Article 29 (1) provides that:

"(1) Subject to paragraphs 2 and 4, the respondent shall, after receiving the following documents, promptly transmit them to the non-disputing Party and make them available to the public: (a) the notice of intent; (b) the notice of arbitration; (c) pleadings, memorials, and briefs submitted to the tribunal by a disputing party and any written submissions submitted pursuant to Article 28 (2) [Non-Disputing Party submissions] and (3) [Amicus Submissions] and Article 33 [Consolidation]; (d) minutes or transcripts of hearings of the tribunal, where available; and (e) orders, awards, and decisions of the tribunal."

15. Regarding protected information, article 29 (3) provides that "Nothing in this Section requires a respondent to disclose protected information or to furnish or allow access to information that it may withhold in accordance with Article 18 [Essential Security Article] or Article 19 [Disclosure of Information Article]." Article 29 (5) of the US Model BIT deals with potential conflict with a party's national law on access to information and provides that "nothing in this Section requires a respondent to withhold from the public information required to be disclosed by its laws."

(iii) *Regional investment agreements*

16. The North American Free Trade Agreement ("NAFTA") came into force in January 1994, creating a free trade area between Canada, Mexico and the United States of America. NAFTA Chapter 11 contains details on access for non-disputing NAFTA parties to procedural documents and awards.<sup>13</sup> Article 1127 provides that the non-disputing NAFTA parties shall receive written notice of any arbitration and copies of all pleadings. Article 1129 (1) specifies that the non-disputing NAFTA parties also have the right to receive all the evidence submitted to the tribunal as well as the written arguments of the disputing parties. Under Article 1129 (2) any information received under paragraph (1) must be treated as if the recipient were a disputing Party. In relation to disclosure of award details, article 1137 (4) states that

<sup>12</sup> Available on 28 July 2010 at <http://www.state.gov/documents/organization/117601.pdf>. See also the comments of the United States of America in document A/CN.9/WG.II/WP.159/Add.3.

<sup>13</sup> Available on 28 July 2010 at <http://www.nafta-sec-alena.org/en/view.aspx?x=343&mtpid=142>. See also the comments of Canada in document A/CN.9/WG.II/WP.159/Add.1 and the comments of the United States of America in document A/CN.9/WG.II/WP.159/Add.3.

“Annex 1137 (4) applies to the Parties specified in that Annex with respect to publication of an award”. Annex 1137 (4) provides that, in an arbitration involving either Canada or the United States, either one of those countries or a disputing investor that is a party to the arbitration may make an award public. In the case of Mexico, the applicable arbitration rules apply to the publication of an award.

17. The “Notes of Interpretation of Certain Chapter 11 Provisions” published by the NAFTA Free Trade Commission (FTC) on 31 July 2001 clarify the question of access to documents as follows:

“(a) Nothing in the NAFTA imposes a general duty of confidentiality on the disputing parties to a Chapter Eleven arbitration and, subject to the application of Article 1137 (4), nothing in the NAFTA precludes the Parties from providing public access to documents submitted to, or issued by, a Chapter Eleven tribunal. (b) In the application of the foregoing: (i) In accordance with Article 1120 (2), the NAFTA Parties agree that nothing in the relevant arbitral rules imposes a general duty of confidentiality or precludes the Parties from providing public access to documents submitted to, or issued by, Chapter Eleven tribunals, apart from the limited specific exceptions set forth expressly in those rules.” [The remaining subparagraphs and paragraph (c) of the Notes contain provisions on protection of confidential information.]

18. The Free Trade Agreement between the United States, Central America and the Dominican Republic (CAFTA-DR)<sup>14</sup> signed on 5 August 2004 contains under chapter 10, article 10.21 on “Transparency of Arbitral Proceedings” the following provisions:

“1. Subject to paragraphs 2 and 4, the respondent shall, after receiving the following documents, promptly transmit them to the non-disputing Parties and make them available to the public: (a) the notice of intent; (b) the notice of arbitration; (c) pleadings, memorials, and briefs submitted to the tribunal by a disputing party and any written submissions submitted pursuant to Article 10.20.2 and 10.20.3 and Article 10.25; (d) minutes or transcripts of hearings of the tribunal, where available; and (e) orders, awards, and decisions of the tribunal. [...] 3. Nothing in this Section requires a respondent to disclose protected information or to furnish or allow access to information that it may withhold in accordance with Article 21.2 (Essential Security) or Article 21.5 (Disclosure of Information). 4. Any protected information that is submitted to the tribunal shall be protected from disclosure in accordance with the following procedures: (a) Subject to subparagraph (d), neither the disputing parties nor the tribunal shall disclose to any non-disputing Party or to the public any protected information where the disputing party that provided the information clearly designates it in accordance with subparagraph (b); (b) Any disputing party claiming that certain information constitutes protected information shall clearly designate the information at the time it is submitted to the tribunal; (c) A disputing party shall, at the same time that it submits a document containing information claimed to be protected information, submit

<sup>14</sup> Available on 28 July 2010 at <http://www.ustr.gov/trade-agreements/free-trade-agreements/cafta-dr-dominican-republic-central-america-fta/final-text>. See also the comments of the Dominican Republic and El Salvador in document A/CN.9/WG.II/WP.159/Add.2.

a redacted version of the document that does not contain the information. Only the redacted version shall be provided to the non-disputing Parties and made public in accordance with paragraph 1; and (d) The tribunal shall decide any objection regarding the designation of information claimed to be protected information. If the tribunal determines that such information was not properly designated, the disputing party that submitted the information may (i) withdraw all or part of its submission containing such information, or (ii) agree to resubmit complete and redacted documents with corrected designations in accordance with the tribunal's determination and subparagraph (c). In either case, the other disputing party shall, whenever necessary, resubmit complete and redacted documents which either remove the information withdrawn under (i) by the disputing party that first submitted the information or redesignate the information consistent with the designation under (ii) of the disputing party that first submitted the information. 5. Nothing in this Section requires a respondent to withhold from the public information required to be disclosed by its laws."

19. The Agreement Establishing the Asean-Australia-New Zealand Free Trade Area (AANZFTA),<sup>15</sup> signed on 27 February 2009, contains under chapter 11, article 26 on "Transparency of Arbitral Proceedings" the following provisions:

"1. Subject to Paragraphs 2 and 3, the disputing Party may make publicly available all awards and decisions produced by the tribunal. [...] 3. Any information specifically designated as confidential that is submitted to the tribunal or the disputing parties shall be protected from disclosure to the public. 4. A disputing party may disclose to persons directly connected with the arbitral proceedings such confidential information as it considers necessary for the preparation of its case, but it shall require that such confidential information is protected. 5. The tribunal shall not require a Party to furnish or allow access to information the disclosure of which would impede law enforcement or would be contrary to the Party's law protecting Cabinet confidences, personal privacy or the financial affairs and accounts of individual customers of financial institutions, or which it determines to be contrary to its essential security. 6. The non-disputing Party shall be entitled, at its cost, to receive from the disputing Party a copy of the notice of arbitration, no later than 30 days after the date that such document has been delivered to the disputing Party. The disputing Party shall notify all other Parties of the receipt of the notice of arbitration within 30 days thereof."

(iv) *Examples of bilateral investment agreements*

20. The Agreement between Japan and the United Mexican States, for the strengthening of the economic partnership signed on 17 September 2004 ("Japan-Mexico FTA")<sup>16</sup> contains specific provisions concerning public access to procedural documents and awards. Article 94 (4) provides that:

"Either disputing party may make available to the public in a timely manner all documents, including an award, submitted to, or issued by,

a Tribunal established under this Section, subject to redaction of: (a) confidential business information; (b) information which is privileged or otherwise protected from disclosure under the applicable law of either Party; and (c) information which the Party must withhold pursuant to the relevant arbitral rules, as applied.”

21. In addition, article 94 includes a note that specifies that:

“For greater certainty, it is confirmed by both Parties that a Party may share with officials of its central or local government in the case of Japan, and its federal or state government in the case of Mexico, all relevant documents in the course of dispute settlement under this Section, including confidential information and that the disputing parties may disclose to other persons in connection with the arbitral proceedings the documents submitted to, or issued by, a Tribunal established under this Section, as they consider necessary for the preparation of their cases; provided that they shall ensure that those persons protect the confidential information in such documents.”

22. The Singapore-Australia Free Trade Agreement, signed on 17 February 2003,<sup>17</sup> allows a party to disclose its own procedural documents to the public subject to protection of designated confidential information. Article 7 (2) of section 16 “Dispute Settlement” of the Agreement provides that:

“2. The deliberations of an arbitral tribunal and the documents submitted to it shall be kept confidential. Nothing in this Article shall preclude a Party from disclosing statements of its own positions or its submissions to the public; provided that a Party shall treat as confidential information submitted by the other Party to the arbitral tribunal which that Party has designated as confidential. Where a Party submits a confidential version of its written submissions to the arbitral tribunal, it shall also, upon request of the other Party, provide a non-confidential summary of the information contained in its submissions that could be disclosed to the public.”

## **2. Open hearings**

### **(a) General remarks**

23. Dispute resolution provisions in international investment agreements favouring transparency provide that hearings shall be open to the public, subject to the protection of confidential information. Logistical arrangements are usually left to the arbitral tribunal to be determined, in consultation with the disputing parties.

**(b) Examples of dispute settlement provisions in international investment agreements addressing open hearings**

*(i) Model international investment agreements proposed by States*

24. Article 38 (1) of Canada's FIPA,<sup>18</sup> which has also been used in concluded BITs,<sup>19</sup> provides as follows:

"1. Hearings held under this Section shall be open to the public. To the extent necessary to ensure the protection of confidential information, including business confidential information, the Tribunal may hold portions of hearings in camera. 2. The Tribunal shall establish procedures for the protection of confidential information and appropriate logistical arrangements for open hearings, in consultation with the disputing parties."

25. The US Model BIT<sup>20</sup> includes in article 29 (2) a provision, which explicitly provides for public hearings and which has been used in concluded BITs:<sup>21</sup>

"2. The tribunal shall conduct hearings open to the public and shall determine, in consultation with the disputing parties, the appropriate logistical arrangements. However, any disputing party that intends to use information designated as protected information in a hearing shall so advise the tribunal. The tribunal shall make appropriate arrangements to protect the information from disclosure."

26. In addition, article 29 (1) of the U.S. Model BIT provides that the respondent should make the minutes or transcripts of hearings of the tribunal available to the public.

*(ii) Regional investment agreements*

27. The CAFTA-DR provides for hearings in its article 10.21.2 "open to the public" and for the tribunal to determine "in consultation with the disputing parties, the appropriate logistical arrangements", as follows:

"2. The tribunal shall conduct hearings open to the public and shall determine, in consultation with the disputing parties, the appropriate logistical arrangements. However, any disputing party that intends to use information designated as protected information in a hearing shall so advise the tribunal."

<sup>18</sup> Available on 28 July 2010 at <http://www.international.gc.ca/trade-agreements-accords-commerciaux/assets/pdfs/2004-FIPA-model-en.pdf>. See also the comments of Canada in document A/CN.9/WG.II/WP.159/Add.1.

<sup>19</sup> See for instance the agreement between Canada and the Republic of Peru for the Promotion and Protection of Investment, signed on 14 November 2006 which contains, in its article 38 on "Public Access to Hearings and Documents" provisions similar to Canada's FIPA. Available on 28 July 2010 at [http://www.unctad.org/sections/dite/ia/docs/bits/canada\\_peru.pdf](http://www.unctad.org/sections/dite/ia/docs/bits/canada_peru.pdf).

<sup>20</sup> Available on 28 July 2010 at <http://www.state.gov/documents/organization/29030.doc>.

<sup>21</sup> See, for example, article 29 (2) of the Treaty between the United State of America and Uruguay concerning the Encouragement and Reciprocal Protection of Investment, signed 4 November 2005, which is available at: [http://www.unctad.org/sections/dite/ia/docs/bits/US\\_Uruguay.pdf](http://www.unctad.org/sections/dite/ia/docs/bits/US_Uruguay.pdf).

The tribunal shall make appropriate arrangements to protect the information from disclosure.”<sup>22</sup>

(iii) *Examples of bilateral investment agreements*

28. Article 10.22.2, contained in chapter 10 of the Australia-Chile Free Trade Agreement, signed on 30 July 2008,<sup>23</sup> provides that hearings shall be open to the public, provided that confidential information is protected. It provides that:

“2. The tribunal shall conduct hearings open to the public and shall determine, in consultation with the disputing parties, the appropriate logistical arrangements. However, any disputing party that intends to use information designated as confidential business information or information that is privileged or otherwise protected from disclosure under a Party’s law in a hearing shall so advise the tribunal. The tribunal shall make appropriate arrangements to protect the information from disclosure including closing the hearing for the duration of any discussion of confidential information.”

## **B. Arbitration rules used in treaty-based investor-State dispute settlement**

29. With the exception of the arbitration rules of the International Centre for the Settlement of Investment Disputes (ICSID), arbitration rules in general do not provide for, nor prohibit, public access to procedural documents or hearings and publication of the award(s), and leave those matters to the agreement of the parties, or to the arbitral tribunal’s determination based on the agreement of the parties, the applicable arbitration rules, and the law applicable to arbitral procedure.<sup>24</sup> As reported by UNCTAD in a 2010 report on “Latest Developments in Investor-State Dispute Settlement”, “of the total 357 known disputes, 225 were filed with the International Centre for Settlement of Investment Disputes (ICSID) or under the ICSID Additional Facility, 91 under the United Nations Commission on International Trade Law (UNCITRAL) Rules, 19 with the Stockholm Chamber of Commerce, eight were administered by the Permanent Court of Arbitration in The Hague, five with the International Chamber of Commerce (ICC) and four are ad hoc cases. One further case was filed with the Cairo Regional Centre for International Commercial Arbitration. In four cases the applicable rules are unknown so far.”

<sup>22</sup> Available on 28 July 2010 at <http://www.ustr.gov/trade-agreements/free-trade-agreements/cafta-dr-dominican-republic-central-america-fta/final-text>. See also the comments of the Dominican Republic and El Salvador in document A/CN.9/WG.II/WP.159/Add.2.

<sup>24</sup> See *Latest Developments in Investor-State Dispute Settlement*, IIA Issues Note No. 1 (2010), International Investment Agreements, p. 2; available on 28 July at [http://www.unctad.org/en/docs/webdiaeia20103\\_en.pdf](http://www.unctad.org/en/docs/webdiaeia20103_en.pdf).

**1. ICSID Convention, Regulations and Rules<sup>25</sup>****(a) Public access to procedural documents and arbitral awards**

30. Regulation 22 of the ICSID Administrative and Financial Regulations provides that:

“1. The Secretary-General shall appropriately publish information about the operation of the Centre, including the registration of all requests for conciliation or arbitration and in due course an indication of the date and method of the termination of each proceeding. 2. If both parties to a proceeding consent to the publication of: (a) reports of Conciliation Commissions; (b) arbitral awards; or (c) the minutes and other records of proceedings, the Secretary-General shall arrange for the publication thereof, in an appropriate form with a view to furthering the development of international law in relation to investments.”

31. The publication mentioned in Regulation 22 (1) of the ICSID Administrative and Financial Regulations is done on the ICSID website.

32. While it is not clear whether the parties themselves are allowed to disclose procedural documents, there are clear rules governing the Centre and the arbitrators. Article 48 (5) of the ICSID Convention provides that:

“5. The Centre shall not publish the award without the consent of the parties.”

33. This prohibition is repeated in Rule 48 (4) of the ICSID Arbitration Rules and extends to ICSID arbitrators by the declarations they must make under Rule 6 (2) of the ICSID Arbitration Rules. The second part of Rule 48 (4) (revised in 2006), however, provides that, even without the parties’ consent, “The Centre shall [...] promptly include in its publications excerpts of the legal reasoning of the tribunal.”

**(b) Open hearings**

34. Rule 32 (2) of the ICSID Arbitration Rules relates to third parties’ presence at hearings and provides that:

“2. Unless either party objects, the Tribunal, after consultation with the Secretary-General, may allow other persons, besides the parties, their agents, counsel and advocates, witnesses and experts during their testimony, and officers of the Tribunal, to attend or observe all or part of the hearings, subject to appropriate logistical arrangements. The Tribunal shall for such cases establish procedures for the protection of proprietary or privileged information.”

**2. UNCITRAL Arbitration Rules<sup>26</sup>****(a) Public access to procedural documents and arbitral awards**

35. The 1976 UNCITRAL Arbitration Rules as well as the Rules as revised in 2010 do not address the issue of public access to procedural documents. It therefore

---

<sup>25</sup> Available on 28 July 2010 at [http://icsid.worldbank.org/ICSID/StaticFiles/basicdoc/CRR\\_English-final.pdf](http://icsid.worldbank.org/ICSID/StaticFiles/basicdoc/CRR_English-final.pdf).

remains a matter to be agreed by the parties and, failing such agreement, to be decided by the arbitral tribunal.

36. Regarding publication of an award, article 32, paragraph (5), of the 1976 UNCITRAL Arbitration Rules provides that: “The award may be made public only with the consent of both parties.” Article 34, paragraph (5), of the UNCITRAL Arbitration Rules (as revised in 2010) provides as follows:

“5. An award may be made public with the consent of all parties or where and to the extent disclosure is required of a party by legal duty, to protect or pursue a legal right or in relation to legal proceedings before a court or other competent authority.”

**(b) Open hearings**

37. Article 25, paragraph (4), of the 1976 version of the UNCITRAL Arbitration Rules and article 28, paragraph (3), of the UNCITRAL Arbitration Rules, (as revised in 2010) provides that: “Hearings shall be held in camera unless the parties agree otherwise. [...]”.

**3. Rules of international arbitration institutions**

**(a) International Chamber of Commerce — Rules of Arbitration (“ICC Arbitration Rules”)<sup>26</sup>**

38. The ICC Arbitration Rules contain no specific provision on public disclosure of the existence of proceedings, or public access to procedural documents. There is also no provision requiring the parties to keep confidential the information related to the arbitration. It may be noted that article 20 (7) authorizes the arbitral tribunal to take measures to protect trade secrets and confidential information.

39. Under article 21 (3) of the ICC Arbitration Rules, “[...] Save with the approval of the Arbitral Tribunal and the parties, persons not involved in the proceedings shall not be admitted”.

**(b) London Court of International Arbitration (LCIA) Rules<sup>28</sup>**

40. Article 30.1 expresses the principle of non-disclosure of procedural documents and awards, as follows:

“1. Unless the parties expressly agree in writing to the contrary, the parties undertake as a general principle to keep confidential all awards in their arbitration, together with all materials in the proceedings created for the purpose of the arbitration and all other documents produced by another party in the proceedings not otherwise in the public domain — save and to the extent

<sup>26</sup> For the 1976 version of the UNCITRAL Arbitration Rules, see *Official Records of the General Assembly, Thirty-first Session, Supplement No. 17 (A/31/17)*, para. 57. For UNCITRAL Arbitration Rules (as revised in 2010), see Annex I of the report of the 43rd session of the Commission. Also available at <http://www.uncitral.org>.

<sup>27</sup> Available on 28 July 2010 at [http://www.iccwbo.org/uploadedFiles/Court/Arbitration/other/rules\\_arb\\_english.pdf](http://www.iccwbo.org/uploadedFiles/Court/Arbitration/other/rules_arb_english.pdf).

<sup>28</sup> Available on 28 July 2010 at [http://www.lcia.org/Dispute\\_Resolution\\_Services/LCIA\\_Arbitration\\_Rules.aspx](http://www.lcia.org/Dispute_Resolution_Services/LCIA_Arbitration_Rules.aspx).

that disclosure may be required of a party by legal duty, to protect or pursue a legal right or to enforce or challenge an award in bona fide legal proceedings before a state court or other judicial authority”.

41. Article 30.3 provides that:

“3. The LCIA Court does not publish any award or any part of an award without the prior written consent of all parties and the Arbitral Tribunal.”

42. Under article 19.4, “[a]ll meetings and hearings shall be in private unless the parties agree otherwise in writing or the Arbitral Tribunal directs otherwise.”

**(c) Arbitration Rules of the Arbitration Institute of the Stockholm Chamber of Commerce (“SCC Arbitration Rules”)<sup>29</sup>**

43. The SCC Arbitration Rules contain a general principle on confidentiality, stated in article 46 as follows:

“Unless otherwise agreed by the parties, the SCC Institute and the Arbitral Tribunal shall maintain the confidentiality of the arbitration and the award.”

44. Article 27, paragraph (3), of the SCC Arbitration Rules provides that:

“Unless otherwise agreed by the parties, hearings will be held in private.”

**(d) International Arbitration Rules of the American Arbitration Association (“AAA International Arbitration Rules”)<sup>30</sup>**

45. The AAA International Arbitration Rules provide in their article 27 that:

“An award may be made public only with the consent of all parties or as required by law.”

46. Article 34 on confidentiality provides that:

“[...] unless otherwise agreed by the parties, or required by applicable law, the members of the tribunal and the administrator shall keep confidential all matters relating to the arbitration or the award.”

**(e) Arbitration Rules of the Permanent Court of Arbitration (“PCA”) involving States<sup>31</sup>**

47. The PCA Optional Rules for Arbitrating Disputes Between Two States (1992) are based on the 1976 UNCITRAL Arbitration Rules, with modifications to reflect the public international law character of inter-States disputes. According to article 32, paragraph (5), an award may only be made public with the consent of the parties. In accordance with article 25, paragraph (4), hearings are held in camera,

	3. Guidelines . . . . .	31

## **II. Transparency in treaty-based investor-State dispute settlement (*continued*)**

### **C. Legislation on international commercial arbitration**

1. In addition to the chosen rules of arbitration, the arbitration procedure will be governed by the law on international commercial arbitration at the place of arbitration. Arbitration between two private parties is the main focus of legislation on international commercial arbitration, and the manner in which procedural transparency is addressed is not necessarily tailored to address the specific needs of investor-State arbitration.

#### **1. The UNCITRAL Model Law on International Commercial Arbitration**

2. The UNCITRAL Model Law on International Commercial Arbitration does not include provisions on confidentiality, nor disclosure, and therefore does not provide for a uniform solution on that matter.

#### **2. Legislation favouring privacy and confidentiality**

3. Where confidentiality is addressed in national laws on international commercial arbitration, there is no single approach to the scope of the obligation of confidentiality in terms of the information that is to be treated as confidential, the persons to whom the obligation attaches, or permissible exceptions to prohibitions on disclosure and communication. In terms of the material or information that is to be kept confidential, some provisions include a general description of facts or other information relating to the dispute or arbitral proceedings. Other provisions adopt a more particular description of the information to be kept confidential and include various categories of information, which are accorded different treatment. These categories include, for example, the fact that the arbitration is taking place; the identity of the arbitrators; written and oral arguments; reference to the evidence given by a party or a witness; communications between parties themselves or their advisors prior to, or in the course of, the arbitration; information that is inherently confidential, such as trade secrets and commercial-in-confidence information; and the contents of the award. As to the persons to whom the duty of confidentiality is to extend, a range of persons are covered such as the arbitrators; the staff of the arbitration institution (where the arbitration is institutional); parties and their agents; witnesses, including experts; and counsel and advisors.

#### **3. Legislation favouring procedural transparency**

4. Some of the circumstances covered by legislation where disclosure of information is permitted in arbitral proceedings include the following: where the parties consent to disclosure; where the information is in the public domain; where disclosure is required by law or a regulatory body; where there is a reasonable need for the protection of a party's legitimate interests; and where it is in the interest of justice or in the public interest. Some provisions also deal with special conditions that attach to the disclosure. Such conditions may vary with the time at which disclosure occurs. If information is to be disclosed, for example, during the arbitral proceedings, one approach is to require that notice of the disclosure be given to both

the arbitral tribunal and the other party. Where disclosure occurs once the arbitration has been concluded, only notice to the other party may be relevant.

## **D. Decisions of arbitral tribunals involving procedural transparency**

5. Decisions of arbitral tribunals involving procedural transparency generally illustrate the ad hoc approach to that matter adopted by tribunals, in the absence of consistent guidelines in international investment agreements, applicable arbitration rules or applicable legislation.

### **1. Procedural documents and arbitral awards**

6. In a case governed by the ICSID Additional Facility Rules,<sup>1</sup> the arbitral tribunal held that: “Neither the NAFTA nor the ICSID (Additional Facility) Rules contain any express restriction on the freedom of the parties [...]. Though, it is frequently said that one of the reasons for recourse to arbitration is to avoid publicity, unless the agreement between the parties incorporates such a limitation, each of them is free to speak publicly of the arbitration. [...] It still appears to the Arbitral Tribunal that it would be of the advantage of the orderly unfolding of the arbitral process and conducive to the maintenance of working relations between the parties if during the proceedings they were both to limit public discussion of the case to a minimum, subject only to any externally imposed obligation of disclosure by which either of them may be legally bound.”<sup>2</sup> In another case governed by the ICSID Arbitration Rules,<sup>3</sup> the claimant (the investor) complained about unilateral disclosure of the minutes of the first meeting of the arbitral tribunal and of a procedural order by the respondent (the State) who publicized those documents on the Internet. The claimant requested that the arbitral tribunal issue an order to ensure the confidentiality of those and other documents in the proceeding.<sup>4</sup> The Tribunal held that there was neither any general duty of confidentiality nor any general rule of transparency in ICSID arbitral proceedings. Consequently, the arbitral tribunal found that it was the responsibility of each arbitral tribunal to find the appropriate balance between confidentiality of the documents and transparency of the proceedings.<sup>5</sup> The Tribunal held that, due to the significant media coverage of that case, there was a sufficient risk of aggravation of exacerbation of the dispute. Therefore, it decided that both parties should refrain from disclosing minutes or records of hearings, documents produced by either party in disclosure procedures and pleadings and correspondence. However, to balance its decision, it held that the parties were free to engage in general discussion about the case in public, provided that “any such public discussion was restricted to what was necessary, and was not used as an instrument to antagonize the parties, exacerbate their differences, unduly

<sup>1</sup> *Metalclad Corp. v. Mexico*, Case No. ARB(AF)/97/, Award, 30 August 2000, 16 ICSID Review 168 (2001); 40 ILM 36 (2001), award available on 29 July 2010 at <http://www.worldbank.org/icsid/cases/awards.htm>.

<sup>2</sup> *Ibid.*, para. 13.

<sup>3</sup> *Biwater GAUFF (Tanzania) Ltd. v. United Republic of Tanzania*, ICSID Case No. ARB/05/22, Award, 24 July 2008, award available on 29 July 2010 at <http://www.worldbank.org/icsid/cases/awards.htm>.

<sup>4</sup> *Ibid.*, paras. 45-51.

<sup>5</sup> *Ibid.*

pressure one of them, or render the resolution of the dispute potentially more difficult or circumvent the terms of this procedural order.”<sup>6</sup>

7. In a case governed by the 1976 UNCITRAL Arbitration Rules,<sup>7</sup> a NAFTA arbitral tribunal held, with respect to transparency, that “[...] whatever may be the position in private consensual arbitrations between commercial parties, it has not been established that any general principle of confidentiality exists in an arbitration such as that currently before this tribunal.”<sup>8</sup> In a first order, the arbitral tribunal ordered that certain documents, including the notice of arbitration and the statements of claim and defence could be released into the public domain under the 1976 UNCITRAL Arbitration Rules. In a further temporary order, the arbitral tribunal ordered that all transcripts and other records of the hearings be kept confidential and only be disclosed according to the conditions required for “Protected Documents”. In another NAFTA case also governed by the 1976 UNCITRAL Arbitration Rules,<sup>9</sup> certain third parties petitioned the arbitral tribunal to be permitted to intervene as *amici curiae* and, as part of that claim, sought copies of all documents filed in the arbitration. The arbitral tribunal held that disclosure or confidentiality was to be determined by the agreement of the disputing parties as recorded in the order regarding disclosure and confidentiality. Pursuant to that order, “either party was at liberty to disclose the major pleadings, orders and awards of the Tribunal into the public domain” (subject to deletion of trade secret information).<sup>10</sup> In another case,<sup>11</sup> where third parties petitioned the arbitral tribunal requesting, *inter alia*, the disclosure of the statement of claim and defence, memorials, counter-memorials, pre-hearing memoranda, witness statements and expert reports, including appendices and exhibits to such submissions, and any applications or motions to the arbitral tribunal,<sup>12</sup> the arbitral tribunal held that under NAFTA Chapter 11 and the 1976 UNCITRAL Arbitration Rules, provision was made for the communication of pleadings, documents and evidence to the other disputing party, the other NAFTA Parties, the arbitral tribunal and the secretariat — and to no one else. The matter was also subject to any agreement between the parties or order in respect of confidentiality. The arbitral tribunal found that while principles of transparency might support the release of some of the documentation, that was not a matter which could be the subject of a general ruling. Some

documentation might be available in the public domain through any agreement or confidentiality order that might be made, or otherwise lawfully.<sup>13</sup>

## 2. Hearings

8. In an arbitration case under the 1976 UNCITRAL Arbitration Rules,<sup>14</sup> petitions submitted to the arbitral tribunal by different organizations contained requests for permission to, inter alia, have observer status at oral hearings. The arbitral tribunal came to the conclusion that because article 25, paragraph (4), of the 1976 UNCITRAL Arbitration Rules provided that hearings were to be held in camera, the petitioners could not be granted the right to attend oral hearings of the arbitration. The arbitral tribunal held that the phrase “in camera” was clearly intended to exclude members of the public, i.e., non-party third persons such as the petitioners.<sup>15</sup> However, at a later stage of the proceedings, the parties agreed to make the hearings open to the public and the hearings were broadcasted live. In addition, transcripts of hearings on the merits as well as the final award were published. Along the same lines, in another case,<sup>16</sup> while examining both Chapter 11 of NAFTA and the 1976 UNCITRAL Arbitration Rules, the arbitral tribunal considered whether those Rules allowed public access to hearings. It noted that article 25, paragraph (4), of 1976 UNCITRAL Arbitration Rules, under which hearings were held in camera unless otherwise agreed by the parties, prevented third parties or their representatives from attending the hearings in the absence of both parties agreeing thereto.<sup>17</sup> The parties agreed to make the proceedings open to the public and the hearings were broadcasted live. In addition, the final award and dissenting opinion were published. Similarly, in another case initiated under Chapter 11 of the NAFTA and governed by the 1976 UNCITRAL Arbitration Rules, the parties agreed to make the hearings open to the public. At the request of the parties and the arbitral tribunal, ICSID accepted to host the hearings. The hearings were broadcasted live and hearing transcripts were published.<sup>18</sup>

<sup>18</sup> ICSID Release News, “Canfor Corporation v. United States of America NAFTA/UNCITRAL Arbitration Rules Proceeding” (December 2, 2004), available on 29 July 2010 at: [http://icsid.worldbank.org/ICSID/FrontServlet?requestType=CasesRH&actionVal=OpenPage&PageType=AnnouncementsFrame&FromPage=NewsReleases&pageName=Archive\\_%20Announcement13](http://icsid.worldbank.org/ICSID/FrontServlet?requestType=CasesRH&actionVal=OpenPage&PageType=AnnouncementsFrame&FromPage=NewsReleases&pageName=Archive_%20Announcement13).

### **III. Concluding remarks and questions for possible consideration by the Working Group**

#### **A. Policy considerations on transparency**

9. The question of transparency in treaty-based investor-State arbitration arises from the presence of a State in the arbitration, the subject-matter of the dispute, which often raises questions of public policy, public interest and the amount of potential liability. Transparency has been viewed as one of the central aspects of good governance claims directed against States and is also considered by private parties as an important characteristic of corporate social responsibility. The underlying functions fulfilled and values protected by transparency apply also to dispute settlement methods. However, confidentiality is generally regarded as an important feature of arbitration. The need to protect business or governmental secrets seems to be largely admitted, as is the need to protect proceedings from any outside pressures on the parties or on the arbitral tribunals. Confidentiality, at least during arbitral proceedings, may be seen as contributing to the de-politicization of investment disputes.

10. Taking into account that both transparency and confidentiality can be considered as legitimate interests of investor-State treaty-based arbitration, the Working Group may wish to consider whether a right balance should be found to protect both interests and whether it would be useful to formulate policy considerations on principles underlying transparency in treaty-based investor-State arbitration.

#### **B. Matters for possible consideration regarding transparency**

##### **1. General remarks**

11. The examples taken from international investment agreements, arbitration rules and case law regarding the question of transparency in treaty-based investor-State arbitration and reflected in part II of this note illustrate possible responses to the general question of how to achieve transparency, while balancing the public interest and the need to protect confidentiality.

12. It may be recalled that at the forty-first session of the Commission, a delegation made suggestions that work on transparency should seek to accomplish five objectives: “(1) creating public knowledge of the initiation of an investor-State arbitration; (2) allowing third parties to make submissions to the tribunal where such submissions would be helpful and relevant and would not unduly delay, interfere with, or increase the costs of, the proceeding; (3) allowing open hearings; (4) making the decisions and award of the tribunal public; and (5) preserving the existing power of an arbitral tribunal to allow closed proceedings and restrict access to documents, or portions thereof, when necessary to protect confidential business information and/or information that is privileged or otherwise protected from disclosure under the domestic law of the disputing State” (see document A/CN.9/662, para. 17). The Working Group may wish to consider the following questions in relation to the scope of work on procedural transparency.

## **2. Persons or institutions concerned**

13. The Working Group may wish to consider how provisions on transparency should determine the rights and obligations of each of the persons involved in the arbitration proceedings, i.e., the States parties to international investment agreements, the parties to the dispute and their representatives, the arbitration institution, if any, and the arbitral tribunal. The rights and obligations of third parties are discussed in paragraphs 20 and 21 below.

14. In particular, it should be clarified whether it would be more appropriate that the parties to the dispute, the arbitral tribunal or an institution be in charge of conveying information to the public. The extent to which the parties may engage in general discussion about the case in public, or make disclosures, and the time at which this would be authorized may also need to be clarified. The Working Group may also wish to determine whether publication should be automatic, left to the parties' discretion or be subject to prior permission by the arbitral tribunal, taking into account the intent of the parties, or should be organized in any other manner.

## **3. Information subject to publicity**

15. The Working Group may wish to consider whether there should be a general rule regarding public access to procedural documents and arbitral awards or the extent to which those matters should be left for individual decisions to be made by the parties or the arbitral tribunal. The Working Group may also wish to consider whether cost elements should be addressed and, in the affirmative, how.

16. Another matter for possible consideration is whether provisions on public access to procedural documents should be drafted in the form of a general statement or should instead contain a list of procedural documents to be made publicly available. In that latter case, the Working Group may wish to decide whether documents to be publicized should include some or all of the following: the notice of arbitration and the response thereto, the minutes or records of hearings; any of the documents produced in the arbitral proceedings by the parties, whether pursuant to a disclosure exercise or otherwise; any of the pleadings or written memorials (and any attached witness statements or expert reports); correspondence between the parties and/or the arbitral tribunal exchanged in respect of the arbitral proceedings, decisions, orders or directions of the arbitral tribunal; and awards.

17. In case the Working Group would consider that a provision on transparency should include publication of procedural documents, it may also wish to consider whether and to what extent documents revealing business secrets or other confidential information should be exempt from possible public disclosure and consider whether additional guidance should be provided.

## **4. Recipients of information**

18. The Working Group may wish to consider the various possible approaches for the determination of recipients of disclosed information which could be limited to the non-disputing governments, or broadened so as to include the public at large.

## **5. Open hearings**

19. The Working Group may wish to consider whether open hearings should be permitted, and in the affirmative, whether guidance to arbitral tribunals should be provided on the organization of open hearings, taking account of the possible need to protect, to the extent required, confidential information.

## **6. Submissions by third parties**

20. Certain international investment agreements include in their dispute resolution clause the possibility for non-disputing individuals or organizations to make their views known on the matters at issue in the arbitration. Guidelines for the acceptance of such written *amicus curiae* submissions by an arbitral tribunal have been established, in certain instances, in legislation and case law and provided for an assessment by the arbitral tribunal of the relevance of the proposed submissions. The question of submissions by third parties is closely connected to the question of access to procedural documents so that third parties' submissions may adequately address matters within the scope of the dispute. The Working Group may wish to decide whether that matter should be included in its consideration of the issue of transparency.

21. In case the Working Group would decide that that matter should be dealt with, it may wish to consider formulating specific rules and guidelines applying to third parties' intervention addressing, *inter alia*, possible criteria for acceptance of third parties' submissions, such as assessing the legitimate interest of the third parties, ensuring that they are accountable, independent and not backed by any of the disputing parties. The extent of their possible intervention might need to be determined: for instance, existing rules on that matter allow third parties to submit *amicus* briefs but not necessarily to call witnesses, or to have the possibility to amend the claims or independently affect the process. The form and content of the third parties' submissions may also need to be determined (pages limitation, questions to be addressed (facts and/or law)). The Working Group may wish to consider whether the arbitral tribunal should be requested to provide grounds for refusal of third parties' submissions and arguments contained in the submissions. A question to be considered would also be the conditions for allowing publicity of the *amicus curiae* briefs.

## **C. Possible form of work on transparency**

22. The Working Group may wish to consider the following possible options concerning the form of its work on transparency in treaty-based investor-State arbitration.

### **1. Model clause for inclusion in the dispute settlement provision of international investment agreements**

23. The Working Group may wish to consider whether, with a view to encouraging and facilitating transparency, it would be useful to prepare a model clause on transparency for inclusion in dispute settlement provisions of international investment agreements. It may be noted that dispute settlement provisions in international investment agreements are often premised on the commercial

arbitration model and, in most cases, do not address such issues as the disclosure of the existence of the proceedings, the disclosure of any procedural document, and open hearings or interventions by non-arbitrating parties. The objective of preparing such a model clause would be to harmonize States' practices in that field, consistent with UNCITRAL's mandate.<sup>19</sup> By adopting such a clause in international investment agreements, States would demonstrate their willingness to promote transparency in arbitration.

24. If the option of providing a model clause for adoption in international investment agreements would be retained, the Working Group may wish to note that, as highlighted in a report by UNCTAD, a new generation of international investment agreements has tended to address in advance a series of specific matters related to the arbitral proceedings such as submission of the same dispute to local courts, the place of arbitration, appointment of experts and remedies available, including interim measures.<sup>20</sup> Under that option, the Working Group may wish to decide whether its work should be limited to offering a model clause on transparency or if it should also encompass other matters on which States might wish to receive guidance for drafting dispute settlement provision in their international investment treaties.

## 2. Specific arbitration rules

25. The Working Group may wish to consider the option of drafting specific arbitration rules addressing transparency in treaty-based investor-State arbitration, either in the form of separate arbitration rules or as an annex to the UNCITRAL Arbitration Rules. In either case, the existence of a specific set of distinct rules applying only to investment arbitration may raise difficult issues regarding the definition of investment arbitration (covered by those rules) as opposed to other types of arbitration (to which those specific rules would not apply).

### *Previous discussions of the Working Group*

26. At the forty-sixth session of the Working Group (New York, 5-9 February 2007), a suggestion had been made to include specific provisions in the UNCITRAL Arbitration Rules to ensure transparency in the procedure for arbitration involving a State.<sup>21</sup> The Working Group had decided to follow a generic approach in the revision of the Rules that sought to identify common denominators that applied to all types of arbitration irrespective of the subject matter of the dispute, in preference

<sup>19</sup> General Assembly resolution 2205 (XXI) [Yearbook 1968-1970, part one, chap. II, sect. E]. It may be recalled that the mandate is based on the consideration that "international trade cooperation among States is an important factor in the promotion of friendly relations, and consequently, in the maintenance of peace and security", that the "interests of all peoples, and particularly those of developing countries, demand the betterment of conditions favouring the extensive development of international trade", and "that divergences arising from the laws of different States in matters relating to international trade constitute one of the obstacles to the development of world trade."

<sup>20</sup> See *International Investment Arrangements: Trends and emerging issues*, UNCTAD Series on International Investment Policies for Development, Part II. Key Issues in New Generations IIAs, J. Investor States Dispute settlement (New York and Geneva 2006), pp. 49-50; available on 29 July 2010 at [http://www.unctad.org/en/docs/iteiit200511\\_en.pdf](http://www.unctad.org/en/docs/iteiit200511_en.pdf).

<sup>21</sup> Report of the Working Group on International Arbitration and Conciliation on the work of its forty-sixth session, A/CN.9/619, para. 61.

to dealing with specific situations.<sup>22</sup> At that session, the Working Group had further considered whether it was appropriate to include a general provision regarding confidentiality of proceedings or of materials including pleadings before the arbitral tribunal.<sup>23</sup> After discussion, the Working Group agreed not to include a provision on confidentiality of proceedings.<sup>24</sup>

27. The Working Group may also wish to recall the discussions at its forty-eighth session (New York, 4-8 February 2008) regarding transparency in investor-State arbitration and may wish to note that annexes I to III of the report on the work of that session reproduce statements made by delegations on that matter.<sup>25</sup>

#### *Separate rules for investment arbitration*

28. In case the Working Group would decide to adopt separate rules on transparency in the context of treaty-based investor-State arbitration, it may wish to consider the extent to which that approach would preserve the general applicability of the UNCITRAL Arbitration Rules. Furthermore, the Working Group may wish to consider whether limiting the drafting of new rules for investment arbitration to issues of transparency would be appropriate, taking account of additional matters that would be expected to be addressed in arbitration rules on investment.

#### *Annex to the UNCITRAL Arbitration Rules*

29. In case the Working Group would decide that the UNCITRAL Arbitration Rules should be supplemented with an annex addressing procedural transparency for use in the context of investor-State arbitration, that annex could contain either specific rules on transparency or recommendations aimed at providing guidance to arbitral tribunals.

30. Under that option, the extent to which parties would be bound by such an annex (taking account of the consensual nature of arbitration) might need to be considered.

### **3. Guidelines**

31. Another possible option to deal with transparency in treaty-based investor-State arbitration would consist in drafting guidelines to provide guidance to States when negotiating international investment treaties, to arbitral tribunals having to decide on such issues, to parties to arbitration and to other parties with a legitimate interest in the outcome of the arbitration.

---

<sup>22</sup> Ibid, para. 62.

<sup>23</sup> Ibid, para. 127.

<sup>24</sup> Ibid, paras. 128-133. Views in favour of including a provision on confidentiality referred to a number of existing international arbitral rules such as the LCIA Arbitration Rules and WIPO rules which contained specific provisions on confidentiality. Against inclusion, it was suggested that inclusion of such a general provision would run counter to the current trend toward greater transparency in international proceedings. It was also said that the underlying aim of the revision of the Rules was to provide flexibility so as to accommodate evolving law and practices. In that respect, it was noted that confidentiality was an area where law and practices were still developing.

## I. Introduction

1. The Commission considered the question of transparency in treaty-based investor-State arbitration at its forty-first session (New York, 16 June-3 July 2008). At that session, the Commission agreed that it would not be desirable to include at that time specific provisions on treaty-based arbitration in the UNCITRAL Arbitration Rules (“UNCITRAL Arbitration Rules” or “Rules”) themselves and that any work on treaty-based investor-State arbitration that the Working Group might have to undertake in the future should not delay the completion of the revision of the UNCITRAL Arbitration Rules in their generic form. As to timing, the Commission agreed that the topic of transparency in treaty-based investor-State arbitration was worthy of future consideration and should be dealt with as a matter of priority immediately after completion of the current revision of the UNCITRAL Arbitration Rules. As to the scope of such future work, the Commission agreed by consensus on the importance of ensuring transparency in treaty-based investor-State arbitration. Written observations regarding that issue were presented by one delegation (A/CN.9/662) and a statement was also made on behalf of the Special Representative of the Secretary-General on human rights and transnational corporations and other business enterprises. The Commission was of the view that, as noted by the Working Group at its forty-eighth session (A/CN.9/646, para. 57), the issue of transparency was a desirable objective in treaty-based investor-State arbitration and should be addressed by future work. As to the form that any future work product might take, the Commission noted that various possibilities had been envisaged by the Working Group (*ibid.*, para. 69) in the field of treaty-based

investor-State arbitration, including the preparation of instruments such as model clauses, specific rules or guidelines, an annex to the UNCITRAL Arbitration Rules in their generic form, separate arbitration rules or optional clauses for adoption in specific treaties. The Commission decided that it was too early to make a decision on the form of a future instrument on treaty-based investor-State arbitration and that broad discretion should be left to the Working Group in that respect. With a view to facilitating consideration of the issues of transparency in treaty-based investor-State arbitration by the Working Group at a future session, the Commission requested the Secretariat, resources permitting, to undertake preliminary research and compile information regarding current practices. The Commission urged member States to contribute broad information to the Secretariat regarding their practices with respect to transparency in treaty-based investor-State arbitration. It was emphasized that, when composing delegations to the Working Group sessions that would be devoted to that project, member States and observers should seek to achieve the highest level of expertise in treaty law and treaty-based investor-State arbitration.<sup>1</sup>

2. At its forty-third session (New York, 21 June-9 July 2010), with respect to future work in the field of settlement of commercial disputes, the Commission recalled the decision made at its forty-first session that the topic of transparency in treaty-based investor-State arbitration should be dealt with as a matter of priority immediately after completion of the current revision of the UNCITRAL Arbitration Rules. The Commission entrusted its Working Group II with the task of preparing a legal standard on that topic. The Commission was informed that, pursuant to the request received from the Commission at its forty-first session, the Secretariat had circulated a questionnaire to States with regard to their practice on transparency in treaty-based investor-State arbitration and that replies thereto would be made available to the Working Group.<sup>2</sup> Those replies are reproduced in document A/CN.9/WG.II/WP.159 and its addenda.

3. At the forty-third session of the Commission, support was expressed for the view that the Working Group could also consider undertaking work in respect of those issues that arose more generally in treaty-based investor-State arbitration and that would deserve additional work. The prevailing view, in line with the decision previously made by the Commission, was that it was too early to make a decision on the precise form and scope of a future instrument on treaty-based investor-State arbitration and that the mandate of the Working Group should be limited to the preparation of rules of uniform law on transparency in treaty-based investor-State arbitration. However, it was agreed that, while operating within that mandate, the Working Group might identify any other topic with respect to treaty-based investor-State arbitration that might also require future work by the Commission. It was agreed that any such topic might be brought to the attention of the Commission at its next session, in 2011.<sup>3</sup>

4. The most recent compilation of historical references regarding the consideration by the Commission of works of the Working Group can be found in document A/CN.9/WG.II/WP.161, paragraphs 5-12.

## II. Organization of the session

5. The Working Group, which was composed of all States members of the Commission, held its fifty-fourth session in New York, from 7 to 11 February 2011. The session was attended by representatives of the following States members of the Working Group:<sup>4</sup> Algeria (2016), Argentina (2016), Armenia (2013), Australia (2016), Austria (2016), Belarus (2011), Benin (2013), Brazil (2016), Bulgaria (2013), Cameroon (2013), Canada (2013), Chile (2013), China (2013), Colombia (2016), Czech Republic (2013), Egypt (2013), El Salvador (2013), France (2013), Germany (2013), India (2016), Iran (Islamic Republic of) (2016), Israel (2016), Italy (2016), Japan (2013), Kenya (2016), Malaysia (2013), Mauritius (2016), Mexico (2013), Morocco (2013), Norway (2013), Pakistan (2016), Paraguay (2016), Philippines (2016), Poland (2012), Republic of Korea (2013), Russian Federation (2013), Singapore (2013), Spain (2016), Thailand (2016), Turkey (2016), Uganda (2016), Ukraine (2014), United Kingdom of Great Britain and Northern Ireland (2013), United States of America (2016) and Venezuela (Bolivarian Republic of) (2016).

6. The session was attended by observers from the following States: Angola, Belgium, Cuba, Democratic Republic of the Congo, Ecuador, Finland, Indonesia, Iraq, Kuwait, Madagascar, Myanmar, Netherlands, Panama, Peru, Sierra Leone, Slovakia, Switzerland, Syrian Arab Republic and Zambia.

7. The session was attended by observers from the following organizations of the United Nations System: International Centre for Settlement of Investment Disputes (ICSID), Office of the High Commissioner for Human Rights (OHCHR), United Nations Conference on Trade and Development (UNCTAD) and the World Bank.

8. The session was attended by observers from the following international intergovernmental organizations invited by the Commission: Asian-African Legal Consultative Organization (AALCO), Energy Charter Secretariat, European Union (EU), Organization for Economic Cooperation and Development (OECD) and the Permanent Court of Arbitration (PCA).

9. The session was also attended by observers from the following international non-governmental organizations invited by the Commission: American Arbitration Association (AAA), American Bar Association (ABA), Arbitration Institute of the Stockholm Chamber of Commerce (SCC), Asociación Americana de Derecho Internacional Privado (ASADIP), Association for the Promotion of Arbitration in Africa (APAA), Association of the Bar of the City of New York (ABCNY), Barreau de Paris, Belgian Center for Arbitration and Mediation (CEPANI), Center for International Environmental Law (CIEL), China International Economic Trade and Arbitration Commission (CIETAC), Comité Français de l'Arbitrage (CFA), Construction Industry Arbitration Council (CIAC), Corporate Counsel International Arbitration Group (CCIAG), Council of Bars and Law Societies of Europe (CCBE), European Law Students' Association (ELSA), Forum for International Conciliation and Arbitration C.I.C. (FICACIC), Inter-American Bar Association (IABA), Inter-American Commercial Arbitration Commission (IACAC), International Arbitration

<sup>4</sup> The following six State members elected by the General Assembly on 3 November 2009 agreed to alternate their membership among themselves until 2016 as follows: Belarus (2010-2011, 2013-2016), Czech Republic (2010-2013, 2015-2016), Poland (2010-2012, 2014-2016), Ukraine (2010-2014), Georgia (2011-2015) and Croatia (2012-2016).

Institution (IAI), International Bar Association (IBA), International Council for Commercial Arbitration (ICCA), International Council for Commercial Arbitration Institutions (IFCAI), International Insolvency Institute (III), International Institute for Sustainable Development (IISD), International Law Institute (ILI), Milan Club of Arbitrators, Moot Alumni Association (MAA), Queen Mary University of London School of International Arbitration (QMUL), Swedish Arbitration Association (SAA), Swiss Arbitration Association (ASA) and Tehran Regional Arbitration Centre (TRAC).

10. The Working Group elected the following officers:

*Chairman:* Mr. Salim Moollan (Mauritius)

*Rapporteur:* Mr. Shane Spelliscy (Canada)

11. The Working Group had before it the following documents: (a) provisional agenda (A/CN.9/WG.II/WP.161); (b) a note by the Secretariat regarding the preparation of a legal standard on transparency in treaty-based investor-State arbitration (A/CN.9/WG.II/WP.162 and its addendum); (c) notes by the Secretariat reproducing (i) comments of the Governments of Canada and of the United States of America on transparency in treaty-based investor-State arbitration under Chapter Eleven of the North American Free Trade Agreement (NAFTA) (A/CN.9/WG.II/WP.163); and (ii) proposals by Governments and International Organizations (A/CN.9/WG.II/WP.164).

12. The Working Group adopted the following agenda:

1. Opening of the session.
2. Election of officers.
3. Adoption of the agenda.
4. Preparation of a legal standard on transparency in treaty-based investor-State arbitration.
5. Other business.
6. Adoption of the report.

### III. Deliberations and decisions

13. The Working Group resumed its work on agenda item 4 on the basis of the notes prepared by the Secretariat (A/CN.9/WG.II/WP.162 and its addendum; A/CN.9/WG.II/WP.163; and A/CN.9/WG.II/WP.164). The deliberations and decisions of the Working Group with respect to this item are reflected in chapter IV. The deliberations and decisions of the Working Group with respect to agenda item 5 on other business are reflected in chapter V.

## IV. Preparation of a legal standard on transparency in treaty-based investor-State arbitration

### A. General remarks

14. General remarks were made regarding the policy context in which the matter of transparency in treaty-based investor-State arbitration arose. General agreement was expressed regarding the desirability of dealing with transparency in treaty-based investor-State arbitration, which differed from purely private arbitration, where confidentiality was an essential feature. According to principles of good governance, government activities were subject to basic requirements of transparency and public access. It was pointed out that transparency in treaty-based investor-State arbitration was only one aspect of the broader notion of transparency in the treatment of investment. Beyond treaty-based investor-State arbitration, transparency was said to be essential (i) for the conduct of States' investment-related administrative procedures, (ii) for the design and implementation of domestic investment laws and regulations, (iii) for investment promotion and States' efforts to attract development enhancing investment, and (iv) for States' specific interactions with individual investors.

15. The Working Group heard a statement made on behalf of the Special Representative of the Secretary-General on human rights and transnational corporations and other business enterprises that adequate transparency in arbitration processes with investors where human rights, including access to clean water, affirmative action policies and the protection of indigenous peoples' rights, were concerned was essential if societies were to be aware of proceedings that might affect the public interest and therefore their own welfare. The statement further expressed the hope that appropriate rules for transparency would not be limited solely to disputes arising under future investment treaties, but would apply also to already existing investment treaties referring to UNCITRAL Arbitration Rules, so as to avoid setting two tiers of practice. Further, it was pointed out that, in limited and well-defined circumstances, there could be legitimate exceptions to transparency, but that attention should focus on ensuring that any limitation on transparency did not defeat its very purpose with regard to good governance.

16. The view was expressed that the right of access to information was an integral component of the freedom of expression under international human rights law. It was further said that the need for access to information was recognized and the decisions in *Claude Reyes v. Chile*<sup>5</sup> and *Társaság v. Hungary*<sup>6</sup> were given as examples for such recognition. In that light, it was said that the legal standard on transparency must give full effect to the mandatory character of human rights.

17. The Working Group took note of the statements made regarding the impact of human rights on its current work and agreed that further consideration would be given to that question at a later stage of its discussion.

---

<sup>5</sup> *Claude Reyes et. al. v. Chile*, Inter-Am. Ct. H.R. (ser.C) No. 151 (19 September 2006).

<sup>6</sup> *Társaság a Szabadságjogokért v. Hungary*, App. No. 37374/05, Eur. Ct. H.R. (14 April 2009).

## **B. Possible forms and scope of application of a legal standard on transparency regarding future investment treaties**

18. The Working Group recalled that, at its fifty-third session, it generally discussed the possible nature of a legal standard on transparency in treaty-based investor-State arbitration and the various forms it might take (A/CN.9/712, paras. 22-30 and paras. 76-100), and decided that all suggestions in that regard would require further legal analysis (A/CN.9/712, para. 94).

### **1. Express consent or presumption of application in the context of future investment treaties (“opt-in” or “opt-out” solutions)**

19. The Working Group resumed discussion on the scope of application of a legal standard on transparency with the aim of identifying policy considerations underlying the various options that had been discussed at the fifty-third session of the Working Group. There was a general agreement that the key issue for the application of a legal standard on transparency to future investment treaties was that of consent. Therefore, the main question to be further considered related to the manner in which that consent would be expressed. In that context, consent could be expressed in two different manners. There could be a presumption in the legal standard on transparency that the standard would apply to future treaties referring to the UNCITRAL Arbitration Rules. Under that approach, the legal standard on transparency would apply, unless States otherwise provided by opting out of the legal standard on transparency (“opt-out” solution). A second option would be to require express consent of States that the legal standard on transparency would apply. Under that option, States would be required to expressly opt into the legal standard on transparency for it to come into application (“opt-in” solution).

20. Regarding the option of presumption of application of the legal standard on transparency (opt-out solution), it was said that that approach would be similar to the one adopted under article 1, paragraph (2) of the 2010 UNCITRAL Arbitration Rules. It would ensure a wider application of the legal standard on transparency, and thereby ensure that the mandate given by the Commission to the Working Group to promote transparency in treaty-based investor-State arbitration would be better fulfilled. One aspect specifically discussed was the extent to which that option would require amendment of the 2010 UNCITRAL Arbitration Rules. A number of delegations that expressed support for that option were of the view that that raised two questions: from a legal perspective, it was not clear whether the amendment would be necessary; however, from a practical perspective, the amendment would achieve clarity (see below, para. 31).

21. In support of an application of the legal standard on transparency based on an express consent of States (opt-in solution), it was said that that solution would ensure that States had taken the conscious decision to apply that standard, and as a matter of policy, States should be made aware of the rules that would be applicable.

22. The Working Group agreed that discussion on opt-in or opt-out solutions were made on a preliminary basis, with the aim to identifying the policy considerations underlying both options, and that no decision in favour of one of the options was intended to be made at the current session. The question would have to be revisited once the content of the legal standard on transparency became clearer.

## **2. Guidelines or stand-alone rules on transparency**

23. The Working Group discussed the possible forms that a legal standard on transparency might take, based on options mentioned in document A/CN.9/WG.II/WP.162, paragraphs 7 to 21, focusing in particular on whether the legal standard on transparency should take the form of guidelines or of stand-alone rules.

24. In support of a legal standard on transparency in the form of guidelines, reference was made to the arguments presented in document A/CN.9/WG.II/WP.164. It was highlighted that guidelines would adopt a different drafting style than stand-alone rules as they would be more discursive, detailed, providing explanations to parties and could lay out various options that parties could choose. Guidelines could also apply where States had consented thereto. In that respect, the option of guidelines would come very close to that of stand-alone rules on transparency that would apply if parties expressly agreed to their application (opt-in solution, see above, para. 21). Examples were given of texts that were drafted as rules or principles but were nevertheless used as guidelines applicable when the parties had agreed thereto, including the IBA Rules on the Taking of Evidence in International Arbitration and the Unidroit Principles of International Commercial Contracts (2004).

25. The view was expressed that high standards on transparency in treaty-based investor-State arbitration should be established because transparency contributed to promoting the rule of law, good governance, due process and rights to access information. It was also seen as an important step to respond to the increasing challenges regarding the legitimacy of international investment law and arbitration as such. It was said that the legal standard on transparency should take the form of detailed rules of procedure rather than as discursive guidelines, as such guidelines would not provide the certainty contemplated by the objective of UNCITRAL to harmonize international trade law.

26. In a spirit of cooperation, those delegations that had thenceforth expressed a strong preference for guidelines agreed to approach the drafting exercise on the basis that the legal standard on transparency be drafted in the form of clear rules rather than looser and more discursive guidelines. That was done on the strict understanding that their prior insistence on guidelines was motivated by a desire to ensure that the legal standard on transparency would only apply where there was clear and specific reference to it (opt-in solution) (see below, para. 58).

## **3. Legal standard on transparency applicable as a supplement to the UNCITRAL Arbitration Rules, or more generally to treaty-based investor-State arbitration, irrespective of the applicable arbitration rules**

27. The Working Group further considered whether stand-alone rules on transparency should be made applicable to treaty-based investor-State arbitration, irrespective of the applicable arbitration rules (see document A/CN.9/WG.II/WP.162, paras. 20 and 21).

28. The Working Group was reminded of its forty-eighth session (New York, 4-8 February 2008), in which it had decided to first complete the revision of the 1976 UNCITRAL Arbitration Rules. It was said that the topic of treaty-based investor-State arbitration had been postponed to be dealt with after the completion

of the revision of the 1976 UNCITRAL Arbitration Rules on the understanding that consideration of the topic was closely linked to the Rules. On that basis, it was said that the Working Group should first consider drafting rules on transparency under the UNCITRAL Arbitration Rules and then consider a possible broader application of the legal standard. It was also said that the legal standard on transparency, even if made applicable in relation to the UNCITRAL Arbitration Rules, would constitute a model for other arbitration rules, for disputing parties to adopt in particular non-UNCITRAL arbitral proceedings, or even for States to adopt in their investment treaties.

29. In response, it was pointed out that the need for transparent proceedings would apply generally to treaty-based investor-State arbitration, without being limited to ad hoc arbitration under the UNCITRAL Arbitration Rules. Not all treaty-based investor-State arbitrations took place under the UNCITRAL Arbitration Rules, and therefore, the Working Group should consider developing a legal standard on transparency of general application. It was further said that the mandate of UNCITRAL<sup>7</sup> was to further the harmonization of international trade law, and under that mandate, UNCITRAL should aim at establishing a unified legal framework for the fair and efficient settlement of disputes arising in international commercial arbitration.

30. To the question whether applying the legal standard on transparency to treaty-based investor-State arbitration generally would be feasible, it was explained that when a treaty contained rules on transparency, those rules would be applied by arbitral institutions despite their rules containing different provisions. It was also said that the International Centre for the Settlement of Investment Disputes (“ICSID”) had so far not had difficulties in applying specific rules on transparency contained in treaties in conjunction with its own rules. As an illustration, it was said that arbitration under the United States — Dominican Republic — Central America Free Trade Agreement (“CAFTA”) included mandatory open hearings, and that kind of specific requirement in treaties had worked in tandem with the applicable arbitration rules.

31. A question was raised whether the 2010 UNCITRAL Arbitration Rules should be amended to refer to any legal standard on transparency that might be added to the Rules (see above, para. 20). It was said that there could be clarity in amending article 1 on scope of application of the UNCITRAL Arbitration Rules to refer to the legal standard on transparency. Other views were expressed that it might be confusing to propose three different sets of UNCITRAL Arbitration Rules (1976 Rules, 2010 Rules, and those revised to address the specific matter of transparency in treaty-based investor-State arbitration). After discussion, it was decided to defer that question to a later stage depending on decisions to be made regarding the manner in which consent of the parties would be expressed, and whether the legal standard on transparency would be drafted as a supplement to the UNCITRAL Arbitration Rules, or more generally as a legal standard of a general application covering all instances of treaty-based investor-State arbitration.

32. The Working Group agreed that the questions raised regarding the scope of application of the legal standard on transparency would be further considered at a later stage.

---

<sup>7</sup> General Assembly resolution 2205 (XXI) of 17 December 1966.

## **C. Applicability of a legal standard on transparency regarding existing investment treaties**

### **1. General information on existing investment treaties**

33. The Working Group heard information on data and trends relating to the UNCITRAL Arbitration Rules in investment treaties and their use in treaty-based investor-State arbitration. A review conducted in 2010 by the United Nations Commission on Trade and Development (UNCTAD) of 100 investment treaties showed that 60 per cent of the investment treaties referred to ad hoc arbitration under the UNCITRAL Arbitration Rules. A review conducted in January 2011 by UNCTAD of 42 available model investment treaties indicated that 76 per cent of the model investment treaties referred to the UNCITRAL Arbitration Rules. It was pointed out that some States referred to the UNCITRAL Arbitration Rules in their respective laws or investment contracts, providing the example of a State that included in new oil contracts the possibility of ad hoc arbitration under the UNCITRAL Arbitration Rules.

34. With respect to the investor's choice of arbitration rules for treaty-based investor-State arbitration, the Working Group was informed that ICSID was the forum used with the greatest frequency (in 62 per cent of the cases on average) followed by the UNCITRAL Arbitration Rules (with an average of 27.4 per cent of the cases) over the last 10 years. There was no empirical evidence that the introduction of transparency had deterred States from offering ICSID arbitration in international investment treaties or investors from accepting such offers, as the share of ICSID cases had remained stable over the last 10 years. It was further mentioned that the absence of transparency did not seem to provide a competitive advantage for a particular set of arbitration rules, whether in the offer under investment treaties or in the conduct of arbitration.

35. Regarding the content of transparency provisions in investment treaties, the Working Group was informed that, of available investment treaties concluded in 2009, 47 per cent included general transparency provisions and 25 per cent included transparency provisions related specifically to treaty-based investor-State arbitration. Some investment treaties included "soft" transparency provisions in the wider context of investment promotion provisions, whereas others included transparency provisions that were legally binding obligations and might require important reform or proactive policies by the parties involved.

### **2. Automatic application of a legal standard on transparency to existing investment treaties**

36. The Working Group considered the extent to which the legal standard on transparency could be made applicable to existing investment treaties, a matter that had already been considered at the fifty-third session of the Working Group (A/CN.9/712, paras. 85-100).

37. Different views were expressed on whether the legal standard on transparency could be made automatically applicable to arbitrations arising under existing investment treaties. It was pointed out that the applicability of the legal standard on transparency could depend not only on the language of the treaty, but also on the intent of the parties to the treaty. The view was expressed that a reference in treaties

to the “UNCITRAL Arbitration Rules” without any further indication of a version of the Rules could be interpreted as a “dynamic reference”, encompassing further possible evolutions of the Rules (A/CN.9/WG.II/WP.162, para. 30). Concern was expressed that any automatic application of the legal standard on transparency to existing treaties would have a retroactive effect, forbidden under the law of treaties. A different view was expressed that the law of treaties did not prohibit retroactivity *per se*, making it conditional on the intention of the parties, but that, in any case, a dynamic reference raised the question of applicability and not one of retroactivity under the law of treaties. The ICSID Rules and the World Trade Organization (“WTO”) Sanitary and Phytosanitary Measures (“WTO-SPS”) Agreement were given as examples of standards, to which a dynamic reference could be made in practice. It was further said that a dynamic reference for the legal standard on transparency would only be possible if the legal standard would take the form of a supplement to the UNCITRAL Arbitration Rules. It was also said that the applicability of the legal standard by a dynamic reference would also imply addressing the issue raised by the presumption in article 1, paragraph (2) of the 2010 UNCITRAL Arbitration Rules.

38. Concerns were expressed on such automatic application through a dynamic reference. It was stated that the reference to the UNCITRAL Arbitration Rules had to be interpreted in the light of public international law, as it was included in a treaty, and that therefore the Vienna Convention on the Law of Treaties (“Vienna Convention”) was applicable. In that light, it was pointed out that the different options to make the legal standard applicable to existing investment treaties were laid out in document A/CN.9/WG.II/WP.162. It was said that any application of the legal standard on transparency would not be possible without the consent of the States parties to the investment treaty and that UNCITRAL did not have the authority to impose on States application of UNCITRAL texts (A/CN.9/WG.II/WP.162, para. 29). In that regard, it was emphasized that an investment treaty was the outcome of negotiations between States based on their consent.

39. With respect to the issue of “retroactivity” or “applicability”, it was said that the decisive factor was treaty interpretation and that an attempt to establish, as a general rule, the automatic application through a dynamic reference would open the door in particular cases to possible legal challenges. It was further said that such an approach would create confusion and legal uncertainty and that the Working Group should rather focus on drafting an instrument to be adopted by States aimed at ensuring that the legal standard on transparency would apply to existing investment treaties. It was also said that any automatic application would be impossible where the investment treaty expressly referred to the 1976 version of the UNCITRAL Arbitration Rules.

40. It was further said that it was not for UNCITRAL to determine whether and how the legal standard on transparency would apply to existing treaties. It was also highlighted that that application would depend on whether the legal standard on transparency would operate on the basis of an opt-in or opt-out mechanism (see above, paras. 19-22).

41. After discussion, the Working Group agreed to revisit that matter in the context of its discussion on whether the legal standard on transparency would apply on an opt-in or opt-out basis, taking into account the facts that (i) if the solution of

an opt-in was favoured, that could foreclose any argument that a reference to the UNCITRAL Arbitration Rules in an existing investment treaty would bring into operation the new legal standard on transparency; and (ii) conversely, if an opt-out solution was favoured, it would leave open that argument but could in turn create uncertainty as to whether or not that standard was applicable.

**3. Possible UNCITRAL instruments on the application of a legal standard on transparency to existing investment treaties**

42. The Working Group then discussed whether it should consider making the legal standard on transparency applicable to existing treaties by an instrument that would either include joint interpretative declarations pursuant to article 31 (3) (a) of the Vienna Convention (A/CN.9/WG.II/WP.162, paras. 32-35), by which States would express their interpretation of the reference to arbitration in their investment treaty to include the legal standard on transparency, or a convention, whereby States could express consent or agree to apply the legal standard on transparency to arbitration under their existing and future investment treaties (A/CN.9/WG.II/WP.162, paras. 23-25). Such new convention, however, would make the legal standard on transparency applicable only to investment treaties between such States parties that were also parties to the new convention. In that context, the Working Group also considered whether the Secretariat should be mandated to explore the different options further and to prepare some drafting proposals for such options for consideration at a future session.

43. Different views were expressed on whether such instruments, including joint declarations or a convention, should be prepared to make the legal standard applicable to existing treaties. It was said that joint interpretative declarations were usually made with respect to the substantive provisions of a treaty and that any instrument, including a model declaration to refer to the interpretation of any investment treaty, would be of questionable validity and value.

44. It was also said that the development of such an instrument would be premature and outside the current mandate of the Working Group. Also, a concern was expressed that many existing investment treaties contained provisions on amendment, and amendments of those treaties must be in accordance with those provisions and not by another instrument. It was further said that it would be for States to consider how to make the legal standard applicable to existing treaties as a matter of public international law. It was further said that such work would be premature until the substance of the legal standard had been considered and that, at that stage of the deliberations, the Working Group was not in a position to provide the Secretariat with adequate directions. The Working Group was reminded of its deliberations on the 2006 Recommendation regarding the interpretation of article II (2) and article VII (1) of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards (New York, 1958), where the Working Group had first worked on the substance and then on the applicability of the interpretation.

45. Views were expressed in favour of pursuing further the option to prepare an instrument that, once adopted by States, could make the legal standard on transparency applicable to existing treaties. It was said that the options of making the legal standard applicable to existing treaties by joint interpretative declarations pursuant to article 31 (3) (a) of the Vienna Convention, by amendment or

modification pursuant to articles 39-41 of the Vienna Convention or by a subsequent agreement between States pursuant to article 30 of the Vienna Convention were interesting and practically possible options, which should be further explored. It was further said that, under public international law, States were permitted to amend or modify their existing treaties and that joint interpretative declarations were accepted in international practice. Another view expressed was that the preparation by the Secretariat of some drafting proposals for a future session would facilitate the deliberations of the Working Group.

46. After discussion, the Working Group agreed to request the Secretariat to further explore the options of making the legal standard on transparency applicable to existing treaties and to prepare some drafting proposals for such instruments for consideration at a later stage.

#### **D. Relation between the host State and the investor, parties to the arbitration**

47. The Working Group considered (i) whether the investor should be given the option in the legal standard on transparency to refuse an offer for transparent arbitration or accept it partially only, and (ii) whether both disputing parties could agree not to apply the rules on transparency once the dispute had arisen.

##### **1. Option for the investor to refuse the legal standard on transparency**

48. At its fifty-third session, the Working Group had considered the question whether the investor should be given the option to deviate from the legal standard on transparency (A/CN.9/712, paras. 30 and 95-96).

49. At the current session, it was said that the investor would express acceptance to arbitrate under terms of an offer to arbitrate, as contained in the treaty, and that that offer could not be varied. Once the offer had been accepted, the investor was bound by the terms and conditions contained in that offer.

50. It was underlined that there should not be a provision allowing the investor to vary the offer for transparent arbitration in the legal standard. It was further said that providing the investor with the last word on the application of the legal standard on transparency would unduly privilege the investor, lead to a decrease in transparency and would be contrary to the Commission's mandate to enhance transparency in treaty-based investor-State arbitration. It was pointed out that the legal standard on transparency was not meant to benefit only the investor and the host State but also civil society, so it was not for the investor alone to decide on such matters.

51. However, it was also said that it might be advisable to provide an opportunity for an investor to express its opinion to the host State's offer of transparent arbitration. In that regard, it was explained that there were two separate elements to consider: one being the body of rules on transparency, and the other being the mechanism triggering their application. Depending on whether the legal standard on transparency would contain an opt-in or opt-out mechanism, it would be up to the State to formulate the offer it wished to make to the investor.

52. In response to a concern, it was clarified that the need to protect sensitive and confidential information would be covered by limitations to be further defined under the rules on transparency (see below, paras. 129 to 147) (referred to as “limitations to transparency set out in section 6”).

53. After discussion, there was broad consensus in the Working Group that the legal standard on transparency should not include a right for the investor to derogate from the offer for transparent arbitration.

## **2. Agreement to depart from the legal standard on transparency after the dispute had arisen**

54. The Working Group agreed to further consider the issue outlined in paragraph 53 of document A/CN.9/WG.II/WP.162, whether the disputing parties could deviate from the legal standard on transparency (see also A/CN.9/712, paras. 97-98).

55. The Working Group noted that treaty-based investor-State arbitration, contrary to commercial arbitration where the will of the arbitrating parties was decisive, was conducted on the basis of an underlying treaty between States Parties, which limited the ability of the disputing parties to depart from the prescribed route of the underlying treaty. It was also said that the expectations of third parties who stood to benefit from the legal standard on transparency had to be taken into due consideration.

## **E. Possible content of a legal standard on transparency**

56. At its fifty-third session, the Working Group generally agreed that the substantive issues to be considered in respect of the possible content of the legal standard on transparency would be as follows: publicity regarding the initiation of arbitral proceedings; documents to be published (such as pleadings, procedural orders, supporting evidence); submissions by third parties (“amicus curiae”) in proceedings; public hearings; publication of arbitral awards; possible exceptions to the transparency rules; and repository of published information (“registry”) (A/CN.9/712, para. 31).

57. At its current session, the Working Group agreed to resume its discussion on each of the identified matters. The Working Group took note of the suggestion that the current list of items regarding the content of the legal standard on transparency did not appear to address a question related to the procedure for appointment of arbitrators in treaty-based investor-State arbitration. In that light, it was suggested that the Working Group should consider whether specific transparency rules for appointment of arbitrators should be defined, in particular when appointment was made by appointing authorities. That suggestion did not receive support (see below, para. 153).

58. The Working Group agreed to proceed with a discussion on developing the content of highest standards on transparency, on the basis that the legal standard on transparency be drafted in the form of clear rules, taking account of the understanding contained in paragraph 26 above. It was said that the content of the legal standard on transparency might need to be reconsidered, and its content

possibly diluted in case the Working Group would at a later stage decide that the application of the legal standard would be based on a presumption (opt-out solution, see above para. 20).

## 1. Publicity regarding the initiation of arbitral proceedings

### *Timing of the publication and documents to be published*

59. At the fifty-third session of the Working Group, different views were expressed on whether the existence of arbitral proceedings should be made public once the arbitral proceedings commenced, or when the arbitral tribunal was constituted (A/CN.9/712, para. 34). Different views were expressed regarding the information to be made public prior to the constitution of the arbitral tribunal, in particular, whether it should be limited to the existence of a dispute, or also include publication of the notice of arbitration (A/CN.9/712, para. 33). It was suggested that providing only preliminary information regarding the parties involved, their nationality, and the economic sector concerned might be sufficient (A/CN.9/712, para. 33).

60. At its current session, the Working Group focused its attention on whether and when the notice of arbitration should be made public. It was pointed out that the decision on that matter would be guided by policy consideration on whether civil society should play an active role at that stage of the proceedings.

61. The Working Group generally agreed that the notice of arbitration should be disclosed. It was said that as most of the important documents of the proceedings would be disclosed, the notice of arbitration and the response thereto should also be published.

62. However, diverging views were expressed on the question whether the notice of arbitration should be published before the constitution of the arbitral tribunal, taking account in particular of the fact that the UNCITRAL Arbitration Rules were ad hoc rules, without any institution to handle issues that might arise before the constitution of the arbitral tribunal.

63. Views were expressed that the notice of arbitration, and more generally publicity on the existence of the arbitral proceedings, should be made public after the arbitral tribunal was constituted. In support of that view, it was said that the arbitral tribunal would be best placed to police matters of confidential and sensitive information that might be contained in the notice of arbitration. Publication of the notice of arbitration at a later stage, it was said, would also protect the parties to the arbitration from possible pressures of civil society, in particular on matters such as the appointment of arbitrators, which was said to be a right of the disputing parties. It was pointed out that the respondent State needed time to organize its defence and to prepare its response to the notice of arbitration. With a view to ensuring fairness, details of the dispute contained in the notice should be made public only when the respondent State had an opportunity to present its own position in the response to the notice. It was said that during the time following the notice of arbitration and until the response to the notice was filed, there were possibilities for settling the dispute which would be compromised once the parties' positions as expressed in the notice of arbitration and the response would be published. In response, it was said that treaties usually provided for a period prior to the commencement of arbitration proceedings where parties could try to resolve disputes amicably.

64. Opposing views were that publication after constitution of the arbitral tribunal would not permit civil society to be informed of the commencement of the proceedings, to express their views at an early stage of the proceedings, and to possibly express views on the composition of the arbitral tribunal. It was said that prompt publication of the notice of arbitration best served the interest of transparency. Under that approach, there should be full disclosure of the notice of arbitration, once served, with possible solutions to address the need to protect sensitive and confidential information. An illustration of practical ways to deal with that matter were given: when a State was put on notice that an investor was commencing an arbitration, the State would, before publishing the notice of arbitration, request the investor to consider whether it wished to redact certain information, and the defendant State would also decide whether some information would need to be redacted. In case of disagreement between the parties on the information to be redacted, the most redacted version of the notice of arbitration would be published. A similar procedure could be adopted in the legal standard on transparency, as in the experience of States having adopted such an approach, no difficulties had arisen. It was pointed out that pressures from the public were inherent in publication and transparency. It was suggested that a procedure could be devised in the rules on transparency, whereby the notice of arbitration could be published, subject to the parties' agreement to redact sensitive and confidential information. In case of disagreement between the parties on the information to be redacted, the most redacted version of the notice of arbitration would be published. After its constitution, the arbitral tribunal could decide on the disputed information to be made public and, if necessary, order publication of a revised notice of arbitration.

65. It was pointed out that, as the legal standard to be drafted was meant to establish clear rules of universal application, a simple procedure would be preferable. The determination of what would constitute the most redacted version of a notice of arbitration in the example given in paragraph 64 above might not be easy to determine in all instances. Under that view, it would be preferable to publish the notice of arbitration after constitution of the arbitral tribunal, so that the arbitral tribunal could assist in determining confidential and sensitive information that should not be published. However, the need to provide information to civil society as soon as the proceedings commenced was also acknowledged.

66. As a compromise solution, it was suggested that the notice of arbitration should be published once the arbitral tribunal was constituted and there should also be disclosure of information on the existence of the proceedings, along the lines of the ICSID procedures, promptly upon the receipt of the notice of arbitration. For instance, Regulation 22(1) of the ICSID Administrative and Financial Regulations provides that "[t]he Secretary-General shall appropriately publish information about the operation of the Centre, including the registration of all requests for conciliation or arbitration and in due course an indication of the date and method of the termination of each proceeding".

67. The attention of the Working Group was drawn to a proposal contained in paragraph 45 of document A/CN.9/WG.II/WP.162/Add.1, which provided that: "Information regarding the name of the parties, their nationalities and the economic sector involved shall be made publicly available once [the notice of arbitration has been received by the respondent] [the arbitral tribunal has been constituted]."

68. Some support was expressed for the proposal mentioned in paragraph 67 above, with the understanding that the text appearing in the first bracket would be retained and the text in the second bracket deleted. It was said that that proposal was in line with the current procedure at ICSID, and constituted therefore a procedure with which many States were already familiar. As a matter of drafting, it was suggested to refer to “a brief description of the subject matter of the claim” instead of the “economic sector involved” in order to convey more precise information to the public.

69. With a view to providing a procedure for the parties to publish the notice of arbitration before the constitution of the arbitral tribunal, a further proposal was made, along the following lines: “Once the notice of arbitration has been received by the respondent, the respondent shall promptly make publicly available (i) information regarding the name of the parties, their nationalities and the economic sector involved; and (ii) the notice of arbitration, except with respect to any portion of the notice to which either the claimant (at the time it submits the notice) or the respondent objects on the ground that it contains protected information.”

70. That proposal also received some support. It was said to provide a simple and clear procedure regarding the information to be published at an early stage of the procedure, and the conditions for publication of the notice of arbitration, thereby addressing concerns expressed in the Working Group (see above, para. 65). It was explained that it was for the claimant to identify, when sending the notice of arbitration, the information to be redacted, and the respondent would have an opportunity to proceed in the same manner. It was further explained that the draft had been prepared based on the hypothesis that the respondent was responsible for making the information public, but that could be modified if the Working Group subsequently decided to establish a repository of published information. It was further explained that that proposal clarified that the only information that could be withheld was the information falling in the category of limitations to transparency set out in section 6.

71. It was suggested that the proposal contained in paragraph 69 above be amended to allow either the claimant or the respondent to object to the publication of the notice of arbitration without conditioning the objection on limitations to transparency set out in section 6. It was suggested that, at the early stage of the proceedings, there might be various reasons why a party would not wish to have information contained in the notice of arbitration made public. It was also suggested to reverse the presumption regarding the publication of the information and provide that the notice of arbitration should not be published, unless both parties agreed to its publication. A number of concerns were reiterated on the publication of the notice of arbitration before the constitution of the arbitral tribunal.

72. With a view to striking a better balance between the need for a transparent procedure and the protection of sensitive and confidential information, a suggestion was made that “any publication of information relating to the notice of arbitration should comply with the duty of confidentiality under applicable law”. That proposal did not receive support, in particular as it was seen as potentially allowing either party to publish information without the consent of the other party, and did not provide for a harmonized procedure.

73. A question was raised whether the discussion on the time for publication would need to include also consideration of the party or the institution responsible for the publication and possible sanctions if any obligation to publish was not complied with. In response, it was clarified that the Working Group would address those matters when considering whether a central repository should be established.

74. After discussion, the Working Group agreed that there was support for the proposal contained in paragraphs 67 and 68 above. The Working Group took note of concerns expressed regarding that proposal by those in favour of publishing information after the constitution of the tribunal. The Working Group requested the Secretariat to prepare a draft based on that proposal, and to also prepare alternative drafts reflecting the proposals contained in paragraphs 69 and 71 above for consideration by the Working Group at a future session.

## **2. Documents to be published**

75. The Working Group recalled that, at its fifty-third session, different views were expressed on whether, and if so which, documents should be published (A/CN.9/712, paras. 40 to 42). The view was expressed that all documents submitted to, and issued by, the arbitral tribunal should be made available to the public. A contrary view was that not all documents would need to be published, in particular in view of the necessity to find the right balance between the requirements of public interest and the legitimate need to ensure manageability and efficiency of the arbitral procedure.

76. At its current session, the Working Group considered proposals contained in document A/CN.9/WG.II/WP.162/Add.1, paragraphs 46 and 47 aimed at reflecting the different views expressed by the Working Group at its fifty-third session.

77. It was clarified that “section 6” mentioned in the proposals under consideration referred to the possible limitations to transparency to be further defined in the legal standard on transparency. It was also clarified that the bracketed text referring to the right of parties to agree otherwise would be further considered in the light of the decision to be made on whether the disputing parties were free to agree to depart from the legal standard on transparency after the dispute had arisen (see above, paras. 54 and 55), and would therefore not be extensively discussed in the context of each proposal. It was further clarified that the publication of the arbitral award would be dealt with separately (see below, paras. 93 to 100).

78. An observation was made that none of the options was indicating the time when the documents should be published. It was explained that the understanding was that publication would be made once the documents were available. In that regard, a view was expressed that publication of documents during the arbitration could put in danger the integrity of the proceedings. According to that view, the aim of transparency could also be achieved through publication of the main documents after the proceedings. In that regard, a comment was made that, in some jurisdictions, the law prohibited an arbitral tribunal from disclosing information until the proceedings were terminated.

79. In response to a general question whether there should be an analysis of the applicable law under which the arbitral tribunal would exercise any power conferred to it under the provision on publication of documents, it was said that the approach would be very similar to that adopted under article 15 of the 1976 UNCITRAL

Arbitration Rules, or article 17 of the 2010 UNCITRAL Arbitration Rules, and that the question of applicable law was not intended to be dealt with under the rules on transparency. A view was expressed that investment treaties usually contained provisions on applicable law that would be relevant to that determination.

*Option 1, variant 1*

80. The first proposal, referred to as option 1, variant 1 in paragraph 46 of document A/CN.9/WG.II/WP.162/Add.1, provided that “[A]ll documents submitted to, or issued by, the arbitral tribunal shall be made publicly available [unless all parties agree otherwise,] subject to section 6 below.”

81. Various views were expressed on option 1, variant 1. It was said that providing access to all documents, subject to the limitations to transparency set out in section 6 was an optimal solution, ensuring that the public would have sufficient access to documents. The Working Group recalled that, at its fifty-third session, it considered that, in the general framework of allowing amicus curiae submissions, the importance of access to documents was emphasized, as the quality of any amicus curiae submissions would depend on the permitted level of access to documents (A/CN.9/712, para. 51).

82. While the proposal under option 1, variant 1 was considered as an option favouring full transparency, the attention of the Working Group was drawn to the cost and burden that such an approach might entail. It was said that, in many cases, evidentiary records were extensive, and it would be a cumbersome exercise for parties and the arbitral tribunal to redact sensitive and confidential information therefrom. In response to that concern, it was explained that, if for practical reasons not all documents could be published, the documents not published could be made available to third parties upon their request.

*Option 1, variant 2*

83. The second proposal, referred to as option 1, variant 2 in paragraph 46 of document A/CN.9/WG.II/WP.162/Add.1, provided a defined list of documents that should be published, and read as follows: “The following documents shall be made publicly available: the notice of arbitration; pleadings, submissions to the tribunal by a disputing party and any written submissions by the non-disputing party and amicus curiae; minutes or transcripts of hearings of the tribunal, where available; and orders, awards, and decisions of the tribunal [unless the disputing parties otherwise agree,] subject to section 6 below.”

84. That option received support on the basis that it provided a good balance between the principles of transparency and necessary exceptions thereto. It was noted that, in the list of documents, there was no reference to documentary evidence, witness statements, expert witness reports, and further consideration should be given to the list contained under option 1, variant 2. It was also questioned whether written submissions by non-disputing State(s) Party(ies) and amicus curiae should be in the list of documents to be disclosed, as such documents might be to the detriment of one party. It was further said that the most interesting information for the public might not necessarily be contained in any of the documents listed, as such information might be contained in an attachment or annex to a document. A limited list of documents might deprive third parties of essential

pieces of information for understanding the case. It was suggested to provide under that option for a more flexible approach and to permit the tribunal to make an order for publication of further specific documents following an application by a third party.

#### *Option 2*

85. The third proposal, referred to as option 2 in paragraph 47 of document A/CN.9/WG.II/WP.162/Add.1, provided that “The arbitral tribunal shall decide, in consultation with the parties, which documents to make publicly available.”

86. In support of that proposal, it was said that the arbitral tribunal would be best placed to determine the documents that should be published, as well as issues of public interest that should be brought to the attention of civil society. It was suggested that instead of consulting the parties, the arbitral tribunal should obtain their approval for the publication or, as a variant, that if a party objected, the arbitral tribunal should then refrain from publishing the documents. It was said that that provision would allow publication to be dealt with on a case-by-case basis, and would come close to the procedure followed by ICSID regarding publication of documents in the course of proceedings. Doubts were expressed on whether that option would be sufficient to enhance transparency in treaty-based investor-State arbitration. It was said that the current proposal was very close to current practice in commercial arbitration, and might therefore not sufficiently promote transparency. It was pointed out that that option placed complete discretion on the arbitral tribunal but gave no indication as to how to exercise that discretion. It was considered desirable to provide some guidance to the arbitral tribunal in that regard, either in the specific rule on access to documents or in a general rule. A view was expressed that consultation of the parties by the arbitral tribunal should also be provided for.

87. After discussion, the Working Group took note of four new approaches that emerged from its consideration of the matter that could be summarized as follows.

88. Under a first approach, the arbitral tribunal should decide which documents to make publicly available, unless a party was opposed to the publication. It was pointed out that under that first approach, the arbitral tribunal would have in fact less discretionary power than it currently enjoyed under the UNCITRAL Arbitration Rules, which provided under articles 15 of the 1976 Rules and 17 of the 2010 Rules that “the arbitral tribunal may conduct the arbitration in such manner as it considered appropriate [...]”. It was further said that, under the UNCITRAL Arbitration Rules, the arbitral tribunal might order publication of documents if it considered it appropriate without any party having a right to oppose. It was therefore questioned whether that first approach was consistent with the mandate of the Working Group to provide for rules on transparency.

89. Under a second approach, all documents should be made publicly available; however, if as a matter of practicability, they were not all published, third parties would still have the right to access the information, upon request, applying the limitations to transparency set out in section 6.

90. Under a third approach, a defined list of documents would be made available in any case while the arbitral tribunal would have the ability to order publication of any other documents it deemed relevant. Under that option, third parties would also have a right to request access to additional information but, contrary to the second

approach, would not have an entitlement to such access. The limitations to transparency set out in section 6 would also apply under that proposal.

91. A fourth approach would consist in providing a list of documents that could be made publicly available. The arbitral tribunal in its discretion would decide which documents to publish on a case-by-case basis, subject to the limitations to transparency set out in section 6.

92. The Working Group requested the Secretariat to prepare alternative draft proposals to reflect the discussion of the Working Group for consideration at a future session.

### **3. Publication of arbitral awards**

93. The Working Group recalled the deliberations at its fifty-third session, where many delegations had expressed support for the establishment of a general provision whereby awards rendered by arbitral tribunals in treaty-based investor-State arbitration should be published (A/CN.9/712, para. 62), and proceeded to consider the issue of publication of arbitral awards at its current session.

94. The Working Group was informed that the Investment Committee of the Organization for Economic Cooperation and Development (OECD) had issued a statement in June 2005, which expressed the general understanding among the members of the Investment Committee that additional transparency, in particular in relation to the publication of arbitral awards, subject to the necessary safeguards for the protection of confidential business and governmental information, was desirable to enhance effectiveness and public acceptance of investment arbitration and to contribute to the further development of jurisprudence.

95. In that light, some support was expressed for having a simple rule on the publication of arbitral awards in treaty-based investor-State arbitration, which would provide for arbitral awards to be published. Such publication, it was said, would enhance transparency in treaty-based investor-State arbitration and would best serve the mandate given by the Commission to the Working Group.

96. It was explained that the publication of the arbitral award would also be subject to the limitations to transparency set out in section 6. The Working Group noted that any rule it would craft on the publication of arbitral awards would have to be considered in light of article 32 (5) of the 1976 UNCITRAL Arbitration Rules and article 34 (5) of the 2010 Rules that made the publication of arbitral awards subject to the consent of all parties, in particular if the legal standard was to constitute a supplement or annex to the UNCITRAL Arbitration Rules.

97. Some support was also expressed for a rule on publication of arbitral awards based on the proposal in document A/CN.9/WG.II/WP.162/Add.1, paragraph 17, which read as follows: "Awards shall be published unless all parties agree otherwise. In case the parties do not agree to the publication of an award, the arbitral tribunal shall promptly make publicly available excerpts of the legal reasoning of the tribunal." With respect to that proposal, it was clarified that the reference to "parties" included only the disputing parties and neither interested third parties nor the other State(s) Party(ies) to the underlying investment treaty. It was further clarified that the reference to "In case the parties do not agree to the

publication of an award” was to be understood as requiring all parties to agree not to publish.

98. Doubts were expressed on whether that proposal would contribute to enhancing transparency as it was very close to the corresponding provision of the UNCITRAL Arbitration Rules.

99. It was noted that the draft proposals contained in paragraphs 17 and 46 of document A/CN.9/WG.II/WP.162/Add.1 used varying terminology to refer to decisions made by the arbitral tribunal, such as “orders”, “awards” and “decisions of the tribunal”. The Working Group agreed that there should be consistency in terminology and a common rule on publication of all decisions made by the arbitral tribunal should be established.

100. After discussion, broad support was expressed in the Working Group for a simple provision whereby awards would be made publicly available, with those delegations which had expressed reservations in that respect requesting that the Working Group ensured adequate protection of confidential or sensitive information in order to address their concerns. The Working Group requested the Secretariat to prepare draft proposals on publication of awards taking account of the discussions of the Working Group for consideration at a future session.

#### **4. Hearings and transcripts thereof**

##### *Public hearings*

101. At its fifty-third session, the Working Group had considered whether hearings should be open to the public (A/CN.9/712, para. 52). Both support and reservations had been expressed regarding public hearings. It had been suggested that a provision on open hearings in any legal standard to be prepared on transparency should provide that hearings should be open to the public, unless the parties agreed otherwise (A/CN.9/712, paras. 53-55). In contrast, reservations of a general nature had been expressed regarding public hearings, a concept that had been viewed to be contrary to the very nature of arbitration, which had been said to be confidential and not to allow for third parties’ access to hearings (A/CN.9/712, para. 57).

102. At its current session, the Working Group considered a draft proposal contained in document A/CN.9/WG.II/WP.162/Add.1, para. 50, which read as follows: “In the event of oral hearings, the tribunal shall conduct hearings open to the public [unless either party objects] and shall determine, in consultation with the parties, the appropriate logistical arrangements.” Support was expressed for the suggestion to include in that text a reference to the limitations to transparency set out in section 6.

103. It was said that open hearings were a fundamental feature of transparent arbitral proceedings. The proposal reflected in paragraph 102 above was considered as providing a simple and adequate rule on open hearings. However, it was said that that proposal only covered logistical arrangements but did not address the power of the tribunal to limit public access.

104. Diverging views were expressed on whether to delete the bracketed text in paragraph 102 above, which permitted either party to object to open hearings. Those favouring deletion of the bracketed text pointed out that rules on transparency were crafted mainly to benefit civil society, and the parties should not be involved in that

determination. Further, it was questioned whether designing a rule on open hearings that parties could defeat at their own discretion would be in accordance with the mandate of the Working Group to promote transparency.

105. A contrary view was expressed that the right of either party to object to open hearings should be asserted. It was suggested that Rule 32 (2) of the ICSID Rules of Procedure for Arbitration Proceedings (“ICSID Arbitration Rules”), with necessary adjustments, be considered by the Working Group as a possible option to deal with that issue, as it included a right for either party to object to open hearings. Rule 32 (2) of the ICSID Arbitration Rules read as follows: “Unless either party objects, the Tribunal, after consultation with the Secretary-General, may allow other persons, besides the parties, their agents, counsel and advocates, witnesses and experts during their testimony, and officers of the Tribunal, to attend or observe all or part of the hearings, subject to appropriate logistical arrangements. The Tribunal shall for such cases establish procedures for the protection of proprietary or privileged information.”

106. With the view to conciliating the diverging opinions on whether parties should have a right to object to open hearings, a proposal was made that the arbitral tribunal should decide whether to hold open hearings, “in consultation with the parties”. A view was expressed that not all hearings were necessarily of public interest, and that the arbitral tribunal would be best placed to determine which hearings or which parts of the hearings to make public. That option would also preserve the possibility for the parties to express their views, but where the public interest would be at stake, the arbitral tribunal would have the power to overrule any objection by the parties, and hold open hearings.

107. The proposal reflected in paragraph 106 received some support. It was suggested that it could be complemented by a sentence clarifying that, as a matter of principle, hearings should be held in public.

108. It was questioned whether more guidance should be provided on how the tribunal would decide to hold open or closed hearings. Some expressed the view that it was neither desirable nor possible to provide guidance to the arbitral tribunal. However, several suggestions were made on possible ways to provide such guidance.

109. It was suggested that the limitations to transparency set out in section 6 should guide the arbitral tribunal. It was questioned whether the exceptions to transparency that related mainly to the protection of confidential and sensitive information would cover all the instances where hearings would need to be held in private. It was suggested that the arbitral tribunal might need the discretion to decide that hearings would be held in private for practical reasons. The view was also expressed that not all hearings necessarily involved matters of public interest.

110. In response to a suggestion that the existence of public interest issues should guide the arbitral tribunal in its decision, it was said that treaty-based investor-State arbitration involved, by nature, public interest because such arbitration implicated a State’s exercise of discretionary powers. Others said that the public interest in a case might not always be immediately apparent to the arbitral tribunal, which should not be burdened with the task of identifying whether or not matters were of public interest. It was questioned whether the purpose of the rule on open hearings was to

allow access of the public or to limit it to hearings where matters of public interest were at stake.

111. In response to a suggestion that the arbitral tribunal could obtain guidance by consulting the parties, it was stated that the parties, having their own personal interests in the matter, might not be best placed to advise the arbitral tribunal on that matter.

112. A suggestion was made to clarify in a preamble to the rules on transparency the purpose they were intended to serve along the lines of: “[W]ith the purpose of enhancing the legitimacy of treaty-based investor-State arbitration and of fostering the public interest inherent in treaty-based investor-State arbitration, these rules on transparency have been developed to apply in treaty-based investor-State arbitrations. These purposes shall guide arbitral tribunals in the application of these Rules.”

113. In response to a question whether the disputing parties could decide that hearings should be held in private despite the legal standard providing for open hearings, it was said that that matter should be considered at a later stage of the deliberations.

114. After discussion, the Working Group took note of the various views expressed, and requested the Secretariat to prepare draft proposals for consideration at a future session. The views expressed in the Working Group were summarized as follows. A first group of views was that either disputing party should have a right of veto as to whether to hold public hearings. Questions were raised as to whether that was compatible with the mandate of the Working Group. A second group was of the view that discretion should be left to the arbitral tribunal in that respect. That raised the question whether relevant guidance should be given to the arbitral tribunal, and if so, which. A third group was of the view that there should be a simple rule that hearings were to be public, subject only to exceptions on the grounds of logistical arrangements and limitations to transparency set out under section 6. It was stated that there might not be much difference between the second and third groups as both accepted that, in principle, the arbitral tribunal had some discretion in the matter. The question was the extent of the discretion: unfettered, with some guidance or restrained with some limitations. That matter could be usefully explored further once the limitations to transparency set out in section 6 became clearer.

#### *Transcripts of hearings*

115. It was noted that the decision to be made regarding transcripts of hearings should depend upon the solution adopted in respect of public access to hearings (see also A/CN.9/712, para. 58). Some delegations questioned that interpretation. It was agreed to further consider that matter in conjunction with the various drafting proposals that would be prepared by the Secretariat for consideration at a future session.

### **5. Submissions by third parties (*amicus curiae*) in arbitral proceedings**

116. The Working Group recalled its consideration of the matter of submissions by third parties, also known as *amicus curiae* submissions, at its fifty-third session where many delegations had expressed strong support for allowing *amicus curiae* submissions on the ground that they could be useful for the arbitral tribunal in

resolving the dispute and promoted the legitimacy of the arbitral process (A/CN.9/712, para. 46).

*Restricting criteria for amicus curiae submissions*

117. At the fifty-third session of the Working Group, it had been widely felt that certain restricting criteria should be put in place for amicus curiae submissions, including the subject matter of the submission, expertise of the amicus curiae, relevance for the proceedings, appropriate page limits, and the time when such submissions would be allowed (A/CN.9/712, para. 47). At the current session, the Working Group continued its deliberation on which criteria should apply to amicus curiae submissions.

118. One proposal made to determine criteria for amicus curiae submissions was based on a provision used in certain investment agreements, which was said to reflect an evolution in practice, and which read as follows: “[T]he tribunal shall have the authority to accept and consider amicus curiae submissions from a person or entity that is not a disputing party.”

119. Although the proposal reflected in paragraph 118 above was found to be a clear and straightforward rule, it was suggested that a provision on that matter might need to be more detailed, in order to provide guidance to parties and the arbitral tribunal, taking account of the fact that a number of States had little experience in the field. In that light, it was proposed to consider whether a provision on amicus curiae submissions as that included in the interpretative document produced by the NAFTA Free Trade Commission’s “Statement of the Free Trade Commission on non-disputing party participation of 7 October 2004” (“FTC Statement”) could be a useful model.

120. In support of the latter proposal, it was said that any provision the Working Group would draft should provide sufficient guidance to the arbitral tribunal on how to deal with amicus curiae submissions. Further, such provision should foresee the possibility that the parties should be consulted by the tribunal, so that the issue of acceptance of amicus curiae submission should not be left to the arbitral tribunal alone. Any provision on that matter should clarify that there would not be an automatic entitlement for amici to have their submissions accepted.

121. As an intermediate solution between the proposal contained in paragraph 118 above, and the provision in the FTC Statement which was very detailed, it was suggested to consider drafting a provision along the lines of Rule 37 (2) of the ICSID Arbitration Rules. In support of that approach, it was said that it would provide appropriate guidance without being as long as the provision on submission of amicus curiae briefs in the FTC Statement.

122. It was noted that Rule 37 (2) of the ICSID Arbitration Rules did not include the requirement of revealing the identity of the non-disputing party, the nature of its membership if it was an organization, and the nature of its relationships, if any, to the parties in the dispute, including whether the non-disputing party had received financial or other material support from any of the parties or from any person connected with the parties in that case. Those points were dealt with in detail in paragraph B.2 of the FTC Statement referred to in paragraph 119 above. As those points were found important, it was suggested that they should be included in a provision on that matter.

123. After discussion, the Working Group requested the Secretariat to prepare draft provisions based on proposals mentioned in paragraphs 118 and 122 above, for consideration by the Working Group at a future session.

*Intervention by non-disputing State(s)*

124. The Working Group recalled that, at its fifty-third session, it had been observed that another State Party to the investment treaty at issue that was not a party to the dispute could also wish, be invited, or have a treaty right to make submissions. It had been noted that such State often had important information to provide, such as information on *travaux préparatoires*, thus preventing one-sided treaty interpretation (A/CN.9/712, para. 49). The Working Group further recalled and reiterated its decision to bring that matter to the attention of the Commission and ask its guidance on whether that matter should be made part of the scope of the current work (A/CN.9/712, para. 103).

*Decisions on amicus curiae submissions*

125. In the light of its deliberation on restrictions of submissions by amicus curiae, the Working Group agreed that, if detailed procedures were to be provided, the arbitral tribunal should be required to consult the parties before rendering its decisions on amicus curiae submissions.

*Levels of access to documents*

126. The Working Group recalled its deliberation at the fifty-third session where, in the general framework of allowing amicus curiae submissions, the importance of access to documents had been emphasized, as the quality of any amicus curiae submissions would depend on the permitted level of access to documents (A/CN.9/712, para. 51). At the current session, the Working Group considered, with respect to the role of amicus curiae, whether there should be a rule providing for different levels of access to documents for the general public on one hand and amicus curiae on the other hand.

127. It was noted that three categories of potential third parties had to be considered with respect to access to documents. The first category was the general public. The second category included third parties that had an interest in the subject matter of the dispute that might need access to wider information in order to make submissions that could benefit the arbitral tribunal in its decision making if those parties were granted leave to make submissions as amici. A third category included parties that had a personal interest in the outcome of the proceedings (for instance, a person that would receive benefits of an alleged expropriation) and might therefore be said to have an interest in participating in the proceedings. It was said that a different level of access of information might need to be provided in respect of each category identified. A different view was that it might be difficult in practice to differentiate the category of amici from that of the general public before a submission was accepted, and that there should not be different levels of access provided in a provision on that matter.

128. After discussion, the Working Group agreed that participation in the arbitral process of the third category of persons mentioned in paragraph 127 above raised matters of joinder, which might require specific rules in the context of treaty-based

investor-State arbitration. However, the Working Group agreed that that matter was not part of the current mandate of the Working Group to deal only with transparency (see below, para. 153). Further, it was noted that the decision on the level of access to be granted to amici was closely linked to the provision on publication of documents. Against that background, the Working Group agreed to further consider that matter at a later stage of its deliberations, based on draft proposals to be submitted in relation to the provision on documents to be published (see above, paras. 75 to 92).

## **6. Possible limitations to transparency rules**

129. The Working Group recalled that, at its fifty-third session, it had agreed that there should be possible limitations to transparency. Various categories of possible exceptions or limitations were mentioned: (i) protection of confidential and sensitive information, (ii) protection of the integrity of the arbitral process, and (iii) ensuring manageability of the arbitral proceedings (A/CN.9/712, paras. 67 to 72).

### *Protection of confidential and sensitive information*

130. At the fifty-third session of the Working Group, it had been generally recognized that the question of protection of confidential and sensitive information was important to take into account as part of the discussion on transparency.

131. Against that background, a proposal was made to request the Secretariat to prepare a draft that would take into account both transparency and confidentiality as legitimate interests and to find a right balance to protect both interests. The Working Group agreed that, though the concept of confidential or sensitive business information was quite clear, the Secretariat should be given more guidance for drafting a proposal on the protection of confidential information pertaining to States. It was further said that there often was national legislation to protect certain information and the question of applicable law would have to be taken into account by the Secretariat when drafting proposals on the protection of confidential and sensitive information for future deliberations of the Working Group. In response, it was said that the legal standard on transparency would, when finalized, probably also include a rule similar to that of article 1 (2) of the 1976 UNCITRAL Arbitration Rules or article 1 (3) of the 2010 Rules, which provided that the legal standard was not intended to derogate from any mandatory applicable law.

132. It was said that the model bilateral investment treaty of one delegation and the “Notes of Interpretation of Certain Chapter 11 Provisions” published by the NAFTA Free Trade Commission (FTC) on 31 July 2001 referred to the redaction of “information which is privileged or otherwise protected” from disclosure under the party’s domestic law to the public. The Working Group agreed that the notion of “privileged information”, which might not be understood in the same manner in all jurisdictions, might need further consideration in order to determine whether a provision on the protection of confidential and sensitive information should also refer to privileged information.

133. After discussion, the Working Group agreed to request the Secretariat to prepare draft proposals on a provision for the protection of confidential and sensitive information for consideration at a future session of the Working Group.

134. The Working Group recalled that the determination of confidential and sensitive information could be handled by the arbitral tribunal or the parties (A/CN.9/712, para. 69). It was noted that paragraph 40 of document A/CN.9/WG.II/WP.162/Add.1 included a proposal that the parties should agree on the determination of confidential and sensitive information and that only in case an agreement could not be found, the arbitral tribunal would make that decision. A further proposal was made that the parties would be given a margin of discretion for the determination of the confidential and sensitive nature of information. The role of the arbitral tribunal would then be limited to controlling whether the parties exercised their obligations in good faith.

135. The Working Group agreed to consider that matter at a future session, in light of draft proposals to be prepared by the Secretariat.

*Protection of the integrity of the arbitral process*

136. The Working Group recalled that, at its fifty-third session, it had been generally recognized that the question of protection of the integrity of the arbitral process should be taken into account as part of the discussion on limitations to transparency (A/CN.9/712, para. 72).

137. It was felt by the Working Group that the “integrity of the arbitral process” would need to be defined, as it could otherwise become an overly broad category, and exceptions to transparency should be concisely defined.

138. It was said that the integrity of the arbitral process included the protection of the parties to the proceedings, their counsel, the witnesses and the arbitral tribunal from intimidation and physical threats. It was pointed out that there might be other examples falling in that category, such as disruption to hearings by members of the audience. Other examples were given of matters external to the arbitral proceedings, including general politicization of the proceedings and manipulation by the mass media.

139. Concerns were expressed regarding the nature and scope of that category of possible exceptions to transparency because it seemed overly broad and vague and might inappropriately limit transparency. It was further said that any exception to transparency for the protection of the integrity of the arbitral process should be based on a high threshold, and should be limited to the examples given of protection from intimidation or physical threat to persons involved in the arbitral proceedings. Language referring to the “risk of aggravation of the dispute” or “rendering the resolution of the dispute difficult or impossible” would be too broad.

140. It was said that issues of due process or disturbance of the hearings should not be understood as falling under the category of the protection of the integrity of the arbitral process, and some of the concerns could be addressed by appropriate language in the provision on the conduct of hearings.

141. It was suggested that one of the threshold measure against the objective of ensuring that hearings were open should be the fairness and efficiency of the proceedings.

142. It was also suggested that the arbitral tribunal already enjoyed wide discretionary power under the UNCITRAL Arbitration Rules (articles 15 of the 1976 Rules and 17 of the 2010 Rules) to conduct the proceedings as appropriate and

that protection of the integrity of the arbitral process might already be covered by that discretionary power. It was suggested that the Secretariat could make further research on cases in international arbitration under the UNCITRAL Arbitration Rules to analyse how that discretionary power had been used by tribunals to protect the integrity of the arbitral process.

143. After discussion, the Working Group agreed that the questions for further consideration on that matter would include: (i) whether a provision on protection of the integrity of the arbitral process should be in the form of a general formulation or should contain specific instances that were meant to be specifically addressed, (ii) the interplay between the protection of the integrity of the arbitral process and the provisions in the UNCITRAL Arbitration Rules already dealing with that issue; and (iii) how to determine the threshold for a limitation to transparency based on the ground of the need to protect integrity of the arbitral process.

#### *Manageability of the arbitral proceedings*

144. At the fifty-third session of the Working Group, the general question of case management had been said to be an important one to be further considered (A/CN.9/712, para. 72). Rules on transparency should not create delays, increase costs or unduly burden the arbitral proceedings and a right balance should be found between the public interest and the manageability of the arbitral proceedings.

145. At the current session of the Working Group, it was said that the manageability of the arbitral proceedings was an important aspect to take into account when designing rules on transparency, because rules on transparency should also aim at preserving the right of effective access to court. It was further said that a too expensive procedure that might result from organizing transparent proceedings could jeopardize a party's human right to effective access to justice.

146. However, concerns were expressed that a general rule on manageability of the arbitral proceedings would contribute to a significant erosion of transparency.

147. After discussion, the Working Group considered that the right balance might well need to be found in relation to each provision in the rules on transparency, rather than as part of the limitations to transparency.

### **7. Repository of published information ("Registry")**

148. The Working Group recalled that, at the fifty-third session of the Working Group, suggestions had been made that information could be made publicly available by the parties, either the host State or the investor, or by a neutral registry (A/CN.9/712, paras. 37, 73-75). General support was expressed for the idea that, should such a neutral registry be established, the United Nations Secretariat would be ideally placed to host it. It was also recalled that, should the United Nations not be in a position to take up that function, the Permanent Court of Arbitration at The Hague and ICSID had expressed their readiness to provide such registry services. A concern was expressed as to whether establishing a neutral registry fell within the mandate of the Working Group or of UNCITRAL itself. In response, the Working Group generally agreed that consideration of a neutral registry should be considered as an integral part of the mandate received from the Commission to prepare a workable legal standard on transparency in treaty-based investor-State arbitration.

149. The Working Group discussed the issue whether establishing a neutral registry should be seen as a necessary step in the promotion of transparency in treaty-based investor-State arbitration. Examples were given of regional arrangements, under which comparable information was provided directly by the various States involved. It was generally agreed that further information should be provided about such experience. It was also pointed out that in the case of arbitration cases handled by existing arbitration institutions, the institution administering the case would be best placed to publish information in compliance with a legal standard on transparency.

150. The prevailing view, however, was that the existence of a central registry would be crucial to provide the necessary level of neutrality in the administration of a legal standard on transparency. It was generally felt that it might be premature to attempt designing the detailed features of such a registry until decisions had been made by the Working Group as to the precise functions it would fulfil. For example, the amount and the cost of legal work required to summarize cases or redact documents would need to be taken into account, in addition to simple clerical work required by the publication of unedited documents. It was agreed that further investigation was required of the parameters to be taken into account in setting up such a registry. Particular points to be further discussed were administrative issues such as the funding, governance and liability of such a registry, as well as the languages in which it would function. In that context, a suggestion was made that in addition to any publication by the central registry, States could play a complementary role, for example by making public information available in the local language.

151. After discussion, the Working Group agreed to pursue discussion of the issues raised by the establishment of a central registry at a future session. The Secretariat was requested to conduct a preliminary investigation of the above-mentioned issues and to collect information from organizations experienced with comparable functions.

## **V. Other business**

152. In accordance with the decision of the Commission at its forty-third session (see above, para. 3), the Working Group proceeded on a discussion to identify other topics which arose more generally in treaty-based investor-State arbitration that would deserve additional work and thus might be brought to the attention of the Commission at a future session.

153. After considering whether the question of participation in the proceedings of a third party having a vested interest in the case (see above, para. 128) and the suggestion that specific rules regarding the appointment of arbitrators should be designed (see above, para. 57), the Working Group agreed that those matters should not be reported to the Commission. The Working Group reiterated its decision made at its fifty-third session (see A/CN.9/712, para. 103) to seek guidance from the Commission on whether the topic of the possible intervention of a non-disputing State party could be dealt with by the Working Group in the context of its current work.

## I. Introduction

1. At its forty-third session (New York, 21 June-9 July 2010), the Commission entrusted the Working Group with the task of preparing a legal standard on the topic of transparency in treaty-based investor-State arbitration.<sup>1</sup> Support was expressed for the view that the Working Group could also consider undertaking work in respect of those issues that arose more generally in treaty-based investor-State arbitration and that would deserve additional work. The prevailing view, in line with the decision previously made by the Commission, was that it was too early to make a decision on the precise form and scope of a future instrument on treaty-based arbitration and that the mandate of the Working Group should be limited to the preparation of rules of uniform law on transparency in treaty-based investor-State arbitration. However, it was agreed that, while operating within that mandate, the Working Group might identify any other topic with respect to treaty-based investor-State arbitration that might also require future work by the Commission. It was agreed that any such topic might be brought to the attention of the Commission at its next session, in 2011.<sup>2</sup>

2. At its fifty-third session (Vienna, 4-8 October 2010), the Working Group commenced its work on the preparation of a legal standard on transparency in treaty-based investor-State arbitration. The discussion of the Working Group at that session, reflected in document A/CN.9/712, took place on a preliminary and general basis, without attempting to reach consensus at that stage. That approach was chosen in order to delineate the issues for discussion at the next session of the Working Group (A/CN.9/712, para. 15). The Working Group proceeded with a general discussion on the possible nature and the various forms a legal standard on transparency might take (A/CN.9/712, paras. 22 to 30 and 76 to 100) as well as its possible content (A/CN.9/712, paras. 31 to 75).

3. In accordance with the decision of the Commission at its forty-third session (see above, para. 1), the Working Group also proceeded on a discussion to identify other topics that arose more generally in treaty-based investor-State arbitration that would deserve additional work and thus might be brought to the attention of the Commission at a future session. In that regard, the Working Group agreed to seek guidance from the Commission on whether the possible intervention in an

<sup>1</sup> *Official Records of the General Assembly, Sixty-fifth Session, Supplement No. 17 (A/65/17)*, para. 190.

<sup>2</sup> *Ibid.*, para. 191.

arbitration of a State party to the investment treaty at issue that was not a party to the dispute could be dealt with by the Working Group in the context of its current work (A/CN.9/712, paras. 102 and 103).

4. In accordance with the request of the Working Group at its fifty-third session, this note seeks to set out an analysis of the matters identified by the Working Group with respect to the possible form (section II), applicability (section III) and substance (section IV) of a legal standard on transparency, for consideration by the Working Group at its fifty-fourth session (A/CN.9/712, para. 101). Unless otherwise indicated, all references to deliberations by the Working Group in this note are to deliberations made at the fifty-third session of the Working Group.

## **II. Scope and possible forms of a legal standard on transparency**

### **A. Scope of a legal standard on transparency**

5. The mandate given by the Commission to the Working Group at its forty-first<sup>3</sup> and forty-third<sup>4</sup> sessions was to provide a legal standard on transparency in treaty-based investor-State arbitration. At its forty-first session, the Commission decided that it was too early to make a decision on the form of a future instrument on treaty-based arbitration and that broad discretion should be left to the Working Group. The various possibilities envisaged by the Commission indicated that work in that respect was meant to address a general issue that arose in all investor-State arbitrations. The Commission did not limit the scope of a legal standard on transparency to arbitration under the UNCITRAL Arbitration Rules. It included the preparation of instruments such as model clauses, specific rules or guidelines, an annex to the UNCITRAL Arbitration Rules in their generic form, separate arbitration rules or optional clauses for adoption in specific treaties.<sup>5</sup>

6. The Working Group may wish to consider whether a legal standard on transparency should be of general application, i.e., apply to treaty-based investor-State arbitration, irrespective of whether a specific set of arbitration rules applies to the settlement of the dispute (see below, paras. 16, 20 and 21). The Working Group may wish also to consider whether broad applicability of the legal standard on transparency, not tied to any specific set of rules, would be best suited to achieve the mandate given by the Commission to the Working Group to provide an instrument that would promote transparency in treaty-based investor-State arbitration.<sup>6</sup>

### **B. Possible forms of a legal standard on transparency**

7. At its fifty-third session, the Working Group generally discussed the possible nature of a legal standard on transparency in treaty-based investor-State arbitration and the various forms it might take (A/CN.9/712, paras. 22-30 and paras. 76-100),

<sup>3</sup> Ibid., *Sixty-third Session, Supplement No. 17* (A/63/17), para. 314.

<sup>4</sup> Ibid., *Sixty-fifth Session, Supplement No. 17* (A/65/17), paras. 190 and 191.

<sup>5</sup> Ibid., *Sixty-third Session, Supplement No. 17* (A/63/17), para. 314.

<sup>6</sup> Ibid., *Sixty-fifth session, Supplement No. 17* (A/65/17), paras. 190 and 191.

and decided that all suggestions in that regard would require further legal analysis (A/CN.9/712, para. 94).

8. It should be noted that the discussion on applicability of a legal standard on transparency in section III as well as the proposed draft text of provisions on transparency in section IV below are not intended to indicate a preference for any possible option. The questions of the nature of a legal standard on transparency, and its possible forms remain matters for decision by the Working Group.

9. The Working Group may also wish to note that the various possible forms of a legal standard on transparency listed below are not necessarily mutually exclusive.

### **1. Model statement of principle**

10. The Working Group may wish to consider whether, with a view to encouraging and facilitating transparency, it would be useful to prepare a model statement of principle that would be offered to States for adoption.

11. A model statement of principle could possibly state substantive rules on transparency and provide the text of a provision whereby a State could indicate that those rules would either apply or be offered for application in case of arbitration with an investor under a specific investment treaty. The statement of principle could be adopted by States through joint or unilateral declarations (see below, paras. 32-37), and could therefore constitute an option to deal with the application of rules on transparency to existing treaties.

12. Depending on the manner in which it is drafted, the statement, once given effect by States parties to the investment treaty concerned could be considered as constituting either an obligation for transparent arbitration or an additional offer to an investor for arbitration in compliance with the transparency provisions that the statement would contain (see below, paras. 50-53).

### **2. Model clauses for inclusion in investment treaties**

13. Model clauses for inclusion in dispute settlement provisions of investment treaties have also been cited as a possible form for a legal standard on transparency. It may be noted that dispute settlement provisions in investment treaties are often premised on the commercial arbitration model and, in most cases, do not address such issues as the disclosure of the existence of the proceedings, the disclosure of any procedural document, and open hearings or submissions by non-arbitrating parties.

14. By adopting such clauses in investment treaties, States would demonstrate their willingness to promote transparency in arbitration. Model clauses could be drafted in such a manner that they would provide a binding obligation for the investor to arbitrate under transparency provisions or an offer to that effect (see below, paras. 50-53).

### **3. Guidelines**

15. Another possible option to deal with transparency in treaty-based investor-State arbitration would consist in drafting guidelines for States to consider when negotiating investment treaties, for arbitral tribunals when deciding on such issues, for parties to arbitration and other parties with a legitimate interest in the outcome

of the arbitration. They could apply in instances of arbitration under existing or future treaties, as long as parties to the arbitration agree to their application.

#### 4. Stand-alone rules

16. Support was expressed at the fifty-third session of the Working Group for a legal standard either in the form of a supplement to the UNCITRAL Arbitration Rules or of stand-alone rules on transparency (A/CN.9/712, para. 76). The Working Group may wish to consider the scope of application of such rules (see above, paras. 5 and 6). Rules on transparency could be intended for application only in relation to arbitral proceedings conducted under the UNCITRAL Arbitration Rules, or more broadly for application to arbitral proceedings irrespective of whether those proceedings were governed by another set of rules.

(i) *Rules complementing the UNCITRAL Arbitration Rules in their generic form, and applying to treaty-based investor-State arbitration only*

17. The Working Group may wish to consider the option of drafting specific rules addressing transparency in treaty-based investor-State arbitration, thereby complementing the UNCITRAL Arbitration Rules in their generic form.

18. The Working Group may wish to consider the extent to which that option would preserve the general applicability of the UNCITRAL Arbitration Rules. Furthermore, the existence of a specific set of distinct rules applying only to investment arbitration may raise difficult issues regarding the definition of investment arbitration (covered by those rules) as opposed to other types of arbitration (to which those specific rules would not apply). Another matter for consideration would be whether limiting the drafting of new rules for investment arbitration to issues of transparency would be appropriate, taking account of additional matters that might be expected to be addressed in arbitration rules on investment.

19. Application to investment treaties of rules on transparency complementing the UNCITRAL Arbitration Rules would suppose that States parties to those treaties have expressed their consent to such application (see below, paras. 27-31, 44 and 47).

(ii) *Rules applicable to any treaty-based investor-State arbitration*

20. The Working Group may wish to consider whether stand-alone rules on transparency should be made applicable to treaty-based investor-State arbitration, irrespective of the applicable arbitration rules (see above, paras. 5, 6 and 16).

21. That option would imply that rules on transparency be drafted in a generic manner, and would apply if States parties to an investment treaty have expressed their consent to such application (see below, paras. 27-31, 44 and 46).

### III. Applicability of a legal standard on transparency

#### A. Relation between States parties to investment treaties

##### 1. Possible UNCITRAL instruments on the application of a legal standard on transparency to both existing and future investment treaties

###### (i) *Recommendation on the application of a legal standard on transparency*

22. Depending on the form of the legal standard on transparency, UNCITRAL could undertake to further the application of a legal standard on transparency to investment treaties through a recommendation urging States to apply the standard to existing and future treaties. The purpose of the recommendation would be to highlight the importance of transparency in the context of treaty-based investor-State arbitration. The recommendation would leave it to States to decide on the means of implementing the transparency standard in the context of both existing and future treaties (see below, paras. 26-40 and 45-48).

###### (ii) *Convention on transparency in treaty-based investor-State arbitration*

23. With a view to promoting application of a legal standard on transparency to investment treaties, another proposal made at the fifty-third session of the Working Group was that an international convention on transparency in treaty-based investor-State arbitration should be prepared whereby States could express consent or agree to apply a legal standard on transparency (A/CN.9/712, para. 93).

24. Regarding existing treaties, the purpose of such an approach would be to avoid the need for a State to enter into procedures to amend each of its already concluded investment treaties (see below, a description of those procedures under paras. 32-40).<sup>7</sup> However, a new convention would make the legal standard on transparency only applicable to investment treaties between such States parties that are also parties to the new convention.

25. The text of a new convention on transparency would also make it clear that transparency standards apply to future investment treaties, under conditions to be determined by the convention.

##### 2. Possible actions by States regarding existing investment treaties

26. At its fifty-third session, the Working Group considered the possible actions that could be undertaken by States to ensure applicability of a legal standard on transparency to existing multilateral or bilateral investment treaties. Many delegations had expressed support for the desirability of applying a legal standard on transparency also to existing investment treaties. However, it was questioned

<sup>7</sup> A comparable approach was taken in the United Nations Convention on the Use of Electronic Communications in International Contracts (2005) regarding the use of electronic communications in connection with the formation or performance of a contract under certain Conventions. A provision along the lines of article 20 (1) of that Convention could be envisaged for such an instrument. It reads as follows: "1. *The provisions of this Convention apply to the use of electronic communications in connection with the formation or performance of a contract to which any of the following international conventions, to which a Contracting State to this Convention is or may become a Contracting State, apply...*".

whether such application to existing treaties was legally and practically feasible (A/CN.9/712, paras. 85-86).

(i) *Consent by States parties to investment treaties*

27. An investment treaty is an international agreement concluded between States in written form and governed by international law pursuant to article 2 (1) of the Vienna Convention on the Law of Treaties (1969)<sup>8</sup> (“the Vienna Convention”), which has been recognized as customary international law.

28. Investment treaties usually include a dispute settlement provision between the host State and an investor, which provides for a choice of arbitration rules for dispute resolution. Application of a legal standard on transparency to such provision of an existing treaty cannot be done automatically, because such legal standard would constitute an amendment to the treaty provision on dispute settlement, which could not be done without the agreement of the treaty parties (see articles 39-41 of the Vienna Convention), who are the “masters” of their treaty.

29. For that agreement to materialize, it would not be sufficient that UNCITRAL as intergovernmental body would have developed a legal standard on transparency under any of the forms listed above under paragraphs 10 to 21. UNCITRAL does not have the authority to impose on States application of UNCITRAL texts.<sup>9</sup>

30. It was suggested to the Working Group at its fifty-third session that automatic application of a legal standard on transparency to already existing treaties could be achieved by interpreting consent in the investment treaty to investor-State arbitration under the UNCITRAL Arbitration Rules as having anticipated that the UNCITRAL system of arbitration would develop over time. Under that view, a legal standard on transparency would automatically apply, as it would be part of that evolving system of UNCITRAL arbitration (A/CN.9/712, para. 89). The Working Group may wish to note that application of a legal standard to already existing treaties without the States parties agreeing to such application, for example by way of a joint interpretative declaration (see below, paras. 32-35) might be regarded as a violation of the treaty and of applicable international law, as it would result in incorporating into an existing treaty a legal standard that came into effect only after that treaty had been concluded. It may be recalled that article 31 (1) of the Vienna Convention provides as a general rule of treaty interpretation that “[a] treaty shall be interpreted in good faith in accordance with the ordinary meaning to be given to the terms of the treaty in their context and in the light of its object and purpose”.

31. The Working Group may wish to recall that it had been well aware of the difficulty of retroactive application in the context of investment treaties and thus drafted article 1 (2) of the UNCITRAL Arbitration Rules as revised in 2010 to cater for the effect of an unintended retroactive application (A/CN.9/646, para. 76).

(ii) *Joint interpretative declaration by States*

32. Application of a legal standard on transparency to existing investment treaties could be achieved through a joint interpretative declaration by States parties.

<sup>8</sup> Done at Vienna on 23 May 1969, entered into force on 27 January 1980. United Nations, *Treaty Series*, vol. 1155, p. 331.

<sup>9</sup> See General Assembly resolution 2205 (XXI), sect. II, para. 8.

Article 31 (3) (a) of the Vienna Convention provides that “any subsequent agreement between the parties regarding the interpretation of the treaty or the application of its provisions” shall be taken into account, together with the context.

33. There are many examples of joint interpretative declarations by States in public international law. As an illustration, in 1993, the States parties to the Treaty on Conventional Forces in Europe (CFE) 1990 concluded a “Document of the States parties” which included an understanding on the interpretation and application of certain provisions of the CFE Treaty, that in effect amounted to amendment of the treaty. Another example of authoritative treaty interpretation involves the joint decision of member States of the, at that time, European Community to replace the term “ECU” with the term “Euro” to refer to the European currency unit in the treaty of the European Community. The member States reached agreement on that term, thereby avoiding an amendment to the treaty, which might have involved a time consuming ratification procedure and parliamentary scrutiny. The wording of the agreement reached at the meeting of member States in Madrid in 1995 was the following: “The specific name ‘Euro’ will be used instead of the generic term ‘ECU’ used in the treaty to refer to the European currency unit. The Governments of the 15 member States have achieved the common agreement that this decision is the agreed and definitive interpretation of the relevant Treaty provisions.”

34. A joint interpretative declaration by States parties to an investment treaty could express the agreement between the States parties that the provision of the treaty providing for investor-State arbitration should be interpreted as including application of the legal standard on transparency. Such interpretation under article 31 (3) (a) of the Vienna Convention does not require any special form,<sup>10</sup> i.e. treaty form, but would have to clearly demonstrate the intention of the parties that their declaration constitutes an agreed basis for interpretation.

35. Such interpretative declaration may be viewed as coming close to a modification or amendment of the original treaty. International courts and tribunals have accepted as authentic interpretation subsequent declaration that deviated from the original intention of the parties under the treaty and/or the plain words of the treaty.<sup>11</sup> However, the distinction between treaty interpretation and amendment is far from being clear under public international law. The Working Group may wish to consider that, despite the recognition of a modifying or amending effect of an

<sup>10</sup> See, for example, Judgment of the International Court of Justice in the Kasikili/Sedudu Island (Botswana/Namibia), Judgement of 13 December 1999, I.C.J. Reports 1999, p. 1045, para. 49, available at [www.icj-cij.org/docket/files/98/7577.pdf](http://www.icj-cij.org/docket/files/98/7577.pdf), clarifying that article 31 (3) (a) of the Vienna Convention did not envisage that a subsequent agreement needed to be included with the same formal requirements as a treaty for such an agreement to play a role in treaty interpretation.

<sup>11</sup> See, for example, *Case concerning the Dispute Regarding Navigational and Related Rights (Costa Rica v. Nicaragua)*, Judgment of the International Court of Justice of 13 July 2009, para. 64, available at [www.icj-cij.org/docket/files/133/15321.pdf](http://www.icj-cij.org/docket/files/133/15321.pdf); *Interpretation of the Air Transport Services Agreement of 27 March 1946 (France v. United States of America)*, Award of 22 December 1963, pp. 60 ff., available at [http://untreaty.un.org/cod/riaa/cases/vol\\_XVI/5-74.pdf](http://untreaty.un.org/cod/riaa/cases/vol_XVI/5-74.pdf); *Location of Boundary Markers in Taba (Egypt v. Israel)*, Award of 28 September 1988, para. 210, available at [http://untreaty.un.org/cod/riaa/cases/vol\\_XX/1-118.pdf](http://untreaty.un.org/cod/riaa/cases/vol_XX/1-118.pdf); *Interpretation of the Air Transport Services Agreement of 6 February 1948 (Italy v. United States of America)*, Award of 17 July 1965, pp. 99 ff., available at [http://untreaty.un.org/cod/riaa/cases/vol\\_XVI/75-108.pdf](http://untreaty.un.org/cod/riaa/cases/vol_XVI/75-108.pdf).

interpretative declaration by States parties under customary international law, certain States might be reluctant to choose that option in view of the risk that possible controversies regarding the effect of such interpretation might arise.

(iii) *Unilateral declarations by States*

36. It was also suggested at the fifty-third session of the Working Group that the applicability of a legal standard on transparency could be achieved through unilateral declarations by States (A/CN.9/712, para. 93).

37. A declaration by only one State would not be sufficient to make a legal standard on transparency applicable to already existing treaties, because a treaty is based on the agreement of the States parties and action by the other State(s) party/ies that it/they share the same understanding would be needed. Therefore, States parties to an investment treaty would need to issue unilateral declarations to the same end so that a legal standard on transparency would apply to an existing treaty. Such unilateral declarations would then form a subsequent agreement between the States parties regarding the interpretation of the treaty or the application of its provisions under article 31 (3) (a) of the Vienna Convention (see above, paras. 32-35). Such subsequent declarations do not necessarily need to take the form of a “joint” statement. However, there needs to be evidence of the agreement of the parties on the interpretation of the treaty, which could be expressed by an exchange of notes. As the International Law Commission has stated in its draft guidelines on declarations relating to bilateral agreements,<sup>12</sup> an authentic interpretation of a treaty can result from an interpretive declaration made by only one State party to the treaty, if it has been accepted by the other party.<sup>13</sup>

(iv) *Amendment or modification of an investment treaty*

38. Article 39 of the Vienna Convention provides that “A treaty may be amended by agreement by the parties. The rules laid down in Part II apply to such an agreement except in so far as the treaty may otherwise provide.” Articles 40 and 41 of the Vienna Convention provide further details on the amendment or modification of treaties. The possibility for amendment of a treaty only by a new and separate agreement flows from the principle of *pacta sunt servanda*. The agreement will be binding only between the agreeing States parties.

39. The provisions of articles 39 to 41 of the Vienna Convention apply only if the treaty does not provide otherwise for the amendment or modification of the treaty. The Working Group may wish to note that many investment treaties contain provisions for amendment of the treaty. Even where the treaty provides for a certain amendment procedure, the subsequent unanimous agreement of the States parties can overrule such procedures. The Working Group may wish to note that an informal agreement to amend or modify a treaty may raise domestic constitutional

---

<sup>12</sup> The draft guidelines on declarations relating to bilateral agreements are included in the draft guidelines on reservations and authentic interpretation of a treaty pursuant to article 31 (3) (a) of the Vienna Convention issued by the International Law Commission, Report of the International Law Commission on the work of its sixty-second session, *Official Records of the General Assembly, Sixty-fifth session, Supplement No. 10* (A/65/10), p. 40, available at <http://untreaty.un.org/ilc/reports/2010/2010report.htm>.

<sup>13</sup> Ibid., Draft Guidelines 1.5.3.

difficulties, even if articles 39 to 41 of the Vienna Convention do not require that, as a matter of public international law, a treaty should be amended or modified in the same manner as it was concluded.

40. Some investment treaties expressly provide for the approval by the States parties for such amendments in accordance with their respective legal procedures. As an illustration of an investment treaty expressly providing for an agreement of the parties to amend the treaty, the Free Trade Agreement between the United States, Central America and Dominican Republic (CAFTA-DR) of 2004 provides in article 22.2 that: “(1) The Parties may agree on any amendment of this Agreement. [...] (2.) When so agreed, and approved in accordance with the applicable legal procedures of each Party, an amendment shall constitute an integral part of this Agreement to take effect on the date on which all Parties have notified the Depositary in writing that they have approved the amendment or on such other date as the Parties may agree.”<sup>14</sup> Another example is the Agreement between Japan and the United Mexican States for the Strengthening of the Economic Partnership (“Japan-Mexico FTA”) of 2004, which provides in article 174 that: “(1.) Unless otherwise provided for in this Agreement, this Agreement may be amended by agreement between the Parties. Such amendment shall be approved by the Parties in accordance with their respective legal procedures. Such amendment shall enter into force on the thirtieth day after the date of exchange of diplomatic notes indicating such approval. (2.) Any amendment to this Agreement shall constitute an integral part of this Agreement.”<sup>15</sup> There are also investment agreements that do not expressly mention the requirement of approval by the States parties in accordance with the respective legal procedures. For example, the Agreement Establishing the ASEAN-Australia-New Zealand Free Trade Area (AANZFTA) of 2009 provides in article 6 of Chapter 18 that: “This Agreement may be amended by agreement in writing by the Parties and such amendments shall come into force on such date or dates as may be agreed among them.”<sup>16</sup>

(v) *Could States be legally prevented from making a legal standard on transparency applicable to already existing treaties?*

41. The Working Group may wish to consider whether any right of an investor or any legitimate expectation of non-transparent arbitration under an investment treaty could prevent States from making a legal standard on transparency applicable to an already existing treaty. Such preclusion or estoppel would presuppose that the investor has a right or legitimate expectation of non-transparent arbitration for the investor under the investment treaty. The Working Group might wish to note that it is doubtful whether the investment treaty could be considered as creating such a right or legitimate expectation. If an investment treaty provides for arbitration under certain existing arbitration rules, it does not necessarily exclude by offering those arbitration rules that the actual arbitration proceedings would take place in a transparent manner. Further, many investment treaties refer to the possibility for an

investor to submit a claim to arbitration under “any other body of rules”, sometimes requiring agreement by both parties for these other rules to apply.<sup>17</sup>

42. The Working Group may wish to note that a right or legitimate expectation of an investor could be considered to come into existence only once the investor had accepted the offer for arbitration under the investment treaty, which, in many instances, takes place at the time of the submission of its claim.

### 3. Possible actions by States regarding future treaties

#### (i) *Consent by States parties to investment treaties*

43. Regarding the application of a legal standard on transparency to future treaties, it was said at the fifty-third session of the Working Group that a presumption of application of a legal standard on transparency could be provided for in a way that ensured the needed level of certainty to parties as to whether or not they were operating under transparency rules in a given arbitration (A/CN.9/712, paras. 82-84).

44. In that respect, the Working Group may wish to note that application of a legal standard on transparency to future investment treaties cannot be done automatically. At the fifty-third session of the Working Group, it was viewed as important that the provisions to be drafted regarding application of the rules on transparency to future treaties should be clear, and provide the necessary level of certainty as to the existence of consent of the States parties to adopt such standard as part of their arbitration process (A/CN.9/712, para. 84).

#### (ii) *Possible options for application of a legal standard on transparency to future treaties*

45. Consent of States to apply the legal standard on transparency could be materialized, either by the adoption by States of a convention on transparency in treaty-based investor-State arbitration (see above, paras. 23-25), or failing such a convention, by inclusion in investment treaties of provisions on transparency based on model clauses (see above, paras. 13 and 14), or by reference to a set of stand-alone rules on transparency (see above, paras. 16-21).

46. In case a legal standard on transparency would take the form of stand-alone rules, one possible approach would be for the legal standard on transparency to apply only if States parties to the investment treaty had expressly opted into transparent arbitration. Stand-alone rules on transparency could include wording along the lines of “the rules on transparency will apply to any arbitration initiated pursuant to an investment treaty hereafter ratified provided that the Parties have expressly agreed to their application.”

<sup>17</sup> See, for example, the United States of America Model Treaty concerning the Encouragement and Reciprocal Protection of Investment (“US Model BIT”) of 2004, which provides in article 24 (3) (b) that a claimant may submit a claim “if the claimant and respondent agree, to any other arbitration institution or under any other arbitration rules”; the Agreement Establishing the ASEAN-Australia-New Zealand Free Trade Area (AANZFTA) of 2009, which provides in article 21 (1) that “if the disputing parties agree, to any other arbitration institution or under any other arbitration rules” and the Agreement between Japan and the United Mexican States for the Strengthening of the Economic Partnership (“Japan-Mexico FTA”) of 2004, which provides in article 79 (1) (d) “if agreed by the disputing parties, any arbitration in accordance with other arbitration rules”.

47. A different approach could be for the rules on transparency to establish a presumption regarding their application in the limited context of arbitration under the UNCITRAL Arbitration Rules. The formulation of the presumption would depend on the manner in which the UNCITRAL Arbitration Rules would be supplemented by rules on transparency. It was suggested at the fifty-third session of the Working Group that stand-alone rules on transparency could include wording along the lines of “these rules will be incorporated in the UNCITRAL Arbitration Rules for any arbitration initiated under those rules pursuant to an investment treaty hereafter ratified unless the treaty expressly provides that these rules will not apply” (A/CN.9/712, para. 83).

48. At the fifty-third session of the Working Group, it was suggested that any solution that might be chosen in respect of future treaties should be evaluated as to its impact on the already concluded investment treaties (A/CN.9/712, para. 84).

## **B. Relation between the host State and the investor parties to the arbitration**

49. Once the States parties to an investment treaty agree on the applicability of the legal standard, the legal standard would be applicable to disputes between the host State and an investor. Questions for consideration are whether an investor could refuse an offer for transparent arbitration, or accept it partially only, and whether both parties could decide not to apply the rules on transparency.

### **1. Could the investor deviate from a legal standard on transparency?**

50. At its fifty-third session, the Working Group had considered the question whether an investor should be given an opportunity to refuse an offer to arbitrate under the legal standard on transparency contained in the treaty or to deviate from the provisions of the legal standard (A/CN.9/712, paras. 30 and 95-96). In that regard, it was pointed out that, in contrast to commercial arbitration, treaty-based investor-State arbitration was conducted on the basis of an underlying treaty between States parties, which limited the ability of the parties to the arbitration to depart from the prescribed route of the underlying treaty.

51. It had been further said that providing the investor with the last word on the application of the legal standard on transparency would unduly privilege the investor, lead to a decrease in transparency and would be contrary to the Commission’s mandate to enhance transparency in treaty-based investor-State arbitration. However, it was also said that, for the purpose of ensuring the equality of parties in treaty-based investor-State arbitration, it might be advisable to provide the right for an investor to react to the host State’s offer of transparent arbitration (A/CN.9/712, para. 96).

52. In that regard it was suggested to make some of the provisions of the legal standard on transparency non-derogable and to specify for each provision, which ones would be derogable and which ones not (A/CN.9/712, para. 98). The Working Group may wish to consider the policy decision to be made whether the legal standard itself or the underlying investment treaty should provide for non-derogability of the legal standard or of some of its provisions.

**2. Could the disputing parties deviate from a legal standard on transparency?**

53. The Working Group further discussed whether the disputing parties should be allowed to depart from the legal standard on transparency. As mentioned above, the underlying treaty, depending on how it provides for the application of a legal standard on transparency would or not prevent such deviation. If the treaty does not allow for such deviation, the host State party to the arbitration could not unilaterally deviate from the provisions of the treaty.

#### IV. Possible content of a legal standard on transparency

1. At its fifty-third session, the Working Group generally agreed that the substantive issues to be considered in respect of the possible content of a legal standard on transparency would be as follows: publicity regarding the initiation of arbitral proceedings; documents to be published (such as pleadings, procedural orders, supporting evidence); submissions by third parties (“*amicus curiae*”) in proceedings; public hearings; publication of arbitral awards; possible exceptions to the transparency rules; and repository of published information (“registry”) (A/CN.9/712, para. 31). The Working Group may wish to note that document A/CN.9/WG.II/WP.163 contains information on the practical aspects of transparency that usefully complement matters dealt with in the sections below.

##### A. Issues for consideration

###### 1. Publicity regarding the initiation of arbitral proceedings

###### (i) *Timing of the publication and documents to be published*

2. At the fifty-third session of the Working Group, different views were expressed on whether the existence of arbitral proceedings should be made public once the arbitral proceedings commenced, or when the arbitral tribunal was constituted (A/CN.9/712, para. 34). Different views were expressed regarding the information to be made public at that early stage of the proceedings, in particular, whether it should be limited to the existence of a dispute, or also include publication of the notice of arbitration (A/CN.9/712, para. 33). It was suggested that providing only preliminary information regarding the parties involved, their nationality, and the economic sector concerned might be sufficient (A/CN.9/712, para. 33).

3. Rules of arbitral institutions often referred to in investment treaties regarding the settlement of disputes between the host State and an investor do not provide for the publication of the notice of arbitration. For instance, Regulation 22 of the ICSID Administrative and Financial Regulations provides that “[t]he Secretary-General

shall appropriately publish information about the operation of the Centre, including the registration of all requests for conciliation or arbitration and in due course an indication of the date and method of the termination of each proceeding”. Rules of other arbitration institutions either do not deal with that matter, or provide for the confidentiality of the procedure (see A/CN.9/WG.II/WP.160, paras. 38 to 47 on the content of rules of arbitration institutions in that respect). Investment treaties sometimes provide for the publication of the notice of arbitration (and even of the intent to arbitrate), but the timing for such publication is not necessarily defined. It may be done at a stage where the seriousness of the claim has already been assessed. Examples of such provisions can be found in document A/CN.9/WG.II/WP.160, paras. 18 and 20.

4. In case the Working Group would favour the option of publication of the notice of arbitration once received by a party, it may wish to consider how to deal with the issue of protecting confidential and sensitive information that may be contained in the notice of arbitration at that early stage of the proceedings where no arbitral tribunal would yet be constituted (see below, paras. 41 and 42). Similarly, the question of frivolous claims, and the way to limit publication thereof would deserve consideration.

(ii) *Person(s) responsible for publication and consequences in case of failure to publish*

5. As to the person(s) responsible for taking the initiative of publication regarding the initiation of the arbitral proceedings, it is conceivable that the host State, the investor or a repository should be responsible for the publication. The publication of information could be undertaken jointly by the parties, based on their consent to do so (A/CN.9/712, para. 35).

6. The determination of the person responsible for making information public would depend on whether a repository for publishing information is established under the legal standard on transparency. If this were to be the case, the repository would be the channel through which information would be published, and the manner in which information should be conveyed to the repository should also be defined. In case no repository is established, publication could be envisaged to be made by the parties, either jointly or separately (see below, paras. 41 and 42).

7. Questions identified by the Working Group at its fifty-third session as to whether publication of information at that stage should be made mandatory, and if so, whether there should be any sanction in case of non-compliance also deserves further consideration (A/CN.9/712, para. 36).

## **2. Documents to be published**

(i) *List of documents*

8. At the fifty-third session of the Working Group, different views were expressed on whether, and if so, which documents should be published (A/CN.9/712, para. 40). The view was expressed that all documents submitted to, and issued by, the arbitral tribunal should be made available to the public (A/CN.9/712, para. 41). A contrary view was that not all documents would need to be published, in particular in view of the necessity to find the right balance between the requirements of public interest and the legitimate need to ensure manageability and efficiency of the arbitral procedure (A/CN.9/712, para. 42).

9. Provisions on public access to procedural documents in investment treaties dealing with that matter most often include either a general statement on publicity of all documents or a list of documents that should be made publicly available. In that latter case, the following documents have been listed: request for arbitration, notice of arbitration, submissions to the tribunal by a disputing party and any written submissions by the non-disputing party(ies) and *amicus curiae*, minutes or transcripts of hearings of the tribunal, where available; and orders, awards, and decisions of the tribunal.

(ii) *Person(s) responsible for the publication*

10. At the fifty-third session of the Working Group, different views were expressed on whether the parties or the arbitral tribunal should be the ones to decide on publication of documents. A further question was whether the consent of the parties would be required for publication (A/CN.9/712, para. 43). Some views were expressed that the arbitral tribunal should decide the issue of publication of documents on a case-by-case basis (A/CN.9/712, para. 44).

11. Under investment treaties, the responsibility for making that information available to the public lies in certain instances with the arbitral tribunal, in others with the parties.<sup>1</sup> Where parties are authorized to make information public, certain investment treaties provide that either party may make all information public, whereas others limit the right of a party to publicize only its own statements or submissions. In general, treaties do not provide details on the manner in which the information is to be conveyed to the public.

12. Concerning the timing for publication, certain investment treaties provide that the information shall be made available “immediately” or “in a timely manner”, whereas others are silent on that question.

(iii) *Practical aspects of publication*

13. Questions regarding the practical aspects of the publication of documents, such as the language of publication (A/CN.9/712, para. 45) and allocation between the parties of the costs of publication were raised at the fifty-third session of the Working Group and would deserve further consideration.

---

<sup>1</sup> Article 38, paras. (3) to (8), of Canada’s Model Foreign Investment Promotion and Protection Agreement 2004 (FIPA). See also, for instance, the Agreement between the United Mexican States and the Government of the Republic of Iceland on the Promotion and Reciprocal Protection of Investments, signed 24 June 2005, which states the following: “Article 17 — Awards and Enforcement (...) (4). The final award will only be published with the written consent of both parties to the dispute.”; available on 30 November 2010 at [www.unctad.org/sections/dite/ia/docs/bits/Mexico\\_Iceland.PDF](http://www.unctad.org/sections/dite/ia/docs/bits/Mexico_Iceland.PDF).

(iv) *Examples*

14. At the fifty-third session of the Working Group, an order in the case *Chemtura Corporation v. Government of Canada*<sup>2</sup> was given as an example of a document containing provisions on publication (A/CN.9/712, para. 41). It reads as follows:

*“Part II — Conduct of Proceedings and Public Disclosure of Documents [...] 11. Subject to the provisions of paragraph 13, either disputing party may disclose to the public the following materials, provided that the disputing party provides the other disputing party with 20 days’ notice of its intent to disclose such material publicly: all pleadings and submissions, together with their appendices and attached exhibits, correspondence to and from the Tribunal, transcripts and any awards, including procedural orders, rulings, preliminary and final awards. 12. A disputing party has twenty days from the date of notice by the other disputing party of its intent to publicly disclose material referred to in paragraph 11, to object to disclosure on the basis that it contains confidential information. Such material may not be publicly disclosed unless both disputing parties have confirmed that they do not object to such release or have agreed on the redaction of the material containing confidential information. 13. Except as permitted by this Order, neither disputing party shall publicly disclose material designated as confidential by the other disputing party [...].”*

15. Examples of provisions on publication of documents can be found in document A/CN.9/WG.II/WP.160, paras. 13 to 22.

**3. Publication of arbitral awards**

16. At the fifty-third session of the Working Group, many delegations expressed support for the establishment of a general provision under which awards rendered by arbitral tribunals in treaty-based investor-State arbitration should be published (A/CN.9/712, para. 62). That matter can be considered in light of examples given above in paragraphs 14 and 15 (“publication of documents”).

17. In case the Working Group would consider that awards should be treated differently from the other documents, and be made public, unless all parties to the arbitration agreed otherwise, it would still be possible to provide for the publication of excerpts of the award containing the relevant legal reasoning (A/CN.9/712, para. 63).<sup>3</sup> A provision reflecting that suggestion could read as follows: *“Awards shall be published unless all parties agree otherwise. In case the parties do not agree to the publication of an award, the arbitral tribunal shall promptly make publicly available excerpts of the legal reasoning of the tribunal.”*

**4. Submissions by third parties (amicus curiae) in arbitral proceedings**

18. Many delegations expressed strong support for allowing submissions by third parties, also known as amicus curiae submissions. It was said that amicus curiae submissions could be useful for the arbitral tribunal in resolving the dispute and promoted legitimacy of the arbitral process (A/CN.9/712, para. 46).

---

<sup>2</sup> *Chemtura Corporation v. Government of Canada, Confidentiality Order*, January 21, 2008.

<sup>3</sup> See Rule 48 (4) of the ICSID Arbitration Rules.

(i) *Restricting criteria for amicus curiae submissions*

19. It was widely felt that there should be certain restricting criteria in place for amicus curiae submissions, including the subject matter of the submission, expertise of the amicus curiae, relevance for the proceedings, appropriate page limits, and the time when such submissions would be allowed (A/CN.9/712, para. 47).

(ii) *Intervention by non-disputing State(s)*

20. The Working Group may consider whether it wishes to further consider the question of participation of non-disputing States that are parties to the investment treaty, but not to the arbitration, pending decision by the Commission on whether that matter should be part of the scope of the current work (see A/CN.9/WG.II/WP.162, para. 3). At the fifty-third session of the Working Group, it was observed that another State party to the investment treaty at issue that was not a party to the dispute could also wish, or be invited, to make submissions. It was noted that such State often had important information to provide, such as information on *travaux préparatoires*, thus preventing one-sided treaty interpretation (A/CN.9/712, para. 49).

21. The Working Group may wish to consider whether specific provisions should be crafted to determine the possible scope of intervention of a non-disputing State in the procedure. For instance, the scope of intervention of a non-disputing State could be limited to questions of interpretation of the investment treaty, or to submissions on points of law. Other questions that the Working Group may wish to consider include whether the arbitral tribunal may *ex officio* invite the non-disputing State to make submissions, and how to ensure that submission by a non-disputing State would not disrupt the proceeding or unfairly prejudice either party.

(iii) *Decisions on amicus submissions*

22. The Working Group left open the question whether the arbitral tribunal would have full discretion to decide on amicus curiae submissions or whether it would have to consult the parties, in accordance with the consensual nature of arbitral proceedings (A/CN.9/712, para. 48).

(iv) *Levels of access to documents*

23. In the general framework of allowing amicus curiae submissions, the importance of access to documents was emphasized, as the quality of any amicus curiae submissions would depend on the permitted level of access to documents (A/CN.9/712, para. 51). With respect to the role of amicus curiae, a question that would deserve further consideration is whether there should be different levels of access to documents provided for the general public on the one hand and amicus curiae on the other hand.

(v) *Costs and case management concerns*

24. In its consideration of that matter, the Working Group may wish to keep in mind the cost that may be incurred by the parties as a result of amicus curiae submissions and the necessity to find a right balance between transparency concerns and manageability of the case.

(vi) *Examples*

25. With the exception of the ICSID Arbitration Rules, rules of arbitral institutions usually do not contain express provisions on the participation of a non-disputing party, the possibility of which would remain a matter between the parties to the arbitration and in the discretion of the arbitral tribunal (see A/CN.9/WG.II/WP.160, paras. 29 to 47). Rule 37 (2) of the ICSID Arbitration Rules regulates non-disputing party submissions as follows:

*“After consulting both parties, the Tribunal may allow a person or entity that is not a party to the dispute (in this Rule called the ‘non-disputing party’) to file a written submission with the Tribunal regarding a matter within the scope of the dispute. In determining whether to allow such a filing, the Tribunal shall consider, among other things, the extent to which: (a) the non-disputing party submission would assist the Tribunal in the determination of a factual or legal issue related to the proceeding by bringing a perspective, particular knowledge or insight that is different from that of the disputing parties; (b) the non-disputing party submission would address a matter within the scope of the dispute; (c) the non-disputing party has a significant interest in the proceeding. The Tribunal shall ensure that the non-disputing party submission does not disrupt the proceeding or unduly burden or unfairly prejudice either party, and that both parties are given an opportunity to present their observations on the non-disputing party submission.”*

26. The Working Group may wish to note that Chapter Eleven of the North American Free Trade Agreement (NAFTA) and the interpretative documents produced by the Free Trade Commission contain details on the issue of third-party participation. The “Statement of the Free Trade Commission on non-disputing party participation” of 7 October 2004 reads as follows:

*“[...]B. Procedures*

*1. Any non-disputing party that is a person of a Party, or that has a significant presence in the territory of a Party, that wishes to file a written submission with the Tribunal (the ‘applicant’) will apply for leave from the Tribunal to file such a submission. The applicant will attach the submission to the application.*

*2. The application for leave to file a non-disputing party submission will: (a) be made in writing, dated and signed by the person filing the application, and include the address and other contact details of the applicant; (b) be no longer than 5 typed pages; (c) describe the applicant, including, where relevant, its membership and legal status (e.g., company, trade association or other non-governmental organization), its general objectives, the nature of its activities, and any parent organization (including any organization that directly or indirectly controls the applicant); (d) disclose whether or not the applicant has any affiliation, direct or indirect, with any disputing party; (e) identify any government, person or organization that has provided any financial or other assistance in preparing the submission; (f) specify the nature of the interest that the applicant has in the arbitration; (g) identify the specific issues of fact or law in the arbitration that the applicant has addressed in its written submission; (h) explain, by reference to the factors*

*specified in paragraph 6, why the Tribunal should accept the submission; and (i) be made in a language of the arbitration.*

3. *The submission filed by a non-disputing party will: (a) be dated and signed by the person filing the submission; (b) be concise, and in no case longer than 20 typed pages, including any appendices; (c) set out a precise statement supporting the applicant's position on the issues; and (d) only address matters within the scope of the dispute.*

4. *The application for leave to file a non-disputing party submission and the submission will be served on all disputing parties and the Tribunal.*

5. *The Tribunal will set an appropriate date by which the disputing parties may comment on the application for leave to file a non-disputing party submission.*

6. *In determining whether to grant leave to file a non-disputing party submission, the Tribunal will consider, among other things, the extent to which: (a) the non-disputing party submission would assist the Tribunal in the determination of a factual or legal issue related to the arbitration by bringing a perspective, particular knowledge or insight that is different from that of the disputing parties; (b) the non-disputing party submission would address matters within the scope of the dispute; (c) the non-disputing party has a significant interest in the arbitration; and (d) there is a public interest in the subject-matter of the arbitration.*

7. *The Tribunal will ensure that: (a) any non-disputing party submission avoids disrupting the proceedings; and (b) neither disputing party is unduly burdened or unfairly prejudiced by such submissions.*

8. *The Tribunal will render a decision on whether to grant leave to file a non-disputing party submission. If leave to file a non-disputing party submission is granted, the Tribunal will set an appropriate date by which the disputing parties may respond in writing to the non-disputing party submission. By that date, non-disputing NAFTA Parties may, pursuant to Article 1128, address any issues of interpretation of the Agreement presented in the non-disputing party submission.*

9. *The granting of leave to file a non-disputing party submission does not require the Tribunal to address that submission at any point in the arbitration. The granting of leave to file a non-disputing party submission does not entitle the non-disputing party that filed the submission to make further submissions in the arbitration. [...]"*

27. The Norwegian draft model agreement for investment contains specific provisions with respect to third-parties' intervention. Article 18, paragraph 3 provides as follows: "The Tribunal shall have the authority to accept and consider written amicus curiae submissions from a person or entity that is not a disputing Party, provided that the Tribunal has determined that they are directly relevant to the factual and legal issues under consideration. The Tribunal shall ensure an opportunity for the parties to the dispute, and the other Party, to submit comments on the written amicus curiae observations." In addition, article 18, paragraph 4 states that "[...] the Tribunal shall reflect submissions from the other Party and from amicus curiae in its report."

## 5. Hearings

### (i) Public hearings

28. At its fifty-third session, the Working Group considered whether hearings should be open to the public (A/CN.9/712, para. 52). Both support and reservations were expressed regarding public hearings. It was suggested that a provision on open hearings in any legal standard to be prepared on transparency should provide that hearings should be held in public, unless the parties agreed otherwise (A/CN.9/712, paras. 53-55). In contrast, reservations of a general nature were expressed regarding public hearings, a concept that was viewed to be contrary to the very nature of arbitration, which was said to be confidential and not to allow for third parties' access to hearings. It was said that treaty-based investor-State arbitration would often raise issues of a political nature and open hearings were likely to put additional pressure on the participating State, thus creating the risk that the involvement of the general public would not facilitate but adversely affect the settlement of the dispute (A/CN.9/712, para. 57).

29. Dispute resolution provisions in investment treaties favouring transparency provide that hearings shall be open to the public, subject to the protection of confidential information. Public hearings may be organized through webcast, or other means that would not necessarily require the physical presence of the public in the hearing room. Logistical arrangements are usually left to the arbitral tribunal to be determined in consultation with the disputing parties. Examples of such provisions can be found in document A/CN.9/WG.II/WP.160, paras. 23 to 28.

30. Rule 32 (2) of the ICSID Arbitration Rules deals with attendance by third party of hearings as follows: "*Unless either party objects, the Tribunal, after consultation with the Secretary-General, may allow other persons, besides the parties, their agents, counsel and advocates, witnesses and experts during their testimony, and officers of the Tribunal, to attend or observe all or part of the hearings, subject to appropriate logistical arrangements. The Tribunal shall for such cases establish procedures for the protection of proprietary or privileged information.*"

### (ii) Transcripts of hearings

31. At the fifty-third session of the Working Group, there was general agreement that the decision to be made regarding transcripts of hearings should depend upon the solution adopted in respect of public access to hearings (A/CN.9/712, para. 58). The Working Group was informed that, for arbitrations under the rules of ICSID, the decision to hold open hearings was left to the arbitral tribunal, unless either party objected. In contrast, to make transcripts publicly available, the consent of the parties was needed. It was further said that the publication of transcripts was a question usually left to the respondent State at least for cases under NAFTA and that ICSID so far had not published any transcripts on its website (A/CN.9/712, para. 59).

## 6. Possible limitations to transparency rules

### (i) *Principles*

32. At its fifty-third session, the Working Group considered the possible limitations to transparency. Various categories of possible exceptions or limitations were mentioned: protection of confidential and sensitive information, protection of the integrity of the arbitral process, and ensuring manageability of the arbitral proceedings (A/CN.9/712, paras. 67 to 72).

#### *- protection of confidential and sensitive information*

33. At the fifty-third session of the Working Group, the need to protect confidential and sensitive information was largely admitted, as was the need to protect proceedings from any outside pressures on the parties or on the arbitral tribunals (see below, paras. 36-40). Taking into account that both transparency and confidentiality can be considered as legitimate interests, the Working Group may wish to consider whether a right balance should be found to protect both interests. General comments were made to the effect that exceptions to transparency to protect confidential and sensitive information should not be so wide as to weaken the main rules on transparency; they should provide clarity and guidance, in order to avoid disputes between the parties on that matter (A/CN.9/712, para. 70).

#### *- protection of the integrity of the arbitral process*

34. At the fifty-third session of the Working Group, it was generally recognized that the question of protection of the integrity of the arbitral process was important to take into account as part of the discussions on transparency. In addition, protection of the integrity of the arbitral proceedings may be seen as a means to contribute to the de-politicization of investment disputes.

#### *- manageability of the arbitral proceedings*

35. At the fifty-third session of the Working Group, the general question of case management was said to be an important one to be further considered (A/CN.9/712, para. 72). Rules on transparency should not create delays, increase costs or unduly burden the arbitral proceedings and a right balance should be found between the public interest and the manageability of the arbitral proceedings.

### (ii) *Definition of confidential and sensitive information*

36. Dispute resolution clauses in investment treaties that deal with public access to procedural documents and awards usually provide that documents submitted to, or issued by, the arbitral tribunal shall be publicly available, unless the disputing parties agree otherwise, subject to the deletion of confidential and sensitive information. Confidential and sensitive information is usually described as information that is not generally known or accessible to the public and, if disclosed, would cause or threaten to cause prejudice to an essential interest of any individual or entity, or to the interest of a party or would be contrary to personal privacy (see A/CN.9/WG.II/WP. 160, paras. 13 to 22). At the fifty-third session of the Working Group, the view was expressed that any provision on that matter should be drafted in a generic manner, thus circumventing the need to envisage all possible

circumstances, but rather leaving a large degree of discretion to the arbitral tribunal (A/CN.9/712, para.69).

37. A model which was said to provide useful guidance in investor-State arbitration was the IBA Rules on the Taking of Evidence in International Arbitration (2010) which contained provisions on confidentiality in paragraphs (3) and (4) of article 9 on admissibility and assessment of evidence (A/CN.9/712, para. 68). Those provisions read as follows: “3. *In considering issues of legal impediment or privilege under Article 9.2(b), and insofar as permitted by any mandatory legal or ethical rules that are determined by it to be applicable, the Arbitral Tribunal may take into account: (a) any need to protect the confidentiality of a Document created or statement or oral communication made in connection with and for the purpose of providing or obtaining legal advice; (b) any need to protect the confidentiality of a Document created or statement or oral communication made in connection with and for the purpose of settlement negotiations; (c) the expectations of the Parties and their advisors at the time the legal impediment or privilege is said to have arisen; (d) any possible waiver of any applicable legal impediment or privilege by virtue of consent, earlier disclosure, affirmative use of the Document, statement, oral communication or advice contained therein, or otherwise; and (e) the need to maintain fairness and equality as between the Parties, particularly if they are subject to different legal or ethical rules.* 4. *The Arbitral Tribunal may, where appropriate, make necessary arrangements to permit evidence to be presented or considered subject to suitable confidentiality protection.*”

(iii) *Person(s) determining confidential and sensitive information*

38. The determination of confidential and sensitive information could be handled by the arbitral tribunal or the parties (A/CN.9/712, para. 69). Provisions in investment treaties seem to indicate that usually the parties are responsible for identifying confidential and sensitive information, and in case a decision needs to be made in that respect, the arbitral tribunal has the authority to do so.

(iv) *Sanction*

39. The question of the conditions of enforcement of limitations or exceptions to transparency rules and whether a sanction should be provided in case a party would breach confidentiality obligations would deserve further consideration. One possible sanction mentioned at the fifty-third session of the Working Group was related to costs (A/CN.9/712, para. 71). Article 9 (7) of the IBA Rules on the Taking of Evidence in International Arbitration (2010) was given as an example of a provision containing such sanction. It provided that: “*If the Arbitral Tribunal determines that a Party has failed to conduct itself in good faith in the taking of evidence, the Arbitral Tribunal may, in addition to any other measures available under these Rules, take such failure into account in its assignment of the costs of the arbitration, including costs arising out of or in connection with the taking of evidence*”.

(v) *Example of procedure*

40. US Model BIT, article 29(4) provides as follows:

*“Any protected information that is submitted to the tribunal shall be protected from disclosure in accordance with the following procedures:*

*(a) Subject to subparagraph (d), neither the disputing parties nor the tribunal shall disclose to the non-disputing Party or to the public any protected information where the disputing party that provided the information clearly designates it in accordance with subparagraph (b);*

*(b) Any disputing party claiming that certain information constitutes protected information shall clearly designate the information at the time it is submitted to the tribunal;*

*(c) A disputing party shall, at the time it submits a document containing information claimed to be protected information, submit a redacted version of the document that does not contain the information. Only the redacted version shall be provided to the non-disputing Party and made public in accordance with paragraph 1; and*

*(d) The tribunal shall decide any objection regarding the designation of information claimed to be protected information. If the tribunal determines that such information was not properly designated, the disputing party that submitted the information may (i) withdraw all or part of its submission containing such information, or (ii) agree to resubmit complete and redacted documents with corrected designations in accordance with the tribunal’s determination and subparagraph (c). In either case, the other disputing party shall, whenever necessary, resubmit complete and redacted documents which either remove the information withdrawn under (i) by the disputing party that first submitted the information or redesignate the information consistent with the designation under (ii) of the disputing party that first submitted the information.”*

## **7. Repository of published information (“registry”)**

41. At the fifty-third session of the Working Group, suggestions were made that information could be made publicly available by the parties, either the host State or the investor, or by a neutral registry (A/CN.9/712, paras. 37, 73-75). The purpose of the current work on transparency is to ensure that information on treaty-based investor-State arbitration cases are made known to the interested public. One flexible approach to do so could be to leave publication of information to the host State. In case an arbitral institution would be involved in the administration of the case, it could also be in charge of the publication.

42. In case the Working Group would decide that a neutral registry should be established, it may then wish to determine its role, and whether it would be involved in any determination regarding for instance limitations to transparency. Under that option, there would be a number of issues to clarify, such as what constitutes a treaty-based investor-State arbitration for the purpose of the applicability of the provisions on publication of documents by a neutral registry, the exact role of a neutral registry and whether it should be established within the United Nations Office of Legal Affairs, or in an existing arbitral institution; the Permanent Court of Arbitration at The Hague and ICSID have mentioned their readiness to provide that service.

## B. Proposals

43. The Working Group may wish to note that if the legal standard on transparency to be adopted takes the form of guidelines (see A/CN.9/WG.II/WP.162, para. 15), the content may include more detailed explanations; there could also be variants proposed to the parties and arbitral tribunals. If the legal standard takes the form of model clauses or stand-alone rules on transparency (see A/CN.9/WG.II/WP.162, paras. 13-14 and 16-21), binding on the parties once they apply, the rules should be clear as to the rights and obligations they provide.

### 1. Scope of application

44. A first part on the scope of application of the legal standard on transparency might be needed. The Working Group may wish to consider how to determine the criteria for application of the legal standard on transparency, whether it should be limited arbitration under investment treaties, or also apply to disputes under contract between States and investors, whether the term “investment treaty” would require clarification. The Working Group may wish to note the potential difficulties and lack of flexibility that any such definition of scope would entail. The Working Group may also wish to consider whether that section should also include a provision on the interplay between the legal standard on transparency and the applicable arbitration rules (see A/CN.9/WG.II/WP.162, paras. 46 and 47).

### 2. Initiation of the arbitral proceedings<sup>4</sup>

45. Proposal: *“Information regarding the name of the parties, their nationalities and the economic sector involved shall be made publicly available once [the notice of arbitration has been received by the respondent] [the arbitral tribunal has been constituted].”*

### 3. Publication of documents<sup>5</sup>

46. Option 1, Variant 1: *“All documents submitted to, or issued by, the arbitral tribunal shall be made publicly available [unless all parties agree otherwise,] subject to section 6 below.”* Variant 2: *“The following documents shall be made publicly available: the notice of arbitration; pleadings, submissions to the tribunal by a disputing party and any written submissions by the non-disputing party and amicus curiae; minutes or transcripts of hearings of the tribunal, where available; and orders, awards, and decisions of the tribunal [unless the disputing parties otherwise agree,] subject to section 6 below.”*

47. Option 2: *“The arbitral tribunal shall decide, in consultation with the parties, which documents to make publicly available.”*

<sup>4</sup> The proposal reflects the option where preliminary information only (and not the notice of arbitration) is disclosed at an early stage of the proceedings, either before or after the constitution of the arbitral tribunal. The option of publication of the notice of arbitration is dealt with under the section on publication of documents (see paras. 46-48).

<sup>5</sup> The following proposals seek to reflect the various suggestions made by the Working Group in relation to the publication of documents (see paras. 8-16). They include the question of publication of the notice of arbitration and arbitral award.

48. Proposal regarding the practical issue of language for the publication of documents: *“Documents shall be published in the language or languages in which they have been made available to the arbitral tribunal.”*

**4. Submissions by third parties (amicus curiae) in arbitral proceedings**

49. The Working Group may wish to consider the level of details it wishes to include on that matter in a legal standard on transparency, based on the examples given under paragraphs 25 to 27 above.

**5. Hearings and transcripts thereof**

50. Proposal: *“In the event of oral hearings, the Tribunal shall conduct hearings open to the public [unless either party objects] and shall determine, in consultation with the parties, the appropriate logistical arrangements. Transcripts of the hearings shall be made publicly available subject to section 6 below.”*

**6. Possible limitations to transparency rules**

51. A specific section dealing with limitations to both publication of documents and public hearings could be provided for in a legal standard on transparency. Those limitations could be dealt with in a generic or detailed manner and the Working Group may wish to determine which model would be more appropriate (see above, paras. 14, and 32-40).

**7. Repository of published information**

52. Proposal: *[The information] [The documents] referred to in sections 2 and 3 shall be made available by [to be determined] through [to be determined].*

**F. Note by the Secretariat on settlement of commercial disputes:  
transparency in treaty-based investor-State arbitration —  
comments of the Governments of Canada and of the United States  
of America on transparency in treaty-based investor-State  
arbitration under Chapter Eleven of the North American Free  
Trade Agreement (NAFTA), submitted to the Working Group on  
Arbitration and Conciliation at its fifty-fourth session  
[Original: English]  
(A/CN.9/WG.II/WP.163)**

In preparation for the fifty-fourth session of Working Group II (Arbitration and Conciliation), during which the Working Group is expected to work on the preparation of a legal standard on transparency in treaty-based investor-State arbitration, the secretariat has sent questions to States parties to the North American Free Trade Agreement (NAFTA) with a view to collect information on the practical aspects of transparency in treaty-based arbitration. In response, the Governments of Canada and of the United States of America, on 30th November 2010, submitted comments on the practical aspects of transparency in treaty-based investor-State arbitration under Chapter Eleven of NAFTA. The texts of the comments are reproduced as an annex to this note in the form in which they were received by the secretariat.

## **Annex**

### **1. Comments of the Government of Canada**

The Government of Canada herein provides a response to the Secretariat's request of information on our experience implementing transparency in the NAFTA context.<sup>1</sup>

### **I. Canada's Experience with respect to the Publication of the Initiation of NAFTA Arbitrations**

The Government of Canada gives public notice of the initiation of arbitral proceedings against it by posting the initiating documents submitted by potential claimants on the website of the Department of Foreign Affairs and International Trade as soon as possible, and in all cases, prior to the appointment of the arbitral tribunal. Indeed, Canada first provides public notice of potential arbitrations even before a claim is formally submitted. In particular, it has been Canada's practice to publish, promptly upon receipt from an alleged investor, the Notice of Intent to

---

<sup>1</sup> Canada notes, for the sake of clarity, that while pursuant to NAFTA Article 1137 and Annex 1137.4 Canada may publish arbitral awards without the consent of the investor, the other practices which have resulted in enhanced transparency in NAFTA arbitrations are not provided for in the text of NAFTA itself, but rather are a result of efforts subsequent to the NAFTA's adoption. These include the Notes of Interpretation of Certain Chapter 11 Provisions (2001) regarding access to documents; the NAFTA Parties' statements on open hearings in NAFTA Chapter Eleven arbitrations (2003); and the Statement of the Free Trade Commission on non-disputing party participation (2003).

Submit a Claim to Arbitration (“Notice of Intent”).<sup>2</sup> Prior to publishing the Notice of Intent, and later the Notice of Arbitration, Canada sends a letter to the alleged investor, describing Canada’s obligations under its Access to Information Act, as well as the position of Canada pursuant to the *Notes of Interpretation* of the NAFTA Free Trade Commission on access to documents. The letter indicates Canada’s intent to make the Notice of Intent or Notice of Arbitration, as the case may be, public, and therefore, requests that the alleged investor provide Canada with a version of the document with any confidential information redacted. In light of the fact that Canada publishes these documents itself, we have no experience where there has been a failure to make the initiation of an arbitration public.

In our experience, concerns that the publication of these initiating documents could have deleterious consequences in the case a claim is not pursued, or is frivolous, are unjustified. We have made public all 28 Notices of Intent submitted against Canada. To date, arbitral proceedings against Canada have been initiated with respect to only 15 of these potential claims. Further, of those 15 proceedings, only 10 have, to date, proceeded to the actual appointment of an arbitral tribunal. We have experienced no negative effects from making the early initiating documents publicly available in either the 13 cases which have not even proceeded to arbitration, nor in the 5 cases which, while submitted, have never reached the appointment of a Tribunal.

## II. Canada’s Experience with respect to Public Access to Documents in NAFTA Arbitrations

Under the 1976 and 2010 versions of the UNCITRAL Arbitration Rules, there is no rule governing what documents can or cannot be made publicly available. In early NAFTA arbitrations against Canada, access to documents tended to be limited to the primary pleadings (Notice of Intent, Notice of Arbitration, Statement of Claim and Statement of Defense) and the decisions of the Tribunal. However, in 2001, in order to ensure that Tribunals were acting in the fullest interests of transparency, the NAFTA Free Trade Commission issued Notes of Interpretation, binding under the NAFTA, pursuant to which the NAFTA parties agreed to “make available to the public in a timely manner all documents submitted to, or issued by, a Chapter Eleven tribunal.”<sup>3</sup>

Subsequent to these Notes of Interpretation, Tribunals in NAFTA arbitrations against Canada have allowed access to all documents submitted to or issued by the Tribunal.<sup>4</sup> In Canada’s experience, the phrase “all documents submitted to, or issued

<sup>2</sup> In the NAFTA context, the filing of a Notice of Intent does not formally initiate arbitral proceedings. Rather, such a filing merely satisfies a prerequisite of the Parties’ consent to arbitration. An investor may submit a claim to arbitration (e.g. by filing a Notice of Arbitration under the UNCITRAL Arbitration Rules) only after 90 days has passed after the filing of the Notice of Intent.

<sup>3</sup> *Notes of Interpretation of Certain Chapter 11 Provisions*, July 31, 2001, available at <http://www.international.gc.ca/trade-agreements-accords-commerciaux/disp-diff/nafta-interpr.aspx?lang=en>.

<sup>4</sup> For two different approaches giving effect to the Notes of Interpretation, compare *Chemtura Corp. v. Canada*, Confidentiality Order, dated January 21, 2008, 11, available at <http://www.international.gc.ca/trade-agreements-accords-commerciaux/assets/pdfs/Confidentialityorder.pdf> with *V.G. Gallo v. Canada*, Confidentiality

by” by the Tribunal creates a rule that is simple to follow: if it goes to or comes from the Tribunal, it is public, and if it is just between the parties, it is not. Accordingly, formal and informal written submissions, exhibits, witness statements/affidavits, expert reports, correspondence to and from the Tribunal and all decisions, orders, and awards by the Tribunal are made publicly available by Canada in redacted form. The only documents not publicly available pursuant to this approach are correspondence solely between the parties, as well as documents exchanged between the parties during document disclosure which are never offered into the evidentiary record by either party.

As a matter of policy, the Government of Canada takes upon itself the obligation to make these documents available to the public and, to date, it has borne the costs of doing so. In practice, Canada has a dual approach to the method of publication for these documents. Canada posts to the website of the Department of Foreign Affairs and International Trade the primary documents submitted to or issued by the Tribunal, such as pleadings (e.g. Notice of Intent, Notice of Arbitration, Statement of Claim and Statement of Defense), formal submissions (e.g. memorial, counter-memorial, reply and rejoinder), and decisions, orders and awards of the Tribunal. However, Canada does not post to the web, but instead makes publicly available upon request, other submissions, such as motions, expert reports, witness statements and exhibits. Such a request could be made either through Canada’s Access to Information Act, or simply by requesting that Canada provide these documents pursuant to the Confidentiality Order in the arbitration.

All of the above-described documents are made publicly available in the language in which they were submitted or issued. As a bilingual country, Canada is particularly aware of the importance of providing meaningful access to documents for different linguistic groups. However, to date, we have not received a request that any documents be translated and thus, have no relevant experience to share with the Secretariat in this regard.

### III. Canada’s Experience with Submissions by Third Parties in NAFTA Arbitrations

Canada’s experience in NAFTA arbitrations with respect to *amicus curiae* participation is that, as long as reasonable limits are established, *amicus* submissions can be a benefit for the Tribunal.

In this regard, the NAFTA Free Trade Commission issued a *Statement of the Free Trade Commission on non-disputing party participation* in 2003.<sup>5</sup> Pursuant to that Statement, whether to allow an interested *amicus* to participate is left to the discretion of the Tribunal. The disputing parties are permitted to comment on whether the Tribunal should grant leave for the *amicus* to file, but the Tribunal may, in principle, accept the submission over the objection of both disputing parties. The

---

Order, dated June 4, 2008, at 5, available at <http://www.international.gc.ca/trade-agreements-accords-commerciaux/assets/pdfs/ConfidentialityOrder2008-06-04.pdf>.

<sup>5</sup> *Statement of the Free Trade Commission on non-disputing party participation*, October 7, 2003, available at <http://www.international.gc.ca/trade-agreements-accords-commerciaux/assets/pdfs/Nondisputing-en.pdf>.

Statement recommends that in exercising its discretion, the Tribunal should consider a number of factors designed to help it determine whether or not the *amicus* submission will be helpful to the Tribunal—these include whether the *amicus* has knowledge or insight different from the parties and whether there is both an interest of the *amicus* and of the public in the dispute.

Recognizing that “written submissions by non-disputing parties in arbitrations under Section B of Chapter 11 of NAFTA may affect the operation” of Chapter 11 arbitration, the Free Trade Commission Statement also contains detailed guidelines for *amicus* submissions: an interested *amicus* must request leave to file a submission, *amicus* submissions must be in written form and must be attached to the application for leave, and the submission cannot be more than 20 pages in length. In preparing submissions, *amicus* have access only to the publicly available documents.

*Amicus* submissions have been made in two of the seven NAFTA arbitrations against Canada that have, to date, reached the stage of a hearing.<sup>6</sup> Further, procedural orders in other arbitrations have expressly addressed the issue of potential participation by *amicus*.<sup>7</sup> In the two cases where *amicus* submission were made, the disputing parties have been granted the opportunity to respond. In those cases, Canada and the Claimant each chose to respond to some but not all of the *amicus* submissions made. In our experience, Tribunals have not needed guidance on *amicus* submissions in addition to that contained in the Free Trade Commission Statement.

Finally, we note that in our NAFTA practice, the United States and Mexico have the right to make submissions on questions regarding the interpretation of the NAFTA pursuant to Article 1128 of NAFTA Chapter 11. In our view, such submissions are of a different type than an *amicus* submission.

#### IV. Canada’s Experience with Open Hearings in NAFTA Arbitrations

Three of the seven hearings in NAFTA Chapter 11 arbitrations against Canada have, so far, been open to the public.<sup>8</sup> Further, in another arbitration, where the hearing has yet to be held, the parties have agreed to an open hearing.<sup>9</sup> In two other cases, Canada has sought open hearings, but pursuant to the Claimants’ objection under the UNCITRAL Arbitration Rules, the hearings were closed.<sup>10</sup> The opening of the

<sup>6</sup> Specifically, *amicus curiae* made submissions in *UPS v. Canada* and in *Merrill & Ring Forestry L.P. v. Canada*.

<sup>7</sup> *Bilcon v. Canada*, Procedural Order No. 1, dated April 9, 2009, available at <http://www.international.gc.ca/trade-agreements-accords-commerciaux/assets/pdfs/ProceduralOrderNo1April9.pdf>.

<sup>8</sup> Specifically, *UPS v. Canada*, *Merrill & Ring v. Canada*, and *Mobil Investments Inc. and Murphy Oil Corporation v. Canada*.

<sup>9</sup> *William Ralph Clayton, William Richard Clayton, Douglas Clayton, Daniel Clayton and Bilcon of Delaware Inc. v. Canada*, Confidentiality Order, dated May 4, 2009, 26, available at <http://www.international.gc.ca/trade-agreements-accords-commerciaux/assets/pdfs/ProceduralOrderNo2-May42009.pdf>.

<sup>10</sup> *Chemtura v. Canada*, Confidentiality Order, 10, dated January 21, 2008, available at <http://www.international.gc.ca/trade-agreements-accords->

hearings did not pose significant logistical or operational hurdles, and nor, in Canada's opinion, did it negatively affect the hearing process in any way.

All three public hearings have been in arbitrations administered by ICSID and accordingly, the hearings have all been held at the World Bank in Washington, D.C. Public access was provided through the use of the ICSID closed-circuit television system. Members of the public were permitted to view the proceedings in a separate room. When confidential information was to be discussed, the video and audio feeds into this public viewing room were simply interrupted. In at least one case, the members of the public who were planning to attend the hearing were required to provide their names and affiliations in advance. Such measures can be used so as to ensure that people who have been excluded from the hearings (i.e. witnesses yet to testify) are not able to view the proceedings in contravention of that order. Media have attended these public hearings, but in all cases so far, any form of recording of the proceedings has been prohibited.

With respect to these three public hearings, Canada has posted two of the transcripts on the webpage maintained by the Department of Foreign Affairs and International Trade,<sup>11</sup> and intends to post the transcript of the most recent hearing as soon as it is available in redacted form.

## **V. Canada's Experience with the Publication of the Award in NAFTA Arbitrations**

Pursuant to Article 1137 and Annex 1137.4 of Chapter 11 of the NAFTA, Canada is entitled to publish any arbitral awards in NAFTA arbitrations. Canada does so by making such awards available, in redacted form, on the webpage maintained by the Department of Foreign Affairs and International Trade. In our experience, this process has been relatively efficient, and has presented no significant concerns with respect to the conduct of the arbitration or indeed the writing of the award by the Tribunal. To date, Canada has published all of the awards—jurisdictional, merits, damages and costs—in all 7 arbitrations that have issued awards. The typical procedure followed for publishing the award is the same followed for publishing all documents, described below.

## **VI. Canada's Experience Protecting Confidential Information in NAFTA Arbitration**

In every one of our NAFTA arbitrations to date, confidential information has been protected from public disclosure. Neither the text of NAFTA nor the subsequent Note of Interpretation on access to documents defines or identifies the information

---

commerciaux/assets/pdfs/Confidentialityorder.pdf; *V.G. Gallo v. Canada*, Procedural Order No. 1, 31, dated June 4, 2008, available at <http://www.international.gc.ca/trade-agreements-accords-commerciaux/assets/pdfs/ProceduralOrder12008-06-04.pdf>.

<sup>11</sup> *UPS v. Canada*, Hearing Transcripts available at [http://www.international.gc.ca/trade-agreements-accords-commerciaux/disp-diff/parcel\\_archive.aspx?lang=en](http://www.international.gc.ca/trade-agreements-accords-commerciaux/disp-diff/parcel_archive.aspx?lang=en); *Merrill & Ring v. Canada* transcripts available at [http://www.international.gc.ca/trade-agreements-accords-commerciaux/disp-diff/merrill\\_archive.aspx?lang=en](http://www.international.gc.ca/trade-agreements-accords-commerciaux/disp-diff/merrill_archive.aspx?lang=en).

that is confidential and should be protected. As a result, arbitral tribunals in NAFTA cases have entered Confidentiality Orders which both define what is to be considered confidential information in a particular case, and the process for the protection of that information. For the most part, in our arbitrations, Tribunals have adopted similar definitions designed to protect business confidential information of either the parties or third parties. We have no experience with a Tribunal ordering information to be withheld from the public on grounds other than confidential business information, such as protecting the integrity of the arbitral process.

In terms of the process for protecting confidential information, in our practice, Tribunals have required that a party intending to make a document public give notice to the other disputing party of its intent to do so. The other disputing party then has a set period of time to review the document and redact any confidential information.<sup>12</sup> Because the redaction of information as confidential is done pursuant to an Order of the Tribunal, any disputes are also resolved by Tribunal.

There have been several cases where Canada has felt that the Claimant inappropriately over-used the “confidential information” designation. In such cases, we have filed a motion with the Tribunal, and the Tribunal has issued a decision on what information can and cannot be redacted prior to public disclosure.<sup>13</sup>

We have no experience with respect to a disputing party violating the Confidentiality Order of the Tribunal, and making public a document that was intended to be kept confidential. In this regard, we note that the Tribunal likely has the same powers it does to enforce any of its Orders, including imposing any relevant costs as a sanction. Further, we also note that in our practice, individuals, other than the representatives of the disputing parties, who are given access to confidential documents in order to assist in the preparation of the case, are typically required to sign a “Confidentiality Undertaking.” In our practice, such an Undertaking is expressly made enforceable pursuant to domestic law, and the individual executing the Undertaking agrees to a domestic court in which disputes relating to a breach can be heard.

## VII. Canada’s Experience with Administering a Repository for the Public Information in its NAFTA Arbitrations

As referenced above several times, Canada uses primarily a web-based repository to store the public documents in its NAFTA arbitrations. However, also as explained above, in order to minimize the web resources required, we limit the types of documents that we post to this repository, making subsidiary or supporting documents instead available upon request.

<sup>12</sup> See, e.g., *Chemtura v. Canada*, Confidentiality Order, 11-12, dated January 21, 2008, available at <http://www.international.gc.ca/trade-agreements-accords-commerciaux/assets/pdfs/Confidentialityorder.pdf>.

<sup>13</sup> See, e.g., *Bilcon v. Canada*, Procedural Order No. 4, available at <http://www.international.gc.ca/trade-agreements-accords-commerciaux/assets/pdfs/Bilcon-ProceduralOrderNo4.pdf>; *Chemtura v. Canada*, Procedural Order No. 3, dated August 8, 2008, available at <http://www.international.gc.ca/trade-agreements-accords-commerciaux/assets/pdfs/ProceduralOrder3Aug82008.pdf>.

In our experience, a web-based repository of information provides an efficient and cost-effective way to disseminate information to the widest possible public audience in Canada. Further, several of our arbitrations are being administered by either ICSID or the PCA, and in such cases, public documents are also made available on their web-based repositories. In our experience, allowing multiple portals of access ensures availability to as wide an audience as possible.

## 2. Comments of the Government of the United States of America

The United States takes this opportunity to respond to the Secretariat's questions regarding the experience of the United States with ensuring appropriate transparency of arbitral proceedings under Chapter Eleven of the North American Free Trade Agreement ("NAFTA"). In response to these questions, and as a supplement to the U.S. comments submitted previously to UNCITRAL on this subject,<sup>14</sup> the United States provides the following additional information regarding its current transparency practices.

### **(1) Publicity regarding the initiation of arbitral proceedings (for instance, what is your experience regarding the publication of the notice of arbitration at an early stage of the proceedings? What would be the consequences of a failure to publish information on the initiation of arbitral proceedings?)**

As part of its commitment to ensuring the transparency of its investor-State arbitrations, the United States makes available promptly to the public, subject to the redaction of protected information,<sup>15</sup> documents regarding the initiation of arbitral proceedings. Pursuant to the NAFTA Free Trade Commission's July 31, 2001 Notes of Interpretation of Certain Chapter 11 Provisions ("NAFTA FTC Interpretation"), the Department of State makes available, "in a timely manner,"<sup>16</sup> Notices of Arbitration ("NOAs") that it receives by posting them on its website.<sup>17</sup> Under recent free trade agreements ("FTAs"), such as the U.S. – Central America – Dominican Republic Free Trade Agreement ("CAFTA-DR"), and bilateral investment treaties ("BITs") based on the 2004 U.S. Model BIT,<sup>18</sup> the United States is required to

<sup>14</sup> See Comments received from the United States of America on transparency in treaty-based investor-State arbitration, A/CN.9/WG.II/WP.159/Add.3 at 7-11 (Aug. 4, 2010) ("U.S. Comments on Transparency").

<sup>15</sup> The categories of protected information are described in the United States' comments on transparency in treaty-based investor-State arbitration. *Id.* at 9-10.

<sup>16</sup> See Notes of Interpretation of the Free Trade Commission of Certain Chapter 11 Provisions A(2)(b) (July 31, 2001), available at <http://www.state.gov/documents/organization/38790.pdf>.

<sup>17</sup> See NAFTA Investor-State Arbitrations, U.S. Department of State, <http://www.state.gov/s/l/c3439.htm>.

<sup>18</sup> As noted in the prior U.S. comments on transparency in treaty-based investor-State arbitration, see U.S. Comments on Transparency at 10, the following recent investment agreements negotiated by the United States "reflect the provisions" of the 2004 Model BIT with respect to transparency: U.S. – Uruguay BIT, art. 29; U.S. – Rwanda BIT, art. 29 (both available at <http://www.ustr.gov/trade-agreements/bilateral-investment-treaties/bit-documents>), and the investment chapters of the following recent FTAs "include similar transparency provisions": U.S. – Chile FTA, art. 10.20; U.S. – Colombia Trade Promotion Agreement, art. 10.21; U.S. – Peru Trade Promotion Agreement, art. 10.21; U.S. – Korea FTA, art. 11.21; U.S. – Morocco FTA, art. 10.20; U.S. – Oman FTA, art. 10.20; U.S. – Panama Trade Promotion Agreement, art. 10.21; and U.S. – Singapore FTA, art. 15.20 (all available at <http://www.ustr.gov/trade-agreements/free-trade-agreements>).

“promptly” make available to the public both Notices of Intent (“NOIs”) and NOAs that it receives.<sup>19</sup>

As practiced in the NAFTA context, the Department of State responds to the receipt of a NOI with a letter that both confirms receipt and discusses “several aspects of NAFTA Chapter Eleven and U.S. law that are relevant to the disclosure of documents in NAFTA investor-State arbitrations.”<sup>20</sup> That letter notifies the claimant that:

(1) under NAFTA Articles 1127 and 1129, copies of documents generated in connection with the arbitration will be provided to the Governments of Canada and Mexico;

(2) under the Freedom of Information Act (“FOIA”), 5 U.S.C. § 552, these documents may be disclosed to members of the public, who have a right of access, enforceable in court, to federal agency records or portions thereof, except to the extent they are protected by applicable exemptions or exclusions; one of which, under 5 U.S.C. § 552(b)(4), protects from disclosure “trade secrets and commercial or financial information ... [that is] privileged or confidential”;

(3) under the NAFTA FTC Interpretation, the NAFTA Parties agreed to provide access to the public to information in NAFTA Chapter Eleven arbitrations;

(4) under NAFTA Article 1126(10), a copy of any request for arbitration or NOA will be recorded in a public register at the NAFTA Secretariat; and,

(5) the United States’ general practice is to make documents available to the public, to the fullest extent feasible, by posting them to the Department of State’s website.<sup>21</sup>

Accordingly, the letter also recommends that, particularly with respect to U.S. FOIA obligations, should the claimant believe that any part of any document that it provides in this matter reflects confidential business information or is otherwise protected from disclosure under FOIA, it should clearly mark the specific information for which protection is claimed and provide a second version of the document in which such information is omitted or obscured.<sup>22</sup>

Without such a designation, the Department of State presumes that any information in the documents provided by the claimant is not exempt from disclosure to the public under the FOIA.<sup>23</sup>

After the letter is sent to claimant’s counsel, and if a NOA is subsequently received, the Department of State posts the NOA to its website in a timely manner, subject to any relevant redactions for protected information. For example, in *Grand River Enterprises Six Nations, Ltd. et al. v. United States*, the Department of State timely posted that NOA on a page which contained the following description of the case:

Grand River Enterprises Six Nations, Ltd., a Canadian corporation, Jerry Montour, Kenneth Hill and Arthur Montour have delivered a notice of arbitration under the UNCITRAL Arbitration Rules on their own behalf and on

<sup>19</sup> See CAFTA-DR art. 10.21(1)(a)-(b), 2004 Model BIT art. 29(1)(a)-(b), and *supra* note 18.

<sup>20</sup> See *infra* Form Letter, app. A.

<sup>21</sup> *Id.*

<sup>22</sup> *Id.*

<sup>23</sup> *Id.*

behalf of Native Wholesale Supply (collectively “Grand River”). Grand River is involved in the manufacture and sale of tobacco products. According to its Statement of Claim, Grand River seeks not less than \$310 million to \$664 million for damages allegedly resulting from a 1998 settlement agreement between various state Attorneys General and the major tobacco companies, and certain state legislation that partially implements the settlement.

Grand River alleges violations of NAFTA Articles 1102 (national treatment), 1103 (most-favoured-nation treatment), 1104 (better of national or most-favoured-nation treatment), 1105 (minimum standard of treatment under international law) and 1110 (expropriation).

The United States intends to defend this claim vigorously.<sup>24</sup>

As illustrated by the last sentence of the case description above, the United States indicates its position with respect to the defence of the claim when the NOA is posted.

The NAFTA FTC Interpretation reflects the political commitment of the NAFTA Parties to each other and to their respective national stakeholders to provide public access to each NOA, as well as other documents submitted to, or issued by, a Chapter Eleven tribunal.<sup>25</sup> The failure to provide public access would be inconsistent with this commitment.

**(2) Documents to be published (for instance, have there been any uncertainties as to whether certain types of documents should be published; or issues raised with respect to translation or costs related issues?)**

The United States described the documents to be published under the NAFTA FTC Interpretation and the 2004 Model BIT in its previous comments on transparency in treaty-based investor-State arbitration.<sup>26</sup>

To date, the United States has not faced uncertainty as to whether certain types of documents submitted to, or issued by a NAFTA tribunal should be published. The Department of State has generally posted to its website written submissions, transcripts, orders, and decisions for the cases in which it is a disputing Party, and provides links to websites maintained by Canada and Mexico which provide access to documents in cases submitted to arbitration against those NAFTA Parties.<sup>27</sup> Documents that are not posted to the website may be requested by members of the public, subject to the redaction of protected information, by contacting the U.S.

<sup>24</sup> *Grand River Enterprises Six Nations, Ltd. et al. v. United States*, U.S. Department of State, <http://www.state.gov/s/l/c11935.htm>.

<sup>25</sup> See NAFTA FTC Interpretation A(2)(b).

<sup>26</sup> See U.S. Comments on Transparency at 9.

<sup>27</sup> The only documents that the Department of State posts on its web pages for claims against the Governments of Canada or Mexico are non-disputing Party submissions under Article 1128 of the NAFTA. See, e.g., *Pope & Talbot, Inc. v. Government of Canada*, U.S. Department of State, available at: <http://www.state.gov/s/l/c3747.htm> (providing a brief description of the matter, copies of the United States’ Article 1128 submissions, and a hyperlink “[f]or further information and documents concerning this claim” to the Government of Canada’s webpage).

Department of State's Office of International Claims and Investment Disputes (L/CID).<sup>28</sup>

No issues have been raised with respect to the translation of these documents or costs related to making them available. The Department of State makes the documents available in the language or languages in which they were submitted to or issued by the tribunal.

**(3) Submissions by third parties (for instance, have you ever experienced an arbitral tribunal in the need of more guidance with respect to the decision-making on the acceptance of submissions by third parties?)**

The United States described the provisions relevant to consideration of amicus involvement in its previous comments on transparency in treaty-based investor-State arbitration.<sup>29</sup> Those comments also described the NAFTA FTC's Statement on Non-Disputing Party Participation ("FTC Amicus Statement"),<sup>30</sup> which recommended specific guidelines to be adopted by Chapter Eleven tribunals when considering proposed amicus submissions.<sup>31</sup> In practice, the United States has not been asked to provide guidance in addition to that recommended by the FTC Amicus Statement.

In *Glamis Gold, Ltd. v. United States*, the Tribunal applied the FTC Amicus Statement's guidelines. The Tribunal amended its first procedural order, which had established a deadline for amicus submissions, "respecting the filing of applications and submissions by non-parties in accordance with [FTC Amicus Statement]"<sup>32</sup> and noted subsequently that amicus submissions "must satisfy the principles" of the FTC Amicus Statement.<sup>33</sup> As detailed in the Award, the Tribunal had expressed its view that it "should apply strictly the requirements specified in the FTC Statement, for example restrictions as to length or limitations as to the matters to be addressed..."<sup>34</sup> For its part, the United States had fully supported amicus participation, "insomuch as it met the requirements of the FTC Statement in terms of both length and content [and] as long as that participation was effectuated in a manner that avoided placing undue burden on the Parties."<sup>35</sup> Ultimately, the Tribunal decided to accept amicus submissions from the National Mining Association, the Quechan Indian Nation,

<sup>34</sup> *Glamis Gold, Ltd. v. United States*, NAFTA/UNCITRAL, Award 286 (June 8, 2009) ("*Glamis Award*"), available at: <http://www.state.gov/documents/organization/125798.pdf>.

<sup>35</sup> *Id.* 285.

Sierra Club and Earthworks, and Friends of the Earth,<sup>36</sup> and to “consider [them], as appropriate, in accordance with the principles stated in the FTC Statement and the particular criterion mentioned by [the United States] that each submission bring ‘a perspective, particular knowledge or insight that is different from that of the disputing parties.’”<sup>37</sup>

In *Grand River Enterprises Six Nations, Ltd. et al. v. United States*, the parties agreed at the first session of the Tribunal that “the Tribunal should later adopt a process for receiving and considering *amicus* submissions, as necessary (but not at this stage), by having recourse to the recommendations of the [FTC Amicus Statement].”<sup>38</sup> When the Office of the National Chief of the Assembly of First Nations presented an *amicus* submission<sup>39</sup> without an accompanying application for leave to file, the Tribunal notified the parties that it “had received an unsolicited letter from a non-party supporting a Party in the pending arbitration.”<sup>40</sup> The Tribunal stated further that, “[i]n considering whether to accept and consider this letter, or any other submissions by non-Parties, the Tribunal intends to be guided by the [FTC Amicus Statement] and will decide in due course whether to consider the submission, in light of any views the Parties may wish to indicate in the Reply and Rejoinder.”<sup>41</sup> The United States stated in its Rejoinder that The Assembly of First Nation’s submission was not accompanied by an application for leave to file a non-party submission. The procedures recommended by the [FTC Amicus Statement] – which the Tribunal has indicated will guide their consideration of *amicus* submissions in this case – require that any proposed *amicus* submission be accompanied by an application for leave to file. Because the Assembly of First Nations did not seek leave to file, their submission should not be considered in this arbitration.<sup>42</sup>

The Tribunal has not yet decided whether to accept the submission.

**(4) Public hearings (for instance, how are public hearings organized? What is your experience with respect to the publication of transcripts?)**

The United States has a clear policy in support of open hearings. In the NAFTA context, the United States has declared that it “will consent, and will request the consent of disputing investors and, as applicable, tribunals, that hearings in Chapter Eleven disputes to which it is a party be open to the public, except to ensure the protection of confidential information, including business confidential information.”<sup>43</sup> Moreover, in the CAFTA-DR and under the 2004 Model BIT, the commitment to public hearings is even stronger because the relevant articles require that [t]he tribunal shall conduct hearings open to the public and shall determine, in consultation with the disputing parties, the appropriate logistical arrangements. However, any disputing party that intends to use information designated as protected information in a hearing shall so advise the tribunal. The tribunal shall make appropriate arrangements to protect the information from disclosure.<sup>44</sup>

In practice, NAFTA hearings have been open to the public via closed-circuit television feed. That feed may be cut, however, for portions of a hearing involving protected information. As explained in detail by the *Glamis* Tribunal in its Procedural Order No. 11: with respect to public access to the hearing, ICSID explained that a separate room had been reserved [at the World Bank in Washington, D.C.] into which a television broadcast would be made through the Bank’s video channel. Neither Party objected to public access in this form. Both Parties did, however, recognize that public viewing would not be possible during the discussion of specific confidential information, including the presentation of company financial information and details as to the exact locations of culture sites and artefacts.<sup>45</sup>

At the most recent merits hearing in *Grand River Enterprises Six Nations, Ltd. et al. v. United States*, the hearing was open to the public in the same manner. In that arbitration, the parties had agreed that [s]ubstantive hearings on merits would be open to the public via a live closed-circuit television transmission, provided that ICSID [was] able to make the appropriate logistical arrangements. It was also noted that no member of the public would be admitted into the hearing room.<sup>46</sup>

Pursuant to that agreement, the hearing was broadcast to a public viewing room at the World Bank in Washington, D.C., subject to cuts of the feed for the protection of confidential business information.

The Department of State also publishes complete hearing transcripts on its website, subject to the redaction of protected information.<sup>47</sup>

<sup>44</sup> See CAFTA-DR art. 10.21.2, 2004 Model BIT art. 29(2), and *supra* note 18.

<sup>45</sup> *Glamis Gold, Ltd. v. United States*, NAFTA/UNCITRAL, Procedural Order No. 11 15 (July 9, 2007), *available at*: <http://www.state.gov/documents/organization/88173.pdf>.

<sup>46</sup> *Grand River Enterprises Six Nations, Ltd. et al. v. United States*, NAFTA/UNCITRAL, Minutes of the First Session of the Tribunal § I(10) (Mar. 31, 2005), *available at*: <http://www.state.gov/documents/organization/45017.pdf>.

<sup>47</sup> See Cases Filed Against the United States of America, U.S. Department of State, *available at*: <http://www.state.gov/s/l/c3741.htm>. For an example of a dispute concerning the redaction of a hearing transcript, see *infra* response to question six.

**(5) Publication of awards (for instance, have there been any cases in which certain decisions or awards were excluded from publication? In the affirmative, what were the reasons?)**

To date, there have not been any cases where the United States was the disputing Party in which decisions or awards were excluded from publication. In Annex 1137.4 of the NAFTA, the United States specified that where it “is the disputing Party, either the United States or a disputing investor that is a party to the arbitration may make an award public.” Moreover, the United States has committed to making awards public under the NAFTA FTC Interpretation.<sup>48</sup> Additionally, the United States is required to make awards public under the CAFTA-DR and the 2004 Model BIT.<sup>49</sup>

**(6) Possible exceptions to the transparency rules (how to deal in practice with those exceptions, in particular in case of disagreement between the parties and how to ensure compliance?)**

As detailed in the U.S. comments on transparency in treaty-based investor-State arbitration, the NAFTA FTC Interpretation and the 2004 Model BIT provide for the non-disclosure of protected information.<sup>50</sup> In prior cases, the United States has concluded confidentiality agreements with claimants to ensure the non-disclosure of protected information and to particularize a procedure for determining whether certain information should be protected.

In practice, the United States seeks to resolve matters of confidentiality with the opposing party. In the event that the parties cannot reach agreement on whether certain information should be protected, the dispute is submitted to the tribunal for resolution, in accordance with any applicable confidentiality agreement. For example, in *Grand River Enterprises Six Nations, Ltd. et al. v. United States*, the United States disagreed with the claimants’ designation of specific information in the hearing transcripts as confidential business information. In the interest of making the transcripts public “in a timely manner,” as required by the NAFTA FTC Interpretation, the Department of State posted the hearing transcripts with this information redacted by the claimants to its website. However, the United States brought its challenge of certain of these redactions to the Tribunal, arguing that the claimants’ designation of the information as business confidential was not justified under the terms of the applicable confidentiality agreement. The Tribunal has not yet resolved this issue.

The United States has not encountered, in its investor-State practice as a disputing Party, any compliance issues regarding the non-disclosure of protected information.

**(7) Repository of published information (for instance, what difficulties have been encountered in the procedure of publication?)**

The Department of State has not encountered any particular difficulties with the publication of documents on its website. Nor has the Department encountered any particular difficulties with, in accordance with NAFTA Article 1126(10), providing a

copy of any request for arbitration or NOA to the NAFTA Secretariat for inclusion in a public register.

## **Appendix A: Form Letter**

*By E-mail & Courier*

Re: [Caption of Matter]

Dear [Addressee]:

This letter will confirm the receipt on [date] by the United States Government of [the claimant's] Notice of Intent to Submit a Claim to Arbitration under Section B of Chapter Eleven of the North American Free Trade Agreement ("NAFTA") concerning [brief description of the matter].

We take this opportunity to note several aspects of NAFTA Chapter Eleven and United States law that are relevant to the disclosure of documents in NAFTA investor-State arbitrations. First, the United States is obliged under NAFTA Articles 1127 and 1129 to provide to the other NAFTA Parties copies of many categories of documents generated in connection with arbitrations under Chapter Eleven. [The claimant] should understand that, by invoking the dispute-resolution provisions of Chapter Eleven, it has submitted itself to a process by which its documents can and will be provided to the Governments of Canada and Mexico.

Second, we note the United States' obligations under the Freedom of Information Act ("FOIA"), codified at 5 U.S.C. § 552. Under the FOIA, any member of the public has a right of access, enforceable in court, to federal agency records or portions thereof, except to the extent protected from disclosure by applicable exemptions or exclusions. One of the FOIA exemptions most often invoked for documents provided by litigants to agencies is 5 U.S.C. § 552(b)(4), which protects from disclosure "trade secrets and commercial or financial information ... [that is] privileged or confidential."

Should [the claimant] believe that any part of any document it provides in this matter reflects confidential business information or is otherwise protected from disclosure under FOIA, it should clearly mark the specific information for which protection is claimed and provide a second version of the document in which such information is omitted or obscured. Absent such a designation, we will presume that [the claimant] does not claim that any information in documents provided by it is exempt from disclosure to the public pursuant to the FOIA.

Third, we note the July 31, 2001 statement of interpretation of the Free Trade Commission established under NAFTA Article 2001, which is available at [www.state.gov/documents/organization/38790.pdf](http://www.state.gov/documents/organization/38790.pdf). That statement, among other things, recorded the intentions of the three NAFTA Parties to grant, subject to limited exceptions, access to the public to information in investor-State arbitrations pursuant to Chapter Eleven of the NAFTA.

Fourth, we note that NAFTA Article 1126(10) requires a disputing Party to provide a copy of any request for arbitration or notice of arbitration to the NAFTA Secretariat for inclusion in a public register. Any document submitting a claim to

arbitration in this matter will be made available to the public at the United States Section of the NAFTA Secretariat.

Fifth, the United States' general practice is to post to the website of the Department of State – to the fullest extent feasible – all submissions, orders and decisions in Chapter Eleven cases against the United States that are of interest to the public.

**G. Note by the Secretariat on settlement of commercial disputes:  
transparency in treaty-based investor-State arbitration — proposals by  
Governments and International Organizations, submitted to the  
Working Group on Arbitration and Conciliation at its  
fifty-fourth session**

**[Original: English]**

**(A/CN.9/WGII/WP.164)**

In preparation for the fifty-fourth session of Working Group II (Arbitration and Conciliation), during which the Working Group is expected to work on the preparation of a legal standard on transparency in treaty-based investor-State arbitration, delegations were encouraged at the fifty-third session of the Working Group to provide information, including written proposals, to the secretariat (A/CN.9/712, para. 101). The texts of the proposals are reproduced as an annex to this note in the form in which they were received by the secretariat.

**Proposal by the Government of Germany**

[Original: English]

[Date: 14 December 2010]

In the opinion of the German delegation to the UNCITRAL Working Group II (Arbitration and Conciliation), the session held by the Working Group from 4 to 8 October 2010 in Vienna was successful in laying down important foundations, first towards better understanding of the transparency requirement in investor-State arbitration and second, towards arbitration practices that comply with the transparency requirement. An analysis of the legal options available to create transparency in investor-State arbitration, which was advocated by many delegations, and by the chairperson in particular, helped to clarify a number of questions on the subject. In this light, the German delegation wishes to submit the following proposals to the chairperson and the other delegations before the next session of the Working Group. The proposals concern the next steps to be taken in preparing new rules on increased transparency in investor-State arbitration.

**The German delegation considers that the rules should be drafted as non-binding guidelines.**

Compared to the alternatives, non-binding guidelines most closely comply with the principle of a party-dominated process that underpins arbitration. Non-binding guidelines are also the best means of achieving the desired objective of all delegations: that is, to establish the widest possible acceptance of transparency rules. Such guidelines could have a significant bearing on both existing investment protection treaties and investment protection treaties that will be negotiated or revised in the future. They should apply to international treaties at intergovernmental level and to private contracts between States and investors which provide for the settlement of disputes through arbitration. In contrast to mandatory transparency rules, non-binding guidelines would allow sufficient flexibility to meet with broad agreement and thus achieve a large measure of practical relevance, in the German view.

Parties to future arbitration proceedings executed on the basis of existing investment protection treaties under the UNCITRAL Arbitration Rules could reach an agreement in the event of a dispute through ad hoc application of the new transparency guidelines. They could also agree, at a later stage, to a general application of the guidelines by means of a treaty amendment or addition.

It would be possible to incorporate the guidelines directly in new investment protection treaties. In this regard, the German delegation proposes the drafting of an additional model clause, which would allow the treaty parties to agree on the applicability of the UNCITRAL transparency guidelines.

In the German delegation's opinion, the alternative to transparency guidelines — agreement on mandatory transparency rules for investor-State disputes — would be a far inferior solution, and barely acceptable for Germany:

- It is unlikely that binding rules would take account, to the same extent as guidelines, of the generally desired goal to achieve the widest possible acceptance of the transparency rules. In contrast to a mandatory legal standard, drafting of non-binding guidelines would be more likely to favour rapid and successful reform within UNCITRAL.
- Incorporating the mandatory regulations in existing treaties would be considerably more difficult. Only investment protection treaties containing a dynamic reference to the latest applicable version of the UNCITRAL Arbitration Rules could be assumed, *ipso jure*, to include the new transparency rules.
- In arbitrations, the question of incorporating the rules would be contentious, possibly leading to additional expense and delays. This would impede the legitimate desire to create uniform transparency rules for investor-State arbitration.
- The UNCITRAL transparency rules should not be structured or formulated in such a way that could restrict national rights concerning access to information. There is a much higher risk of imposing such a restriction through mandatory regulations than through non-binding guidelines.

## Introduction

1. At its thirty-seventh session, in 2004, the United Nations Commission on International Trade Law (the “Commission”) entrusted the drafting of proposals for the revision of the 1994 UNCITRAL Model Law on Procurement of Goods, Construction and Services (the “Model Law”, A/49/17 and Corr.1, annex I) to its Working Group I (Procurement). The Working Group was given a flexible mandate to identify the issues to be addressed in its considerations, including providing for new practices in public procurement, in particular those that resulted from the use of electronic communications (A/59/17, para. 82). The Working Group began its work on the elaboration of proposals for the revision of the Model Law at its sixth session (Vienna, 30 August-3 September 2004) (A/CN.9/568). At that session, it decided to proceed at its future sessions with the in-depth consideration of topics in documents A/CN.9/WG.I/WP.31 and 32 in sequence (A/CN.9/568, para. 10).

2. At its seventh to thirteenth sessions (New York, 4-8 April 2005, Vienna, 7-11 November 2005, New York, 24-28 April 2006, Vienna, 25-29 September 2006, New York, 21-25 May 2007, Vienna, 3-7 September 2007, and New York, 7-11 April 2008, respectively) (A/CN.9/575, A/CN.9/590, A/CN.9/595, A/CN.9/615, A/CN.9/623, A/CN.9/640 and A/CN.9/648), the Working Group considered the topics related to the use of electronic communications and technologies in the procurement process: (a) the use of electronic means of communication in the procurement process, including exchange of communications by electronic means, the electronic submission of tenders, opening of tenders, holding meetings and storing information, as well as controls over their use; (b) aspects of the publication of procurement-related information, including possibly expanding the current scope of article 5 and referring to the publication of forthcoming procurement opportunities; and (c) electronic reverse auctions (ERAs), including whether they should be treated as an optional phase in other procurement methods or a stand-alone method, criteria for their use, types of procurement to be covered, and their procedural aspects.

3. At its seventh, eighth and tenth to twelfth sessions, the Working Group in addition considered the issues of abnormally low tenders (ALTs), including their early identification in the procurement process and the prevention of negative consequences of such tenders.

4. At its thirteenth and fourteenth (New York, 7-11 April 2008, and Vienna, 8-12 September 2008) sessions, the Working Group held an in-depth consideration of the issue of framework agreements on the basis of drafting materials contained in notes by the Secretariat. At its thirteenth session, the Working Group also discussed the issue of suppliers’ lists and decided that the topic would not be addressed in the revised Model Law, for reasons that would be set out in the Guide to Enactment. At its fourteenth session, the Working Group also held an in-depth consideration of the issue of remedies and enforcement and addressed the topic of conflicts of interest.

5. At its fifteenth session (New York, 2-6 February 2009), the Working Group completed the first reading of the draft revised model law and although a number of issues were outstanding, including the entire chapter IV, the conceptual framework was agreed upon. It also noted that further research was required for some

provisions in particular in order to ensure that they were compliant with the relevant international instruments.

6. At its sixteenth session (New York, 26-29 May 2009), the Working Group considered proposals for article 40 of the revised model law, dealing with a proposed new procurement method — competitive dialogue. The Working Group agreed on the principles on which the provisions should be based and on much of the draft text, and requested the Secretariat to review the provisions in order to align the text with the rest of the draft revised model law. The Secretariat was also entrusted with revising the draft provisions for chapter I.

7. At its seventeenth and eighteenth sessions (Vienna, 7-11 December 2009, and New York, 12-16 April 2010), the Working Group completed a second reading of all chapters of the draft revised model law and had begun a third reading of the text. The Working Group settled many of the substantive issues and requested the Secretariat to redraft certain provisions to reflect its deliberations at the sessions. The Working Group, at its eighteenth session, agreed to address the remaining outstanding issues throughout the draft revised model law with a view to finalizing the text at its nineteenth session and presenting the draft revised model law for adoption by the Commission at its forty-fourth session, in 2011. It also agreed to undertake work on a draft revised guide to enactment.

8. At its thirty-eighth to forty-first sessions, in 2005 to 2008, respectively, the Commission commended the Working Group for the progress made in its work and reaffirmed its support for the review being undertaken and for the inclusion of novel procurement practices in the revised Model Law (A/60/17, para. 172, A/61/17, para. 192, A/62/17 (Part one), para. 170, and A/63/17, para. 299). At its thirty-ninth session, the Commission recommended that the Working Group, in updating the Model Law and the Guide, should take into account issues of conflict of interest and should consider whether any specific provisions addressing those issues would be warranted in the revised Model Law (A/61/17, para. 192). At its fortieth session, the Commission recommended that the Working Group should adopt a concrete agenda for its forthcoming sessions in order to expedite progress in its work (A/62/17 (Part one), para. 170). Pursuant to that recommendation, the Working Group adopted the timeline for its deliberations at its twelfth and thirteenth sessions (A/CN.9/648, annex), and agreed to bring an updated timeline to the attention of the Commission on a regular basis. At its forty-first session, the Commission invited the Working Group to proceed expeditiously with the completion of the project, with a view to permitting the finalization and adoption of the revised Model Law, together with its Guide to Enactment, within a reasonable time (A/63/17, para. 307).

9. At its forty-second session, in 2009, the Commission considered chapter I of the draft revised model law and noted that most provisions of that chapter had been agreed upon, although some issues remained outstanding. The Commission noted that the draft revised model law was not ready for adoption at that session of the Commission. It entrusted the Secretariat to prepare drafting suggestions for consideration by the Working Group to address those outstanding issues. At that session, the importance of completing the revised model law as soon as reasonably possible was highlighted (A/64/17, paras. 283-285).

10. At its forty-third session, in 2010, the Commission requested the Working Group to complete its work on the revision of the Model Law during the next two sessions of the Working Group and present a draft revised model law for finalization and adoption by the Commission at its forty-fourth session, in 2011. The Commission instructed the Working Group to exercise restraint in revisiting issues on which decisions had already been taken (A/65/17, para. 239).

## II. Organization of the session

11. The Working Group, which was composed of all States members of the Commission, held its nineteenth session in Vienna, from 1 to 5 November 2010. The session was attended by representatives of the following States members of the Working Group: Argentina, Belarus, Bolivia (Plurinational State of), Botswana, Canada, China, Colombia, Czech Republic, Fiji, France, Germany, India, Iran (Islamic Republic of), Italy, Mexico, Paraguay, Philippines, Poland, Republic of Korea, Russian Federation, Singapore, Spain, Thailand, Turkey, Uganda, Ukraine, United Kingdom of Great Britain and Northern Ireland, United States of America and Venezuela (Bolivarian Republic of).

12. The session was attended by observers from the following States: Belgium, Dominican Republic, Guatemala, Indonesia, Kuwait, Panama, Romania, Slovakia, Sweden, Tunisia and Yemen.

13. The session was also attended by observers from the following international organizations:

(a) *United Nations system*: United Nations Office on Drugs and Crime (UNODC) and the World Bank;

(b) *Intergovernmental organizations*: European Bank for Reconstruction and Development (EBRD), European Union (EU), International Development Law Organization (IDLO), and Organization for Economic Cooperation and Development (OECD);

(c) *International non-governmental organizations invited by the Working Group*: Forum for International Conciliation and Arbitration (FICACIC) and International Federation of Consulting Engineers (FIDIC).

14. The Working Group elected the following officers:

*Chairman*: Mr. Tore WIWEN-NILSSON (Sweden)<sup>1</sup>

*Rapporteur*: Mr. Seung Woo SON (Republic of Korea)

15. The Working Group had before it the following documents:

(a) Annotated provisional agenda (A/CN.9/WG.I/WP.74);

(b) Possible revisions to the UNCITRAL Model Law on Procurement of Goods, Construction and Services — a revised text of the Model Law (A/CN.9/WG.I/WP.75 and Add.1-8).

---

<sup>1</sup> Elected in his personal capacity.

16. The Working Group adopted the following agenda:
  1. Opening of the session.
  2. Election of officers.
  3. Adoption of the agenda.
  4. Consideration of proposals for the revision of the UNCITRAL Model Law on Procurement of Goods, Construction and Services.
  5. Other business.
  6. Adoption of the report of the Working Group.

### **III. Deliberations and decisions**

17. At its nineteenth session, the Working Group continued its work on the elaboration of proposals for the revision of the Model Law.

## **IV. Consideration of proposals for the revision of the UNCITRAL Model Law on Procurement of Goods, Construction and Services (A/CN.9/WG.I/WP.75/Add.1-8)**

### **A. Chapter VIII. Review (A/CN.9/WG.I/WP.75/Add.8)**

18. The Working Group was informed about the results of inter-session consultations on draft chapter VIII. It noted that the following proposals for amendment during those consultations would affect the drafting of the entire chapter: (a) excluding procuring entities and approving authorities from the group of review bodies, the latter term being used only with respect to courts and administrative review bodies outside the procuring entity; (b) limiting the possibility of procuring entity to consider complaints only until the award of the procurement contract; (c) giving the discretion to the procuring entity to decide on suspension of the procurement proceedings; (d) leaving the power to overturn the concluded contracts to courts; and (e) referring in the Guide to systems, alternative to the one in the revised Model Law. The Working Group was also invited to reconsider the need for references to “approving authority” throughout the chapter, taking into account their very infrequent use in the draft revised Model Law as compared to the 1994 text.

19. It was agreed that specific changes proposed to be made to draft chapter VIII during inter-session consultations should be introduced to the Working Group by the Secretariat article by article.

*Article 61. Right to review*

20. The Working Group had before it the following suggestion for article 61:

**“Article 61. Right to seek reconsideration or review**

(1) A supplier or contractor that claims to have suffered or claims that it may suffer, loss or injury due to alleged non-compliance with the provisions of this Law may seek a reconsideration or review of the alleged non-compliance, in accordance with articles [62 to 66] of this Law or with other provisions of applicable law of this State.

(2) A supplier or contractor may appeal any decision taken by a procuring entity or by a review body in proceedings initiated pursuant to paragraph (1) of this article, or may institute proceedings if no decision is issued within the prescribed time-limits, or if the procurement proceedings are not suspended as required by article [65 (1)] of this Law.”

21. The point was made that the provisions of paragraph (1) should be conformed to article 64 (2) as regards suppliers that would have the right to file a complaint or appeal (see para. 57 below).

*Article 62. Review by the procuring entity or the approving authority*

22. The Working Group had before it the following suggestion for article 62:

**“Article 62. Application for reconsideration by  
the procuring entity or the approving authority**

(1) A supplier or contractor may apply to procuring entity[, or where applicable, to the approving authority], to have a decision or step in the procurement proceedings reconsidered.

(2) Applications for reconsideration shall be submitted in writing and shall be submitted within the following time periods:

(a) Applications for reconsideration as regards the terms of solicitation, pre-qualification or pre-selection or arising from the pre-qualification or pre-selection proceedings shall be submitted no later than the deadline for presenting submissions;

(b) All other applications for reconsideration arising from the procurement proceedings shall be submitted prior to the entry into force of the procurement contract.

(3) Promptly after the timely submission of an application under paragraph (2) of this article, the procuring entity [or approving authority] may suspend the procurement proceedings. The procuring entity[, or approving authority] may take no decision or step to award the procurement contract until [its decision on the application has been communicated to the supplier or contractor submitting the application].

(4) The procuring entity [or approving authority] may overturn, correct, vary or uphold any decision or step in the procurement proceedings that is the subject of the application.

(5) The procuring entity [or the approving authority] shall issue a written decision on the application within ... working days (the enacting State specifies the period) after the submission of the application. The decision shall state the reasons for the decision, and the action taken.

(6) If the procuring entity [or the approving authority] does not communicate its decision to the supplier or contractor submitting the application and to any other participant in the application by the time specified in paragraph (2) of this article, the supplier or contractor submitting the application is entitled immediately thereafter to institute proceedings under article [63 or 66]. Upon the institution of such proceedings, the competence of the procuring entity [or the approving authority] to entertain the complaint ceases.”

23. The Working Group recalled its earlier decision not to refer in the article to “the head of the procuring entity” (as in the 1994 text), and to provide for an optional recourse by aggrieved suppliers to the procuring entity. The formal nature of the procedures covered by the article was highlighted.

#### *Paragraph (2)*

24. With reference to paragraph (2), the following risks of not allowing the procuring entity to consider applications for reconsideration after the procurement contract entered into force were highlighted: (a) in the absence of an independent review body in some jurisdictions, suppliers’ recourse would be limited to the courts, which might be burdensome and inefficient; and (b) the system would provide incentives to the procuring entity to rush to conclude procurement contracts to avoid review. The point was made that in some jurisdictions, the law provided that the procuring entity could consider complaints submitted to it after the award of the procurement contract, and the procuring entities had the authority to overturn contracts that had entered into force. Possible reasons for overturning the procurement contract mentioned were termination of an awarded contract where an impropriety had occurred during the award process, for public policy considerations and for preserving the integrity of the process. Support was therefore expressed for article 62 (2) as contained in document A/CN.9/WG.I/WP.75/Add.8.

25. The view prevailed that the article should not deal with justifications for termination of a concluded contract and should not allow the unilateral modification of concluded contracts by the procuring entity. Concern was expressed that the proposed expansion of the period for filing complaints might inadvertently give excessive powers to the procuring entity. The limited scope of the Model Law, which did not cover the contract administration stage, was noted in this respect. Support was expressed therefore for paragraph (2) as contained in paragraph 22 of this report. Safeguards provided for by a standstill period and in chapter VIII of the Model Law, including the possibility of post-award review in a court and where applicable in the independent review body, were considered sufficient.

26. Reservation was expressed about this approach on the understanding that under certain conditions the procuring entity, rather than the court or the independent review body, would be in the best position to deal with post-award

complaints. In such situations, it should be allowed to deal with them without requiring recourse to the independent review body or court. The Working Group agreed that the matter might need to be reconsidered in conjunction with other provisions of the chapter, so that the correct balance between the effective protection of the rights of suppliers, and the need to ensure the integrity of the process, and efficiency was achieved.

*Paragraph (3)*

27. With regard to paragraph (3), it was questioned whether it would be desirable to provide the procuring entity with complete discretion as regards a decision to suspend the procurement proceedings. Particular concern was expressed about an optional suspension in the case of complaints as regards terms of solicitation. In challenges to pre-qualification or pre-selection decisions, potentially negative impacts on aggrieved suppliers, where there was no suspension, was also noted. The suggestion was therefore made that the first sentence should be deleted and in the second sentence the word “shall” should be used in lieu of the word “may”.

28. The alternative view was that the provisions of the first sentence, conferring discretion on the procuring entity to suspend the procurement proceedings, should be retained. It was noted that the provisions for mandatory suspension might be abused by suppliers which might use them for exerting pressure on the procuring entity. The Working Group also noted that article 63 provided safeguards by allowing an appeal against a decision by the procuring entity not to suspend to the independent review body. Some other provisions of the Model Law, such as on extension of deadlines for presenting submissions or on cancellation of the procurement, were also noted as relevant.

29. The view prevailed that the law should confer discretion on the procuring entity to suspend the procurement proceedings. The understanding was that the Guide should refer to cases that would justify a suspension, such as in the case of complaints as regards the terms of solicitation, in which case a suspension would be justified to avoid costs that would arise if the entire procurement proceedings were nullified late in the process. It was decided that the Model Law could not stipulate all situations when suspension would or would not be justifiable and therefore relying on the reasonable judgment of the procuring entity was unavoidable and appropriate.

30. It was agreed that the last sentence of paragraph (3) should be redrafted along the following lines: “The procuring entity[, or approving authority] shall not award the procurement contract until [its decision on the application has been communicated to the supplier or contractor submitting the application].” The Secretariat was requested to amend the provisions in order avoid any unintentional implication that the procurement contract could be awarded immediately after the procuring entity’s decision on the application for reconsideration was communicated to the supplier or contractor submitting the application. (For further discussion relevant to the provisions of article 62 on suspension, see paras. 70-73 below.)

*Paragraph (4)*

31. In response to a query as regards the words “or step”, it was clarified that the reference was intended to cover actions other than a decision, such as the means or timeframe of communicating a decision to interested parties. Preference was expressed for reconsidering or deleting the reference to “or step”.

*Paragraph (5)*

32. Questions were raised as regards the requirement to provide a decision in writing. The practice in jurisdictions that allowed for silence on the part of the procuring entity to be taken as an objection or a rejection was noted. The Working Group agreed that the issue would be discussed in the Guide with an indication that best practice was to provide a written, reasoned decision. Reference in this context was also made to paragraph (6) that addressed the consequences of a failure to issue a decision.

33. The Secretariat was requested to replace the provisions throughout the chapter referring to “issuance of the decisions” with provisions reading “giving notice of the decision” and indicating the intended addressees.

*Paragraph (6)*

34. It was agreed that the paragraph should be redrafted to make it consistent with paragraph (5) as regards the need to give notice of the decision and specify reasons for the decision and the intended addressees. It was also noted that a reference to “participants in the application” should be reconsidered to make it more consistent with the relevant wording found in article 64 (1) in document A/CN.9/WG.I/WP.75/Add.8.

35. The suggestion was made that the provisions of article 62 should envisage an additional period of time after the notice of the decision of the procuring entity to allow an effective appeal. A cross-reference in this regard was made to the relevant provisions in article 65 (5) in document A/CN.9/WG.I/WP.75/Add.8.

*Article 63. Review before an independent administrative body*

36. The Working Group had before it the following suggestion for article 63:

**“Article 63. Review before an independent review body”<sup>\*</sup>**

(1) A supplier or contractor seeking review may submit a complaint or an appeal to ... (the enacting State inserts the name of the independent review body). Complaints or appeals shall be submitted in writing, and shall be submitted within the following time periods:

---

<sup>\*</sup> States where hierarchical administrative review of administrative actions, decisions and procedures is not a feature of the legal system may omit this article and provide only for judicial review (article [66]), on the condition that in the enacting State exists an effective system of judicial review, including an effective system of appeal, to ensure legal recourse and remedies in the event that the procurement rules and procedures of this Law are not followed, in compliance with the requirements of the United Nations Convention against Corruption. [States may provide for the system of appeal judicially, or administratively, to reflect the legal system in the jurisdiction concerned.]

- (a) Complaints as regards the terms of solicitation, pre-qualification or pre-selection or arising from the pre-qualification or pre-selection proceedings shall be submitted no later than the deadline for presenting submissions;
  - (b) All other complaints regarding decisions or steps taken in the procurement proceedings shall be submitted prior to the entry into force of the procurement contract;
  - (c) Complaints submitted on the ground that a decision was not issued in accordance with article 62 (4), or that the procurement proceedings were not suspended in accordance with article [65 (1)], shall be submitted within ... working days (the enacting State specifies the period) after the expiry of the prescribed time-limit for issuance of such a decision or within ... working days (the enacting State specifies the period) after the submission of the application for reconsideration;
  - (d) Appeals against a decision of the procuring entity [or approving authority] made under article [62 (3)] of this Law shall be submitted within ... working days (the enacting State specifies the period) after the decision was communicated to the supplier or contractor concerned.
- (2) Upon receipt of a complaint or an appeal, the ... (the enacting State inserts the name of the independent review body) shall give notice thereof promptly to the procuring entity [and to the approving authority where applicable].
- (3) The [insert name of review body] may declare the legal rules or principles that govern the subject matter of the complaint or appeal and shall be [empowered/required] to take one or more of the following actions:
- (a) Prohibit the procuring entity[, or the approving authority as the case may be,] from acting or deciding unlawfully or from following an unlawful procedure;
  - (b) Require the procuring entity[, or the approving authority as the case may be,] that has acted or proceeded in an unlawful manner, or that has reached an unlawful decision, to act or to proceed in a lawful manner or to reach a lawful decision;
  - (c) Overturn in whole or in part an unlawful act or decision of the procuring entity, or the approving authority as the case may be, [other than any act or decision as to the award of the procurement contract], [or uphold or overturn in whole or in part a decision of the procuring entity [or the approving authority] on an application made under article 62];
  - (d) Revise an unlawful decision by the procuring entity, or the approving authority as the case may be, or substitute its own decision for such a decision, other than any act or decision bringing the procurement contract into force, or confirm a lawful decision by the procuring entity or the approving authority;
  - (e) Order that the procurement proceedings be suspended or terminated;
  - (f) Dismiss the complaint or appeal;
  - (g) Require the payment of compensation for any reasonable costs incurred by the supplier or contractor submitting the complaint or appeal as a result of

an unlawful act or decision of, or procedure followed by, the procuring entity or the approving authority in the procurement proceedings, and for any loss or damages suffered[, which shall be limited to costs for the preparation of the submission, or the costs relating to the complaint and the appeal where applicable, or both]; or

(h) Take such alternative action as is appropriate in the circumstances.

(4) The [insert name of review body] shall within [...] days after receipt of the complaint or appeal issue a written decision concerning the complaint or appeal, stating the reasons for the decision and the action taken.

(5) The [insert name of review body] shall communicate its decision to all participants in the review proceedings in accordance with article 64 (5).

(6) The procuring may request the [insert name of review body], in writing, to permit a procurement contract to be awarded before an application under article 62 is determined, on the grounds referred to in paragraph (3) of article 65. The decision of the [insert name of review body] on such a request shall be made a part of the record of the procurement proceedings and shall promptly be communicated to all parties to the application concerned.”

37. It was agreed that the reference to an “independent review body” should be replaced with a reference to an “independent body”. The former was considered too narrow since the body in question in some jurisdictions, apart from being a review body, might have some advisory function.

38. In paragraph (1) (b), it was agreed to replace “prior to the entry into force of the procurement contract” with the relevant text in article 63 (1) (b) contained in document A/CN.9/WG.I/WP.75/Add.8. In support of this change, it was noted that it would be essential to permit complaints and appeals to be filed shortly after the contract entered into force, so as to eliminate any incentive for the procuring entity to conclude the procurement contract while the complaint of the aggrieved supplier remained unresolved. It was noted, however, that the Guide might draw the attention of enacting States to the fact that not all jurisdictions in fact allowed for complaints or appeals to be filed after the procurement contract had entered into force.

39. As a result of the change agreed to be made in paragraph (1) (b), it was agreed to delete paragraph (1) (c) and replace paragraph (1) (d) with the text of article 63 (1) (c) contained in document A/CN.9/WG.I/WP.75/Add.8.

40. A number of revisions were proposed to the list of actions that might be taken by the independent body, to reflect, in particular, that not all jurisdictions allowed review bodies: (a) to substitute decisions of the procuring entity with their own decisions; and (b) to overturn the procurement contract. It was agreed that the following list of actions might be included in paragraph (3):

“(a) Prohibit the procuring entity[, or the approving authority as the case may be,] from acting or deciding unlawfully or from following an unlawful procedure;

(b) Require the procuring entity[, or the approving authority as the case may be,] that has acted or proceeded in an unlawful manner, or that has reached an unlawful decision, to act or to proceed in a lawful manner or to reach a lawful decision;

- (c) Overturn in whole or in part an unlawful act or decision of the procuring entity, or the approving authority as the case may be, [other than any act or decision as to the award of the procurement contract], [or uphold or overturn in whole or in part a decision of the procuring entity [or the approving authority] on an application made under article 62];
- (d) Revise an unlawful decision by the procuring entity, or the approving authority as the case may be, or substitute its own decision for such a decision, other than any act or decision bringing the procurement contract into force, or confirm a lawful decision by the procuring entity or the approving authority;
- (e) Overturn the award of a procurement contract or the framework agreement that has entered into force unlawfully and, if notice of the award of the procurement contract or the framework agreement has been published, order the publication of notice of the overturning of the award;
- (f) Order that the procurement proceedings be suspended or terminated;
- (g) Dismiss the complaint or appeal;
- (h) Require the payment of compensation for any reasonable costs incurred by the supplier or contractor submitting the complaint or appeal as a result of an unlawful act or decision of, or procedure followed by, the procuring entity or the approving authority in the procurement proceedings, and for any loss or damages suffered(, which shall be limited to costs for the preparation of the submission, or the costs relating to the complaint and the appeal where applicable, or both); or
- (i) Take such alternative action as is appropriate in the circumstances.”

41. With respect to the provisions in subparagraphs (c) to (e), it was agreed that the text should be placed in parenthesis, and that the Guide or a footnote to those provisions should explain that States that did not allow the listed actions to be taken by an independent body might not enact them. With respect to the provisions in parenthesis in subparagraph (h), it was agreed that the Guide would explain that, if the language in parenthesis was deleted, the resulting provisions, by allowing the State to permit compensation for lost profits, might provide appropriate incentives for filing complaints and appeals, which might be appropriate when the concept of an independent review was introduced. With respect to the provisions in subparagraph (i), it was agreed that if the text was included, the Guide would specify that it was intended to accommodate evolving practices as regards actions that might be taken by review bodies, and would discuss the scope of the subparagraph.

42. It was observed that the language of article 63 addressed the question of timing of complaints, but not the manner in which an independent body would determine whether a complaint was receivable. In this context, practical experience in some countries was shared: suppliers had appeared ignorant of procurement law, and complaints without merit had been commonly filed. The manner in which such complaints were treated could call into question the effectiveness of review proceedings, it was said. It was accordingly suggested, and agreed, that the words “without merit” should be added in subparagraph (g). It was noted that in one jurisdiction the independent body had 5 days to decide whether to take the action referred to in subparagraph (g). It was noted that the Guide would explain that

“without merit” in this context was a broad notion intended to cover frivolous or vexatious claims and complaints filed out of time or by persons that had no standing to file a complaint.

43. The need to make consequential changes in paragraph (4) and (5) as regards notices of decisions and intended addressees was noted (see para. 33 above).

44. A query was raised about the possibility of charging suppliers fees for filing complaints or appeals. This was seen as an effective tool to deter abusive practices. It was considered however that the issue of charging fees should be dealt with in other branches of law.

45. The point was also made that the Model Law or the Guide should clarify the meaning of an “independent” body as referred to in article 63. It was agreed that the Guide should explain the concept of independence of a review body and how it could be guaranteed.

46. In the course of its consideration of article 65 (see paras. 59-65 below), the Working Group considered the following proposal for an additional text to be inserted in article 63 as appropriate:

“(1) The [insert name of the independent body] shall have the power to order the suspension of the procurement proceedings at any time before the entry into force of the procurement contract if and for as long as it finds suspension necessary to protect the interest of a supplier or contractor having submitted an application, complaint or appeal in accordance with article 61, and taking into account the factors listed in paragraph (4) of this article. The [insert name of the independent body] shall also have the power to lift any suspension ordered by the procuring entity or by itself, taking into account the above considerations.

(2) Except in the circumstances set forth in paragraph (4) of this article, suspension of the procurement proceedings shall be automatic for a period of ten (10) working days at the following stages of the proceedings:

(a) Upon receipt of a complaint or appeal under this article prior to the deadline for presenting applications to pre-qualify or submissions, in order to allow the [insert name of the independent body] to decide whether or not to extend the deadline and to take other actions as regards the terms of solicitation, pre-qualification or pre-selection or other issues arising from pre-qualification or pre-selection proceedings; [The Guide would explain in which cases the order of extension of the deadline is sufficient and in which cases the review body should decide on the substance of the complaint or appeal in addition to ordering the extension of the deadline, e.g. whether an additional supplier should be permitted to participate in the restricted tendering or whether a previously disqualified supplier should be allowed to participate further in the procurement proceedings] and

(b) Upon the receipt of a complaint or appeal under this article after presentation of submissions in those cases where there is no standstill period applied by the procurement entity prior to the entry into force of a procurement contract or framework agreement.

(3) (The [insert name of the independent body] shall also have the power subsequent to the entry into force of a procurement contract or framework agreement, to order the suspension of the performance of the procurement contract or framework agreement during the pendency of its review proceedings if and for as long it finds suspension necessary to protect the interest of a supplier or contractor having submitted an application, complaint or appeal in accordance with article 61, and taking into account the factors listed in paragraph (4) of this article.)

(4) Automatic suspension of the procurement proceedings and suspension of performance of a procurement contract or a framework agreement do not apply if:

(a) The [insert name of the independent body] decides that the complaint or appeal is manifestly without merit or the supplier or contractor submitting it is without standing, including based on summary proceedings;

(b) The [insert name of the independent body] decides that the suspension will cause disproportionate harm to the procuring entity or to suppliers or contractors participating in the procurement proceedings; or

(c) The [insert name of the independent body] decides that urgent public interest considerations require the procurement proceedings, the framework agreement, or the procurement contract, as applicable, to proceed.

(5) The [insert name of the independent body] shall lift the suspension at such time as it gives the notice of its decision to the supplier or contractor having submitted an application, complaint or appeal in accordance with article 61 and to other participants in the procurement proceedings if it rejects or dismisses the application, complaint or appeal.”

47. The following queries and proposals were made with respect to those provisions:

(a) That the reference to “automatic suspension” should be reconsidered. In this regard, it was observed that the exceptions in paragraph (4) would have to be considered and assessed in order to determine whether a suspension was applicable by virtue of the law. The alternative interpretation was that the exceptions meant that there would be an automatic suspension, but that it would be lifted if any of the determinations listed under paragraph (4) were made by the independent body within the 10 day suspension period;

(b) That the provisions should be reviewed to avoid giving the impression in paragraph (1) and (3) that suspension under those paragraphs was automatic. In this context, it was suggested that the opening phrase in paragraph (2) should be reworded and the order of paragraphs (2) and (3) should be reversed;

(c) That paragraph (4) (b) should be deleted. The point was made that the independent body would not have the means to determine within a short suspension period whether harm existed and the question of proportionality with respect to the interests of various stakeholders. It was also observed that the issue of disproportionate harm might be subsumed within the notion of “urgent public interest” in paragraph (4) (c). In this respect, it was recalled that a similarly-worded reference to disproportionate harm in article 56 (1) of the 1994 Model Law was

made in a different context, in that it did not require a determination by a review body as to the existence and extent of harm;

(d) That how article 61 bis (see paras. 67-69 below) was related to paragraph (1) of the proposed text should be clarified;

(e) That whether the exceptions listed under paragraph (4) were exhaustive should also be clarified. In particular, it was questioned whether there should be an automatic suspension in the cases set out in article 20 (3); and

(f) That whether the provisions should relate to applications for reconsideration should be clarified.

48. The Working Group agreed to include the proposed additional text in article 63 with some revisions. The Working Group agreed to delete paragraph (4) (b) and to note in the Guide that the deleted provisions would in practice be subsumed under the exception “urgent public interest”. In response to a suggestion that the requirement for an “urgent” public interest might not encompass the full scope of the exception in paragraph 4 (b) it was considered that the term “urgent” was sufficiently broad to encompass not only urgency in terms of time but also the extent of the public interest. The need to ensure consistency with the wording in article 20 (3) (c) that referred to the same exception (in the context of the standstill period) was noted. The Working Group also agreed that a reference to “urgent public interest” in the proposed text would sufficiently cover the situations listed in article 20 (3).

49. The Working Group also agreed: (a) to add in the beginning of paragraph (1) the words “upon receipt of a complaint or appeal”; (b) to replace in the second sentence of paragraph (1) the words “to lift” with the words “to extend or lift”; (c) to move reference to “during the pendency of its review” in paragraph (3) to the beginning of that paragraph; (d) to delete references to automatic suspension throughout the provisions by replacing them as appropriate with the text stating that “the procurement shall be suspended”; and (e) to ensure consistency of the presentation of the provisions as regards timing of the actions concerned.

50. In response to certain other concerns raised about the provisions, the point was made that the goal of the provisions was to ensure quick decisions on whether suspensions should or should not be applied, even if the results were less than perfect. It was recognized that there might be various grounds for not applying a suspension other than those specifically mentioned in the provisions, which would have to be considered in practice. The key safeguard against abuse was considered to be the requirement to put on the record all decisions in relation to suspension and the reasons for them, so that ultimately they could be scrutinized by the court. The Working Group emphasized that the 1994 approach to the issue of suspension was no longer applicable in the revised Model Law, in particular since the exemptions from review contained in article 52 (2) of the 1994 text had been deleted. This deletion, it was noted, would lead to a considerably greater number of complaints and appeals, which might cause significant disruption to the procurement proceedings.

*Article 64. Certain rules applicable to review proceedings under articles [62 and 63]*

51. The Working Group had before it the following suggestion for article 64:

**“Article 64. Certain rules applicable to review  
proceedings under articles [62 and 63]**

(1) Promptly after the receipt of an application under article [62], a complaint under article [63], or an appeal under article [63] of this Law, the procuring entity or [insert name of review body] shall notify all suppliers or contractors participating in the procurement proceedings to which the application, complaint or appeal relates as well as any governmental authority whose interests are or could be affected about the submission of the application, complaint or appeal and its substance.

(2) Any such supplier or contractor or governmental authority has the right to participate in the application or review proceedings. A supplier or contractor or a governmental authority that fails to participate therein is barred from subsequently making the same or equivalent application, complaint or appeal.

(3) The participants to the application or review proceedings shall have access to all proceedings and shall have the right to be heard prior to a decision being made on the application, complaint or appeal, the right to be represented and accompanied, the right to request that the proceedings take place in public and the right to present evidence, including witnesses.

(4) In cases before [an approving authority or] the [insert name of the independent body], the procuring entity shall provide to body concerned all documents pertinent to the application, complaint or appeal, including the record of the procurement proceedings, in timely fashion.

(5) A copy of the decision of the procuring entity, approving authority or [insert name of the independent body] shall be communicated to the participants in the proceedings within ... working days (the enacting State specifies the period) after the issuance of the decision. Promptly thereafter, the application, complaint or appeal and the decision thereon shall be made available to the public.

(6) No information under paragraphs (3) to (5) of this article shall be disclosed and no public proceedings shall take place if so doing would be against the protection of essential security interests of the State or contrary to law, would impede law enforcement, would prejudice the legitimate commercial interests of the suppliers or contractors or would impede fair competition.

(7) The decision by the procuring entity[, approving authority] or [insert name of review body] and the reasons and circumstances therefor shall be made part of the record of the procurement proceedings.”

*Title*

52. It was agreed that the title should read: “Certain rules applicable to applications for reconsideration under article 62 and review proceedings under article 63”.

*Paragraph (1)*

53. It was agreed that the paragraph should be amended to provide expressly that the body to which an application for reconsideration or review was submitted was the body required to fulfil the notice requirement contained in the paragraph.

54. The reference to “any governmental authority whose interests are or could be affected” was queried. In reply, it was noted that such governmental authorities were granted the right to participate in reconsideration application or review proceedings under paragraph (2), and therefore that they should be provided with notice of those proceedings, in order to ensure that they could avail themselves of the right. On the other hand, it was noted that the Model Law should not regulate internal government communications, and therefore that this issue would be better addressed in the Guide. After consideration, it was agreed to remove the reference from the paragraph and to include appropriate discussion in the Guide.

55. It was queried whether the procuring entity would be notified of the proceedings in the same way as suppliers or contractors. It was agreed that the procuring entity should be afforded the same rights to be notified and to participate as suppliers or contractors, and therefore that appropriate references should be made in this paragraph and in paragraph (2). A suggestion that the procuring entity should be able to make an application to the independent body other than as provided for in article 63 (6) contained in paragraph 36 above was not taken up by the Working Group.

*Paragraph (2)*

56. Following the deletion of the reference to “any governmental authority whose interests are or could be affected” from paragraph (1) (see para. 54 above), it was agreed that the phrase “any governmental authority” should be replaced by the phrase “any governmental authority whose interests are or could be affected” in the first sentence of the paragraph.

57. It was noted that a supplier or contractor that received notice of the reconsideration application or review proceedings was not automatically entitled to seek review under article 61 (1). It was therefore agreed to explain in the Guide the relationship between article 64 (2) and article 61 (1).

*Paragraph (5)*

58. The reference to provision of a copy of the decision of the procuring entity or independent body was queried, in that it implied a bureaucratic procedure of sending out individual notices. It was suggested, therefore, that reference should be made to notification of the decision to appropriate suppliers, contractors and other bodies; it was also observed that those bodies should be all those that participated in the procurement proceedings and not just in the reconsideration application or review proceedings, and that until the notification had been provided, the procuring entity was not permitted to enter into the procurement contract. These suggestions were agreed upon, noting also that drafting changes to ensure consistency with articles 62 and 63 regarding notification of decisions would be made (see para. 33 above).

*Article 65. Suspension of procurement proceedings, the framework agreement or the procurement contract*

59. The Working Group had before it the following suggestion for article 65:

**“Article 65. Suspension of the procurement proceedings,  
the framework agreement or the procurement contract**

(1) Promptly after the timely submission of a complaint or appeal under article [63] of this Law, the [insert name of review body] shall suspend the procurement proceedings, the framework agreement or the procurement contract, for a period to be determined by the [insert name of review body], except as provided for in paragraph (2) of this article.

(2) The [insert name of review body] need not suspend the procurement proceedings if it decides that the complaint or appeal is manifestly without merit.

(3) The [insert name of review body] may lift the suspension applied in accordance with paragraph (1) of this article if it decides that the suspension will cause or has caused disproportionate harm to the procuring entity or to other suppliers or contractors, or that urgent public interest considerations require the procurement proceedings, or the procurement contract or framework agreement, to proceed.

(4) The [insert name of review body] may extend the originally determined period of suspension in order to preserve the rights of the supplier or contractor submitting an application, complaint or appeal or commencing an action [before the courts] pending the disposition of the review proceedings, provided that the total period of suspension shall not exceed the period required for the procuring entity[, approving authority] or [insert name of review body] to take a decision in accordance with article [62 or 63] as applicable, plus a period thereafter sufficient to allow a supplier or contractor to file any appeal against the decision of the procuring entity[, the approving authority] or [insert name of review body].

(5) The fact of the suspension and the duration of the suspension or a decision by the [insert name of review body] not to suspend the procurement proceedings or the procurement contract or the framework agreement, as the case may be, shall be included in the notification of the submission of the complaint or appeal issued in accordance with article [64 (1)] of this Law, which shall be promptly communicated by the [insert name of review body] to the supplier or contractor submitting the complaint or appeal.

(6) A decision on an extension of the suspension indicating the duration of the extension or a decision to lift the suspension and all other decisions taken by the [insert name of review body] pursuant to this article, and the reasons therefore, shall be promptly communicated to all participants in the proceedings.

(7) The fact of the suspension and the duration of the suspension and any decision by the [insert name of review body] under this article and the reasons

and circumstances therefor shall be made part of the record of the procurement proceedings.”

60. The Working Group considered a proposal to remove the requirement for automatic suspension in review proceedings before an independent body. In support of the proposal, it was observed that the rights of suppliers would be adequately protected if the procuring entity were constrained from entering into the procurement contract as had been agreed under article 62 (3) (see para. 30 above; for further consideration of this issue, see the discussion on article 61 bis in paras. 67-69 below). It was also considered that providing for automatic suspension would be a cumbersome and rigid approach, which would allow suppliers to submit abusive requests that would needlessly delay the procurement proceedings. An automatic suspension, it was further stressed, would risk causing serious damage to the procurement proceedings, and suppliers would be able to impose heavy pressure on the procuring entity with significant economic consequences. From this perspective, as was explained, only in exceptional circumstances would a suspension be required, under the safeguard that no procurement contract could come into force while the review proceedings continued. The safeguards contained in paragraphs (2) and (3) were considered inadequate. It was noted that the independent body should be empowered to make its own decision on a request for suspension presented to it, hearing both parties before taking its decision if necessary. In this regard, it was emphasized that the supplier or contractor would have the burden of demonstrating why a suspension should be granted.

61. Objection was raised to this approach, and a system of presumptive suspension was urged. Presumptive suspension in this context was explained to mean that an initial suspension would apply for a short, defined period, and a further suspension could be denied or the initial suspension lifted, such as for the reasons set out in paragraphs (2) and (3). The comment was made that this approach would be consistent with the 1994 text, and would lead to a more efficient and effective process, which ultimately could be less disruptive of the procurement process because it could avoid the need to undo steps in the procurement process if a decision was ultimately made against the procuring entity. In addition, it was underscored that an approach that was cost-effective and easy to follow (such as this alternative proposed) would provide the appropriate degree of incentive for suppliers to submit complaints. Another reason for this approach, it was said, was that when a review was first sought, the supplier or contractor would have only an outline understanding of what had gone awry in the procurement proceedings, and it would be when the record of the procurement had been made available that the supplier or contractor would be able to substantiate its complaint. In response, caution was urged to avoid suppliers engaging in a fishing expedition to find grounds for review through such a mechanism.

62. An alternative suggestion was that, taking into account the requirement for the independent body to act “promptly” after the submission of a complaint, the independent body need not suspend the procurement proceedings in either of the circumstances envisaged in paragraphs (2) and (3). Those circumstances, it was recorded, could also justify the lifting of any suspension granted during the review proceedings, which the independent body would be able to do at any stage.

63. The Working Group heard the following suggestions as regards the principles that could form the basis of a revised draft article 65:

(a) That the combined use of a standstill period and a prohibition against a contract entering into force until a complaint was resolved would cover many situations that could be expected to arise;

(b) That issues relating to the period prior to the commencement of the standstill period, to situations where there was no standstill period (as envisaged by article 20 (3)) and situations arising once the procurement contract had entered into force might require additional provisions;

(c) The additional provisions might involve some form of presumptive suspension;

(d) That in practical terms, once the procuring entity had decided on the award of the procurement contract, the standstill period and an automatic suspension would provide the same safeguard;

(e) That if the procurement involved considerations that would justify not imposing a standstill, an automatic suspension or any suspension would also not be appropriate;

(f) That if a complaint were filed during the standstill period, and assuming that it might most frequently be filed towards the end of that standstill period, an automatic suspension would effectively be required in order to give effect to the prohibition against entering into the procurement contract until the complaint was resolved. In this regard, it was emphasized that the provisions should ensure that they gave the means to exercise the rights provided in the chapter in practice, which would involve an automatic suspension to prevent the contract coming into force in some cases;

(g) That the risk that a procurement contract could be held in abeyance for an extended period while a complaint was taken through the various bodies should be taken into account. While the procuring entity could request the independent body to grant it permission to enter into the procurement contract on urgent public interest grounds under article 63 (6) as contained in paragraph 36 of this report (subsequently replaced by article 61 bis (2), see paras. 67-69 below), and could presumably make an equivalent request to the court, it was observed that procurements that did not involve urgent public interest considerations could be delayed for lengthy periods. It was added, in this regard, that the procuring entity would be able to cancel the procurement and recommence the procedure if it considered that this would be a more appropriate course of action, and so review bodies need not necessarily be constrained by these issues;

(h) That the flexibility conferred by article 63 (including as regards the powers granted to the independent body) should not be constrained by excessively rigid provisions in article 65 (1), and a particular issue to be considered was whether the article should be permissive as regards suspension;

(i) That paragraph (1) might provide for the right of the independent body to decide on a suspension taking into account the subject matter and other substantive terms and conditions of the procurement in question.

64. It was noted that once the provisions of article 65 were agreed, articles 62 to 65 should be considered and if necessary reorganized, in order to avoid repetition and to ensure that all provisions that applied to reconsideration applications under article 62 were located together, and all those that applied to review proceedings under article 63 also appeared together. In this regard, the need for a separate article on suspension in review proceedings was questioned.

65. Further consideration of the provisions of article 65 took place in the context of the new provisions proposed to be included in article 63 (see paras. 46-50 above). As a result of the changes agreed to be made in those new provisions for article 63 (see paras. 48-49 above), the Working Group agreed that article 65 (4) and (5) should be deleted, and the provisions from article 65 (6) and (7) should be placed in article 63, with changes consequent upon the deliberations at the current session to be reflected as necessary.

*Article 66. Judicial review*

66. The point was made that consistency in references to judicial review and judicial authorities throughout chapter VIII should be ensured.

*Article 61 bis. Effect of an application for reconsideration, request for review or appeal*

67. The Working Group had before it the following proposal for a new article 61 bis:

**“Article 61 bis. Effect of an application for reconsideration, request for review or appeal**

(1) The timely receipt by the procuring entity, the [insert the name of the independent body] or judicial authority of an application for reconsideration, request for review or appeal (collectively referred to in this chapter as a “challenge”) prohibits the procuring entity from entering into a procurement contract or framework agreement resulting from the procurement proceedings concerned while the challenge is outstanding before the procuring entity, the [insert the name of the independent body] or judicial authority. This prohibition remains in force until after sufficiently long period has expired after giving notice of the decision on the challenge to all participants in the procurement proceedings in accordance with article [64 (...)] to allow appeal of the decision.

(2) The procuring entity may request the [insert name of the independent body], in writing, to permit it to enter into a procurement contract or framework agreement notwithstanding the prohibition in paragraph (1) of this article on the grounds referred to in article [63 (4) (a) to (c)]. The [insert the name of the independent body], upon consideration of such request, may authorize the procuring entity to take the steps necessary to make the procurement contract enter into force in the circumstances set forth in article [63 (4) (a) to (c)]. The decision of the [insert name of independent body] on such a request shall be made a part of the record of the procurement proceedings. Notice of the decision shall promptly be given to all participants in the procurement proceedings.”

68. The following queries and suggestions were made as regards that article:

(a) Whether the words “or judicial authority” were appropriate or necessary in paragraph (1); if so whether the same words should also appear in paragraph (2);

(b) Whether the provisions presumed that the decision would always be against suppliers and therefore an appeal was inevitable;

(c) That the Guide text to paragraph (2) should explicitly refer to the fact that there could be a further appeal to the court against the independent body’s decision on an application under that paragraph;

(d) That the words “to allow appeal of the decision” in paragraph (1) should be reconsidered to make it clearer that the reference was to the time required for filing an appeal, and not to that required for the consideration of an appeal by the independent body or the court;

(e) That the article should indicate how the prohibition would lapse in practice, such as following the filing of an appeal;

(f) That the reference to “sufficiently long” should be reconsidered, since it might imply a lengthy period for filing an appeal, whereas the aim was to provide for a short period; instead, it was proposed to provide that enacting States should specify the applicable time period (with the Guide indicating that it should be within a time frame of 1 to 8 working days);

(g) That the provisions should be reviewed with a view to avoiding an excessively long and indefinite suspension under the default principle contained in the first sentence of paragraph (1). This suspension would cover the entire period during which the challenge was outstanding, whether it was outstanding before the procuring entity, the independent body or the court; and

(h) The words “at any time” should be added after the word “request” in the first sentence of paragraph (2).

69. The Working Group agreed to revise article 61 bis as follows:

**“Article 61 bis. Effect of an application for  
reconsideration, request for review or appeal**

(1) The timely receipt by the procuring entity, [insert name of independent body] or judicial authority, as the case may be, of an application for reconsideration, request for review or appeal (collectively referred to in this chapter as a “challenge”) prohibits the procuring entity from entering into a procurement contract [or framework agreement] resulting from the procurement proceedings concerned. The prohibition referred to in this article shall lapse after the expiry of [...] working days (the enacting State specifies the period) after notice of the decision was given to all participants in the procurement proceedings in accordance with article [62 (5)] and [63 (4)].

(2) The procuring entity may at any time request the [insert name of independent body] or judicial authority, as the case may be, to permit the procuring entity enter into the procurement contract [or framework agreement] on the grounds referred to in article [63 (4) (a) and (b)]. The [insert name of independent body], upon consideration of that request, may authorize the

procuring entity to enter into the procurement contract [or framework agreement] where it is satisfied that such circumstances exist. The decision of the [insert name of independent body] shall be made a part of the record of the procurement proceedings, and notice thereof [in accordance with article [...]] shall promptly be given to all participants in the procurement proceedings.”

*Concluding remarks as regards chapter VIII*

70. The proposed deviation from the approach taken in the 1994 text that provided for an automatic suspension in proceedings both before the procuring entity and in those before the independent body was noted. Concern was expressed that this revised approach to the regulation of suspension procedures in articles 62 and 63 was undesirable, as it would lead to a dual challenge system that would compromise the incentive to seek to resolve disputes first before the procuring entity. An additional concern raised was that since recourse to the procuring entity was optional, more complaints could be expected to be filed directly with the independent body under the envisaged framework, which in turn raised issues of capacity. In this regard, it was considered whether a short period of automatic suspension before the procuring entity would be an effective tool to redress the balance.

71. In response, it was observed that the incentive to seek to resolve a dispute first with the procuring entity was still present, in that so doing would be advantageous from the perspectives of efficiency and good long-term relations between the parties. It was also pointed out that the role of the procuring entity in the challenge process was distinct from that of the independent body: it was the party whose decisions were at issue, and because the procuring entity was aware of all circumstances of the case, it would be in a better position than an independent body to handle disputes. In addition, giving the procuring entity discretion in deciding whether to apply a suspension was entirely consistent with the toolbox approach under the Model Law. The provisions, it was added, did not exclude the possibility that the procuring entity could apply a suspension: they merely provided more flexibility than was granted to the independent body.

72. Objection was raised to any proposals including automatic suspension provisions in article 62, even if the period of suspension was short. The preferred approach was to set out optional language in the Guide for the use of enacting States that wished to provide for automatic suspension of the procurement proceedings in an application for reconsideration filed with the procuring entity. It was also noted that the Guide might reflect that, in some countries, decisions subject to review might be made by the approving authority, and that conferring unfettered discretion to suspend the procurement proceedings upon the procuring entity might therefore be inappropriate.

73. It was agreed that, although the approach taken in chapter VIII would be maintained, the Guide would highlight the concerns expressed and provide options for those enacting States that might consider enacting provisions different from those set out in the text, to meet the practice in particular of multilateral development banks. The importance of ensuring that the procuring entity conducted a serious and effective review of any application for reconsideration under all approaches was highlighted.

**B. Chapter II. Methods of procurement and their conditions for use.  
Solicitation and notices of the procurement  
(A/CN.9/WG.I/WP.75/Add.3)**

*Article 24. Methods of procurement, an accompanying footnote*

74. It was suggested that the existing footnote accompanying the article should be expanded to state that enacting States may wish to provide that recourse to some procurement methods should be subject to a high-level approval. As a consequence, the reference to a high-level approval should be deleted in some provisions of the Model Law. Support was expressed for this suggestion, and it was proposed that the relevant wording in the footnote might draw on the opening phrase in article 27 (2) and accompanying footnote 5.

75. Alternative suggestions were that reference to high-level approval might be excluded from the Model Law and the Guide. The negative consequences of a high-level approval requirement on the procurement proceedings, such as delays and additional reasons for challenges, were highlighted.

76. The Working Group's earlier consideration of this issue was recalled. Objection to including references to a high-level approval in the text of the Model Law other than in articles 20, 27 (2) and 27 (5) (e) was reiterated.

77. A specific suggestion was made that the following wording should be included in the end of the footnote: "States may consider whether, for certain methods of procurement, to include a requirement of a high-level approval by a designated organ. On this question see the Guide to Enactment (A/CN.9/...)." No objection was raised to this suggestion. It was also agreed that the Guide would explain that with the decentralization of procurement that had been effected in many systems, the use of high-level approval had been reduced and might no longer be necessary. An additional point made was that a requirement for a high-level approval might be particularly inappropriate in certain circumstances, such as in the use of two-stage tendering, in the context of the precise conditions for use of that procurement method, and in some instances of single-source procurement (for example in urgent situations). It was observed that the Guide should draw this point to the attention of enacting States.

78. Concern was expressed about the part of the footnote that referred to "open tendering". It was agreed that this part should be amended to read as follows: "though an appropriate range of options, including open tendering, should be always provided for".

*Article 25. General rules applicable to the selection of a procurement method*

79. The point was made that the conditions for use of procurement methods were elastic and that the Guide should emphasize the principle of maximizing competition contained in article 25. It was stressed that this principle would be used as a ground to challenge the selection of a procurement method.

80. It was proposed that the Guide should explain that the meaning of the principle "maximizing competition" in the context of different procurement methods would be different (for example, in the context of auctions, it could be appropriate to state that maximizing a number of bidders could be an appropriate means to achieve the

goal of maximizing competition but the same means would not be appropriate in the context of the request for proposals with dialogue proceedings).

*Article 26. Conditions for use of methods of procurement under chapter IV of this Law (restricted tendering, request for quotations and request for proposals without negotiation)*

81. It was suggested to reflect the content of footnote 2 in the Guide. No objection was raised to that suggestion.

*Article 27. Conditions for use of methods of procurement under chapter V of this Law (two-stage tendering, request for proposals with dialogue, request for proposals with consecutive negotiations, competitive negotiations and single-source procurement)*

82. With reference to footnote 8, support was expressed for reflecting the provisions of paragraph (2) (d) also under paragraph (1) as a condition justifying recourse to two-stage tendering. The relevant provisions of the 1994 text (article 19 (1) (d)) were recalled in this context. Concern was expressed that including such provisions only in paragraph (2) would imply that request for proposals with dialogue would be a default option in the case of the failure of open tendering. This concern was widely shared in the Working Group and it was agreed that the proposed changes would avoid giving this unintentional interpretation.

83. Another suggestion to address this concern was that the provisions of paragraph (2) (d) might be formulated as a general principle and placed in article 25. This was on the understanding that following a failure of an open tendering procedure, the procuring entity would be able to use any procurement method provided that the conditions for its use were met. The need for such provisions (which were considered redundant by some delegations) was questioned.

84. Another suggestion was to include the relevant provisions within article 27, so that the procuring entity would have a choice among all procurement methods listed in article 27. Concern was expressed that this approach would confer discretion on the procuring entity to have automatic recourse to single-source procurement where open tendering failed. A query was also raised as to whether recourse to competitive negotiations and consecutive negotiations in these circumstances would be appropriate.

85. A further suggestion was to delete the provisions of paragraph (2) (d) and to explain the consequences of the failure of open tendering only in the Guide.

86. Opposition was expressed to deleting these provisions. They were considered essential as justifying recourse to more flexible procurement methods where open tendering had failed. In this respect, it was explained, they set out an additional condition for the use of request for proposals with dialogue and two-stage tendering, which would apply only in the case of a failed open tendering procedure, and without which there could be no recourse to these flexible methods in such circumstances.

87. The prevailing view was that the provisions of paragraph (2) (d) should appear also in paragraph (1) with the understanding that both two-stage and request for proposals with dialogue were options following a failed open tendering procedure, but they were not the only further option. The understanding was that the procuring

entity would be required to assess reasons for the failure of the open tendering procedure and decide whether the situation could be rectified so that a new open tendering procedure could be held, or where that was not feasible, to assess whether the procurement should be abandoned altogether or whether using other procurement methods would be appropriate. It was agreed that the Guide should explain the reasoning for including provisions of paragraph (2) (d) also in paragraph (1) of article 27.

88. The Working Group agreed to replace the word “and” at the end of paragraph (4) (b) with the word “or”.

89. With reference to paragraph (5), the point was made that the Guide should encourage the procuring entity not to draft its description of the subject matter of the procurement in a way that artificially limited the market concerned to a single source, and the experience in one jurisdiction in using functional descriptions to support this approach was shared.

*Article 28. Conditions for use of an auction*

90. The Working Group agreed to defer the consideration of some issues raised in conjunction with the definition of “auction” until it took up article 2 on definitions.

*Article 29. Conditions for use of a framework agreement procedure*

91. The preference was expressed for using the word “indefinite” rather than the word “repeated” in paragraph (1) (a). No objection was raised to this suggestion.

92. Views were expressed both in favour of and against the suggestion contained in footnote 21 to include an open-ended condition for the use of framework agreements in addition to the conditions set out in paragraph (1) (a) and (b).

93. The Working Group decided to retain the provisions without change. The Working Group noted the utility of the use of framework agreements for centralized purchasing, which had proved in many jurisdictions to be an effective means in ensuring economy and efficiency in procurement, and noted that the Guide would explain that the existing wording indeed accommodated centralized purchasing.

### **C. Chapter III. Open tendering (A/CN.9/WG.I/WP.75/Add.3)**

94. The Working Group noted the need for consequential changes in this and subsequent chapters as a result of amendments agreed to be made in chapter VIII. It also noted that consistency throughout the Model Law, to the extent permitted by different procurement methods, should be ensured in provisions that required the procuring entity to provide information “to the extent known” in the solicitation documents or their equivalent.

*Article 37. Examination and evaluation of tenders*

95. With reference to footnote 61, support was expressed for deleting paragraph (8) in the light of the separate article that addressed the issues of confidentiality (article 22 of the current draft). No objection was raised to that proposal.

**D. Chapter IV. Procedures for restricted tendering, request for quotations and request for proposals without negotiation (A/CN.9/WG.I/WP.75/Add.4)**

*Article 41. Request for proposals without negotiation*

96. The suggestion was made that the heading of the article should be changed to “Two-envelope tendering”. The Working Group recalled that that title was suggested for use in the earlier drafts but was considered to be inaccurate and not sufficiently technologically neutral.

**E. Chapter V. Procedures for two-stage tendering, request for proposals with dialogue, request for proposals with consecutive negotiations, competitive negotiations and single-source procurement (A/CN.9/WG.I/WP.75/Add.5)**

*Article 43. Request for proposals with dialogue*

97. It was proposed that the word “maximum” should appear before the words “effective competition” in paragraph (3) (b). It was decided that the provisions should remain unchanged.

*Article 44. Request for proposals with consecutive negotiations*

98. It was agreed to use the term “ranking” in the article. The Working Group also confirmed the understanding that no pre-selection should be used in this procurement method for the reasons set out in footnote 22.

99. With respect to the provisions of footnote 21, proposed to be included in the Guide, the suggestion was made that the Guide should first set out benefits of using the procurement method under appropriate conditions and subsequently should discuss means to mitigate possible risks with its use. It was noted that the same approach should be followed in describing other procurement methods in the Model Law. It was also proposed that the Guide should highlight the widespread use of request for proposals with consecutive negotiations in the situations envisaged by the Model Law.

*Article 45. Competitive negotiations*

100. The Working Group agreed to include in paragraph (3) provisions prohibiting negotiations after the best and final offers (BAFO) were submitted, drawing on similar provisions in article 43 (12). In response to the point made that some jurisdictions allowed post-BAFO negotiations, the understanding in the Working Group was that it was not good practice to do so. It was noted that the Guide should elaborate on this point.

## **F. Chapter VI. Auctions (A/CN.9/WG.I/WP.75/Add.6)**

### *Article 47. Procedures for soliciting participation in procurement by means of an auction*

101. With reference to paragraph (1) (l), several delegations reported that there was no practice in their jurisdictions to limit the number of bidders. The point was made that technological constraints that were present when the relevant provisions were first considered in the Working Group a few years ago were generally no longer present. It was nevertheless decided to retain the provisions in paragraph (1) (l) and related provisions of paragraph (2), possibly in parenthesis, with an indication to enacting States that they might consider omitting these provisions if they viewed them irrelevant in the light of prevailing circumstances.

102. It was suggested that, if the provisions were retained, their drafting could be simplified to provide for limiting the number of bidders using only the “first come first served” principle.

103. The provisions were retained without change on the understanding that other procedures and criteria for limiting the number might be applicable.

104. With reference to paragraph (1) (q), the point was made that it would not be always possible to establish the criteria for closing the auction at the outset of the procurement proceedings, rather after when the number of bidders registered for the auction and other information having impact on the structure of the auction (whether it would be held in one round or several subsequent rounds) were known. It was suggested that it would be appropriate for the law to require the general criteria to be set out at the outset of the procurement proceedings, leaving specific criteria to be defined later in the process.

105. The Working Group confirmed its understanding that the Model Law would provide for two types of auctions: simple auctions, and more sophisticated ones that might involve pre-auction examination or evaluation of initial bids. Although a suggestion was made to refer to “pre-auction bids” instead of “initial bids”, that suggestion was subsequently withdrawn in the light of the need to ensure consistency with the use of the terms throughout the Model Law (such as with article 42 (2) where reference was made to initial tenders).

106. The Working Group heard various reasons for the need to hold pre-auction examination or evaluation of initial bids, including that in some more complex auctions, no bidding could start before ranking was established and the relevant information was communicated to bidders as required under paragraph (4) (c). It was also noted that more complex auctions might receive initial bids that significantly exceeded the minimum requirements, particularly where suppliers would be permitted to offer items with different technical merits and correspondingly different price levels.

## **G. Chapter VII. Framework agreements procedures (A/CN.9/WG.I/WP.75/Add.7)**

### *Article 53. Requirements of closed framework agreements*

107. With respect to provisions in article 53 (1) (a), the preference was expressed for retaining the provisions in the second set of square brackets. While support was expressed for this suggestion, it was proposed that the wording should be changed to make it clearer that the reference to a maximum duration of a closed framework agreement should not necessarily preclude there being more than one maximum for all framework agreements. The point was made that the maximum duration might vary not only by subject matter of the procurement but also by region or sector of economy, reflecting the specific circumstances in an enacting State.

108. The alternative suggestion was that the wording in the first set of square brackets should be retained and a specific maximum duration should be set out as an indication to enacting States as to what should be considered the best practice. The Working Group recalled its earlier consideration of the issue and that it was agreed not to fix any definite maximum in the Model Law, on the understanding that it would be impossible to set the one for all types of procurement.

109. A further suggestion was that instead of setting a maximum in either law or procurement regulations, the Model Law should envisage a mechanism for adapting long-term closed framework agreements to evolving needs in the market. In response, it was observed that such a flexible mechanism could be considered present in the wording in the second set of square brackets or might be envisaged in the framework agreements themselves.

110. Yet other suggestions were to replace the text in the second set of square brackets with the wording along the following lines: “the maximum duration established by this State” or “the maximum duration established in accordance with provisions of law of this State”. In response, it was considered best practice to keep all procurement-related legal provisions in the law and regulations on public procurement.

111. The question was therefore whether the relevant provisions should be in procurement law or in procurement regulations. The prevailing view in the Working Group was that the matter should be addressed only in procurement regulations since they allowed more flexibility in addressing the issue reflecting the prevailing conditions in an enacting State at any particular time. The understanding was that this approach did not interfere in the hierarchy of legal acts of the enacting State and methods used to ensure coherence of the legal framework. It was suggested that the Guide might therefore elaborate on the implication of other branches of law, such as State budgeting, on provisions of procurement regulations that would regulate a maximum duration of closed framework agreements.

112. After discussion, it was agreed to retain the text in the second set of square brackets without brackets and to provide necessary explanations in the Guide as regards the need to take into account provisions of other branches of law, such as State budgeting, in establishing any maximum duration of closed framework agreements.

*Article 56. Second stage of a framework agreement procedure*

113. The Working Group agreed that the text in square brackets in paragraph (4) (b) (x) should be deleted for the reasons provided in footnote 28.

*Article 57. No material change during the operation of a framework agreement*

114. The point was made that the accompanying Guide text to the first sentence of the article should make reference to the possibility of product modifications and technology substitutions.

**H. Chapter I. General provisions (A/CN.9/WG.I/WP.75/Add.1 and 2)***Article 2. Definitions***(a) Auction**

115. In response to comments made that the scope of the definition covered only limited types of auctions, the Working Group confirmed that the Model Law should regulate only those electronic reverse auctions in which the procuring entity acted as a buyer and where the process involved presentation of successively lowered bids. It was agreed that, while the Model Law provisions would remain unchanged in this respect, the Guide might discuss other auctions existing in practice and explain why the decision was made in UNCITRAL not to regulate them in the Model Law.

116. Concern was also expressed about the use of the term “auction” in the current draft instead of the term “electronic reverse auction” used in earlier drafts. It was highlighted that this change would involve difficulties in enacting States that had already enacted legislation using the earlier terminology. In addition, it was pointed out that the use of the term “auction” might be confusing as it implied features of the traditional auctions, such as that they were usually price-only and presupposed the physical presence of bidders. Concern that the previously used term was not technologically neutral was considered irrelevant since the Model Law provided for only online auctions.

117. The Working Group agreed to reinsert the term “electronic reverse auction” in the text.

118. The proposal was made that the definition should refer to what was considered a distinct feature of this purchasing technique — the possibility of seeing bids submitted in the course of the auction. In this regard, it was said that the absence of such a feature in the course of an auction would be a ground for a challenge in that transparency and integrity might be absent in the process. In response, it was observed that the extent of disclosure of information relevant to bids would vary from auction to auction and was regulated in article 50. The Working Group recalled its earlier consideration of avoidance of collusion and the need to preserve confidentiality of commercially sensitive information.

119. It was agreed that, with the exception of the change agreed to be made in the term used (see para. 117 above), the definition would remain unchanged.

**(e) Framework agreement procedure**

120. It was agreed that the text in subparagraphs (i) to (v) should remain in the text of the Model Law as providing helpful guidance as regards the newly introduced procedure.

**(i) Procurement involving classified information**

121. Support was expressed for reflecting the content of footnote 14 in the Guide.

**(m) Socio-economic policies**

122. Support was expressed for the definition as it was presented in the text.

123. It was proposed, and agreed, that the text in the first set of parenthesis in footnote 21 should not be included in the Guide.

124. A question was raised about the second sentence of footnote 22, which referred to the costs that might arise from the pursuit of socio-economic policies. The issue was noted to be politically sensitive and thus more appropriate for consideration by the Commission.

**(p) Standstill period**

125. It was proposed that the definition should be amended to refer to the point in time from which the standstill period would run and to reflect that no contract or framework agreement could be awarded during the standstill period.

126. In response, the following wording was proposed: “‘Standstill period’ means the period starting when the notice is dispatched in accordance with article 20 (2) of this Law during which the procuring entity cannot enter into the procurement contract and during which suppliers or contractors whose submissions were examined can challenge the decision so notified under articles 62, 63 and 66.”

127. It was agreed that the text “whose submissions were examined” should be deleted from this proposed definition, and that the definition should refer to the acceptance of the successful submission rather than to the entry into force of the procurement contract. It was agreed that the pool of suppliers entitled to initiate a challenge during the standstill period should be regulated in article 20 (2) and in the relevant provisions of chapter VIII rather than in the definition, and consistency on this matter throughout the Model Law should be ensured.

128. The Working Group agreed to revise the definition along the following lines: “‘Standstill period’ means the period starting when the notice referred to in article 20 (2) is dispatched in accordance with that article, during which the procuring entity cannot accept the successful submission and during which suppliers or contractors can challenge the decision so notified under chapter VIII of this Law.”

*Article 8. Participation by suppliers or contractors*

129. It was proposed to add in the end of footnote 43 for subsequent reflection in the Guide that multilateral development banks, in particular, did not allow participation in procurement to be limited on the basis of nationality, except for a very few cases mandated for example by public international law. Instead, it was

noted, the banks would not require international solicitation in some procurement proceedings, but international participation in such proceedings would not be excluded per se.

*Article 11. Rules concerning evaluation criteria and procedures*

130. The Working Group agreed to delete the text in parenthesis in paragraph (4) (a) and the text in square brackets in paragraph (4) (b).

131. The importance of explaining in the Guide the link between the provisions on margins of preference in subparagraph (b) and those on socio-economic policies, and in particular their possible cumulative effect, was emphasized.

*Article 20. Acceptance of the successful submission and entry into force of the procurement contract*

132. The Working Group agreed to:

(a) Retain references to “contract price” and “price” currently in square brackets throughout chapter I without square brackets and ensure consistency in those references;

(b) Conform the text in paragraph (2) (c) with the chapeau provisions of paragraph (2) with the aim of ensuring that all suppliers or contractors that presented submissions should receive the notice referred to in paragraph (2);

(c) Retain provisions on the threshold value in paragraph 3 (b);

(d) Delete the text in square brackets from paragraph 3 (c) in the light of the amendments agreed to be made in chapter VIII and the aim of preventing the procuring entity from failing to apply a standstill period for abusive reasons.

133. Some concerns about the provisions of article 20 (6) and (8) and the related provisions of article 17 (1) were noted, in particular that these provisions could imply that a separate written contract was the norm in all procurement methods. This indication, it was said, combined with the ability to cancel the procurement in the case of a failure by suppliers to sign the contract, could be open to abuse (such as the inappropriate use of procurement methods other than open tendering). In response it was noted that article 17 (3) already contained appropriate safeguards. It was agreed that the Guide should stress that the solicitation documents should require a written contract only when it was strictly necessary.

*Article 22. Confidentiality*

134. The Working Group agreed to retain the proposed wording in square brackets in paragraph (1) without square brackets.

135. It was noted that the same wording appeared in square brackets in certain other provisions of the Model Law, such as in article 23 (4) (a), and it was agreed that it also should be retained in those provisions without square brackets.

*Article 23. Documentary record of procurement proceedings*

136. The Working Group agreed with the deletion of paragraph (1) (f) for the reasons set out in footnote 47, in particular because the issue was already adequately covered in paragraph (1) (e).

## **V. Other business**

137. The Working Group recalled that UNCITRAL practice was to circulate the final text as recommended by its working groups to all Governments and relevant international organizations for comment. It was noted that the same practice would be followed with respect to the draft Model Law emanating from the current session, and it was anticipated that the comments received would be before the Commission at its forty-fourth session next year. It was emphasized that no amendments would be made to the draft Model Law after the text was circulated for comment and before the Commission considered it.

138. The understanding was that the Working Group, at its twentieth session, would focus on the revised draft Guide. The Working Group noted that efforts were under way to present a working draft of the Guide to the next session of the Working Group and the subsequently amended draft of the Guide for the Commission session next year, to assist the latter with the consideration of the draft revised Model Law. For this purpose, inter-session consultations were expected. It was emphasized that the Commission was not expected to adopt the Guide at its next session. It was assumed that the Commission would have five to eight days to consider the draft revised Model Law, but that the assumption could be revised if circumstances warranted.

139. The Working Group recalled that it had deferred a number of issues for discussion in the Guide and that decisions on them should be maintained, unless they were superseded by subsequent discussion in the Working Group. It was also recalled that additional sections addressing issues of procurement planning and contract administration, a glossary of terms and table of correlation with the 1994 Model Law were agreed to be included in the Guide. The understanding was that, for the lack of time, it would not be feasible to prepare any expanded Guide for implementers or end-users, and thus the Guide would be addressed to legislators.

140. It was agreed that repetitions between the general part of the revised Guide and article-by-article commentary should be minimized to the extent possible; where they were unavoidable, consistency ought to be ensured. It was agreed that the relative emphasis between these two sections should be carefully considered. The Secretariat was requested to follow the following guidelines in preparing the revised Guide: (a) to produce an initial draft of the general introductory part of the Guide, which would ultimately be used by legislators in deciding whether the revised Model Law should be enacted in their jurisdictions; (b) in preparing that general part, highlight changes that had been made to the 1994 Model Law and reasons therefor; (c) to issue a draft text for the Guide on a group of articles or a chapter at or about the same time, to facilitate the discussions on the form and structure of the revised Guide; (d) ensure that the text was user-friendly and easily understandable by parliamentarians who were not procurement experts; theoretical discussion should therefore be eliminated; and (e) sensitive policy issues, such as

best value for money, should be addressed with caution. The Secretariat was further requested, in order to expedite the work on the revised Guide, to circulate to experts and interested delegations for comment as soon as possible the text of the Guide already available, such as on e-procurement and framework agreements, which had already been before the Working Group.

141. As regards the publication of the Model Law with the Guide, various options were considered, including the use of electronic media. Features, such as hyper-linking the relevant provisions, were suggested to make the use of e-text of the Model Law and the Guide more user-friendly. The pressing need to allow the immediate use of particular provisions of the Model Law, such as on e-procurement, framework agreements and remedies, was noted. The need to finalize the accompanying Guide to these provisions first and the option of posting them at least on the UNCITRAL website were therefore highlighted.

142. The Working Group noted that some issues in the areas of public-private partnerships and sustainable procurement had been brought to the attention of the Secretariat as potential future work for UNCITRAL. It was also noted that the Commission might wish to consider which steps to take to ensure consistency between the revised Model Law and UNCITRAL instruments on privately financed infrastructure projects.

143. The Working Group heard the statement by a representative of the United Nations Office on Drugs and Crime (UNODC) regarding the relevance of the work by this Working Group to the work of UNODC and intergovernmental mechanisms established under the United Nations Convention against Corruption on the issues of prevention of corruption in public procurement. The Working Group noted that the first meeting of a Conference of States Parties' working group on the prevention of corruption was expected to be held in Vienna from 13 to 15 December 2010, which would address, among others, issues related to public procurement and conflicts of interest. The UNODC representative invited delegations and observers of the Working Group to participate at that session.

---

**B. Note by the Secretariat on possible revisions to the UNCITRAL Model Law on Procurement of Goods, Construction and Services — a revised text of the Model Law, submitted to the Working Group on Procurement at its nineteenth session**

**(A/CN.9/WG.I/WP.75 and Add.1-8)**

**[Original: English]**

1. The background to the current work of Working Group I (Procurement) on the revision of the UNCITRAL Model Law on Procurement of Goods, Construction and Services (the “Model Law”) (A/49/17 and Corr.1, annex I) is set out in paragraphs 8 to 91 of document A/CN.9/WG.I/WP.74, which is before the Working Group at its nineteenth session. The main task of the Working Group is to update and revise the Model Law, so as to take account of recent developments in public procurement.
2. At its eighteenth session, the Working Group, for the lack of time, was not able to consider the entire draft revised Model Law contained in document A/CN.9/WG.I/WP.73/Add.1-8. The Working Group requested the Secretariat to revise chapters VI and VIII and some provisions in chapters V, VII, I and II that were considered at the session, in the light of its deliberations.
3. The present note sets out the table of contents of the draft revised Model Law contained in the addenda to this note (A/CN.9/WG.I/WP.75/Add.1-8). Chapters VI and VIII and some provisions in chapters V, VII, I and II were revised to reflect the deliberations at the Working Group’s eighteenth session. The provisions of section II of chapter II and of chapters III and IV that were not considered at the Working Group’s eighteenth session were further revised by the Secretariat in the light of the changes agreed to be made so far in the Model Law.
4. It is expected that at its nineteenth session, the Working Group will proceed with the consideration of the revised chapters VIII and II and will subsequently take up the chapters regulating procedures for different procurement methods. It is expected that chapter I will be taken up after other chapters have been considered.
5. In accordance with the agreement reached at the Working Group’s fifteenth session (A/CN.9/668, para. 280) and confirmed at the Working Group’s subsequent sessions, the documents for the session of the Working Group are posted on the UNCITRAL website upon their availability in various language versions.

## Table of contents

Article in the revised Model Law	Corresponding provisions in the 1994 Model Law	New provisions considered or to be considered by the Working Group
<b>Chapter I. GENERAL PROVISIONS</b>  <b>Articles 1-23 bis</b>	<b>Chapter I. GENERAL PROVISIONS</b>	
Article 1. Scope of application	Article 1. Scope of application	Revisions to article 1 of the 1994 Model Law agreed upon at the Working Group's fifteenth session (A/CN.9/668, paras. 16-17); further amendments in the light of the deliberations at the Working Group's seventeenth session (A/CN.9/687, para. 17)
Article 2. Definitions	Article 2. Definitions	Revisions to article 2 of the 1994 Model Law agreed upon at the Working Group's fifteenth, seventeenth and eighteenth sessions (A/CN.9/668, paras. 272-274, A/CN.9/687, paras. 19-29, and A/CN.9/690, paras. 96-111); proposals made at the Commission's forty-second session (A/64/17, paras. 51-74); and amendments proposed by the Secretariat further to the expert consultations
Article 3. International obligations of this State relating to procurement [and intergovernmental agreements within (this State)]	Article 3. International obligations of this State relating to procurement [and intergovernmental agreements within (this State)]	Revisions to article 3 of the 1994 Model Law agreed upon at the Commission's forty-second session (A/64/17, paras. 75-78)
Article 4. Procurement regulations	Article 4. Procurement regulations	Revisions to article 4 of the 1994 Model Law in the light of the deliberations at the Working Group's seventeenth session (A/CN.9/687, paras. 31-32)
Article 5. Publication of legal texts	Article 5. Public accessibility of legal texts	Draft article 5 as preliminarily approved by the Working Group at its twelfth session (A/CN.9/640, paras. 30-34), except for its paragraph (3), which was included in a separate article 6 (see below)  The draft article with this revision was approved at the Working Group's fifteenth session (A/CN.9/668, para. 32). Further revised at the eighteenth session (A/CN.9/690, para. 115)

Article in the revised Model Law	Corresponding provisions in the 1994 Model Law	New provisions considered or to be considered by the Working Group
Article 6. Information on possible forthcoming procurement <b>(new provisions)</b>		Based on draft article 5, paragraph (3), as preliminarily approved by the Working Group at its twelfth session (A/CN.9/640, paras. 30-34), and revised at the Working Group's fifteenth session (A/CN.9/668, paras. 37-38), and at the Commission's forty-second session (A/64/17, paras. 80-87)
Article 7. Communications in procurement	Replaced article 9. Form of communications	Article 5 bis as preliminarily approved by the Working Group at its twelfth session (A/CN.9/640, paras. 17-25) and as proposed to be revised at the Commission's forty-second session (A/64/17, paras. 121-143)
Article 8. Participation by suppliers or contractors	Article 8. Participation by suppliers or contractors	Amendments proposed by the Secretariat further to the expert consultations and in the light of the deliberations at the Working Group's seventeenth session (A/CN.9/687, paras. 40-42)  Further revised at the eighteenth session (A/CN.9/690, paras. 118-120)
Article 9. Qualifications of suppliers and contractors	Article 6. Qualifications of suppliers and contractors  Article 10. Rules concerning documentary evidence provided by suppliers or contractors	Revisions agreed upon at the Working Group's fifteenth and seventeenth sessions (A/CN.9/668, paras. 73-76 and 109, and A/CN.9/687, paras. 43-50); amendments proposed by the Secretariat further to the expert consultations. Further revised at the eighteenth session (A/CN.9/690, paras. 121-122)
Article 10. Rules concerning description of the subject matter of the procurement, and the terms and conditions of the procurement contract or framework agreement	Article 16. Rules concerning description of goods, construction or services	Revisions agreed upon at the Working Group's fifteenth session (A/CN.9/668, paras. 77-81) and proposals made at the Commission's forty-second session (A/64/17, paras. 144-148); amendments proposed by the Secretariat in the light of the deliberations at the Working Group's seventeenth session (A/CN.9/687, paras. 51-52). Further revised at the eighteenth session (A/CN.9/690, para. 124)
Article 11. Rules concerning evaluation criteria and procedures <b>(new provisions based on the 1994 text)</b>	Articles 27 (e), 34 (4), 38 (m), 39 and 48 (3) (basis of new provisions)	Revisions considered at the Working Group's fifteenth session (A/CN.9/668, paras. 82-87); proposals made at the Commission's forty-second session (A/64/17, paras. 149-174); and amendments proposed by the Secretariat further to the expert consultations and in the light of the deliberations at the Working Group's seventeenth session (A/CN.9/687, paras. 53-62)

Article in the revised Model Law	Corresponding provisions in the 1994 Model Law	New provisions considered or to be considered by the Working Group
Article 12. Rules concerning estimation of the value of procurement <b>(new provisions)</b>		New provisions are proposed to be added in the light of the suggestions made by experts. They are based on the equivalent provisions of the WTO GPA (article II.2 and 3 of the 1994 version and article II.6 of the 2006 version); revised by the Secretariat in the light of the deliberations at the Working Group's seventeenth session (A/CN.9/687, paras. 63-66)
Article 13. Rules concerning the language of documents	Article 17. Language Article 29. Language of tenders	Revisions agreed upon at the Working Group's fifteenth session (A/CN.9/668, paras. 88 and 169)
Article 13 bis. Rules concerning the manner, place and deadline for presenting applications to pre-qualify or submissions <b>(new provisions based on the 1994 text)</b>	Articles 7 (3) (a) (iv) and 30 (2) to (4)	Proposed by the Secretariat
Article 14. Clarifications and modifications of solicitation documents	Article 28. Clarifications and modifications of solicitation documents	Proposed by the Secretariat to be moved from chapter III to chapter I. Further revised at the eighteenth session (A/CN.9/690, para. 130)
Article 15. Tender securities	Article 32. Tender securities	As approved at the Working Group's fifteenth session (A/CN.9/668, para. 91); minor amendments proposed by the Secretariat further to the expert consultations
Article 16. Pre-qualification proceedings	Article 7. Pre-qualification proceedings. Also articles 23, 24 and 25, provisions related to pre-qualification	Revisions agreed upon at the Working Group's fifteenth and seventeenth sessions (A/CN.9/668, paras. 93-110; and A/CN.9/687, paras. 72-76) and at the Commission's forty-second session (A/64/17, paras. 177-178); minor amendments proposed by the Secretariat further to the expert consultations. Further revised at the eighteenth session (A/CN.9/690, para. 131)
Article 17. Cancellation of the procurement	Article 12. Rejection of all tenders, proposals, offers or quotations	Revisions considered at the Working Group's fifteenth session (A/CN.9/668, paras. 111-117) and at the Commission's forty-second session (A/64/17, paras. 179-208) and agreed upon at the Working Group's seventeenth session (A/CN.9/687, paras. 77-81); and amendments proposed by the Secretariat further to the expert consultations. Further revised at the eighteenth session (A/CN.9/690, paras. 132-134)

Article in the revised Model Law	Corresponding provisions in the 1994 Model Law	New provisions considered or to be considered by the Working Group
Article 18. Rejection of abnormally low submissions ( <b>new provisions</b> )		Based on article 12 bis as preliminarily agreed upon by the Working Group at its twelfth session (A/CN.9/640, paras. 44-55) and proposals made at the Commission's forty-second session (A/64/17, paras. 209-212); minor amendments proposed by the Secretariat
Article 19. Exclusion of a supplier or contractor from the procurement proceedings on the grounds of inducements from the supplier or contractor, an unfair competitive advantage or conflicts of interest	Article 15. Inducements from suppliers or contractors	Conflicts of interest (A/CN.9/664, para. 116) A proposal by a delegation for a new paragraph 1 of the article; revisions agreed upon at the Working Group's fifteenth and seventeenth sessions (A/CN.9/668, paras. 121-125; and A/CN.9/687, paras. 83-90); proposals made at the Commission's forty-second session (A/64/17, paras. 213-222); and amendments proposed by the Secretariat further to the expert consultations
Article 20. Acceptance of the successful submission and entry into force of the procurement contract	Article 13. Entry into force of the procurement contract  Article 36. Acceptance of tender and entry into force of procurement contract	Standstill period (A/CN.9/664, paras. 45-55 and 72)  Revisions considered at the Working Group's fifteenth and seventeenth sessions (A/CN.9/668, paras. 126-145; and A/CN.9/687, paras. 91-98) and at the Commission's forty-second session (A/64/17, paras. 223-247); amendments proposed by the Secretariat further to the expert consultations. Further revised at the eighteenth session (A/CN.9/690, para. 138)
Article 21. Public notice of awards of procurement contract and framework agreement	Article 14. Public notice of procurement contract awards	Revisions agreed upon at the Working Group's fifteenth and seventeenth sessions (A/CN.9/668, paras. 146-148; and A/CN.9/687, paras. 99-100), and amendments proposed by the Secretariat further to the expert consultations. Further revised at the eighteenth session (A/CN.9/690, para. 139)
Article 22. Confidentiality	Articles 45, 48 (7) and 49 (3)	Revisions considered at the Working Group's fifteenth and seventeenth sessions (A/CN.9/668, paras. 149-152; A/CN.9/687, paras. 101-103) and at the Commission's forty-second session (A/64/17, paras. 248-266); and amendments proposed by the Secretariat. Further revised at the eighteenth session (A/CN.9/690, paras. 140-142)

Article in the revised Model Law	Corresponding provisions in the 1994 Model Law	New provisions considered or to be considered by the Working Group
Article 23. Documentary record of procurement proceedings	Article 11. Record of procurement proceedings	Revisions considered at the Working Group's ninth (A/CN.9/595, para. 49), eleventh (A/CN.9/623, para. 100), twelfth (A/CN.9/640, paras. 90-91), fifteenth (A/CN.9/668, paras. 153-157) and seventeenth sessions (A/CN.9/687, paras. 104-106) and at the Commission's forty-second session (A/64/17, paras. 267-280); and amendments proposed by the Secretariat further to the expert consultations. Further revised at the eighteenth session (A/CN.9/690, para. 143)
Article 23 bis. Code of conduct (new provisions)		Proposed by the Secretariat; based on provisions of draft article 4 (2) that were before the Working Group at its seventeenth session. Further revised at the eighteenth session (A/CN.9/690, paras. 144-145) and further to consultations with experts
<b>Chapter II.</b> <b>METHODS OF PROCUREMENT AND THEIR CONDITIONS FOR USE.</b> <b>SOLICITATION AND NOTICES OF THE PROCUREMENT</b>  <b>Articles 24-29 quinquies</b>	<b>Chapter II.</b> <b>METHODS OF PROCUREMENT AND THEIR CONDITIONS FOR USE</b>	Draft article 7. Rules concerning methods of procurement and type of solicitation in WP.69/Add.1  Revisions considered at the Working Group's fifteenth and seventeenth sessions (A/CN.9/668, paras. 39-70; and A/CN.9/687, paras. 107-131) and at the Commission's forty-second session (A/64/17, paras. 88-120)  Amendments proposed by the Secretariat further to the expert consultations. Further revised at the eighteenth session (A/CN.9/690, paras. 146-155)
<b>Section I.</b> <b>METHODS OF PROCUREMENT AND THEIR CONDITIONS FOR USE</b>  <b>Articles 24-29 bis</b>		Chapter II. METHODS OF PROCUREMENT AND THEIR CONDITIONS FOR USE, articles 24-29, as contained in document WP.71/Add.2 and considered at the Working Group's seventeenth session (A/CN.9/687, paras. 107-131). In the light of introduction of new provisions on methods of solicitation and their conditions for use in the chapter, the Secretariat proposed splitting the chapter into two sections

Article in the revised Model Law	Corresponding provisions in the 1994 Model Law	New provisions considered or to be considered by the Working Group
Article 24. Methods of procurement (new provisions)		Proposed by the Secretariat further to the expert consultations held in autumn 2009  Revisions considered at the Working Group's seventeenth session (A/CN.9/687, paras. 107-109). Further revised at the eighteenth session (A/CN.9/690, para. 146)
Article 25. General rules applicable to the selection of a procurement method	Article 18. Methods of procurement	Draft article 7 (1), (2) and (8) in WP.69/Add.1 as considered at the Working Group's fifteenth session (A/CN.9/668, paras. 40-45, 69)  Revisions considered at the Working Group's seventeenth session (A/CN.9/687, paras. 110-112)
Article 26. Conditions for use of methods of procurement under chapter IV of this Law (restricted tendering, request for quotations and request for proposals without negotiation)	Articles 20, 21 and 42	Revisions considered at the Working Group's seventeenth session (A/CN.9/687, paras. 113-119)
Article 27. Conditions for use of methods of procurement under chapter V of this Law (two-stage tendering, request for proposals with dialogue, request for proposals with consecutive negotiations, competitive negotiations and single-source procurement)	Article 19 (1)	As related to the new procurement method (request for proposals with dialogue), see para. 1 of a new article 40 proposed by delegations of Austria, France, UK and USA as considered at the Working Group's sixteenth session (A/CN.9/672, paras. 32-37) and revised in A/CN.9/XLII/CRP.2, para. 5 (a)  Revisions considered at the Working Group's seventeenth session (A/CN.9/687, paras. 120-129)  Amendments proposed by the Secretariat further to the expert consultations. Further revised at the eighteenth session (A/CN.9/690, paras. 149-155).
	Article 19 (2)	Amendments proposed by the Secretariat further to the expert consultations and in the light of the deliberations at the Working Group's seventeenth session (A/CN.9/687, paras. 120-129). Further revised at the eighteenth session (A/CN.9/690, paras. 154-155)

Article in the revised Model Law	Corresponding provisions in the 1994 Model Law	New provisions considered or to be considered by the Working Group
	Article 22	<p>Draft article 7 (7) in WP.69/Add.1 as considered at the Working Group's fifteenth session (A/CN.9/668, paras. 51-64) and at the Commission's forty-second session (A/64/17, para. 119)</p> <p>A revision agreed to be made at the Working Group's seventeenth session (A/CN.9/687, para. 131)</p>
Article 28. Conditions for use of an auction ( <b>new provisions</b> )		<p>Draft article 41 (1) in WP.69/Add.4 as approved at the Working Group's fifteenth session (A/CN.9/668, para. 216)</p> <p>Amendments proposed by the Secretariat further to the expert consultations</p>
Article 29. Conditions for use of a framework agreement procedure ( <b>new provisions</b> )		Moved from the chapter on framework agreement procedures of the draft considered by the Working Group at its fifteenth session (article 49) (A/CN.9/668, paras. 226-229)
<b>Section II.</b> <b>SOLICITATION AND NOTICES OF THE PROCUREMENT</b>  <b>Articles 29 bis-29 quater (new provisions)</b>		New provisions proposed by the Secretariat in the light of the deliberations at the Working Group's seventeenth session
Article 29 bis. Solicitation in open tendering, two-stage tendering and in procurement by means of an auction		
Article 29 ter. Solicitation and notices of the procurement in restricted tendering, competitive negotiations and single-source procurement		
Article 29 quater. Solicitation in request for proposals proceedings		

Article in the revised Model Law	Corresponding provisions in the 1994 Model Law	New provisions considered or to be considered by the Working Group

**(A/CN.9/WG.I/WP.75/Add.1) (Original: English)****Note by the Secretariat on possible revisions to the UNCITRAL Model Law on Procurement of Goods, Construction and Services — a revised text of the Model Law, submitted to the Working Group on Procurement at its nineteenth session****ADDENDUM**

This note sets out a proposal for the Preamble and articles 1-13 of chapter I (General provisions) of the revised Model Law.

The Secretariat's comments are set out in the accompanying footnotes.

**UNCITRAL MODEL LAW ON PUBLIC PROCUREMENT****Preamble**

WHEREAS the [Government] [Parliament] of ... considers it desirable to regulate procurement so as to promote the objectives of:

- (a) Maximizing economy and efficiency in procurement;
- (b) Fostering and encouraging participation in procurement proceedings by suppliers and contractors<sup>1</sup> regardless of nationality, and thereby promoting international trade;
- (c) Promoting competition among suppliers and contractors for the supply of the subject matter of the procurement;
- (d) Providing for the fair and equitable treatment of all suppliers and contractors;
- (e) Promoting the integrity of, and fairness and public confidence in, the procurement process;
- (f) Achieving transparency in the procedures relating to procurement.

Be it therefore enacted as follows.

**CHAPTER I. GENERAL PROVISIONS****Article 1. Scope of application<sup>2</sup>**

This Law applies to all public procurement.

---

<sup>1</sup> Amended pursuant to A/CN.9/690, para. 94.

<sup>2</sup> The accompanying Guide text will point out that States in situations of economic and financial crisis might exempt the application of the Model Law through legislative measures (which would themselves receive the scrutiny of the legislature) (A/CN.9/668, para. 63).

## Article 2. Definitions<sup>3</sup>

For the purposes of this Law:

(a) “Auction”<sup>4</sup> means an online real-time purchasing technique utilized by the procuring entity to select the successful submission, which involves presentation by suppliers or contractors of successively lowered bids during a scheduled period of time and automatic evaluation of the bids;<sup>5</sup>

(b) “Currency” includes monetary unit of account;

(c) “Direct solicitation” means the<sup>6</sup> solicitation addressed directly to one or a restricted number of suppliers or contractors. This excludes solicitation addressed to a limited<sup>7</sup> number of suppliers or contractors following prequalification or pre-selection proceedings;

(d) “Domestic procurement” means procurement limited to domestic suppliers or contractors pursuant to article [8] of this Law;

(e) “Framework agreement procedure”<sup>8</sup> means a procurement conducted in two stages: a first stage to select supplier(s) or contractor(s) to be the party or parties to a framework agreement with a procuring entity, and a second stage to award a procurement contract under the framework agreement to a supplier or contractor party to the framework agreement:

(i) “Framework agreement” means an agreement or agreements between the procuring entity and the selected supplier(s) or contractor(s) concluded upon completion of the first stage of the framework agreement procedure;

(ii) “Closed framework agreement” means a framework agreement to which no supplier or contractor that is not initially a party to the framework agreement may subsequently become a party;

(iii) “Open framework agreement” means a framework agreement to which supplier(s) or contractor(s) in addition to the initial parties may subsequently become a party or parties;

(iv) “Framework agreement procedure with second stage competition” means a procedure under an open framework agreement or a closed framework agreement with more than one supplier or contractor in which certain terms and conditions of the procurement that cannot be established with sufficient precision when the framework agreement is concluded are to be established or refined through the second stage competition;

<sup>3</sup> The article will be supplemented in the revised Guide to Enactment by a more comprehensive glossary of terms used in the Model Law.

<sup>4</sup> The more neutral term to “electronic reverse auction” is used in the current draft pursuant to A/CN.9/690, para. 39 (a), and the comments made during the intersessional consultations.

<sup>5</sup> The last portion was added to encompass in the definition all the main features of the reverse auction.

<sup>6</sup> The word “exceptional” was deleted pursuant to A/CN.9/690, para. 108.

<sup>7</sup> The word “limited” replaced the word “restricted” used in the previous draft.

<sup>8</sup> During the intersessional consultations, suggestions were made to reconsider referring to the “procedure” in this context.

(v) “Framework agreement procedure without second stage competition” means a procedure under a closed framework agreement in which all terms and conditions of the procurement are established when the framework agreement is concluded;

(...)<sup>9</sup>

(f) “Prequalification documents” means documents issued by the procuring entity that set out the terms and conditions of the prequalification proceedings in accordance with article [16] of this Law;<sup>10</sup>

(g) “Procurement” means the acquisition<sup>11</sup> of goods, construction or services (the “subject matter of the procurement”);<sup>12</sup>

(h) “Procurement contract” means a contract or contracts<sup>13</sup> resulting from the procurement proceedings and made between the procuring entity and supplier(s) or contractor(s);

(i) “Procurement involving classified<sup>14</sup> information” means procurement in which the procuring entity may be authorized by the procurement regulations or by other provisions of law of this State to take special measures and impose special

<sup>9</sup> The definition of “Material change” was deleted pursuant to A/CN.9/690, paras. 96-98. During the intersessional consultations, the prevailing view was that the definition should be deleted and the relevant provisions should address the extent of permissible change in the specific context, as has been done in draft articles 42 and 43.

<sup>10</sup> The definition is retained without square brackets pursuant to A/CN.9/690, para. 100.

<sup>11</sup> Amended pursuant to A/CN.9/690, para. 101. The accompanying Guide text will explain that the definition encompasses acquisition by purchase, but also by lease (drawing on equivalent terms in article I.2 of the WTO Agreement on Government Procurement (the 1994 version of GPA) and article II.2 (b) of the provisionally agreed text of the revised GPA (the 2006 version of GPA), the latter referring to “purchase, lease and rental or hire purchase, with or without an option to buy”).

<sup>12</sup> The accompanying Guide text will set out the substance of the definitions of the goods, construction and services from the 1994 text (article 2 (c) to (e)).

<sup>13</sup> The accompanying Guide text will note that reference to contracts in plural intends to encompass inter alia split contracts awarded as a result of the same procurement proceedings. In this regard, it will refer to the provisions of the Model Law stipulating that suppliers or contractors may be permitted to present submissions for only a portion of the subject matter of the procurement (e.g. article 33 (g) of this draft).

<sup>14</sup> The accompanying Guide text will explain that the term “classified information” intends to refer to information designated as classified by an enacting State in accordance with the relevant national law, and that the provision does not intend to confer any discretion on the procuring entity to expand the definition of “classified information”. The Guide will also explain that the term “classified information” being understood in many jurisdictions as information to which access is restricted by law or regulation to particular classes of persons, and that the term does not intend to refer only to the procurement in the sectors where “classified information” is most commonly encountered, such as national security and defence, but also to procurement in any other sector where protection of certain information from public disclosure may be permitted by law, such as in the health sector (for example procurement of vaccines in the case of pandemics in order to avoid panic) or where sensitive medical research and experiments may be involved. Because of the risk of abuse of exceptions to transparency requirements, the Working Group may wish to recommend in the Guide that the issues pertaining to the treatment of “classified information” should be regulated at the level of statutes in order to ensure appropriate scrutiny by the legislature.

requirements for the protection of classified information, including to determine which provisions of this Law calling for public disclosure shall not apply;<sup>15</sup>

(j) “Procurement regulations” means regulations to be enacted in accordance with article [4] of this Law;

(k) “Procuring entity” means:

(i) *Option I*

Any governmental department, agency, organ or other unit, or any subdivision or multiplicity thereof,<sup>16</sup> that engages in procurement, except ...; (and)

*Option II*

Any department, agency, organ or other unit, or any subdivision or multiplicity thereof,<sup>17</sup> of the (“Government” or other term used to refer to the national Government of the enacting State) that engages in procurement, except ...; (and)

(ii) (The enacting State may insert in this subparagraph and, if necessary, in subsequent subparagraphs, other entities or enterprises, or categories thereof, to be included in the definition of “procuring entity”);

(l) “Public procurement” means procurement carried out by a procuring entity;<sup>18</sup>

(m) “<sup>19</sup>Socio-economic policies”<sup>20</sup> means environmental, social, economic and other policies of this State authorized or required by the procurement regulations or other provisions of law of this State<sup>21</sup> to be taken into account by the

<sup>15</sup> The accompanying Guide text will note that the definition, where it is used in the Model Law, is supplemented by the requirement in the article on the documentary record of procurement proceedings to include in the record the reasons and circumstances on which the procuring entity relied to justify the measures and requirements imposed during the procurement proceedings for protection of classified information, such as exemptions from public disclosure.

<sup>16</sup> Amended pursuant to A/CN.9/690, paras. 102 and 103. The accompanying Guide text will explain that procurement can be done by groups or consortia of procuring entities, and they can collectively be dealt with as a single “procuring entity”. It will further note that, in some jurisdictions, to ensure political accountability, even when procuring entities band together, one remains the lead procuring entity. The Guide will also refer to a consortium of procuring entities from various States where a procuring entity from one State in its capacity as the lead procuring entity acts as an agent of procuring entities from other States.

<sup>17</sup> Ibid.

<sup>18</sup> The accompanying Guide text will cross-refer to the definitions of “procurement” and “procuring entity”.

<sup>19</sup> There was suggestion during the intersessional consultations to add the word “Government” or use it instead of the word “socio-economic” in that definition. While there was some support for the use of the term “Government socio-economic policies”, the term “Government policies” was considered to be very broad for the purposes intended. Alternative phrases used in academic texts include “secondary policies”, “horizontal policies” and “horizontal considerations”.

<sup>20</sup> The Working Group has agreed to reconsider the need for this definition (A/CN.9/690, para. 120 (v)).

<sup>21</sup> Amended pursuant to A/CN.9/690, para. 106. The Guide will explain that the provisions are not intended to be open-ended, but to encompass only those policies set out in the legislation of the enacting State, and those that can be triggered by international regulation such as United

procuring entity in the procurement proceedings. (The enacting State may expand this subparagraph by providing an illustrative list of such policies;)<sup>22</sup>

(n) “Solicitation” means an invitation to tender or to present quotations, proposals or bids, according to the context;<sup>23</sup>

(o) “Solicitation documents” means documents issued by the procuring entity, including any amendments thereto,<sup>24</sup> that set out the terms and conditions of the given procurement;

(p) “Standstill period”<sup>25</sup> means the period before the entry into force of the procurement contract, during which the suppliers or contractors whose submissions have been examined may seek review of the decision of the procuring entity to accept the successful submission at the end of that period;

(q) “Submission(s)” means tender(s), proposal(s), offer(s), quotation(s) and bid(s) referred to collectively or generically;

(...)<sup>26</sup>

(r) “Supplier or contractor” means, according to the context, any potential party or any party to the procurement proceedings with the procuring entity;

(s) “Tender security”<sup>27</sup> means a security required from suppliers or contractors by the procuring entity and provided to the procuring entity to secure the

---

Nations Security Council anti-terrorism measures or sanctions regimes. The aim of the provisions is to ensure that (a) socio-economic policies (which might include political policies as well as those enumerated in the paragraph) are not determined on an ad hoc basis by the procuring entity, and (b) applied across all government purchasing, so that their costs and benefits can be seen. If there is any other organ or organs with the authority to promulgate socio-economic policies in an enacting State, the Guide will note that it or they should operate under these constraints (and not allow, for example, misuse and abuse through ad hoc adoption of policies, favouritism, etc.).

<sup>22</sup> The accompanying Guide text will contain an illustrative list of such policies, such as that contained in the 1994 Model Law (article 34 (4) (c) (iii)). The Guide will also describe the costs to procurement that recourse to such policies can bring, and that they are commonly considered to be appropriate only for the purposes of assisting development, such as capacity-building.

<sup>23</sup> Amended to differentiate “solicitation” from “the invitation to participate in the procurement proceedings,” the latter being broader as it may encompass an invitation to pre-qualify or an invitation to the pre-selection in accordance with article 43. The accompanying Guide text will elaborate on the meaning of solicitation in each procurement method, in particular that in the auctions where initial bids are requested for assessment of their responsiveness or evaluation, the solicitation starts already from an invitation to present initial bids rather than from the invitation to bid after the opening of the auction.

<sup>24</sup> The accompanying Guide text will explain the difference in the meaning of “solicitation documents” in various procurement methods. With respect to the amendments, it will cross-refer to the relevant provisions of the Model Law, such as draft articles 13 bis, 14, 42 and 43 of this Law.

<sup>25</sup> This definition was revised pursuant to A/CN.9/690, paras. 109 and 110.

<sup>26</sup> The definition of “Successful submission” was deleted pursuant to A/CN.9/690, para 111.

<sup>27</sup> The accompanying Guide text will explain that although the Model Law refers to “tender security”, as the commonly-used term in the relevant context, this should not imply that this type of security may be requested only in the tendering proceedings. It will also explain that the definition does not intend to imply that multiple tender securities can be requested by the procuring entity in any single procurement proceedings that involve presentation of revised proposals or bids.

fulfilment of any obligation referred to in article [15 (1) (f)] of this Law and includes such arrangements as bank guarantees, surety bonds, standby letters of credit, cheques on which a bank is primarily liable, cash deposits, promissory notes and bills of exchange. For the avoidance of doubt, the term excludes any security for the performance of the contract.

**Article 3. International obligations of this State relating to  
procurement [and intergovernmental agreements  
within (this State)]<sup>28</sup>**

To the extent that this Law conflicts with an obligation of this State under or arising out of any

(a) Treaty or other form of agreement to which it is a party with one or more other States,

(b) Agreement entered into by this State with an intergovernmental international financing institution, or

[(c) Agreement between the federal Government of [name of federal State] and any subdivision or subdivisions of [name of federal State], or between any two or more such subdivisions,]

the requirements of the treaty or agreement shall prevail; but in all other respects, the procurement shall be governed by this Law.

**Article 4. Procurement regulations<sup>29</sup>**

The ... (the enacting State specifies the organ or authority authorized to promulgate the procurement regulations) is authorized to promulgate procurement regulations to fulfil the objectives and to carry out the provisions of this Law.

**Article 5. Publication of legal texts**

(1) Except as provided for in paragraph (2) of this article, the text of this Law, procurement regulations and other legal texts of general application in connection with procurement covered by this Law, and all amendments thereto, shall be promptly made accessible to the public and systematically maintained.

(2) Judicial decisions and administrative rulings with precedent value in connection with procurement covered by this Law shall be made available to the public.<sup>30</sup>

---

<sup>28</sup> The accompanying Guide text will explain that the texts in square brackets in this article are relevant to, and intended for consideration by, federal States, and that although treaties have an effect on national implementation of this Law and that more stringent requirements might be applicable, international commitments should not be used as a pretext to avoid basic safeguards under the Model Law (A/CN.9/690, para. 113). It will also alert enacting States that the provisions of the article might need to be adapted to constitutional requirements or should not be enacted at all if they conflict with the constitutional law of the enacting State (A/64/17, paras. 75-78).

<sup>29</sup> The accompanying Guide text will contain a list of cross-references to all provisions of the Model Law where requirements about the content of the procurement regulations are found.

### Article 6. Information on possible forthcoming procurement

- (1) Procuring entities may publish information regarding planned procurement activities for forthcoming months or years.<sup>31</sup>
- (2) Procuring entities may also publish an advance notice of possible future procurement.<sup>32</sup>
- (3) Publication under this article does not constitute a solicitation, does not oblige the procuring entity to issue a solicitation and does not confer any rights on suppliers or contractors.<sup>33</sup>

### Article 7. Communications in procurement<sup>34</sup>

- (1) Any document, notification, decision or any other information generated in the course of a procurement and communicated as required by this Law, including in connection with review proceedings under chapter [VIII] or in the course of a meeting, or forming part of the record of procurement proceedings under article [23], shall be in a form that provides a record of the content of the information and that is accessible so as to be usable for subsequent reference.
- (2) Direct solicitation<sup>35</sup> and communication of information between suppliers or contractors and the procuring entity referred to in articles [15 (1) (d),<sup>36</sup> 16 (6) and (9),<sup>37</sup> 35 (2) (a),<sup>38</sup> 37 (1)<sup>39</sup> and 44 (2) to (4)]<sup>40, 41</sup> may be made by means that do

<sup>30</sup> Amended pursuant to A/CN.9/690, para. 115. The accompanying Guide text will explain that laws and regulations of the enacting State will regulate which State agency is responsible for fulfilling the obligations under this article.

<sup>31</sup> The accompanying Guide text will emphasize the need for proper procurement planning.

<sup>32</sup> The accompanying Guide text will explain that the reference to “an advance notice of possible future procurement” is made to enable procuring entities to assess the market for complex procurement, without using a term that might be confused with a notice seeking expressions of interest that is usually published in conjunction with request for proposals proceedings.

<sup>33</sup> The accompanying Guide text will explain that the provisions of this article may be applied regardless of the procurement method, and will also highlight the importance of the provisions in the light of the United Nations Convention against Corruption (UNCAC), as ensuring transparency throughout the process and eliminating any advantageous position of suppliers or contractors that otherwise may gain access to procurement planning phases in a non-transparent manner. The Guide will also explain the media where the type of information covered by the article is usually published (A/CN.9/687, para. 37).

<sup>34</sup> The accompanying Guide text will explain that: (a) in procurement containing classified information, classified information may be included in an appendix to the solicitation documents that is not made public; and (b) that the means of communication may be changed by issuing an addendum to the original solicitation documents (A/CN.9/690, para. 117).

<sup>35</sup> Corresponds to references in article 9 of the 1994 Model Law to articles 37 (3) and 47 (1) of that text.

<sup>36</sup> Id., as regards reference to article 32 (1) (d) of the 1994 text.

<sup>37</sup> Id., as regards reference to article 7 (4) and (6) of the 1994 text.

<sup>38</sup> Id., as regards reference to article 31 (2) (a) of the 1994 text.

<sup>39</sup> Id., as regards reference to article 34 (1) of the 1994 text.

<sup>40</sup> Id., as regards reference to article 44 (b) to (f) of the 1994 text (selection procedure with consecutive negotiation).

<sup>41</sup> It was decided that the other references in the 1994 text (to articles 36 (1) (notice of acceptance of the successful tender), and to article 12 (3) (notice of the rejection of all submissions)) would be deleted (A/64/17, para. 122).

not provide a record of the content of the information on the condition that, immediately thereafter, confirmation of the communication is given to the recipient of the communication in a form that provides a record of the content of the information and that is accessible so as to be usable for subsequent reference.

(3) The procuring entity, when first soliciting the participation of suppliers or contractors in the procurement proceedings, shall specify:

(a) Any requirement of form;

(b) In procurement involving classified information, if the procuring entity considers it necessary, measures and requirements needed to ensure the protection of classified information at the requisite level;

(c) The means to be used to communicate information by or on behalf of the procuring entity to a supplier or contractor or to the public or by a supplier or contractor to the procuring entity or other entity acting on its behalf;

(d) The means to be used to satisfy all requirements under this Law for information to be in writing or for a signature; and

(e) The means to be used to hold any meeting of suppliers or contractors.

(4) The procuring entity may use only those means of communication that are in common use by suppliers or contractors in the context of the particular procurement. In any meeting held with suppliers or contractors, the procuring entity shall use only those means that ensure in addition that suppliers or contractors can fully and contemporaneously participate in the meeting.

(5) The procuring entity shall put in place appropriate measures to secure the authenticity, integrity and confidentiality of information concerned.

#### **Article 8. Participation by suppliers or contractors<sup>42</sup>**

(1) Suppliers or contractors shall be permitted to participate in procurement proceedings without regard to nationality, except where the procuring entity decides to limit participation in procurement proceedings on the basis of nationality on grounds<sup>43</sup> specified in the procurement regulations or other provisions of law of this State.<sup>44</sup>

<sup>42</sup> Amended pursuant to A/CN.9/690, paras. 118-120.

<sup>43</sup> Although a suggestion was made during the intersessional consultations to refer explicitly in these provisions to “the extent of domestic content,” the view prevailed that such reference would be unadvisable. In this respect, practical difficulties with calculating the extent of the domestic content, especially since supply chain is becoming more complex and international, were highlighted. Difficulties with defining nationality as opposed to domestic content were also mentioned. It was agreed that the accompanying Guide text would stress that any restriction under these provisions would be against free trade.

<sup>44</sup> Amended pursuant to A/CN.9/690, paras. 118-120. In particular, paragraph (1) (a) in the previous draft reading “Where the procuring entity decides, in view of the low value of the goods, construction or services to be procured, that only domestic suppliers or contractors are likely to be interested in presenting submissions” was deleted. This was on the understanding that, as is the case in the 1994 text (article 23), the procuring entity cannot have recourse to domestic procurement on the sole basis that the subject matter of the procurement is of the low value and thus only domestic suppliers or contractors are likely to be interested in presenting

(2) Except when authorized or required<sup>45</sup> to do so by the procurement regulations or other provisions of law of this State,<sup>46</sup> the procuring entity shall establish no other requirement aimed at limiting participation of suppliers or contractors in procurement proceedings that discriminates<sup>47</sup> against or among suppliers or contractors or against categories thereof.

(3) The procuring entity, when first soliciting the participation of suppliers or contractors in the procurement proceedings, shall declare whether participation of suppliers or contractors in the procurement proceedings is limited pursuant to this article and on which ground. Any such declaration may not later be altered.<sup>48</sup>

(4) A procuring entity that decides to limit participation of suppliers or contractors in procurement proceedings pursuant to this article shall include in the record of the procurement proceedings a statement of the reasons and circumstances<sup>49</sup> on which it relied.<sup>50</sup>

(5) The procuring entity shall make available to any member of the public, upon request, its reasons for limiting participation of suppliers or contractors in the procurement proceedings pursuant to this article.<sup>51</sup>

---

submissions. What it can do in such case, but it does not have to, is to advertise such low-value procurement only domestically. This understanding was reflected in article 29 bis (4) of the current draft. The accompanying Guide text will explain that this paragraph may deal not only with cases of domestic procurement (e.g. to cover situations where nationalities subject to international or bilateral sanctions are excluded). Although socio-economic policies would most likely justify recourse to exceptions provided for in this subparagraph, the reference only to the socio-economic policies of an enacting State was not considered sufficient since limiting participation in procurement proceedings on the basis of nationality may occur on grounds other than socio-economic policies of this State, such as safety and security.

<sup>45</sup> Amended pursuant to A/CN.9/690, para. 120, and aligned with the similar wording found elsewhere in the current draft (e.g. article 11 (4) (b)).

<sup>46</sup> The accompanying Guide text will explain that this paragraph intends to cover situations when limitation of participation in procurement proceedings is not on the basis of nationality or not solely on that basis (e.g. set-aside programmes in some jurisdictions for small and medium enterprises or coming from disadvantaged areas). The paragraph may cover, as paragraph (1) does, domestic procurement (e.g. procurement with participation of only suppliers or contractors coming from disadvantaged areas within the same State) or international procurement limited to certain groups of suppliers or contractors (e.g. persons with disabilities).

<sup>47</sup> The accompanying Guide text will explain that, apart from clearly discriminatory measures, in practice some measures may be taken that produce inadvertently discriminatory effect on suppliers or contractors.

<sup>48</sup> The accompanying Guide text would specify the media where the declaration would be published.

<sup>49</sup> During the intersessional consultations, suggestion was made to replace the reference to “reasons and circumstances” with the word “grounds” to allow reference to applicable law/regulations. The Working Group may however wish to recall its decision at its earlier sessions to use the term “reasons and circumstances” consistently throughout the revised Model Law. The latter term was therefore retained in the current draft. The accompanying Guide text will elaborate on the importance of setting out in the record also the legal grounds, with reference to applicable law and regulations, for the decision.

<sup>50</sup> The paragraph was retained without square brackets pursuant to A/CN.9/690, para. 120.

<sup>51</sup> It is suggested that the Guide text that will discuss transparency requirements of the Model Law should list separately all public disclosure requirements found in the Model Law.

### Article 9. Qualifications of suppliers and contractors

(1) This article applies to the ascertainment by the procuring entity of the qualifications of suppliers or contractors at any stage of the procurement proceedings.

(2) <sup>52</sup>Suppliers or contractors must meet such of the following criteria as the procuring entity considers appropriate and relevant in the circumstances of the particular procurement:

(a) That they have the necessary professional, technical and environmental qualifications, professional and technical competence, financial resources, equipment and other physical facilities,<sup>53</sup> managerial capability, reliability, experience and the personnel to perform the procurement contract;

(b) That they meet applicable ethical and other standards;<sup>54</sup>

(c) That they have legal capacity to enter into the procurement contract;

(d) That they are not insolvent, in receivership, bankrupt or being wound up, their affairs are not being administered by a court or a judicial officer, their business activities have not been suspended, and they are not the subject of legal proceedings for any of the foregoing;

(e) That they have fulfilled their obligations to pay taxes and social security contributions in this State;<sup>55</sup>

(f) That they have not, and their directors or officers have not, been convicted of any criminal offence related to their professional conduct or the making of false statements or misrepresentations as to their qualifications to enter

<sup>52</sup> The opening phrase was deleted since it raised concerns in the Working Group (A/CN.9/690, para. 121) as well as, in its amended version reading “In order to participate in the procurement proceedings and be awarded the procurement contract”, during the intersessional consultations. In particular, it was noted that read together with article 16 (1), it implied that prequalification would always be necessary. This wording, it was also explained, would allow procuring entities to formulate excessively demanding qualification requirements and through their application restrict the pool of participants for the purpose of reducing the workload for themselves. The other view was that the deleted wording was adequate but the Guide should alert that assessment of qualifications at the outset of the procurement, while justifiable in some procurement, restricts the competition and should also refer to the provisions of the Model Law that allow challenge disqualification.

<sup>53</sup> The accompanying Guide text will explain that the requirement that suppliers or contractor must possess the “necessary equipment and other physical facilities” is not intended to restrict the participation of small and medium-sized enterprises in public procurement. The Guide will note that often such enterprises would not themselves possess the required equipment and other physical facilities but rather ensure through their subcontractors that the required equipment and facilities were made available for the implementation of the procurement contract.

<sup>54</sup> Amended pursuant to A/CN.9/690, para. 122. The accompanying Guide text will explain with reference to “other standards” that the procuring entity should be entitled to satisfy itself, for example, that suppliers or contractors have all the required insurances, and to impose security clearances or consider environmental aspects where necessary.

<sup>55</sup> The accompanying Guide text will explain the effect of this provision on foreign suppliers or contractors, with a cross-reference to article 8 that prevents imposing requirements other than those stipulated in the procurement regulations or other provisions of law of the enacting State, to deter participation in the procurement proceedings by foreign suppliers or contractors.

into a procurement contract within a period of ... years (the enacting State specifies the period of time) preceding the commencement of the procurement proceedings, or have not been otherwise disqualified pursuant to administrative suspension or debarment proceedings.<sup>56</sup>

(3) Subject to the right of suppliers or contractors to protect their intellectual property or trade secrets, the procuring entity may require suppliers or contractors participating in procurement proceedings to provide appropriate documentary evidence or other information to satisfy itself that the suppliers or contractors are qualified in accordance with the criteria referred to in paragraph (2).<sup>57</sup>

(4) Any requirement established pursuant to this article shall be set out in the prequalification documents, if any, and in the solicitation documents,<sup>58</sup> and shall apply equally to all suppliers or contractors. A procuring entity shall impose no criterion, requirement or procedure with respect to the qualifications of suppliers or contractors other than those provided for in this Law.

(5) The procuring entity shall evaluate the qualifications of suppliers or contractors in accordance with the qualification criteria and procedures set out in the prequalification documents, if any, and in the solicitation documents.

(6) Other than any criterion, requirement or procedure that may be imposed by the procuring entity in accordance with article [8] of this Law, the procuring entity shall establish no criterion, requirement or procedure with respect to the qualifications of suppliers or contractors that discriminates against or among suppliers or contractors or against categories thereof, or that is not objectively justifiable.<sup>59</sup>

(7) Notwithstanding paragraph (6) of this article, the procuring entity may require the legalization of documentary evidence provided by the supplier or contractor presenting the successful submission to demonstrate its qualifications for the particular procurement. In doing so, the procuring entity shall not impose any requirements as to the legalization of the documentary evidence other than those provided for in the laws of this State relating to the legalization of documents of the type in question.

(8) (a) The procuring entity shall disqualify a supplier or contractor if it finds at any time that the information submitted concerning the qualifications of the supplier or contractor was false;

---

<sup>56</sup> It was suggested that the accompanying Guide text should refer to the World Bank's guidelines on suspension procedures (A/CN.9/687, para. 50).

<sup>57</sup> At the Working Group's seventeenth session, it was agreed that the accompanying Guide text should explain the interaction between paragraphs (3) and (2), in particular paragraph (2) (a), of this article (A/CN.9/687, para. 48).

<sup>58</sup> The accompanying Guide text will note that, in some jurisdictions, standard qualifications requirements are found in procurement regulations and the prequalification documents simply cross-refer to those regulations. For reasons of transparency and equal treatment, the Model Law requires all requirements to be set out in the prequalification and solicitation documents, but the Guide will note that the requirements of paragraph (4) may be satisfied where the prequalification or solicitation documents or both refer to the qualification requirements in sources that are transparent and readily available (A/CN.9/690, para. 123).

<sup>59</sup> The accompanying Guide text will note that, despite this statement in the Model Law, some practical measures, such as a choice of the language, although objectively justifiable, may lead to discrimination against or among suppliers or contractors or against categories thereof.

(b) A procuring entity may disqualify a supplier or contractor if it finds at any time that the information submitted concerning the qualifications of the supplier or contractor was materially inaccurate or materially incomplete;

(c) Other than in a case to which subparagraph (a) of this paragraph applies, a procuring entity may not disqualify a supplier or contractor on the ground that information submitted concerning the qualifications of the supplier or contractor was inaccurate or incomplete in a non-material respect. The supplier or contractor may, however, be disqualified if it fails to remedy such deficiencies promptly upon request by the procuring entity;

(d) The procuring entity may require a supplier or contractor that was pre-qualified in accordance with article [16] of this Law to demonstrate its qualifications again in accordance with the same criteria used to pre-qualify such supplier or contractor. The procuring entity shall disqualify any supplier or contractor that fails to demonstrate its qualifications again if requested to do so. The procuring entity shall promptly notify each supplier or contractor requested to demonstrate its qualifications again as to whether or not the supplier or contractor has done so to the satisfaction of the procuring entity.<sup>60</sup>

**Article 10. Rules concerning description of the subject matter of the procurement, and the terms and conditions of the procurement contract or framework agreement<sup>61</sup>**

(1) The procuring entity shall set out in the prequalification documents, if any, and in the solicitation documents the description of the subject matter of the procurement that it will use in the examination of submissions, including the minimum requirements that submissions must meet in order to be considered responsive and the manner in which those minimum requirements are to be applied.<sup>62</sup>

(2) Other than any criterion, requirement or procedure that may be imposed by the procuring entity in accordance with article [8] of this Law, no description of the subject matter of a procurement that may restrict the participation of suppliers or contractors in or their access to the procurement proceedings,<sup>63</sup> including any restriction based on nationality, shall be included or used in the prequalification documents, if any, or in the solicitation documents.

(3) The description of the subject matter of the procurement may include specifications, plans, drawings, designs, requirements, including concerning testing

<sup>60</sup> The accompanying Guide text will note that in most procurement (with the exception perhaps of complex procurement requiring long negotiations), these provisions should be limited to the winner as envisaged in articles 37 (6) and (7) and 51.

<sup>61</sup> The accompanying Guide text will elaborate on the way the socio-economic factors can be taken into account in setting out the description of the subject matter of the procurement and the terms and conditions of the procurement contract or a framework agreement.

<sup>62</sup> The accompanying Guide text will explain that the minimum requirements intend also to cover thresholds referred to in the provisions on request for proposals without negotiation and consecutive negotiations.

<sup>63</sup> Amended pursuant to A/CN.9/690, para. 124.

and test methods,<sup>64</sup> packaging, marking or labelling or conformity certification, and symbols and terminology.<sup>65</sup>

(4) To the extent practicable, any description of the subject matter of the procurement shall be objective, functional and generic, and shall set out the relevant technical and quality characteristics or the performance characteristics<sup>66</sup> of that subject matter. There shall be no requirement for or reference to a particular trademark or trade name, patent, design or type, specific origin or producer unless there is no sufficiently precise or intelligible way of describing the characteristics of the subject matter of the procurement and provided that words such as “or equivalent” are included.<sup>67</sup>

(5) (a) Standardized features, requirements, symbols and terminology relating to the technical and quality characteristics of the subject matter of the procurement shall be used, where available, in formulating any description of the subject matter of the procurement to be included in the prequalification documents, if any, and in the solicitation documents;

(b) Due regard shall be had for the use of standardized trade terms and standardized conditions,<sup>68</sup> where available, in formulating the terms and conditions of the procurement and the procurement contract or the framework agreement to be entered into as a result of the procurement proceedings, and in formulating other relevant aspects of the prequalification documents, if any, and solicitation documents.

#### **Article 11. Rules concerning evaluation criteria and procedures**

(1) Except for the criteria set out in paragraph (4) of this article, the evaluation criteria shall relate to the subject matter of the procurement.

(2) The evaluation criteria may include:

(a) The price;

(b) The cost of operating, maintaining and repairing goods or construction, the time for delivery of goods, completion of construction or provision of services, the characteristics of the subject matter of the procurement, such as the functional characteristics of goods or construction and the environmental characteristics of the

---

<sup>64</sup> The accompanying Guide text will explain that the requirements may include those relevant to environment protection or other socio-economic policies of the enacting State.

<sup>65</sup> The accompanying Guide text will note the importance of ensuring that the description is sufficiently precise (A/CN.9/690, para. 125).

<sup>66</sup> The accompanying Guide text will explain that the relevant technical and quality characteristics or the performance characteristics may also cover characteristics relevant to environment protection or other socio-economic policies of the enacting State.

<sup>67</sup> The accompanying Guide text will explain that a brand name should be called out in a solicitation only where absolutely necessary, and if a brand name is called out, the solicitation should specify the salient features of the subject matter being sought, and should state specifically that the brand name item “or equivalent” may be offered.

<sup>68</sup> Amended pursuant to A/CN.9/690, para. 124.

subject matter,<sup>69</sup> the terms of payment and of guarantees in respect of the subject matter of the procurement;

(c) Where relevant in procurement conducted in accordance with articles [41, 43 and 44], experience, reliability and professional and managerial competence of the supplier or contractor and of the personnel to be involved in providing the subject matter of the procurement.

(3) All non-price evaluation criteria shall, to the extent practicable, be objective, quantifiable and expressed in monetary terms.<sup>70</sup>

(4) In addition to the criteria set out in paragraph (2), the evaluation criteria may include:

(a) Any criteria that the procurement regulations or other provisions of law of this State authorize or require to be taken into account (subject to approval by ... (the enacting State designates an organ to issue the approval));

(b) A margin of preference for the benefit of domestic suppliers or contractors or domestically produced goods, if authorized or required by the procurement regulations or other provisions of law of this State<sup>71</sup> [(and subject to approval by ... (the enacting State designates an organ to issue the approval))].<sup>72</sup> The margin of preference shall be calculated in accordance with the procurement regulations.<sup>73</sup>

(5) The procuring entity shall set out in the solicitation documents:<sup>74</sup>

(a) Whether the successful submission will be ascertained on the basis of price or of price and other criteria;<sup>75</sup>

(b) All evaluation criteria established pursuant to this article, including the price and any margin of preference;<sup>76</sup>

<sup>69</sup> The accompanying Guide text will explain that this paragraph allows the procuring entity to include characteristics such as the environmental character of the production line. More generic socio-economic policy considerations are addressed in articles 8, 9 and 10 and paragraph (4) of this article.

<sup>70</sup> The accompanying Guide text will explain that expressing all non-price evaluation criteria in monetary terms in the request for proposals with dialogue proceedings (article 43 of the current draft) would not be practicable.

<sup>71</sup> Aligned with the relevant wording in the definition "Socio-economic policies" (A/CN.9/690, para. 106. See, also, footnotes 24-27 above). See however the immediately following footnote.

<sup>72</sup> The Working Group is invited to consider whether the words in square brackets should be retained. It may wish to note a close link of these provisions with the definition "Socio-economic policies" where these words do not appear.

<sup>73</sup> The accompanying Guide text will cross-refer to the article regulating the documentary record of procurement proceeding that require putting on the record the relevant information on the use of a margin of preference in the given procurement.

<sup>74</sup> The accompanying Guide text will cross-refer to the corresponding provisions in the articles regulating the contents of solicitation documents in the context of each procurement method.

<sup>75</sup> The accompanying Guide text will explain that the solicitation documents must make it clear whether the selection will be on the basis of the lowest priced submission or the most advantageous submission, as appropriate.

<sup>76</sup> The phrase "price subject to any margin of preference" was replaced with "price and any margin of preference" in this and the following subparagraphs.

(c) Where any criteria other than price are to be used in the evaluation procedure, the relative weights of all evaluation criteria, including price and any margin of preference, except where the procurement is conducted under article [43], in which case the procuring entity shall list all evaluation criteria in descending order of importance;<sup>77</sup>

(d) The manner of application of the criteria in the evaluation procedure.

(6) In evaluating submissions and determining the successful submission, the procuring entity shall use only those criteria and procedures that have been set out in the solicitation documents, and shall apply those criteria and procedures in the manner that has been disclosed in those solicitation documents. No criterion or procedure shall be used that has not been set out in accordance with this provision.

#### **Article 12. Rules concerning estimation of the value of procurement<sup>78</sup>**

(1) A procuring entity shall neither divide its procurement nor use a particular valuation method for estimating the value of procurement so as to limit competition among suppliers or contractors or otherwise avoid obligations under this Law.

(2) In estimating the value of procurement, the procuring entity shall include the estimated maximum total value of the procurement over its entire duration, whether awarded to one or more suppliers or contractors, taking into account all forms of remuneration.<sup>79, 80</sup>

<sup>77</sup> The accompanying Guide text will explain that this provision is intended to ensure full transparency, so that suppliers will be able to see how their submissions will be evaluated. It will also explain that a basket of non-price criteria will normally include some quantifiable and objective criteria (such as maintenance costs) and some subjective elements (the relative value that the procuring entity places on speedy delivery or green production lines, for example), amalgamated into an overall quality ranking. Thus for procurement not involving negotiations, the procuring entity has to disclose both how the non-price basket factors will weigh, and how the basket will weigh against price. The accompanying Guide text will also explain the importance of setting out the appropriate level of detail of the evaluation criteria, and will cross-refer to the provisions of article 43 that require listing the evaluation criteria in descending order of importance in competitive dialogue proceedings where it is often not possible to establish the relative weight of evaluation criteria at the outset of the procurement. It will also discuss how a margin of preference is generally applied in practice, and will examine the merits and demerits of the possible alternative approaches.

<sup>78</sup> The accompanying Guide text will explain that the provisions of the article are in particular relevant in the context of low-value procurement (see articles 21 and 29 bis (4) of the current draft), restricted tendering and request for quotations proceedings.

<sup>79</sup> The accompanying Guide text will explain that in procurement that provides for the possibility of option clauses, the estimated value under the article will refer to the estimated maximum total value of the procurement, inclusive of optional purchases, as this is regulated in the respective provisions of the WTO GPA (article II.2 and 3 of the 1994 version and article II.6 of the 2006 version).

<sup>80</sup> The accompanying Guide text will explain that estimates are to be used primarily for internal purposes of the procuring entity (A/CN.9/690, para. 127). The intersessional consultations concluded that prohibiting revealing such estimates to suppliers in all cases, as suggested in the second part of paragraph 127 of A/CN.9/690, would be unjustifiable.

**Article 13. Rules concerning the language of documents**

- (1) The prequalification documents, if any, and the solicitation documents shall be formulated in ... (the enacting State specifies its official language or languages) (and in a language customarily used in international trade unless decided otherwise by the procuring entity in a domestic procurement).
- (2) Applications to pre-qualify, if any, and submissions may be formulated and presented in the language of the prequalification documents, if any, and solicitation documents, respectively, or in any other language permitted by those documents.

**text of the Model Law, submitted to the Working Group on**  
**Procurement at its nineteenth session**

**ADDENDUM**

This note sets out a proposal for articles 13 bis-23 bis of chapter I (General provisions).

The Secretariat's comments are set out in the accompanying footnotes.

**CHAPTER I. GENERAL PROVISIONS**  
*(continued)*

**Article 13 bis. Rules concerning the manner, place and deadline  
for presenting applications to pre-qualify or submissions<sup>1</sup>**

(1) The manner, place and deadline for presenting applications to pre-qualify shall be set out in the invitation to pre-qualify and the pre-qualification documents. The manner, place and deadline for presenting submissions shall be set out in the solicitation documents.

(2) The deadlines for presenting applications to pre-qualify or submissions shall be expressed as a specific date and time and shall allow sufficient time for suppliers or contractors to prepare and present their applications or submissions, taking into account the reasonable needs of the procuring entity.

(3) If the procuring entity issues a clarification or modification of the pre-qualification or solicitation documents, it shall, prior to the deadline for presenting applications to pre-qualify or submissions, extend the deadline if necessary or as required under article [14 (3)] of this Law, in order<sup>2</sup> to afford suppliers or contractors sufficient time to take the clarification or modification into account in their applications or submissions.<sup>3</sup>

(4) The procuring entity may, in its absolute discretion, prior to the deadline for presenting applications to pre-qualify or submissions, extend the deadline if it is not

---

<sup>1</sup> The accompanying Guide text will state that: (i) the mechanism for presenting submissions must be reasonably accessible to suppliers; (ii) the procurement regulations will specify a minimum period for presenting submissions for each procurement method (reference in this regard may be made to the provisions of article XI.2 of the 1994 version, and article XI.3 of the 2006 version, of GPA, for open procedures that requires the period to be not less than 40 days); (iii) such a period must be sufficiently long in international and complex procurement to allow suppliers reasonable time to prepare their submissions; and (iv) failures in electronic presentation of submissions and the allocation of risks are to be addressed in procurement regulations or other appropriate forum (A/CN.9/690, para. 129).

<sup>2</sup> Amended further to introduction of new article 14 (3).

<sup>3</sup> The accompanying Guide text will explain that this provision also intends to cover any new suppliers that may decide to join as a result of amendments made.

possible for one or more suppliers or contractors to present their applications or submissions by the deadline owing to any circumstance beyond their control.

(5) Notice of any extension of the deadline shall be given promptly to each supplier or contractor to which the procuring entity provided the pre-qualification or solicitation documents.<sup>4</sup>

#### **Article 14. Clarifications and modifications of solicitation documents<sup>5</sup>**

(1) A supplier or contractor may request a clarification of the solicitation documents from the procuring entity. The procuring entity shall respond to any request by a supplier or contractor for clarification of the solicitation documents that is received by the procuring entity within a reasonable time prior to the deadline for presenting submissions. The procuring entity shall respond within a reasonable time so as to enable the supplier or contractor to make a timely presentation of submissions and shall, without identifying the source of the request, communicate the clarification to all suppliers or contractors to which the procuring entity has provided the solicitation documents.

(2) At any time prior to the deadline for presenting submissions, the procuring entity may, for any reason, whether on its own initiative or as a result of a request for clarification by a supplier or contractor, modify the solicitation documents by issuing an addendum. The addendum shall be communicated promptly to all suppliers or contractors to which the procuring entity has provided the solicitation documents and shall be binding on those suppliers or contractors.

(3) If as a result of a clarification or modification issued in accordance with this article, the information published when first soliciting the participation of suppliers or contractors in the procurement proceedings becomes materially inaccurate, the procuring entity shall cause the amended information to be published in the same manner and place in which the original information was published, and shall extend the deadline for presentation of submissions as provided for in article [13 bis (3)] of this Law.<sup>6</sup>

(4) If the procuring entity convenes a meeting of suppliers or contractors, it shall prepare minutes of the meeting containing the requests submitted at the meeting for clarification of the solicitation documents, and its responses to those requests, without identifying the sources of the requests. The minutes shall be provided promptly to all suppliers or contractors to which the procuring entity provided the solicitation documents, so as to enable those suppliers or contractors to take the minutes into account in preparing their submissions.

---

<sup>4</sup> The accompanying Guide text will cross-refer to the provisions on material changes to those documents in article 14 (3).

<sup>5</sup> The accompanying Guide text will make it clear that any obligation of the procuring entity to debrief individual suppliers or contractors would arise to the extent that the identities of the suppliers or contractors are known to the procuring entity.

<sup>6</sup> New paragraph inserted pursuant to A/CN.9/690, paras. 98 and 130.

**Article 15. Tender securities<sup>7</sup>**

(1) When the procuring entity requires suppliers or contractors presenting submissions to provide a tender security:

(a) The requirement shall apply to all suppliers or contractors;

(b) The solicitation documents may stipulate that the issuer of the tender security and the confirmer, if any, of the tender security, as well as the form and terms of the tender security, must be acceptable to the procuring entity. In cases of domestic procurement, the solicitation documents may in addition stipulate that the tender security shall be issued by an issuer in this State;

(c) Notwithstanding the provisions of subparagraph (b) of this paragraph, a tender security shall not be rejected by the procuring entity on the grounds that the tender security was not issued by an issuer in this State if the tender security and the issuer otherwise conform to requirements set out in the solicitation documents, unless:

(i) The acceptance by the procuring entity of such a tender security would be in violation of a law of this State; or

(ii) The procuring entity in cases of domestic procurement requires a tender security to be issued by an issuer in this State;

(d) Prior to presenting a submission, a supplier or contractor may request the procuring entity to confirm the acceptability of a proposed issuer of a tender security, or of a proposed confirmer, if required; the procuring entity shall respond promptly to such a request;

(e) Confirmation of the acceptability of a proposed issuer or of any proposed confirmer does not preclude the procuring entity from rejecting the tender security on the ground that the issuer or the confirmer, as the case may be, has become insolvent or otherwise lacks creditworthiness;

(f) The procuring entity shall specify in the solicitation documents any requirements with respect to the issuer and the nature, form, amount and other principal terms and conditions of the required tender security; any requirement that refers directly or indirectly to conduct by the supplier or contractor presenting the submission may relate only to:

(i) Withdrawal or modification of the submission after the deadline for presenting submissions, or before the deadline if so stipulated in the solicitation documents;

---

<sup>7</sup> The accompanying Guide text will refer to the use in some jurisdictions of alternatives to a tender security, such as a bid securing declaration that the procuring entity may, in appropriate cases, require all suppliers or contractors to sign in lieu of requiring them to furnish tender securities. Under this type of declaration, the supplier or contractor agrees to submit to sanctions, such as disqualification from subsequent procurement, for the contingencies that normally are secured by a tender security. Sanctions, however, should not include debarment since the latter should not be concerned with commercial failures. These alternatives aim at promoting more competition in procurement, by increasing participation in particular of small- and medium-sized enterprises that otherwise might be prevented from participation because of formalities and expenses involved in connection with presentation of a tender security.

- (ii) Failure to sign the procurement contract if required by the procuring entity to do so; and
  - (iii) Failure to provide a required security for the performance of the contract after the successful submission has been accepted or to comply with any other condition precedent to signing the procurement contract specified in the solicitation documents.
- (2) The procuring entity shall make no claim to the amount of the tender security, and shall promptly return, or procure the return of, the security document after whichever of the following that occurs earliest:
- (a) The expiry of the tender security;
  - (b) The entry into force of a procurement contract and the provision of a security for the performance of the contract, if such a security is required by the solicitation documents;
  - (c) The cancellation of the procurement;<sup>8</sup>
  - (d) The withdrawal of the submission prior to the deadline for presenting submissions, unless the solicitation documents stipulate that no such withdrawal is permitted.

#### **Article 16. Pre-qualification proceedings**

- (1) The procuring entity may engage in pre-qualification proceedings with a view to identifying, prior to the solicitation, suppliers and contractors that are qualified. The provisions of article [9] of this Law shall apply to pre-qualification proceedings.
- (2) If the procuring entity engages in pre-qualification proceedings, it shall cause an invitation to pre-qualify to be published in ... (the enacting State specifies the official gazette or other official publication in which the invitation to pre-qualify is to be published).<sup>9</sup> Unless decided otherwise by the procuring entity in domestic procurement, the invitation to pre-qualify shall also be published, in a language customarily used in international trade, in a newspaper of wide international circulation or in a relevant trade publication or technical or professional journal of wide international circulation.

---

<sup>8</sup> Reference to “termination of the procurement proceedings without the entry into force of a procurement contract” was replaced with a reference to “the cancellation of the procurement” as a result of the amendments made to article 17 (1) of this draft.

<sup>9</sup> The accompanying Guide text to these and similar provisions throughout the Model Law will note that reference to the official gazette shall be interpreted according to the principle of the functional equivalence between paper- and non-paper means and media of information and thus may encompass any non-paper official gazette used in an enacting State or group of States, such as in the European Union. The Guide will cross-refer in this respect to the relevant discussion that will accompany article 5 on publication of legal texts.

- (3) The invitation to pre-qualify shall include the following information:
- (a) The name and address<sup>10</sup> of the procuring entity;
  - (b) A summary of the principal required terms and conditions of the procurement contract or the framework agreement to be entered into as a result of the procurement proceedings, including the nature and quantity, and place of delivery of the goods to be supplied, the nature and location of the construction to be effected, or the nature of the services and the location where they are to be provided, as well as the desired or required time for the supply of the goods or for the completion of the construction, or the timetable for the provision of the services;
  - (c) The criteria and procedures to be used for ascertaining the qualifications of suppliers or contractors, in conformity with article [9] of this Law;
  - (d) A declaration to be made in accordance with article [8] of this Law;
  - (e) The means of obtaining the pre-qualification documents and the place where they may be obtained;
  - (f) The price, if any, charged by the procuring entity for the pre-qualification documents and, subsequent to pre-qualification, for the solicitation documents;
  - (g) If the price is charged, the means of payment for the pre-qualification documents and, subsequent to pre-qualification, for the solicitation documents, and the currency of payment;<sup>11</sup>
  - (h) The language or languages in which the pre-qualification documents and, subsequent to pre-qualification, the solicitation documents are available;<sup>12</sup>
  - (i) The manner, place and deadline for presenting applications to pre-qualify and, if already known, the manner, place and deadline for presenting submissions, in conformity with article [13 bis] of this Law.
- (4) The procuring entity shall provide a set of pre-qualification documents to each supplier or contractor that requests them in accordance with the invitation to pre-qualify and that pays the price, if any, charged for those documents. The price that the procuring entity may charge for the pre-qualification documents shall reflect only the cost of providing them to suppliers or contractors.<sup>13</sup>

<sup>10</sup> The accompanying Guide text to this and other provisions where reference to “address” is found will explain that the term intends to refer to the physical registered location as well as any other pertinent contact details (telephone numbers, e-mail address, etc. as appropriate), and that this term should be interpreted so consistently notwithstanding whether reference is to the address of the procuring entity or the address of a supplier or contractor.

<sup>11</sup> Amended pursuant to A/CN.9/690, para. 22 (b). The accompanying Guide text will note that the procuring entity may decide not to include reference to the currency of payment in domestic procurement, if it would be unnecessary in the circumstances.

<sup>12</sup> Amended pursuant to A/CN.9/690, para. 22 (b). The accompanying Guide text will note that the procuring entity may decide not to include this information in domestic procurement, if it would be unnecessary in the circumstances, and will add that an indication of the language or languages may still be important in some multilingual countries.

<sup>13</sup> The accompanying Guide text to this and similar provisions throughout the Model Law will make it clear that development costs (including consultancy fees and advertising costs) are not to be recovered through this provision and that the costs should be limited to the minimal charges of providing the documents (and printing them, where appropriate).

- (5) The pre-qualification documents shall include the following information:
- (a) Instructions for preparing and presenting pre-qualification applications;
  - (b) Any documentary evidence or other information that must be presented by suppliers or contractors to demonstrate their qualifications;
  - (c) The name, functional title and address of one or more officers or employees of the procuring entity who are authorized to communicate directly with and to receive communications directly from suppliers or contractors in connection with the pre-qualification proceedings, without the intervention of an intermediary;
  - (d) References to this Law, the procurement regulations and other laws and regulations directly pertinent to the pre-qualification proceedings and the place<sup>14</sup> where these laws and regulations may be found;
  - (e) Any other requirements that may be established by the procuring entity in conformity with this Law and the procurement regulations relating to the preparation and presentation of applications to pre-qualify and to the pre-qualification proceedings.
- (6) The procuring entity shall respond to any request by a supplier or contractor for clarification of the pre-qualification documents that is received by the procuring entity within a reasonable time prior to the deadline for presenting applications to pre-qualify. The procuring entity shall respond within a reasonable time so as to enable the supplier or contractor to make a timely presentation of its application to pre-qualify. The response to any request that might reasonably be expected to be of interest to other suppliers or contractors shall, without identifying the source of the request, be communicated to all suppliers or contractors to which the procuring entity has provided the pre-qualification documents.
- (7) The procuring entity shall take a decision with respect to the qualifications of each supplier or contractor presenting an application to pre-qualify. In reaching that decision, the procuring entity shall apply only the criteria and procedures set out in the invitation to pre-qualify and in the pre-qualification documents.
- (8) Only suppliers or contractors that have been pre-qualified are entitled to participate further in the procurement proceedings.
- (9) The procuring entity shall promptly notify each supplier or contractor presenting an application to pre-qualify whether or not it has been pre-qualified. It shall also make available to any member of the public, upon request, the names of all suppliers or contractors that have been pre-qualified.<sup>15</sup>
- (10) The procuring entity shall promptly communicate to each supplier or contractor that has not been pre-qualified the reasons therefor.

---

<sup>14</sup> The accompanying Guide text will explain that the place refers not to the physical location but rather to an official publication, portal, etc. where authoritative texts of laws and regulations of the enacting State are made available to the public and systematically maintained.

<sup>15</sup> The accompanying Guide text will cross-refer to the article on confidentiality that contains exceptions to the public disclosure.

**Article 17. Cancellation of the procurement<sup>16</sup>**

(1) The procuring entity may cancel the procurement at any time prior to the acceptance of the successful submission and, after the successful submission was accepted, in the circumstances referred to in article [20 (8)] of this Law.<sup>17</sup> The procuring entity shall not open any tenders or proposals after taking a decision to cancel the procurement.

(2) The decision of the procuring entity to cancel the procurement and reasons for the decision shall be included in the record of the procurement proceedings and<sup>18</sup> promptly communicated to any supplier or contractor that presented a submission. The procuring entity shall in addition promptly publish a notice of the cancellation of the procurement in the same manner and place in which the original information regarding the procurement proceedings was published, and return any tenders or proposals that remain unopened at the time of the decision to the suppliers or contractors that presented them.

(3) Unless the cancellation of the procurement was a consequence of irresponsible or dilatory conduct on the part of the procuring entity, the procuring entity shall incur no liability, solely by virtue of its invoking paragraph (1) of this article, towards suppliers or contractors that have presented submissions.<sup>19</sup>

**Article 18. Rejection of abnormally low submissions**

(1) The procuring entity may reject a submission if the procuring entity has determined that the price in combination with other constituent elements of the submission is abnormally low in relation to the subject matter of the procurement and raises concerns with the procuring entity as to the ability of the supplier or contractor that presented that submission to perform the procurement contract, provided that the procuring entity has taken the following actions:

(a) The procuring entity has requested in writing from the supplier or contractor details of the submission that gives rise to concerns as to the ability of the supplier or contractor to perform the procurement contract;

(b) The procuring entity has taken account of any information provided by the supplier or contractor following this request, and the information included in the

---

<sup>16</sup> The accompanying Guide text will explain that the purpose of the article is to draw the right balance between the discretion of the procuring entity to cancel the procurement at any stage of the procurement process covered by the Model Law and the need to accord appropriate protection to the market against irresponsible acts by the procuring entities, such as the abuse of discretion to cancel procurements to investigate market conditions. It will also state that, although the article does not address issues of damages and other remedies, it has implications for the review provisions in chapter VIII of the Model Law.

<sup>17</sup> Amended pursuant to A/CN.9/690, para. 133.

<sup>18</sup> The reference to the record of procurement proceedings was retained without square brackets pursuant to A/CN.9/690, para. 134.

<sup>19</sup> The accompanying Guide text will explain that the opening phrase also covers unforeseeable events and that liability will arise in exceptional circumstances. It will also explain that the procuring entity may face liability for cancelling the procurement under other branches of law and that, although suppliers or contractors present their submissions at their own risk, and bear the related expenses, cancellation may give rise to liability towards suppliers or contractors whose submissions have been opened.

submission, but continues, on the basis of all such information, to hold concerns; and

(c) The procuring entity has recorded the concerns and its reasons for holding them, and all communications with the supplier or contractor under this article, in the record of the procurement proceedings.

(2) The decision of the procuring entity to reject a submission in accordance with this article and reasons for the decision shall be included in the record of the procurement proceedings and promptly communicated to the supplier or contractor concerned.<sup>20</sup>

**Article 19. Exclusion of a supplier or contractor from the procurement proceedings on the grounds of inducements from the supplier or contractor, an unfair competitive advantage or conflicts of interest<sup>21</sup>**

(1) A procuring entity shall exclude a supplier or contractor from the procurement proceedings if:

(a) The supplier or contractor offers, gives or agrees to give, directly or indirectly, to any current or former officer or employee of the procuring entity or other governmental authority a gratuity in any form, an offer of employment or any other thing of service or value, so as to influence an act or decision of, or procedure followed by, the procuring entity in connection with the procurement proceedings; or

---

<sup>20</sup> The reference to the record of procurement proceedings was retained without square brackets pursuant to A/CN.9/690, para. 135.

<sup>21</sup> The accompanying Guide text will explain that the provisions of the article are subject to other branches of law of an enacting State where the issues of anti-corruption are regulated and are also without prejudice to any other sanctions, such as debarment, that may be applied to the supplier or contractor. The Guide in this context will cross-refer to article 3 of the Model Law and any available international standards against corrupt practices, in which context the Guide will explain that such standards may evolve, and will encourage enacting States to consider the relevant standards applicable at the time of enactment of the Model Law. The Guide will also emphasize that the article was intended to be consistent with those international standards and to outlaw any corrupt practices regardless of their form and how they were defined (A/CN.9/690, para. 136). While emphasizing the need to cross-refer to other branches of law in order to avoid unnecessary confusion, inconsistencies and incorrect perceptions about anti-corruption policies of an enacting State, the Guide will caution that such cross-referencing should not inadvertently convey the erroneous meaning that a criminal conviction would be a pre-requisite for exclusion of the supplier or contractor under this article. The Guide will also address: (i) applicable standards (e.g. consultants involved in drafting the solicitation documents should be prohibited from participating in the procurement proceedings where those documents are used); (ii) difficulties with establishing the fact of corruption as opposed to a bribe as the former might consist of a chain of actions over time rather than a single action; (iii) that combining provisions on conflicts of interest (which refer to a situation) and corruption (which is a wrongdoing) may lead to confusion, and should be avoided; and (iv) how the situation of a subsidiary would be treated.

(b) The supplier or contractor has an unfair competitive advantage or a conflict of interest in violation of applicable standards.<sup>22</sup>

(2) Any decision of the procuring entity to exclude a supplier or contractor from the procurement proceedings under this article and the reasons therefor shall be included in the record of the procurement proceedings and promptly communicated to the supplier or contractor concerned.<sup>23</sup>

#### **Article 20. Acceptance of the successful submission and entry into force of the procurement contract**

(1) The procuring entity shall accept the successful submission unless:

(a) The procurement is cancelled in accordance with article [17 (1)] of this Law; or

(b) The supplier or contractor presenting the successful submission is disqualified in accordance with article [9] of this Law; or

(c) The supplier or contractor presenting the successful submission is excluded from the procurement proceedings on the grounds specified in article [19] of this Law; or

(d) The submission found successful at the end of evaluation is rejected as abnormally low under article [18] of this Law.<sup>24</sup>

(2) The procuring entity shall promptly notify each supplier or contractor that presented submissions<sup>25</sup> of its decision to accept the successful submission at the end of the standstill period. The notice shall contain, at a minimum, the following information:

(a) The name and address of the supplier or contractor presenting the successful submission;

(b) [The contract price]<sup>26</sup> or, where the successful submission was ascertained on the basis of price and other criteria, [the contract price]<sup>27</sup> and a

---

<sup>22</sup> The accompanying Guide text will explain the reference to standards and stress that those standards evolve over time. The Guide will also address issues of unjustified rejection and the need for the establishment of a process including a dialogue between the procuring entity and an affected supplier or contractor to discuss potential conflicts of interest, drawing on the provisions of article 18 regulating procedures for investigating abnormally low submissions.

<sup>23</sup> The reference to the record of procurement proceedings was retained without square brackets pursuant to A/CN.9/690, para. 137.

<sup>24</sup> Cross-references to articles 18 and 19 were added. The paragraph was also aligned with article 51 of the current draft.

<sup>25</sup> The phrase “that presented submissions” replaced the phrase “whose submission was examined” as more accurate especially in the procurement where no separate examination of submissions may take place, e.g. in auctions (see chapter VI of the current draft).

<sup>26</sup> See the footnote to the same term in article 21 below.

<sup>27</sup> Ibid.

summary of other characteristics and relative advantages of the successful submission;<sup>28</sup> and

(c) The duration of the standstill period as set out in the solicitation documents, which shall be at least ... working days (the enacting State specifies the period of time)<sup>29</sup> and shall run from the date of the dispatch of the notice under this paragraph to all suppliers or contractors whose submissions were examined.

(3) Paragraph (2) of this article shall not apply to awards of procurement contracts:

(a) Under a framework agreement procedure without second stage competition;<sup>30</sup>

(b) Where the contract price is less than ... (the enacting State specifies a threshold);<sup>31</sup> or

(c) Where the procuring entity determines that urgent public interest considerations require the procurement to proceed without a standstill period.<sup>32</sup> The decision of the procuring entity that such urgent considerations exist and the reasons

<sup>28</sup> The accompanying Guide text will cross-refer to the discussion in the Guide on debriefing of unsuccessful suppliers or contractors. The Guide text on debriefing will explain reasons for addressing the issues of debriefing only in the Guide but not in the Model Law, in particular that debriefing procedures vary significantly not only from jurisdiction to jurisdiction but also from procurement to procurement, and that provisions on debriefing are not easily enforceable (A/CN.9/687, para. 93).

<sup>29</sup> Amended pursuant to A/CN.9/690, paras. 87 and 138. The Guide will explain the considerations that should be taken into account in establishing the minimum duration of the standstill period in the Law, including the impact that the duration of the standstill period would have on overall objectives of the revised Model Law as regards transparency, accountability, efficiency and equitable treatment of suppliers or contractors. Although the impact of a lengthy standstill period on the costs would be considered and factored in by suppliers or contractors in their submissions and in deciding whether to participate, the Guide will note that the period should be sufficiently long to enable any challenge to the proceedings to be filed. The Guide would also draw attention of the enacting State that the period of time of a short duration should be established in working days; in other cases, it may be established in calendar days (A/CN.9/690, para. 87).

<sup>30</sup> Amended to align with the respective definition in article 2.

<sup>31</sup> The accompanying Guide text will draw the attention of an enacting State to the thresholds found in other provisions of the Model Law referring to low-value procurement, such as those justifying an exemption from the requirement of public notice of the procurement contract award (article 21 (2) of the current draft), an exemption from the requirement of international solicitation (article 29 bis (4) of the current draft) and recourse to request for quotations proceedings (article 26 (2) of the current draft). The threshold in this provision may be aligned with them. The Working Group's attention is drawn in this regard to the provisions of article 26 (2) of the current draft where it is envisaged that the threshold amount will be set out in the procurement regulations rather than in the Model Law itself. The Working Group may wish to decide that the same approach should be followed in this provision and in article 21 (2) of the current draft, in particular in the light of the fluctuating value of currencies (inflation, etc.).

<sup>32</sup> In the light of the similar provisions found in chapter VIII in the context of the suspension of the procurement proceedings (article 65), the Guide will elaborate on the appropriate considerations, which may differ, to justify an exemption under this provision and under article 65.

for the decision shall be included in the record of the procurement proceedings<sup>33</sup> [and shall be conclusive with respect to all levels of review under chapter VIII of this Law except for judicial review].<sup>34</sup>

(4) Upon expiry of the standstill period, or where there is none, promptly after the successful submission was ascertained, the procuring entity shall dispatch the notice of acceptance of the successful submission to the supplier or contractor that presented that submission, unless a competent court or ... (the enacting State designates the relevant organ) orders otherwise.

(5) Unless a written procurement contract and/or approval by a higher authority is/are required, a procurement contract in accordance with the terms and conditions of the successful submission enters into force when the notice of acceptance is dispatched to the supplier or contractor concerned, provided that the notice is dispatched while the submission is still in effect.

(6) Where the solicitation documents require the supplier or contractor whose submission has been accepted to sign a written procurement contract conforming to the terms and conditions of the accepted submission:

(a) The procuring entity and the supplier or contractor concerned shall sign the procurement contract within a reasonable period of time after the notice of acceptance is dispatched to the supplier or contractor concerned;

(b) Unless the solicitation documents stipulate that the procurement contract is subject to approval by a higher authority, the procurement contract enters into force when the contract is signed by the supplier or contractor concerned and by the procuring entity. Between the time when the notice of acceptance is dispatched to the supplier or contractor concerned and the entry into force of the procurement contract, neither the procuring entity nor that supplier or contractor shall take any action that interferes with the entry into force of the procurement contract or with its performance.

(7) Where the solicitation documents stipulate that the procurement contract is subject to approval by a higher authority, the procurement contract shall not enter into force before the approval is given. The solicitation documents shall specify the estimated period of time following dispatch of the notice of acceptance that will be required to obtain the approval. A failure to obtain the approval within the time specified in the solicitation documents shall not extend the period of effectiveness of submissions specified in the solicitation documents or the period of effectiveness of the tender security required under article [15] of this Law.

(8) If the supplier or contractor whose submission has been accepted fails to sign any written procurement contract as required, or fails to provide any required security for the performance of the contract, the procuring entity may either cancel the procurement, or may decide to select a successful submission, in accordance with the criteria and procedures set out in this Law and in the solicitation

---

<sup>33</sup> The reference to the record of procurement proceedings was retained without square brackets pursuant to A/CN.9/690, para 138.

<sup>34</sup> The Working Group is invited to reconsider this provision in the light of the broad powers given to the administrative review body under chapter VIII of the Model Law. It may wish to note that similar provisions are to be considered in the context of article 65 of the current draft.

documents, from among the remaining submissions still in effect.<sup>35</sup> In the latter case, the provisions of this article shall apply *mutatis mutandis* to such submission.

(9) Notices under this article are dispatched when they are promptly and properly addressed or otherwise directed and transmitted to the supplier or contractor, or conveyed to an appropriate authority for transmission to the supplier or contractor, by any reliable means specified in accordance with article [7] of this Law.

(10) Upon the entry into force of the procurement contract and, if required, the provision by the supplier or contractor of a security for the performance of the contract, notice of the procurement contract shall be given promptly to other suppliers or contractors, specifying the name and address of the supplier or contractor that has entered into the contract [and the contract price].<sup>36</sup>

#### **Article 21. Public notice of awards of procurement contract and framework agreement**

(1) Upon the entry into force of the procurement contract or conclusion of a framework agreement, the procuring entity shall promptly publish notice of the award of the procurement contract or the framework agreement, specifying the name(s) of the supplier(s) or contractor(s) to whom the procurement contract or the framework agreement was awarded [and the contract price].<sup>37</sup>

(2) Paragraph (1) is not applicable to awards where the contract price is less than ... (the enacting State specifies a threshold).<sup>38</sup> The procuring entity shall publish a cumulative notice of such awards from time to time but at least once a year.

(3) The procurement regulations shall<sup>39</sup> provide for the manner of publication of the notices required by this article.

#### **Article 22. Confidentiality**

(1) In its communications with suppliers or contractors or the public, the procuring entity shall not disclose any information [if its non-disclosure is necessary

<sup>35</sup> The provisions have been revised to align them with the similar wording appearing in article 37 (7) of the current draft.

<sup>36</sup> See the footnote to the same term in article 21 below.

<sup>37</sup> Reference to the contract price was inserted as a result of the intersessional consultations and in the light of provisions in articles 20 (2) (b) and (10) and 23 (3) of the current draft. The Working Group may wish to recall in this context that the arguments against disclosing the winning price were put forward to the Working Group in the context of ERAs (to prevent collusion in subsequent ERAs, in particular). If the Working Group finds these arguments still persuasive, then restrictions on the public disclosure of the winning price should be consistently imposed in articles 20 (2) (b) and (10) and 23 (3).

<sup>38</sup> See the relevant footnote to the provisions of article 20 (3) (b) of the current draft. The accompanying Guide text will note that there is no exemption applicable to the conclusion of a framework agreement.

<sup>39</sup> Amended pursuant to A/CN.9/690, para. 139. The accompanying Guide text will suggest minimum standards for publication of this type of information.

for the protection of essential security interests of the State<sup>40</sup> or] if its disclosure would be contrary to law, would impede law enforcement, would prejudice the legitimate commercial interests of the suppliers or contractors or would impede fair competition,<sup>41</sup> unless disclosure of that information is ordered by the competent court or ... (the enacting State designates the relevant organ) and in such case, subject to the conditions of such an order.

(2) Other than when providing or publishing information pursuant to<sup>42</sup> articles [20 (2) and (10), 21, 23 and 36] of this Law, the procuring entity shall treat applications to pre-qualify and submissions in such a manner as to avoid the disclosure of their contents to competing suppliers or contractors or to any other person not authorized to have access to this type of information.<sup>43</sup>

(3) Any discussions, communications,<sup>44</sup> negotiations and dialogue between the procuring entity and a supplier or contractor pursuant to articles [42 (3) and 43 to 46] of this Law shall be confidential. Unless required by law or ordered by the competent court or ... (the enacting State designates the relevant organ) or permitted in the solicitation documents, no party to any discussions, communications, negotiations or dialogue shall disclose to any other person any technical, price or other information relating to these discussions, communications,<sup>45</sup> negotiations or dialogue without the consent of the other party.

(4) In procurement involving classified information, the procuring entity may decide or may be required to:

- (a) Withhold classified information from public disclosure;
- (b) Impose on suppliers or contractors requirements aimed at protecting classified information; and
- (c) Demand that suppliers or contractors ensure compliance with requirements aimed at protecting classified information by their subcontractors.

<sup>40</sup> The phrase in square brackets replaces the earlier references to “essential national security or essential national defence” and to the “public interest”. Both were found problematic in the Working Group (A/CN.9/690, paras. 140 and 141) as well as during the intersessional consultations. The current wording draws on the wording found in article XXIII.1 of the 1994 version of the GPA and article III.1 of the 2006 version of the GPA. The accompanying Guide text will explain that the essential security interests of the State could relate “to procurement indispensable for national security or for national defence purposes” and “relating to the procurement of arms, ammunition, or war materials” (the GPA wording) but not only (e.g. in the health sector, procurement involving medical research experiment or procurement of vaccines during pandemics). Cross-reference in this regard will be made to the discussion in the Guide applicable to the classified information (see the accompanying footnote to the definition of “procurement involving classified information” in article 2).

<sup>41</sup> The accompanying Guide text will explain that the phrase “to impede fair competition” should be interpreted as encompassing the risks of hampering competition not only in the procurement proceedings in question but also in subsequent procurements (A/CN.9/668, para. 131).

<sup>42</sup> Amended pursuant to A/CN.9/690, para. 142.

<sup>43</sup> The Guide will explain the ambit of this reference as referring to any third party outside the procuring entity (including a member of a bid committee), other than any oversight, review or other competent body authorized to have access to information in question under applicable provisions of law of the enacting State.

<sup>44</sup> Amended pursuant to A/CN.9/690, para. 142.

<sup>45</sup> Ibid.

### Article 23. Documentary record of procurement proceedings

(1) The procuring entity shall maintain a record of the procurement proceedings that includes the following information:

- (a) A brief description of the subject matter of the procurement;
- (b) The names and addresses of suppliers or contractors that presented submissions, and the name(s) and address(es) of the supplier(s) or contractor(s) with whom the procurement contract is entered into and [the contract price]<sup>46</sup> (in the case of a framework agreement procedure, in addition the name(s) and address(es) of the supplier(s) or contractor(s) with whom the framework agreement is concluded);
- (c) A statement of the reasons and circumstances relied upon by the procuring entity for the decision as regards means of communication and any requirement of form;
- (d) In the procurement proceedings in which the procuring entity, in accordance with article [8] of this Law, limits participation of suppliers or contractors, a statement of the reasons and circumstances relied upon by the procuring entity for imposing the limitation;
- (e) If the procuring entity uses a method of procurement other than open tendering, a statement of the reasons and circumstances relied upon by the procuring entity for the use of such other method;
- (f) [deleted]<sup>47</sup>
- (g) In the case of procurement by means of an auction or involving an auction as a phase preceding the award of the procurement contract, a statement of the reasons and circumstances relied upon by the procuring entity for the use of the auction, information about the date and time of the opening and closing of the auction, and the reasons and circumstances on which the procuring entity relied to justify any rejection of bids presented during the auction;
- (h) If the procurement is cancelled pursuant to article [17 (1)] of this Law, a statement to that effect and the reasons and circumstances relied upon by the procuring entity for its decision to cancel the procurement;
- (i) [deleted]<sup>48</sup>

<sup>46</sup> To be considered with reference to the footnote to the term “contract price” in article 21 above, for which purpose it should be read together with paragraph (2) of this article.

<sup>47</sup> The deleted wording corresponds to articles 11 (1) (j) and 41 (2) of the 1994 Model Law. In the current draft, the procuring entity is required to include in the record the reasons and circumstances relied upon by the procuring entity for the use of any procurement method other than open tendering (article 25 (3) of the current draft). The Working Group has not so far discussed the need to justify in addition the reasons and circumstances relied upon by the procuring entity for the use of the specific procurement method under chapter V. The Secretariat’s understanding is that no such additional justification for the selection of a procurement method among those under chapter V would be needed.

<sup>48</sup> The text reading “If the procurement proceedings did not result in a procurement contract, a statement to that effect and of the reasons therefore” was deleted since the preceding subparagraph encompasses it in the light of the amendments made in article 17 (1).

- (j) If the procurement proceedings resulted in the award of a procurement contract in accordance with article [20 (8)] of this Law, a statement to that effect and of the reasons therefor;
- (k) A summary of any requests for clarification of the pre-qualification documents, if any, or solicitation documents, the responses thereto, as well as a summary of any modification of those documents;
- (l) Information relative to the qualifications, or lack thereof, of suppliers or contractors that presented applications to pre-qualify, if any, or submissions;
- (m) [The price],<sup>49</sup> or the basis for determining the price, and a summary of the other principal terms and conditions of each submission and of the procurement contract, where these are known to the procuring entity (in the case of a framework agreement procedure, in addition a summary of the principal terms and conditions of the framework agreement);
- (n) A summary of the evaluation<sup>50</sup> of submissions, including the application of any margin of preference pursuant to article [11 (4) (b)] of this Law;
- (o) If any socio-economic factors were considered in the procurement proceedings, information about such factors and the manner in which they were applied;
- (p) If the submission is rejected pursuant to article [18] of this Law or the supplier or contractor is excluded from the procurement proceedings pursuant to article [19] of this Law, a statement to that effect and the reasons and circumstances relied upon by the procuring entity for its decision;
- (q) If no standstill period was applied, a statement of the reasons and circumstances relied upon by the procuring entity for non-application of a standstill period in accordance with article [20 (3)] of this Law;
- (r) In the case of review in conjunction with the procurement proceedings under chapter VIII of this Law, a summary of the complaint and of the review proceedings and the decision<sup>51</sup> taken at each level of the review;
- (s) In procurement involving classified information, a statement of the reasons and circumstances relied upon by the procuring entity for measures and requirements taken for the protection of the classified information, including any exemptions from the provisions of this Law calling for public disclosure;
- (t) Other information required to be included in the record in accordance with the provisions of this Law or the procurement regulations.<sup>52</sup>

---

<sup>49</sup> To be considered with reference to the footnote to the term “contract price” in article 21 above, for which purpose it should be read together with paragraph (3) of this article.

<sup>50</sup> Amended pursuant to A/CN.9/690, para. 18.

<sup>51</sup> Amended pursuant to A/CN.9/690, para. 75.

(2) The portion of the record referred to in subparagraphs (a) to (f)<sup>53</sup> of paragraph (1) of this article shall, on request, be made available to any person after the successful submission has been accepted<sup>54</sup> or the procurement has been cancelled.<sup>55, 56</sup>

(3) Except as disclosed pursuant to article [36 (3)] of this Law, the portion of the record referred to in subparagraphs (g) to (p)<sup>57</sup> of paragraph (1) of this article shall, on request, be made available to suppliers or contractors that presented submissions<sup>58</sup> after the decision on acceptance of the successful submission or on cancellation of the procurement has become known to them.<sup>59, 60</sup> Disclosure of the portion of the record referred to in subparagraphs (k) to (n)<sup>61</sup> may be ordered at an earlier stage only by a competent court or ... (the enacting State designates the relevant organ).<sup>62</sup>

<sup>52</sup> The Secretariat included a “catch-all” provision in the end of the list, which should ensure that all significant decisions in the course of the procurement proceedings and reasons therefor would have to be put on the record. The accompanying Guide text will refer to the decisions to be recorded pursuant to the relevant provisions of the Model Law, such as those related to the choice of direct solicitation when the choice between open and direct solicitations exists, or the decision and reasons for limiting participation in the auctions and open framework agreements on the ground of technological constraints. In addition, it will also refer to information that may be required to be included in the record under the procurement regulations. See, in this regard, the issues raised in A/CN.9/WG.I/WP.68/Add.1, section H, as regards some information not listed in the 1994 Model Law which may be worth adding in the record.

<sup>53</sup> See the footnote to the term “contract price” in article 21 above.

<sup>54</sup> Amended pursuant to A/CN.9/690, para. 143.

<sup>55</sup> The phrase “the procurement has been cancelled” replaced the wording in the previous drafts “after procurement proceedings have been terminated without resulting in a procurement contract (in the case of a framework agreement procedure, after the procurement proceedings have been terminated without resulting in a framework agreement)”, in the light of the amendments made in article 17 (1) of the current draft.

<sup>56</sup> The accompanying Guide text will elaborate that this provision is without prejudice to paragraph (4) of this article that sets out in subparagraph (a) grounds that would allow the procuring entity exempt information from public disclosure and in subparagraph (b) information that cannot be publicly disclosed.

<sup>57</sup> See the footnote to the term “contract price” in article 21 above.

<sup>58</sup> The phrase “or applied for pre-qualification” was deleted here, to align the wording with the wording in article 20 (2) of the current draft that limits the pool of suppliers to those that presented submissions. The Secretariat’s understanding is that suppliers disqualified as a result of pre-qualification should not have access to information relevant to examination and evaluation of submissions. The reasons for their disqualification will be communicated to them in accordance with article 16 (10) and this should give them sufficient grounds for challenge under chapter VIII of the Model Law.

<sup>59</sup> The phrase “after the decision about acceptance of the successful submission has become known to them” replaced the earlier wording “after the successful submission has been accepted”, to allow effective review under article 20 (2) and the relevant provisions of chapter VIII of the Model Law.

<sup>60</sup> Reference to “decision about cancellation of the procurement” replaced the wording in the previous drafts “after procurement proceedings have been terminated without resulting in a procurement contract (in the case of a framework agreement procedure, after the procurement proceedings have been terminated without resulting in a framework agreement)”, in the light of the amendments made in article 17 (1) of this draft.

<sup>61</sup> See the footnote to the term “contract price” in article 21 above.

<sup>62</sup> Amended pursuant to A/CN.9/690, para. 143.

(4) Except when ordered to do so by a competent court or ... (the enacting State designates the relevant organ), and subject to the conditions of such an order, the procuring entity shall not disclose:

(a) Information from the record of the procurement proceedings [if its non-disclosure is necessary for the protection of essential security interests of the State or]<sup>63</sup> if its disclosure would be contrary to law, would impede law enforcement, would prejudice the legitimate commercial interests of the suppliers or contractors or would impede fair competition;

(b) Information relating to the examination and evaluation<sup>64</sup> of submissions, and submission prices, other than the summary referred to in subparagraph (n) of paragraph (1) of this article.

(5) The procurement entity shall record, file and preserve all documents relating to the procurement proceedings, according to procurement regulations or other provisions of law.<sup>65</sup>

### Article 23 bis. Code of conduct

A code of conduct for officers or employees of procuring entities shall be enacted. It shall address, inter alia, the prevention of conflicts of interest in procurement and, where appropriate, measures to regulate matters regarding personnel responsible for procurement, such as declarations of interest in particular procurements, screening procedures and training requirements. The code of conduct so enacted shall be promptly made accessible to the public and systematically maintained.<sup>66</sup>

<sup>63</sup> Amended pursuant to the amendments made to article 22 (1) of the current draft. The accompanying Guide text will cross-refer to the relevant discussion in the Guide in connection with the respective provisions in article 22.

<sup>64</sup> Amended pursuant to A/CN.9/690, para. 18.

<sup>65</sup> The accompanying Guide text will explain that the provisions intend to reflect a requirement in the United Nations Convention against Corruption that States parties must “take such civil and administrative measures as may be necessary, in accordance with the fundamental principles of [their] domestic law, to preserve the integrity of accounting books, records, financial statements or other documents related to public expenditure and revenue and to prevent the falsification of such documents” (article 9 (3)). The Guide will also explain the need for preservation of documents, and cross-refer to any applicable rules on documentary records and archiving. If the enacting State considers that applicable internal rules and guidance should also be stored with the documents for a particular procurement, it could include those items in the regulations.

<sup>66</sup> The amended wording has been agreed upon during the intersessional consultations. The accompanying Guide text will cross-refer to article 5 (1) of this Law that addresses publicity of legal texts, and to other law that includes relevant codes of conduct (A/CN.9/690, para. 144). In this regard, it will also address the concerns raised by the concept of the “revolving door” (i.e. that public officials seek or are offered employment in the private sector by entities or individuals — potential participants in procurement proceedings) and so note that codes of conduct indirectly establish boundaries for the behaviour of private sector entities or individuals with public officials (A/CN.9/690, para. 145).

**(A/CN.9/WG.I/WP.75/Add.3) (Original: English)**

**Note by the Secretariat on possible revisions to the UNCITRAL Model Law on Procurement of Goods, Construction and Services — a revised text of the Model Law, submitted to the Working Group on Procurement at its nineteenth session**

**ADDENDUM**

This note sets out a proposal for chapter II (Methods of procurement and their conditions for use. Solicitation and notices of the procurement) of the revised Model Law (chapter II comprising articles 24-29 quater) and for chapter III (Open tendering) of the revised Model Law, comprising articles 30-38.

The Secretariat's comments are set out in the accompanying footnotes.

**CHAPTER II. METHODS OF PROCUREMENT AND THEIR CONDITIONS FOR USE. SOLICITATION AND NOTICES OF THE PROCUREMENT**

**SECTION I. METHODS OF PROCUREMENT AND THEIR CONDITIONS FOR USE**

**Article 24. Methods of procurement\***

- (1) The procuring entity may conduct procurement by means of:
  - (a) Open tendering;
  - (b) Restricted tendering;
  - (c) Request for quotations;
  - (d) Request for proposals without negotiation;
  - (e) Two-stage tendering;
  - (f) Request for proposals with dialogue;
  - (g) Request for proposals with consecutive negotiations;
  - (h) Competitive negotiation;
  - (i) Auction;
  - (j) Single-source procurement.
- (2) The procuring entity may engage in a framework agreement procedure in accordance with the provisions of chapter VII of this Law.

---

\* States may choose not to incorporate all these methods of procurement into their national legislation, though open tendering should always be provided for. On this question, see the Guide to Enactment of the UNCITRAL Model Law on Public Procurement (A/CN.9/...).

**Article 25. General rules applicable to the selection  
of a procurement method**

- (1) Except as otherwise provided for in articles [26 to 28] of this Law, a procuring entity shall conduct procurement by means of open tendering.
- (2) A procuring entity may use a method of procurement other than open tendering only in accordance with articles [26 to 28] of this Law, and shall select the other method of procurement to accommodate the circumstances of the procurement concerned, and shall seek to maximize competition to the extent practicable.
- (3) If the procuring entity uses a method of procurement other than open tendering, it shall include in the record required under article [23] of this Law a statement of the reasons and circumstances upon which it relied to justify the use of that method.<sup>1</sup>

**Article 26. Conditions for use of methods of procurement under chapter IV of  
this Law (restricted tendering, request for quotations and request for proposals  
without negotiation)**

- (1) The procuring entity may engage in procurement by means of restricted tendering in accordance with article [39] of this Law when:
  - (a) The subject matter of the procurement, by reason of its highly complex or specialized nature, is available only from a limited number of suppliers or contractors; or
  - (b) The time and cost required to examine and evaluate a large number of tenders would be disproportionate to the value of the subject matter of the procurement.
- (2) A procuring entity may engage in procurement by means of a request for quotations in accordance with article [40] of this Law for the procurement of readily available goods or services that are not specially produced or provided to the particular description of the procuring entity and for which there is an established market, so long as the estimated value of the procurement contract is less than the threshold amount set out in the procurement regulations.
- (3) The procuring entity may engage in procurement by means of request for proposals without negotiation in accordance with article [41] of this Law where the procuring entity needs to consider the financial aspects of proposals separately and only after completion of examination and evaluation of quality and technical aspects of the proposals.<sup>2</sup>

---

<sup>1</sup> This paragraph was retained without square brackets pursuant to A/CN.9/690, para. 147.

<sup>2</sup> The Working Group's tentative view was that this procurement method should not be treated as appropriate only for procurement of advisory or consultancy services (A/CN.9/687, para. 128). As the multilateral development banks recommend its use only for such services, the Working Group may wish to note that it can be so limited in the Guide to Enactment, which can also note that a tendering-based method could be used for other procurement.

**Article 27. Conditions for use of methods of procurement under chapter V of this Law (two-stage tendering, request for proposals with dialogue, request for proposals with consecutive negotiations, competitive negotiations and single-source procurement)<sup>3</sup>**

(1) <sup>4</sup>A procuring entity may engage in procurement by means of two-stage tendering in accordance with article [42] of this Law where the procuring entity assesses that discussions with suppliers or contractors are needed to refine aspects of the description of the subject matter of the procurement and to formulate them with the precision required under article [10] of this Law and in order to allow the procuring entity to obtain the most satisfactory solution to its procurement needs.

(2) (Subject to approval by ... (the enacting State designates an organ to issue the approval)),<sup>5</sup> a procuring entity may engage in procurement by means of request for proposals with dialogue in accordance with article [43] of this Law where:

(a) It is not feasible for the procuring entity to formulate a detailed description of the subject matter of the procurement in accordance with article [10] of this Law, and the procuring entity assesses that dialogue with suppliers or contractors is needed to obtain the most satisfactory solution to its procurement needs;

(b) When the procuring entity seeks to enter into a contract for the purpose of research, experiment, study or development, except where the contract includes the production of items in quantities sufficient to establish their commercial viability or to recover research and development costs;

<sup>3</sup> The Working Group has confirmed its understanding that in principle all procurement methods under the Model Law were available for all types of procurement (A/CN.9/687, para. 128). It was suggested that the accompanying Guide text would explain that the conditions for use in this article could not entirely address the considerations raised by the selection of the procurement method, and indeed that it might not be appropriate for them to do so. The selection may in practice not be amenable to challenge, and the main issue should be to enable structured decision-making on the part of the procuring entity and to manage the risks that such decisions may entail. The Guide will provide detailed commentary addressing the issues in selecting between the methods listed in articles 26 and 27 and among the methods listed in article 27, from the perspective both of legislators and of procuring entities. In addition, the guidance will address the elements of that choice that could not be addressed in a legislative text and will draw on real-life examples (A/CN.9/687, paras. 121-127).

<sup>4</sup> It is the Secretariat's understanding that a higher-level approval for the use of a procurement method under chapter V was discussed at the Working Group's eighteenth session only in the context of provisions addressing the request for proposals with dialogue and competitive negotiations (A/CN.9/690, paras. 152-155). The opening phrase, like the one appearing in paragraph (2) of this article, was not therefore included in this paragraph that addresses two-stage tendering.

<sup>5</sup> The opening phrase has been added pursuant to A/CN.9/690, para. 152. It will remain in the Model Law in round brackets (to indicate that it is optional for the enacting State). The accompanying Guide text will alert the enacting State that, in the light of the risks involved in the procurement method involving dialogue, the enacting State may require that recourse to such procurement method should be subject to approval by a higher-level authority. If it so decides, its national law should include the phrase without brackets.

(c) Where the procuring entity determines that the selected method is the most appropriate method of procurement for the protection of essential security interests of the State;<sup>6</sup> or

(d) When open tendering was engaged in but no tenders were presented or the procurement was cancelled by the procuring entity pursuant to article [17 (1)] of this Law<sup>7</sup> and when, in the judgement of the procuring entity, engaging in new open tendering proceedings or a procurement method under chapter IV of this Law would be unlikely to result in a procurement contract.<sup>8</sup>

(3) <sup>9</sup>A procuring entity may engage in procurement by means of request for proposals with consecutive negotiations in accordance with article [44] of this Law where the procuring entity needs to consider the financial aspects of proposals separately and only after completion of examination and evaluation of quality and technical aspects of the proposals, and it assesses that consecutive negotiations with suppliers or contractors are needed in order to ensure that the financial terms and conditions of the procurement contract are acceptable to the procuring entity.

(4) A procuring entity may engage in competitive negotiations, in accordance with the provisions of article [45] of this Law, in the following circumstances:<sup>10</sup>

(a) There is an urgent need for the subject matter of the procurement, and engaging in open tendering proceedings or any other method of procurement because of the time involved in using those methods would therefore be impractical, provided that the circumstances giving rise to the urgency were neither foreseeable by the procuring entity nor the result of dilatory conduct on its part;

(b) Owing to a catastrophic event, there is an urgent need for the subject matter of the procurement, making it impractical to use open tendering proceedings or any other method of procurement because of the time involved in using those methods;<sup>11</sup> and

---

<sup>6</sup> Amended in order to align with the relevant wording in articles 22 (1) and 23 (4) (a) of the current draft.

<sup>7</sup> Amended pursuant to the amendments introduced in article 17 (1).

<sup>8</sup> The Working Group is invited to consider whether this last ground can also justify recourse to two-stage tendering. If so, the provisions of this subparagraph are also to be reflected under paragraph (1) of this article.

<sup>9</sup> It is the Secretariat's understanding that desirability of a higher-level approval for the use of a procurement method under chapter V was discussed at the Working Group's eighteenth session only in the context of provisions addressing the request for proposals with dialogue and competitive negotiations (A/CN.9/690, paras. 152-155). The opening phrase, like the one appearing in paragraph (2) of this article, was not therefore included in this paragraph that addresses request for proposals with consecutive negotiations.

<sup>10</sup> At its eighteenth session, the Working Group deferred consideration of suggestions to include a reference to a higher-level approval either in the text of the Model Law (in the chapeau of paragraph (4) or in subparagraph (c)) or in the Guide (A/CN.9/690, paras. 152 and 155).

<sup>11</sup> The accompanying Guide text will explain that the phrase excludes reference to single-source procurement.

(c) Where the procuring entity determines that the use of any other method of procurement is not appropriate for the protection of essential security interests of the State.<sup>12, 13</sup>

(5) A procuring entity may engage in single-source procurement in accordance with the provisions of article [46] of this Law in the following exceptional circumstances:

(a) The subject matter of the procurement is available only from a particular supplier or contractor, or a particular supplier or contractor has exclusive rights in respect of the subject matter of the procurement, such that no reasonable alternative or substitute exists, and the use of any other procurement method would therefore not be possible;

(b) Owing to a catastrophic event, there is an extremely urgent need for the subject matter of the procurement, and engaging in any other method of procurement would be impractical because of the time involved in using those methods;<sup>14</sup>

(c) The procuring entity, having procured goods, equipment, technology or services from a supplier or contractor, determines that additional supplies must be procured from that supplier or contractor for reasons of standardization or because of the need for compatibility with existing goods, equipment, technology or services, taking into account the effectiveness of the original procurement in meeting the needs of the procuring entity, the limited size of the proposed procurement in relation to the original procurement, the reasonableness of the price and the unsuitability of alternatives to the goods or services in question;

(d) Where the procuring entity determines that the use of any other method of procurement is not appropriate for the protection of essential security interests of the State;<sup>15</sup> or

---

<sup>12</sup> Amended in order to align with the relevant wording in articles 22 (1) and 23 (4) (a) of the current draft.

<sup>13</sup> The accompanying Guide will explain that the provisions in subparagraphs (a) to (c) are without prejudice to the general principle contained in article 25 (2) according to which the procuring entity must seek to maximize competition to the extent practicable when it selects a procurement method. It is therefore understood that when an alternative to competitive negotiation, such as restricted tendering or request for quotations, is appropriate, the procuring entity must select such an alternative procurement method that would ensure most competition in the circumstances of the given procurement without jeopardizing other not less important considerations, such as urgency of delivery of the subject matter of the procurement.

<sup>14</sup> Revised pursuant to the deliberations at the Working Group's eighteenth session (A/CN.9/690, para. 34). The accompanying Guide text will explain that this provision is without prejudice to the general principle contained in article 25 (2) according to which the procuring entity must seek to maximize competition to the extent practicable when it selects a procurement method. It is therefore understood that when an alternative to single-source procurement, such as competitive negotiation, restricted tendering or request for quotations, is appropriate, the procuring entity must select such an alternative procurement method that would ensure most competition in the circumstances of the given procurement without jeopardizing, however, other not less important considerations, such as urgency of delivery of subject matter of the procurement.

<sup>15</sup> Amended in order to align with the relevant wording in articles 22 (1) and 23 (4) (a) of the current draft.

(e) Subject to approval by ... (the enacting State designates an organ to issue the approval), and following public notice and adequate opportunity to comment, where procurement from a particular supplier or contractor is necessary in order to implement a socio-economic policy of this State set out in the procurement regulations, provided that procurement from no other supplier or contractor is capable of promoting that policy.

#### **Article 28. Conditions for use of an<sup>16</sup> auction**

(1) A procuring entity may engage in procurement by means of an auction in accordance with the provisions of chapter VI of this Law, under the following conditions:

(a) Where it is feasible for the procuring entity to formulate a detailed and precise description of the subject matter of the procurement;

(b) Where there is a competitive market of suppliers or contractors anticipated to be qualified to participate in the auction, such that effective competition is ensured; and

(c) Where the criteria to be used by the procuring entity in determining the successful submission are quantifiable and can be expressed in monetary terms.

(2) A procuring entity may use an auction as a phase preceding the award of the procurement contract in a procurement method as appropriate under the provisions of this Law. It may also use an auction for award of a procurement contract in a framework agreement procedure with second stage competition in accordance with the provisions of this Law.<sup>17</sup>

#### **Article 29. Conditions for use of a framework agreement procedure<sup>18, 19</sup>**

(1) A procuring entity may engage in a framework agreement procedure in accordance with chapter VII of this Law where it determines that:

(a) The need for the subject matter of the procurement is expected to arise on a [repeated or indefinite]<sup>20</sup> basis during a given period of time; or

<sup>16</sup> References to “electronic reverse” auctions have been removed, pursuant to A/CN.9/690, para. 39(a). See, also, the definition of the auction in article 2, which makes express reference to the fact that the auctions are held online and that they are reverse auctions.

<sup>17</sup> The article was split into two parts since the conditions set out in paragraph (1) would make it impossible to use ERAs as a phase in procurement methods under the Model Law. The text in this paragraph was amended pursuant to A/CN.9/690, para. 42 (b). The accompanying Guide text will elaborate on the procurement methods in which it would be appropriate to hold the auctions and on the procurement methods in which it would be inappropriate to do so.

<sup>18</sup> For lack of time the Working Group was not able to consider at its eighteenth session the provisions of this and the following articles up to article 41, of the draft Model Law.

<sup>19</sup> The article has been moved from chapter VII.

<sup>20</sup> One of the issues deferred by the Working Group was a proposal presented at the fifteenth session to reconsider the inclusion and extent of conditions for use of framework agreements (A/CN.9/668, paras. 227-229). The alternatives in square brackets were provided by participants at the session to the Secretariat, for further consideration by the Working Group, with the comment that the term “indefinite” indicates unknown timing and/or unknown quantities. The

(b) By virtue of the nature of the subject matter of the procurement, the need for it may arise on an urgent basis during a given period of time.<sup>21</sup>

(2) The procuring entity shall include in the record required under article [23] of this Law a statement of the reasons and circumstances upon which it relied to justify the recourse to a framework agreement procedure and the type of framework agreement selected.<sup>22</sup>

## SECTION II. SOLICITATION AND NOTICES OF THE PROCUREMENT

### Article 29 bis. Solicitation in open tendering, two-stage tendering and in procurement by means of an auction

(1) An invitation to tender in open tendering or two-stage tendering and an invitation to the auction under article [47] of this Law shall be published in ... (the enacting State specifies the official gazette or other official publication in which the solicitation is to be published).

(2) The invitation shall also be published in a language customarily used in international trade, in a newspaper of wide international circulation or in a relevant trade publication or technical or professional journal of wide international circulation.<sup>23</sup>

(3) The provisions of this article shall not apply where the procuring entity engages in pre-qualification proceedings in accordance with article [16] of this Law.

(4) The procuring entity shall not be required to publish the invitation in accordance with paragraph (2) of this article in domestic procurement and in procurement proceedings where the procuring entity decides, in view of the low

---

informal drafting party, July 2009, comprising Angola, Austria, the Czech Republic, France, Germany, Morocco, Nigeria, Senegal, Turkey, the United Kingdom and the United States of America, recommended that the Guide to Enactment should explain that a procuring entity should offer estimates of future quantities in the solicitation documents, in part to guide prospective vendors as to the government's likely requirements. The Guide to Enactment should also explain why the Model Law refers to indefinite quantities, e.g. because it is possible that an item may be ordered only once.

<sup>21</sup> At the Working Group's fifteenth session, it was suggested that an additional open-ended subparagraph (c) could be included reading "Other grounds and circumstances that justify recourse to a framework agreement procedure", which would allow the procuring entity to have recourse to framework agreement procedures subject to the justification of its decision in the record of the procurement proceedings (A/CN.9/668, para. 228). The informal drafting party, July 2009, recommended that the Guide to Enactment should give examples of what these circumstances might be. The Working Group is invited to consider whether such additional open-ended subparagraph should be included in the text of the article.

<sup>22</sup> This paragraph was retained without square brackets pursuant to the Working Group's decision on similar provisions in other articles of the draft revised Model Law.

<sup>23</sup> The accompanying Guide text will explain that international advertisement is on the increase to promote regional trade and cross-border protests. It will cross-refer to paragraph (4) of the article that permits an exemption from the requirement in paragraph (2).

value of the subject matter of the procurement, that only domestic suppliers or contractors are likely to be interested in presenting submissions.<sup>24</sup>

**Article 29 ter. Solicitation and notices of the procurement in restricted tendering, competitive negotiations and single-source procurement**

(1) (a) When the procuring entity engages in procurement by means of restricted tendering on the grounds specified in article [26 (1) (a)] of this Law,<sup>25</sup> it shall solicit tenders from all suppliers and contractors from whom the subject matter of the procurement is available;<sup>26</sup>

(b) When the procuring entity engages in procurement by means of restricted tendering on the grounds specified in article [26 (1) (b)] of this Law, it shall select suppliers or contractors from whom to solicit tenders in a non-discriminatory manner, and it shall select a sufficient number of suppliers or contractors to ensure effective competition.<sup>27</sup>

(2) Where the procuring entity engages in procurement by means of request for quotations in accordance with article [26 (2)] of this Law, it shall request quotations from as many suppliers or contractors as practicable, but from at least three.<sup>28</sup>

<sup>24</sup> This paragraph is based on article 23 of the 1994 Model Law. It has been included pursuant to A/CN.9/690, paras. 118-120. The accompanying Guide text will stress that foreign suppliers should be allowed to participate in low-value procurement if they so chose, but (following the 1994 Model Law approach) the procuring entity would not be required to publish the invitation in a newspaper of wide international circulation in a language customarily used in international trade. The Guide will also explain what is meant by low-value procurement, to prevent enacting States from setting the threshold high to exclude the bulk of its procurement from requirement of international publication. Although the threshold for the low-value procurement will not be the same, and it will be impossible to set out a single threshold, for all enacting States, the Guide should promote a common understanding what low value is meant to involve. The accompanying Guide text will further explain that the low value consideration should be taken into account alongside an anticipated lack of a cross-border interest in participating in the procurement concerned (i.e. even if the procuring entity publicized the procurement internationally, no international participation would result in the absence of interest on the part of foreign suppliers or contractors, and thus such publication would involve additional cost (in particular, translation costs if applicable)). The Guide may cross-refer to other provisions of the Guide that address other exemptions in the case of the domestic procurement that may be applicable also to the low-value procurement, such as exemption from the requirement to indicate in the solicitation documents information about currency and languages, which is usually pertinent in the context of the international procurement.

<sup>25</sup> The accompanying Guide text will provide examples of the exceptional cases in which these grounds will apply (A/CN.9/687, paras. 159-160).

<sup>26</sup> The accompanying Guide text will elaborate on the implications of this provision on the procuring entity if it receives requests from suppliers or contractors to allow them to tender in response to the notice of the procurement published in accordance with paragraph (5) of this article. The Secretariat's understanding is that such suppliers will have to be allowed to tender unless they are disqualified (if pre-qualification took place) or do not comply with the terms of the notice of the procurement (e.g. the declaration made pursuant to article 8 of the Law).

<sup>27</sup> The provisions of paragraph (1) of this article are based on article 39 (2) of A/CN.9/WG.I/WP.73/Add.4.

<sup>28</sup> The provisions of this paragraph are based on the first sentence of article 40 (1) of A/CN.9/WG.I/WP.73/Add.4.

(3) Where the procuring entity engages in procurement by means of competitive negotiations in accordance with article [27 (4)] of this Law, it shall engage in negotiations with a sufficient number of suppliers or contractors to ensure effective competition.<sup>29</sup>

(4) Where the procuring entity engages in single-source procurement in accordance with article [27 (5)] of this Law, it shall solicit a proposal or price quotation from a single supplier or contractor.<sup>30</sup>

(5) <sup>31</sup>Prior to direct solicitation in accordance with the provisions of paragraphs (1), (3) and (4) of this article, the procuring entity shall publish a notice of the procurement in ... (the enacting State specifies the official gazette or other official publication in which the solicitation is to be published). The notice shall contain at a minimum the following information:

(a) The name and address of the procuring entity;

(b) A summary of the principal required terms and conditions of the procurement contract or the framework agreement to be entered into as a result of the procurement proceedings, including the nature and quantity, and place of delivery of the goods to be supplied, the nature and location of the construction to be effected, or the nature of the services and the location where they are to be provided, as well as the desired or required time for the supply of the goods or for the completion of the construction, or the timetable for the provision of the services;

(c) A declaration pursuant to article [8] of this Law; and

(d) The method of procurement to be used.

(6) The requirements of paragraph (5) shall not apply in the case of urgency as referred to in articles [27 (4) (b) and 27 (5) (b)]. The procuring entity shall include in the record required under article [23] of this Law a statement of the reasons and circumstances upon which it relied to justify an exemption from the requirement of publication of the notice of the procurement under paragraph (5) of this article.<sup>32</sup>

#### **Article 29 quater. Solicitation in request for proposals proceedings**

(1) An invitation to participate in the request for proposals proceedings shall be published in accordance with article [29 bis (1) and (2)], except where:

(a) The procuring entity engages in pre-qualification proceedings in accordance with article [16] of this Law or in pre-selection proceedings in accordance with article [43] of this Law; or

<sup>29</sup> The provisions of this paragraph are based on the first sentence of article 45 (1) of A/CN.9/WG.I/WP.73/Add.5.

<sup>30</sup> The provisions of this paragraph are based on the first sentence of article 46 of A/CN.9/WG.I/WP.73/Add.5.

<sup>31</sup> The Working Group, at its seventeenth session, decided that the requirement of publishing the notice of procurement should not apply to request for quotations proceedings (A/CN.9/687, para. 171). No cross-reference to paragraph (2) of this article is therefore made in this paragraph. The accompanying Guide text would need to set out reasons for this exemption.

<sup>32</sup> The last sentence was retained without square brackets pursuant to the Working Group's decision on similar provisions in other articles of the draft revised Model Law.

(b) The procuring entity engages in direct solicitation under the conditions set out in paragraph (2) of this article; or

(c) The procuring entity decides not to publish the invitation in accordance with article [29 bis (2)] of this Law under the conditions set out in article [29 bis (4)] of this Law.

(2) The procuring entity may engage in direct solicitation in request for proposals proceedings if:

(a) The subject matter to be procured is available only from a limited number of suppliers or contractors, provided that the procuring entity solicits proposals from all those suppliers or contractors; or

(b) The time and cost required to examine and evaluate a large number of proposals would be disproportionate to the value of the subject matter to be procured, provided that the procuring entity solicits proposals from a sufficient number of suppliers or contractors to ensure effective competition; or

(c) The procurement involves classified information, provided that the procuring entity solicits proposals from a sufficient number of suppliers or contractors to ensure effective competition.<sup>33</sup>

(3) The procuring entity shall include in the record required under article [23] of this Law a statement of the reasons and circumstances upon which it relied to justify recourse to direct solicitation in request for proposals proceedings.<sup>34</sup>

(4) The procuring entity shall publish a notice of the procurement in accordance with the requirements set out in article [29 ter (5)] where it engages in direct solicitation in request for proposals proceedings.

## **CHAPTER III. OPEN TENDERING**

### **SECTION I. SOLICITATION OF TENDERS**

#### **Article 30. Procedures for soliciting tenders**

The procuring entity shall solicit tenders by issuing an invitation to tender in accordance with the provisions of article [29 bis] of this Law.

#### **Article 31. Contents of invitation to tender**

The invitation to tender shall include the following information:

(a) The name and address of the procuring entity;

(b) A summary of the principal required terms and conditions of the procurement contract to be entered into as a result of the procurement proceedings, including the nature and quantity, and place of delivery of the goods to be supplied, the nature and location of the construction to be effected, or the nature of the

---

<sup>33</sup> Based on provisions of article 37 (3) of the 1994 Model Law and A/64/17, para. 265.

<sup>34</sup> This paragraph was retained without square brackets pursuant to the Working Group's decision on similar provisions in other articles of the draft revised Model Law.

services and the location where they are to be provided, as well as the desired or required time for the supply of the goods or for the completion of the construction, or the timetable for the provision of the services;

(c) The criteria and procedures to be used for ascertaining the qualifications of suppliers or contractors, and any documentary evidence or other information that must be submitted by suppliers or contractors to demonstrate their qualifications, in conformity with article [9] of this Law;

(d) A declaration pursuant to article [8] of this Law;

(e) The means of obtaining the solicitation documents and the place where they may be obtained;

(f) The price, if any, charged by the procuring entity for the solicitation documents;

(g) If a price is charged for the solicitation documents, the means and currency of payment;<sup>35</sup>

(h) The language or languages in which the solicitation documents are available;<sup>36</sup>

(i) The manner, place and deadline for presenting tenders.

#### **Article 32. Provision of solicitation documents**

The procuring entity shall provide the solicitation documents to each supplier or contractor that responds to the invitation to tender in accordance with the procedures and requirements specified therein. If pre-qualification proceedings have been engaged in, the procuring entity shall provide a set of solicitation documents to each supplier or contractor that has been pre-qualified and that pays the price, if any, charged for those documents. The price that the procuring entity may charge for the solicitation documents shall reflect only the cost of providing them to suppliers or contractors.<sup>37</sup>

#### **Article 33. Contents of solicitation documents**

The solicitation documents shall include<sup>38</sup> the following information:

(a) Instructions for preparing tenders;

<sup>35</sup> Amended pursuant to A/CN.9/690, para. 22 (b). The accompanying Guide text will note that the procuring entity may decide not to include reference to the currency of payment in domestic procurement, if it would be unnecessary in the circumstances.

<sup>36</sup> Amended pursuant to A/CN.9/690, para. 22 (b). The accompanying Guide text will note that the procuring entity may decide not to include this information in domestic procurement, if it would be unnecessary in the circumstances, and will add that an indication of the language or languages may still be important in some multilingual countries.

<sup>37</sup> The accompanying Guide text to this and similar provisions throughout the Model Law will make it clear that development costs (including consultancy fees and advertising costs) are not to be recovered through this provision and that the costs should be limited to the minimal charges of providing the documents (and printing them, where appropriate).

<sup>38</sup> A/CN.9/687, para. 133.

(b) The criteria and procedures, in conformity with the provisions of article [9] of this Law, that will be applied in the ascertainment of the qualifications of suppliers or contractors and in any further demonstration of qualifications pursuant to article [37 (6)] of this Law;

(c) The requirements as to documentary evidence or other information that must be presented by suppliers or contractors to demonstrate their qualifications;

(d) The description of the subject matter of the procurement, in conformity with article [10] of this Law; the quantity of the goods;<sup>39</sup> services to be performed; the location where the goods are to be delivered, construction is to be effected or services are to be provided; and the desired or required time, if any, when goods are to be delivered, construction is to be effected or services are to be provided;<sup>40</sup>

(e) The terms and conditions of the procurement contract, to the extent they are already known to the procuring entity, and the contract form, if any, to be signed by the parties;<sup>41</sup>

(f) If alternatives to the characteristics of the subject matter of the procurement, contractual terms and conditions or other requirements set out in the solicitation documents are permitted, a statement to that effect, and a description of the manner in which alternative tenders are to be evaluated;

(g) If suppliers or contractors are permitted to present tenders for only a portion of the subject matter of the procurement, a description of the portion or portions for which tenders may be presented;

(h) The manner in which the tender price is to be formulated and expressed, including a statement as to whether the price is to cover elements other than the cost of the subject matter of the procurement itself, such as any applicable transportation and insurance charges, customs duties and taxes;

(i) The currency or currencies in which the tender price is to be formulated and expressed;<sup>42</sup>

(j) The language or languages, in conformity with article [13] of this Law, in which tenders are to be prepared;<sup>43</sup>

(k) Any requirements of the procuring entity with respect to the issuer and the nature, form, amount and other principal terms and conditions of any tender security to be provided by suppliers or contractors presenting tenders in accordance with article [15] of this Law, and any such requirements for any security for the

---

<sup>39</sup> The accompanying Guide text will explain that in some cases this may refer to an estimated quantity, with cross-references to the relevant provisions in the chapter on framework agreements.

<sup>40</sup> A/CN.9/687, para. 136.

<sup>41</sup> The accompanying Guide text will explain the meaning of the term “contract form” in this provision as distinct from contract form requirements found in subparagraph (x) of this article.

<sup>42</sup> Amended pursuant to A/CN.9/690, para. 22 (b). The accompanying Guide text will note that the procuring entity may decide not to include reference to the currency in domestic procurement, if it would be unnecessary in the circumstances.

<sup>43</sup> Amended pursuant to A/CN.9/690, para. 22 (b). The accompanying Guide text will note that the procuring entity may decide not to include this information in domestic procurement, if it would be unnecessary in the circumstances, and will add that an indication of the language or languages may still be important in some multilingual countries.

performance of the procurement contract to be provided by the supplier or contractor that enters into the procurement contract, including securities such as labour and material bonds;

(l) If a supplier or contractor may not modify or withdraw its tender prior to the deadline for presenting tenders without forfeiting its tender security, a statement to that effect;

(m) The manner, place and deadline for presenting tenders, in conformity with article [13 bis] of this Law;<sup>44</sup>

(n) The means by which, pursuant to article [14] of this Law, suppliers or contractors may seek clarifications of the solicitation documents, and a statement as to whether the procuring entity intends, at this stage, to convene a meeting of suppliers or contractors;

(o) The period of time during which tenders shall be in effect, in conformity with article [35] of this Law;

(p) The manner, place, date and time for the opening of tenders, in conformity with article [36] of this Law;<sup>45</sup>

(q) The criteria and procedure for the examination of tenders against the description of the subject matter of the procurement;

(r) The criteria and procedure for evaluation of tenders in accordance with article [11] of this Law;

(s) The currency that will be used for the purpose of evaluating tenders pursuant to article [37 (5)] of this Law and either the exchange rate that will be used for the conversion of tenders into that currency or a statement that the rate published by a specified financial institution prevailing on a specified date will be used;<sup>46</sup>

(t) References to this Law, the procurement regulations and other laws and regulations directly pertinent to the procurement proceedings, including those applicable to procurement involving classified information, and the place<sup>47</sup> where these laws and regulations may be found;

(u) The name, functional title and address of one or more officers or employees of the procuring entity who are authorized to communicate directly with and to receive communications directly from suppliers or contractors in connection with the procurement proceedings, without the intervention of an intermediary;

(v) [deleted]<sup>48</sup>

---

<sup>44</sup> A/CN.9/687, para. 139.

<sup>45</sup> A/CN.9/687, para. 139.

<sup>46</sup> Amended pursuant to A/CN.9/690, para. 22 (b). The accompanying Guide text will note that the procuring entity may decide not to include reference to the currency in domestic procurement, if it would be unnecessary in the circumstances.

<sup>47</sup> Reference to the place was added by the Secretariat further to the suggestions of experts. The accompanying Guide text will explain that the place refers not to the physical location but rather an official publication, portal etc. where authoritative texts of laws and regulations of the enacting State are made available to the public and systematically maintained.

<sup>48</sup> Reference to any commitments outside the procurement contract was deleted in this article and elsewhere in the current draft where it was found, pursuant to A/CN.9/690, para. 39 (h).

(w) Notice of the right provided under article [61] of this Law to seek review of non-compliance with the provisions of this Law together with information about duration of the applicable standstill period and, if none will apply, a statement to that effect and reasons therefor;

(x) Any formalities that will be required once a successful tender has been accepted for a procurement contract to enter into force, including, where applicable, the execution of a written procurement contract pursuant to article [20] of this Law, and approval by a higher authority or the Government and the estimated period of time following the dispatch of the notice of acceptance that will be required to obtain the approval;

(y) Any other requirements established by the procuring entity in conformity with this Law and the procurement regulations relating to the preparation and presentation of tenders and to other aspects of the procurement proceedings.<sup>49</sup>

## SECTION II. PRESENTATION OF TENDERS

### Article 34. Presentation of tenders

*[The old paras. 1 to 4 were deleted in the light of the newly proposed article 13 bis.]*

(1) Tenders shall be presented in the manner, at the place and by the deadline specified in the solicitation documents.

(2) (a) A tender shall be presented in writing, and signed, and:

(i) If in paper form, in a sealed envelope; or

(ii) If in any other form, according to requirements specified by the procuring entity in the solicitation documents, which ensure at least a similar degree of authenticity, security, integrity and confidentiality;

(b) The procuring entity shall provide to the supplier or contractor a receipt showing the date and time when its tender was received;<sup>50</sup>

(c) The procuring entity shall preserve the security, integrity and confidentiality of a tender, and shall ensure that the content of the tender is examined only after its opening in accordance with this Law.

(3) A tender received by the procuring entity after the deadline for presenting tenders shall not be opened and shall be returned unopened to the supplier or contractor that presented it.

<sup>49</sup> In the context of the discussion at the Working Group's seventeenth session of correction of arithmetical errors (draft article 37 (1)), a query was raised as to whether it might be useful to require the solicitation documents to specify the manner in which arithmetical errors would be corrected (A/CN.9/687, para. 151). The Working Group may wish therefore consider whether the article should be amended to provide for such a requirement.

<sup>50</sup> The accompanying Guide text will discuss the nature of the receipt to be provided, and will state that the certification of receipt provided by the procuring entity would be conclusive (A/CN.9/668, para. 173).

**Article 35. Period of effectiveness of tenders;  
modification and withdrawal of tenders**

(1) Tenders shall be in effect during the period of time specified in the solicitation documents.

(2) (a) Prior to the expiry of the period of effectiveness of tenders, the procuring entity may request suppliers or contractors to extend the period for an additional specified period of time. A supplier or contractor may refuse the request without forfeiting its tender security;<sup>51</sup>

(b) Suppliers or contractors that agree to an extension of the period of effectiveness of their tenders shall extend or procure an extension of the period of effectiveness of tender securities provided by them or provide new tender securities to cover the extended period of effectiveness of their tenders. A supplier or contractor whose tender security is not extended, or that has not provided a new tender security, is considered to have refused the request to extend the period of effectiveness of its tender.

(3) Unless otherwise stipulated in the solicitation documents, a supplier or contractor may modify or withdraw its tender prior to the deadline for presenting tenders without forfeiting its tender security. The modification or notice of withdrawal is effective if it is received by the procuring entity prior to the deadline for presenting tenders.

**SECTION III. EVALUATION OF TENDERS**

**Article 36. Opening of tenders**

(1) Tenders shall be opened at the time specified in the solicitation documents as the deadline for presenting tenders.<sup>52</sup> They shall be opened at the place and in accordance with the manner and procedures specified in the solicitation documents.<sup>53</sup>

(2) All suppliers or contractors that have presented tenders, or their representatives, shall be permitted by the procuring entity to be present at the opening of tenders. Suppliers or contractors shall be deemed to have been permitted to be present at the opening of the tenders if they have been given opportunity to be fully and contemporaneously apprised of the opening of the tenders.<sup>54</sup>

---

<sup>51</sup> The accompanying Guide text will explain that in such case the effectiveness of the tender of the supplier or contractor will terminate upon the expiry of the original period of effectiveness specified in the solicitation documents (A/CN.9/687, para. 143).

<sup>52</sup> The words “or at the deadline specified in any extension of the deadline” were deleted in the light of the definition of the solicitation documents as incorporating any amendments thereto: any extension of the deadline originally set out in the solicitation documents will be considered the amendments to the originally issued solicitation documents.

<sup>53</sup> The accompanying Guide text will explain risks of departing from the requirements of the Model Law that tenders must be opened at the time specified in the solicitation documents as the deadline for presenting tenders, and practical considerations that should be taken into account in implementing that requirement (A/CN.9/687, para. 150).

<sup>54</sup> The accompanying Guide text will highlight that the place, manner and procedures for the opening of tenders established by the procuring entity should allow for the presence of suppliers

(3) The name and address of each supplier or contractor whose tender is opened and the tender price shall be announced to those persons present at the opening of tenders, communicated on request to suppliers or contractors that have presented tenders but that are not present or represented at the opening of tenders, and included immediately in the record of the tendering proceedings required by article [23].<sup>55</sup>

### **Article 37. Examination and evaluation of tenders**

(1) (a) The procuring entity may ask a supplier or contractor for clarifications of its tender in order to assist in the examination and evaluation of tenders;

(b) The procuring entity shall correct purely arithmetical errors that are discovered during the examination of tenders. The procuring entity shall give prompt notice of any such correction to the supplier or contractor that presented the tender;<sup>56</sup>

(c) No change in a matter of substance in the tender, including changes in price and changes aimed at making an unresponsive tender responsive, shall be sought, offered or permitted.<sup>57</sup>

(2) (a) Subject to subparagraph (b) of this paragraph, the procuring entity shall regard a tender as responsive if it conforms to all requirements set out in the solicitation documents in accordance with article [10] of this Law;

(b) The procuring entity may regard a tender as responsive even if it contains minor deviations that do not materially alter or depart from the characteristics, terms, conditions and other requirements set out in the solicitation documents or if it contains errors or oversights that are capable of being corrected without touching on the substance of the tender. Any such deviations shall be quantified, to the extent possible, and appropriately taken account of in the evaluation of tenders.

(3) The procuring entity shall reject a tender:

(a) If the supplier or contractor that presented the tender is not qualified;

(b) If the supplier or contractor that presented the tender does not accept a correction of an arithmetical error made pursuant to paragraph (1) (b) of this article;

(c) If the tender is not responsive;

(d) In the circumstances referred to in article [18 or 19] of this Law.

---

or contractors (A/CN.9/668, para. 178). The Guide will also elaborate on “deemed” present or “virtual” presence of suppliers or contractors at the opening of tenders.

<sup>55</sup> The accompanying Guide text will explain that any late tenders would be returned unopened, and their (late) submission would be noted in the record.

<sup>56</sup> The accompanying Guide text will explain the rules and principles applicable to the correction by the procuring entity of arithmetical errors.

<sup>57</sup> The paragraph was redrafted to make the requirement of subparagraph (c) applicable to both subparagraphs (a) and (b). In the 1994 text, this requirement was found only in subparagraph (a), raising questions on the extent of the permissible corrections of arithmetical errors under subparagraph (b). The Secretariat’s understanding is that under both subparagraphs (a) and (b), no change can be made in a matter of substance of the tender.

(4) (a) The procuring entity shall evaluate the tenders that have not been rejected in order to ascertain the successful tender, as defined in subparagraph (b) of this paragraph, in accordance with the procedures and criteria set out in the solicitation documents. No criterion shall be used that has not been set out in the solicitation documents;

(b) The successful tender shall be:

(i) Where price is the only award criterion, the tender with the lowest tender price;<sup>58</sup> or

(ii) Where there are price and other award criteria, the most advantageous tender<sup>59</sup> ascertained on the basis of the criteria and procedures for evaluating tenders specified in the solicitation documents in accordance with article [11] of this Law.

(5) When tender prices are expressed in two or more currencies, for the purpose of evaluating and comparing tenders the tender prices of all tenders shall be converted to the currency specified in the solicitation documents according to the rate specified in those documents, pursuant to article [33 (s)] of this Law.<sup>60</sup>

(6) Whether or not it has engaged in pre-qualification proceedings pursuant to article [16] of this Law, the procuring entity may require the supplier or contractor presenting the tender that has been found to be the successful tender pursuant to paragraph (4) (b) of this article to demonstrate its qualifications again, in accordance with the criteria and procedures conforming to the provisions of article [9] of this Law. The criteria and procedures to be used for such further demonstration shall be set out in the solicitation documents. Where pre-qualification proceedings have been engaged in, the criteria shall be the same as those used in the pre-qualification proceedings.

(7) If the supplier or contractor presenting the successful tender is requested to demonstrate its qualifications again in accordance with paragraph (6) of this article but fails to do so, the procuring entity shall reject that tender and shall select a successful tender, in accordance with paragraph (4) of this article, from among the remaining tenders still in effect, subject to the right of the procuring entity to cancel the procurement in accordance with article [17 (1)] of this Law.

(8) Information relating to the examination, clarification and evaluation of tenders shall not be disclosed to suppliers or contractors or to any other person not involved officially in the examination or evaluation of tenders or in the decision on which tender should be accepted, except as provided in articles [20, 22, 23 and 36 (3)] of this Law.<sup>61</sup>

---

<sup>58</sup> A/CN.9/687, para. 153.

<sup>59</sup> A/CN.9/687, paras. 153 and 155. The Guide will elaborate on evolution of procurement practices since 1994 that justified the replacement of the term the “lowest evaluated tender” used in this context in the 1994 Model Law.

<sup>60</sup> A/CN.9/687, para. 157.

<sup>61</sup> The Working Group may wish to consider the need for this provision in the light of article 22.

**Article 38. Prohibition of negotiations with  
suppliers or contractors**

No negotiations shall take place between the procuring entity and a supplier or contractor with respect to a tender presented by the supplier or contractor.

**(A/CN.9/WG.I/WP.75/Add.4) (Original: English)**

**Note by the Secretariat on possible revisions to the UNCITRAL Model Law on Procurement of Goods, Construction and Services — a revised text of the Model Law, submitted to the Working Group on Procurement at its nineteenth session**

**ADDENDUM**

This note sets out a proposal for chapter IV (Procedures for restricted tendering, request for quotations and request for proposals without negotiation) of the revised Model Law, comprising articles 39-41.

The Secretariat's comments are set out in the accompanying footnotes.

**CHAPTER IV. PROCEDURES FOR RESTRICTED TENDERING, REQUEST FOR QUOTATIONS AND REQUEST FOR PROPOSALS WITHOUT NEGOTIATION<sup>1</sup>**

**Article 39. Restricted tendering<sup>2</sup>**

- (1) The procuring entity shall solicit tenders in accordance with the provisions of article [29 ter] of this Law.
- (2) The provisions of chapter III of this Law shall apply to restricted tendering proceedings, except to the extent that those provisions are derogated from this article.

**Article 40. Request for quotations**

- (1) The procuring entity shall request quotations in accordance with the provisions of article [29 ter] of this Law.<sup>3</sup> Each supplier or contractor from whom a quotation is requested shall be informed whether any elements other than the charges for the subject matters of the procurement themselves, such as any applicable transportation and insurance charges, customs duties and taxes, are to be included in the price.
- (2) Each supplier or contractor is permitted to give only one price quotation and is not permitted to change its quotation. No negotiations shall take place between the procuring entity and a supplier or contractor with respect to a quotation presented by the supplier or contractor.

---

<sup>1</sup> The title of the chapter was revised pursuant to A/CN.9/690, para. 149.

<sup>2</sup> The article was revised pursuant to the deliberations at the Working Group's seventeenth session (in particular, provisions on a pre-selection procedure have been deleted) (A/CN.9/687, paras. 159-169) and in the light of the newly proposed section II of chapter II, in particular article 29 ter that incorporates some of the provisions that were previously in this article.

<sup>3</sup> Amended in the light of new article 29 ter.

(3) The successful quotation shall be the lowest-priced quotation meeting the needs of the procuring entity as set out in the request for quotations.<sup>4</sup>

#### **Article 41. Request for proposals without negotiation**

(1) The procuring entity shall solicit proposals by issuing an invitation to participate in the request for proposals without negotiation proceedings in accordance with article [29 quater] of this Law except as otherwise provided for in that article.

(2) The invitation shall include:

- (a) The name and address of the procuring entity;
- (b) A description of the subject matter of the procurement, and the desired or required time and location for the provision of such subject matter;
- (c) The terms and conditions of the procurement contract, to the extent they are already known to the procuring entity, and the contract form, if any, to be signed by the parties;
- (d) The criteria and procedures to be used for ascertaining the qualifications of suppliers or contractors and any documentary evidence or other information that must be presented by suppliers or contractors to demonstrate their qualifications, in conformity with article [9] of this Law;
- (e) The criteria and procedures for opening the proposals and for examining and evaluating the proposals in accordance with articles [10 and 11] of this Law, including the minimum requirements with respect to technical and quality characteristics that proposals must meet in order to be considered responsive in accordance with article [10] of this Law, and a statement that proposals that fail to meet those requirements will be rejected as non-responsive;
- (f) A declaration pursuant to article [8] of this Law;
- (g) The means of obtaining the request for proposals and the place where it may be obtained;
- (h) The price, if any, charged by the procuring entity for the request for proposals;
- (i) If a price is charged for the request for proposals, the means and currency of payment for the request for proposals;<sup>5</sup>
- (j) The language or languages in which the requests for proposals are available;<sup>6</sup>
- (k) The manner, place and deadline for presenting proposals.

---

<sup>4</sup> A/CN.9/687, para. 170.

<sup>5</sup> Amended pursuant to A/CN.9/690, para. 22(b). The accompanying Guide text will note that the procuring entity may decide not to include reference to the currency of payment in domestic procurement, if it would be unnecessary in the circumstances.

<sup>6</sup> Amended pursuant to A/CN.9/690, para. 22(b). The accompanying Guide text will note that the procuring entity may decide not to include this information in domestic procurement, if it would be unnecessary in the circumstances, and will add that an indication of the language or languages may still be important in some multilingual countries.

(3) The procuring entity shall issue the request for proposals:

(a) Where an invitation to participate in the request for proposals without negotiation proceedings has been published in accordance with the provisions of article [29 quater] of this Law, to each supplier or contractor that responds to the invitation in accordance with the procedures and requirements specified therein;

(b) In the case of pre-qualification, to each supplier or contractor pre-qualified in accordance with article [16] of this Law;

(c) In the case of direct solicitation, to each supplier or contractor selected by the procuring entity;<sup>7</sup>

and that pays the price, if any, charged for the request for proposals. The price that the procuring entity may charge for the request for proposals shall reflect only the cost of providing it to suppliers or contractors.<sup>8</sup>

(4) The request for proposals shall include, in addition to the information referred to in paragraphs (2)(a) to (e) and (k) of this article, the following information:

(a) Instructions for preparing and presenting proposals, including instructions to suppliers or contractors to present simultaneously to the procuring entity proposals in two envelopes: one envelope containing the technical and quality characteristics of the proposal and the other envelope containing the financial aspects of the proposal;

(b) If suppliers or contractors are permitted to present proposals for only a portion of the subject matter of the procurement, a description of the portion or portions for which proposals may be presented;<sup>9</sup>

(c) The currency or currencies in which the proposal price is to be formulated or expressed, and the currency that will be used for the purpose of evaluating proposals, and either the exchange rate that will be used for the conversion of proposal prices into that currency or a statement that the rate published by a specified financial institution prevailing on a specified date will be used;<sup>10</sup>

(d) The manner in which the proposal price is to be formulated or expressed, including a statement as to whether the price is to cover elements other than the cost of the subject matter of the procurement, such as reimbursement for transportation, lodging, insurance, use of equipment, duties or taxes;<sup>11</sup>

(e) The means by which, pursuant to article [14] of this Law, suppliers or contractors may seek clarifications of the request for proposals, and a statement as

<sup>7</sup> It is the Secretariat's understanding that provisions on pre-selection of article 43 would not be applicable to this procurement method, and thus no mention of pre-selection is made here as compared to the similar provisions in article 43 of the current draft.

<sup>8</sup> Amended to align with the similar wording found elsewhere in the current draft.

<sup>9</sup> Based on article 38 (i) of the 1994 Model Law.

<sup>10</sup> Based on article 38 (j) and (n) of the 1994 Model Law. Amended pursuant to A/CN.9/690, para. 22(b). The accompanying Guide text will note that the procuring entity may decide not to include reference to the currency in domestic procurement, if it would be unnecessary in the circumstances.

<sup>11</sup> Based on article 38 (k) of the 1994 Model Law.

to whether the procuring entity intends, at this stage, to convene a meeting of suppliers or contractors;<sup>12</sup>

(f) References to this Law, the procurement regulations and other laws and regulations directly pertinent to the procurement proceedings, including those applicable to procurement involving classified information, and the place<sup>13</sup> where these laws and regulations may be found;<sup>14</sup>

(g) The name, functional title and address of one or more officers or employees of the procuring entity who are authorized to communicate directly with and to receive communications directly from suppliers or contractors in connection with the procurement proceedings, without the intervention of an intermediary;<sup>15</sup>

(h) Notice of the right provided under article [61] of this Law to seek review of non-compliance with the provisions of this Law together with information about duration of a standstill period and, if none will apply, a statement to that effect and reasons therefor;<sup>16</sup>

(i) Any formalities that will be required once the proposal has been accepted for a procurement contract to enter into force, including, where applicable, the execution of a written procurement contract, and approval by a higher authority or the Government and the estimated period of time following dispatch of the notice of acceptance that will be required to obtain the approval;<sup>17</sup>

(j) Any other requirements that may be established by the procuring entity in conformity with this Law and the procurement regulations relating to the preparation and presentation of proposals and to the procurement proceedings.<sup>18</sup>

(5) Before opening the envelopes containing the financial aspects of the proposals, the procuring entity shall examine and evaluate the technical and quality characteristics of proposals in accordance with the criteria and procedures specified in the request for proposals.

(6) The results of the examination and evaluation of the technical and quality characteristics of the proposals shall be immediately included in the record of the procurement proceedings.

(7) The proposals whose technical and quality characteristics fail to meet the relevant minimum requirements shall be considered to be non-responsive and shall be rejected on that ground. The notice of rejection and reasons for rejection,<sup>19</sup> together with an unopened envelope containing the financial aspects of the proposal, shall be promptly dispatched to each respective supplier or contractor whose proposal was rejected.

---

<sup>12</sup> Based on article 38 (q) of the 1994 Model Law.

<sup>13</sup> Reference to the place was added by the Secretariat further to the suggestions of experts. The accompanying Guide text will explain that the place refers not to the physical location but rather an official publication, portal, etc. where authoritative texts of laws and regulations of the enacting State are made available to the public and systematically maintained.

<sup>14</sup> Based on article 38 (s) of the 1994 Model Law.

<sup>15</sup> Based on article 38 (p) of the 1994 Model Law.

<sup>16</sup> Based on article 38 (t) of the 1994 Model Law.

<sup>17</sup> Based on article 38 (u) of the 1994 Model Law.

<sup>18</sup> Based on article 38 (v) of the 1994 Model Law.

<sup>19</sup> A/CN.9/687, para. 178.

(8) The proposals whose technical and quality characteristics meet or exceed the relevant minimum requirements shall be considered to be responsive. The procuring entity shall promptly communicate to each supplier or contractor presenting such a proposal the score of the technical and quality characteristics of its respective proposal. The procuring entity shall invite all such suppliers or contractors to the opening of the envelopes containing the financial aspects of their proposals.

(9) The score of the technical and quality characteristics of each responsive proposal and the corresponding financial aspect of that proposal shall be read out in the presence of the suppliers or contractors invited in accordance with paragraph (8) of this article to the opening of the envelopes containing the financial aspects of the proposals.

(10) The procuring entity shall compare the financial aspects of the responsive proposals and on that basis identify the successful proposal in accordance with the criteria and the procedure set out in the request for proposals. The successful proposal shall be the proposal with the best combined evaluation in terms of the criteria other than price specified in the request for proposals and the price.<sup>20</sup>

---

<sup>20</sup> A/CN.9/687, paras. 179-181. The article is designed for the award of the contract on the basis of the best combined evaluation in terms of the criteria other than price specified in the request for proposals and the price. The accompanying Guide text will explain that the procuring entity can award on the basis of the lowest price alone if it sets out sufficiently high the relevant threshold for the minimum quality and technical characteristics of the proposals. In such case, the procuring entity, before opening the envelopes containing the financial aspects of the proposals, would examine the technical and quality characteristics of proposals and reject non-responsive ones. No evaluation of quality and technical characteristics of responsive proposals would take place and thus no scores or ratings would be assigned since scores or ratings would not be relevant where the award is made to the responsive proposal with the lowest price.

**(A/CN.9/WG.I/WP.75/Add.5) (Original: English)****Note by the Secretariat on possible revisions to the UNCITRAL Model Law on Procurement of Goods, Construction and Services — a revised text of the Model Law, submitted to the Working Group on Procurement at its nineteenth session****ADDENDUM**

This note sets out a proposal for chapter V of the revised Model Law (Procedures for two-stage tendering, request for proposals with dialogue, request for proposals with consecutive negotiations, competitive negotiations and single-source procurement)), comprising articles 42-46.

The Secretariat's comments are set out in the accompanying footnotes.

**CHAPTER V. PROCEDURES FOR TWO-STAGE TENDERING, REQUEST FOR PROPOSALS WITH DIALOGUE, REQUEST FOR PROPOSALS WITH CONSECUTIVE NEGOTIATIONS, COMPETITIVE NEGOTIATIONS AND SINGLE-SOURCE PROCUREMENT<sup>1</sup>****Article 42. Two-stage tendering<sup>2</sup>**

- (1) The provisions of chapter III of this Law shall apply to two-stage tendering proceedings, except to the extent those provisions are derogated from in this article.
- (2) The solicitation documents shall call upon suppliers or contractors to present, in the first stage of the two-stage tendering proceedings, initial tenders containing their proposals without a tender price. The solicitation documents may solicit proposals relating to the technical, quality or other characteristics of the subject matter of the procurement as well as to contractual terms and conditions of supply, and, where relevant, the professional and technical competence and qualifications of the suppliers or contractors.
- (3) The procuring entity may, in the first stage, engage in discussions with suppliers or contractors whose tenders have not been rejected pursuant to provisions of this Law,<sup>3</sup> concerning any aspect of their tenders. When the procuring entity

---

<sup>1</sup> The title of the chapter was revised pursuant to A/CN.9/690, para. 149.

<sup>2</sup> The accompanying Guide text will discuss the variants of the two-stage tendering used in practice, and will explain that the article accommodates the essential characteristics of this method, and will explain the risks of collusion posed by this procurement method.

<sup>3</sup> The accompanying Guide text will cross-refer to the relevant provisions, highlighting that this procedure involves an assessment of responsiveness. The Working Group may wish to consider, as suggested during the intersessional consultations, that this provision itself should contain a specific cross-reference to the provisions of article 37 (3) (a) to (c) and article 19 of this draft (no mention is made of article 37 (3) (d) since it also refers to article 18 (rejection of the

engages in discussions with any supplier or contractor, it shall extend an equal opportunity to participate in discussions to all suppliers or contractors.

(4) (a) In the second stage of the two-stage tendering proceedings, the procuring entity shall invite all suppliers or contractors whose tenders were not rejected at the first stage to present final tenders with prices with respect to a single description of the subject matter of the procurement;

(b) In formulating that description,<sup>4</sup> the procuring entity may delete or modify any aspect of the technical or quality characteristics of the subject matter of the procurement as set out in the solicitation documents and add any new characteristic that conforms to the requirements of this Law;

(c) The procuring entity may delete or modify any criterion for examining or evaluating tenders set out in the solicitation documents and may add any new criterion that conforms to the requirements of this Law, to the extent only that the deletion or modification is required as a result of changes made in the technical or quality characteristics of the subject matter of the procurement;<sup>5</sup>

(d) Any deletion, modification or addition made pursuant to subparagraphs (b) or (c) of this paragraph shall be communicated to suppliers or contractors in the invitation to present final tenders;

(e) A supplier or contractor not wishing to present a final tender may withdraw from the tendering proceedings without forfeiting any tender security that the supplier or contractor may have been required to provide;<sup>6</sup>

(f) The final tenders shall be evaluated<sup>7</sup> in order to ascertain the successful tender as defined in article [37 (4) (b)] of this Law.

---

submission as abnormally low), which is not applicable here since no tender price is known to the procuring entity at this stage of examination).

<sup>4</sup> Suggestions were made during the intersessional consultations to refer in these provisions to article [22] of this Law. Since article 22 in the relevant part is applicable not only to this subparagraph but also to subparagraphs (c) and (d) as well as to paragraph (3) above, the Secretariat's understanding is that making a cross-reference to article 22 only in this provision will be misleading. Since article 22 is of general application, the Working Group may wish to consider that cross-references to it, where appropriate, in the accompanying Guide text alone would be sufficient. As regards specifically this article, the accompanying Guide text would explain which provisions of article 22 are relevant to paragraph (3), which to subparagraphs (b) and (c) and which to subparagraphs (d), of paragraph (4). The overall objective is to emphasize, that not only during the discussions, but also in revising the solicitation documents and communicating revisions to the suppliers or contractors, the procuring entity should respect the confidentiality of the suppliers or contractors' technical proposals used in the first stage, consistent with requirements of article 22 of the Law. It will highlight the importance of this safeguard to ensure participation of suppliers or contractors in this type of two-stage procurement proceedings.

<sup>5</sup> The accompanying Guide text will explain that changes to technical or quality characteristics may necessarily require changes to the examination and/or evaluation criteria, as otherwise the examination and/or evaluation criteria at the second stage would not reflect the applicable technical and quality criteria.

<sup>6</sup> The accompanying Guide text will explain the application of the article on tender securities in the context of two-stage proceedings, in particular at which stage of the proceedings tender securities may be required.

<sup>7</sup> Amended pursuant to A/CN.9/690, para. 18.

**Article 43. Request for proposals with dialogue<sup>8</sup>**

(1) The procuring entity shall solicit proposals by issuing an invitation to participate in the request for proposals with dialogue proceedings in accordance with article [29 quater] of this Law except as otherwise provided for in that article.

(2) The invitation shall include:

(a) The name and address of the procuring entity;

(b) A description of the subject matter of the procurement to the extent known, and the desired or required time and location for the provision of such subject matter;

(c) The terms and conditions of the procurement contract, to the extent that they are already known to the procuring entity, and the contract form, if any, to be signed by the parties;

(d) The intended stages of the procedure;

(e) The criteria and procedures to be used for ascertaining the qualifications of suppliers or contractors and any documentary evidence or other information that must be presented by suppliers or contractors to demonstrate their qualifications, in conformity with article [9] of this Law;

(f) The minimum requirements that proposals must meet in order to be considered responsive in accordance with article [10] of this Law, and a statement that proposals that fail to meet those requirements will be rejected as non-responsive;

(g) A declaration pursuant to article [8] of this Law;

(h) The means of obtaining the request for proposals and the place where it may be obtained;

(i) The price, if any, charged by the procuring entity for the request for proposals;

(j) If a price is charged for the request for proposals, the means and currency of payment for the request for proposals;<sup>9</sup>

---

<sup>8</sup> The accompanying Guide text will explain that this procurement method is available for all types of procurement, including the procurement of non-quantifiable advisory services. It will further explain that in the latter type of procurement, regulations could provide additional steps or provisions. For example, proposals need not contain financial elements or prices where the cost is not an evaluation criterion or not a significant evaluation criterion. As regards evaluation criteria in such type of procurement, the Guide could explain that for non-quantifiable advisory services, they usually include (i) the service-provider's experience for the specific assignment, (ii) the quality of the understanding of the assignment under consideration and of the methodology proposed, (iii) the qualifications of the key staff proposed, (iv) transfer of knowledge, if such transfer is relevant to the procurement or is a specific part of the description of the assignment, and (v) when applicable, the extent of participation by nationals among key staff in the performance of the services.

<sup>9</sup> Amended pursuant to A/CN.9/690, para. 22(b). The accompanying Guide text will note that the procuring entity may decide not to include reference to the currency of payment in domestic procurement, if it would be unnecessary in the circumstances.

(k) The language or languages in which the requests for proposals are available;<sup>10</sup>

(l) The manner, place and deadline for presenting proposals.<sup>11</sup>

(3) For the purpose of limiting the number of suppliers or contractors from whom to request proposals, the procuring entity may engage in pre-selection proceedings. The provisions of article [16] of this Law shall apply *mutatis mutandis* to the pre-selection proceedings, except to the extent that those provisions are derogated from in this paragraph:

(a) The procuring entity shall specify in the pre-selection documents that it will request proposals only from a limited number of pre-selected suppliers or contractors that best meet the qualification criteria specified in the pre-selection documents;

(b) The pre-selection documents shall set out the maximum number of pre-selected suppliers or contractors from whom the proposals will be requested and the manner in which the selection of that number will be carried out. In establishing such a number the procuring entity shall bear in mind the need to ensure the effective competition;

(c) The procuring entity shall rate the suppliers or contractors that meet the qualifications criteria specified in the pre-selection documents according to the manner of rating that is set out in the invitation to pre-selection and the pre-selection documents.

(d) The procuring entity shall pre-select suppliers or contractors that acquired the best rating up to the maximum number indicated in the pre-selection documents but at least three if possible;

(e) The procuring entity shall promptly notify each supplier or contractor whether or not it has been pre-selected and shall upon request communicate to suppliers or contractors that have not been pre-selected the reasons therefor. It shall make available to any member of the general public, upon request, the names of all suppliers or contractors that have been pre-selected.

(4) The procuring entity shall issue the request for proposals:

(a) Where an invitation to participate in the request for proposals with dialogue proceedings has been issued in accordance with the provisions of article [29 quater] of this Law, to each supplier or contractor that responds to the invitation in accordance with the procedures and requirements specified therein;

(b) In the case of pre-qualification, to each supplier or contractor pre-qualified in accordance with article [16] of this Law;

---

<sup>10</sup> Amended pursuant to A/CN.9/690, para. 22(b). The accompanying Guide text will note that the procuring entity may decide not to include this information in domestic procurement, if it would be unnecessary in the circumstances, and will add that an indication of the language or languages may still be important in some multilingual countries.

<sup>11</sup> Some amendments were made in the listing to align it with the list in article 41 of the current draft.

(c) Where pre-selection proceedings have been engaged in, to each pre-selected supplier or contractor in accordance with the procedures and requirements specified in the pre-selection documents;

(d) In the case of direct solicitation, to each supplier or contractor selected by the procuring entity;

that pays the price, if any, charged for the request for proposals. The price that the procuring entity may charge for the request for proposals shall reflect only the cost of providing it to suppliers or contractors.<sup>12</sup>

(5) The request for proposals shall include, in addition to the information referred to in paragraphs (2)(a) to (f) and (l) of this article, the following information:

(a) Instructions for preparing and presenting proposals;

(b) If suppliers or contractors are permitted to present proposals for only a portion of the subject matter of the procurement, a description of the portion or portions for which proposals may be presented;

(c) The currency or currencies in which the proposal price is to be formulated or expressed, and the currency that will be used for the purpose of evaluating proposals, and either the exchange rate that will be used for the conversion of proposal prices into that currency or a statement that the rate published by a specified financial institution prevailing on a specified date will be used;<sup>13</sup>

(d) The manner in which the proposal price is to be formulated or expressed, including a statement as to whether the price is to cover elements other than the cost of the subject matter of the procurement, such as reimbursement for transportation, lodging, insurance, use of equipment, duties or taxes;

(e) The means by which, pursuant to article [14] of this Law, suppliers or contractors may seek clarifications of the request for proposals, and a statement as to whether the procuring entity intends, at this stage, to convene a meeting of suppliers or contractors;

(f) Any elements of the description of the subject matter of the procurement or term or condition of the procurement contract that will not be the subject of dialogue during the procedure;

(g) Where the procuring entity intends to limit the number of suppliers or contractors that it will invite to participate in the dialogue, the minimum number of suppliers or contractors, which shall be not lower than three, if possible, and, where appropriate, the maximum number and the criteria and procedure, in conformity with the provisions of this Law, that will be followed in selecting it;

---

<sup>12</sup> Amended to align with the similar wording found elsewhere in the current draft.

<sup>13</sup> Based on article 38 (j) and (n) of the 1994 Model Law. Amended pursuant to A/CN.9/690, para. 22(b). The accompanying Guide text will note that the procuring entity may decide not to include reference to the currency in domestic procurement, if it would be unnecessary in the circumstances.

(h) The criteria and procedure for evaluating the proposals in accordance with article [11] of this Law;<sup>14</sup>

(i) References to this Law, the procurement regulations and other laws and regulations directly pertinent to the procurement proceedings, including those applicable to procurement involving classified information, and the place where these laws and regulations may be found;

(j) The name, functional title and address of one or more officers or employees of the procuring entity who are authorized to communicate directly with and to receive communications directly from suppliers or contractors in connection with the procurement proceedings, without the intervention of an intermediary;

(k) Notice of the right provided under article [61] of this Law to seek review of non-compliance with the provisions of this Law together with information about duration of a standstill period and, if none will apply, a statement to that effect and reasons therefor;

(l) Any formalities that will be required once the proposal has been accepted for a procurement contract to enter into force, including, where applicable, the execution of a written procurement contract, and approval by a higher authority or the Government and the estimated period of time following dispatch of the notice of acceptance that will be required to obtain the approval;

(m) Any other requirements that may be established by the procuring entity in conformity with this Law and the procurement regulations relating to the preparation and presentation of proposals and to the procurement proceedings.<sup>15, 16</sup>

(6) (a) The procuring entity shall examine all proposals received against the established minimum requirements and shall reject each proposal that fails to meet these minimum requirements on the ground that it is non-responsive;

(b) Where the limitation on the number of suppliers or contractors that can be invited to participate in the dialogue was established and the number of responsive proposals exceeds that maximum, the procuring entity shall select the maximum number of responsive proposals in accordance with the criteria and procedure specified in the request for proposals;

(c) The notice of rejection and reasons for rejection shall be promptly dispatched to each respective supplier or contractor whose proposal was rejected.

(7) The procuring entity shall invite each supplier or contractor that presented a responsive proposal, within any applicable maximum, to participate in dialogue. The procuring entity shall ensure that the number of suppliers invited to participate in the dialogue is sufficient to ensure effective competition, and shall be at least three, if possible.

---

<sup>14</sup> The accompanying Guide text will address the question of sub-criteria and provide the guidance that would be needed to ensure that a true picture of the evaluation criteria is given. Different procurements might require different levels of flexibility in this regard.

<sup>15</sup> Amended pursuant to A/CN.9/690, para. 22(c). The accompanying Guide text will elaborate on the benefit of including information as regards the timetable envisaged for the procedure.

<sup>16</sup> Some amendments were made in the listing to align it with the list in article 41 of the current draft.

(8) The dialogue shall be conducted by the same representatives of the procuring entity on a concurrent basis.

(9) During the course of the dialogue, the procuring entity shall not modify the subject matter of the procurement, nor any qualification or evaluation criterion, nor any minimum requirements established pursuant to paragraph (2) (f) of this article, nor any elements of the description of the subject matter of the procurement or term or condition of the procurement contract<sup>17</sup> that is not subject to the dialogue as notified in the request for proposals.<sup>18</sup>

(10) Any requirements, guidelines, documents, clarifications or other information generated during the dialogue that are communicated by the procuring entity to a supplier or contractor shall be communicated at the same time on an equal basis to all other participating suppliers or contractors, unless they are specific or exclusive to that supplier or contractor, or such communication would be in breach of the confidentiality provisions of article [22] of this Law.<sup>19</sup>

(11) Following the dialogue, the procuring entity shall request all suppliers or contractors remaining in the proceedings to present a best and final offer with respect to all aspects of their proposals. The request shall be in writing, and shall specify the manner, place and deadline for presenting best and final offers.

(12) No negotiations shall take place between the procuring entity and suppliers or contractors with respect to their best and final offers.<sup>20</sup>

(13) The successful offer shall be the offer that best meets the needs of the procuring entity as determined in accordance with the criteria and procedure for evaluating the proposals set out in the request for proposals.

---

<sup>17</sup> Amended to align with paragraphs (2)(f) and (5)(f) of this article.

<sup>18</sup> The accompanying Guide text will explain why other changes need to be permitted in this procurement method, and that the evaluation criteria should be drafted at a level of detail that will avoid arbitrariness. It will further explain that the provisions seek to prevent the procuring entity from making the changes described (but would not prevent suppliers from making changes in their proposals as a result of the dialogue) (A/CN.9/690, para. 22(d)).

<sup>19</sup> The accompanying Guide text will cross-refer to article 22 that addresses consent to disclosure of the confidential information among suppliers.

<sup>20</sup> Added to mitigate one of the concerns raised by multilateral development banks as regards this procurement method.

#### Article 44. Request for proposals with consecutive negotiations<sup>21</sup>

(1) The provisions of article [41 (1)-(7)]<sup>22</sup> of this Law shall apply mutatis mutandis to procurement conducted by means of request for proposals with consecutive negotiations, except to the extent those provisions are derogated from in this article.

<sup>21</sup> The Working Group has decided that this procurement method should not be limited to advisory services, but that the accompanying Guide text will discuss the history and use of the method, in particular in the projects financed by multilateral development banks, to enable enacting States to decide whether to restrict it when drafting legislation based on the Model Law (A/CN.9/690, para. 26). The suggestions during the intersessional consultations were to the effect that the accompanying Guide text should also discuss the significant negotiating disadvantage caused by consecutive negotiations, in particular through losing benefit of leverage of concurrent negotiations (the procuring entity being at a disadvantage since the first ranked supplier has little incentive to negotiate). The accompanying Guide text, it was suggested, will point out that these disadvantages might be partly mitigated by the solicitation documents fixing a period for the negotiations and by the first ranking supplier facing a risk that negotiations with the procuring entity may be terminated at any time and may succeed with other participating suppliers since they will have incentive to improve their bids to win. The accompanying Guide text will nevertheless point out that the procuring entity may still incur transaction costs and face embarrassment risk if it has to terminate negotiations with the first ranked supplier (the procuring entity will unavoidably face criticism for saving at expense of quality and technical considerations). The Guide should discuss therefore that whether this method is appropriate depends on circumstances (e.g. where the procuring entity can indeed afford to compromise on quality; if it cannot, the article 41 procurement method seems to be the only alternative) as will also depend on circumstances whether the procuring entity would ever want to go to the second, third, fourth, etc., best supplier (if the quality gap between them is very big, the procuring entity can always cancel the procurement). Despite all these disadvantages, the Guide will explain that for the type of procurement intended to be covered by this procurement method, envisaging simultaneous negotiations in this procurement method as the alternative to consecutive negotiations, because of corruption risk, is not appropriate. The accompanying Guide text will also have to discuss why the Working Group decided to abandon the idea of permitting the procuring entity to select the best offer at the end of the consecutive negotiations with all the responsive suppliers, and decided to provide instead that the procuring entity should not be able to award the contract to a supplier with which negotiations had been terminated (A/CN.9/690, para. 30). In this respect, the Working Group may wish to review the adequacy of the explanation in the relevant footnote below.

<sup>22</sup> Although the previous drafts cross-referred to the provisions of article 43, in the light of the amendments made in the conditions for use of this procurement method in article 27 (3) of the current draft, the Secretariat's understanding is that this method should be considered as a variation of the article 41 rather than the article 43 method (which would also be consistent with the approach of the 1994 Model Law (see article 44)). The paragraph in this draft was redrafted accordingly. Although at its eighteenth session the Working Group agreed that pre-selection should be envisaged in this procurement method (A/CN.9/690, para. 31), the Secretariat's understanding is that pre-selection would not be appropriate either in the article 41 or article 44 procurement method. The Working Group agreed to introduce provisions on pre-selection in article 43 on the ground that holding simultaneous negotiations with a large number of qualified suppliers will be time- and cost-consuming, especially in the light of the type of procurement intended to be covered by article 43 (large and complex, similar to the ones covered by the UNCITRAL instruments on privately financed infrastructure projects, where pre-selection is also provided for). The situation is different in the article 41 and 44 procurement methods intended to deal with simpler types of procurement, where the bigger the pool of the responsive bidders the higher are chances of selecting the submission that meets best the needs of a procuring entity. Both of those methods provide for a straightforward procedure for the selection of the successful submission and thus time and cost considerations are not relevant.

(2) The proposals whose technical and quality characteristics meet or exceed the relevant minimum requirements shall be considered to be responsive.<sup>23</sup> The procuring entity shall rate<sup>24</sup> each responsive proposal in accordance with the criteria and procedure for evaluating proposals as set out in the request for proposals, and shall:

(a) Promptly communicate to each supplier or contractor presenting the responsive proposal the score of the technical and quality characteristics of its respective proposal and its rating;<sup>25</sup>

(b) Invite the supplier or contractor that has attained the best rating in accordance with those criteria and procedure for negotiations on the financial aspects of its proposal;<sup>26</sup> and

(c) Inform other suppliers or contractors that presented responsive proposals that they may be considered for negotiation if the negotiations with the suppliers or contractors with better ratings do not result in a procurement contract.

(3) If it becomes apparent to the procuring entity that the negotiations with the supplier or contractor invited pursuant to paragraph (2)(b) of this article will not result in a procurement contract, the procuring entity shall inform that supplier or contractor that it is terminating the negotiations.<sup>27</sup>

(4) The procuring entity shall then invite for negotiations the supplier or contractor that attained the second best rating; if the negotiations with that supplier or contractor do not result in a procurement contract, the procuring entity shall invite the other suppliers or contractors still participating in the procurement

---

<sup>23</sup> The first sentence was added to align with the corresponding provisions in article 41 (8) of the current draft.

<sup>24</sup> The Working Group may wish to consider whether the terms “rank” and “ranking” should replace the words “rate” and “rating” throughout this article as compared to article 41.

<sup>25</sup> This subparagraph was added to align with the corresponding provisions in article 41 (8) of the current draft.

<sup>26</sup> Amended pursuant to A/CN.9/690, para. 29. The accompanying Guide text will explain, with a cross-reference to paragraph (5) of this article, that no aspects of the proposal that have been considered as part of the assessment of responsiveness and evaluation of quality and technical characteristics of proposals should subsequently be open for negotiation.

<sup>27</sup> The accompanying Guide text to this and other provisions in this article referring to the notion “termination of negotiations” will explain that this notion means to encompass the rejection of a supplier’s final price proposal and the consequent exclusion of that supplier from further participation in the procurement proceedings. Thus no procurement contract could be awarded to the supplier(s) with whom the negotiations were terminated pursuant to article 44 (3) and (4). The Guide will further point out that UNCITRAL carefully considered views that this approach might be viewed as excessively rigid, since only at the end of the process would the procuring entity know which was in fact the best offer, and further views that, although the procuring entity should not be permitted to reopen negotiations, to avoid open-ended negotiations that could lead to abuse and cause delay, it should be permitted to accept that best offer (and award the contract to the supplier that had proposed it). UNCITRAL however chose to impose the prohibition in article 44 (6), in order not to overemphasize competition on financial aspects in types of procurement for which this procurement method is primarily designed (such as in the procurement of architectural and engineering services) where considerations of technical quality are particularly important (A/CN.9/690, para. 30, and the relevant wording from the 1994 Guide to Enactment).

proceedings for negotiations on the basis of their ranking until it arrives at a procurement contract or rejects all remaining proposals.

(5) During the course of the negotiations, the procuring entity shall not modify the subject matter of the procurement, nor any qualification, examination or evaluation criterion, including any established minimum requirements, nor any elements of the description of the subject matter of the procurement or term or condition of the procurement contract other than financial aspects of proposals that are subject to the negotiations as notified in the request for proposals.<sup>28</sup>

(6) The procuring entity may not reopen negotiations with any supplier or contractor with which it has terminated negotiations.<sup>29</sup>

#### **Article 45. Competitive negotiations<sup>30</sup>**

(1) The provisions of article [29 ter] of this Law shall apply to the procedure preceding the negotiations.<sup>31</sup>

(2) Any requirements, guidelines, documents, clarifications or other information relative to the negotiations that are communicated by the procuring entity to a supplier or contractor before or during the negotiations shall be communicated on an equal basis to all other suppliers or contractors engaging in negotiations with the procuring entity relative to the procurement, unless they are specific or exclusive to that supplier or contractor, or such communication would be in breach of the confidentiality provisions of article [22] of this Law.

(3) Following completion of negotiations, the procuring entity shall request all suppliers or contractors remaining in the proceedings to present, by a specified date, a best and final offer with respect to all aspects of their proposals.<sup>32</sup>

<sup>28</sup> Amended pursuant to A/CN.9/690, para. 29, and in the light of the deletion of the definition “material change”. The provisions draw on article 43 (9) of the current draft.

<sup>29</sup> Amended pursuant to A/CN.9/690, para. 30. The Guide will explain what is meant by “termination” of negotiations. See the relevant footnote above.

<sup>30</sup> The accompanying Guide text will explain that this method is an alternative to single-source procurement rather than to the other methods in chapter V of the Model Law, and that it primarily aims to address situations of urgency. The Guide will explain that in selecting between competitive negotiations and single-source procurement under appropriate circumstances, the procuring entity will have to take into account the requirement of article 25 (2) of the Law to maximize competition, and the need to assess the level of urgency (A/CN.9/690, paras. 33 and 34).

<sup>31</sup> Amended pursuant to the new article 29 ter that incorporates what was the first sentence in this paragraph.

<sup>32</sup> It was suggested during the intersessional consultations that this paragraph should be deleted as no request of best and final offers will follow this type of negotiations. The Secretariat draws the Working Group’s attention that the provisions are based on article 49 (4) of the 1994 Model Law, which the Working Group has not so far decided to amend. The Working Group may wish to consider that the deletion of this paragraph may eliminate the only safeguard against abuses in this procurement method. In particular, the referred stage puts all participating suppliers on an equal footing as regards receiving information about termination of negotiations. It also leaves traces for the audit as regards all actual offers that were before the procuring entity and that it should have considered in making the selection in accordance with paragraph (4) of this article. Without that stage, much discretion is given to the procuring entity to decide with whom

(4) The successful offer shall be the offer that best meets the needs of the procuring entity.

#### **Article 46. Single-source procurement**

The provisions of article [29 ter] of this Law shall apply to the procedure preceding the solicitation of a proposal or price quotation from a single supplier or contractor. The procuring entity shall engage in negotiations with the supplier or contractor from which a proposal or price quotation is solicited unless such negotiations are not feasible in the circumstances of the procurement concerned.<sup>33</sup>

---

to conclude the contract, with no transparency and verifiable traces in the process that would allow effective challenge.

<sup>33</sup> Amended pursuant to A/CN.9/690, paras. 36 and 37, and new article 29 ter that incorporates what was the old first sentence of this article. The first sentence of this article in the current draft was revised accordingly. The accompanying Guide text will elaborate on the utility for the procuring entity to negotiate and request, when feasible and necessary, market data or costs clarifications, in order to avoid unreasonably priced proposals or quotations. It will also underscore single-source procurement as the method of last resort after all other alternatives had been exhausted, and will encourage the use of framework agreements to anticipate urgent procurement (A/CN.9/690, para. 36).

**(A/CN.9/WG.I/WP.75/Add.6) (Original: English)**

**Note by the Secretariat on possible revisions to the UNCITRAL Model Law on Procurement of Goods, Construction and Services — a revised text of the Model Law, submitted to the Working Group on Procurement at its nineteenth session**

**ADDENDUM**

This note sets out a proposal for chapter VI (Auctions) of the revised Model Law, comprising articles 47 to 51.

The Secretariat's comments are set out in the accompanying footnotes.

**CHAPTER VI. AUCTIONS**

**Article 47. Procedures for soliciting participation in procurement by means of an auction**

(1) The procuring entity shall solicit bids by issuing an invitation to the auction in accordance with the provisions of article [29 bis]. The invitation shall include:

- (a) The name and address of the procuring entity;
- (b) A description of the subject matter of the procurement, in conformity with article [10] of this Law, and the desired or required time and location for the provision of such subject matter;
- (c) The terms and conditions of the procurement contract, to the extent they are already known to the procuring entity, and the contract form, if any, to be signed by the parties;
- (d) A declaration pursuant to article [8] of this Law;
- (e) The criteria and procedures to be used for ascertaining the qualifications of suppliers or contractors and any documentary evidence or other information that must be presented by suppliers or contractors to demonstrate their qualifications in conformity with article [9] of this Law;
- (f) The criteria and procedure for examination of bids against the description of the subject matter of the procurement;<sup>1</sup>
- (g) The criteria and procedure for evaluation of bids in conformity with article [11 (5)] of this Law, including any mathematical formula that will be used in the evaluation procedure during the auction;<sup>2</sup>
- (h) [deleted];<sup>3</sup>

---

<sup>1</sup> The accompanying Guide text will explain that the examination might take place after the auction, as provided in article 51.

<sup>2</sup> The reference to "any criteria that cannot be varied during the auction" used in the end of this provision in the previous drafts was deleted since it seems referring to examination/responsiveness criteria already covered by subparagraph (f) of this paragraph.

(i) The manner in which the bid price is to be formulated and expressed, including a statement as to whether the price is to cover elements other than the cost of the subject matter of the procurement itself, such as any applicable transportation and insurance charges, customs duties and taxes;

(j) The currency or currencies in which the bid price is to be formulated and expressed;<sup>4</sup>

(k) The minimum number of suppliers or contractors required to register for the auction in order for the auction to be held, which shall be sufficient to ensure effective competition;<sup>5</sup>

(l) If any limitation on the number of suppliers or contractors that can be registered for the auction is imposed in accordance with paragraph (2) of this article, the relevant maximum number and the criteria and procedure, in conformity with the provisions of this Law, that will be followed in selecting it;

(m) How the auction can be accessed, including appropriate information for connection to the auction;<sup>6</sup>

(n) The deadline by which the suppliers and contractors shall register for the auction and the requirements for registration;

(o) The date and time of the opening of the auction and the requirements for identification of bidders at the opening of the auction;

(p) [deleted];<sup>7</sup>

(q) The criteria governing the closing of the auction;

(r) Other rules for the conduct of the auction, including the information that will be made available to the bidders in the course of the auction, the language in

---

<sup>3</sup> Reference to possibility of submitting bids for a portion or portions of the subject matter of the procurement was deleted since this would imply holding several separate auctions within the same procurement proceedings.

<sup>4</sup> Amended pursuant to A/CN.9/690, para. 22 (b). The accompanying Guide text will note that the procuring entity may decide not to include this information in domestic procurement if it would be unnecessary in the circumstances.

<sup>5</sup> The accompanying Guide text will address the issues of objectivity and fairness of treatment, as was suggested in the Working Group, and reasons for not setting any minimum in the Model Law as is done for example in request for proposals proceedings.

<sup>6</sup> The phrase “including appropriate information for connection to the auction” replaced the phrase “information about the equipment being used and technical specifications for connection” used in the previous drafts, as the former is more technology neutral. The accompanying Guide text will specify technical aspects that should be provided (such as website, any particular software, features, capacity, the equipment being used and technical specifications for connection).

<sup>7</sup> The provisions reading “whether there will be only a single stage of the auction, or multiple stages (in which case, the number of stages and the duration of each stage)” were deleted on the understanding that there will be no need for separate stages if there is no exclusion of bidders at the end of each stage. The Working Group may wish to consider that, even if the possibility of holding a multi-staged auction is to be preserved, information at this level of detail can be provided in the rules for the conduct of the auction referred to in subparagraph (r) of this paragraph.

which it will be made available<sup>8</sup> and the conditions under which the bidders will be able to bid;

(s) References to this Law, the procurement regulations and other laws and regulations directly pertinent to the procurement proceedings, including those applicable to procurement involving classified information, and the place where these laws and regulations may be found;

(t) The means by which suppliers or contractors may seek clarifications of information relating to the procurement proceedings;<sup>9</sup>

(u) The name, functional title and address of one or more officers or employees of the procuring entity who are authorized to communicate directly with and to receive communications directly from suppliers or contractors in connection with the procurement proceedings before and after the auction,<sup>10</sup> without the intervention of an intermediary;

(v) [deleted];<sup>11</sup>

(w) Notice of the right provided under article [61] of this Law to seek review of non-compliance with the provisions of this Law together with information about duration of the applicable standstill period and, if none will apply, a statement to that effect and reasons therefor;

(x) Any formalities that will be required after the auction for a procurement contract to enter into force, including, where applicable, ascertainment of qualifications or responsiveness in accordance with article [51] of this Law and the execution of a written procurement contract pursuant to article [20] of this Law;<sup>12</sup>

(y) Any other requirements established by the procuring entity in conformity with this Law and the procurement regulations relating to the procurement proceedings.<sup>13</sup>

<sup>8</sup> The Secretariat's understanding is that the accompanying Guide text should note (so as to be consistent with the Working Group's decisions on similar provisions regarding language) that the procuring entity may decide not to include this information in domestic procurement, if it would be unnecessary in the circumstances, but that an indication of the language or languages may still be important in some multilingual countries (see A/CN.9/690, para. 22 (b)).

<sup>9</sup> The additional standard provisions used in this context throughout the Model Law reading "and a statement as to whether the procuring entity intends, at this stage, to convene a meeting of suppliers or contractors" were omitted here since they will be inappropriate in the auction setting where preserving the anonymity of bidders is paramount. The accompanying Guide text will elaborate on this discrepancy.

<sup>10</sup> The phrase "before and after the auction" was added in the light of article 50 (2) (d) of the current draft.

<sup>11</sup> Reference to any commitments to be made by the supplier or contractor outside the procurement contract was deleted pursuant to A/CN.9/690, para. 39 (h).

<sup>12</sup> The additional standard provisions used in this context throughout the Model Law reading "and approval by a higher authority or the Government and the estimated period of time following the dispatch of the notice of acceptance that will be required to obtain the approval" were omitted here in the light of the conditions for the use of stand-alone auctions. It is unlikely that approval by a higher authority or the Government would be required for procurement of subject matter envisaged by article 28 (1) of the current draft.

<sup>13</sup> It was suggested during the intersessional consultations that the accompanying Guide text should highlight that if there were to be any entry fee for the auction (not recommended in the

(2) The procuring entity may impose a maximum number of suppliers or contractors that can be registered for the auction only to the extent that capacity limitations in its communication system so require.<sup>14</sup> The procuring entity shall include a statement of the reasons and circumstances upon which it relied to justify the imposition of such a maximum in the record required under article [23] of this Law.

(3)<sup>15</sup> The procuring entity may decide in the light of the circumstances of the given procurement that the auction shall be preceded by an examination or evaluation of initial bids.<sup>16</sup> In such case, the invitation to the auction shall, in addition to information listed in paragraph (1) of this article, include:

(a) An invitation to present initial bids together with the instructions for preparing initial bids;<sup>17</sup>

(b) The manner, place and deadline for presenting initial bids.<sup>18</sup>

(4) Where the auction has been preceded by the examination or evaluation of initial bids, the procuring entity shall promptly after the completion of the examination or evaluation of initial bids:

(a) Dispatch the notice of rejection and reasons for rejection to each supplier or contractor whose initial bid was rejected;

(b) Issue an invitation to the auction to each qualified supplier or contractor whose initial bid is responsive, providing all information required to participate in the auction;

---

light of the Working Group's conclusions at its earlier sessions in the context of discussion of the article 7 provisions and ERAs), at a minimum it must be disclosed at the outset of the procurement.

<sup>14</sup> The phrase "only to the extent that capacity limitations in its communication system so require" replaced the previously used phrase "for technical reasons or capacity limitations". The Secretariat's understanding is that there should be no capacity limitations other than arising out of technical reasons. The suggested wording is aligned with article 50 (5) with reference to "its communication system".

<sup>15</sup> The accompanying Guide text will explain that the enacting State may omit the next two paragraphs if it decides to provide in its national public procurement law only for very simple auctions, not involving any pre-auction stage other than registration for the auction. The Guide will point out however that even in this type of auctions, if the procuring entity has to impose a limit on the number of bidders because of capacity limitations in its communication system (see para. (2) of this article), it may prefer to limit the pool to those qualified and responsive bidders rather than to the defined maximum number of the bidders that were registered first.

<sup>16</sup> The accompanying Guide text will note that the ascertainment of qualifications of suppliers is inherent in examination or evaluation of initial bids.

<sup>17</sup> The phrase reading "including the language or languages, in conformity with article [13] of this Law, in which initial bids are to be prepared" that had been included in the end of this provision in the previous drafts was deleted in the current draft. It is the Secretariat's understanding that it would be sufficient for the accompanying Guide text to refer to this point. To be consistent with the Working Group's decisions on similar provisions regarding language, the Guide would also point out that the procuring entity may decide not to include this information in domestic procurement, if it would be unnecessary in the circumstances, but that an indication of the language or languages may still be important in some multilingual countries (see A/CN.9/690, para. 22 (b)).

<sup>18</sup> The accompanying Guide text will cross-refer to paragraph (1) (f) and (g) as regards the criteria for examination and evaluation of bids, which will also be applicable to initial bids.

(c) Where an evaluation of initial bids has taken place, each invitation to the auction shall also be accompanied by the outcome of the evaluation as relevant to the supplier or contractor to which the invitation is addressed.<sup>19, 20</sup>

**Article 48. Procedures for soliciting participation in procurement proceedings involving an auction as a phase preceding the award of the procurement contract<sup>21</sup>**

(1) Where an auction is to be used as a phase preceding the award of the procurement contract in a procurement method, as appropriate, or in a framework agreement procedure with second stage competition, the procuring entity shall notify suppliers and contractors when first soliciting their participation in the procurement proceedings, that an auction will be held and shall provide, in addition to other information required to be included under provisions of this Law, the following information about the auction:

(a) The mathematical formula<sup>22</sup> that will be used in the evaluation procedure during the auction;<sup>23</sup>

(b) How the auction can be accessed, including appropriate information for connection to the auction.

(2) Before the auction is held, the procuring entity shall issue an invitation to the auction to all suppliers or contractors remaining in the proceedings specifying:

(a) The deadline by which the suppliers and contractors shall register for the auction and requirements for registration;

(b) The date and time of the opening of the auction and requirements for identification of bidders at the opening of the auction;

(c) [deleted];<sup>24</sup>

(d) Criteria governing the closing of the auction;

(e) Other rules for the conduct of the auction, including the information that will be made available to the bidders in the course of the auction, the language in

<sup>19</sup> The accompanying Guide text will address the extent of the information on the outcome of the full evaluation that should be provided.

<sup>20</sup> The provisions referring to the obligation of the procuring entity to ensure that the number of suppliers or contractors invited to register for the auction is sufficient to ensure effective competition were deleted in the current draft since the procuring entity would have no means to ensure that: all responsive bidders would have to be invited up to any maximum specified in the invitation to the auction. The procuring entity cannot enlarge the pool of responsive bidders if it turned out to be small. In such case, provisions of article 49 (2) would apply.

<sup>21</sup> The title was shortened pursuant to A/CN.9/690, para. 42 (a).

<sup>22</sup> The Working Group, at its eighteenth session, agreed to amend this wording by replacing the narrow reference to a mathematical formula with a broader reference to an automatic evaluation method, including a formula, drawing on the relevant wording of the 2006 version of the GPA (A/CN.9/690, para. 42 (c)). This has been done by an addition to the definition of the auction in article 2, and is addressed in article 50 (2) (b).

<sup>23</sup> Reference to “any criteria that cannot be varied during the auction” used in the end of this provision in the previous drafts was deleted. See the relevant footnote above as regards article 47 (1) (g).

<sup>24</sup> See the relevant footnote above regarding the stages of the auction.

which it will be made available<sup>25</sup> and the conditions under which the bidders will be able to bid.

#### **Article 49. Registration for the auction and timing of holding of the auction**

- (1) Confirmation of registration for the auction shall be communicated promptly to each registered supplier or contractor.
- (2) If the number of suppliers or contractors registered for the auction is insufficient to ensure effective competition,<sup>26</sup> the procuring entity may cancel the auction. The cancellation of the auction shall be communicated promptly to each registered supplier or contractor.
- (3) The period of time between the issuance of the invitation to the auction and the auction shall be sufficiently long to allow suppliers or contractors to prepare for the auction, taking into account the reasonable needs of the procuring entity.<sup>27</sup>

#### **Article 50. Requirements during the auction**

- (1) The auction shall be based on:
  - (a) Price, where the procurement contract is to be awarded to the lowest priced bid; or
  - (b) Price and other criteria specified to suppliers or contractors under articles [47 and 48] of this Law, as applicable, where the procurement contract is to be awarded to the most advantageous bid.
- (2) During the auction:
  - (a) All bidders shall have an equal and continuous opportunity to present their bids;
  - (b) There shall be automatic evaluation of all bids in accordance with the criteria, procedure and formula provided to suppliers or contractors under articles [47 and 48] of this Law, as applicable;
  - (c) Each bidder must receive, instantaneously and on a continuous basis during the auction, sufficient information allowing it to determine the standing of its bid vis-à-vis other bids;<sup>28</sup>

---

<sup>25</sup> The Secretariat's understanding is that the accompanying Guide text should note (so as to be consistent with the Working Group's decisions on similar provisions regarding language) that the procuring entity may decide not to include this information in domestic procurement, if it would be unnecessary in the circumstances, but that an indication of the language or languages may still be important in some multilingual countries (see A/CN.9/690, para. 22 (b)).

<sup>26</sup> Amended pursuant to A/CN.9/690, para. 45.

<sup>27</sup> The accompanying Guide text will explain that this period must be sufficiently long also to allow effective review of the terms of solicitation under chapter VIII of this Law. According to the relevant provisions of that chapter in the current draft, the terms of solicitation can be challenged only up to the deadline for presentation of submissions, which in simple auctions (with no pre-auction examination or evaluation of initial bids) will mean up to the opening of the auction.

<sup>28</sup> The accompanying Guide text will highlight the risks of collusion that might arise where information about other bids is provided. It will also highlight risks of suppliers being able to

(d) There shall be no communication between the procuring entity and the bidders or among the bidders, other than as provided for in subparagraphs (a) and (c) of this paragraph.

(3) The procuring entity shall not disclose the identity of any bidder during the auction.

(4) The auction shall be closed in accordance with the criteria specified to suppliers or contractors under articles [47 and 48] of this Law, as applicable.

(5) The procuring entity shall suspend or terminate the auction in the case of failures in its communication system that risk the proper conduct of the auction or for other reasons stipulated in the rules for the conduct of the auction. The procuring entity shall not disclose the identity of any bidder in the case of suspension or termination of the auction.<sup>29</sup>

#### **Article 51. Requirements after the auction**

(1) The bid that at the closure of the auction is the lowest priced bid or the most advantageous bid, as applicable, shall be the successful bid.

(2) In procurement by means of an auction where the auction was not preceded by examination or evaluation of initial bids,<sup>30</sup> the procuring entity shall ascertain after the auction the responsiveness of the successful bid and the qualifications of the supplier or contractor submitting it. The procuring entity shall reject that bid if it is found to be unresponsive or the supplier or contractor submitting it is found unqualified. Without prejudice to the right of the procuring entity to cancel the procurement in accordance with article [17 (1)] of this Law, the procuring entity shall select the bid that was the next lowest priced or next most advantageous bid at the closure of the auction, provided that that bid is ascertained to be responsive and the supplier submitting it is ascertained to be qualified.

(3) Where the successful bid at the closure of the auction appears to the procuring entity to be abnormally low and gives rise to concerns of the procuring entity as to the ability of the bidder that presented it to perform the procurement contract, the procuring entity may follow the procedures described in article [18] of this Law. If the procuring entity rejects the bid as abnormally low under article [18], it shall select the bid that at the closure of the auction was the next lowest priced or next most advantageous bid. This provision is without prejudice to the right of the

---

reverse engineering others' bids in more complex auctions using the provided mathematical formula. It will discuss difficulties of preventing that and difficulties of ensuring meaningful bidding process and automatic evaluation while not revealing commercially sensitive information. It will also highlight difficulties of preserving anonymity of bidders, despite the provisions of this article and the chapter as a whole, in procurement of subject matters for which more or less stable pool of providers exists, albeit competition among them may be ensured. The Guide therefore should provide examples of existing good practices to mitigate all these risks.

<sup>29</sup> The accompanying Guide text will note that the effect of the termination of the auction may be cancellation of the procurement.

<sup>30</sup> The accompanying Guide text will note that the ascertainment of qualifications of suppliers is inherent in examination or evaluation of initial bids.

procuring entity to cancel the procurement in accordance with article [17 (1)] of this Law.<sup>31</sup>

---

<sup>31</sup> During the intersessional consultations, the suggestions were made that the accompanying Guide text should explain the nature of bids (binding/non-binding and under which conditions) and applications of provisions of this Law on a standstill period and review in the context of the auctions.

**(A/CN.9/WG.I/WP.75/Add.7) (Original: English)****Note by the Secretariat on possible revisions to the UNCITRAL Model Law on Procurement of Goods, Construction and Services — a revised text of the Model Law, submitted to the Working Group on Procurement at its nineteenth session****ADDENDUM**

This note sets out a proposal for chapter VII (Framework agreements procedures) of the revised Model Law, comprising articles 52 to 57.

The Secretariat's comments are set out in the accompanying footnotes.

**CHAPTER VII. FRAMEWORK AGREEMENTS PROCEDURES****Article 52. Award of a closed framework agreement<sup>1</sup>**

(1) The procuring entity shall award a closed framework agreement:<sup>2</sup>

(a) By means of open tendering proceedings, in accordance with provisions of chapter III of this Law except to the extent that those provisions are derogated from in this chapter; or

(b) By means of other procurement methods, in accordance with the relevant provisions of chapters II, IV and V of this Law except to the extent that those provisions are derogated from in this chapter;<sup>3</sup>

(c) In the case of a framework agreement concluded with only one supplier or contractor, in addition<sup>4</sup> by means of single-source procurement under the conditions set out in article [27 (5)] of this Law.

(2) The provisions of this Law regulating the contents of the solicitation in the context of the procurement methods referred to in paragraph (1) (a) and (b) of this

<sup>1</sup> The accompanying Guide text will alert enacting States to both the benefits of framework agreements and the risks to competition, including the risk of creating monopolies or highly concentrated oligopolies through the use of framework agreements in relatively concentrated markets, and of driving potential suppliers out of the market altogether.

<sup>2</sup> The accompanying Guide will cross-refer to the definition of the closed framework agreement in article 2 that specifies that in this type of agreement no supplier or contractor who is not initially a party to the framework agreement may subsequently become a party.

<sup>3</sup> The accompanying Guide will explain that there are no derogations from the substantive provisions on choice of procurement methods in chapter II of this Law, and that the derogations are limited to procedural issues in chapters IV and V.

<sup>4</sup> The accompanying Guide text will explain that the phrase "in addition" in this provision intends to convey that a single-supplier closed framework agreement can be awarded also by means of the proceedings referred to in paragraphs 1 (a) and (b) of this article. It would also point out that, under the general principle contained in article 25 (2) of the current draft, the procuring entity must seek to maximize competition to the extent practicable when it selects a procurement method. It is therefore understood that when an alternative to single-source procurement is appropriate, the procuring entity must select such an alternative procurement method that would ensure most competition in the circumstances of the given procurement.

article shall apply *mutatis mutandis*<sup>5</sup> to the information to be provided to suppliers or contractors when first soliciting their participation in a closed framework agreement procedure. The procuring entity shall in addition specify at that stage:

(a) That the procurement will be conducted as a framework agreement procedure, leading to a closed framework agreement;

(b) Whether the framework agreement is to be concluded with one or more than one supplier or contractor;

(c) If the framework agreement will be concluded with more than one supplier or contractor, any minimum or maximum number of suppliers or contractors that will be parties thereto;

(d) The form, terms and conditions of the framework agreement in accordance with article [53] of this Law.

(3) The provisions of article [20] of this Law shall apply *mutatis mutandis*<sup>6</sup> to the award of a closed framework agreement.

### **Article 53. Requirements of closed framework agreements**

<sup>7</sup>(1) A closed framework agreement shall be concluded in writing and shall set out:

(a) The duration of the framework agreement, which shall not exceed [...] (the enacting State specifies a maximum duration)) [the maximum duration established by the procurement regulations];<sup>8</sup>

(b) The description of the subject matter of the procurement and all other terms and conditions of the procurement established when the framework agreement is concluded;

(c) To the extent that they are known, estimates of the terms and conditions of the procurement that cannot be established with sufficient precision when the framework agreement is concluded;

(d) Whether in a closed framework agreement concluded with more than one supplier or contractor there will be a second stage competition to award a procurement contract under the framework agreement and, if so:

---

<sup>5</sup> The accompanying Guide text will explain what will need to be changed in the context of framework agreement procedures.

<sup>6</sup> Ibid.

<sup>7</sup> Paragraph (1) of this article in previous drafts was deleted as being superfluous. It read: "(1) A closed framework agreement may be concluded between one or more procuring entities and one or more suppliers or contractors as selected in accordance with the criteria and procedures specified when first soliciting their participation in the framework agreement procedure."

<sup>8</sup> The text in the first set of square brackets reflects the understanding in the Working Group (A/CN.9/690, para. 55 (b)). Since the maximum duration will be different for different types of subject matter of the procurement, the Working Group may wish to consider that the procurement regulations, not the Law, shall specify appropriate maximum duration per each group of subject matters (hence the proposed text in the second set of square brackets). For example, as was pointed out in the Working Group, the maximum duration for framework agreements dealing with such items as IT products, whose price might fluctuate rapidly, should be established in months rather than years.

- (i) A statement of the terms and conditions that are to be established or refined through second stage competition;
  - (ii) The procedures for and the anticipated frequency<sup>9</sup> of any second stage competition and envisaged deadlines for presenting second stage submissions;
  - (iii) Whether the award of a procurement contract under the framework agreement will be to the lowest priced or to the most advantageous submission;<sup>10</sup>
  - (iv) The procedures and criteria to be applied during the second stage competition, including the relative weight of such criteria and the manner in which they will be applied, in accordance with articles [10 and 11] of this Law. If the relative weights of the evaluation criteria may be varied during second stage competition, the framework agreement shall specify the permissible range.<sup>11</sup>
- (2) A closed framework agreement with more than one supplier or contractor shall be concluded as one agreement between all parties unless:
- (a) The procuring entity determines that it is in the interests of either party that separate agreements with each supplier or contractor party to the framework agreement be concluded; and
  - (b) The procuring entity includes in the record required under article [23] of this Law a statement of the reasons and circumstances on which it relied to justify the conclusion of separate agreements;<sup>12</sup> and
  - (c) Any variation in the terms and conditions of the separate agreements for a given procurement is minor and concerns only those provisions that justify the conclusion of separate agreements.
- (3) The framework agreement shall in addition to information specified elsewhere in this article contain all information necessary to allow the effective operation of the framework agreement, including information on how the agreement and notifications of forthcoming procurement contracts thereunder can be accessed and appropriate information for connection where applicable.<sup>13</sup>

---

<sup>9</sup> Amended pursuant to A/CN.9/690, para. 55 (c). The accompanying Guide will explain that the frequency of second stage competition may not easily be anticipated, and that this information is not binding on the procuring entity.

<sup>10</sup> Amended pursuant to A/CN.9/690, para. 55 (d). The accompanying Guide will explain why UNCITRAL changed the term the “lowest evaluated” used in the 1994 Model Law to the term the “most advantageous”.

<sup>11</sup> The accompanying Guide will cross-refer to the provisions of article 57, prohibiting any material change to the procurement during the operation of the framework agreement.

<sup>12</sup> The provisions have been retained pursuant to A/CN.9/690, para. 55 (e).

<sup>13</sup> Amended pursuant to A/CN.9/690, para. 55 (f) and aligned with the similar wording in chapter VI of the current draft (articles 47 (1) (m) and 48 (1) (b)). The Guide will address the issues arising from the use of electronic means of communication in procurement proceedings.

**Article 54. Establishment of an open framework agreement**

(1) The procuring entity shall establish and maintain an open framework agreement online.<sup>14</sup>

(2) The procuring entity shall solicit participation in the open framework agreement by issuing an invitation to become a party to the open framework agreement in accordance with article [29 bis] of this Law.

(3) The invitation to become a party to the open framework agreement shall include the following information:

(a) The name and address of the procuring entity that establishes and maintains the open framework agreement and the name and address of any other procuring entities that will have the right to award procurement contracts under the framework agreement;<sup>15</sup>

(b) That the procurement will be conducted as a framework agreement procedure leading to an open framework agreement;

(c) That it is an open framework agreement that is to be concluded;

(d) The language or languages of the open framework agreement<sup>16</sup> and all information about the operation of the agreement, including how the agreement and notifications of forthcoming procurement contracts thereunder can be accessed and appropriate information for connection;<sup>17</sup>

(e) The terms and conditions for suppliers or contractors to be admitted to the open framework agreement, including:

(i) A declaration pursuant to article [8] of this Law;

(ii) If any limitation on the number of suppliers or contractors that are parties to the open framework agreement is imposed in accordance with paragraph (7) of this article, the relevant maximum number and the criteria and procedure, in conformity with this Law, that will be followed in selecting it;

(iii) Instructions for preparing and presenting indicative submissions necessary to become a party to the open framework agreement, including the

---

<sup>14</sup> The term “online” replaced the phrase “in electronic form” used in previous drafts.

<sup>15</sup> These provisions have been retained without square brackets pursuant to A/CN.9/690, para 58. The accompanying Guide text will explain the interaction between these provisions and the definition of the procuring entity, the importance of identifying the procuring entity at the outset of the procurement proceedings as an element of transparency under the Model Law, that the provisions enable multiple users of a framework agreement, that suppliers are to be adequately informed about the administrative arrangements for the operation of the framework agreement, and that both the parties to and users of the framework agreement are to be appropriately described.

<sup>16</sup> The accompanying Guide text will note that the procuring entity may decide not to include this information in domestic procurement, if it would be unnecessary in the circumstances. The Guide would also note that an indication of the language or languages may still be important in some multilingual countries.

<sup>17</sup> Aligned with the similar wording in article 53 (3).

currency(ies) and the language(s) to be used,<sup>18</sup> as well as the criteria and procedures to be used for ascertaining the qualifications of suppliers or contractors and any documentary evidence or other information that must be presented by suppliers or contractors to demonstrate their qualifications in conformity with article [9] of this Law;

(iv) An explicit statement that suppliers or contractors may apply to become parties to the framework agreement at any time during the period of its operation by presenting indicative submissions, subject to any maximum number of suppliers, if any, and any declaration made pursuant to article [8] of this Law;

(f) Other terms and conditions of the open framework agreement, including all information required to be set out in the open framework agreement in accordance with article [55] of this Law;

(g) References to this Law, the procurement regulations and other laws and regulations directly pertinent to the procurement proceedings, including those applicable to procurement involving classified information, and the place where these laws and regulations may be found;

(h) The name, functional title and address of one or more officers or employees of the procuring entity who are authorized to communicate directly with and to receive communications directly from suppliers or contractors in connection with the procurement proceedings, without the intervention of an intermediary.

(4) Suppliers and contractors may apply to become a party or parties to the framework agreement at any time during its operation by presenting indicative submissions to the procuring entity in compliance with the requirements of the invitation to become a party to the framework agreement.

(5) The procuring entity shall examine all indicative submissions received during the period of operation of the framework agreement within a maximum of ... working days (the enacting State specifies the maximum period of time)<sup>19</sup> in accordance with the procedures set out in the invitation to become a party to the framework agreement.

(6) The framework agreement shall be concluded with all qualified suppliers or contractors that presented submissions unless their submissions have been rejected on the grounds specified in the invitation to become a party to the framework agreement.

(7) The procuring entity may impose a maximum number of parties to the open framework agreement only to the extent that capacity limitations in its communication system so require.<sup>20</sup> The procuring entity shall include a statement

<sup>18</sup> A/CN.9/690, para. 22 (b). The accompanying Guide text will note that the procuring entity may decide not to include this information in domestic procurement, if it would be unnecessary in the circumstances.

<sup>19</sup> The accompanying Guide text will in this context again draw attention of the enacting State that the period of time of a short duration should be established in working days; in other cases, it may be established in calendar days (A/CN.9/690, para. 87).

<sup>20</sup> As in the corresponding provisions applicable to auctions, the phrase “only to the extent that capacity limitations in its communication system so require” replaced the previously used phrase “for technical reasons or capacity limitations.”

of the reasons and circumstances upon which it relied to justify the imposition of such a maximum in the record required under article [23] of this Law.<sup>21</sup>

(8) The procuring entity shall promptly notify the suppliers or contractors whether they have become parties to the framework agreement and of the reasons for the rejection of their indicative submissions if they have not.

#### **Article 55. Requirements of open framework agreements**

(1) An open framework agreement shall provide for second stage competition for the award of a procurement contract under the agreement and shall include:

- (a) The duration of the framework agreement;
  - (b) The description of the subject matter of the procurement and all other terms and conditions of the procurement known when the open framework agreement is established;
  - (c) Any terms and conditions that may be refined through second stage competition;
  - (d) The procedures and the anticipated frequency<sup>22</sup> of second stage competition;
  - (e) Whether the award of a procurement contract under the framework agreement will be to the lowest priced or the most advantageous submission;
  - (f) The procedures and criteria to be applied during the second stage competition, including the relative weight of the evaluation criteria and the manner in which they will be applied, in accordance with articles [10 and 11] of this Law. If the relative weights of the evaluation criteria may be varied during second stage competition, the framework agreement shall specify the permissible range.<sup>23</sup>
- (2) The procuring entity shall, during the entire period of operation of the open framework agreement, republish at least annually the invitation to become a party to the open framework agreement and shall in addition ensure unrestricted, direct and full access to the terms and conditions of the framework agreement and to any other necessary information relevant to its operation.<sup>24</sup>

---

<sup>21</sup> The last sentence has been retained without square brackets pursuant to A/CN.9/690, para. 59.

<sup>22</sup> Amended pursuant to A/CN.9/690, para. 55 (c). The accompanying Guide will explain that the frequency of second stage competition may not easily be anticipated, and that this information is not binding on the procuring entity.

<sup>23</sup> The accompanying Guide will cross-refer to the provision of article 57 of this Law, prohibiting any material change to the procurement during the operation of the framework agreement.

<sup>24</sup> The accompanying Guide will explain, with a cross-reference to article 54 (3) (d) of this Law, that republication and maintenance of the relevant information shall be at the place where the original invitation was published or at the place (website or other electronic address) set out in the original invitation.

**Article 56. Second stage of a framework agreement procedure**

(1) Any procurement contract under a framework agreement shall be awarded in accordance with the terms and conditions of the framework agreement and the provisions of this article.

(2) A procurement contract under a framework agreement may only be awarded to a supplier or contractor that is a party to the framework agreement.

(3) The provisions of article [20] of this Law, except for its paragraph (2),<sup>25</sup> shall apply to the acceptance of the successful submission under framework agreements without second stage competition.

(4) In a closed framework agreement with second stage competition and in an open framework agreement, the following procedures shall apply to the award of a procurement contract:

(a) The procuring entity<sup>26</sup> shall issue a written invitation to present submissions simultaneously to each supplier or contractor party to the framework agreement, or only to each of those parties of the framework agreement then capable of meeting the needs of that procuring entity in the subject matter of the procurement;

(b) The invitation to present submissions shall include the following information:

(i) A restatement of the existing terms and conditions of the framework agreement to be included in the anticipated procurement contract, set out the terms and conditions that are to be subject to the second stage competition and provide further detail of the terms and conditions where necessary;

(ii) A restatement of the procedures and criteria for the award of the anticipated procurement contract (including their relative weight and the manner of their application);

(iii) Instructions for preparing submissions;

(iv) The manner, place and deadline for presenting submissions;

(v) If suppliers or contractors are permitted to present submissions for only a portion of the subject matter of the procurement, a description of the portion or portions for which submissions may be presented;

(vi) The manner in which the submission price is to be formulated and expressed, including a statement as to whether the price is to cover elements other than the cost of the subject matter of the procurement itself, such as any applicable transportation and insurance charges, customs duties and taxes;

(vii) Reference to this Law, the procurement regulations and other laws and regulations directly pertinent to the procurement proceedings, including those

<sup>25</sup> The accompanying Guide text will explain reasons why provisions on the standstill period of article 20 do not apply to framework agreements without second stage competition.

<sup>26</sup> Amended pursuant to A/CN.9/690, para. 62. The definition of the procuring entity provides for multi-user frameworks, and the accompanying Guide will stress the importance of ensuring that suppliers are aware of the administrative arrangements for the operation of framework agreement, as noted in the relevant footnote above.

applicable to procurement involving classified information, and the place where these laws and regulations may be found;

(viii) The name, functional title and address of one or more officers or employees of the procuring entity who are authorized to communicate directly with and to receive communications directly from suppliers or contractors in connection with the second stage competition, without the intervention of an intermediary;

(ix) <sup>27</sup>Notice of the right provided under article [61] of this Law to seek review of non-compliance with the provisions of this Law together with information about duration of the applicable standstill period and, if none will apply, a statement to that effect and reasons therefor;

(x) Any formalities that will be required once a successful submission has been accepted for a procurement contract to enter into force, including, where applicable, the execution of a written procurement contract pursuant to article [20] of this Law, [and approval by a higher authority or the Government and the estimated period of time following the dispatch of the notice of acceptance that will be required to obtain the approval];<sup>28</sup>

(xi) Any other requirements established by the procuring entity in conformity with this Law and the procurement regulations relating to the preparation and presentation of submissions and to other aspects of the second stage competition;

(c) The procuring entity<sup>29</sup> shall evaluate all submissions received and determine the successful submission in accordance with the evaluation criteria and the procedures set out in the invitation to present submissions;

(d) The procuring entity shall accept the successful submission in accordance with article [20] of this Law.

#### **Article 57. No material change during the operation of a framework agreement**

During the operation of a framework agreement, no change shall be allowed to the description of the subject-matter of the procurement. Changes to other terms and conditions of the procurement, including to the criteria (and their relative weight and the manner of their application) and procedures for the award of the anticipated

---

<sup>27</sup> Reference to any commitments to be made by the supplier or contractor outside the procurement contract has been deleted pursuant to A/CN.9/690, para. 62.

<sup>28</sup> The Working Group may wish to consider appropriateness of the provision put in square brackets in the context of the award of procurement contracts under the framework agreement procedures. It may consider that this provision may be relevant only in the context of the award of the framework agreement itself rather than procurement contracts thereunder (especially under open framework agreements). If it is to be deleted, the accompanying Guide text will elaborate on justifications for this deviation, as will be the case with respect to the corresponding provisions applicable to auctions (article 47 (1) (x) of the current draft).

<sup>29</sup> Amended pursuant to A/CN.9/690, para. 62. See the relevant footnote above.

procurement contract, may occur only to the extent expressly permitted in the framework agreement.<sup>30</sup>

*[Articles 58-60 are not used]*

---

<sup>30</sup> The accompanying Guide text will explain that the phrase “to the extent expressly permitted” is intended to ensure that any such changes must respect any estimates, variables or permissible range of variation set out in the framework agreement. It will also note that any change to the qualification or responsiveness criteria that would change the parties to the framework agreement would effectively contravene articles 52 and 54 that require establishing these criteria at the outset of the procurement proceedings.

**(A/CN.9/WG.I/WP.75/Add.8) (Original: English)****Note by the Secretariat on possible revisions to the UNCITRAL Model Law on Procurement of Goods, Construction and Services — a revised text of the Model Law, submitted to the Working Group on Procurement at its nineteenth session****ADDENDUM**

This note sets out a proposal for chapter VIII (Review) of the revised Model Law, comprising articles 61 to 66.

The Secretariat's comments are set out in the accompanying footnotes.

**CHAPTER VIII. REVIEW<sup>1</sup>****Article 61. Right to review**

(1) A supplier or contractor that claims to have suffered or claims that it may suffer, loss or injury due to alleged non-compliance with the provisions of this Law may submit a complaint seeking review of the alleged non-compliance in accordance with articles [62 to 66] of this Law or other provisions of applicable law of this State.

(2) A supplier or contractor may appeal any decision taken by a review body in review proceedings initiated pursuant to paragraph (1) of this article, or institute proceedings following the failure of a review body to take a decision within the prescribed time limits or to suspend the procurement proceedings in accordance with article [65 (1)] of this Law.<sup>2</sup>

**Article 62. Review by the procuring entity or the approving authority**

(1) A supplier or contractor seeking review shall submit a complaint in writing to the procuring entity or, where applicable, to the approving authority.<sup>3</sup>

(2) Complaints shall be submitted within the following time periods:

---

<sup>1</sup> The Guide provisions accompanying chapter VIII will note that the chapter contains a minimum set of provisions aimed at ensuring an effective review process, and will encourage enacting States to incorporate all the provisions of the chapter to the extent that the legal system of the enacting State so permits (A/CN.9/690, para. 68). They will also refer to the applicable provisions of the United Nations Convention against Corruption and will contain a discussion of the relevance of other branches of law and of other bodies if a review were triggered for example by fraud or corruption (including the need to alert the relevant authorities to ensure that appropriate action is taken). They will cross-refer in this regard to the relevant discussion in the Guide in conjunction with the provisions of article [19] (A/CN.9/690, para. 93).

<sup>2</sup> The second paragraph was added pursuant to A/CN.9/690, para. 69 (b). The accompanying Guide text will explain that, apart from suppliers or contractors, various State bodies may have the right to initiate review or appeals under chapter VIII (A/CN.9/690, para. 67).

<sup>3</sup> The opening words in the chapeau provisions were deleted pursuant to A/CN.9/690, para. 69 (a). The accompanying Guide text will explain that regulations or other guidance should address the evidentiary support to be provided to substantiate the complaint.

(a) Complaints as regards the terms of solicitation,<sup>4</sup> pre-qualification or pre-selection or arising from the pre-qualification or pre-selection proceedings shall be submitted no later than the deadline for presenting submissions;

(b) All other complaints arising from the procurement proceedings shall be submitted:

(i) Within the standstill period applied pursuant to article [20 (2)] of this Law;<sup>5</sup> or

(ii) If no standstill period is applied under circumstances of article [20 (3)] of this Law, within ... working days (the enacting State specifies the period)<sup>6</sup> of when the supplier or contractor submitting the complaint became aware of the circumstances giving rise to the complaint or when that supplier or contractor should have become aware of those circumstances, whichever is earlier, provided that the procuring entity or, where applicable, the approving authority need not entertain a complaint, or continue to entertain a complaint, after the procurement contract has entered into force or the decision to cancel the procurement has been taken, as the case may be.<sup>7</sup>

<sup>4</sup> The accompanying Guide text will explain the intended meaning of the phrase “terms of solicitation” as encompassing all issues arising from the procurement proceedings before the deadline for presenting submissions (other than those covered by pre-qualification or pre-selection, separately mentioned in the subparagraph), such as the selection of a method of procurement or a method of solicitation where the choice between open and direct solicitation exists, and the limitation of participation in the procurement proceedings in accordance with article 8. It thus excludes issues arising from examination and evaluation of submissions. It will further explain that the terms of the solicitation, pre-qualification or pre-selection include the contents of any addenda issued pursuant to article 14 (A/CN.9/690, para. 69 (c)).

<sup>5</sup> Amended pursuant to A/CN.9/690, para. 69 (f).

<sup>6</sup> The accompanying Guide text will note that the determination of the specific deadline is left to enacting States as is done with respect to the standstill period, and that the enacting States should ensure that all the relevant time limits left for their determination should be aligned throughout the Model Law (A/CN.9/690, para. 86). It will also bring to the attention of enacting States the time period specified in the 1994 and 2006 versions of the GPA to assist in inserting the requisite number of days.

<sup>7</sup> Differing views were expressed during the Working Group’s eighteenth session on whether this article should allow submission of complaints after the entry into force of the procurement contract. The Working Group did not finalize the consideration of this issue as well as the suggestion to include a provision to prevent suppliers from disrupting the entry into force of the procurement contract by filing a complaint immediately before the contract is to be signed (A/CN.9/690, para. 69 (d) and (e)). The Working Group may consider that the wording “need not entertain a complaint, or continue to entertain a complaint,” used in this subparagraph, is sufficiently flexible to address both concerns. In order to mitigate risks of abuse of the discretion given to the procuring entity under such flexible wording, the accompanying Guide text will need to refer to provisions of article 65 (1) on automatic suspension of the procurement proceedings. The Working Group may wish to consider that it is unlikely that complaints about procurement proceedings after the entry into force of the procurement contract will be submitted to the procuring entity or the approving authority; most likely that they will be submitted directly to the administrative review body or to the court, taking into account that these bodies will most certainly have the prerogative to overturn the award of the contract (the administrative review body has such a prerogative under article 63 (3) (f) of the current draft). The prerogative of the procuring entity or the approving authority to that effect may differ from jurisdiction to jurisdiction.

(3) Unless the complaint is resolved by mutual agreement of the parties, the procuring entity or the approving authority, as the case may be, shall ... working days (the enacting State specifies the period)<sup>8</sup> after the submission of the complaint, issue a written decision. The decision shall:

(a) State the reasons for the decision; and

(b) If the complaint is upheld in whole or in part, state the corrective measures that shall be undertaken.

(4) If the procuring entity or the approving authority, as the case may be, does not issue a decision by the time specified in paragraph (3) of this article, the supplier or contractor submitting the complaint<sup>9</sup> is entitled immediately thereafter to institute proceedings under article [63 or 66]. Upon the institution of such proceedings, the competence of the procuring entity or the approving authority, as the case may be, to entertain the complaint, ceases.<sup>10</sup>

(5) The procuring entity or the approving authority, as the case may be, shall communicate its decision to all participants in the review proceedings in accordance with article 64 (5).<sup>11</sup>

### **Article 63. Review before an independent administrative body<sup>\*,12</sup>**

(1) A supplier or contractor seeking review shall submit a complaint or an appeal in writing to ... (the enacting State inserts the name of the independent administrative body) within the following time periods:<sup>13</sup>

<sup>8</sup> Amended pursuant to A/CN.9/690, para. 69 (g).

<sup>9</sup> The words “or the procuring entity” taken from the 1994 text (see article 53 (5)) were deleted in the current draft. Although they intended to cover possible appeal by the procuring entity of the decisions by the approving authority taken against it, the Secretariat’s understanding is that issues related to possibility of appeals by the procuring entity are outside the scope of the chapter and the Model Law.

<sup>10</sup> The accompanying Guide text will draw a clear distinction between review proceedings under this article and debriefing proceedings.

<sup>11</sup> The accompanying Guide text will explain that the term “participants in the review proceedings” could include a different pool of participants depending on the timing of the review proceedings and subject of the complaint. In this respect, it will cross-refer to the provisions of article 64 (1) and (2).

<sup>\*</sup> States where hierarchical administrative review of administrative actions, decisions and procedures is not a feature of the legal system may omit this article and provide only for judicial review (article [66]), on the condition that in the enacting State exists an effective system of judicial review, including an effective system of appeal, to ensure legal recourse and remedies in the event that the procurement rules and procedures of this Law are not followed, in compliance with the requirements of the United Nations Convention against Corruption. [States may provide for the system of appeal judicially, or administratively, to reflect the legal system in the jurisdiction concerned.]

<sup>12</sup> The accompanying Guide text will clarify the meaning of the term “independent administrative body”, in particular whether the body should be composed of outside experts, independent from the Government. It was noted that the Guide might highlight the disruptions to the procurement proceedings if decision-taking at the review stage lacked independence since decisions might be challenged in the court and this would cause further delays. The Guide will note that the Model Law establishes the principle of independence of the administrative review body, but does not prescribe the manner in which that independence should be achieved, with the understanding that there would be various ways of so doing in various jurisdictions depending on their prevailing conditions (A/CN.9/690, para. 71 (o)).

(a) Complaints as regards the terms of solicitation, pre-qualification or pre-selection or arising from the pre-qualification or pre-selection proceedings shall be submitted no later than the deadline for presenting submissions;

(b) All other complaints arising from the procurement proceedings shall be submitted no later than ... (the enacting State specifies the period of time)<sup>14</sup> after the entry into force of the procurement contract or the decision to cancel the procurement, as the case may be, provided that the review body need not entertain the complaint.<sup>15</sup>

(i) If it was submitted after the expiry of the standstill period applied pursuant to article [20 (2)] of this Law; or if no standstill period has been applied pursuant to article [20 (3)] of this Law;

(ii) If it was submitted later than ... working days (the enacting State specifies the period) of when the supplier or contractor submitting the complaint became aware of the circumstances giving rise to the complaint or when that supplier or contractor should have become aware of those circumstances, whichever is earlier;<sup>16</sup>

<sup>13</sup> Amended pursuant to A/CN.9/690, para. 71 (a) and 69 (b). The accompanying Guide text will note that judicial review at any level may also be available as an alternative to proceedings before an administrative body in some States, as provided for in article [66]. It will also note that regulations or other guidance should address the evidentiary support to be provided to substantiate the complaint or appeal.

<sup>14</sup> The accompanying Guide text will note that the determination of the specific deadline is left to enacting States as is done with respect to the standstill period (A/CN.9/690, para. 86) and will note that the period here will most likely be expressed in months or year(s) than calendar or working days since the provisions intend to provide for the absolute maximum (see the explanation in the relevant footnote below).

<sup>15</sup> Amended pursuant to A/CN.9/690, paras. 69 (d) to (g), 85 and 86.

<sup>16</sup> Amended to reconcile differing views in the Working Group and during the intersessional consultations on whether the supplier should be able to submit complaints after the entry into force of the procurement contract, regardless of whether the standstill period was applied or not. The provisions would allow suppliers to do so but would impose (i) in the chapeau the absolute maximum time limit after expiry of which no complaints can be entertained and (ii) an additional time limit equal to the duration of the standstill period if it was applied or an additional time limit to be determined by the enacting State if no standstill period was applied. The provisions would also give the review body discretion to decide on whether to entertain complaints submitted after those additional time limits. The provisions also intend to cover situations where, although the complaint was submitted on time, the procurement contract entered into force (e.g. due to the failure to suspend the procurement proceedings or due to the decision to lift the suspension). With respect to provisions in (ii), the accompanying Guide text would cross-refer to article 20 (3) that sets out grounds for exceptions to application of the standstill period, including on the ground of urgency/emergency. The Guide in this respect will stress that, although in such cases the notice of the procurement contract award to be published under article 21 would most likely serve as the time point when the supplier or contractor submitting the complaint will become aware of the circumstances giving rise to the complaint or when that supplier or contractor should become aware of those circumstances, this would not necessarily be always the case. For example, the urgency/emergency ground would most likely justify the exemption from publication of the procurement contract award for reasons of confidentiality (e.g. protection of essential national interests of State). Hence the provisions as drafted do not link the time point to the notice of the procurement contract award but take more flexible approach, which is necessary in order to allow review in situations where transparency safeguards of the Model Law do not apply.

(c) Appeals shall be submitted within ... working days (the enacting State specifies the period) after the issuance of the decision in accordance with article [62 (3)] of this Law or, if no decision was issued or the procurement proceedings was not suspended in accordance with article [65 (1)], proceedings shall be instituted within ... working days (the enacting State specifies the period) after the expiry of the prescribed time limit for issuance of such a decision or for suspension.<sup>17</sup>

(2) Upon receipt of a complaint or an appeal, the ... (the enacting State inserts the name of the independent administrative body) shall give notice thereof promptly to the procuring entity and to the approving authority where applicable.

(3) The [insert name of administrative body] may declare the legal rules or principles that govern the subject matter of the complaint or appeal and shall be empowered to take one or more of the following actions:<sup>18</sup>

(a) Prohibit the procuring entity, or the approving authority as the case may be, from acting or deciding unlawfully or from following an unlawful procedure;

(b) Require the procuring entity, or the approving authority as the case may be, that has acted or proceeded in an unlawful manner, or that has reached an unlawful decision, to act or to proceed in a lawful manner or to reach a lawful decision;

(c) Overturn<sup>19</sup> in whole or in part an unlawful act or decision of the procuring entity, or the approving authority as the case may be, [or a decision of the procuring entity or the approving authority on a complaint submitted to that entity or authority];<sup>20</sup>

(d) Revise an unlawful decision by the procuring entity, or the approving authority as the case may be, or substitute its own decision for such a decision, [other than any act or decision bringing the procurement contract into force] or confirm a lawful decision by the procuring entity or the approving authority;<sup>21</sup>

(e) Order that the procurement proceedings be terminated;

(f) Overturn the award of a procurement contract or the framework agreement that has entered into force unlawfully and, if notice of the award of the

---

<sup>17</sup> The accompanying Guide text will explain that article [65 (1)] prescribes a very short time limit for suspension to take place as it refers to “prompt” action.

<sup>18</sup> Amended pursuant to A/CN.9/690, paras. 71 (b) and (d) and 72. The accompanying Guide text will emphasize the importance of ensuring that the administrative body can exercise any of these remedies in any combination, as appropriate, in order to ensure an effective and independent administrative system of review (A/CN.9/690, para. 73).

<sup>19</sup> The accompanying Guide text will explain that this term does not carry any particular consequences (it is not to be treated as declaring the decision of no effect), so that the enacting State may provide for the consequences appropriate in the light of the legal tradition in the jurisdiction concerned (A/CN.9/690, paras. 71 (f) and 72).

<sup>20</sup> The Working Group may wish to consider the need for this additional wording in square brackets to allow for appeals. The decision on a complaint is not necessarily unlawful decision (it may be wrong on merits but taken in accordance with law) and when it is not, then it is not covered by this subparagraph.

<sup>21</sup> The accompanying Guide text will explain that this text may be omitted in those enacting States where administrative review body may impose its own decision as to the award of the contract.

procurement contract or the framework agreement has been published, order the publication of notice of the overturning of the award;<sup>22</sup>

(g) Dismiss the complaint or appeal;<sup>23</sup> and

(h) Require the payment of compensation for any reasonable costs incurred by the supplier or contractor submitting the complaint or appeal as a result of an unlawful act or decision of, or procedure followed by, the procuring entity or the approving authority in the procurement proceedings, and for any loss or damages suffered, which shall be limited to costs for the preparation of the submission, or the costs relating to the complaint and the appeal where applicable, or both;<sup>24</sup> and the [insert name of administrative body] shall take the decision appropriate in the circumstances.<sup>25</sup>

(4) The [insert name of administrative body] shall within [...] days after receipt of the complaint or appeal issue a written decision concerning the complaint or appeal, stating the reasons for the decision and the action taken.

(5) The [insert name of administrative body] shall communicate its decision to all participants in the review proceedings in accordance with article 64 (5).

#### **Article 64. Certain rules applicable to review proceedings under articles [62 and 63]**

(1) Promptly after the receipt of a complaint under article [62 or 63] of this Law, or appeal under article [63] of this Law, the review body shall notify all suppliers or contractors participating in the procurement proceedings<sup>26</sup> to which the complaint

<sup>22</sup> See the relevant footnote above as regards the term “overturn” used in the current draft. At the Working Group’s eighteenth session, the point was made that all other remedies were linked to stages of the procurement proceedings before the entry into force of the procurement contract or framework agreement, and thus were limited in time, while the possibility of overturning the procurement contract or framework agreement appeared to be open-ended (A/CN.9/690, para. 71 (m)). The Working Group may wish to consider that the amendments made in paragraph (1) of this article as regards the absolute maximum timeframe for submission of complaints will address this concern.

<sup>23</sup> Amended pursuant to A/CN.9/690, paras. 71 (c) and 72.

<sup>24</sup> The accompanying Guide text will discuss that unlike the 1994 Model Law, the revised Model Law prefers only one approach towards compensation of costs, which will support a speedy and effective administrative review process. It will also note that this approach does not exclude the possibility of seeking anticipatory losses through court action (or in proceedings before administrative review bodies where the legal system in an enacting State so permitted, or in an action under a contract that has been executed and where performance has commenced) (A/CN.9/690, para. 71 (j)).

<sup>25</sup> Amended pursuant to A/CN.9/690, para. 72. The accompanying Guide text will emphasize the list of measures in paragraph (3) is a minimum set of measures that the administrative review body should be able to take according to the circumstances, in order to ensure an effective and independent administrative review, and the enacting State will therefore be directed to incorporate all of the measures listed except when so doing would be in violation of the constitution or other laws of the State. The Guide text will also state that the last phrase in this paragraph (3) is aimed at ensuring an effective review process (A/CN.9/690, para. 73).

<sup>26</sup> The Guide will explain that the term “participating in the procurement proceedings” could include a different pool of participants depending on the timing of the review proceedings and subject of the complaint, and will specify that those suppliers who were disqualified as a result of pre-qualification proceedings may not become participants in the review proceedings that

or appeal relates as well as any governmental authority whose interests are or could be affected about the submission of the complaint or appeal and its substance.

(2) Any such supplier or contractor or governmental authority has the right to participate in the review proceedings. A supplier or contractor or the governmental authority that fails to participate in the review proceedings is barred from subsequently making the same type of complaint or appeal.<sup>27</sup>

(3) The participants to the review proceedings shall have access to all proceedings and shall have the right to be heard prior to a decision of the review body being made on the complaint or appeal, the right to be represented and accompanied, the right to request that the proceedings take place in public<sup>28</sup> and the right to present evidence, including witnesses.<sup>29</sup>

(4) In the cases of review by the approving authority or the [insert name of administrative body], the procuring entity shall provide to the review body all documents pertinent to the complaint, including the record of the procurement proceedings, in timely fashion.<sup>30</sup>

(5) A copy of the decision of the review body shall be communicated to the participants in the review proceedings within ... working days (the enacting State specifies the period) after the issuance of the decision. In addition, after the decision has been issued, the complaint and the decision shall promptly be made available to the public.

(6) No information under paragraphs (3) to (5) of this article shall be disclosed and no public proceedings shall take place if so doing would be against the protection of essential security interests of the State<sup>31</sup> or contrary to law, would impede law enforcement, would prejudice the legitimate commercial interests of the suppliers or contractors or would impede fair competition.

(7) The decision by the review body and the reasons and circumstances therefor shall be made part of the record of the procurement proceedings.<sup>32</sup>

---

concern subsequent stages of the procurement proceedings (e.g. examination and evaluation of submissions).

<sup>27</sup> Amended pursuant to A/CN.9/690, para. 75.

<sup>28</sup> Retained without square brackets pursuant to A/CN.9/690, para. 75. The accompanying Guide text will note that these provisions are to be read together with those in paragraph (6) permitting the review body to refuse a request to hold public proceedings on the grounds of confidentiality.

<sup>29</sup> Amended pursuant to A/CN.9/690, para. 75.

<sup>30</sup> The accompanying Guide text will refer to the need for practice directions or similar guidance on time periods.

<sup>31</sup> Aligned in the relevant part with articles 22 (1) and 23 (4).

<sup>32</sup> The accompanying Guide text will refer to the need for practice directions or similar guidance on time periods. It will explain the importance of this provision to ensuring transparency and that the record of the procurement is complete.

**Article 65. Suspension of the procurement proceedings,  
the framework agreement or the procurement contract<sup>33</sup>**

(1) Promptly after the timely submission of a complaint under article [62 or 63] of this Law or an appeal under article [63] of this Law, the review body shall suspend<sup>34</sup> the procurement proceedings, the framework agreement or the procurement contract, for a period to be determined by the review body, except as provided for in paragraphs (2) of this article.

[deleted]<sup>35</sup>

(2) The review body need not suspend the procurement proceedings if it decides that the complaint or appeal is manifestly without merit.<sup>36</sup>

(3) The review body may lift the suspension applied in accordance with paragraph (1) of this article if it decides that the suspension will cause or has caused disproportionate harm to the procuring entity or to other suppliers or contractors, or that urgent public interest considerations require the procurement, or the procurement contract or framework agreement, to proceed. The review body's decision is conclusive with respect to all levels of review except judicial review.<sup>37</sup>

(4) Where the procuring entity is not the review body, it may request in writing the review body to lift the suspension on the grounds referred to in paragraph (3) of this article.<sup>38</sup>

(5) The review body may extend the originally determined period of suspension in order to preserve the rights of the supplier or contractor submitting the complaint or appeal or commencing the action pending the disposition of the review proceedings, provided that the total period of suspension shall not exceed the period required for the review body to take a decision in accordance with article [62 or 63] as

<sup>33</sup> This article has been redrafted to reflect the Secretariat's understanding of the Working Group's decisions in A/CN.9/690, para. 79. The accompanying Guide text will note that the article does not purport to address the question of court-ordered suspension.

<sup>34</sup> The accompanying Guide text would explain which steps will be involved for the suspension to take place depending on the body reviewing the complaint. In particular, it will draw a distinction between steps that the procuring entity will have to take if it is the review body and steps that it has to take (and may in addition take) if it receives a notice of the suspension from the review body. A cross-reference in this context will be made to article 64 (1).

<sup>35</sup> The provisions referring to the declaration to be submitted by suppliers or contractors (A/CN.9/690, para. 79 (b). See also article 56 (1) of the 1994 Model Law) were deleted. The Secretariat's understanding is that the complaint or the appeal itself would demonstrate the likelihood of its success, and a declaration is no longer necessary as the suspension is automatic.

<sup>36</sup> Redrafted pursuant to A/CN.9/690, para. 79 (a).

<sup>37</sup> The Working Group may wish to consider significant deviation from the approach in article 56 (4) of the 1994 Model Law that refers in this context to certification by the procuring entity as the only sufficient ground for not applying suspension. The Working Group may also wish to recall its consideration in A/CN.9/690, para. 79 (c), and consider whether the last sentence should be retained, taking into account that the "review body" in this provision cumulatively refers to the procuring entity, the approving authority and the administrative review body, as the case may be.

<sup>38</sup> The accompanying Guide text will elaborate that the approving authority or the administrative body may request the procuring entity to provide to the review body necessary documents to substantiate its request.

applicable and the sufficiently long period thereafter for a supplier or contractor to file any appeal against a decision of a review body.<sup>39</sup>

(6) (a) The fact of the suspension and the duration of the suspension or the decision by the review body not to suspend the procurement proceedings or the procurement contract or the framework agreement, as the case may be, shall be included in the notification of the submission of the complaint or appeal issued in accordance with article [64 (1)] of this Law and shall in addition be promptly communicated by the review body to the supplier or contractor submitting the complaint or appeal;

(b) The decision on an extension of the suspension indicating the duration of the extension or the decision to lift the suspension and all other decisions taken by the review body pursuant to this article and the reasons therefor shall be promptly communicated to all participants in the review proceedings.

(7) The fact of the suspension and the duration of the suspension and any decision by the review body under this article and the reasons and circumstances therefor shall be made part of the record of the procurement proceedings.<sup>40</sup>

---

<sup>39</sup> Amended pursuant to A/CN.9/690, paras. 80 and 81.

<sup>40</sup> Retained without square brackets pursuant to A/CN.9/690, para. 75.

**Article 66. Judicial review\*,<sup>41</sup>**

The [insert name of court or courts] has jurisdiction over actions pursuant to article [61].<sup>42, 43</sup>

---

\* States that provide only for judicial review of the decisions of the procuring entity or approving authority, are required to put in place an effective system of judicial review, including an effective system of appeal, to ensure legal recourse and remedies in the event that the procurement rules and procedures of this Law are not followed, in compliance with the requirements of the United Nations Convention against Corruption. Such an effective system of judicial review shall in particular ensure: (i) that deadlines for submission of complaints or petitions for judicial review of decisions of the procuring entity, the approving authority or the administrative body as the case may be shall be appropriate in the procurement context, in particular the provisions of this Law on the standstill period shall be taken into account; (ii) that the court or courts with jurisdiction over actions pursuant to article [61] may take any or any combination of the actions contemplated in article [63(3)] of this Law and to grant interim measures that it considers necessary to ensure effective review, including suspension of the procurement proceedings or performance of the procurement contract or the framework agreement, as applicable; and (iii) that minimum safeguards as regards the participation in the review proceedings, submission of evidence and protection of confidential information in the procurement context, contemplated in article [64] of this Law, are in place.

<sup>41</sup> An accompanying footnote to this article has been inserted pursuant to A/CN.9/690, paras. 90-92. It is the Secretariat's understanding that the footnote will remain in the text of the Model Law.

<sup>42</sup> article has been amended pursuant to the changes made in article 61. In particular, the portion of the text that was based on the text in the 1994 Model Law, reading "and petitions for judicial review of decisions made by review bodies, or of the failure of those bodies to make a decision within the prescribed time limit, under article [62 or 63]" was deleted as being superfluous in the light of the similar provisions added in article 61.

<sup>43</sup> The accompanying Guide text, in particular with reference to the accompanying footnote to this article, will emphasize that the Model Law does not intend to interfere into the prerogatives of courts, which are regulated or are supposed to be regulated in a separate body of law in enacting States. It will further point out that the Model Law neither intends to inadvertently restrict broader powers that most likely exist for courts under legislation of enacting States. Specific mention in this regards will be made of the powers to award compensation for anticipatory losses or to grant interim measures (A/CN.9/690, para. 90). The accompanying Guide text in this context will cross-refer to the provisions of article 63 (3) (h) addressing the issues of compensation for costs incurred by the supplier or contractor submitting the complaint and appeal where applicable. It will note that although the provisions there exclude possibility of seeking in the course of administrative review compensation for anticipatory losses, such possibility may still exist through court action, including under a contract that has been executed and where performance has commenced, if the legal system of the enacting State so permits (A/CN.9/690, para. 71 (j)). The accompanying Guide text will also refer to the provisions of article 65 on suspension and will reiterate that the article did not refer to the court-ordered suspension.

**C. Report of the Working Group on Procurement on the work of its twentieth session (New York, 14-18 March 2011)**

V. Future work . . . . .	137-139

## I. Introduction

1. At its thirty-seventh session, in 2004, the United Nations Commission on International Trade Law (the “Commission”) entrusted the drafting of proposals for the revision of the 1994 UNCITRAL Model Law on Procurement of Goods, Construction and Services (the “1994 Model Law”, A/49/17 and Corr.1, annex I) to its Working Group I (Procurement). The Working Group was given a flexible mandate to identify the issues to be addressed in its considerations, including providing for new practices in public procurement, in particular those that resulted from the use of electronic communications (A/59/17, para. 82).

2. The Working Group began its work on the elaboration of proposals for the revision of the 1994 Model Law at its sixth session (Vienna, 30 August-3 September 2004) and completed that work at its nineteenth session (Vienna, 1-5 November 2010).<sup>1</sup>

3. At its thirty-eighth to forty-first sessions, in 2005 to 2008, respectively, the Commission commended the Working Group for the progress made in its work and reaffirmed its support for the review being undertaken and for the inclusion of novel procurement practices in the revised Model Law (A/60/17, para. 172, A/61/17, para. 192, A/62/17, part I, para. 170, and A/63/17 and Corr.1, para. 307). At its thirty-ninth session, the Commission recommended that the Working Group, in updating the 1994 Model Law and the Guide, should take into account issues of conflict of interest and should consider whether any specific provisions addressing those issues would be warranted in the revised Model Law (A/61/17, para. 192). At its fortieth session, the Commission recommended that the Working Group should adopt a concrete agenda for its forthcoming sessions in order to expedite progress in its work (A/62/17, part I, para. 170). At its forty-first session, the Commission invited the Working Group to proceed expeditiously with the completion of the project, with a view to permitting the finalization and adoption of the revised Model Law, together with its Guide to Enactment, within a reasonable time (A/63/17 and Corr.1, para. 307).

4. At its forty-second session, in 2009, the Commission considered chapter I of the draft revised model law and noted that most provisions of that chapter had been agreed upon, although some issues remained outstanding. The Commission noted that the draft revised model law was not ready for adoption at that session of the Commission. It entrusted the Secretariat to prepare drafting suggestions for consideration by the Working Group to address those outstanding issues. At that session, the importance of completing the revised Model Law as soon as reasonably possible was highlighted (A/64/17, paras. 283-285).

5. At its forty-third session, in 2010, the Commission requested the Working Group to complete its work on the revision of the 1994 Model Law during the next two sessions of the Working Group and present a draft revised model law for finalization and adoption by the Commission at its forty-fourth session, in 2011. The Commission instructed the Working Group to exercise restraint in revisiting issues on which decisions had already been taken (A/65/17, para. 239).

---

<sup>1</sup> For the reports of the Working Group on the work of its sixth to nineteenth sessions, see A/CN.9/568, A/CN.9/575, A/CN.9/590, A/CN.9/595, A/CN.9/615, A/CN.9/623, A/CN.9/640, A/CN.9/648, A/CN.9/664, A/CN.9/668, A/CN.9/672, A/CN.9/687, A/CN.9/690 and A/CN.9/713.

6. At its nineteenth session, having completed its work on the revisions of the 1994 Model Law (see para. 2 above), the Working Group reached the understanding that, according to the UNCITRAL practice, the draft Model Law on Public Procurement emanating from the nineteenth session of the Working Group (the “draft Model Law”) would be circulated to all Governments and relevant international organizations for comment. It was noted that the comments received would be before the Commission at its forty-fourth session, in 2011, together with the draft Model Law. It was emphasized that no amendments would be made to the draft Model Law after the text was circulated for comment and before the Commission considered it (A/CN.9/713, para. 137).

7. At the same session, the Working Group reached the understanding that, at its twentieth session, it would focus on proposals for a revised Guide to Enactment. Although it was understood that the Commission was not expected to adopt the revised Guide together with the revised Model Law, the Working Group noted its intention of submitting a working draft of the revised Guide emanating from the work of its twentieth session to the Commission, so as to assist the latter with its consideration of the draft Model Law (A/CN.9/713, para. 138).

8. At the same session, the Working Group recalled that it had deferred a number of issues for discussion in the revised Guide. It was agreed that decisions of the Working Group on the treatment of those issues in the revised Guide should be maintained, unless they were superseded by subsequent discussion in the Working Group or Commission. It was also recalled that additional sections addressing issues of procurement planning and contract administration, a glossary of terms and table of correlation of the revised Model Law with the 1994 Model Law were agreed to be included in the revised Guide. The understanding was that, for lack of time, it was unlikely to be feasible to prepare an expanded Guide for implementers or end-users, and thus the revised Guide would primarily be addressed to legislators (A/CN.9/713, para. 139).

9. At the same session, the Working Group requested the Secretariat to follow the following guidelines in preparing the revised Guide: (a) to produce an initial draft of the general introductory part of the revised Guide, which would ultimately be used by legislators in deciding whether the revised Model Law should be enacted in their jurisdictions; (b) in preparing that general part, to highlight changes that had been made to the 1994 Model Law and reasons therefor; (c) to issue a draft text for the revised Guide on a group of articles or a chapter at or about the same time, to facilitate the discussions on the form and structure of the revised Guide; (d) to ensure that the text of the revised Guide was user-friendly and easily understandable by parliamentarians who were not procurement experts; (e) to address sensitive policy issues, such as best value for money, with caution; and (f) to minimize to the extent possible repetitions between the general part of the revised Guide and article-by-article commentary; where they were unavoidable, consistency ought to be ensured. It was agreed that the relative emphasis between the general part of the revised Guide and article-by-article commentary of the revised Guide should be carefully considered (A/CN.9/713, para. 140).

## II. Organization of the session

10. The Working Group, which was composed of all States members of the Commission, held its twentieth session in New York, from 14 to 18 March 2011. The session was attended by representatives of the following States members of the Working Group: Algeria, Austria, Belarus, Benin, Brazil, Bulgaria, Cameroon, Canada, Chile, China, Czech Republic, El Salvador, France, Germany, Iran (Islamic Republic of), Israel, Italy, Japan, Kenya, Malaysia, Mexico, Morocco, Nigeria, Pakistan, Paraguay, Philippines, Republic of Korea, Russian Federation, Singapore, Spain, Thailand, Turkey, Uganda, Ukraine, United States of America and Venezuela (Bolivarian Republic of).

11. The session was attended by observers from the following States: Congo (Democratic Republic of), Cuba, Indonesia, Iraq, Kuwait, Lithuania, Myanmar, Romania, Sweden and Zambia.

12. The session was also attended by observers from the following international organizations:

(a) *United Nations system*: World Bank;

(b) *Intergovernmental organizations*: European Bank for Reconstruction and Development (EBRD), European Space Agency (ESA), European Union (EU) and International Development Law Organization (IDLO);

(c) *Invited international non-governmental organizations*: American Bar Association (ABA), European Law Students' Association (ELSA), Forum for International Conciliation and Arbitration (FICACIC), International Federation of Consulting Engineers (FIDIC) and International Law Institute (ILI).

13. The Working Group elected the following officers:

*Chairman*: Mr. Tore WIWEN-NILSSON (Sweden)<sup>2</sup>

*Rapporteur*: Sra. Ligia GONZÁLEZ LOZANO (Mexico)

14. The Working Group had before it the following documents:

(a) Annotated provisional agenda (A/CN.9/WG.I/WP. 76);

(b) Note by the Secretariat containing proposals for a Guide to Enactment of the UNCITRAL Model Law on Public Procurement (A/CN.9/WG.I/WP.77 and Add.1-9).

15. The Working Group adopted the following agenda:

1. Opening of the session.
2. Election of officers.
3. Adoption of the agenda.
4. Consideration of proposals for a Guide to Enactment of the UNCITRAL Model Law on Public Procurement.
5. Other business.
6. Adoption of the report of the Working Group.

---

<sup>2</sup> Elected in his personal capacity.

### **III. Deliberations and decisions**

16. At its twentieth session, the Working Group commenced its work on the elaboration of proposals for a Guide to Enactment of the UNCITRAL Model Law on Public Procurement.

### **IV. Consideration of proposals for a Guide to Enactment of the UNCITRAL Model Law on Public Procurement (A/CN.9/WG.I/WP.77 and Add.1-9)**

17. The Working Group recalled guidelines for preparing the revised Guide formulated at its nineteenth session, reproduced in paragraph 9 above. The Working Group confirmed its understanding that the Guide should consist of two parts: the first describing the general approach to drafting the revised Model Law and the second part containing article-by-article commentary. The importance of Part I in particular for legislators in understanding complex provisions of the revised Model Law, reasons for changes made to the 1994 Model Law and policy choices involved in enacting procurement legislation on the basis of the revised Model Law was highlighted.

18. With reference to the draft before the Working Group, the general view was that the optimal balance in the discussion of various issues in the two parts of the Guide was still to be achieved. It was considered that many provisions currently set out in Part I were more appropriate for Part II while some points raised in the article-by-article commentary might be worth highlighting in Part I.

19. As regards Part I in particular, the importance of the text being easily understandable by legislators was emphasized. The point was made that legislators often did not have the resources or time to read through long and complex materials. Extensive discussion on any topic and the use of technical terms requiring expert knowledge or additional research for their understanding should therefore be avoided in Part I. There was also suggestion to move references to particular articles of international instruments to footnotes.

20. The Working Group decided to consider first the proposed guidance on challenges and appeals contained in addenda 3 and 4 of document A/CN.9/WG.I/WP.77 and defer the consideration of addenda 1 and 2 to a later stage at the session.

#### **1. Part I. General remarks to provisions of the revised Model Law on challenges and appeals (A/CN.9/WG.I/WP.77/Add.3)**

21. The general view was that the general remarks to provisions of the revised Model Law on challenges and appeals in Part I of the Guide should substantially be reduced. It was considered that many provisions, in particular paragraphs 112, 113 and 118-120, might be removed to the commentary to the relevant provisions of chapter VIII of the revised Model Law and some might be moved to an introduction to that chapter. It was emphasized that only provisions setting out policy considerations for drafting chapter VIII and the main objectives and principles achieved through chapter VIII should remain in Part I. Examples of the latter provisions, it was said, were contained in paragraphs 121, 124, 125 and 130.

Concern was expressed about some repetitive provisions, which raised issues of inconsistency and confusion.

22. The Working Group agreed that the general remarks to provisions of the revised Model Law on challenges and appeals should be redrafted: provisions that were linked to specific articles of chapter VIII should be moved to the commentary to those articles; and provisions explaining general technical aspects as related to chapter VIII as a whole might be consolidated in an introduction to chapter VIII.

23. With respect to footnote 1, support was expressed for the suggestion to avoid extensive discussion in the Guide of the notion of “independent body”, the ideal degree of separation of powers and whether authorities under article 66 should be given to a newly established or existing body. It was explained that these issues were to be addressed by enacting States in the light of prevailing local circumstances. The suggestion was made to refer instead in the Guide to the guidelines of the Organization for Economic Cooperation and Development (OECD) on integrity of review bodies where the relevant issues were adequately covered.

24. Another view was that more specific guidelines as regards the independent body should be provided in the Guide. It was explained that such discussion might in particular benefit vulnerable States that did not have resources to create any new body for the purpose of fulfilling article 66 provisions and might have doubts regarding existing bodies to which the powers under article 66 should be given. Defining basic requirements that such an independent body should fulfil, and in particular specifying which bodies would not be suitable to perform article 66 functions, was considered important for those States.

25. The Working Group agreed to consider the issues raised in footnote 1 in connection with the relevant commentary to article 66 (for further discussion on these issues, see para. 36 below).

26. With respect to footnote 2, opposition was expressed to describing rules of procedure and rules of evidence in detail in any part of the Guide. The view was shared that those issues were outside the scope of the Guide and the revised Model Law and it would be impossible to present exhaustive and accurate discussion of such issues in a concise manner in the Guide.

27. The view was expressed that the term “peer-based system” or “peer system” with reference to challenge mechanism under article 65 should be avoided since that description was not accurate. It was also suggested that references to “options” in paragraphs 127-129 might be replaced with references to “alternatives”.

## **2. Part II. Article-by-article commentary to chapter VIII. Challenges and appeals (A/CN.9/WG.I/WP.77/Add.4)**

### *Article 63*

28. The Working Group agreed that the penultimate sentence in paragraph 2 of the commentary to article 63 should be revised to convey more accurately the intended meaning. It was suggested in particular in this context that reference to “capacities” should be replaced with reference to “abilities” or “possibilities”. Another view was that the reference should be to conditions under which suppliers or contractors could seek the review. The latter however was considered excessively broad since some

conditions were already covered in article 63 while the goal of the last sentences of paragraph 2 was to give examples of issues that were not regulated in the revised Model Law, such as eligibility of persons to file complaints under provisions of law of enacting States.

29. It was also suggested that reference in the provisions in question to “the nature or degree of interest or detriment” should be replaced with reference to “the nature or degree of loss or injury”, in order to make guidance closer to the wording of article 63. There was general understanding that reference in that context was intended to be made to requirements that might be found in other provisions of law of enacting States as regards proof of loss or injury, or likelihood thereof.

30. It was understood that abilities or possibilities to seek review and the nature or degree of loss or injury would differentiate frivolous complaints or applicants without standing from complaints that ought to be entertained and eligible applicants. After discussion, the Working Group agreed to replace the penultimate sentence in paragraph 2 with the following wording: “In addition, this article does not deal with the requirements under domestic law that a supplier or contractor must satisfy in order to be able to seek review or obtain a remedy.”

#### *Article 64*

31. As regards paragraph 3 of the commentary to article 64, the suggestion was made that the use of the term “inquisitorial” should be reconsidered; the phrase “inquisitorial rather than adversarial” was considered clearer. It was also agreed that in the last sentence reference to “evidence” should be replaced with a reference to “elements”.

#### *Article 65*

32. As regards a cross-reference in paragraph 1 of the commentary to article 65 to possible provisions of the Guide on debriefing, the view was shared that including discussion on debriefing in the Guide was essential. The impact of effective debriefing systems on reducing the number of complaints was noted. Reference was made to jurisprudence that supported the importance of effective and timely debriefing. A delegation suggested assisting the Secretariat with drafting the relevant provisions for the Guide and subsequently proposed the following text:

“As a best practice, procuring entities should provide a debriefing to any supplier or contractor that requests one; debriefings may be provided to suppliers or contractors excluded during the course of the procurement (such as during a pre-qualification proceeding), or after award. A debriefing should be provided as soon as practically possible. Debriefings of successful and unsuccessful suppliers or contractors may be done orally, in writing, or by any other method acceptable to the procuring entity. At a minimum, the debriefing information should include:

- (1) The procuring entity’s evaluation of the significant weaknesses or deficiencies in the requesting supplier or contractor’s bid or proposal, if applicable;
- (2) The overall evaluated price (including unit prices) and technical rating, if applicable, of any successful supplier or contractor and the requesting supplier

or contractor, and qualification information regarding the requesting supplier or offeror;

(3) The overall ranking of all bidders or offerors, when any ranking was developed by the agency during the procurement process;

(4) A summary of the rationale for any award;

(5) A precise description of the product or service to be delivered by the successful supplier or contractor; and

(6) Reasonable responses to relevant questions about whether the procurement procedures contained in the solicitation, applicable regulations, and other applicable authorities, were followed.

The debriefing shall not reveal any commercially sensitive information prohibited by this law, or otherwise, from disclosure. A summary of the debriefing shall be included in the contract file.”

33. As regards a query raised in the first sentence of footnote 1, it was reiterated (see para. 26 above) that no detailed information on rules of evidence or procedures should be included in the Guide in the context of article 65 or any other provisions of the revised Model Law. As regards queries in the remaining part of that footnote, the Working Group agreed that no additional wording should be included in the Guide since the suggested addition conveyed the wrong idea that no corrective action could be taken by the procuring entity after the procurement contract entered into force. Including such wording, it was noted, would contradict the statement in paragraph 7 of the commentary to article 65 of the draft Guide that the procuring entity might take some limited corrective actions after the award, such as some disciplinary measures against personnel involved in improprieties. The possibility of taking such limited corrective actions was, it was emphasized, without prejudice to the provisions of the revised Model Law setting time limits for submission of complaints to the procuring entity before the entry into force of the procurement contract. It was also generally understood that such possibility would exist regardless of whether the concluded procurement contract was cancelled or not.

34. The Working Group agreed to amend the last sentence of paragraph 7 to read “the latter cases may fall instead within the purview of quasi-judicial or judicial review”. That wording, it was explained, conveyed more accurately the idea that some corrective measures, such as cancellation of the procurement contract that entered into force, under the revised Model Law would fall generally under the purview of the independent body or judicial authority.

#### *Article 66*

35. The level of detail in the first two sentences in paragraph 2 of the commentary to article 66 was considered excessive. The suggestion was made to replace those sentences with a sentence reading “The enacting State may consider not enacting article 66.” It was observed that this option was not a condition of anything, as indicated in the draft text of the Guide.

36. Recalling its consideration earlier at the session about the notion of an “independent body” (see paras. 23 and 24 above), the Working Group agreed that paragraphs 4 and 5 of the commentary to article 66 should be redrafted on the basis

of provisions contained therein as well as provisions of paragraphs 118-119 of addendum 3 of document A/CN.9/WG.I/WP.77. It was pointed out that such issues as appointment and removal of the independent body's officers and determining to which body the independent body should be accountable, involved many sensitive issues that should be approached with caution. The Secretariat was also requested to reconsider the reference to "vulnerable States". Emphasizing in this context points raised in the last part of paragraph 5 of the commentary to article 66 was considered sufficient. It was also suggested referring to "authorities of the independent body" in lieu of "competence of the independent body".

37. It was suggested that paragraph 10 of the commentary to article 66 and paragraph 6 of the commentary to article 65 should be redrafted to make them consistent as regards powers of an independent body in the case of cancellation of the procurement proceedings. Reference in this regard was made to provisions of article 66 (2) (b) (ii) of the draft Model Law that referred to two possibilities that might exist in enacting States: first, where an independent body has the authority to review any challenges related to procurement that had been cancelled and second, where only courts might have such authority. It was suggested that paragraph 6 of the commentary to article 65 and paragraph 10 of the commentary to article 66 should be redrafted to reflect those two possibilities.

38. The need for consistency in references to cancellation and termination of procurement proceedings in articles 66 (2) (b) (ii) and 66 (9) (f) of the draft Model Law was queried. In response, it was observed that the use of distinct terms might be desirable in order to differentiate cancellation of the procurement proceedings by the procuring entity from termination of the procurement proceedings by the independent body. The nature of the latter as an available remedy in the challenge and appeal proceedings was emphasized. It was however noted that the consequences of cancellation and termination of the procurement proceedings were the same.

39. With reference to paragraph 25, the point was made that it might be burdensome for the independent body to review all documents related to the procurement proceedings transferred to it by the procuring entity as required under article 66 (8) of the draft Model Law. It was therefore suggested that paragraph 25 should instead refer not to all documents relating to the procurement proceedings that were in the procuring entity's possession but only to those documents that were relevant to the review proceedings. Concerns were expressed about that suggestion since it contradicted the wording in article 66 (8) and would also introduce much discretion for the procuring entity to decide which documents were relevant to the review proceedings and which were not. The exercise of such discretion might lead to abuse, in particular withholding relevant documents on purpose.

40. A related point was that instead of requiring the physical transfer of all documents, which might be burdensome for both the procuring entity and the independent body, the procuring entity should be required to provide immediate access by the independent body to all documents in the procuring entity's possession relevant to the procurement proceedings. In such cases, it was explained, the independent body would decide itself which documents were relevant to the review proceedings. In response, it was observed that electronic records and electronic transmission of data made the transfer of documents and determining their relevance considerably easier.

41. Support was expressed for retaining the provisions of paragraph 25 of the Guide as drafted, taking into accounts risks involved in the suggested alternative approach.

42. The Secretariat was requested to specify to which version of the Agreement on Government Procurement of the World Trade Organization (GPA) reference was made in paragraph 28. The attention of the Working Group was brought in this regard to paragraph 13 of Part I of the draft Guide that noted the need to ensure the accurate references to two versions of the GPA. The Secretariat took note of the need to refer throughout the Guide to the accurate version of the GPA in the context of the provisions analysed. The suggestion to relocate paragraph 28 to Part I did not raise any objection. (See also para. 119 (d) below.)

43. The Working Group agreed with the suggestion to add in the end of the wording in the second set of parentheses in paragraph 29 the words “but for the non-compliance of the procuring entity with the provisions of this Law”.

44. It was agreed that the following parts in the proposed text should be deleted: in paragraph 8, the sentence reading “It is also acknowledged that in most States, there is a determined limitation period for any civil claim”; and in paragraph 29, references to “future losses” and to “the loss of a chance” and the last part of the last sentence, reading “if the power to award financial compensation lies in a small entity or the hands of a few individuals.” It was also suggested that the wording “the term ‘overturn’ does not carry any particular consequences” and the use of the term “quash” in paragraph 27 should be reconsidered, and that guidance should be provided in the appropriate parts of the Guide as regards reasonable duration of the standstill period.

#### *Article 67*

45. The need to ensure meaningful, not necessarily literal, translation in various languages of the phrase “fishing expeditions” found in paragraph 4 was emphasized.

#### *Article 68*

46. No comments were made with respect to the portion of the draft Guide addressing this article.

#### *Article 69*

47. Different views were expressed as regards the need for the article and the footnote accompanying it in the revised Model Law. A strong view was expressed that no footnotes should appear in the revised Model Law. Another view was that footnotes appearing in the draft Model Law (as contained in addenda to document A/CN.9/729) served a useful purpose and should be retained. Most of them, it was pointed out, explained optional texts included in parentheses in the revised Model Law and made it clear that they would not be part of the national law enacted on the basis of the revised Model Law. The point was made that footnote 14 accompanying article 69 was unclear in that latter respect but that deficiency should not undermine the importance of retaining the footnote in the revised Model Law. Concern was expressed that issues raised in that footnote might be overlooked if the text of the footnote appeared only in the Guide.

48. After discussion, support was reiterated for retaining footnote 14 in the revised Model Law. Some delegations supported retaining it together with article 69 with no guidance on article 69 to be included in the Guide while others preferred deleting article 69 and moving footnote 14 to article 63 or the title of chapter VIII. The opposing view was that either that footnote (as all other footnotes currently in the draft Model Law) should be removed to the Guide or its content should be included in article 69.

49. The Working Group recognized that there were deficiencies in provisions of article 69 read together with article 63 of the draft Model Law. It was considered that the Commission should be invited to eliminate them during its finalization of the draft Model Law at its upcoming session. At that stage, it would also decide on the location of footnote 14.

### **3. Proposed text for the Guide to Enactment of the revised Model Law addressing issues of restricted tendering (A/CN.9/WG.I/WP.77/Add.5, part A)**

50. The appropriate location for guidance on the changes to the 1994 Model Law as regards the use of procurement methods was considered. A preference was expressed for including the discussion in a separate part of the Guide, rather than putting it together with the guide to the revised Model Law. The point was made that such an approach would better accommodate two groups of readers: one group that was not familiar with the 1994 Model Law and would be interested only in guidance to the revised Model Law as such; and another that was familiar with the 1994 Model Law and would be interested in understanding the changes made to the 1994 Model Law and the reasons therefor.

51. It was agreed that the word “and” in the third sentence of paragraph 1 should be replaced with the word “or”. The Secretariat was requested to reconsider the examples given in that paragraph, in particular to replace the reference to standard cleaning services with a reference to the supply of pins intended to be traded at sporting events (as an example of procurement of goods of a very nominal value, with many suppliers capable of supplying them), and also to reconsider the use of the term “nuclear” power plants. An alternative view on the latter suggestion, which was eventually agreed, was to retain the term “nuclear” when referring to these power plants, as an indication of the type of highly complex procurement covered by article 28 (1) (a).

52. As regards paragraph 2, the fourth sentence was considered to be accurate only in situations where there was sufficient competition in the market. The Secretariat was requested to redraft the sentence accordingly. The suggestion was made that the use of open tendering with pre-qualification might be considered more appropriate in situations referred to in article 28 (1) (b).

53. Concern was raised as regards reference to the term “lottery” in paragraph 6. It was noted that in many jurisdictions the use of lotteries in public procurement was prohibited. It was therefore suggested that the term “lottery” should be replaced with references to examples of objective selection methods, such as to random selection by drawing lots, to random selection from among a pool of suppliers or contractors and to selection on a first come first served basis. The need to ensure consistency in this respect between paragraphs 6 and 10 was highlighted.

54. The Secretariat was requested to reconsider the reference to small, medium and micro enterprises (SMMEs) in paragraph 18 and elsewhere in the Guide. It was considered that the term might be confusing since the difference between small and micro enterprises was not evident. The view was expressed that the Guide should refer to a more traditional generic term “small and medium enterprises (SMEs)” and explain in the glossary that this term might include micro enterprises. (On this point, see also para. 127 (c) below.)

55. With reference to footnote 1, the suggestion was made that general points related to solicitation might be placed in introductory guidance to section II of chapter II of the revised Model Law, while discrete guidance per procurement method should be placed in the commentary to each relevant procurement method. The value of repeating guidance on advance notices in the commentary to each relevant procurement method (restricted tendering, competitive negotiations and single-source procurement) was noted, in particular in the light of the different implications of such an advance notice in different procurement methods.

56. A query was raised as regards the reference in paragraph 18 to an invitation to tender in the context of restricted tendering, and its relation to an advance notice of procurement. The Secretariat was requested to revise the guidance to avoid confusion with an invitation to tender in open tendering. The accuracy of the seventh sentence of the paragraph was also questioned: it was noted that while the provisions of the draft Model Law excluded the application of article 37 to restricted tendering, the guidance stated that only some provisions of article 37 would not apply, and the Secretariat was requested to reconsider the interaction of these items.

57. The Secretariat was requested to eliminate repetitive provisions and excessive cross-references in paragraphs 4, 11, 12 and 17. It was also requested to avoid excessive detail when referring to other procurement tools and techniques, and challenge proceedings, which might confuse the reader. The possibility of listing all relevant cross-references at the outset of the guidance to a particular article or topic was considered.

58. The Working Group decided to defer the consideration of proposed provisions of the Guide discussing changes made to the 1994 Model Law to a later stage, at which time an entire section consolidating such proposed provisions would be before the Working Group (for the discussion of this point, see para. 50 above).

#### **4. Proposed text for the Guide to Enactment of the revised Model Law addressing issues of request for quotations (A/CN.9/WG.I/WP.77/Add.5, part B)**

59. With reference to footnote 3, support was expressed for harmonizing the provisions of the draft Model Law on thresholds by requiring that they should be set out in procurement regulations, rather than in the law, for example, to allow exchange rate movements and inflation to be accommodated without needing to change the law. The Working Group noted that this point would be brought to the attention of the Commission.

60. In response to a suggestion that reference to higher-value procurement should be included in paragraph 4, it was agreed that there was no need for such a reference and, indeed, the reference to complex procurement should be eliminated, since both were outside the scope of article 28 (2). It was agreed that the second sentence in

this paragraph should be replaced with a sentence reading: “For repeated purchases, establishing a framework agreement may be an appropriate alternative.”

61. The suggestion was made that examples for the use of this procurement method and suggested alternatives should be added, such as procurement of spare parts for vehicles: they could be procured using request for quotations when the need for a single small purchase existed or through a framework agreement when the need for spare parts for a fleet of vehicles might arise on a repeated basis.

62. The complexities involved in selection of a procurement method under the revised Model Law were noted. The Secretariat was requested to simplify the text of the Guide by avoiding extensive comparative analysis between various procurement methods and excessive cross-references, such as in paragraph 9. It was agreed that paragraph 5 should be moved elsewhere in the Guide, and a reference to standardized products (such as in the information technology and communication (ITC) sector) should be included in paragraph 1 as an example of off-the-shelf products that could be defined by reference to industry standards.

**5. Proposed text for the Guide to Enactment of the revised Model Law addressing issues of request for proposals without negotiation (A/CN.9/WG.I/WP.77/Add.6, part A)**

*Conditions for use*

63. The view was shared that the content of footnote 1 was of sufficient importance to be included in the Guide, and it was agreed that the appropriate location would be the guidance to articles 26 and 27 of the revised Model Law (on the selection of procurement methods). In drafting the relevant commentary on the basis of the footnote, the Secretariat was requested to consider adding the following text in the end of the second sentence of that footnote: “and it may shift certain performance risks to the supplier or contractor that presents the proposed output or solution”. It was explained that the procuring entity would bear the performance risks arising from mistakes in detailed specifications, whereas the performance risks arising from mistakes or omissions in output-based specifications would be borne by the supplier or contractor. This point was considered by some delegations to be an important consideration in the selection of a procurement method.

64. While supporting the suggestions described in the preceding paragraph, concerns were expressed that the resulting guidance should not convey the idea that output-based specifications were relevant only in request-for-proposals proceedings and not in tendering. It was noted that this element of differentiation between tendering and request for proposals proceedings was not found in the draft Model Law. The Working Group decided to defer the consideration of the issue to a later stage, at which the guidance to the request for proposals with dialogue would be considered. (For further discussion of this issue, see para. 83 below.)

65. With reference to paragraph 3 and footnote 3 of the commentary to article 28 (3), there were different views as regards the desirability of replacing the term “financial aspects” with “price-related aspects” both in the draft Model Law and consequently in supporting guidance. The latter term was considered narrower and more appropriate in the context of article 46 (9) and (10), whereas the former was considered very broad; while there might be benefits in a broader scope, it could also encompass the financial capacities of bidders, which would be evaluated

in the context of technical and quality aspects of proposals and so included in the first envelope. The method of request for proposals without negotiation, it was said, raised some uncertainties, including as regards the expected content of the first and second envelopes. The view was expressed that a term that would describe as narrowly and precisely as possible the expected content of the second envelope should be used.

66. The alternative view was that the term “financial aspects” should be retained, as it was intended to refer to all financial aspects of proposals included in the second envelope. It was added that the term was not intended to refer to the financial capacities of bidders. Delivery and warranty terms were cited as examples of financial, not price-related, aspects of proposals. In the view of other delegations, however, delivery and warranty terms would most likely be evaluated in the context of technical proposals. A further proposal was to use the term “commercial aspects” in lieu of “financial aspects”. The point was made that regardless of the term used in the revised Model Law, its intended meaning was to be clarified in the Guide, as paragraph 3 of the commentary to article 28 (3) currently sought to do. In addition, it was emphasised that the solicitation documents should set out exactly which aspects should be included in which of the two envelopes, and this would determine what the procuring entity meant by technical or quality aspects and what it meant by financial aspects.

67. The suggestion was made that references in the Guide to envelopes should appear in quotation marks, with an explanation that the term was intended to convey the separate presentation of technical/quality and financial aspects, rather than an envelope per se: in some procurement, large quantities of documents might be submitted as part of the technical proposals. It would also be emphasized that the two envelopes would be submitted simultaneously.

68. With reference to paragraph 4 and footnote 4 of the commentary to article 28 (3), the view was expressed that provisions on clarification should be introduced in article 46 of the Model Law, and in other appropriate procurement methods, where interactive clarifications mechanisms were essential, for example because excessively high or low technological solutions might be sought or proposed. A similar provision would be considered for pre-qualification proceedings and for the assessment of qualification.

69. The following amendments were proposed to the last two sentences of paragraph 5 of the commentary to article 28 (3): “Enacting States should be aware nevertheless that some multilateral development banks are of the view that the use of procurement methods sharing features of request for proposals without negotiation as provided for in the revised Model Law may apply only to the procurement of routine advisory services. Some multilateral development banks may not authorize the use of this method in projects financed by them.”

70. Reservation was expressed at including the proposed wording, as it referred to the practice of one or a few delegations or observers. The point was made that similar provisions appeared throughout the draft Guide, such as in paragraph 14 of document A/CN.9/WG.I/WP.77/Add.1 and in paragraph 19 of document A/CN.9/WG.I/WP.77/Add.8; all should be reconsidered, it was said. The point was made that the Guide should reflect the result of the Working Group’s consensus on the provisions. Concern was also expressed that the proposed wording

might reflect only current practices and not future developments; the text might become obsolete while the Guide continued to be used. It was therefore suggested that the suggested wording should not be included or, alternatively, that the last sentence should be deleted from the proposal.

71. In response to a query as regards whether the proposal would reflect the position of multilateral development banks (“MDBs”) other than the World Bank (only the latter’s position was made known at the session), the Secretariat informed the Working Group that it had received broadly consistent feedback (both formally and informally) from regional MDBs on this and similar questions, and it was recalled that some of the banks concerned had expressed such views at earlier Working Group sessions.

72. A further view was that in considering the proposal and similar provisions throughout the Guide, the needs of potential end-users of the revised Model Law, which in many cases might be those benefitting from loans extended by MDBs, should not be overlooked. Those end-users, it was noted, should be alerted that they might face difficulties in securing loans from the MDBs if they used certain procurement methods in the full range of circumstances contemplated in the revised Model Law.

73. After discussion, the Working Group agreed that the proposed discussion of the practice of the MDBs should be consolidated in one section that might be put in Part I of the Guide or as commentary to article 3. The consolidated discussion should state that certain provisions of the revised Model Law might not be consistent with the rules of certain MDBs with respect to projects financed by them, and that the latter’s policies would need to be consulted if relevant. In addition, it was agreed that the Guide should not include comparative analysis between procurement methods of the revised Model Law and the practices of MDBs. (For further discussion of this point, see paras. 120 and 133-136 below.)

#### *Solicitation*

74. The view was expressed that the Guide should discuss all the exceptions to open solicitation in request for proposals in the order in which they were dealt with in the revised Model Law. It was also suggested that guidance on solicitation within the commentary on a particular procurement method should focus on the distinct features of solicitation for that method: in this case, the guidance should address request for proposals without negotiation rather than request for proposals generally.

75. As a general observation as regards the manner of presenting discussion in the Guide, it was suggested that the provisions of the revised Model Law should not be simply repeated in the Guide for the sake of completeness: discussion should be included only where explanations were provided.

#### *Procedures*

76. With respect to footnote 5, a reservation was expressed to the suggestion to amend the description of the successful proposal to the “most advantageous proposal” in article 46. However, support was expressed for the suggestion because the current wording in different procurement methods was not consistent, even where the same concept was being addressed. The point was made that any

suggested change to the draft Model Law, including this one, would need to be considered by the Commission.

77. As regards paragraph 8 of the commentary to article 46, questions were raised as regards the scoring methods used under this procurement method and the wording in the draft Guide referring to the possibility of selecting the successful proposal under this method on the basis of price alone (the possibility not being referred to in the draft Model Law itself). The reference to price “alone” was considered inaccurate as the method presupposed always evaluation of technical and quality aspects together with price. The Secretariat was requested to redraft the relevant part of paragraph 8 to eliminate inaccuracy, stressing that the successful proposal would always be selected from those that met or exceeded the technical and quality threshold.

**6. Proposed text for the Guide to Enactment of the revised Model Law addressing issues of request for proposals with consecutive negotiations (A/CN.9/WG.I/WP.77/Add.6, part B)**

*Conditions for use*

78. The suggestion was made that examples for the use of this procurement method should be provided. It was recalled that the Working Group had already noted that this procurement method had traditionally been used for the procurement of intellectual services (e.g. advisory services such as legal and financial, design, environmental studies, engineering works). It was observed that the term “intellectual services” was not familiar to all, and that the Guide should reflect terminology used in different systems (e.g. “professional or consulting services”). A further example of the use of this procurement method was offered: procurement of accommodation (i.e. office space) for Government. It was the understanding in the Working Group that, consistent with the Working Group’s decision earlier at the session to remove specific references to the current practices of the MDBs from the guidance to specific procurement methods (see paras. 69-73 above), paragraph 4 of the commentary to article 29 (3) should be redrafted, though retaining references to the use of the method in practice mainly for such services.

79. It was agreed that the words “cannot” should be replaced with the words “may not” in the last sentence of paragraph 3 of the commentary to article 29 (3).

*Procedures*

80. The suggestion was made that guidance on the purpose of scoring in this procurement method should be provided, i.e. that the ranking was determined on the basis of the scores assigned, and that negotiations would then commence with the highest-ranked supplier.

81. The Secretariat was requested to redraft paragraph 3 of the commentary to article 49 in more balanced terms, and to reconsider the order of paragraphs 3 and 4, so as to explain the benefits and potential difficulties in the use of consecutive negotiations, with particular reference to the bargaining position of the procuring entity.

**7. Proposed text for the Guide to Enactment of the revised Model Law addressing issues of two-stage tendering (A/CN.9/WG.I/WP.77/Add.7)**

*Conditions for use*

82. With reference to footnote 1, the view was expressed that no changes in the text of the draft Model Law were required, as the provisions accurately reflected that the envisaged need for discussions with suppliers or contractors was taken into account in deciding to use this procurement method; that the need might not actually materialize was a different consideration. It was also noted that article 47 on the procedures for two-stage tendering made the use of discussions an optional step. The alternative view was that the main justification for use of this procurement method was the need to refine aspects of the description of the subject matter, for which purpose discussions were envisaged, and that the current draft did not fully reflect this emphasis. It was agreed that the Commission should be invited to consider these points when addressing the drafting of article 47.

83. With reference to footnote 2, the suggestion was made that the following words should be added in the end of the last sentence of paragraph 2: “, with input from prospective suppliers or contractors.” It was explained that not only the procuring entity but also the suppliers or contractors that provided input for the final description of the subject matter of the procurement should be responsible for the technical solution and should assume the performance risk arising from any mistakes made therein. The point was made, however, that the last sentence of the paragraph was not intended to deal with allocation of responsibility and contract performance risks, but to convey the idea that in two-stage tendering, unlike in request for proposals with dialogue, the procuring entity remained in charge of finalizing the revised set of terms and conditions of the procurement; the drafting would be reviewed to ensure that this point was accurately reflected.

84. The Secretariat was requested to reconsider the examples provided in paragraph 2 in the light of the last sentence in that paragraph. The point was made that in turnkey projects in particular, suppliers and contractors, not the procuring entity, were in charge of finalizing the detailed description of the technical solution and were subsequently responsible for any failures, but it was acknowledged that the examples reflected in particular the experience of certain MDBs with the use of this procurement method.

85. With reference to footnote 3, the following addition was suggested at the end of the first sentence of paragraph 3: “; nor will discussions allow the procuring entity to weigh costs against potential technical benefits.” It was explained that where commercial terms and technical aspects should be compared so as to finalize the description of the subject matter of the procurement, the use of the method might not be appropriate.

86. Also with reference to the first sentence of paragraph 3, a query was raised as to whether the draft Model Law in fact prohibited any discussion of the financial aspects of proposed technical solutions. The point was made that, in practice, it was common to discuss the financial implications of certain technical aspects at the first stage.

87. The Working Group decided to consider the issues raised in connection with paragraph 3 when it reviewed the commentary to article 47 (see paras. 90-93 below). The need to consider paragraph 8 in that context was also highlighted.

88. The Working Group requested the Secretariat to reflect in the guidance to two-stage tendering that the method was a variant of open tendering; therefore all the safeguards of open tendering applied. The understanding was that the provisions on clarification of solicitation documents also applied to the second stage. Additionally, it was agreed that the guidance should emphasize that discussions were permitted only at the first stage.

#### *Solicitation*

89. With reference to paragraph 13, in the context of the second exemption from international publication in article 32 (4), it was considered that greater emphasis should be attached to the qualitative assessment that only domestic suppliers or contractors were likely to be interested in presenting submissions, among other things because of the low value of the procurement concerned. The need to elaborate on other criteria that the procuring entity would have to take into account in such qualitative assessment was emphasized. Examples provided were geographic factors and limited or the absence of supply base from abroad (indigenous crafts). With reference to footnote 4, it was explained that the exemption was not limited to a value threshold, and should therefore be distinguished from the issues arising in articles 21 (3) (b) and 22 (2), which were based on the application of a financial threshold alone. It was the understanding that in the light of this explanation, paragraph 13 should be revised (also to ensure that the interaction with article 8 (1) was clear), and most of paragraph 14 considering issues of the coherence of low-value thresholds would be more appropriately reflected in the commentary to those other articles in which threshold considerations arose.

#### *Procedures*

90. The Working Group agreed to make the following amendments in the guidance:

(a) To redraft paragraph 20 by stating from the outset that chapter III of the revised Model Law applied to two-stage tendering and subsequently explaining which provisions of chapter III applied to which stage and in which context;

(b) With reference to footnote 7, to bring to the attention of the Commission the proposal to change the terminology;

(c) To explain in paragraph 22 that initial tenders would be rejected as non-responsive if they included price, and to highlight that the scope of discussions under article 47 (3) therefore could not include price;

(d) To explain in paragraph 23 the term “equal opportunity” found in the last sentence, by highlighting the similarities and differences in achieving equal treatment of suppliers during discussions in two-stage tendering and during dialogue in request for proposals with dialogue, drawing on the provisions of article 48 (10) as appropriate, while providing for appropriate safeguards against disclosure of confidential information and the risks of collusion;

(e) To align more closely the wording of paragraph 28 as regards permissible changes in examination and/or evaluation criteria with the provisions of article 47 (4) (b) (ii); and

(f) To reflect in the guidance, perhaps in paragraph 23, the need to put on the record details of the discussions, with a cross-reference to article 24 on the documentary record of procurement proceedings.

91. In the context of paragraph 23, the Working Group recalled its consideration earlier at the session (see paras. 85, 86 and 90 (c) above) on the scope of discussions at the first stage of two-stage tendering. It was noted that at the first stage, while price bids were not allowed, informal discussions on market data might take place.

92. The view was expressed that it would be natural to expect the procuring entity, during the discussions, to consider all aspects of the subject matter of the procurement, including the relative price of certain items available in the market, in order to be able to arrive at the best technical solution. It was therefore proposed that paragraph 3 and other similar provisions throughout the guidance should be amended so as not to exclude the possibility of discussing price-related aspects. Doubts were expressed, however, as to the extent to which the procuring entity could base its choice of the technical solution on non-binding information about market or general prices supplied during discussions, which might turn out to be speculative. It was also noted that it would be unrealistic to disregard the implications of price and price-related aspects in the choice of the technical solution. In this regard, it was noted that the guidelines of certain MDBs prohibited the submission of price at the first stage.

93. The Secretariat was requested to consider all these issues in revising the relevant provisions of the guidance, including paragraphs 3, 8 and 23, and to ensure consistency throughout the guidance in reflecting the permissible scope of discussions.

94. As regards changes to the terms of the procurement as a result of the discussions, it was observed that the first stage solicitation documents were likely to focus on the functional aspects of the items to be procured, using broad terms of reference, and the second stage would allow for the technical aspects to be refined and included in the request for final tenders. Hence the subject matter could not be changed during the discussions, but the technical solutions to provide that function could indeed change. The Secretariat was also requested to provide practical examples in the context of paragraph 26 that would illustrate how changes to technical and quality aspects might or might not change the description of the subject matter of the procurement, so as to allow for an easier understanding of the concepts at issue.

95. The Working Group recalled its consideration of this topic at its earlier sessions and that it had not defined the concept of material change to the description of the subject matter, because the many variables involved had indicated that a descriptive approach allowing a procurement-by-procurement consideration would be the better approach. It was considered that it would similarly not be possible to provide a definition of when the description of the subject matter changed in this context; it would require a case-by-case analysis, reflecting, for example, whether a different group of potential suppliers or contractors might participate as a result of the change (for example, changes in the type of trains procured or length of the

roads to be built might change the pool of suppliers in some cases and might not in others). In this regard, it was noted that it would be helpful for the Guide to indicate criteria that would illustrate whether a change was to technical aspects or to the description as a whole. It was also agreed that the Guide should cross refer to the provisions of article 10 (4) which regulated the description of the subject matter of the procurement. The suggestion was made that general issues might better be discussed in the commentary to that article with a cross-reference in paragraph 26 to that discussion, while discrete issues arising from article 10 in the context of two-stage tendering should be discussed in paragraph 26. The implications of changes to the solicitation documents that might require a new procurement under the provisions of article 15 were also highlighted in this regard.

96. The Working Group also recalled, with reference to footnote 3, that real-life examples of the use of two-stage tendering as opposed to request for proposals with dialogue were still outstanding. In response, supply and installation of a plant was mentioned, noting that certain MDBs did not contemplate the use of request for proposals with dialogue for such procurement. Building roads and the procurement of metro cars were cited as other examples. In those examples, formulating detailed specifications from the outset of the procurement would be possible but, after discussions with suppliers, the procuring entity might refine some technical aspects of the subject matter reflecting the information supplied (such as on more sophisticated materials or methods available in the market). The point was made that the difference between two-stage tendering and request for proposals with dialogue was not so much in the subject matter of the procurement but rather in the experience of the procuring entity in the use of these procurement methods: would the procuring entity be able to procure the subject matter in question better through request for proposals with dialogue as opposed to two-stage tendering? Another point made was that the use of two-stage tendering was diminishing in practice. (For further discussion on differences between these procurement methods, see para. 97 below.)

**8. Proposed text for the Guide to Enactment of the revised Model Law addressing issues of request for proposals with dialogue (A/CN.9/WG.I/WP.77/Add.8)**

*Conditions for use*

97. The Secretariat was requested to provide real-life examples for the use of the request for proposals with dialogue in the guidance. Examples suggested related to procurement aimed at seeking innovative solutions, such as for saving energy or achieving sustainable procurement, where various technical solutions existed for the same need (e.g. in an energy-saving example, differences might be in the materials used, and the use of one source of energy as opposed to the other (wind vs. solar)). The experience of one international organization with the use of the method was shared, noting that it saved considerable time as compared with that required for the use of two-stage tendering.

98. With reference to footnote 1, reservations were expressed to changing the text of article 10. The point was made that article 10, addressing the description of the subject matter of the procurement, should remain generic and sufficiently broad to accommodate tendering and non-tendering procurement methods and detailed and output-based performance specifications. Were any changes required to ensure consistency between articles 10 and 48, they should be made to article 48.

99. Allied to this issue, the wording in paragraph 5 referring to the notion in article 48 on the feasibility of formulating a detailed description of the subject matter of the procurement was queried. It was suggested that the use of the words “cannot formulate” in the guidance was not the same test as set out in article 48, in that the guidance implied that the test would be whether the procuring entity was unable objectively to formulate a detailed description of the subject matter. It was recalled that the Working Group had taken a more flexible approach when it had drafted the provisions of the draft Model Law and that approach should not be tightened through the guidance. The point was made that the reasons for deciding not to formulate a single and detailed description of the subject matter might include a lack of sufficient resources or expertise, or that so doing was considered a sub-optimal approach (for example, where the available solutions were not fully known or not fully appreciated). The Secretariat was requested to reconsider the wording to reflect these various grounds, including that suppliers might be in a better position to formulate detailed technical solutions to meet certain needs of the procuring entity, such as those that required significant level of expertise and skills (for example, architectural works, or civil engineering services).

100. The Working Group requested the Secretariat:

- (a) To remove the reference to construction from paragraph 1;
- (b) To eliminate the automatic link between the complexity of what was to be procured and the use of request for proposals with dialogue in paragraphs 1 to 3. Concern was expressed in particular as regards inconsistent references to complex, relatively complex and highly complex procurement in various paragraphs of the guidance;
- (c) To include in paragraph 8 a cross-reference to the commentary to article 20 that addressed conflicts of interest that would arise where one supplier might be involved in designing the technical solution and subsequently participated in the procurement;
- (d) To ensure that the references to negotiations and dialogue in the guidance to chapter V as a whole were accurate, i.e. that references to bargaining and negotiations would not be made when discussing dialogue, and the term “negotiations” would be used only in the procurement methods using that term in their title;
- (e) To align the text more closely with the conditions for use in article 29 (2);
- (f) To make consequential changes in the text reflecting the decisions reached by the Working Group earlier in the session, in particular as regards issues that might more appropriately be addressed in general guidance (such as the notion of approval by an external authority and the position of certain MDBs as regards the use of some procurement methods under the Model Law (see paras. 69-73 above));
- (g) To consider relocating paragraphs 12 and 13 from the guidance to article 29 (2) to the guidance to article 48, save to the extent that the procedural aspects of the procurement method discussed in paragraphs 12 and 13 might affect the decision of the procuring entity as regards the selection of the procurement method. It was also observed that the approach to this structural question should be consistent for all procurement methods;

(h) To eliminate repetition in the discussion of best and final offers (BAFOs).

*Procedures*

101. With reference to footnote 4, the view was expressed that the wording in square brackets in the guidance should remain in the text without square brackets. It was suggested that the sentence where that wording was found should be divided into two; the first sentence should indicate that article 48 (5) listed information that must (not “should”) be included in the request for proposals; and the second sentence should explain that the procuring entity was responsible for ensuring that the information provided was adequate for suppliers to prepare their proposals and for the procuring entity to evaluate such proposals equitably.

102. The Working Group agreed:

(a) With the suggestions made in footnotes 5 and 6 that the guidance concerned should be moved from the guidance to article 48 to the discussion of qualification criteria and evaluation criteria respectively. The text of paragraph 31 should also be reviewed to ensure that it was clear that both qualification criteria and evaluation criteria could reflect the skills and experience of suppliers’ personnel;

(b) To redraft the last sentence of paragraph 34 to convey that the procuring entity was required by article 11 of the Model Law to provide a true picture of the evaluation criteria and procedure;

(c) With reference to footnote 7, to delete the last sentence in square brackets from paragraph 38, on the understanding that it would be ineffective and counterproductive to oblige suppliers to remain participating in the dialogue if they did not want to participate further, and that tender securities would not provide a workable solution to the issue of ensuring sufficient participation. (A related point, linked to para. 40 of the guidance, was that the possibility of excluding suppliers during the dialogue procedure was regulated differently in various jurisdictions.)

**9. Proposed text for the Guide to Enactment of the revised Model Law addressing issues of competitive negotiations (A/CN.9/WG.I/WP.77/Add.9, part A)**

103. With reference to paragraph 7 and footnote 1 of the commentary to article 29 (4), it was pointed out that if the additional guidance suggested in the footnote were included, it should be borne in mind that addressing a lack of effective negotiation skills could not be addressed when an urgent procurement arose. The view was expressed that issues of capacity should not be addressed in the guidance to this procurement method, but rather should be treated as a general matter or a matter to be addressed in the context of, for example, request for proposals with dialogue.

104. The Working Group noted that in practice the method was used widely in the circumstances other than those listed in article 29 (4), such as for the procurement of services.

105. The Working Group agreed:

(a) To replace in paragraph 7 of the commentary to article 29 (4) the reference to “competitive dialogue” with a reference to “competitive negotiations”;

(b) With reference to the provisions of article 33 (5) and similar provisions throughout the Model Law, to recommend to the Commission that it might wish to reconsider specifying in the law itself, rather than in procurement regulations, the place of publishing an advance notice of procurement and similar information;

(c) As suggested in footnote 2, to explain in the glossary the term “BAFO”, but the explanation of the rule that there could be only one round of BAFOs should appear in the guidance to article 50;

(d) With reference to paragraph 13 of the commentary to article 50, to highlight the differences between concurrent negotiations in competitive negotiations and dialogue that took place concurrently in request for proposals with dialogue, emphasizing that negotiation would need to be of a very short duration given the urgency that would be involved;

(e) With reference to paragraph 17 of the commentary to article 50, to replace the phrase “freezes specifications” with the phrase “terminates the ability of the procuring entity to modify its requirements and the terms and conditions of the procurement”; and to replace the reference to “the contract terms offered by suppliers and contractors” with a reference to the “terms and conditions offered by suppliers and contractors”, and to clearly distinguish between consequences of the request for BAFOs and making BAFOs;

(f) To use consistently throughout the Guide the term “best practice” in preference to “good practice”.

106. The Secretariat was requested to ensure a uniform and structured approach in the guidance to each procurement method.

**10. Proposed text for the Guide to Enactment of the revised Model Law addressing issues of single-source procurement (A/CN.9/WG.I/WP.77/Add.9, part B)**

*Conditions for use*

107. With reference to paragraph 1 of the commentary to article 29 (5), it was observed that a common use of single-source procurement arose in the purchase of products protected by intellectual property rights, such as spare parts; accordingly, it was suggested that the guidance should encourage procuring entities to plan for future procurements and to acquire appropriate licenses, so as to allow for competition in such future procurement. With reference to paragraph 1 and footnote 3, the Working Group’s consideration earlier at the session of the description of the subject matter of the procurement was recalled (see paras. 95 and 98 above). The suggestion was therefore made that the issues raised in footnote 3 should be addressed elsewhere.

108. The Working Group agreed to replace the word “normally” with the word “possibly” in paragraph 2 and to emphasize at the end of that paragraph that the amount procured in emergency situations should be strictly limited to the needs arising from that emergency situation.

109. With reference to paragraph 5 and footnote 4, the general view was that the example provided in the paragraph, although taken from the 1994 Guide, was inappropriate and should be removed. Another view was that the entire paragraph should be deleted. In response, it was observed that the provisions on safeguards contained in the paragraph should be retained.

110. After discussion, it was agreed that paragraph 5 should be redrafted to align it with the wording of article 29 (5) (e), which did not itself refer to cases of serious economic emergency. In redrafting the paragraph, the Secretariat was requested to highlight that risks of abuse were present in all cases of single-source procurement, but might be greater under article 29 (5) (e), and to emphasize the following points: that the use of single-source procurement was exceptional and the use of the method under article 29 (5) (e) was even more exceptional, as evidenced by the ex-ante approval and public consultation requirements (which would take the method outside the general competitive market); that urgent procurement arising from catastrophes and emergency procurement were addressed elsewhere; that the example of economic emergency taken from the 1994 Guide was misleading and should not be repeated in the revised Guide; although examples of when the method could be used should not be included here to avoid confusion, notably as regards how the exclusive ability of the supplier is to be determined, examples of cases that would be excluded from the application of the provisions should be provided; and that socio-economic policies could be better pursued through other avenues available under the revised Model Law.

111. Another view was that article 29 (5) (e) of the draft Model Law should be removed since it was contrary to the objectives of the revised Model Law. In response, it was observed that the provision had been subject to extensive discussion and the Working Group had decided to retain it. It was observed that there might be good reasons for resort to the measures referred to in that article or in the guidance, and that the deletion of article 29 (5) (e) could be counterproductive, as a State in a situations envisaged in article 29 (5) (e) might decide to pursue those types of measures. Without the provision under discussion, it could do so without the safeguards of the revised Model Law.

112. It was recalled that it would be for the Commission to decide on any proposed amendment to or deletion of the provisions of the draft Model Law. It was also noted that, as was the case with the 1994 Model Law and its Guide to Enactment, the Commission was expected to approve both the revised Model Law and the revised Guide.

113. With reference to paragraph 8, the point was made that the hierarchy between competitive negotiations and single-source procurement was not always clear. The view was expressed that one of the criteria for selecting a procurement method under article 27 — to seek to maximize competition to the extent practicable — made single-source procurement the method of last resort, as it was the only method in which no competition was envisaged. It was suggested that the guidance to articles 26 and 27 should facilitate the toolbox approach to the selection of the procurement method and could give examples of the risks (notably to competition and integrity) arising in each procurement method, and risks of extraneous considerations such as greater familiarity with certain procurement methods that might distort an objective selection.

*Solicitation*

114. A query was raised as to whether a reference to article 29 (4) (a) should be added to article 33 (6) of the Model Law. The Secretariat was requested to consider this point and, if appropriate, to bring any suggested change to the attention of the Commission.

*Procedures*

115. The Secretariat was requested to reflect in paragraph 14, consistent with the approach in paragraph 13, the exemption to the requirement for an advance notice in the case of urgency under article 29 (5) (b).

**11. Part I. General remarks (A/CN.9/WG.I/WP.77/Add.1 and 2)***General comments*

116. The view was expressed that addenda 1 and 2 should be significantly revised, to remove imprecise terms and discussion of secondary issues and consequences, and to focus more clearly on the concepts at issue.

*Sections I.A.1. and I.A.2. History and Purpose*

117. The following suggestions were made:

(a) To combine the sections on “History” and “Purpose”, explaining the original purposes in 1994 and those underlying current work;

(b) To reflect that UNCITRAL’s main objective when preparing the 1994 Model Law was to provide a mature, complete and satisfactory model for public procurement to all United Nations Member States, which could operate as an alternative to the varying procurement policies of bilateral and multilateral donors;

(c) To amend paragraph 4 to reflect the mandate for, and the objectives in, revising the 1994 Model Law;

(d) To refer in paragraph 5 to both international and national trade;

(e) To revise paragraph 6 by deleting the final sentence, and clearly delineating the remaining purposes set out in the paragraph. The substance of the final sentence would then be located elsewhere, as an introduction to the presentation of the revisions to the 1994 Model Law; cross-references between Part I and this section would be included.

*Section I.A.3. Universal application of the Model Law*

118. The following suggestions were made:

(a) To reconsider the section title, perhaps replacing the word “universal” with the word “general” and to consider including a reference to the broader scope of the revised Model Law;

(b) To replace references to “flexible and non-prescriptive provisions of the Model Law”, such as in paragraph 9 and elsewhere, with references to options envisaged in the text;

(c) To combine paragraphs 8 and 9 and to add a reference to the users of the 1994 Model Law;

(d) In paragraph 10, to reflect the concepts of neutrality and objectivity; to revise the reference to “all types of States” and to include a reference to different legal traditions; to relocate the final sentence to the proposed section “History and Purpose of the Model Law” (see para. 117 (a) above). An alternative view was to retain the first part of that final sentence, reading “Sound laws and practices for public sector procurement are necessary in all countries”, in paragraph 10;

(e) To refer to article 3 that affected the concept of universal application.

*Section I.A.4. Interaction with other international texts addressing public procurement*

119. The following suggestions were made:

(a) As the main issue was to note that the revised Model Law was subject to international agreements as per article 3, to highlight only those issues that might be of concern to enacting States; to eliminate unnecessary factual detail on other international instruments, so as to ensure that inaccurate statements were not made;

(b) To treat the points raised as regards article 3 in paragraphs 11 and 13 as a discrete item deserving separate discussion;

(c) To reconsider the drafting of the last sentence in paragraph 12 as regards the relationship between the revised Model Law and the United Nations Convention against Corruption;<sup>3</sup>

(d) To revisit the references to the GPA in paragraph 13 in due course, to ensure accuracy (see also paragraph 42 above), and to mention that preparatory work on the revised GPA had also been taken into account in preparing the revised Model Law; in the same paragraph, to refer to bilateral free trade agreements;

(e) To outline in paragraph 14 the differences between the revised Model Law and MDBs’ policies, avoiding detailed comparison;

(f) In paragraph 14, to refer to “projects” and not “procurement projects”; to link the two first sentences with the rest of the paragraph; to refer only to the harmonization of the MDBs’ internal policies; to redraft the last sentence to avoid any implication that a domestic law based on the revised Model Law would automatically be acceptable to the MDBs; and to relocate this paragraph, as it did not refer to international instruments addressing public procurement.

120. The view was expressed that the MDBs’ position on the use of some procurement methods in the Model Law in projects financed by them should be reflected in the commentary to article 26. Earlier decisions by the Working Group to provide historical background on the use of some procurement methods by MDBs were recalled. A general statement to the effect that countries seeking financing from MDBs should seek information about their current applicable policies was considered insufficient in this regard. In response, it was observed that views of the MDBs, which could change over time, should not be reflected in the Guide. (For further discussions on this point, see paras. 133-136 below.)

<sup>3</sup> United Nations, *Treaty Series*, vol. 2349, No. 42146.

*Section I.B. Purpose of the Guide*

121. It was agreed to add a reference in the text to a new section of the Guide that would describe the changes made to the 1994 Model Law.

*Section II.A. Objectives*

122. The view was expressed that paragraph 19 should also provide the context and derivation of the objectives listed, and should discuss their relative importance. Another view was that such background information might involve excessive theoretical discussion and might be controversial.

123. The suggestion was made that the section should highlight that the objectives referred to public procurement, so as not to create expectations in private sector procurement, and should also include commentary on the satisfaction of public needs. It was also suggested that the section, perhaps in paragraph 20, should highlight that the objectives might be reinforcing but might also contradict each other and that in some procurement methods one or some objectives might prevail over others. The view was expressed that the discussion in the section was excessively economics-focused.

124. With reference to paragraph 20, the suggestion was made that the words “may not confer” should be replaced with the words “does not itself confer” in the first sentence or, alternatively, that the sentence might not be accurate and should be deleted. After discussion, it was agreed to retain the wording in the 1994 Guide (“does not itself”), subject to possible review by the Commission. It was also suggested that the phrase “is assured” should be replaced with the phrase “is better assured” and the phrase “abuse is absent” should be replaced with the phrase “abuse is addressed”.

Value for money

125. The following suggestions were made:

(a) To replace the word “includes” with the words “is a concept including” and add “and aimed at an optimal relationship between both for the procuring entity” in the first sentence of paragraph 21; and to reverse use of the terms economy and efficiency;

(b) Simpler examples should be provided in paragraph 21, and a more robust reference to the use of life-cycle costing should be included elsewhere;

(c) Paragraph 22 should be deleted, with its general substance being added to paragraph 21.

Participation and competition

126. Views differed as to whether participation and competition should be addressed together or separately, but it was agreed that further explanation of the objective of competition should be added. The concept, it was said, encompassed three aspects: the number of competitors; their capacity and quality; and their willingness to participate and compete. The view was expressed that the overlap between the objective of participation and the objective of competition should be explained in the Guide.

127. It was agreed:

(a) To add the words “on balance” in the first sentence of paragraph 23 after the word “effective” and to refer to “these objectives” rather than “the objectives” of the revised Model Law;

(b) In paragraph 24, to refer to the “limited and exceptional circumstances” in which international participation could be limited and to replace the words “on both a domestic and international level” with “by both domestic and international suppliers and contractors”;

(c) To delete the reference to “micro enterprises” in paragraph 27 (on this point, see also para. 54 above);

(d) To consider replacing in paragraph 28 the reference to “a more concentrated market” with a reference to a market with a limited number of suppliers or contractors capable of delivering the subject matter of the procurement concerned; to refer to concentrating rather than consolidating the market at the end of the paragraph;

(e) To delete the second sentence in paragraph 28 as it went beyond a description of the revised Model Law’s objectives. A reservation was expressed about this suggestion as the sentence included valuable concepts. It was suggested that the substance of the paragraph could be relocated, such as to a section of the Guide discussing the interaction of procurement regulation and other government policies affecting participation and competition;

(f) To use consistently the term “suppliers or contractors” or to define the term “suppliers” in the Guide as including contractors.

#### Fair and equitable treatment

128. The Secretariat was requested:

(a) To shorten paragraph 29, in particular by reconsidering the need for the text after the second sentence;

(b) In what would become the remaining text of paragraph 29, to emphasize the exceptional circumstances that were under discussion;

(c) To revise paragraph 30 by (i) explaining and illustrating appropriately equal and equitable treatment, highlighting the differences between the two terms, (ii) deleting the references to free trade agreements, and (iii) removing the reference to reciprocity in the end of the paragraph.

#### *Concluding remarks*

129. In concluding its discussion of Part I of the draft Guide, the Working Group requested the text to be as factual and concise as possible. In this regard, the view was expressed that providing detailed guidance on the objectives of the revised Model Law should be reconsidered.

*Proposals for the Guide as regards sections addressing the selection of procurement methods*

130. It was suggested that Part I should include the following wording under section II. Main features of the Model Law:

“1. The revised Model Law contains a greater variety of procurement methods than were provided in the 1994 Model Law. These methods, whether revised or new, reflect developments in the field and evolving government procurement practice in the years since the 1994 Model Law was adopted. The number of procurement methods provided reflects the view of the Commission that the objectives of the Model Law are best served by providing States with a varied menu of options from which to choose in order to address different procurement situations, provided that the conditions for use of the particular method are met. The availability of multiple procurement methods allows States to tailor the procurement procedures according to the subject matter of the procurement and the needs of the procuring entity. This in turn permits the procuring entity to maximize economy and efficiency in the procurement while promoting competition.

2. Enacting States are cautioned, however, that many of these methods are complex, and consideration should be given to the capacity of procuring entities to administer certain procurement methods effectively.”

131. Opposition was expressed to the proposed wording in paragraph 2, in that it implied that some procurement methods were simpler to conduct than others, without adequate explanation, and might indicate that some methods were less acceptable than others. In support of the proposal, it was stated that it conveyed in concrete terms the issues covered by the relevant provisions of the revised Model Law.

132. In addition, the following wording was proposed for consideration by the Secretariat for inclusion in the commentary to articles 26 and 27:

“Article 26. Methods of Procurement in the revised Model Law contains a footnote (as appears in the 1994 Model Law) advising enacting States that they ‘may choose not to incorporate all the methods of procurement listed in this article into their national legislation.’ The new footnote adds that ‘an appropriate range of options, including open tendering, should be always provided for.’

As an additional safeguard, in its provisions on conditions for use, the 1994 Model Law included, for each method of procurement other than tendering, the following optional language for enacting States to consider: ‘Subject to approval by ... (the enacting State designates an organ to issue the approval)’. In the revised Model Law, the Commission decided to remove that optional language from the individual provisions on conditions for use of procurement methods and instead to address the concern more globally in the footnote to article 26. That footnote now includes the following: ‘States may consider whether, for certain methods of procurement, to include a requirement of a high-level approval by a designated organ.’”

133. The Working Group had before it in addition the following proposal:

“Historically, the rules of some multilateral development banks have not included procurement methods equivalent to request for proposals with dialogue or competitive negotiations as provided for in the Model Law, and have included methods with features of request for proposals without negotiation and request for proposals with consecutive negotiations as provided for in the Model Law only for the procurement of advisory services. Aware of this, UNCITRAL has nevertheless decided not to base the selection of procurement method on whether it is goods, works or services that are procured, but rather in order to accommodate the circumstances of the given procurement and to maximize competition to the extent practicable (article 27 (2)) (for the relevant guidance, see paragraphs ...). UNCITRAL wishes to note that the model law should reflect the fact that policies and practices evolve over time.”

134. Support was expressed for the substance of the text in paragraph 133 above, subject to clarification of the scope of the term “advisory services”. An alternative view was that the text should be shortened to state generally that potential borrowers from the MDBs should check the applicable public procurement policies.

135. The understanding was that the proposed wording in paragraph 133 above should be included in the commentary to article 26 and an introductory statement should also appear in Part I outlining the general approaches of the revised Model Law and MDBs and providing a cross-reference to the guidance to article 26.

136. It was proposed that an introductory statement for Part I on this subject might be added in section II.B. Scope of the Model Law under the heading “Methods of procurement” and should reflect the provisions reproduced in paragraph 130 above and the following concepts: (a) that enacting States should give consideration to the capacity of procuring entities to administer procurement methods effectively; and (b) that enacting States that considered receiving financing from MDBs might wish to consult the relevant MDBs, as noted above. While support was expressed for the substance of the proposal, the point was made that items (a) and (b) raised unrelated issues and should be discussed separately.

## V. Future work

137. The Working Group noted the need to consider more expeditious ways to reform the revised Model Law in the future, to ensure that it accurately reflected evolving practices and regulations.

138. The Working Group discussed possible topics for future work in public procurement and related areas, including updating the UNCITRAL instruments addressing privately financed infrastructure projects, to reflect the revised Model Law and developments in the use of public-private partnerships (PPPs). Possible issues included methods of selection and post-contract dispute resolution. A review of developments in the regulation of PPPs and a study on the feasibility and desirability of work by the Commission in that field were considered potentially useful. Other areas of work mentioned included procurement planning and contract administration.

139. The point was also made that there might be topics in non-procurement-related areas, such as those relating to property rights, worth considering for possible future work by UNCITRAL.

**D. Note by the Secretariat on the revised Guide to Enactment to accompany the UNCITRAL Model Law on Public Procurement, submitted to the Working Group on Procurement at its twentieth session (A/CN.9/WG.I/WP.77 and Add.1-9)**

**[Original: English]**

1. At its nineteenth session (Vienna, 1-5 November 2010), having completed its work on the revision of the 1994 UNCITRAL Model Law on Procurement of Goods, Construction and Services (the “Model Law”),<sup>1</sup> the Working Group reached the understanding that, at its twentieth session, it would focus on proposals for a revised Guide to Enactment. It was understood that the Commission would adopt the Model Law on Public Procurement (the revised Model Law) at its forty-third session, in 2011. The Working Group noted its intention of submitting a working draft of the revised Guide emanating from the work of its twentieth session to the Commission, so as to assist the latter with its consideration of the draft revised Model Law at that session (A/CN.9/713, para. 138). It was not expected that the Commission would adopt the revised Guide at that session.

2. At its nineteenth session, the Working Group recalled that it had deferred a number of issues for discussion in the revised Guide and that decisions on them should be maintained, unless they were superseded by subsequent discussion in the Working Group or Commission (A/CN.9/713, para. 139). The Working Group requested the Secretariat to prepare proposals for the revised Guide in accordance with the following guidelines: (a) to produce an initial draft of the general introductory part of the revised Guide, which would ultimately be used by legislators in deciding whether the revised Model Law should be enacted in their jurisdictions; (b) in preparing that general part, to highlight changes that had been made to the Model Law and reasons therefor; (c) to issue a draft text for the revised Guide on a group of articles or a chapter at or about the same time, to facilitate the discussions on the form and structure of the revised Guide; (d) to ensure that the text of the revised Guide was user-friendly and easily understandable by parliamentarians who were not procurement experts; (e) to address sensitive policy issues, such as best value for money, with caution; and (f) to minimize to the extent possible repetitions between the general part of the revised Guide and article-by-article commentary; where they were unavoidable, consistency should be ensured. It was agreed that the relative emphasis of the general part and article-by-article commentary of the revised Guide should be carefully considered (A/CN.9/713, para. 140).

3. This note is submitted pursuant to this request of the Working Group. Addenda 1 to 3 to the present note set out proposals for some sections of Part I (General remarks) of a draft revised Guide to Enactment to the revised Model Law. The purpose of the general part of the Guide to Enactment is to explain the main policy considerations arising when enacting national legislation on public

---

<sup>1</sup> For the text of the Model Law, see *Official Records of the General Assembly, Forty-ninth Session, Supplement No. 17* and corrigendum (A/49/17 and Corr.1), annex I (also published in the Yearbook of the United Nations Commission on International Trade Law, vol. XXV: 1994) (United Nations publication, Sales No. E.95.V.20), part three, annex I. The Model Law is available in electronic form at the UNCITRAL website: [www.uncitral.org/pdf/english/texts/procurem/ml-procurement/ml-procure.pdf](http://www.uncitral.org/pdf/english/texts/procurem/ml-procurement/ml-procure.pdf).

procurement, and the recommendations made by the Working Group, so as to put the article-by-article remarks that will follow the general part of the Guide into context. It is intended that this structure of the Guide will assist legislators in enacting the provisions of the revised Model Law into their national legislation.

4. The Working Group is invited to consider whether any additional sections/sub-sections or topics should be added in Part I. They may include, for example: use of procurement methods, tools and techniques available under the Model Law; methods of solicitation; qualification of suppliers and contractors; the use and importance of the documentary record; debriefing; institutional issues (including considerations of centralized and decentralized procurement systems); sustainable procurement; and assistance from the UNCITRAL secretariat.

5. Addenda 4 to 9 to this note set out proposals for Part II (Article-by-article commentary) of the Guide, which purpose is to guide not only legislators in enacting the provisions of the revised Model Law into national legislation but also regulators and procuring entities in implementing the provisions of the revised Model Law. It is expected that this Part of the Guide will also be supported by practical materials, such as a glossary of terms used in the Model Law (equating them to alternatives in current use where appropriate), timetables and flow-charts, to assist practitioners. Each of these addenda contain: a summary of the purpose of the provisions under discussion; where relevant, any drafting issues that may assist legislative drafters; and guidance on the provisions themselves.

6. Addendum 4 to this note sets out a proposal for the Guide text to accompany chapter VIII (Challenges and appeals) of the revised Model Law. Addenda 5 to 9 set out proposals for guidance to the use of each procurement method referred to in chapters IV and V of the revised Model Law. Although the provisions regulating methods of procurement are found in several places of the Model Law, the relevant guidance is presented per procurement method, consolidating the guidance on related provisions of chapters II, IV and V. The manner of presenting guidance followed in the current draft of addenda 5 to 9 is thus different from the presentation of article-by-article commentary that was a feature of the 1994 text, and is also found in addendum 4 to this note. This deviation is for ease of reference in the Working Group and the Commission. That manner of presenting guidance per procurement method, if retained in the final revised Guide, may allow legislators and other policy-makers to consider how to enact the provisions to suit local circumstances in the light of both the conditions for use and procedures for each method. The Working Group is invited to consider the manner of presenting the guidance on the use of procurement methods in the final revised Guide.

7. The draft revised Guide to Enactment contained in the addenda to this note addresses the revised Model Law. A separate section of the Guide may be added that will discuss the revisions made to the 1994 text (including a correlation table).

## (A/CN.9/WG.I/WP.77/Add.1) (Original: English)

**Note by the Secretariat on the revised Guide to Enactment to accompany the UNCITRAL Model Law on Public Procurement, submitted to the Working Group on Procurement at its twentieth session****ADDENDUM**

This addendum sets out a proposal for the following sections and sub-sections of Part I (General remarks) of a draft revised Guide to Enactment to the UNCITRAL Model Law on Public Procurement: I. Introduction (“History and purpose of the UNCITRAL Model Law on Public Procurement” and “Purpose of the Guide”) and II. Main features of the Model Law (“Objectives”, “Scope” and “General approach”).

**GUIDE TO ENACTMENT OF THE UNCITRAL MODEL LAW ON PUBLIC PROCUREMENT****Part I. General remarks****I. INTRODUCTION****A. History and purpose of the UNCITRAL Model Law on Public Procurement****1. History**

1. At its twenty-seventh session (New York, 31 May-17 June 1994), the United Nations Commission on International Trade Law (UNCITRAL or the Commission) adopted the UNCITRAL Model Law on Procurement of Goods, Construction and Services (the 1994 Model Law),<sup>1</sup> and an accompanying Guide to Enactment.<sup>2</sup> The 1994 Model Law proved to be widely-used and successful. It formed the basis of procurement law in more than thirty countries across the world, and its general principles have been reflected to a greater or lesser degree in many more.

2. At its thirty-seventh session, in 2004, the Commission decided that the 1994 Model Law would benefit from being updated to reflect new practices, in particular those that resulted from the use of electronic public procurement, and the experience gained in the use of the 1994 Model Law as a basis for law reform, without departing from its basic principles.

<sup>1</sup> The text of that Model Law is found in annex I to the report of UNCITRAL on the work of its twenty-seventh session (*Official Records of the General Assembly, Forty-ninth Session, Supplement No. 17 (A/49/17)*), and is also available at [www.uncitral.org](http://www.uncitral.org).

<sup>2</sup> The first UNCITRAL text on public procurement was the UNCITRAL Model Law on Procurement of Goods and Construction, adopted in 1993 at the twenty-sixth session of the Commission (annex I to the report of UNCITRAL on the work of its twenty-sixth session (*Official Records of the General Assembly, Forty-eighth Session, Supplement No. 17 (A/48/17)*)). This text addressed the regulation of public procurement in the area of goods and construction but did not contain provisions on non-construction services.

3. The UNCITRAL Model Law on Public Procurement, adopted by the Commission at its forty-fourth session (Vienna, 27 June-... July 2011) (the revised Model Law)<sup>3</sup> is the result of the work of UNCITRAL to reform the 1994 Model Law. This Guide accompanies the revised Model Law. References to the “Model Law” in this Guide, save where otherwise noted, are to the revised Model Law.

## **2. Purpose**

4. The decision by UNCITRAL to formulate model legislation on procurement was promoted by a wish to address inadequate or outdated legislation that had been observed in many countries, resulting in inefficiency and ineffectiveness in the procurement process, abuse, and the consequent failure of the public purchaser to obtain adequate value in return for the expenditure of public funds.

5. Inadequate procurement legislation at the national level creates obstacles to international trade (the promotion of which is a major aspect of the mandate of UNCITRAL), a significant amount of which is linked to procurement. Disparities among and uncertainty about national legal regimes governing procurement may be a partial limitation on the extent to which Governments can access the competitive price and quality benefits available through international procurement. At the same time, the ability and willingness of suppliers and contractors to sell to foreign Governments is hampered by the inadequate or divergent state of national procurement legislation in many countries.

6. The purpose of the Model Law is therefore three-fold: first, to serve as a model for States for the evaluation and modernization of their procurement laws and practices, and the establishment of procurement legislation where none currently exists. The second purpose is to support the harmonization of procurement regulation internationally, and so to promote international trade. The third purpose is to allow users of the 1994 Model Law to amend their national legislation to reflect modern procurement practices.

## **3. Universal application of the Model Law**

7. In accordance with its general approach of intergovernmental consensus-building, UNCITRAL has drawn on the experiences of countries from around the world in regulating public procurement when drafting the Model Law. This approach also serves to ensure that the text reflects best practice, and its provisions are universally applicable.

8. In the period following the issue of the 1994 Model Law, the text was used most frequently as a basis for introducing procurement legislation in countries whose economies were in transition and in developing countries. In countries at those levels of development, a substantial portion of all procurement is engaged in by the public sector, and a substantial proportion of gross domestic product is represented by public procurement. A significant part of total procurement may arise in connection with projects that are part of the essential process of economic and social development, and procurement may be targeted at enhancing such

---

<sup>3</sup> The text of the revised Model Law is found in annex I to the report of UNCITRAL on the work of its forty-fourth session (*Official Records of the General Assembly, Sixty-sixth Session, Supplement No. 17 (A/66/17)*), and is also available at [www.uncitral.org](http://www.uncitral.org).

development and capacity-building. In economies in transition, the introduction of procurement legislation is also part of a process of increasing the market orientation of the economy and a tool to regulate the relationship between its public and private sectors.

9. For developed countries, many of which enacted procurement legislation before the Model Law was issued, the Model Law's flexible and non-prescriptive provisions can be utilized as a tool for evaluation and modernization of existing systems and earlier legislation, so as to improve the outcomes in public procurement.

10. The potential of the Model Law as an instrument to harmonize international trade will be fully realized to the extent that it is used by all types of States. The text has therefore not been designed with any particular groups of countries or particular state of development in mind, and does not promote the experience in and approach of any one region. Sound laws and practices for public sector procurement are necessary in all countries: resources are scarce in all regions, even if relative scarcity varies, and so the Model Law is designed to facilitate the objective of ensuring that procurement is carried out in the most advantageous way possible.

#### **4. Interaction with other international texts addressing public procurement**

11. Since the issue of the 1994 Model Law, other international texts and agreements addressing public procurement have been promulgated, and they confer obligations that affect national procurement legislation in States that are parties to the texts concerned. The Model Law is expressly subject to any international agreements entered into by the enacting State (pursuant to article [3]), and UNCITRAL has sought to ensure, to the extent possible, consistency with these international texts and with common provisions in regional texts, so that it can be used by parties to them without major amendment.

12. The United Nations Convention against Corruption (New York, 31 October 2003)<sup>4</sup> (the Convention against Corruption) addresses the prevention of corruption by setting mandatory minimum standards for procurement in its article 9, which requires each State party to take the "necessary steps to establish appropriate systems of procurement, based on transparency, competition and objective criteria in decision-making, that are effective, inter alia, in preventing corruption". Although the Model Law is not an anti-corruption instrument per se, its procedures are aimed, among other things, at the avoidance of abuse, so allowing the many enacting States that will be subject to the Convention against Corruption to comply with its obligations.

13. The Agreement on Government Procurement of the World Trade Organization (the WTO) contained in the Final Act of the 1986 —1994 Uruguay Round of trade negotiations (the 1994 GPA)<sup>5</sup> is a plurilateral agreement between [28] members,

---

<sup>4</sup> United Nations, *Treaty Series*, vol. 2349. The Convention was adopted by the United Nations General Assembly by its resolution 58/4. In accordance with article 68 (1) of the Convention, the Convention entered into force on 14 December 2005. The text of the Convention is also available at [www.unodc.org/documents/treaties/UNCAC/Publications/Convention/08-50026\\_E.pdf](http://www.unodc.org/documents/treaties/UNCAC/Publications/Convention/08-50026_E.pdf) (accessed January 2011).

<sup>5</sup> Available at [www.wto.org/english/docs\\_e/legal\\_e/gpr-94\\_01\\_e.htm](http://www.wto.org/english/docs_e/legal_e/gpr-94_01_e.htm) (accessed January 2011).

whose purpose is described by the WTO as to open up as much of public procurement as possible to international competition, through making laws, regulations, procedures and practices regarding government procurement more transparent and ensuring that Governments do not protect domestic products or suppliers, or discriminate against foreign products or suppliers. [A new Agreement on Government Procurement is expected to be formally issued in 2011<sup>6</sup> [to be updated and a generic reference to both versions of the GPA (the “GPA”) is to be included].] There are also regional trade agreements and procurement directives applicable in other economic or political groupings of States. The Model Law is designed with sufficient flexibility to allow enacting States to adapt it to meet their international trade obligations as regards procurement without compromising the efficacy of the text itself.

14. In developing countries and countries whose economies are in transition, many procurement projects may be funded by multilateral donors or by foreign direct investment and, indeed, donors may finance procurement reform. The Model Law includes provisions that are suitable for all types of procurement, including large-scale and complex projects, and so can be used for the procurement aspects of privately or donor-funded projects. The multilateral development banks have agreed to harmonize their regimes as regards donor-financed procurement. The Paris Declaration on Aid Effectiveness and the Accra Agenda for Action<sup>7</sup> provide, inter alia, for partner country ownership and the use of country systems for aid delivery (in circumstances in which the procurement system in the country concerned is assessed to be of the requisite standard). As the Model Law is drafted to reflect best practice in procurement, enacting States can be assured that it provides a sound basis for an approach based on the use of a country’s procurement system.

## **B. Purpose of the Guide**

15. In preparing and adopting the Model Law, UNCITRAL is mindful that the Model Law will be a more effective tool for States modernizing their procurement legislation if background and explanatory information is provided to policymakers and legislators to assist them in using the Model Law, particularly if there is limited familiarity with the type of procurement procedures it contains. This Guide also addresses the expanded scope of the revised Model Law as compared with its 1994 counterpart, and also explains, as necessary, the main recent developments in procurement that underlie the revisions made to the 1994 Model Law.

16. The information presented in this Guide is intended to explain both the objectives of the Model Law (as set out in its Preamble) and how the provisions in the Model Law are designed to achieve those objectives. The information in this Guide may also assist States in exercising the options provided for in the Model Law and in considering which, if any, of the provisions of the Model Law might have to be varied to take into account particular local circumstances. For example,

---

<sup>6</sup> The provisionally agreed revised GPA text (of 11 December 2006) is available at [www.wto.org/english/tratop\\_e/gproc\\_e/negotiations\\_e.htm](http://www.wto.org/english/tratop_e/gproc_e/negotiations_e.htm) (accessed January 2011) [to be updated].

<sup>7</sup> Available at [www.oecd.org/dataoecd/30/63/43911948.pdf](http://www.oecd.org/dataoecd/30/63/43911948.pdf) (accessed January 2011).

options have been included on issues that are expected in particular to be treated differently from State to State, such as the definition of the term “procuring entity”, which involves the scope of application of the Model Law, and issues related to challenge and appeals procedures.

17. Taking into account that the Model Law is a “framework” law and provides only essential principles and procedures (see further section [II.D] below), this Guide discusses the need for regulations to support legislation based on the Model Law, identifies the main issues that should be addressed in them, and discusses legal and other infrastructure that will be needed to support the effective implementation of the text.

## II. MAIN FEATURES OF THE MODEL LAW<sup>8</sup>

### A. Objectives

18. The Model Law has six main objectives, set out in its Preamble, which can be summarized as follows:

- (a) Achieving economy and efficiency (value for money);
- (b) Wide participation by suppliers and contractors, with procurement open to international participation as a general rule;
- (c) Maximising competition;
- (d) Ensuring fair and equitable treatment;
- (e) Assuring integrity, fairness and public confidence; and
- (f) Promoting transparency.

19. The above objectives are mutually supporting and reinforcing. The procedures and safeguards in the Model Law are designed to promote objectivity in the procurement proceedings which, in turn, facilitate participation, competition, fair treatment and transparency. These notions are the key principles that facilitate achieving the overarching aims of the Model Law: value for money and avoidance of abuse. Both the Convention against Corruption and the GPA are also based on statements of highly similar principles: expressed in the Convention as transparency, competition and objectivity in decision-making, and in the GPA as non-discrimination and transparency.

20. The statement of objectives may not confer substantive rights on any participants or potential participants in the procurement process. The effective implementation of the objectives can only take effect through cohesive and coherent procedures based on these underlying principles, and where compliance with them is evaluated and, where necessary, enforced. With the procedures prescribed in the Model Law incorporated in its national legislation, an enacting State will therefore create an environment in which the public is assured that the government purchaser will spend public funds with responsibility and accountability, and thus will obtain

---

<sup>8</sup> Some provisions in this section may need to be amended after the article-by-article commentary has been completed, to avoid unnecessary repetitions.

value for money. This will also be the environment in which parties offering to sell to the Government are confident of receiving fair treatment and that abuse is absent.

## **1. Value for money**

21. Value for money in procurement includes both economy (meaning that the transaction costs or administrative costs of procurement and procurement systems are reasonable) and efficiency (meaning an optimal relationship between cost and other factors, which include the quality of the subject matter of the procurement). Price may be the sole or main determinant of the winning offer, or quality or other considerations may prevail, depending on the nature of the procurement concerned. When assessing what will represent value for money in a particular procurement, the procuring entity may wish to include a broad range of elements, such as life-cycle costs (which may themselves include disposal (sale or decommissioning) costs), and the impact of variations agreed during the administration of a procurement contract. The notion of sustainability — the costs and benefits to society as a whole rather than to the procuring entity alone, and which themselves may include the social and environmental impact of the procurement — may also be considered relevant. [Add a cross-reference to discussion in the Guide on sustainable procurement.]

22. The Model Law allows flexibility in designing the minimum standards that tenders or other offers must meet in order to be considered responsive (article [10]), and in the design of evaluation criteria (article [11]), so that procuring entities can determine the most advantageous tender in accordance with local practices regarding the components of value for money. (See, further, paragraphs 33-35 below regarding the transparency measures designed, *inter alia*, to facilitate the accountability of procurement officials for the decisions they take.)

## **2. Participation and competition**

23. The Model Law mandates as the main procurement method open tendering — widely recognized as the most effective in promoting the objectives of the Model Law. A main reason is that the procurement is “open” to all potential suppliers, and its terms are pre-determined and pre-publicised, so that suppliers are encouraged to participate and to compete to sell to the Government.

24. Participation on both a domestic and international level is a pre-requisite for competition, and accordingly, such international participation is the default rule for procurement under the Model Law. The limited circumstances in which international participation can be limited (directly or indirectly) are set out in articles [8]-[11] of the Model Law, as further explained in section [II.F] below. Enacting States will need to take into account any relevant international trade obligations regarding international participation in their procurement, when implementing these provisions into their domestic legislation.

25. The commentary to chapter II, section II, of the Model Law explains the default rule of open solicitation for procurement methods, other than those that necessarily involve or permit the use of direct solicitation (procurement that is not “open” in the sense set out above).

26. Finally, there are rules that require a minimum number of participants in procurement in which there might otherwise be too few participants to compete, to

ensure, among other considerations, that competition remains a relevant consideration regardless of whether or not the procurement is “open” (see, for example, the provisions on Request for proposals with dialogue, article [48]).

27. Enacting States may wish to take steps to increase the participation of small, medium and micro enterprises (SMMEs) in their domestic procurement. [To be completed when the article-by-article remarks sections have been drafted — to avoid repetition.]

28. Although some procurement markets will comprise many potential suppliers, procurement of larger and more complex items and services will normally take place in a more concentrated market. Enacting States may wish to monitor the extent of real competition in public procurement and take steps to avoid collusion and/or the creation of oligopolies where there are repeated procurements or long-term procurements in markets without many potential suppliers. The risks involved may increase where the effect of the Government’s purchases may be to consolidate still further the market.

### **3. Fair and equitable treatment**

29. The concept of fair and equitable treatment of suppliers under the Model Law involves non-discrimination and objectivity in taking procurement decisions that affect suppliers. The Model Law includes several provisions implementing these principles. First, except when authorized or required to do so by the procurement regulations or other provisions of law of this State, the procuring entity may not establish any “requirement limiting participation of suppliers or contractors in procurement proceedings that discriminates against or among suppliers or contractors or against categories thereof” (article [8 (2)]). Secondly, subject to provisions of article [8], the procuring entity may not establish any criterion, requirement or procedure with respect to the qualifications of suppliers or contractors that discriminates against or among suppliers or contractors or against categories thereof, or that is not objectively justifiable (article [9 (6)]). Thirdly, article [10 (2)] as regards descriptions of the procurement provides that the procuring entity, again subject to provisions of article [8], may not establish any description of the subject matter of a procurement that may restrict the participation of suppliers or contractors in or their access to the procurement proceedings, including any restriction based on nationality. A further aspect of fair and equitable treatment is reflected in the requirement of article [10] that descriptions of what is to be procured must be objective, clear and complete. Along with the safeguards contained in article [11] on the evaluation criteria, this requirement of article [10] is aimed at ensuring that suppliers compete on an equal footing. (See, further, the commentary to article [7] on the rules of communication, designed not to exclude suppliers in a discriminatory fashion; article [9] setting rules on qualifications and providing in particular that suppliers can be disqualified only on the basis of pre-determined grounds; articles [10 and 11] regulating examination and evaluation criteria and providing in particular that submissions have to be examined and evaluated against pre-publicised criteria; and article [39] as regards presentation of tenders, in particular that late tenders cannot be accepted.)

30. The principle of equal treatment underlying free trade agreements normally implies that suppliers in all participating States are treated equally; the Model Law’s principle of fair and equitable treatment is a more nuanced one, which recognizes

that strictly equal treatment can lead to a discriminatory outcome (such as if the same time limits are applied to suppliers communicating in paper form and those communicating in electronic form). Nonetheless, the Model Law and free trade regimes proceed on the basis that opening domestic procurement markets to international competition is of benefit, and that the obligations between States under those agreements should therefore be reciprocal.

#### **4. Integrity**

31. Integrity in procurement involves both the avoidance of corruption and abuse and the notion of personnel involved in procurement acting ethically and fairly, avoiding conflicts of interest in particular.

32. General standards of conduct for civil servants may be addressed by enacting States in other national laws and regulations. Since the Convention against Corruption requires procurement systems to address conflicts of interest of personnel in procurement, article [25] of the Model Law highlights the need to enact a code of conduct for such personnel that will address conflicts of interest and other relevant issues. Enacting States, in accordance with their national legislation, may wish to add further provisions addressing integrity and prevention of corruption, or to include references to other laws regulating these issues.

#### **5. Transparency**

33. Transparency in procurement involves five main elements: the disclosure of the rules that apply in the procurement process; the publication of procurement opportunities; the prior determination and publication of what is to be procured and how offers are to be considered; the visible conduct of procurement according to the prescribed rules and procedures; and the existence of a system to monitor that these rules are being followed (and to enforce officials to follow them if necessary). Transparency is considered a key element of a procurement system that is designed, in part, to limit the discretion of officials, and thereby to avoid abuse and corruption. It is thus a critical support for integrity in procurement and for public confidence in its operation, and a tool to facilitate the accountability of those engaged in the procurement process.

34. Transparency measures feature throughout the Model Law. They include requirements that all legal texts regulating procurement should be made promptly and publicly available (article [5]), the determination of evaluation criteria at the outset of the procurement and their publication in the solicitation documents (article [11]), the publication of the deadline for presentation of submissions (article [14]), the disclosure to all participants of significant further information provided during the procurement to any one participant (article [15]), the publication of contract award notices (article [22]), the wide publication of invitations to participate and conditions of participation (articles [32 and 34]), including in an appropriate language (article [13]), and, in tendering proceedings, an opening of tenders in the presence of suppliers or contractors submitting them (article [41]). Further, certain information regarding the conduct of a particular procurement must be made publicly available *ex post facto*, and participants are entitled to further information, all of which must be included in a record of the procurement (article [24]). The Model Law also sets out requirements for non-discriminatory methods of communication (article [7]), stipulates the manner of

entry into force of the procurement contract (article [21]), and allows alleged non-compliance with these requirements to be challenged under its chapter VIII.

35. Nonetheless, the provisions in the text have also been formulated to allow for discretion where appropriate and necessary. Taking account of the differing stages of development and maturity of procurement systems in enacting States, this Guide comments on features of certain procurement methods that are intended to permit more or less discretion, and the capacity and infrastructure needed to operate them effectively, so as to enable enacting States to decide whether or not each method is appropriate for its local circumstances. Significant steps in the procurement process that are intended to constitute legal obligations towards suppliers are governed by rules so as to limit the use of discretion (such as the choice of procurement methods, which is discussed in detail in section [...] below). Other steps involve much broader discretion, such as designing evaluation criteria, which can be crafted to favour price above quality, or vice versa, in a highly flexible manner. The use of discretion under the Model Law involves a balance that allows the procuring entity to identify what to procure and how best to conduct the procurement, but discretion is then circumscribed in that the procuring entity must subsequently follow the prescribed rules and procedures in implementing the decisions involved (so the evaluation criteria and their constituent elements must be published in advance and then adhered to). Transparency is therefore a tool that allows the exercise of discretion to be monitored and evaluated (and, where necessary, challenged).

## **B. Scope of the Model Law**

### **1. Application to all public procurement**

36. The Model Law is designed to be applicable to all public procurement within an enacting State: the objectives of the Model Law are best served by the widest possible application of its provisions. Consequently, article [1] of the text provides that the Model Law applies to all public procurement in the enacting State. There are various options provided in the text to define the concept of the “procuring entity”, reflecting different extent of the public sector in States (see, further, the commentary to the relevant provisions of article [2]).

37. For the same reason, there is no general threshold below which the Model Law’s provisions do not apply. The Commission is aware that the costs of full compliance with all the provisions of the Model Law may exceed their benefits in some low-value procurement, and presents several options for procuring entities in such cases. First, the request-for-quotations procedure in article [45], a simple and speedy method particularly where conducted electronically, is available below a threshold set by the enacting State; auctions and framework agreements under chapters VI and VII, respectively, can also be used to amortise transaction costs and are thus useful for low-value procurement. Secondly, for procurements below [the same threshold], the standstill period envisaged under article [21 (2)] and individual contract award notices under article [22 (2)] can be dispensed with, provided that a notice of all below-threshold procurement is published at least once a year. Certain detailed publicity requirements relating to languages and currencies are optional for such procurement (see, for example, articles [13 (1) and 32 (4)]).

## 2. Defence and sensitive procurement

38. Defence procurement is a significant sector of the domestic procurement market in many enacting States. Traditionally (including in the 1994 Model Law), such procurement was exempted as a whole from legislation and supporting rules governing procurement. The present text brings national defence and national security sectors, where appropriate, into the general ambit of the Model Law, so as to promote a harmonized legal procurement regime across all sectors in enacting States, and to enable all procurement to benefit from the Model Law's provisions. However, it is acknowledged that the Model Law's extensive transparency obligations might not be compatible with all defence procurement: some procurement in the defence and national security arena will require appropriate modifications to accommodate sensitive or confidential information.

39. The Model Law permits such modifications, however, not because the procurement involves defence per se, but because it involves classified information and can thus be referred to as sensitive procurement. Enacting States will observe that modifications are permitted on a case-by-case basis, in order to avoid a blanket exemption arising whether by design or accident. "Classified information" refers to information designated as classified by an enacting State in accordance with the relevant national law, understood in many jurisdictions as information to which access is restricted by law or regulation to particular classes of persons. The term, and therefore the flexibility conferred as regards classified information, refer not only to procurement in the sectors where "classified information" is most commonly encountered, such as national security and defence, but also to procurement in any other sector where protection of certain information from public disclosure may be permitted by law, such as in the health sector. Importantly, the provisions do not confer any discretion on the procuring entity to expand the definition of "classified information": to do so would invite abuse. Generally, issues pertaining to the treatment of "classified information" are regulated at the level of statute, and are therefore subject to scrutiny by the legislature.

40. The authorization granted to procuring entities to take special measures and impose special requirements for the protection of classified information, including granting an exemption for the procurement from provisions requiring public disclosure of information, applies only to the extent permitted by the procurement regulations or by other provisions of law in the enacting State. Under article [7] of the Model Law, the procuring entity is required to specify, when first soliciting participation in a procurement procedure involving classified information, if any measures and requirements are needed to protect that information at the requisite level, and what those measures are. If it does so, the procuring entity must provide reasons in the record: these safeguards are designed to ensure that the potential significance of the exemptions is appropriately considered, and that the procuring entity (which determines whether sufficient grounds exist to lift normal transparency requirements) can explain and justify its actions.

41. As an application of the general principle described in paragraphs 11-14 above, the provisions in the Model Law allowing for exceptions to transparency mechanisms for the protection of essential security interests, such as relating to the procurement of arms, ammunition or war materials, or to procurement indispensable for national security or for national defence purposes, are flexible and allow for States to comply with relevant international obligations.

42. Other issues that are of particular concern in defence procurement include the complexity of some procurement, and the need to ensure security of both information and supply. The Model Law's provisions, in chapters V and VII in particular, allow for these needs to be accommodated (including the appropriate protection of classified information as necessary).

### **[3. International obligations]**

43. It is also important to note that article [3] gives deference to the international obligations of the enacting State at the intergovernmental level. It provides that such international obligations (e.g., loan or grant agreements with multilateral and bilateral aid agencies containing specific procedural requirements for the funds involved; procurement directives of regional economic integration groupings) prevail over the Model Law to the extent of any inconsistent requirements.]

### **4. Procurement planning and contract administration**

44. The Model Law includes the essential procedures for the selection of suppliers and contractors for a given procurement contract, consistent with the objectives described in paragraphs 18-35 above, and provides for an effective challenge mechanism if the rules or procedures are broken or not respected. The Model Law does not purport to address the procurement planning, or contract performance or implementation phase. Accordingly, issues such as budgeting, needs assessment, market research and consultations, contract administration, resolution of performance disputes or contract termination are not addressed in its provisions.

45. Nonetheless, the Commission recognizes the importance of these phases of the procurement process for the overall effective functioning of the procurement system. The enacting State will need to ensure that adequate laws and structures are available to deal with these phases of the procurement process: if they are not in place, the aims and objectives of the Model Law may be frustrated.

46. As regards procurement planning, international and regional procurement regimes have moved towards encouraging the publication of information on forthcoming procurement opportunities, and some enacting States may require the publication of such information as part of their administrative law. Some other systems reduce time limits for procurement advertisements and notices where there has been such advance publication. The benefits of this practice accrue generally through improved procurement management, governance and transparency. Specifically, it encourages procurement planning and better discipline in procurement and can reduce instances of, for example, unjustified recourse to methods designed for urgent procurement (if the urgency has arisen through lack of planning) and procurement being split to avoid the application of more stringent rules. The practice can also benefit suppliers and contractors by allowing them to identify needs, plan the allocation of necessary resources and take other preparatory actions for participation in forthcoming procurements.

47. [The Model Law does not require the publication of such information — its provisions in article [6] are permissive. Flexibility is needed because information and needs may change with circumstances; not only may the procuring entity's time and costs be wasted, but suppliers or contractors may also incur unnecessary costs. Making available abundant, irrelevant or misleading information, rather than

carefully planned, useful and relevant information, may compromise the purpose of issuing this type of information. Similarly, the publication of procurement plans for the forthcoming months is also encouraged, subject to these caveats. The commentary to article [6] provides further detail of the approach of the Model Law.]

48. The contract administration stage, if poorly conducted, can undermine the integrity of the procurement process and compromise the objectives of the Model Law of equitable treatment, competition and avoidance of corruption, for example if variations to the contract significantly increase the final price, if sub-standard quality is accepted, if late payments are routine, and if disputes interrupt the performance of the contract. Detailed suggestions for contract administration in complex procurement with a private finance component are set out in the UNCITRAL Legislative Guide on Privately Financed Infrastructure Projects (2000):<sup>9</sup> many of the points made in that instrument equally apply to all contract administration, particularly where the contract relates to a complex project. The UNCITRAL Legal Guide on Drawing Up International Contracts for the Construction of Industrial Works (1987),<sup>10</sup> addresses provisions specific to an industrial works contract.<sup>11</sup>

### C. General approach of the Model Law

49. The Model Law provisions set out general requirements for a sound procurement system, and procedures for each procurement. Consistent with its intended application for all regions, the approach of the text is flexible and non-prescriptive. States can adapt the text to local circumstances, such as defining the extent of public sector procurement, without compromising the Model Law's essential principles and procedures.

50. The Model Law offers procedures that provide a balance between allowing some commercial discretion on the part of the procurement official (with the aim of empowering him or her to maximize value for money) and regulating or restricting the use of such discretion (by means of transparency and rules for the conduct of procurement) to avoid poor and corrupt decisions.

51. The Model Law's general prescriptions for the procurement system can be summarized as follows:

(a) That the applicable law, procurement regulations and other relevant information are to be made publicly available (article [5]);

(b) The prior publication of announcements for each procurement procedure (with relevant details) (articles [32-34]) and ex post facto notice of the award of procurement contracts (article [22]);

(c) Items to be procured are to be described in accordance with article [10] (that is, objectively, and without reference to specific brand-names as a general rule,

---

<sup>9</sup> Available at [www.uncitral.org/uncitral/en/uncitral\\_texts/procurement\\_infrastructure.html](http://www.uncitral.org/uncitral/en/uncitral_texts/procurement_infrastructure.html) (accessed January 2011).

<sup>10</sup> Id.

<sup>11</sup> The Working Group may consider that further discussion is warranted on procurement planning and contract administration and, if so, to provide guidance to the Secretariat on the parameters for such discussion.

so as to allow submissions to be prepared and compared on a common and objective basis);

(d) That qualification procedures and permissible criteria to determine which suppliers will be able to participate are set out in the law, and the particular criteria that will determine whether or not suppliers are qualified in a particular procurement procedure are to be advised to all potential suppliers (articles [9 and 17]);

(e) That open tendering is the recommended procurement method and that the rules require the objective justification for the use of any other procurement method (article [27]). The law must set out the particular conditions for use of each such method (articles [28-30]);

(f) Standard procedures for the conduct of each procurement procedure are prescribed in the law (chapters III-VII);

(g) Communications with suppliers are to be in a form and manner that does not impede access to the procurement (article [7]);

(h) There is a legal requirement for a standstill period between the identification of the winning supplier and the award of the contract, in order to allow any non-compliance with the provisions of the Model Law to be addressed prior to any procurement contract entering into force (article [21 (2)]); and

(i) There is a legal requirement for challenge and appeal procedures if rules or procedures are breached (chapter VIII).

52. As regards the obligations on the procuring entity for each procurement proceeding, the procuring entity is to:

(a) Determine and advise potential suppliers of all relevant information for the procurement at the beginning of the procedure in accordance with the rules set out in the Model Law (articles [36, 38, 46, 48, 52 and 57-60], for example). This information includes the procedures for each procurement method and the criteria and procedures for awarding the procurement contract;

(b) Use open and fully competitive procedures unless there is justification to do otherwise (chapter II, sections I and II);

(c) Follow the prescribed procedures for each procurement procedure (chapters III-VII); and

(d) Advertise the award of the procurement contract (article [22]).

**(A/CN.9/WG.I/WP.77/Add.2) (Original: English)****Note by the Secretariat on the revised Guide to Enactment to accompany the UNCITRAL Model Law on Public Procurement, submitted to the Working Group on Procurement at its twentieth session****ADDENDUM**

This addendum sets out a proposal for the following section and subsections of Part I (General remarks) of a draft revised Guide to Enactment to the UNCITRAL Model Law on Public Procurement: II. Main features of the Model Law (“A ‘framework’ law to be supplemented by procurement regulations and supported by appropriate infrastructure”, “E-procurement,” and “Provisions on international participation in procurement proceedings, and the use of procurement systems to achieve other government policy goals”).

**GUIDE TO ENACTMENT OF  
THE UNCITRAL MODEL LAW  
ON PUBLIC PROCUREMENT****Part I. General remarks**

...

**II. MAIN FEATURES OF THE MODEL LAW**

*(continued)*

**D. A “framework” law to be supplemented by procurement regulations and supported by appropriate infrastructure****1. Legislative framework**

53. The Model Law is intended to provide all the essential procedures and principles for conducting procurement proceedings in the various types of circumstances likely to be encountered by procuring entities. However, it is a “framework” law that does not itself set out all the rules and regulations that may be necessary to implement those procedures in an enacting State.

54. Accordingly, the Model Law envisages, as a first step, that enacting States will issue procurement regulations to complete the legislative framework for the procurement system, both to fill in the details of procedures authorized by the Model Law and to take account of the specific, possibly changing circumstances at play in the enacting State (such as the real value of thresholds for request for quotations, for example, and accommodating technical developments). Naturally, caution is needed to ensure that regulations, which are derived from the Model Law, do not compromise its objectives and procedures. As regards other legal

infrastructure, not only will procurement procedures under the Model Law raise matters of procedure that will be addressed in the procurement regulations, but answers to other legal questions arising will probably be found in other bodies of law (such as administrative, contract, criminal and judicial-procedure law). Procuring entities may need to take account of and apply employment and equality legislation, environmental requirements, and perhaps others. Enacting States will enhance their procurement efficacy to the extent that the many applicable provisions are clearly disseminated and they and their interaction with procurement law understood.

## **2. Implementation of legislative provisions**

55. The legislative framework for procurement should form part of a coherent and cohesive procurement system. A second step to support legal reform is the use of measures to provide for effective implementation and operational efficacy. The use of guidance notes, manuals and developing standard forms and sample documents have proved an effective tool in practice. International and regional organizations and other bodies are active in procurement reform, and resources discussing best practice and other guidance can be found at their Internet addresses.

56. The following section describes the institutional, administrative and legal infrastructure and adequate capacity are needed to support the legislative framework if the procurement system's overall objectives are to be achieved, and for it to fulfil the requirements of the Convention against Corruption, some of which are not generally, or ideally, addressed through legislation.

## **3. Institutional and administrative structures and adequate resources**

57. Thirdly, the Model Law is based on an assumption that the enacting State has in place, or will put into place, the proper institutional and administrative structures and human resources necessary to operate and administer the type of procurement procedures provided for in the Model Law. At the administrative level, the interaction between good management of public finances and procurement (which is also a feature of the Convention against Corruption) is an issue of significance. Budgeting requirements or procedures may be found in a variety of sources, and enacting States will wish to ensure that procuring entities are aware of all relevant obligations, such as whether budgetary appropriation is required before a procurement procedure may commence, and whether or not those obligations are part of the procurement system per se.

58. At the institutional level, an enacting State may also find it desirable to set up a public procurement agency or other authority to assist in the implementation of rules, policies and practices for procurement to which the Model Law applies. The functions of such authority might include, for example:

(a) *Ensuring effective implementation of procurement law and regulations.* This may include the issue of procurement regulations, the code of conduct required under article [25] of the Model Law, monitoring implementation of the procurement law and regulations, making recommendations for their improvement, and issuing interpretations of those laws.

(b) *Rationalization and standardization of procurement and of procurement practices.* This may include coordinating procurement by procuring entities, and

preparing standardized procurement documents where appropriate, specifications and conditions of contract. This function may be particularly productive where the enacting State seeks to enhance the participation of SMMEs in the procurement process, in that the disincentive to participate where procedures are unknown, uncertain or long and complex will be significant.

(c) *Monitoring procurement and the functioning of the procurement law and regulations from the standpoint of broader government policies.* This may include examining the impact of procurement on the national economy (such as monitoring concentration in particular markets and potential risks to competition), analysing the costs and benefits of pursuing socio-economic goals through procurement, rendering advice on the effect of particular procurement on prices and other economic factors[, and verifying that a particular procurement falls within the programmes and policies of the Government].

(d) *Assisting and advising procuring entities and procurement officers.* Procurement officers may seek guidance on drafting internal documents for use within a procuring entity, and interpretations of specific aspects of law and regulations. Legal advice may already be provided by the legal advisors to the Government, or within a particular procuring entity, but, otherwise, procurement officials may seek guidance as to whether their intended actions (for example using an alternative procurement method or recourse to direct solicitation) are in compliance with the legislative framework.

(e) *Training of procurement officers.* The agency or other authority could also be made responsible for training the procurement officers and other civil servants involved in operating the procurement system. This function will be particularly important (i) where the enacting State has included in its domestic legislation procurement methods that pre-suppose a high degree of professionalism in the procurement function, especially at the upper levels within procuring entities, where critical decisions are taken. There are various bodies at the international level that specialize in certification and training of procurement officers, information regarding which can be found through links on the UNCITRAL website, [www.uncitral.org](http://www.uncitral.org); and (ii) where the enacting State seeks to enhance SMME participation in procurement.

(f) *Approval requirement.* The agency or other authority may be charged with issuing approvals for particular procurements prior to the commencement of the procurement proceedings or prior to the award of the procurement contract, where the enacting State provides for such an approval function (see, further, paragraphs 66-68 below). Where this facility exists, the enacting State may wish to consider the use of flexibility in referral thresholds (so as to ensure that cases are not referred unnecessarily and that appropriate cases can be referred); the use of a guidance function as an alternative to an approval function (so as to ensure accountability in decision-making and to avoid impeding the development of capacity); and the appropriate structure of the agency and resources required.

(g) *Certification.* In some cases, such as high value or complex procurement contracts, the agency might alternatively be empowered to review the procurement proceedings to ensure that they have conformed to the Model Law and to the procurement regulations, before the award is made or the contract enters into force.

59. Where procuring entities are autonomous of the governmental or administrative structure of the State, such as some State owned commercial enterprises, States may find it preferable for any approval, certification or guidance function to be exercised by an agency or authority that is part of the governmental or administrative apparatus in order to ensure that the public policies sought to be advanced by the Model Law are given due effect. Most importantly, where approval functions are concerned, the agency or authority must be able to exercise its functions impartially and effectively and be sufficiently independent of the persons or department involved in the procurement proceedings. It may be preferable for these functions to be exercised by a committee of persons, rather than by one single person, to avoid the risk of abuse of the power conferred.

#### **4. Oversight and enforcement**

60. A related issue is the question of oversight and enforcement of individual procurement decisions. An oversight function will be effective only to the extent that it is exercised by an entity that is independent of the decision-taker — that is, the procuring entity (see paragraphs 66-68 below for considerations relating to an approving body). An alternative structure for those systems in which the public procurement authority or agency exercises decision-making powers may be for oversight to be undertaken by a national audit body.

61. As regards enforcement of compliance with the provisions of legislation based on the Model Law, enacting States will be aware that chapter VIII of the Model Law requires an independent review function (administrative or judicial). Administrative review bodies will not be considered to be independent, and will face potential and actual conflicts of interest, if they are part of an agency or authority that can assist or advise procurement officials or procuring entities, and/or exercise decision-making powers. Although in some systems this review function has been exercised by a subsidiary body within the public procurement authority or agency with the general powers described above, it is generally considered undesirable to subject the review function to what will be perceived as effective political control on the part of the agency or authority itself. Finally, an advisory function will be compromised if procurement officers are reluctant to use it for fear of subsequent enforcement action on the basis of information they provide when seeking advice.

#### **5. Structure of public procurement authorities or agencies**

62. The nature of the agencies or other authorities that exercise administrative, oversight and review functions in a particular enacting State, and the precise functions that they will exercise, will depend, among other things, on the governmental, administrative and legal systems in the State, which vary widely from country to country. The system of administrative control over procurement should be structured with the objectives of effectiveness, economy and efficiency in mind. Systems that are excessively costly or burdensome either to the procuring entity or to participants in procurement proceedings, or that result in undue delays in procurement, will be counterproductive. In addition, excessive control over decision-making by officials who carry out the procurement proceedings could in some cases stifle their ability to act effectively. Enacting States may consider that investment in systems to ensure that procuring entities have sufficient capacity, and that they and procurement officers are adequately trained and resourced, will assist

in the effective functioning of the system and in keeping the costs of administrative control proportionate.

63. The public procurement agency or authority may also be linked with existing regulatory authorities with expertise in related areas, such as those addressing competition. The latter may monitor collusion and bid-rigging, and concentration in public procurement markets. Enacting States may also wish to consider whether enforcement authority in competition-related and procurement-related matters is more effectively provided through one or more bodies.

64. Empirical evidence also indicates that there may be a risk of abuse of the powers of a public procurement agency or authority if there are insufficient controls to ensure its members are sufficiently independent from decision makers in the Government and in procuring entities.

65. It should be noted that by enacting the Model Law, a State does not commit itself to any particular administrative structure; neither does the adoption of such legislation necessarily commit the enacting State to increased government expenditures.

#### **6. Specific considerations relating to the optional prior-approval requirement for use of exceptional procedures**

66. The Model Law provides an option to allow certain important actions and decisions by the procuring entity, in particular those involving the use of certain procurement methods and the entry into force of the procurement contract, be subject to prior approval from outside the procuring entity. The advantage of such a prior-approval system is that it fosters the detection of errors and problems before certain actions and final decisions are taken. In addition, it may provide an added measure of uniformity in a national procurement system.

67. The prior-approval requirement is presented in the Model Law as an option because a prior-approval system is not applied in all countries, and its use is decreasing. An alternative approach is to exercise oversight over procurement practices primarily through audit after the event. In this regard, a requirement for external approval may be particularly inappropriate in certain circumstances, such as in the use of two-stage tendering, given that there are precise conditions for use of that procurement method (see [cross refer to relevant article-by-article remark]), and in some instances of single-source procurement, such as for urgent situations.

68. Where it decides to enact an approval requirement, the enacting State will designate the agency or other body or bodies responsible for issuing the various approvals, and to delineate the extent of authority conferred in this regard. An approval function may be vested in an agency or authority that is wholly autonomous of the procuring entity (e.g., ministry of finance or of commerce, or public procurement authority) or, alternatively, it may be vested in a separate supervisory organ of the procuring entity itself. (See further considerations raised in paragraph 59 above, which are also relevant in this context.)

## **E. E-procurement**

### **1. Background**

69. E-procurement includes (inter alia) the presentation of submissions electronically and the use of new procurement methods facilitated by the Internet (electronic reverse auctions, electronic catalogues, and electronic framework agreements), the publication of procurement-related information on the Internet and the use of electronic systems throughout the procurement process (for the communication and exchange of information).

70. Terms such as “documents”, “written communication” and “documentary evidence” are becoming more commonly used to refer to all documents (whether electronic or paper-based) in those countries in which e-government and e-commerce are widespread, but, in others, the assumption may be that they infer a paper-based environment. Accordingly, the Model Law now contains provisions to ensure that all means of communication, transmission of information and retention of information can be used in procurement under legislation based on that text.

71. At the time the revised Model Law was issued by the Commission, non-paper information transfers were most commonly conducted using the Internet and related systems. However, the Commission noted the rapid pace of technological advance and assumed that new technologies would emerge. For convenience, the term e-procurement will be used in this Guide to refer to the use of e-communications and the electronic presentation of submissions, which involve the transfer of information using electronic or similar media. The policy issues are of general application for all emerging information technologies that can be used to transfer information and documents and to conduct procurement procedures.

### **2. Benefits of e-procurement**

72. The potential benefits of e-procurement in terms of promoting the achievement of the objectives of the Model Law have been widely noted: they include increased administrative efficiency in terms of both time and costs (paper-related administrative costs and the time needed to send information in paper form are reduced); and repeated purchases can be standardized. The use of information technologies for the publication of procurement opportunities and of procurement rules and procedures enhances transparency and market access, facilitating both participation in the procurement process and competition. Similarly, the use of these technologies to enable suppliers to apply and participate in the procedure, to give and receive information, and to submit tenders and other offers online is not only administratively efficient, but can also open up the market to entrants located far away that might not otherwise participate. Automated processes are not only administratively efficient through introducing uniformity and standardization, but the electronic systems also provide new measures to support integrity, by reducing human interaction in the procurement cycle and the personal contacts between procurement officials and suppliers that can give rise to bribery opportunities.

73. While these benefits may be considerable, enacting States may wish to ensure that e-procurement is implemented in a way that does not impede market access — either generally, or to certain suppliers, such as SMMEs. The safeguards provided in the Model Law are discussed in particular in paragraphs [85-90] below. (Issues

relating to the participation of SMMEs generally are discussed in [add appropriate reference].)

### **3. Approach of the Model Law to e-procurement**

74. The general approach to the introduction of e-procurement in the Model Law is based on three key principles. First, given the potential benefits of e-procurement, the Model Law should, where appropriate and to the extent possible, encourage its use; secondly, as a consequence of rapid technological advance and of the divergent level of technical sophistication in States, the text should be technologically neutral (in that it does not recommend any particular technology, but describes the functions of available technologies); and, thirdly, further and more detailed guidance should be provided to assist enacting States in introducing and operating e-procurement.

75. The policy considerations arising from specific aspects of e-procurement are discussed in the article-by-article remarks (see [cross-reference to relevant article-by-article remarks]). The guidance in this section discusses possible legal and other obstacles to the use of e-procurement. The safeguards that are necessary to ensure that it is not used to compromise the objectives of the Model Law are addressed in sections below.

76. As regards possible legal obstacles to the use of e-procurement, the extent to which individual States can use this resource depends on the availability of necessary electronic commerce infrastructure and other resources, including measures respecting electronic security, and the adequacy of the applicable law permitting and regulating electronic commerce. The general legal environment in a State (rather than its procurement legislation) may or may not provide adequate support for e-procurement. For example, laws regulating the use of written communications, signatures, what is to be considered an original document and the admissibility of evidence in court might be inadequate to allow e-procurement with sufficient certainty. While these issues may not diminish the desire to use e-procurement, the outcome may be unpredictable and commercial results will not be optimized.

77. An initial consideration in addressing this issue is whether the general regulation of, or permission to use, e-procurement is to be addressed in procurement law or in the general administrative law of an enacting State. As noted in Section [II.D] above, the Model Law is not a complete protocol for procurement: procurement planning, contract administration and the general supporting infrastructure for procurement are addressed elsewhere. Even if the Model Law were to provide for a general recognition of electronic documents and communications, it would not cover all documents, information exchange and communications in the procurement cycle, and there may be conflicts with other legal texts on electronic commerce. The solution adopted in the Model Law therefore, is to rely on laws of the enacting States, including general electronic commerce legislation to enable e-procurement, adapting them as necessary for procurement-specific needs. Enacting States will therefore first need to assess whether their general electronic commerce legislation enables e-procurement in their jurisdictions.

78. For this purpose, enacting States may wish to adapt the series of electronic commerce texts that UNCITRAL has issued: the Model Law on Electronic Commerce (1996), the Model Law on Electronic Signatures (2001), and the United Nations Convention on the Use of Electronic Communications in International Contracts (2005).<sup>1</sup> These texts provide a general recognition of electronic commerce and electronic signatures, and which, if enacted in a State, provide the general legal requirements for the use of e-procurement. They rely on what has been called a “functional equivalent approach” to electronic commerce, which analyses the functions and purposes of traditional requirements for paper-based documents and procedures, and fulfils those requirements using information technologies. This approach has also been followed for procurement-specific applications of e-commerce in the Model Law.

79. Because the approach is functional, it encompasses the notion of technological neutrality and avoids the imposition of more stringent standards on e-procurement than have traditionally applied to paper-based procurement. It is important to note that more stringent standards will operate as a disincentive to the use of e-procurement, and/or may elevate the costs of its use, and its potential benefits may be lost or diluted accordingly. Further, there will be risks of paralysis of a system should any technology that it mandates become temporarily unavailable. An additional reason for applying technological neutrality is to avoid the consequences of a natural tendency to over-regulate new techniques or tools in procurement or to follow a prescriptive approach, reflecting a lack of experience and confidence in the use of new technologies, which would also make their adoption more difficult than it needs to be.

80. Another implication of this approach is that no definitions of the terms “electronic”, “signature”, “writing”, “means of communication” and “electronic data messages” are included in the Model Law. Definitions of the main terms needed for effective electronic commerce transactions do appear in the UNCITRAL electronic commerce texts described above. [For example, article 2 of the UNCITRAL Model Law on Electronic Commerce describes “data message” as “information generated, sent, received or stored by electronic, optical or similar means including, but not limited to, electronic data interchange (EDI), electronic mail, telegram, telex or telecopy.”] On the other hand, the Model Law no longer includes references or form requirements that pre-suppose a paper-based environment.

81. The Model Law itself addresses issues specific to procurement that are not addressed in general e-commerce legislation, such as the need for precise times of receipt for e-tenders, and the importance of preventing access to their contents until the scheduled opening time [add cross reference to relevant article-by-article remarks].

#### **4. Practical considerations**

82. Obstacles to the use of e-procurement may be logistical and/or technological. Although many Governments have moved to conducting some of their business online, reliable access to the Internet cannot always be assumed: there may be

---

<sup>1</sup> Available at [http://www.uncitral.org/uncitral/en/uncitral\\_texts/electronic\\_commerce.html](http://www.uncitral.org/uncitral/en/uncitral_texts/electronic_commerce.html) (accessed January 2011).

infrastructure deficiencies, and the relevant technologies may not be universally available, particularly if it involves or uses new technologies and their supporting infrastructures that are not yet used sufficiently widely, or that is beyond the reach of SMMEs.

83. A related issue is the use of proprietary information technology systems and specialist software for procurement. Market access is enhanced if procuring entities make these systems available to all potential suppliers without charge, but practical and commercial considerations may indicate otherwise. Procuring entities may be under significant pressure to amortize and or recoup the costs of investment in proprietary systems, and may contract out the management of e-procurement systems to third parties, which may then own any intellectual property in their systems or create the potential for conflicts of interest.

84. Consequently, the Model Law does not require procuring entities to provide all software or other technical requirements without charge, but it is strongly recommended that no charge is made. If it is necessary to apply charges, procuring entities should not levy disproportionate amounts or use proprietary systems or charges to restrict access to the procurement. For these reasons, too, enacting States may wish to consider the use of off-the-shelf or open software information systems. An important consideration is that the systems should be easily harmonized with systems used by potential trading partners, should not involve multiple-user licence fees, and should be easily adaptable to local languages or to accommodate multilingual solutions. Interoperability considerations may be especially important in the broader context of public governance reforms involving integration of internal information systems of different government agencies, and in preventing the use of e-procurement systems to restrict international participation of suppliers in the procurement. Some e-procurement systems require potential users, i.e. suppliers, to provide domestic information as a prerequisite for authorization to use the system. While security and authenticity considerations must be accommodated, enacting States are encouraged to ensure that their systems do not impose unnecessary restrictions that will impede market access. (See further Section [II.F] below.) The [refer to the appropriate version] GPA requires that e-procurement systems be generally available and interoperable with other systems that are widely used in the relevant State. Enacting States may wish to ensure that they comply with those and any applicable regional trade agreements in this regard, many of which have similar requirements.

## **5. Safeguards to enhance the use of e-procurement**

85. The take-up of e-procurement systems requires public confidence in the security of the information system to be used. Such public confidence itself requires adequate authentication of suppliers, sufficiently reliable technology, systems that do not compromise tenders or other offers, and adequate security to ensure that confidential information from suppliers remains confidential, is not accessible to competitors and is not used in any inappropriate manner. That these attributes are visible is particularly important where third parties operate the system concerned. At a minimum, the system must verify what information has been transmitted or made available, by whom, to whom, and when (including the duration of the communication), and must be able to reconstitute the sequence of events. It should provide adequate protection against unauthorized actions aimed at disrupting the

normal operation of the public procurement process. Transparency to support confidence-building will be enhanced where any protective measures that might affect the rights and obligations of procuring entities and potential suppliers are made generally known to public or at least set out in the solicitation documents.

86. Applying the principles of functional equivalence and technological neutrality to safeguards is necessary to manage the requisite measures for e-procurement, as noted above. For example, specific safeguards for e-communications or confidentiality in tenders or other offers would inevitably set higher standards of security and for preserving integrity of data than those applicable to paper-based communications (because there are very few, if any, such standards set in the paper-based world), and they may fail to allow for the risks that paper-based communications have always involved.

87. The first safeguard is to ensure the authentication of communications, i.e. ensuring that they are traceable to the supplier or contractor submitting them, which is commonly effected by electronic signature technology and systems that address responsibilities and liabilities in matters of authentication. Relevant rules may either be specific to a procurement system or may be found in the State's general law on electronic systems. The concept of technological neutrality means in practice that procurement systems should not be automatically restricted to any one electronic signature technology [(such as advanced electronic signatures based on cryptography and public key infrastructure, even if they are the pre-eminent technology at the relevant time)].<sup>2</sup> Some electronic signature systems are based on a local certification requirement. Accordingly, and in order to avoid the use of e-procurement systems as instruments to restrict access to the procurement, the system should ensure the recognition of foreign certificates and associated security requirements related to electronic signatures, by disregarding the place of origin of signatures. In this regard, enacting States will need to consider which communications, such as tenders or other offers, require full authentication, and that other mechanisms for establishing trust between the procuring entity and suppliers may be sufficient for other communications. This approach is not novel: the 1994 Model Law applied different requirements to lesser and more important communications in the procurement process, as does the revised Model Law (see article [7]).

88. Another requirement is for integrity, so as to protect the information from alteration, addition or manipulation or, at least, that any alteration, addition or manipulation that takes place can be identified and traced. A related issue is "security", meaning that time-sensitive documents, such as tenders, cannot be accessed until the scheduled opening time.

89. These issues are discussed in more detail in [cross-reference to the guidance on article [39]] below, in which they assume the greatest importance.

90. The rise in e-procurement has been accompanied by the introduction of new procurement methods and the overhaul of existing methods to take advantage of the new technologies. New methods include electronic reverse auctions and electronic catalogues, and the more traditional techniques such as framework agreements can

---

<sup>2</sup> The Working Group may wish to consider whether this reference is helpful given the pre-eminence of this technology.

be modernized to allow for e-submissions notably at the second stage of the procedure: these techniques can permit purchases to be completed in hours rather than weeks or months. The approach of the Model Law is, again, to facilitate these techniques where appropriate and subject to appropriate safeguards (see [cross-reference to commentary to chapters VI and VII] below).

## **6. E-procurement as a process issue**

91. Some of the most significant economic benefits of e-procurement arise from its application to the procurement system as a whole: introducing uniformity into the procurement system through information technologies can enhance oversight, monitoring and evaluation capacities, particularly where procurement systems are integrated with planning, budgetary and contract administration and payment systems (which themselves may include electronic invoicing and payment). The introduction of e-procurement is an opportunity to reform the entire procurement system to this end: if paper communications are simply replaced with e-mails and Internet-based communications, and advertising procurement opportunities on a website, the benefits of e-procurement will not be as great. Without systemic reform, the risk is that whatever weaknesses may exist in a traditional procurement system are transported to its new, digital system and the risks associated with e-procurement will not be adequately addressed.

92. Such an overhaul of an entire procurement system is a significant investment and the electronic systems shall also entail new governance processes. Empirical evidence suggests that most e-procurement systems that are introduced have taken many years to provide the benefits promised, and the most effective implementation has been often undertaken in a staged manner, which can also assist in amortizing the investment costs. Systems set up to be self-financing through charges to suppliers and outsourcing may be administratively efficient, but can involve risks: commentators have observed both decreasing participation and competition where charges are levied, and the potential for institutional conflicts of interest. These risks will be enhanced if the system is outsourced merely to introduce it swiftly and relatively cheaply. In other words, the costs and benefits of self-financing systems and outsourcing need to be carefully considered.

## **F. Provisions on international participation in procurement proceedings, and the use of procurement systems to achieve other government policy goals**

### **1. Background**

93. In line with the mandate of UNCITRAL to promote international trade, and with the Model Law's objectives of maximizing participation and competition so as to enhance value for money, the Model Law provides that suppliers and contractors are to be permitted to participate in procurement proceedings without regard to nationality, save to the extent the procurement regulations or other provisions of law in the enacting State exceptionally permit otherwise (article [(8) (1)]). This general rule is meant to promote transparency and to prevent arbitrary and excessive resort to restriction of foreign participation, and is given effect by a number of procedures designed, for example, to ensure that invitations to participate in a procurement

proceeding and invitations to pre-qualify are issued in such a manner that they will reach and be understood by an international audience of suppliers and contractors. They are further supported by article [(9) (6)], which states that, subject to article [8], “the procuring entity shall establish no criterion, requirement or procedure with respect to the qualifications of suppliers or contractors that discriminates against or among suppliers or contractors or against categories thereof, or that is not objectively justifiable,” and by the rules on description of the subject matter of the procurement, which provide that, subject to article [8], no description of the subject matter of a procurement may be used that may restrict participation of suppliers or contractors in or their access to the procurement proceedings, including any restriction on the basis of nationality (article [10 (2)]).

## **2. Direct limitation of international participation**

94. The Model Law permits enacting States to provide legally for procurement limited to domestic suppliers, as an exceptional measure, by permitting the procuring entity under article [8 (1)] to declare that a procurement proceeding will exclude suppliers or contractors on the basis of nationality. However, the procuring entity can limit international participation only to the extent that other laws (including treaty obligations) or the procurement regulations so permit. The aim of this restriction is to ensure that the procuring entity is not able to discriminate against particular suppliers or categories of suppliers at its own instance.

95. This latter point is reinforced by provisions that expressly prohibit discrimination through requirements regarding qualification, examination or evaluation criteria in articles [9], [10] and [11] of the Model Law, respectively.

96. This approach, together with the provisions in article [3] on the primacy of international obligations of the enacting State, permits the Model Law to take account of cases in which the funds being used for procurement are derived from a bilateral tied-aid arrangement. Such an arrangement may require that procurement should be from the donor country’s suppliers or contractors. Similarly, recognition can be given to restrictions on the basis of nationality that may result, for example, from regional economic integration groupings that accord national treatment to suppliers and contractors from other States members of the regional economic grouping, as well as to restrictions arising from sanctions imposed by the United Nations Security Council.

## **3. Indirect limitation of international participation**

97. The above discussion refers to exceptional measures that are explicitly designed to limit foreign participation. Certain measures may indirectly give the same result, such as through the setting of minimum standards for qualification, in the description of the subject matter of the procurement and in the design of the evaluation criteria (in articles [9, 10 and 11]).

98. As is further explained in the commentary to articles [9, 10 and 11], the procuring entity can set minimum standards for qualification and responsiveness, and can include evaluation criteria, that do not relate to the subject matter of the procurement in order to promote government policies (such as environmental policies, industrial policies or social policies). Minimum standards might either restate legal requirements within the enacting State (such as the minimum wage for

employees), or such standards or evaluation criteria might set higher standards than, or prefer submissions that exceed, the legal norms for the purpose of promoting a policy through procurement (such as higher environmental standards). These policies will have the effect of disfavours international participation if the standards are higher than those applying in other States. Other policies may aim at promoting local capacity development through providing support for SMMEs, targeting particular sectors of the commercial sector that have historically been disadvantaged, and the promotion of community participation in procurement. Governments may also seek to place certain types of procurement contracts for strategic reasons. All such measures may be part of an explicit approach to sustainable or environmentally sensitive procurement. These terms are flexible notions, but in general seek to ensure that the environmental, social and developmental impact of procurement is taken into account [cross-reference to the section on sustainable procurement].

99. Article [11] permits the procuring entity to use the technique referred to as the “margin of preference” in favour of local suppliers and contractors. By way of this technique, the Model Law provides the enacting State with a mechanism for balancing the objectives of international participation in procurement proceedings and fostering local capacities, without resorting to purely domestic procurement. The margin of preference permits the procuring entity to select a submission from a local supplier as the successful supplier when the difference in price (or price when combined with quality scores) between that submission and the overall lowest-priced or most advantageous submission falls within the range of the margin of preference. It allows the procuring entity to favour local suppliers and contractors that are capable of approaching internationally competitive prices, and it does so without simply excluding foreign competition.

#### **4. The use of procurement to promote government policies and objectives**

100. A system based on the Model Law allows exceptions to procedures that would be considered to be those that guarantee optimum allocation of resources and value for money in order to allow other government objectives to be pursued, particularly to develop and enhance local capacities.<sup>3</sup>

101. The Model Law does not restrict the types of policies or objectives that enacting States may promote through procurement, but it applies rigorous transparency requirements to ensure that how the policies will be applied is clear to all participants in the process. Provisions of law or regulations in enacting States must set out the policies concerned. Examples of policies that have been encountered in practice include protecting the balance of payments position and foreign exchange reserves of a State, allowing for countertrade arrangements offered by suppliers or contractors, the extent of local content, including manufacture, labour and materials, the economic development potential offered by tenders, including domestic investment or other business activity, the encouragement of employment, the reservation of certain production for domestic

---

<sup>3</sup> The Working Group may wish to consider whether the Guide should discuss whether these policies should be used only to the extent that they are engaged in for local capacity development or whether they may also appropriately include political considerations (which are equally valid in the view of some States).

suppliers, the transfer of technology and the development of managerial, scientific and operational skills, targeting specific industrial sector development, the development of SMMEs, minority enterprises, small social organizations, disadvantaged groups, persons with disabilities, regional and local development, environmental improvements, and the improvement of the rights of women, the young and the elderly, and people who belong to indigenous and traditional groups.

102. The approach of the Model Law is designed to ensure that the costs of the policies concerned can be calculated through comparison with established benchmarks, and so balanced against the benefits derived. Common considerations as regards the impact of such policies on the objectives of the Model Law set out in the Preamble include that, to the extent they impose a restriction on competition, they are likely to have an inflationary effect on the ultimate price paid and thus on the value for money; and the cost of monitoring compliance with government policies may add to administrative or transaction costs, which may have a negative effect on efficiency. On the other hand, some such policies may open the procurement market to sectors that have traditionally been excluded from procurement contracts (such as SMMEs) and may increase participation and competition, though in the longer term such benefits may not persist if suppliers choose not to expand beyond the level of an SMME.

103. Enacting States may wish to consider empirical evidence from States that have pursued such policies. For example, within relatively short periods, suppliers or contractors from supported areas of the economy may develop to such an extent, following or as a result of the implementation of such policies, that they become able to compete freely in the market. However, total insulation from foreign competition for an extended period of time or beyond the point that suppliers can compete freely can frustrate the capacity development that such policies are designed to achieve. For similar reasons, the results from the use of preference policies (such as the use of evaluation criteria to prefer a defined group) tends to be more positive than for set-aside policies (such as requiring subcontracting to a defined group). Enacting States will wish to ensure that pursuing government policies through procurement is both effective in achieving the policy objectives and efficient in operation. At the same time, enacting States should consider viable alternatives, such as targeted technical assistance, simplifying procedures and red tape, ensuring that adequate financial resources are available to all sectors of the economy, requiring procuring entities to pay suppliers regularly and on time, and providing other targeted support.

## **5. Sustainable procurement**

104. [Further research/contributions are required if a section on this topic is to be included.]

## **6. International obligations**

105. The Model Law is not an international text in the sense of being a negotiated international agreement, a situation that facilitates its flexible approach. Enacting States may be signatories to international agreements covering procurement (including the Convention against Corruption and the [appropriate references to the versions to be added] GPA, and regional trade agreements), which may have the

effect of limiting the opportunity of pursuing government policies of the type described above through the procurement system.

106. The pursuit of certain government policies under the Model Law may run contrary to international agreements (such as the GPA and regional trade agreements), which generally require “national treatment”, i.e. that suppliers in all signatory countries will be treated no less favourably than domestic suppliers. [“Offsets”, i.e. measures to encourage local development or improve the balance-of-payments accounts by means of domestic content, licensing of technology, investment requirements, counter-trade or similar requirements, are explicitly prohibited in the GPA. However, developing countries may negotiate (at the time of their accession) the use of offsets as qualification criteria, but offsets may not be used as evaluation or award criteria.] Enacting States will therefore wish to consider the extent of their international obligations when implementing the provisions allowing any direct or indirect restriction of international participation into their national procurement law[, and where they have based or will base their procurement legislation on the Model Law, to consider their domestic provisions when negotiating international obligations]. The provisions of many trade agreements mean that some, but not all, of the options available under the Model Law that may have the effect of restricting international participation will be available to enacting States.

#### **7. Exemptions from international publication of invitations to participate and procurement notices**

107. The procurement regulations can exempt procuring entities from having to publish an initial invitation to participate in a low-value procurement in a newspaper of wide international circulation in a language customarily used in international trade, where the procuring entity considers that the low value is unlikely to attract cross-border interest [article 32 (4)]. It is important to note that low value alone is not a justification to exclude international participation of suppliers per se (by contrast with other reasons permitting domestic procurement set out in article [8]), so that international suppliers can participate if they so choose; for example, if they respond to a domestic advertisement.

108. The concept of low-value procurement in this regard should not be interpreted as conferring upon enacting States complete flexibility to set the appropriate threshold sufficiently high to exclude the bulk of its procurement from requirement of international publication. It is not possible for the Model Law to set out a single threshold that will be appropriate for all enacting States. Nonetheless, the enacting State may wish to take the following matters into account when setting the appropriate threshold or thresholds: whether one threshold should be applied for “low-value procurement”, to address permissible exemptions from international publication and from the requirement to provide information about currency and languages in the solicitation documents, and whether this threshold should also serve as the upper limit for the use of request-for-quotations procedures.

109. Enacting States may also wish to encourage procuring entities to assess whether international participation is a likelihood in the circumstances of each given procurement (whether or not it is low-value), assuming that there is international publication, and what additional steps international participation might indicate. In this regard, the Model Law recognizes that in such cases of low-value procurement

the procuring entity may or may not have an economic interest in precluding the participation of foreign suppliers and contractors: a blanket exclusion of foreign suppliers and contractors might unnecessarily deprive it of the possibility of obtaining a better price. On the other hand, international participation may involve translation costs, additional time periods to accommodate translation of the advertisement or responses from foreign suppliers, and might require the procuring entity to consider tenders or other offers in more than one language. The procuring entity will wish to assess the costs and benefits of international participation, where its restriction is permitted, on a case-by-case basis.

**(A/CN.9/WG.I/WP.77/Add.3) (Original: English)****Note by the Secretariat on the revised Guide to Enactment to accompany the UNCITRAL Model Law on Public Procurement, submitted to the Working Group on Procurement at its twentieth session****ADDENDUM**

This addendum sets out a proposal for the following section and sub-section of Part I (General remarks) of a draft revised Guide to Enactment to the UNCITRAL Model Law on Public Procurement: II. Main features of the Model Law (“Challenges and appeals”).

**GUIDE TO ENACTMENT  
OF  
THE UNCITRAL MODEL LAW ON  
PUBLIC PROCUREMENT****Part I. General remarks****II. MAIN FEATURES OF THE MODEL LAW**

*(continued)*

**G. Challenges and appeals**

110. A key feature of a transparent procurement system is the existence of mechanisms to monitor that the system’s rules are followed and to enforce them if necessary. Such mechanisms include audits and investigations, and prosecutions for criminal offences (which are matters not generally addressed in a procurement law and consequently are not provided for in the Model Law), and challenge procedures, in which suppliers and contractors are given the right to challenge decisions and actions of the procuring entity that they allege are not in compliance with the rules contained in the applicable procurement legislation.

111. An effective challenge mechanism is therefore an essential element towards ensuring the proper functioning of the procurement system and can promote confidence in that system. Such a mechanism helps to make the Model Law to an important degree self-policing and self-enforcing, since it provides an avenue for review to suppliers and contractors that have a natural interest in monitoring compliance by procuring entities with the provisions of the Model Law in each procurement procedure. An additional function of the challenge mechanism is to act as a deterrent: its existence is designed to discourage actions or decisions knowingly in breach of the law.

112. Challenges can address breaches of rules and procedures only at the instigation of suppliers, and so the other oversight mechanisms outlined above should be in place to deal with (a) non-compliance where a supplier chooses not to take action

and (b) systemic issues. Suppliers may not wish to take action for many reasons: where the contract is of low value, larger suppliers may consider that losses may not justify the costs concerned; smaller suppliers may consider that the time and costs of any challenge are unaffordable; and all suppliers may be unwilling to challenge discretionary decisions because of the higher risk of failure, and may be concerned that a challenge will risk future relationships with the procuring entity. Systemic non-compliance may be overlooked if attention in challenge mechanisms is directed to individual cases, especially those involving relatively insignificant non-compliance.

113. A key feature of an effective challenge mechanism is to allow timely submissions of challenges: accordingly, the requirement for a standstill provision under article 21 (2) is designed to ensure that challenges can be brought before a procurement contract (or framework agreement) enters into force; the interaction between the provisions governing a standstill period and provisions of chapter VIII form part of the overall supervisory and enforcement mechanism under the Model Law.

114. Chapter VIII contains a minimum set of provisions aimed at ensuring an effective challenge process, and enacting States are encouraged to incorporate all the provisions of the chapter to the extent that their legal system so permits.

#### **1. International agreements addressing challenge mechanisms**

115. Article 9 (1) (d) of the Convention against Corruption requires procurement systems to include an effective system of domestic review, including an effective system of appeal, to ensure legal recourse and remedies in the event that the rules or procedures established pursuant to article 9 (1) of the Convention are not followed. The Commission, in seeking to ensure that the Model Law addresses the Convention's requirements, decided that the Model Law should require enacting States to provide all rights and procedures necessary (both at first instance and in appeals) for an effective challenge mechanism. Similarly, the Commission has sought to ensure consistency with the approach to challenge mechanisms under the GPA.

#### **2. Ensuring challenge mechanisms operate in the context of an enacting State's legal traditions**

116. The requirements of the Convention against Corruption and the Model Law are founded on the recognition that the procedures need to be implemented in a manner consistent with the legal tradition in the enacting State concerned. It is recognized that there exist in most States mechanisms and procedures for the challenge of acts of administrative organs and other public entities (often called a review function). In some States, such mechanisms and procedures have been established specifically for disputes arising in the context of procurement by those organs and entities. In other States, those disputes are dealt with by means of the general mechanisms and procedures for review of administrative acts. States do, however, differ significantly in their approach to enforcement: in some countries, there is a long-standing system of review before specialist authorities and courts; in others there is no general legislative provision for such review (except to the extent required by international obligations and subject to judicial review procedures). In some systems there are administrative sanctions for breaches of procurement law by

organs of the State, and proceedings are brought before an administrative tribunal, while in others there is a combination of administrative review, or quasi-judicial review, and/or judicial review of procurement decisions through the ordinary courts (accompanied by special criminal proceedings for violations of procurement laws by procuring entities).

117. The rules and procedures set out in chapter VIII of the Model Law are intended to be sufficiently flexible that they can be adapted to any of these approaches, without compromising their efficacy. Certain important aspects of challenge proceedings, such as the forum where an application or appeal is to be filed and the remedies that may be granted, are related to fundamental conceptual and structural aspects of the legal system and system of state administration in every country.

118. Some legal systems provide for challenge or review of acts of administrative organs and other public entities before an independent administrative body that exercises hierarchical authority or control over the organ or entity. In legal systems that provide for this type of review, the question of which body or bodies are to exercise that function in respect of acts of particular organs or entities depends largely on the structure of the state administration. In other States, the challenge or review function is performed by specialized bodies whose competence is sometimes referred to as “quasi-judicial”. Such a body is not, however, considered in those States to be a court within the judicial system. The procedures before an administrative or quasi-judicial body are set out in article [66] of the Model Law.

119. Whether the mechanism is administrative or quasi-judicial, a key feature is that it is independent. In this context, the notion of “independence” means independence from the procuring entity rather than independence from the Government as a whole. Nonetheless, enacting States are encouraged, within the scope of their national systems, to provide for as much autonomy and independence of action from the executive and legislative branches as possible, in order to avoid political influence and to ensure rigour in decisions emanating from the independent body. The need for an independent mechanism is particularly critical in those systems in which it is unrealistic to expect that reconsideration by the procurement entity of its own acts and decisions will always be impartial and efficient, but, on the other hand, there may be difficulties in ensuring that effective remedies can be provided through other mechanisms in some vulnerable States.<sup>1</sup>

120. Many national legal systems provide for a judicial review of acts of administrative organs and public entities, either in addition to the quasi-judicial function outlined above, or instead of this function. In some legal systems where both quasi-judicial and judicial review is provided, judicial review may be sought only after opportunities for other challenges have been exhausted; in other systems

---

<sup>1</sup> The Working Group may wish to consider whether further detail, such as on the ideal degree separation of powers between a procurement agency, regulatory bodies (e.g. existing anti-trust authorities) and independent bodies should be included in the Guide, whether here or in the general section on administrative infrastructure to support the Model Law. The Secretariat’s understanding is that a supervisory body or central procurement board cannot be independent because it takes decisions for the procuring entity. A regulatory or oversight body, such as a public procurement authority, could discharge the function or, if scale and resources indicate, such functions could be delegated to a separate body.

the two means of challenge or review are available as options. The provisions in the Model Law do not address this question, so that enacting States can provide for the desired approach through regulations.

121. Enacting States may wish to use the provisions of the Model Law to assess the effectiveness of challenge mechanisms already in operation in their country. As a general rule, the nature of procurement disputes indicates that specialized fora are beneficial. Where a system of effective and efficient court review is already present, there may be little benefit in introducing a new quasi-judicial body, and, on the other hand, there may be equally little benefit in promoting procurement specialization in the courts if there is a well-functioning quasi-judicial function.

122. In view of the above, and in order to enable the provisions to be accommodated within the widely differing conceptual and structural frameworks of legal systems and systems of State administration throughout the world, the provisions in chapter VIII set out the principles and main procedures to be followed in order to constitute an effective challenge mechanism. Continuing the general approach of the Model Law as a framework text, they are intended to be supplemented by regulations and detailed rules of procedure to ensure that the challenge mechanisms operate effectively, expeditiously and in a cost-effective manner. Particular importance should be given to the question of evidence and hearings, so as to ensure that all parties to the proceedings are fully aware of their rights and obligations in this regard.<sup>2</sup>

123. Chapter VIII does not deal with the possibility of dispute resolution through arbitration or alternative fora, since the use of arbitration in the context of procurement proceedings is relatively infrequent, and given the nature of challenge proceedings, which often involves the characterization of acts or decisions of the procuring entity as compliant or not compliant with the requirements of the Model Law. Nevertheless, the Model Law does not intend to suggest that the procuring entity and the supplier or contractor are precluded from submitting to arbitration, in appropriate circumstances, a dispute relating to the procedures in the Model Law.

124. Other branches of law and other bodies in the enacting State may have an impact on the challenge mechanism envisaged under chapter VIII, if, for example a challenge is triggered by allegations of fraud or corruption, or breaches of competition law. In such cases, enacting States may wish to ensure that appropriate guidance is provided to procuring entities and to suppliers, and that this information is publicly available, to ensure that relevant authorities are alerted and so that appropriate action is taken.

### **3. Importance of the balance between effective challenge mechanisms and avoiding excessive disruption of the procurement process**

125. A key characteristic of an effective challenge mechanism is that it strikes the appropriate balance between, on the one hand, the need to preserve the rights of

---

<sup>2</sup> The Working Group may wish to consider whether further detail is required, particularly to guide independent bodies that are being set up, on how to gather evidence (investigatory or adversarial approach) and the conduct of the proceedings. For example, the procuring entity is obliged to provide the procurement record, but an enforcement mechanism might be appropriate. Also, provisions on evidence to ensure that there is consistency in terms of the type of evidence required and the weight it will be given may be needed.

suppliers and contractors and the integrity of the procurement process and, on the other hand, the need to limit disruption of the procurement process. The provisions therefore limit the right to challenge to suppliers and contractors (including potential suppliers and contractors that have, for example, been disqualified); provide time limits for filing of applications and appeals, and for disposition of cases; and provide discretion in deciding in some circumstances whether a suspension of the procurement proceedings may apply. Nonetheless, article [64] contains a general prohibition preventing the entry into force of the procurement contract or framework agreement while a challenge remains involved (with limited exceptions). These matters are discussed in the commentary to that article.

#### **4. Need for timely resolution of disputes**

126. An important factor contributing to the efficient resolution of disputes and limiting the disruption of the procurement process is to encourage early resolution of issues and disputes, and to enable challenges to be addressed before stages of the procurement proceedings would need to be undone, of which the most significant is the entry into force of the procurement contract (or, where applicable, the conclusion of a framework agreement). There are several provisions in the Model Law to this end, notably the use of a standstill period (provided for in article [21 (2)]). The aim of imposing a standstill period is to require a short delay between the identification of the successful submission and the award of the procurement contract (or framework agreement), so that any challenges to the proposed award can be dealt with before the additional complications and costs of addressing an executed contract arise. As regards challenges to the terms of solicitation and other issues that arise prior to the submission of tenders or other offers, article [15] provides a mechanism for clarifying and modifying the solicitation documents, so as to reduce the likelihood of challenges to the terms and conditions set out in those documents. These provisions therefore support the challenge mechanism in chapter VIII.

#### **5. Summary of the challenge provisions**

127. The provisions in chapter VIII establish in the first place that suppliers and contractors have a right to challenge an act or decision of a procuring entity: there are no acts or decisions in a procurement procedure that are exempt from the mechanism. As to forum, the Model Law provides for three options. In the first instance, a challenge may be presented to the procuring entity itself under article [65], provided that the procurement contract is yet to be awarded. Significantly, this peer-based system is an option for suppliers, and not a mandatory first step in the challenge process. This option has been included so as to facilitate a swift, simple and relatively low-cost procedure. Speedy remedies that can be granted without significant time and cost are features that are highly desirable in a procurement challenge mechanism, and the fact that the procuring entity will be in possession of the facts relating to and in control of the procurement proceedings concerned, and may be willing and able to correct procedural errors of which it may perhaps not have been aware, contribute to achieving them. These features are important not only to the challenging supplier, but also in order to minimize disruption to the procurement process as a whole. A peer-based system may also lessen the perceived risk of jeopardizing future business through a legal procedure, which has been observed to operate as a disincentive to challenges. Enacting States

are therefore encouraged to take steps to ensure that this mechanism, its operation (which includes formal procedures and is not a debriefing) and its benefits are widely disseminated, so that effective use can be made of it.

128. The second option is for an independent, third-party review of the decision or action of the procuring entity that the supplier alleges is not in compliance with the law. This independent review may operate as an administrative or quasi-judicial procedure. It is broader in scope than the peer system outlined above, because challenges can be submitted after the entry into force of the procurement contract (or framework agreement). The independent body receiving the challenge may grant a wide range of remedies, and footnotes to the provisions concerned highlight those remedies that may not traditionally be available in certain legal systems, so that enacting States can ensure consistency between the independent review system and equivalent mechanisms before their courts.

129. The third option for suppliers is to commence proceedings in a competent court. The Model Law does not provide procedures for such proceedings, which will be governed by applicable national law. The footnotes to the various provisions identify issues and procedures that will need to be implemented in some manner so as to ensure the effective overall mechanism outlined above.

130. In this regard, enacting States are encouraged to review the scope of all forums available, to ensure that the system put in place indeed confers effective legal recourse and remedies (including appeals) as required by the Convention against Corruption and as is acknowledged to constitute best practice. In general terms, an effective mechanism involves the possibility of intervention without delay; the power to suspend or cancel the procurement proceedings and to prevent in normal circumstances the entry into force of a procurement contract while the dispute remains outstanding; the power to implement other interim measures, such as giving restraint orders and imposing financial sanctions for non-compliance; the power to award damages if intervention is no longer possible (e.g. after the contract is awarded); and the ability to proceed swiftly within a reasonably short period of time, which should be measured in terms of days and weeks in the normal course.

[This completes the current draft of Part I. General remarks of the Guide. The Working Group is to consider which additional sections/sub-sections/issues for Part I. General remarks of the Guide are to be included. This may affect the sequence of sections/sub-sections/issues in the current draft of Part I.]

**(A/CN.9/WG.I/WP.77/Add.4) (Original: English)****Note by the Secretariat on the revised Guide to Enactment to accompany the UNCITRAL Model Law on Public Procurement, submitted to the Working Group on Procurement at its twentieth session****ADDENDUM**

This addendum sets out a proposal for the Guide text to accompany chapter VIII (Challenges and appeals) of the UNCITRAL Model Law on Public Procurement.

**GUIDE TO ENACTMENT OF THE  
UNCITRAL MODEL LAW ON  
PUBLIC PROCUREMENT****Part II. Article-by-article commentary**

...

**CHAPTER VIII. CHALLENGES AND APPEALS****Article [63]. Right to challenge and appeal**

1. The purpose of article [63] is to establish the basic right to challenge an act or a decision of the procuring entity in the procurement proceedings concerned, and the right to appeal a first-instance finding on a challenge where necessary.
2. Under paragraph (1), the right to challenge is given only to suppliers and contractors (including potential suppliers or contractors, such as those excluded through pre-qualification), and not to members of the general public. Sub-contractors are also omitted from the ambit of the right to challenge provided for in the Model Law. These limitations are designed to ensure that challenges relate to the decisions or actions of the procuring entity in a particular procurement procedure, and to avoid an excessive degree of disruption to the procurement process through challenges that are based on policy or speculative issues. In addition, the article does not deal with the capacity of the supplier or contractor to seek review or with the nature or degree of interest or detriment that is required to be claimed for a supplier or contractor to be able to seek review. Those and other issues, such as whether State bodies may have the right to pursue challenge applications, are left to be resolved in accordance with the relevant legal rules in the enacting State.
3. Paragraph (1) refers to applications under articles [65 and 66] to the procuring entity and independent body, respectively, and to courts. A challenge that takes the form of a judicial review may be made under the relevant court procedures or authority, or under article [69] of the Model Law.
4. Paragraph (2) is limited to appeals from decisions made in proceedings under articles [65 and 66]. Appeals to courts and in court proceedings will be made under

relevant court procedures and authority. The paragraph is silent on this matter, and enacting States may wish to make specific reference to the appropriate authority when transposing this provision into their domestic legislation.

**Article [64]. Effect of an application for reconsideration or review or an appeal**

1. The purpose of the article is to provide for prohibition to enter into a procurement contract or framework agreement while a challenge or an appeal remains pending. This ensures that the challenge or appeal cannot be nullified by making an award a *fait accompli*.

2. The procuring entity is prohibited from entering into a procurement contract (or framework agreement) where it receives within prescribed time limits an application for reconsideration or is notified of a challenge or an appeal before an independent body or from the courts. The prohibition provided for in this article continues for a short period after a challenge or appeal has been decided and participants have been notified, as provided for in paragraph (2), in order to allow any disaffected party to appeal to the next level forum. Enacting States will wish to ensure that this period is as short as their systems will permit, so as to avoid excessive disruption to the procurement process.

3. The prohibition provided for is not absolute: there may be urgent public interest considerations that indicate that the better course of action would be to allow the procurement proceedings to continue and the procurement contract or framework agreement to enter into force, even while the challenge or appeal is still outstanding. An independent body may therefore order that the proceedings and contract or framework agreement may proceed. An option is provided in paragraph (3) (b) for enacting States to specify that an independent body may take a decision on this question without a request from a procuring entity. This option may be appropriate in systems that operate on an inquisitorial basis, but in other States, it may be less so. When drafting rules of procedure and guidance for the operations of the independent body, States will also wish to ensure that there are clear rules and procedures as regards the evidence that a procuring entity would need to adduce as regards urgent public interest considerations where it makes such an application, and how applications to permit the procurement to continue should be filed (including whether the application is to be made by the procuring entity *ex parte*, or *inter partes*).

4. The need for timely resolution of procurement disputes and effective challenge and appeal mechanism should be balanced with the protection of urgent public interest considerations. This is particularly important in jurisdictions where court systems in the enacting State do not allow for injunctive and interim relief and summary proceedings. Paragraph (3) (b) is drafted to ensure that any decision to permit the procurement contract or framework agreement to proceed in such circumstances can itself be challenged (by application of the general rights conferred under article 63). The procuring entity, on the other hand, should also be given opportunity to request the competent court to allow it to proceed with the procurement contract or framework agreement on the ground of urgent public interest considerations where the independent body ruled against granting an exemption to the prohibition to enter into a procurement contract or framework agreement.

5. An important requirement in this regard contained in paragraph (3) (b) is to ensure that prompt notice of the decision taken by the independent body is provided to all participants concerned, including the procuring entity. The provisions require disclosure of the decision and its reasons, which is essential to allow any further action (such as an appeal from the decision concerned). By the nature of an application under paragraph (3), there may be need for the protection of confidential information, the public disclosure of which will be restricted under article [68]. This however does not exempt the independent body from the obligation to notify all concerned (as listed in the provisions) of its decision and provide reasons therefor; any confidential information will have to be excluded to the extent and in the manner required by law.

#### **Article [65]. Application for reconsideration before the procuring entity**

1. Article [65] provides that a supplier or contractor that wishes to challenge a decision or act of the procuring entity may, in the first instance, request the procuring entity to reconsider the decision or action concerned. This application is optional, because its effectiveness will vary both according to the nature of the challenge at issue and the willingness of the procuring entity to revisit its steps in the procurement process. The procedure under this article is to be contrasted with a debriefing procedure [cross-refer to any discussion of debriefing in the Guide]. Enacting States may consider that it is desirable to promote the early resolution of disputes by promoting the use of the optional challenge mechanism envisaged by this article, in that so doing might also enhance efficiency and the long-term relationship between the procuring entity and suppliers or contractors.

2. The purpose of providing for this procedure is to allow the procuring entity to correct defective acts, decisions or procedures. Such an approach can avoid unnecessarily burdening other forums with applications and appeals that might have been resolved by the parties at an earlier, less disruptive stage, and with lower costs.

3. Nonetheless, the application for reconsideration is a formal procedure, and in this regard it is important for the scope of the application and the issues it raises to be clearly delineated at the outset (both to ensure their effective consideration and to avoid other issues being raised during the proceedings). The application must therefore be in writing. There are no rules presented in the Model Law as regards supporting evidence: the applicant will wish to present its best case to demonstrate why a reconsideration or corrective action is the appropriate course, but how that may be done will vary from case to case. Regulations and procedural rules, as noted above, should address evidentiary gathering where it is necessary. A general approach that permits the submission of a statement of application with any supporting evidence being filed later may defeat the aim of requiring prompt action on the application by the procuring entity (provided for under paragraph (3)), and accordingly these supporting rules and regulations should encourage the early submission of all available evidence.

4. The purpose of the two time limits in paragraph (2) is, in general terms, to ensure that grievances are promptly filed so as to avoid unnecessary delay and disruption in the procurement proceedings, and to avoid actions or decisions being unwound at a later stage. There are, broadly speaking, two types of challenge contemplated by the article: first, challenges to the terms of solicitation and to pre-qualification or pre-selection, which must be filed prior to the deadline for

submissions for the reasons set out immediately above. In this context, the “terms of solicitation” encompass all issues arising from the procurement proceedings before the deadline for presenting submissions (including those arising in pre-qualification or pre-selection, separately mentioned in the subparagraph), such as the selection of a method of procurement or a method of solicitation where the choice between open and direct solicitation exists, and the limitation of participation in the procurement proceedings in accordance with article 8. It thus excludes issues arising from examination and evaluation of submissions. The terms of the solicitation, pre-qualification or pre-selection include the contents of any addenda issued pursuant to article [15]. The use of the term “prior to” the submission deadline is crafted in broad terms, so as to allow enacting States to provide in applicable regulations for a filing deadline that is a defined, short, period before the submission deadline (and there may be the need for different periods for different procurement methods: the appropriate period for electronic reverse auctions would normally be shorter than for procurement methods with dialogue or negotiations). The reason for this approach is that there may be a need to prevent highly disruptive (and perhaps vexatious) challenges being filed immediately before the submission deadline.

5. The second type of challenge is likely to relate in some manner to the award, or proposed award, of the procurement contract (or framework agreement) and here the main aim is to ensure that the challenge is addressed before the additional complications of an executed contract (or an operating framework agreement) arise. The issues will commonly arise from the examination and evaluation of submissions, a step in the procurement process that may also include the assessment of qualifications of suppliers (but not pre-qualification). The deadline for submission of these challenges is the expiry of the standstill period where one applies, or the entry into force of the procurement contract (or framework agreement) as applicable. Reference in the text is made to the entry into force of the procurement contract, rather than to the despatch of the notice of acceptance, in order to allow for situations in which signing a written procurement contract or receiving approval of another body for entry into force of the procurement contract is required (possibilities envisaged under article [21] and the articles throughout the Model Law describing the content of the solicitation documents).

6. The provisions do not refer to the procuring entity’s competence to consider challenges to decisions to cancel the procurement. Although a decision to cancel the procurement is, in principle, no different from any other decision in the procurement process, the Commission considered that the issues involved are such that they should more appropriately be considered by the courts.

7. The policy rationale behind requiring the request for reconsideration before the procuring entity only if the procurement contract has not yet entered into force is that, thereafter, there are limited corrective measures that the procuring entity could usefully require. The latter cases would better fall within the purview of quasi-judicial or judicial review.<sup>1</sup>

---

<sup>1</sup> The Working Group may wish to consider whether additional matters should be discussed. The restriction of the procuring entity’s competence to pre-contract disputes is intended to avoid granting excessive powers to the procuring entity, and is also consistent with the approach of the Model Law that it does not address the contract administration stage, so that the natural

8. Should an application be filed out of time, the procuring entity has no competence and should dismiss the application under paragraph (3) (a) of the article. Where a standstill period has been applied and approval of another authority is required for the entry into force of the procurement contract, the provisions mean that a challenge initiated after the expiry of the standstill period but before approval is granted is out of time.

9. The interaction of articles [65 and 64] means that upon the filing of an application for reconsideration, no procurement contract may be awarded (or framework agreement concluded) unless the procuring entity's request for an exemption from the prohibition on the grounds of urgent public interest is granted by the independent body under article 64 (3) or by courts.

10. Paragraph (3) requires the procuring entity to take several steps. First, promptly after receipt of the application, it must publish a notice of the application. There is no fixed time limit given for this step; the appropriate time will depend on the manner of publication and availability of the relevant forum. In the electronic environment, for example, the most effective place for publication to take place is the website where the initial notice of the procurement was published. The aim is to ensure that all participants in the procurement process (whose contact details may or may not be known to the procuring entity) are informed that the application has been filed.

11. In addition to this publication requirement, within three working days of receipt of the application, the procuring entity must notify all participants in the procurement proceedings known to it (i.e. whose contact details are made known to the procuring entity) about the submission of the application and its substance. Providing notice of the substance of the application permits the procuring entity to avoid the disclosure of potentially confidential information without the need for reviewing the entire application to redact confidential information.

12. The purpose of the publication and notification provisions is to make the suppliers or contractors aware that an application has been submitted concerning procurement proceedings in which they have participated or are participating and to enable them to take steps to protect their interests. Those steps may include intervention in the review proceedings under article [67], which might include a request to lift a suspension that has been applied, and other steps that may be provided for under applicable regulations or procedural rules. The possibility of broader participation in the review proceedings is provided for since it is in the interest of the procuring entity to have complaints aired and information brought to its attention as early as possible.

13. Within the same period (three working days of receipt of the application), the procuring entity, must take further steps, which amount to an initial review of the

---

consequence is that the procuring entity's powers cease when the contract comes into force. An alternative approach could be described in the Guide, such as that, if there is no independent body, enacting States might wish to expand the time limits by using the equivalent provisions in article 66 (because otherwise there might only be recourse to the courts). This may be considered to be a point of some significance as the procuring entity has the most detailed knowledge and might be in the best position to judge the challenge. On the other hand, safeguarding the integrity of the process is addressed through the standstill period and availability of other remedies.

application for reconsideration and notification of the applicant and other concerned of the result of such review. It must first decide whether it will entertain the application. Paragraph (3) (a) identifies the types of situation in which the procuring entity may decide not to entertain the application. The procuring entity will consider such issues as whether the application has been filed within the prescribed time limits; whether or not the applicant has standing to file its application (as noted in paragraph [2] of the commentary to article 63 above, sub-contractors and members of the general public, as opposed to potential suppliers, do not have standing); whether the application is based on an obviously erroneous understanding of the facts or applicable law and regulations; or whether the application is frivolous or vexatious. These issues may be particularly pertinent in those systems in which challenge mechanisms are in their infancy and where suppliers may be unsure about the extent of their rights to file a challenge. Permitting early dismissal is important to minimize disruption to the procurement process and to minimize the costs of all concerned.

14. The decision on dismissal can be challenged under the competence granted by article [63], because, as paragraph (3) (a) of the article notes, the dismissal constitutes a decision on the application. It also allows the prohibition against entry into force of the procurement contract or framework agreement to lapse after the time period specified in article [64], unless a further challenge or an appeal against the dismissal is made. To allow further challenge or appeal in a timely fashion, the provisions require the procuring entity to notify the applicant about its decision on dismissal and reasons therefor not later than three days upon receipt of the application.

15. If the procuring entity decides to entertain the application, it must consider whether to suspend the procurement proceedings and, if so, the period that is required. The purpose of suspension is to enable the interests of the applicant to be preserved pending the disposition of the proceedings. The approach taken with regard to suspension — that is, to allow the procuring entity to decide on the matter — is designed to strike a balance between the right of the supplier or contractor to have a challenge reviewed and the need of the procuring entity to conclude a contract in an economic and efficient way, without undue disruption and delay of the procurement process.

16. The Commission, in framing the suspension powers given to the procuring entity, was mindful that an automatic suspension would involve a cumbersome and rigid approach, and might allow suppliers to submit vexatious requests that would needlessly delay the procurement proceedings, and might cause serious damage to the procurement proceedings. This possibility would allow suppliers to pressurize the procuring entity to take action that might, albeit unwittingly, inappropriately favour the supplier concerned. Another possible disadvantage of an automatic suspension approach might be an increase in challenge mechanisms generally, resulting in disruption and delay in the procurement process.

17. Nonetheless, without a suspension, a supplier or contractor submitting a complaint might not have sufficient time to seek and obtain interim relief. The availability of suspension enhances the possibility of settlement of applications at a lower level, short of judicial intervention, thus fostering more economical and efficient dispute settlement.

18. For this reason, the procuring entity has discretion as to whether or not to suspend the procurement proceedings. The procuring entity's decision on suspension will be taken in the light of both the nature of the challenge and its timing, as well as the facts and circumstances of the procurement at issue. For example, a challenge to certain terms of the solicitation made early in the proceedings may not have the type of impact that requires suspension even if some minor corrective action is ultimately required; a challenge to some other terms might warrant a suspension, where there is a possibility that corrective action might mean undoing steps taken and wasting costs; at the other extreme, a challenge to such terms a few days before the submission deadline would require quite different action and a suspension would be likely to be appropriate. The supplier concerned will have the burden of establishing why a suspension should be granted, though in this regard it is important to note that the supplier may not be necessarily in possession of the full record of the procurement proceedings, and may be able only to outline the issues involved.

19. Although article [64] prohibits the entry into force of the procurement contract until the application has been disposed of, a suspension of the procurement proceedings may also be necessary in the situations described in the preceding paragraph, among others. In other words, suspension of the procurement proceedings is a broader notion than the prohibition under article [64]: it stops all actions in those proceedings.

20. An alternative approach, particularly where the procuring entity might lack experience in challenge proceedings, where decisions in the procurement proceedings concerned have been taken by another body, or where it is desired to promote the early resolution of disputes by strongly encouraging any challenge to be presented to the procuring entity in the first instance, would be to regulate the exercise of the procuring entity's discretion in deciding whether or not to suspend the procurement proceedings. If such an approach is desired, enacting States may wish to redraft the provisions of paragraph (3) along the lines of the provisions of paragraphs (3) to (7) of article [66].

21. Given the overall aim of efficient dispute resolution, a further goal of the provisions on suspension is to ensure swift decisions on whether or not to apply a suspension, and accordingly the procuring entity is given a short period of three working days to decide whether or not to suspend the procurement and on the length of any suspension applied, and to notify the applicant and all participants in the procurement process of its decision. Where the procuring entity decides to suspend the proceedings, it need not give reasons for that decision, because it is not one that the applicant will wish to challenge. The key safeguard against abusive failures to suspend are transparency measures; first, under paragraph (3) (c) (ii), the procuring entity must advise the applicant of the reasons for its decision not to suspend the procurement and, secondly, it must put on the record all decisions in relation to suspension and the reasons for them. These safeguards ensure that the procuring entity's decision can itself be challenged and scrutinized (for example, by the independent body provided for in article [66], or by the courts).

22. Where a procuring entity decides not to grant a suspension, the applicant may consider that this decision is a likely predictor of the eventual decision on the application, and accordingly that its best course would be to terminate its application before the procuring entity and commence proceedings before an

independent body or court (rather than appealing the decision not to suspend to that body). Paragraph (4) confers this right. While a procuring entity may consider that this option operates as a disincentive to treat applications with the seriousness the system is intended to confer, a subsequent challenge before another forum or action by another oversight body, which should be considered a probable consequence, should demonstrate that any such approach is unwise. Paragraph (4) also provides that a failure to abide by the three-day notification requirement permits the applicant to recommence proceedings with an independent body or court, a measure also intended to discourage dilatory conduct on the part of the procuring entity. Where proceedings before an independent body or court are commenced, the competence of the procuring entity to entertain further the application ceases.

23. Paragraphs (5) to (7) regulate the procuring entity's steps as regards the application that it entertains. Paragraph (5) confers a wide discretion on the procuring entity when deciding on the application. Possible corrective measures might include the following: rectifying the procurement proceedings so as to be in conformity with the procurement law, the procurement regulations or other applicable rules; if a decision has been made to accept a particular submission and it is shown that another should be accepted, refraining from issuing the notice of acceptance to the initially chosen supplier or contractor, but instead to accept that other submission; or cancelling the procurement proceedings and commencing new proceedings.

24. The decision of the procuring entity on the application that it entertains is to be issued and communicated to the applicant, and to all participants in the challenge and procurement proceedings, as required by paragraph (6). The enacting State is invited to specify the appropriate number of working days within which the decision must be issued. The period of time so specified should balance the need for a thorough review of the issues concerned and the need for an expeditious resolution of the application for reconsideration, in order to allow the procurement proceedings to continue.

25. If the application cannot be disposed of expeditiously, quasi-judicial review or judicial review may be the more appropriate course. To that end, in the absence of a timely decision, or if the decision is unsatisfactory to the applicant, paragraph (7) entitles the supplier or contractor that submitted the application to commence review or appeal proceedings under article [66] or proceedings before the court, as appropriate.

26. Paragraph (8) provides additional transparency mechanisms. All decisions of the procuring entity must be recorded in writing, state action(s) taken and include reasons, both to enhance understanding and thereby assist in the prevention of further disputes, and to facilitate any further challenge or appeal. Although in some systems silence by the procuring entity to an application can be deemed to be a rejection of such an application, the provisions require a written decision as an example of good practice. The application and all decisions must also be included in the record. The implication of this provision is that these documents (subject to confidentiality restrictions of article [24]), will be made available to the public in accordance with the provisions of article [24].

27. Where the enacting State provides that certain actions of the procuring entity are to be subject to the decision of an approving authority [cross reference to

relevant discussion], the enacting State will need to ensure that appropriate provision is included in this article to allow that authority to receive an application for reconsideration and all information pertinent to the relevant challenge proceedings.

**Article [66]. Application for review or an appeal before an independent body**

1. Article 66 regulates review and appeal proceedings before an independent body. The Model Law intends that the enacting State should grant all the powers set out in this article, subject to permissible deviations described in the footnotes. These powers are required as a package in order to ensure the effectiveness of the system.
2. A footnote to this article records that States in which administrative or quasi-judicial review of administrative actions, decisions and procedures is not a feature of the legal system might choose to omit this article and provide only for judicial review (article [69]) in addition to the peer system under article [65]. This flexibility is granted on the condition that the enacting State provides an effective system of judicial review, including an effective system of appeal, to ensure that a challenge can be made in compliance with the requirements of the Convention against Corruption. In those States in which effective independent review is already achieved through the court system, there may also be little advantage in introducing another layer of review; the peer system before the procuring entity may nonetheless provide a useful mechanism to assist in the early resolution of disputes.
3. In some legal systems that provide for both administrative or quasi-judicial review and judicial review, proceedings for judicial review may be instituted while quasi-judicial review proceedings are still pending, or vice versa, or judicial review may be sought only after opportunities for other challenges have been exhausted. Some States concerned may already provide rules that will guide those involved in challenge procedures on these matters. If not, the State may wish to establish them by law or by regulation; the Model Law, which does not regulate court procedures, does not address the issue. In this regard, the Model Law does not seek to encourage the filing of multiple applications. The aim of the provisions is to allow enacting States to address the issue consistent with its legal tradition.
4. An enacting State that wishes to set up a mechanism for administrative or quasi-judicial review will need to identify the appropriate body in which to vest the review function, whether in an existing body or in a new body created by the enacting State. The body may, for example, be one that exercises overall supervision and control over procurement in the State, a relevant body whose competence is not restricted to procurement matters (e.g., the body that exercises financial control and oversight over the operations of the Government and of the public administration (the scope of the review should not, however, be restricted to financial control and oversight)), or a special administrative body whose competence is exclusively to resolve disputes in procurement matters.
5. As its name indicates, it is an important safeguard that the body exercising the review function be independent of the procuring entity and protected from political pressure. In this regard, an administrative body that, under the Model Law as enacted in the State, has the competence to approve certain actions or decisions of, or procedures followed by, the procuring entity, or to advise the procuring entity on procedures, will not fulfil the requirement for independence. In addition, States will

wish to consider in particular whether the body should include or be composed of outside experts, independent from the Government. Independence is also important as a practical matter: if decision-taking in review proceedings lacks independence, a further challenge to the court may result, causing lengthy disruption to the procurement process.

6. Paragraph (1) is drafted to ensure broad competence on the part of the independent body. In addition to bringing an application for review as an original application to the independent body, a supplier that is dissatisfied with a decision of the procuring entity under article [65] can appeal that decision, or commence new proceedings before the independent body; the supplier can take either step if the procuring entity does not issue its decision as required by article [65 (3), (6) or (8)]. The paragraph is therefore one of the key provisions intended to give effect to the requirements of the Convention against Corruption for an effective system of review including an appeal mechanism.

7. Paragraph (2) establishes time limits for the commencement of review applications and appeals. Paragraph (2) (a) addresses challenges to the terms of solicitation and pre-submission matters, and provides the same time limits as apply in challenge proceedings before the procuring entity, guidance as to which is set out in paragraph [4] of the commentary to article [65]] above.

8. Under paragraph (2) (b) (i), applications regarding other decisions or steps in the procurement proceedings should be submitted within the standstill period prescribed in article [21(2)], where a standstill period has been applied. Under paragraph (2) (b) (ii), where a standstill period was not applied (either because the procuring entity was permitted not to apply a standstill period by article [21(3)], or failed to respect the requirements of a standstill period), a challenge must be filed within a specified number of working days from the point of time when the supplier became aware or should have become aware of the circumstances in question. To avoid an indefinite period during which applications for review can be filed under such circumstances, the provisions also refer to the absolute maximum — the application cannot be filed upon expiry of a certain number of days after the entry into force of the procurement contract. Such a final deadline is required in order to provide a balance between the rights of suppliers to enforce the integrity of the process and the need for the procurement contract to continue undisrupted. It is also acknowledged that in most States, there is a determined limitation period for any civil claim. The absolute maximum period may be expressed in weeks or months rather than working days, where it would be more appropriate to do so. Enacting States are invited to specify these two time limits in the light of their local needs.

9. As regards the first time limit in paragraph (2) (b) (ii), the 1994 text of the Model Law specifies a period of 20 days for equivalent time limits; the [revised GPA] specifies a minimum 10 day period; and enacting States may wish to be guided by those provisions in considering the appropriate time period for their domestic legislation. As regards the second time limit in paragraph (2) (b) (ii), although in many cases the notice of the procurement contract award to be published under article [22] will probably alert the supplier or contractor submitting the application of the circumstances concerned, it will not necessarily be always the case. For example, the reasons for not applying a standstill period may also justify an exemption from the obligation to advertise the procurement contract award — such as where confidentiality is invoked for the protection of essential national

interests of the State. Accordingly, it was decided not to refer to the publication of the notice of the award as the starting point for calculating the absolute maximum, since the publication will not take place in all cases, but to refer instead to the entry into force of the procurement contract.

10. As in article [65], the provisions do not refer to the independent body's competence to consider challenges to decisions to cancel the procurement. This reflects the Commission's decision, mentioned in paragraph [6] of the commentary to article [65], that challenges related to such decisions should be in the exclusive competence of the courts.

11. Paragraph (2) (c) envisages that a supplier may request the independent body to entertain an application after the expiry of the standstill period applied pursuant to article [21 (2)], on the grounds that the application raises significant public interest considerations. The absolute deadline for submission of such late applications is to be established by enacting States, which should be aligned with the final deadline to be established in paragraph (2) (b) (ii). It is up to the independent body to decide whether significant public interest considerations are indeed present and justify entertaining such late applications. As regards the type of issues that should permit entertaining applications after the standstill period, enacting States may consider that the most common will be the discovery of fraudulent irregularities or instances of corruption. The enacting State will wish to provide rules or guidance on these matters. The discretionary element of this provision does not bar entirely the independent body to consider this type of applications. Within the normal limitation period in the jurisdiction concerned, such applications can also be submitted directly to the courts. This provision is in particular important in situations in which the normal transparency safeguards of the Model Law do not apply.

12. Paragraph (2) (d) provides the time limit for the submission of appeals against a decision of the procuring entity and the absence of decisions under article [65]. When setting this time limit, enacting States are, again, left to determine the relevant number of working days from the point of time when the supplier became aware or should have become aware of the circumstances in question. States will wish to ensure that all relevant time limits left to their determination are effectively aligned, both within chapter VIII and as regards the standstill period in article [21(2)].

13. Paragraphs (3) and (4) address issues of suspension. The main policy issues surrounding suspensions are discussed in [paragraphs [15 to 21] of the commentary to article [65]] and are also relevant here.

14. Paragraph (3) delineates the general discretion that is to be granted to the independent body to order the suspension of the procurement proceedings. This discretion is subject to the requirement to suspend the procurement proceedings under certain circumstances referred to in paragraph (4). In all other cases not covered by paragraph (4) where suspension is mandatory, the independent body may order a suspension for so long as it considers it necessary to protect the interests of the supplier presenting the application for review or appeal; it may also lift or extend any suspension so granted, and these powers may be exercised at any time during the challenge proceedings before the independent body. Recognizing that in some jurisdictions, the independent body may have limited powers as regards the

procurement contracts or framework agreements that entered into force, the provisions of subparagraph (b) (like all other provisions throughout the article referring to procurement contracts or framework agreements that entered into force) are accompanied by a footnote indicating the optional nature of the provisions.

15. Paragraph (4) sets out two situations in which the procurement proceedings must be, as a general rule, suspended. Those are the situations considered to pose particularly serious risks to the integrity of the procurement process.

16. Under paragraph (4) (a), the suspension for a period of ten working days must be applied where the application or appeal is received prior to the deadline for presenting submissions. The reason for this approach is to ensure to a large extent that such challenges are addressed before the submissions are received, when corrective action is easier to achieve. In such circumstances, the independent body may wish to take such steps as to extend the deadline for submission of tenders, and correct other actions as regards the terms of solicitation, pre-qualification or pre-selection.

17. Paragraph (4) (b) covers situations where no standstill was applied and a challenge is received after the submission deadline. No fixed period is provided for in the text, because circumstances may indicate different periods are appropriate. As the challenge may be received after the entry into force of the procurement contract, the optional power is given to suspend performance of a procurement contract or operation of a framework agreement, as the case may be.

18. In each case covered by paragraphs (3) and (4), the suspension is presumptive and not automatic, in that the independent body may decide that urgent public interest considerations may justify that the procurement contract or framework agreement should proceed. This is the same test as applies in article [64 (3)] (under which a procuring entity may seek to lift the prohibition to enter into the procurement contract or framework agreement), and enacting States should ensure that appropriate guidance is given on the circumstances that may so justify. Examples when this might be the case include natural disasters, emergencies, and situations where disproportionate harm might otherwise be caused to the procuring entity or other interested parties. The rules of procedure for the independent body may provide permission for the body to make enquiry of the procuring entity if its decision on suspension must be taken before the full record of the procurement proceedings is provided to it (as required by paragraph (8) of this article).

19. In any event, the independent body should bear in mind that a suspension might ultimately prove less disruptive of the procurement process because it may avoid the need to undo steps taken in the procurement process if a decision is taken to overturn or to correct a decision of the procuring entity. In addition, the appropriate degree of incentive for suppliers to submit challenges should be ensured, in which the availability of suspension is an important consideration.

20. In order to mitigate the potentially disruptive effect of an application for review or appeal, paragraphs (5) and (6) together operate to require the independent body to undertake an initial consideration of the application or appeal filed, akin to that set out in paragraph (3) of article [65], guidance as to which is set out in the commentary to that paragraph (paragraphs [13-22] of the guidance to article [65]). This initial review of the application is intended to permit the independent body to

assess the application swiftly and on a *prima facie* basis, so as to determine whether it should be entertained.

21. Paragraph (5) requires the independent body promptly to notify the procuring entity and all participants in the procurement proceedings whose identities are known to the independent body of the application for review or appeal, and of its substance. It is not required to notify other entities whose interests might be affected by the application or appeal (such as other government entities), but is required to publish a notice of the application or appeal so that such entities can take steps to protect their interests, as appropriate. As was discussed in the context of the challenge proceedings before the procuring entity, such steps may include intervention in the challenge proceedings under article [67], might include a request to lift a suspension that has been applied, and such other steps that may be provided for under applicable regulations or procedural rules.

22. It must also take a decision on suspension, and notify all concerned about such decision (including, where relevant, the period of suspension). The independent body must also provide reasons for a decision not to suspend to the applicant or appellant (so as to facilitate any appeal against that decision) and to the procuring entity.

23. The powers to dismiss the application for review or appeal under paragraph (6) track those given to the procuring entity under article [65], as discussed in paragraph [13] of the commentary to that article. The same transparency safeguards as regards the notification of the decision and reasons therefor as in article [65] are also applicable.

24. Under paragraph (7), notices of the actions taken under paragraphs (5) and (6) must be given within three working days after the application or appeal was received, as is the case with applications for reconsideration to the procuring entity. The effect of the notices will vary with the decisions they notify, but notably the independent body may require the procuring entity to suspend the procurement proceedings.

25. Paragraph (8) requires the procuring entity to provide all documents relating to the procurement proceedings to the independent body; this obligation is subject to the confidentiality provisions in articles [23 and 24], in particular restrictions on disclosure of certain information, which however may be lifted by competent authorities identified by enacting States in those provisions. Enacting States may wish to provide rules or guidance to avoid excessive disruption of both procurement and review or appeal proceedings by providing secure and efficient means of transfer of such documents.

26. Paragraph (9) lists remedies that the independent body can grant under the Model Law with respect to the application for review or appeal that it decides to entertain. Paragraph (9) acknowledges that differences exist among national legal systems with respect to the nature of the remedies that bodies exercising quasi-judicial review are competent to grant. In enacting the Model Law, States are encouraged to enact all remedies that, under its legal system, can be granted to an independent body undertaking review, so as to ensure an effective system of review as required by the Convention against Corruption. The thrust of the provisions is to ensure that an appropriate decision on the application or appeal is taken (including, where circumstances so dictate, that the application is dismissed or rejected); as part

of that exercise, any suspension existing when the application or appeal is disposed of must also be lifted or extended where the independent body considers it necessary.

27. Some provisions in this paragraph appear in parenthesis indicating their optional nature and possibility of their variation in accordance with the local circumstances of the enacting State. For example, sub-paragraphs (c) and (e) permit the independent body to overturn acts and decisions of the procuring entity, including award of a procurement contract. The term “overturn” does not carry any particular consequences (it need not be treated as declaring the decision of no effect), so that the enacting State may provide for the consequences appropriate in the light of the legal tradition in the jurisdiction concerned. Nonetheless, footnotes to these sub-paragraphs as well as to sub-paragraph (d) note that, where an independent body cannot be granted the power to overturn a procurement contract or to substitute its own decision for that of a procuring entity, an alternative formulation would be to permit the independent body to quash the decision of the procuring entity, so that the procuring entity is then required to take another decision in the light of the decision of the independent body.

28. Corrective action should be regarded as the primary and most desirable remedy. This approach is reflected in the GPA. The early resolution of disputes through corrective action will reduce the need for financial compensation. Financial compensation may, however, be part of the appropriate remedy in a given case, for example where a contract has entered into force but it is not considered appropriate to interfere in the contract. A system without provision for any financial compensation (beyond the costs of filing a complaint) may therefore fail to provide adequate remedies in all situations, and the question of financial compensation should therefore be a part of the broader perspective of putting in place an effective remedies system.

29. Paragraph (9) (h) therefore makes provision for financial compensation, and sets out two alternatives for the consideration of the enacting State. Where the text in parenthesis is retained, compensation may be required in respect of any reasonable costs incurred by the supplier or contractor submitting the complaint in connection with the procurement proceedings as a result of the unlawful act, decision or procedure. Those costs do not include profit lost because of non-acceptance of a tender, proposal, offer or quotation of the supplier or contractor submitting the complaint. The types of losses compensable under the second alternative (i.e. where provisions are enacted without the text in parenthesis) are broader, and might include future losses, including lost profit, in appropriate cases. Enacting States will wish to consider how purely economic loss is addressed in their domestic legal systems, so as to ensure consistency in the measure of financial compensation throughout the jurisdiction concerned (such as whether the compensation should reflect the loss of a chance, and the extent to which financial compensation is contingent on the complainant proving that it would have won the procurement contract concerned). Since the possibility of receiving financial compensation can raise the risk of encouraging speculative applications and disrupting the procurement process, it may be useful when a quasi-judicial system is in its infancy, to ensure that there is adequate incentive for suppliers to bring applications, but the mechanism should be reviewed as systems mature. In addition,

the enacting State may wish to monitor the risk of abuse if the power to award financial compensation lies in a small entity or the hands of a few individuals.<sup>2</sup>

30. Paragraph (10) provides for a maximum period within which the decision on the application or appeal that the independent body decided to entertain must be taken. It also provides for the requirement of prompt notification of that decision to all concerned. Together with paragraph (11) that requires all decisions taken by the independent body during the review or appeal proceedings to be in writing, complete, reasoned and put on the record, paragraph (10) sets out important transparency safeguards that also aim at ensuring efficient and effective review and appeal proceedings and possible further action by aggrieved suppliers in courts if need be. Paragraphs (10) and (11) are similar to paragraphs (6) and (8) of article [65]; the matters discussed in paragraphs [24] and [26] of the guidance to article [65] are therefore relevant here.

31. The examination of evidence, and the manner in which it is conducted (such as whether hearings are to take place), will be a significant determining factor as regards the necessary length of administrative or quasi-judicial proceedings, and will reflect the legal tradition in the enacting State concerned. If detailed rules governing procedures in administrative or quasi-judicial review do not already exist in the enacting State, the State may provide such rules by law or in the procurement regulations, to cover such matters as the conduct of review proceedings, the manner in which applications are to be filed, and questions of evidence.

#### **Article [67]. Rights of participants in challenge or appeal proceedings**

1. The references in paragraph (1) to any supplier or contractor participating in the procurement proceedings and to any governmental authority whose interests may be affected by challenge proceedings or appeals establish a broad right of participation in challenge or appeal proceedings beyond the applicant or appellant. These rights of participation are intended to provide an appropriate balance between effective challenge proceedings and avoiding excessive disruption, as noted regarding general rights to commence challenge proceedings described in the commentary to article [64] above, and are predicated on the notion that participation is granted to the extent that the supplier or contractor, or other potential participant, can demonstrate that its interests may be affected by the challenge or appeal proceedings.

2. In this context, the “participants in challenge or appeal proceedings” can include a varying pool of participants, depending on the timing of the challenge or appeal proceedings and subject of the challenge or appeal, and can include other governmental bodies. A governmental body may include public sector bodies that would intend to use a framework agreement, or any approving authority that has participated in the procurement concerned. The reference to suppliers or contractors “participating in the procurement proceedings” is intended to permit all those that remain in the proceedings concerned, but to exclude those that have been eliminated through pre-qualification or a similar step earlier in the proceedings, unless that step is the action or decision of the procuring entity to which the challenge or appeal relates.

---

<sup>2</sup> The Working Group has expressed the wish that the Guide should address the quantification of costs, and may wish to provide parameters for this discussion to the Secretariat.

3. Paragraph (2) enshrines the right of the procuring entity to participate in challenge or appeal proceedings before an independent body.

4. Paragraph (3) sets out the fundamental rights of participants in the proceedings, of which the most significant are the right to be heard, to have access to all the proceedings and to present evidence. These rights accrue to those described in paragraphs (1) and (2) of the article, and not to anyone that may be present during hearings that take place in public (such as members of the press). The independent body may grant access to the record of the challenge or appeal proceedings (which will, under the provisions of article [66 (8)], include the record of the procurement proceedings). Participants in the proceedings will need to demonstrate their interest in the documents to which access is sought: this measure is intended to allow the independent body to keep effective control of the proceedings and to avoid fishing expeditions. Access to records is also subject to the provisions on confidentiality in article [68]. There will be a need for robust procedural rules in order to ensure that the proceedings examine the issues in each case in the appropriate level of detail and in a timely fashion.

#### **Article [68]. Confidentiality in challenge and appeal proceedings**

The article has been included in chapter VIII to apply the principles of confidentiality found in article 23 to the challenge and appeal proceedings, in particular the review and appeal proceedings taking place in the independent body (to which article [23] does not apply).

#### **Article [69]. Judicial review**

[1. This section remains to be completed. The relevant part of the Guide to Enactment of the 1994 Model Law on the equivalent article is included here, together with comments made by the Working Group on the scope of judicial review and a footnote accompanying article 69 of the draft revised Model Law.

2. The commentary to article 57. Judicial review of the Guide to Enactment of the 1994 Model Law reads as follows:

“The purpose of this article is not to limit or to displace the right to judicial review that might be available under other applicable law. Rather, its purpose is merely to confirm the right and to confer jurisdiction on the specified court or courts over petitions for review commenced pursuant to article 52. This includes appeals against decisions of review bodies pursuant to articles 53 and 54, as well as against failures by those review bodies to act. The procedural and other aspects of the judicial proceedings, including the remedies that may be granted, will be governed by the law applicable to the proceedings. The law applicable to the judicial proceedings will govern the question of whether, in the case of an appeal of a review decision made pursuant to article 53 or 54, the court is to examine *de novo* the aspect of the procurement proceedings complained of, or is only to examine the legality or propriety of the decision reached in the review proceeding. The minimal approach in article 57 has been adopted so as to avoid impinging on national laws and procedures relating to judicial proceedings.”

3. Comments by the Working Group as regards the provisions of the revised Model Law on judicial review are contained in footnote 43 in document A/CN.9/WG.I/WP.75/Add.8. They can be summarized as follows:

“The Model Law does not intend to interfere into the prerogatives of courts, which are regulated or should be regulated in a separate body of law in enacting States. The Model Law intends neither inadvertently to restrict broader powers may exist for courts under legislation of enacting States, such as powers to award compensation for anticipatory losses or to grant interim measures, including under a contract that has been executed and where performance has commenced, if the legal system of the enacting State so permits.

Since the Model Law does not deal with judicial review beyond outlining the framework and encouraging all remedies available in quasi-judicial proceedings to be available before the Court, article 66 does not purport to address the question of court ordered suspension, which may be available under the applicable law.”

4. A footnote accompanying article [69] of the revised Model Law reads as follows:

“States may provide for the system of appeal judicially, or administratively, or both, to reflect the legal system in the jurisdiction concerned. States that provide only for judicial review of the decisions of the procuring entity are required to put in place an effective system of judicial review, including an effective system of appeal, to ensure legal recourse and remedies in the event that the procurement rules and procedures of this Law are not followed, in compliance with the requirements of the United Nations Convention against Corruption. Such an effective system of judicial review shall in particular ensure: (i) that deadlines for submission of applications for judicial review or appeal of decisions of the procuring entity or the independent body, as the case may be, shall be appropriate in the procurement context, in particular the provisions of this Law on the standstill period shall be taken into account; (ii) that the court or courts with jurisdiction pursuant to article 63 may take any or any combination of the actions contemplated in article 66 (9) of this Law and to grant interim measures that it considers necessary to ensure effective review, including suspension of the procurement proceedings or performance of the procurement contract or the operation of the framework agreement, as applicable; and (iii) that minimum safeguards as regards the participation in the challenge or appeal proceedings, submission of evidence and protection of confidential information in the procurement context, contemplated in articles 67 and 68 of this Law, are in place.”]

## (A/CN.9/WG.I/WP.77/Add.5) (Original: English)

**Note by the Secretariat on the revised Guide to Enactment to accompany the UNCITRAL Model Law on Public Procurement, submitted to the Working Group on Procurement at its twentieth session****ADDENDUM**

This addendum sets out a proposal for the Guide text to accompany related provisions of chapters II and IV of the UNCITRAL Model Law on Public Procurement on restricted tendering and request for quotations.

## **GUIDE TO ENACTMENT OF THE UNCITRAL MODEL LAW ON PUBLIC PROCUREMENT**

### **Part II. Article-by-article commentary**

[for ease of reference, this addendum consolidates the proposed article-by-article commentary to various provisions of the Model Law regulating restricted tendering and request for quotations]

...

#### **A. Proposed text for the Guide to Enactment of the revised Model Law addressing issues of restricted tendering**

##### **1. Conditions for use**

*The relevant provision of the revised Model Law on conditions for use:*

**“Article 28. Conditions for use of methods of procurement under chapter IV of this Law (restricted tendering ...)**

(1) The procuring entity may engage in procurement by means of restricted tendering in accordance with article 44 of this Law when:

(a) The subject matter of the procurement, by reason of its highly complex or specialized nature, is available only from a limited number of suppliers or contractors; or

(b) The time and cost required to examine and evaluate a large number of tenders would be disproportionate to the value of the subject matter of the procurement.”

*Proposed text for the Guide:*

1. Paragraph (1) of the article sets out the conditions for use of restricted tendering. It has been included in order to enable the procuring entity, in exceptional cases, to solicit participation only from a limited number of suppliers or contractors. Those exceptional cases are: the procurement of technically complex or specialized subject matter that is available from only a limited number of suppliers (for

example, equipment for nuclear power plants); and where the time and cost required to examine and evaluate a large number of tenders would be disproportionate to the value of the subject matter of the procurement (for example, standard cleaning services). A requirement for open solicitation in such cases would be inappropriate.

2. Although the use of restricted tendering is subject to transparency safeguards, in that an advance notice of the procurement is required under the provisions of [article 33 (5)], and certain procedures applicable to open tendering apply also to restricted tendering procedures under article 44, strict and narrow conditions for use have been included for restricted tendering. These conditions are based on the notion that inappropriate use of the method would fundamentally impair the objectives of the Model Law. They therefore seek to avoid encouraging its use. Under the conditions of paragraph (1) (a) in particular, the use of open tendering with pre-qualification can achieve the same purposes as restricted tendering in a more transparent manner. The use of restricted tendering on the grounds specified in paragraph (1) (b) should diminish with the use of electronic procurement: many steps in the process can be automated to a large degree, saving both time and costs.

3. Both conditions for use of this method listed in paragraph (1) confer significant discretion on the procuring entity as regards solicitation: in the first instance as regards the existence of only a limited number of suppliers or contractors capable of delivering a subject matter of the procurement, though this judgement is subject to further suppliers seeking to participate following the publication of a notice as discussed further below. In the second case, the procuring entity has the discretion to assess the appropriate maximum number of tenders to be evaluated to achieve proportionality between the costs or time spent in evaluation and the value of the procurement. Thus the method necessarily involves subjectivity and may therefore be at risk of abuse.

4. In applying the grounds specified in paragraph (1) (a), the procuring entity should be aware of the implications of article 33 (5) that requires giving an advance notice of the procurement specifying inter alia the main terms and conditions of the procurement and the method of procurement selected. The justification for the use of restricted tendering should be set out in the record, as required under the Model Law (see paragraph [9] below), and the justification should be provided in such detail as would allow the decision to be overseen or challenged where appropriate. However, the justification need not be included in the notice (to avoid inaccurate summaries or excessively long notices). (See, also, the guidance to article 24 that explains how suppliers that may wish to challenge the choice of procurement method can have access to the justification in the record.)

5. If, under the conditions of paragraph (1) (a), the procuring entity receives requests from suppliers or contractors to allow them to tender in response to that notice, such suppliers will have to be allowed to tender unless they are disqualified (if pre-qualification took place) or do not comply with the terms of the notice of the procurement (for example, the declaration made pursuant to article 8 of the Law). This is in compliance with article 33 (1) (a) requiring solicitation of tenders from all suppliers and contractors, within the market concerned, from which the subject matter of the procurement is available.

6. The procuring entity has more discretion if recourse to restricted tendering has been justified on the ground referred to in paragraph (1) (b), that is the time and cost

required to examine and evaluate a large number of tenders would be disproportionate to the value of the subject matter of the procurement. As long as it has already selected a sufficient number of suppliers or contractors in an objective manner to ensure effective competition, the procuring entity in such cases may decline to consider requests to tender coming from additional suppliers or contractors responding to the notice published in accordance with article 33 (5). In practice, objectivity in selection may be achieved by various methods, such as a lottery or random selection, as discussed in the guidance to article [33 (1)], but oversight measures to ensure that the manner of selection is indeed undertaken objectively should be put in place, particularly where repeated procedures are envisaged.

7. The manner in which the suppliers will be selected to participate, the choice of the procurement method and terms of solicitation, among other things, may be challenged under chapter VIII of the Model Law. In applying the grounds specified in paragraph (1) (b), the procuring entity should therefore carefully consider whether the desired goal of saving time and cost would indeed be achieved in the procurement concerned. It is important to note that a challenge cannot be mounted unless the manner of selection is alleged to be discriminatory: suppliers cannot challenge their exclusion per se. Where repeated procedures are concerned, and a limited group is repeatedly selected, it may be easier to show a lack of objectivity in the selection. Where there are repeated purchases, the procuring entity should take particular care to be demonstrably objective in its selection of the suppliers to be invited to participate (or may wish to consider the use of a tool such as a framework agreement).

8. The provisions of paragraph (1) (b) should also be read together with article 12 of the Model Law containing rules on estimation of the value of the procurement. That article contains essential safeguards against the artificial division of the subject matter of the procurement for the purpose, for example, of justifying resort to restricted tendering on the ground set out in paragraph (1) (b), i.e. that the time and cost required to examine and evaluate a large number of tenders would be disproportionate to the value of the subject matter of the procurement.

9. The procuring entity, under article 27 (3) read together with the provisions of article 24 (1) (e), is required to put on the record a statement of the reasons and circumstances relied upon by the procuring entity to justify the use of restricted tendering instead of open tendering.

*For a discussion of the changes in conditions for use from the 1994 text, see section A.5 below.*

## 2. Solicitation

*The relevant provision of the revised Model Law on solicitation:*

### **“Article 33. Solicitation in restricted tendering ...**

(1) (a) When the procuring entity engages in procurement by means of restricted tendering on the grounds specified in article 28 (1) (a) of this Law, it shall solicit tenders from all suppliers and contractors from which the subject matter of the procurement is available;

(b) When the procuring entity engages in procurement by means of restricted tendering on the grounds specified in article 28 (1) (b) of this Law, it shall select suppliers or contractors from which to solicit tenders in a non-discriminatory manner, and it shall select a sufficient number of suppliers or contractors to ensure effective competition.”

*Proposed text for the Guide:*

10. Paragraph (1) sets out minimum solicitation requirements in restricted tendering. They have been drafted in order to give effect to the purpose of article 28 (1) of limiting the use of restricted tendering to truly exceptional cases while maintaining the appropriate degree of competition. They are tailored specifically to each of the two exceptional cases reflected in the conditions for use in article 28 (1). When resort is made to restricted tendering on the ground referred to in article 28 (1) (a), that is the procurement of technically complex or specialized subject matter that is available from only a limited number of suppliers, all the suppliers or contractors that could provide the subject matter of the procurement in the market envisaged to be covered by the procurement are required to be invited to participate. When the ground is that the time and cost required to examine and evaluate a large number of tenders would be disproportionate to the value of the subject matter of the procurement, the case referred to in article 28 (1) (b), suppliers or contractors should be invited in a non-discriminatory manner and in a sufficient number to ensure effective competition. The requirement of selection in a non-discriminatory manner would presuppose notification to the public in accordance with paragraph (5) of this article of not only the procuring entity’s decision that restricted tendering would be used but also of the maximum number of participants to be selected, and the manner of selection (for example, on a random or lottery basis, or on the basis of the “first come first served” principle, up to the maximum number notified — see, also, paragraphs [5-7] above).

### **3. Advance notice of the procurement**

*The relevant provision of the revised Model Law:*

#### **“Article 33. ... Requirement for an advance notice of the procurement**

...

(5) Prior to direct solicitation in accordance with the provisions of paragraphs (1), (3) and (4) of this article, the procuring entity shall cause a notice of the procurement to be published in ... (the enacting State specifies the official gazette or other official publication in which the notice is to be published). The notice shall contain at a minimum the following information:

(a) The name and address of the procuring entity;

(b) A summary of the principal required terms and conditions of the procurement contract or the framework agreement to be entered into in the procurement proceedings, including the nature and quantity, and place of delivery of the goods to be supplied, the nature and location of the construction to be effected, or the nature of the services and the location where they are to be provided, as well as the desired or required time for the supply of the goods or for the completion of the construction, or the timetable for the provision of the services;

- (c) A declaration pursuant to article 8 of this Law; and
  - (d) The method of procurement to be used.
- (6) The requirements of paragraph (5) shall not apply in the case of urgency as referred to in articles 29 (4) (b) and 29 (5) (b)."

*Proposed text for the Guide as regards restricted tendering:*<sup>1</sup>

11. Paragraph (5) promotes transparency and accountability as regards the decision to use [restricted tendering] by requiring publication of a notice of the procurement in the media to be specified by the enacting State in its procurement law. Also relevant in this regard is the rule in article 27 (3) (which is of general application), read together with the provisions of article 24 (1) (e), which require the procuring entity to include in the record of procurement proceedings a statement of the grounds and circumstances relied upon to justify the selection of the procurement method concerned.

12. The paragraph mandates the publication of the notice prior to the direct solicitation. It is therefore distinct from a public notice of the award of a procurement contract or framework agreement required under article 22 of the Model Law. Including the procedures described in this article in the procurement law enables interested suppliers and contractors to identify, simply by reading the procurement law, publications that they may need to monitor in order to stay abreast of procurement opportunities in the enacting State and of the way those procurement opportunities are allocated in the market. (The procuring entity should also be aware of the implications of this notice provision in restricted tendering as discussed in paragraphs [4-7] above.) The Model Law does not regulate the means and media of publication, which are left to determination by enacting States. There may be paper or electronic media or combination of both. In this context, considerations raised in the guidance to article 5 in paragraphs ... above are relevant.

13. The information to be published is a minimum needed to ensure effective public oversight and possible challenge by aggrieved suppliers or contractors under chapter VIII of the Model Law. In particular, the selected method of procurement may be challenged by any affected supplier or contractor if, for example, single-source procurement or restricted tendering were selected on the ground that a particular supplier or limited group of suppliers existed in the market and was or were capable of supplying the subject matter of the procurement. Any other suppliers or contractors capable of delivering the same subject matter of the procurement in the market intended to be covered by the procurement might challenge the use of the procurement method relying on the information in the notice of the procurement. Under chapter VIII, they would be able to do so before the deadline for submission of tenders and could benefit from provisions on the mandatory suspension of the procurement proceedings if the application for review

<sup>1</sup> The Working Group may wish to consider whether a general discussion of solicitation in restricted tendering, request for quotations, competitive negotiations and single-source procurement to accompany article 33 or article 33 (5), with a cross-reference in the guidance to each procurement method concerned, would be preferable to a discussion of solicitation in each such procurement method. While the discussion in some provisions in the paragraphs below are tailored to restricted tendering, some other provisions in those paragraphs are of general application to the procurement methods addressed in article 33.

is filed with the independent review body. As is discussed in the commentary to chapter VIII, and in order to avoid vexatious challenges that can be highly disruptive when filed at the last minute, a supplier has to show that its interests may or have been affected at the point in time concerned: thus, for example, it may have to show a real intention to participate in the circumstances described above (for example, by submitting a draft tender or other offer).

14. The requirement for an advance notice of the procurement in restricted tendering, competitive negotiations and single-source procurement is essential in the fight against corruption and as a means to achieve transparency. Together with the provisions of chapter VIII, they enable and encourage aggrieved suppliers or contractors to seek redress earlier in the procurement process rather than at a later stage where redress may not be possible or will be costly to the public and available remedies will thus be limited.

15. The requirement to publish an advance notice of the procurement is not applicable in request for quotations proceedings in the light of the very restrictive conditions for use of that method, which will constrain any excessive or abusive use of that method. Nor does it apply in the case of competitive negotiations and single-source procurement when those methods are used in urgent or extremely urgent situations due to catastrophic events (for example, under the conditions for use of these procurement methods under articles 29 (4) (b) and 29 (5) (b)). In the normal case, when an advance notice is in principle required, an exemption may nevertheless apply under article 23 (confidentiality), in particular in procurement involving classified information. (For the guidance on the relevant provisions of the Model Law on confidentiality and procurement involving classified information, see paragraphs ... above).

*For a discussion of the changes in solicitation and notice requirements from the 1994 text, see section A.5 below.*

#### **4. Procedures**

*The relevant provision of the revised Model Law on procedures:*

##### **“Article 44. Restricted tendering**

(1) The procuring entity shall solicit tenders in accordance with the provisions of article 33 (1) and (5) of this Law.

(2) The provisions of chapter III of this Law, except for articles 35 to 37, shall apply to restricted tendering proceedings.”

*Proposed text for the Guide:*

16. The article regulates the procedures for restricted tendering. The provisions are very short since the relevant provisions of other chapters of the Model Law regulate the procedural steps required in this procurement method, cross-reference to which is made in this article.

17. As noted in the comments to article 33 (1), the solicitation requirements for this procurement method are designed to ensure that, in the case of resort to restricted tendering on the grounds referred to in article 28 (1) (a), tenders are solicited from all suppliers or contractors from whom the subject matter of the

procurement is available in the market intended to be covered by the procurement, and, in the case of resort to restricted tendering on the grounds referred to in article 28 (1) (b), from a sufficient number of suppliers or contractors to ensure effective competition. Incorporation of those solicitation requirements, together with the requirement to publish an advance notice of the procurement in accordance with article 33 (5), is an important safeguard to ensure that the use of restricted tendering does not subvert the objective of the Model Law of promoting competition, is justifiable in each case with reference to the transparent criteria and may be challenged in accordance with chapter VIII.

18. Paragraph (2) of the article makes it clear that the procedures to be applied in restricted tendering are those normally applied to tendering proceedings, with the exception of open solicitation and requirements applicable in the case of open solicitation. Paragraph (2) therefore excludes articles 35 to 37 from application to restricted tendering. Article 35 regulates procedures for soliciting tenders in open tendering and is therefore not applicable to restricted tendering. Article 36 regulates contents of an invitation to tender to be published in open tendering. In restricted tendering, it is not necessarily that an invitation to tender is issued and if it is issued, it does not necessarily include all information listed in article 36. As regards article 37, in restricted tendering, solicitation documents will be provided to all suppliers that were directly invited and that expressed interest in tendering. Some provisions of article 37 will therefore not be applicable to restricted tendering. If the procuring entity decides to charge a price for the solicitation documents in restricted tendering, it will, despite the exclusion of article 37 from application to restricted tendering, be bound by the provision in the last sentence of article 37 (“the price that the procuring entity may charge for the solicitation documents shall reflect only the cost of providing them to suppliers or contractors”). This provision appears in other articles of the Model Law in the similar context and may be considered as referring to good practice that is aimed at preventing the procuring entity from charging excessively high unjustifiable amounts for solicitation documents. The negative effect of such charges on participation in procurement of suppliers or contractors, in particular SMEs, and prices that suppliers or contractors participating in the procurement would eventually offer in their tenders, proposals, offers, quotations or bids, should be carefully considered.<sup>2</sup>

*For a discussion of the changes in procedures from the 1994 text, see section A.5 below.*

## **5. Points regarding restricted tendering proceedings proposed to be discussed in the Section of the Guide to Enactment addressing changes from the 1994 text of the Model Law**

### *Conditions for use*

19. The provisions in the revised Model Law addressing restricted tendering are based on article 20 of the 1994 Model Law, with two main changes. The first of which was to delete from the revised text references to an approval by a designated organ. This change implements the decision of UNCITRAL not to require, as a

<sup>2</sup> As regards the final sentence, the Working Group may consider that a cross-reference to the guidance to article 37, for example will be sufficient, as that guidance will discuss this point in more detail.

general rule, in the revised Model Law the procuring entity to seek an approval of another body for steps to be taken by the procuring entity (for the guidance on this point, see paragraphs ... above).

20. The second change was to delete the 1994 reference to “reasons of economy and efficiency” from the revised text. This deletion reflects the UNCITRAL decision not to refer to any objective of the Model Law listed in its Preamble in the articles of the text itself (for further discussion of this point, see paragraphs ... above). The procuring entity should, in any event, consider the objective of “maximizing economy and efficiency in procurement” and all other objectives of the Model Law when selecting any procurement method — a consideration that should also be applied at all other stages of the procurement proceedings, as appropriate. In addition, it was also considered that the reference to “economy and efficiency” was relevant in the context of the second condition for use of this procurement method (to avoid disproportionate costs and time), not to its use where there was a limited supply base.

#### *Solicitation*

21. The provisions set out in article 33 (1) and (5) are based on article 47 (1) and (5) of the 1994 Model Law, respectively, with drafting changes to ensure consistency of style and specification of the minimum information to be included in the advance notice of procurement. The provisions of the revised Model Law also make it clear that the notice is to be published before the direct solicitation is made.

#### *Procedures*

22. Provisions of article 44 are based on article 47 (3) of the 1994 Model Law, with the exclusion of specific articles of chapter III regulating open tendering that are not applicable to restricted tendering, as explained in paragraph [18] above.

## **B. Proposed text for the Guide to Enactment of the revised Model Law addressing issues of request for quotations**

### **1. Conditions for use**

*The relevant provision of the revised Model Law on conditions for use:*

#### **“Article 28. Conditions for use of methods of procurement under chapter IV of this Law (... request for quotations ...)**

(2) A procuring entity may engage in procurement by means of a request for quotations in accordance with article 45 of this Law for the procurement of readily available goods or services that are not specially produced or provided to the particular description of the procuring entity and for which there is an established market, so long as the estimated value of the procurement contract is less than the threshold amount set out in the procurement regulations.”

#### *Proposed text for the Guide:*

1. Paragraph (2) of this article sets out conditions for use of request for quotations. This method of procurement provides a procedure appropriate for low-value purchases of a standardized nature (commonly referred to as “off-the-

shelf items”). In such cases, engaging in tendering proceedings, which can be costly and time-consuming, may not be justified. Article 28 (2) limits the use of this method strictly to procurement of a value below the threshold set in the procurement regulations. That threshold may or may not be the same as the one required to be set in the provisions of the Model Law exempting low-value procurement from the mandatory application of a standstill period (article 21 (3) (b)) or from the requirement of public notice of the procurement contract award (article 22 (2)). It is recommended however that the threshold to be set in the procurement regulations for the purposes of paragraph (2) of this article should be harmonized with the thresholds set for the purposes of enacting articles 21 (3) (b) and 22 (2) of the Model Law, to ease the implementation of these related provisions of the Model Law.

2. [Unlike those other provisions that require setting a threshold in the Law itself, the threshold referred to in paragraph (2) of this article is to be set in the procurement regulations.]<sup>3</sup> Enacting States will wish to provide guidance to procuring entities on the concept of low-value procurement, by reference to the thresholds, among other things, to ensure consistency of approach. (See, also, the guidance to article 32 (4) addressing the exemption of low-value procurement from international solicitation in paragraphs ... below).

3. In enacting article 28, it should be made clear that use of request for quotations is not mandatory for procurement below the threshold value. Article 27 containing the requirement to maximize competition and to have regard for the circumstances surrounding the procurement when choosing a procurement method, and the conditions for use of other procurement methods that might be appropriate, will guide the procuring entity in considering alternatives to request for quotations (for the relevant guidance to article 27, see paragraphs ... above).

4. In particular, the method is not intended to be used for repeated purchases, because of the risk of restricting the market and of abuse in so doing (such as through an abusive selection of participating suppliers or in justifying the need for repeated purchases by, for example, splitting procurement to avoid exceeding the threshold under article 12 (see, further, below)). For repeated purchases, establishing an open framework agreement or, if more complex items are involved, concluding a closed framework agreement as a result of tendering proceedings, is a preferred alternative. The use of electronic catalogues may assist in promoting transparency where the procedure is used on a periodic, rather than repeated, basis.

5. Where procurement of more complex items is involved and thus evaluation of prices alone is not sufficient, tendering with its greater transparency safeguards should be used, even though the value of the procurement may fall below the

---

<sup>3</sup> At its nineteenth session, the Working Group was requested to consider whether the Model Law, instead of fixing any threshold in its provisions, should refer the matter to the procurement regulations consistently throughout the Model Law, in particular in the light of the fluctuating value of currencies (inflation, etc.) (A/CN.9/WG.I/WP.75/Add.2, footnotes 31 and 38). The Working Group did not consider that suggestion. However, the suggestion was made, during expert consultations on the guidance to be provided for this procurement method, that the Working Group and Commission may wish to reconsider the point so as to ensure consistent approach to the location of thresholds. Given the need for periodic adjustment as economic circumstances change, the thresholds themselves may best be set out in regulations (by comparison with article 22 (2)).

threshold established for the use of request for quotations.<sup>4</sup> Restricted tendering on the ground set out in article 28 (1) (b) may in particular be appropriate in such cases. Where initial low-value procurement would have the long-term consequence of committing the procuring entity to a particular type of technological system, the use of other methods of procurement, leading in particular to conclusion of a framework agreement, is recommended. For procurement of commodities, simple services and similar items, an alternative approach may be to use an electronic reverse auction. (For the relevant guidance to article 28 (1) (b) as applicable to restricted tendering, see paragraphs ... above; for the relevant guidance to provisions on electronic reverse auctions, see paragraphs ... below; and for the relevant guidance to provisions on framework agreements, see paragraphs ... below.)

6. The provisions of paragraph (2) should be read together with article 12 of the Model Law containing rules on estimating the value of the procurement. That article gives added and important effect to the intended limited scope for the use of request for quotations. It does so by prohibiting the artificial division of the subject matter of the procurement for the purpose of circumventing the value limit on the use of request for quotations with a view to avoiding use of the more competitive methods of procurement, a prohibition that is essential to the objectives of the Model Law.

*For a discussion of the changes in conditions for use from the 1994 text, see Section B.4 below.*

## 2. Solicitation

*The relevant provision of the revised Model Law on solicitation:*

### **“Article 33. Solicitation in ... request for quotations ...**

(2) Where the procuring entity engages in procurement by means of request for quotations in accordance with article 28 (2) of this Law, it shall request quotations from as many suppliers or contractors as practicable, but from at least three.”

*Proposed text for the Guide:*

7. Paragraph (2) sets out rules of solicitation in the case of request for quotations. The objectives of the Model Law of fostering and encouraging participation and competition are applicable to procurement regardless of its value. Thus, the procuring entity is bound to request quotations from as many suppliers or contractors as practicable, but from at least three, without exception. This minimum requirement is present in the light of the type of the subject matter supposed to be procured by means of request for quotations — readily available goods or services that are not specially produced or provided to the particular description of the procuring entity and for which there is an established market (article 28 (2)). For this type of procurement, it should always be possible to request quotations from at least three suppliers or contractors that are capable of providing the subject matter

<sup>4</sup> The Working Group may wish to consider including a discussion of the use of tendering even where the subject matter of the procurement is not produced to the particular design of the procuring entity, and the use of performance or output-based specifications that refer to industry standards.

of the procurement. The use of electronic procurement also allows the procuring entity to reach a broader audience and ensure that a sufficient number of quotations is sought.

8. Enacting States may wish to provide guidance to ensure that the selection of participants in request-for-quotations procedures is not carried out in a way so as to restrict market access or to allow abuse of the procedures (examples might include the selection of two suppliers whose prices are known to be high, or two suppliers that are geographically remote, so as to direct the procurement towards a third, chosen supplier). The considerations raised as regards the manner of selection of participating suppliers in the context of the use of restricted tendering on the ground of article 28 (1) (b) are relevant here (see paragraphs ... above). In addition, procedures that require the comparison of historical offers and to ensure rotation among suppliers, where the same items may be procured occasionally, are useful. Oversight procedures should identify the winning suppliers under this method, so that repeat awards can be evaluated.

9. Electronic methods of requesting quotations may be particularly cost-effective for low-value procurement and ensuring also more transparent selection. The use of electronic catalogues as a source of quotations may in particular be considered to offer better opportunity for transparency in the selection of suppliers from which to request quotations, in that such selection can be evaluated against those suppliers offering relevant items in catalogues (see, also, the guidance on framework agreements under chapter VII for the repeated procurement of low-cost items).<sup>5</sup> Ensuring adequate transparency is a key issue, given that procurement under this method is not required to be preceded by a notice of the procurement (see, further, paragraph ... above).

10. The requirement to request quotations from at least three suppliers or contractors should not however be interpreted as invalidating the procurement where in response to request for quotations addressed to three or more suppliers only one or two quotations were received.

*For a discussion of the changes in solicitation from the 1994 text, see section B.4 below.*

### 3. Procedures

*The relevant provision of the revised Model Law on procedures:*

#### **“Article 45. Request for quotations**

(1) The procuring entity shall request quotations in accordance with the provisions of article 33 (2) of this Law. Each supplier or contractor from which a quotation is requested shall be informed whether any elements other than the charges for the subject matters of the procurement themselves, such as any applicable transportation and insurance charges, customs duties and taxes, are to be included in the price.

(2) Each supplier or contractor is permitted to give only one price quotation and is not permitted to change its quotation. No negotiations shall take place

---

<sup>5</sup> A/CN.9/668, para. 208.

between the procuring entity and a supplier or contractor with respect to a quotation presented by the supplier or contractor.

(3) The successful quotation shall be the lowest-priced quotation meeting the needs of the procuring entity as set out in the request for quotations.”

*Proposed text for the Guide:*

11. The article sets out procedures for request for quotations. In the light of the nature and low value of the subject matter to be procured by means of request for quotations, only minimum procedural requirements are included, which are designed to provide for the fair and equitable treatment of suppliers or contractors participating in the procurement. Overseeing the use of the method, using electronic tools where possible to amortise the costs of so doing in low-value procurement, can introduce transparency and safeguards against abuse in practice.

12. With respect to the requirement in paragraph (1) that suppliers from whom quotations are requested should be informed as to the charges to be included in the quotation, the procuring entity may wish to consider using recognized trade terms, in particular INCOTERMS.

*For a discussion of the changes in procedures from the 1994 text, see section B.4 immediately below.*

**4. Points regarding request for quotations proceedings proposed to be discussed in the Section of the Guide to Enactment addressing changes from the 1994 text of the Model Law**

*Conditions for use*

13. The request-for-quotations method in the revised text is based on article 21 of the 1994 Model Law. The wording of the latter article has been amended so as to allow the use of request for quotations for all types of standardized or common procurement that is not tailored by means of specifications or technical requirements. Use of the method under the revised text does not contain a requirement for external approval, in conformity with the decision of UNCITRAL not to require, as a general rule, in the revised Model Law the procuring entity to seek an approval of another body for steps to be taken by the procuring entity (for the guidance on this point, see paragraphs ... above). Paragraph (2) of the 1994 text has been deleted in the light of new article 12 setting rules concerning estimation of the value of procurement applicable to all procurement methods, not only request for quotations.

*Solicitation*

14. The provisions in the revised Model Law (article 33 (2)) are based on the first sentence of article 50 of the 1994 Model Law. The words “if possible” in the reference to the minimum three suppliers or contractors from which quotations should be requested have been deleted in the revised text since they were considered to raise the risk of abuse and subjectivity in selecting suppliers from which to solicit quotations. As explained in paragraph [7] above, in the light of the type of the subject matter supposed to be procured by means of request for quotations — off-the-shelf items — it should always be possible to request quotations from at least

three suppliers of contractors that are capable of providing the subject matter of the procurement.

*Procedures*

15. Article 45 is based on the remaining provisions of article 50 of the 1914 Model Law, with the addition of the phrase “as set out in the request for quotations” in the end of paragraph (3). The phrase has been added to ensure equal treatment of suppliers by requiring that information about the needs of the procuring entity that has been provided to participating suppliers at the outset of the procurement remains valid throughout the procurement proceedings and is the basis for the selection of the successful quotation.

**(A/CN.9/WG.I/WP.77/Add.6) (Original: English)****Note by the Secretariat on the revised Guide to Enactment to accompany the UNCITRAL Model Law on Public Procurement, submitted to the Working Group on Procurement at its twentieth session****ADDENDUM**

This addendum sets out a proposal for the Guide text to accompany related provisions of chapters II, IV and V of the UNCITRAL Model Law on Public Procurement on request for proposals without negotiation and request for proposals with consecutive negotiations.

**GUIDE TO ENACTMENT  
OF  
THE UNCITRAL MODEL LAW  
ON PUBLIC PROCUREMENT****Part II. Article-by-article commentary**

[for ease of reference, this addendum consolidates the proposed article-by-article commentary to various provisions of the Model Law regulating request for proposals without negotiation and request for proposals with consecutive negotiations]

...

**A. Proposed text for the Guide to Enactment of the revised Model Law addressing issues of request for proposals without negotiation****1. Conditions for use**

*The relevant provision of the revised Model Law on conditions for use:*

**“Article 28. Conditions for use of methods of procurement under chapter IV of this Law (... request for proposals without negotiation)**

(3) The procuring entity may engage in procurement by means of request for proposals without negotiation in accordance with article 46 of this Law where the procuring entity needs to consider the financial aspects of proposals separately and only after completion of examination and evaluation of quality and technical aspects of the proposals.”

*Proposed text for the Guide:*

1. Paragraph (3) provides for the conditions for use of request for proposals without negotiation, a procurement method that may be used where the procuring

entity (a) wishes to express its needs in a functional or output-based manner<sup>1</sup> and (b) needs to consider the financial aspects of proposals separately and only after completion of examination and evaluation of their quality and technical aspects. This approach is appropriate where the procuring entity does not wish to be influenced by the financial aspects of proposals when it examines and evaluates their quality and technical aspects, and the words “needs to” in the provisions are intended to convey that there is an objective and demonstrable need for the procuring entity to follow this sequential examination and evaluation procedure. These circumstances may arise, for example, where the procuring entity wishes to consider whether a particular technical solution will work, or to assess the quality of key personnel. Only if the technical proposal fully responds to the terms of reference in the request for proposals will the procuring entity continue to consider the price of the proposal concerned. The method is therefore suitable for procurement of items or services of a relatively standard nature, where all aspects of the proposals can be evaluated without resort to discussions, dialogue or negotiations with suppliers.

2. The procurement method covered by the paragraph is therefore not appropriate in procurement where price is the only award criterion or one of the main award criteria, or where a complete evaluation would not be possible without evaluating price and non-price criteria together.<sup>2</sup> In such circumstances, a tendering procurement method that focuses on the price, and which does not provide for a sequential examination and evaluation of quality and technical aspects and of financial aspects, would be appropriate. The procuring entity may find that a tendering-based procurement method is also more appropriate where it has many technical requirements. The method is also not appropriate where there is a need to negotiate on any aspects of proposals (be they quality, technical or financial) since the method, like tendering, does not allow for dialogue or negotiations (for the types of procurement in which dialogue or negotiations may be appropriate and necessary, see the guidance to request for proposals with dialogue and with consecutive negotiations, at [...] below).

3. In practical terms, the technical and quality proposals will be submitted in one envelope (or its electronic equivalent), and they will require manual evaluation by suitably qualified individuals. For those proposals that respond to the terms of reference, a second envelope (or electronic equivalent) containing the financial aspects of the proposal concerned is opened. The term “financial aspects” in this context means that the envelope will contain all the commercial aspects of the proposals that cannot be set out in the terms of reference (which might include

---

<sup>1</sup> The guidance to articles 26 and 27 (on choice of procurement methods) will explain that procurement through request for proposals methods can be distinguished from tendering proceedings in that the needs of the procuring entity in request for proposals methods are set out in terms of reference that, as a general rule, focus on the functional aspects of what is to be procured. This type of presentation of the procuring entity’s needs can also be described as an output-based description. In tendering proceedings, on the other hand, the description of the needs of the procuring entity includes technical specifications and is based on a single, defined technical solution (also termed an input-based description).

<sup>2</sup> The Working Group may wish to give examples of procurement of this type.

warranties, guarantees, insurance and so forth) as well as the final price.<sup>3</sup> These aspects may be susceptible to automated evaluation.

4. [In tendering proceedings, the procuring entity may seek clarification of tenders in order to assist in the examination and evaluation procedure and envisages that minor deviations that do not affect the substance of the tender can be accepted (see article 42(1) and (2)). It may be considered that the need for such a facility may be lesser in the context of request for proposals proceedings as proposals respond to terms of reference rather than to technical specifications. Nonetheless, enacting States may wish to include provisions equivalent to those in article 42, with the accompanying safeguards.]<sup>4</sup>

5. Under the Model Law, request for proposals without negotiation is available, subject to its conditions for use, for all types of procurement, in conformity with the UNCITRAL decision not to base the selection of procurement method on whether it is goods, works or services that are procured but rather in order to accommodate the circumstances of the given procurement and to maximize competition to the extent practicable (article 27 (2) of the Model Law; for the relevant guidance, see paragraphs ... above). Enacting States should be aware nevertheless that some multilateral development banks recommend, where procurement methods sharing the features of request for proposals without negotiation as provided for in the revised Model Law are to be used, that they be used for the procurement of well-defined services that are neither complex nor costly, such as the development of curricula, that are usually outsourced because procuring entities generally lack the internal capacity to undertake this type of work. Some multilateral development banks may not authorize the use of this method in other circumstances, at least as regards projects financed by them.

6. The procedures for the use of request for proposals without negotiation, including the submission of the envelopes as described above, are set out in article 46; they mirror the transparency and competition mechanisms of open tendering, save that (as further explained below), the procuring entity may engage in direct solicitation in defined circumstances. For further guidance on those procedural aspects, see paragraphs [...] below.

*For a discussion of the changes in conditions for use from the 1994 text, see section A.4 below.*

## 2. Solicitation

*The relevant provision of the revised Model Law on solicitation:*

### **“Article 34. Solicitation in request for proposals proceedings**

(1) An invitation to participate in the request for proposals proceedings shall be published in accordance with article 32 (1) and (2), except where:

<sup>3</sup> During expert consultations, it was suggested that the term “financial aspects” used in the text might be inaccurate in the light of the experts’ understanding of the scope of the items concerned; and that a suitable alternative term might be “price-related aspects”. The Working Group may wish to consider this suggestion.

<sup>4</sup> The Working Group may wish to consider whether such a provision could alternatively be included in article 46 itself and in other appropriate procurement methods (or as a general provision, in which case it may also be applied to pre-qualification and qualification).

(a) The procuring entity engages in pre-qualification proceedings in accordance with article 17 of this Law or in pre-selection proceedings in accordance with article 48 (3) of this Law; or

(b) The procuring entity engages in direct solicitation under the conditions set out in paragraph (2) of this article; or

(c) The procuring entity decides not to cause the invitation to be published in accordance with article 32 (2) of this Law in the circumstances referred to in article 32 (4) of this Law.

(2) The procuring entity may engage in direct solicitation in request for proposals proceedings if:

(a) The subject matter to be procured is available only from a limited number of suppliers or contractors, provided that the procuring entity solicits proposals from all those suppliers or contractors; or

(b) The time and cost required to examine and evaluate a large number of proposals would be disproportionate to the value of the subject matter to be procured, provided that the procuring entity solicits proposals from a sufficient number of suppliers or contractors to ensure effective competition; or

(c) The procurement involves classified information, provided that the procuring entity solicits proposals from a sufficient number of suppliers or contractors to ensure effective competition.

(3) The procuring entity shall include in the record required under article 24 of this Law a statement of the reasons and circumstances upon which it relied to justify the use of direct solicitation in request for proposals proceedings.

(4) The procuring entity shall cause a notice of the procurement to be published in accordance with the requirements set out in article 33 (5) where it engages in direct solicitation in request for proposals proceedings.”

*Proposed text for the Guide:*

1. The article regulates solicitation in request for proposals proceedings. The Model Law provides for three types of request for proposals proceedings: request for proposals without negotiation; request for proposals with dialogue; and request for proposals with consecutive negotiations. The article applies to all three types of request for proposals proceedings. It provides for various solicitation options that the procuring entity may choose, depending on the circumstances of the given procurement.

2. In line with the objectives of the Model Law of fostering and encouraging participation in procurement proceedings by suppliers and contractors and promoting competition among them, paragraph (1) of this article sets out a requirement for open international solicitation as the default rule. The provisions contained in that paragraph are aimed at ensuring that as many suppliers and contractors as possible are made aware of the procurement proceedings and are able to express their interest in participating. As is also the case in tendering proceedings, this objective is fulfilled by providing that an invitation to participate in the request for proposals proceedings should be publicized widely as prescribed in the paragraph.

3. Where request for proposals proceedings are preceded by pre-qualification proceedings, solicitation is subject to separate regulation under article 17, the provisions of which also require international solicitation in the same manner as is required in article 32. Further guidance is set out in the commentary to the guidance to those articles. After the pre-qualification proceedings have been completed, the request for proposals must be provided to all pre-qualified suppliers. Similarly, when pre-selection proceedings are used in request for proposals with dialogue proceedings under article 48 (3), special rules apply: the request for proposals is to be preceded by an open invitation to pre-selection, and following the pre-selection proceedings, the request for proposals is issued to all pre-selected suppliers or contractors. As is the case with pre-qualification, wide international outreach, except in the cases referred to in article 32 (4), is ensured in pre-selection proceedings through the application of article 17 (2).

4. As is also the case in tendering proceedings, there are exceptions to the default rule requiring international solicitation. They are contained in paragraphs (1) (b) and (c) of the article. The exceptions set out in paragraph (1) (c) mirror those contained in article 32: that is, for domestic and low-value procurement as described in article 32 (4). Given the similarity between these provisions, the considerations raised in this Guide as regards article 32 should be taken into account in enacting this paragraph (see paragraphs ... above). The exception set out in paragraph (1) (b) is not found in article 32 since it is relevant only in the request for proposals proceedings where there may be choice between open and direct solicitation.

5. Recognizing that in certain instances, the requirement of open solicitation might be unwarranted or might defeat the objectives of economy and efficiency, paragraph (2) of this article sets out those cases where the procuring entity may engage in direct solicitation in request for proposals proceedings (without pre-qualification or pre-selection). Subparagraphs (a) and (b) generally track the circumstances that may justify direct solicitation in restricted tendering (under article 28 (1)), and the considerations raised in this Guide as regards article 28 (1) are thus relevant in the context of paragraphs (2) (a) and (b). (For the guidance on article 28 (1), see paragraphs ... above.) Subparagraph (c) sets out a distinct ground that may justify recourse to direct solicitation in request for proposals proceedings — procurement involving classified information. In such cases, the procuring entity must solicit proposals from a sufficient number of suppliers or contractors to ensure effective competition.

6. In deciding whether or not to engage in direct solicitation, the procuring entity should give consideration as to whether it is authorized to reject any unsolicited proposals or as to the manner in which it would consider any such proposals. The discussions on this point in this Guide as regards article 33 are also relevant in this context (see paragraphs ... above).

7. Because direct solicitation impedes the objectives of the Model Law of fostering and encouraging open participation in procurement proceedings by suppliers and contractors and promoting competition among them, paragraphs (3) and (4) are included to provide for more transparency and accountability when direct solicitation is used. Paragraph (3) requires the procuring entity including in the record of procurement proceedings a statement of the reasons and circumstances upon which it relied to justify the use of direct solicitation in request for proposals proceedings. Paragraph (4) requires the procuring entity, where it engages in direct

solicitation in request for proposals proceedings, to cause a notice of the procurement to be published in accordance with the requirements set out in article 33 (5) (unless classified information would thereby be compromised) (for the guidance on article 33 (5), see paragraphs ... above). Both measures intend to facilitate a possible challenge by affected suppliers or contractors to the use and manner of use by the procuring entity of direct as opposed to open solicitation.

*For a discussion of the changes as regards solicitation from the 1994 text, see section A.4 below.*

### 3. Procedures

*The relevant provision of the revised Model Law on procedures:*

#### **“Article 46. Request for proposals without negotiation**

(1) The procuring entity shall solicit proposals by causing an invitation to participate in the request for proposals without negotiation proceedings to be published in accordance with article 34 (1) of this Law, unless an exception provided for in that article applies.

(2) The invitation shall include:

(a) The name and address of the procuring entity;

(b) A description of the subject matter of the procurement, and the desired or required time and location for the provision of such subject matter;

(c) The terms and conditions of the procurement contract, to the extent they are already known to the procuring entity, and the contract form, if any, to be signed by the parties;

(d) The criteria and procedures to be used for ascertaining the qualifications of suppliers or contractors and any documentary evidence or other information that must be presented by suppliers or contractors to demonstrate their qualifications, in conformity with article 9 of this Law;

(e) The criteria and procedures for opening the proposals and for examining and evaluating the proposals in accordance with articles 10 and 11 of this Law, including the minimum requirements with respect to technical and quality characteristics that proposals must meet in order to be considered responsive in accordance with article 10 of this Law, and a statement that proposals that fail to meet those requirements will be rejected as non-responsive;

(f) A declaration pursuant to article 8 of this Law;

(g) The means of obtaining the request for proposals and the place where it may be obtained;

(h) The price, if any, charged by the procuring entity for the request for proposals;

(i) If a price is charged for the request for proposals, the means and currency of payment for the request for proposals;

(j) The language or languages in which the requests for proposals are available;

(k) The manner, place and deadline for presenting proposals.

(3) The procuring entity shall issue the request for proposals:

(a) Where an invitation to participate in the request for proposals without negotiation proceedings has been published in accordance with the provisions of article 34 (1) of this Law, to each supplier or contractor that responds to the invitation in accordance with the procedures and requirements specified therein;

(b) In the case of pre-qualification, to each supplier or contractor pre-qualified in accordance with article 17 of this Law;

(c) In the case of direct solicitation under article 34 (2) of this Law, to each supplier or contractor selected by the procuring entity; and that pays the price, if any, charged for the request for proposals. The price that the procuring entity may charge for the request for proposals shall reflect only the cost of providing it to suppliers or contractors.

(4) The request for proposals shall include, in addition to the information referred to in paragraphs (2) (a) to (e) and (k) of this article, the following information:

(a) Instructions for preparing and presenting proposals, including instructions to suppliers or contractors to present simultaneously to the procuring entity proposals in two envelopes: one envelope containing the technical and quality characteristics of the proposal and the other envelope containing the financial aspects of the proposal;

(b) If suppliers or contractors are permitted to present proposals for only a portion of the subject matter of the procurement, a description of the portion or portions for which proposals may be presented;

(c) The currency or currencies in which the proposal price is to be formulated or expressed, and the currency that will be used for the purpose of evaluating proposals, and either the exchange rate that will be used for the conversion of proposal prices into that currency or a statement that the rate published by a specified financial institution prevailing on a specified date will be used;

(d) The manner in which the proposal price is to be formulated or expressed, including a statement as to whether the price is to cover elements other than the cost of the subject matter of the procurement, such as reimbursement for transportation, lodging, insurance, use of equipment, duties or taxes;

(e) The means by which, pursuant to article 15 of this Law, suppliers or contractors may seek clarifications of the request for proposals, and a statement as to whether the procuring entity intends, at this stage, to convene a meeting of suppliers or contractors;

(f) References to this Law, the procurement regulations and other laws and regulations directly pertinent to the procurement proceedings, including

those applicable to procurement involving classified information, and the place where these laws and regulations may be found;

(g) The name, functional title and address of one or more officers or employees of the procuring entity who are authorized to communicate directly with and to receive communications directly from suppliers or contractors in connection with the procurement proceedings, without the intervention of an intermediary;

(h) Notice of the right provided under article 63 of this Law to challenge or appeal decisions or actions taken by the procuring entity that are allegedly not in compliance with the provisions of this Law, together with information about the duration of the applicable standstill period and, if none will apply, a statement to that effect and reasons therefor;

(i) Any formalities that will be required once the proposal has been accepted for a procurement contract to enter into force, including, where applicable, the execution of a written procurement contract, and approval by another authority and the estimated period of time following dispatch of the notice of acceptance that will be required to obtain the approval;

(j) Any other requirements that may be established by the procuring entity in conformity with this Law and the procurement regulations relating to the preparation and presentation of proposals and to the procurement proceedings.

(5) Before opening the envelopes containing the financial aspects of the proposals, the procuring entity shall examine and evaluate the technical and quality characteristics of proposals in accordance with the criteria and procedures specified in the request for proposals.

(6) The results of the examination and evaluation of the technical and quality characteristics of the proposals shall be immediately included in the record of the procurement proceedings.

(7) The proposals whose technical and quality characteristics fail to meet the relevant minimum requirements shall be considered to be non-responsive and shall be rejected on that ground. A notice of rejection and the reasons for the rejection, together with the unopened envelope containing the financial aspects of the proposal, shall be promptly dispatched to each respective supplier or contractor whose proposal was rejected.

(8) The proposals whose technical and quality characteristics meet or exceed the relevant minimum requirements shall be considered to be responsive. The procuring entity shall promptly communicate to each supplier or contractor presenting such a proposal the score of the technical and quality characteristics of its respective proposal. The procuring entity shall invite all such suppliers or contractors to the opening of the envelopes containing the financial aspects of their proposals.

(9) The score of the technical and quality characteristics of each responsive proposal and the corresponding financial aspect of that proposal shall be read out in the presence of the suppliers or contractors invited in accordance with

paragraph (8) of this article to the opening of the envelopes containing the financial aspects of the proposals.

(10) The procuring entity shall compare the financial aspects of the responsive proposals and on that basis identify the successful proposal in accordance with the criteria and the procedure set out in the request for proposals. The successful proposal shall be the proposal with the best combined evaluation in terms of the criteria other than price specified in the request for proposals and the price.”

*Proposed text for the Guide:*

1. The article regulates the procedures for procurement using request for proposals without negotiations. Paragraph (1), by cross-referring to article 34, reiterates the default rule contained in article 34 (1) of the Model Law that an invitation to participate in the proceedings must, as a general rule, be publicized as widely as possible, so as to ensure wide participation and competition. Solicitation may be preceded by pre-qualification. The exceptions to the open solicitation rule and the guidance on solicitation procedures following pre-qualification are provided for in article 34. (For the guidance to article 34, see paragraphs ... above.)
2. When open solicitation without pre-qualification is involved, an invitation to participate in the request for proposals without negotiation proceedings is issued, which must include the minimum information listed in paragraph (2). Providing that minimum information is designed to assist suppliers or contractors in determining whether they are interested and eligible to participate and, if so, how they can participate. The relevant requirements are similar to those applicable to an invitation to tender (article 36) and an invitation to participate in request for proposals with dialogue proceedings (article 48 (2)). They contain the required minimum and do not preclude the procuring entity from including additional information that it considers appropriate. The procuring entity should take into account that it is usual practice to keep the invitation brief and include therein the most essential information about procurement, which is most pertinent to the initial stage of the procurement proceedings. All other information about the procurement, including elaboration of the information contained in the invitation, is included in the request for proposals (see paragraph (4) of this article). This approach helps to avoid repetition, possible inconsistencies and confusion in the content of the documents issued by the procuring entity to suppliers or contractors. Nonetheless, where the procuring entity uses electronic means of advertisement and communication, it is possible to include in the invitation a web link to the terms of the request for proposals itself: this approach is proving beneficial in terms of both efficiency and transparency.
3. The procuring entity may omit information about the currency of payment and on applicable languages referred to in subparagraphs (i) and (j) in domestic procurement, if it would be unnecessary in the circumstances; however, an indication of the language or languages may still be important in some multilingual countries even in the context of domestic procurement. Subparagraph (e) refers to the minimum requirements with respect to technical and quality characteristics that proposals must meet in order to be considered responsive. This provision covers both the threshold that is to be established for rejecting proposals and assigning scores to proposals that meet or exceed the proposals.

4. Paragraph (3) specifies the group of suppliers or contractors to which the request for proposals is to be issued. Depending on the circumstances of the given procurement, such suppliers may comprise the entire group of suppliers or contractors that respond to the invitation in accordance with the procedures and requirements specified therein; or if pre-qualification has been undertaken, only to those that were pre-qualified; or in the case of direct solicitation, only to those that are directly invited. The provisions contain a standard clause, found also in other provisions of the Model Law in similar context, that the price that may be charged for the request for proposals may reflect only the cost of providing the request for proposals to suppliers or contractors. (See the guidance to article [...] for a further discussion of this limitation.)

5. Paragraph (4) contains a list of the minimum information that should be included in request for proposals in order to assist the suppliers or contractors in preparing their proposals and to enable the procuring entity to compare the proposals on an equal basis. The list is largely parallel in level of detail and in substance to the provisions on the required contents of solicitation documents in tendering proceedings (article 38) and contents of request for proposals in request for proposals with dialogue proceedings (article 48 (5)). The differences reflect the procedural specifics of this procurement method, and are aimed at ensuring that the financial aspects of proposals are presented, although simultaneously, separately from quality and technical aspects of the proposals. As explained above, the procuring entity will not have access to the financial aspects of proposals until after it has evaluated their technical and quality aspects. The procuring entity may omit information about currency of payment referred to in subparagraph (c) in domestic procurement, if it would be unnecessary in the circumstances.

6. Paragraphs (5) to (10) of the article regulate the sequential examination and evaluation procedure in this procurement method. They ensure that the procuring entity will not be influenced by the financial aspects of proposals when it evaluates quality and technical aspects of proposals and assigns scores to suppliers or contractors as a result of that evaluation. A number of provisions in those paragraphs are aimed at ensuring transparency and integrity in the process. Paragraphs (6) to (8), for example, contain requirements that the results of the evaluation of technical and quality aspects of the proposals are to be promptly reflected in the record of procurement proceedings and communicated to all suppliers or contractors that presented proposals. Special rules are designed for suppliers and contractors whose quality and technical aspects of proposals were rejected: they are to receive promptly not only information about the fact of rejection but also the reasons therefor, and the unopened envelopes containing financial aspects of their proposals are returned to them. These provisions are essential for the timely debriefing of, and effective challenge, by aggrieved suppliers. (For a fuller discussion of the benefits and procedures for debriefing, see [...].)

7. Paragraphs (8) and (9) allow the presence at the opening of the second envelopes (those containing the financial aspects of proposals) of suppliers or contractors whose proposals as regards quality and technical aspects of proposals met or exceeded the minimum requirements. They can thus verify the accuracy of the information announced by the procuring entity at the opening of second envelopes that is relevant to them, such as on the scores assigned and the financial

aspects of their proposals, and can observe whether the successful proposal is identified in accordance with the criteria and the procedure set out in the request for proposals.

8. The Model Law regulates complex scenarios involving the separate evaluation of all aspects of proposals and combining the results of those evaluations in order to determine the successful proposal. Paragraph (10) therefore defines the successful proposal in this procurement method as the proposal with the best combined evaluation in terms of the criteria other than price specified in the request for proposals and the price.<sup>5</sup> Enacting States should be aware however that in the procurement of simpler subject matter, the procuring entity may select the successful proposal on the basis of price alone. This approach may be appropriate in situations where the procuring entity does not need to evaluate quality and technical aspects of proposals and assign any scores but rather establishes a threshold by which to measure quality and technical aspects of proposals at such a high level that all the suppliers or contractors whose proposals attain a rating at or above the threshold can in all probability perform the procurement contract at a more or less equivalent level of competence. There should also be no need in such cases to evaluate any financial aspects of proposals other than price. Such procedures are compatible with the Model Law on the condition that the procedures and all criteria involved are set out in the solicitation documents and are applied accordingly.

*For a discussion of the changes in the procedures from the 1994 text, see section A.4 immediately below.*

**4. Points regarding request for proposals without negotiation proposed to be discussed in the Section of the Guide to Enactment addressing changes from the 1994 text of the Model Law**

*Conditions for use*

9. Request for proposals without negotiation is a new procurement method that draws its features from the selection procedure without negotiation (article 42) of the 1994 Model Law. The 1994 Model Law provided for the selection procedure without negotiation in the context of procurement of services only. Under the revised Model Law, request for proposals without negotiation is not treated as a procurement method appropriate only for procurement of services, in conformity with the UNCITRAL decision not to base the selection of procurement method on whether it is goods, works or services that are procured but rather in order to accommodate the circumstances of the given procurement and to maximize competition to the extent practicable (article 27 (2) of the Model Law; for the relevant guidance, see paragraphs ... above).

[Details as regards solicitation and procedures to be added at a later date]

---

<sup>5</sup> During expert consultations on the guidance to this article, it was suggested that the Working Group may wish to use the term “most advantageous proposal” for consistency with the term used in tendering, as this term (unlike the previous term “lowest evaluated tender”) no longer has an implicit emphasis on price.

## **B. Proposed text for the Guide to Enactment of the revised Model Law addressing issues of request for proposals with consecutive negotiations**

### **1. Conditions for use**

*The relevant provision of the revised Model Law on conditions for use:*

**“Article 29. Conditions for use of methods of procurement under chapter V of this Law (... request for proposals with consecutive negotiations, ...)**

(3) A procuring entity may engage in procurement by means of request for proposals with consecutive negotiations in accordance with article 49 of this Law where the procuring entity needs to consider the financial aspects of proposals separately and only after completion of examination and evaluation of quality and technical aspects of the proposals, and it assesses that consecutive negotiations with suppliers or contractors are needed in order to ensure that the financial terms and conditions of the procurement contract are acceptable to the procuring entity.”

*Proposed text for the Guide:*

1. Paragraph (3) sets out conditions for use of request for proposals with consecutive negotiations. The conditions for use and procedures of this method resemble those of the request for proposals without negotiation referred to in article 28 (3) of the Model Law. Like the request for proposals without negotiation procedure, it has proved to be beneficial where quality and technical characteristics may be the main priority and where the procuring entity needs to consider the financial aspects of proposals separately and only after completion of examination and evaluation of the quality and technical aspects of the proposals (i.e. so that the procuring entity is not influenced by the financial aspects when it examines and evaluates quality and technical aspects of proposals). The words “needs to” in the provisions intend to convey that there is an objective and demonstrable need for the procuring entity to follow this sequential examination and evaluation procedure. Thus, like the request for proposals without negotiation, this procurement method is appropriate for use only where the examination and evaluation of quality and technical aspects of the proposals separately from consideration of financial aspects of proposals is possible and needed.

2. The difference of this procurement method from the request for proposals without negotiation is in the need to hold negotiations on the financial aspects of the proposals, reflecting that it is appropriate for the procurement of goods or services that are designed for the procuring entity, rather than for procurement of subject matter of a fairly standard nature. The request for proposals with consecutive negotiations procedure is thus appropriate for use in the procurement of more complex subject matter, such as intellectual services, where holding negotiations on commercial or financial aspects of proposals is indispensable — there may be so many variables in these aspects of proposals that they cannot be all foreseen and specified at the outset of the procurement and must be refined and agreed upon during negotiations.

3. All stages in this procurement method preceding the stage of negotiations are the same as in the request for proposals without negotiation: the procuring entity sets a threshold on the basis of the quality and technical aspects of the proposals, and then ranks those proposals that are rated at and above the threshold, ensuring that the suppliers or contractors with whom it will negotiate are capable of providing the required subject matter of the procurement. The procuring entity then holds negotiations on financial aspects of the proposals first with the supplier or contractor that was ranked highest; if negotiations with that supplier are terminated, the procuring entity holds negotiations with the next highest-ranked supplier and so on, to the extent necessary, until it concludes a procurement contract with one of them. These negotiations are aimed at ensuring that the procuring entity obtains fair and reasonable financial proposals. The format of consecutive, as opposed to concurrent or simultaneous, negotiations has proved to be the most appropriate in the context of this procurement method in the light of the scope of negotiations covering exclusively financial or commercial aspects of the proposals. When the need exists to negotiate on other aspects of proposals, this procurement method cannot be used. (For the guidance on article 49 regulating procedural aspects of this procurement method, see paragraphs ... below).

4. Request for proposals with consecutive negotiations is not reserved exclusively for the procurement of services. This approach is in conformity with the UNCITRAL decision not to base the selection of procurement method on whether it is goods, works or services that are procured but rather in order to accommodate the circumstances of the given procurement and to maximize competition to the extent practicable (article 27 (2)) (for the relevant guidance, see paragraphs ... above). Enacting States should be aware, nevertheless, that some multilateral development banks recommend the use of the procurement method with features of the request for proposals with consecutive negotiations as provided for in the Model Law for the procurement of advisory services (i.e. those with an intellectual output). The method has traditionally been widely used in such type of procurement. Such banks may not authorize the use of this method in other circumstances, at least as regards projects financed by them.

*For a discussion of the changes in conditions for use from the 1994 text, see section B.4 below.*

## **2. Solicitation**

[Please see in the guidance on RfP without negotiation]

## **3. Procedures**

*The relevant provision of the revised Model Law on procedures:*

### **“Article 49. Request for proposals with consecutive negotiations**

(1) The provisions of article 46 (1)-(7) of this Law shall apply mutatis mutandis to procurement conducted by means of request for proposals with consecutive negotiations, except to the extent those provisions are derogated from in this article.

(2) The proposals whose technical and quality characteristics meet or exceed the relevant minimum requirements shall be considered to be responsive.

The procuring entity shall rank each responsive proposal in accordance with the criteria and procedure for evaluating proposals as set out in the request for proposals, and shall:

(a) Promptly communicate to each supplier or contractor presenting the responsive proposal the score of the technical and quality characteristics of its respective proposal and its ranking;

(b) Invite the supplier or contractor that has attained the best ranking in accordance with those criteria and procedure for negotiations on the financial aspects of its proposal; and

(c) Inform other suppliers or contractors that presented responsive proposals that they may be considered for negotiation if the negotiations with the suppliers or contractors with a better ranking do not result in a procurement contract.

(3) If it becomes apparent to the procuring entity that the negotiations with the supplier or contractor invited pursuant to paragraph (2) (b) of this article will not result in a procurement contract, the procuring entity shall inform that supplier or contractor that it is terminating the negotiations.

(4) The procuring entity shall then invite for negotiations the supplier or contractor that attained the second best ranking; if the negotiations with that supplier or contractor do not result in a procurement contract, the procuring entity shall invite the other suppliers or contractors still participating in the procurement proceedings for negotiations on the basis of their ranking until it arrives at a procurement contract or rejects all remaining proposals.

(5) During the course of the negotiations, the procuring entity shall not modify the subject matter of the procurement, nor any qualification, examination or evaluation criterion, including any established minimum requirements, nor any elements of the description of the subject matter of the procurement or term or condition of the procurement contract other than financial aspects of proposals that are subject to the negotiations as notified in the request for proposals.

(6) The procuring entity may not reopen negotiations with any supplier or contractor with which it has terminated negotiations.”

*Proposed text for the Guide:*

1. The article regulates request for proposals with consecutive negotiations procedures. All stages in this procurement method preceding the stage of negotiations are the same as in request for proposals without negotiation. Paragraph (1) therefore makes reference to the applicable provisions of article 46. The guidance to those provisions therefore applies also to this article (see paragraphs ... above).<sup>6</sup>

2. Paragraphs (2) to (6) regulate the distinct procedures of this procurement method. Paragraph (2) addresses issues of ranking and the invitation to consecutive

---

<sup>6</sup> See, also, footnote 4 above as regards the use of a clarification procedure in this procurement method.

negotiations. The reference in paragraph (2) (b) to “financial aspects of proposals”<sup>7</sup> intends to exclude any quality, technical and other aspects of proposals that have been considered as part of the examination and evaluation of quality and technical characteristics of proposals.

3. Paragraphs (3) and (6) refer to the notion of “termination of negotiations”. This notion means the rejection of a supplier’s final financial proposal and the consequent exclusion of that supplier from further participation in the procurement proceedings. Thus, no procurement contract can be awarded to the supplier(s) with which the negotiations have been terminated as provided for in paragraphs (3) and (4). This feature may be considered rigid and it may be considered to defeat the efficacy of the procedure. Only at the end of a process of negotiation with all suppliers may the procuring entity know which proposal in fact constitutes the best offer; that offer however may have been rejected as a result of the termination of negotiation with the supplier or contractor submitting it. In addition, the procedure does not necessarily ensure a strong bargaining position on the part of the procuring entity since the highest-ranked supplier, knowing its preferred status, may have little incentives to negotiate, particularly as regards price. The benefit of leverage that may be present in concurrent negotiations is not present here.

4. UNCITRAL has nevertheless decided to include this feature of this procurement method in order to emphasize competition on quality and technical aspects of proposals. When the procurement method is used in appropriate circumstances, this distinct feature of the procurement method may impose discipline on both suppliers and procuring entities to negotiate in good faith. The first-ranking supplier faces a risk that negotiations with the procuring entity may be terminated at any time, leading to the permanent exclusion of the supplier from the procurement proceedings. That supplier may also consider that negotiations with the lower-ranked suppliers are more likely to succeed since such suppliers will have an incentive to improve their position to win, and it is in the interest of the procuring entity to have the procurement contract in the end of the process. Thus the highest-ranked supplier will be under some pressure to negotiate while the procuring entity, facing the risk of rejecting the best technical proposal, will exercise restraint in putting an excessive focus on the financial aspects of proposals at the expense of quality and technical considerations. Fixing a period for the negotiations in the solicitation documents may be considered another effective discipline measure on both sides in negotiations.

5. Whether the procuring entity is willing to compromise on quality and technical considerations by terminating negotiation with a better-ranked supplier and beginning negotiations with the next ranked supplier will very much depend on the circumstances of procurement, in particular the results of the examination and evaluation of the quality and technical aspects of proposals. The extent of the gap between the proposals of various suppliers may vary widely, and the procuring entity’s strategies in negotiations must be adjusted accordingly. The procuring entity can always cancel the procurement if it faces unacceptable proposals.

---

<sup>7</sup> See footnote 3 above, as regards the use of this term.

**4. Points regarding request for proposals with consecutive negotiations proposed to be discussed in the Section of the Guide to Enactment addressing changes from the 1994 text of the Model Law**

*Conditions for use*

1. Request for proposals with consecutive negotiations is a procurement method that draws its features from the selection procedure with consecutive negotiations of the 1994 Model Law (article 44). Unlike its equivalent in the 1994 text, the procurement method in the revised text is not reserved exclusively for procurement of services. This approach is in conformity with the UNCITRAL decision not to base the selection of procurement method on whether it is goods, works or services that are procured but rather in order to accommodate the circumstances of the given procurement and to maximize competition to the extent practicable (article 27 (2)) (for the relevant guidance, see paragraphs ... above).

[Details as regards solicitation and procedures to be added at a later date]

(A/CN.9/WG.I/WP.77/Add.7) (Original: English)

**Note by the Secretariat on the revised Guide to Enactment to accompany the UNCITRAL Model Law on Public Procurement, submitted to the Working Group on Procurement at its twentieth session**

**ADDENDUM**

This addendum sets out a proposal for the Guide text to accompany the related provisions of chapters II and V of the UNCITRAL Model Law on Public Procurement on two-stage tendering.

**GUIDE TO ENACTMENT  
OF  
THE UNCITRAL MODEL LAW ON PUBLIC  
PROCUREMENT**

**Part II. Article-by-article commentary**

[for ease of reference, this addendum consolidates the proposed article-by-article commentary to various provisions of the Model Law regulating two-stage tendering]

...

**Proposed text for the Guide to Enactment of the revised Model Law addressing issues of two-stage tendering**

**1. Conditions for use**

*The relevant provision of the revised Model Law on conditions for use:*

**“Article 29. Conditions for use of methods of procurement under chapter V of this Law (two-stage tendering, request for proposals with dialogue, request for proposals with consecutive negotiations, competitive negotiations and single-source procurement)**

(1) A procuring entity may engage in procurement by means of two-stage tendering in accordance with article 47 of this Law where:

(a) The procuring entity assesses that discussions with suppliers or contractors are needed to refine aspects of the description of the subject matter of the procurement and to formulate them with the precision required under article 10 of this Law<sup>1</sup> and in order to allow the procuring entity to obtain the most satisfactory solution to its procurement needs; or

---

<sup>1</sup> The Working Group may wish to correct an inaccuracy in this condition for use identified during expert consultations on the draft guidance to this procurement method. The procedures for the method in article 47 make it clear that discussions with suppliers or contractors are optional, and need not be held, contrary to what is stated in article 29 (1). The need is, in reality, to refine certain technical aspects of the description — a step that can be carried out without discussions

(b) Open tendering was engaged in but no tenders were presented or the procurement was cancelled by the procuring entity pursuant to article 18 (1) of this Law and where, in the judgement of the procuring entity, engaging in new open tendering proceedings or a procurement method under chapter IV of this Law would be unlikely to result in a procurement contract.”

*Proposed text for the Guide:*

1. Paragraph (1) of the article provides for conditions for use of two-stage tendering. The rationale behind the two-stage procedure used in this method of procurement is to combine two elements: first, to allow the procuring entity, through the examination of the technical aspects of tenders and optional discussions on them, to refine and finalize the terms and conditions of the procurement that the procuring entity may not have been able to formulate adequately at the outset of the procurement. The second is to ensure the high degree of objectivity and competition provided by the procedures for open tendering proceedings under chapter III that will apply to the selection of the successful tender under two-stage tendering proceedings.

2. UNCITRAL acknowledges that the method has stood the test of time and is successfully used for procurement, for example, of high-technology items, such as large passenger aircraft, information or communication technology systems, technical equipment and other infrastructure procurement (including turnkey contracts, large complex facilities or construction of a specialized nature). In such procurement, it may be undesirable or impractical to prepare a complete description of the procurement setting out all the technical or quality aspects (including technical specifications) at the outset. At that stage, the procuring entity may be able to formulate draft technical specifications at some level of detail, or may express its requirements in terms of output or performance. The aim of the procedure is that initial tenders responding to the description in the solicitation documents should allow the procuring entity to refine the description of the technical and quality aspects so that, at the second stage, the suppliers or contractors present their final tenders against a single technical solution. That single technical solution is then set out in the refined statement of technical and quality aspects forming part of the request to present final tenders. Thus the procuring entity remains responsible for the design of the technical solution throughout the procedure.<sup>2</sup>

---

if the initial tenders address the aspects of which the procuring entity is unsure at the outset. An appropriate amendment to the text could read as follows: “(a) The procuring entity assesses that there is a need for a stage in the process to refine the technical and quality aspects of the subject matter of the procurement (which may include discussions with suppliers or contractors) in order for the procuring entity to formulate them in accordance with the precision required under article 10, and so as to allow the procuring entity to obtain the most satisfactory solution to its needs”. A consequential amendment to article 10 to refer to “technical and quality aspects” rather than “technical and quality characteristics” of the subject matter will be made, to ensure that there is sufficient clarity regarding the precision required to distinguish tendering procurement methods from those involving requests for proposals. The difference between these types of procurement is an issue that will be discussed in detail in the guidance to articles 26 and 27 on the choice of procurement method.

<sup>2</sup> The commentary to articles 26 and 27 will explain that in request-for-proposals proceedings, the suppliers make proposals as to how to meet the needs of the procuring entity, and so it is the suppliers that are responsible for the technical solution. It will also discuss the options available

3. As a consequence of the objectives of the procedure, the discussions that may be held in this procurement method with suppliers or contractors will not cover the proposed tender price. They may cover other financial aspects of the tenders only to the extent that such aspects form part of the description of the requirements of the procuring entity as set out in the solicitation documents. All price and price-related items that are not part of discussions are then submitted as part of the final tenders. This feature of this procurement method (as well as the absence of bargaining at any stage of the proceedings) is a further way in which this method differs from other methods available under chapter V.<sup>3</sup>

4. The flexibility and potential benefits described above are not risk-free. In particular, the procuring entity may tailor the final terms and conditions of the procurement to one particular supplier (regardless of whether discussions are held or not, though it should be acknowledged that this risk is also present in open tendering proceedings, particularly where informal market consultations precede the procurement). The transparency provisions applicable to all tendering proceedings should mitigate the risks of distorting the procurement to favour a particular supplier. The procurement system should also require the procurement planning stage to be documented and recorded.

5. This method is a structured one. The rules of open tendering regulate the solicitation procedure and the selection of the successful tender in two-stage tendering (see articles 32 and 47 of the Model Law and the guidance to them in paragraphs [...] below).

6. Subparagraph (a) deals with the procurement of technically sophisticated and complex items. The need for use of the procurement method in these circumstances may become clear at the procurement planning stage: that is, in situations in which it is evident that obtaining best value for money is unlikely if the procuring entity draws up terms and conditions of the procurement without examining initial tenders. Those initial tenders will propose technical solutions as to the exact capabilities and possible variations of what is available in the market. After its examination of the initial tenders, the procuring entity may decide that proposed solutions alone are not adequate and it is necessary to hold discussions with suppliers and contractors whose proposed technical solutions met the minimum requirements set out by the procuring entity.

7. Subparagraph (b) deals with a different situation — where open tendering was engaged in but it failed. This condition is the same as one of the conditions for resort to request for proposals with dialogue, contained in paragraph (2) (d) of this article. In such situations the procuring entity must analyse the reasons for the

---

for procurement of complex subject-matter, such as a consultancy contract for design purposes, followed by open or two-stage tendering, and the use of request for proposals with dialogue proceedings. The Working Group may wish to add a cross-reference to that discussion here, rather than repeating those considerations. Hence the focus here is limited to highlighting distinct features of two-stage tendering as compared to other chapter V procurement methods.

<sup>3</sup> The Working Group decided that detailed commentary in the Guide addressing the issues in selecting among the methods of chapter V would be necessary, from the perspective both of legislators and of procuring entities, and that the guidance should address the elements of that selection that could not be addressed in a legislative text and should draw on real-life examples. If the Working Group considers that the above discussion is insufficient, it is requested to provide further guidance to assist the Secretariat in expanding it.

failure of open tendering. Where it concludes that its difficulties in formulating sufficiently precise terms and conditions of the procurement were the reasons for the failure, it may consider that a two-stage procedure in which suppliers are involved is the appropriate course. The reasons for the earlier failure should also guide the procuring entity in selecting between two-stage tendering under paragraph (1) (b) of this article and request for proposals with dialogue under paragraph (2) (d) of this article: if formulating a single set of terms and conditions (including a single technical solution) for the procurement will be possible and appropriate, two-stage tendering will be the appropriate procurement method. The procuring entity will be able to engage with suppliers or contractors in order to be able to formulate those terms and conditions as necessary. (By contrast, the procuring entity may conclude that it is not possible or not appropriate to formulate a single technical solution, in which case request for proposals with dialogue may be the better course — see the guidance to that procurement method at [...].)

8. The provisions refer to the need for holding “discussions”, not “negotiations” or “dialogue”. While reflecting the iterative nature of the process, the term distinguishes the nature of talks that may be held in this method — which may not include the tender price or other financial aspects of the procurement — from the bargaining that may take place in other procurement methods regulated by chapter V of the Model Law.

*For a discussion of the changes in conditions for use from the 1994 text, see section 4 below.*

## 2. Solicitation

*The relevant provision of the revised Model Law on solicitation:*

### **“Article 32. Solicitation in open tendering, two-stage tendering and in procurement by means of an electronic reverse auction**

(1) An invitation to tender in open tendering or two-stage tendering and an invitation to an electronic reverse auction under article 52 of this Law shall be published in [...] (the enacting State specifies the official gazette or other official publication in which the solicitation is to be published).

(2) The invitation shall also be published in a language customarily used in international trade, in a newspaper of wide international circulation or in a relevant trade publication or technical or professional journal of wide international circulation.

(3) The provisions of this article shall not apply where the procuring entity engages in pre-qualification proceedings in accordance with article 17 of this Law.

(4) The procuring entity shall not be required to cause the invitation to be published in accordance with paragraph (2) of this article in domestic procurement and in procurement proceedings where the procuring entity decides, in view of the low value of the subject matter of the procurement, that only domestic suppliers or contractors are likely to be interested in presenting submissions.”

*Proposed text for the Guide:*

9. The article reflects one of the key features of open tendering — unrestricted solicitation of participation by suppliers or contractors. The same feature is present in two-stage tendering and electronic reverse auctions and is the default rule in request-for-proposals procurement methods.

10. In order to promote transparency and competition, paragraph (1) sets out the minimum publicity procedures to be followed for soliciting tenders from an audience wide enough to provide an effective level of competition. Including these procedures in the procurement law enables interested suppliers and contractors to identify, simply by reading the procurement law, publications that they may need to monitor in order to stay abreast of procurement opportunities in the enacting State. The Model Law does not regulate the means and media of publication, which are left to determination by enacting States. There may be paper or electronic media or combination of both. In this context, considerations raised in the guidance to article 5 in paragraphs [...] above are relevant.

11. In view of the objective of the Model Law of fostering and encouraging international participation in procurement proceedings, paragraph (2) requires publication of the invitations also in media with international circulation in a language customarily used in international trade. These procedures are designed to ensure that invitations to tender or to the electronic reverse auction are issued in such a manner that they will reach and be understood by an international audience of suppliers and contractors.

12. The exceptions to this rule are found in paragraph (4), and comprise cases of domestic procurement, and low-value procurement in which, in the judgement of the procuring entity, there is unlikely to be interest on the part of foreign suppliers or contractors. In such cases, the procuring entity may still solicit internationally but is not required to do so; however, where suppliers or contractors wish to participate (if they have seen an advertisement on the Internet, for example), they must be permitted to do so (see, further, paragraph [...] below).

13. The first exception — resort to domestic procurement — is possible under article 8 of the Law only on grounds specified in the procurement regulations or other provisions of law of the enacting State (for the guidance to that article, see paragraphs [...] above). The second exemption — low-value procurement — relies largely on the judgement of the procuring entity. The Model Law recognizes that in cases of low-value procurement the procuring entity would not have any legal or economic interest in precluding the participation of foreign suppliers and contractors, since a blanket exclusion of foreign suppliers and contractors in such cases might unnecessarily deprive it of the possibility of obtaining a better price. The decision, it should be emphasized, must be recorded and is open to challenge under chapter VIII, and the procuring entity will wish to consider the potential costs and benefits of its approach.

14. To promote transparency and to prevent arbitrary and excessive resort to the second exception, the enacting State may wish to establish in the procurement regulations a value threshold below which procuring entities need not, in accordance with paragraph (4) of the article, resort to international solicitation. This threshold may be the same or different from those to be set out by enacting States in

enacting articles 21 (3) (b) and 22 (2) of the Model Law and may vary for different types of procurement. In the absence of any specific threshold set out by the enacting State in the procurement regulation for the purposes of implementing paragraph (4), the enacting State may wish to give guidance to procuring entities as to appropriate descriptions of low-value procurement in the State concerned, which may take into account the thresholds set out by the enacting State in enacting articles 21 (3) (b) and 22 (2) of the Model Law.<sup>4</sup> <sup>5</sup>

15. Regardless of which approach is followed, the goal of reaching a common understanding in an enacting State of what is meant by low-value procurement should be achieved, to prevent excluding the bulk of procurement from requirement of international publication. The low-value consideration should be taken into account alongside any anticipated lack of a cross-border interest in participating in the procurement concerned (i.e. even if the procuring entity publicized the procurement in a publication of international circulation in a language customarily used in international trade, no international participation would result: foreign suppliers or contractors would simply not be interested). Thus, such publication would involve additional cost without benefit (in particular, translation costs may be applicable). Consistent practices throughout the enacting State's procuring entities in this respect are important to avoid confusion, uncertainty and concerns over the accessibility of the enacting State's procurement system.

16. Where the procuring entity has used an exemption under paragraph (4), it may invoke the other exemptions applicable in the case of the domestic procurement, such as exemption from the requirement to indicate in the solicitation documents information about currency and languages, which may no longer be pertinent in the context of the international procurement (for the guidance on this point, see paragraphs [...] below).

17. The publicity requirements in the Model Law are only minimum requirements. The procurement regulations may require procuring entities to publicize the invitation to tender by additional means that would promote widespread awareness by suppliers and contractors of procurement proceedings. These might include, for example, posting the invitation on official notice boards, a contracts bulletin and

---

<sup>4</sup> For the purpose of finalizing the guide to these provisions of article 32 (4), the Working Group is requested to confirm the Secretariat's understanding that the procuring entity by invoking the exemption from international solicitation under article 32 (4) will be bound by the threshold established in the Law and procurement regulations for low-value procurement; if the threshold in the procurement regulations is different from the one in articles 21 (3) (b) and 22 (2) of the Law, the one set in the Model Law will prevail; if a threshold in article 21 (3) (b) is different from the one in article 22 (2), the one in article 22 (2) will prevail as more relevant for the purposes of article 32 (4).

<sup>5</sup> At its nineteenth session, the Working Group was requested to consider whether the Model Law, instead of fixing any threshold in its provisions, should refer the matter to the procurement regulations consistently throughout the Model Law, in particular in the light of the fluctuating value of currencies (inflation, etc.) (A/CN.9/WG.I/WP.75/Add.2, footnotes 31 and 38). The Working Group did not consider that suggestion. However, the suggestion was made, during expert consultations on the guidance to be provided for this procurement method, that the Working Group and the Commission may wish to reconsider the point so as to ensure consistent approach to the location of thresholds. Given the need for periodic adjustment as economic circumstances change, the thresholds themselves may best be set out in regulations (by comparison with article 22 (2)).

circulating it to chambers of commerce, to foreign trade missions in the country of the procuring entity and to trade missions abroad of the country of the procuring entity.<sup>6</sup> Where the procuring entity uses electronic means of advertisement and communication, it is possible to include in the invitation a Web link to the solicitation documents themselves: this approach is proving beneficial in terms of both efficiency and transparency.

18. The article does not apply, as stated in paragraph (3), in the cases of pre-qualification. This exemption does not indicate that the need for wide international solicitation is not present when pre-qualification proceedings are involved: to the contrary, open participation is mandatory in such proceedings. The solicitation, in those cases however, follows a different pattern: an invitation to tender or to the auction is preceded by an invitation to pre-qualification. The latter is to be issued in accordance with the provisions of article 17 (2) that parallel the provisions of article 32. Wide international outreach to potentially interested suppliers and contractors is therefore ensured also when pre-qualification is involved, except in the cases referred to in article 32 (4). [Cross-reference to appropriate discussion of the principles of open pre-qualification].

### 3. Procedures

*The relevant provision of the revised Model Law on procedures:*

#### **“Article 47. Two-stage tendering**

(1) The provisions of chapter III of this Law shall apply to two-stage tendering proceedings, except to the extent those provisions are derogated from in this article.

(2) The solicitation documents shall call upon suppliers or contractors to present, in the first stage of the two-stage tendering proceedings, initial tenders containing their proposals<sup>7</sup> without a tender price. The solicitation documents may solicit proposals relating to the technical, quality or other characteristics of the subject matter of the procurement as well as to contractual terms and conditions of supply, and, where relevant, the professional and technical competence and qualifications of the suppliers or contractors.

(3) The procuring entity may, in the first stage, engage in discussions with suppliers or contractors whose tenders have not been rejected pursuant to provisions of this Law, concerning any aspect of their tenders. When the procuring entity engages in discussions with any supplier or contractor, it shall extend an equal opportunity to participate in discussions to all suppliers or contractors.

(4) (a) In the second stage of the two-stage tendering proceedings, the procuring entity shall invite all suppliers or contractors whose tenders were

---

<sup>6</sup> This sentence is based on the 1994 commentary to article 24 of the 1994 Model Law. It reflects a general point that may be more appropriate in the general discussion on solicitation e.g. in the introductory part to section II of chapter II. If so, only a cross-reference will be needed here and the following discussion of electronic publication can be moved to that discussion in addition.

<sup>7</sup> The Working Group may wish to recommend that the term “proposals” be replaced with the term “proposed solutions”, so as to avoid confusion with request-for-proposals proceedings.

not rejected at the first stage to present final tenders with prices in response to a revised set of terms and conditions for the procurement;

(b) In revising the relevant terms and conditions of the procurement, the procuring entity may:

(i) Delete or modify any aspect of the technical or quality characteristics of the subject matter of the procurement initially provided, and may add any new characteristic that conforms to the requirements of this Law;

(ii) Delete or modify any criterion for examining or evaluating tenders initially provided, and may add any new criterion that conforms to the requirements of this Law, to the extent only that the deletion or modification is required as a result of changes made in the technical or quality characteristics of the subject matter of the procurement;

(c) Any deletion, modification or addition made pursuant to subparagraph (b) of this paragraph shall be communicated to suppliers or contractors in the invitation to present final tenders;

(d) A supplier or contractor not wishing to present a final tender may withdraw from the tendering proceedings without forfeiting any tender security that the supplier or contractor may have been required to provide;

(e) The final tenders shall be evaluated in order to ascertain the successful tender as defined in article 42 (4) (b) of this Law.”

*Proposed text for the Guide:*

19. This article regulates the procedures for two-stage tendering proceedings. Paragraph (1) serves as a reminder that the rules of open tendering apply to two-stage tendering, save where modification is required by the procedures particular to the latter method. Some of the open tendering rules will be applicable without modification, such as procedures for soliciting tenders (article 35), contents of invitation to tender (article 36) and provision of solicitation documents (article 37). Some other rules of chapter III will require modification in the light of the specific features of two-stage tendering described in paragraphs (2) to (4) of article 47. For example, the provisions of article 38 on the contents of the solicitation documents referring to tender price will not be relevant when initial tenders are solicited. The provisions of article 40 on the period of effectiveness of tenders and modification and withdrawal of tenders are to be read together with paragraph (4) (d) of article 47, which allows a supplier or contractor not wishing to present a final tender to withdraw from the proceedings without forfeiting any tender security (on a justification for the deviation from the applicable open tendering rules, see paragraph [30] below).

20. Some provisions of chapter III, such as article 41 on opening of tenders and provisions of article 42 on evaluation of tenders, will be applicable only to final tenders submitted in response to the revised set of terms and conditions for the procurement. The provisions on presentation of tenders in article 39 and on examination of tenders in article 42 will, on the other hand, be applicable to both initial and final tenders. The provisions of article 43, prohibiting negotiation with

suppliers or contractors after tenders have been submitted, should be interpreted in the context of two-stage tendering as not preventing the non-bargaining type of discussions that may take place in two-stage tendering between the procuring entity and any supplier or contractor with respect to their initial tenders. The prohibition of negotiations of a bargaining nature applies throughout the two-stage tendering proceedings (including to the period after final tenders have been submitted).

21. Paragraph (2) contains specific rules for the solicitation of initial tenders. They modify the rules on solicitation of chapter III. At this stage, the procuring entity may solicit proposed solutions with respect to any terms and conditions of the procurement other than tender price. In the light of the conditions for use of this procurement method (see article 29 (1); for the guidance to this article, see paragraphs [...] above), it is expected that the procuring entity will solicit various solutions relating in the first place to the technical and quality requirements for the subject matter of the procurement and, where relevant, the professional and technical competence and qualifications of the suppliers or contractors. Certain quality requirements may have a commercial impact, such as the acquisition or transfer of intellectual property rights: such aspects can properly form part of the terms and conditions of the procurement and be discussed with suppliers. For example, there may be a requirement in the solicitation documents for solutions to the use of intellectual property (for example, such rights could be licensed or acquired). If so, these requirements form part of the technical aspects of the procurement. Otherwise, the related costs for the use of the intellectual property concerned will be simply part of the tender price submitted at the second stage.

22. The article does not provide for any specific rules on presentation and examination of initial tenders. The relevant provisions of chapter III apply. In particular, the applicable provisions of article 42 (3) will regulate the instances in which rejection of initial tenders will be possible: they are where the supplier or contractor that presented a tender is not qualified; where the tender presented is not responsive; or where a supplier or contractor is excluded from the procurement proceedings on the grounds specified in article 20 (inducement, unfair competitive advantage or conflicts of interest). Other grounds for rejection specified in article 42 (3) are not applicable; they apply to situations when tender prices are examined, which is not the case at this first stage of two-stage tendering. All suppliers whose tenders are not rejected are entitled to participate further in the procurement proceedings.

23. Paragraph (3) provides for the possibility of holding discussions with suppliers or contractors whose tenders have not been rejected, concerning any aspect of their tenders. Discussions may involve any aspect of the procurement but price and are of a non-bargaining nature (on this point, see the guidance in paragraphs [...] above). Discussions will not always be necessary since the procuring entity may be able to refine and finalize the terms and conditions of the procurement itself, on the basis of the initial tenders received. The provisions of paragraph (3) require that, when the procuring entity decides to engage in discussions, it must extend an equal opportunity to discuss to all suppliers or contractors concerned.

24. Paragraph (4) regulates the procedural steps involved at the subsequent stages of the two-stage tendering to the extent that they are different from the rules of open tendering in chapter III of the Model Law. It also regulates issues arising from the

preparation and issue of a final revised set of terms and conditions, such as the extent of permissible changes to the terms and conditions originally advertised.

25. Subparagraph (a) imposes the obligation on the procuring entity to extend the invitation to present final tenders, following the issuance of a revised set of terms and conditions for the procurement, to all suppliers or contractors whose tenders were not rejected at the first stage. Final tenders are equivalent to the tenders submitted in open tendering: that is, they will be assessed for responsiveness to the solicitation and will include prices.

26. Subparagraph (b) addresses the extent of permissible changes to the terms and conditions of the procurement originally announced. Changes (deletions, modifications or additions) are permitted to the technical and quality aspects of the subject matter and to the criteria for examining and evaluating tenders, under certain conditions that aim at limiting the discretion of the procuring entity in this respect. In the light of the objective of the Model Law of providing for the fair and equitable treatment of all suppliers and contractors, changes to the technical and quality aspects made following the first stage of the procedure may not change the description of the subject matter of the procurement as originally announced. If the description of the subject matter would be so changed, new procurement proceedings must be held to allow new suppliers or contractors to participate (including suppliers or contractors whose initial tenders were rejected or that would now become qualified). Article 15 (3) is relevant in this context: it requires the procuring entity to re-advertise the procurement if, as a result of clarifications and modifications of the solicitation documents, the information about procurement published when first soliciting participation of suppliers or contractors in the procurement proceedings has become materially inaccurate (for the guidance to article 15 (3), see paragraphs [...] above).

27. Subparagraph (b) (i) addresses the extent of permissible changes to the description of the subject matter of the procurement. They refer primarily to technical and quality aspects of the subject matter of the procurement in the light of the main aim of the two-stage tendering — to enhance the precision of technical and quality specifications of the subject matter of the procurement, to narrow down the possible options to the one that would best meet the procuring entity's needs, and on that basis to finalize a single set of terms and conditions of the procurement.

28. Changes to technical or quality aspects of the subject matter of the procurement may necessarily require changes to the examination and/or evaluation criteria, as otherwise the examination and/or evaluation criteria at the second stage would not reflect the applicable technical and quality aspects. Subparagraph (b) (ii) therefore provides that only those changes may be introduced to the examination and evaluation criteria that are strictly necessary as a result of changes made to the technical or quality aspects of the subject matter of the procurement.

29. Subparagraph (c) requires any changes made to the terms and conditions of the procurement as originally announced to be communicated to suppliers or contractors, through the medium of the invitation to present final tenders.

30. Subparagraph (d) permits suppliers or contractors to refrain from submitting a final tender without forfeiture of any tender security that may have been required for entry into the first stage. The latter provision is included to enhance participation by suppliers or contractors since, upon the deadline for submission of initial tenders,

the suppliers or contractors cannot be expected to know what changes to the terms and conditions of the procurement may subsequently be made. In the light of the features of this procurement method, tender securities most likely will be required however in the context of presentation of final tenders rather than of initial tenders.

31. Subparagraph (e) subjects the procedural steps involved in examination and evaluation of final tenders and determination of the successful tender to the rules of open tendering in chapter III of the Model Law.

32. Enacting States should note the particular importance of the provisions of article 23 on confidentiality in the context of this procurement method (as in any other procurement method under chapter V). The risks of revealing, inadvertently or otherwise, commercially sensitive information of competing suppliers or contractors may arise not only at the stage of discussions but also in the formulation of the revised set of the terms and conditions of the procurement (for example, in the use of requirements, symbols and terminology to describe the revised technical and quality aspects of the subject matter, which may inadvertently reveal the source of information) and in the communication, as required under paragraph (4) (c), of changes made to the terms and conditions originally advertised to the suppliers or contractors. In conformity with the requirements of article 23, the procuring entity must respect the confidentiality of the suppliers or contractors' technical proposals throughout the process. The importance of this safeguard should not be underestimated if the integrity of, and fairness and public confidence in, the procurement process is to be preserved, and the participation of suppliers or contractors in the ongoing and any future two-stage procurement proceedings is to be ensured.

*For a discussion of the changes in procedures from the 1994 text, see section 4 immediately below.*

**4. Points regarding two-stage tendering proceedings proposed to be discussed in the Section of the Guide to Enactment addressing changes from the 1994 text of the Model Law**

*Conditions for use*

33. The provisions on two-stage tendering in the revised Model Law draw on the provisions of the 1994 Model Law regulating the same procurement method (article 19 (1)). Changes have been made to the 1994 provisions to make the primary condition for use of this procurement method (as reflected in subparagraph (a) of article 29 (1)) more specific and distinct from the conditions for use of other procurement methods of chapter V (in the 1994 text, the same conditions for use applied to three procurement methods: two-stage tendering, request for proposals and competitive negotiations). In addition, the phrasing of the conditions for use in subparagraph (a) has been amended to make it clear that discussions with suppliers or contractors are an optional feature of the method.

34. A reference to seeking external approval for the use of this procurement method, which was present in the 1994 text, has been deleted in conformity with the UNCITRAL decision not to require, as a general rule, in the revised Model Law the procuring entity to seek an approval of another body for steps to be taken by the procuring entity (for the guidance on this point, see paragraphs [...] above).

*Procedures*

35. The procedures for two-stage tendering are based on article 46 of the 1994 Model Law. Substantive revisions, aimed at enhancing precision and strengthening safeguards against abuses in this procurement method, have been made in paragraph (3) and (4) of the article [detail to be added at a later date].

**(A/CN.9/WG.I/WP.77/Add.8) (Original: English)****Note by the Secretariat on the revised Guide to Enactment to accompany the UNCITRAL Model Law on Public Procurement, submitted to the Working Group on Procurement at its twentieth session****ADDENDUM**

This addendum sets out a proposal for the Guide text to accompany the related provisions of chapters II and V of the UNCITRAL Model Law on Public Procurement on request for proposals with dialogue.

**GUIDE TO ENACTMENT  
OF  
THE UNCITRAL MODEL LAW  
ON PUBLIC PROCUREMENT**

**Part II. Article-by-article commentary**

[For ease of reference, this addendum consolidates the proposed article-by-article commentary to various provisions of the Model Law regulating request for proposals with dialogue.]

...

**Proposed text for the Guide to Enactment of the revised Model Law addressing issues of request for proposals with dialogue**

**1. Conditions for use**

*The relevant provision of the revised Model Law on conditions for use:*

**“Article 29. Conditions for use of methods of procurement under chapter V of this Law (... request for proposals with dialogue ...)**

(2) (Subject to approval by the [name of the organ designated by the enacting State to issue the approval]), a procuring entity may engage in procurement by means of request for proposals with dialogue in accordance with article 48 of this Law where:

(a) It is not feasible for the procuring entity to formulate a detailed description of the subject matter of the procurement in accordance with article 10 of this Law,<sup>1</sup> and the procuring entity assesses that dialogue

---

<sup>1</sup> The Working Group may wish to correct an inaccuracy in this condition for use identified during expert consultations on the draft guidance to this procurement method. Article 10 (1) does not require any particular level of detail in the description of the subject matter of the procurement that is to be included in the solicitation documents, and article 10 (4) sets out the requirements for “any description” without qualification. Thus it would always be possible to fulfil the

with suppliers or contractors is needed to obtain the most satisfactory solution to its procurement needs;

(b) The procuring entity seeks to enter into a contract for the purpose of research, experiment, study or development, except where the contract includes the production of items in quantities sufficient to establish their commercial viability or to recover research and development costs;

(c) The procuring entity determines that the selected method is the most appropriate method of procurement for the protection of essential security interests of the State; or

(d) Open tendering was engaged in but no tenders were presented or the procurement was cancelled by the procuring entity pursuant to article 18 (1) of this Law and where, in the judgement of the procuring entity, engaging in new open tendering proceedings or a procurement method under chapter IV of this Law would be unlikely to result in a procurement contract.”

*Proposed text for the Guide:*

1. Paragraph (2) provides conditions for use of the procurement method called request for proposals with dialogue, a procedure that is designed for the procurement of relatively complex goods, construction and services. As with all procurement methods under the Model Law, the use of this method is not intended exclusively for any type of procurement (be it procurement of goods, construction or services). Also in common with all procurement methods under the Model Law, the procuring entity will be able to choose this procurement method when the conditions for use are satisfied, and when it assesses that the method is best suited to the given circumstances. Article 27 (setting out general principles for the choice of procurement methods, guidance to which is found at ...), paragraph (2) of this article setting out conditions for use of this procurement method, and the distinct procedural features of this procurement method (as set out in article 48) will guide the procuring entity in taking its decision in this regard.

2. The procedure itself involves two stages. At the first stage, the procuring entity issues a solicitation setting out a description of its needs expressed as terms of reference to guide suppliers in drafting their proposals. The needs can be expressed in functional, performance or output terms but are required to include minimum technical requirements. The second stage of the procedure is designed to enable suppliers and contractors to understand, through dialogue with the procuring entity, the needs of the procuring entity as outlined in its request for proposals. Upon conclusion of the dialogue, the suppliers and contractors make best and final offers (“BAFOs”) to meet those needs. BAFOs may be similar in some respects while significantly different in others, in particular as regards proposed technical solutions. The method therefore gives the procuring entity the opportunity of comparing different technical solutions to and alternatives and options for its needs. By comparison with two-stage tendering (which is a procedurally similar but

---

requirements of article 10. An alternative formulation could be to refer to a “complete description” in paragraph 2 (a) of article 29, and to amend article 10 (1) and (4) to require a complete description that complies with the minimum requirements set out in article 10 (4) to be set out in the solicitation documents.

substantively different method), it is not intended that the procedure will involve the procuring entity in setting out a full technical description of the subject matter of the procurement.

3. Methods based on this type of dialogue have proved to be beneficial to the procuring entity in procurement of complex works and services where the opportunity cost of not engaging in negotiations with the supply side is high, while the economic gains of engaging in the process are evident. They are appropriate for example in the procurement of architectural or construction works, where there are many possible solutions to the procuring entity's needs and in which the personal skill and expertise of the supplier or contractor can be evaluated only through negotiations. The complexity need not be at the technical level: in infrastructure projects, for example there may be different locations and types of construction as the main variables. The method has enabled the procuring entity in such situations to identify and obtain the best solution to its procurement needs.

4. Since the dialogue normally involves complex and time-consuming procedures, the method should be utilized only when its benefits are appropriate, and not for simple items that are usually procured through procurement methods not involving interaction with suppliers. The procurement method is, for example, not intended to apply to cases where negotiations are required because of urgency or because there is an insufficient competitive base (in such cases, the use of competitive negotiations or single-source procurement is authorized under the revised Model Law). It does not address the type of negotiations that seek only technical improvements and/or price reductions, as are envisaged in request for proposals with consecutive negotiations. Nor it is intended to apply in situations in which two-stage tendering proceedings should be used in accordance with paragraph (1) of this article — i.e. when the procuring entity needs to refine its procurement needs and envisages formulating a single set of terms and conditions (including specifications) for the procurement, against which tenders can be presented.

5. Paragraph (2) (a) of the article sets out the condition for what is expected to be the main use of request for proposals with dialogue: that the procuring entity cannot formulate a complete description of the subject matter of the procurement at the outset of the procedure, and it will need to engage in several phases of dialogue with suppliers or contractors capable of delivering the subject matter of the procurement in order to come to acceptable solutions to satisfy its needs. In practice, the procuring entity must be able to describe its broad needs at the outset of the procurement at the level of functional (or performance or output) requirements. This requirement reflects the fact that inadequate planning is likely to mean that the procurement will be unsuccessful; it is also needed so as to provide the minimum technical requirements that article 48 calls for and to allow the effective participation of suppliers or contractors.

6. Similarly to the situation envisaged in sub-paragraph 2 (a), the situation described in subparagraph (b) refers to procurement in which a tailor-made solution is needed (for example, an information technology system for the archiving of legal records, which may need particular features such as long-term accessibility), and where technical excellence is an issue. The third condition, in subparagraph (c), refers to procurement for the protection of essential security interests of the State. This condition would usually cover the security and defence sectors where the need

may involve the procurement of highly complex subject matter and/or conditions for supply, at the same time requiring measures for the protection of classified information.

7. The last condition for use of this method, in subparagraph (d), is the same as one of the conditions for use of two-stage tendering — open tendering was engaged in but it failed. In such situations the procuring entity must analyse the reasons for the failure of open tendering. Where it concludes that using open tendering again or using any of the procurement methods under chapter IV of this Law would not be successful, it may also conclude that it faces difficulties in formulating sufficiently precise terms and conditions of the procurement at the outset of the procurement. The reasons for the earlier failure should guide the procuring entity in selecting between two-stage tendering under paragraph (1) (b) of this article and request for proposals with dialogue under paragraph (2) (d) of this article. In order to use request for proposals with dialogue proceedings, the procuring entity would have to conclude that formulating a complete single set of terms and conditions of the procurement would not be possible or would not be appropriate, and therefore dialogue with suppliers or contractors is necessary for the procurement to succeed.

8. Enacting States should be aware of the practice accumulated with the use of procurement methods involving dialogue of the type envisaged in the request for proposals with dialogue of the Model Law, in particular their benefits, difficulties and risks. It is evident that the method presupposes significant discretion in decision-making on the part of the procuring entity, which must therefore possess sufficient knowledge and skills in the use of negotiating tools to match those of their counterparts in dialogue, or otherwise it will be placed in a disadvantaged bargaining position during the dialogue. Although the supply side of the market, not the procuring entity, makes proposals to meet the procuring entity's needs, suppliers should not take a lead in defining those needs.

9. The Model Law regulates this procurement method in considerable detail to mitigate the risks and difficulties that it can involve where used inappropriately or without the degree of care and capacity required to use it effectively. The conditions in paragraph (2) may mitigate concerns over the inappropriate use of this procurement method, by effectively preventing its use to procure items that should be procured through tendering or other, less flexible, methods of procurement.

10. Apart from imposing exhaustive conditions for use of this procurement method, the revised Model Law refers to the possibility of requiring external approval for the use of this procurement method. If an enacting State decides to provide for ex ante approval by a designated authority for such use, it must enact the opening phrase put in parenthesis in the chapeau provisions of paragraph (2). [It is an exceptional measure since the decision of UNCITRAL has been not to require, as a general rule, in the revised Model Law a high-level approval for resort to any procurement method (for the guidance on this point, see paragraphs ... above).] The exception was made in this case to signal to enacting States that higher measures of control over resort to this procurement method may be justifiable in the light of the particular features of this procurement method that make it at risk of abusive behaviour, which may be difficult to mitigate in some enacting States.

11. If the provisions are enacted, it will be for the enacting State to designate an approving authority and its prerogatives in the procurement proceedings, in

particular whether these prerogatives will end with granting to the procuring entity the approval to use this procurement method or also extend to some form of supervision on the way proceedings are handled. As a matter of good practice, the approving authority in exercise of its functions should be independent from the procuring entity and should have authority to bar the use of the method if the appropriate institutional framework, capacity and integrity within the procuring entity are not available or where the method is intended for use where it is not justified (for example, to avoid appropriate preparation for the procurement and shift responsibility of defining procurement needs to the supply side).

12. Article 48 contains detailed rules regulating the procedures for this procurement method, which are designed to include safeguards against possible abuses or improper use of this method and robust controls. Nonetheless, they also preserve the necessary flexibility and discretion on the part of the procuring entity in the use of the method, without which the benefits of the procedure disappear. The provisions have been aligned with the UNCITRAL instruments on privately financed infrastructure projects (see paragraphs ... below).<sup>2</sup>

13. The safeguards in particular aim at: (a) transparency by requiring proper notification of all concerned about the essential decisions taken in the beginning, during and at the end of the procurement proceedings, at the same time preserving confidentiality of commercially sensitive information as required under article 23; (b) objectivity, certainty and predictability in the process, in particular by requiring that all methods of limiting or reducing a number of participants in the procurement proceedings are made known from the outset of the procurement, and also by regulating the extent of permissible modifications to the terms and conditions of the procurement and by prohibiting post-BAFOs negotiations; (c) promoting effective competition through the same mechanism; (d) enhancing participation and ensuring the equitable treatment of suppliers and contractors by requiring that the dialogue be held on a concurrent basis and be conducted by the same representatives of the procuring entity, by regulating communication of information from the procuring entity to the participating suppliers or contractors during the dialogue stage and by setting rules for the stages following the completion of the dialogue; and (d) accountability by requiring comprehensive record-keeping in supplementing provisions of article 24.

14. Some other measures aim at enhancing participation of suppliers in procurement by this method. For example, inherent in the method is the fact that participating suppliers or contractors will invest significant time and resources in their participation. Participation will be discouraged if there is no reasonable chance of winning the contract to be awarded at the end of the procurement process. The procedures for the method therefore set out a process that enables the procuring entity to limit the number of participants to an appropriate number.

15. Similarly, suppliers or contractors will not be willing to participate if their proposals, which have a commercial value, are subsequently turned into a description available to all potential participants. The procedures for the method, as explained above, provide safeguards since they do not envisage the issue of a

---

<sup>2</sup> The UNCITRAL Model Legislative Provisions on Privately Financed Infrastructure Projects and the UNCITRAL Legislative Guide on the same subject, available as of the date of this report at [www.uncitral.org/uncitral/en/uncitral\\_texts/procurement\\_infrastructure.html](http://www.uncitral.org/uncitral/en/uncitral_texts/procurement_infrastructure.html).

complete set of terms and conditions of the procurement against which proposals can be presented at any stage of this procurement method (by contrast with the position in two-stage tendering). A single set of minimum requirements and an ordered list of evaluation criteria are made available at the outset of the procurement, which cannot be varied during the proceedings. During the dialogue process, the procuring entity evaluates proposals of various suppliers or contractors against those requirements and criteria. Suppliers or contractors may have several chances to refine their original and subsequent proposals in order to adjust them to the needs of the procuring entity as clarified during the dialogue. The final stage in this procurement method — the selection of the successful proposal after completion of the dialogue phase — involves the evaluation of BAFOs that contain the final proposal from each supplier or contractor and the terms and conditions of their respective offers.

16. The dialogue is to be conducted “concurrently”. This term is used in the text to stress that all suppliers and contractors are entitled to an equal opportunity to participate in the dialogue, and there are no consecutive discussions. The term also seeks to avoid the impression that the dialogue is to be conducted at precisely the same time with all suppliers or contractors, which would presuppose that different procurement officials or negotiating committees composed of different procurement officials are engaged in dialogue. Such a stance has been considered undesirable as it may lead to the unequal treatment of suppliers and contractors. For guidance on the conduct of the dialogue, see paragraphs [...] below.

17. Enacting States should recognize that regulatory and procedural safeguards alone will not be sufficient. They must be supported by an appropriate institutional framework, measures of good governance, high standards of administration and high-skilled procurement personnel. The experience of the multilateral development banks has indicated that putting in place the institutional frameworks and safeguards that are a prerequisite for the use of this method have proved to be among the most difficult reforms to implement.

18. As an example of a supporting measure that can mitigate the higher risks of corruption and abuse than in other less flexible procedures inherent in the dialogue format in this procedure, is the use of independent “probity officers” who can observe the conduct of dialogue. Such observation can prevent the disclosure of commercially sensitive information, such as price, to competitors, and the provision of important information to favoured suppliers only. The enacting State may wish to encourage procuring entities to take such practical steps as part of the managerial tools necessary for the effective use of this procurement method.

19. Because of the inherent features and the associated risks of this procurement method, some multilateral development banks may have a general difficulty with authorizing the use of this procurement method in projects financed by them, in particular for quantifiable (or non-intellectual) types of services and intellectual services that might be more appropriately procured through consecutive rather than concurrent negotiations. Ex ante approval by a designated authority [and establishing a threshold] for resort to this procurement method may accommodate concerns of multilateral development banks that resort to this procurement method

may occur in improper circumstances and in the absence of the adequate enabling framework and capacities on the side of the procuring entity.<sup>3</sup>

## 2. Solicitation

[Please see in the guidance on RfP without negotiation.]

## 3. Procedures

*The relevant provision of the revised Model Law on procedures:*

### [Article 48. Request for proposals with dialogue]

Not reproduced for reasons of otherwise exceeding the word and page limits imposed by the United Nations General Assembly on the length of documents produced by the Secretariat.]

*Proposed text for the Guide:*

20. The article regulates request for proposals with dialogue procedures. The steps involved in this procedure are: (a) an optional request for expressions of interest, which does not confer any rights on suppliers or contractors, including any right to have their proposals evaluated by the procuring entity. In this sense, it resembles an advance notice of possible future procurement referred to in article 6 (2) (for the guidance to article 6, see paragraphs ... above); (b) pre-qualification or pre-selection when it is expected that more than the optimum number of qualified candidates would express interest in participating; if neither pre-qualification or pre-selection is involved, open or direct solicitation as regulated by article 34; (c) issue of the request for proposals to those responding to the open or direct solicitation or to those pre-qualified or pre-selected, as the case may be; (d) concurrent dialogue, which as a general rule is held in several rounds or phases; (e) completion of the dialogue stage with a request for BAFOs; and (f) award. The article regulates these procedural steps in the listed chronology, except for an optional request for expressions of interest, which, as stated, is covered by provisions of article 6.

21. Paragraph (1), by cross-referring to article 34, reiterates the default rule contained in article 34 (1) of the Model Law that an invitation to participate in the request for proposals with dialogue proceedings must as a general rule be publicized as widely as possible to ensure wide participation and competition (unless the solicitation has been preceded by pre-qualification or pre-selection, both of which procedures also include a substantive requirement for wide publicity). The solicitation options are at the choice of the procuring entity in the light of the circumstances of the given procurement and subject to the requirements of article 34. (For the guidance to article 34, see paragraphs ... above.) Relevant

---

<sup>3</sup> The Working Group decided that detailed commentary in the Guide addressing the issues in selecting among the methods of chapter V would be necessary, from the perspective both of legislators and of procuring entities, and that the guidance should address the elements of that selection that could not be addressed in a legislative text and should draw on real-life examples. If the Working Group considers that the above discussion is insufficient, it is requested to provide further guidance to assist the Secretariat in expanding it. Further discussion may also be appropriate in the guidance to articles 26 and 27.

exceptions to the open solicitation rule are provided for in article 34, such as there being a limited supply base or the procurement involving classified information.

22. When open solicitation without pre-qualification or pre-selection is involved, an invitation to participate in the request for proposals with dialogue is issued, which must contain the minimum information listed in paragraph (2). This minimum information is designed to assist suppliers or contractors to determine whether they are interested and eligible to participate in the procurement proceedings and, if so, how they can participate. The information specified is similar to that required for an invitation to tender (article 36). The procuring entity may omit information about the currency of payment and about languages, referred to in subparagraphs (j) and (k), in domestic procurement, if it would be unnecessary in the circumstances; however, an indication of the language or languages may still be important in some multilingual countries in the context of domestic procurement.

23. Paragraph (2) lists the required minimum information and does not preclude the procuring entity from including additional information that it considers appropriate. The procuring entity should take into account however that it is the usual practice to keep the invitation brief and include the most essential information about procurement; that information is also most relevant to the initial stage of the procurement proceedings. All other information about the procurement, including further detail of the information contained in the invitation, is included in the request for proposals (see paragraph (5) of this article). This approach helps to avoid repetitions, possible inconsistencies and confusion in the content of the documents issued by the procuring entity to suppliers or contractors. It is in particular advisable in this procurement method since some information may become available or be refined later in the procurement proceedings (to the extent permitted by paragraph (9) of the article).

24. Paragraph (3) regulates pre-selection proceedings, as an option for the procuring entity to limit a number of suppliers or contractors from which to request proposals. The provisions have been aligned generally with the provisions on pre-selection found in the UNCITRAL instruments on privately financed infrastructure projects. Pre-selection proceedings allow the procuring entity to specify from the outset of the procurement that only a certain number of best qualified suppliers or contractors will be admitted to the next stage of the procurement proceedings. This tool is available as an option where it is expected that many qualified candidates will express interest in participating in the procurement proceedings. The Model Law provides for this possibility only in this procurement method: it is considered justifiable in the light of the significant time and cost that would be involved in examining and evaluating a large number of proposals. It is therefore an exception to the general rule of open participation as described in [...] above.

25. The number of suppliers or contractors to be admitted to the next stage of the procurement proceedings may also, in fact, be limited as a result of pre-qualification. The latter, however, cannot be used under the Model Law with certainty that it will limit the participation to a pre-determined maximum number of participants because it merely excludes unqualified suppliers whose qualifications can only be estimated in advance. If all suppliers or contractors applying for pre-qualification will turn out to be qualified, they must be admitted to the next stage of the procurement proceedings.

26. Pre-selection is held in accordance with the rules applicable to pre-qualification proceedings. The provisions of article 17 therefore apply to pre-selection, to the extent that they are not derogated from in paragraph (3) (to reflect the nature and purpose of pre-selection proceedings). For example, to ensure transparency and the equitable treatment of suppliers and contractors, paragraph (3) requires the procuring entity from the outset of the procurement to specify that the pre-selection proceedings will be used, the maximum number of pre-selected suppliers or contractors from which proposals will be requested, the manner in which the selection of that number of suppliers or contractors will be carried out and criteria that will be used for ranking suppliers or contractors, which should constitute qualification criteria and should be objective and non-discriminatory.

27. The maximum number of suppliers to be pre-selected must be established by the procuring entity in the light of the circumstances of the given procurement to ensure effective competition. When possible, the minimum should be at least three. If the procuring entity decides to regulate the number of suppliers or contractors to be admitted to the dialogue (see paragraph (5) (g) of the article), the maximum number of suppliers or contractors from which proposals will be requested should be established taking into account the minimum and maximum numbers of suppliers or contractors intended to be admitted to the dialogue phase as will be specified in the request for proposals under paragraph (5) (g) of this article. It is recommended that the maximum number of suppliers or contractors from which proposals will be requested should be higher than the maximum to be admitted to the dialogue phase, in order to allow the procuring entity to select from a bigger pool the most suitable candidates for the dialogue phase. To enable effective challenge, the provisions require promptly notifying suppliers or contractors of the results of the pre-selection and providing to those that have not been pre-selected reasons therefor.

28. Paragraph (4) specifies the group of suppliers or contractors to which the request for proposals is to be issued. Depending on the circumstances of the given procurement, this group could constitute the entire group of suppliers or contractors that respond to the invitation; or, if pre-qualification or pre-selection was involved, to only those that were pre-qualified or pre-selected; in the case of direct solicitation, the group would comprise of only those that are directly invited. The provisions also contain a standard clause in the Model Law that the price that may be charged for the request for proposals may reflect only the cost of providing the request for proposals to the suppliers or contractors concerned.

29. Paragraph (5) contains a list of the minimum information that should be included in the request for proposals in order to assist the suppliers or contractors in preparing their proposals [and to enable the procuring entity to compare the proposals on an equal basis].<sup>4</sup> The list is largely parallel in level of detail and in substance to the provisions on the required contents of solicitation documents in tendering proceedings (article 38) and contents of request for proposals in the request for proposals without negotiation proceedings (article 46 (4)). The differences reflect the procedural specifics of this procurement method.

---

<sup>4</sup> The Working Group may wish to consider the accuracy of the statement put in square brackets in the context of this procurement method.

30. The procuring entity may omit information about the currency of payment referred to in subparagraph (c), in domestic procurement, if it would be unnecessary in the circumstances. This information as well as related information about the proposal price may also be irrelevant in procurement of non-quantifiable advisory services where the cost is not a significant evaluation criterion and therefore initial proposals often need not contain financial aspects or price. Instead, in the context of evaluation criteria referred to in subparagraph (h), the emphasis in this type of procurement will be placed on the service-provider's experience for the specific assignment, the quality of the understanding of the assignment under consideration and of the methodology proposed, the qualifications of the key staff proposed, transfer of knowledge, if such transfer is relevant to the procurement or is a specific part of the description of the assignment, and when applicable, the extent of participation by nationals among key staff in the performance of the services.

31. The inclusion of such criteria as evaluation criteria does not preclude specifying a particular level required as qualification criteria under article 9 and paragraph (2) (e) of this article. Whereas by virtue of article 9 the procuring entity has the authority not to evaluate or pursue the proposals of unqualified suppliers or contractors, by specifying the same criteria as the evaluation criteria, the procuring entity will be able to weigh, for example, the required experience of one service provider against experience of others. On the basis of such comparison, it might feel more, or less, confident in the ability of one particular supplier or contractor than in that of another to implement the proposal.<sup>5</sup>

32. While the primary focus of dialogue typically may be on technical aspects or legal or other supporting issues, the subject matter of the procurement and market conditions may allow and even encourage the procuring entity to use price as an aspect of dialogue. In addition, in some cases, it is not possible to separate price and non-price criteria. Thus a preliminary price may be required to be provided in the initial proposals. The price is always included in the BAFOs.

33. Paragraph (5) (g) is applicable in situations when the procuring entity, in the light of the circumstances of the given procurement, decides that a minimum and/or maximum number of suppliers or contractors with whom to engage in dialogue should be established. Those limits should aim at reaching the optimum number of participants, taking into account that in practice holding concurrent negotiations with many suppliers has proved to be very cumbersome and unworkable, and may discourage participation. The provisions refer to a desirable minimum of three participants. They are supplemented by provisions of paragraphs (6) (b) and (7).

34. Paragraph (5) (h) refers to the criteria and procedures for evaluating the proposals in accordance with article 11 that in particular sets out exceptions to default requirements as regards assigning the relative weights to all evaluation criteria, to accommodate the specific features of this procurement method. These features may make it impossible for the procuring entity to determine from the outset of the procurement the relative weights of all evaluation criteria. It is therefore permitted under article 11 to list the relevant criteria in the descending order of importance. Where sub-criteria are also known in advance, they should be

---

<sup>5</sup> The Working Group may wish to consider whether this point is relevant in other procurement methods, and whether it should be discussed in the context of qualification generally.

specified as well and assigned relative weight if possible; if not, they should also be listed in the descending order of importance. It is recognized that different procurements might require different levels of flexibility as regards specification of evaluation criteria and procedures in this procurement method. However, providing a true picture of the evaluation criteria and procedure from the outset of the procurement proceedings is important as a general transparency measure.<sup>6</sup>

35. In the context of paragraph (5) (m) requiring the procuring entity to specify in the request for proposals any other requirements relating to the proceedings, it may be beneficial to include the timetable envisaged for the procedure. The proceedings by means of this procurement method are usually time- and resource-consuming on both sides — the procuring entity and suppliers or contractors. An estimated timetable of the proceedings in the request for proposals encourages better procurement planning and makes the process more predictable, in particular as regards the maximum period of time during which suppliers or contractors should be expected to commit their time and resources. It also gives both sides a better idea as regards the timing of various stages and which resources (personnel, experts, documents, designs, etc.) would be relevant, and should be made available, at which stage.

36. After the provision of the request for proposals to the relevant suppliers or contractors, sufficient time should be allowed for suppliers or contractors to prepare and submit their proposals. The relevant timeframe is to be specified in the request for proposals and may be adjusted if need be, in accordance with the requirements of article 14.

37. Paragraph (6) regulates the examination (assessment of responsiveness) of proposals. All proposals are to be assessed against the established minimum examination criteria notified to suppliers or contractors in the invitation to the procurement and/or request for proposals. The number of suppliers or contractors to be admitted to the next stage of the procurement proceedings — dialogue — may fall as a result of the rejection of non-responsive proposals, i.e. those that do not meet the established minimum criteria. As in the case with pre-qualification proceedings (see paragraph [25] above), examination procedures cannot be used for the purpose of limiting the number of suppliers or contractor to be admitted to the next stage of the procurement proceedings. If all suppliers or contractors presenting proposals turn out to be responsive, they all must be admitted to the dialogue unless the procuring entity reserved the right to invite only a limited number. As stated in the context of paragraph (5) (g) (see paragraph [33] above), such a right can be reserved in the request for proposals. In this case, if the number of responsive proposals exceeds the established maximum, the procuring entity will select the maximum number of responsive proposals in accordance with the criteria and procedure specified in the request for proposals. The Model Law itself does not regulate this procedure and criteria, which may vary from procurement to procurement. A certain level of subjectivity in the selection cannot be excluded in this procurement method. The risk of abusive practices should be mitigated by the requirement to specify the applicable selection procedure and criteria in the request for proposals, and to provide prompt notification of the results of the examination

---

<sup>6</sup> The Working Group may wish to consider whether this point is relevant in other procurement methods, and whether it should be discussed in the context of evaluation generally.

procedure, including reasons for rejection when applicable. These requirements should allow the aggrieved suppliers effectively to challenge the procuring entity's decisions. Managerial techniques to oversee the procedure can also support these regulatory tools.

38. In accordance with paragraph (7), the number of suppliers or contractors invited to the dialogue in any event must be sufficient to ensure effective competition. The desirable minimum of three suppliers or contractors mentioned in paragraph (5) (g) is reiterated in this paragraph. The procuring entity will not however be precluded from continuing with the procurement proceedings if only one or two responsive proposals are presented. The reason for allowing the procuring entity to continue with the procurement in such case is that, even if there is a sufficient number of responsive proposals, the procuring entity has no means of ensuring that the competitive base remains until the end of the dialogue phase: suppliers or contractors are not prevented from withdrawing at any time from the dialogue. [This issue can be addressed to some extent in the requirement to provide a tender security in accordance with article 16 (for the guidance to article 16, see paragraphs ... above).]<sup>7</sup>

39. Paragraph (8) sets out two requirements for the format of dialogue: that it should be held on a concurrent basis and that the same representatives of the procuring entity should be involved to ensure consistent results. The reference to "representatives" of the procuring entity is in plural in these provisions since the use of committees comprising of several people is considered to be good practice, especially in the fight against corruption. This requirement does not prevent the procuring entity from holding dialogue with only one supplier or contractor, as explained above. Dialogue may involve several rounds or phases. By the end of each round or phase, the needs of the procuring entity are refined and participating suppliers or contractors are given a chance to modify their proposals in the light of those refined needs and the questions and comments put forward by the negotiating committee during dialogue.

40. The reference in subsequent paragraphs of this article to "suppliers or contractors remaining in the procurement proceedings" indicates that the group of suppliers or contractors entering the dialogue at the first phase may decline throughout the dialogue process. Some suppliers or contractors may decide not to participate further in dialogue, or they may be excluded from further negotiations by the procuring entity on the grounds permitted under the Model Law or other provisions of applicable law of the enacting State. Unlike some systems with similar procurement methods, the Model Law does not give an unconditional right to the procuring entity to terminate competitive dialogue with a supplier or contractor, for example, only because in the view of the procuring entity that supplier or contractor would not have a realistic chance of being awarded the contract. The dialogue phase involves constant modification of solutions and it would be unfair to eliminate any supplier only because at some stage of dialogue a solution appeared not acceptable to the procuring entity. Although terminating the dialogue with such a supplier might allow both sides to avoid wasting time and resources (which could turn out to

---

<sup>7</sup> The Working Group is invited to consider the accuracy of the statement put in square brackets, in particular the likelihood of obtaining a tender security against largely undefined terms and conditions of the procurement.

be significant in this type of procurement), and might consequently reduce the risk of reduced competition in future procurements, UNCITRAL has proceeded on the basis that the risks to objectivity, transparency and equal treatment significantly outweigh the benefits.

41. On the other hand, the procuring entity should not be prohibited from terminating dialogue with suppliers or contractors on the grounds specified in the Model Law or through other provisions of applicable law of the enacting State. Some provisions in the Model Law would require the procuring entity to exclude suppliers or contractors from the procurement proceedings. For example, they must be excluded on the basis of article 20 (inducement, unfair competitive advantage or conflicts of interest), or if they are no longer qualified (for example in the case of bankruptcy), or if they materially deviate during the dialogue phase from the minimum responsive requirements or other key elements that were identified as non-negotiable at the outset of the procurement. In such cases, the possibility of a meaningful challenge under chapter VIII by aggrieved suppliers or contractors is ensured since the procuring entity will be obligated to notify promptly suppliers or contractors of the procuring entity's decision to terminate the dialogue and to provide grounds for that decision. It may be useful to provide suppliers or contractors at the outset of the procurement proceedings with information about the grounds on which the procuring entity will be required under law to exclude them from the procurement.

42. Paragraph (9) imposes limits on the extent of modification of the terms and conditions of the procurement as set out at the outset of the procurement proceedings. Unlike article 15 that regulates modification of the solicitation documents before the submissions/proposals are presented, paragraph (9) deals with restriction on modification of any aspect of the request for proposals after the initial proposals have been presented. The possibility of making such modifications is inherent in this procurement method; not allowing sufficient flexibility to the procuring entity in this respect will defeat the purpose of the procedure. The need for modifications may be justified in the light of dialogue but also in the light of circumstances not related to dialogue (such as administrative measures).

43. At the same time, the negative consequences of unfettered discretion may significantly outweigh the benefits in terms of flexibility. The provisions of paragraph (9) seek to achieve the required balance by preventing the procuring entity from making changes to those terms and conditions of the procurement that are considered to be so essential for the advertised procurement that their modification would have to lead to the new procurement. They are the subject matter of the procurement, qualification and evaluation criteria, the minimum requirements established pursuant to paragraph (2) (f) of this article and any elements of the description of the subject matter of the procurement or term or condition of the procurement contract that the procuring entity explicitly excludes from the dialogue at the outset of the procurement (i.e. non-negotiable requirements). The provisions would not prevent suppliers or contractors from making changes in their proposals as a result of the dialogue; however, deviation from the essential requirements of the procurement (such as the subject matter of the procurement, the minimum or non-negotiable requirements) may become a ground for the exclusion from the procurement of the supplier or contractor proposing such unacceptable deviations.

44. Paragraph (10) provides an essential measure to achieve equal treatment of suppliers and contractors in the communication of information from the procuring entity to suppliers or contractors during the dialogue phase. It subjects any such communication to the provisions of article 23 on confidentiality, some of which are specifically designed for chapter V procurement methods. Concerns over confidentiality are particularly relevant in this procurement method in the light of the format and comprehensive scope of the dialogue. The general rule is that no information pertinent to any particular supplier or its proposal should be disclosed to any other participating supplier without consent of the former. Further exceptions are listed in article 23 (3) (disclosure is required by law, or ordered by competent authorities, or permitted in the solicitation documents). (For the guidance to article 23, see paragraphs ... above.)

45. Achieving equal treatment of all participants during the dialogue requires implementing a number of practical measures. The Model Law refers only to the most essential ones, such as those in paragraph (10), and the requirement that negotiations be held on a concurrent basis by the same representatives of the procuring entity (paragraph (8) as explained in paragraph [39] above). Other measures, such as ensuring that the same topic is considered with the participants concurrently for the same amount of time, should be thought through by committees when preparing for the dialogue phase. Enacting States may wish to provide for other practical measures in the procurement regulations.

46. Upon completion of the dialogue stage, all the remaining participants must be given an equal chance to present BAFOs, which are defined as best and final with respect to each supplier's proposal. This definition highlights one of the main distinct features of this procurement method — the absence of any complete single set of terms and conditions of the procurement beyond the minimum technical requirements against which final submissions are evaluated. Paragraphs (11) and (12) regulate the BAFOs stage. The safeguards contained in these paragraphs intend to maximize competition and transparency. The request for BAFOs must specify the manner, place and deadline for presenting them. No negotiation with suppliers or contractors is possible after BAFOs have been presented and no subsequent call for further BAFOs can be made. Thus the BAFO stage puts an end to the dialogue stage and freezes all the specifications and contract terms offered by suppliers and contractors so as to restrict an undesirable situation in which the procuring entity uses the offer made by one supplier or contractor to pressure another supplier or contractor, in particular as regards the price offered. Otherwise, in anticipation of such pressure, suppliers or contractors may be led to raise the prices offered, and there is a risk to the integrity of the marketplace.

47. Paragraph (13) deals with the award of the procurement contract under this procurement method. It is to be awarded to the successful offer, which is determined in accordance with the criteria and procedure for evaluating the proposals set out in the request for proposals. The reference to the criteria and procedure for evaluating the proposals as set out in the request for proposals in this provision reiterates the prohibition of modification of those criteria and procedures during the dialogue stage, found in paragraph (9) of the article as explained in paragraphs [42 and 43] above.

48. The procuring entity will be required to maintain a comprehensive written record of the procurement proceedings, including a record of the dialogue with each

supplier or contractor, and to give access to the relevant parts of the record to the suppliers or contractors concerned, in accordance with article 24. This is an essential measure in this procurement method to ensure effective oversight, including audit, and possible challenges by aggrieved suppliers or contractors.

**4. Points regarding request for proposals with dialogue proposed to be discussed in the Section of the Guide to Enactment addressing changes from the 1994 text of the Model Law**

*Conditions for use*

49. Paragraph (2) of article 29 provides conditions for use of a new procurement method, request for proposals with dialogue, that combines the features of articles 43 (selection procedures with simultaneous negotiations for procurement of services) and 48 (request for proposals) of the 1994 Model Law. These two procurement methods in the 1994 text have many similarities and can be used for procurement of services. Request for proposals with dialogue retains the main feature of those 1994 procurement methods — the use of interaction with suppliers, which is held concurrently with a group of suppliers or contractors (as opposed to consecutive negotiations as envisaged under paragraph (3) of this article and article 49 of the Model Law; for the guidance on those provisions, see paragraphs ... below). In order to avoid confusion over terminology and the choice of procurement methods in those States that enacted their procurement legislation on the basis of the 1994 Model Law, the revised Model Law uses a distinct term to identify this new procurement method.

[Detail with respect to solicitation and procedures will be added at a later stage.]

(A/CN.9/WG.I/WP.77/Add.9) (Original: English)

**Note by the Secretariat on the revised Guide to Enactment to accompany the UNCITRAL Model Law on Public Procurement, submitted to the Working Group on Procurement at its twentieth session**

**ADDENDUM**

This addendum sets out a proposal for the Guide text to accompany the related provisions of chapters II and V of the UNCITRAL Model Law on Public Procurement on competitive negotiations and single-source procurement.

**GUIDE TO ENACTMENT OF THE UNCITRAL MODEL  
LAW ON PUBLIC PROCUREMENT**

**Part II. Article-by-article commentary**

[For ease of reference, this addendum consolidates the proposed article-by-article commentary to various provisions of the Model Law regulating competitive negotiations and single-source procurement.]

...

**A. Proposed text for the Guide to Enactment of the revised Model Law addressing issues of competitive negotiations**

**1. Conditions for use**

*The relevant provision of the revised Model Law on conditions for use:*

**“Article 29. Conditions for use of methods of procurement under chapter V of this Law (... competitive negotiations ...)**

(4) A procuring entity may engage in competitive negotiations, in accordance with the provisions of article 50 of this Law, in the following circumstances:

(a) There is an urgent need for the subject matter of the procurement, and engaging in open tendering proceedings or any other competitive method of procurement because of the time involved in using those methods would therefore be impractical, provided that the circumstances giving rise to the urgency were neither foreseeable by the procuring entity nor the result of dilatory conduct on its part;

(b) Owing to a catastrophic event, there is an urgent need for the subject matter of the procurement, making it impractical to use open tendering proceedings or any other competitive method of procurement because of the time involved in using those methods; or

(c) Where the procuring entity determines that the use of any other competitive method of procurement is not appropriate for the protection of essential security interests of the State.”

*Proposed text for the Guide:*

1. Paragraph (4) of this article sets out the conditions for use of competitive negotiations, a procurement method that may be used only in the exceptional circumstances set out in subparagraphs (a) to (c): urgency, catastrophic events and the protection of essential security interests of the enacting State. Such restrictions are necessary in the light of the very flexible procedures of the method itself. Those procedures do not provide the same levels of transparency, integrity and objectivity in the process as are present in other competitive procurement methods, and the method is therefore at greater risk of abuse and corruption.
2. Subparagraph (a) addresses situations of urgency not caused by the conduct of the procuring entity, and that do not arise out of foreseeable circumstances. Subparagraph (b) refers to urgency arising out of catastrophic events. Both subparagraphs refer to situations when the use of open tendering proceedings or any other competitive method of procurement is impractical because of the time involved in using those methods. The cases of urgency contemplated in both paragraphs are intended to be truly exceptional, and not merely cases of convenience: such as the need for urgent medical or other supplies after a natural disaster or the need to replace an item of equipment in regular use that has malfunctioned. The method is not available if the urgency is due to a lack of procurement planning or other action on the part of the procuring entity, and the extent of the procurement through this method must be directly derived from the urgency itself. In other words, if there is an urgent need for one item of equipment, and an anticipated need for several more of the same type, competitive negotiations can be used only for the item needed immediately.
3. Subparagraph (c) refers to the procurement for the protection of essential security interests of the State [cross refer to where the scope of this topic is discussed] where the procuring entity determines that the use of any other competitive method of procurement is not appropriate.
4. The provisions in subparagraphs (a) to (c) are without prejudice to the general principle contained in article 27 (2) according to which the procuring entity must seek to maximize competition to the extent practicable when it selects a procurement method, and to have regard to the circumstances of the procurement. It is therefore to be understood that where an alternative to competitive negotiation, such as restricted tendering or request for quotations, is available, the procuring entity must select a method so as to ensure the greatest level of competition as is compatible with other circumstances of the procurement, such as the urgent need for the subject matter of the procurement.
5. In conformity with the same principle, subparagraph (b) dealing with cases of urgency owing to a catastrophic event, and subparagraph (c) dealing with procurement for the protection of essential security interests of the State, prevent the procuring entity from resorting to single-source procurement where competitive negotiations are available. In situations covered by these subparagraphs, the procuring entity is required first to consider the use of open tendering or any other competitive method of procurement. Where the procuring entity concludes that the

use of other competitive methods is impractical, it must resort to competitive negotiations, not to single-source procurement, unless it concludes that there is extreme urgency or another distinct ground justifying the use of single-source procurement under paragraph (5) of this article (for example, the absence of a competitive base, exclusive rights involved, etc.). This is because competitive negotiations are inherently more competitive than single-source procurement and more rigorous safeguards are built in the provisions of the Model Law regulating procedures in competitive negotiations, making the latter more structured and transparent than single-source procurement. This method is therefore the preferred alternative to single-source procurement in situations of urgency and for the protection of the essential security interests of the State.

6. It follows from the above considerations that competitive negotiations should not be considered as an alternative to any other methods in the Model Law, other than single-source procurement in the limited situations described in the preceding paragraph. For procurement of subject matter such as advisory services or complex technical items that may require interaction with suppliers, two-stage tendering, request for proposals with dialogue or with consecutive negotiations is available.

7. The unstructured nature of the procedures in competitive dialogue, as described in article 50 and explained in paragraphs [...] below mean managing the use of the method will be the key to ensuring its success in appropriate circumstances. The issues discussed regarding managerial techniques in the context of request for proposals with dialogue proceedings (see paragraphs [...] of the guidance to that procurement method) will apply to competitive negotiations, particularly given the heightened integrity risks that this method involves.<sup>1</sup>

*For a discussion of the changes in conditions for use from the 1994 text, see section A.4 below.*

## 2. Solicitation

*The relevant provision of the revised Model Law on solicitation:*

### **“Article 33. Solicitation in ...competitive negotiations ... Requirement for an advance notice of the procurement**

(3) Where the procuring entity engages in procurement by means of competitive negotiations in accordance with article 29 (4) of this Law, it shall engage in negotiations with a sufficient number of suppliers or contractors to ensure effective competition.

...

(5) Prior to direct solicitation in accordance with the provisions of paragraphs (1), (3) and (4) of this article, the procuring entity shall cause a notice of the procurement to be published in ... (the enacting State specifies

<sup>1</sup> The Working Group may wish to consider whether additional guidance, such as on ensuring effective negotiation skills and capacity on the part of procuring entities, the use of centralized oversight systems and other institutional support for competitive negotiations might be appropriate.

the official gazette or other official publication in which the notice is to be published). The notice shall contain at a minimum the following information:

- (a) The name and address of the procuring entity;
  - (b) A summary of the principal required terms and conditions of the procurement contract or the framework agreement to be entered into in the procurement proceedings, including the nature and quantity, and place of delivery of the goods to be supplied, the nature and location of the construction to be effected, or the nature of the services and the location where they are to be provided, as well as the desired or required time for the supply of the goods or for the completion of the construction, or the timetable for the provision of the services;
  - (c) A declaration pursuant to article 8 of this Law; and
  - (d) The method of procurement to be used.
- (6) The requirements of paragraph (5) shall not apply in the case of urgency as referred to in articles 29 (4) (b) and 29 (5) (b)."

*Proposed text for the Guide:*

8. Paragraph (3) regulates solicitation in competitive negotiations, and is coupled with the requirement of paragraph (5) of this article for an advance notice of the procurement. That notice must specify, in particular, that competitive negotiations will be used and must also provide a summary of the principal terms and conditions of the procurement contract envisaged. This is an essential public oversight measure. On the basis of the information published, any aggrieved supplier or contractor may challenge the use of competitive negotiations where a more transparent and regulated procurement method is available. This safeguard is particularly important in the context of this procurement method and of single-source procurement, both of which are considered exceptional and justified for use only in the very limited cases provided for in article 29 of the Model Law.

9. The procuring entity will not be required to publish such a notice, but may still choose to do so, when competitive negotiations are used in situations of urgency due to catastrophic events (article 29 (4) (b)). This exemption is set out in paragraph (6) of this article. In the other cases of urgency referred to in article 29 (4) (a), providing an advance notice of the procurement is the default rule. This is also the default rule when resort to competitive negotiations is made in procurement for the protection of essential security interests of the State referred to in article 29 (4) (c). The default rule is subject to any exemptions on the basis of confidentiality that may apply under the provisions of law of the enacting State. For example, procurement involving the protection of essential security interests of the State may also involve classified information; in such cases, the procuring entity may be authorized (by the procurement regulations or by other provisions of law of the enacting State) not to publish any public notice related to the procurement (for the guidance on the relevant provisions of the Model Law on confidentiality and procurement involving classified information, see paragraphs ... above).

10. Additional guidance on both the use of advance notices under paragraphs (5) and (6) of article 33 and on the objective identification of suppliers to participate in

the process is found in the guidance on restricted tendering. The issues raised there are also relevant in the context of competitive negotiations.

*For a discussion of the changes as regards solicitation from the 1994 text, see section A.4 below.*

### 3. Procedures

*The relevant provision of the revised Model Law on procedures:*

#### **“Article 50. Competitive negotiations**

(1) Paragraphs (3), (5) and (6) of article 33 of this Law shall apply to the procedure preceding the negotiations.

(2) Any requirements, guidelines, documents, clarifications or other information relative to the negotiations that are communicated by the procuring entity to a supplier or contractor before or during the negotiations shall be communicated on an equal basis to all other suppliers or contractors engaging in negotiations with the procuring entity relative to the procurement, unless they are specific or exclusive to that supplier or contractor, or such communication would be in breach of the confidentiality provisions of article 23 of this Law.

(3) Following completion of negotiations, the procuring entity shall request all suppliers or contractors remaining in the proceedings to present, by a specified date, a best and final offer with respect to all aspects of their proposals.

(4) No negotiations shall take place between the procuring entity and suppliers or contractors with respect to their best and final offers.

(5) The successful offer shall be the offer that best meets the needs of the procuring entity.”

*Proposed text for the Guide:*

11. The article addresses the procedures for competitive negotiations. Safeguards have been included aimed at ensuring transparency and the equal treatment of participants in procurement by means of this procurement method.

12. The article is relatively short in the light of the flexible nature of the method itself. However, it would be wrong to state that procedures of this procurement method remain largely unregulated in the Model Law. This procurement method, as any other, is subject to the general provisions and rules set out in chapters I and II of the Model Law, the procurement regulations and any other bodies of applicable law. For example, under the Model Law, the procuring entity will be required to maintain a detailed record of the procurement proceedings, including details of negotiations with each participating supplier or contractor, and to provide access by suppliers or contractors to the record, as provided by article 24. This requirement is an essential measure for this procurement method to ensure effective oversight, and to permit challenges by aggrieved suppliers.

13. To the extent that the procuring entity complies with all the applicable rules, and that the negotiations are conducted on a concurrent basis and so as to ensure

equal treatment of the suppliers, the procuring entity may organize and conduct the negotiations as it sees fit. The rules that are set out in the present article are intended to confer this freedom upon the procuring entity, while attempting to foster competition in the proceedings and objectivity in the selection and evaluation process.

14. Paragraph (1) cross-refers to the relevant provisions of article 33 on solicitation in competitive negotiations, one of which requires providing an advance notice of the procurement, except in cases of urgency. (For the guidance to the relevant provisions of article 33, see paragraphs ... above.)

15. Paragraph (2), regulating communication of information during negotiations, is subject to the rules on confidentiality contained in article 23 of the Model Law. The provisions are similar to the provisions addressing request for proposals with dialogue contained in article 48 (10). The guidance to article 48 (10) is therefore relevant in the context of this paragraph (see paragraphs ... above).

16. Paragraph (3) provides that the procuring entity should, at the end of the negotiations, request suppliers or contractors to submit best and final offers (BAFOs),<sup>2</sup> on the basis of which the successful offer is to be selected. BAFOs are defined as best and final with respect to all aspects of each supplier's proposal. (Thus, as in request for dialogue procedures (guidance to which is found in [...]), no single set of terms and conditions of the procurement against which final submissions are evaluated is issued in this procurement method.) BAFOs are to be presented by a date specified by the procuring entity in its request for BAFOs. To ensure that all participating suppliers are on an equal footing as regards receiving information about termination of negotiations and available time to prepare their BAFO, it is good practice to issue the request in writing and to communicate it simultaneously to all participating suppliers. The provisions are similar to those of article 48 (11). The guidance to article 48 (11) (see paragraphs ... above) is therefore relevant in the context of this paragraph.

17. UNCITRAL considers the BAFO stage essential since it provides for the equal treatment of participating suppliers. It puts an end to the negotiations and freezes all the specifications and the contract terms offered by suppliers and contractors. In addition, requiring requests for BAFOs to be issued to all suppliers remaining in the negotiations, leaves an audit trail as regards all actual offers that were before the procuring entity and that it should have considered in making the selection in accordance with paragraph (5) of this article. Without that stage, excess discretion is given to the procuring entity to decide with which supplier or contractor to conclude the contract, with no transparency and verifiable traces in the process that would allow effective challenge.

18. Paragraph (4) prohibits negotiations after BAFOs were submitted, so as to conform the competitive negotiations procedure with equivalent stages in other procurement methods and to ensure the equal treatment of suppliers. It draws on similar provisions in article 48 (12). The guidance to article 48 (12) (see paragraphs ... above) is therefore relevant in the context of this paragraph.

---

<sup>2</sup> The Working Group may wish to note that this term will be the subject of description in the glossary of terms to be included in the Guide, explaining (among other things) that there can be only one round of BAFOs.

UNCITRAL considers it best practice to prevent the procuring entity from negotiating further after BAFOs have been presented, and to prevent multiple requests for “BAFOs” and this stance is taken consistently throughout the Model Law where the BAFOs stage is envisaged.

19. The enacting State may impose additional requirements in the context of this procurement method by requiring in the procurement regulations that the procuring entity take steps such as: establishing basic rules and procedures relating to the conduct of the negotiations in order to help ensure that they proceed in an efficient manner; preparing various documents to serve as the basis for the negotiations, including documents setting out the desired technical characteristics of the goods or construction to be procured, or a description of the nature of services to be procured, and the desired contractual terms and conditions; and requesting the suppliers or contractors with which it negotiates to itemize their prices so as to assist the procuring entity in comparing what is being offered by one supplier or contractor during the negotiations with offers from the other suppliers or contractors. (For more detailed guidance on such comparisons, including risk mitigation, see the discussion on evaluation in request for proposals with dialogue proceedings.)

*For a discussion of the changes in procedures from the 1994 text, see section A.4 immediately below.*

**4. Points regarding competitive negotiations proposed to be discussed in the Section of the Guide to Enactment addressing changes from the 1994 text of the Model Law**

*Conditions for use*

20. Competitive negotiations is the title of a procurement method that draws its main features from the method of the same name in the 1994 Model Law. The conditions for use of competitive negotiations in the 1994 Model Law (article 19) have been substantially revised. Competitive negotiations may now be used only in the exceptional circumstances set out in subparagraphs (a) to (c): urgency, catastrophic events and the protection of essential security interests of the enacting State. For further guidance on the use of the method in these circumstances, and related considerations, see paragraphs [...] of the guidance to the method itself.

21. The revised Model Law, unlike the 1994 text, does not require an approval by a designated organ for resort to competitive negotiations. This approach reflects the decision of UNCITRAL, as a general rule, that the Model Law should not require the procuring entity to seek an approval of another body for steps to be taken by the procuring entity (for the guidance on this point, see paragraphs ... above).

*Solicitation*

22. Paragraph (3) of article 33 regulates solicitation in competitive negotiations. It draws on the provisions of article 49 (1) of the 1994 Model Law [detail of differences to be added at a later date].

*Procedures*

23. Article 50 addresses the procedures for competitive negotiations and draws largely on article 49 of the 1994 Model Law. The main change is the introduction of an express prohibition of post-BAFO negotiations in paragraph (4) [detail of other differences to be added at a later date].

## **B. Proposed text for the Guide to Enactment of the revised Model Law addressing issues of single-source procurement**

### **1. Conditions for use**

*The relevant provision of the revised Model Law on conditions for use:*

**“Article 29. Conditions for use of methods of procurement under chapter V of this Law (...single-source procurement)**

(5) A procuring entity may engage in single-source procurement in accordance with the provisions of article 51 of this Law in the following exceptional circumstances:

(a) The subject matter of the procurement is available only from a particular supplier or contractor, or a particular supplier or contractor has exclusive rights in respect of the subject matter of the procurement, such that no reasonable alternative or substitute exists, and the use of any other procurement method would therefore not be possible;

(b) Owing to a catastrophic event, there is an extremely urgent need for the subject matter of the procurement, and engaging in any other method of procurement would be impractical because of the time involved in using those methods;

(c) The procuring entity, having procured goods, equipment, technology or services from a supplier or contractor, determines that additional supplies must be procured from that supplier or contractor for reasons of standardization or because of the need for compatibility with existing goods, equipment, technology or services, taking into account the effectiveness of the original procurement in meeting the needs of the procuring entity, the limited size of the proposed procurement in relation to the original procurement, the reasonableness of the price and the unsuitability of alternatives to the goods or services in question;

(d) Where the procuring entity determines that the use of any other method of procurement is not appropriate for the protection of essential security interests of the State; or

(e) Subject to approval by the [name of the organ designated by the enacting State to issue the approval], and following public notice and adequate opportunity to comment, where procurement from a particular supplier or contractor is necessary in order to implement a socio-economic policy of this State, provided that procurement from no other supplier or contractor is capable of promoting that policy.”

*Proposed text for the Guide:*

1. Paragraph (5) sets out the conditions for use of single-source procurement. The first, in subparagraph (a), refers to objectively justifiable reasons for resort to single-source procurement: the existence of only one supplier or contractor capable of providing the subject matter, either because that supplier or contractor has exclusive rights with respect to the subject matter of the procurement or for other reasons that confirm the exclusivity. The rules concerning the description of the subject matter of the procurement contained in article 10 of the Model Law prohibit the procuring entity from formulating the description of the subject matter of the procurement in a way that artificially limits the market concerned to a single source. Where the risk or practices of formulating such narrow descriptions exist, the use of functional descriptions (performance/output specifications) should be encouraged.<sup>3</sup> The enacting State should in addition ensure, through appropriate authorities, the regular monitoring of the practice of its procurement entities with the use of the ground referred to in subparagraph (a) as justification for resort to single-source procurement since its improper use may encourage monopolies and corruption, whether inadvertently or intentionally. Enacting the requirement for an advance public notice of single-source procurement (contained in article 33 (5) of the Model Law) should be considered an essential safeguard against the negative effects of relying on the ground set out in subparagraph (a) on transparency and accountability in procurement practices.
2. The conditions in subparagraph (b), referring to extreme urgency owing to a catastrophic event, overlap to some extent with the condition for use of the competitive negotiations in the case of urgency owing to a catastrophic event (paragraph (4) (b) of this article). The difference is in the level of urgency: to justify resort to single-source procurement, the urgency must be so extreme that holding negotiations with more than one supplier would be impractical. For example, following a catastrophic event, there may be immediate needs for clean water and medical supplies; a need for semi-permanent shelter may arise out of the same catastrophe but is normally not so urgent. As is the case in competitive negotiations, the need to link the extent of the procurement with the extreme urgency will limit the amount that can be procured using this method.
3. Subparagraph (c) refers to the need for standardization or compatibility with existing goods, equipment, technology or services as the justification for resort to single-source procurement. The use of single-source procurement in such situations must be exceptional: otherwise needs may be cited that are in reality due to poor procurement planning on the part of the procuring entity. Procurement in such situations should therefore also be limited both in size and in time.
4. Subparagraph (d) justifies recourse to single-source procurement for the protection of essential security interests of the State. This provision addresses, in particular, procurement involving classified information where the procuring entity concludes that the information concerned will be insufficiently protected if any other method of procurement, including another exceptional method of procurement such as competitive negotiations, is used.

---

<sup>3</sup> The Working Group may wish to consider the extent to which this point is of general application and its interaction with the main distinguishing features of tendering as compared with request-for-proposals-based procurement methods, as set out in the guidance to articles 26 and 27.

5. Subparagraph (e) has been included in order to permit the use of single-source procurement in cases of serious economic emergency in which such procurement would avert serious harm. A case of this type may be, for example, where an enterprise employing most of the labour force in a particular region or city is threatened with closure unless it obtains a procurement contract. This subparagraph contains safeguards to ensure that it does not give rise to more than a very exceptional use of single-source procurement. It should be interpreted in very restrictive terms, not to allow the use of single-source procurement for such extrinsic considerations, for example, as transfer of technology, shadow-pricing or counter trade.<sup>4</sup>

6. The decision to use single-source procurement in the economic emergency type of circumstance referred to in the provisions would and should ordinarily be taken at the highest levels of Government. The subparagraph therefore requires the procuring entity to receive the prior approval of an organ designated by the enacting State for resort to single-source procurement in such situations. In addition, the subparagraph requires a public notice of the anticipated single-source procurement in the economic emergency type of circumstance and adequate opportunity to comment. Although this stage is not regulated in detail in the Model Law, to make the opportunity to comment meaningful, the procuring entity should allow sufficient time to elapse between the notice and the start of the procurement proceedings. The procuring entity may receive comments from any member of the public and should be expected to provide explanations. The enacting States may wish to regulate further aspects of these provisions in the procurement regulations, in particular, whose comments should specifically be sought (for example, of local communities) and the purpose or the effect of comments, especially negative, if received.

7. Other than in situations referred to in subparagraph (e), the revised Model Law does not require approval by a designated organ for resort to the use of single-source procurement. This approach is in conformity with the decision of UNCITRAL not to require, as a general rule, in the revised Model Law the procuring entity to seek an approval of another body for steps to be taken by the procuring entity (for guidance on this point, see paragraphs ... above). This stance has also been applied as regards procuring entity's decision to resort to single-source procurement. UNCITRAL has however recognized that, some enacting States may require procuring entities to obtain a prior approval from a higher-level authority for use of such an exceptional measure as single-source procurement. While not discouraging such practices in the context of this particular procurement method in order to prevent corruption and arbitrary decisions on the side of the procuring entities, UNCITRAL acknowledges that this safeguard may be illusory: there can be elevated risks of corruption involving the approval chain where resort to single-source procurement is sought in improper cases. At the same time, there can be an unjustifiable waste of time and costs where permission for use of single-source procurement is sought for perfectly appropriate circumstances.

8. In view of the non-competitive character of single-source procurement, this method is considered under the Model Law the method of last resort after all other alternatives had been exhausted. The provisions of paragraph (5) should therefore be

---

<sup>4</sup> The text in this paragraph is taken from the 1994 Guide. The Working Group is invited to reconsider it, in particular in the light of article 11 of the draft revised Model Law.

implemented without prejudice to the general principle contained in article 27 (2) according to which the procuring entity must seek to maximize competition to the extent practicable when it selects a procurement method. It is therefore understood that when an alternative to single-source procurement, such as restricted tendering, request for quotations or competitive negotiation, is appropriate, the procuring entity must select the procurement method that would ensure most competition in the circumstances of the given procurement without jeopardizing, however, other no less important considerations, such as the level of urgency of delivery of the subject matter of the procurement. It is recognized that, except for situations described in subparagraphs (a), (d) and (e), in other situations referred to in paragraph (5) the procuring entity may avoid the use of single-source procurement by using alternative methods or tools or through proper procurement planning. For example, in situations of extreme urgency due to a catastrophic event where negotiations with more than one supplier would be impractical (subparagraph (b)), the procuring entity may consider using procurement methods not involving negotiations, such as request for quotations for procurement of off-the-shelf items. A closed framework agreement without second-stage competition may also effectively address situations of extreme urgency, where it concluded in advance against a background of an identified and probable need occurring on a periodic basis or within a given time frame. With a better procurement planning, framework agreements may also be a viable alternative to single-source procurement in situations referred to in subparagraph (c) (the need for additional supplies from the same source for reasons of standardization and compatibility).

*For a discussion of the changes in conditions for use from the 1994 text, see section B.4 below.*

## 2. Solicitation

*The relevant provision of the revised Model Law on solicitation:*

### **“Article 33. Solicitation in ... single-source procurement. Requirement for an advance notice of the procurement**

(4) Where the procuring entity engages in single-source procurement in accordance with article 29 (5) of this Law, it shall solicit a proposal or price quotation from a single supplier or contractor.

(5) Prior to direct solicitation in accordance with the provisions of paragraphs (1), (3) and (4) of this article, the procuring entity shall cause a notice of the procurement to be published in ... (the enacting State specifies the official gazette or other official publication in which the notice is to be published). The notice shall contain at a minimum the following information:

(a) The name and address of the procuring entity;

(b) A summary of the principal required terms and conditions of the procurement contract or the framework agreement to be entered into in the procurement proceedings, including the nature and quantity, and place of delivery of the goods to be supplied, the nature and location of the construction to be effected, or the nature of the services and the location where they are to be provided, as well as the desired or required time for the supply

of the goods or for the completion of the construction, or the timetable for the provision of the services;

(c) A declaration pursuant to article 8 of this Law; and

(d) The method of procurement to be used.

(6) The requirements of paragraph (5) shall not apply in the case of urgency as referred to in articles 29 (4) (b) and 29 (5) (b).”

*Proposed text for the Guide:*

9. Paragraph (4) regulates solicitation in single-source procurement and is coupled with the requirement in paragraph (5) of this article for an advance notice of the procurement. That notice must specify in particular that single-source procurement will be used and must also provide a summary of the principal required terms and conditions of the envisaged procurement contract. This is an essential public oversight measure. On the basis of the information published, any aggrieved supplier or contractor may challenge the use of single-source procurement where a competitive method of procurement appropriate in the circumstances of the given procurement is available. This safeguard is particularly important in the context of this procurement method, which is considered exceptional and justified for use only in the very limited cases provided for in article 29 (5) of the Model Law.

10. The procuring entity will not be required to publish such a notice, but may still choose to do so, when single-source procurement is used in situations of extreme urgency owing to a catastrophic event (article 29 (5) (b)). This exemption is set out in paragraph (6) of this article. In the other cases justifying resort to single-source procurement, providing an advance notice of the procurement is the default rule, subject to any exemptions on the basis of confidentiality that may apply under the provisions of law of the enacting State. For example, procurement involving the protection of the essential security interests of the State may also involve classified information; in such cases, the procuring entity may be authorized (by the procurement regulations or by other provisions of law of the enacting State) not to publish any public notice related to the procurement. This situation may arise in particular when resort to single-source procurement is made in procurement for the protection of essential security interests of the State under article 29 (5) (d). (For the guidance on the relevant provisions of the Model Law on confidentiality and procurement involving classified information, see paragraphs ... above).

11. Additional guidance on both the use of advance notices under paragraphs (5) and (6) of article 33 and on the objective identification of suppliers to participate in the process is found in the guidance on Restricted tendering. The issues raised there are also relevant in the context of single-source procurement.

*For a discussion of the changes as regards solicitation from the 1994 text, see section B.4 below.*

### 3. Procedures

*The relevant provision of the revised Model Law on procedures:*

**“Article 51. Single-source procurement**

Paragraphs (4) to (6) of article 33 of this Law shall apply to the procedure preceding the solicitation of a proposal or price quotation from a single supplier or contractor. The procuring entity shall engage in negotiations with the supplier or contractor from which a proposal or price quotation is solicited unless such negotiations are not feasible in the circumstances of the procurement concerned.”

*Proposed text for the Guide:*

12. The article sets out relatively simple procedures for single-source procurement procedures. The simplicity reflects the very flexible nature of single-source procurement, which involves a sole supplier or contractor, thus making the procedure essentially a contract negotiation (and which therefore falls outside the general scope of the Model Law). Issues of competition and equal treatment of suppliers or contractors in the procurement proceedings, although important at the stage when the decision on the resort to this procurement method is made, do not arise during the procurement proceedings.

13. The provisions cross-refer to the requirement of an advance notice of the procurement and an exemption thereto in article 33. They also contain the requirement of engaging in negotiations, unless to do so is not feasible. It has been introduced in the light of the utility for the procuring entity to negotiate and request, when feasible and necessary, market data or costs clarifications, in order to avoid unreasonably priced proposals or quotations.

14. The provisions of chapter I are generally applicable to single-source procurement, including the obligation to cancel the procurement in situations described in article 20 (for example, when the sole supplier must be excluded from further participation in the procurement proceedings on the ground of inducement, unfair competitive advantage or conflicts of interest). In addition, a number of provisions of the Model Law aimed at transparency in the procurement proceedings will be applicable, such as article 22 on publication of notices of procurement contract awards, article 24 on keeping the comprehensive record of the procurement proceedings, including justifications for resort to single-source procurement, and article 33 on an advance notice of the procurement. The procedures of single-source procurement should not therefore be regarded as largely unregulated in the Model Law because of the short provisions in article 51. They must be implemented taking into account all applicable provisions of the Model Law as well as those of procurement regulations and other applicable provisions of law of the enacting State.

*For a discussion of the changes in procedures from the 1994 text, see section B.4 immediately below.*

**4. Points regarding single-source procurement proposed to be discussed in the Section of the Guide to Enactment addressing changes from the 1994 text of the Model Law**

*Conditions for use*

15. Article 29 sets out the conditions for use of single-source procurement. It is based on the provisions of article 22 of the 1994 Model Law, save that some justifications for the use of single-source procurement found in the 1994 text have been eliminated. [Detail to be included at a later date.] For further guidance on the use of the method in the circumstances permitted by article 29, and related considerations, see paragraphs [...] of the guidance to the method itself.

16. Other than in situations referred to in article 29 (5) (e) (see paragraphs [...] above), the revised Model Law, unlike the 1994 text, does not require an approval by a designated organ for resort to single-source procurement. This is in conformity with the decision of UNCITRAL not to require, as a general rule, in the revised Model Law the procuring entity to seek an approval of another body for steps to be taken by the procuring entity (for the guidance on this point, see paragraphs ... above). This stance has also been applied as regards procuring entity's decision to resort to single-source procurement, taking into account the changes made in the conditions for use of this procurement method, which, compared to the 1994 Model Law, are considerably more restrictive.

*Solicitation*

17. Paragraph (4) of article 33 regulates solicitation in single-source procurement. It draws on the provisions of article 51 of the 1994 Model Law [detail of differences to be added at a later date].

*Procedures*

18. Article 51 addresses the procedures for single-source procurement. An equivalent provision was not included in the 1994 Model Law. Article 51 of the 1994 Model Law provided only the manner of solicitation, which in the revised Model Law is reflected in article 33 (4) of the revised Model Law. The provisions in the revised Model Law also require the procuring entity to engage in negotiations, unless to do so is not feasible (see the guidance to the article 51 above).

## E. Note by the Secretariat on the draft revised text of the Model Law

(A/CN.9/729 and Add.1-8)

[Original: English]

1. This note sets out in annex I a table of content of the draft revised Model Law as emanated from the work of the nineteenth session of UNCITRAL Working Group I (Procurement) (Vienna, 1-5 November 2010) (the “draft revised Model Law”), showing also concordance between the articles of the draft revised Model Law and the provisions of the 1994 UNCITRAL Model Law on Procurement of Goods, Construction and Services (the “1994 Model Law”).
2. This note sets out in annex II a table of concordance between the articles of the 1994 Model Law and the provisions of the draft revised Model Law.
3. The draft revised Model Law is contained in addenda 1 to 8 to this note.

### Annex I

#### Table of contents of the draft revised Model Law, showing also concordance between the articles of the draft revised Model Law and the provisions of the 1994 Model Law

Article of the draft revised Model Law	Relevant provisions of the 1994 Model Law where applicable
<b>Preamble</b>	<b>Preamble</b>
<b>Chapter I. GENERAL PROVISIONS</b>	<b>Chapter I. GENERAL PROVISIONS</b>
<b>Articles 1-25</b>	
Article 1. Scope of application	Article 1. Scope of application
Article 2. Definitions	Article 2. Definitions
Article 3. International obligations of this State relating to procurement (and intergovernmental agreements within (this State))	Article 3. International obligations of this State relating to procurement [and intergovernmental agreements within (this State)]
Article 4. Procurement regulations	Article 4. Procurement regulations
Article 5. Publication of legal texts	Article 5. Public accessibility of legal texts
Article 6. Information on possible forthcoming procurement ( <b>new provisions</b> )	
Article 7. Communications in procurement	Article 9. Form of communications
Article 8. Participation by suppliers or contractors	Article 8. Participation by suppliers or contractors

Article of the draft revised Model Law	Relevant provisions of the 1994 Model Law where applicable
Article 9. Qualifications of suppliers and contractors	Article 6. Qualifications of suppliers and contractors  Article 10. Rules concerning documentary evidence provided by suppliers or contractors
Article 10. Rules concerning description of the subject matter of the procurement, and the terms and conditions of the procurement contract or framework agreement	Article 16. Rules concerning description of goods, construction or services
Article 11. Rules concerning evaluation criteria and procedures <b>(new provisions based on the 1994 text)</b>	Articles 27 (e), 34 (4), 38 (m), 39 and 48 (3)
Article 12. Rules concerning estimation of the value of procurement <b>(new provisions)</b>	
Article 13. Rules concerning the language of documents	Article 17. Language  Article 29. Language of tenders
Article 14. Rules concerning the manner, place and deadline for presenting applications to pre-qualify or applications for pre-selection or for presenting submissions <b>(new provisions based on the 1994 text)</b>	Articles 7 (3) (a) (iv) and 30 (1) to (4)
Article 15. Clarifications and modifications of solicitation documents	Article 28. Clarifications and modifications of solicitation documents
Article 16. Tender securities	Article 32. Tender securities
Article 17. Pre-qualification proceedings	Article 7. Pre-qualification proceedings  Also provisions related to pre-qualification of articles 23, 24 and 25
Article 18. Cancellation of the procurement	Article 12. Rejection of all tenders, proposals, offers or quotations
Article 19. Rejection of abnormally low submissions <b>(new provisions)</b>	
Article 20. Exclusion of a supplier or contractor from the procurement proceedings on the grounds of inducements from the supplier or contractor, an unfair competitive advantage or conflicts of interest	Article 15. Inducements from suppliers or contractors

<b>Article of the draft revised Model Law</b>	<b>Relevant provisions of the 1994 Model Law where applicable</b>
Article 21. Acceptance of the successful submission and entry into force of the procurement contract	Article 13. Entry into force of the procurement contract  Article 36. Acceptance of tender and entry into force of procurement contract
Article 22. Public notice of awards of procurement contract and framework agreement	Article 14. Public notice of procurement contract awards
Article 23. Confidentiality	Articles 45, 48 (7) and 49 (3)
Article 24. Documentary record of procurement proceedings	Article 11. Record of procurement proceedings
Article 25. Code of conduct (new provisions)	
<b>Chapter II. METHODS OF PROCUREMENT AND THEIR CONDITIONS FOR USE. SOLICITATION AND NOTICES OF THE PROCUREMENT</b>  <b>Articles 26-34</b>	<b>Chapter II. METHODS OF PROCUREMENT AND THEIR CONDITIONS FOR USE</b>
<b>Section I. METHODS OF PROCUREMENT AND THEIR CONDITIONS FOR USE</b>  <b>Articles 26-31</b>	
Article 26. Methods of procurement (new provisions)	
Article 27. General rules applicable to the selection of a procurement method	Article 18. Methods of procurement
Article 28. Conditions for use of methods of procurement under chapter IV of this Law (restricted tendering, request for quotations and request for proposals without negotiation)	Articles 20 and 21
Article 29. Conditions for use of methods of procurement under chapter V of this Law (two-stage tendering, request for proposals with dialogue, request for proposals with consecutive negotiations, competitive negotiations and single-source procurement)	Articles 19 and 22
Article 30. Conditions for use of an electronic reverse auction	

<b>Article of the draft revised Model Law</b>	<b>Relevant provisions of the 1994 Model Law where applicable</b>
<b>(new provisions)</b>	
Article 31. Conditions for use of a framework agreement procedure <b>(new provisions)</b>	
<b>Section II. SOLICITATION AND NOTICES OF THE PROCUREMENT</b>  <b>Articles 32-34 (new provisions based on the relevant provisions of the 1994 Model Law)</b>	
Article 32. Solicitation in open tendering, two-stage tendering and in procurement by means of an electronic reverse auction	Article 24. Procedures for soliciting tenders or applications to pre-qualify
Article 33. Solicitation in restricted tendering, request for quotations, competitive negotiations and single-source procurement. Requirement for an advance notice of the procurement	Articles 47 (1) and (2), 49 (1), 50 (1) and 51
Article 34. Solicitation in request for proposals proceedings	Articles 37 and 48 (1) and (2)
<b>Chapter III. OPEN TENDERING</b>  <b>Articles 35-43</b>	<b>Chapter III. TENDERING PROCEEDINGS</b>
Article 35. Procedures for soliciting tenders	Article 24. Procedures for soliciting tenders or applications to pre-qualify
Article 36. Contents of invitation to tender	Article 25. Contents of invitation to tender and invitation to pre-qualify (para. (1))
Article 37. Provision of solicitation documents	Article 26. Provision of solicitation documents
Article 38. Contents of solicitation documents	Article 27. Contents of solicitation documents
Article 39. Presentation of tenders	Article 30. Submission of tenders (paras. (5) and (6))
Article 40. Period of effectiveness of tenders; modification and withdrawal of tenders	Article 31. Period of effectiveness of tenders; modification and withdrawal of tenders
Article 41. Opening of tenders	Article 33. Opening of tenders
Article 42. Examination and evaluation of tenders	Article 34. Examination, evaluation and comparison of tenders
Article 43. Prohibition of negotiations with suppliers or contractors	Article 35. Prohibition of negotiations with suppliers or contractors

Article of the draft revised Model Law	Relevant provisions of the 1994 Model Law where applicable
<b>Chapter IV.</b> <b>PROCEDURES FOR RESTRICTED TENDERING, REQUEST FOR QUOTATIONS AND REQUEST FOR PROPOSALS WITHOUT NEGOTIATION</b>  <b>Articles 44-46</b>	Chapter IV, article 42 and other relevant provisions; and chapter V, articles 47 and 50
Article 44. Restricted tendering	Article 47. Restricted tendering
Article 45. Request for quotations	Article 50. Request for quotations
Article 46. Request for proposals without negotiation	Article 42. Selection procedure without negotiation, and other relevant provisions of chapter IV. Principal method for procurement of services
<b>Chapter V.</b> <b>PROCEDURES FOR TWO-STAGE TENDERING, REQUEST FOR PROPOSALS WITH DIALOGUE, REQUEST FOR PROPOSALS WITH CONSECUTIVE NEGOTIATIONS, COMPETITIVE NEGOTIATIONS AND SINGLE-SOURCE PROCUREMENT</b>  <b>Articles 47-51</b>	Chapter IV, articles 43 and 44 and other relevant provisions; chapter V, articles 46, 48, 49 and 51
Article 47. Two-stage tendering	Article 46. Two-stage tendering
Article 48. Request for proposals with dialogue	Article 43. Selection procedure with simultaneous negotiations Article 48. Request for proposals
Article 49. Request for proposals with consecutive negotiations	Article 44. Selection procedure with consecutive negotiations
Article 50. Competitive negotiations	Article 49. Competitive negotiation

**(A/CN.9/729/Add.1) (Original: English)**  
**Note by the Secretariat on the draft revised text of the Model Law**

**ADDENDUM**

This note sets out a proposal for the Preamble and articles 1 to 13 of chapter I (General provisions) of the revised Model Law.

**UNCITRAL MODEL LAW ON PUBLIC  
PROCUREMENT**

**Preamble**

WHEREAS the [Government] [Parliament] of ... considers it desirable to regulate procurement so as to promote the objectives of:

- (a) Maximizing economy and efficiency in procurement;
- (b) Fostering and encouraging participation in procurement proceedings by suppliers and contractors regardless of nationality, and thereby promoting international trade;
- (c) Promoting competition among suppliers and contractors for the supply of the subject matter of the procurement;
- (d) Providing for the fair and equitable treatment of all suppliers and contractors;
- (e) Promoting the integrity of, and fairness and public confidence in, the procurement process;
- (f) Achieving transparency in the procedures relating to procurement.

Be it therefore enacted as follows.

**CHAPTER I. GENERAL PROVISIONS**

**Article 1. Scope of application**

This Law applies to all public procurement.

**Article 2. Definitions**

For the purposes of this Law:

- (a) “Currency” includes monetary unit of account;
- (b) “Direct solicitation” means solicitation addressed directly to one or a restricted number of suppliers or contractors. This excludes solicitation addressed to a limited number of suppliers or contractors following pre-qualification or preselection proceedings;

(c) “Domestic procurement” means procurement limited to domestic suppliers or contractors pursuant to article 8 of this Law;

(d) “Electronic reverse auction” means an online real-time purchasing technique utilized by the procuring entity to select the successful submission, which involves presentation by suppliers or contractors of successively lowered bids during a scheduled period of time and the automatic evaluation of bids;

(e) “Framework agreement procedure” means a procurement conducted in two stages: a first stage to select supplier(s) or contractor(s) to be the party or parties to a framework agreement with a procuring entity, and a second stage to award a procurement contract under the framework agreement to a supplier or contractor party to the framework agreement:

(i) “Framework agreement” means an agreement or agreements between the procuring entity and the selected supplier(s) or contractor(s) concluded upon completion of the first stage of the framework agreement procedure;

(ii) “Closed framework agreement” means a framework agreement to which no supplier or contractor that is not initially a party to the framework agreement may subsequently become a party;

(iii) “Open framework agreement” means a framework agreement to which supplier(s) or contractor(s) in addition to the initial parties may subsequently become a party or parties;

(iv) “Framework agreement procedure with second-stage competition” means a procedure under an open framework agreement or a closed framework agreement with more than one supplier or contractor in which certain terms and conditions of the procurement that cannot be established with sufficient precision when the framework agreement is concluded are to be established or refined through the second-stage competition;

(v) “Framework agreement procedure without second-stage competition” means a procedure under a closed framework agreement in which all terms and conditions of the procurement are established when the framework agreement is concluded;

(f) “Pre-qualification documents” means documents issued by the procuring entity under article 17 of this Law that set out the terms and conditions of the pre-qualification proceedings;

(g) “Preselection documents” means documents issued by the procuring entity under article 48 (3) of this Law that set out the terms and conditions of the preselection proceedings;

(h) “Procurement” means the acquisition of goods, construction or services (the “subject matter of the procurement”);

(i) “Procurement contract(s)” means a contract or contracts concluded between the procuring entity and supplier(s) or contractor(s) at the end of the procurement proceedings;

(j) “Procurement involving classified information” means procurement in which the procuring entity may be authorized by the procurement regulations or by

other provisions of law of this State to take measures and impose requirements for the protection of classified information;

(k) “Procurement regulations” means regulations enacted in accordance with article 4 of this Law;

(l) “Procuring entity” means:

(i) *Option I*

Any governmental department, agency, organ or other unit, or any subdivision or multiplicity thereof, that engages in procurement, except ... ; (and)

*Option II*

Any department, agency, organ or other unit, or any subdivision or multiplicity thereof, of the (“Government” or other term used to refer to the national Government of the enacting State) that engages in procurement, except ... ; (and)

(ii) (The enacting State may insert in this subparagraph and, if necessary, in subsequent subparagraphs, other entities or enterprises, or categories thereof, to be included in the definition of “procuring entity”);

(m) “Public procurement” means procurement carried out by a procuring entity;

(n) “Socio-economic policies” means environmental, social, economic and other policies of this State authorized or required by the procurement regulations or other provisions of law of this State to be taken into account by the procuring entity in the procurement proceedings. (The enacting State may expand this subparagraph by providing an illustrative list of such policies.);

(o) “Solicitation” means an invitation to tender or to present proposals, quotations or bids, according to the context;

(p) “Solicitation documents” means documents issued by the procuring entity, including any amendments thereto, that set out the terms and conditions of the given procurement;

(q) “Standstill period” means the period starting from the dispatch of a notice as required by article 21 (2) of this Law, during which the procuring entity cannot accept the successful submission and during which suppliers or contractors can challenge, under chapter VIII of this Law, the decision so notified;

(r) “Submission(s)” means tender(s), proposal(s), offer(s), quotation(s) and bid(s) referred to collectively or generically;

(s) “Supplier or contractor” means, according to the context, any potential party or any party to the procurement proceedings with the procuring entity;

(t) “Tender security” means a security required from suppliers or contractors by the procuring entity and provided to the procuring entity to secure the fulfilment of any obligation referred to in article 16 (1) (f) of this Law and includes such arrangements as bank guarantees, surety bonds, standby letters of credit, cheques on which a bank is primarily liable, cash deposits, promissory notes and bills of

exchange. For the avoidance of doubt, the term excludes any security for the performance of the contract.

**Article 3. International obligations of this State relating to  
procurement (and intergovernmental agreements  
within (this State))<sup>1</sup>**

To the extent that this Law conflicts with an obligation of this State under or arising out of any:

(a) Treaty or other form of agreement to which it is a party with one or more other States,

(b) Agreement entered into by this State with an intergovernmental international financing institution, or

((c) Agreement between the federal Government of [name of federal State] and any subdivision or subdivisions of [name of federal State], or between any two or more such subdivisions,)

the requirements of the treaty or agreement shall prevail; but in all other respects, the procurement shall be governed by this Law.

**Article 4. Procurement regulations**

The [name of the organ or authority authorized to promulgate the procurement regulations] is authorized to promulgate procurement regulations to fulfil the objectives and to implement the provisions of this Law.

**Article 5. Publication of legal texts**

(1) Except as provided for in paragraph (2) of this article, the text of this Law, the procurement regulations and other legal texts of general application in connection with procurement covered by this Law, and all amendments thereto, shall be promptly made accessible to the public and systematically maintained.

(2) Judicial decisions and administrative rulings with precedent value in connection with procurement covered by this Law shall be made available to the public.

**Article 6. Information on possible forthcoming procurement**

(1) Procuring entities may publish information regarding planned procurement activities for forthcoming months or years.

(2) Procuring entities may also publish an advance notice of possible future procurement.

(3) Publication under this article does not constitute a solicitation, does not oblige the procuring entity to issue a solicitation and does not confer any rights on suppliers or contractors.

---

<sup>1</sup> The texts in parenthesis in this article are relevant to, and intended for consideration by, federal States.

**Article 7. Communications in procurement**

(1) Any document, notification, decision or any other information generated in the course of a procurement and communicated as required by this Law, including in connection with challenge and appeal proceedings under chapter VIII or in the course of a meeting, or forming part of the record of procurement proceedings under article 24, shall be in a form that provides a record of the content of the information and that is accessible so as to be usable for subsequent reference.

(2) Direct solicitation and communication of information between suppliers or contractors and the procuring entity referred to in articles 16 (1) (d), 17 (6) and (9), 40 (2) (a), 42 (1) and 49 (2) to (4), may be made by means that do not provide a record of the content of the information on the condition that, immediately thereafter, confirmation of the communication is given to the recipient of the communication in a form that provides a record of the content of the information and that is accessible so as to be usable for subsequent reference.

(3) The procuring entity, when first soliciting the participation of suppliers or contractors in the procurement proceedings, shall specify:

(a) Any requirement of form;

(b) In procurement involving classified information, if the procuring entity considers it necessary, measures and requirements needed to ensure the protection of classified information at the requisite level;

(c) The means to be used to communicate information by or on behalf of the procuring entity to a supplier or contractor or to the public or by a supplier or contractor to the procuring entity or other entity acting on its behalf;

(d) The means to be used to satisfy all requirements under this Law for information to be in writing or for a signature; and

(e) The means to be used to hold any meeting of suppliers or contractors.

(4) The procuring entity may use only those means of communication that are in common use by suppliers or contractors in the context of the particular procurement. In any meeting held with suppliers or contractors, the procuring entity shall use only those means that ensure in addition that suppliers or contractors can fully and contemporaneously participate in the meeting.

(5) The procuring entity shall put in place appropriate measures to secure the authenticity, integrity and confidentiality of information concerned.

**Article 8. Participation by suppliers or contractors**

(1) Suppliers or contractors shall be permitted to participate in procurement proceedings without regard to nationality, except where the procuring entity decides to limit participation in procurement proceedings on the basis of nationality on grounds specified in the procurement regulations or other provisions of law of this State.

(2) Except when authorized or required to do so by the procurement regulations or other provisions of law of this State, the procuring entity shall establish no other requirement aimed at limiting participation of suppliers or contractors in

procurement proceedings that discriminates against or among suppliers or contractors or against categories thereof.

(3) The procuring entity, when first soliciting the participation of suppliers or contractors in the procurement proceedings, shall declare whether participation of suppliers or contractors in the procurement proceedings is limited pursuant to this article and on which ground. Any such declaration may not later be altered.

(4) A procuring entity that decides to limit participation of suppliers or contractors in procurement proceedings pursuant to this article shall include in the record of the procurement proceedings a statement of the reasons and circumstances on which it relied.

(5) The procuring entity shall make available to any member of the public, upon request, its reasons for limiting participation of suppliers or contractors in the procurement proceedings pursuant to this article.

#### **Article 9. Qualifications of suppliers and contractors**

(1) This article applies to the ascertainment by the procuring entity of the qualifications of suppliers or contractors at any stage of the procurement proceedings.

(2) Suppliers or contractors shall meet such of the following criteria as the procuring entity considers appropriate and relevant in the circumstances of the particular procurement:

(a) That they have the necessary professional, technical and environmental qualifications, professional and technical competence, financial resources, equipment and other physical facilities, managerial capability, reliability, experience and the personnel to perform the procurement contract;

(b) That they meet ethical and other standards applicable in this State;

(c) That they have legal capacity to enter into the procurement contract;

(d) That they are not insolvent, in receivership, bankrupt or being wound up, their affairs are not being administered by a court or a judicial officer, their business activities have not been suspended, and they are not the subject of legal proceedings for any of the foregoing;

(e) That they have fulfilled their obligations to pay taxes and social security contributions in this State;

(f) That they have not, and their directors or officers have not, been convicted of any criminal offence related to their professional conduct or the making of false statements or misrepresentations as to their qualifications to enter into a procurement contract within a period of ... years (the enacting State specifies the period of time) preceding the commencement of the procurement proceedings, or have not been otherwise disqualified pursuant to administrative suspension or debarment proceedings.

(3) Subject to the right of suppliers or contractors to protect their intellectual property or trade secrets, the procuring entity may require suppliers or contractors participating in procurement proceedings to provide appropriate documentary

evidence or other information to satisfy itself that the suppliers or contractors are qualified in accordance with the criteria referred to in paragraph (2).

(4) Any requirement established pursuant to this article shall be set out in the pre-qualification or preselection documents, if any, and in the solicitation documents, and shall apply equally to all suppliers or contractors. A procuring entity shall impose no criterion, requirement or procedure with respect to the qualifications of suppliers or contractors other than those provided for in this Law.

(5) The procuring entity shall evaluate the qualifications of suppliers or contractors in accordance with the qualification criteria and procedures set out in the pre-qualification or preselection documents, if any, and in the solicitation documents.

(6) Other than any criterion, requirement or procedure that may be imposed by the procuring entity in accordance with article 8 of this Law, the procuring entity shall establish no criterion, requirement or procedure with respect to the qualifications of suppliers or contractors that discriminates against or among suppliers or contractors or against categories thereof, or that is not objectively justifiable.

(7) Notwithstanding paragraph (6) of this article, the procuring entity may require the legalization of documentary evidence provided by the supplier or contractor presenting the successful submission so as to demonstrate its qualifications for the particular procurement. In doing so, the procuring entity shall not impose any requirements as to the legalization of the documentary evidence other than those provided for in the laws of this State relating to the legalization of documents of the type in question.

(8) (a) The procuring entity shall disqualify a supplier or contractor if it finds at any time that the information submitted concerning the qualifications of the supplier or contractor was false;

(b) A procuring entity may disqualify a supplier or contractor if it finds at any time that the information submitted concerning the qualifications of the supplier or contractor was materially inaccurate or materially incomplete;

(c) Other than in a case to which subparagraph (a) of this paragraph applies, a procuring entity may not disqualify a supplier or contractor on the ground that information submitted concerning the qualifications of the supplier or contractor was inaccurate or incomplete in a non-material respect. The supplier or contractor may, however, be disqualified if it fails to remedy such deficiencies promptly upon request by the procuring entity;

(d) The procuring entity may require a supplier or contractor that was pre-qualified in accordance with article 17 of this Law to demonstrate its qualifications again in accordance with the same criteria used to pre-qualify such supplier or contractor. The procuring entity shall disqualify any supplier or contractor that fails to demonstrate its qualifications again if requested to do so. The procuring entity shall promptly notify each supplier or contractor requested to demonstrate its qualifications again as to whether or not the supplier or contractor has done so to the satisfaction of the procuring entity.

**Article 10. Rules concerning description of the subject matter of the procurement, and the terms and conditions of the procurement contract or framework agreement**

(1) The procuring entity shall set out in the pre-qualification or preselection documents, if any, and in the solicitation documents, the description of the subject matter of the procurement that it will use in the examination of submissions, including the minimum requirements that submissions must meet in order to be considered responsive and the manner in which those minimum requirements are to be applied.

(2) Other than any criterion, requirement or procedure that may be imposed by the procuring entity in accordance with article 8 of this Law, no description of the subject matter of a procurement that may restrict the participation of suppliers or contractors in or their access to the procurement proceedings, including any restriction based on nationality, shall be included or used in the pre-qualification or preselection documents, if any, or in the solicitation documents.

(3) The description of the subject matter of the procurement may include specifications, plans, drawings, designs, requirements, including concerning testing and test methods, packaging, marking or labelling or conformity certification, and symbols and terminology.

(4) To the extent practicable, any description of the subject matter of the procurement shall be objective, functional and generic, and shall set out the relevant technical and quality characteristics or the performance characteristics of that subject matter. There shall be no requirement for or reference to a particular trademark or trade name, patent, design or type, specific origin or producer unless there is no sufficiently precise or intelligible way of describing the characteristics of the subject matter of the procurement and provided that words such as “or equivalent” are included.

(5) (a) Standardized features, requirements, symbols and terminology relating to the technical and quality characteristics of the subject matter of the procurement shall be used, where available, in formulating any description of the subject matter of the procurement to be included in the pre-qualification or preselection documents, if any, and in the solicitation documents;

(b) Due regard shall be had for the use of standardized trade terms and standardized conditions, where available, in formulating the terms and conditions of the procurement and the procurement contract or the framework agreement to be entered into in the procurement proceedings, and in formulating other relevant aspects of the pre-qualification or preselection documents, if any, and solicitation documents.

**Article 11. Rules concerning evaluation criteria and procedures**

(1) Except for the criteria set out in paragraph (4) of this article, the evaluation criteria shall relate to the subject matter of the procurement.

(2) The evaluation criteria may include:

(a) The price;

(b) The cost of operating, maintaining and repairing goods or construction, the time for delivery of goods, completion of construction or provision of services, the characteristics of the subject matter of the procurement, such as the functional characteristics of goods or construction and the environmental characteristics of the subject matter, the terms of payment and of guarantees in respect of the subject matter of the procurement;

(c) Where relevant in procurement conducted in accordance with articles 46, 48 and 49, the experience, reliability and professional and managerial competence of the supplier or contractor and of the personnel to be involved in providing the subject matter of the procurement.

(3) All non-price evaluation criteria shall, to the extent practicable, be objective, quantifiable and expressed in monetary terms.

(4) In addition to the criteria set out in paragraph (2), the evaluation criteria may include:

(a) Any criteria that the procurement regulations or other provisions of law of this State authorize or require to be taken into account;

(b) A margin of preference for the benefit of domestic suppliers or contractors or domestically produced goods, if authorized or required by the procurement regulations or other provisions of law of this State. The margin of preference shall be calculated in accordance with the procurement regulations.

(5) The procuring entity shall set out in the solicitation documents:

(a) Whether the successful submission will be ascertained on the basis of price or of price and other criteria;

(b) All evaluation criteria established pursuant to this article, including the price and any margin of preference;

(c) Where any criteria other than price are to be used in the evaluation procedure, the relative weights of all evaluation criteria, including price and any margin of preference, except where the procurement is conducted under article 48, in which case the procuring entity shall list all evaluation criteria in descending order of importance;

(d) The manner of application of the criteria in the evaluation procedure.

(6) In evaluating submissions and determining the successful submission, the procuring entity shall use only those criteria and procedures that have been set out in the solicitation documents, and shall apply those criteria and procedures in the manner that has been disclosed in those solicitation documents. No criterion or procedure shall be used that has not been set out in accordance with this provision.

#### **Article 12. Rules concerning estimation of the value of procurement**

(1) A procuring entity shall neither divide its procurement nor use a particular valuation method for estimating the value of procurement so as to limit competition among suppliers or contractors or otherwise avoid its obligations under this Law.

(2) In estimating the value of procurement, the procuring entity shall include the estimated maximum total value of the procurement contract or of all procurement contracts envisaged under a framework agreement over its entire duration, taking into account all forms of remuneration.

### **Article 13. Rules concerning the language of documents**

(1) The pre-qualification or preselection documents, if any, and the solicitation documents shall be formulated in ... (the enacting State specifies its official language or languages) (and in a language customarily used in international trade unless decided otherwise by the procuring entity in the circumstances referred to in article 32 (4) of this Law).

(2) Applications to pre-qualify or for preselection, if any, and submissions may be formulated and presented in the language of the pre-qualification or preselection documents, if any, and solicitation documents, respectively, or in any other language permitted by those documents.

**(A/CN.9/729/Add.2) (Original: English)**  
**Note by the Secretariat on the draft revised text of the Model Law**

**ADDENDUM**

This note sets out a proposal for articles 14-25 of chapter I (General provisions).

**CHAPTER I. GENERAL PROVISIONS**  
*(continued)*

**Article 14. Rules concerning the manner, place and deadline for presenting applications to pre-qualify or applications for preselection or for presenting submissions**

- (1) The manner, place and deadline for presenting applications to pre-qualify or for preselection shall be set out in the invitation to pre-qualify or to preselection and the pre-qualification or preselection documents, as applicable. The manner, place and deadline for presenting submissions shall be set out in the solicitation documents.
- (2) Deadlines for presenting applications to pre-qualify or for preselection or for presenting submissions shall be expressed as a specific date and time and shall allow sufficient time for suppliers or contractors to prepare and present their applications or submissions, taking into account the reasonable needs of the procuring entity.
- (3) If the procuring entity issues a clarification or modification of the pre-qualification, preselection or solicitation documents, it shall, prior to applicable deadline for presenting applications to pre-qualify or for preselection or for presenting submissions, extend the deadline if necessary or as required under article 15 (3) of this Law, in order to afford suppliers or contractors sufficient time to take the clarification or modification into account in their applications or submissions.
- (4) The procuring entity may, in its absolute discretion, prior to a deadline for presenting applications to pre-qualify or for preselection or for presenting submissions, extend the applicable deadline if it is not possible for one or more suppliers or contractors to present their applications or submissions by the deadline initially stipulated, because of any circumstance beyond their control.
- (5) Notice of any extension of the deadline shall be given promptly to each supplier or contractor to which the procuring entity provided the pre-qualification, preselection or solicitation documents.

**Article 15. Clarifications and modifications of solicitation documents**

- (1) A supplier or contractor may request a clarification of the solicitation documents from the procuring entity. The procuring entity shall respond to any request by a supplier or contractor for clarification of the solicitation documents that is received by the procuring entity within a reasonable time prior to the deadline for

presenting submissions. The procuring entity shall respond within such time as will enable the supplier or contractor to present its submission in timely fashion and shall, without identifying the source of the request, communicate the clarification to all suppliers or contractors to which the procuring entity has provided the solicitation documents.

(2) At any time prior to the deadline for presenting submissions, the procuring entity may, for any reason, whether on its own initiative or as a result of a request for clarification by a supplier or contractor, modify the solicitation documents by issuing an addendum. The addendum shall be communicated promptly to all suppliers or contractors to which the procuring entity has provided the solicitation documents and shall be binding on those suppliers or contractors.

(3) If as a result of a clarification or modification issued in accordance with this article, the information published when first soliciting the participation of suppliers or contractors in the procurement proceedings becomes materially inaccurate, the procuring entity shall cause the amended information to be published in the same manner and place in which the original information was published, and shall extend the deadline for presentation of submissions as provided for in article 14 (3) of this Law.

(4) If the procuring entity convenes a meeting of suppliers or contractors, it shall prepare minutes of the meeting containing the requests submitted at the meeting for clarification of the solicitation documents, and its responses to those requests, without identifying the sources of the requests. The minutes shall be provided promptly to all suppliers or contractors to which the procuring entity provided the solicitation documents, so as to enable those suppliers or contractors to take the minutes into account in preparing their submissions.

#### **Article 16. Tender securities**

(1) When the procuring entity requires suppliers or contractors presenting submissions to provide a tender security:

(a) The requirement shall apply to all suppliers or contractors;

(b) The solicitation documents may stipulate that the issuer of the tender security and the confirmer, if any, of the tender security, as well as the form and terms of the tender security, must be acceptable to the procuring entity. In cases of domestic procurement, the solicitation documents may in addition stipulate that the tender security shall be issued by an issuer in this State;

(c) Notwithstanding the provisions of subparagraph (b) of this paragraph, a tender security shall not be rejected by the procuring entity on the grounds that the tender security was not issued by an issuer in this State if the tender security and the issuer otherwise conform to requirements set out in the solicitation documents, unless:

(i) The acceptance by the procuring entity of such a tender security would be in violation of a law of this State; or

(ii) The procuring entity in cases of domestic procurement requires a tender security to be issued by an issuer in this State;

(d) Prior to presenting a submission, a supplier or contractor may request the procuring entity to confirm the acceptability of a proposed issuer of a tender security, or of a proposed confirmer, if required; the procuring entity shall respond promptly to such a request;

(e) Confirmation of the acceptability of a proposed issuer or of any proposed confirmer does not preclude the procuring entity from rejecting the tender security on the ground that the issuer or the confirmer, as the case may be, has become insolvent or has otherwise ceased to be creditworthy;

(f) The procuring entity shall specify in the solicitation documents any requirements with respect to the issuer and the nature, form, amount and other principal terms and conditions of the required tender security; any requirement that refers directly or indirectly to the conduct of the supplier or contractor presenting the submission may relate only to:

(i) Withdrawal or modification of the submission after the deadline for presenting submissions, or before the deadline if so stipulated in the solicitation documents;

(ii) Failure to sign a procurement contract if so required by the solicitation documents; and

(iii) Failure to provide a required security for the performance of the contract after the successful submission has been accepted or to comply with any other condition precedent to signing the procurement contract specified in the solicitation documents.

(2) The procuring entity shall make no claim to the amount of the tender security, and shall promptly return, or procure the return of, the security document after the earliest of the following events:

(a) The expiry of the tender security;

(b) The entry into force of a procurement contract and the provision of a security for the performance of the contract, if such a security is required by the solicitation documents;

(c) The cancellation of the procurement;

(d) The withdrawal of a submission prior to the deadline for presenting submissions, unless the solicitation documents stipulate that no such withdrawal is permitted.

#### **Article 17. Pre-qualification proceedings**

(1) The procuring entity may engage in pre-qualification proceedings with a view to identifying, prior to solicitation, suppliers and contractors that are qualified. The provisions of article 9 of this Law shall apply to pre-qualification proceedings.

(2) If the procuring entity engages in pre-qualification proceedings, it shall cause an invitation to pre-qualify to be published in ... (the enacting State specifies the official gazette or other official publication in which the invitation to pre-qualify is to be published). Unless decided otherwise by the procuring entity in the circumstances referred to in article 32 (4) of this Law, the invitation to pre-qualify shall also be published, in a language customarily used in international trade, in a

newspaper of wide international circulation or in a relevant trade publication or technical or professional journal of wide international circulation.

(3) The invitation to pre-qualify shall include the following information:

(a) The name and address of the procuring entity;

(b) A summary of the principal required terms and conditions of the procurement contract or the framework agreement to be entered into in the procurement proceedings, including the nature and quantity, and place of delivery of the goods to be supplied, the nature and location of the construction to be effected, or the nature of the services and the location where they are to be provided, as well as the desired or required time for the supply of the goods or for the completion of the construction, or the timetable for the provision of the services;

(c) The criteria and procedures to be used for ascertaining the qualifications of suppliers or contractors, in conformity with article 9 of this Law;

(d) A declaration as required by article 8 of this Law;

(e) The means of obtaining the pre-qualification documents and the place where they may be obtained;

(f) The price, if any, to be charged by the procuring entity for the pre-qualification documents and, subsequent to pre-qualification, for the solicitation documents;

(g) If a price is charged, the means of payment for the pre-qualification documents and, subsequent to pre-qualification, for the solicitation documents, and the currency of payment;

(h) The language or languages in which the pre-qualification documents and, subsequent to pre-qualification, the solicitation documents are available;

(i) The manner, place and deadline for presenting applications to pre-qualify and, if already known, the manner, place and deadline for presenting submissions, in conformity with article 14 of this Law.

(4) The procuring entity shall provide a set of pre-qualification documents to each supplier or contractor that requests them in accordance with the invitation to pre-qualify and that pays the price, if any, charged for those documents. The price that the procuring entity may charge for the pre-qualification documents shall reflect only the cost of providing them to suppliers or contractors.

(5) The pre-qualification documents shall include the following information:

(a) Instructions for preparing and presenting pre-qualification applications;

(b) Any documentary evidence or other information that must be presented by suppliers or contractors to demonstrate their qualifications;

(c) The name, functional title and address of one or more officers or employees of the procuring entity who are authorized to communicate directly with and to receive communications directly from suppliers or contractors in connection with the pre-qualification proceedings, without the intervention of an intermediary;

(d) References to this Law, the procurement regulations and other laws and regulations directly pertinent to the pre-qualification proceedings and the place where these laws and regulations may be found;

(e) Any other requirements that may be established by the procuring entity in conformity with this Law and the procurement regulations relating to the preparation and presentation of applications to pre-qualify and to the pre-qualification proceedings.

(6) The procuring entity shall respond to any request by a supplier or contractor for clarification of the pre-qualification documents that is received by the procuring entity within a reasonable time prior to the deadline for presenting applications to pre-qualify. The procuring entity shall respond within such time as will enable the supplier or contractor to present its application to pre-qualify in timely fashion. The response to any request that might reasonably be expected to be of interest to other suppliers or contractors shall, without identifying the source of the request, be communicated to all suppliers or contractors to which the procuring entity has provided the pre-qualification documents.

(7) The procuring entity shall take a decision with respect to the qualifications of each supplier or contractor presenting an application to pre-qualify. In reaching that decision, the procuring entity shall apply only the criteria and procedures set out in the invitation to pre-qualify and in the pre-qualification documents.

(8) Only suppliers or contractors that have been pre-qualified are entitled to participate further in the procurement proceedings.

(9) The procuring entity shall promptly notify each supplier or contractor presenting an application to pre-qualify whether or not it has been pre-qualified. It shall also make available to any member of the public, upon request, the names of all suppliers or contractors that have been pre-qualified.

(10) The procuring entity shall promptly communicate to each supplier or contractor that has not been pre-qualified the reasons therefor.

#### **Article 18. Cancellation of the procurement**

(1) The procuring entity may cancel the procurement at any time prior to the acceptance of the successful submission and, after the successful submission was accepted, in the circumstances referred to in article 21 (8) of this Law. The procuring entity shall not open any tenders or proposals after taking a decision to cancel the procurement.

(2) The decision of the procuring entity to cancel the procurement and reasons for the decision shall be included in the record of the procurement proceedings and promptly communicated to any supplier or contractor that presented a submission. The procuring entity shall in addition promptly publish a notice of the cancellation of the procurement in the same manner and place in which the original information regarding the procurement proceedings was published, and return any tenders or proposals that remain unopened at the time of the decision to the suppliers or contractors that presented them.

(3) Unless the cancellation of the procurement was a consequence of irresponsible or dilatory conduct on the part of the procuring entity, the procuring entity shall

incur no liability, solely by virtue of its invoking paragraph (1) of this article, towards suppliers or contractors that have presented submissions.

#### **Article 19. Rejection of abnormally low submissions**

(1) The procuring entity may reject a submission if the procuring entity has determined that the price in combination with other constituent elements of the submission is abnormally low in relation to the subject matter of the procurement and raises concerns with the procuring entity as to the ability of the supplier or contractor that presented that submission to perform the procurement contract, provided that the procuring entity has taken the following actions:

(a) The procuring entity has requested in writing from the supplier or contractor details of the submission that gives rise to concerns as to the ability of the supplier or contractor to perform the procurement contract;

(b) The procuring entity has taken account of any information provided by the supplier or contractor following this request, and the information included in the submission, but continues, on the basis of all such information, to hold concerns; and

(c) The procuring entity has recorded the concerns and its reasons for holding them, and all communications with the supplier or contractor under this article, in the record of the procurement proceedings.

(2) The decision of the procuring entity to reject a submission in accordance with this article and reasons for the decision shall be included in the record of the procurement proceedings and promptly communicated to the supplier or contractor concerned.

#### **Article 20. Exclusion of a supplier or contractor from the procurement proceedings on the grounds of inducements from the supplier or contractor, an unfair competitive advantage or conflicts of interest**

(1) A procuring entity shall exclude a supplier or contractor from the procurement proceedings if:

(a) The supplier or contractor offers, gives or agrees to give, directly or indirectly, to any current or former officer or employee of the procuring entity or other governmental authority a gratuity in any form, an offer of employment or any other thing of service or value, so as to influence an act or decision of, or procedure followed by, the procuring entity in connection with the procurement proceedings; or

(b) The supplier or contractor has an unfair competitive advantage or a conflict of interest in violation of provisions of law of this State.

(2) Any decision of the procuring entity to exclude a supplier or contractor from the procurement proceedings under this article and the reasons therefor shall be included in the record of the procurement proceedings and promptly communicated to the supplier or contractor concerned.

**Article 21. Acceptance of the successful submission and entry  
into force of the procurement contract**

- (1) The procuring entity shall accept the successful submission unless:
- (a) The supplier or contractor presenting the successful submission is disqualified in accordance with article 9 of this Law; or
  - (b) The procurement is cancelled in accordance with article 18 (1) of this Law; or
  - (c) The submission found successful at the end of evaluation is rejected as abnormally low under article 19 of this Law; or
  - (d) The supplier or contractor presenting the successful submission is excluded from the procurement proceedings on the grounds specified in article 20 of this Law.
- (2) The procuring entity shall promptly notify each supplier or contractor that presented submissions of its decision to accept the successful submission at the end of the standstill period. The notice shall contain, at a minimum, the following information:
- (a) The name and address of the supplier or contractor presenting the successful submission;
  - (b) The contract price or, where the successful submission was ascertained on the basis of price and other criteria, the contract price and a summary of other characteristics and relative advantages of the successful submission; and
  - (c) The duration of the standstill period as set out in the solicitation documents, which shall be [at least] ... working days (the enacting State specifies the period of time) [unless the procurement regulations provide otherwise] and shall run from the date of the dispatch of the notice under this paragraph to all suppliers or contractors that presented submissions.
- (3) Paragraph (2) of this article shall not apply to awards of procurement contracts:
- (a) Under a framework agreement procedure without second-stage competition;
  - (b) Where the contract price is less than ... (the enacting State specifies a threshold); or
  - (c) Where the procuring entity determines that urgent public interest considerations require the procurement to proceed without a standstill period. The decision of the procuring entity that such urgent considerations exist and the reasons for the decision shall be included in the record of the procurement proceedings.
- (4) Upon expiry of the standstill period, or where there is none, promptly after the successful submission was ascertained, the procuring entity shall dispatch the notice of acceptance of the successful submission to the supplier or contractor that presented that submission, unless the [name of court or courts] or [name of the relevant organ designated by the enacting State] orders otherwise.

(5) Unless a written procurement contract and/or approval by another authority is/are required, a procurement contract in accordance with the terms and conditions of the successful submission enters into force when the notice of acceptance is dispatched to the supplier or contractor concerned, provided that the notice is dispatched while the submission is still in effect.

(6) Where the solicitation documents require the supplier or contractor whose submission has been accepted to sign a written procurement contract conforming to the terms and conditions of the accepted submission:

(a) The procuring entity and the supplier or contractor concerned shall sign the procurement contract within a reasonable period of time after the notice of acceptance is dispatched to the supplier or contractor concerned;

(b) Unless the solicitation documents stipulate that the procurement contract is subject to approval by another authority, the procurement contract enters into force when the contract is signed by the supplier or contractor concerned and by the procuring entity. Between the time when the notice of acceptance is dispatched to the supplier or contractor concerned and the entry into force of the procurement contract, neither the procuring entity nor that supplier or contractor shall take any action that interferes with the entry into force of the procurement contract or with its performance.

(7) Where the solicitation documents stipulate that the procurement contract is subject to approval by another authority, the procurement contract shall not enter into force before the approval is given. The solicitation documents shall specify the estimated period of time following dispatch of the notice of acceptance that will be required to obtain the approval. A failure to obtain the approval within the time specified in the solicitation documents shall not extend the period of effectiveness of submissions specified in the solicitation documents or the period of effectiveness of the tender security required under article 16 of this Law.

(8) If the supplier or contractor whose submission has been accepted fails to sign any written procurement contract as required, or fails to provide any required security for the performance of the contract, the procuring entity may either cancel the procurement, or may decide to select the next successful submission from among those remaining in effect, in accordance with the criteria and procedures set out in this Law and in the solicitation documents. In the latter case, the provisions of this article shall apply *mutatis mutandis* to such submission.

(9) Notices under this article are dispatched when they are promptly and properly addressed or otherwise directed and transmitted to the supplier or contractor, or conveyed to an appropriate authority for transmission to the supplier or contractor, by any reliable means specified in accordance with article 7 of this Law.

(10) Upon the entry into force of the procurement contract and, if required, the provision by the supplier or contractor of a security for the performance of the contract, notice of the procurement contract shall be given promptly to other suppliers or contractors, specifying the name and address of the supplier or contractor that has entered into the contract and the contract price.

### **Article 22. Public notice of awards of procurement contract and framework agreement**

- (1) Upon the entry into force of the procurement contract or conclusion of a framework agreement, the procuring entity shall promptly publish notice of the award of the procurement contract or the framework agreement, specifying the name(s) of the supplier(s) or contractor(s) to which the procurement contract or the framework agreement was awarded and, in the case of procurement contracts, the contract price.
- (2) Paragraph (1) is not applicable to awards where the contract price is less than ... (the enacting State specifies a threshold). The procuring entity shall publish a cumulative notice of such awards from time to time but at least once a year.
- (3) The procurement regulations shall provide for the manner of publication of the notices required under this article.

### **Article 23. Confidentiality**

- (1) In its communications with suppliers or contractors or the public, the procuring entity shall not disclose any information if its non-disclosure is necessary for the protection of essential security interests of the State or if its disclosure would be contrary to law, would impede law enforcement, would prejudice the legitimate commercial interests of the suppliers or contractors or would impede fair competition, unless disclosure of that information is ordered by the [name of court or courts] or [name of the relevant organ designated by the enacting State] and in such case, subject to the conditions of such an order.
- (2) Other than when providing or publishing information pursuant to articles 21 (2) and (10), 22, 24 and 41 of this Law, the procuring entity shall treat applications to pre-qualify or for preselection and submissions in such a manner as to avoid the disclosure of their contents to competing suppliers or contractors or to any other person not authorized to have access to this type of information.
- (3) Any discussions, communications, negotiations and dialogue between the procuring entity and a supplier or contractor pursuant to articles 47 (3) and 48 to 50 of this Law shall be confidential. Unless required by law or ordered by the [name of court or courts] or [name of the relevant organ designated by the enacting State] or permitted in the solicitation documents, no party to any discussions, communications, negotiations or dialogue shall disclose to any other person any technical, price or other information relating to these discussions, communications, negotiations or dialogue without the consent of the other party.
- (4) Subject to the requirements in paragraph (1) of this article, in procurement involving classified information, the procuring entity may:
  - (a) Impose on suppliers or contractors requirements aimed at protecting classified information; and
  - (b) Demand that suppliers or contractors ensure compliance with requirements aimed at protecting classified information by their subcontractors.

**Article 24. Documentary record of procurement proceedings**

(1) The procuring entity shall maintain a record of the procurement proceedings that includes the following information:

- (a) A brief description of the subject matter of the procurement;
- (b) The names and addresses of suppliers or contractors that presented submissions, and the name(s) and address(es) of the supplier(s) or contractor(s) with which the procurement contract is entered into and the contract price (in the case of a framework agreement procedure, in addition the name(s) and address(es) of the supplier(s) or contractor(s) with which the framework agreement is concluded);
- (c) A statement of the reasons and circumstances relied upon by the procuring entity for the decision as regards means of communication and any requirement of form;
- (d) In the procurement proceedings in which the procuring entity, in accordance with article 8 of this Law, limits participation of suppliers or contractors, a statement of the reasons and circumstances relied upon by the procuring entity for imposing the limitation;
- (e) If the procuring entity uses a method of procurement other than open tendering, a statement of the reasons and circumstances relied upon by the procuring entity to justify the use of such other method;
- (f) In the case of procurement by means of an auction or involving an auction as a phase preceding the award of the procurement contract, a statement of the reasons and circumstances relied upon by the procuring entity for the use of the auction, and information about the date and time of the opening and closing of the auction;
- (g) In the case of a framework agreement procedure, a statement of the reasons and circumstances upon which it relied to justify the use of a framework agreement procedure and the type of framework agreement selected;
- (h) If the procurement is cancelled pursuant to article 18 (1) of this Law, a statement to that effect and the reasons and circumstances relied upon by the procuring entity for its decision to cancel the procurement;
- (i) If any socio-economic policies were considered in the procurement proceedings, details of such policies and the manner in which they were applied;
- (j) If no standstill period was applied, a statement of the reasons and circumstances relied upon by the procuring entity in deciding not to apply a standstill period;
- (k) In the case of a challenge or appeal under chapter VIII of this Law, a copy of the application for reconsideration or review and the appeal, as applicable, and of all decisions taken in the relevant challenge or appeal proceedings or both and the reasons therefor;
- (l) A summary of any requests for clarification of the pre-qualification or preselection documents, if any, or solicitation documents, the responses thereto, as well as a summary of any modification of those documents;

(m) Information relative to the qualifications, or lack thereof, of suppliers or contractors that presented applications to pre-qualify or for preselection, if any, or submissions;

(n) If a submission is rejected pursuant to article 19 of this Law, a statement to that effect and the reasons and circumstances relied upon by the procuring entity for its decision;

(o) If a supplier or contractor is excluded from the procurement proceedings pursuant to article 20 of this Law, a statement to that effect and the reasons and circumstances relied upon by the procuring entity for its decision;

(p) A copy of the notice of the standstill period given in accordance with article 21 (2) of this Law;

(q) If the procurement proceedings resulted in the award of a procurement contract in accordance with article 21 (8) of this Law, a statement to that effect and of the reasons therefor;

(r) The contract price and other principal terms and conditions of the procurement contract; where the written procurement contract has been concluded, a copy thereof. (In the case of a framework agreement procedure, in addition a summary of the principal terms and conditions of the framework agreement or copy of any written framework agreement concluded);

(s) The price, or the basis for determining the price, and a summary of the other principal terms and conditions, of each submission;

(t) A summary of the evaluation of submissions, including the application of any margin of preference pursuant to article 11 (4) (b) of this Law, and the reasons and circumstances on which the procuring entity relied to justify any rejection of bids presented during the auction;

(u) Where exemptions from disclosure of information were invoked under article 23 (1) or 68 of this Law, the reasons and circumstances relied upon in invoking them;

(v) In procurement involving classified information, any requirements imposed on suppliers or contractors for the protection of classified information pursuant to article 23 (4) of this Law; and

(w) Other information required to be included in the record in accordance with the provisions of this Law or the procurement regulations.

(2) The portion of the record referred to in subparagraphs (a) to (k) of paragraph (1) of this article shall, on request, be made available to any person after the successful submission has been accepted or the procurement has been cancelled.
