11. Design and implementation of technical cooperation and assistance activities took place in line with the priorities identified for such activities, which include: stressing a regional and subregional approach in order not only to achieve economies of scale but also to complement ongoing regional integration initiatives; promoting the universal adoption of those international trade law texts already enjoying wide acceptance, and making particular efforts to disseminate information on recently adopted texts, with a view, if such texts were treaties, to fostering their early adoption and entry into force (A/66/17, para. 255).

12. Some of the key activities undertaken by the Secretariat in the relevant time period are described below. It should be noted that due to lack of resources and time constraints, some of the activities were undertaken by experts on behalf of the Secretariat. Activities denoted with an asterisk were funded by the UNCITRAL Trust Fund for Symposia.

Promotion of the universal adoption of fundamental trade law instruments

13. The Secretariat has continued to engage in promoting the adoption of fundamental trade law instruments, i.e., those treaties that are already enjoying wide adoption and the universal participation to which would therefore seem particularly desirable.

14. The Secretariat has jointly organized, participated in, or contributed to the following events which dealt with a number of areas to which UNCITRAL's work relates:

(a) A training on international trade law for Democratic People's Republic of Korea officials organized by the International Council of Swedish Industry (Stockholm, 18 May 2015)*;

(b) The 5th St. Petersburg International Legal Forum, in an effort to increase awareness among the Russian legal practitioners about developments in UNCITRAL of relevance to the legal framework of the Russian Federation (St. Petersburg, Russia, 26-29 May 2015)*;

(c) A training seminar on international trade law for Democratic People's Republic of Korea government officials and legal professionals (Beijing, 20-27 June 2015)*;

(d) The Centre for Small States Inaugural Conference: "Small States in a Legal World". Delivered a presentation on "the relevance of global efforts to harmonize trade law: UNCITRAL and small States" and shared experiences of UNCITRAL in supporting commercial law reform in small jurisdictions (London, 7 September 2015);

(e) A lecture on UNCITRAL texts at the Pace University online certificate program in commercial law (30 mins via video conference) (2 October 2015);

(f) A seminar regarding various UNCITRAL related topics such as international arbitration, simplified incorporation and secured transactions (Bogota, 9 February 2016); and

(g) The Conference ''UNCITRAL Contribution to International Trade Law" organized by the University of Paris 1 and Paris 2 (Paris, 12 April 2016)*.

Initiatives for a regional approach

15. The Secretariat continued its collaboration with the Asia-Pacific Economic Cooperation (APEC). At the APEC Structural Reform Ministerial Meeting (Cebu, Philippines, 7-8 September 2015)*, the APEC Ministers recognized the importance of work to develop model legal instruments and commended APEC work in this area in collaboration with the Commission. The APEC Ministers further agreed that the development of international legal instruments and their adoption will create a more conducive climate for cross-border trade and investment, thus facilitating economic growth and that the use of those instruments provides greater legal certainty in cross-border transactions, harmonization of finance and dispute resolution systems, closer economic and legal integration among cooperating economies, and the simplification of procedures involved in international transactions. The Secretary of UNCITRAL addressed the APEC Economic Committee during its plenary (Lima, 29 February and 1 March 2016)*, providing a general overview of UNCITRAL, its mandate and texts, its involvement in technical assistance and coordination and the need for continued collaboration with APEC, particularly its Economic Committee.

16. During the reporting period, the Secretariat, through the Regional Centre for Asia and the Pacific, held two joint workshops with the Department of Justice of Hong Kong Special Administrative Region of China under the auspices of the APEC Economic Committee and its Friends of the Chair Group on Strengthening Economic and Legal Infrastructure (SELI): one on Effective Enforcement of Business Contracts and Efficient Resolution of Business Disputes through the Hague Choice of Court Agreements Convention (Cebu, Philippines, 1 September 2015)* and another on Dispute Resolution — The Key to Efficient Settlement of Business Disputes (Lima, 26 February 2016)*. The Secretariat also continued its participation in the Ease of Doing Business (EoDB) project on enforcing contracts, which aims at strengthening the legislative and institutional framework for the enforcement of contracts in APEC economies. In that context, UNCITRAL participated in the International Seminar on the Ease of Doing Business (Seoul, 27 January 2016)*, which provided an opportunity to examine the past five years of participation in the project and also held joint discussion with Korean and Mexican authorities to share experience gained in the area of enforcing contracts and possibly expand it to the area of getting credit (Mexico City, 9-10 November 2015)*. The Secretariat's participation in the EoDB project was made

possible through the voluntary contribution from the Government of the Republic of Korea. It is expected that the Secretariat will also closely cooperate with the United States of America and Mexico in implementing the second APEC EoDB Action Plan (2016-2018), particularly with respect to getting credit. In addition, the UNCITRAL Regional Centre for Asia and the Pacific also took part in the APEC E-Commerce Forum: New Paradigm for Cross-Border E-Commerce and Online Shopping (Jeju, Republic of Korea, 26-28 November 2015)*.

B. Specific activities

Sale of goods

17. The Secretariat has continued to promote broader adoption, use and uniform interpretation of the United Nations Convention on Contracts for the International Sale of Goods (Vienna, 1980) (the "United Nations Sales Convention" or "CISG"),[2] including by organizing or participating in dedicated events. Examples of such meetings include:

(a) "Legal framework for the settlement of national and international trade disputes in the Eurasian Region" organized by the Kiel Center for Eurasian Economic Law (Ekaterinburg, Russian Federation, 18 June 2015)*;

(b) Workshop on the CISG for government lawyers in Azerbaijan co-organized by the Academy of Public Administration and UNCITRAL secretariat (Baku, 29 September-1 October 2015)*;

(c) "Masterclass on the CISG" (Vienna, 9 October 2015), a session of the "Annual Conference of the International Bar Association"; and

(d) "Sixth Annual Vis Middle East Pre-Moot" and "Regional Middle East Arbitration Forum" (Manama, 11-12 February 2016).

18. At its forty-sixth session, the Commission requested the Secretariat to commence planning for a colloquium to celebrate the thirty-fifth anniversary of the CISG, to take place on a date after the forty-seventh Commission session. The Commission agreed that the scope of that colloquium could be expanded by including some of the issues raised by a proposal submitted at its forty-fifth session (A/CN.9/758).[3] That request was reiterated at the Commission's forty-seventh session.[4] Accordingly, a panel discussion was organized by the Secretariat at the forty-eighth Commission session with participation of experts in the field of international sale of goods law.[5] Pursuant to a request of the Commission, the proceedings of that panel have been published.[6]

19. Other events held in the reporting period to celebrate the thirty-fifth anniversary of the CISG include:

(a) UNCITRAL-Singapore Seminar: "35 Years of the CISG: Achievements and Perspectives" (Singapore, 23-24 April 2015);

(b) II Congreso Iberoamericano de Derecho Internacional de los Negocios: "360° de la compraventa internacional de mercaderías" — 35 años de la Convención de Viena, co-organized by Universidad Externado, Bogotá, the Government of Colombia and the UNCITRAL Secretariat (Bogotá, 16-20 October 2015);

(c) "Third International Arbitration Readings in Memory of Academician Igor Pobirchenko", organized by the International Commercial Arbitration Court at the Ukrainian Chamber of Commerce and Industry (Kyiv, 13 November 2015)*; and

---

(d) "35 Years of CISG — Present Experiences and Future Challenges", co-organized by the UNCITRAL Secretariat and Faculty of Law of the University of Zagreb (Zagreb, 1-2 December 2015).

Dispute resolution

20. The Secretariat has been engaged in the promotion of UNCITRAL texts in the field of dispute resolution including through a number of training activities and has supported ongoing law reform process in various jurisdictions. The Secretariat has also developed soft law instruments and tools to provide information on the application and interpretation of those texts. Given the high rate of adoption of those texts, the demand for technical assistance in the field of dispute resolution remains particularly acute.

Development of instruments and tools to provide information on the application and interpretation of UNCITRAL texts in the field of dispute settlement

21. Regarding the New York Convention, the website (www.newyorkconvention1958.org), which was established to make the information gathered in the preparation of the UNCITRAL Secretariat Guide on the New York Convention freely and publicly available,[7] has been expanded to include case law from additional jurisdictions as well as a comprehensive bibliographical reference. It is currently planned that the UNCITRAL Secretariat Guide on the New York Convention will be available by the end of 2016 electronically in all United Nations languages.

22. Regarding the UNCITRAL Model Law on International Commercial Arbitration (1985), with amendments as adopted in 2006 (the "Model Law on Arbitration"),[8] the Secretariat is currently working on updating the 2012 Digest of Case Law on the Model Law on International Commercial Arbitration.[9]

Supporting ongoing legislative work and training activities

23. The Secretariat has reviewed or provided comments on legislation on arbitration and/or mediation of Albania, Bahamas, Bahrain, Barbados, Bhutan, the Democratic People's Republic of Korea, the Democratic Republic of Congo, Iraq, the Lao People's Democratic Republic, Maldives, Mongolia, Montenegro, Papua New Guinea, Saudi Arabia and Viet Nam. The Secretariat has also reviewed or provided comments on rules of certain arbitral institutions, such as those of the Istanbul Chamber of Commerce Arbitration Centre (ITOTAM), the Bhutanese Construction Board and the Afghanistan Centre for Commercial Dispute Resolution. In the field of dispute resolution, the Secretariat has jointly organized, participated in, or contributed to the following events:

(a) APEC Conference on Enforcing Contracts in Sri Lanka and Thailand (Seoul, 5-8 May 2015)*;

(b) Presentation to the Parliament of the European Union on UNCITRAL texts on transparency in investment arbitration (Brussels, 5 May 2015 and 13 July 2015);

(c) Conference on "Investment Protection and Public Interests" organized by the University of Turin (Turin, Italy, 11 May 2015);

(d) Conference on "United States of America/Cuba: Towards the end of the embargo?" (Paris, 12 May 2015)*;

(e) Capacity-building workshop on alternative dispute resolution in the context of the construction industry with the Secretariat participation focusing on the implementation of the New York Convention and the Model Law on Arbitration (Thimphu, Bhutan, 18-19 May 2015)*;

(f) Workshop on the New York Convention for the Ukrainian judiciary (Kharkiv, Ukraine, 20 May 2015);

(g) Panel on Consensual Dispute Resolution with the Secretariat participation focusing on UNCITRAL texts on conciliation (Vienna, 1 July 2015);

(h) Chartered Institute of Arbitrators (CIArb) Conference on Arbitration with assistance also provided with respect to the possible establishment of a regional arbitration centre (Kingston, 9-10 July 2015);

(i) Thailand Arbitration Institute Anniversary Event with the Secretariat participation focusing on the Model Law on Arbitration and the UNCITRAL Arbitration Rules (Bangkok, 23-24 July)*;

(j) BANI Arbitration Centre Conference on arbitration law reform in Indonesia (Jakarta, 12 August 2015)*;

(k) International Conference on Arbitration Discourse and Practices in Asia with the Secretariat participation focusing on its participation in the APEC EoDB project (Kuala Lumpur, 20-21 August 2015)*;

(l) Training on arbitration with the Addis Ababa Chamber of Commerce and Sectoral Associations and Chamber Trade Sweden (Addis Ababa, 27-28 August 2015);

(m) Workshop on Effective Enforcement of Business Contracts and Efficient Resolution of Business Disputes through the Hague Choice of Court Agreements Convention (Cebu, Philippines, 1 September 2015);

(n) OHADAC Congress, a launching event of the Organisation for the Harmonisation of Business Law in the Caribbean (Point à Pitre, Guadeloupe, 21-22 September 2015)*;

(o) ICC Arbitration Commission meeting with the Secretariat participation providing an update on the work undertaken by Working Group II (Arbitration and Conciliation) (Vienna, 3 October 2015);

(p) International Conference organized by the President of the Saudi Arbitration Court and the Higher Institute of Judiciary and Arbitration (Riyadh, 11-12 October 2015);

(q) Colloquia of the Association pour la promotion de l'Arbitrage en Afrique (APAA) with the Secretariat participation focusing on UNCITRAL texts on transparency in investment arbitration (Douala, Cameroon, 14-15 October 2015)*;

(r) Joint conference with the New York Branch of CIArb with the Secretariat participation focusing on the UNCITRAL Secretariat Guide on the New York Convention (New York, 21 October 2015);

(s) 9th Mediterranean and Middle East Conference organized by the European Court of Arbitration (Naples, Italy, 23 October 2015);

(t) Judicial Roundtable on the New York Convention and the Model Law on Arbitration, and the UNCITRAL Asia Pacific Judicial Summit (Hong Kong, 26-28 October 2015)*;

(u) Fifth Meeting of the Asia-Pacific Foreign Direct Investment Network for Least Developed and Landlocked Developing Countries on ''Investment Agreements and Investor State Dispute Resolution: Current Trends and Emerging Issues'' (Bangkok, 2 November 2015)*;

(v) Fourth Asia Pacific ADR Conference jointly organized with the Korean Ministry of Justice, the Korean Commercial Arbitration Board and ICC (Seoul, 3-4 November 2015)*;

(w) Training at the Energy Charter Treaty jointly with Centre for Effective Dispute Resolution (CEDR) and International Mediation Institute (IMI) on conciliation/mediation (Brussels, 4-6 November 2015);

(x) Columbia International Investment Conference with the Secretariat participation focusing on UNCITRAL texts on transparency in investment arbitration (New York, 10-11 November);

(y) 2nd International Conference for a Euro-Mediterranean Community of International Arbitration jointly organized with OECD and Cairo Regional Centre for International Commercial Arbitration (CRCICA) (Cairo, 12-13 November 2015);

(z) Workshop for the Attorney General's Office and the Law Reform and Revision Commission of the Bahamas (Nassau, 13-14 November 2015);

(aa) International Arbitration Institute (IAI) Conference on "Treaty-making in investment arbitration" with the Secretariat participation focusing on UNCITRAL texts on transparency in investment arbitration (Washington D.C., 20 November 2015);

(bb) 2nd International Conference on Arbitration with Arbitration Institute of Addis Chamber of Commerce and Chamber Trade Sweden (Addis Ababa, 23-24 November 2015);

(cc) Conference on International Investment Arbitration in the MENA Region (Manama, 9-10 December 2015);

(dd) Vienna Arbitration Day 2016, jointly organized with the Austrian Arbitration Association, the International Arbitral Centre of the Austrian Federal Economic Chamber (VIAC), the International Chamber of Commerce Austria and the Young Austrian Arbitration Practitioners (YAAP) (Vienna, 22-23 January 2016);

(ee) 2016 Vis Mid East Pre-Moot (Bahrain, 11-13 February 2016)*;

(ff) Fourth International Investment Arbitration Conference organized by the Ministry of Justice of Kuwait in association with the Permanent Court of Arbitration (Kuwait City, 17-18 February 2016)*;

(gg) Conference on "Parties' needs in arbitration" jointly organized with the Ljubljana Arbitration Centre (LAC) with the Secretariat participation focusing on enforceability (Ljubljana, 15 March 2016);

(hh) UNCTAD Expert Meeting, "International Investment Agreements (IIA) Stocktaking" with the Secretariat participation focusing on UNCITRAL texts on transparency in investment arbitration and possible future work by Working Group II (Arbitration and Conciliation) (Geneva, 16 March 2016);

(ii) Conference on "Where does arbitration go, from crisis to new perspectives" with the Secretariat participation focusing on UNCITRAL texts on transparency in investment arbitration (Istanbul, 8-9 April 2016);

(jj) Somali International Arbitration Summit (SIAS) (Mogadishu, 11 April 2016);

(kk) First annual conference "The Arab states in international arbitration: current issues" organized by the Chamber of Tunis (14-15 April 2016); and

(ll) OECD Workshop on international investment treaties, investment disputes and arbitration for Iraqi government officials (Beirut, 21 April 2016).

Electronic commerce

24. The Secretariat has continued promoting the adoption, use and uniform interpretation of UNCITRAL texts on electronic commerce, including in cooperation with other organizations[10] and emphasizing a regional approach. In that framework, the Secretariat has also informally provided comments on draft regional and national legislation and interacted with legislators and policymakers from various jurisdictions.

25. Activities relating to promoting the adoption of UNCITRAL texts on electronic commerce and their effective use and uniform interpretation where already adopted include:

(a) Presentations on current and future UNCITRAL e-commerce projects and their relevance for Arab States at the Arab Information and Communication Technologies

[10] See United Nations Conference on Trade and Development (UNCTAD), Report of the Multi-year Expert Meeting on Cyberlaws and Regulations for Enhancing E-commerce, Including Case Studies and Lessons Learned [including corrigendum] (TD/B/C.II/EM.5/3), 12 May 2015, paras. 10, 12 and 54.

Organization (AICTO) Conference "PKI & the global e-commerce law" (Tunis, 8 May 2015)*;

(b) Remote presentation on e-signatures to the European Forum on Electronic Signature (EFPE) (11 June 2015);

(c) The Regional Workshop "E-commerce Harmonization in the Caribbean", co-organized by UNCTAD, the Government of the Republic of Trinidad and Tobago, the Latin-American and Caribbean Economic System (SELA) and the Association of Caribbean States (ACS) (Port of Spain, 29 September — 2 October 2015);

(d) The UNCITRAL/ARCTEL-CPLP workshop on the promotion of the use of UNCITRAL texts and of the adoption of the United Nations Convention on the Use of Electronic Communications in International Contracts, 2005 (Praia, 7-9 October 2015); and

(e) "Tercer Congreso Internacional de Derecho del Comercio Electrónico"; participation by the Chair of UNCITRAL (San José, 3-4 March 2016).

Procurement

26. In accordance with requests of the Commission and Working Group I (under its former mandate on Public Procurement and Infrastructure Development), the Secretariat has established links with other international organizations active in public procurement reform to support the use of the UNCITRAL Model Law on Public Procurement (2011) (the "Procurement Model Law"),[11] its accompanying Guide to Enactment (2012),[12] and the UNCITRAL texts on Privately-Financed Infrastructure Projects.[13]

27. The aims of such cooperation are to ensure that reforming Governments and organizations are informed of the terms of and the policy considerations underlying those texts, including as regards regional requirements and circumstances, so as to promote a thorough understanding and appropriate use of these UNCITRAL texts.[14] The Secretariat is following a regional approach to this cooperation, engaging with the multilateral development banks and regional organizations, addressing the role of public procurement in sustainable development, good governance, the avoidance of corruption and achieving value for money in government expenditure.

Supporting ongoing legislative work and training activities

28. The Secretariat has provided advice to the Governments of Jamaica and Trinidad and Tobago (with the support of the IADB), to Afghanistan (with the support of the United States Department of Commerce Commercial Law Development Programme), and to Armenia, Egypt, the Kyrgyz Republic and Tajikistan (within the framework of the EBRD-UNCITRAL Public Procurement Initiative) on reform of their public procurement legal and regulatory framework, including on proposed legislation.

29. In this connection, the Secretariat participated in (i) a Conference on Public Procurement legislative reform in Afghanistan (Istanbul, 1-6 November 2015); (ii) rounds of consultations with drafters of primary and secondary public procurement legislation and supporting donors in Armenia, Egypt, the Kyrgyz Republic, and Tajikistan (throughout the year).

30. The Secretariat also took part in (i) the creation of a Body of Knowledge (BoK) on Public-Private Partnerships (PPP), in the context of the World Bank/APMG's work towards creating a Global PPPs Certification Program (May 2015 onwards); (ii) a steering group of a project at UNCTAD (Multi-Agency Support Team Project) addressing non-tariff measures influencing trade; policies that governments use to favour domestic firms in public procurement (November 2015 onwards); (iii) the production of a Chapter on public

procurement for an OSCE Anti-corruption Handbook (August-December 2015); (iv) an International Learning Laboratory project on Public Procurement and Human Rights, a project coordinated by International Corporate Accountability Roundtable (ICAR), the Danish Institute for Human Rights (DIHR), the Harrison Institute of Public Law at Georgetown University, and the University of Nottingham public procurement Research Group, analysing the challenges and opportunities presented for the integration of human rights considerations into public procurement (January 2016 onwards); and (v) producing a summary of the approach to sustainable procurement under the Model Law to UNEP for its technical assistance activities in this aspect of public procurement (March 2016). At the request of UNEP, the Secretariat also reviewed proposed public procurement legislation for Mongolia.

31. The Secretariat has participated as a lecturer in (i) a post-graduate degree programme — the Executive LLM in Public Procurement Law and Policy (University of Nottingham, United Kingdom of Great Britain and Northern Ireland, 9-10 January 2016; (ii) the 10th edition of the ITC-ILO Master in Public Procurement for Sustainable Development (Turin, Italy, 22-23 February 2016 and planned for 31 May 2016); and (iii) the 4th Edition of the International Master in Public Procurement Management at the University of Rome, Tor Vergata (with the support of the EBRD) (Rome, 5-6 April 2016).

32. The main activities and international events in the year to May 2016, in which the Secretariat has participated as speaker/presenter, included:

(a) The Sussex Regulatory Research Group and Advisory Committee conference establishing a "Competition and Procurement Policy Research and Knowledge Exchange Network". The purpose of forming the knowledge-exchange network is to enable an interchange of interdisciplinary academic expertise with private sector practitioners in the interdisciplinary field of competition and procurement law and governance issues (United Kingdom, 28-29 May 2015 (virtual participation));

(b) The 11th Public Procurement Knowledge Exchange Forum, with a focus on procurement oversight and monitoring as a means for efficient project implementation (Batumi, Georgia, 9-12 June 2015);*

(c) The Global Revolution VII Conference on public procurement; moderating a session which discussed the regional impact of UNCITRAL with emphasis on procurement and aid effectiveness (Nottingham, United Kingdom, 14-16 June 2015);

(d) The UNODC/UNCAC Conference of States Parties Working Group on Prevention to discuss the implementation of article 9 of the United Nations Convention against Corruption (procurement and public finances), with a focus on the management of public finance for policymakers and justice officials (Vienna, 2-4 September 2015);

(e) The International Anti-Corruption Academy (Laxenburg) for participants from various countries, providing anti-corruption tailor-made training (10 September 2015); to Audit Board of the Republic of Indonesia (5 October 2015); the Central Vigilance Commission of India (5 February 2016), the Office of Auditor General, Thailand (29 March 2016), and representatives of Eurasian Economic Union (EAEU) member States (26 May 2016);

(f) A Symposium on "The revised WTO Agreement on Government Procurement (GPA): an emerging pillar of twenty-first century trade and development" and delivered a presentation on "The revised Procurement Model Law: synergies and complementarities with the revised GPA" (Geneva, Switzerland, 17-18 September 2015);

(g) A conference on "Post-conflict states and public procurement: Strategic, economic and legal challenges and opportunities", to discuss the engagement of States in and the main challenges relating to implementing the Model Law in post-conflict States (Brussels, 30 September 2015);

(h) A presentation on public procurement to Central and Eastern Europe, Central Asian and the Caucasus Countries at a WTO workshop with the aim to encourage use of the Procurement Model Law in these countries (Vienna, 20 October 2015);

(i) The annual OSCE Economic and Environmental Dimension Implementation Meeting (EEDIM), of the OSCE, focusing on combating corruption in public procurement and delivered a presentation on the importance of transparency and accountability in public procurement processes (Vienna, 19-20 October 2015);

(j) A round-table conference on law and international trade ‘‘Towards Convergence in Transatlantic Procurement Markets”; a prelude to establishing a Post Graduate Diploma in on comparative public procurement law in 2016 (London, 26 October 2015);

(k) The World Bank-EBRD E-Procurement Forum: Enhancing Public Spending (Vienna, 1-3 December 2015); and

(l) Within the framework of an EBRD-UNCITRAL Public Procurement Initiative (i) capacity-building session for the Kyrgyz Republic and Ukraine (Nicosia, 22-24 July 2015)*, (ii) the workshop in Egypt on reforms of the local procurement review system, e-procurement and identification of training needs (Cairo, 6 and 7 April 2016)*; and (iii) a technical meeting with member States of EAEU on the comparative analysis of the WTO GPA and provisions of the EAEU Treaty related to public procurement (Podgorica, 6 May 2016)*.

Insolvency

33. The Secretariat has promoted the use and adoption of insolvency texts, particularly the UNCITRAL Model Law on Cross-Border Insolvency (1997) [15] and the UNCITRAL Legislative Guide on Insolvency Law (2004),[16] through participation as a speaker at various international meetings and conferences, including:

(a) A panel and discussions regarding current work and related insolvency matters with World Bank staff and regional offices (Washington D.C., 2-3 June 2015);

(b) The INSOL Europe/INSOL Academic Forum Joint International Insolvency Conference to discuss current approaches to corporate rescue (Nottingham, United Kingdom, 25-26 June 2015);

(c) The 2nd National Insolvency Conference “Singapore as a Key Player in the Regional and International Insolvency and Restructuring — The Way Forward”, in the context of Singapore’s adoption of the Model Law on Cross-Border Insolvency (Singapore, 11 September 2015)*;

(d) The 6th Africa Roundtable on Insolvency Law Reform 2015. As the most important insolvency reform event in Africa, this provided the opportunity to meet with key government officials and practitioners in the region where there are lots of insolvency reform activities being undertaken and to discuss UNCITRAL insolvency texts (Cape Town, South Africa, 12-13 October 2015)*; and

(e) A seminar to LLM students at Nottingham University on the UNCITRAL process and work methods with particular reference to insolvency and Working Group V (Nottingham, United Kingdom, 27 November 2015).

34. The Secretariat reviewed the enactments of the Model Law by Gibraltar, Kenya, Malawi and OHADA.

Security interests

35. The approach taken by the Secretariat in providing technical assistance related to UNCITRAL texts on security interests (the United Nations Convention on the Assignment of Receivables in International Trade (2001), the UNCITRAL Legislative Guide on Secured Transactions (2007), its Supplement on Security Rights in Intellectual Property (2010) and the UNCITRAL Guide on the Implementation of a Security Rights Registry (2013)) is twofold.

[15] General Assembly resolution 52/158, annex.
[16] United Nations publication, Sales No. E.05.V.10.

Supporting ongoing legislative work and training activities

36. The first approach focuses on providing technical assistance to States in their secured transactions law reform activities. An example of such activities is the technical assistance provided in cooperation with the World Bank Group to States with respect to efforts to reform their secured transactions law (e.g. Thailand and Philippines). The objective of this cooperation is to ensure that technical assistance is provided consistent with UNCITRAL texts on security interests and in particular the UNCITRAL Legislative Guide on Secured Transactions.

37. The Secretariat also engages in informal consultation with legislators and policymakers from various jurisdictions, in some instances as a follow-up to the aforementioned activities. Further, the Secretariat is continuing its work with the World Bank with regard to revising the World Bank Insolvency and Creditor Rights Standard to include the key recommendations of the UNCITRAL Legislative Guide on Secured Transactions and reference to the other texts of UNCITRAL on security interests. The work with the World Bank includes, in addition, the comparison of key provisions of the draft Model Law on Secured Transactions with key provisions of Islamic finance law as part of an initiative carried out by the World Bank Global Islamic Finance Development Center.

38. Staff members of the Secretariat participated as lecturers on secured financing based on the UNCITRAL texts on security interests in a course organized by the Civil Law Institute of the University of Vienna Law School (Vienna, Winter 2015 and Spring 2016).

39. The second approach focuses on disseminating information about those texts to Government officials, legislators, judges, academics and practitioners and thus promoting their implementation. Such activities included participation in the following:

(a) The Factors Chain International and the International Factors Group Annual Meeting, and spoke on the work of UNCITRAL and the harmonization of the law of secured transactions (Vienna, 19-21 October 2015);

(b) The World Bank Law, Justice and Development Week, and spoke on the treatment of security interests in insolvency under the UNCITRAL Legislative Guide on Secured Transactions; also participated in a discussion on Islamic finance and MSME finance (Washington, D.C., 16-20 November 2015);

(c) A panel discussion on secured transactions law reform at the University of Warwick Law School, and spoke on the experience from the implementation of the recommendations of the UNCITRAL Legislative Guide on Secured Transactions in view of the relevant initiatives aimed at reforming the English secured transactions law (Coventry, United Kingdom, 10-11 December 2015); and

(d) A Workshop on the economic assessment of trade law in particular with respect to the UNCITRAL texts on security interests and on best practices in the field of electronic registry design and operation, organized by the Unidroit Foundation and the Commercial Law Centre at the Harris-Manchester College of the University of Oxford (Oxford, United Kingdom, 30-31 March 2016).

Micro, Small and Medium-sized Enterprises

40. The Secretariat has encouraged participation and dialogue in respect of its work on micro, small and medium-sized enterprises (MSMEs — Working Group I) through its participation, in the Corporate Registers Forum (CRF) and the European Commerce Registers' Forum (ECRF) joint annual conference, as well as presenting on the topic of "Business Registration, Registry & Legal Reform, Reducing Burdens" (Cardiff, Wales 9-12 May 2016).

III. Dissemination of information

41. A number of publications and documents prepared by UNCITRAL serve as key resources for its technical cooperation and assistance activities, particularly with respect to dissemination of information on its work and texts.

A. Website

42. The UNCITRAL website, available in the six official languages of the United Nations, provides access to full-text UNCITRAL documentation and other materials relating to the work of UNCITRAL, such as publications, treaty status information, press releases, events and news. In line with the organizational policy for document distribution, official documents are provided, when available, via linking to the United Nations Official Document System (ODS).

43. In 2015, the website received roughly 690,000 unique visitors, an increase from 2014 (640,000 unique visitors). Of all sessions, roughly 59 per cent were directed to pages in English and 41 per cent to pages in Arabic, Chinese, French, Russian and Spanish. In this respect, it should be noted that, while the UNCITRAL website is among the most important electronic sources of information on international trade law in all languages, it may represent one of few available sources on this topic in some of the official languages.

44. The content of the website is updated and expanded on an ongoing basis in the framework of the activities of the UNCITRAL Law Library and therefore at no additional cost to the Secretariat. The General Assembly has welcomed "the continuous efforts of the Commission to maintain and improve its website, including by developing new social media features, in accordance with the applicable guidelines."[17] In this regard, in September 2015, a general UNCITRAL LinkedIn account was established that now has over 900 followers. This account supplements the Tumblr microblog ("What's new at UNCITRAL?") established in 2014. Both features are accessible from the UNCITRAL website.

B. Library

45. Since its establishment in 1979, the UNCITRAL Law Library has been serving research needs of Secretariat staff and participants in intergovernmental meetings convened by UNCITRAL. It has also provided research assistance to staff of Permanent Missions, global staff of the United Nations, staff of other Vienna-based international organizations, external researchers and law students. In 2015, library staff responded to approximately 550 reference requests, originating from over 47 countries. Library visitors other than meeting participants, staff and interns included researchers from over 24 countries.

46. The collection of the UNCITRAL Law Library focuses primarily on international trade law and currently holds over 12,000 monographs, 100 active journal titles, legal and general reference material, including non-UNCITRAL United Nations documents, documents of other international organizations; and electronic resources (restricted to in-house use only). Particular attention is given to expanding the holdings in all of the six United Nations official languages. While use of electronic resources has increased, resources on trade law from many countries are still only found in print, and circulation of print items has remained steady (there was a slight increase in 2015 over 2014).

47. The UNCITRAL Law Library maintains an online public access catalogue (OPAC) jointly with the other United Nations libraries in Vienna. The OPAC is available via the library page of the UNCITRAL website.[18] In 2015, the OPAC was updated, providing an easier to use and enhanced interface.

48. The UNCITRAL Law Library staff prepares for the Commission an annual "Bibliography of recent writings related to the work of UNCITRAL". The bibliography includes references to books, articles and dissertations in a variety of languages, classified according to subject (for the forty-ninth Commission session, see A/CN.9/874). Individual records of the bibliography are entered into the OPAC, and the full-text collection of all cited materials is maintained in the Library collection. Monthly updates from the date of the latest annual bibliography are available in the bibliography section of the UNCITRAL website.

---

[17] General Assembly resolution 70/115.

[18] Available from www.uncitral.org/uncitral/publications/library.html.

49. The Library produces a consolidated bibliography of writings related to the work of UNCITRAL on the UNCITRAL website.[19] The consolidated bibliography aims to compile all entries of the bibliographical reports submitted to the Commission since 1968. It currently contains over 8,000 entries, reproduced in the English and the original language versions, verified and standardized to the extent possible.

C. Publications

50. In addition to official documents, UNCITRAL traditionally maintains two series of publications, namely the texts of all instruments developed by the Commission and the UNCITRAL Yearbook. Publications are regularly provided in support of technical cooperation and assistance activities undertaken by the Secretariat, as well as by other organizations where the work of UNCITRAL is discussed, and in the context of national law reform efforts.

51. The following works were published in 2015: Conference for a Euro-Mediterranean Community of International Arbitration,[20] Thirty-five Years of Uniform Sales Law: Trends and Perspectives, [21] United Nations Convention on Transparency in Treaty-based Investor-State Arbitration (New York, 2014),[22] and the 2012 UNCITRAL *Yearbook*.[23]

52. In light of budget and environmental concerns, the Secretariat has continued its efforts to use electronic media as a primary method to disseminate UNCITRAL texts. Thus, print runs for all publications have been reduced and the 2012 UNCITRAL *Yearbook* was published exclusively in electronic format (CD-ROM and e-book).

D. Press releases

53. Press releases are being regularly issued when treaty actions relating to UNCITRAL texts take place or information is received on the adoption of an UNCITRAL model law or other relevant text. Press releases are also issued with respect to information of particular importance and direct relevance to UNCITRAL. Those press releases are provided to interested parties by e-mail and are posted on the UNCITRAL website, as well as on the website of the United Nations Information Service (UNIS) in Vienna or of the Department of Public Information, News and Media Division in New York, if applicable.

54. To improve the accuracy and timeliness of information received with respect to the adoption of UNCITRAL model laws, since such adoption does not require a formal action with the United Nations Secretariat, and to facilitate the dissemination of related information, the Commission may wish to request Member States to advise the Secretariat when enacting legislation implementing an UNCITRAL model law.

E. General enquiries

55. The Secretariat currently addresses approximately 2,000 general enquiries per year concerning, inter alia, technical aspects and availability of UNCITRAL texts, working papers, Commission documents and related matters. Increasingly, these enquiries are answered by reference to the UNCITRAL website.

F. Information lectures in Vienna

56. The Secretariat provides upon request information lectures in-house and via video conference on the work of UNCITRAL to visiting university students and academics,

members of the bar, Government officials including judges and others interested. Since the last report, more than 20 lectures have been given to visitors from all parts of the world.

IV. Resources and funding

57. The costs of most technical cooperation and assistance activities are not covered by the regular budget. The ability of the Secretariat to implement the technical cooperation and assistance component of the UNCITRAL work programme is therefore contingent upon the availability of extrabudgetary funding.

58. The Secretariat has explored a variety of ways to increase resources for technical assistance activities, including through in-kind contributions. In particular, a number of missions have been funded, in full or in part, by the organizers. Additional potential sources of funding could be available if trade law reform activities could be mainstreamed more regularly in broader international development assistance programmes. In this respect, the Commission may wish to provide guidance on possible future steps.

A. UNCITRAL Trust Fund for symposia

59. The UNCITRAL Trust Fund for symposia supports technical cooperation and assistance activities for the members of the legal community in developing countries, funding the participation of UNCITRAL staff or other experts at seminars where UNCITRAL texts are presented for examination and possible adoption and fact-finding missions for law reform assessments in order to review existing domestic legislation and assess country needs for law reform in the commercial field.

60. During the period under review, a pledge of US$ 20,000 was received by the Government of Indonesia. The Government of the Republic of Korea provided a contribution of US$ 25,555.84 for the participation of the UNCITRAL Secretariat in the APEC EoDB project (see para. 16 above) and a separate contribution of US$ 46,953 for Trust Fund activities.

61. At its 48th Session (Vienna, 29 June-16 July 2015), the Commission appealed to all States, international organizations and other interested entities to consider making contributions to the Trust Fund for UNCITRAL symposia, if possible, in the form of multi-year contributions, or as specific-purpose contributions, so as to facilitate planning and enable the Secretariat to meet the increasing requests from developing countries and countries with economies in transition for training and technical legislative assistance (A/70/17, paras. 244-245). Potential donors have also been approached on an individual basis.

62. The Commission may wish to note that, in spite of efforts by the Secretariat to solicit new donations, funds available in the Trust Fund are sufficient only for a very small number of future technical cooperation and assistance activities. Efforts to organize the requested activities at the lowest cost and with co-funding and cost sharing whenever possible are ongoing. However, once current funds are exhausted, requests for technical cooperation and assistance involving the expenditure of funds for travel or to meet other costs will have to be declined unless new donations to the Trust Fund are received or alternative sources of funds can be found.

63. The Commission may once again wish to appeal to all States, relevant United Nations Agencies and bodies, international organizations and other interested entities to make contributions to the Trust Fund, if possible in the form of multi-year contributions, so as to facilitate planning and to enable the Secretariat to meet the demand for technical cooperation and assistance activities and to develop a more sustained and sustainable technical assistance programme. The Commission may also wish to request Member States to assist the Secretariat in identifying sources of funding within their Governments.

B. UNCITRAL Trust Fund to grant travel assistance to developing countries that are members of UNCITRAL

64. The Commission may wish to recall that, in accordance with General Assembly resolution 48/32 of 9 December 1993, the Secretary-General was requested to establish a Trust Fund to grant travel assistance to developing countries that are members of UNCITRAL. The Trust Fund so established is open to voluntary financial contributions from States, intergovernmental organizations, regional economic integration organizations, national institutions and non-governmental organizations, as well as to natural and juridical persons.

65. In the period under review, a contribution in the amount of euro 5,000 was received from the Government of Austria, to whom the Commission may wish to express its appreciation.

66. During the same reporting period, the available Trust Fund resources were used to facilitate participation at the 48th session of UNCITRAL in Vienna (29 June-16 July) for delegates from Colombia, Honduras and Mexico, and for participation in the 25th and 26th sessions of Working Group I in New York (13-17 April) and Vienna (19-23 October) for delegates from Colombia and Uganda. In order to allow for broader assistance despite the limited resources of the fund, cost coverage in each case has been provided either for the air ticket, or for the DSA only.

67. In order to ensure participation of all Member States in the sessions of UNCITRAL and its Working Groups, the Commission may wish to reiterate its appeal to relevant bodies in the United Nations system, organizations, institutions and individuals to make voluntary contributions to the Trust Fund established to provide travel assistance to developing countries that are members of the Commission.

68. It is recalled that in its resolution 51/161 of 16 December 1996, the General Assembly decided to include the Trust Funds for UNCITRAL symposia and travel assistance in the list of funds and programmes that are dealt with at the United Nations Pledging Conference for Development Activities.

B. Note by the Secretariat on UNCITRAL regional presence: activities of the UNCITRAL Regional Centre for Asia and the Pacific

(A/CN.9/877)

[Original: English]

1. The General Assembly, in its resolutions 67/89 of 14 December 2012, 69/115 of 10 December 2014 and 70/115 of 14 December 2015, welcomed the activities of the United Nations Commission on International Trade Law Regional Centre for Asia and the Pacific ("UNCITRAL-RCAP" or "Regional Centre"), in the Republic of Korea, towards reaching out and providing technical assistance with international trade law reforms to developing countries in the region.

2. The UNCITRAL-RCAP has carried out its activities in accordance with the priority lines of action identified in the UNCITRAL Secretariat's strategic framework for technical assistance (A/66/17, para. 255), as well as with the specific mandate identified for the Regional Centre, namely (a) to enhance international trade and development in the Asia-Pacific region by promoting certainty in international commercial transactions through the dissemination of international trade norms and standards, in particular those elaborated by UNCITRAL; (b) to provide bilateral and multilateral technical assistance to States with respect to the adoption and uniform interpretation of UNCITRAL texts through workshops and seminars; (c) to engage in coordination activities with international and regional organizations active in trade law reform projects in the region; and (d) to function as a channel of communication between States in the region and UNCITRAL.

3. The Regional Centre has established the following four annual flagship events with the objective of streamlining activities to promote UNCITRAL texts and establishing regular opportunities for substantive regional contributions to support the present and possible future legislative work of UNCITRAL:

(a) The UNCITRAL Asia Pacific Spring Conference (second edition in 2015), a regional conference, held in the host city of Incheon, Republic of Korea, comprehensively covering UNCITRAL topics except those relating to arbitration and conciliation. In 2015, the conference focused on international sales law and electronic commerce, bringing together international, regional and national organizations, government officials and legal officers, academics, entrepreneurs and business people, experts and practitioners from more than thirty jurisdictions;

(b) The Asia Pacific ADR Conference (fourth edition in 2015), a regional conference, held in Seoul, promoting all UNCITRAL standards on arbitration and conciliation, and designed to attract not only experts and practitioners from around the world, but also officials, researchers and scholars from 56 Asia Pacific States to share their opinions and research findings related to the conference themes. In 2015, the conference gathered the institutional support of the International Chamber of Commerce, as well as the Ministry of Justice of the Republic of Korea and the Korean Commercial Arbitration Board (KCAB). The conference addressed recent developments in the field of arbitration, such as ethics and corruption in international arbitration, appeal mechanisms in investment arbitration, regional implementation of the UNCITRAL Model Law on International Commercial Arbitration, the relevance of investor-State dispute settlement in the context of regional infrastructure projects, and the efficiency and effectiveness of alternative dispute resolution (ADR). The conference gathered experts, practitioners, representatives from arbitration centres and officials from the region (Australia, China, India, Japan, Malaysia, Mongolia, Qatar, the Republic of Korea and Singapore);

(c) The UNCITRAL Emergence Conference (first edition in 2015), held in Macau, China, with the support of the University of Macau, based on call for academic papers, addressing planned and possible future work of the Commission, and other emerging topics relating to the harmonization of international trade law. Entitled "Harmonizing Trade Law to Enable Private Sector Regional Development", the 2015 conference attracted more than 50 participants from 14 jurisdictions, who discussed a wide range of topics including

international contract law, electronic commerce, micro, small and medium-sized enterprises (MSMEs), cross-border insolvency and international commercial dispute resolution;

(d) The UNCITRAL Asia Pacific Day, aimed at promoting awareness and encouraging the study, discussion, and implementation of the UNCITRAL texts, and celebrating the establishment of UNCITRAL by the General Assembly on 17 December 1966. Every year, universities from across the region are invited to join the celebrations by proposing a special programme that can range from special lectures and seminars, to public conferences. In 2015, seven universities joined the celebrations, namely: the Beijing Normal University which delivered a public lecture on "International Trade Law in E-Commerce Environment" (Beijing, 1 December 2015); the University of Western Australia which delivered a special lecture on uniform commercial law reform and a seminar for continuing professional development on arbitration, international sales and electronic transactions (Perth, Australia, 10 December 2015); the China University of Political Science and Law which delivered a public lecture on "Comparison between CISG and UNIDROIT Principles and Their Impact on the Chinese Contract Law" (Beijing, 15 December 2015); Nagoya University which delivered a special lecture on online dispute resolution (Nagoya, Japan, 16 December 2015); Kobe University which delivered special lectures on UNCITRAL's initiatives on the development of international dispute resolution and an arbitration moot based on UNCITRAL texts (Kobe, Japan, 18-20 December 2015); Chuo University which delivered a special lecture on "Trade Law Reform in Asia and the Role of UNCITRAL" (Tokyo, 18-21 December 2015); and Nankai University which delivered a lecture on "Trade Law Reforms and the Pilot Free Trade Zones in China" (Tianjin, China, 19 December 2015).

4. In addition to the above events, UNCITRAL-RCAP has, during the reporting period, also delivered and/or supported the following activities aimed at promoting certainty in international commercial transactions through the dissemination of international trade norms and standards, in particular those elaborated by UNCITRAL:

(a) On UNCITRAL's mandate generally: Conference on "Doing Business across Asia: Legal Convergence in an Asian Century" organized by the Singapore Academy of Law, at which UNCITRAL-RCAP delivered a presentation on "legal convergence in Asia — learning from global harmonization initiatives" (Singapore, 19-22 January 2016); public lecture at the National University of Singapore on "Regional Development and Integration: the Role of UNCITRAL" (Singapore, 22 January 2016);

(b) In the area of the international sale of goods: Celebratory Conference on "35 Years of the CISG: Achievements and Perspectives" held with the Government of Singapore, the Singapore Management University and the National University of Singapore (Singapore, 23-24 April 2015);

(c) In the area of dispute resolution: Open Forum on Online Dispute Resolution held jointly with the Electronic Transactions Development Agency of Thailand (Bangkok, 4 April 2015); presentation on the implementation of UNCITRAL texts in Islamic law-influenced jurisdictions at Arbitration Week hosted, with the support of UNCITRAL-RCAP, by the Kuala Lumpur Regional Centre for Arbitration (Kuala Lumpur, 7-9 May 2015); lecture on UNCITRAL texts on dispute resolution at the International Arbitration Expert Programme held by KCAB (Seoul, 22 June 2015); Asia Pacific Transparency Observatory Inaugural Conference held with KCAB, the Asia Pacific Law Institute of the Seoul National University and the Seoul International Dispute Resolution Centre (Seoul, 18 December 2015); UNCITRAL Model Law Workshop delivered with the East Asian Branch of the Chartered Institute of Arbitrators (CIArb) (Shanghai, China, 1 March 2016); presentation on the UNCITRAL Rules on Transparency in Treaty-based Investor-State Arbitration (2014) and the United Nations Convention on Transparency in Treaty-based Investor-State Arbitration (New York, 2014) at the Kuala Lumpur Regional Centre for Arbitration (KLRCA) International Investment Arbitration Conference, supported by UNCITRAL-RCAP (Kuala Lumpur, 10-11 March 2016).

Furthermore, in collaboration with the Asia Pacific Law Institute of the Seoul National University and KCAB, the Regional Centre has established the *ISDS Asia Pacific Transparency Observatory* as a framework for monitoring Asia Pacific treaty-based investor-State dispute settlements ("ISDS"). The Observatory will engage in disseminating the United Nations Convention on Transparency in Treaty-based Investor-State Arbitration

(New York, 2014) and the UNCITRAL Rules on Transparency in Treaty-based Investor-State Arbitration (2014); collecting relevant information and research related to ISDS in the Asia-Pacific; monitoring ongoing negotiations and current trade agreements that concerns ISDS; assisting the Secretariat, through UNCITRAL-RCAP, in respect of issues regarding ISDS in the region; and disseminating relevant information related to the project among national and international partners;

(d) In the area of electronic commerce: Seminar on "Electronisation of Transferable Documents or Instruments Used in International Trade" organized with the Attorney-General's Chambers of Singapore and the Association of Banks in Singapore (Singapore, 10-11 March 2016);

(e) In the area of procurement and infrastructure development: on the occasion of the International Anti-Corruption Day (9 December 2015), the Regional Centre issued a Call2Action for the promotion of the UNCITRAL Model Law on Public Procurement (2011), joining the global United Nations campaign #breakthechain, and considering that the Model Law was specifically designed to implement the procurement-related provisions in the United Nations Convention against Corruption (New York, 2003) ("UNCAC"). The campaign was launched in English, Korean, Chinese and Bahasa Indonesia on all RCAP's social media platforms.

5. For the promotion of the rule of law and the uniform application and interpretation of UNCITRAL texts, UNCITRAL-RCAP hosted the first UNCITRAL Asia Pacific Judicial Summit, attended by 40 judges from 18 jurisdictions, and aimed at promoting the uniform interpretation and application of the Convention on the Recognition and enforcement of Foreign Arbitral Awards (New York, 1958) ("New York Convention"). Sponsorship for attendance by judges from Least Developed Countries, Landlocked Developing Countries and Small Island Developing States in the Asia Pacific Region was provided with the support of the Government of the Hong Kong Special Administrative Region of China and the Hong Kong International Arbitration Centre. The Commission may note that the Judicial Summit is part of an initiative to establish partnerships with judiciaries and judicial training institutions across the region to facilitate the further integration of capacity-building activities, wider inclusion of UNCITRAL texts in training curricula and broader promotion of the uniform interpretation of UNCITRAL texts.

6. UNCITRAL-RCAP has also been engaged in the following capacity-building, technical cooperation and assistance activities aimed at promoting the regional use and adoption of UNCITRAL texts. These activities are priorities for UNCITRAL pursuant to a decision taken at its twentieth session (1987):[1]

(a) On UNCITRAL's work generally: the UNCITRAL South Pacific Seminar was the first event UNCITRAL-RCAP held with the support of the Department of Justice of Papua New Guinea, the Ministry of Justice of the Republic of Korea and the Centre for Small States (CSS) at the Queen Mary University of London, and specifically designed to provide capacity-building for the small island Pacific States in the fields of the international sale of goods, electronic commerce and arbitration (Port Moresby, 24-25 September 2015); the UNCITRAL DPRK Workshop (Beijing, 21-27 June 2015) was the first comprehensive training and capacity-building initiative for nineteen officials, legal officers and academics of the Democratic People's Republic of Korea on international commercial and investment arbitration, international sale of goods, e-commerce, and secured transactions;

(b) In the area of international sale of goods, in particular the United Nations Convention on Contracts for the International Sale of Goods (New York, 1980) ("CISG"): the CISG Asia Pacific Roadshow 2015-2016 aimed at promoting regional accession, ratification and implementation of the Convention with technical briefings delivered to relevant domestic stakeholders (Bangkok, 3 April 2015; Manila, 3 September 2015; Vientiane, 2 February 2016; Bandar seri Begawan, 4 February 2016);

(c) In the area of dispute resolution: UNCITRAL Bhutan Workshop on arbitration, together with a side event for the judiciary of Bhutan on the enforcement of arbitral awards (Thimphu, 18-19 May 2015); Workshop for Incheon Businesses on Prevention and

[1] *Official Records of the General Assembly, Forty-second Session, Supplement No. 17* (A/42/17), para. 335.

Resolution of Legal Disputes in Transactions, held with the Ministry of Justice of the Republic of Korea and KCAB (Incheon, Republic of Korea, 4 June 2015); upon request by the Ministry of Justice of Viet Nam and in close coordination with the International Finance Corporation (IFC), UNCITRAL provided comments on the draft Conciliation Law of Viet Nam, taking into consideration the UNCITRAL Model Law on International Commercial Conciliation (2002);

(d) In the area of electronic commerce: UNCITRAL Thailand Workshop on the United Nations Convention on the Use of Electronic Communications in International Contracts (New York, 2005) ("e-CC") held with the United Nations Economic and Social Commission for Asia and the Pacific (UNESCAP) and the Electronic Transactions Development Agency of Thailand (Bangkok, 3 April 2015); UNCITRAL Cambodia Workshop on "Legislative Framework for Safe and Sound Electronic Payments and Commerce" held with the National Bank of Cambodia (Phnom Penh, 27 April 2015); scoping mission, in collaboration with UNESCAP, to the Maldives on legislation on electronic commerce (Male, 28-29 October 2015); briefings on the e-CC with government officials of Japan (Tokyo, 21 December 2015), the Lao People's Democratic Republic (Vientiane, 2 February 2016) and Brunei Darussalam (Bandar seri Begawan, 4 February 2016).

7. Following technical assistance activities and in its capacity as a channel of communication between States in the region, UNCITRAL-RCAP has, during the reporting period, monitored the progress towards, and assisted States in, the adoption and implementation of the following UNCITRAL texts:

(a) In the area of international sale of goods:

United Nations Convention on Contracts for the International Sale of Goods, (Vienna, 1980): ratification by Viet Nam on 18 December 2015. Progress towards the adoption of the Convention was reported by Indonesia, the Philippines and Thailand;

(b) In the area of dispute resolution:

Convention on the Recognition and Enforcement of Foreign Arbitral Awards, (New York, 1958): progress towards accession to the Convention has been reported by Palau and Papua New Guinea. Australia has also amended its International Arbitration Act 1974 (Cth) to simplify provisions on the enforcement of foreign arbitral awards in Australia and to improve compliance with the Convention in 2015;

United Nations Convention on Transparency in Treaty-based Investor-State Arbitration (New York, 2014): progress towards accession to the Convention has been reported by Australia;

UNCITRAL Model Law on International Commercial Arbitration (1985), with amendments as adopted in 2006: new legislation based on the Model Law has been adopted in Bahrain, Bhutan and Myanmar. In the United Arab Emirates, arbitration regulations have also been reported to be enacted by the Abu Dhabi Global Market with reference to the provisions of the Model Law. Progress towards adoption of the Model Law has also been reported by Mongolia and the Republic of Korea;

UNCITRAL Model Law on International Commercial Conciliation (2002): legislation based on the Model Law has been adopted in Bhutan; progress towards adoption of the Model Law has also been reported by Viet Nam; and

UNCITRAL Rules on Transparency in Treaty-based Investor-State Arbitration (2014) (the "Rules"): Two agreements specifically reference the Rules, with the details of arrangements for their application to be concluded in due course. On 17 June 2015 the Governments of China and Australia concluded a free trade agreement, and on 10 February 2016 the Government of the Hong Kong Special Administrative Region of China, under the authorization of the Central People's Government of China, concluded with the Government of Canada an agreement on the promotion and protection of investments;

(c) In the area of electronic commerce:

United Nations Convention on the Use of Electronic Communications in International Contracts (New York, 2005): ratification by Sri Lanka on 7 July 2015. Progress towards ratification of or accession to the Convention was reported by Australia, the Philippines and Thailand.

8. Systematic coordination and cooperation activities that were pursued with institutions active in trade law reform during the reporting period include:

(a) United Nations Economic and Social Commission for Asia and the Pacific (UNESCAP): UNCITRAL-RCAP has been involved in the preparation of the "Framework Agreement on Facilitation of Cross-Border Paperless Trade in Asia and the Pacific" formulated under the auspices of UNESCAP, including participation in the meetings of the Intergovernmental Steering Group on Cross-Border Paperless Trade Facilitation (Bangkok, 1-3 April 2015; 21-24 March 2016). UNCITRAL-RCAP participated in the 7th Asia-Pacific Trade Facilitation Forum which was held jointly by UNESCAP, the Asian Development Bank (ADB) and the China International Electronic Commerce Centre (Wuhan, China, 20-21 October 2015). In addition, UNCITRAL-RCAP hosted a session on "Investment Agreements and Investor State Dispute Resolution: Current Trends and Emerging Issues" jointly with UNESCAP, the United Nations Conference on Trade and Development (UNCTAD) and the International Centre for the Settlement of Investment Disputes (ICSID) at the 5th Meeting of the Asia-Pacific Foreign Direct Investment Network for Least Developed and Landlocked Developing Countries (Bangkok, 2 November 2015). A capacity-building workshop on "Cross-border Paperless Trade Facilitation" was also held with UNESCAP (Bangkok, 4 November 2015);

(b) United Nations Conference on Trade and Development (UNCTAD): as mentioned above, a session on "Investment Agreements and Investor State Dispute Resolution: Current Trends and Emerging Issues" was held jointly with UNESCAP, UNCTAD and ICSID (Bangkok, 2 November 2015);

(c) United Nations Project Office on Governance (UNPOG): UNCITRAL-RCAP participated in the 2015 UNPOG Roundtable on Promoting Good Governance (Seoul, 18 December 2015);

(d) World Bank: UNCITRAL-RCAP participated in the "Entrepreneurial Talents' House of Opportunities and Supports" (ETHOS) programme organized by the World Bank and the State University of New York Korea by delivering presentations on UNCITRAL's work (Incheon, Republic of Korea, 25 January 2016). In addition, as mentioned above, a session on "Investment Agreements and Investor State Dispute Resolution: Current Trends and Emerging Issues" was held jointly with UNESCAP, UNCTAD and ICSID (Bangkok, 2 November 2015);

(e) International Finance Corporation (IFC) East Asia and the Pacific Office: as mentioned above, coordination of technical assistance on laws on conciliation to the Government of Viet Nam;

(f) Asian Development Bank (ADB): as mentioned above, UNCITRAL-RCAP participated in the 7th Asia-Pacific Trade Facilitation Forum which was held jointly by UNESCAP, the Asian Development Bank (ADB) and the China International Electronic Commerce Centre (Wuhan, China, 20-21 October 2015); representatives of the ADB Pacific Private Sector Development Initiative, also attended and provided support to the 2015 UNCITRAL South Pacific Seminar (Port Moresby, 24-25 September 2015);

(g) Asia-Pacific Economic Cooperation (APEC): The UNCITRAL-RCAP has continued its engagement with APEC in the context of the framework of cooperation with the APEC Economic Committee Friends of the Chair ("FotC") Group on Strengthening Economic and Legal Infrastructure ("SELI") to enhance the promotion of UNCITRAL texts in the fields of arbitration, international sale of goods, secured transactions and e-commerce. Specifically, the UNCITRAL-RCAP hosted the Workshop on effective enforcement of business contracts and efficient resolution of business disputes, with the Department of Justice of the Government of the Hong Kong Special Administrative Region of China and the Asia Pacific Regional Office of the Hague Conference on Private International Law (HCCH), and participated in the first meeting of the FotC Group on SELI (Cebu, Philippines,

1 September 2015). UNCITRAL-RCAP also delivered a presentation on electronic commerce at the "APEC E-Commerce Forum 2015: New Paradigm for Cross-Border E-Commerce and Online Shopping" (Jeju, Republic of Korea, 26 November 2015), and on arbitration and conciliation at the APEC International Seminar on the Ease of Doing Business (Seoul, 27 January 2016). Another APEC Workshop on Dispute Resolution was hosted in collaboration with the Department of Justice of the Government of the Hong Kong Special Administrative Region of China (Lima, 26 February-1 March 2016). UNCITRAL-RCAP also recommended experts for the 2nd Expert Council of the APEC E-Commerce Business Alliance (APEC-ECBA), which were endorsed by the Plenary Meeting of the First Senior Officials' Meeting (SOM1) Electronic Commerce Steering Group (ECSG) (Lima, 27 February 2016);

(h) Asian-African Legal Consultative Organization (AALCO): UNCITRAL-RCAP participated in the 54th Annual Session of AALCO and delivered a speech on UNCITRAL and its texts on transparency in treaty-based investor-State arbitration (Beijing, 13-14 April 2015);

(i) Hague Conference Asia Pacific Regional Office (HAPRO): UNCITRAL-RCAP collaborated with HAPRO in supporting the Conference on "The Developing World of Arbitration: A Comparative Study of Arbitration Reform in the Asia Pacific" organized by the University of Hong Kong, China (Hong Kong, China, 27 October 2015);

(j) Office of the Chief Trade Adviser of the Forum Island Countries (FICs): as mentioned above, representatives of the Office of the Chief Trade Advisers of the FICs attended and provided support to the 2015 UNCITRAL South Pacific Seminar (Port Moresby, 24-25 September 2015);

(k) Melanesian Spearhead Group (MSG): during the reporting period, UNCITRAL-RCAP engaged in cooperation with MSG to provide technical assistance to States in the South Pacific in the areas of international contracts and arbitration; MSG's representative also attended and provided support to the 2015 UNCITRAL South Pacific Seminar (Port Moresby, 24-25 September 2015);

(l) International Chamber of Commerce (ICC): ICC supported UNCITRAL-RCAP's annual flagship event — the Asia Pacific ADR Conference; UNCITRAL-RCAP delivered a presentation on UNCITRAL's work on arbitration at the ICC's arbitration workshop for government officials in the Lao People's Democratic Republic (Vientiane, 29 February-1 March 2016);

(m) International organizations based in the Republic of Korea: participating in consultation meetings organized by the Ministry of Foreign Affairs of the Republic of Korea (1 April 2015).

9. UNCITRAL-RCAP has continued its coordination efforts with the UNCITRAL National Coordination Committees for Australia (UNCCA) and India, and acknowledged the founding of the Global Private Law Forum (GPLF) of Japan as national expertise centre for international trade law. During the reporting period, the Regional Centre held the first UNCITRAL Australia Seminar with the UNCCA and the Attorney General's Department of Australia (Canberra, 29 May 2015), followed by the "International Conference on Changing Dynamics of International Arbitration in India" where the UNCITRAL National Coordination Committee for India was launched (New Delhi, 31 October 2015). A briefing on the e-CC was also conducted with Japanese stakeholders in cooperation with GPLF (Tokyo, 21 December 2015). These private sector initiatives allow for wider dissemination of international trade norms and national coordination activities, allowing the Regional Centre to allocate more resources to dissemination of UNCITRAL texts in Least Developed Countries (LDCs), Landlocked Developing Countries (LLDCs) and Small Island Developing States (SIDCs) in the region.

10. Resolution 69/115 adopted by the General Assembly on 10 December 2014 reiterated its appeal to all bodies responsible for development assistance such as the bilateral aid programmes of States, to support UNCITRAL in its technical cooperation and assistance programmes and to cooperate and coordinate their activities with those of UNCITRAL in light of the relevance and importance of such work for the promotion of the rule of law, both at the national and international levels. In light of this, the Regional Centre participated in

the Aid for Trade Seminar organized by the Department of Foreign Affairs and Trade of Australia for programme managers and policy officers in Asia from Australia and other donor countries (Singapore, 21-22 April 2016), and engaged in coordination with the Asian Development Bank (Papua New Guinea). Within this framework, the Regional Centre has engaged with agencies in charge of official development assistance to ensure further coordination of technical assistance activities in the field of trade law in the region.

11. To expand the reach of its mandate both with the hosting community and regional academia, the Regional Centre started national outreach and regional educational programmes during the reporting period, which aim to maintain regular dialogue with non-governmental organizations, local and national political stakeholders, other international organizations, academia, the media and the general public on various aspects of the UNCITRAL-RCAP, to enhance cooperation and community support, and increase awareness of UNCITRAL activities:

(a) For the national outreach programme, the Regional Centre has actively participated in the Incheon International Organizations Consultative Partnership and related events held by the Incheon Metropolitan City, and at the Incheon International City Forum (Incheon, 11 April 2016) organized by the Incheon International Relations Foundation. In addition, staff and interns have been involved in career fairs hosted by the Incheon Metropolitan City, as well as other international organizations and offices in the Republic of Korea. The Regional Centre has opened its doors to various visitors, including representatives of the Incheon Municipal Council, local students and interns from the Ministry of Justice of the Republic of Korea. Various lectures have also been delivered to local students on UNCITRAL and its work. Also, the Regional Centre is preparing a website that includes a Korean language version to facilitate the promotion of UNCITRAL's work and the dissemination of UNCITRAL texts in Korea;

(b) The Regional Centre has continued its support to international trade law moot competitions held in the region, namely: the 2015 FDI Moot Asia-Pacific Regional Rounds organized by KCAB and the Centre for International Legal Studies (Seoul, 19-21 August 2015); the 13th Annual Willem C. Vis (East) International Commercial Arbitration Moot (Hong Kong, China, 6-13 March 2016); and the 9th Vis Japan Practice Moot hosted by Kobe University and the Academy for International Business Transactions AIBT (Kobe, Japan, 14 February 2016);

(c) The Regional Centre has launched an annual online publication by the Regional Centre of articles on topics of international trade law which are selected following annual calls for papers. The goal of that online publication is to stimulate interest, research and study on UNCITRAL and its texts. It is dedicated to the city of Incheon as host of the first UNCITRAL Regional Centre. In accordance with the mandate of the UNCITRAL-RCAP, all papers considered for the publication must be relevant to the Asia Pacific region. The views expressed therein are those of the authors and do not necessarily reflect the views of the United Nations;

(d) Academic engagement was fostered by jointly organizing events or by delivering public lectures at regional institutions and universities such as: Beijing Normal University, the China University of Political Science and Law, Chuo University, Dankook University, Hanyang University, Hokkaido University, the University of Hong Kong, Incheon National University, Kobe University, Korea University, Nagoya University, Nankai University, Seoul National University, the National University of Singapore, Soongsil University, the University of Western Australia and Yonsei University.

12. The Regional Centre has consolidated the function it serves on behalf of the UNCITRAL Secretariat as a channel of communication between States in the region and UNCITRAL, setting up contact points within governments in the region and engaging in regular consultations with government officials from Australia, Cambodia, China (including the Special Administrative Regions of Hong Kong and Macau), India, Indonesia, Iran (Islamic Republic of), Japan, Malaysia, Myanmar, Mongolia, Nepal, Oman, Pakistan, Philippines, Republic of Korea, Sri Lanka, Thailand and Viet Nam (A/69/17, para. 212).

13. The Regional Centre is staffed with one professional, two team assistants and two legal experts. During this reporting period, 19 interns were hosted at the Regional Centre. The

core project budget allows for the occasional employment of experts and consultants. The Regional Centre relies on the generous financial contribution from the Incheon Metropolitan City to the Trust Fund for UNCITRAL Symposia to meet the cost of operation and programme, and on the contribution of a non-reimbursable loan of a legal expert by the Ministry of Justice of the Republic of Korea. The Regional Centre has often been able to leverage the resources of its partners, especially for contribution to the costs of travel and of meeting facilities and services. In October 2015, following a related exchange of letters between the United Nations and China, the UNCITRAL Secretariat and the Government of the Hong Kong Special Administrative Region of China concluded a memorandum of understanding for the technical and administrative arrangements relating to contribution of a non-reimbursable loan of an expert to the UNCITRAL-RCAP.

14. According to article 13.3 of the Memorandum of Understanding signed on 18 November 2011, between the United Nations, and the Ministry of Justice and Incheon Metropolitan City of the Republic of Korea, regarding the operation and financial contribution to the Regional Centre for Asia and the Pacific, the terms of such support are to be reviewed by all parties five years after the establishment of the Regional Centre, i.e. before 10 January 2017. The latest payment of the annual financial contribution by the Incheon Metropolitan City to the Trust Fund for UNCITRAL Symposia was made on November 2015.

15. It is expected that interest in UNCITRAL texts will grow with additional requests for technical assistance. Such increase will call for a corresponding increase in available resources. Governments, the relevant bodies of the United Nations system, organizations, institutions and individuals are actively encouraged to make voluntary contributions to the United Nations Commission on International Trade Law Trust Fund for Symposia and, where appropriate, for the financing of special projects and otherwise to assist the UNCITRAL Secretariat in carrying out technical cooperation and assistance activities. Additional contributions to the project from member States, or from interested private and public entities recommended by member States, are required to further respond to regional expectations.

C. Note by the Secretariat on technical assistance to law reform: compilation of comments by States on a draft guidance note on strengthening United Nations support to States to implement sound commercial law reforms

(A/CN.9/882 and Add.1)

[Original: English/Spanish]

Contents

I. Introduction

1. At its forty-sixth session, in 2010, the Commission requested the Secretariat to consider ways of better integrating its technical cooperation and assistance activities into activities conducted on the ground by the United Nations in particular through the United Nations Development Programme or other country offices of the United Nations.[1] At its forty-eighth session, the Commission had before it a draft guidance note on strengthening United Nations support to States to implement sound commercial law reforms, presented by the Secretariat in response to that request (A/CN.9/845).

2. After consideration at that session, the Commission requested States to provide to its secretariat any suggestion for revision of the text. It was agreed that the compilation of all comments received from States would be circulated by the Secretariat to all States together with a revised version of the text. It was understood that, if agreement of States on the revised text could be achieved before or during the consideration of the Commission's report in the Sixth Committee of the General Assembly in 2015, the Sixth Committee itself might wish to endorse the text, so as to avoid delay in issuing the document. Otherwise, the matter might need to be brought back to the Commission for consideration at its next session. The Secretariat was requested, in revising the text, to follow closely the wording of General Assembly resolution 2205 (XXI) on the establishment of UNCITRAL and avoid embarking into areas not directly linked to the UNCITRAL mandate. The Secretariat was also requested to allocate sufficient time for consideration of the revised text at the forty-ninth session if the revised text had to be considered at that time, and to make provisions for specific time to be allotted to that item in the provisional agenda of that session.[2]

3. Pursuant to those decisions, the Secretariat circulated a note verbale to States on 21 July 2015 requesting them to submit suggestions for revision of document A/CN.9/845 and, in formulating such suggestions, to keep in mind, as requested by the Commission,[3] the intended scope and purpose of the document, which, to be usable by its expected readers, should remain short, concise and simple. It was stated in the note verbale that the intended scope and purpose of the guidance note was to be a tool to increase awareness across the United Nations about the importance of sound commercial law reforms and the use of internationally accepted commercial law standards in that context.

4. The compilation of comments by States received by the Secretariat on document A/CN.9/845 in response to that note verbale is reproduced in section II of this note. In addition to those comments, the Secretariat received on 23 October 2015 a comment by a State in response to a note verbale of the Secretariat of 8 October 2015 circulating to all States, as requested by the Commission (see para. 2 above), all comments received on

[1] *Official Records of the General Assembly, Sixty-fifth Session, Supplement No. 17* (A/65/17), para. 336.

[2] Ibid., *Seventieth Session, Supplement No. 17* (A/70/17), paras. 251-252.

[3] Ibid, para. 251.

document A/CN.9/845 with a version of the guidance note revised by the Secretariat pursuant to those comments (the 8 October version of the guidance note). Section III of this note reproduces that comment by a State.

5. States may wish to note that a draft guidance note on strengthening United Nations support to States, upon their request, to implement sound commercial law reforms is contained in document A/CN.9/883 that will be before the Commission at its forty-ninth session. The draft was prepared on the basis of the 8 October version of the guidance note incorporating comments on that version conveyed by States to the Secretariat, including during informal consultations in the Sixth Committee. Pursuant to the request of the Commission at its forty-eighth session (see para. 2 above), the Secretariat will allocate time in the provisional agenda of the forty-ninth session of UNCITRAL (A/CN.9/859) for the discussion of the draft guidance note.

II. Comments by States on document A/CN.9/845 received by the Secretariat in response to its note verbale LA/TL 131(9) — CU 2015/183/OLA/ITLD circulated to all States on 21 July 2015

(in the chronological order of receipt of responses by the Secretariat)

Singapore [30 July 2015; original in English]

- Proposed changes in the third sentence of para. 3, section B.2 (**The need for assistance with domestic commercial law reforms should be regularly assessed**):

  "Mechanisms for adjudicating disputes and enforcing binding commitments in the context of trade and investment must operate on the basis of internationally recognized **norms** ~~human rights~~ and should be easily accessible, affordable, efficient and effective."

[a comment accompanying the amendments read: "Adjudication of disputes and enforcing commercial commitments should properly be compliant with international norms, not just human rights."]

- Proposed changes in para.1, section B.5 (**UNCITRAL is the core legal body in the United Nations system in the field of international commercial law and as such should be relied upon in strengthening United Nations support to States to implement sound commercial law reforms**):

  "UNCITRAL is the only global and neutral international law-making body entrusted with legislating on commercial law matters on behalf of the entire international community. ~~Not only~~ States and relevant intergovernmental organizations **assisted by** ~~but also~~ **relevant** professional associations and other non-governmental organizations participate in the UNCITRAL legislative process. This contributes to the transparency and inclusiveness of the standard-making process. ~~and ensures scrutiny of legislative proposals by representatives of various economic and social interests, different legal traditions and societies at different levels of development.~~ The possible disconnect between **the perspectives** of Government delegates and **those of the** business world ~~representatives~~ is therefore minimized and adopted texts ideally reflect the optimal balance between the many competing interests. These facts together with consensus-building ensure a type of legislative due process that gives legitimacy to UNCITRAL standards as internationally accepted ones, rather than the product of any given system or country."

[a comment accompanying the first set of amendments read: "This reflects the basic principle governing UNCITRAL which is comprised of states. UNCITRAL has decided after much debate that decisions of UNCITRAL can only be taken by states, not observers such as industry groups and other NGOs with an interest in the subject matter. (see A 65/17, paras 299-306 and Annex III). The participation of these industry groups and other NGOs serve to assist the participating states to come to the best possible outcome."]

[a comment accompanying the second set of amendments read: "The original sentence is hard to read in the context of the discussion here. The first part of this sentence sufficiently captures the point sought to be made here."]

- Proposed changes in para. 2.c.ii, section C.1 (**Legal framework**):

"(ii) Identifying all stakeholders relevant to the commercial law reform, including domestic reform constituencies, international experts, various rule-of-law-assistance providers working in the same or related field, etc., and ensuring proper consultations ~~and if necessary strategic partnerships~~ with them **where necessary**;"

[a comment accompanying the amendments read: "It is not clear what is meant by entering into "partnerships" with stakeholders. The reforms are to be put in place by governments and it is for the government concerned to determine who they wish to partner with. It should not be for UN officials to "ensure" that governments enter in partnerships with entities identified by these officials."]

- Proposed changes in sub-para. (c), section C.3 (**Private sector, academia and general public**):

"(c) Maintaining regular dialogue with **non-governmental** ~~civil society~~ organizations ~~and groups~~ that represent various segments of society (e.g. consumers, local communities, end-users of public services, individual entrepreneurs, micro-, small and medium-sized enterprises and academia) as regards their views on measures required to improve the commercial law framework in the State;"

[a comment accompanying the amendments read: "For a UN instruction such as this, the proper term should be the term used in the UN Charter. (see Article 71, UN Charter)."]

- Proposed changes in para. 11 of the Annex:

~~"11. There are mechanisms to monitor and oversight actions and decisions of public authorities."~~

[a comment accompanying the amendments read: "This is not relevant for technical assistance in commercial law reform."]

Argentina [10 August 2015; original in Spanish]

"…

(1) The deletion of principles 2, 3 and 4 or their modification by the Secretariat in such a way that their language is consistent with the objective of the guidance note.

(2) The replacement of the phrase "flow of international trade" throughout the text with the phrase "extensive development of international trade", which is consistent with the language used in General Assembly resolution 2205 (XXI)...."

Ecuador [21 August 2015; original in Spanish]

"…In that regard, Ecuador wishes to reiterate how important it is that the work of UNCITRAL and all documents produced by the Secretariat adhere strictly to the terms of General Assembly resolution 2205 (XXI), which clearly sets out the Commission's mandate.

On the basis of the above, the document should have a more general focus and refer to "assistance in promoting the progressive harmonization and unification of international trade law", or simply "assistance in the implementation of international trade law". In the same spirit, the note should avoid terms that suggest intervention in the internal affairs of States, specifically with respect to their legal and legislative systems.

It is worth recalling that domestic reform processes lie exclusively within the competence of the State and that, with the exception of its conventions, instruments produced by UNCITRAL are not binding. In that regard, the document should establish with sufficient clarity that the objective of the Commission's activities is not — as the draft note appears to suggest — to impose new legislation on Member States or compel internal legislative changes, but only to develop guidelines or model laws that can be drawn upon by States in developing relevant commercial regulations.

The document should be short, concise and simple, and to that end should avoid referring to issues that are not directly linked to the Commission's mandate, such as peace, security, conflict prevention and post-conflict reconstruction. It should also avoid value judgements with respect to the activities of States.

Further proposed modifications of document A/CN.9/845 are as follows:

- References to "**domestic commercial law reforms**" and "**commercial law reforms at the country level**" ("*reforma interna del derecho mercantil*") should be removed from **all sections and paragraphs**
- It is suggested that **paragraph 2** be deleted from **section B ("Guiding Principles"), subsection 1**. It cannot be asserted that trade liberalization per se contributes to economic cooperation or the stability and well-being of peoples. Reality shows that it is precisely the economic system that has deepened differences and increased levels of poverty in certain parts of the world. International trade remains inequitable and discriminates between countries that produce raw materials and those that produce value added goods, and between States and transnational capital.
- It is suggested that **paragraph 3** be deleted from **section B, Guiding Principles, subsection 1**. The areas of activity referred to are not linked to the mandate of UNCITRAL.
- **In section B.2, paragraph 2**, it is suggested that the first part of the paragraph (up to and including the words "uniform interpretation and application", i.e. the first three sentences) be deleted. The "legal framework" refers to topics that are addressed by other international organizations and that fall within the competence of States.
- **In section B.2, paragraph 3**, it is suggested that the first part of the paragraph (up to and including the word "accountable", i.e. the first two sentences) be deleted. Only States and their legal systems may interpret legislative provisions and apply sanctions when a law is violated.
- **In section B.3, paragraph 1**, it is suggested that the second part of the paragraph (from the words "Ill-conceived policies", i.e. the final sentence) be deleted, since it constitutes an unnecessary value judgement.
- **In section B.4, paragraph 1**, it is suggested that the second part of the paragraph (from the words "There should also be ...", i.e. the final sentence) be deleted. Only States and their foreign policies may determine the coordination of their positions in international forums and the level and structure of their delegations.
- It is suggested that **paragraph 2** be deleted from **section B.4**. The reform of legal systems is not within the Commission's remit.
- **In section B.4, paragraph 3**, it is suggested that the first part of the paragraph (up to and including the words "conflicting enforcement results", i.e. the first sentence) be deleted, since it constitutes an unnecessary value judgement.
- **In section B.5, paragraph 1**, it is suggested that the first part of the paragraph be replaced with the following text: "UNCITRAL is the legal body of the United Nations system in the field of international commercial law. It is an intergovernmental forum comprising 60 member States elected by the General Assembly. Its membership is representative of the various geographic regions and the principal legal and economic systems. Intergovernmental organizations, professional associations and other non-governmental organizations also participate as observers." The paragraph would then continue up to the words "levels of development." **It is suggested that the second part of the paragraph** (from the words "The possible disconnect") **be deleted**, since it constitutes an unnecessary value judgement.
- **Under section C, Operational Framework**, it is suggested that the first part of the opening paragraph be replaced with the following text: "It is necessary to identify the needs of countries as regards assistance in the implementation of international trade law, in coordination with their respective Governments and only at their request, and to incorporate such assistance in the appropriate context of United Nations operations", the paragraph then continuing up to the words "United Nations system".

- **In section C ("Operational Framework"), section 1 ("Legal framework"), paragraph 2**, subparagraph (a) should be deleted. That text goes beyond the mandate of the United Nations and thus beyond that of UNCITRAL. In subparagraph (c) (ii) of the Spanish version of the document, the word "individualizando" should be replaced with the word "identificando". The final part of the subparagraph, from ", and ensuring", should be deleted. Such activities do not fall within the Commission's remit, as they are internal matters. In subparagraph (c) (iii), the word "preparing" should be replaced with the words "supporting the preparation of". The final part of the subparagraph, from the words "and ensuring", should be deleted. Again, such activities fall to the State rather than to UNCITRAL.
- In the Annex, it is suggested that paragraphs 10 and 11 be deleted. They bear no relation to the topic."

Belarus [24 August 2015; original in English]

"…to replace the last sentence of paragraph 2 of section 1 of chapter B of the Draft guidance note with the following sentence "Accordingly, they may contribute to the achievement of the purposes specified in the United Nations Charter and the United Nations General Assembly resolution 2205 (XXI) of 17 December 1966 'Establishment of the United Nations Commission on International Trade Law'." …"

Cyprus [24 August 2015; original in English]

"…the competent Authorities of the Republic of Cyprus acknowledged and took note of the said Note Verbale as well as the document entitled "Technical Assistance to law reform" attached therein…"

Israel [24 August 2015; original in English]

"…

General Comments

1. One important element in facilitating commercial law reform is a structured work plan which can focus on identifying the goals and objectives of the different steps (for both providing assistance and taking reform measures), setting up a schedule, developing strategies to address weaknesses or inadequacies of the different legislative norms or practices, and allocating resources. It is suggested that the Guidance Note encourages UN bodies to propose to States to adopt such an organized work plan.

2. Coordination is a key component in the commercial law reform process. In the context of the Guidance Note it could be advisable to highlight the importance of coordination between UN bodies, as well as domestic governmental departments, engaging in reform efforts. Such coordination is sometimes essential in order to avoid duplication of efforts, and can be achieved by appointing appropriate focal points in each body or agency to coordinate a specific reform initiative.

3. The use of UNCITRAL model laws and similar instruments issued by other international organizations as a basis or inspiration for legislation as part of commercial law reform should perhaps be given more prominence in the Guidance Note. At the same time, the Guidance Note could emphasize that model laws can be adapted to domestic circumstances and that States can select which provisions are most relevant to their legal systems.

4. The Guidance Note should also briefly refer to cooperation and exchanges of good practices between States, which can be supported or encouraged by UN bodies, as an instrument which can play a significant role in promoting commercial law reform. The Guidance Note emphasizes in several places throughout the text that commercial law reform is strongly linked to international legal obligations. We see that as a very important point. However, it could be considered that there is a need to clarify that the intention is to aspire

to consistency between domestic law and international obligations and not to create gaps or conflicts between the two, which the current text in the Guidance Note might be misinterpreted to construe.

Text Proposals

5. We believe that it would be preferable to refrain as much as possible from using the term "harmonization" in the Guidance Note, as it could be interpreted as a call for complete and overbroad alignment of domestic laws with international commercial law. Accordingly, please see the following suggested amendments: (suggested additions to the text are bolded/ highlighted/underlined and deletions are crossed out).

Paragraph B — Guiding Principles (1.2, p.3) — *The modern and harmonized international commercial law framework is the basis for rule-based commercial relations and an indispensable part of international trade,* ***bearing in mind the relevancy of domestic law and domestic legal systems in this regard****.*

Paragraph B — Guiding Principles, (2.2, p. 3) — *"Harmonization,* ***where appropriate,*** *of the local legal framework regulating commercial relations with internationally accepted commercial law standards should be promoted in this context since such* ~~*harmonization*~~ ***adaptation*** *facilitates fulfilling these basic requirements in the local legal framework".*

6. We suggest adding a reference to amendment of existing legislation as part of law reform as follows:

Paragraph B — Guiding Principles (2.1, p. 3), *"Often States need international assistance with building the required local capacity to enact necessary rules or* ***updating and modernizing existing rules*** *and adequately enforce, implement, apply and interpret them."*

7. We suggest, in Paragraph B — Guiding Principles (3.3, p. 4), the following rephrasing of the paragraph for the purposes of clarifying its substantive content: *Mechanisms for adjudicating disputes and enforcing binding commitments in the context of trade and investment* ~~*must operate on the basis of internationally recognized human rights and*~~ *should* ***in accordance with internationally recognized human rights,*** *be easily accessible, affordable, efficient and effective.*

8. We suggest, in Paragraph B — Guiding Principles (3.2, p. 4), to include examples of the relevant stakeholders: *"Commercial law reforms should therefore involve close consultations and coordination among all relevant stakeholders* ***including civil society (representing the general public), lawyers, legislators, judges, arbitrators and other legal practitioners such as officials responsible for drafting legislation.*** *"*

9. Engagement of domestic officials, as well as other domestic stakeholders, in designing international commercial law can also have an important contribution to promoting and facilitating reform based on international legal instruments. Accordingly, see the following proposal for an additional brief paragraph (could possibly be added as Paragraph B - Guiding Principles 5.5 in p. 6 of the Guidance Note, or as a separate paragraph under Operational Framework):

> ***Active Participation of domestic governmental and non-governmental stakeholders in international legislative forums such as UNCITRAL (the Working Groups and the Commission) can significantly contribute to the understating of the benefits of using international legal instruments to facilitate commercial law reform. Such participation can allow stakeholders to gain familiarity with drafting international commercial law and the different modalities which can be later used domestically, as well as to serve as a platform for exchange of best practices with counterparts of a wide and diverse professional and geographical background.***

10. We request to add a clarification that ultimately it is for the country accepting the assistance to decide how to implement the suggested reforms. Accordingly, we suggest the following addition after Paragraph C — Operational Framework 1.2(c)(i-iii), p.7, ***Notwithstanding sub-articles (i-iii), reform of the legal framework should be a process which is country led, country owned and country managed.***"

Peru [26 August 2015; original in Spanish]

"…In that regard, the Permanent Mission of Peru has the honour to transmit the following comments on the above-mentioned guidance note:

- As indicated in the note, its purpose is to serve as a guide for all offices, bodies, funds and programmes of the United Nations in connection with the promotion of trade law, and the note constitutes a response to the request for greater integration of the technical assistance and cooperation activities of UNCITRAL in the general activities of the United Nations, in particular through United Nations country offices and the United Nations Development Programme. Consequently, the contents of the note should be consistent with, and support the application of, the general guidelines of the United Nations in that area, in the spirit of integration of efforts and efficiency and effectiveness in the use of resources and the achievement of objectives.
- The note should take into account the post-2015 agenda and refer to the process of defining the sustainable development goals, which will serve as the future framework for action by States and international bodies.
- The document could be improved, particularly with respect to defining the relationship between development and the development of commercial law.
- All of the indicators mentioned in the note should be linked to the purpose of the document.
- The note could take into account the development of trade law, new trends in law, the present state of the international economy and the dissemination and approval of the documents produced by the Commission in relation to the information contained in document A/CN.9/843.
- Lastly, given the purpose of the note and the fact that it was submitted to the Commission for consideration and adoption after being developed and drafted solely on the basis of the views of the UNCITRAL secretariat, the note should include the views of States.

In light of the above comments, the Permanent Mission considers that the document should be considered during the forty-ninth session of the Commission ..."

Mexico [27 August 2015; original in Spanish]

"Mexico believes that the document is of high quality since it summarizes the work carried out by the United Nations Commission on International Trade Law (UNCITRAL) and the tools at its disposal in supporting countries in general. It could be a little more precise as regards the tools offered and means of accessing them, as it refers to activities, databases and the possibility of providing expert assistance but does not indicate what States can request, how requests should be made and to whom they should be addressed.

The assessment system and the list of indicators in the Annex provide good food for thought and fall within the scope of such initiatives as the World Bank's reports on the observance of standards and codes. Might it be desirable to integrate such initiatives in the joint work carried out by UNCITRAL and the World Bank? However, the following points should be made:

1. Section B.3: "Commercial law reforms should be holistic and coordinated as appropriate with other relevant initiatives." It is suggested that the text of this subsection also point out that while the laws and regulations of States cannot accommodate purely technical issues because they set out policy preferences, they always include public policies that those States seek to promote for the benefit of their peoples.

2. Section C ("Operational Framework") establishes that 'The need to identify local requirements for commercial law reforms should be recognized in United Nations operations in the appropriate context, such as in peacebuilding and development assistance frameworks. To effectively address any identified local requirements for commercial law reforms, awareness about United Nations existing standards, tools and expertise related to regulation

of commercial relations and recourse to them should be substantially increased across the United Nations system. An annex to this Guidance Note may serve as a checklist of indicators relevant in the assessment of the state of commercial law framework in a particular country.'

The appropriateness of this paragraph must be reviewed, as States should not be subject to compulsory schemes for the verification of new indicators for assessing trade regulations, especially given that the work carried out within the framework of the Commission is aimed at creating tools for States on the basis of standardization across the various legal traditions, thus leaving States to adapt those tools according to their particular needs.

It is relevant to recall that the mechanisms referred to as "soft law" (model laws and legislative guides) ensure the freedom of States to decide on regulations according to their specific circumstances, and the trade regulations of a State should not be assessed on the basis of whether or not that State has adopted the relevant model laws.

It should be noted that, at present, most economies are analysed within the framework of the "Doing Business" project, which is based on various indicators that may serve as a point of reference for the Commission with regard to the ease of doing business in different economies. Furthermore, and without prejudice to the above, the guidance note indicates neither the methodology used for selection of the indicators set out in the Annex nor the assessment to be carried out with respect to each of the responses, which leaves States in a position of insecurity.

Annex

List of indicators relevant in the assessment of the state of commercial law framework in a particular country.

1. The legal framework provides for the recognition and enforcement of property rights and legal relationships.

Response: yes, in Mexico private property rights are respected except when expropriation or application of the Termination of Ownership Act is necessary.

2. Local commercial law framework is compliant with internationally accepted commercial law standards:

Response: yes, the Code of Commerce and the trade rules deriving from it comply with international trade-law provisions and are regularly updated.

(a) Local laws regulating commercial relations are enacted on the basis of internationally accepted commercial law standards;

Response: yes, some international standards are included in the law and others are implemented through trade agreements and treaties.

3. Local capacity to implement sound commercial law reforms is continually built:

Response: yes, Mexican trade law is amended according to emerging needs, for example, in the areas of security rights and electronic commerce.

(a) Training courses on commercial law matters for government officials are held regularly [but at least twice a year];

Response: yes, general courses are offered at the National Autonomous University of Mexico and in the Ministry of Economic Affairs.

(b) Participation in such courses is improving, in particular the number of attendees, disaggregated by age, gender, specialization, affiliation (e.g. ministry or other state agency) and other relevant criteria, is steadily increasing, and assessment test results are adequate;

Response: in general, attendance is variable.

(c) The number of rule-formulating activities of regional and international bodies on commercial law issues attended by local experts is steadily increasing;

Response: yes, there is a group of advisers of the Ministry of Foreign Affairs comprised of trade-law experts who participate in the work of international bodies, particularly UNCITRAL.

(d) Local expertise on commercial law issues is centralized, readily available and easily deployed when necessary (e.g. for coordinating the State's position in rule-formulating activities of regional and international bodies on commercial law issues and for identifying and following up on local needs in commercial law reforms at the local, regional and international levels);

Response: yes, it is readily available.

(e) Local needs in commercial law reforms are assessed on a regular basis, including within the development assistance framework.

Response: yes, commercial legislation is updated regularly and such revisions are published officially.

4. Capacity of local judges, arbitrators and other legal practitioners to understand internationally accepted commercial law standards, apply them in a uniform way and achieve a better quality of judgements and awards is adequate:

Response: yes, judges and arbitrators specialize in commercial law standards and the application of those standards.

(a) Continuous learning courses for judges are held regularly [but at least twice a year] and their curricula include courses on uniform interpretation and application of internationally accepted commercial law standards;

Response: yes, the curricula of the National Autonomous University of Mexico and of other universities include international trade law and even carry out mock proceedings, including arbitral proceedings.

(b) Participation in such courses is improving, in particular the number of attendees, disaggregated by age, gender, specialization, court affiliation (e.g. court of first instance, appeal court, state or federal or supreme court) and other relevant criteria, is steadily increasing, and assessment test results are adequate;

Response: no, judicial officers study subjects individually, and only study as a group in the case of collegiate bodies, such as the collegiate circuit courts and the Supreme Court of Justice.

(c) The number of local judges participating in the international judicial colloquiums and other international and regional judicial training is steadily increasing;

Response: yes, they currently attend conferences, colloquiums and workshops.

(d) A mechanism for collecting, analysing, monitoring and publicizing national case law relating to internationally accepted commercial law standards is in place;

Response: yes, the Judicial Weekly of the Federation and the annual reports of the Supreme Court of Justice.

(e) A number of reported cases on commercial law issues referencing as appropriate internationally accepted commercial law standards is steadily increasing.

Response: yes, this information is made available in the publications referred to in 4 (d) above.

5. Mechanisms for adjudicating disputes and enforcing binding commitments in the context of trade and investment are easily accessible, affordable, efficient and effective:

Response: yes, they are accessible and affordable.

(a) Alternative mechanisms for resolution of commercial disputes (commercial arbitration, mediation and conciliation) are available as an option to seek adjudication of commercial disputes in a neutral forum;

Response: yes, courts have introduced mediation and conciliation.

(b) Those mechanisms function on the basis of internationally accepted standards;

Response: yes, they are based on international standards introduced by law or by international treaties and conventions.

(c) Mechanisms to monitor speed and effectiveness of court decisions and their enforcement as well as enforcement of arbitral awards are in place.

Response: yes, on the basis of the Federal Act on Transparency and Access to Public Government Information.

6. People are educated on international commercial law issues, basic rights and obligations arising from commercial relations and employment opportunities linked thereto:

Response: No.

(a) Subjects of commercial law are included in curricula of technical schools, universities and vocational training courses;

Response: yes, trade law subjects are taught at all of those levels.

(b) Local courses for members of academia designed to facilitate developing local legal doctrine on commercial law issues in line with internationally prevailing ones are held regularly [but at least twice a year];

Response: yes, courses and workshops on legal doctrine relating to commercial law are held.

(c) Participation in such courses is improving, in particular the number of attendees, disaggregated by age, gender, specialization, affiliation (universities and other academic institutions) and other relevant criteria, is steadily increasing, and assessment test results are adequate;

Response: participation is variable.

(d) The number of local law students, disaggregated by gender, income and other relevant criteria, participating in local, regional and international moot competitions on commercial law matters is steadily increasing.

Response: no, unfortunately the courses are focused on human rights litigation.

7. Effective mechanisms for legal empowerment on commercial matters are in place:

Response: yes, through arbitration.

(a) Internationally accepted commercial law standards are translated into local languages and the translation is made readily available to the public;

Response: yes, some are translated into Spanish and are available to the public, but none are translated into local languages.

(b) The use of readily available authoritative sources of information on international commercial law matters, including tools designed to facilitate understanding, implementation and uniform interpretation and application of internationally accepted commercial law standards, is widely promoted;

Response: yes, all of the above apply to undergraduate and postgraduate studies.

(c) There are institutions that support economic activity, such as chambers of commerce, bar associations, commercial arbitration and conciliation centres, and they are evenly distributed throughout the country.

Response: yes, they include the National Chamber of the Processing Industry, the Mexican Academy of Comparative and Private International Law, the National Bar, the National Association of Company Lawyers, the trade-law faculties of universities and the International Chamber of Commerce.

Some outcome and output indicators, such as those below, although not commercial law specific, influence the effectiveness of the commercial law framework:

8. Laws, regulations and other legal texts with any amendments thereto as well as judicial decisions and administrative rulings of general application or precedent value are:

(a) Easily understood;

Response: not by persons who are new to the subject area and do not understand the legal concepts concerned.

(b) Capable of uniform interpretation and application; and

Response: yes, but only if case law is referred to; otherwise their interpretation is subjective.

(c) Made promptly accessible to the public.

Response: yes, through the Official Gazette of the Federation and the official gazettes of the federal entities.

9. The authoritative source of legal texts and other government information is widely publicized and systematically maintained;

Response: yes, they are widely published in the Official Gazette of the Federation and the official gazettes of the federal entities and through electronic media.

10. Institutions and workforce therein are well-structured, financed and trained;

Response: no, the workforce is poorly funded and, naturally, requires training courses.

11. There are mechanisms to monitor and oversee actions and decisions of public authorities.

Response: yes, the Office of the Federal Attorney for Consumer Protection, local attorney's offices, the Council of the Judiciary, the Ministry of the Public Service and the Supreme Audit Office."

El Salvador [1 September 2015; original in Spanish]

"… In that regard, the Ministry of Economic Affairs, as the competent national authority, has communicated the following considerations: '*There are no legal observations to submit; however, it is relevant to draw attention to the fact that this Ministry has promoted several trade-related legal reforms in order to harmonize the legal framework of El Salvador with that of the international community, thus creating a situation of certainty for trade. It would therefore be very important to have access to the technical assistance referred to in the above-mentioned instrument and thus to implement best practices at the international level ...*'".

III. A comment by a State received by the Secretariat in response to its note verbale LA/TL 131(9) — CU 2015/245/OLA/ITLD circulated to all States on 8 October 2015

Chile [23 October 2015; original in Spanish]

"…In that regard, the Permanent Mission of Chile welcomes the 'Draft guidance note on strengthening United Nations support to States to implement sound commercial law reforms' and the comments submitted by a number of UNCITRAL member States, and considers the contents thereof to be a contribution to the substantive discussion on defining the role of UNCITRAL in the context of the United Nations, and to the orientation of the Commission's future work.

It also agrees with many of the comments submitted, particularly — and as already expressed during the Commission's discussions in July 2015 — with regard to the need for a concise and clear document, without value judgements, that will contribute to achievement of the objectives set out in the Charter of the United Nations and in resolution 2205 (XXI) of December 1966 of the United Nations General Assembly.

In view of the above, the Permanent Mission is of the view that the document should be reviewed once again at the next session of the Commission in July 2016…"

Note by the Secretariat on technical assistance to law reform: compilation of comments by States on a draft guidance note on strengthening United Nations support to States to implement sound commercial law reforms

ADDENDUM

Contents

IV. A comment by a State on the draft guidance note contained in a note by the Secretariat (A/CN.9/883)

[Original: Russian]
[Date: 21 June 2016]

Russian Federation

The Russian Federation considers it necessary to remove references to the rule of law [*верховенство права*] from the "Draft guidance note on strengthening United Nations support to States, upon their request, to implement sound commercial law reforms".

D. Note by the Secretariat on technical assistance to law reform: draft guidance note on strengthening United Nations support to States, upon their request, to implement sound commercial law reforms

(A/CN.9/883)

[Original: English]

Contents

I. Introduction

1. At its forty-sixth session, in 2010, the Commission requested the Secretariat to consider ways of better integrating its technical cooperation and assistance activities into activities conducted on the ground by the United Nations in particular through the United Nations Development Programme or other country offices of the United Nations.[1] At its forty-eighth session, the Commission had before it a draft guidance note on strengthening United Nations support to States to implement sound commercial law reforms, presented by the Secretariat (A/CN.9/845).

2. After consideration, the Commission requested States to provide to its secretariat any suggestion for revision of the text. It was agreed that the compilation of all comments received from States would be circulated by the Secretariat to all States together with a revised version of the text. It was understood that, if agreement of States on the revised text could be achieved before or during the consideration of the Commission's report in the Sixth Committee of the General Assembly in 2015, the Sixth Committee itself might wish to endorse the text, so as to avoid delay in issuing the document. Otherwise, the matter might need to be brought back to the Commission for consideration at its next session. The Secretariat was requested, in revising the text, to follow closely the wording of General Assembly resolution 2205 (XXI) on the establishment of UNCITRAL and avoid embarking into areas not directly linked to the UNCITRAL mandate. The Secretariat was also requested to allocate sufficient time for consideration of the revised text at the forty-ninth session if the revised text had to be considered at that time, and to make provisions for specific time to be allotted to that item in the provisional agenda of that session.[2]

3. Pursuant to those decisions, the Secretariat circulated a note verbale to States on 21 July 2015 requesting them to submit suggestions for revision of document A/CN.9/845 and, in formulating such suggestions, to keep in mind, as requested by the Commission,[3] the intended scope and purpose of the document, which, to be usable by its expected readers, should remain short, concise and simple. It was stated in the note verbale that the intended scope and purpose of the guidance note was to be a tool to increase awareness across the United Nations about the importance of sound commercial law reforms and the use of internationally accepted commercial law standards in that context.

4. The compilation of comments by States received by the Secretariat on document A/CN.9/845 in response to that note verbale, together with a comment by a State on a version of the guidance note prepared by the Secretariat pursuant to those comments and circulated to States in a note verbale of 8 October 2015 (the 8 October version), may be found in document A/CN.9/882. That document will be before the Commission at its forty-ninth session.

---

[1] *Official Records of the General Assembly, Sixty-fifth Session, Supplement No. 17* (A/65/17), para. 336.

[2] Ibid., *Seventieth Session, Supplement No. 17* (A/70/17), paras. 251-252.

[3] Ibid., para. 251.

5. This note contains a draft guidance note on strengthening United Nations support to States, upon their request, to implement sound commercial law reforms. The draft was prepared on the basis of the 8 October version incorporating comments on that version conveyed by States to the Secretariat, including during informal consultations in the Sixth Committee. Pursuant to the request of the Commission at its forty-eighth session (see para. 2 above), the Secretariat will allocate time in the provisional agenda of the forty-ninth session of UNCITRAL (A/CN.9/859) for the discussion of the draft guidance note.

II. Draft guidance note on strengthening United Nations support to States, upon their request, to implement sound commercial law reforms

"Guidance note on strengthening United Nations support to States, upon their request, to implement sound commercial law reforms

A. About this Guidance Note

6. This Guidance Note provides the guiding principles and framework for strengthening United Nations support to States, upon their request, to implement sound commercial law reforms on the basis of internationally accepted standards. It is framed within the United Nations mandate to promote higher standards of living, full employment, and conditions of economic and social progress and development, as well as solutions of international economic, social and related problems.[4] It is a contribution to the implementation of the international development agenda and General Assembly resolutions calling for: (a) enhanced technical assistance and capacity-building in the international commercial law field; (b) better integration of the work in that field in the broader agenda of the United Nations; (c) greater coordination and coherence among the United Nations entities and with donors and recipients; (d) greater evaluation of the effectiveness of such activities; (e) measures to improve the effectiveness of capacity-building activities; and (f) placement of national perspectives at the centre of United Nations assistance programmes.

7. This Guidance Note is relevant to all United Nations departments, offices, funds, agencies and programmes as well as other donors that deal with: (a) mobilizing finance for sustainable development; (b) reducing or removing legal obstacles to the flow of international trade and achieving international and/or regional economic integration; (c) private sector development; (d) justice sector reforms; (e) increasing the resilience of economies to economic crisis; (f) good governance, including public procurement reforms and e-governance; (g) empowerment of the poor; (h) preventing and combating economic crimes through education (e.g. commercial fraud, forgery and falsification); (i) addressing the root causes of conflicts triggered by economic factors; (j) addressing post-conflict economic recovery problems; (k) addressing specific problems with access to international trade by landlocked countries; and (l) domestic implementation of international obligations in the field of international commercial law and related areas.

B. Guiding Principles

1. The United Nations work in the field of international commercial law as an integral part of the broader agenda of the United Nations

8. The establishment of sound rules furthering commercial relations is an important factor in economic development. This is because commercial decisions are taken not in isolation but in the context of all relevant factors, including the applicable legal framework.

9. The modern and harmonized international commercial law framework is the basis for rule-based commercial relations and an indispensable part of international trade, bearing in

[4] The Charter of the United Nations, article 55 (a) and (b).

mind the relevance of domestic law and domestic legal systems in this regard. In reducing or removing legal obstacles to the flow of international trade, especially those affecting developing countries, it also contributes significantly to universal economic cooperation among all States on a basis of equality, equity, common interest and respect for the rule of law, to the elimination of discrimination in international trade and, thereby, to peace, stability and the well-being of all peoples.[5] The implementation and effective use of such frameworks are also essential for advancing good governance, sustained economic development and the eradication of poverty and hunger.[6] Accordingly, they may contribute to the achievement of the purposes of the United Nations Charter and those specified in the United Nations General Assembly resolution 2205 (XXI) of 17 December 1966 on the establishment of the United Nations Commission on International Trade Law (UNCITRAL).

10. For these reasons, the United Nations work in the field of international commercial law should be better integrated, where and as necessary, at the headquarters and country levels in United Nations operations in development, conflict-prevention, post-conflict-reconstruction and other appropriate contexts.[7]

2. United Nations assistance to States, upon their request, with the assessment of local needs for commercial law reforms and their implementation

11. Commercial law constantly evolves in response to new business practices and global challenges. This necessitates the implementation of commercial law reforms that keep pace with those developments. States often request assistance with the assessment of the need for commercial law reforms and their implementation.

12. To achieve better integration of the United Nations work in the field of international commercial law in the broader agenda of the United Nations, United Nations entities operating on the ground should be able to respond to such requests. For that, they should be aware of standards, tools and expertise readily available in the United Nations system in the field of international commercial law. Guiding principle 5 below provides sources of information about such standards, tools and expertise, section C of this note illustrates steps that may need to be taken to assist States with the assessment and implementation of commercial law reforms, and an annex to this Guidance Note may serve as a checklist of illustrative indicators relevant to the assessment of the state of the commercial law framework and the need for commercial law reforms in a particular country.

13. United Nations entities should promote the harmonization of the local legal framework regulating commercial relations with internationally accepted commercial law standards, where appropriate. Such harmonization would: (a) facilitate recognition, protection and enforcement of contracts and other binding commitments; (b) make commercial law more easily understandable to commercial parties; (c) promote uniform interpretation and application of international commercial law frameworks; and (d) provide legal certainty and predictability in order to enable parties to commercial transactions to take commercially reasonable decisions.[8]

---

[5] General Assembly resolution 69/115, the second preambular paragraph. See also earlier General Assembly resolutions on UNCITRAL reports for a similar wording.

[6] General Assembly resolution 69/115, para. 12. See also earlier General Assembly resolutions on UNCITRAL reports for a similar wording.

[7] A particular reference to the early engagement of UNCITRAL instruments and resources in post-conflict reconstruction contexts is found in paragraph 17 of General Assembly resolution 66/94; calls for better integration of UNCITRAL work in the development context are found in repetitive paragraphs like paragraph 7 (d) of General Assembly resolution 69/115; similar calls but in the rule of law context are found in repetitive paragraphs like paragraph 12 of General Assembly resolution 69/115. Such calls were also made by the Commission itself, most recently, in paragraph 301 of the report of the Commission on the work of its forty-eighth session (A/70/17), in paragraph 284 of the report of the Commission on the work of its forty-seventh session (A/69/17), paragraphs 307 and 308 of the report of the Commission on the work of its forty-sixth session (A/68/17) and paragraph 336 of the report of the Commission on the work of its forty-third session (A/65/17).

[8] Calls for promotion of use of internationally accepted legal standards resulting from the work of UNCITRAL and their effective implementation are found in General Assembly resolutions, for example in paras. 7 (a) and 19 of resolution 69/115.

14. States also often request assistance with the assessment of the effectiveness of their mechanisms for adjudicating disputes and enforcing binding commitments in the context of trade and investment, in particular commercial arbitration and alternative dispute resolution mechanisms (jointly referred to in this Guidance Note as ADR). In this context, United Nations entities should be aware of the applicable internationally accepted standards, compliance with which may help to ensure that such mechanisms operate on the basis of internationally recognized norms and are easily accessible, affordable, efficient and effective.[9] Where ADR is promoted by a State as an option to seeking adjudication of commercial disputes in a neutral forum, United Nations entities should be aware that court reforms may be needed so as to equip the judiciary to efficiently and effectively support ADR.

3. United Nations role in assisting States, upon their request, to implement holistic and properly coordinated commercial law reforms

15. Laws and regulations governing commercial relations and the accompanying institutional framework are not purely technical matters. They embody particular policy preferences. They can produce political and social impacts, including gender-unbalanced impacts, in addition to the obvious, economic impacts.

16. Commercial law reforms should therefore involve close consultation and coordination among all relevant stakeholders, including non-governmental organizations (representing the general public), lawyers, legislators, judges, arbitrators and other legal practitioners, such as officials responsible for drafting legislation. In particular, the close link between policymaking and law-making and institutional reforms needs to be ensured.

17. Commercial law reform is strongly linked to international legal obligations. Involvement of international experts may be desirable to ensure consistency between domestic law and international obligations where risks of creating gaps or conflicts between the two exist. United Nations entities should also support and encourage cooperation and exchanges of good practices between States as an important means of promoting sound commercial law reform.

18. The proper coordination among United Nations entities themselves and between them and other donors, as well as domestic governmental departments, engaging in reform efforts should also be achieved. The results of coordination and cooperation gained at the country level must be preserved at the headquarters level and vice versa. Such coordination is essential in order to avoid duplication of efforts and promote efficiency, consistency and coherence in the modernization and harmonization of international commercial law.[10]

4. United Nations support to States, upon their request, with building local capacity to effectively implement sound commercial law reforms

19. Adequate local capacity to enact, enforce, implement, apply and interpret sound commercial law frameworks is necessary for the expected benefits of rule-based commercial relations and international trade to accrue. Often States request international assistance with building the required local capacity.

20. The effective way to provide such assistance is through technical cooperation, training and capacity-building sessions aimed at strengthening local expertise to draw on readily available international standards, tools and expertise for carrying out commercial law reforms at the country level. United Nations entities should support the organization of those and similar activities and facilitate participation of local experts therein.[11]

---

[9] See e.g. General Assembly resolutions 40/72 and 61/33, the fourth preambular paragraph.

[10] Calls for closer coordination and cooperation are found in General Assembly resolutions, for example, in General Assembly resolution 69/115, the fourth and fifth preambular paragraphs and paras. 6 and 7 (d). Efforts and initiatives of UNCITRAL aimed at increasing coordination of and cooperation on legal activities of international and regional international organizations active in the field of international trade law have been also endorsed in para. 89 of the Addis Ababa Action Agenda (General Assembly resolution 69/313).

[11] Calls for such support are found in General Assembly resolutions (see e.g. General Assembly resolution 69/115, para. 7 (d)).

21. In addition, active participation of domestic governmental and non-governmental stakeholders in international legislative forums such as UNCITRAL (see guiding principle 5) (at the level of both working groups and the Commission) can significantly contribute to the understanding of the benefits of using international legal instruments to facilitate commercial law reform. Such participation can allow stakeholders to gain familiarity with the drafting of international commercial law and the different modalities which can be later used domestically. It can also serve as a platform for exchange of best practices with counterparts from a wide and diverse professional and geographical background. Close coordination of a State position in various regional and international rule-formulating bodies active in the field of international commercial law helps to avoid the appearance of conflicting rules and interpretations in those bodies. All efforts should therefore be made by United Nations entities to support States in their endeavours to achieve representation of their position in a sustained and coordinated manner in UNCITRAL and other regional and international rule-formulating bodies active in the field of international commercial law.[12]

22. Achieving transparent, consistent and predictable outcomes in jurisprudence on commercial law matters in compliance with the relevant international obligations of States[13] is important for rule-based commercial relations. Judges, arbitrators, law professors and other legal practitioners play primary roles in this regard. Their capacity to interpret international commercial law standards in a way that would promote uniformity in their application and the observance of good faith in international trade should also be a continuous concern. There are tools specifically designed by the United Nations for such purposes (see guiding principle 5). United Nations entities should promote their development and use.[14]

5. UNCITRAL is the core legal body in the United Nations system in the field of international commercial law and as such should be relied upon by United Nations entities in their support to States, upon their request, to implement sound commercial law reforms

23. UNCITRAL is the law-making body of the United Nations system in the field of international commercial law. It is an intergovernmental forum composed of Member States elected by the General Assembly. Its composition is representative of the various geographic regions and the principal economic and legal systems. Additionally, intergovernmental organizations, professional associations and other non-governmental organizations with observer status participate in its work.

24. UNCITRAL standards represent what the international community considers at a given time to be the best international practice for regulating certain commercial transactions. They equip States with models and guidance to support sound commercial law reforms at lower costs. Reliance on such standards enhances the quality of enacted legislation in the long run and builds the confidence of the private sector, including foreign investors, in the ease of doing business in a country that adheres to them.

25. Most standards are adaptable to local circumstances and needs of commercial parties.[15] A particular feature of UNCITRAL model laws and similar instruments issued by other international organizations is that they can be used by States as a basis or inspiration for legislation that forms part of commercial law reform: they can be adapted to domestic

---

[12] Calls for facilitation of participation of all Member States in sessions of UNCITRAL and its working groups are found in General Assembly resolutions, e.g. resolution 69/115, paras. 10 and 11.

[13] E.g. the United Nations Convention on Contracts for the International Sale of Goods (Vienna, 1980), article 7. United Nations, *Treaty Series*, vol. 1489, No. 25567. Also available at www.uncitral.org/uncitral/en/uncitral_texts/sale_goods/1980CISG.html (accessed May 2013).

[14] Calls for raising awareness about the availability and usefulness of the CLOUT system in professional, academic and judiciary circles, for dissemination of digests of case law and for expansion and coordination of the system are found in General Assembly resolutions, e.g. paras. 18 and 20 of resolution 69/115.

[15] For the up-to-date list of the UNCITRAL standards, see www.uncitral.org/uncitral/en/uncitral_texts.html.

circumstances, and States can select which provisions are most relevant to their legal systems.

26. In addition to internationally accepted commercial law standards, UNCITRAL provides readily available technical assistance, capacity-building and other tools, such as CLOUT,[16] digests of case law,[17] databases related to the implementation of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards, done at New York, on 10 June 1958[18] (the New York Convention),[19] and other databases and publications,[20] that aim to facilitate the understanding and use of those standards and to disseminate information about modern legal developments, including case law, in the international commercial law field. Those tools are in particular indispensable in training judges, arbitrators, law professors and other legal practitioners on commercial law matters and to the legal empowerment of people in general.

27. The areas covered by UNCITRAL work are: (a) contracts (international sale of goods, international transport of goods, electronic commerce); (b) international commercial and investment dispute settlement (arbitration, conciliation, online dispute resolution (ODR) and investor-State dispute resolution); (c) public procurement and privately financed infrastructure projects; (d) international payments; (e) insolvency law; (f) security interests; (g) commercial fraud; and (h) developing an enabling legal environment for micro-, small and medium-sized enterprises.[21]

C. Operational framework

28. Sections below and the annex to this note illustrate steps that may need to be taken by United Nations entities that are requested by States to assist with the assessment and implementation of commercial law reforms.

1. Legal framework

29. States may request technical assistance and capacity-building with their commercial law reform efforts, in particular with identification of local needs for commercial law reforms, with enactment of a law or with updating and modernizing existing rules on a particular commercial law subject. In response, the United Nations should endeavour to assist States with the following, bearing in mind that reform of the legal framework should remain a process which is country led, country owned and country managed:

(a) Preparing a structured workplan that would identify the goals and objectives of the different steps for commercial law reform (for both providing assistance and taking reform measures), set up a schedule, develop strategies to address the weaknesses or inadequacies of the different legislative norms or practices, appoint appropriate focal points to coordinate a specific reform initiative and allocate resources;

(b) Assessing the general commercial law framework and the status of its implementation in the State, e.g.: (i) whether the State is party to fundamental conventions in the commercial law field (e.g. the New York Convention), which will be conducive to other commercial law reforms; (ii) if yes, the status of their implementation; (iii) if not, measures to be taken to consider becoming a party; and (iv) whether the local commercial

[21] New areas of work may be added. For the most updated list, please contact the UNCITRAL secretariat at the addresses indicated in the end of this Guidance Note or check the UNCITRAL website (www.uncitral.org).

law framework is otherwise compliant with internationally accepted commercial law standards;

(c) In the context of a particular commercial law reform:

(i) Identifying an applicable internationally accepted commercial law standard and related readily available tools and expertise designed to facilitate its enactment;

(ii) Identifying all stakeholders relevant to the commercial law reform, including domestic reform constituencies, international experts, various donors working in the same or related field, etc., and appropriate focal points in each entity to coordinate a specific reform, in order to facilitate proper consultations with them, where necessary;

(iii) Preparing a comprehensive legislative package to accompany the adoption of a new law (e.g. other necessary laws, regulations, guidance and/or codes of conduct) and ensuring the proper expert assessment of the legislative package before the law is adopted.

2. State institutions involved in commercial law reforms

30. States may request technical assistance and capacity-building, in particular as regards:

(a) Development of capacity in various State institutions (parliamentary committees, ministries of justice, trade and economic development, public procurement agencies, monitoring and oversight bodies) to handle commercial law reforms and implement commercial law framework. Technical assistance and capacity-building in such cases may take the form of: (i) raising awareness of readily available internationally accepted commercial law standards, and tools and expertise designed to facilitate understanding, enactment and implementation of those standards; (ii) circulating texts of the relevant standards; (iii) organizing briefings or training; (iv) supporting efforts to centralize local expertise on commercial law issues, for example through the establishment of a national centre of commercial law expertise or national research centre and national databases on commercial law issues; and (v) facilitating responsible and continuous representation of local experts in international and regional commercial law standard-setting activities;

(b) Building capacity of local judges, arbitrators and other legal practitioners to better understand internationally accepted commercial law standards, apply them in a uniform way and achieve a better quality of judgements and awards. Means of assistance may include: (i) raising awareness of readily available international tools designed to facilitate understanding and uniform interpretation and application of internationally accepted commercial law standards; (ii) supporting the establishment of a mechanism for collecting, analysing and monitoring national case law related to internationally accepted commercial law standards [22] and collecting relevant statistics, e.g. on the speed of adjudication and enforcement; (iii) supporting continuous learning courses for judges and inclusion in the curricula of such courses of the relevant readily available international tools referred to above; (iv) organizing local judicial training with the participation of experts; and (v) raising awareness about international judicial colloquiums and facilitating participation of local judges therein;

(c) The establishment and functioning of arbitration and conciliation centres. Means of assistance may include: (i) attracting readily available expertise for the establishment of, and support to, such centres; (ii) facilitating access to the ADR and ODR mechanisms in those centres, for example by raising public awareness about them; (iii) organizing training for separate groups of ADR practitioners with the involvement of relevant experts to assist these mechanisms to become more responsive to the rights and needs of intended end users (e.g. arbitrators on uniform application and interpretation of international commercial standards; mediators and conciliators on conflict resolution skills; and ODR providers on issues specific to e-environment); and (iv) addressing through court reforms and other

[22] In this regard, please consult in particular the UNCITRAL CLOUT system that relies on a network of national correspondents designated by those States that are parties to a Convention, or have enacted legislation based on a Model Law, emanated from the work of UNCITRAL, or the New York Convention www.uncitral.org/uncitral/en/case_law/national_correspondents.html.

measures the role of the judiciary in providing appropriate support to ADR and ODR mechanisms.

3. Private sector, academia and general public

31. States may request assistance with:

(a) Raising public awareness, in particular among micro-, small and medium-sized enterprises and individual entrepreneurs, about internationally accepted commercial law standards, the readily available tools designed to facilitate their understanding and use, and commercial opportunities linked thereto (e.g. e-commerce, cross-border trade, access to domestic and foreign public procurement markets, access to credit, viable options for recovery in case of financial difficulties). Assistance in such cases may take the form of: (i) translation of those standards into local languages; (ii) creation of readily available local databases of those standards with links to their international source and supporting tools; and (iii) dissemination of information about those standards by other means;

(b) Supporting community-based institutions that contribute to economic activity, empowerment of the poor, private sector development, access to justice, legal education and skills-building, such as chambers of commerce, bar associations, arbitration and conciliation centres, legal information centres and legal aid clinics;

(c) Maintaining regular dialogue with non-governmental organizations that represent various segments of society (e.g. consumers, local communities, end users of public services, individual entrepreneurs, micro-, small and medium-sized enterprises and academia) as regards their views on measures required to improve the commercial law framework in the State;

(d) Assisting members of academia with developing local legal doctrine on commercial law issues in line with internationally prevailing ones, in particular by facilitating establishment of, or participation in, existing regional and international exchange platforms, including electronic ones;

(e) Educating people on international commercial law issues and increasing their awareness of basic rights and obligations arising from commercial relations as directly relevant to entrepreneurship (e.g. start-up and management of business) and employment opportunities. Means of achieving that include assistance with: (i) including international commercial law subjects in curricula of schools, vocational and technical training courses and universities; (ii) organizing moot competitions and sponsoring participation of local student teams in relevant international moot competitions;[23] and (iii) raising awareness about international courses on international commercial law matters[24] and facilitating participation of interested individuals therein; and

(f) Building capacity of various actors in informal justice systems and ADR (e.g. village elders) to use mediation and conciliation skills in accordance with internationally accepted standards and to better understand international commercial law standards, apply them in a uniform way and achieve a better quality of decisions.

The UNCITRAL secretariat [25] is interested in learning about experience with the implementation of this Guidance Note. It can be contacted on all issues addressed in this Guidance Note, including as regards provision of assistance with the identification of local needs for commercial law reforms, implementation of commercial law reforms and training on commercial law issues in countries in which the United Nations operates and across the United Nations system.

Annex

List of illustrative indicators relevant in the assessment of the state of the commercial law framework and the need for commercial law reforms in a particular country

1. The legal framework provides for the recognition and enforcement of contracts and other binding commitments.

2. The local commercial law framework is compliant with internationally accepted commercial law standards:

(a) Local laws regulating commercial relations are enacted on the basis of internationally accepted commercial law standards.

3. Local capacity to implement sound commercial law reforms is continually built:

(a) Training courses on commercial law matters for government officials are held regularly but at least once a year;

(b) Participation in such courses, in particular the number of attendees, disaggregated by age, gender, specialization, affiliation (e.g. ministry or other state agency) and other relevant criteria, and assessment test results, are adequate;

(c) Participation of local experts in rule-formulating activities of regional and international bodies on commercial law issues is adequate;

(d) Local expertise on commercial law issues is centralized, readily available and easily deployed when necessary (e.g. for coordinating a State's position in rule-formulating activities of regional and international bodies on commercial law issues and for identifying and following up on local needs in commercial law reforms at the local, regional and international levels);

(e) Local needs in commercial law reforms are assessed on a regular basis, including within the development assistance framework.

4. Capacity of local judges, arbitrators and other legal practitioners to understand internationally accepted commercial law standards, apply them in a uniform way and achieve a better quality of judgements and awards is adequate:

(a) Continuous learning courses for judges are held regularly but at least once a year and their curricula include courses on uniform interpretation and application of internationally accepted commercial law standards;

(b) Participation in such courses, in particular the number of attendees, disaggregated by age, gender, specialization, court affiliation (e.g. court of first instance, appeal court, state or federal or supreme court) and other relevant criteria, and assessment test results, are adequate;

(c) Participation of local judges in the international judicial colloquiums and other international and regional judicial training is adequate;

(d) A mechanism for collecting, analysing, monitoring and publicizing national case law relating to internationally accepted commercial law standards is in place.

5. Mechanisms for adjudicating disputes and enforcing binding commitments in the context of trade and investment are easily accessible, affordable, efficient and effective:

(a) Alternative mechanisms for resolution of commercial disputes (commercial arbitration, mediation and conciliation) are available as an option to facilitate adjudication of commercial disputes in a neutral forum;

(b) Those mechanisms function on the basis of internationally accepted standards;

(c) Mechanisms to monitor speed and effectiveness of court decisions and their enforcement, as well as enforcement of arbitral awards, are in place.

6. People are educated on international commercial law issues, basic rights and obligations arising from commercial relations and employment opportunities linked thereto:

(a) Commercial law is included in curricula of technical schools, universities and vocational training courses;

(b) Courses for members of academia designed to facilitate the development of local legal doctrine on commercial law issues in line with internationally prevailing ones are held regularly but at least once a year;

(c) Participation in such courses, in particular the number of attendees, disaggregated by age, gender, specialization, affiliation (universities and other academic institutions) and other relevant criteria, and assessment test results, are adequate;

(d) Participation of local law students, disaggregated by gender, income and other relevant criteria, in local, regional and international moot competition on commercial law matters is adequate.

7. Effective mechanisms for legal empowerment on commercial matters are in place:

(a) Internationally accepted commercial law standards are translated into local languages and the translation is made readily available to the public;

(b) The use of readily available authoritative sources of information on international commercial law matters, including tools designed to facilitate understanding, implementation and uniform interpretation and application of internationally accepted commercial law standards, is widely promoted;

(c) There are institutions that support economic activity, such as chambers of commerce, bar associations, commercial arbitration and conciliation centres, and they are evenly distributed throughout the country.”

X. STATUS AND PROMOTION OF UNCITRAL LEGAL TEXTS

Note by the Secretariat on the status of conventions and model laws

(A/CN.9/876)

[Original: English]

1. At its thirteenth session, in 1980, the United Nations Commission on International Trade Law (UNCITRAL) decided[1] that it would consider, at each of its sessions, the status of conventions that were the outcome of work carried out by it.

2. The present note sets forth the status of the conventions and model laws emanating from the work of the Commission. It also shows the status of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards (New York, 1958),[2] which, although adopted prior to the establishment of the Commission, is closely related to the work of the Commission in the area of international commercial arbitration.

3. Technical cooperation and assistance activities aimed at promoting the use and adoption of its texts are priorities for UNCITRAL pursuant to a decision taken at its twentieth session (1987).[3] The Secretariat monitors adoption of model laws and conventions.

4. This note indicates the changes since 4 May 2015, when the last annual report in this series (A/CN.9/843) was issued. The information contained herein is current up to 17 May 2016. Authoritative information on the status of the treaties deposited with the Secretary-General of the United Nations, including historical status information, may be obtained by consulting the United Nations Treaty Collection (http://treaties.un.org), and the information on conventions in this note and on the UNCITRAL website (www.uncitral.org) is based on that information. Readers may also wish to contact the Treaty Section of the Office of Legal Affairs of the United Nations (tel.: (+1-212) 963-5047; fax: (+1-212) 963-3693; e-mail: treaty@un.org). Information on the status of conventions and model laws is made available on the UNCITRAL website as detailed tables related to specific texts and as a single table providing an overview of all texts. Information on the status of model laws is updated on the website whenever the Secretariat is informed of a new enactment.

5. This note covers the following texts, incorporating as indicated new treaty actions (the term "action" is used generically to denote the deposit of an instrument of ratification, approval, acceptance, accession, or signature in respect of a treaty, or participation in a treaty as a result of an action to a related treaty, or the withdrawal or modification of a declaration or of a reservation) and enactments of Model Laws based on information received since the last report:

(a) In the area of sale of goods:

Convention on the Limitation Period in the International Sale of Goods (New York, 1974),[4] as amended by the Protocol of 11 April 1980 (Vienna).[5] New action by Côte d'Ivoire (accession to the Convention as amended); as amended: 23 States parties; unamended: 30 States parties;

United Nations Convention on Contracts for the International Sale of Goods (Vienna, 1980).[6] New actions by Azerbaijan (accession), Hungary (withdrawal of declarations) and Viet Nam (accession); 85 States parties;

(b) In the area of dispute resolution:

Convention on the Recognition and Enforcement of Foreign Arbitral Awards (New York, 1958).[7] New action by Andorra (accession); 156 States parties;

UNCITRAL Model Law on International Commercial Arbitration (1985),[8] with amendments as adopted in 2006.[9] New legislation based on the Model Law has been adopted in Maldives (2013), Montenegro (2015), Myanmar (2016) and Slovakia (2014). New legislation based on the Model Law as amended in 2006 has been adopted in Bahrain (2015) and Bhutan (2013);

UNCITRAL Model Law on International Commercial Conciliation (2002).[10] New legislation based on the Model Law has been adopted in Bhutan (2013);

United Nations Convention on Transparency in Treaty-based Investor-State Arbitration (New York, 2014).[11] New actions by Belgium (signature), Congo (signature), Gabon (signature), Italy (signature), Luxembourg (signature), Madagascar (signature) and Mauritius (ratification); 1 State party;

(c) In the area of government contracting:

UNCITRAL Model Law on Public Procurement (2011);[12]

(d) In the area of banking and payments:

United Nations Convention on International Bills of Exchange and International Promissory Notes (New York, 1988)[13] (5 States parties);

UNCITRAL Model Law on International Credit Transfers (1992);[14]

United Nations Convention on Independent Guarantees and Stand-by Letters of Credit (New York, 1995)[15] (8 States parties);

(e) In the area of security interests:

United Nations Convention on the Assignment of Receivables in International Trade (New York, 2001)[16] (1 State party);

(f) In the area of insolvency:

UNCITRAL Model Law on Cross-Border Insolvency (1997).[17] New legislation based on the Model Law has been adopted in Benin (2015); Burkina Faso (2015); Cameroon (2015); Central African Republic (2015); Chad (2015); Comoros (2015); Congo

[16] General Assembly resolution 56/81, annex. The Convention has not yet entered into force; it requires five States parties for entry into force. For the complete status of this text, see part I, sect. G.

[17] General Assembly resolution 52/158, annex. For the complete status of this text, see part II, sect. D.

(2015); Côte d'Ivoire (2015); Democratic Republic of the Congo (2015); Equatorial Guinea (2015); Gabon (2015); Guinea (2015); Guinea-Bissau (2015); Kenya (2015); Malawi (2015); Mali (2015); Niger (2015); Senegal (2015); Togo (2015); and United Kingdom of Great Britain and Northern Ireland, in Gibraltar (2014);

(g) In the area of transport:

United Nations Convention on the Carriage of Goods by Sea (Hamburg, 1978)[18] (34 States parties);

United Nations Convention on the Liability of Operators of Transport Terminals in International Trade (Vienna, 1991)[19] (4 States parties);

United Nations Convention on Contracts for the International Carriage of Goods Wholly or Partly by Sea (New York, 2008)[20] (3 States parties);

(h) In the area of electronic commerce:

UNCITRAL Model Law on Electronic Commerce (1996).[21] New legislation based on the Model Law has been adopted in Bahamas (2003); El Salvador (2015); Honduras (2015); United Kingdom, in Montserrat (2009); and United Republic of Tanzania (2015);

UNCITRAL Model Law on Electronic Signatures (2001).[22] New legislation based on the Model Law has been adopted in the United Kingdom, in Montserrat (2009);

United Nations Convention on the Use of Electronic Communications in International Contracts (New York, 2005).[23] New action by Sri Lanka (ratification); 7 States parties.

6. Previous annual reports in this series also included chronological tables of actions for conventions. To avoid redundancy, this information can now be found on the UNCITRAL website.

7. UNCITRAL texts also include legislative and legal guides and contractual standards whose impact cannot be assessed by reference to their adoption by States.[24] In this regard, part III has been added to this note in an attempt to convey the impact of other selected UNCITRAL texts. Part III includes information on the use by arbitration centres of the UNCITRAL Arbitration Rules,[25] although it should be noted that the full impact of the Rules is difficult to assess since, for example, they are widely applied in ad hoc commercial arbitration where such use is generally not reported. In addition, part III includes information on the impact on investment treaties of the UNCITRAL Rules on Transparency in Treaty-based Investor-State Arbitration (effective date: 1 April 2014).[26]

Zambia		6 June 1986(*)	1 August 1988

Parties (as amended by the Protocol of 1980): 23
Parties (unamended): 30

For information on which States listed above are Parties to the 1980 amending Protocol, consult the United Nations Treaty Collection, http://treaties.un.org.

[a] Party only to the unamended Convention.

[b] Upon accession to the Protocol, Czechoslovakia and the United States of America declared that, pursuant to article XII of the Protocol, they did not consider themselves bound by article I of the Protocol.

[c] Upon signature, Norway declared, and confirmed upon ratification, that, in accordance with article 34, the Convention would not govern contracts of sale where the seller and the buyer both had their relevant places of business within the territories of the Nordic States (i.e. Denmark, Finland, Iceland, Norway and Sweden).

[d] From 1 August 1988 to 31 January 2011, the Dominican Republic was a Party to the unamended Convention.

[e] From 3 June 2006 to 28 February 2013, Montenegro was a Party to the unamended Convention.

Parties: 85

[a] This State declared, in accordance with articles 12 and 96 of the Convention, that any provision of article 11, article 29 or Part II of the Convention that allowed a contract of sale or its modification or termination by agreement or any offer, acceptance or other indication of intention to be made in any form other than in writing, would not apply where any party had his place of business in its territory.

[b] This State declared that it would not be bound by paragraph 1 (b) of article 1.

[c] Upon accession, Canada declared that, in accordance with article 93 of the Convention, the Convention would extend to Alberta, British Columbia, Manitoba, New Brunswick, Newfoundland and Labrador, Nova Scotia, Ontario, Prince Edward Island and the Northwest

Territories. In a declaration received on 9 April 1992, Canada extended the application of the Convention to Quebec and Saskatchewan. In a notification received on 29 June 1992, Canada extended the application of the Convention to the Yukon Territory. In a notification received on 18 June 2003, Canada extended the application of the Convention to the Territory of Nunavut.

[d] Denmark, Finland, Iceland, Norway and Sweden declared that the Convention would not apply to contracts of sale or to their formation where the parties have their places of business in Denmark, Finland, Iceland, Norway or Sweden.

[e] Upon ratifying the Convention, Germany declared that it would not apply article 1, paragraph 1 (b) in respect of any State that had made a declaration that that State would not apply article 1, paragraph 1 (b).

It should be noted that the principles of the Convention were incorporated into the UNCITRAL Legislative Guide on Secured Transactions (2007).[27] Thus, States that substantially implement the recommendations of the Guide have, at the same time, introduced the principles of the Convention into their domestic law.

[a] Upon signature, Luxembourg lodged the following declaration:
"Pursuant to article 39 of the Convention, the Grand Duchy of Luxembourg declares that it does not wish to be bound by chapter V, which contains autonomous conflict-of-laws rules that allow too wide an application to laws other than those of the assignor and that moreover are difficult to reconcile with the Rome Convention. The Grand Duchy of Luxembourg, pursuant to article 42, paragraph 1 (c), of the Convention, will be bound by the priority rules set forth in section III of the annex, namely those based on the time of the contract of assignment."

Information on jurisdictions enacting at the national level substantive provisions of the Convention is included in the status information for the UNCITRAL Model Law on Electronic Commerce (1996) (see part II, sect. C).

[a] Upon ratification, Singapore declared: The Convention shall not apply to electronic communications relating to any contract for the sale or other disposition of immovable property, or any interest in such property. The Convention shall also not apply in respect of (i) the creation or execution of a will; or (ii) the creation, performance or enforcement of an indenture, declaration of trust or power of attorney, that may be contracted for in any contract governed by the Convention.

[b] Upon acceptance, the Russian Federation declared:

1. In accordance with article 19, paragraph 1, of the Convention, the Russian Federation will apply the Convention when the parties to the international contract have agreed that it applies;

2. In accordance with article 19, paragraph 2, of the Convention, the Russian Federation will not apply the Convention to transactions for which a notarized form or State registration is required under Russian law or to transactions for the sale of goods whose transfer across the Customs Union border is either prohibited or restricted;

3. The Russian Federation understands the international contracts covered by the Convention to mean civil law contracts involving foreign citizens or legal entities, or a foreign element.

[c] Upon ratification, Sri Lanka declared: In accordance with Articles 21 and 19 (para. 2) of the United Nations Convention on the Use of Electronic Communications in International Contracts, the Convention shall not apply to electronic communications or transactions specifically excluded under Section 23 of the Electronic Transactions Act No. 19 of 2006, of Sri Lanka.

Parties: 156

Declarations or other notifications pursuant to article I(3) and article X(1)

[a] This State will apply the Convention only to recognition and enforcement of awards made in the territory of another contracting State.

[b] With regard to awards made in the territory of non-contracting States, this State will apply the Convention only to the extent to which those States grant reciprocal treatment.

[c] This State will apply the Convention only to differences arising out of legal relationships, whether contractual or not, that are considered commercial under the national law.

[d] Canada declared that it would apply the Convention only to differences arising out of legal relationships, whether contractual or not, that were considered commercial under the laws of Canada, except in the case of the Province of Quebec, where the law did not provide for such limitation.

[e] On 24 April 1964, the Netherlands declared that the Convention shall apply to the Netherlands Antilles.

[f] On 10 February 1976, Denmark declared that the Convention shall apply to the Faroe Islands and Greenland.

[g] On 24 February 2014, the United Kingdom submitted a notification to extend territorial application of the Convention to the British Virgin Islands. For the following territories, the United Kingdom has submitted notifications extending territorial application and declaring that the Convention shall apply only to the recognition and enforcement of awards made in the territory of another Contracting State: Gibraltar (24 September 1975), Isle of Man (22 February 1979), Bermuda (14 November 1979), Cayman Islands (26 November 1980), Guernsey (19 April 1985), Bailiwick of Jersey (28 May 2002).

[h] Upon resumption of sovereignty over Hong Kong on 1 July 1997, the Government of China extended the territorial application of the Convention to Hong Kong, Special Administrative Region of China, subject to the statement originally made by China upon accession to the Convention. On 19 July 2005, China declared that the Convention shall apply to the Macao Special Administrative Region of China, subject to the statement originally made by China upon accession to the Convention.

Reservations or other notifications

[i] This State formulated a reservation with regards to retroactive application of the Convention.

[j] This State formulated a reservation with regards to the application of the Convention in cases concerning immovable property.

II. Enactments of model laws[28]

A. UNCITRAL Model Law on International Commercial Arbitration (1985), with amendments as adopted in 2006

8. Legislation based on the Model Law has been adopted in 72 States in a total of 102 jurisdictions:

Armenia (2006); Australia (2010[a,c]), in New South Wales (2010[a]), Northern Territory (2011[a]), Queensland (2013[a]), South Australia (2011[a]), Tasmania (2011[a]), Victoria (2011[a]), and Western Australia (2012[a]); Austria (2006); Azerbaijan (1999); Bahrain (2015); Bangladesh (2001); Belarus (1999); Belgium (2013[a]); Bhutan (2013[a]); Brunei Darussalam (2009[a]); Bulgaria (2002[c]); Cambodia (2006); Canada (1986), in Alberta (1986), British Columbia (1986), Manitoba (1986), New Brunswick (1986), Newfoundland and Labrador (1986), Northwest Territories (1986), Nova Scotia (1986), Nunavut (1999), Ontario (1987), Prince Edward Island (1986), Quebec (1986), Saskatchewan (1988), and Yukon (1986); Chile (2004); China, in Hong Kong, China (2010[a,c]) and Macao, China (1998); Costa Rica (2011[a]); Croatia (2001); Cyprus (1987); Denmark (2005); Dominican Republic (2008); Egypt (1994); Estonia (2006); Georgia (2009[a]); Germany (1998); Greece (1999); Guatemala (1995); Honduras (2000); Hungary (1994); India (1996); Iran (Islamic Republic of) (1997); Ireland (2010[a,c]); Japan (2003); Jordan (2001); Kenya (1995); Lithuania (2012[a,c]); Madagascar (1998); Malaysia (2005); Maldives (2013); Malta (1996); Mauritius (2008[a]); Mexico (1993); Montenegro (2015); Myanmar (2016); New Zealand (2007[a,c]); Nicaragua (2005); Nigeria (1990); Norway (2004); Oman (1997); Paraguay (2002); Peru (2008[a,c]); Philippines (2004); Poland (2005); Republic of Korea (1999); Russian Federation (1993); Rwanda (2008[a]); Serbia (2006); Singapore (1994[d]); Slovakia (2014); Slovenia (2008[a]);

[28] Since States enacting legislation based upon a model law have the flexibility to depart from the text, these lists are only indicative of the enactments that were made known to the UNCITRAL Secretariat. The legislation of each State should be considered in order to identify the exact nature of any possible deviation from the model in the legislative text that was adopted. The year of enactment provided in this note is the year the legislation was passed by the relevant legislative body, as indicated to the UNCITRAL Secretariat; it does not address the date of entry into force of that piece of legislation, the procedures for which vary from State to State, and could result in entry into force some time after enactment. In addition, there may be subsequent amending or repealing legislation that has not been made known to the UNCITRAL Secretariat.

Spain (2003); Sri Lanka (1995); Thailand (2002); the former Yugoslav Republic of Macedonia (2006); Tunisia (1993); Turkey (2001); Uganda (2000); Ukraine (1994); United Kingdom of Great Britain and Northern Ireland, in Bermuda (1993[b]), British Virgin Islands (2013[a,b]), and Scotland (1990); United States of America, in California (1988), Connecticut (1989), Florida (2010[a]), Georgia (2012), Illinois (1998), Louisiana (2006), Oregon (1991), and Texas (1989); Venezuela (Bolivarian Republic of) (1998); Zambia (2000); and Zimbabwe (1996).

[a] Indicates legislation based on the text of the UNCITRAL Model Law on International Commercial Arbitration with amendments as adopted in 2006.
[b] Overseas territory of the United Kingdom of Great Britain and Northern Ireland.
[c] The legislation amends previous legislation based on the Model Law.
[d] The legislation has been further amended in 2001, 2003, 2005 and 2009.

B. UNCITRAL Model Law on International Credit Transfers (1992)

9. A directive of the European Parliament and of the Council of the European Union based on the principles of the UNCITRAL Model Law on International Credit Transfers was issued on 27 January 1997.

C. UNCITRAL Model Law on Electronic Commerce (1996)

10. Legislation based on or influenced by the Model Law has been adopted in 67 States in a total of 143 jurisdictions:

Antigua and Barbuda (2006[d]); Australia (2011[e,h]), in Australian Capital Territory (2012[e,h]), New South Wales (2010[e,h]), Northern Territory (2011[e, h]), Queensland (2013[e,h]), South Australia (2011[e,h]), Tasmania (2010[e,h]), Victoria (2011[e,h]), and Western Australia (2011[e,h]); Bahamas (2003); Bahrain (2002); Bangladesh (2006[a,d]); Barbados (2001); Belize (2003); Bhutan (2006); Brunei Darussalam (2000); Canada, in Alberta (2001[b]), British Columbia (2001[b]), Manitoba (2000[b]), New Brunswick (2001[b]), Newfoundland and Labrador (2001[b]), Northwest Territories (2011[b]), Nova Scotia (2000[b]), Nunavut (2004[b]), Ontario (2001[b]), Prince Edward Island (2001[b]), Quebec (2001[d]), Saskatchewan (2000[b]), and Yukon (2000[b]); Cape Verde (2003); China (2004), in Hong Kong, China (2000), and Macao, China (2005[d, h]); Colombia (1999[a]); Dominica (2013[e]); Dominican Republic (2002[a]); Ecuador (2002[a]); El Salvador (2015[d]); Fiji (2008); France (2000); Gambia (2009[e]); Ghana (2008[e]); Grenada (2008); Guatemala (2008[e]); Honduras (2015); India (2000[a]); Iran (Islamic Republic of) (2004); Ireland (2000); Jamaica (2006); Jordan (2001); Kuwait (2014[a,d]); Lao People's Democratic Republic (2012[a]); Liberia (2002[a]); Madagascar (2014[e]); Malaysia (2006); Mauritius (2000); Mexico (2000); New Zealand (2002); Oman (2008[a]); Pakistan (2002); Panama (2001[a]); Paraguay (2010); Philippines (2000); Qatar (2010[e]); Republic of Korea (1999); Rwanda (2010[e]); Saint Kitts and Nevis (2011[e]); Saint Lucia (2011); Saint Vincent and the Grenadines (2007); Samoa (2008); San Marino (2013[e]); Saudi Arabia (2007); Seychelles (2001[a]); Singapore (2010[e,h]); Slovenia (2000); South Africa (2002[a]); Sri Lanka (2006); Syrian Arab Republic (2014[a,d]); Thailand (2002); Trinidad and Tobago (2011[e]); United Arab Emirates (2006); United Kingdom of Great Britain and Northern Ireland, in Bailiwick of Guernsey (2000[f]), Bailiwick of Jersey (2000[f]), Bermuda (1999[g]), Cayman Islands (2000[g]), Isle of Man (2000[f]), Montserrat (2009[g]), and the Turks and Caicos Islands (2000[g]); United Republic of Tanzania (2015[e]); United States of America, in Alabama (2001[c]), Alaska (2004[c]), Arizona (2000[c]), Arkansas (2001[c]), California (1999[c]), Colorado (2002[c]), Connecticut (2002[c]), Delaware (2000[c]), District of Columbia (2001[c]), Florida (2000[c]), Georgia (2009[c]), Hawaii (2000[c]), Idaho (2000[c]), Illinois (1998), Indiana (2000[c]), Iowa (2000[c]), Kansas (2000[c]), Kentucky (2000[c]), Louisiana (2001[c]), Maine (2000[c]), Maryland (2000[c]), Massachusetts (2003[c]), Michigan (2000[c]), Minnesota (2000[c]), Mississippi (2001[c]), Missouri (2003[c]), Montana (2001[c]), Nebraska (2000[c]), Nevada (2001[c]), New Hampshire (2001[c]), New Jersey (2000[c]), New Mexico (2001[c]), North Carolina (2000[c]), North Dakota (2001[c]), Ohio (2000[c]), Oklahoma (2000[c]), Oregon (2001[c]), Pennsylvania (1999[c]), Rhode Island (2000[c]), South Carolina (2004[c]), South Dakota (2000[c]), Tennessee (2001[c]), Texas (2001[c]), Utah (2000[c]), Vermont (2003[c]), Virginia (2000[c]), West Virginia (2001[c]), Wisconsin

(2004[c]), and Wyoming (2001[c]); Vanuatu (2000); Venezuela (Bolivarian Republic of) (2001); Viet Nam (2005[e]); and Zambia (2009[e]).

[a] Except for the provisions on certification and electronic signatures.
[b] The legislation enacts uniform legislation influenced by the Model Law and the principles on which it is based, namely, the Uniform Electronic Commerce Act, adopted in 1999 by the Uniform Law Conference of Canada.
[c] The legislation enacts uniform legislation influenced by the Model Law and the principles on which it is based, namely, the Uniform Electronic Transactions Act, adopted in 1999 by the National Conference of Commissioners on Uniform State Law.
[d] The legislation is influenced by the Model Law and the principles on which it is based.
[e] The legislation also includes substantive provisions of the United Nations Convention on the Use of Electronic Communications in International Contracts, the status of which can be found in part I, sect. H.
[f] Crown Dependency of the United Kingdom of Great Britain and Northern Ireland.
[g] Overseas territory of the United Kingdom of Great Britain and Northern Ireland.
[h] The legislation amends previous legislation based on the Model Law.

D. UNCITRAL Model Law on Cross-Border Insolvency (1997)

11. Legislation based on the Model Law has been adopted in 41 States in a total of 43 jurisdictions:

Australia (2008); Benin (2015[b]); Burkina Faso (2015[b]); Cameroon (2015[b]); Canada (2005); Central African Republic (2015[b]); Chad (2015[b]); Chile (2014); Colombia (2006); Comoros (2015[b]); Congo (2015[b]); Côte d'Ivoire (2015[b]); Democratic Republic of the Congo (2015[b]); Equatorial Guinea (2015[b]); Gabon (2015[b]); Greece (2010); Guinea (2015[b]); Guinea-Bissau (2015[b]); Japan (2000); Kenya (2015); Malawi (2015); Mali (2015[b]); Mauritius (2009); Mexico (2000); Montenegro (2002); New Zealand (2006); Niger (2015[b]); Philippines (2010); Poland (2003); Republic of Korea (2006); Romania (2002); Senegal (2015[b]); Serbia (2004); Seychelles (2013); Slovenia (2007); South Africa (2000); Togo (2015[b]); Uganda (2011); United Kingdom of Great Britain and Northern Ireland, in Great Britain (2006), Gibraltar (2014[a]), and the British Virgin Islands (2003[a]); United States of America (2005); and Vanuatu (2013).

[a] Overseas territory of the United Kingdom of Great Britain and Northern Ireland.
[b] Enacting the *Acte uniforme portant organisation des procédures collectives d'apurement du passif* (OHADA), adopted on 10 September 2015 at Grand-Bassam, Côte d'Ivoire.

E. UNCITRAL Model Law on Electronic Signatures (2001)

12. Legislation based on or influenced by the Model Law has been adopted in 32 States:

Antigua and Barbuda (2006); Barbados (2001); Bhutan (2006); Cape Verde (2003); China (2004); Colombia (2012); Costa Rica (2005[a]); Gambia (2009); Ghana (2008); Grenada (2008); Guatemala (2008); Honduras (2013); India (2009[a]); Jamaica (2006); Madagascar (2014); Mexico (2003); Nicaragua (2010[a]); Oman (2008[a]); Paraguay (2010); Qatar (2010); Rwanda (2010); Saint Kitts and Nevis (2011); Saint Lucia (2011); Saint Vincent and the Grenadines (2007); San Marino (2013); Saudi Arabia (2007[a]); Thailand (2001); Trinidad and Tobago (2011); United Arab Emirates (2006); United Kingdom of Great Britain and Northern Ireland, in Montserrat (2009[b]); Viet Nam (2005); and Zambia (2009).

[a] The legislation is influenced by the Model Law and the principles on which it is based.
[b] Overseas territory of the United Kingdom of Great Britain and Northern Ireland.

F. UNCITRAL Model Law on International Commercial Conciliation (2002)

13. Legislation based on or influenced by the Model Law has been adopted in 15 States in a total of 27 jurisdictions:

Albania (2011[d]); Belgium (2005); Bhutan (2013); Canada, in Nova Scotia (2005[b]), and Ontario (2010[b]); Croatia (2003); France (2011[c]); Honduras (2000); Hungary (2002); Luxembourg (2012); Montenegro (2005[c]); Nicaragua (2005); Slovenia (2008); Switzerland

(2008[c]); the former Yugoslav Republic of Macedonia (2009); and United States of America, in District of Columbia (2006[a]), Hawaii (2013[a]); Idaho (2008[a]), Illinois (2004[a]), Iowa (2005[a]), Nebraska (2003[a]), New Jersey (2004[a]), Ohio (2005[a]), South Dakota (2007[a]), Utah (2006[a]), Vermont (2005[a]), and Washington (2005[a]).

[a] The legislation enacts uniform legislation influenced by the Model Law and the principles on which it is based, namely, the Uniform Mediation Act, adopted in 2001 (amended in 2003) by the National Conference of Commissioners on Uniform State Laws.

[b] The legislation enacts uniform legislation influenced by the Model Law and the principles on which it is based, namely, the Uniform [International] Commercial Mediation Act, adopted in 2005 by the Uniform Law Conference of Canada.

[c] The legislation is influenced by the Model Law and the principles on which it is based.

[d] The legislation amends previous legislation based on the Model Law.

G. UNCITRAL Model Law on Public Procurement (2011)[29]

14. The UNCITRAL Model Law on Public Procurement as adopted in 2011 forms the basis of or is reflected in the public procurement laws and regulations in the following States. These States have used the Model Law and accompanying Guide to Enactment in reforming their public procurement law and systems, though the extent to which the resulting regulatory framework incorporates the provisions of the Model Law varies, as that framework also reflects legal traditions, domestic policy and other objectives:

Afghanistan, Armenia, Egypt, Ghana, India, Jamaica, Kazakhstan, Kenya, Kyrgyzstan, Mexico, Myanmar, Russian Federation, Rwanda, Tajikistan, Trinidad and Tobago, Tunisia, Uganda, United Republic of Tanzania, Uzbekistan and Zambia.

15. The following organizations use the Model Law and accompanying Guide to Enactment as a benchmark for public procurement law reform in countries of their operation:

African Development Bank, Asian Development Bank, European Bank for Reconstruction and Development, Inter-American Development Bank, Organization for Economic Cooperation and Development and the World Bank.

III. Status of other UNCITRAL texts

A. UNCITRAL Arbitration Rules

16. The following table presents a non-exhaustive list of arbitration centres which (i) have institutional rules based on, or inspired by, the UNCITRAL Arbitration Rules, (ii) administer arbitral proceedings or provide administrative services under the Rules, and/or (iii) act as an appointing authority under the Rules.[30]

[29] The UNCITRAL Model Law on Public Procurement (2011) is a revision of the UNCITRAL Model Law on Procurement of Goods, Construction and Services (1994), *Official Records of the General Assembly, Forty-ninth Session, Supplement No. 17* and corrigendum (A/49/17 and Corr.1), annex I. Historical status information on the UNCITRAL Model Law on Procurement of Goods, Construction and Services (1994) is available on the UNCITRAL website, www.uncitral.org/uncitral/uncitral_texts/procurement_infrastructure.html.

[30] Arbitration centres wishing to provide updated information for this table are invited to contact the Secretariat. The contents of this table are only updated on the UNCITRAL website on an annual basis.

State	*Name of the arbitration centre*	*With institutional Rules based on or inspired by the UNCITRAL Arbitration Rules*	*Administering arbitral proceedings under the UNCITRAL Arbitration Rules or providing some administrative services*	*Acting as appointing authority under the UNCITRAL Arbitration Rules*

XI. COORDINATION AND COOPERATION

Note by the Secretariat on coordination activities

(A/CN.9/875)

[Original: English]

Contents

I. Introduction

1. In resolution 34/142 of 17 December 1979, the General Assembly requested the Secretary-General to place before the United Nations Commission on International Trade Law a report on the legal activities of international organizations in the field of international trade law, together with recommendations as to the steps to be taken by the Commission to fulfil its mandate of coordinating the activities of other organizations in the field.

2. In resolution 36/32 of 13 November 1981, the General Assembly endorsed various suggestions by the Commission to implement further its coordinating role in the field of international trade law.[1] Those suggestions included presenting, in addition to a general report of activities of international organizations, reports on specific areas of activity focusing on work already under way and areas where unification work was not under way but could appropriately be undertaken.[2]

3. This report, prepared in response to resolution 34/142 and in accordance with UNCITRAL's mandate,[3] provides information on the activities of other international organizations active in the field of international trade law in which the UNCITRAL secretariat has participated, principally working groups, expert groups and plenary meetings. The purpose of that participation has been to ensure coordination of the related activities of the different organizations, share information and expertise and avoid duplication of work and the resultant work products.

4. The Commission may wish to note the increasing involvement of the Secretariat in initiatives of other organizations. This is a recurrent pattern in recent years, consistent with the increase in the Secretariat's technical assistance activities,[4] and which is expected to continue and even increase in future.

II. Coordination activities

A. The International Institute for the Unification of Private Law and the Hague Conference on Private International Law

International Institute for the Unification of Private Law (Unidroit)

5. The Secretariat participated as an observer in the third meeting of the Unidroit Working Group on Long-Term Contracts (Oslo, 3-4 March 2016), which was established

[4] See A/CN.9/775.

for the purpose of formulating proposals for possible amendments and additions to the black-letter rules and comments of the Unidroit Principles of International Commercial Contracts 2010 (see also A/CN.9/838, para. 5). UNCITRAL participation aimed to ensure coordination of the topics under discussion with relevant UNCITRAL texts.

Hague Conference on Private International Law (HccH)

6. The Secretariat attended the Council on General Affairs and Policy of the Hague Conference (The Hague, The Netherlands, 15-17 March 2016) at which, inter alia, a "joint proposal of the Secretariats of UNCITRAL, Unidroit and HccH for cooperation in the area of international commercial contract law (with a focus on sales)" was discussed. The HccH Council directed its Permanent Bureau to further cooperate with the Secretariats of UNCITRAL and Unidroit on this matter (see also para. 8 below).

Joint activities with Unidroit and HCCH

7. The 2016 tri-partite coordination meeting of UNCITRAL, Unidroit and HccH was hosted by Unidroit (Rome, 19-20 April 2016). As in the past, the meeting provided the opportunity to discuss current work of the three organizations, areas of mutual interest and possible joint activities.

8. At its forty-ninth session, the Commission will have before it a joint proposal on cooperation in the area of international commercial contract law (with a focus on sales) prepared by the UNCITRAL secretariat and the secretariats of HccH and of Unidroit (A/CN.9/892, see also para. 6 above).

B. Other organizations

9. The Secretariat undertook other coordination activities with various international organizations. Most of such activities included provision of comments on documents drafted by those organizations, and participation in various meetings and conferences with the purpose of briefing about the work of UNCITRAL or to provide an UNCITRAL perspective on the matters at stake.

1. General

10. The Secretariat continued its collaboration with the Asia-Pacific Economic Cooperation (APEC) (see also A/CN.9/872). At the APEC Structural Reform Ministerial Meeting (Cebu, Philippines, 7-8 September 2015), the APEC Ministers recognized the importance of work to develop model legal instruments and commended APEC work in this area in collaboration with UNCITRAL. The APEC Ministers further agreed that the development of international legal instruments and their adoption would create a more conducive climate for cross-border trade and investment, thus facilitating economic growth and that the use of those instruments provides greater legal certainty in cross-border transactions, harmonization of finance and dispute resolution systems, closer economic and legal integration among cooperating economies, and the simplification of procedures involved in international transactions. The Secretary of UNCITRAL addressed the APEC Economic Committee during its plenary (Lima, 29 February-1 March 2016), providing a general overview of UNCITRAL, its mandate and texts, its involvement in technical assistance and coordination and the need for continued collaboration with APEC, particularly its Economic Committee.

11. The Secretariat attended the Annual Meeting of the Advisory Committee on Private International Law held under the aegis of the United States State Department (Washington D.C., 24-25 September 2015), which brings together senior representatives from international organizations involved in private international law, representatives of Governments and NGOs. The Secretariat provided an update on the activity of UNCITRAL and participated in discussions over recent achievements and future work of the main international organizations involved in private international law.

12. The Secretariat remained actively involved in the Inter-Agency Cluster on Trade and Productive Capacity. Among others, it took part (remote participation) in the annual meeting

of the Cluster (Geneva, Switzerland, 12 November 2015) at which the establishment of a Global Multi Donor Trust Fund on Trade and Productive Capacity was discussed and follow-up actions were proposed (see also A/CN.9/838, para. 10).

13. The Secretariat continued to be involved in the Global Forum on Law, Justice and Development (GFLJD), a permanent global forum, established at the initiative of the World Bank, that aims to exchange and disseminate innovative legal solutions for development. As explained in A/CN.9/838 para. 11, the GFLJD is intended to spur both South-South and North-South collaboration and its multidisciplinary activities address economic, legal and technical dimensions of the targeted issues. The UNCITRAL secretariat was appointed as co-leader of the Law and Economy Working Group, with effect from September 2014.

14. One of the GFLJD activities is the Law, Justice and Development Week at which the Secretariat participated in sessions on public procurement and public-private partnerships (Washington, D.C., 16-20 November 2015), addressing systems for review or challenges to decisions in public procurement in the context of the international financial institutions (IFIs), on suspension and debarment in sanctions and debarments in IFIs, United Nations organizations and other international organizations; and on enhancing the quality of decisions in PPP transactions in a variety of areas.

15. The Secretariat participated in an academic workshop on the Economic Assessment of International Commercial Law Reform held at Harris Manchester College, University of Oxford jointly with the Unidroit Foundation (Oxford, United Kingdom of Great Britain and Northern Ireland, 29-31 March 2016).

16. The Secretariat attended the eighty-eighth regular session of the Inter-American Juridical Committee (IAJC) as an observer (Washington, D.C., 4 April 2016). The IAJC "serves the [Organization of American States] OAS as an advisory body on juridical matters of an international nature and promotes the progressive development and the codification of international law." The meeting, attended by members (academics and other legal experts) and observers from member States and international organizations, aimed to generate ideas for legislative projects which could be put before OAS member States.

Rule of Law

17. The UNCITRAL secretariat undertook or facilitated several coordination activities on the rule of law in those areas of work of the United Nations and other entities that are of general relevance to UNCITRAL. The Secretariat continued contributing to a rule of law newsletter and annual report of the Secretary-General to the General Assembly on strengthening and coordinating United Nations rule of law activities. It also contributed to a joint report by the Office of the High Commissioner for Human Rights (OHCHR), Office of Legal Affairs (OLA) and United Nations Office on Drugs and Crime (UNODC) to the Rule of Law Coordination and Resource Group (RoLCRG) prepared pursuant to the 2012 decision of the Secretary-General's Policy Committee relating to the United Nation's rule of law arrangements (Decision No. 2012/13). The decision, in particular, called for the cooperation of OHCHR, OLA and UNODC, in consultation with all other relevant entities in the RoLCRG and with the assistance of the Rule of Law Unit, in order to strengthen the Organization's institutional response to trends and challenges in the application of the rule of law at the international level. The joint report is intended as a basis for discussion by the RoLCRG. It outlines some examples of institutional cooperation that have taken place among the three offices since September 2012, identifies trends and challenges in the application of the rule of law at the international level, as requested by the above-mentioned Policy Committee decision, and suggests areas of possible future collaboration among OHCHR, OLA and UNODC in strengthening the rule of law at the international level.

18. It may be recalled that, at its forty-sixth to forty-eighth sessions, in 2013 to 2015, the Commission learned about initiatives across the United Nations system to formulate sustainable development goals and a post-2015 international development agenda.[5] At that time, the Commission noted the relevance of UNCITRAL work to these initiatives and

[5] *Official Records of the General Assembly, Sixty-eighth Session, Supplement No. 17* (A/68/17), paras. 274-275; ibid., *Sixty-ninth Session, Supplement No. 17* (A/69/17), paras. 220-233; and ibid., *Seventieth Session, Supplement No. 17* (A/70/17), paras. 298-231.

requested its Bureau and its Secretariat to take appropriate steps to ensure that the areas of work of UNCITRAL and the role of UNCITRAL in the promotion of the rule of law and sustainable development were not overlooked. Pursuant to those requests, efforts were made to ensure that the message of UNCITRAL was conveyed to the States negotiating the post-2015 development agenda. As a result, in the Addis Ababa Action Agenda (General Assembly resolution 69/313, para. 89) (the AAAA), which is an integral part of the 2030 Agenda for Sustainable Development (General Assembly resolution 70/1, para. 40), States endorsed "the efforts and initiatives of the United Nations Commission on International Trade Law, as the core legal body within the United Nations system in the field of international trade law, aimed at increasing coordination of and cooperation on legal activities of international and regional organizations active in the field of international trade law and at promoting the rule of law at the national and international levels in this field." Pursuant to those requests of the Commission, efforts were made to ensure that the message of UNCITRAL was conveyed to the States negotiating global indicators that would accompany the 2030 Agenda for Sustainable Development, to be adopted in September 2016.

19. At the Secretariat level, the UNCITRAL secretariat has joined the Inter-Agency Task Force (IATF) on Financing for Development (FfD), convened by the Secretary-General to: (a) review progress in implementing the AAAA; and (b) advise the intergovernmental follow-up process thereon. The UNCITRAL secretariat contributed to the 2016 Inaugural Report of IATF, which set out options for monitoring the commitments covered in the Trade Chapter of the AAAA. The submission by the UNCITRAL secretariat in particular stated that achievement of the targets covered by paragraph 89 of the AAAA could be monitored through data that is already collected on:

(a) Treaty actions and enactments of UNCITRAL texts;

(b) Relevant court and arbitral decisions applying and interpreting UNCITRAL texts that are reported and publicized through the Case Law on UNCITRAL texts system (CLOUT);

(c) Participation in UNCITRAL sessions by States, IGOs and NGOs;

(d) Cooperation and coordination activities involving UNCITRAL participation;

(e) Technical assistance activities conducted by UNCITRAL;

(f) Dissemination activities conducted by UNCITRAL (website, digests and other publications);

(g) Teaching, training and capacity-building activities; and

(h) Other activities not covered above that are reported as being, or having been, conducted by States and organizations (both IGOs and NGOs) at the national, regional and international levels that refer to the use of UNCITRAL texts.

Data collected can be disaggregated, as appropriate, by reference to factors such as type of activity, topic, gender, country, region, level of development and the IGOs and NGOs involved. Where relevant, information relating to activities conducted by UNCITRAL would include those conducted jointly with States, IGOs and NGOs. These indicators can be monitored every four years. It is not expected that such monitoring would impose any additional reporting burden on States, except with respect to tracking the use of UNICTRAL texts.

20. The new web page of the UNCITRAL website, which became operational from 5April 2016, provides an overview of the relevance of UNCITRAL to the 2030 Agenda for Sustainable Development.

21. It may be recalled that, at its forty-eighth session, in 2015, the Commission recalled its call to its secretariat to continue exploring synergies and expanding outreach to delegations of States to various United Nations bodies with the view of increasing their awareness of the work of UNCITRAL and its relevance to other areas of work of the United Nations. Support was expressed in that context at that session for outreach to various bodies of the United Nations system operating at a country level with the mandate to assist with local law reforms, be it in the promotion of the rule of law, development or other context, so

that they appropriately factor in their work the promotion of the rule of law in commercial relations generally and UNCITRAL standards in particular.[6] The draft guidance note on strengthening United Nations support to States, upon their request, to implement sound commercial law reforms (contained in document A/CN.9/883 that will be before the Commission at its forty-ninth session), is aimed at becoming a tool to increase awareness across the United Nations about the importance of sound commercial law reforms and the use of internationally accepted commercial law standards in that context.

2. Micro, small and medium-sized enterprises (MSMEs)

22. The Secretariat has encouraged participation and dialogue in respect of its work on micro, small and medium-sized enterprises (MSMEs — Working Group I) through its participation in the Corporate Registers Forum (CRF) and the European Commerce Registers' Forum (ECRF) joint annual conference, as well as presenting on the topic of "Business Registration, Registry and Legal Reform, Reducing Burdens" at such a conference (Cardiff, United Kingdom, 9-12 May 2016) (see also A/CN.9/872).

3. Procurement

23. In accordance with requests of the Commission and Working Group I (under its former mandate on Public Procurement), the Secretariat has established links with other international organizations active in procurement reform to foster cooperation with regard to the UNCITRAL Model Law on Public Procurement (2011) and its accompanying Guide to Enactment (2012). The aims of such cooperation are to ensure that reforming governments and organizations are informed of the policy considerations underlying those texts, so as to promote a thorough understanding and appropriate use of the Model Law, at both regional and national levels. The Secretariat is taking a regional approach to this cooperation, and activities with the multilateral development banks in several regions, focusing on good governance and anti-corruption (in which procurement reform plays a pivotal role), are envisaged (see A/CN.9/838, para. 26).

24. To this end, the Secretariat participated, among others, in the following activities:

(a) The work of the World Bank's International Advisory Group on Procurement, which has advised the World Bank on its Procurement Policy Review, including participation in a final meeting held in Cairo, to review and comment on the proposed implementation of the reforms (Washington, D.C., 21-22 September 2015);

(b) The development of a World Bank system for benchmarking public procurement, including participation in discussions on expansion of the scope of the system (Washington, D.C., 22 September 2015);

(c) The "Third Suspension and Debarment Colloquium, 2015", held at the World Bank Headquarters, addressing (inter alia) the prospects for harmonization in systems for sanctions and debarment in public procurement (Washington, D.C., 16 December 2015);[7]

(d) The work of the team of specialists in Public-Private Partnerships (PPPs) of the United Nations Economic Commission for Europe (UNECE), which meets and reviews policy issues in PPPs, including on the Role of PPPs in financing the post-2015 United Nations Development Agenda;

(e) The work of the Meeting of Leading Practitioners on Public Procurement of the Organization for Economic Co-operation and Development (OECD), focusing on possible revisions to the draft OECD Recommendation on Public Integrity and to the 1998 OECD Recommendation on Improving Ethical Conduct in the Public Service, under the OECD Public Governance Committee;

(f) The work of the Sustainable Public Procurement Initiative Network established by the United Nations Environment Programme (UNEP), including serving on its working groups on developing principles for sustainable public procurement, addressing legal

barriers, and promoting collaboration between international organizations (see also A/CN.9/872, para. 30);

(g) The work of the World Trade Organization regarding its Agreement on Government Procurement, including through the issue of a joint publication on the treatment of small and medium-sized enterprises in public procurement and joint technical assistance activities (see also A/CN.9/872, para. 32).[8]

4. Dispute settlement

25. As noted by the Commission at its forty-eighth session, in 2015, UNCITRAL standards in the field of dispute settlement are characterized by their flexibility and generic application to different types of arbitration, including both purely commercial arbitration and investor-State arbitration.[9] In line with the decision of the Commission that the Secretariat should continue to coordinate with organizations in relation to the various types of arbitration to which UNCITRAL standards were applicable, and to closely monitor developments, further exploring areas for cooperation and coordination,[10] the Secretariat activities in the area of international commercial arbitration and conciliation included:

(a) Coordination with United Nations Conference on Trade and Development (UNCTAD) in the field of international investment arbitration, including participation in the expert group meeting on investor-State dispute settlement (ISDS) reforms "International Investment Agreements (IIA) Stocktaking" to provide information on UNCITRAL instruments on transparency and on possible future work (Geneva, Switzerland, 16 March 2016);

(b) Coordination with United Nations Department of Economic and Social Affairs (UNDESA) on resolution of disputes between States arising under tax conventions and in connection with relevant issues such as transfer pricing, base erosion and profit shifting.

(c) Coordination with OECD, including the organization of the Second International Conference for Euro-Mediterranean Community of International Arbitration (also with Cairo Regional Centre for International Commercial Arbitration (CRCICA)) addressing topical issues in both commercial and investment arbitration, and a workshop on international investment treaties, investment disputes and arbitration for Iraqi government officials;

(d) Cooperation with the World Economic Forum and the International Centre for Trade and Sustainable Development (ICTSD) on the E15 Initiative Task Force on Investment Policy, a project aimed at "strengthening the global trade and investment system";

(e) Coordination with the International Centre for Settlement of Investment Disputes (ICSID) and with the Permanent Court of Arbitration at The Hague (PCA) on matters related to international investment arbitration;

(f) Coordination with the International Chamber of Commerce (ICC) with regard to possible cooperation on joint conferences, training, and use of resources in relation to international arbitration, particularly in the Asia-Pacific region;

(g) Coordination with a wide range of arbitral institutions and organizations with respect to use of the UNCITRAL Arbitration Rules as well as the revision of the UNCITRAL Notes on Organizing Arbitral Proceedings;

(h) Coordination with the Energy Charter Treaty (ECT) secretariat and participation in their expert groups including the group on mediation;

(i) Coordination with the European Union and the OPEC Fund for International Development (OFID) with respect to the financing of the UNCITRAL Transparency Registry; and

---

[10] Ibid.

(j) Coordination with the International Bar Association (IBA) and participation in its committee on investment arbitration.

5. Electronic commerce

26. The Secretariat carried out coordination activities with international and regional organizations involved in the formulation of legal standards in the field of electronic commerce in order to ensure their compatibility with UNCITRAL texts and their underlying principles. Among others, coordination with the Arab Information and Communication Technologies Organization (AICTO), which included participation in the Conference "PKI & the global e-commerce law" (Tunis, 8 May 2015), and with the World Bank, which included participation in the "International Identity Management Law and Policy Meeting" (Washington, D.C., 14 January 2016), are to be noted.

27. In the context of the preparation by the United Nations Economic and Social Commission for Asia and the Pacific (UN/ESCAP) of a Framework Agreement on Facilitation of Cross-border Paperless Trade in Asia and the Pacific, the Secretariat participated as an observer in the Second Meeting of the Intergovernmental Steering Group on Cross-border Paperless Trade Facilitation (the "Steering Group", Bangkok, 4-6 November 2015), in the Interim Meeting of the Legal Working Group of the Steering Group (Bangkok, 19-21 January 2016 — remote participation) and in the Third Meeting of the Legal Working Group of the Steering Group and in the Second Meeting of the Steering Group on: (Bangkok, 21-25 March 2016). The Commission will hear an oral report on the content of that Framework Agreement and its relevance for the promotion of the adoption, use and uniform interpretation of UNCITRAL texts on electronic commerce.

6. Insolvency

28. The Secretariat coordinated with the International Insolvency Institute (III) by attending its fifteenth annual conference (Naples, Italy, 14-16 June, 2015) and participating as a panellist in a session entitled "UNCITRAL: A Treaty On Insolvency-Related Judgements?". Several additional topics of relevance to the work of UNCITRAL's Working Group V on Insolvency (in which III participates as an NGO) were discussed on panels and in breakout sessions at the III conference, including the following: The European Insolvency Reform and the New Approach to Business Failure; Financial Derivatives in Bankruptcy: Containing or Creating Systemic Risk?; Sovereign Debt Restructuring: Current Developments and Proposals for Reform; Judicial Panel: Issues and Answers in Coordinating Cross-Border Cases; Solving Corporate Group Insolvencies; Three Dimensional Chess: Directors' and Officers' Responsibilities in Distressed Company Groups; and Resolving IP Issues in Insolvency and Restructurings.

29. The Secretariat attended various sessions of the annual conference of the International Bar Association (IBA) (Vienna, 4-9 October, 2015). With respect to insolvency law, the Secretariat participated in two sessions discussing the feasibility of developing an international convention on selected aspects of cross-border insolvency law, a topic that is being studied, together with the potential for wider adoption of the Model Law on Cross-Border Insolvency, by an open-ended, informal group reporting to Working Group V (Insolvency Law).[11]

7. Security interests

30. Coordination with relevant organizations was pursued to ensure that States were offered comprehensive and consistent guidance in the area of secured transactions law.

31. Specific activities of the Secretariat included:

(a) Coordination with III on the current work of UNCITRAL on security interests in the context of its fifteenth Anniversary Conference (Naples, 15-16 June 2015) (see also para. 28 above);

[11] See A/CN.9/798, para. 19, A/CN.9/803, para. 39 and the *Official Records of the General Assembly, Sixty-ninth Session, Supplement No. 17* (A/69/17), paras. 152 and 158.

(b) Coordination with IBA on UNCITRAL texts on security interests in the context of its Annual Conference (Vienna, 4-9 October 2015) (see also para. 29 above);

(c) Coordination with the Factors Chain International and the International Factors Group on the harmonization of the law of secured transactions in the context of their Annual Meeting (Vienna, 19-21 October 2015) (see also A/CN.9/872, para. 39);

(d) Coordination with Unidroit to ensure that the Mining, Agriculture and Construction (MAC) Protocol being prepared by the relevant Unidroit Study Group does not overlap or conflict with the security interests texts prepared by UNCITRAL (Rome, 19-21 October 2015 and 7-9 March 2016);

(e) Coordination with the United Nations Global Compact initiative on the Finance Chapter of the United Nations and Global Commerce publication with regard to UNCITRAL and its work on security interests (February-April 2016); and

(f) Coordination with the World Bank to prepare a revised version of the joint UNCITRAL-World Bank Standard on Insolvency and Creditor Rights to include the key recommendations of the UNCITRAL Legislative Guide on Secured Transactions, (Washington, D.C., 19 November 2015).

World Bank Insolvency and Creditor Rights Standard (ICR Standard)

32. At its forty-eighth session, in 2015, the Commission took note with appreciation of the report of the Secretariat about the progress achieved in: (a) the revision the World Bank Insolvency and Creditor Rights Standard (the "ICR Standard") to take into account the key recommendations of the Secured Transactions Guide; (b) the coordination efforts with the European Commission with a view to ensuring a coordinated approach to the law applicable to the third-party effects of assignments of receivables, taking into account the approach followed in the Assignment Convention, the Secured Transactions Guide and the draft Model Law; (c) the coordination efforts with Unidroit with respect to a fourth Protocol to the Convention on International Interests in Mobile Equipment on matters specific to agricultural, construction and mining equipment; and (d) the coordination efforts with the International Finance Corporation and the Organization of American States in providing technical assistance and assistance with respect to local capacity-building in the area of security interests.[12] It was widely felt that such coordination and cooperation efforts were extremely important and should continue with a view to ensuring that the work of the Commission on security interests was reflected to the maximum extent possible in the relevant texts of other organizations. After discussion, the Commission renewed its mandate to the Secretariat to continue its coordination and cooperation efforts in the area of security interests.[13]

33. The Commission may wish to note that, further to the agreement reached at a meeting held in Washington, D.C., on 19 November 2015, the Secretariat provided comments on the World Bank Secured Transactions Principles that are part of the ICR Standard and is expecting to receive the comments of the World Bank on the revised version of the ICR Standard prepared jointly by the Secretariat and the World Bank that includes references to the key recommendations of the Secured Transactions Guide. The Commission may wish to consider this matter and confirm or revise the mandate given to the Secretariat to coordinate with the World Bank so as to include in the revised ICR Standard the key recommendations of the Secured Transactions Guide and references to the other UNCITRAL texts on secured transactions. In this connection, the Commission may wish to take into account the need for both duplication of effort and divergence in the texts to be avoided, with due respect for the different mandates of the Commission and the World Bank.[14]

[12] *Official Records of the General Assembly, Seventieth Session, Supplement No. 17* (A/70/17), para. 218.

[13] Ibid., para. 219.

[14] Ibid., *Forty-eighth Session, Supplement No. 17* (A/48/17), para. 174.

8. Commercial Fraud

34. No development occurred in the area of commercial fraud since A/CN.9/838 was prepared. For easy reference of the Commission, the relevant paragraph (para. 37) of that Secretariat's Note is reproduced here below.

35. Further to the request of the Commission (A/63/17, para. 347; A/64/17, para. 354, and A/68/17, para. 312) in relation to commercial fraud, the Secretariat continued to coordinate with the United Nations Office on Drugs and Crime (UNODC) in its work on economic crime and identity fraud. In particular, the Secretariat remains a member of UNODC's core group of experts on identity-related crime, which was formed to bring together on a regular basis representatives from governments, private sector entities, international and regional organizations and academia to pool experience, develop strategies, facilitate further research and agree on practical action against identity-related crime. Work planned by UNODC core group of experts on the development of model legislation on identity-related crime did not proceed due to a lack of extrabudgetary resources, however the Secretariat will continue to participate in the core group of experts once its work proceeds. The Commission may also wish to note that UNODC also plans to develop, again subject to the availability of extrabudgetary funds, a web-based repository of information on identity-related crime, as well as a comprehensive package of training tools (see E/CN.15/2014/17, paras. 72 to 75 for more details).

Part Three

ANNEXES

I. SUMMARY RECORDS OF THE MEETINGS OF THE UNITED NATIONS COMMISSION ON INTERNATIONAL TRADE LAW

Finalization and adoption of a draft Model Law on Secured Transactions

Summary record of the 1024th meeting, held at Headquarters, New York, on Monday, 27 June 2016, at 10.30 a.m.

[A/CN.9/SR.1024]

Temporary Chairperson: Mr. Sorieul (Secretary of the Commission)
Chairperson: Mr. Labardini Flores (Vice-Chair) (Mexico)

The meeting was called to order at 10.45 a.m.

Agenda item 1: Opening of the session

1. **Mr. de Serpa Soares** (Under-Secretary-General for Legal Affairs, The Legal Counsel) said that Sustainable Development Goal 16, "Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels", was closely related to the Commission's mandate to modernize and harmonize the rules on international business. The pivotal role of trade in reducing poverty and promoting sustainable development was widely recognized. At the third International Conference on Financing for Development, States had specifically recognized the role of the Commission in that regard and the General Assembly had repeatedly confirmed that the implementation and effective use of modern private law standards in international trade were essential for advancing good governance, sustained economic development and the eradication of poverty and hunger. The Commission's work contributed directly to the realization of those goals.

2. The current session would be a busy yet productive one, involving the finalization and adoption of three different texts. Years of work by Working Group VI were expected to culminate in the adoption of a Model Law on Secured Transactions, which would assist States in developing modern legislation on secured transactions to enhance the availability of secured credit using movable assets as collateral. Working Group III (Online Dispute Resolution) had completed its work and had submitted the resulting technical notes for consideration and finalization by the Commission. The Commission would also be updating its Notes on Organizing Arbitral Proceedings to reflect recent developments in arbitration practice.

3. The Commission had made progress on the enforcement of settlement agreements and on the Model Law on Electronic Transferable Records. Nonetheless, it would continue to deliberate on a range of other matters, including conciliation, electronic commerce, insolvency, concurrent proceedings, ethics for arbitrators, use of the United Nations Convention on Transparency in Treaty-based Investor-State Arbitration as a model for further reform of investor-State dispute settlement, identity management and cloud computing.

4. At a time of limited resources, it was particularly important to address the future work of the Commission from a strategic perspective. In that connection, the notes by the Secretariat on the Commission's overall work programme and on specific topics, as well as the progress reports of working groups, would provide a sound basis for deciding how best to deploy those limited resources while meeting the increased demands from States for capacity-building and technical assistance in the implementation of UNCITRAL standards.

5. He looked forward to the Commission's continued consideration of the draft guidance note on strengthening United Nations support to States, upon their request, to implement sound commercial law reforms. A key priority was support and technical cooperation in areas relating to capacity-building for local and national institutions and for joint planning and implementation of programmes through multi-stakeholder partnerships. Support for capacity development at the country level required the right combination of knowledge and expertise within United Nations country teams. The draft guidance note would indeed achieve that goal and help in mobilizing knowledge and expertise to assist countries in the early phase of the implementation of special development goals.

6. The Commission had a role to play in promoting the rule of law at the national and international levels, and it had been firmly established that promotion of the rule of law in commercial relations should be an integral part of the broader United Nations rule of law agenda. To continue efforts to integrate the work of UNCITRAL into the activities of the United Nations, the Rule of Law Unit would organize a biennial briefing and a panel discussion focusing on State practices in implementing multilateral treaties influenced by the work of UNCITRAL and on practical measures to facilitate access to justice in the context of commercial law, in particular for micro-, small and medium enterprises.

7. There were also a number of noteworthy projects being managed by the International Trade Law Division on behalf of the Commission. The Transparency Registry, one of the pillars of transparency standards in investor-State arbitration, had become fully operational thanks to generous donations from the European Union and the OPEC Fund for International Development. Furthermore, the UNCITRAL Regional Centre for Asia and the Pacific was in its fifth year of operation and had exceeded expectations. He commended the Government of the Republic of Korea for its contribution to the Centre, and thanked the Chinese Government for its support in approving the contribution by the authorities of Hong Kong, China, of a legal expert to the Centre.

Tribute to the memory of former Commission members Sergei Nikolaevich Lebedev and Jean Stoufflet

8. **The Temporary Chair** paid tribute to the memory of Mr. Sergei Nikolaevich Lebedev of the Russian Federation and Mr. Jean Stoufflet of France for their outstanding contribution to the work of the Commission.

Agenda item 2: Election of officers

9. **The Temporary Chair** said that it was the turn of the Group of African States to nominate a candidate for the office of Chair of the Commission.

10. **Mr. Katota** (Zambia), speaking on behalf of the Group of African States, said that the Group wished to nominate Mr. Kenfack Douajni (Cameroon) for the office of Chair of the Commission.

11. **Mr. Dennis** (United States of America) and Mr. Bellenger (France) seconded the nomination.

12. *Mr. Kenfack Douajni (Cameroon) was elected Chair by acclamation.*

13. **Mr. Tommo Monthe** (Cameroon), speaking in the absence of Mr. Kenfack Douajni, thanked the Group of African States and the members of the Commission for honouring his country with the election of Mr. Kenfack Douajni as Chair of the Commission.

14. **Mr. Garros** (Argentina) said that the Group of Latin American and Caribbean States wished to nominate Mr. Labardini Flores (Mexico) for the office of Vice-Chair of the Commission.

15. **Mr. Dennis** (United States of America), **Mr. Kwon** Young Joon (Republic of Korea) and **Mr. Tirado Martí** (Spain) seconded the nomination.

16. *Mr. Labardini Flores (Mexico) was elected Vice-Chair by acclamation.*

17. *Mr. Labardini Flores (Mexico), Vice-Chair, took the Chair.*

18. **The Chair** said that the other members of the Bureau would be elected later during the session.

Agenda item 3: Adoption of the agenda (A/CN.9/859)

19. *The agenda was adopted.*

Agenda item 4: Consideration of issues in the area of security interests

(a) Finalization and adoption of a draft Model Law on Secured Transactions (A/CN.9/865, A/CN.9/871, A/CN.9/884, A/CN.9/884/Add.1, A/CN.9/884/Add.2, A/CN.9/884/Add.3, A/CN.9/884/Add.4, A/CN.9/886, A/CN.9/887 and A/CN.9/887/Add.1)

20. **The Chair** invited the Commission to consider the revised text of the draft Model Law (A/CN.9/884, A/CN.9/884/Add.1, A/CN.9/884/Add.2, A/CN.9/884/Add.3 and A/CN.9/884/Add.4), with a view to its adoption. He suggested proceeding article by article, with the Secretariat presenting any outstanding issues, after which members could make brief comments, beginning with the articles contained in document A/CN.9/884.

Article 1

21. **Mr. Bazinas** (Secretariat) said that the text in square brackets in paragraph 2 had been added to adjust the terminology of the Model Law so that it covered outright transfers of receivables, which were covered by the Model Law even though they were not secured transactions as such. Following consultations and comments from States, however, the Secretariat felt that the text could be deleted, since it referred to terminological issues, which should be left to article 2. He also suggested that paragraph 2 should be revised to refer to articles 70-80 and that the words "by agreement" should be included after the word "receivables", to clarify that the Model Law applied only to consensual security interests; in other words, to transfers of receivables by agreement and not by law.

22. **The Chair s**uggested that the square brackets in paragraph 4 should be removed.

23. **Ms. Sabo** (Canada) said that her delegation understood that paragraph 4 was intended to remain in square brackets, to account for the specific laws of the enacting State.

24. **Mr. Celarie Landaverde** (El Salvador) said he agreed that all definitions and rules of interpretation should be left to article 2, as recommended by the Secretariat, and that the text in square brackets in paragraph 2 of article 1 should therefore be deleted.

25. **The Chair** suggested that the outer square brackets around paragraph 4 should be removed, and that the inner square brackets should be retained, as they referred to the law of the enacting State.

26. **Ms. Sabo** (Canada) said that it was her delegation's understanding that both sets of square brackets in paragraph 4 should be retained, on the assumption that the text in that paragraph was related to the text in subparagraph 3 (e).

27. **Mr. Bazinas** (Secretariat) said that paragraph 4 was in square brackets because the text had not yet been finalized; nonetheless, as it reflected the policy in recommendation 6 of the UNCITRAL Legislative Guide on Secured Transactions, the square brackets could be deleted.

28. **The Chair** said he took it that the Commission wished to revise paragraph 2 to refer to articles 70-80; to include the words "by agreement" after the word "receivables"; to delete the text in square brackets; and to retain paragraph 4 outside square brackets.

29. *It was so decided.*

Article 2

30. **Mr. Bazinas** (Secretariat) said that a number of changes had been suggested with regard to the terms used in the Model Law. The square bracketed text in the definition of the term "bank account" showed different ways of referring to institutions authorized to receive deposits. The Commission might wish to adopt the term "authorized

deposit-taking institution" to cover all such institutions, which would require the fewest changes to be made to terminology used elsewhere in the Model Law in reference to bank accounts.

31. The definition of the term "competing claimant" contained the words "to be specified by the enacting State" in square brackets. However, that text could be deleted if examples of creditors were provided in the commentary, making it unnecessary for the Model Law to indicate that the matter should be referred to the enacting State, although it would still be subject to the law of the enacting State.

32. In the definition of the term "debtor of the receivable", the reference to a "transferor in an outright transfer" should be deleted; it contained a factual error, because the debtor of a receivable could never be the transferor in an outright transfer.

33. In the definition of the term "default", the text that appeared within square brackets could be revised to read "any other event that under the terms of the security agreement constitutes default", or words to that effect. The change was being suggested because it had been brought to the attention of the Secretariat that grantors and secured creditors often listed events of default in their agreements without necessarily defining the word "default". The corresponding note to the Commission should therefore also be deleted.

34. In the definition of the term "encumbered asset", the words "by agreement" should be added after the words "outright transfer", in line with the Commission's decision on article 1, paragraph 2, and the text should be retained outside square brackets. In the definition of the term "grantor", the word "and" in square brackets and the words "lessee or licensee" should be deleted. The draft Guide to Enactment of the draft Model Law on Secured Transactions could instead explain that lessees and licensees could not be grantors of security interests merely because they were transferees. Furthermore, in subparagraph (iii) the word "in" should be replaced with the word "under", and the words "by agreement" should be added after the word "receivable".

35. The definition of the term "insolvency representative" should be deleted, as it did not appear anywhere else in the Model Law. It could, however, be briefly explained in the Guide to Enactment. Other terms included in the note to the Commission could also be explained by referral to their definitions both in the *UNCITRAL Legislative Guide on Insolvency Law* and in chapter X of the *UNCITRAL Legislative Guide on Secured Transactions.*

36. With regard to the definition of the term "inventory", it had been brought to the attention of the Secretariat that the expression "work-in-process" was general enough to cover "semi-processed materials", a term that was not widely used in all jurisdictions. In that regard, the words "semi-processed materials" should be deleted and the parentheses around "work-in-process" should be taken out.

37. The Commission might wish to include a definition of the term "movable asset", as it appeared multiple times in the Model Law and defined the scope of the Model Law. It could be defined along the following lines: "'movable asset' means a tangible or intangible asset other than immovable property", with the phrase "as defined in the law of the enacting State" kept in square brackets.

38. The definition of the term "non-intermediated securities" should be aligned with the Convention on Substantive Rules for Intermediated Securities of the International Institute for the Unification of Private Law (UNIDROIT), on which it was based, in order to avoid any conflict or overlap with existing law on securities and that Convention. To that end, the words "or interests" should be added after the word "rights".

39. In the definition of the term "possession", the words "directly or indirectly" were redundant and should be deleted, along with the corresponding note to the Commission.

40. As had been suggested by States, the term "registry", which was referred to frequently in the Model Law, should be defined, possibly along the following lines: "'registry' means the registry established under article 27 of this Law".

41. In the definition of the term "secured creditor", the square brackets should be deleted and, in subparagraph (ii), the word "in" should be replaced with "under", and the words "by agreement" should be added after the word "receivable". In the definition of the term "secured obligation", the second sentence, which appeared in square brackets, could be deleted and the draft Guide to Enactment could instead explain that there was no secured obligation in an outright transfer of a receivable. However, in the definition of the term "securities", the square brackets could be retained, as the text contained a reference to the law of the enacting State determining additional rights that should qualify as securities.

42. The square brackets in the definitions of the terms "security agreement" and "security right" should be deleted and in subparagraph (ii) in both cases, the word "in" should be replaced with "under", and the words "by agreement" should be added after "receivable".

43. Lastly, in the definition of the term "tangible asset", reference should be made to subparagraph (l) instead of subparagraph (k) and, in addition, to article 31, where the term was also used.

44. **Ms. Gullifer** (United Kingdom), supported by **Mr. Deschamps** (Canada), **Mr. Kwon** Young Joon (Republic of Korea), **Mr. Whittaker** (Australia) and **Mr. Garros** (Argentina), said that the proposed reference to a "security agreement" in the definition of the term "default" might be too limiting, as the events of default in the context of secured transactions could be defined, inter alia, in a separate loan agreement. A more general reference to "the agreement" between the grantor and the secured creditor, or words to that effect, would be preferable, especially since the words in square brackets in the text as currently drafted referred only to "their agreement".

45. **Mr. Tirado Martí** (Spain), supported by **Mr. Adamov** (Belarus) and **Mr. Whittaker** (Australia), said that in the definition of the term "bank account", the term "authorized deposit-taking institution" should be retained, as opposed to "depositary institution", which was broader and could be understood to include institutions that received securities.

46. **Mr. Deschamps** (Canada), while supporting the use of the expression "authorized deposit-taking institution", said that his delegation did not object to the use of the term "depositary institution" in the definition of the term "control agreement", because it was clear from that context that the term referred to an institution authorized to receive deposits, as set out in the definition of the term "bank account".

47. **Mr. Whittaker** (Australia), supported by **Mr. Deschamps** (Canada), **Ms. Gullifer** (United Kingdom) and **Mr. Garros** (Argentina), said that there was no need to include the words "or interests" in the definition of the term "non-intermediated securities", because the UNIDROIT Convention on Substantive Rules for Intermediated Securities (Geneva Securities Convention) used the expression "rights and securities", while the Convention on the Law Applicable to Certain Rights in Respect of Securities Held with an Intermediary (Hague Securities Convention) used a different expression. In addition, that would be the only occurrence of the phrase "rights or interests" in the Model Law, thus potentially giving rise to difficulties of interpretation. Strict adherence to the wording of the Geneva Securities Convention was not essential in that context.

48. **Mr. Adamov** (Belarus) said he agreed that a definition of "movable assets" should be included in article 2, because other terms such as "tangible assets" and "intangible assets" were defined by reference to movable assets. Article 2 should logically contain a definition of the concept of "competing security rights," which was the subject of chapter V, article 28, of the Model Law.

49. **Mr. Bazinas** (Secretariat) said that article 28 dealt with the issue of priority among competing security rights. As article 2 already included definitions of the terms "priority" and "competing claimants", who were the holders of competing security rights, it was not necessary to define the concept of competing security rights in article 2. The Working Group had not followed the suggestion that a definition of the term "in writing" that included electronic records should be included in the Model Law, in line with recommendation 11 of the Secured Transactions Guide, because the relevant definition would be subject to the legislation of the enacting State.

50. **Mr. Celarie Landaverde** (El Salvador) said that, as the text in square brackets in the definition of the term "default" was intended to clarify the meaning of the term, which should be explained in greater detail in the Secured Transactions Guide, it should not be included in article 2. The definition of the term "insolvency representative" should be retained, with the clarification suggested in the corresponding note to the Commission. In addition, the terms "insolvency proceedings" and "insolvency estate" should be defined in article 2, for the reasons outlined in the same note.

51. The term "movable assets" should not be defined in article 2, to avoid possible confusion, as different enacting States defined the term in different ways in their national legislation or used different words to capture that same concept. Lastly, the inclusion of "directly or indirectly" in the definition of the term "possession" was not necessary, as the definition clearly referred to possession by the creditor, a third party or various designated persons responsible for the performance of a contract.

52. **Mr. Whittaker** (Australia) said that his delegation would support the inclusion of a definition of the term "movable assets" in the Model Law, as the term could have different meanings in various jurisdictions.

53. **Ms. Gullifer** (United Kingdom) said that the suggested change to the definition of the term "default" to refer to an agreement instead of a security agreement should state clearly that it was referring to an agreement between the grantor and the secured creditor, not just any agreement. Her delegation was in favour of including in the Model Law a definition of "in writing" to include electronic communications.

54. **Mr. Dennis** (United States of America) said that his delegation supported the proposed changes as well as the proposal to include a specific definition of the term "in writing".

55. **Mr. Wang** Yi (China) said that the definition of the term "bank account" was too narrow and did not cover all types of institutions in the banking system. Subparagraph (c) could be redrafted to include not only accounts maintained by deposit-taking institutions but also accounts to which funds could be credited or from which funds could be debited, or accounts that contained security interests.

56. **Mr. Bazinas** (Secretariat) said that the definition of a bank account in the Model Law was based on the one given in the Secured Transactions Guide and was broad enough to encompass all types of institutions in the banking system. The use of the term "authorized deposit-taking institution" did not mean that all accounts in such an institution were deposit accounts. The specific definition of the terms "bank" and "bank account" in each country would be left to the enacting State.

57. **Mr. Garro** (Argentina) said that, given the differing views concerning the definition of the term "movable asset", it would be prudent to define it in a manner that specifically excluded immovable assets. In the definition of the term "non-intermediated securities", the word "rights" was already sufficiently broad to include the concept of interests, and was used in such contexts in other UNCITRAL documents, including model laws. It was therefore unnecessary to add the words "or interests".

58. **Mr. Kwon** Young Joon (Republic of Korea) said that his delegation supported the suggestion by the Secretariat to delete the definition of the term "insolvency representative", since that term did not appear anywhere else in the Model Law and the concept might already be defined in the insolvency laws of an enacting State.

59. **Mr. Tirado Martí** (Spain) said that his delegation also supported the suggestion to delete the definition of "insolvency representative" and would resist any effort to define the term "insolvency proceedings", as that would be an exceedingly complicated and time-consuming exercise.

60. **Mr. Morse** (Commercial Finance Association) said that the Commission should strive to avoid any overlap between the Model Law and the Geneva Securities Convention in its definition of the term "non-intermediated

securities", as the scope of the Model Law differed from that of the Convention.

61. **Mr. Medina Mejías** (Bolivarian Republic of Venezuela) said that the term used to refer to security rights throughout article 2 of the Spanish translation of the Model Law, "garantía real", was problematic, since in his country that term applied only to immovable assets. He therefore proposed that it should be replaced with the term "garantía mobiliaria", which specifically referred to security rights in movable assets.

62. **Mr. Tirado Martí** (Spain) said that the term "garantía real" could refer to either immovable or movable assets. While it was not strictly necessary to distinguish between the two in the context of article 2, which referred to security rights in movable assets only, his delegation would not object to the use of the term "garantía real mobiliaria".

63. **The Chair**, after suggesting that any proposed translation changes should be submitted to the Secretariat, said he took it that the Commission agreed that in article 2, the amendments proposed by the Secretariat to the definition of the terms "debtor of the receivable", "encumbered asset", "grantor", "inventory", "secured creditor", "secured obligation", "security agreement" and "tangible asset" should be retained, and that the definition of the term "insolvency representative" and the corresponding note to the Commission should be deleted. Definitions of the terms "movable assets" and "registry" would be added to the article. The phrasing to be used in the definition of the term "bank account" would be "an authorized deposit-taking institution"; and subparagraph (i) in the definition of the term "debtor of the receivable" would remain, while subparagraph (ii) would be deleted.

64. Furthermore, in the definition of the term "default", the bracketed text would remain outside square brackets and would read "and any other event that, under the terms of the agreement between the grantor and the secured creditor, constitutes default"; the corresponding note to the Commission would also be removed. Regarding the definition of "grantor", subparagraph (iii) would read "A transferor under an outright transfer of a receivable by agreement". The definition of the term "inventory" would be amended to read "'Inventory' means tangible assets held by the grantor for sale or lease in the ordinary course of the grantor's business, including raw materials and work-in-process". The phrase "or interests" would not be included in the definition of the term "non-intermediated securities", and the bracketed phrase "directly or indirectly" in the definition of the term "possession", as well as the corresponding note to the Commission, would be deleted. Lastly, in the definition of the term "secured creditor", subparagraph (ii) would be amended to read "A transferee under an outright transfer of a receivable by agreement", and the square brackets would be removed. The Commission had also agreed to include a definition of the term "in writing" in article 2.

65. *It was so decided.*

Article 3

66. **Mr. Bazinas** (Secretariat) said that no comments had been received on article 3, and therefore no changes to the article had been suggested.

67. **Mr. Dennis** (United States of America) said that his delegation had made a proposal regarding alternate dispute settlement procedures (A/CN.9/886, paragraph 27), which differed from the proposal made by El Salvador (A/CN.9/887, paragraph 67). He therefore suggested that a group of friends of the Chair should be given more time to consult in an effort to resolve the differences between the two proposals.

68. **Mr. Medina Mejías** (Bolivarian Republic of Venezuela) said that his delegation supported the proposal and would like to participate in the consultations.

69. **The Chair** said he took it that the Commission agreed to retain article 3 as proposed, pending the outcome of the work of the group of friends of the Chair.

70. *It was so decided.*

The meeting rose at 1 p.m.

Finalization and adoption of a draft Model Law on Secured Transactions
(*continued*)

Summary record of the 1025th meeting, held at Headquarters, New York, on Monday, 27 June 2016, at 3 p.m.

[A/CN.9/SR.1025]

Chairperson: Mr. Labardini Flores (Vice-Chair) (Mexico)

Contents

In the absence of Mr. Kenfack Douajni (Cameroon), Mr. Labardini Flores (Mexico), Vice-Chair, took the Chair.

The meeting was called to order at 3.05 p.m.

Agenda item 4: Consideration of issues in the area of security interests (*continued*)

(a) Finalization and adoption of a draft Model Law on Secured Transactions (*continued*)
(A/CN.9/865, A/CN.9/871, A/CN.9/884, A/CN.9/884/Add.1, A/CN.9/884/Add.2, A/CN.9/884/Add.3, A/CN.9/884/Add.4, A/CN.9/886, A/CN.9/887 and A/CN.9/887/Add.1)

1. **The Chair**, drawing attention to document A/CN.9/884, invited the Commission to continue its article-by-article consideration of the draft Model Law.

Article 4

2. *Article 4 was approved.*

Article 5

3. **Mr. Tosato** (Italy) said that the word "observance" in paragraph 1 should be deleted and the paragraph should simply indicate that regard was to be had to good faith in the interpretation of the Model Law. That would replicate the language used in other Commission texts.

4. **Mr. Sono** (Japan) said that paragraph 1 was modelled on article 7, paragraph 1, of the United Nations Convention on Contracts for the International Sale of Goods and other UNCITRAL texts and should therefore be retained as it stood.

5. **The Chair** said he took it that the Commission wished to approve article 5 as currently drafted.

6. *It was so decided.*

7. **Mr. Bazinas** (Secretariat), drawing attention to the title of chapter II, section A, said that one State had noted that throughout the Model Law the general rules should be subject to the asset-specific rules. In fact, the Model Law was structured in such a way that the general rules were by definition subject to the asset-specific rules. However, to make that point absolutely clear within the text, the Commission might wish to add a footnote to the title, along the following lines: "In this chapter and all other chapters, the general rules are subject to the asset-specific rules. The enacting State may wish to include in its law a provision reflecting this principle or otherwise address the relationship between general and asset-specific provisions".

8. **The Chair** said he took it that the Commission wished to add the proposed footnote to the title of chapter II, section A.

9. *It was so decided.*

Article 6

10. **Mr. Bazinas** (Secretariat) said that, in line with the comments of one State, it was suggested that the title of the article should be changed to "Creation of a security right and requirements for a security agreement" so as to better reflect the article's content. In addition, if the Commission decided to refer to secured obligations in article 9, it might be appropriate to refer to that article in paragraph 3 (b) of article 6. The square brackets in paragraph 3 were intended to remain in the text of the Model Law because they indicated options to be chosen by the enacting State, as explained in footnotes 3 and 4.

11. **The Chair** said he took it that the Commission wished to accept those suggestions.

12. *It was so decided.*

Article 7

13. **Mr. Bazinas** (Secretariat) said that one State had proposed that the opening phrase of the article should be amended to read "A security right may secure one or more obligations of any type", so as to make it clear that more than one obligation might be secured.

14. **The Chair** said he took it that the Commission wished to accept that proposal.

15. *It was so decided.*

Article 8

16. **Mr. Bazinas** (Secretariat) said that one State had proposed that the words "including future assets" in subparagraph (a) should be deleted because future assets were not a "type" of movable asset and because article 6,

paragraph 2, already addressed the security rights that could be created in future assets in a comprehensive manner.

17. **The Chair** said he took it that the Commission wished to accept that proposal.

18. *It was so decided.*

Article 9

19. **Mr. Bazinas** (Secretariat) said it had been suggested that the words "assets encumbered or to be encumbered" in paragraph 1 should be replaced with the words "encumbered assets" and that a reference to secured obligations should be added to that paragraph. Furthermore, a third paragraph should be added to the article along the following lines: "A description of secured obligations that indicates that the security right secures all obligations owed to the secured creditor at any time satisfies the standard in paragraph 1".

20. **Mr. Kwon** Young Joon (Republic of Korea) said that, if those changes were made, a reference to secured obligations would need to be added to the title of the article and the words "as provided in article 9" to article 6, paragraph 3 (b).

21. **Mr. Foëx** (Switzerland) asked whether the broad description of secured obligations in the proposed new paragraph 3 also covered obligations acquired by a secured creditor from third parties.

22. **Mr. Bazinas** (Secretariat), drawing attention to the definitions of the terms "secured obligation", "security right" and "grantor" in article 2 of the Model Law, said that a secured obligation could be that of the grantor or that of another person.

23. **The Chair** said he took it that the Commission wished to approve article 9 with the proposed amendments and to make the consequent change to article 6, paragraph 3 (b).

24. *It was so decided.*

Article 10

25. **Mr. Bazinas** (Secretariat) said that, on the basis of comments received from one State, it was suggested that paragraph 2 (a) should be amended to read along the following lines: "The security right extends to the commingled money or funds, notwithstanding that they have ceased to be identifiable". Paragraph 2 (b) should be amended to read along the following lines: "The security right in the commingled money or funds is limited to the amount of the money or funds immediately before they were commingled". Lastly, paragraph 2 (c) should be amended to read "If at any time after the commingling, the amount of the commingled money or funds is less than the amount of the money or funds immediately before they were commingled, the security right in the commingled money or funds is limited to the lowest amount between the time when the money or funds were commingled and the time when the security right is claimed".

26. **Ms. Gullifer** (United Kingdom) said that a more accurate wording for the title of the article would be "Right to proceeds taking the form of commingled funds".

27. **Mr. Bazinas** (Secretariat), noting that the title of the article reflected the conclusions of the Working Group, said that the right to proceeds and the right to commingled funds were two separate issues, covered by paragraphs 1 and 2 of the article respectively. In the title of the article, the word "funds" was considered to include money; however, the word "money" could be added if the Commission so wished.

28. **Mr. Kwon** Young Joon (Republic of Korea) said that, for the sake of consistency with the body of the article, it would be preferable to refer to commingled money and funds in the title.

29. **Mr. Riffard** (France) said that, unless the article was to be divided into two separate articles, one containing the text of paragraph 1 and the other containing the text of paragraph 2 — a change which his delegation considered unnecessary — the current title should be retained. The addition of a reference to money would make the text even more dense than it already was.

30. **Ms. Gullifer** (United Kingdom), supported by **Mr. Riffard** (France), noted that paragraph 2 of the article dealt only with proceeds in the form of money or funds. There was therefore no provision for initial encumbered assets in the form of money or funds.

31. **Ms. Walsh** (Canada) said she agreed that the rule set out in paragraph 2 did not cover commingled money and funds exhaustively. It was her delegation's understanding that if a person had a security right in money or funds credited to a bank account as an initial encumbered asset, paragraph 2 did not apply, as the text was intended to address commingled money or funds only where they were proceeds of some other asset, without creating a rule for other commingled money or funds.

32. **Mr. Cohen** (United States of America) said that money as original collateral should be covered by the article.

33. **Mr. Bazinas** (Secretariat) noted that the *UNCITRAL Legislative Guide on Secured Transactions* and the draft Model Law had been the subject of lengthy consideration by the Commission and the Working Group respectively. Paragraphs 1 and 2 of the article reflected recommendations 19 and 20 of the Guide, which related, respectively, to continuation of a security right in proceeds and to commingled proceeds. Where money or funds were original encumbered assets, article 9 of the Model Law covered the way in which they should be described and the question of whether there was a security right in them. He hoped that the Commission would not be too quick to change provisions that represented the fruit of many years' work.

34. **Mr. Weise** (American Bar Association) said that the gap identified was a small one; situations where original collateral was commingled with other assets of the same kind could arise, but were relatively infrequent. The Commission might therefore conclude that the gap was permissible. If not, the logical approach would be for original collateral to be covered by a provision analogous to paragraph 2.

35. **Mr. Jin** Saibo (China) said he agreed that, since the transactions in question were infrequent, it might not be necessary to address the gap.

36. **Mr. Riffard** (France) said that, if the gap was to be addressed, a new article on money commingled in a mass would be needed. However, as suggested by previous speakers, it might be acceptable not to address the gap at all. The courts of individual countries would thus be responsible for dealing with the rare cases that arose.

37. **Ms. Gullifer** (United Kingdom) said that a possible solution would be to change the word "proceeds" in the chapeau of paragraph 2 to "encumbered assets or proceeds".

38. **Ms. Walsh** (Canada) said that her delegation supported that suggestion. Perhaps the Commission could return to it once delegations had had an opportunity to consult on it.

39. **The Chair** said that it might be preferable to address the gap in the draft Guide to Enactment of the draft Model Law on Secured Transactions rather than in the text of the Model Law itself. He took it that the Commission wished to approve the amendments to article 10 outlined by the Secretariat; to retain the title of the article unchanged; and to consult further on the amendment proposed by the representative of the United Kingdom.

40. *It was so decided.*

Article 11

41. **Mr. Bazinas** (Secretariat) said that one State had proposed that, since the word "asset" was used in the singular in paragraph 1, the word "assets" in option A, paragraph 2, and option B, paragraph 3, should be changed to "asset". The word "they" in both paragraphs should consequently be changed to "it".

42. **Mr. Riffard** (France) said that his delegation was in favour of adding the proposed new option C to the article (A/CN.9/886, paragraph 36). The section on the article in the Guide to Enactment would require significant elaboration, with practical numerical examples, so as to help legislators choose from among options A, B and C.

43. **Mr. Cohen** (United States of America), supported by **Ms. Walsh** (Canada), said that paragraph [3][4.] should be deleted, since the issue it addressed was dealt with more comprehensively in article 31. Regarding options A and B, it would be preferable not to have different options in the final text of the article; moreover, neither option was adequate as it currently stood. The rule set out in option A would be difficult to administer because the objects in a mass were unlikely to have been valued at the precise moment of commingling. The cap should be based on quantity rather than on value, since parties typically knew how many objects they had a security right in. Option B, paragraph 2, which currently referred only to a mass, appeared to provide the best rule for products too. A group of friends of the Chair should be convened to discuss those issues.

44. **Mr. Tosato** (Italy) said he agreed with the representative of France that, irrespective of the outcome of the current discussion, the Guide to Enactment should contain examples illustrating how options A, B and C, if retained, would work.

45. **Mr. Medina Mejías** (Bolivarian Republic of Venezuela) said he agreed that paragraph [3][4.] of the article should be deleted, and that the cap referred to in paragraph 2, under both option A and option B, should be based on the quantity of assets commingled in a mass rather than their value. The principle that applied to assets commingled in a mass under option B, paragraph 2, should also apply to assets commingled in a product under option B, paragraph 3.

46. **The Chair** said he took it that the Commission wished to resume consideration of article 11 once the outstanding issues had been discussed by a group of friends of the Chair.

47. *It was so decided.*

Article 12

48. **Mr. Bazinas** (Secretariat) said that, on the basis of comments received from one State, it was suggested that the article should be amended to read along the following lines: "A security right is extinguished when all secured obligations have been discharged and there are no outstanding commitments to extend credit secured by the security right". That reflected the policy approved by the Working Group.

49. **Mr. Weise** (American Bar Association) suggested that the words "no outstanding commitments" should be changed to "no outstanding commitments by the secured creditor".

50. **Mr. Whittaker** (Australia) said that care must be taken not to exclude security trusts, in which a security was held by one person for the benefit of other lenders.

51. **Ms. Walsh** (Canada) said that the wording suggested by the Secretariat was sufficiently clear and did not need to be changed.

52. **The Chair** said he took it that the Commission wished to amend article 12 along the lines suggested by the Secretariat.

53. *It was so decided.*

Article 13

54. **Mr. Bazinas** (Secretariat) said it was suggested that the phrase "as between the grantor and the secured creditor and as against the debtor of the receivable" should be deleted from paragraph 1, since it was clear without those words that the effectiveness of a security right in a receivable was limited to the parties to the transaction. Furthermore, that change would make the paragraph more consistent with article 9, paragraph 1, of the United Nations Convention on the Assignment of Receivables in International Trade, on which it was based.

55. Some States had expressed concern that the meaning of the term "subsequent secured creditor" in paragraph 1 was unclear. It was therefore suggested that a definition of the term "subsequent security right" should be added to article 2, drawing on the language relating to the term "subsequent assignment" in article 2 of the Convention, to read along the following lines: "'Subsequent security right' means a security right created by the initial or any other secured creditor".

56. **Ms. Walsh** (Canada) asked how such a definition would help clarify article 13, paragraph 1, since the term "subsequent security right" was not used there.

57. **Mr. Bazinas** (Secretariat) said that it would be obvious that a subsequent secured creditor was a holder of a subsequent security right, on the basis that a secured creditor was a holder of a security right. The point could also be explained in the Guide to Enactment if necessary. Furthermore, the proposed definition would have the added benefit of clarifying articles 60 and 61, where the term "subsequent security right" was used.

58. **Ms. Gullifer** (United Kingdom) said that it would not be obvious to the reader that a subsequent secured creditor was a holder of a subsequent security right; the term could be interpreted to mean a second secured creditor, particularly since the word "subsequent" was used with that meaning in the phrase "the initial or any subsequent grantor" earlier in the same paragraph. It was not satisfactory for the understanding of the term "subsequent secured creditor" to be dependent on the definition of another term that did not itself appear in the article in question. Perhaps the problem could be resolved by including a definition of the term "subsequent secured creditor" in the Model Law, provided that that term was not used in any other context in the text.

59. **Mr. Deschamps** (Canada) said that the current formulation of paragraph 1 had been included in the Model Law for years without raising issues; nonetheless, his delegation could agree to the deletion of the phrase referred to by the Secretariat. There was no need to add a definition of "subsequent security right" to article 2; the issue could be resolved by deleting the word "subsequent" from the phrase "subsequent secured creditor" so that the text referred simply to "any secured creditor".

60. **Ms. Gullifer** (United Kingdom) and **Mr. Whittaker** (Australia) expressed support for that proposal.

61. **Mr. Cohen** (United States of America) said that both paragraph 2 and paragraph 3 provided some protection for third parties in the event of a breach of an anti-assignment clause. However, paragraph 3 could be interpreted as limiting the protection provided to secured creditors under paragraph 2. He therefore proposed that a phrase should be added to the beginning of paragraph 3 along the following lines: "Without limiting in any way the protection provided to secured creditors in paragraph 2".

62. **Ms. Walsh** (Canada) said that, while she understood the concern raised by the previous speaker, the proposed amendment would make the text unnecessarily complex.

63. **Mr. Brink** (Factors Chain International and European Union Federation for the Factoring and Commercial Finance Industry) said that the language in paragraphs 2 and 3 was based on the equivalent provisions of the United Nations Convention on the Assignment of Receivables in International Trade. He cautioned against any changes that might lead to conflicting interpretations.

64. **Mr. Dennis** (United States of America) said that, in order to be fully consistent with article 10, paragraph 3, of the Convention and to avoid any potential ambiguity, paragraphs 2 and 3 of article 13 of the Model Law should be merged into a single paragraph.

65. **Ms. Walsh** (Canada) said that her delegation did not mind whether paragraphs 2 and 3 remained separate or were merged into a single paragraph, provided that the language was consistent with the relevant provisions of the Convention.

66. **The Chair** said he took it that the Commission wished to delete the words "as between the grantor and the secured creditor and as against the debtor of the receivable" in paragraph 1; to change the phrase "any subsequent secured creditor" in paragraph 1 to "any secured creditor"; and to merge paragraphs 2 and 3.

67. *It was so decided.*

Article 14

68. **Mr. Bazinas** (Secretariat) said that one State had suggested that the words "under the law governing it" should be inserted after the word "transferable" in paragraph 2, for the sake of consistency with article 10, paragraph 1, of the United Nations Convention on the Assignment of Receivables in International Trade. That change would make it clear that nothing in the Model Law affected whether a supporting right was transferable with or without a new act of transfer.

69. **Mr. Kwon** Young Joon (Republic of Korea) said that the two paragraphs of the article should be combined in order to follow the structure of the Convention, since that had been the approach taken to article 13.

70. **Ms. Walsh** (Canada) said that, where articles of the Model Law corresponded to articles of the Convention, their structure should be brought into line with the Convention, unless there was a good reason not to do so.

71. **The Chair** said he took it that the Commission wished to add the words proposed by the Secretariat and to merge the two paragraphs of the article into one.

72. *It was so decided.*

Articles 15-17

73. *Articles 15-17 were approved.*

Article 18

74. **Mr. Bazinas** (Secretariat) said that, since the Commission had decided to add a definition of the term "registry" to article 2, the phrase "general security rights registry (the 'Registry')" in paragraph 1 could be replaced with the word "Registry". The footnote in article 18 should be moved to article 2 and reworded to state simply that, if a State adopted a secured transactions law and registry-related provisions in a single law, it would need to include a definition of the term "registry" only once in that law. If two separate laws were adopted, the definition would have to be included in both.

75. **The Chair** said he took it that the Commission wished to accept those suggestions.

76. *It was so decided.*

Article 19

77. **Mr. Bazinas** (Secretariat) said that one State had noted that paragraph 2 of the article referred to "identifiable proceeds", while paragraph 1 simply mentioned "proceeds". For the sake of clarity and consistency, it was suggested that the word "identifiable" should be deleted from paragraph 2 and that both paragraphs 1 and 2 should be amended to refer to a security right in proceeds arising under article 10.

78. **The Chair** said he took it that the Commission wished to accept those suggestions.

79. *It was so decided.*

80. **Mr. Bazinas** (Secretariat), drawing attention to the note to the Commission under article 19, said that the Commission might wish to insert a new article, which could be referred to as 19 bis, on the third-party effectiveness of a security right in tangible assets commingled in a mass or product, in line with recommendation 44 of the *UNCITRAL Legislative Guide on Secured Transactions*. The title of such a new article could be "Tangible assets commingled in a mass or product" and the body of the article could read along the following lines: "If a security right in a tangible asset is effective against third parties, a security right in a mass or product to which the security right extends under article 11 is effective against third parties without any further act".

81. **Ms. Gullifer** (United Kingdom) said that both article 19 and the proposed article 19 bis dealt only with proceeds, not original encumbered assets. Therefore, if article 10, paragraph 2, was amended to refer to both original encumbered assets and proceeds, as she had proposed, there would be a lacuna in articles 19 and 19 bis. That might constitute a reason not to amend article 10.

82. **Ms. Walsh** (Canada), expressing agreement with the previous speaker, said that the lacuna could not be resolved by a simple drafting change.

83. **The Chair** said that, in the absence of specific proposed wording to address the lacuna identified, he took it that the Commission wished to approve a new article 19 bis as proposed by the Secretariat and that, for the sake of consistency, the words "encumbered assets or" should not be added to article 10, paragraph 2.

84. *It was so decided.*

Articles 20 and 21

85. *Articles 20 and 21 were approved.*

Article 22

86. **Mr. Bazinas** (Secretariat) said that one State had proposed that the phrase "as a result of a change in the location of the encumbered asset or the grantor, whichever determines the applicable law under the provisions of chapter VIII" should be deleted from the chapeau of paragraph 1, since there were other circumstances that could also result in a change of the applicable law. Another State had proposed that the remainder of the chapeau should be amended to read along the following lines: "The security right remains effective against third parties under this Law if it is made effective against third parties in accordance with this Law before the earlier of…". Lastly, paragraph 1 (b) could be amended to read "The expiry of [a short period of time to be specified by the enacting State] after this law becomes applicable".

87. **The Chair** said he took it that the Commission wished to accept those proposals.

88. *It was so decided.*

Article 23

89. **Mr. Bazinas** (Secretariat) said that, on the basis of a proposal made by one State, it was suggested that option B should be made clearer by replacing the phrase "[below a value to be specified by the enacting State]" with wording along the following lines: "with an acquisition price below [an amount to be specified by the enacting State]".

90. **Ms. Walsh** (Canada) said that her delegation supported that suggestion. Since the only intended difference between option A and option B was that, under the latter, automatic third-party effectiveness applied only to goods below a certain acquisition price, she proposed that option B should be amended to incorporate the special protection for buyers provided for in option A by inserting the words "other than a buyer or other transferee, lessee or licensee" after the words "effective against third parties".

91. **Mr. Weise** (American Bar Association) said he agreed that the same set of persons should be protected under options A and B. However, the Commission might wish to consider moving those provisions to chapter V, on priority of a security right.

92. **Mr. Bazinas** (Secretariat), noting that options A and B had both been adopted by the Working Group, said that option B was inconsistent with recommendation 179 of the Secured Transactions Guide, since the recommendation did not mention any value-based limitations on automatic third-party effectiveness. The Commission might therefore wish to consider whether to retain both options.

93. **Mr. Dennis** (United States of America) said he agreed that chapter V was a more appropriate place for the provisions in question and that the Commission should opt to retain either option A or option B, not both.

94. **Ms. Walsh** (Canada) said that the Working Group had decided to add option B because some members had felt that option A went too far in that it took no account of the value of the goods in question. The Commission should not reverse that decision by eliminating option B.

95. Her delegation was not averse to addressing the issue of special protection for buyers in chapter V, but the phrase "other than a buyer or other transferee, lessee or licensee" should nonetheless be retained in options A and B of article 23, as it indicated to readers that they should consult the general rules, not the asset-specific rules, on the question of third-party effectiveness against buyers, transferees, lessees and licensees.

96. **Mr. Kwon** Young Joon (Republic of Korea) said he agreed that option B should be retained, as some enacting States would need to restrict the scope of automatic third-party effectiveness. Option B was not inconsistent with

recommendation 179, as it did not deny automatic effectiveness but simply qualified it.

97. **Mr. Riffard** (France) said that the article was based on the application of a cost-benefit ratio. The nature and usual value of the vast majority of consumer goods did not justify an obligation for the creditor to register a notice in the Registry, or for third parties to consult the Registry. His delegation was therefore in favour of retaining option A and would not object to the elimination of option B. If option B was retained, the Guide to Enactment should make it clear that the threshold value should be high enough to allow only rare exceptions to the general rule of automatic third-party effectiveness. Otherwise, option B could undermine the very principle that the article aimed to establish.

98. **Mr. Whittaker** (Australia) said that option B should be retained. Having two options should not be seen as a sign of indecision on the part of the Commission but rather as a means of enabling enacting States to choose the option that was most appropriate for their domestic circumstances.

99. His delegation would prefer the exception for buyers and other transferees, lessees and licensees to be dealt with as a priority rule, rather than as a qualification of effectiveness against third parties in article 23, so as to avoid creating confusion about the general rule that security rights were effective against third parties.

100. **Mr. Garro** (Argentina) said that the reference to the lessee or licensee should be removed from option A. Option B should be retained, as it did not conflict with the principle of automatic effectiveness of acquisition security rights in consumer goods but simply gave enacting States discretion to determine the value of the goods to which it should apply. While the option was in some ways inconsistent with recommendation 179 of the Secured Transactions Guide, it did not negate it, since the underlying principle was the same. The Guide to Enactment should clearly set out the reasons for the inclusion of the option.

101. **Ms. Walsh** (Canada) said that if a priority rule were to replace the reference to buyers, transferees, lessees and licensees in article 23, it would presumably have to indicate that an acquisition security right in consumer goods was not effective against a buyer or other transferee, lessee or licensee unless it had been made effective against third parties in accordance with the general rule. Thus, the priority rule would simply lead back to the third-party effectiveness rule. Her delegation could not, therefore, support the deletion of the reference to buyers and other transferees, lessees or licensees from article 23 without having an opportunity to see the proposed wording of the priority rule intended to replace it.

102. **Mr. Tirado Martí** (Spain) said that option B should be retained and that option A should be deleted, since its provisions were covered by option B. He agreed that it should be made clear to legislators that the value specified in option B should be high.

103. **Mr. Cohen** (United States of America) said he agreed that, if the rule protecting buyers and other transferees, lessees or licensees was placed in article 23, it would create confusion about the general rule of effectiveness of security rights against third parties. While acknowledging the concerns expressed by the representative of Canada, his delegation was confident that appropriate language could be found for a priority rule. Such a rule might simply indicate that a buyer or other transferee, lessee or licensee acquired its rights free of a security right made effective against third parties solely under article 23. That would make it clear that if the only way the security right was effective against third parties was under article 23 — so-called automatic effectiveness — then the protected parties would prevail. Since the difference of opinion was partly a matter of drafting, perhaps a solution could be sought by a group of friends of the Chair in order to save time.

104. **Mr. Weise** (American Bar Association), expressing agreement with the previous speaker, said that he was confident that the Secretariat could draft an appropriate rule.

105. **Mr. Bazinas** (Secretariat), drawing attention to the note to the Commission under article 23, said that the note referred to option A but raised an issue that would still need to be addressed if the Commission decided to delete option A and add the phrase “other than a buyer or other transferee, lessee or licensee” to option B. Where there was a buyer, lessee or licensee, value was implied; that was in line with the Secured Transactions Guide, which explained that someone who received goods as a gift — a donee — would not be a transferee in the ordinary course of business. On that basis, the exception in article 23 should not apply to transferees; it should be limited to buyers, lessees and licensees.

106. **Ms. Walsh** (Canada) requested an explanation of the reference to the ordinary course of business, since the rule in question did not relate to buyers in the ordinary course of business.

107. **Mr. Bazinas** (Secretariat) said that the proposed reference to a buyer or other transferee, lessee or licensee in article 23 was based on language in other parts of the Model Law, such as article 32, which referred to buyers or other transferees, licensees or lessees in the ordinary course of business. In article 32, it was clear that no gift was involved, whereas in article 23, that point was not clear, as there was no reference to the ordinary course of business. It was therefore not clear that the transferee referred to would not be a donee. For that reason, the Commission might wish to omit the words “or other transferee” in article 23. Alternatively, the term “transferee for value” could be used.

108. **Mr. Whittaker** (Australia) said he agreed that article 32 referred to transferees only in situations where the secured creditor was consenting to the transfer; it was therefore irrelevant whether or not there was value in such a transaction. Value was implicit, however, in the terms “buyer”, “lessee” and “licensee”. Perhaps the best solution would be to omit the words “or other transferee” in article 23.

109. **Mr. Weise** (American Bar Association), expressing agreement with the previous speaker, said that the policy question for the Commission was whether donees should be protected when an acquisition security right in consumer goods was made effective by third parties “automatically” under article 23.

110. **Mr. Tosato** (Italy) asked what was meant by the word "licensee" in the context of consumer goods.

111. **The Chair** said that a buyer of a laptop, for example, would be buying not only the physical object but also a licence for the software installed on the machine. Perhaps that point should be made clearer in the text.

112. He took it that the Commission wished to delete option A in article 23 and to retain option B, amending it to read along the following lines: "An acquisition security right in consumer goods with an acquisition price below [an amount to be specified by the enacting State] is effective against third parties other than a buyer, lessee or licensee upon its creation without any further act". In the Guide to Enactment, legislators would be encouraged to specify a reasonably high price in the cases in question. He also took it that delegations would consult in order to draft a new priority rule for inclusion in chapter V of the Model Law.

113. *It was so decided.*

Article 24

114. *Article 24 was approved.*

Article 25

115. **Mr. Bazinas** (Secretariat) said that, on the basis of comments made by one State, it was suggested that the phrase "or the asset covered by the document" should be added after the words "after the document" in paragraph 3 in order to cover situations in which a secured creditor delivered not the document but the assets themselves. If that change was made, the words "covered by the document" at the end of the paragraph could be deleted. The Commission might also wish to consider whether to delete the words "ultimate sale or exchange, loading or unloading, or otherwise" near the end of the paragraph; the Guide to Enactment could explain that the phrase "dealing with the assets" covered all those operations. Lastly, for the sake of consistency with the rest of the article, the Commission might wish to change the word "assets" to "asset".

116. **Mr. Medina Mejías** (Bolivarian Republic of Venezuela) said that, if the words "ultimate sale or exchange, loading or unloading, or otherwise" were deleted, a footnote should be added to explain that those were the kinds of operations covered by the phrase "dealing with the asset", so as to avoid any confusion about the meaning of the provision.

117. **The Chair** said that a footnote might not be the appropriate place for such a clarification. As suggested by the Secretariat, an explanation could be provided in the Guide to Enactment.

118. He took it that the Commission wished to approve article 25 with the amendments suggested by the Secretariat.

119. *It was so decided.*

Article 26

120. *Article 26 was approved.*

Article 27

121. **The Chair** drew attention to document A/CN.9/884/Add.1, which contained article 27 relating to the establishment of a registry for the registration of notices with respect to security rights, including draft Model Registry-related Provisions.

122. **Mr. Bazinas** (Secretariat) said that, since the Commission had agreed to add a definition of the word "registry" to article 2 of the Model Law, the title of article 27 could be changed to "Establishment of the Registry".

123. **The Chair** said he took it that the Commission wished to accept that suggestion.

124. *It was so decided.*

125. **The Chair** invited the Commission to consider the Model Registry-related Provisions article by article. He recalled that the substance of the text had already been approved by the Commission the previous year.

126. **Mr. Bazinas** (Secretariat) said that the Commission might wish to consider changing the title of the Provisions to "Model Registry Provisions".

127. **The Chair** said he took it that the Commission wished to accept that suggestion.

128. *It was so decided.*

Article 1

129. **Mr. Bazinas** (Secretariat) said that the definition of the term "registered notice" in subparagraph (g) had been placed in square brackets because the Working Group had not reached agreement on whether it should be included. As the term was used several times in the draft Provisions, the Commission might wish to retain the definition and remove the square brackets from subparagraph (g) and from the letters identifying the subsequent subparagraphs.

130. **The Chair** said he took it that the Commission wished to accept that suggestion.

131. *It was so decided.*

Articles 2-4

132. *Articles 2-4 were approved.*

Article 5

133. **Mr. Bazinas** (Secretariat), drawing attention to the note to the Commission under the article, which suggested the addition of a new paragraph (3 bis) stating that the Registry could not refuse access to registry services if a person complied with the requirements of paragraphs 1 and 2, said that one State had proposed that the requirements of paragraph 3 should also be mentioned. That State had also proposed that the phrase "If access is refused" in paragraph 4 should be amended to read "If access to registry services is refused". Lastly, the Commission might wish to consider whether secure access requirements, such as a user code or identification number, should be mentioned in paragraph 1. At its previous session, the Commission had

decided that that matter could be addressed in the Guide to Enactment.

134. **Ms. Gullifer** (United Kingdom), noting that, under paragraph 2, a person submitting an amendment or cancellation notice had to satisfy the secure access requirements specified by the Registry, said that, if a paragraph 3 bis was added to the article, a similar reference to secure access requirements would need to be added to paragraph 1. Otherwise a registry would not be able to refuse access to a person submitting an initial notice who did not meet those requirements. Paragraph 1 (b) was not necessarily sufficient to cover such requirements in the case of an electronic registry. One solution would be to include a generic reference to secure access requirements in paragraph 1; alternatively, the Guide to Enactment could state that paragraph 1 (b) covered such requirements and provide further information as to their precise nature. It was important to address the issue because, in the future, registry services in enacting States were likely to include fully electronic registers.

135. **Ms. Walsh** (Canada), having expressed agreement with the previous speaker, said that the word "also" in paragraph 2 could suggest that the secure access requirements referred to in that paragraph were an alternative to the requirements of paragraph 1. Her delegation therefore proposed that the principle set out in paragraph 2 should instead be placed in a new subparagraph 1 (d). It would also be prudent to state explicitly what the secure access requirements were.

136. **Mr. Bazinas** (Secretariat) said that, as far as he recalled, the *UNCITRAL Guide on the Implementation of a Security Rights Registry* did not state that secure access requirements had to be met because that would constitute an undue restriction on public access to registry services.

137. **Mr. Tirado Martí** (Spain) said that the proposed paragraph 3 bis should not be included unless a reference to secure access requirements was added to paragraph 1.

138. **Ms. Walsh** (Canada) said she agreed that no restrictions should be placed on access for the registration of initial notices. Secure access was not a precondition for initial registration; it was assigned as part of the process of initial registration and then had to be used in order to register any subsequent amendment or cancellation notice.

139. **Mr. Dennis** (United States of America) said that his delegation agreed with the comments made by the representative of the United Kingdom regarding paragraph 1. Paragraph 2 should be retained, but a reference to additional access requirements for amendments or cancellations should be added.

140. **Mr. Kwon** Young Joon (Republic of Korea) said that his delegation wished to retain paragraph 1 as it stood. The question of secure access requirements could be addressed in the Guide to Enactment in relation to paragraph 1 (b).

141. **The Chair** said he took it that the Commission wished to continue consideration of article 5 at its next meeting.

142. *It was so decided.*

The meeting rose at 6.05 p.m.

Finalization and adoption of a draft Model Law on Secured Transactions
(*continued*)

Summary record of the 1026th meeting, held at Headquarters, New York, on Tuesday, 28 June 2016, at 10 a.m.

[A/CN.9/SR.1026]

Chairperson: Mr. Labardini Flores (Vice-Chair) (Mexico)

Contents

In the absence of Mr. Kenfack Douajni (Cameroon), Mr. Labardini Flores (Mexico), Vice-Chair, took the Chair.

The meeting was called to order at 10.05 a.m.

Agenda item 4: Consideration of issues in the area of security interests (*continued*)

(a) Finalization and adoption of a draft Model Law on Secured Transactions (*continued*) (A/CN.9/884, A/CN.9/884/Add.1, A/CN.9/884/Add.2, A/CN9/886, A/CN.9/887 and A/CN.9/887/Add.1, A/CN.9/XLIX/CRP.5)

1. **The Chair** drew attention to article 27 of the draft Model Law (A/CN.9/884/Add.1), relating to the establishment of a registry for the registration of notices with respect to security rights, including draft Model Registry-related Provisions. He invited the Commission to resume its consideration of those Provisions article by article.

Article 5

2. **The Chair** recalled that at its previous meeting the Commission had discussed secure access requirements, in particular whether they should be included in article 5 in the form of a paragraph 3 bis.

3. **Ms. Sabo** (Canada) said that there was no call to address those requirements in article 5; they could be covered in the Guide to Enactment of the Model Law on Secured Transactions. Secure access requirements needed to apply only to amendment or cancellation notices and not to the registration of an initial notice. For that reason, it might not be appropriate to include a paragraph 3 bis.

4. **Ms. Walsh** (Canada) said that it would be preferable not to include a paragraph 3 bis so as to allow for procedural steps by registry staff in relation to electronic filing. Paragraph 2 might usefully be incorporated in paragraph 1, as a fourth condition.

5. **Mr. Tirado Martí** (Spain), supported by **Ms. Gullifer** (United Kingdom), said that, for the reasons already stated, and also because of a duplication with article 6, paragraph 3, there was no need for a paragraph 3 bis.

6. **Mr. Kwon** Young Joon (Republic of Korea) said that a separate paragraph on secure access requirements was not needed, particularly as such requirements frequently related to the identity of the person submitting the notice, which was covered by subparagraph 1 (b). It would be better to address the matter in the Guide to Enactment.

7. **Mr. Dennis** (United States of America) said that there was merit in a proposed paragraph 3 bis; it was important to signal that the Registry could not simply exercise discretion as to whether or not to accept a request, but must make a substantive determination following a review of the documentation. He wondered whether the proposed paragraph might be submitted to a group of friends of the Chair for further discussion.

8. **Ms. Gullifer** (United Kingdom) said she wondered whether the concerns expressed by the delegation of the United States were not adequately addressed by article 6, which provided for the rejection of a registration for lack of information, as opposed to article 5, which dealt with the conditions for access.

9. **The Chair** said he took it that the Commission wished to approve the text as it stood, without the addition of the proposed paragraph 3 bis.

10. *It was so decided.*

Article 6

11. **Mr. Bazinas** (Secretariat) said that some States had indicated that, as currently drafted, article 6 might require the Registry to reject a notice or a request if some but not all the information was illegible, which was not the intention. It was therefore suggested that subparagraph 1 (a) should read "A notice if no information is entered in one of the mandatory designated fields, or if information entered in one of the mandatory designated fields is illegible", and that paragraph 2 should read "The Registry must reject a search request if no information is entered in one of the fields designated for entering a search criterion, or if information entered in one of the fields designated for entering a search criterion is illegible". The new wording would provide for two separate requirements, namely, that the information should be entered and that the information entered should be legible.

12. **The Chair** said he took it that the Commission wished to approve those changes.

13. *It was so decided.*

Article 7

14. *Article 7 was approved.*

Article 8

15. **Mr. Bazinas** (Secretariat) said that one State had commented that, as the words "in accordance with article 9 of these Provisions" following the square brackets in subparagraph (a) could create the false impression that article 9 dealt with additional information, those words should more appropriately be placed before the bracketed wording.

16. **The Chair** said he took it that the Commission wished to approve those changes.

17. *It was so decided.*

Articles 9 and 10

18. *Articles 9 and 10 were approved.*

Article 11

19. **Mr. Bazinas** (Secretariat) said that, for the sake of consistency with article 9 of the draft Model Law, which dealt with the same issue in the context of the security agreement, paragraph 1 of article 11 should refer simply to "encumbered assets" and not to "assets encumbered or to be encumbered", and in paragraph 2, the phrase "within a particular category" should be replaced by "within a generic category".

20. **The Chair** said he took it that the Commission wished to approve those changes.

21. *It was so decided.*

Articles 12, 13 and 14

22. *Articles 12, 13 and 14 were approved.*

Article 15

23. **Mr. Bazinas** (Secretariat) said that one State had proposed that, in the interests of greater clarity, subparagraph 2 (b) should be reworded to read "If that person knows that the address has changed, at the most recent address, if known or reasonably available to that person".

24. **The Chair** said he took it that the Commission wished to approve those changes.

25. *It was so decided.*

Articles 16, 17, 18 and 19

26. *Articles 16, 17, 18 and 19 were approved.*

Article 20

27. **Mr. Bazinas** (Secretariat), responding to comments received from many States on the article, proposed a number of parallel changes. It had been noted that it was impossible for a creditor to know that the grantor would not authorize registration, as stipulated in subparagraph 1 (a); moreover, that provision conflicted with the approach followed in the Model Law, which was to base actions on written notices rather than on subjective criteria. Accordingly, in subparagraph 1 (a), the words "the secured creditor knows that the grantor will not authorize that registration" might usefully be replaced by "the secured creditor has been notified in writing by the grantor that the grantor will not authorize that registration". Similarly, in subparagraph 2 (a), the words "the secured creditor knows that the grantor will not authorize the registration" should be replaced by "the secured creditor has been notified in writing by the grantor that the grantor will not authorize the registration", and again, in subparagraph 3 (a) (i), the words "the secured creditor knows that the grantor will not authorize" should be replaced by "the secured creditor has been notified in writing by the grantor that the grantor will not authorize".

28. **Mr. Foëx** (Switzerland) said that he welcomed the proposed changes but wondered whether it was necessary for the notification to be in writing; no such requirement appeared either in the comments by States or in the *UNCITRAL Guide on the Implementation of a Security Rights Registry*.

29. **Mr. Riffard** (France) likewise questioned the need for the notification to be in writing, particularly in subparagraph 3 (a) (i), wondering whether, in a case where a creditor requested a registration in advance without any subsequent security agreement being concluded, the creditor must wait for a notification in writing from the grantor before proceeding with cancellation. In such a case, the creditor would indeed know that the grantor would not authorize registration if there was a breakdown in negotiations. Accordingly, while notification in writing might be justified in paragraphs 1 and 2, it would not be in paragraph 3.

30. **Mr. Tirado Martí** (Spain) said that his delegation also supported the inclusion of a notification requirement but considered that such notification did not need to be in writing; he was therefore in favour of the removal of any such stipulation in the article.

31. **Ms. Gullifer** (United Kingdom) said that her delegation had proposed that the secured creditor should be "informed" that the grantor would not give authorization, but likewise saw no need for notification to be in writing.

32. **Mr. Weise** (American Bar Association) asked whether deleting the "in writing" stipulation would still leave the requirement of notification.

33. **Mr. Bazinas** (Secretariat) said that one State, noting the separate paragraphs devoted to amendment notices and cancellation notices, had pointed to an element lacking in paragraph 1, as compared with paragraph 3, which, in its subparagraph (b), covered the possibility of an authorization being withdrawn without a security agreement having been

concluded; the obligation of registration still remained. It would make sense to include a similar provision in paragraph 1 through the addition of a new subparagraph (c) that would read "The grantor authorized the registration of a notice covering those assets but the authorization has been withdrawn and no security agreement covering those assets has been concluded". The word "or" at the end of subparagraph (a) should be deleted and inserted following a semicolon at the end of subparagraph (b). Paragraph 4 should accordingly include a reference to the new subparagraph 1 (c), which like the other provisions mentioned would not allow any payment for the creditor's compliance with its obligation.

34. **Mr. Sono** (Japan), after asking whether the "in writing" requirement was to be omitted not only in paragraph 3 but also in paragraphs 1 and 2, said that it might be better to use the word "informed", rather than "notified", which implied a written communication.

35. **Mr. Weise** (American Bar Association), referring to the possibility of pre-registration mentioned by the representative of France, said he wondered whether the proposed new subparagraph 1 (c) should be broadened so that an authorization for registration without an agreement being concluded would constitute a requirement for cancellation and not just for an amendment in relation to specific assets.

36. **Mr. Bazinas** (Secretariat) said that such a scenario was already addressed in subparagraph 3 (b), which required the creditor to register a cancellation notice if the authorization had been withdrawn and no security agreement had been concluded. The reason for the difference in language between subparagraphs 3 (b) and 1 (c) was that the former related to all the assets and the latter to only some assets.

37. **Ms. Gullifer** (United Kingdom) said that if the "in writing" requirement was to be omitted the word "notified" should be replaced by "informed".

38. **The Chair** said he took it that the Commission agreed that subparagraphs 1 (a), 2 (a) and 3 (a) (i) should be amended to refer to the secured creditor's having been informed, rather than knowing, and that a new subparagraph 1 (c) should be included.

39. *It was so decided.*

Articles 21, 22 and 23

40. *Articles 21, 22 and 23 were approved.*

Article 24

41. **Mr. Bazinas** (Secretariat) drew attention to the note to the Commission included after paragraph 6 concerning the phrase "except to the extent it seriously misled third parties that relied on the erroneous information in the registered notice", noting that the Commission might wish to leave the text unchanged, so long as it was aware of the disparity between the text and the explanation provided in the Registry Guide; alternatively, it might prefer to delete the qualifying clause.

42. **The Chair** suggested that it was perhaps the Guide that should be amended and not the article.

43. **Mr. Whittaker** (Australia) said that it was preferable not to include unnecessary language in the Model Law.

44. **Ms. Walsh** (Canada) said that it was difficult to disagree with that view. Nevertheless, the Commission must be sure that the language in question was truly unnecessary before deciding to delete it. If it did so decide, that fact should be noted in the Guide to Enactment with an explanation, as it would represent a departure from the Registry Guide.

45. **Mr. Kwon** Young Joon (Republic of Korea) said that his delegation's preference was to leave the text unchanged, with perhaps an explanation of the phrase in the Guide to Enactment.

46. **Mr. Foëx** (Switzerland) said he concurred with that view and drew the Commission's attention to paragraph 220 of the Registry Guide, which recommended that creditors should be entitled to enforce their security right as against a third party only up to the maximum amount erroneously stated in the registered notice.

47. **The Chair** said he took it that the Commission wished to approve the article without change and to provide a clarification in the Guide to Enactment.

48. *It was so decided.*

Article 25

49. **Ms. Walsh** (Canada), introducing her delegation's proposal on article 25 (A/CN.9/887), said that the proposed drafting changes were intended to make it clear that, even if a secured creditor did not register an amendment notice after a change in the identifier of the grantor or failed to do so within the grace period, the secured creditor still retained its priority against a competing secured creditor or transferee. The comments were also intended to clarify the difference between the scenario where the amendment notice was registered before the expiry of the grace period and the scenario where it was registered subsequently.

50. **Mr. Weise** (American Bar Association), referring to a situation where the grantor's name changed and where, during the grace period that would have been available for amending the registration, the secured creditor was able to make its security right effective against third parties by other means — namely, not by amending the grantor's name but, for example, by possession — asked whether the right would continue to be effective against third parties and would not be subject to another security right by another secured creditor that was made effective before the first secured creditor took possession.

51. **Ms. Walsh** (Canada) said that the issue was addressed in the proposed redraft, paragraph 1 of which set out the general rule that the third party's priority was not affected by a change in the identifier, except in the specific circumstances set out in paragraph 2. Accordingly, registration of the notice was ineffective only against subsequent secured creditors and subsequent buyers and then only if the amendment notice was not registered before

the expiry or before the competing security right was made effective.

52. **Mr. Whittaker** (Australia), referring to paragraph 3 of the proposed redraft, recalled that in the discussion on article 23 of the draft Model Law, dealing with acquisition security rights in consumer goods, it had been agreed to convert what had previously been a qualifier on the concept of "effective against third parties" into a priority rule, since such effectiveness was a condition of the security right itself and did not apply only to some third parties and not to others. He wondered whether, in line with that principle, proposed paragraph 3 might similarly be converted into a priority rule.

53. **Ms. Walsh** (Canada) said that, elsewhere in the Guide to Enactment, in situations where assets were taken free of a security right, there was no reference to a transferee having priority over the secured creditor but simply to the question whether a security right was effective against the buyer or licensee. Since the tendency was not to use the language of priority and subordination in relation to transferees, it seemed appropriate in the proposal to speak simply of the ineffectiveness of registration against a person's rights.

54. **Mr. Whittaker** (Australia) explained that he had indeed been concerned more with the idea of taking assets free of a security right than with any priority rule.

55. **Ms. Walsh** (Canada) stressed how difficult it had been to draft a satisfactory proposal and that it might well be further improved. Nevertheless, the possibility of third-party effectiveness still remained, whether through possession or control or any other mechanism. Her delegation had no difficulty with article 23 of the draft Model Law or with the idea of a security right being effective against some parties and not against others.

56. **Mr. Cohen** (United States of America) said that some confusion might indeed result from the concept of effectiveness against some third parties but not against others. It might be advisable to take up the discussion of that issue informally in respect of article 23 of the draft Model Law and at the same time to reconsider the Canadian proposal, since they presented the same drafting challenge.

57. **The Chair** suggested that a group of friends of the Chair should discuss the issue further to see if they could arrive at a consensus.

58. *It was so decided.*

Article 26

59. **Ms. Walsh** (Canada), introducing her delegation's proposed redraft of the article (A/CN.9/887), which sought to address a situation similar to that encountered in article 25, said that it envisaged a scenario where there was no change in the identifier but the encumbered asset was transferred and the transferee then sold or granted security in the transferred asset. Option A would require the secured creditor to register an amendment notice naming the transferee as a new grantor within a set period following the transfer. Option B carried the same obligation to preserve priority against subsequent secured creditors and transferees, but only where the secured creditor acquired knowledge that the transfer had occurred. Since the concerns addressed were analogous in the two articles, the proposed options were also analogous.

60. However, option B took up an issue not clearly enunciated in the previous draft. It required the secured creditor to register an amendment notice only if it acquired knowledge not merely of the transfer but also of the identity of the transferee, since without such knowledge it could not very well perform its obligation of registration. A further difference was the deletion in option A of the reference to subsequent transfers, since a registered notice would be ineffective against a subsequent transferee unless the secured creditor managed to register the amendment notice before the subsequent transfer occurred. A final clarification in option B was that if the asset was subject to subsequent transfers before the secured creditor found out that it had been transferred, the secured creditor was not required to take steps to preserve the effectiveness of the registered notice unless it had knowledge of the identifier of the most recent transferee. She recognized that some delegations considered it conceptually suspect for a security right to be effective against some but not other third parties and might wish to consider other drafting changes.

61. **The Chair** suggested that a group of friends of the Chair could discuss the proposal further, along with the redrafted article 25, with a view to further improvements.

62. *It was so decided.*

Article 27

63. **Mr. Tirado Martí** (Spain) said that the title of the article, "Appointment of the registrar", was misleading, because the article also dealt with dismissal, determination of duties and monitoring of performance. More importantly, it required the appropriate authority to determine the registrar's duties. In many jurisdictions those duties were determined, or indeed predetermined, only by law or regulation, not by any authority.

64. **Mr. Dubovec** (National Law Center for Inter-American Free Trade) said that the Guide to Enactment might usefully explain how in practice the registrar's duties would be determined, which would typically be by way of regulation or law. Another solution would be to replace the word "determine" with "prescribe".

65. **The Chair** said he took it that the Commission wished to approve the article, on the understanding that a clarification would be provided in the Guide to Enactment.

66. *It was so decided.*

Article 28

67. *Article 28 was approved.*

Article 29

68. **Mr. Dubovec** (National Law Center for Inter-American Free Trade) said that article 18, option B, required the Registry to amend information by registered notice at the request of the person concerned; article 20, paragraph 7, stipulated that the Registry must register a notice upon a court order. He therefore wondered whether article 29

should not also include a reference to those other two exceptions.

69. **Mr. Riffard** (France) said that the exceptions provided for in article 29 concerned cases where the Registry amended information on its own initiative, without any external request.

70. **Mr. Kwon** Young Joon (Republic of Korea) said that article 29 dealt specifically with the integrity of information in the Registry record and that the basic intention was to prevent the Registry from amending or removing such information on its own. The other possible exceptions cited did not appear to involve any impairment of the integrity of that information.

71. **Ms. Gullifer** (United Kingdom) said that article 18, option B, did appear to concern an amendment of information already registered and might therefore be suitably referred to as an exception in article 29, paragraph 1. Article 20, paragraph 7, however, concerned the registration of an amendment or cancellation notice and did not entail any removal or amendment of registered information.

72. **The Chair** said he took it that the article could be approved as written, with the Guide to Enactment providing the necessary clarification.

73. *It was so decided.*

Article 30

74. **Mr. Bazinas** (Secretariat) said that one State had noted that the reference to article 20 at the end of paragraph 1 of option A might unintentionally create the impression that, in order to remove information from the public registry office, the Registry must verify compliance with the conditions laid down in article 20. It had therefore been proposed that the last line of that paragraph should be amended to read "in accordance with article 19, including any cancellation notice registered in accordance with article 20, paragraphs 3 or 7, of these Provisions".

75. **The Chair** said he took it that the Commission wished to approve the new wording.

76. *It was so decided.*

Articles 31, 32 and 33

77. *Articles 31, 32 and 33 were approved.*

78. **The Chair** said he took it that the Commission wished to approve the draft Model Registry-related Provisions, as amended, as a whole.

79. *It was so decided.*

80. **The Chair** invited the Commission to resume its consideration of the articles of the draft Model Law contained in document A/CN.9/844/Add.2.

Article 28

81. **Ms. Walsh** (Canada), introducing her delegation's proposal on article 28 (A/CN.9/XLIX/CRP.5), said that the proposal addressed two scenarios. In the first, there was a priority contest between security rights created by the same grantor in the same encumbered asset (article 28); in the second, there was a priority contest between security rights created by different grantors in the same encumbered asset (article 28 bis). In the first scenario, two options were proposed in order to clarify the agreed rule, namely, that priority was determined by the order in which third-party effectiveness was achieved, except in the case of a security right that was made effective against third parties by registration of a notice. Option B closely tracked recommendation 76 of the *UNCITRAL Legislative Guide on Secured Transactions*; option A had the advantage of being short and was not substantively different from option B.

82. **Mr. Riffard** (France) said that his delegation had no reservations as to the substance of the Canadian proposal, but only as to its wording. The article already set out the agreed rule on the order of priority in language that was straightforward and easily understandable. He therefore questioned the usefulness of a more cumbersome formulation which, because of its attention to detail, might not be readily understood. The ideal should be short, simple, concise rules. It might therefore be better to retain the original wording, with a more detailed exposition if necessary in the Guide to Enactment.

83. **Ms. Gullifer** (United Kingdom) said that her delegation supported option A, which was both clear and elegant. Option B was perhaps more comprehensive but was also longer and more difficult to understand. She took it that the suggested options would replace the current paragraphs 1 and 3 of the article.

84. **Ms. Walsh** (Canada) confirmed that the proposed new wording was intended to replace current paragraphs 1 and 3. The new wording had been proposed because of the potential for confusion in the current draft. Current paragraph 1 set out the general rule that priority was determined according to the order of third-party effectiveness but contained no cross reference to current paragraph 3, which set out a different rule for security rights made effective by registration. The object had been to clarify the relationship between the two ways of determining priority.

85. **Mr. Tirado Martí** (Spain) expressed a preference for option B, which was not so much complicated as detailed and clearly set out the possibilities, whereas option A required fuller prior knowledge. Option B would be more helpful to users and was, in addition, more consistent with the Secured Transactions Guide.

86. **Mr. Dennis** (United States of America) said that his delegation could support either option but had minor drafting concerns about both. Option A correctly stated that priority was determined by order of occurrence of two events but did not clearly state that the earlier of those two events would determine which of two competing security rights would have priority. Option B might give rise to confusion in situations where both registration and other methods were used to make security rights effective against third parties. For example, subparagraph (b) of that option concerned the case where security rights were made effective otherwise than by registration, but it was not clear whether the rule applied when the secured creditor took possession of

collateral and then registered a notice covering such collateral, since the security rights could be made effective in both ways.

87. **Mr. Kwon** Young Joon (Republic of Korea) said that the current article required comprehensive knowledge of modern law in order to be understood and that the Canadian proposal better reflected its intention. His delegation had a slight preference for option B; although longer than option A, it was more reader-friendly and was also more closely aligned with the recommendation in the Secured Transactions Guide. Its subparagraph (c) appropriately addressed the situation where a security right was made effective against third parties by registration and otherwise. Where it was made effective both by registration and by possession, the party might well be expected to rely on the most favourable method. In any case, not all situations could be addressed in the Model Law; some were better left to the Guide to Enactment.

88. **Ms. Gullifer** (United Kingdom) said that her delegation still preferred option A, which did not raise the same problems as option B. It probably required only a little tweaking, as indeed did the other option.

89. **Mr. Weise** (American Bar Association) echoed that view and said that drafting changes might perhaps be agreed on in informal consultations.

90. **Ms. Walsh** (Canada) said that, in option A, the stipulation that priority would be determined according to order of occurrence made it unnecessary to spell out that it would be determined according to whichever of the two events mentioned came first. Since no specific indication had been given as to what drafting changes might be required, she was not in favour of convening a group of friends of the Chair. Regarding option B, which appeared to have more general support than option A, she agreed that security rights sometimes fell within the scope of more than one rule in the Model Law and that the secured creditor would be likely to choose the rule most advantageous to its position.

91. **Mr. Dennis** (United States of America) said that the issue he had raised would be resolved by the insertion in option B of the word "first" in subparagraphs (a) and (c), the beginning of which would then read "(a) As between security rights that were first made effective" and "(c) As between the security right that was made effective against third parties by registration and a security right that was first made effective against third parties".

92. **Mr. Kwon** Young Joon (Republic of Korea) said that he was still concerned, however, about the exceptional situation dealt with in option B, where a party obtained third-party effectiveness by different methods, for instance, first by possession, then by registration. The Model Law should not be tailored to exceptional situations but should lay out general principles. Such situations might more appropriately be dealt with in the Guide to Enactment or be left to the parties. For the sake of clarity, a chapeau like that appearing in option A, stating that priority between competing security rights created by the same grantor in the same encumbered asset was determined according to order of occurrence, should also be inserted in option B.

93. **Mr. Sono** (Japan) also expressed a preference for option B. However, the proposed insertion of the word "first" would create the undesirable impression of a supremacy of registration over possession as a means of establishing third-party effectiveness. The current wording of the proposal was adequate. His delegation agreed with the proposed insertion of a chapeau in that option.

94. **Ms. Walsh** (Canada) said that a chapeau like that appearing in option A should also have been included in option B, with the wording "Subject to articles 31, 36, 37 and 39-41, priority between competing security rights created by the same grantor in the same encumbered asset is determined by the following rules:". Insertion of the word "first" in subparagraphs (a) and (c) would create more confusion. It would be better to explain in the Guide to Enactment that the secured creditor would choose the rule fitting the facts that would give the most favourable result.

95. **The Chair** said he took it that the Commission wished to approve option B without the addition of the word "first" but with the inclusion of a chapeau, it being understood that an explanation would be provided in the Guide to Enactment.

96. *It was so decided.*

97. **The Chair** said he took it that the Commission wished to approve article 28 bis as proposed.

98. *It was so decided.*

Article 29

99. **Mr. Bazinas** (Secretariat) suggested that, in line with the two preceding articles, the title of article 29 should be changed to "Priority between competing security rights". In addition, the words "provided that there is no time period during which" should be replaced by "provided that there is no time when".

100. **The Chair** said he took it that the Commission wished to approve those changes.

101. *It was so decided.*

Article 30

102. **Ms. Walsh** (Canada), introducing her delegation's proposal on article 30 (A/CN.9/XLIX/CRP.5), said that the proposal did not signal a policy change but was intended merely to clarify that competition between security rights in proceeds would normally be with a party claiming a security right in the same original encumbered asset. One delegation had wondered whether the rule should be subject to article 39, concerning rights in proceeds claimed by an acquisition secured creditor, as in some cases the rule set out in that article might produce different results. Since, however, article 39 set out a more specific rule, it would override article 30. If there still remained a concern, article 30 might say that the security right had the same priority, subject to article 39, but her delegation did not see the need for it.

103. **Mr. Dennis** (United States of America) said that article 39 did indeed give a different result as compared with article 30. Should the Commission fail to address that point, a court might well find subsequently that article 30 trumped

article 39. The Model Law would be more user-friendly and less susceptible to interpretative error if it was clearly stated that article 30 was subject to article 39.

104. **The Chair** said he took it that the Commission wished to approve the article as redrafted, with the addition of the words "subject to article 39".

105. *It was so decided.*

Article 31

106. **Ms. Walsh** (Canada) said that the proposed redraft (A/CN.9/XLIX/CRP.5) sought to clarify the relationship between article 31 and the general rule in article 28 and to address the overlap, and to some extent the conflict, between article 31 and article 11, paragraphs 3 and 4 of which the Commission had earlier decided to delete because of that overlap.

107. **Mr. Riffard** (France) said that the question of security rights in a mass or product was one of the most difficult in the draft Model Law, especially in terms of the link between articles 11 and 31. His delegation had advocated a very didactic treatment of article 11 in the Guide to Enactment and could only request a similar approach to article 31. Discussions with other delegations had revealed that both articles were not always understood in the same way. His delegation supported the new, clearer wording proposed by the representative of Canada for paragraphs 1 and 2, but was less convinced by the new paragraph 3, which seemed less clear than the previous version, particularly in the light of the reference to the vague and questionable concept of the "value" of the security right. A clarification of the consequences of the proposed change would be appreciated.

108. **Ms. Walsh** (Canada) said that there was no difference in substance between the old and the new versions of paragraph 3. The reference in the proposed redraft to the obligation secured by a security right aligned it more closely with the wording of proposed paragraph 2.

109. **Mr. Dennis** (United States of America) said that his delegation supported the new wording proposed by the Canadian delegation. A huge amount of time had already been devoted to the issues raised, which related to a relatively rare situation. The new paragraph 3, combined with the agreed deletion of paragraph [3] [4] of article 11, provided a precise answer to a complicated question and was therefore itself complicated.

110. **Mr. Whittaker** (Australia), expressing support for the proposed new wording, said that the wording used regarding the concept of "value" in proposed paragraph 3 was already in the existing draft and that it also referred back to article 11, which likewise revolved around the concept of "value".

111. **Mr. Bazinas** (Secretariat) recalled that the text of article 11 had not yet been finalized. As currently worded, article 11 referred to the value of the encumbered asset in relation to the value of the mass or product at the time of commingling, as well as to the value of the encumbered assets before they became part of the mass or product. It remained unclear whether the value of the encumbered assets was the same as the value of the security right. In any case, the final wording of article 11 would have to be reconciled with the wording of article 31.

112. **Mr. Kwon** Young Joon (Republic of Korea) noted that paragraph 2 of the original article referred to the value of the security right, while the Canadian proposal referred to the obligation secured by the security right. It would be useful to know whether that proposal was essentially the same as paragraph 2 of the original article and, if not, whether the Commission would have to decide which was more important in determining the ratio of the security right for secured creditors.

113. **Ms. Gullifer** (United Kingdom) noted in turn that paragraph 3 of the proposed redraft limited the obligation referred to in paragraph 2 to the value of the security right determined in accordance with article 11, where the value of the security right was limited to the value of the encumbered asset, making everything rather unclear. It would perhaps be better to replace the word "value" with another word.

114. **Mr. Dennis** (United States of America) said he agreed that the phrase "value of the security right" was obscure in relation to article 11. There did not seem to be any policy issue, simply a matter of terminology. It might be advisable not to finalize paragraph 3 until exact language had been agreed on for article 11.

115. **Mr. Sono** (Japan) said he concurred with that view. Nevertheless, to overcome the difficulty posed by the concept of the "value of the security right", he suggested that paragraph 3 should read "For the purposes of paragraph 2, the obligation secured by a security right that extends the mass or product is subject to the limitation determined in accordance with article 11".

116. **The Chair** said he took it that the Commission wished to approve the article, subject to any adjustments that might be required by the final wording of article 11.

117. *It was so decided.*

Articles 32, 33 and 34

118. *Articles 32, 33 and 34 were approved.*

Article 35

119. **Mr. Bazinas** (Secretariat) suggested that, for the sake of consistency with the titles of the other articles, the title of article 35 should be changed to "Priority of security rights over the rights of judgment creditors". The first clause of paragraph 1 should be condensed to read "Subject to article 38". Several suggestions had been made to improve the wording of subparagraph 2 (a), one of which would read "(a) Before the secured creditor received a notice from the judgment creditor that the judgment creditor has taken the steps referred to in paragraph 1 or within [a short period of time to be specified by the enacting State] thereafter". As for the rare situation referred to in the corresponding note to the Commission, where the time that the security right became effective coincided with the time that the judgment creditor took the steps referred to in paragraph 1, the Commission might wish to retain the words between square brackets in the chapeau of paragraph 2, but without the

square brackets. An explanation might be provided in the Guide to Enactment.

120. **The Chair** said he took it that the Commission wished to approve those suggestions.

121. *It was so decided.*

Article 36

122. **Ms. Walsh** (Canada), introducing her delegation's proposed revised version of article 36 (A/CN.9/XLIX/CRP.5), said that the proposal should be read in conjunction with the comments from her delegation (A/CN.9/887), which detailed and explained the reasoning behind the proposed changes. The proposed revised text retained the basic structure and approach of the current text; the intention of the reworded text was simply to provide clarification.

123. **Ms. Gullifer** (United Kingdom) asked for clarification as to the proposed deletion of the words "or the agreement for the sale or licence of intellectual property has been concluded" from option A, subparagraph 1 (a). Since proposed subparagraph 1 (b) still showed two alternatives, namely, registration after possession or conclusion of an agreement, she wondered whether there should not also have been two alternatives in subparagraph 1 (a).

124. **Ms. Walsh** (Canada) explained that the proposed chapeau for the article referred to acquisition security rights in two types of assets, namely, equipment and intellectual property or rights of a licensee. In the current wording, the acquisition secured creditor had priority over a non-acquisition secured creditor, provided that the acquisition secured creditor was in possession of the assets, or that a notice had been registered, or that the necessary agreement had been concluded. There would have been a contradiction had the words in question been retained in proposed subparagraph 1 (a) since, in the case of equipment, the agreement would already have been concluded. The secured creditor would have priority in respect of equipment by possession or by first registering a notice before giving up possession to a grantor. In the case of intellectual property or licensee rights, the secured creditor could not be in possession and would therefore not have priority until a notice was registered. There was consequently no mention of an agreement in proposed subparagraph 1 (a).

125. **Mr. Tosato** (Italy) requested that, if the Canadian proposal was accepted, it should refer throughout to intellectual property being "held" rather than "used".

126. **Ms. Walsh** (Canada) said that her delegation would have no objection to the suggested change.

127. **Mr. Bazinas** (Secretariat) said that the language in question came from the *UNCITRAL Legislative Guide on Secured Transactions: Supplement on Security Rights in Intellectual Property*, which defined consumer goods to include intellectual property used or intended by the grantor to be used for personal, family or household purposes. In the definition of the term "inventory", the Supplement referred to intellectual property being "held". The Commission might wish to decide which of the two terms it preferred.

128. **Ms. Gullifer** (United Kingdom) said that the reference in the original article to assets other than inventory, consumer goods and intellectual property or rights held by a grantor was rather confusing. The challenge was to find words that could apply to both intellectual property and equipment. If satisfactory wording could not be found, it might be necessary to revert to the original wording.

129. **Mr. Dennis** (United States of America) said that the wording used had been borrowed from the Supplement, which had been agreed to after many years of discussion in the Working Group and the Commission. If one element of wording was changed, it might be harder to understand the unchanged elements. The wording should be changed only if the Commission could be confident that another word better expressed the intent.

130. **Mr. Weise** (American Bar Association) said that the Supplement employed the word "used" by analogy with goods or equipment. It would not be inappropriate to replace that word with "held" if intellectual property could be considered along the same lines as goods or equipment.

131. **Mr. Bazinas** (Secretariat) said that the original wording of paragraph 3 limited the value of the consumer goods and intellectual property or rights in question. No such limitation appeared in paragraph 3 of the proposed text. He wondered whether that was intentional or whether the proposal might be subsequently revised to include a limitation of value, in the light of the outcome of the discussions on article 23.

132. **Ms. Walsh** (Canada) said that her delegation had considered that option B of article 23, referring to minimum acquisition value, had no implication for article 36. It had therefore decided not to include any such limitation.

133. **The Chair** said he took it that that the Commission wished to approve article 36 as redrafted by the Canadian delegation (A/CN.9/XLIX/CRP.5).

134. *It was so decided.*

Article 37

135. **Mr. Bazinas** (Secretariat) suggested that, in paragraph 1, the definite article should be deleted before the word "priority". In response to a question raised by one State in its written comments, he noted that paragraph 2 restated a rule of the Secured Transactions Guide that where two parties held acquisition security rights, one a seller, the other a bank, the seller had priority. It had been pointed out that the wording "other than a seller" in the article could inadvertently give the impression that there could be two sellers. The Commission might wish to consider whether or not to delete the words "of a secured creditor other than a seller or lessor, or a licensor of intellectual property", since any competing acquisition security right would by definition be that of a non-seller.

136. **Ms. Gullifer** (United Kingdom) said that, if those words were deleted, an explanation should be provided in the Guide to Enactment.

137. **Mr. Bazinas** (Secretariat) referred to recommendation 182 of the Secured Transactions Guide, which read "the supplier's acquisition security right has priority as against all

competing acquisition security rights". A seller, lessor or licensor would accordingly have priority over any other holder of an acquisition security right.

138. **The Chair** said he took it that the Commission wished to approve the article as amended, including the deletion of the last words of paragraph 2 following "has priority over a competing acquisition security right", it being understood that the Guide to Enactment would provide the necessary clarification.

139. *It was so decided.*

Article 38

140. **The Chair** said that the title of the article should be adjusted for the sake of consistency to read "Priority of acquisition security rights over the rights of judgment creditors".

141. **Mr. Weise** (American Bar Association) said that it would be desirable to align the titles of all the comparative priority rules. Most of them said "priority between… and…"; others said "priority of… over…". It might be preferable to use the formulation "priority between", which was most frequently found in the Model Law.

142. **The Chair** said he took it that the Commission wished to approve that suggestion and to approve article 38.

143. *It was so decided.*

The meeting rose at 1.05 p.m.

Finalization and adoption of a draft Model Law on Secured Transactions
(*continued*)

Summary record of the 1027th meeting, held at Headquarters, New York, on Tuesday, 28 June 2016, at 3 p.m.

[A/CN.9/SR.1027]

Chairperson: Mr. Labardini Flores (Vice-Chair) (Mexico)

Contents

In the absence of Mr. Kenfack Douajni (Cameroon), Mr. Labardini Flores (Mexico), Vice-Chair, took the Chair.

The meeting was called to order at 3 p.m.

Agenda item 4: Consideration of issues in the area of security interests (*continued*)

(a) Finalization and adoption of a draft Model Law on Secured Transactions (*continued*) (A/CN.9/865, A/CN.9/871, A/CN.9/884, A/CN.9/884/Add.1, A/CN.9/884/Add.2, A/CN.9/884/Add.3, A/CN.9/884/Add.4, A/CN.9/886, A/CN.9/887 and A/CN.9/887/Add.1; A/CN.9/XLIX/CRP.5)

1. **The Chair** invited the Commission to resume its consideration of the draft Model Law, focusing on the articles contained in documents A/CN.9/884/Add.2 and A/CN.9/884/Add.3.

Article 39

2. **Ms. Walsh** (Canada), introducing her delegation's proposal (A/CN.9/XLIX/CRP.5), said that the proposal was not intended to modify existing policy, but rather to reduce potential overlap and inconsistencies between paragraphs 2 and 3 of option A as currently drafted, and to align the text with the relevant recommendation of the *UNCITRAL Legislative Guide on Secured Transactions*. The wording of paragraph 2 (b) had been adjusted to align more closely with article 35, which dealt with the need to notify secured creditors with respect to acquisition security rights in original encumbered assets. The original wording of option B, which defined the priority given to security rights in proceeds in negative terms, had been revised to state, in positive terms, that a security right in the proceeds of an asset subject to an acquisition security right had the same priority as a non-acquisition security right. Lastly, the title of article 39 should be revised to align it with that of article 30. The new title would read "Priority between competing security rights in proceeds of an asset subject to an acquisition security right", to reflect the fact that the article concerned competition between a security right in the proceeds of an asset subject to an acquisition security right and a non-acquisition security right.

3. **Mr. Cohen** (United States of America) asked whether the proposed version of article 39, option A, paragraph 1, might be eliminated, as it appeared to restate the rule set out in article 30. Should that rule need to be restated in the context of article 39, the wording of paragraph 1 might need to be aligned as closely as possible with article 30, to avoid any implications of differences in meaning between the provisions.

4. **Ms. Walsh** (Canada) said that the difficulty with allowing the rule in article 30 to also cover the scenario in option A, paragraph 1, of article 39 was that article 36 included a number of priority rules for acquisition security rights in different types of assets. The proposed version of paragraph 1 should therefore be retained, as it referred directly to article 36, which stipulated not only the effectiveness of an acquisition security right against the rights of third parties, but also the specific conditions to which the super-priority status of an acquisition security right was subject. She agreed with the suggestion that article 30 should be made subject to article 39.

5. **Ms. Gullifer** (United Kingdom) said she agreed that paragraph 1 should be retained, if only to clarify the rule to which paragraph 2 was an exception. However, article 39 should track the language of article 30 more closely, particularly its reference to article 19.

6. **Ms. Walsh** (Canada) said that, were article 39, paragraph 1, to be revised to reflect the language of article 30, it would inaccurately suggest that the priority status of an acquisition security right depended only on its effectiveness against third parties, which was the basis for any competition among security rights. It was therefore critical to retain the existing reference to article 36, which indicated the specific rules governing priority status of third-party-effective security rights, such as those pertaining to inventory.

7. **Mr. Cohen** (United States of America) said he agreed that the current wording of article 30 would need to be adjusted to fit the context of article 39, paragraph 1. Indeed, aligning article 39 more closely with article 30 would avoid some unintended side effects. Article 30 did not simply assume that an acquisition security right had priority status based on its effectiveness against third parties, but referred to the rules set out in article 19. The proposed version of article 39, paragraph 1, might usefully be redrafted, without the reference to article 36, to indicate that a security right in

the proceeds of an asset subject to an acquisition security right had the same priority over a competing security right as the acquisition security right in the assets from which the proceeds had arisen, given that that priority status resulted from the application of article 36. A few small adjustments would be required to ensure that articles 30 and 39 appeared as consistent statements of the same rule rather than as independently drafted provisions.

8. **The Chair** said he took it that the Commission wished to approve the article as presented by the representative of Canada, subject to the Secretariat subsequently assessing any potential discrepancies between the proposed version of paragraph 1 and article 30.

9. *It was so decided.*

Article 40

10. **The Chair** suggested that the title could be adjusted to read "Priority among acquisition security rights in tangible assets commingled in a mass or product competing with non-acquisition security rights in the mass or product", or words to that effect, to reflect the focus on the concept of priority among competing rights, in line with the proposed changes to the titles of the other articles under chapter V, section A.

11. *It was so decided.*

Articles 41, 42 and 43

12. *Articles 41, 42 and 43 were approved.*

Articles 44, 45, 46, 47 and 48

13. **Ms. Gullifer** (United Kingdom) asked whether, in the light of the proposed revisions to the titles of the other articles in chapter V, section A, the titles of the articles in chapter V, section B (Asset-specific rules), could also be modified to reflect the fact that they dealt with priority between competing security rights.

14. **Mr. Bazinas** (Secretariat) said that the titles of all the asset-specific provisions in the Model Law referred simply to the type of asset involved. If the titles of the asset-specific provisions were changed to reflect the issue under discussion rather than the type of asset involved, substantial changes would also need to be made to the titles of many articles of the Model Law.

15. **Mr. Whittaker** (Australia) said that the existing titles referring to the specific types of assets discussed in chapter V, section B, were adequate and that there was no reason to expand them further.

16. **Mr. Weise** (American Bar Association) said that all the asset-specific rules were based on the belt-and-suspenders approach, which allowed secured parties to use more than one method to make their security rights effective against third parties. Some of the rules, including those set out in article 28, seemed to suggest that only one method of third-party effectiveness could be used, when, in some cases, secured parties could ensure priority more effectively by using two methods. For example, article 44, paragraph 1, was only accurate in the event that the security right made effective against third parties by registration was not made effective by other methods as well, such as possession, in which case priority between the competing rights referred to would be determined by possession rather than by registration. Hence, while modifications to the provisions themselves were not necessary, such clarifying explanations, along with specific examples, could usefully be included in the Guide to Enactment with regard to each of the asset-specific rules.

17. **Mr. Riffard** (France) said that future readers of the Model Law could easily decipher the subject addressed in each article based on the chapter or section heading ("priority" in the case of chapter V). It was therefore unnecessary to include repeated references to the subject in each individual title under the chapter.

18. **The Chair** said he took it that the Commission wished to approve articles 44, 45, 46, 47 and 48 and that it did not wish to have the words "priority between" included in the title of each of the articles.

19. *It was so decided.*

Article 49

20. **Mr. Bazinas** (Secretariat), drawing attention to the note to the Commission following the article, said that the Commission might wish to decide how to resolve the difference in approach with respect to various types of paper set out in article 44, paragraph 2, article 47, paragraph 3, and article 49, paragraph 5.

21. **Mr. Deschamps** (Canada) said that the difference stemmed from the relative simplicity of the rules governing the acquisition of rights by buyers or transferees of negotiable instruments and negotiable documents compared with the complexity of such rules in the case of non-intermediated securities. As no solid consensus had been established with regard to the rules protecting transferees of non-intermediated securities, further consideration of the laws applicable to non-intermediated securities would be required before such a rule could be meaningfully established in the Model Law.

22. **Mr. Weise** (American Bar Association) said that to encourage broad acceptance of the Model Law, the current approach reflected in article 49, paragraph 5, should be retained; article 44, paragraph 2, and article 47, paragraph 3, instead of establishing substantive rules that could come into conflict with the existing laws of enacting States, should refer to the relevant "taking free" rules to be specified by the enacting State. Indeed, it was unnecessary to include "taking free" rules in a Model Law which had already established rules upholding the priority status of secured parties in possession of negotiable instruments.

23. **The Chair** said he took it that the Commission wished to approve the article as drafted and that the Secretariat had the information required to incorporate any necessary explanations in the Guide to Enactment.

24. *It was so decided.*

Article 50

25. *Article 50 was approved.*

Article 51

26. **Mr. Bazinas** (Secretariat), drawing attention to the wording "reasonable care to preserve the asset and its value", said that it had been suggested during the discussions in the Working Group and in comments from States that the words "and its value" should be deleted from both article 51 and article 53, subparagraph 1 (a), on the understanding that preservation of the asset also covered preservation of the value of the asset. Even in situations where preservation of the asset did not cover preservation of the value of the asset, as in the case of securities, the value of which was determined not by the person in possession but by the market, reference to "and its value" would create an impossible obligation for the person in possession, since that person would be not able to determine the value of the asset.

27. **Mr. Riffard** (France) recalled that his delegation had previously expressed reservations with respect to the addition of the words "and its value", for the same reasons noted by the Secretariat.

28. **Mr. Kwon** Young Joon (Republic of Korea), noting that the words "and its value" were used in recommendation 111 of the *UNCITRAL Legislative Guide on Secured Transactions*, said that there could be a difference between preserving the asset itself and preserving its value and that reference to "and its value" in the article might be necessary. Furthermore, the words "reasonable care" could cover cases where preserving the value of an asset was beyond the control of the grantor or secured creditor, because if such care was exercised there would be no violation of obligation. His delegation therefore had reservations about deleting the words "and its value" from the article.

29. **Ms. Gullifer** (United Kingdom), expressing support for the deletion of the words "and its value" from the article, said that there was little likelihood of situations in which either party would have to take action beyond preserving the asset in order to preserve its value. In addition, there was no provision for parties to contract out of their obligations under the article. While the words "reasonable care" could theoretically cover any problems, should the need for the preservation of value ever become contentious, that could put significant strain on the qualification "reasonable" and raise issues that would be difficult to resolve in practice.

30. **Mr. Tosato** (Italy) said that the words "and its value" should be deleted; that matter had been addressed by the general criteria of "good faith" and "commercial reasonableness" approved by the Commission, and could possibly be covered in the Guide to Enactment, in which it could be specified that preservation of the asset extended also beyond the mere preservation of the physical integrity of the asset.

31. **Mr. Weise** (American Bar Association) said he agreed that the meaning of the word "value" was quite different to and went beyond preserving the asset. It added too much to the obligation of preserving the physical integrity of the asset. A secured creditor might not have the skill or knowledge required to preserve the ultimate value of what could be a non-intermediated security. It should be sufficient to preserve the physical asset to avoid the burden of having to take other actions to preserve the market value of the asset.

32. **Mr. Kohn** (Commercial Finance Association) said he agreed that requiring a lender to preserve the value of an asset would create too much ambiguity and would probably result in additional costs of credit that would be passed on to the borrower, making credit more expensive.

33. **The Chair** said he took it that the proposal to delete the words "and its value" from article 51 and subparagraph 1 (a) of article 53 was acceptable.

34. *It was so decided.*

Article 52

35. **Mr. Foëx** (Switzerland), recalling the comments submitted by his delegation (A/CN.9/887), said that under article 52, a secured creditor in possession of an encumbered asset must return the asset to the grantor upon extinction of the security right, and that pursuant to article 3 that rule was binding. While there was no need to amend the article, it was unclear why the parties should not be at liberty to derogate from that rule. After all, there were a number of situations in which the parties had a legitimate interest in choosing an alternative solution, such as when the encumbered asset belonged not to the grantor but to a third party. It would be appropriate, therefore, to remove article 52 from the list of provisions contained in article 3 from which the parties could not derogate.

36. **Mr. Weise** (American Bar Association) said that in all cases, the owner of the encumbered asset would, by definition, be the grantor. However, if the grantor wanted the asset to be given to a third party, the Commission might wish to consider including wording to the effect that the asset must be returned to the grantor or at the grantor's direction.

37. **Mr. Riffard** (France) said that while his delegation agreed with the points raised by the representative of Switzerland in substance, it was not in favour of removing article 52 from the list of mandatory rules given that the obligation to return an asset was fundamentally binding. In the interest of compromise, he agreed that adding the words "or to any person designated by the grantor" at the end of the article should satisfy the concerns raised by the representative of Switzerland while maintaining the binding nature of the article.

38. **Ms. Gullifer** (United Kingdom) said that the parties or the grantor must be given the opportunity to derogate from article 52, to the extent that the asset must be returned to a third party. However, rather than removing the article from the list in article 3, the compromise solution proposed by the observer for the American Bar Association could be adopted.

39. **Mr. Kwon** Young Joon (Republic of Korea) said that while his delegation did not oppose the proposed solution, that proposal could raise legal doctrine issues. In some jurisdictions, including his own, when returning an asset to a third party at the request of the grantor, the secured creditor was legally deemed to be returning it to the grantor, who then delivered it to the third party. In that connection, there was no further need for the addition of the proposed wording or language to that effect.

40. **The Chair** suggested that the matter might be resolved with an explanation in the Guide to Enactment.

41. **Mr. Sono** (Japan) asked whether secured creditors returning an encumbered asset would have to cover the cost of return and whether they had to follow directions given by the grantor.

42. **Mr. Cohen** (United States of America) said that the drafting change should not imply that the asset could be returned wherever the grantor directed. It must be specified that the asset should be returned to the grantor or to a third party agreed to by the secured creditor and the grantor. His delegation had understood that the provisions on the return of assets would not necessarily apply in all States and was therefore confused by the Chair's suggestion to deal with the issue in the Guide to Enactment. It was a point of substance that merited more than an explanation; his delegation would therefore prefer for it to be addressed in the Model Law.

43. **Mr. Morse** (Commercial Finance Association) said that it was common for first-ranking and second-ranking security rights holders to conclude agreements to the effect that the holder of the first priority would turn over the collateral to the second priority holder. Another possible scenario was that creditors would take the asset in satisfaction of the debt, in which case they should not have an obligation to return the asset to the grantor. There might also be a statutory decision or ruling by an insolvency court that would require the return of the asset to be addressed otherwise.

44. **Mr. Tirado Martí** (Spain) said that a possible solution could be found by the application of the "commercial reasonableness" and "good faith" standards.

45. **Ms. Walsh** (Canada) said that the proposed addition would introduce an unnecessary complication and her delegation would prefer to have "or to any person designated by the grantor" or words to that effect added to the article and an explanation given in the Guide to Enactment.

46. **The Chair** said that it was clear from the discussion that the asset could be returned to the grantor or a person designated by the grantor. The Commission could request the Secretariat to clarify that in the Guide to Enactment or indicate that there must have been a clear, prior agreement between the grantor and the creditor.

47. **Ms. Gullifer** (United Kingdom) suggested that the article could read "Upon extinction of a security right in an encumbered asset, a secured creditor in possession must deliver the asset to the grantor, or otherwise as agreed by the grantor and secured creditor", and that the words "or as the grantor directs" could be placed after the words "return the asset to the grantor".

48. **Mr. Jin** Saibo (China) said that the requirement to return the asset to the grantor was too rigid. If a debtor was unable to return an asset, the grantor typically performed the obligation and the encumbered asset was then returned to the compensating grantor, by agreement of the debtor, creditor and grantor, or the situation was dealt with by other means.

49. **Mr. Kwon** Young Joon (Republic of Korea) asked whether article 52 would remain in the list of mandatory rules outlined in article 3.

50. **Mr. Riffard** (France) said that replacing the word "return" with another word would weaken the article and cause it to lose its instructional value and commercial appeal.

51. **Mr. Weise** (American Bar Association) said that a compromise could be to leave out any reference to an agreement in the text of the article but include in the Guide to Enactment a note that the grantor must act in a commercially reasonable manner and could not impose inconvenient directions on the secured creditor. Further, the Guide could note that it could be appropriate for the parties to agree that the cost of sending the encumbered asset to a third party would be borne by the grantor.

52. **The Chair** said he took it that the Commission wished to approve the proposed additional wording, along with an explanation in the Guide to Enactment as to possible differences in practice in various jurisdictions.

53. *It was so decided.*

Article 54

54. **Mr. Bazinas** (Secretariat) suggested that, in line with the relevant notices and notifications provided for in the Model Law, the request referred to in paragraph 1 should be a written request so that both the secured creditor and the grantor had evidence of the request. Furthermore, in line with the language adopted by the Commission for article 2, the word "in" in the second line of the paragraph should be replaced by "under" and the phrase "by agreement" should be added after the word "receivable".

55. **The Chair** said he took it that the Commission wished to approve that suggestion.

56. *It was so decided.*

The meeting was suspended at 4.25 p.m. and resumed at 4.50 p.m.

Articles 55 and 56

57. *Articles 55 and 56 were approved.*

Article 57

58. **Mr. Bazinas** (Secretariat) suggested that, to align the article with its counterpart article in the United Nations Convention on the Assignment of Receivables in International Trade (article 14, paragraph 1), the phrase "or a tangible asset is returned to the grantor with respect to the receivable" in subparagraph 1 (a) should be deleted, and the phrase "to delivery of the asset" should be replaced with "any tangible asset returned with respect to the receivable". Subparagraph 1 (b) should be amended to read "If payment with respect to the receivable is made to the grantor, the secured creditor is entitled to payment of the proceeds of the payment and any asset returned to the grantor with respect to the receivable". With regard to subparagraph 1 (c), the phrase "or a tangible asset is returned to the grantor with respect to the receivable" should be deleted and the phrase "delivery of the asset" should be replaced with "any asset returned to that person with respect to the receivable".

59. **Ms. Gullifer** (United Kingdom) said that the proposed language for subparagraph 1 (a) was unsuitable, as it gave

the impression that the secured creditor was entitled to retain the tangible asset, although the tangible asset had been returned to the grantor.

60. **Mr. Bazinas** (Secretariat) said that, in line with article 14, subparagraph 1 (a), of the Convention, the proposed text said that the secured creditor was entitled to retain the proceeds of payment and was also entitled to any tangible asset returned with respect to the receivable. It did not refer to the retention of a returned tangible asset. The Convention did not refer to a return to the grantor because, where payment was made to the secured creditor, the buyer of goods might return the goods to the secured creditor, or to the seller. The text therefore covered both situations in which payment was made to the secured creditor, who was entitled to retain the proceeds of the payment and any tangible asset returned whether to the secured creditor or to the grantor with respect to the receivable.

61. **Mr. Cohen** (United States of America) said that the both the Commission and the Working Group were in agreement as to the intent of subparagraph 1 (a). However, the proposed language did not necessarily match that intent. For the sake of clarity, subparagraph 1 (a) could be drafted as a mirror image of subparagraph 1 (b). Whereas subparagraph 1 (b) referred to the secured creditor's right in respect of both the payment to the grantor and the return of the tangible asset to the grantor, subparagraph 1 (a) only referred to the secured creditor's right when payment was made to the secured creditor. The second part of the proposed language was overly vague, as it referred to the return of a tangible asset without indicating to whom the asset would be returned.

62. **Mr. Deschamps** (Canada), supported by **Ms. Gullifer** (United Kingdom), said that, in the proposed wording of subparagraph 1 (a), the word "retain" seemed to qualify both the proceeds of the payment and the tangible asset, when the subparagraph actually contemplated a case in which the tangible asset had not been delivered or might not have been delivered to the secured creditor. The text could be redrafted to indicate clearly that the secured creditor was entitled both to the proceeds of the payment and to any tangible asset returned.

63. **The Chair** said he took it that the Commission agreed with the proposed changes to the article.

64. *It was so decided.*

Article 58

65. *Article 58 was approved.*

Article 59

66. **Mr. Bazinas** (Secretariat) said that subparagraph 2 (b) of article 59 referred to an "original contract", following the language used in the United Nations Convention on the Assignment of Receivables in International Trade. However, as, unlike the Convention, the Model Law did not contain a definition of an "original contract", a number of States had suggested that the words "original contract" should be replaced by the phrase "contract giving rise to the receivable". The same change should also be made to subparagraph 2 (a), article 61, paragraph 1, and the title of article 64.

67. **The Chair** said he took it that the Commission wished to approve the proposed changes.

68. *It was so decided.*

Article 60

69. **Mr. Bazinas** (Secretariat), recalling that the Commission had decided in the context of article 13 that there should be no definition of the expression "subsequent security right", said that it would be useful if the word "subsequent" was deleted from paragraph 4, which would now read "Notification of a security right in a receivable created by the initial or any other secured creditor constitutes notification of all prior security rights in that receivable". Such wording would help to explain what a subsequent right was without using the word "subsequent", and would be consistent with the language adopted by the Commission in article 13.

70. **Mr. Kwon** Young Joon (Republic of Korea) said he wished to know how there could be a subsequent security right in a receivable if the receivable was created by an initial creditor. A subsequent security right would exist only if the receivable was acquired by a secured creditor from the initial creditor.

71. **Mr. Bazinas** (Secretariat) said that an initial security right was created by the grantor; a security right created by the initial secured creditor was therefore a subsequent security right because it would be subsequent to the security right created by the grantor. Throughout the Model Law rights were "created"; if the word "acquired" was used, that would be the first time that the term appeared in the Model Law and, as it would follow the word "receivable", it would cause confusion by implying that it was the receivable that was being acquired, rather than the security right in the receivable.

72. **Ms. Walsh** (Canada) said that, if "acquired" was a problematic term, the article could instead refer to a security right in a receivable "granted to" a secured creditor by an initial or subsequent secured creditor. In any event, her delegation found nothing wrong with a security right in a receivable being "acquired" or "obtained" from an initial or subsequent secured creditor, either expression to be read as referring to a security right in a receivable, rather than to the receivable itself.

73. **Mr. Whittaker** (Australia) said that, while it was important for the wording of the Model Law to track the wording of the Convention on the Assignment of Receivables in International Trade as closely as possible, it might be useful if the intent behind the provision was explained in the Guide to Enactment.

74. **Mr. Brink** (Factors Chain International and European Union Federation for the Factoring and Commercial Finance Industry) said that, as in the Convention on the Assignment of Receivables in International Trade, the article described a situation in which there was a chain of assignments. It was challenging to put the simple concept under discussion into

the complex language of the Model Law. However, the proposed wording was suitable.

75. **Mr. Kwon** Young Joon (Republic of Korea) said that there remained some confusion regarding the creation of a security right, as it could not be asserted that only the grantor was involved, since the first security right was created by the grantor and the initial secured creditor.

76. **Mr. Deschamps** (Canada) suggested that the text could be amended to read "Notification of a security right in a receivable obtained by the initial or subsequent secured creditor constitutes notification of all prior security rights in that receivable".

77. **Mr. Weise** (American Bar Association) said that the point of the provision was not that the grantor and the secured creditor created the security right together, but that when the original grantor sold the receivable to the original secured creditor, one security right was created in favour of the first secured creditor; however, when the first secured creditor sold the receivable to the second secured creditor, the first secured creditor would not be acting as a secured creditor at that point but as a new grantor, granting the security right to the second buyer, who, upon selling the receivable, would become a grantor with respect to that step of the transaction. Although the process seemed confusing, the wording proposed by the representative of Canada seemed to clarify the situation.

78. **Mr. Whittaker** (Australia) said he wondered whether it was correct to still refer to the "initial secured creditor" when security rights acquired by the initial secured creditor were in fact security rights granted by the grantor.

79. **Mr. Bazinas** (Secretariat), recalling the Commission's decision in its consideration of article 13 to avoid using the terms "subsequent secured creditor" and "subsequent security right", suggested the following wording in an effort to resolve the confusion: "Notification of a security right in a receivable created in favour of a secured creditor by the initial or any other secured creditor constitutes notification of all prior security rights in that receivable".

80. **The Chair** said he took it that the Commission agreed with the proposed wording.

81. *It was so decided.*

Article 61

82. **Mr. Bazinas** (Secretariat) said that, in light of the Commission's decision regarding the use of the expression "subsequent security rights", the Secretariat suggested that paragraph 5 should be amended to read "If the debtor of the receivable receives notification of one or more security rights in the same receivable created in favour of a secured creditor by the initial or any other secured creditor, it is discharged by paying in accordance with the notification of the last of such security rights". In paragraph 6, the word "either" should be inserted after the word "discharged". The first sentence of paragraph 8 should be amended to read "If the debtor of the receivable receives notification of a security right in the receivable from the secured creditor, the debtor is entitled to request the secured creditor to provide within a reasonable period of time adequate proof of its security right and, if the security right is created in favour of a secured creditor by the initial or any other secured creditor, adequate proof of the security right created by the initial grantor in favour of the initial secured creditor, and of any intermediate security right".

83. **Mr. Deschamps** (Canada) said he wondered whether the new wording of paragraph 5 might not inadvertently contradict the provisions of paragraph 4.

84. **Mr. Bazinas** (Secretariat) said that, in contrast to paragraph 4, which concerned situations where one grantor granted security rights to a number of different people, paragraph 5 concerned situations where security rights were transferred from one party to another party, who then transferred them to another party, and so on and so forth, representing the classic subsequent security rights scenario. Therefore, the two paragraphs addressed two dissimilar situations.

85. **The Chair** said that article 61 would be held in abeyance.

Articles 62, 63, 64, 65, 66, 67, 68, 69, 70 and 71

86. *Articles 62, 63, 64, 65, 66, 67, 68, 69, 70 and 71 were approved.*

Article 72

87. **Mr. Bazinas** (Secretariat) said that the concerns raised by some States regarding the use of the expression "competing claimant" in option A in reference to the joint owner of an encumbered asset whose rights were affected by non-compliance with the provisions of chapter VII could be addressed by referring instead to "any other person with a right in the encumbered asset". Option B referred more generally to any person whose rights were affected by such non-compliance. The Commission might wish to decide whether to retain one of the two options or to keep both. If it ultimately decided to include both options, then the piece following option B should also be incorporated in option A.

88. **Ms. Walsh** (Canada) said that her delegation preferred option B, because certain parties, such as creditors or their representatives, including insolvency administrators, might not have a property right in the encumbered asset but might still have their rights affected by the non-compliance, depending on the approach taken by the enacting State. While option A referred to a debtor, grantor and any other person with a right to the encumbered asset, it was worth noting that a debtor who was not the grantor might have an obligation but not necessarily a right in respect of the encumbered asset. Although her delegation preferred option B, if the Commission decided to retain option A, the text should be adjusted to ensure that it did not imply that the debtor necessarily had a right in the encumbered asset. One solution might be to simply delete the word "other" from the phrase "any other person with a right in the encumbered asset".

89. **Mr. Whittaker** (Australia) said that his delegation preferred to retain both options, but if one had to be chosen, then option A was preferred, since option B might expand, beyond the scope recognized in the laws of an enacting State,

the definition of persons entitled to claim judicial relief. The reference to the debtor in option A could also be moved to the end of the paragraph, in order to make it clear that the debtor did not have the same rights as the grantor or any other person who had a right in the encumbered asset.

90. **Mr. Riffard** (France) said that option A might, in certain legal systems, be considered to be a limitation of the basic principle of access to a court. Therefore, his delegation preferred option B.

91. **Ms. Gullifer** (United Kingdom) said that her delegation preferred to retain both options. Instead of removing the word "other" in option A, which would give the impression that the grantor did not have a right to the encumbered asset, reference could be made to the debtor, the grantor or any other person who had a right in the encumbered asset.

92. **Mr. Weise** (American Bar Association) said that the word "affected" in option B was too open-ended to be appropriate for seeking relief for non-compliance. For instance, if a business was the grantor and the secured creditor was enforcing its security right, a supplier to the business could claim that it had been "affected" by the actions of the secured creditor. In such a case, the supplier was relatively far removed from the transaction which the secured creditor had entered into, and therefore should not be considered to have rights that would be affected by non-compliance under option B. Furthermore, the rights of an insolvency administrator would be adequately covered under option A in most jurisdictions, since the insolvency administrator would, in effect, be "stepping into the shoes" of the debtor or the grantor or whoever the administrator was representing. Therefore, only option A should be retained.

93. **Ms. Walsh** (Canada) said that when the Model Law referred to a "right" in an asset, that should be understood as a proprietary right, as opposed to a right with respect to that asset, and under the insolvency laws of many jurisdictions, although the insolvency administrator acted as the debtor, the debtor remained the owner of the asset and the administrator, while acting in the debtor's stead, had no proprietary right in the asset, which was why her delegation preferred option B. Nonetheless, it was also open to more specific and limiting wording for the phrase "any person whose rights are affected".

94. **The Chair** said he took it that the Commission wished to retain options A and B and to have option A revised to refer to the grantor, any other person with a right in the encumbered asset or the debtor, and option B revised to cover people who did not have a right in the encumbered asset and to somehow narrow the number of people that could be considered as "affected" by the non-compliance of another person with the provisions of chapter VII. In addition, both options should include the wording at the end that applied to both of them, beginning with the phrase "is entitled to apply for relief".

95. *It was so decided.*

The meeting rose at 6.05 p.m.

Finalization and adoption of a draft Model Law on Secured Transactions
(*continued*)

Summary record of the 1028th meeting, held at Headquarters, New York, on Wednesday, 29 June 2016, at 10 a.m.

[A/CN.9/SR.1028]

Chairperson: Mr. Labardini Flores (Vice-Chair) (Mexico)

Contents

In the absence of Mr. Kenfack Douajni (Cameroon), Mr. Labardini Flores (Mexico), Vice-Chair, took the Chair.

The meeting was called to order at 10.05 a.m.

Agenda item 4: Consideration of issues in the area of security interests (*continued*)

(a) Finalization and adoption of a draft Model Law on Secured Transactions (*continued*) (A/CN.9/865, A/CN.9/871, A/CN.9/884, A/CN.9/884/Add.1, A/CN.9/884/Add.2, A/CN.9/884/Add.3, A/CN.9/884/Add.4, A/CN.9/886, A/CN.9/887 and A/CN.9/887/Add.1)

1. **The Chair** invited the Commission to resume its consideration of the draft Model Law, focusing on the articles contained in documents A/CN.9/884/Add.3 and A/CN.9/884/Add.4.

Article 73

2. *Article 73 was approved.*

Article 74

3. **Mr. Bazinas** (Secretariat) said that one delegation, in its written comments, had highlighted an inconsistency between article 74, paragraph 2, and article 79, paragraphs 2 and 4. The former stated that the right in question was subject to the right of the lessee or licensee, while the latter stated that, in the same situation, the lessee or licensee was entitled to the benefit of the lease or licence except as against creditors with rights that had priority over the right of the enforcing secured creditor. Article 79 was based on recommendations in the *UNCITRAL Legislative Guide on Secured Transactions*, and Working Group VI had approved it before approving article 74; perhaps, therefore, paragraph 2 should be amended or deleted.

4. **Mr. Deschamps** (Canada) said that he supported the deletion of paragraph 2. It was illogical for a higher-ranking creditor to be bound by a lease, for example, which had been established by a lower-ranking creditor.

5. **Mr. Weise** (American Bar Association) said that the purpose of paragraph 2 of article 74 was not to create a hierarchy of rights but, in conjunction with paragraph 1, to establish when secured creditors with priority could take over enforcement from other secured creditors. Paragraph 1 meant that a higher-ranking secured creditor could take over enforcement until such time as a lower-ranking secured creditor finished its foreclosure or disposition, and paragraph 2 meant that a higher-ranking creditor could take over until a lease or licensing agreement had been entered into. Paragraph 2 simply needed to be reformulated, without mentioning priority, to better express that idea and to eliminate the inconsistency with article 79.

6. **Mr. Whittaker** (Australia) said that his delegation could not agree to a reformulation of paragraph 2 if the result would be that a senior secured creditor could be bound by something that a junior secured creditor had done, other than selling or disposing of the encumbered assets.

7. **Mr. Weise** (American Bar Association) explained that the notion behind paragraph 2 of article 74 was that a senior secured creditor could take over the enforcement right from a junior secured creditor only until such time as the junior secured creditor completed enforcement, such as by entering into a lease agreement. Along with paragraph 1, it was intended to define the point in time at which a junior secured creditor would be considered to have completed enforcement. It did not preclude senior secured creditors from enforcing their security rights in accordance with the terms of article 79.

8. **Mr. Bazinas** (Secretariat) suggested that the words "lease or licence" should be added to paragraph 1 of article 74 after the words "the earlier of the sale or other disposition" and again after the words "by that creditor for the sale or other disposition". The rationale for including two paragraphs instead of one had been that, if an encumbered asset had been disposed of, there was nothing left to take over, whereas if a lease or licence agreement had been entered into, there was still an asset and it was still possible to take over enforcement. The Commission must decide what its policy would be for those different situations.

9. **Mr. Deschamps** (Canada) said that, according to that interpretation, a senior secured creditor would still be able to enforce its right against a lessee, if a lease agreement had been entered into. The article would thus lead to the same end result as article 79. That understanding was unclear from paragraph 2 as currently worded.

10. **Mr. Weise** (American Bar Association) said that he agreed with the representative of Canada that the end result was the same. In his view, the Commission could reconcile articles 74 and 79 by reformulating paragraph 2 to align it with paragraph 1; it should relate not to different creditors' priority, but only to the point at which a senior creditor took over enforcement, as opposed to initiating enforcement. Paragraph 2 had been intended as a modest rule to cover leases and licences under conditions similar to those laid down in paragraph 1; it did not relate to priority or take free, the rules for which were set out in article 79.

11. **The Chair** said he took it that the Commission wished to approve article 74, with the deletion of paragraph 2.

12. *It was so decided*.

Article 75

13. **Mr. Bazinas** (Secretariat) said that one delegation had proposed an addition to article 75, paragraph 1, to clarify that secured creditors were entitled to obtain possession of encumbered assets without applying to a court, as well as by applying to a court; that would make article 75 consistent with articles 76 and 77. Paragraph 2 was in square brackets because it had been provisionally added for the sake of consistency with the other articles relating to enforcement. If approved, paragraph 2 should be taken out of square brackets.

14. **Mr. Dennis** (United States of America) said that, in paragraph 4, his delegation did not understand the logic behind the reference to assets "of a kind sold on a recognized market"; perhaps the phrase could be deleted.

15. **Mr. Tirado Martí** (Spain) said he agreed that the term "recognized market" was unclear. Paragraph 4 made sense, however, if "recognized market" meant a market where prices were determined publicly. "Official market" might be a good alternative term.

16. **Mr. Bazinas** (Secretariat) explained that Working Group VI had decided that the term "recognized market" should be included, in line with recommendation 149 of the Secured Transactions Guide. The Working Group had further decided that the Guide to Enactment of the Model Law on Secured Transactions should explain that "recognized market" referred to a market in which prices were set by the market and not by individual sellers.

17. **Mr. Riffard** (France) said that the sense of paragraph 4 was clear and was explained in the draft Guide to Enactment. However, the proposed paragraph 2 was problematic. It was obvious that, if a secured creditor applied to a court or other authority to obtain possession of an encumbered asset, it must follow civil procedures. If there were no additional conditions to be met, then paragraph 2 did not serve any purpose. If, however, there were additional conditions to be met, the Commission should list them.

18. **Mr. Bazinas** (Secretariat) pointed out that paragraph 2 provided for the insertion of specific conditions by enacting States. The structure reflected that of other articles; if paragraph 2 was deleted, then paragraph 2 of article 76, paragraph 1 of article 77 and paragraphs 1 and 2 of article 79 should likewise be removed.

19. **Mr. Riffard** (France) said that there was a clear purpose behind the other paragraphs mentioned, which were essential to the Model Law; paragraph 2 of article 75, on the other hand, did not appear to be necessary.

20. **The Chair** said that the idea was to maintain consistency in the Model Law's structure. The paragraphs mentioned all referred to elements "to be specified by the enacting State".

21. **Ms. Walsh** (Canada) said that she agreed with the representative of France that paragraph 2 could be deleted. States would impose the same conditions on secured creditors as they would on any others seeking to obtain possession of property. Paragraph 4 should remain unchanged, since assets sold on markets with publicly determined prices might need to be sold quickly, and the Guide to Enactment provided sufficient clarification of the term "recognized market".

22. **Mr. Kwon** Young Joon (Republic of Korea) said that the term "recognized market" should be retained in paragraph 4. It was important because the possessor of an asset of a kind sold on a recognized market would not be severely disadvantaged by a lack of notice and would easily be able to acquire another such asset at the market-determined price. The paragraph was consistent with recommendation 149 of the Secured Transactions Guide, and the details of the concept could be explained in the Guide to Enactment. His delegation had a slight preference for keeping paragraph 2: some enacting States might, in fact, have special conditions for obtaining possession of an encumbered asset, and providing for such conditions would facilitate those States' implementation of the Model Law.

23. **Mr. Whittaker** (Australia) said that he agreed with the United States delegation that the reference to assets "of a kind sold on a recognized market" was not appropriate in paragraph 4. The paragraph was designed to protect secured creditors from the risk of a rapid decline in the value of secured assets by ensuring that they would not be constrained by a notice period, and would thus be able to rapidly recover the money they were owed. However, it was not logical to waive the requirement of notice for all assets sold on a recognized market. Listed shares, for example, might decline rapidly in value, but would in that event be covered by the reference to assets which "may decline in value speedily". The argument that a grantor would readily be able to replace an asset sold on a recognized market and thus would not be disadvantaged by a lack of notice was not watertight. That would not be the case if, for example, the security given by the grantor consisted of a controlling stake in a listed entity.

24. **Ms. Gullifer** (United Kingdom) said that she shared the position of the representative of the Republic of Korea in relation to paragraph 2. She disagreed with regard to paragraph 4, however, for the reasons given by the representative of Australia, and also because recommendation 149 of the Secured Transactions Guide concerned disposition, not taking possession; the relevant recommendation was actually recommendation 147, which did not provide for any exceptions to the requirement of notice. In addition, the three exceptions mentioned in paragraph 4 served different purposes: the first two covered

situations where the secured creditor might need to act speedily to avoid losing money, but the last did not. A secured creditor might decide to take possession of stocks because of changes in their market value. There were many conceivable scenarios in which a secured creditor might want to sell an asset quickly, but not all of them justified an exemption from the requirement to give notice in order to protect the debtor.

25. **Mr. Bazinas** (Secretariat) said that, if the Commission wished to retain paragraph 2, the wording within square brackets could be made more specific in order to make its purpose clearer and to make it consistent with similar placeholder paragraphs in articles 76, 77 and 79, which gave more precise indications of what needed to be specified by the enacting State. He suggested changing the words within square brackets to read "any conditions, or provisions of other law, to be specified by the enacting State". That would make it clear that enacting States were to insert any specific provisions of their civil law which applied.

26. **Mr. Tosato** (Italy) said that the word "recognized" in paragraph 4 should be deleted or changed. If it was retained, the Guide to Enactment should make it very clear that "recognized markets" did not refer specifically to stock markets.

27. **Ms. Walsh** (Canada) said that paragraph 4 should be deleted, as its provisions did not belong in article 75. They should appear only in article 76, in line with recommendation 149 of the Secured Transactions Guide.

28. **Mr. Tirado Martí** (Spain) said that his delegation had changed its opinion and was now in favour of deleting the reference to recognized markets in paragraph 4. References to listed markets were not applicable, as the provision did not apply to intermediated securities. The term "recognized market" had no intrinsic meaning in Spanish or in his country.

29. **Mr. Bazinas** (Secretariat) said that the Working Group had made a deliberate decision to include paragraph 4 so that articles 75 and 76 would take the same approach with regard to giving notice and preventing delays in repossession in cases where a delay could have a negative impact on the value of the encumbered asset.

30. **Mr. Dennis** (United States of America) asked for clarification of the intention of paragraph 2. If it referred only to rules of procedure that a State might have, it could probably be deleted. If it referred to substantive limitations on the right to take possession, it might need to be included, but that would require further discussion.

31. With regard to paragraph 4, his delegation's intention was not to reverse the Working Group's decision but merely to ensure that the paragraph was clearly worded.

32. **Mr. Whittaker** (Australia) said that the reference to recognized markets should be deleted from paragraph 4, but the rest of the paragraph should be retained, as there would be little point in giving secured creditors the right to dispose of perishable assets quickly if article 75 did not enable them to take possession of those assets quickly. For example, under paragraph 3 (c), a grantor in possession of the assets could potentially prevent the secured creditor from taking possession and thus from exercising the right to dispose of the assets that was provided for in article 76.

33. **Ms. Walsh** (Canada) said that it made little difference whether paragraph 4 was retained or not, since it did not specify how far in advance the notice of the intent to obtain possession had to be given and therefore did not impose a significant restriction on the secured creditor, who could presumably provide the notification a very short time before taking possession of the goods. It was not clear from article 75 whether or not secured creditors had to give notice of default if they did not intend to obtain possession of the assets.

34. **Mr. Tirado Martí** (Spain) said that paragraph 4 should be retained; his delegation had only proposed removing the reference to recognized markets. Paragraph 2 should also be retained.

35. **Mr. Weise** (American Bar Association) said that the first two exceptions mentioned in paragraph 4 of article 75 were very important, as they supported and reinforced the right established in article 76, paragraph 8, to sell assets before they declined speedily in value.

36. **Ms. Gullifer** (United Kingdom) said that paragraph 4 should remain, but without the reference to recognized markets.

37. **The Chair** said he took it that the Commission wished to approve article 75, removing paragraph 2 in its entirety and deleting the phrase "or is of a kind sold on a recognized market" from paragraph 4.

38. *It was so decided*.

Article 76

39. **Mr. Bazinas** (Secretariat) suggested a number of editorial changes to article 76. In paragraph 1, the word "either" should be inserted before the words "by applying or without applying". In the chapeau of paragraph 4, the phrase "decides to sell or otherwise dispose of, lease or license an encumbered asset" should be replaced by the phrase "decides to exercise the right provided in paragraph 1", to mirror the wording in paragraphs 2 and 3. Paragraphs 5, 6 and 8 should be amended to begin with the words "The notice referred to in paragraph 4" instead of "The notice".

40. The Commission might also wish to consider a substantive amendment to paragraph 7 to take into account all the recipients of the notice, not just the grantor. The wording of paragraphs 6 and 7 was taken from recommendation 151 (c) of the Secured Transactions Guide, which had been modelled on article 16, paragraph 1, of the United Nations Convention on the Assignment of Receivables in International Trade. The second sentence of article 16, paragraph 1, of the Convention, which corresponded to paragraph 7 of article 76 of the draft Model Law, established a safe harbour rule protecting the secured creditor. Article 16 of the Convention provided that notice was sufficient if it was given "in the language of the original contract", because the recipient of the notice was a single "debtor", who was a party to the original contract. However, recommendation 151 (c) of the Secured Transactions Guide referred to "recipients" of the notice. Similarly, although

paragraph 7 of article 76 of the draft Model Law referred to only one recipient, "the grantor", paragraph 4 of that article listed multiple recipients. Recommendation 151 (c) and paragraph 7 of article 76 both stated that notice was sufficient if it was given "in the language of the security agreement", but that might not be the most appropriate language for the notice if multiple recipients were taken into account. One possible solution would be to stipulate that the language of the notice should be the official language of the enacting State. However, such a provision would not be useful if the applicable law was a law other than that of the enacting State. Another option would be to provide that the notice should be given in the language of the relevant Registry.

41. **Ms. Gullifer** (United Kingdom) said that the suggested new wording for paragraphs 5, 6 and 8 was problematic, as paragraph 4 referred to more than one notice. She proposed using the phrase "The notice of the secured creditor's intention" instead.

42. **Ms. Walsh** (Canada) proposed using the wording suggested by the Secretariat for paragraphs 5, 6 and 8 but changing the word "notifies" to "informs" in subparagraph 4 (b) to avoid confusion.

43. **Mr. Bazinas** (Secretariat) said that changing the wording of subparagraph 4 (b) would not, in itself, solve the problem, as paragraph 4 would still refer to more than one notice: the notice of the secured creditor's intention and, in subparagraph 4 (c), a notice in the Registry. He therefore suggested using the wording proposed by the representative of the United Kingdom.

44. **Ms. Gullifer** (United Kingdom) said that the amendment to subparagraph 4 (b) proposed by the delegation of Canada would address her concerns. The reference to a notice in subparagraph 4 (c) was unlikely to confuse the reader, as it referred to a registered notice, whereas paragraphs 5, 6 and 8 clearly referred to a notice between the parties.

45. **Ms. Walsh** (Canada) said that stipulating, in paragraph 7, that the language of the notice should be the language of the relevant Registry would only establish a partial safe harbour, as the security right being enforced could have been made effective through a method other than registration. Her delegation therefore did not support the suggested amendment.

46. **Mr. Weise** (American Bar Association) said that it would be better to provide a partial safe harbour than no safe harbour at all. Otherwise, there would be no guideline other than that the language must be "reasonably expected to inform the recipient". Since secured creditors receiving the notice must have chosen to enter into a transaction that required registration in a particular State, it would not be unfair for them to receive the notice in a language determined on the basis of that registration. The Model Law could not cover every contingency; its purpose was to establish general rules that would be applicable most of the time. Therefore, it would be useful to include in paragraph 7 a clear and objective rule covering the vast majority of circumstances.

47. **Mr. Sono** (Japan) proposed that the words "referred to in paragraph 4" should be inserted after the word "notice" in paragraph 7, in line with the amendments that had been made to paragraphs 5, 6 and 8.

48. **Ms. Walsh** (Canada) said that the phrase "at least [a short period of time to be specified by the enacting State] before the notice is sent" should be deleted from subparagraphs 4 (b) and (c), as her delegation had indicated in its written comments. Third parties whose rights would be affected by the enforcement action should be entitled to notice of the intent of the secured creditor as long as they registered or provided notice of their security right at any time before the notice from the secured creditor was sent, in line with the approach taken in national laws that included similar requirements. If States were given the option of specifying the period of time, the Guide to Enactment should state that the period should be no more than 24 hours, in order to avoid prejudicing the rights of third parties with a direct interest in the collateral against which enforcement action was being exercised. The same problem existed in article 78, subparagraphs 2 (b) and (c).

49. **Mr. Whittaker** (Australia) said that he understood the concerns expressed by the representative of Canada but felt that the secured creditor should be allowed some time to organize the sending of the notices. It would be appropriate to specify in the Guide to Enactment that the period of time should be very short. He also proposed that the reference to recognized markets should be deleted from paragraph 8, in line with the amendments that had been made to article 75, paragraph 4.

50. **Ms. Walsh** (Canada) said that, if the references to a short period of time to be specified by the enacting State were retained in subparagraphs 4 (b) and (c), the Guide to Enactment should highlight the potential prejudice to third parties if the period was not extremely short.

51. Her delegation did not support the deletion of the reference to recognized markets in paragraph 8, because that paragraph was useful and had been copied directly from recommendation 149 of the Secured Transactions Guide. The normal requirement to give 30 days' notice of disposition of assets was unnecessary and should be dispensed with when the goods were sold on a market where the prices were determined by objective forces beyond the control of the buyer and seller.

52. **Ms. Gullifer** (United Kingdom) said that her delegation supported the retention of the reference to recognized markets in paragraph 8, for the reasons set out by the representative of Canada.

53. **Mr. Whittaker** (Australia) said that he had proposed removing the reference to recognized markets from paragraph 8 for the same reasons that had motivated his similar proposal in relation to article 75, paragraph 4. For example, if shares over which a security right had been granted constituted a controlling stake in a company, the grantor should be given the opportunity to pay the secured creditor in full and retain the controlling stake, since the grantor might not be in a position to acquire a fresh controlling stake on the market.

54. **Mr. Kwon** Young Joon (Republic of Korea) said that the reference to recognized markets should be retained in paragraph 8, for the reasons his delegation had given concerning article 75, paragraph 4. In many jurisdictions the notification process was very lengthy, and not requiring notification would facilitate the swift enforcement of the security right.

55. His delegation supported the deletion of the reference to a short period of time in subparagraphs 4 (b) and (c), for the reasons set out by the representative of Canada.

56. **Mr. Riffard** (France) said that his delegation wished to retain paragraph 8 of article 76. Although the reference to a "recognized market" was open to discussion, it was essential for the reasons previously mentioned. Its removal would jeopardize 14 years of discussion on the issue. The price of the asset in question was fixed in the case of an official market; it was therefore not necessary to protect the secured creditor by requiring advance notice.

57. **Mr. Henning** (United States of America) said that his delegation supported the retention of paragraph 8. The point made by the representative of Australia could be accommodated in the Guide to Enactment. While there was a recognized market for shares in a company, there was not a recognized market for a controlling stake. Paragraph 8 would not justify selling a controlling stake without giving the appropriate notices. The issue concerned the interpretation of the paragraph; there was no justification for removal of the entire rule, which covered many other simpler situations.

58. **The Chair** said he took it that the Commission wished to approve article 76, incorporating the editorial changes to paragraphs 1, 4, 5, 6 and 8 suggested by the Secretariat and the editorial change to paragraph 7 proposed by the representative of Japan; changing "notifies" to "informs" in subparagraph 4 (b); and retaining the text in square brackets in subparagraphs 4 (b) and (c) while including an explanation, in the Guide to Enactment, that the period of time referred to in those subparagraphs should be very brief. He also took it that the Commission wished to retain paragraph 8 and to clarify what was meant by "recognized market" in the Guide to Enactment.

59. *It was so decided*.

Article 77

60. **Mr. Bazinas** (Secretariat), referring to the title of article 77, said that one State had pointed out that the manner in which a secured creditor distributed proceeds was not necessarily a right but an obligation. Moreover, paragraph 3 dealt not with distribution but with the debtor's liability for any deficiency. Accordingly, it had been suggested that the title should be changed to read "Distribution of the proceeds of a disposition of an encumbered asset and debtor's liability for any deficiency".

61. There were two issues with paragraph 3. Firstly, the point had been made that the word "shortfall" should be replaced with the word "deficiency". However, if the word "amount" were to replace the word "shortfall", the rest of the sentence would retain the same meaning and avoid the use of a term that might not fit or translate well into other languages. Secondly, if the debtor had a claim against the secured creditor, either under the agreement or for violations of the standards of conduct set out in article 4 or of the provisions contained in chapter VII of the Model Law, the debtor would have a right of set-off. A claim for deficiency should thus be reduced by any amount owed to the debtor by the secured creditor for failure to comply with those provisions. Should the Commission decide to address that issue, it could do so in article 77, paragraph 3, or in article 4. It could also refer to such set-offs of counterclaims that the debtor might have against the secured creditor in the Guide to Enactment.

62. **Mr. Tirado Martí** (Spain) said that there appeared to be a redundancy in subparagraph 2 (a). The phrase "net proceeds" meant precisely that proceeds were deducted from the original cost of enforcement. The Commission should delete either the word "net" or the phrase "after deducting the reasonable cost of enforcement". As it stood, the subparagraph conveyed the idea that preferential claims might have priority over the costs of enforcement. However, the cost of enforcement should be paid before anything else.

63. With respect to the Secretariat's suggestion concerning paragraph 3, the definition of the term "set-off" varied from one country to another. The inclusion of such a rule in that location seemed odd; his delegation would prefer to see it in the Guide to Enactment.

64. **Ms. Gullifer** (United Kingdom) said that her delegation supported the Spanish delegation's proposal to resolve the redundancy in subparagraph 2 (a) by removing the word "net". With respect to paragraph 3, it was understood that the amount owing would be reduced by any set-off that applied. It would be odd to mention one particular cross-claim but not other cross-claims that could be set off under particular laws.

65. **Mr. Kwon** Young Joon (Republic of Korea) said he agreed that the issue of set-offs arising from non-compliance should be covered in the Guide to Enactment, not in paragraph 3.

66. **Mr. Foëx** (Switzerland) said that his delegation preferred not to modify paragraph 3.

67. **Mr. Weise** (American Bar Association) said that the concept behind the suggested additional wording in paragraph 3 was important. The Model Law contained elaborate provisions to protect grantors, yet article 4 referred only vaguely to consequences for non-compliance by a secured creditor. The type of set-off and whether it was characterized as a set-off or a liability for the secured creditor did not matter. However, the kind of set-off under discussion was unlike others where there might be cross-claims between the grantor and the secured creditor. In practice, a huge proportion of the disputes that arose between grantors and secured creditors concerned the secured creditor's compliance with both the specific requirements of notice and commercially reasonable requirements in connection with the enforcement of the security right. Beyond the Guide to Enactment, and in addition to the general reference contained in article 4, it would be useful to indicate that there was a consequence if the secured creditor failed to follow the rules in question.

68. **Mr. Foëx** (Switzerland) said that the system outlined in paragraph 2 (b) could work properly only if the enforcing secured creditor reported on how the proceeds of disposition had been applied. That was an action explicitly required by some laws. The secured creditor had an implicit obligation to provide a breakdown when remitting a balance, which could be mentioned in the Guide to Enactment.

69. **The Chair** said he took it that the Commission wished to approve article 77, deleting the word "net" from subparagraph 2 (a) and retaining paragraph 3 as it stood, while providing additional clarification in the Guide to Enactment.

70. *It was so decided*.

Article 78

71. **Mr. Bazinas** (Secretariat) said that one State had commented that the first part of subparagraph 3 (a) of article 78 should be modified to read "A statement of the amount required at the time the proposal is given to satisfy the secured obligation", so as to align the text with that of article 76, subparagraph 5 (b). It had also been suggested that the cases covered in paragraph 4 should be addressed in two separate paragraphs, rather than two subparagraphs. The beginning of paragraph 4 would read "A secured creditor that has made a proposal for the acquisition of an encumbered asset in full satisfaction of the secured obligation acquires the encumbered asset unless it receives an objection in writing from any person entitled to receive the proposal under paragraph 2", and the rest of the text would be taken from subparagraph 4 (a). Subparagraph 4 (b) would then become paragraph 5, and would read "A secured creditor that has made a proposal for the acquisition of the encumbered asset in partial satisfaction of the secured obligation acquires the encumbered asset only if it receives the affirmative consent in writing of all persons entitled to receive the proposal under paragraph 2 within [a short period of time to be specified by the enacting State] after the proposal is received by each of them". The following paragraph would then be renumbered as paragraph 6.

72. The issue referred to in the note to the Commission after article 78 should also be addressed. It could be argued that the time period mentioned in subparagraph 4 (b) was discussed in the commentary of the Secured Transactions Guide and that the Working Group had approved it. The Secretariat was not necessarily suggesting that the time period should be deleted, but rather sought to inform the Commission of the issue.

73. Finally, with regard to the existing paragraph 4 (b), the term "affirmative consent" raised the question of whether it was possible to have "negative consent". It might be sufficient to say "consent in writing" or "explicit consent in writing".

74. **Mr. Kwon** Young Joon (Republic of Korea) said that the word "affirmative" was unnecessary and should be deleted. The idea of consent in writing was sufficient.

75. **Mr. Whittaker** (Australia) said he agreed that the word "consent" should be used without a qualifying adjective, as had been done in a number of places in the draft Model Law.

76. **Mr. Weise** (American Bar Association) said that the phrase "in writing" ensured that silence could not be construed as consent.

77. **The Chair** said he took it that the Commission wished to approve article 78, deleting the word "affirmative" from subparagraph 4 (b) and adopting the amendments read out by the Secretariat.

78. *It was so decided*.

Article 79

79. **Mr. Bazinas** (Secretariat) said that one State had proposed that, in paragraph 1 of article 79, which dealt with judicial enforcement, the words "except rights that have priority over the right of the enforcing secured creditor" should be deleted. To make it clear that the text in the square brackets was a question put to the enacting State, the words "or not" could be added after the word "whether". The same change was also suggested for paragraph 2. Concerning paragraph 5, he drew attention to the note to the Commission after article 79, in which the Commission was asked to decide whether the bracketed text should be retained.

80. **Mr. Whittaker** (Australia) said that his delegation saw value in retaining the bracketed text in paragraph 5. If the buyer from the secured creditor was aware of any non-compliance with the chapter under discussion, in particular non-compliance in bad faith, the buyer should not necessarily acquire the rights free of any third-party rights.

81. **The Chair** said he took it that the Commission wished to approve article 79, incorporating the amendments read out by the Secretariat and retaining the bracketed text in paragraph 5 outside square brackets.

82. *It was so decided*.

Article 79 bis

83. **Mr. Bazinas** (Secretariat) said that the draft Model Law contained several references to the possibility of setting, in the security agreement and in the notice to be registered, a maximum amount up to which the security right could be enforced, yet there was no equivalent provision in the chapter on enforcement. Consequently, one State had proposed the addition of an article 79 bis, entitled "Enforcement of a security right up to a maximum amount". The text would read "If the maximum amount entered in an initial or amendment notice is lower than that indicated in the security agreement to which the notice relates, the security right to which the notice relates may be enforced only in respect of the amount entered in the registered notice". Article 79 bis could be accompanied by a footnote indicating that the provision would be necessary if the enacting State included in its legislation article 6, subparagraph 3 (d), and article 42, paragraph 3, of the draft Model Law, as well as article 8, paragraph (e), article 20, subparagraph 2 (b), and article 24, paragraph 4, of the draft Model Registry-related Provisions.

84. **Mr. Riffard** (France) said that, while the issue should be covered in the Model Law, his delegation had some reservations with respect to the proposed wording of the new article, which might work in a situation with several competing creditors but not with just one. Where there were

a number of competing creditors, it was reasonable that the rights of the enforcing secured creditor should be limited to the amount mentioned in the notice, as that was the only document to which the other creditors could refer. However, his delegation did not understand why, in the relationship between the grantor and the secured creditor, the amount cited in the notice should prevail over the one established in the security agreement. The proposed new article should distinguish between the two cases, namely the relationship between a secured creditor and other competing creditors and the relationship between a secured creditor and the grantor.

85. **Mr. Whittaker** (Australia) said that his delegation saw merit in the observation made by the representative of France. In addition, the text of the proposed article 79 bis referred several times to a "notice", but concluded with a reference to a "registered notice". The word "registered" should perhaps be deleted.

86. **Mr. Kwon** Young Joon (Republic of Korea) said that his delegation understood the proposed article 79 bis as addressing the discrepancy between the maximum amount indicated in the security agreement and the maximum amount actually entered in an initial or amendment notice. For example, if a security agreement indicated a maximum amount of 10 million euros, but a maximum amount of 8 million euros was entered in a notice, then the latter amount would prevail.

87. There was also a potential discrepancy between the incurred amount of a secured obligation and the maximum amount entered in a notice. For example, if the amount of the obligation was 10 million euros, but the maximum amount entered in a notice was only 8 million euros, then the security right could only be enforced up to 8 million euros. Such cases should be addressed if the Commission planned to insert a new provision relating to the maximum enforceable amount.

88. **Ms. Walsh** (Canada), addressing the point raised by the delegation of the Republic of Korea, proposed amending article 79 bis to read "enforced only up to the amount entered in the registered notice". The Guide to Enactment could then explain that, if the current outstanding secured obligation was less than the amount stated in the notice, enforcement could occur only up to the amount that was still owing.

89. She agreed with the representative of France that the amount in a registered notice should bind only the secured creditor in a competition. When there were other competing claimants, the wording should perhaps be modified to state that the "security right may be enforced as against competing claimants only in respect of the amount entered in the notice". In a purely bilateral context, however, the amount stated in the security agreement was the relevant amount.

90. **Mr. Cohen** (United States of America) said that his delegation was uncertain whether a reference to "competing claimants" was the most appropriate wording, and called on the Secretariat to address that issue. The key point was that the limitation in the registered notice had to do with priority. If there was one secured creditor and the amount incurred by a grantor was greater than the amount shown in the registered notice, then the contractually incurred amount must be the amount to which the secured creditor was entitled.

91. **Mr. Whittaker** (Australia) said that it was not strictly a question of the amount in respect of which a secured creditor could enforce its security right, but rather of the order in which enforcement proceeds were applied. Where there was a maximum amount for a particular secured creditor, that creditor should receive only the amount that it was owed up to the amount stipulated in the register, ahead of other secured claimants. However, it might be able to recover the balance at the end of the process, once other creditors had been paid.

92. **Ms. Walsh** (Canada) said that her delegation did not understand the maximum amount limitation in that way, but rather as limiting the amount for which a given party was secured if there were any other creditors. If there were no competing claimants, the amount contractually agreed should be recoverable through secured enforcement mechanisms. However, if there were competing claimants, the purpose of specifying a maximum amount in the registered notice was to limit the amount for which a particular claimant was secured. Her delegation did not wish to allow the security to be recovered over and above the amount entered in the registered notice, except as against the grantor and when there were no other creditors or buyers.

93. **Mr. Sono** (Japan) said that if the application of the new article was limited to situations where there were competing claimants, as proposed by the delegation of France, then such a provision would not be necessary. In situations where there were no competing claimants, a secured creditor with a maximum limit could always exceed the limit as an unsecured creditor.

94. **Mr. Brink** (Factors Chain International and European Union Federation for the Factoring and Commercial Finance Industry) said that unsecured creditors might have an interest in preserving certain assets free of encumbrances. If article 79 bis was adopted as proposed, it would address the situation of unsecured creditors. However, if the changes proposed by the delegation of France were incorporated, the article would fall short of protecting unsecured creditors or other parties interested in preserving assets free of encumbrances.

95. **Mr. Bazinas** (Secretariat) said that if there were no competing creditors with a right in the asset, the secured creditor might be able to recover as an unsecured creditor. However, that did not address the fact that the secured creditor had a secured claim against the grantor. If there were no competing claimants with rights in the asset, in principle there was no reason why secured creditors should be treated as unsecured creditors. The indication of different maximum amounts in the registered notice and in the security agreement did not mean that the higher amount listed in the security agreement was not the amount of the secured obligation or that the lower amount listed in the notice would require the secured creditor to be treated as an unsecured creditor for the additional amount exceeding the amount stipulated in the notice.

96. **Mr. Weise** (American Bar Association) said that the rule should apply only with respect to competing claimants.

If there were other unsecured creditors and they obtained a judicial lien of some kind, they would become competing claimants and be entitled to protection. He suggested that the words "against competing claimants" should be added after the words "the security right to which the notice relates may be enforced" in article 79 bis. If there was a discrepancy between the amounts indicated in the security agreement and the notice, and if all other competing claimants had been paid, there was no reason not to let the secured creditor enforce up to the maximum amount stated in the security agreement. Once all other competing claimants had been paid, the situation became identical to one in which there had been no competing claimants.

97. **Ms. Gullifer** (United Kingdom) said that the Secured Transactions Guide, in recommendation 14, supported the possibility of including a maximum amount, "if the State determines that such an indication would be helpful to facilitate subordinate lending". That clearly referred to competing claimants. More time was required to reflect on the wording "enforced as against competing claimants", as it was actually a matter of enforcing against the debtor.

98. **Ms. Walsh** (Canada) said that, if all competing claimants had been paid, the rule would apply and there was no need to elaborate further. Her delegation proposed the wording "enforced only in respect of the amount entered into the registered notice, unless there are no competing claimants".

99. **The Chair** said that the group of friends of the Chair would meet to address those issues.

Article 80

100. *Article 80 was approved.*

Article 81

101. **Mr. Bazinas** (Secretariat) said that, in light of the amendments made to article 2, it might be advisable to add the words "by agreement" after the phrase "In the case of an outright transfer of a receivable". The same words could also be added to the title of the article.

102. In view of the Commission's decision that articles 70 to 80 should not apply to outright transfers, he suggested that paragraphs 3 and 5 of article 80 should be reiterated in article 81 to ensure that they would apply to outright transfers.

103. **Ms. Gullifer** (United Kingdom) asked whether the wording of the new paragraphs to be added to article 81 would be identical to, or adapted from, the wording in article 80.

104. **Ms. Walsh** (Canada) said that, for the sake of brevity, article 81 could include a cross reference to article 80, paragraphs 3 and 5, rather than repeating their wording in full.

105. **Mr. Whittaker** (Australia) said that incorporating article 80, paragraph 3, by cross-referencing it in article 81 would not work, as article 80, paragraph 3, in turn cross-referenced secured creditors' right to collect under article 80, paragraphs 1 and 2, and was not relevant to outright transfers. It would be better to restate those principles in new paragraphs in article 81.

106. **Mr. Weise** (American Bar Association) said that the use of the word "default" in article 81 was not quite appropriate, as the default of the grantor was irrelevant to the rights of the secured creditor. The paragraph should be reformulated to indicate that the right of the secured creditor (the buyer) to enforce existed regardless of anything the transferor did. As the owner, the buyer could disregard the status of the transferor.

107. **Ms. Walsh** (Canada) said that it would suffice to say "at any time" rather than "before or after default of the transferor". That would be a rule subject to contrary agreement. If the agreement between the transferor and the transferee imposed conditions on the entitlement to collect, those would override the default rule.

108. **Mr. Bazinas** (Secretariat) said that, if the proposals made by delegations were adopted, article 81 would read "In the case of an outright transfer of a receivable by agreement, the transferee is entitled to collect the receivable at any time". A new paragraph 2 would read "An outright transferee exercising the right to collect under paragraph 1 is also entitled to enforce any personal or property right that secures or supports payment of the receivable". A new paragraph 3 would read "The right of the outright transferee to collect under paragraphs 1 and 2 is subject to articles 59 to 69".

109. **Mr. Weise** (American Bar Association) said that perhaps the Guide to Enactment should explain that the phrase "at any time" did not override any provisions of the assigned receivable regarding the time at which payment was due. The buyer could not accelerate the payment to a date earlier than that provided for in the contract for the assigned receivable.

110. **Ms. Walsh** (Canada) asked whether it was necessary to repeat "outright" in paragraphs 2 and 3, since the word was already used in paragraph 1.

111. **Mr. Brink** (Factors Chain International and European Union Federation for the Factoring and Commercial Finance Industry) said that it was preferable to be specific so as to distinguish outright transferees from the secured creditors mentioned in article 80. As the draft Model Law was full of confusing cross references, the Commission should make the text clearer for legislators by preserving the word "outright".

112. **Mr. Bazinas** (Secretariat) said that the reference to an outright transferee in the title and in paragraph 1 might be sufficient. He suggested that paragraph 1 should clarify that the transferee was entitled "to collect the receivable at any time, in accordance with the contract giving rights to the receivable", in order to avoid giving the impression that "at any time" applied irrespective of when the receivable became due under the contract giving rights.

113. **Ms. Gullifer** (United Kingdom) said that it was necessary to exercise caution in referring to the contract giving rights, as the terms of the contract giving rights to the receivable might in fact state that the receivable could not be assigned at all. While that was overridden by the previous section, it might be necessary to refer specifically to the terms on when the receivable was due. She proposed that the end of the sentence should be reworded to read "the transferee is entitled to collect the receivable at any time after payment has become due".

114. **The Chair** said he took it that the Commission wished to approve the new version of article 81 read out by the Secretariat, with the amendments made to paragraph 1 and without the repetition of "outright" in new paragraphs 2 and 3.

115. *It was so decided*.

Article 82

116. *Article 82 was approved*.

The meeting rose at 1 p.m.

Finalization and adoption of a draft Model Law on Secured Transactions
(*continued*)

Summary record of the 1029th meeting, held at Headquarters, New York, on Wednesday, 29 June 2016, at 3 p.m.

[A/CN.9/SR.1029]

Chairperson: Mr. Labardini Flores (Vice-Chair) (Mexico)

Contents

In the absence of Mr. Kenfack Douajni (Cameroon), Mr. Labardini Flores (Mexico), Vice-Chair, took the Chair.

The meeting was called to order at 3.05 p.m.

Agenda item 4: Consideration of issues in the area of security interests (*continued*)

(a) Finalization and adoption of a draft Model Law on Secured Transactions (*continued*) (A/CN.9/865, A/CN.9/871, A/CN.9/884, A/CN.9/884/Add.1, A/CN.9/884/Add.2, A/CN.9/884/Add.3, A/CN.9/884/Add.4, A/CN.9/886, A/CN.9/887 and A/CN.9/887/Add.1)

1. **The Chair** invited the Commission to resume its consideration of the draft Model Law, focusing on the articles contained in document A/CN.9/884/Add.4.

Article 83

2. **Mr. Cohen** (United States of America), supported by **Mr. Deschamps** (Canada), said that, in paragraph 2, the words "as against a competing security right made effective against third parties by another method" should be replaced with the words "as against a competing claimant", to ensure that the conflict-of-laws rule also covered competing claimants that were not secured creditors, such as judgment creditors that obtained a right in the tangible asset.

3. **Mr. Li** Zhi (Wuhan University Institute of International Law) asked whether, in subparagraph 4 (b), the "short period of time" referred to in the square brackets corresponded to an existing international standard or normal practice.

4. **The Chair** said that the time period would be determined by each State.

5. **Mr. Bazinas** (Secretariat) suggested that, in paragraph 4, the words "may be created and made effective" should be amended to read "may also be created and made effective". In addition, the Commission might wish to delete subparagraph 4 (a), as it merely repeated the *lex situs* rule in paragraph 1, and retain subparagraph 4 (b) as a special rule for goods in transit, security rights in which could be created and made effective against third parties under the laws of the destination country even before the goods arrived in that country. Each State was responsible for establishing an appropriate time period, taking into account such factors as mode of transport.

6. While the Commission had yet to decide on the United States proposal concerning paragraph 2, he suggested that the proposed wording should be changed from "as against a competing claimant" to "as against the right of a competing claimant", since the sentence concerned the priority of one right over another right.

7. **The Chair** said he took it that the Commission wished to approve article 83, incorporating the amendment to paragraph 2 that had been proposed by the representative of the United States and modified at the suggestion of the Secretariat, as well as the Secretariat's suggestions that the word "also" should be added to paragraph 4, subparagraph 4 (a) should be deleted and the wording of subparagraph 4 (b) should be included in the chapeau.

8. *It was so decided.*

Article 84

9. *Article 84 was approved.*

Article 85

10. **Mr. Bazinas** (Secretariat) said that, in order to improve the clarity of article 85, the Commission might wish to amend the words "a receivable that arises from the sale or lease of, or is secured by, immovable property" to read "a receivable that either arises from the sale or lease of immovable property or is secured by immovable property".

11. In addition, to resolve the policy issue referred to in the note to the Commission after article 85, the Commission could decide either that the rule in that article should not apply to any receivables secured by immovable property, or that the rule should be limited to receivables secured by immovable property that was identified or identifiable in the contract giving rise to the receivable, which the secured creditor must be aware of and have an opportunity to examine. Such a change would allow the secured creditor to know whether a different law would apply in a given situation.

12. **Mr. Whittaker** (Australia), supported by **Mr. Tirado Martí** (Spain), said that his delegation preferred the existing wording. While he agreed that it was preferable for the secured creditor not to be surprised by the fact that its priority was regulated in part by the law of a jurisdiction of which it had previously been unaware, if the secured creditor had not been aware of the existence of the land as being part of its security package it would not have taken the value of that land into consideration in deciding how much financing to provide initially. On the other hand, a competing claimant with a registered right in the land registry of one country might be very surprised to find that it was subject to a priority competition with a claim of which it had previously been unaware and which was regulated by the laws of another country. Priority should be given to the immovable land registry in such cases.

13. **Mr. Deschamps** (Canada) said that his delegation supported the changes suggested by the Secretariat, for the reasons stated by the Secretariat.

14. **Mr. Cohen** (United States of America) and **Mr. Kwon** Young Joon (Republic of Korea) said that the words "either" and "immovable property" should be added but no other changes should be made.

15. **The Chair** said he took it that the Commission wished to approve article 85, amending the words "a receivable that arises from the sale or lease of, or is secured by, immovable property" to read "a receivable that either arises from the sale or lease of immovable property or is secured by immovable property" but making no further changes.

16. *It was so decided.*

Article 86

17. **Mr. Bazinas** (Secretariat), drawing attention to the note to the Commission after article 86, said that the Commission might wish to retain the wording of only one of the two optional phrases in square brackets in subparagraph (a).

18. **Mr. Deschamps** (Canada) said that his delegation preferred the text in the second set of square brackets, as it provided greater certainty and made it possible to locate the connecting factor at a particular time.

19. **Mr. Henning** (United States of America) said that his delegation preferred the text in the first set of square brackets, which should be amended to read "the relevant act of enforcement takes place".

20. **Mr. Tirado Martí** (Spain) said that his delegation preferred the text in the second set of square brackets, as it provided greater certainty by establishing where enforcement would take place.

21. **Mr. Whittaker** (Australia) said that his delegation preferred the text in the second set of square brackets. It reflected the fact that, in most cases, the enforcement action would need to be taken against the asset, making it more practical to use the law of the State where the asset was located.

22. **Ms. Yamanaka** (Japan) said that her delegation preferred the text in the second set of square brackets.

23. **Mr. Kwon** Young Joon (Republic of Korea) asked whether there was any practical difference between the contents of the two sets of square brackets and whether, for instance, enforcement could take place somewhere other than the location of the asset.

24. **Mr. Weise** (American Bar Association) said that there could be significant differences if assets were located in more than one State. If the text in the first set of square brackets was adopted, the grantor could have tangible assets in many different States but the secured creditor could choose to conduct the auction in a State that was not one of those States. However, if the text in the second set of square brackets was adopted, the secured creditor would have to conduct the auction in each State where there was a physical asset.

25. **Mr. Deschamps** (Canada) said that, if the secured creditor wished to sell assets located in different States, the text in the second set of square brackets would not require the secured creditor to conduct several different sales. The secured creditor could bring together and sell the assets in one State, but the law applicable to the sale as an enforcement remedy would be the law of the State where the encumbered assets were located at the time of commencement of the enforcement. However, if the assets were located in different States at the time of commencement of the enforcement, it was unclear whether the enforcement would commence at the same time in all States or whether there would be a prevailing time.

26. Furthermore, while the change proposed by the representative of the United States would make the text more precise, it would imply that a different law could apply to each act of enforcement, without defining what was meant by an act of enforcement. Enforcement would have be divided into several components, as some lawyers would consider a series of actions to constitute a single act, while others would require a series of actions to be divided into a certain number. The text in the first set of square brackets would therefore not provide greater certainty.

27. **Mr. Riffard** (France) said that his delegation preferred the text in the second set of square brackets. With regard to the question posed by the representative of the Republic of Korea, there would not be a significant practical difference between the options in square brackets in modes of enforcement relating only to the repossession and sale of assets, as *lex loci rei sitae* would apply. However, in situations involving a proposal to acquire assets in satisfaction of the secured obligation, if the creditor and the assets were located in different States, the text in the second set of square brackets provided clarity by giving an objective indication that the place of enforcement was the place where the assets were located.

28. **Mr. Henning** (United States of America) said that enforcement might typically begin with the repossession of an asset. In a situation where encumbered assets were located in multiple States, the conditions set out in the second set of square brackets would require the use of the procedures of the States in which repossession took place, even if the assets were combined and sold in one location. It would be a difficult and complicated situation in which multiple, potentially inconsistent, procedures would need to be followed.

29. Regarding the Canadian delegation's comments on the proposal to refer to "the relevant act of enforcement", he agreed that different courts could interpret the phrase in different ways, but believed that the potential ambiguities were not as significant as had been suggested. The relevant act of enforcement would determine how repossession took place and provide guidance for the secured creditor, while the issue of how to give notification could be easily resolved.

30. **Mr. Weise** (American Bar Association) said that, under the text in the second set of square brackets, while the secured creditor could conduct a single physical foreclosure sale when assets were located in multiple States, that sale would have to comply with the laws of those States on an asset-by-asset basis. Compliance with multiple laws could therefore pose a problem if different States had different sets of rules on enforcement of a security right, and could interfere with the ability to sell the encumbered assets as a whole or as an operating business. Under the text in the first set of square brackets, on the other hand, one set of laws would apply to all assets. Nonetheless, a secured creditor could potentially manipulate the law under that option by referring to the State where enforcement took place, although that situation could be managed through the rules established in article 4.

31. **Mr. Bazinas** (Secretariat) said that, under the text in the second set of square brackets, if the secured creditor repossessed assets in different jurisdictions before bringing those assets into one jurisdiction and conducting a sale, that sale would have to follow the laws of the different jurisdictions. However, it was unclear what would happen under that option if the court in the State where the assets were brought and enforcement took place considered enforcement to be a procedural issue and applied *lex fori*. He asked if the forum must determine whether such issues were substantive and could be referred to the laws of another jurisdiction, and therefore whether the texts in the first and second sets of square brackets would have the same effect. While enforcement normally involved procedural issues, it could also entail substantive ones, and the qualification of those issues was decided by each forum.

32. **Mr. Deschamps** (Canada) said it was his assumption that the article dealt with substantive issues. It should be noted that the matter under discussion was irrelevant to federal countries; for example, if assets were located in different states of the United States. However, in cases of assets located in different countries, the parties would reasonably expect that the law applicable to the enforcement would be the law where the assets were located at the time when the secured creditor commenced enforcement.

33. **Mr. Henning** (United States of America) said that, although the comments made by the Secretariat were correct in the context of a judicial action, the discussion concerned private actions. *Lex fori* would not be applied, as there would not be a forum until litigation occurred at a later stage, and parties would need to know which law was applicable in order to comply with it and plan their foreclosure proceedings. It was assumed that substantive law was under discussion.

34. **The Chair** said he took it that the Commission wished to approve article 86, retaining the text in the second set of square brackets.

35. *It was so decided.*

Articles 87 and 88

36. *Articles 87 and 88 were approved.*

Article 89

37. **Mr. Cohen** (United States of America) said that, while his delegation agreed with the policy set out in article 89, the meaning of the phrase "at the time the issue arises" in subparagraph 1 (b) was unclear. Third-party effectiveness and priority issues could arise when parties were considering what action to take and which State's laws they should follow, when action was taken or when action was first challenged in litigation. More precise wording must be found for the Model Law, such as "when the issue first becomes relevant". A clear explanation should also be given in the Guide to Enactment, as parties to secured transactions must be able to identify the applicable law in order to comply with it.

38. **Mr. Deschamps** (Canada) said that his delegation preferred the current formulation, as the wording proposed by the United States would not provide greater clarity. The provision would require explanations and examples in the Guide to Enactment, although the rule was already found in the national laws of some countries, including Canada and the United States. In cases concerning the effectiveness of a security right against a trustee in bankruptcy, for example, it seemed clear that, if at the time of bankruptcy the security right had not been made effective, then it was not effective against the trustee. If there was a priority contest between two secured creditors, then the time the issue arose would be the time the priority contest arose; if there was litigation, the court would examine the facts as they stood at the commencement of the litigation, and a change in circumstances after the start of legal proceedings would therefore not alter the applicable law.

39. **Mr. Cohen** (United States of America) said that subparagraph 1 (b) could be fully understood only in relation to article 83, paragraph 1, and article 9. The rules in the Model Law governing the movement of assets between States assumed that once the assets had moved to a different State they were governed by the laws of the new State, including conflict-of-laws rules, but the current wording of subparagraph 1 (b) did not make that clear. As the issue could arise in non-judicial contexts, the current wording could prompt different interpretations, making it difficult for readers of chapter III (Effectiveness of a security right against third parties) and of the Registry-related Provisions to determine which State's law governed effectiveness against third parties or which State's law must be followed in registering a notice. It was inadvisable to put enacting States in such a position; an unambiguous phrase that did not require extensive explanation should therefore be found.

40. **Mr. Weise** (American Bar Association) said that determining the relevant time could be very complicated. For instance, in an insolvency proceeding, if an encumbered asset was moved from one State to another and, under the rule of continuity in third-party effectiveness, the security right in that asset temporarily remained effective in the new State, it would be expected that the court considering it in connection with the insolvency would look to the location of

the asset at the time the security right had first been made effective against third parties. The concept of relevance, as opposed to when the issue arose, would give courts more guidance and the Guide to Enactment could provide a series of examples based on the hypothetical scenarios discussed.

41. **The Chair** said he took it that the Commission wished to approve article 89 while retaining subparagraph 1 (b) in its current form, provided that the Secretariat reviewed the exact wording and the Guide to Enactment gave further clarification on the matter.

42. *It was so decided.*

Article 90

43. *Article 90 was approved.*

Article 91

44. **Mr. Tirado Martí** (Spain) said that article 91 was clearly based on the work of the Hague Conference on Private International Law with respect to the law applicable to contracts. The Model Law, however, applied only to security rights and was based on objective connections. Paragraph 4 was particularly excessive: it was unclear why, if there was an objective connection, reference would need to be made to the law of a State other than the forum State. His delegation considered that the article should be drastically reduced or deleted, but would not stand in the way of a consensus if other delegations did not agree.

45. **The Chair** said that the article resulted from the recommendations of Working Group VI. As there were no other objections, he took it that the Commission wished to approve the article without change.

46. *It was so decided.*

Article 92

47. *Article 92 was approved.*

Article 93

48. **Mr. Bazinas** (Secretariat) said that the Commission might wish to consider replacing the words "is the law applicable to" with the words "also is the law applicable to" in the chapeau of article 93, as it would provide greater clarity and align the article with the wording of recommendation 217 of the *UNCITRAL Legislative Guide on Secured Transactions*.

49. **Mr. Sono** (Japan) said that, for asset-specific rules in other chapters, it had been decided that the name of the specific asset would be referred to in the article titles. The words "Law applicable to" should therefore be deleted from the title of article 93 and all other articles in the asset-specific rules section of chapter VIII.

50. **The Chair** said he took it that the Commission wished to approve article 93, incorporating the changes put forward by the Secretariat and the representative of Japan.

51. *It was so decided.*

Articles 94, 95 and 96

52. *Articles 94, 95 and 96 were approved.*

Article 97

53. **Mr. Deschamps** (Canada), supported by **Mr. Cohen** (United States of America), **Mr. Tirado Martí** (Spain) and **Ms. Gullifer** (United Kingdom), said that his delegation supported the retention of option C, which was very straightforward, and the deletion of options A and B.

54. **Mr. Kohn** (Commercial Finance Association) said he agreed that option C was a straightforward rule; having only one option would simplify enactment and promote uniformity among States. Moreover, having the same rule for certificated and uncertificated securities would eliminate the possibility that, in the case of certificated securities, the applicable law could be that of a State in which the certificate was located but which had no relationship to the transaction in question.

55. *Article 97, as amended, was approved.*

Article 98

56. **Mr. Henning** (United States of America) said that his delegation supported the deletion of the three existing paragraphs and their replacement with the wording suggested in the note to the Commission. However, the subparagraph (b) suggested in the note was overly complicated and could be deleted. If subparagraph (b) was considered necessary, it could end after the phrase "internal conflict-of-laws rules of the State".

57. **Mr. Deschamps** (Canada) said he agreed that the existing wording should be replaced with the wording suggested in the note, including subparagraph (b). The wording in subparagraph (b) suggested in the note would address situations in federal States where internal conflict-of-laws rules might not exist at the federal level. If less detailed wording was desired, the phrase "internal conflict-of-laws rules of the State" could be replaced with "internal conflict-of-laws rules in effect in the State", although such wording might be unclear to an uninformed reader.

58. **Mr. Henning** (United States of America) said that he supported the wording proposed by the Canadian delegation. The concern over subparagraph (b) stemmed from the reference to the "law in force in the relevant territorial unit" in subparagraph (a), as the subsequent reference to "the law in force in that territorial unit" in the absence of internal conflict-of-laws rules must mean the law of the aforementioned "relevant territorial unit". As confusion could potentially arise, the Secretariat could try to align the wording more closely with recommendation 225 of the Secured Transactions Guide.

59. **Mr. Deschamps** (Canada) said that, instead of referring to "the law in force in that territorial unit", subparagraph (b) should refer to "the internal conflict-of-laws rules in force in the State or, in the absence of such rules, the internal conflict-of-laws rules in that territorial unit".

60. *The meeting was suspended at 4.30 p.m. and resumed at 4.55 p.m.*

61. **Mr. Bazinas** (Secretariat) said it was his understanding that the Commission members wished to delete the three paragraphs of article 98 and replace them with the text in the note to the Commission. The wording of subparagraph (b) would be altered to read "the internal

conflict-of-laws rules in force in that State or, in the absence of such rules, in that territorial unit", or words to that effect. Further changes to the wording might be necessary.

62. **Mr. Deschamps** (Canada) said that the intention had been to make express provision both for cases where there were federal rules and for cases where there were only rules of territorial units. However, if the phrase "in that State" was used, it would include both sets of rules. Subparagraph (b) should therefore read "the internal conflict-of-laws rules of that State or, in the absence of such rules, of that territorial unit determine the relevant territorial unit whose substantive law is to apply". With that alteration, the entire text of article 98 should be replaced with the text in the note to the Commission.

63. **Mr. Henning** (United States of America) said that he agreed with the changes proposed by the Canadian delegation, which reflected recommendation 225 of the Secured Transactions Guide.

64. **Mr. Bazinas** (Secretariat) asked whether the words "or, in the absence of such rules," were necessary. If there were no conflict-of-laws rules at the federal level, the rules of the territorial unit would apply.

65. **Mr. Deschamps** (Canada) said that the words "or, in the absence of such rules," should be retained, as otherwise the provision would mean that either the federal conflict-of-laws rules or the rules of the territorial unit could apply. The rules of the territorial unit should apply only in the absence of conflict-of-laws rules at the federal level.

66. **Mr. Henning** (United States of America) said that he agreed with the representative of Canada, as the provision should not suggest that there should be freedom of choice between federal or territorial rules.

67. **Mr. Sono** (Japan) said that, as article 98 was not an asset-specific rule, it should be moved to the end of section A of chapter VIII after article 92.

68. **The Chair** said he took it that the Commission wished to approve article 98, amending it as proposed by the representative of Canada and moving it to the end of section A of chapter VIII.

69. *It was so decided.*

Article 99

70. *Article 99 was approved.*

Article 100

71. **Mr. Cohen** (United States of America) proposed that, while the square brackets in subparagraph 1 (a) should be removed, the wording should be retained, as it allowed articles 101 and 102 to work correctly by referring to the law that the State would have applied before the effective date. The additional comments submitted in writing by his delegation (A/CN.9/886) could be addressed in the Guide to Enactment.

72. **Ms. Walsh** (Canada) said that the wording of paragraph 1 (a) should be amended to read "the law that applied under the conflict-of-laws rules of the enacting State to prior security rights immediately before the entry into force of this Law". The existing wording did not reflect the fact that the provision referred to the conflict-of-laws rules that had determined the applicable law under the prior law, rather than those that determined the applicable law under the Model Law.

73. **Mr. Cohen** (United States of America) said that he agreed with the Canadian delegation with regard to which conflict-of-laws rules were referred to in the provision. While his delegation had suggested that the point could be addressed in the Guide to Enactment, it could instead be addressed in the Model Law itself.

74. **Ms. Gullifer** (United Kingdom), supported by **Mr. Tosato** (Italy), said that the current wording of the text in square brackets should be retained. The fact that the word "applied" was in the past tense was sufficient to indicate that it did not relate to new conflict-of-laws rules. If considered necessary, the provision could be clarified in the Guide to Enactment.

75. **Ms. Walsh** (Canada) said that a phrase along the lines of "the law applicable to prior security rights under the conflict-of-laws rules of the enacting State that were in force immediately before the entry into force of this Law" might provide greater clarity.

76. **The Chair** said he took it that the Commission wished to approve article 100, removing the square brackets in subparagraph 1 (a) but retaining the wording they contained.

77. *It was so decided.*

Articles 101, 102 and 103

78. *Articles 101, 102 and 103 were approved.*

Article 104

79. **Mr. Bazinas** (Secretariat), drawing attention to the note to the Commission after article 104, said that the Commission might wish to delete the existing version of paragraph 1 and place the revised version of paragraph 1, as contained in the note, at the end of article 103, and to approve article 104 as amended.

80. *It was so decided.*

Article 105

137. *Article 105 was approved.*

The meeting rose at 5.25 p.m.

Finalization and adoption of a draft Model Law on Secured Transactions
(*continued*)

Summary record of the 1030th meeting, held at Headquarters, New York, on Thursday, 30 June 2016, at 10 a.m.

[A/CN.9/SR.1030]

Chairperson: Mr. Labardini Flores (Vice-Chair) (Mexico)

Contents

In the absence of Mr. Kenfack Douajni (Cameroon), Mr. Labardini Flores (Mexico), Vice-Chair, took the Chair.

The meeting was called to order at 10 a.m.

Agenda item 4: Consideration of issues in the area of security interests (*continued*)

(a) Finalization and adoption of a draft Model Law on Secured Transactions (*continued*) (A/CN.9/884, A/CN.9/884/Add.1, A/CN.9/884/Add.2, A/CN.9/884/Add.3 and A/CN.9/884/Add.4)

Draft article 79 bis

1. **Mr. Weise** (American Bar Association), supported by **Ms. Walsh** (Canada), **Mr. Tirado Marti** (Spain), **Mr. Henning** (United States of America), **Ms. Gullifer** (United Kingdom) and **Mr. Whittaker** (Australia), suggested that the proposed draft article 79 bis should be omitted, as the scenario it envisaged was adequately addressed in draft article 24, paragraph 6, of the draft Model Registry-related Provisions, which set out the potential consequences of an erroneous indication in a registered notice of the maximum amount to which a security right could be enforced. While the consequences provided for in draft article 24, paragraph 6, were not identical to those proposed in draft article 79 bis, the former would be adequate to address the relatively rare instances in which such errors were committed.

2. **Ms. Walsh** (Canada) said that, in limiting the maximum amount to which a security right could be enforced to the amount indicated in the financing statement when it was lower than the amount stated in the security agreement, draft article 79 bis achieved the same effect as draft article 24, paragraph 6, provided that there were competing secured creditors that had relied on the lower amount entered in the notice in making lending decisions. Buyers were also protected and would acquire the residual value of the encumbered asset in the event that they had relied upon the lower amount in the notice. Moreover, insofar as it dealt only with the scenario in which a party had relied on the amount indicated in the financing statement, draft article 24, paragraph 6, adequately addressed the concern previously expressed by the representative of France with regard to the need to ensure the enforceability of a security right up to the amount stated in the security agreement in the event that there were no competing creditors, as no grantor subject to such an agreement could claim that it had relied on the amount indicated in the financing statement. Some Commission members had expressed concern that the original proposed version of draft article 79 bis provided for the enforceability of a security right up to the amount indicated in the financing statement against all third parties, even those who could not demonstrate reliance on that amount, and that it was thus inconsistent with draft article 24, paragraph 6. It had therefore been judged preferable to eliminate draft article 79 bis and retain draft article 24, paragraph 6, on the understanding that a more extensive explanation of the consequences stemming from draft article 24, paragraph 6, would be included in the Guide to Enactment.

3. **Mr. Kwon** Young Joon (Republic of Korea) said that, as draft article 24, paragraph 6, focused only on the effectiveness of the registered notice in the event of errors in the required information, its relevance to the policy decisions contained in draft article 79 bis regarding competing claimants and the enforceability of a security right up to the maximum amount indicated in the registered notice was not immediately apparent. While the implications of draft article 24, paragraph 6, with respect to competing claimants and enforceability could be inferred by members of the Commission on close consideration of the text, the provision should be drafted to ensure that non-specialists could readily draw the same conclusion.

4. **Ms. Gullifer** (United Kingdom) said that, while draft article 24, paragraph 6, stipulated that, for a registered notice to be rendered ineffective on account of errors in the required information, third parties must have been seriously misled by the erroneous information, the original version of draft article 79 bis treated the maximum amount indicated in the registered notice as an absolute limit, irrespective of whether third parties had been misled. Hence, if draft article 79 bis were included in order to clarify the issue of enforceability, it would have to be radically redrafted to ensure consistency with draft article 24, paragraph 6. It did not need to be included, however, as it seemed logical, on the basis of draft article 24, paragraph 6, that the maximum amount indicated in the registered notice would only be enforceable to the extent that the notice was effective. Moreover, draft article 24, paragraph 6, did address the issue of competing

claimants insofar as competing secured creditors were the only third parties that could justifiably claim to have been misled; unsecured creditors could make no such claim, as their position could have been jeopardized at any point, had the debtors entered into other advances after the notice had been registered.

5. **Ms. Walsh** (Canada) said that the inclusion of draft article 79 bis had been proposed by Canada in its comments on the draft Model Law (A/CN.9/887) with the aim of concretizing draft article 24, paragraph 6. It had become apparent, however, that the proposed draft article had failed to achieve its intended purpose, in view of the inconsistency pointed out by the representative of the United Kingdom. Consequently, removing draft article 79 bis would not change any existing rule, but rather would entail a reversion to the original rule.

6. **Mr. Weise** (American Bar Association) said that the Commission's deliberations on draft article 79 bis had demonstrated the difficulty of drafting a concise and direct provision on the matter under consideration. Although the Guide to Enactment could provide further explanations as needed, it could be extrapolated from draft article 24, paragraph 6, that the persons who would rely on erroneous information in the registered notice would normally be competing claimants and that their reliance on that information would necessarily have the effect of limiting the enforceability of the security right to the amount stated in the registered notice. Draft article 24, paragraph 6, was therefore adequate to address the rare circumstances in which erroneous information was entered by the secured creditor in the registered notice.

7. **Mr. Bazinas** (Secretariat) said that the implications of draft article 24, paragraph 6, could, of course, be explained in greater detail in the Guide to Enactment. However, it was his understanding that the original proposed version of draft article 79 bis had been revised in order to bring it into line with draft article 24, paragraph 6, the revised text to read: "If the maximum amount entered in an initial or amendment notice is lower than that indicated in the security agreement to which the notice relates, the security right to which the notice relates may be enforced only up to the amount entered in the notice, unless there are no other competing claimants that relied on the maximum amount entered in the notice." He wondered whether that version was still under consideration. He believed that it presented a clearer solution for non-specialists reading the draft Model Law.

8. **Mr. Whittaker** (Australia) said that draft article 79 bis was problematic in that it presupposed that the security agreement in question indicated the specific amount secured, whereas, in the case of an "all monies" security agreement, for example, no specific amount was required that could be compared with the amount entered in the registered notice. The draft article also failed to account for the possibility of a shortfall in the amount entered in the notices registered by junior secured creditors, who should be subject to the same rules as the first-ranking secured creditor responsible for enforcing the security right. It was therefore simpler to accept the principle set out in draft article 24, paragraph 6, than to draft a more specific solution that did not apply to all relevant situations.

9. **The Chair** recalled that a law was, by definition, general in nature and would not necessarily specify every possible scenario. While the Commission's technical approach was commendable, the main objective was to draft a Model Law that was internally consistent and general enough to satisfy the relevant legal conditions, on the understanding that any inadequacies would be addressed by the courts when dealing with specific cases. The Commission should not focus unduly on exceptional circumstances but should ensure that draft article 79 bis and draft article 24, paragraph 6, were mutually consistent, should both articles be included in the draft Model Law. The difficulties faced by the experts of the Commission in seeking precise language that would address all potential scenarios was perhaps an indication that their concerns transcended the scope of the draft Model Law and that the issue should be left open-ended.

10. **Mr. Kwon** Young Joon (Republic of Korea) said that, at least in his country, the indication of a maximum secured amount in a secured transaction did not constitute an exceptional circumstance. While the commission of an error in the registered notice might be exceptional, the situation envisaged in draft article 24, paragraph 6, was, by extension, also exceptional; that did not obviate the need to address such a scenario in the draft Model Law. Given that other draft articles referred to the maximum amount for which a security right could be enforced, a provision outlining the rules for enforcing a security right in transactions in which the maximum amount indicated in the security agreement exceeded the amount indicated in the registered notice would improve the consistency of the draft Model Law. A general provision could not address every potential scenario, and draft article 24, paragraph 6, was just as inadequate as draft article 79 bis in that regard. He therefore supported the version of draft article 79 bis presented by the Secretariat, as it effectively addressed his delegation's concerns and was consistent with draft article 24, paragraph 6.

11. **Ms. Sabo** (Canada) said that both article 24, paragraph 6, and article 79 bis were to be enacted only by States that required the indication of a maximum amount in the security agreement. The problem arose in exceptional cases where the secured creditor indicated a different amount, which could only occur as the result of an error. In its current wording, article 79 bis did not make it clear that it was directly addressing that scenario and was simply a restatement of article 24, paragraph 6. For the purpose of clarification, it would therefore be necessary to redraft 79 bis to say that if the secured creditor, in error, indicated a different amount than that stated in the agreement, that amount could not be enforced against third parties that relied on the error. Not only was article 79 bis redundant, but its explanation in the Guide was also unnecessary because it expressed the general rule that a secured creditor could not claim priority over a competing claimant.

12. **Mr. Whittaker** (Australia) said that the group of Friends of the Chair was aware that the Commission could not and should not attempt to achieve a one-size-fits-all solution in drafting article 79 bis; the general rule that was already set out in article 24, paragraph 6, of the draft Model Law sufficed.

13. **Ms. Gullifer** (United Kingdom), endorsing the comments of the representatives of Canada and Australia, said that she was not sure that the draft read out by the Secretariat was consistent with article 24, paragraph 6. The redrafting that would be required to align the proposed article 79 bis with article 24, paragraph 6, was fraught with difficulty and, ultimately, unnecessary.

14. **Mr. Riffard** (France) said that he could not agree with the conclusion of the representative of Canada that the scenario in article 79 bis could arise only in error. Citing article 9 (e), which required an initial notice to contain a statement of the maximum amount for which the security right could be enforced, he said that, in France, creditors could conclude a security agreement with a debtor for an unspecified amount but that, in some cases, the legislature could enact provisions requiring that an amount be specified for purposes of publicity. In such cases, the difference between the maximum amount indicated in the notice and what was due under the agreement was not an error. Consequently, if the Commission decided to maintain article 79 bis, his delegation supported the initial draft read out by the Secretariat.

15. **Mr. Bazinas** (Secretariat) said that the Commission would recall that, during the session, the Secretariat had expressed some misgivings with regard to the words "except to the extent it seriously misled third parties" in article 24, paragraph 6, in view of the explanations given in the UNCITRAL Guide on the Implementation of a Security Rights Registry. The Guide made it clear that third parties were not misled because, if the maximum amount indicated in the notice was greater than the maximum amount agreed, they were bound by the amount in the notice; if the amount was less, the notice was effective up to that amount. However, according to the article in question, parties that relied on the information in the notice were protected. The Commission might wish to consider amending article 24, paragraph 6, and decide whether to refer to the priority rule on the matter, as set out in article 42, paragraph 3. He would have thought that draft article 79 bis, without any reference to error, was complementary and that the issue of reliance had to be addressed.

16. **Mr. Kwon** Young Joon (Republic of Korea) said that while the general principles were clear, a number of issues relating to creation, effectiveness, priority and enforcement still needed to be addressed. While article 24, paragraph 6, dealt with the effectiveness of a notice if there was an error in the maximum amount specified therein, it did not automatically address enforcement. Draft article 79 bis served to settle the question of what amount a secured creditor could enforce. His delegation therefore reiterated its support of the suggestion by the Secretariat.

17. **Ms. Gullifer** (United Kingdom) said that, if the Commission agreed to any of the proposals to amend article 24, paragraph 6, it should bear in mind that the paragraph dealt also with errors in the period of effectiveness of registration and that the relevant provisions would also need to be amended. In that regard, the Commission might wish to consider redrafting paragraph article 79 bis to read: "The obligation secured by a security right to which an initial or amendment notice which specifies a maximum amount relates is limited to the amount entered in the registered notice, unless there are no other competing claimants." While her suggestion was an attempt to synthesize the previous day's discussions, it might, however, need to be adjusted if issues were the priority of a creditor or the existence of a senior competing claimant.

18. **Mr. Bazinas** (Secretariat), drawing the Commissions attention to recommendation 66 of the Legislative Guide on Secured Transactions, said that the second sentence of that recommendation, regarding the protection of third parties, was of particular interest for article 24, paragraph 6, because it focused on reliance. There was no reference to misinformation; the words "seriously misleading" had been added in the Working Group.

19. **Mr. Sono** (Japan), endorsing the comments made by the representative of the Republic of Korea and by the Secretariat, said that the amendment suggested by the United Kingdom might work but would require further consideration. There was a clear need for the provisions, which would be better placed in the section on enforcement. His preference was to keep draft article 79 bis, possibly with the wording suggested, and either remove article 24, paragraph 6, which worked well with regard to an error in the period of effectiveness, or delete from that paragraph the bracketed language pertaining to error relating to maximum amounts.

20. **Mr. Henning** (United States of America) said that while the Commission was getting bogged down in a drafting exercise. He suggested focusing on how to express the rule governing a registered notice that contained an amount that was too low, and nothing more. The Secretariat had helpfully drawn attention to recommendation 66. The second sentence of that recommendation was a good illustration of the difference between a legislative guide and a model law, as it provided guidance on what practice States should adopt. It was now up to the Commission to determine what that practice was, and the amendment suggested by the representative of the United Kingdom took care of that point. An additional clause might be needed at the end to cover situations where competing claimants had higher priority than the secured creditor who had entered an incorrect amount, because that claimant would not be prejudiced and would be paid in full. The representative of Japan had raised important points about where the rule should be placed and his delegation believed that that could be agreed on once the Commission had ironed out the rule.

21. **Ms. Walsh** (Canada) reiterated that the draft Model Law required parties to limit the maximum amount of the secured obligation in order to facilitate the buyer's ability to use the same encumbered assets as security with a subsequent lender. The maximum amount required in the agreement had to be indicated in the registered notice. The issue at hand was the situation in which the secured creditor incorrectly entered an amount in the registered notice that was either lower or higher than the amount in the security agreement. As against the grantor and competing claimants, the secured creditor should be limited to the amount in the security agreement. However, the language proposed by the representative of the United Kingdom did not solve the problem. The time spent on the matter was indicative of the

difficulty of attempting to create a subset of rules to address various scenarios. Any new wording proposed was deficient because it was either too broad or too narrow and failed to address all possibilities. Her delegation maintained that article 24, paragraph 6, with the words "seriously misleading" deleted, sufficiently addressed all possible scenarios. If the Commission did not find that acceptable and wished to have a new rule that spelled out everything, there would be a need to revise article 24, paragraph 6, and article 42, paragraph 3, and reformulate 79 bis, which would require further consultation and drafting before the Commission could decide.

22. **Mr. Foëx** (Switzerland) said that if his delegation understood it correctly, the draft proposed by the representative of the United Kingdom would limit the secured obligation to the amount indicated in the registered notice. If that was so, the proposal went beyond article 79 bis in its current iteration, which was limited to enforcement. He would be hesitant to allow the indication of a maximum amount to limit the secured obligation outside of any enforcement procedure.

23. **Ms. Gullifer** (United Kingdom), recalling that the issue had been raised earlier, said that the idea was that it was not just the obligation, but the obligation secured by a security right, for which a secured creditor would get paid; the word enforcement had been removed because there might be a different secured creditor enforcing, leading to a waterfall of payments. She had proposed the draft, which she agreed might not be necessary, in response to the case mentioned by the representative of France in which a security agreement had been drafted in very general terms but, for reasons that might be very deliberate, a limited amount had been indicated in the registered notice and, by agreement with the debtor, only that amount would be enforced.

24. **Mr. Tirado** (Spain), endorsed by Mr. Tosato (Italy), said that while his delegation appreciated the points raised by the representative of the Republic of Korea and the Secretariat, it was not convinced that the issue was significant and reiterated its position that article 24, paragraph 6, should be retained and article 79 bis eliminated.

25. **Ms. Sabo** (Canada) asked the Secretariat to clarify the proposals for amending the draft article.

26. **Mr. Bazinas** (Secretariat) said that the phrase "to the extent that they were seriously misled" should be deleted and that a phrase along the lines of "except as against third parties that relied" should be included. Such wording would protect the reliance of third parties, in line with recommendation 66 of the UNCITRAL Legislative Guide on Secured Transactions. The amount referred to in the text was the amount to which the notice was effective and, in accordance with paragraph 3 of draft article 42, the priority of the security right was limited to that amount.

27. **Ms. Walsh** (Canada) said that the draft article should state that registration of the notice was effective only to the extent that a third party relied on the amount in the notice. The present wording suggested that the registration was entirely ineffective against third parties that relied on the amount in the notice. In that regard, the words "to the extent" or some similar wording should be included.

28. **Mr. Bazinas** (Secretariat) said that, if the intent of the draft article was to clarify that the registration of the notice was not completely ineffective, then it was suitable in its present form with the additional deletion of the phrase "seriously misled". The draft article would thereby only protect third parties relying on the amount in the notice because, as explained in the UNCITRAL Guide on the Implementation of a Security Rights Registry, third parties were not being misled.

29. **Mr. Dennis** (United States of America) said that the registration should not be made entirely ineffective. In that regard, part of paragraph 6 of draft article 24 could form a new paragraph 7. Paragraph 7 could be entirely bracketed and address the maximum amount in the notice. In addition, it could state that the registration was effective only up to the amount in the notice as against third parties that relied on it.

30. **Ms. Gullifer** (United Kingdom) said that the wording read out by the Secretariat seemed to suggest that the registration of the notice was ineffective, except to the extent that third parties relied on it. The suggestion made by the United States delegation would make it clear that registration of the notice was effective up to the amount stated in the notice, rather than making the effectiveness of the notice dependent on reliance.

31. **The Chair** suggested that the Commission might wish to revert to draft article 79 bis at a subsequent meeting.

32. *It was so decided.*

Draft article 10

33. *Draft article 10 was adopted*.

Draft article19

34. **The Chair** said that the Commission might wish to address draft article 19 in the draft Guide to Enactment of the draft Model Law on Secured Transactions.

35. **Ms. Gullifer** (United Kingdom), responding to comments made by **Ms. Walsh** (Canada), said that draft article 19 was to be retained in its present form.

The meeting was suspended at 11.30 a.m. and resumed at 12.15 p.m.

36. **Mr. Medina Mejías** (Bolivarian Republic of Venezuela), speaking on behalf of the Group of Friends of the Chair, said that the draft Model Law was highly important for developing countries. The availability of legal instruments that could facilitate business loans for small and medium-sized commercial enterprises would enhance market development, providing growth opportunities for those that required, inter alia, loans secured by their cash flow, accounts receivables and movable assets.

37. The draft Model Law must not affect any agreement made by the parties on the use of alternative dispute resolution (ADR), including arbitration, mediation, conciliation and online dispute resolution. A provision to that effect should be included in draft article 3, highlighting

the autonomy of the parties under consensual agreements and respecting the principle of pacta sunt servanda. The document would be incomplete without such a provision.

38. The slow pace of the judicial process in developing countries could be mitigated if the parties involved in private commercial operations agreed to avoid, inter alia, perishables spoiling and contracts being breached. The protection of agreements between parties was a reason to include a provision in the draft Model Law, which would reinforce the autonomy of agreements on ADR in the field of secured transactions.

39. The delegations of Algeria, Brazil, Costa Rica, the Dominican Republic, El Salvador, Honduras, Indonesia, Italy, Mexico, Namibia, Nigeria, Panama, the Philippines, Sierra Leone, Singapore, Spain, Thailand, the United Kingdom, the United States and the Bolivarian Republic of Venezuela supported the inclusion of such a provision, to read as follows: "Nothing is this law affects any agreement by the parties to the use of alternative dispute resolution, including arbitration, mediation, conciliation and online dispute resolution."

40. **Ms. Sabo** (Canada) said that her delegation was seriously concerned about the inclusion of such a provision in the draft Model Law. Issues related to arbitrability were outside the scope of Working Group VI (Security Interests) and should be taken up by Working Group II (Arbitration and Conciliation). It would be unwise for the Commission to include the proposed provision in the draft Model Law, because Working Group II might at a later date take different decisions on the matter that might conflict with the provision. Working Group VI had recommended that the provision should be included in the draft Guide to Enactment (A/CN.9/885).

41. **Mr. Riffard** (France) said that his delegation agreed with the view expressed by the representative of Canada. There was no need to state explicitly that nothing in the draft Model Law would prohibit arbitration, since that was already clear. A provision concerning matters of procedural law had no place in a Model Law relating to secured transactions. Including it could give the impression that the Commission was twisting the arm of legislators, which was an inappropriate message to send. Therefore the provision should be included only in the draft Guide to Enactment.

42. **Mr. Chan** (Singapore) said that, while his country unequivocally supported the inclusion of the provision, there was concern that it would create a precedent requiring a similar provision to be included in all legislation. Although legislators would be free to leave out the provision when enacting national laws on the basis of the draft Model Law and while it was important to make users of the draft Model Law aware that no restrictions should be placed on the right of parties to use ADR methods, such a clause might not be necessary. In that regard, the draft Guide to Enactment could perhaps indicate that the provision was merely a suggestion to legislators.

43. A further consideration was that some countries might prohibit the use of ADR in disputes over secured transactions. As that issue had not been discussed by the Working Group, the draft Model Law should not bar legislators from taking such action. Nonetheless, there should be both a provision in the text of the draft Model Law and a reference in the draft Guide to Enactment to underscore that the best practice with regard to disputes over secured transactions was to allow ADR, rather than rely solely on litigation.

44. **Mr. Kwon** Young Joon (Republic of Korea) said that, although ADR had become an enormous industry and had its strengths, there was no need to include a specific provision on it in the draft Model Law. If the Commission were to approve the proposal, it would then, for the sake of consistency, have to add such a provision to other laws and codes, where it would be out of place. While the Commission should provide a sound legal framework for ADR, it should avoid stressing one form of dispute resolution over another. The issue of ADR could be addressed in the draft Guide to Enactment.

45. **Mr. Tosato** (Italy) said that in the view of his delegation, the Commission was the ideal forum for resolving issues that had been left unsettled by a working group. Although it had been claimed that the provision proposed by the Friends of the Chair was unnecessary, many sections of the draft Model Law were, in fact, pedagogical in nature. From that perspective, the provision would be very beneficial. The draft Model Law contained several provisions relating to litigation, and, in the interest of balance, some mention should be made of ADR. The language of the proposed provision was so simple and anodyne that it should not be seen as creating any risks, nor should it give rise to any procedural concerns.

46. **Mr. Foëx** (Switzerland) said that his delegation did not support the inclusion of the proposed provision in the draft Model Law. It would be advisable to consult with Working Groups II and III, which were competent in the matter, before taking such a decision. The provision could be included in the draft Guide to Enactment.

47. **Mr. Medina Mejías** (Bolivarian Republic of Venezuela) said that each enacting State was responsible for deciding which provisions to introduce into its national legislation. The provision under consideration did not change the substance of the draft Model Law. In fact, it highlighted and broadened the possibilities for dispute resolution. In some developing countries, it was not unusual for it to take between two and four years to resolve a dispute through the judicial system. The inclusion of the provision would be useful for enacting States. His delegation strongly supported the statement by the representative of Singapore in favour of mentioning ADR in the draft Guide to Enactment. If the working groups had been unable to resolve the matter, then the Commission was the appropriate forum for doing so.

48. **Mr. Dahlkamp** (Germany) said that his delegation had reservations about including the proposed provision, because it related essentially to a procedural question that had nothing to do with security interests. Including it would only raise further questions regarding arbitrability and other issues. He did not believe it was the Commission's intention to signal that ADR methods were preferred. One possible compromise was to leave the draft Model Law text as it was, mention ADR in the Guide to Enactment, and, in recognition

of the fact that more work needed to be done in that area, place ADR on the agenda of Working Group VI or Working Group II.

49. **Mr. Sorieul** (Secretary of the Commission) said that in its discussion of the proposed provision, the Commission should be careful not to trespass into the area of arbitrability. That should be left to the competent Working Group; otherwise the Commission might end up speaking with several voices and thus send an unclear message. In fact, the question of arbitrability was already on the agendas of the Commission and Working Group II, and had been for several years. Although the value of ADR was recognized by the Commission, the Secretariat recommended including the ideas contained in the proposed provision in a document other than the Model Law itself. That would allow the Commission to expand the discussion of arbitration and ADR. Regardless of the solution the Commission ultimately chose, it was important to make it abundantly clear that any additional provision would not affect existing prohibitions under the law, the rights of third parties, or the right of a party to recourse to the national courts.

50. **Mr. Celarie Landaverde** (El Salvador) said that the proposal under discussion had considerable merit insofar as it addressed the problem of different legal traditions in some developing countries. Since the Commission's aim was to facilitate international trade between all commercial actors, an academic approach to the draft Model Law should be avoided and the practical aspects of trade and the needs and experiences of traders should be borne in mind. Alternative dispute resolution methods were recognized in the Model Inter-American Law on Secured Transactions and in the national legislation of several countries, inter alia, Colombia, Costa Rica, Honduras and El Salvador. Given the deficiencies of the judicial systems in some developing countries, the availability of ADR mechanisms benefited all the parties to secured transactions.

51. Lastly, since working groups were answerable to the Commission and not vice versa, the Commission could deal directly with the proposal.

52. **Mr. Remaoun** (Observer for Algeria) said that his delegation supported the proposed provision, which was a pragmatic measure intended to combat the procedural delays common in many developing countries. Indeed mediation and arbitration facilitated resolution of disputes in developing and developed countries alike. The proposal was not controversial, and many African and other developing countries would doubtless also support it.

53. **Mr. Sono** (Japan) said that, given the concerns expressed by the delegations of Canada, France, the Republic of Korea, Germany, Switzerland and the Secretariat, which his delegation shared, the wording of the proposed provision was inadequate. If the Commission did not address the shortcomings of ADR at the same time as its merits, the educational and practical value of the proposed provision would be limited. It should not be included in the draft Model Law, but might be appropriate in the draft Guide to Enactment.

54. **Mr. Aprianto** (Indonesia) said that his delegation supported the inclusion of the proposed provision in the draft Model Law, in view of its importance for many developing countries.

55. **Ms. Gullifer** (United Kingdom) said that her delegation supported the statement made by the representative of Italy. The proposed provision should be included because of its pedagogical value. If it was seen as too broad in scope, then it could be modified to limit it to the rights and obligations of the parties to a security agreement and included in Section I of Chapter VI of the draft Model Law.

56. **Ms. Lephilibert** (Thailand) said that her delegation supported the statements made by the representatives of Italy, Singapore and El Salvador, and recognized the benefit of including a provision on ADR in the draft Model Law.

57. **Mr. Dennis** (United States of America) said that his delegation supported the inclusion of the proposed provision in article 3 of the draft Model Law.

58. **Mr. Tirado** (Spain) said that the users of the draft Model Law were more likely to be developing countries whose courts did not perform satisfactorily in resolving commercial disputes. They would therefore benefit from a clear indication in the Model Law that ADR mechanisms were available. His delegation strongly supported the inclusion of the proposed provision, but could also support the alternative, and perhaps less ambitious, drafting proposed by the representative of the United Kingdom.

The meeting rose at 1.05 p.m.

Finalization and adoption of a draft Model Law on Secured Transactions
(*continued*)

Summary record of the 1031st meeting, held at Headquarters, New York, on Thursday, 30 June 2016, at 3 p.m.

[A/CN.9/SR.1031]

Chairperson: Mr. Labardini Flores (Vice-Chair) (Mexico)

Contents

The meeting was called to order at 3.05 p.m.

Agenda item 4: Consideration of issues in the area of security interests (*continued*)

(a) Finalization and adoption of a draft Model Law on Secured Transactions (*continued*) (A/CN.9/884 and A/CN.9/884/Add.1)

Article 3 (*continued*)

1. **Mr. Medina Mejías** (Bolivarian Republic of Venezuela), speaking on behalf of the Group of Friends of the Chair, recalled that at the preceding meeting, the Group of Friends had proposed adding in article 3 of the draft Model Law a new sentence, to read: "Nothing in this Law affects any agreement to the use of alternative dispute resolution, including arbitration, mediation, conciliation and online dispute resolution."

2. **Ms. Sabo** (Canada) said that the fact that the Model Inter-American Law on Secured Transactions contained a provision similar to the one proposed by the Group of Friends was not sufficient justification for the inclusion of such a provision in the UNCITRAL Model Law. The Model Inter-American Law was a regional instrument, whereas the Commission's Model Law must take into account the international scope of the Commission's work, in particular in the area of arbitration.

3. The proposed provision could encourage arbitration, a topic that had not yet been fully explored, and have a negative effect if arbitration were to be used to the detriment of the rights of third parties. Her delegation welcomed the suggestion by the representative of Germany that the Commission should carry out a more in-depth study on arbitration in the context of secured transactions. The Commission should not include a provision that risked doing harm in the Model Law, but rather should set out the issues that might arise and note the need for further exploration of the matter in the draft Guide to Enactment of the draft Model Law on Secured Transactions.

4. **Ms. Muñóz Flor** (Mexico) said that her delegation supported the proposal by the Group of Friends. In her country, creditors would be unlikely to accept certain types of goods as security unless they had access to flexible methods of alternative dispute resolution (ADR).

5. **Mr. Hamunyela** (Namibia) said that his delegation fully supported the proposal.

6. **Mr. Cavalcanti** (Brazil) said that ADR was essential to ensure a timely resolution of disputes over certain matters in some States. The issue was of major concern in Brazil and had been addressed in recent legislative reforms. Highlighting ADR as an option was thus of the utmost importance and should not be prevented because of concerns about procedural issues.

7. **Ms. Gullifer** (United Kingdom) said that her delegation supported the proposal as drafted by the Group of Friends. However, given the concerns that had been expressed, the Commission might wish to consider an alternative provision with a narrower scope.

8. **Ms. Cerrato** (Honduras) said that her delegation fully supported the addition of a provision highlighting ADR and the agreed with the United Kingdom delegation that such a provision might be drafted in a different way that might be acceptable to all delegations.

9. **Mr. Nawana** (Sri Lanka) said that it was of paramount importance to include a provision of the kind proposed by the Group of Friends in the Model Law in order to ensure the expeditious resolution of disputes in developing countries.

10. **Mr. Riffard** (France) said that the inclusion of the provision proposed by the Group of Friends would do nothing to ensure the effectiveness or validity under national law of agreements reached through ADR. In contrast, the Guide to Enactment could draw the attention of legislators to the need to take measures to facilitate and ensure the effectiveness of ADR in support of the implementation of the Model Law. Thus, the proposal by the delegation of Canada to address the issue in the Guide to Enactment represented not only a compromise that should satisfy all delegations but also a means of enabling States that wished to promote ADR to do so much more effectively than by including the proposed provision in the Model Law.

11. **Mr. Filippov** (Russian Federation) said that, while access to ADR was very important, the inclusion of the proposed provision in the Model Law would do nothing to promote it, as the provision would have no effect on national legislation on ADR.

12. **Mr. Kwon** Young-Joon (Republic of Korea) said that there were several reasons why the proposed provision should not be included in the Model Law. First, it gave the impression that all disputes arising out of the Model Law were arbitrable, which was not the case. Second, if such a provision were inserted into the Model Law, a similar clause would have to be added to every instrument produced by the Commission relating to disputes. That would not be efficient and was unnecessary, given that there was a specific instrument on arbitration. Third, the inclusion of the provision would mean that new clauses would have to be inserted to cover everything else that was not precluded by the Model Law, such as the parties agreeing to a liability exemption clause. The matter could be dealt with in the Guide to Enactment, if necessary, but the insertion of the provision in the Model Law, which was intended to be a simple and concise instrument dealing exclusively with secured transaction law, was not appropriate.

13. **Mr. Rangreji** (India) said that his delegation felt strongly that reference to ADR should be made in the Guide to Enactment, not the Model Law.

14. **Mr. Medina Mejías** (Bolivarian Republic of Venezuela) said that a great many developed and developing countries had stressed the importance of incorporating the provision into the Model Law. His delegation therefore firmly supported the inclusion of the provision as proposed and requested the Chair to take a decision based on the prevailing view within the Commission.

15. **Mr. Kohn** (Commercial Finance Association) said that his delegation supported the proposal, as it sent a very important signal to lenders considering cross-border lending, in particular to developing countries, who were very much concerned with the enforceability of security interests. The points raised by the Secretariat at the previous meeting, including the need to make it clear that the provision did not affect arbitrability, could be addressed in the Guide to Enactment.

16. **Mr. Dubovec** (National Law Center for Inter-American Free Trade) said that he supported the proposal for the reasons stated by the representative of Spain at the 1030th meeting of the Commission. Access to expeditious means of dispute resolution was very important for the practical implementation of the Model Law, but was also an element that could be easily overlooked by States undertaking legislative reform. Flagging the critical issue of ADR lawmakers by including the proposed provision in the Model Law would thus maximize the chances of the Model Law being widely implemented.

17. **Mr. Weise** (American Bar Association) said that the provision should be included, since a significant number of the users of the Model Law would be developing countries and many developing countries had expressed support for the proposal.

18. **The Chair** said that all delegations seemed to agree that the Guide to Enactment should make it clear that the Model Law did not affect arbitrability, the rights of third parties or recourse to the courts. It should be noted that many treaties, including the Vienna Convention on the Law of Treaties, expressly stated that their provisions did not prevent States from resolving disputes through other agreed means. Since the prevailing view was that the proposal should be accepted, he took it that the Commission wished to include the provision proposed by the Group of Friends of the Chair in the Model Law as article 3, paragraph 3.

19. *It was so decided*.

20. *Article 3, as amended, was approved*.

21. **Ms. Sabo** (Canada) said that the report on the current session should reflect the significant strong opposition to the inclusion of the provision.

22. **Mr. Medina Mejías** (Bolivarian Republic of Venezuela) said that the report should also note that developing countries had been overwhelmingly in favour of the proposal.

Articles 2 and 11 (*continued*)

23. **Ms. Gullifer** (United Kingdom) proposed amendments to articles 2 and 11 to reflect the difference between mass and product. The definition of "mass or product" in article 2 (t) should be split into two in order to define mass and product separately. The revised definitions should read: "'Mass' means a tangible asset which results when tangible assets are so commingled with other tangible assets of the same kind that they have lost their separate identity"; and "'Product' means a tangible asset which results when tangible assets are so physically associated or united with other tangible assets of a different kind, or when one or more tangible assets are so manufactured, assembled or processed, that they have lost their separate identity".

24. To reflect that difference, article 11, paragraph 1, should be amended to read: "A security right in a tangible asset that is commingled in a mass of assets extends to the mass. A security right in a tangible asset that is transformed into a product extends to the product." In the same article, option A should be deleted in its entirety and paragraph 2, which was currently under option B, should be amended to read: "A security right that extends to a mass is limited to the same proportion of the mass as the quantity of the encumbered asset or to the quantity of the entire mass immediately after the commingling." In paragraph 3, the word "assets" should be changed to "asset" and "they" to "it", since a product could be formed through the transformation of a single asset.

25. **The Chair** said that he took it that the Commission wished to accept the proposed amendments to articles 2 and 11.

26. *It was so decided*.

27. *Articles 2 and 11, as amended, were approved*.

Article 31

28. **Ms. Gullifer** (United Kingdom) said that article 31 did not need to be changed. It simply provided, as did article 11, paragraph 1, that security rights to assets commingled in masses or products remained the same.

29. **Mr. Cohen** (United States) said that article 31, as it stood, fitted in well with the amended article 11 and the new definitions.

30. **Ms. Walsh** (Canada) said that article 31, paragraph 3, might need to be adjusted to reflect the fact that the new article 11 based security rights which extended to masses on quantity, rather than on value.

31. **Mr. Sono** (Japan) said that the title of article 31 should be changed to reflect the changes made to article 11. The phrase "commingled in a mass or product" should be replaced wherever it occurred in the draft to "…commingled in a mass or transformed into a product".

32. **Mr. Whittaker** (Australia) proposed amending paragraph 3 of article 31, which had already been amended at an earlier session, to read as follows: "For the purposes of paragraph 2, the obligation secured by a security right that extends to the mass or product is subject to the limitation determined in accordance with article 11".

33. *Article 31, as amended, was adopted.*

34. **The Chair** said that the Secretariat would be requested to revise all references in the Model Law to assets "commingled in a mass or product".

Article 27

35. **Ms. Gullifer** (United Kingdom) explained that the Friends of the Chair proposed splitting paragraph 6 of article 24 of the draft Model Registry-related Provisions into two paragraphs. The first would read: "Notwithstanding paragraph 4, an error in the period of effectiveness of registration entered in an initial or amendment notice, does not render the registration of the notice ineffective, except to the extent that third parties relied on the erroneous information in the registered notice." Consequently, footnote 13 would now apply to the entire paragraph. The second paragraph, new paragraph 7, would read: "Notwithstanding paragraph 4, an error in the maximum amount for which the security right may be enforced entered in an initial or amendment notice does not render the registration of the notice ineffective. However, the registration is not ineffective as against third parties who relied on the amount stated in the notice, but only up to either that amount or the maximum amount indicated in the security agreement, whichever is the lower." Although it was inelegant, the wording "not ineffective" had been used as opposed to "effective" in the second sentence to make it clear that the paragraph related only to errors in amounts entered in registration notices, and would not preclude a registration being ineffective on completely different grounds. The second option in the second sentence, "or the maximum amount indicated in the security agreement", had been included so that the paragraph would apply to incorrect amounts that were either too high or too low. If the entered amount was too low, the registration would be effective up to that amount; if it was too high, the registration would be effective up to the amount indicated in the security agreement. Footnote 14 would now apply to the entire paragraph 7.

36. **Mr. Deschamps** (Canada) said that he broadly supported the proposal, but did not believe that the use of "not ineffective" in the second sentence of the proposed paragraph 7 was necessary. In the context, the sentence could not be misconstrued if it was rendered in the positive and simply said "is effective". The word "but" should be removed from the same sentence, so that the second part of the sentence would read: "…amount stated in the notice, only up to…".

37. **Ms. Walsh** (Canada) suggested that the words "for which the security right may be enforced" should be deleted from the first sentence of proposed new paragraph 7. The Commission had not always included those words in other registry-related provisions and the sentence would be more readable without them. In both of the new paragraphs, 6 and 7, the comma after "an initial or amendment notice" was unnecessary.

38. **Mr. Cohen** (United States), supported by **Mr. Whittaker** (Australia), expressed general support for the ideas behind the proposed new paragraphs, but agreed with the representative of Canada that the second sentence of proposed paragraph 7 was awkward. It could be reworked to read: "However, its effectiveness against third parties who relied on the amount stated in the notice is limited to that amount or the maximum amount indicated in the security agreement, whichever is lower."

39. **Ms. Gullifer** (United Kingdom) endorsed the suggestions made by the representatives of the United States and Canada.

40. **Mr. Bazinas** (Secretariat) said that he had understood that Canada had proposed that the references to the "maximum amount for which the security right may be enforced" should be made consistent throughout the entire draft Model Law. That would mean making a number of changes. For instance, the word "monetary" in article 6, paragraph 3(d), would have to be deleted. Other articles in the draft Model Registry-related Provisions contained similar references, such as article 8, paragraph (e), article 24, paragraph 6, and article 42, paragraph 3. It was up to the Commission to decide how to deal with those references and any others that might need to be revised.

41. **The Chair** that the Secretariat would no doubt check the entire draft Model Law for consistency.

42. **Ms. Walsh** (Canada) said that, specifically in the context of article 27, containing the registry-related provisions, the Commission had not felt it necessary to refer always to "the maximum amount for which the security right may be enforced specified in a registered notice". In article 20 for example, paragraph 2 simply referred to the "maximum amount specified in a registered notice". Her delegation's proposal had not been to remove the words "for which the security right may be enforced" in every occurrence, but only where the context made them unnecessary.

43. **Ms. Gullifer** (United Kingdom) said that proposed new paragraphs 6 and 7 of article 24 referred to errors in amounts and periods "entered" in initial or amendment notices; perhaps the Secretariat should consider replacing "entered" with "specified" for the sake of consistency with article 20 of the draft Registry-related Provisions.

44. *New paragraphs 6 and 7 of article 24 of the draft Registry-related Provisions contained in article 27 of the draft Model Law, as amended, were approved.*

Article 23

45. **Mr. Cohen** (United States of America) said that the Friends of the Chair had suggested rewording article 23 so that the sorts of parties described in option A were protected through a priority rule rather than a third-party effectiveness rule. The paragraph should read: "An acquisition security right in consumer goods with an acquisition price below [an amount to be specified by the enacting State] is effective against third parties upon its creation without any further act." A new paragraph should be added to article 32 in order to create an additional exception to protect buyers. It should read: "A buyer takes free of, and the rights of a lessee are not affected by, an acquisition security right in consumer goods unless the security right is made effective against third parties other than under article 23 before the buyer or lessee acquires its right in the goods."

46. **Ms. Walsh** (Canada) said that the only alternative methods of third-party effectiveness that the secured creditor could take to prevail over the buyer were registration or possession, as stipulated in article 18.

47. **Mr. Cohen** (United States) said that the Guide to Enactment could and should reflect the point made by the representative of Canada to make more clear the import of articles 23 and 32.

48. **Mr. Bazinas** (Secretariat) said that the expression "the buyer takes free" had given rise to problems of translation and should thus be replaced with the expression "a buyer acquires its rights free", as already contained in article 32, paragraph 2.

49. As confusion was anticipated regarding the clause "unless the security right is made effective against third parties other than under article 23"; since "other than" could be taken to refer to other third parties, it might be better to reword the provision along the lines of "made effective against third parties by a method other than" or "otherwise than".

The meeting was suspended at 4.35 p.m. and was resumed at 4.55 p.m.

50. **Mr. Cohen** (United States) said that the omission of a reference to licensees in article 23 was intentional, in order to reflect the Commission's previous discussions, during where doubt had been expressed as to whether there existed such a thing as a licensee of consumer goods.

51. *Article 23, as amended, was approved*.

Articles 25 and 26

52. **Ms. Walsh** (Canada), noting the Secretariat's suggestion that the expression "takes free of" created problems and that the expression "acquires its rights free of" was preferable, pointed out that articles 25, paragraph 3, and 26, paragraph 3, under both option A and option B, would have to be revised accordingly. The Commission had decided that when a provision was not meant to cover donees, the phrase "a buyer or other transferee" should be avoided. As a result, "or other transferee" should be deleted from article 25, paragraph3, article 26, paragraph 3, under options A and B, and article 25, paragraph 1, under both option A and option B. The Secretariat should examine all articles containing the phrase "buyer or other transferee" to ensure that the expression was not used when donees were not included.

53. The Commission had agreed with the substance of the proposal contained in document A/CN.9/XLIX/CRP.9, but had expressed the desire for a redrafting of the text. Accordingly, the Friends of the Chair were proposing that article 25 should be revised to read:

"1. Subject to paragraphs 2 and 3, the third-party effectiveness and priority of a security right that was made effective against third parties by registration of a notice is not affected by a change in the identifier of the grantor after the notice is registered.

2. If the identifier of the grantor changes after a notice is registered, a competing security right created by the grantor that was made effective against third parties after the change has priority over the security right to which the notice relates unless the security right to which the notice relates is made effective against third parties by another method or an amendment notice disclosing the new identifier of the grantor is registered:

(a) Before the expiry of [a short period of time to be specified by the enacting State] after the change; or

(b) After the expiry of the period referred to in paragraph 2 (a) but before the competing security right is made effective against third parties.

3. If the identifier of the grantor changes after a notice is registered, a buyer to whom the encumbered asset is sold after the change acquires its right free of the security right to which the notice relates unless it is made effective against third parties by another method or an amendment notice disclosing the new identifier of the grantor is registered:

(a) Before the expiry of the period referred to in subparagraph 2 (a); or

(b) After the expiry of the period referred to in subparagraph 2 (a) but before the buyer acquires its right in the asset."

54. Consequently, draft article 26, paragraph 1, under both option A and option B, as well as all of option C, would be mirrored in article 25, paragraph1. Likewise, article 25, paragraphs 2 and 3, would be mirrored in article 26 paragraphs 2 and 3, under options A and B. Paragraph 4 of article 26 under option A and paragraph 5 of article 26 under option B confirmed that the rules did not apply in the context of a security right in intellectual property. Moreover, paragraph 4 of article 26 under option B addressed the specific problem of the subsequent sale of an encumbered asset before the secured creditor acquired knowledge of the sale and the identifier of the buyer.

55. **Mr. Cohen** (United States) said that article 25, paragraphs 2 and 3, subparagraphs (a) and (b), did not address the situation in which an event happened on a given date, rather than before or after that date. The word "before" should, therefore, be changed to "no later than".

56. In article 25, paragraph 2, the clause "unless the security right to which the notice relates is made effective

against third parties by another method" should, for the sake of clarity, be expanded to read "by a method other than registration of a notice".

57. **The Chair**, underscoring the need for consistency, recalled that the Commission had previously decided to replace the phrase "no later than" with "before" in other articles.

58. **Mr. Weise** (American Bar Association), referring to article 25, paragraph 2, said he wondered whether the clause "if the identifier of the grantor changes after a notice is registered" should be reworded to read "if the identifier of the grantor changes so that it is no longer sufficient under article 24". Such a rewording would allow for minor errors in some cases. If the change was so small that the grantor could still be found by a search, pursuant to article 24, paragraph 1, there should be no risk of losing the effectiveness of the registration as against buyers or other secured parties under article 25, paragraphs 2 and 3.

59. **Ms. Walsh** (Canada) said that the word "before" did not change the meaning of the text and was brief. The phrase "method other than registration" was more exact and should be used in all relevant provisions. With regard to the point made by the Observer for the American Bar Association, the Commission was implicitly referring to the identifier of the grantor as determined under the draft Registry-related Provisions and such a change would alter the application of the rules thereunder. The issue could be addressed in the Guide to Enactment, but should not be included in the draft Model Law.

60. **Mr. Cohen** (United States of America) asked the representative of Canada to clarify her remarks. The Observer for the American Bar Association had been referring to States that had chosen option B under article 23 and wished to reflect the existence of that option in the rule.

61. **Ms. Walsh** (Canada) said it was unfortunate that the issue now before the Commission had not been raised during consultations. It was inadvisable to formulate a rule based on the assumption that a State had adopted a system under which close matches found by a search could be retrieved. The matter should be addressed in the Guide to Enactment; the many contingencies made it unfeasible to do so in the draft Model Law. As a matter of policy, if the identifier of the grantor changed in such a manner that it no longer qualified as the identifier under the rules, than the amendment order should be registered.

62. **Mr. Weise** (American Bar Association) said that if despite a minor name change the original registration notice filed by the first secured creditor could be found, there was no policy reason why the second secured creditor or buyer should have priority over the rights of the first. The Commission might consider drafting an amendment. A cross reference to the relevant articles would be sufficient, and the issue could be dealt with in greater detail in the Guide to Enactment.

63. **Mr. Cohen** (United States of America) said that the phrase "such that the name no longer satisfies the requirements of article 24" could be added in the appropriate places. Provided that the rule was approved by the Commission, he was ready to work with interested delegations, in particular Canada, to find acceptable language.

64. **Ms. Walsh** (Canada) asked the Observer for the American Bar Association whether his point could be addressed in the Guide to Enactment. The Commission should not make such an amendment without also defining in the relevant paragraphs what constituted a misleading identifier notice. A misleading identifier was one that no longer satisfied the test for a sufficient identifier, while a sufficient identifier was one that could still be retrieved through a search using the correct name. If the Observer for the American Bar Association did not believe that to be sufficiently clear, then the Commission should defer a decision on the matter.

65. **Mr. Cohen** (United States of America) said that he agreed with the Observer for the American Bar Association. He was ready to work with the latter and the representative of Canada in order to formulate appropriate language. Only several words would need to be changed. It would be made clear that the text in question applied only to States that had chosen option B under article 23. Since the point was substantive, it should not be handled solely in the Guide to Enactment.

66. **Mr. Tirado Martí** (Spain) asked whether he should wait until the following day to raise a translation-related issue.

67. **The Chair** said that the issue should be examined the following day.

68. **Ms. Gullifer** (United Kingdom) suggested that in article 25 after the words "if the identifier of the grantor changes after a notice is registered", the Commission might wish to add, "such that a search carried out in accordance with article 23 of these provisions would not reveal the security right mentioned in paragraph 1 of this article."

69. **Mr. Whittaker** (Australia) said that the proposal should specify whether the search had been performed using the grantor's previous or new identifier.

70. **Mr. Weise** (American Bar Association) endorsed the proposals made by the representatives of the United Kingdom and Australia.

71. **Ms. Walsh** (Canada) said that persons dealing with a grantor under a new name would conduct searches using that name. The issue was whether a search using the new identifier would retrieve the registered notice, which was why the reference to the misleading error test had been included in article 24, paragraph 1. The Commission should not burden paragraphs 2 and 3 of the draft text with additional language. A new paragraph 4 stating that paragraphs 2 and 3 did not apply to searches using new identifiers could be added.

72. **Mr. Whittaker** (Australia) said that instead of adding a paragraph that qualified rules already applied in previous paragraphs, the text proposed by the representative of the United Kingdom offered a viable, user-friendly solution.

73. **Ms. Walsh** (Canada) said that reference should be made to the draft Registry-related Provisions rather than to article 23. What determined whether an error in the grantor's

identifier was seriously misleading was whether the information could be retrieved using the correct identifier as a search criterion. Language to that effect should be included. Although there was no specific objection to lengthening paragraphs 2 and 3, doing so would result in duplication.

74. **Mr. Weise** (American Bar Association) said that he agreed with the representative of Canada that the new identifier was the appropriate reference. The simplest solution was to add a separate paragraph.

75. **Mr. Whittaker** (Australia) said that his delegation agreed with the proposal to add a new paragraph 4.

76. **The Chair** said that the proposed text would read: "Paragraphs 2 and 3 do not apply if the information in the registered notice would be retrieved by a search using the new identifier of the grantor as the search criterion".

77. **Ms. Gullifer** (United Kingdom) said that the article in question was lengthy and referred to a variety of notices. In the interest of clarity, the Commission should add the phrase "referred to in paragraph 1" after "if the information in the registered notice".

78. **Mr. Cohen** (United States of America) said that his delegation agreed with the United Kingdom proposal. It would also be helpful to include a footnote indicating that the paragraph was only necessary for States that had chosen option B of article 23.

79. **The Chair** reassured the Commission that the Secretariat would review the articles of the draft Model Law for consistency. It was important to clarify that proposed paragraph 4 would be added to article 25, not article 26.

80. *Articles 25 and 26, as amended, were approved*.

The meeting rose at 6 p.m.

Finalization and adoption of a draft Model Law on Secured Transactions
(*continued*)

Summary record of the 1032nd meeting, held at Headquarters, New York, on Friday, 1 July 2016, at 10 a.m.

[A/CN.9/SR.1032]

Chairperson: Mr. Labardini Flores (Vice-Chair) (Mexico)

Contents

In the absence of Mr. Kenfack Douajni (Cameroon), Mr. Labardini Flores (Mexico), Vice-Chair, took the Chair.

The meeting was called to order at 10 a.m.

Agenda item 4: Consideration of issues in the area of security interests (*continued*)

(a) Finalization and adoption of a draft Model Law on Secured Transactions (*continued*) (A/CN.9/884, A/CN.9/884/Add.1, A/CN.9/884/Add.2, A/CN.9/886, A/CN.9/887, A/CN.9/887/Add.1; and A/CN.9/XLIX/CRP.2)

1. **The Chair** invited the Commission to resume its consideration of pending issues concerning the draft Model Law on Secured Transactions. Specifically, he requested the Commission to resume consideration of article 24 of the Draft Model Registry-related Provisions, contained in article 27 of the draft Model Law.

2. **Mr. Deschamps** (Canada) said that the version of paragraph 7 of article 24 which the Commission had approved the previous day was unclear because it did not indicate for what amount a registration was effective. The first sentence stated that the registration was not ineffective, meaning that it was effective, but it did not specify an amount. The second sentence provided an exception to the general rule established by the first sentence: it stated that the registration was effective and for what amount, but it applied uniquely to third parties that had relied on the registration. There was thus no clarity with regard to the amount in the case of a third party that had not relied on the registration. If a judgement creditor were to seize an asset subject to a security right in favour of a secured creditor, for instance, and if the judgement creditor did not rely on the registration because the amount in it was incorrect, the first sentence would apply. The secured creditor would be paid first, because the judgement creditor would not have a security interest, but the amount up to which the secured creditor would be paid was unspecified. To resolve the problem, the paragraph should consist only of the existing second sentence, minus the clause concerning reliance on the registration: it should indicate that if there was an error in the amount, the registration was effective up to the amount inserted in the registration or the amount inserted in the security agreement, whichever was lower.

3. **Ms. Gullifer** (United Kingdom) said that paragraph 4 of article 24 provided the general rule about errors in registered information, and the original paragraph 6 had set out an exception to it. The first sentence of the new paragraph 6 essentially restated the general rule, which was unnecessary. Removing the notion of reliance, while sensible, would require further consideration. In addition, there must be some indication of which third parties effectiveness was limited against. The second sentence as it currently stood read “However, the effectiveness of the notice against third parties who relied on the amount stated in the notice is limited to that amount or the maximum amount indicated in the security agreement, whichever is lower”; reliance on the notice was therefore used to identify the people against whom effectiveness was limited. In response to the problem highlighted by the representative of Canada, she proposed that paragraph 7 should read: “Notwithstanding paragraph 4, where there is an error in the maximum amount for which the security right may be enforced entered in an initial or an amendment notice, the effectiveness of the notice against third parties …”, with the rest of the sentence remaining unchanged.

4. **Mr. Bazinas** (Secretariat) asked whether the policy underlying paragraph 7, or merely its drafting, was being discussed. Any change to the policy regarding reliance was a serious matter that would require further discussion in the Commission. For years the Working Group had considered relying parties to be protected.

5. **Mr. Deschamps** (Canada) clarified that his delegation simply wanted to know the amount for which the registration

was effective under the first sentence, which related to parties that had not relied on the registration.

6. **Mr. Bazinas** (Secretariat) said that the meaning of the previous version of paragraph 6 had been clear: an error in the maximum amount in the notice did not render the registration ineffective, meaning that the registration was effective up to the maximum amount entered in notice — based on the general rule. The new second sentence, in saying that registrations were effective up to the maximum amount entered in the notice or the security agreement, whichever was the lower, had changed the paragraph's meaning, and appeared to establish a different rule.

7. **Mr. Whittaker** (Australia) said that paragraph 3 of article 42, part of the chapter of the Model Law that dealt with priority governed how much a party that had not relied on the registration was entitled to. It established that a security right was limited to the maximum amount set out in the notice, without any reference to whether another person had relied on the notice.

8. **Ms. Gullifer** (United Kingdom) said that she had understood the rule to mean that if someone had not relied on the registration, and therefore was not a competing claimant, the registration was valid up to the amount in the security agreement, and not the amount in the notice. In a scenario such as that mentioned by the representative of Canada, where there was one secured creditor and one judgement creditor who had not relied on the notice, and the amount in the notice was lower than that in the security agreement, the secured creditor could enforce up to the amount in the security agreement, and whatever was left was what remained for the judgement creditor. If the rule was otherwise, it was not important whether or not people relied on the registration, because where there was an error, the registration was only valid up to the amount in the notice, against everyone. There appeared to be two different interpretations: first, that the security right was limited vis-à-vis competing claimants, and second, that it was limited against everyone else. If the first interpretation was the correct one, then it was true that the current two-sentence formulation of paragraph 7 was confusing.

9. **Mr. Cohen** (United States of America) said that the representative of Australia was correct in suggesting that article 42 was the appropriate place to deal with the issue of competing rights in the event of an error entered into the registration notice. Including the matter under article 27 was illogical and could lead to unintended complications.

10. **The Chair** suggested that the interested delegations should discuss the matter further informally, in order to enable the Commission to move ahead with its agenda.

11. **Mr. Deschamps** (Canada) said it was true that article 42 provided part of the answer. However, the text agreed upon the previous day qualified article 42. There was still no clear answer to the question concerning the applicable amount under the current paragraph 7. The Secretary had said that the registration was effective for the amount that had been stated in the notice, which worked if there was no second sentence. The second sentence, which related to competing claimants who had relied on the registration, said that the registration was effective for the lower of the two amounts. However, according to the Secretariat, that meant that for a party that had not relied on the registration, the amount that mattered would be the amount entered on the registration notice. That interpretation would create a bizarre situation, if the amount inserted in the registration notice was higher than the amount in the security agreement. Clarity was needed; the easiest solution was for the second sentence to state that the security right was enforceable up to the lower of the amounts stated in the registration notice and in the security agreement respectively.

12. **Mr. Bazinas** (Secretariat) said that the article under discussion dealt with third party effectiveness, and hence competing claimants, and not with the effectiveness of a security agreement between parties. The addition of a reference to the security agreement was thus puzzling. A coordination problem had arisen between article 24, paragraph 7, and article 42, paragraph 3, as a result of the change of the rule in paragraph 7. The new text referred to the maximum amount in the security agreement in relation to effectiveness against third parties, when previously paragraph 7 had related only to third parties and competing rights.

13. **The Chair** suggested suspending discussion of article 24 of the Draft Model Registry-related Provisions, contained in article 27 of the draft Model Law, in order to give the interested delegations time to agree on an amendment that would resolve the difficulty.

A/CN.9/XLIX/CRP.2

14. **Mr. Bazinas** (Secretariat) said that A/CN.9/XLIX/CRP.2 contained the draft decision of the Commission on the adoption of the *UNCITRAL Model Law on Secured Transactions*. The text of A/CN.9/XLIX/CRP.2, as revised and as amended by Member States, would be included in the report of the Commission. In that connection, the Commission might wish to consider the title of the Model Law in languages other than English.

15. **Mr. Tirado Martí** (Spain), supported by **Mr. Garro** (Argentina), proposed that the Spanish title of the Model Law should be "Ley modelo sobre garantías reales mobiliarias". The translation of "secured transactions" as "operaciones garantizadas" was too vague, and was much broader than that of "secured transactions". However, throughout the text "secured transactions" could be translated simply as "garantías mobiliarias".

16. **Ms. Flor** (Mexico) also expressed support for the proposal, but suggested deleting the word "reales" in order to avoid confusion that might arise as a result of the meaning of "real" in the context of Mexican legislation.

17. **Mr. Riffard** (France) said that the remarks made by the representative of Spain applied equally to the French translation of "secured transactions". "Opérations garanties" did not mean very much in French; "sûretés (réelles) mobilières" reflected the meaning of the English much more precisely. However, "opérations garanties" had been the accepted term for 14 years; it was used in the *UNCITRAL Legislative Guide on Secured Transactions*, subsequent technical guides and various articles. It had begun to take root and changing it might make the relationship between the

different texts unclear, confusing users. It was a difficult decision: a more legally correct translation was desirable, but the history of "opérations garanties" and the coherence between the texts produced by Working Group VI on security interests were important considerations.

18. **Mr. Bazinas** (Secretariat) said that, firstly, the term "secured transaction" was defined in the Legislative Guide as "a transaction that creates a security right". If the law was called "Model Law on Security Interests" in Spanish or French, that would not create any confusion. "Secured transaction" was not defined in the Model Law. Secondly, the equivalent law of the Organization of American States was called "Model Inter-American Law on Secured Transactions" in English, and in Spanish "Ley Modelo Interamericana sobre Garantías Mobiliarias". The important thing was that the Model Law should be clear to readers in all languages.

19. **Mr. Tirado Martí** (Spain), responding to the point made by the representative of France regarding tradition, said that the translation of "secured transactions" as "operaciones garantizadas" was wrong and therefore it was perhaps time to break with tradition. The change could be explained in the Legislative Guide or in a footnote in the Spanish version of the Model Law. "Operaciones garantizadas" did not have any history in Spanish-speaking countries, where laws referred to "garantías mobiliarias", therefore no one would be confused by the change. With regard to the proposal by the representative of Mexico, he said that his delegation proposed to use "reales" only in the title of the Model Law; its inclusion was appropriate as it made it clear that the Model Law addressed proprietary security rights as opposed to personal ones. However, it could be left out of the title if that was the unanimous preference of the delegations of the Spanish-speaking countries.

20. **Mr. Garro** (Argentina) said that "operaciones garantizadas" was a literal translation that did not convey the intended meaning. It must be changed, to either "garantías mobiliarias" or "garantías reales mobiliarias".

21. **Ms. Sabo** (Canada) said that the translation "opérations garanties" had not posed problems over the course of 14 years. For the sake of continuity in the work of Working Group VI it made sense to maintain it. The Guide to Enactment of the Model Law on Secured Transactions could contain an explanation of the precise meaning of "secured transactions" in different languages. Alternatively, other versions of the Model Law could use different translations if the relevant delegations deemed it appropriate, but her delegation would prefer the French version to remain unchanged.

22. **Mr. Foëx** (Switzerland) said that without consultations between the French-speaking delegations having taken place, he did not have a firm proposal regarding the French translation of "secured transactions". However, two precedents for the use of "sûreté" existed: the *UNCITRAL Guide on the Implementation of a Security Rights Registry* was "Le Guide de la CNUDCI sur la mise en place d'un registre des sûretés réelles mobilières" in French, and the French title of the *UNCITRAL Legislative Guide on Secured Transactions: Supplement on Security Rights in Intellectual Property* used "sûretés réelles mobilières" for "security rights".

23. **Mr. Tirado Martí** (Spain) said that his proposal was concerned only with the Spanish translation of "secured transactions", not its translation in other languages, and there was agreement among the Spanish-speaking delegations to adopt it. The only sticking point was whether or not to include "reales", but his delegation was happy for it to be omitted if that meant there would be consensus.

24. **Ms. Flor** (Mexico) said that changing the translation was important because many Latin American countries which were developing laws on security rights used the term "garantías mobiliarias". The representative of Spain had said that his delegation could be flexible with regard to the inclusion of "reales" in the title of the Model Law; her delegation favoured omitting it.

25. **Mr. Cavalcanti** (Brazil) said that in Portuguese the same problem of "secured transactions" being translated literally existed. A similar change was therefore needed.

26. **Mr. Cohen** (United States) said that the title of the Model Law should be consistent with the wording used by Governments that had enacted secured transactions reform, in particular the terminology used in many Latin American countries that ranked among the top 15 economies globally in terms of access to credit and secured transactions reform according to the World Bank's *Doing Business* report. The Secretariat should therefore consult with those countries' Governments.

27. **Mr. Remaoun** (Observer for Algeria) said that the issue was relevant to Arabic as well, as the term used in Arabic was also a literal translation that was not strictly correct.

28. **Mr. Tirado Martí** (Spain), returning to the comment made by the representative of the United States, said that in Latin American countries secured transactions laws used the term "garantías mobiliarias".

29. **Ms. Sabo** (Canada) said that her earlier intervention had been based on a desire to see continuity in the Commission's work. On reflection, however, it did make sense to change the title of the Model Law, at least in French — and the Secretariat should investigate whether similar changes to other language versions were needed.

30. **Mr. Riffard** (France) said that the French delegation had been involved in reforming secured transactions legislation in various French-speaking countries, using the *UNCITRAL Legislative Guide on Secured Transactions*. Although the Legislative Guide used "opérations garanties", the reformed national legislation used the correct term "sûretés réelles mobilières", and the difference had not caused confusion. However, if the Commission chose to adopt "sûretés réelles mobilières", it must make clear the link between the Model Law and all its work of the last 14 years. That could be done by giving the Model Law a subtitle which referenced the Legislative Guide, on which it was based, or including a footnote explaining the change.

31. **Mr. Tirado Martí** (Spain) said that his delegation would support the inclusion of a footnote or other form of explanation; what mattered was changing the title of, and the

references throughout, the Spanish version of the Model Law.

32. **The Chair** suggested that "secured transactions" should be translated in the title of the Spanish Model Law as "garantías mobiliarias". A footnote or other form of explanation should be included to explain the change, and there should likewise be a note in the Guide to Enactment of the Model Law on Secured Transactions. Once a mistake had been recognized, there was a duty to correct it. He asked for clarification of the exact wording proposed for the French version.

33. **Mr. Riffard** (France) said that, on the basis of tradition, legal specialists used "sûretés réelles mobilières". However, "réelles" was redundant, so purists preferred to use simply "sûretés mobilières". His preference would be to align the French version with the versions in other languages, in particular the Spanish version; if the longer form was going to be used in the Spanish title, then the French title should refer to "sûretés réelles mobilières".

34. **Mr. Foëx** (Switzerland) expressed a preference for "sûretés réelles mobilières" for consistency with the *UNCITRAL Guide on the Implementation of a Security Rights Registry* and the *UNCITRAL Legislative Guide on Secured Transactions: Supplement on Security Rights in Intellectual Property.*

35. **Ms. Sabo** (Canada) said that the choice facing French-speaking delegations was whether to make the French version of the Model Law consistent with earlier texts on secured transactions or with the other language versions of the same text. Her delegation's slight preference was for the latter. Assuming that the Chair's suggestion to use the shorter version of the Spanish in the title would be accepted, the title of the French version would thus refer to "sûretés mobilières".

36. **The Chair** suggested that the French version of the Model Law should use "sûretés mobilières" and requested the Secretariat to look into potential changes to be made to the other language versions.

Draft decision on the adoption of the UNCITRAL Model Law on Secured Transactions *(A/CN.9/XLIX/CRP.4)*

37. **Ms. Sabo** (Canada) proposed that, in the sixth preambular paragraph of A/CN.9/XLIX/CRP.2, in order to clarify that it was not the Model Law alone which provided comprehensive guidance to States, but the entire body of UNCITRAL work on secured transactions, she proposed adding the words "with those texts", so that the sentence would read "… the draft Model Law is based on the recommendations of the *UNCITRAL Legislative Guide on Secured Transactions* and consistent with all texts prepared by UNCITRAL on secured transactions, and, with those texts, thus provides comprehensive guidance to States …".

38. *The draft decision, as orally amended, was adopted.*

(b) Consideration of the draft Guide to Enactment of the draft Model Law on Secured Transactions (A/CN.9/885, A/CN.9/885/Add.1, A/CN.9/885/Add.2, A/CN.9/885/Add.3 and A/CN.9/885/Add.4)

39. **Mr. Bazinas** (Secretariat) said that preparation of the draft Guide to Enactment of the draft Model Law on Secured Transactions had been entrusted to Working Group VI. At its twenty-ninth session, the Working Group had requested one or two more sessions to finalize the draft Guide to Enactment. The Commission might wish to heed that recommendation to allow the Working Group to complete its work, which was already far advanced, with a view to considering and adopting the draft Guide to Enactment at its fiftieth session in 2017.

40. **Ms. Sabo** (Canada) said that in its deliberations on the draft Model Law the Commission had identified many issues that the Guide to Enactment would need to address. Given the importance of the Guide, the Working Group should be allowed the extra sessions it had requested.

41. **Mr. Tirado Martí** (Spain) said that the Working Group should be allowed two extra sessions to complete its work. The draft Guide to Enactment contained many necessary explanations and was a vital tool that would support legislators in their implementation of the Model Law.

42. **The Chair** suggested that the Commission could approve the Working Group's request for one or two additional sessions.

43. **Mr. Cohen** (United States) expressed support for the suggestion.

44. **Mr. Bazinas** (Secretariat) said that, if the Working Group did not need a full two sessions to finish its work on the draft Guide to Enactment, it could use the time remaining to it to discuss its future work — either as a Working Group or by organising a colloquium. He reminded the Commission that publication of the Guide to Enactment would have to come from the UNCITRAL publications budget. Therefore, the Commission might wish to request the Secretariat to reflect its decision in its publications programme and to take the necessary steps to ensure publication of the final version of the Guide to Enactment, in paper and electronic form, in the six official languages of the United Nations.

45. **Ms. Sabo** (Canada) said that a colloquium on future work would be a valuable use of the Working Group's time, if it finished ahead of schedule. Even if it did not finish early, a colloquium should not be ruled out. Her delegation supported the Secretary's suggestions regarding the publication of the Guide to Enactment.

46. **Mr. Dennis** (United States) expressed support for a colloquium on future work, preferably to be held within the Working Group's allotted two weeks. If the Working Group did not complete its work ahead of schedule, however, it should nevertheless be allocated separate conference room time to discuss future work. The Guide to Enactment was due to be complete by the Commission's 2017 session, so it would soon be necessary for the Working Group to take up a new area of work. Some important potential areas of work

had been listed under agenda item 4 (c), including a contractual guide on secured transactions. The Working Group might also consider topics which were not listed, such as warehouse receipt financing fraud.

47. **Mr. Bellenger** (France) said that if the Working Group did have time left over, it should not necessarily dedicate it to secured transactions; it could, as the representative of the United States had proposed, examine other topics. However, the use of the Working Group's time should be considered under agenda item 16: Work programme of the Commission, and not as an isolated issue during the current meeting.

48. **Mr. Garro** (Argentina) expressed support for the suggestions regarding publication of the Guide to Enactment. It was critical to the success of the Model Law, as it would facilitate the translation of its principles and rules into new legislation that would change centuries-old practices. His delegation also supported a colloquium, which should address not only theoretical questions but practical enactment-related ones as well. UNCITRAL should consider coordinating with the Organization of American States, which had its own model law on secured transactions, to discuss issues related to implementation.

49. **Mr. Tirado Martí** (Spain) agreed with the representatives of Canada and the United States: even if the Working Group used up its allocated two weeks, it should still hold a colloquium separately.

50. **The Chair** suggested that the Commission might wish to grant the Working Group one or two additional sessions for it to complete the Guide to Enactment, and to approve the holding of a colloquium, regardless of whether the Working Group finished its work on schedule, to address practical implementation issues. It might also wish to add the publication of the Guide to Enactment, in paper and electronic form, to the Commission's publications schedule and budget.

51. *It was so decided.*

(c) Possible future work in the area of security interests (A/CN.9/871)

52. **Mr. Bazinas** (Secretariat) said that in 2010 the Commission had placed on its future work agenda the preparation of a contractual guide on secured transactions and a uniform law text on intellectual property licensing. In 2015 the Commission had decided to retain those items on its future work programme and consider them at a future session on the basis of notes to be prepared by the Secretariat, following a colloquium or expert group meeting, which should be held within existing resources. The Commission might also wish to consider suggestions for its future work that had been made by Working Group VI and by other Working Groups.

53. One potential area of work was finance to micro, small and medium-sized enterprises. The topic was linked not only to the work of Working Group I on micro, small and medium-sized enterprises, but also to the work of Working Group VI, in two ways. First, it might be necessary to review the Model Law to determine whether its provisions were well adapted to microfinance. Second, the Working Group could examine the issue of providing contractual guidance and transparency with regard to complex financial terms for the benefit of parties to financial transactions involving small and medium-sized enterprises when those parties lacked expert knowledge of such matters or did not have access to the advice of sophisticated counsel. The topic was also related to the possible future work on a contractual guide to enactment that would provide guidance to parties to transactions. In that connection, the Commission might wish to recall that its contractual guide on major industrial contracts had been very well received.

54. The Commission had touched on another potential area of future work the previous day when it had decided to add a paragraph to article 3 of the Model Law stating that parties could agree to resolve their disputes by arbitration. The topic was relevant to the work of Working Groups II and V, on dispute settlement and insolvency respectively, because it was important to decide whether disputes concerning security rights were arbitrable in the context of insolvency. The issue called for joint work by experts on arbitration, insolvency and secured finance. The Commission might wish to take note of the new potential topic and place it on its agenda for future consideration on the basis of a note to be prepared by the Secretariat, possibly following an expert group meeting or colloquium held within existing resources, and subject to the general discussion of the work of the Commission as a whole which was scheduled for later in the current session.

The meeting was suspended at 11.35 a.m. and resumed at 12.05 p.m.

55. **Mr. Dennis** (United States) expressed support for a colloquium for the selection of future topics of work. A contractual guide on secured transactions was a good idea, but all potential areas of work, including warehouse receipt financing, should be discussed. Although it was covered by the Model Law, there had been substantial fraud in warehouse receipt financing; it might be useful for the Commission to develop an instrument to address that.

56. **Ms. Sabo** (Canada) also supported convening a colloquium, which could benefit from expert input, to decide on future areas of work. Although not convinced that warehouse receipt financing was a priority, her delegation thought that it and all other potential topics should be considered. Before giving a mandate to the Working Group, the Commission had to determine the parameters of its chosen topic. It was important, first, to have a clear idea of the problem to be addressed and to evaluate the likelihood of reaching a consensual solution — the temptation to find a solution and then look for the problem later must be avoided.

57. **Ms. Flor** (Mexico) expressed support for the suggestion made by the representative of the United States for the Working Group to work on warehouse receipt financing fraud. Mexico was doing work on that issue, which was related closely to secured transactions.

58. **The Chair** said that the topics mentioned by the Secretariat, along with warehouse receipt financing, could be discussed at a colloquium as suggested.

(d) Coordination and cooperation

59. **Mr. Bazinas** (Secretariat) said that the Commission might wish to recall that considerable effort had been put

into cooperating with other organizations in the area of secured transactions. One outcome was the joint publication, with the International Institute for the Unification of Private Law (Unidroit) and the Hague Conference, of texts on security interests. The Secretariat currently had a mandate, which it would like the Commission to renew, to coordinate and cooperate on four projects. Coordination served to prevent duplication of efforts, and overlaps and conflicts among texts; make the best use of public resources; and ensure that the results of the Commission's work were adopted and appropriately used.

60. The first project involved collaboration with the World Bank on the Creditor Rights and Insolvency Standard. A few years earlier the Secretariat had worked with colleagues at the World Bank to prepare a revised version of the Standard, which combined the World Bank Principles for Effective Insolvency and Creditor/Debtor Regimes and relevant recommendations from the *UNCITRAL Legislative Guide on Insolvency Law*. The Secretariat was also seeking to have the Standard include references to the relevant recommendations of the *UNCITRAL Legislative Guide on Secured Transactions*. Collaborative efforts were ongoing: the Secretariat had provided extensive comments on the World Bank Principles, and was currently waiting to hear back from the World Bank regarding progress on the revised Standard.

61. The second project, with the European Commission, was designed to ensure a coordinated approach to the law applicable to third-party effects of the assignment of receivables, taking into account the United Nations Convention on the Assignment of Receivables in International Trade, the *UNCITRAL Legislative Guide on Secured Transactions* and the newly adopted Model Law. At the latest meeting a few years earlier, there had been a discussion of how the Commission could implement recommendations made on the basis of a study prepared by the British Institute of International and Comparative Law, while also ensuring that there was one basic rule for third-party effects of assignments, on the understanding that if there were conflicting rules everyone stood to lose. The Commission agreed that it was important to have a coordinated approach, and a single rule, but it had not yet seen the study or the European Commission's proposal. When the proposal was ready it would probably be translated into a legislative initiative. A number of European Union members which were parties to the Unidroit Convention on International Factoring, or were interested in the Receivables Convention for other reasons, were delaying their ratification, which was of concern. The ongoing coordination between the Secretariat and the European Commission would be pursued.

62. The third project involved collaboration with Unidroit on development of a fourth Protocol to the Convention on International Interests in Mobile Equipment (the Cape Town Convention), which would address international interests in mining, agricultural and construction equipment. The Protocol might cover items that were not included in previous protocols, namely low-value items and items that were not uniquely identifiable, which would create overlap and potential conflict with the Commission's work on security interests. The Secretariat was cooperating with Unidroit to avoid such conflict. The Unidroit Governing Council had recently referred the matter to an intergovernmental group of experts, which would meet in 2017; the Secretariat thus hoped that its mandate for coordination with Unidroit would be renewed.

63. The fourth coordination effort related to the implementation of the Commission's texts on security interests. The Secretariat was working with various organizations — primarily the World Bank Group, but also the Organization of American States — to provide technical assistance to States interested in implementing such texts; as well as to develop local capacity, in particular in the area of security interest registries, but also on secured transactions law more generally, as the benefits of a modern registry and a modern secured transaction law could not be realized unless the users of the law took full advantage of them.

64. The Commission might wish to take note of the efforts undertaken thus far and renew the Secretariat's coordination and cooperation mandate.

65. **Ms. Sabo** (Canada) said that her delegation supported the renewal of the Secretariat's coordination and cooperation mandate. It was important for the Secretariat to participate in the meeting of the intergovernmental group of experts on the proposed mining, agriculture and construction Protocol being developed by Unidroit. The inclusion of low-value equipment was of less concern, given the way that the draft Protocol had been structured, but it was nevertheless worth UNCITRAL participating in the proceedings. Coordination between UNCITRAL and Unidroit in the area of security interests was crucial, primarily to ensure consistency between the instruments they produced.

66. **Mr. Garro** (Argentina) expressed strong support for the renewal of the Secretariat's coordination and cooperation mandate. The coordination that had led to the joint publication *UNCITRAL, Hague Conference and Unidroit Texts on Security Interests* was valuable; similar efforts should be made to coordinate the implementation of the Model Law with that of the Model Inter-American Law on Secured Transactions of the Organization of American States, which had already underpinned reforms in six countries in the region. Collaboration would not only mean that efforts were not duplicated, but would also facilitate learning from different countries' enactment experiences and mistakes. The Secretariat had a great re-education challenge ahead of it: the restructuring of registers and legal systems which were based on entirely different principles to those underlying the Model Law was a huge undertaking.

67. **Mr. Dennis** (United States) agreed that the Commission should renew the Secretariat's mandate. The Secretariat had been actively assisting Asia-Pacific Economic Cooperation with the implementation of the *UNCITRAL Legislative Guide on Secured Transactions*, and would hopefully also support its implementation of the new Model Law. Therefore, the Secretariat should consider extending its existing coordination with the International Finance Corporation and the Organization of American States to also include Asia-Pacific Economic Cooperation.

Agenda item 21: Adoption of the report of the Commission (A/CN.9/XLIX/CRP.1/Add.1, A/CN.9/XLIX/CRP.1/Add.2, A/CN.9/XLIX/CRP.1/Add.3 and A/CN.9/XLIX/CRP.1/Add.4)

68. **The Chair** invited the Commission to consider the paragraphs of the draft report relating to the Commission's deliberations so far on agenda item 4, as contained in documents A/CN.9/XLIX/CRP.1/Add.1 and 2.

A/CN.9/XLIX/CRP.1/Add.1

69. **Mr. Bazinas** (Secretariat) drew attention to revisions that had been made to A/CN.9/XLIX/CRP.1/Add.1. The first was to add an additional sentence to paragraph 16, referring to article 13 of the Model Law, which was based on article 9 of the United Nations Convention on the Assignment of Receivables in International Trade. The Commission had decided to delete the term "subsequent" as a qualifier of "secured creditor" in article 13, on the understanding that it was a drafting change that would not affect the interpretation of the Convention. It was an important point, so a decision had been taken to include it in paragraph 16 of A/CN.9/XLIX/CRP.1/Add.1. A new subparagraph, (b), would read: "As the meaning of the term 'subsequent' was not clear (unlike the Receivables Convention, which defined the term 'subsequent assignment' in article 2, subparagraph (b), the draft Model Law did not contain a definition of the term 'subsequent security right') and on the understanding that the meaning of paragraph 1 would not change, reference should be made to 'any secured creditor' rather than to 'any subsequent secured creditor'". The previous subparagraph (b) would become subparagraph (c). The second revision was to add "20, 21," in paragraph 26, after the word "articles" and before "24 and 26 unchanged".

70. Within parentheses in article 23 of the Model Law, there would be cross references to the paragraphs of the draft report in A/CN.9/XLIX/CRP.1/Add.4 which reflected the discussion on article 23 that had taken place the previous day.

71. **Mr. Weise** (American Bar Association) said that paragraph 6 (h), which defined the term "inventory", should specify that reference should not be made to "semi-processed".

72. *A/CN.9/XLIX/CRP.1/Add.1, as orally revised and amended, was adopted.*

A/CN.9/XLIX/CRP.1/Add.2

73. **Mr. Bazinas** (Secretariat) said that in paragraph 30, after "57", "61" had been added.

74. **Ms. Gullifer** (United Kingdom) said that the Commission had not yet finalized article 24 and therefore paragraph 7 of A/CN.9/XLIX/CRP.1/Add.2 might need to be changed.

75. **Mr. Bazinas** (Secretariat) said that the point applied to all the matters were still pending. The summary of the deliberations on those matters would be contained in A/CN.9/XLIX/CRP.1/Add.5. Cross references would be included in paragraph 7 of A/CN.9/XLIX/CRP.1/Add.2 and in A/CN.9/XLIX/CRP.1/Add.5 to give readers a full picture of the discussion on article 24.

76. **Mr. Dennis** (United States) proposed that the following sentence should be added to paragraph 12 after the quoted language about the new text: "It was noted that the Guide to Enactment could explain the application of this rule in cases in which the secured creditor registers a notice and takes actions necessary to achieve third-party effectiveness by another means."

77. **Mr. Bazinas** (Secretariat) said that the report reflected decisions taken, so rather than "It was noted …", the new sentence should begin "It was agreed …", and the rest of the sentence should be in indirect speech.

78. **Ms. Gullifer** (United Kingdom) said that her delegation thought that the Commission had agreed to replace the word "return" with "deliver" throughout paragraph 25, which related to article 52 of the Model Law. The paragraph referred to assets sometimes not being returned to the grantor, but being given to a person designated by the grantor who had not possessed them originally; the verb "return" was therefore not appropriate.

79. **The Chair** said that his recollection of the debate was different. The word "return" would remain unchanged in paragraph 25.

80. *A/CN.9/XLIX/CRP.1/Add.2, as orally revised and subject to agreed redrafting, was adopted.*

A/CN.9/XLIX/CRP.1/Add.3

81. **Mr. Bazinas** (Secretariat) said that there was a mistake in paragraph 11. The reference to "subparagraph 4(b)" should be deleted and replaced by subparagraph 4(a)".

82. **Mr. Tirado Martí** (Spain), referring to point (b) of paragraph 3, which concerned article 75 of the Model Law, said that as far as he remembered three delegations had supported the deletion of paragraph 2 and three delegations had spoken in favour of retaining it. It was thus unclear why it was being deleted.

83. **The Chair** said that he recalled that the Commission had decided to delete paragraph 2 of article 75; the draft report accurately reflected that decision.

The meeting rose at 1 p.m.

Summary record of the 1033rd meeting, held at Headquarters, New York, on Friday, 1 July 2016, at 3 p.m.

[A/CN.9/SR.1033]

Chairperson: Mr. Labardini Flores (Vice-Chair) (Mexico)

Contents

In the absence of Mr. Kenfack Douajni (Cameroon), Mr. Labardini Flores (Mexico), Vice-Chair, took the Chair.

The meeting was called to order at 3.05 p.m.

Agenda item 21: Adoption of the report of the Commission (A/CN.9/XLIX/CRP.1/Add.3 and A/CN.9/XLIX/CRP.1/Add.4)

1. **The Chair** drew attention to the section of the draft report relating to the Commission's deliberations on the draft Model Law on Secured Transactions in documents A/CN.9/XLIX/CRP.1/Add.3 and A/CN.9/XLIX/CRP.1/Add.4.

Document A/CN.9/XLIX/CRP.1/Add.3

2. **Mr. Cohen** (United States of America) said that, while the Commission's decision to delete the reference in paragraph 3 (c) to recognized markets was reported correctly, the rationale for the decision was not accurately reflected. His delegation would be in favour of removing the explanation, in keeping with the Commission's usual practice. However, if the Commission preferred to retain it, he suggested that the text should be amended by inserting after the word "unclear" the words "and are not applicable in the context of the procedure for obtaining possession of the encumbered assets".

3. **Mr. Weise** (American Bar Association) said that the language in paragraph 14 (b) was open-ended and he suggested replacing it with a new text, to read: "the issue of priority of a security right as against another security right would arise when the acts that gave rise to the priority conflict arose".

4. *A/CN.9/XLIX/CRP.1/Add.3, as orally amended, was adopted.*

Document A/CN.9/XLIX/CRP.1/Add.4

5. **Mr. Bazinas** (Secretariat) said that in the second line of paragraph 5 (1), the word "right" should be inserted after the word "security" and the word "asset'' after "tangible". In paragraph 8, the words "other than a buyer, lessee or licensee" should be deleted, as the issue had given rise to the priority rule reflected in paragraph 9.

6. **Mr. Dennis** (United States of America) said that the last line of paragraph 4 referred to the "exercise of the constitutional right to justice", but he had understood that the Secretariat's statement and the ensuing discussion had related to the right of access to justice. He was therefore unclear why the word "constitutional" had been inserted.

7. **The Chair** suggested amending the end of the sentence to read "the protection of the rights of third parties or access to justice".

8. **Mr. Cohen** (United States of America) said that his delegation had understood that the Commission had agreed to replace, in paragraph 15, the word "Before" in subparagraph 3 (a) under Option A by "No later than".

9. **The Chair**, supported by **Ms. Sabo** (Canada), said that, after some discussion, it had been agreed that the subparagraph would not be changed, to keep it in line with the language used in similar provisions elsewhere in the text. As it was clearly in the Commission's interest that its reports should be well drafted, the fine points of drafting might be left to native English speakers. With respect to article 24, paragraph 7, of the Registry-related Provisions, he asked the representative of the United Kingdom whether there was consensus on a final draft.

10. **Ms. Gullifer** (United Kingdom) said that all interested parties had been consulted and article 24, paragraph 7, had been redrafted on the basis of the discussions. The provisions of article 24 and the Registry-related provisions dealt with effectiveness against third parties, not as against the grantor, since the rights and obligations between the grantor and the secured creditor were governed by the security agreement. Where there was a discrepancy between the maximum amount in the security agreement and the notice, the security right for a competing claimant was limited to the amount stated in the notice. Article 24, paragraph 7, could therefore be simplified, to read: "Notwithstanding paragraph 4, an error in the maximum amount specified in an initial or amendment notice does not render the registration ineffective, but the priority of the security right is limited to the maximum amount specified in the notice or the maximum amount indicated in the security agreement, whichever is lower." There was a consensus that that wording should replace the text appearing in paragraph 11 of document A/CN.9/XLIX/CRP.1/Add.4.

11. Furthermore, it had been agreed that article 42, paragraph 3, should be deleted, because, as had been pointed out, it should not say that the priority was limited to the amount in the registered notice, but to the amount in the security agreement, and that should be subject to the rule governing what happened when there was a discrepancy and the amount in the notice was registered in error. Amending the paragraph thus amounted to saying that the priority was

based on the security agreement and it therefore became redundant.

12. **The Chair** took it that the Commission agreed to include new article 24, paragraph 7, in paragraph 11 and to delete article 42, paragraph 3.

13. *It was so decided.*

14. **Mr. Sono** (Japan) asked for clarification on whether the decision on the use of the word "return" in article 52 would be left to the English speaking representatives. Turning to the last line in paragraph 6 of document A/CN.9/XLIX/CRP.1/Add.4, he asked whether the word "separate" was illogical and should not be replaced by "original", especially in the case where there was one tangible asset that was transformed, such as gold being transformed into a gold ring.

15. **The Chair** said that the Commission had decided to maintain the word "return" in article 52 and that the word "separate" could be retained as it conveyed the desired notion.

16. *A/CN.9/XLIX/CRP.1/Add.4, as orally amended, was adopted.*

The meeting rose at 3.50 p.m.

Summary record of the 1034th meeting, held at Headquarters, New York, on Tuesday, 5 July 2016, at 10 a.m.

[A/CN.9/SR.1034]

Chairperson: Mr. Labardini Flores (Vice-Chair) (Mexico)
Later: Mr. Kenfack Douajni (Cameroon)
Later: Mr. Chan (Rapporteur) (Singapore)

Contents

In the absence of Mr. Kenfack Douajni (Cameroon), Mr. Labardini Flores (Mexico), Vice-Chair, took the Chair.

The meeting was called to order at 10.25 a.m.

Agenda item 21: Adoption of the report of the Commission (*continued*) (A/CN.9/XLIX/CRP.1/Add.5)

1. **The Chair** invited the Commission to resume its consideration of the section of the draft report concerning the draft Model Law on Secured Transactions (A/CN.9/XLIX/CRP.1/Add.5).

2. **Mr. Bellenger** (France) said, with respect to paragraph 13, that it was his understanding that no formal decision to hold a colloquium had been taken and that such a decision would not be taken until the Commission discussed its future programme of work as a whole at the end of the current session.

3. **Mr. Dennis** (United States of America), supported by **Ms. Sabo** (Canada), said that, as the issue of the colloquium was appropriately dealt with in the last sentence of paragraph 10 of the report, and as the colloquium was to be held within the Commission's existing conference servicing resources, paragraph 13 needed no modification.

4. **Mr. Wang** Jianbo (China) said that his delegation agreed with the representative of France. A decision to hold a colloquium could not be taken without further discussion.

5. **Mr. Chan** (Singapore) recalled that, during the relevant discussion, some delegations had expressed the view that the colloquium should take place whether or not Working Group VI completed its work during the next two sessions, while others had said that a decision on the colloquium should be deferred until the Commission had achieved a holistic view of its work for the coming year. His delegation had taken the latter position.

6. **The Chair** said that paragraph 10 accurately reflected the agreement reached in the past week's discussions. It therefore seemed unnecessary to change either paragraph 10 or paragraph 13.

7. *The section of the draft report contained in document A/CN.9/CRP.1/Add.5 was approved.*

8. *Mr. Kenfack Douajni (Cameroon) took the Chair.*

Agenda item 2: Election of officers (*continued*)

9. **Mr. Sorieul** (Secretary of the Commission) invited the Commission to elect a member of the Asia-Pacific Group to serve as Rapporteur.

10. **Ms. Mangklatanakul** (Thailand) nominated Mr. Chan (Singapore) to serve as Rapporteur of the Commission.

11. **Ms. Sabo** (Canada), **Mr. Wang** Jianbo (China), **Mr. Dennis** (United States of America) and **Mr. Apter** (Israel) seconded the nomination.

12. *Mr. Chan (Singapore) was elected Rapporteur by acclamation.*

13. **Mr. Sorieul** (Secretary of the Commission) said that it had been suggested that the newly elected Rapporteur, in his capacity as Chair of Working Group III, which dealt with the issue of online dispute resolution, should preside over the discussions on agenda item 6. While it was unusual for a Rapporteur to chair the discussions of a General Assembly body, he took it that the Commission agreed to that course of action.

14. *It was so decided.*

15. *Mr. Chan (Singapore), Rapporteur, took the Chair.*

Agenda item 6: Consideration of issues in the area of online dispute resolution: finalization and adoption of Technical Notes on Online Dispute Resolution (*continued*) (A/CN.9/888; A/CN.9/XLIX/CRP.3)

16. **The Chair** said that the Technical Notes on Online Dispute Resolution (A/CN.9/888), prepared by Working Group III, were of a different nature from the rules on that subject which the Working Group had originally intended to formulate. They represented a balanced compromise among competing views. In discussing the Technical Notes on Online Dispute Resolution, the Commission would be well advised to bear in mind that it would be difficult to make changes to the underlying principles of the document without reopening issues on which consensus had already been achieved.

17. **Ms. Nicholas** (Secretariat) said that five drafting changes to the Technical Notes had been proposed in informal consultations. In the first sentence of paragraph 19, the words "The ODR proceeding may commence" should be deleted, as paragraph 34 defined the time when online dispute resolution proceedings were deemed to have commenced. Secondly, and also so as not to undermine paragraph 34, the first sentence of paragraph 33 should be amended to read, "In order that an ODR proceeding may commence, it is desirable…". Thirdly, for the sake of consistency throughout the document, the word "claimant's" before "notice" in paragraphs 36 and 51 should be deleted. Fourthly, the words "as described in paragraph 46 below" should be added to the end of paragraph 42 for greater clarity. Lastly, in paragraph 53, the words "due process" should be deleted and, after "standards", the words "of confidentiality and due process" should be added, so as to better reflect the consensus reached by Working Group III at its thirty-third session.

18. **Mr. Apter** (Israel) said that paragraph 6 did not explain the relationship between the Technical Notes and domestic law, particularly laws relating to consumers and arbitration. He proposed that the sentence "The Technical Notes are not intended to supplement or override domestic law" should be added at the end of paragraph 6.

19. **Mr. Decker** (Observer for the European Union) said that it was entirely clear that the Technical Notes were intended to be descriptive and not prescriptive, and that they did not supplement or override domestic law. The proposed addition was therefore unnecessary; moreover, it might imply that other paragraphs without such a caveat did take precedence over domestic law. To address the concern expressed by the representative of Israel, however, he proposed that the report of the current session should clearly state that the Technical Notes could not supplement or override domestic law.

20. **Mr. Maradiaga** (Honduras) said he agreed that the proposed addition was not necessary; technical notes, by definition, did not override domestic laws. Nevertheless, he did not object to the proposal to include, in the report of the current session, a note specifying that the Technical Notes could not supplement or override domestic law.

21. **Mr. Dennis** (United States of America) said that his delegation fully supported the proposed drafting changes read out by the representative of the Secretariat. He agreed that the proposal made by the representative of Israel was unnecessary: paragraph 6 already stated that the Technical Notes did not "impose any legal requirement binding on the parties". A note in the report of the session, as suggested by the observer for the European Union, would be acceptable.

22. **Mr. Wang** Jianbo (China) said that he did not see the need for either the proposed addition to paragraph 6 or a special note in the report of the current session.

23. **Mr. Nawana** (Sri Lanka) said he concurred that the proposed addition was not necessary, nor was a specific note in the report of the session.

24. **The Chair** said that, because the issue was being discussed, there would naturally be a record of it in the report of the current session.

25. **Mr. Wijnen** (Observer for the Netherlands) said he agreed that the proposed addition was unnecessary, but supported the inclusion of a note in the report of the session.

26. **Mr. Fang** (China Society of Private International Law) said he agreed that the suggested addition was unnecessary, given the non-legislative, non-binding nature of the Technical Notes.

27. **Mr. Schoefisch** (Germany) said that he supported the drafting changes presented by the Secretariat, but agreed that the additional sentence proposed by the representative of Israel should not be included, as it could lead to confusion. The Israeli proposal would be reflected in the report of the session, as the Chair had indicated. To address the concern of the representative of Israel, a note could be included in the report stating that technical notes could never override domestic law.

28. **Ms. Menéndez González** (Spain) said that her delegation did not support the proposal made by the delegation of Israel, as the proposed addition to paragraph 6 was unnecessary and could in fact engender confusion. Although her delegation did not believe that it was absolutely necessary to refer to the issue in the report, it would support the proposal of the European Union in the interest of consensus.

29. **Mr. Decker** (Observer for the European Union) said that there was some confusion regarding his delegation's proposal. It had not meant to include a specific note in the report, but rather to reflect the Commission's understanding that the Technical Notes were purely descriptive in nature and could not override applicable domestic laws.

30. **Mr. Chander** (India) said that his delegation did not support the Israeli proposal, as the additional wording would dilute the meaning of paragraph 6. However, the views of the delegation of Israel should be properly reflected in the report.

31. **Mr. Apter** (Israel) said that his delegation was willing to take the approach suggested by the observer for the European Union. At a later date, the Commission might wish to discuss the possibility of referring to the issue in the preamble to the resolution on the adoption of the Technical Notes.

32. His delegation wished to propose another change to the Technical Notes. As the issue of language was very important for Israel, his delegation suggested that the sentence "The ODR administrator may utilize technical means to accommodate this selection" should be added to the end of paragraph 51.

33. **The Chair** said that the current wording was the result of a compromise achieved in the Working Group meetings.

34. **Mr. Fornell** (Ecuador) requested clarification of the proposal made by the delegation of Israel.

The meeting was suspended at 11.50 a.m. and resumed at 12.10 p.m.

35. **Mr. Apter** (Israel) said that his delegation's proposed wording was intended to make it clear that the online dispute resolution administrator should assist parties with language

issues. However, as that proposal had not gained support, his delegation would withdraw it.

36. In paragraph 53, his delegation suggested that the words "standards of confidentiality and due process that apply to that process" should be replaced with "confidentiality and due process standards that apply to dispute resolution proceedings".

37. **Mr. Dennis** (United States of America), **Ms. Dostie** (Canada), **Mr. Decker** (Observer for the European Union) and **Ms. Matias** (Jerusalem Arbitration Center) said that they supported the proposal as a useful clarification of the text.

38. *Paragraph 53, as amended, was approved.*

39. **Ms. Nicholas** (Secretariat) said that in the course of the informal consultations the Chinese delegation had drawn attention to an inconsistency in the Technical Notes concerning the commencement of online dispute resolution proceedings. While paragraphs 19 and 33 indicated that online dispute resolution proceedings commenced when a claimant submitted a notice through the online dispute resolution platform to the online dispute resolution administrator, paragraph 34 stated that the proceedings could be deemed to have commenced when the online dispute resolution administrator notified the parties that the notice was available on the platform. During the informal consultations, it had been suggested that paragraphs 19 and 33 should be amended, as Working Group III preferred the language of paragraph 34, which referred to a clear and unambiguous point in time.

40. The Working Group's understanding was that the administrator would notify the parties of the availability of the notice on the platform within a reasonable time. However, while the notion of reasonable time was mentioned in paragraph 35, in connection with action by the respondent, it did not appear in paragraph 34. The Commission might therefore wish to amend paragraph 34 to make that understanding explicit.

41. **Mr. Wang** Jianbo (China) said that the inconsistency between paragraphs 19 and 33, on the one hand, and paragraph 34, on the other, must be resolved. Furthermore, in its current formulation, paragraph 34 conferred an enormous amount of responsibility on the administrator and could create delays, as the proceedings could not commence until the administrator had notified the parties that the claimant's notice was available on the platform. If the administrator failed to publish the notice, the proceedings might never begin. That ran counter to the intention of the Technical Notes, which was to ensure that disputes were resolved as quickly as possible. Leaving the entire procedure in the hands of the administrator could compromise the efficiency of the proceedings. He therefore proposed that paragraph 34 should be amended to read, "ODR proceedings may be deemed to have commenced when the claimant communicates a notice to the ODR administrator. It is desirable that the administrator notify the parties that the notice is available at the ODR platform within a reasonable time".

42. **Mr. Schoefisch** (Germany) said that the Chinese proposal was problematic, as under such a system one of the parties might not be aware that proceedings had begun. Proceedings should not be deemed to have commenced until both parties had been notified.

43. **Mr. Decker** (Observer for the European Union) said that there was no need to add a reference to timely processing by the administrator to paragraph 34; it would be appropriate for that expectation to remain implicit. The concern that delayed action by the administrator could hinder the proceedings might merit further discussion, but the solution could not be to advance the moment at which proceedings were deemed to have commenced to the time of the communication of the claimant's notice to the administrator. Such a change to paragraph 34 would undermine the consensus of the Working Group.

44. **Mr. Zhang** (Asia Pacific Regional Arbitration Group) said that he supported the views of the Chinese delegation with regard to the time when online dispute resolution proceedings should be deemed to have commenced. However, the Commission should consider replacing the word "may" with the word "shall" or "should" in paragraph 34, to avoid ambiguity. Furthermore, that paragraph should state that the notice submitted to the administrator must fulfil the requirements set out in paragraph 33.

45. **Ms. Matias** (Jerusalem Arbitration Center) said that online dispute resolution proceedings should be deemed to have commenced when the administrator notified the parties that the notice was available. As online dispute resolution was a new process, it was not yet clear how platforms would be regulated and monitored or how efficient they would be. It would therefore be risky to deem proceedings to have commenced when the claimant submitted a notice. To address the concerns expressed by the representative of China, language could be added to paragraph 34 to indicate that the administrator should notify the parties promptly when a notice was received.

46. **Mr. Dennis** (United States of America) said that paragraph 34 was consistent with article 3, paragraph 2, of the Commission's Arbitration Rules, which stated that arbitral proceedings should be deemed to commence on the date on which the notice of arbitration was received by the respondent. While the Technical Notes were not rules, they should not imply anything that was inconsistent with the Arbitration Rules. It should also be noted that the need for the administrator to give prompt notice to the parties was dealt with in paragraph 31 (b) of the Technical Notes.

47. **Mr. Wang** Jianbo (China) said that contradictions within the text must be resolved, even if the contradictory paragraphs had been agreed upon by the Working Group. Thus, the text must be amended to reconcile paragraphs 19 and 34. His delegation had therefore proposed a minor change to paragraph 34, which would make it possible to preserve paragraphs 19 and 33 as they stood. The amendment should be made in paragraph 34, since that paragraph came later in the text than paragraphs 19 and 33. His delegation was not attempting to undermine the consensus of the Working Group but simply to make the text coherent.

48. **Mr. Apter** (Israel) said that his delegation strongly preferred to retain the current wording of paragraph 34, which accurately reflected the consensus reached by the Working Group.

The meeting rose at 1 p.m.

Summary record of the 1035th meeting, held at Headquarters, New York, on Tuesday, 5 July 2016, at 3 p.m.

[A/CN.9/SR.1035]

Chairperson: Mr. Chan (Rapporteur) (Singapore)
Later: Mr. Kenfack Douajni (Cameroon)

Contents

In the absence of Mr. Kenfack Douajni (Cameroon), Mr. Chan (Singapore), Rapporteur, took the Chair.

The meeting was called to order at 3.15 p.m.

Agenda item 6: Consideration of issues in the area of online dispute resolution: finalization and adoption of Technical Notes on Online Dispute Resolution (*continued*) (A/CN.9/888; A/CN.9/XLIX/CRP.3)

1. **The Chair** invited the Commission to resume its consideration of the Technical Notes on Online Dispute Resolution (A/CN.9/888).

2. **Ms. Nicholas** (Secretariat) said that informal consultations had taken place on the amendments that had been proposed, at the Commission's preceding meeting (A/CN.9/SR.1034), to paragraphs 19, 33 and 34 of the Technical Notes; those proposals were aimed at removing an element of ambiguity regarding the commencement of online dispute resolution proceedings. During the informal consultations, delegations had agreed that the overall dispute resolution process began when a claimant notified the online dispute resolution administrator of a claim, but formal dispute resolution proceedings could not begin until the notice was actually received by the system. Thus, the clearest point at which the first stage of dispute resolution proceedings could begin was when the administrator notified all parties of the receipt of the notice. All delegations had agreed that that was what took place in practice and that the wording of paragraphs 19, 33 and 34 of the Technical Notes could be improved to make that clearer, but an agreement had not been reached on precisely how the text should be amended.

The meeting was suspended at 3.20 p.m. and resumed at 4.10 p.m.

3. **Ms. Nicholas** (Secretariat) said that no consensus had been reached on the proposed amendments to paragraphs 19, 33 and 34, and suggested that those paragraphs should therefore remain unchanged.

4. **Mr. Schoefisch** (Germany) said that it would have been possible to achieve a consensus if all parties had been willing to do so.

5. **Mr. Dennis** (United States of America) requested that the report of the Commission should indicate that all delegations but one had agreed that online dispute resolution proceedings could be deemed to have commenced when, following a claimant's communication of a notice to the online dispute resolution administrator, the online dispute resolution administrator notified the parties that the notice was available at the online dispute resolution platform, as stated in paragraph 34, and that the majority of delegations that had expressed a view had considered that the point in time when online dispute resolution proceedings began was not regulated by paragraph 19.

6. **The Chair** said that it would be difficult to include the wording proposed by the representative of the United States in the report, since not all delegations had spoken in the same terms. The report would, however, reflect the views expressed by the United States and other delegations.

7. **Mr. Apter** (Israel) said that he shared the view expressed by the United States delegation. Many States represented in Working Group III had agreed that the point in time when proceedings commenced was regulated by paragraphs 33 and 34, not paragraph 19.

8. **Mr. Wang** Yi (China) said that if a State were to be singled out in the report, that State should be named. In any case, it was not true that the amendments had been blocked by a single delegation. The reason that no amendments were being made to the three paragraphs under joint consideration was that the majority of delegations were opposed to the amendment which his delegation had proposed in relation to paragraph 34.

9. **Ms. Matias** (Jerusalem Arbitration Center) said that her delegation concurred with the comments of the representatives of the United States and Israel regarding paragraph 34. It was important for that paragraph to be consistent with article 10 of the United Nations Convention on the Use of Electronic Communications in International Contracts.

10. **Mr. Schoefisch** (Germany) said that he endorsed the comments of the representative of the United States. As no delegation had submitted written comments expressing concerns prior to the discussion of the text, it was accurate to say that most or all delegations approved of it. Since there was broad support for the proposed amendments to paragraphs 19 and 33 but not for the proposed amendment to paragraph 34, paragraphs 19 and 33 should be amended and paragraph 34 should remain as it stood.

11. **Mr. Decker** (Observer for the European Union), supported by **Mr. Wijnen** (Observer for the Netherlands),

said that his delegation was in favour of amending paragraphs 19 and 33 as proposed at the preceding meeting, while retaining the current wording of paragraph 34. He agreed that the report should reflect the common understanding that the point in time at which online dispute resolution proceedings commenced was addressed in paragraphs 33 and 34.

12. **Ms. Nicholas** (Secretariat) said that the proposals made at the 1034th meeting concerning paragraphs 19 and 33 had been provisionally approved, pending a final decision on the proposed amendments to paragraph 34. Since there was no consensus on the proposed amendment to paragraph 34, it was the Secretariat's understanding that there was no longer any agreement to amend paragraphs 19 and 33.

13. **Mr. Wang** Yi (China) said that his delegation's understanding was consistent with that of the Secretariat and that, therefore, paragraphs 19 and 33 should not be amended.

14. **Mr. Schoefisch** (Germany) said that, in accordance with the past practice of the Commission, a broad majority constituted a consensus. Therefore, if the Chinese delegation was the only one to object to the proposed amendments to paragraphs 19 and 33, a consensus had been reached and the text should be amended accordingly.

15. **The Chair** said that he shared the German delegation's understanding of what constituted a consensus.

16. **Mr. Maradiaga** (Honduras) said that the most expedient path would be to accept the amendments read out by the Secretariat at the Commission's 1034th meeting. It should be borne in mind that the Technical Notes were simply technical standards setting out the principles of dispute resolution; as such, they did not affect domestic or international law.

17. **Mr. Bellenger** (France) said that his delegation was in favour of the amendments to paragraphs 19 and 33. Since the Technical Notes did not constitute a legally binding text, the exact wording was less important than ensuring that the intention was clear.

18. **Mr. Decker** (Observer for the European Union), **Mr. Popovici** (Romania), **Mr. Dennis** (United States of America), **Mr. Rangreji** (India), **Mr. Wijnen** (Observer for the Netherlands), **Mr. Milassin** (Hungary), **Mr. Apter** (Israel), **Ms. Dostie** (Canada), **Ms. Menéndez González** (Spain), **Mr. Özsunay** (Turkey) and **Mr. Yang** Jai-Ho (Republic of Korea) expressed support for the proposed amendments to paragraphs 19 and 33.

19. **The Chair** said he took it that, in accordance with the consensus, the Commission wished to approve paragraphs 19 and 33, as amended, and paragraph 34 without change.

20. *It was so decided.*

21. **Mr. Wang** Yi (China) said that he wished to know the basis on which certain paragraphs of the text approved by the Working Group had been reopened for discussion and amendment. He also requested clarification on whether a consensus could be considered to exist in cases where there was strong opposition from a single delegation or region.

22. **The Chair** said that in the practice of the Commission and many other United Nations forums, unanimity was not a condition for a consensus. In the case of the Technical Notes, the Commission had considered proposed amendments to resolve drafting issues identified in the text approved by the Working Group. The majority of delegations supported the proposed drafting changes to paragraphs 19 and 33, and that consensus must be respected.

23. **Ms. Nicholas** (Secretariat) recalled that a proposal had been made, in informal consultations, to add the words "as described in paragraph 46 below" to the end of paragraph 42.

24. *Paragraph 42, as amended, was approved.*

25. **Ms. Nicholas** (Secretariat) recalled that another proposal had been made to change the phrase "the claimant's notice" in paragraphs 36 and 51 to "the notice", for the sake of consistency.

26. *Paragraphs 36 and 51, as amended, were approved.*

27. *The Technical Notes on Online Dispute Resolution, as amended, were adopted.*

Draft decision on the adoption of the Technical Notes on Online Dispute Resolution (A/CN.9/XLIX/CRP.3)

First, second and third preambular paragraphs

28. **Mr. Apter** (Israel), supported by **Ms. Dostie** (Canada), proposed that, in the second preambular paragraph, the words "online cross-border transactions" should be replaced with "online cross-border high-volume, low-value transactions" to reflect the language used in various reports of the Working Group. He also proposed that, in the third preambular paragraph, the words "simple, fast, flexible and secure manner" should be replaced with the words "simple, fast, flexible, efficient, low-cost and secure manner".

29. **Ms. Matias** (Jerusalem Arbitration Center) suggested that the Commission might wish to leave the second preambular paragraph unchanged, since it consisted of a general description of online dispute resolution, the use of which was not limited to high-volume, low-value transactions.

30. **Mr. Decker** (Observer for the European Union), supported by **Mr. Wijnen** (Observer for the Netherlands), said that the text should not refer to high-volume transactions, as the Working Group had dropped the term. With that exception, his delegation supported the proposals made by the representative of Israel.

31. **Mr. Wang** Yi (China) said that, as the preamble was sufficiently clear, his delegation did not support the proposed amendments.

32. **Mr. Apter** (Israel) said that he wished to modify his proposal in line with the suggestion made by the observer for the European Union. The reference to low-value transactions should be included in order to make it clear that the Technical Notes were intended to regulate such transactions. The proposed amendment would not preclude the use of online dispute resolution for other types of transactions.

33. **Mr. Fang** (China Society of Private International Law) said that it would be preferable not to add to the preamble, in order to ensure that the text remained concise. Readers would understand the purpose of the Technical Notes without a specific reference to low-value transactions in the adopting decision.

34. **Mr. Schoefisch** (Germany) said that the draft decision should reflect the fact that the Working Group's discussions had concerned low-value transactions. His delegation had no objection to the addition of the words "efficient, low-cost" to the third preambular paragraph.

35. **Mr. Rangreji** (India) said that his delegation did not support the proposals. The second preambular paragraph should remain general and, in any case, there was a reference to low-value contracts in the penultimate preambular paragraph. The addition of the words "efficient" and "low-cost" in the third preambular paragraph would not add any value to the text.

36. **Mr. Dennis** (United States of America) said that he agreed with the representatives of China and India. He recalled that paragraph 22 of the Technical Notes, on the scope of the online dispute resolution process, mentioned low-value transactions but did not limit the use of online dispute resolution to such transactions. Thus, an amendment to the draft decision indicating that the Technical Notes applied only to low-value transactions would be inconsistent with the text of the Technical Notes.

37. **The Chair** said he took it that the Commission wished to leave the paragraphs as they stood.

38. *It was so decided.*

39. *The first, second and third preambular paragraphs were approved.*

Fourth, fifth and sixth preambular paragraphs

40. *The fourth, fifth and sixth preambular paragraphs were approved.*

Seventh and eighth preambular paragraphs

41. **Mr. Wang** Yi (China) said that the terms "accountability" in the seventh preambular paragraph and "development of systems" in the eighth preambular paragraph had not been translated correctly in the Chinese version of the text.

42. **The Chair** said that the Secretariat would work with the language services to resolve the problem.

43. *The seventh and eighth preambular paragraphs were approved.*

Ninth preambular paragraph

44. *The ninth preambular paragraph was approved.*

Paragraphs 1, 2 and 3

45. *Paragraphs 1, 2 and 3 were approved.*

Paragraph 4

46. **Mr. Apter** (Israel) proposed inserting the words "and intergovernmental organizations" after the word "States".

47. **Mr. Sorieul** (Secretary of the Commission) said that he was not sure whether the Commission could make direct requests to intergovernmental organizations. The report could state that it had been suggested that intergovernmental organizations, in particular those belonging to the United Nations system, could be involved in the promotion of the Technical Notes, and the Secretariat could examine precedents before the matter came under discussion by the Sixth Committee at the seventy-first session of the General Assembly.

48. **Mr. Apter** (Israel) said that he agreed to the suggestion made by the Secretary of the Commission.

49. **The Chair** said he took it that the Commission wished to adopt the draft decision on the adoption of the Technical Notes on Online Dispute Resolution (A/CN.9/XLIX/CRP.3).

50. *It was so decided.*

51. **Mr. Apter** (Israel) proposed that the Technical Notes should be endorsed by the General Assembly in the form of a dedicated resolution, rather than as part of the omnibus resolution on the report of the Commission, in order to draw attention to their importance and facilitate their use as a reference document. The Sixth Committee could perhaps take the final decision on whether or not to adopt a separate draft resolution on the Technical Notes.

52. He also proposed holding a side event during the seventy-first session of the General Assembly to highlight the achievement represented by the conclusion of the text, especially since the Commission would not undertake any work in the area of online dispute resolution for some decades.

53. **Mr. Sorieul** (Secretary of the Commission) said that there were no procedural or technical obstacles to the submission of a separate draft resolution on the Technical Notes. However, the Commission might wish to take a decision in that regard, as the Sixth Committee would be unlikely to approve anything that was not clearly set out in the report.

54. **Mr. Bellenger** (France) said that the adoption of a separate resolution on a non-binding text could set a problematic precedent. He asked whether the adoption of a dedicated resolution on the Technical Notes would necessitate the adoption of a similar resolution on the revised Notes on Organizing Arbitral Proceedings.

55. **Mr. Schoefisch** (Germany) said that a separate resolution should not be submitted unless there were precedents, in order to avoid future confusion as to what matters should be the subject of dedicated resolutions.

56. **Mr. Sorieul** (Secretary of the Commission) said that it was not necessary to give great weight to issues of precedent, as past practice had varied and had often been determined by practical concerns rather than matters of principle. If the Commission submitted a dedicated draft resolution on the Technical Notes, it might wish to do the same for the revised Notes on Organizing Arbitral Proceedings, since the latter was a more ambitious text.

57. **Mr. Dennis** (United States of America) said that he agreed with the representative of Israel regarding the importance of highlighting the Commission's work on online dispute resolution, but also felt that practice should be consistent. He suggested that the matter should be left with the Secretariat.

58. **Ms. Sabo** (Canada) said that there was no established practice with regard to separate resolutions. It might be appropriate to use dedicated resolutions to draw particular

attention to certain texts. She suggested that the Secretariat should determine whether it would be feasible to submit a dedicated draft resolution on any of the texts adopted at the Commission's current session.

59. **Ms. Matias** (Jerusalem Arbitration Center) said that she hoped that the Commission would carry out further work on online dispute resolution. A dedicated resolution on the Technical Notes would send a clear signal that they represented a new and significant development that could benefit many States, in particular developing countries and those affected by conflict.

60. **The Chair** said that there was no clear consensus on the appropriateness of a dedicated resolution on the Technical Notes. He suggested that the Secretariat could continue to consult with States when preparing submissions for the Sixth Committee, which he understood to be the suggestion made by the representative of the United States. He recalled that no action or decision by the Commission would prevent a Member State from submitting a draft resolution on the Technical Notes to the Sixth Committee at its own initiative.

61. **Mr. Moran Morales** (Grupo Latinoamericano de Abogados para el Derecho del Comercio Internacional) said that a dedicated resolution would draw attention to the usefulness of online dispute resolution as an efficient, low-cost tool, particularly for developing countries.

62. **The Chair** suggested that delegations that were in favour of the submission of a dedicated draft resolution on the adoption of the Technical Notes should engage in consultations with the Secretariat. If there proved to be insufficient support, the Commission's adoption of the Technical Notes would be mentioned in the omnibus resolution.

63. *It was so decided.*

64. **The Chair** said that the Commission had concluded its work on the Technical Notes. Online dispute resolution was becoming increasingly important, as the exponential growth in e-commerce and cross-border online transactions meant that there was an urgent need for means of expeditiously and effectively resolving disputes arising from those transactions. Owing to the divergence of views, the Commission's work on the matter had taken more time and effort than initially expected and had resulted in the drafting of the Technical Notes rather than the rules on online dispute resolution that had originally been envisaged. Much had been achieved, considering the differences of opinion, although it was unfortunate that consensus had not been reached on certain critical issues.

65. **Mr. Wang** Yi (China) said that despite the diverging views of member States, all delegations had engaged positively and sincerely in the work on online dispute resolution.

66. *Mr. Kenfack Douajni (Cameroon) took the Chair.*

Agenda item 17: Congress 2017 (A/CN.9/878)

67. **Ms. Nicholas** (Secretariat) recalled that, at its forty-eighth session, the Commission had instructed the Secretariat to begin preparations for a Congress to mark the fiftieth anniversary of the Commission. The Congress would be held in Vienna during the first week of the Commission's fiftieth session, from 4 to 6 July 2017. The Secretariat had created a web page dedicated to the Congress on the Commission's website, and a call for papers had been issued.

68. The Congress would be open to all persons and organizations with an interest in the Commission's areas of activity. The event would be targeted primarily at legal professionals, but relevant policymakers could also participate. One objective of the Congress would be to suggest possible areas of work for the Commission, which might include the development of the cross-border digital economy, global supply chains and access to inputs such as credit, transport and infrastructure, resolution of climate and resource disputes, and the exploitation of global public goods. Participants would also be encouraged to describe commercial law reform activities taking place at the national and regional levels in order to provide the Commission with a holistic view of the types of work it might wish to undertake in the future.

69. **Mr. Dennis** (United States of America) said that States should be given the opportunity to comment on the proposed agenda for the Congress to ensure that the topics covered were in line with the mandate of the Commission and did not impinge on the work of other international organizations.

70. **Mr. Sorieul** (Secretary of the Commission) said that informal consultations on the draft agenda would be held with member States. The Congress could also provide an opportunity to revise or improve the interpretation and understanding of existing texts.

71. **Mr. Schoefisch** (Germany) said that the topics for future work that would be discussed at the Congress should be determined by the Commission, not the Secretariat.

72. **Ms. Sabo** (Canada) said that the Congress should focus not only on future work but also on lessons that could be drawn from past endeavours. She hoped that the agenda would be as broad as possible, and agreed that it should be distributed to member States for comment. She also encouraged the Secretariat to identify and extend invitations to speakers who might have a valuable contribution to make rather than limiting itself to the responses to the call for papers.

73. **Mr. Apter** (Israel) said he agreed that the draft agenda for the Congress should be circulated to member States. He suggested that the items on the agenda should relate to concrete past or future Commission projects, and requested the Secretariat to avoid highly sensitive topics.

The meeting rose at 6.10 p.m.

Summary record of the 1036th meeting, held at Headquarters, New York, on Thursday, 7 July 2016, at 10 a.m.

[A/CN.9/SR.1036]

Chairperson: Mr. Kenfack Douajni (Cameroon)
Later: Mr. Schneider (Vice-Chair) (Switzerland)

Contents

The meeting was called to order at 10.15 a.m.

Election of officers (*continued*)

1. **The Chair** said that it was the turn of the Group of Western European and Other States to nominate a Vice-Chair.

2. **Mr. Schnabel** (United States of America), speaking on behalf of the Group of Western European and Other States, said that the Group nominated Mr. Michael Schneider (Switzerland) for the office of Vice-Chair.

3. *Mr. Schneider (Switzerland) was elected Vice-Chair of the Commission by acclamation.*

4. *Mr. Schneider (Switzerland) took the Chair.*

Tribute to the memory of Sergey N. Lebedev, representative of the Russian Federation in the United Nations Commission on International Trade Law

5. *At the invitation of the Chair, the members of the Commission observed a minute of silence.*

Consideration of issues in the area of arbitration and conciliation

(a) Finalization and adoption of the revised UNCITRAL Notes on Organizing Arbitral Proceedings (A/CN.9/879)

6. **The Chair** said that, at its forty-eighth session, the Commission had approved, in principle, the draft revised UNCITRAL Notes on Organizing Arbitral Proceedings, which had subsequently been revised on the basis of comments from delegations and organizations, and input from experts of the Secretariat. The version of the Notes before the Commission (A/CN.9/879) was the product of the deliberations conducted by the Working Group at its sixty-fourth session, during which it had focused on aligning the Notes with modern practices in the area of arbitration. Note 5 and Notes 14 to 18 had been identified as specific issues for consideration by the Commission at its current session.

Note 5. Costs of arbitration (paragraphs 39 to 49)

7. **The Chair** said that many Working Group members had expressed support for the inclusion of in-house costs in the list of recoverable costs of arbitration, as they felt that parties should freely decide whether to allocate responsibility for work performed in connection with arbitration to external or in-house counsel, and because in-house costs were often a substantial component of the arbitration costs incurred by parties. While current practices reflected an increasing understanding of the significance of in-house costs and support for their inclusion, the differing views on the subject indicated that such acceptance could not be treated as automatic. The Working Group had therefore added a new paragraph (paragraph 40) to Note 5, which reflected a balanced and cautious treatment of the issue of in-house costs, highlighting that support for including them among recoverable costs, though widespread, was not universal.

8. **Mr. Popovici** (Romania) proposed adding at the end of the last sentence of paragraph 40 a new sentence, to read: "When assessing the reasonableness of the amount of such costs, the arbitral tribunal should take into account all the relevant circumstances, inter alia, if necessary, the costs that would have been incurred by the party for the same services or activities had they been provided by an independent provider."

9. **Ms. Dostie** (Canada) said that the issue of in-house costs had been raised for the first time at the Working Group's sixty-fourth session owing to the lack of uniform practice in the matter. In that regard, Note 5 should clearly indicate that the legal representation in respect of which recoverable costs were incurred was not limited to external counsel. For example, government lawyers were typically hired to represent Canada in investment arbitration proceedings, while external legal counsel was rarely used. The recoverability of the costs of legal representation was also in line with the UNCITRAL Arbitration Rules. A clear distinction should be made between those and other in-house costs, including those incurred for work performed by managing directors and other staff members, which should not be recoverable.

10. **The Chair** emphasized that, in certain cases, companies used their own technical and accounting departments rather than outside experts to perform substantial work in connection with arbitration proceedings. He questioned whether such costs should indeed be unrecoverable and whether outsourcing such activities should be favoured over having those activities performed in-house.

11. **Ms. Dostie** (Canada) said that, while the costs of legal representation, including general counsel in the case of commercial arbitration, should be recoverable, making other in-house costs recoverable was a slippery slope that could lead to overbilling for time spent by managing directors and staff members at various levels.

12. **The Chair** said that, while the Working Group had concluded that recoverable costs should not be limited to legal representation, the Commission could discuss whether the Notes should prescribe such a limitation. Paragraph 40 had been drafted to reflect the differing views on that subject; it also addressed some of the considerations underscored by the representative of Romania.

13. **Mr. Apter** (Israel) agreed with the inclusion of the reference to in-house counsel in paragraph 40. Although the Notes did not include references to States, paragraph 40 should be amended to reflect the fact that in-house costs could also be incurred by Governments. He therefore proposed that the words "including States and State agencies" should be inserted in first sentence of paragraph 40, after the word "parties" and before the words "may incur."

14. **Ms. Palacios** (Spain) said that paragraph 40 should be revised to cover situations in which parties, including States, defended claims regarding the use of in-house legal services in the context of investment arbitration proceedings, as was the case in Spain and other countries. It was logical that such costs, which were incurred by the State, should be included among the costs of arbitration, particularly if the Notes were to reflect prevailing international practices. To that end, she proposed the inclusion of a new sentence in paragraph 40, to read: "In particular, some arbitral tribunals have granted reimbursement of the costs of in-house legal counsel when one of the parties organized its defence using primarily its own in-house lawyers."

15. **The Chair** wondered whether the final sentence of paragraph 40, which referred to the practice of some arbitral courts with respect to reimbursement of arbitration costs, would be sufficient to meet Spain's concerns.

16. **Mr. Komarov** (Russian Federation) said that the Notes embodied the experience accumulated over many years by a large number of countries and would play an important role in reforming arbitration legislation in countries by reflecting the complex international standards emerging in the field. Furthermore, while the issue of covering in-house costs was multifaceted and many different aspects related to it could be addressed in the Notes, the text as it stood provided a balanced and accessible formulation, which his delegation fully supported.

17. **Mr. Zhang** Zhenan (Asia Pacific Regional Arbitration Group) said that legal fees of a company or government attorney involved in arbitration proceedings were treated differently in different legal jurisdictions. In China, for instance, the losing party to a dispute was typically not required to pay the fees of the other party's attorney or other in-house counsel; the relevant regulations were specified in China's arbitration law. Given that legal advisers' fees were already included in a company's management costs, he wondered how those fees would be defined for the purposes of the new provision. There should be clear guidelines regarding the conditions under which the costs of legal or other relevant personnel would be borne by the losing party.

18. **The Chair** said that a prescriptive approach to the reimbursement of in-house costs would not be in keeping with the spirit of the Notes. The last sentence of paragraph 40 indicated the practice of some tribunals in that respect; while its exact wording was open to discussion, introducing a prescriptive element would be at odds with the indicative purpose of the Notes.

19. **Ms. Kaufmann-Kohler** (Switzerland) said that paragraph 40 should be amended to clarify that the costs generally accepted as recoverable were not limited to external legal counsel but could also include in-house representation in cases where Government lawyers acted as sole counsel in arbitration proceedings. Such a clarification would reflect the current practice of States that typically hired in-house counsel in investment arbitration proceedings, the costs of which did not fall within the category of in-house costs subject to the different practices indicated in paragraph 40.

20. **The Chair** said that, while Governments might typically use in-house representation, commercial parties were often represented by their general counsel or, in the case of individuals, were self-represented. The Notes should be drafted to leave open such options and to avoid favouring the use of external counsel. It was his understanding that the representatives of Canada and Switzerland wished to ensure that the reference to legal representation in respect of which recoverable costs were incurred was broad enough to reflect the various forms of representation used by different parties.

21. **Mr. Chen** Jian (China) said that a balanced approach was needed, taking into account circumstances that differed from country to country. The document as a whole should be descriptive in nature, not prescriptive, as it was intended to provide information on methods used in various jurisdictions and to draw attention to factors that should be taken into consideration. Under certain conditions, descriptions of those methods would be acceptable and could serve as reference material to be consulted by parties and arbitrators before they took decisions. Recent developments in the Chinese court system were such that a claimant could now receive varying amounts of compensation from the losing party to a dispute. The Commission's current discussion would result in a document that was better aligned with the interests of all parties to a dispute subject to commercial arbitration.

22. **The Chair** said that differentiating between admissible and inadmissible in-house costs was a challenging task. While the last sentence of paragraph 40 outlined some of the criteria used to determine admissibility, for instance, that the relevant costs had to be substantiated in sufficient detail to be distinguished from ordinary staffing

expenses and be reasonable in amount, such criteria often depended on the specific circumstances of each case. Introducing further specifications might therefore be counterproductive, inasmuch as such requirements could only be meaningfully determined in practice.

23. **Mr. Schöfisch** (Germany) said that his delegation supported paragraph 40 and the text, as a whole, as they stood.

24. **Mr. Medina Mejías** (Bolivarian Republic of Venezuela) said that his delegation would appreciate clarification as to whether the Notes covered investor-State arbitration, which, differed greatly from those governing commercial arbitration and should be addressed differently since they affected individuals as opposed to commercial, for-profit, entities. Investor-State arbitration proceedings were frequently compromised when dealt with as commercial issues. He reiterated his delegation's position on arbitration costs and endorsed the proposal that the option for States to use in-house legal counsel in investment arbitration proceedings should not be excluded.

25. **The Chair** said that it was understood that the Notes had the same scope as the UNCITRAL Arbitration Rules and addressed both investor-State and commercial arbitration. In drafting the Arbitration Rules, there had been extensive discussion of whether a distinction should be made between those two categories and the Commission had clearly decided, on several occasions, that the rules should be of a generic nature, while specific points concerning investor-State arbitration, in particular transparency, should be dealt with separately. Those rules having been adopted, any suggestion to limit the scope of the Notes to commercial arbitration would be a matter of principle that should have been raised at the outset, as it would require a review of the Notes in their entirety. As some delegates had pointed out, the Commission should take care not to limit the scope of the Notes inadvertently and he would be reluctant to open such a debate if it contradicted the previous work of the Commission. He therefore took it that the Commission would ensure that the final version of the Notes did not contain any provisions that addressed arbitration in a manner that would cause problems for investor-State arbitration.

26. **Mr. Medina Mejías** (Bolivarian Republic of Venezuela) said that while his delegation would follow the guidance of the Chair, it considered that there were many problems with investor-State arbitration that required reform, such as when States found themselves cornered or when their sovereignty was abused. The issue of transparency could perhaps be dealt with through third-party funding or through the relations between legal counsel and arbitrators, which his delegation deemed important aspects of transparency.

27. **The Chair** drew attention to the report of the Commission's discussion of the previous year, contained in paragraph 19 of document A/CN.9/826.

28. **Ms. Dostie** (Canada) said that her delegation had serious concerns regarding the references to "internal legal, management and other costs" and to the costs relating to "managing directors". Such costs should be recoverable only when framed as in-house legal representation. However, business costs such as salaries, staffing, or witness preparation for company executives or employees should not be recoverable. The notion that there was no principle prohibiting the recovery of in-house costs left the door wide open to the acceptance of a broad range of management and business costs that should not be covered under the UNCITRAL Arbitration Rules. She wondered whether categorizing in-house costs as legal costs might be a solution.

29. **The Chair** said that the view taken by Canada raised a general question of whether the Notes should exclude internal costs. He had seen cases in which a company appointed an employee to deal with an arbitration, and such in-house costs could be recoverable. He invited comments on the matter, inasmuch as practice in that respect differed. The question remained why a company hiring outside experts to conduct technical reports or studies should receive more favourable treatment than one that relied on internal experts. Turning to the issue of costs incurred by "external legal counsel" in paragraph 40, he suggested that the phrase could be replaced with "legal representation". As to the proposal by Israel, he asked the representative of Israel to clarify why there would be a need to distinguish between "State" and "State organizations".

30. **Mr. Apter** (Israel) said that, as it stood, the paragraph was not clear. As he understood from the discussions in the Working Group, reference to in-house legal counsel or legal representation usually concerned companies or corporations; State or State organizations did not automatically come to mind. His delegation therefore deemed it necessary to send a clear message to arbitrators that government representation also came within the purview of the rule, which would justify a departure from the Commission's established practice.

31. **Mr. Komarov** (Russian Federation) said that the issue of covering in-house costs was topical and including it in the Notes was a positive development. However, it would not make sense to state unequivocally that costs should always be covered, given the great variety of circumstances that might occur. Ultimately, the arbitral tribunal would decide whether or not costs should be covered on the basis of the general criteria used to assess the conduct of the parties and the magnitude of the costs claimed with a view to striking a fair balance between the interests of the parties.

32. **The Chair** said that the suggestion for a general reference to costs was relevant in the light of the growing importance of the topic and the increasing costs being claimed and awarded.

33. **Mr. Komarov** (Russian Federation) said that the intent of the text should not be to address all specific issues that could arise with regard to costs, but to establish a basic principle that an arbitral tribunal could use as a basis for making decisions in the light of the circumstances of each case.

34. **The Chair** said that the point raised by the representative of the Russian Federation might be better addressed in paragraph 41, which contained specific reference to in-house costs and could perhaps be given a more general scope. He suggested that the Commission might wish to return to that issue after concluding its discussion of paragraph 40.

35. **The Chair**, replying to the representative of the United States, said that it was proposed to replace "external legal counsel" with "legal representation" and to redraft the rest of the sentence to make clear that "legal representation" also included the in-house services of a company or a Government. The redrafting could be left to the Secretariat.

36. **Mr. Schöfisch** (Germany), supported by **Mr. Maradiaga** (Honduras), said that the balanced draft had already gone through the Working Group and was now before the Commission in its second iteration. The Commission could not therefore address new questions or consider the Notes at another session. He reiterated his delegation's support for the text as it stood and its opposition to reopening the discussion on several points. Germany would support the changes proposed by Canada, subject to final redrafting by the Secretariat.

37. **The Chair** said that the Working Group itself had had concerns regarding in-house legal costs. The text before the Commission reflected those discussions and urged greater caution. At the outset, he had flagged the provision that might require closer attention.

38. He took it that the Commission was not in favour of the amendment proposed by the representative of Israel. He also took it that the Commission rejected the suggestion by the representative of Canada to include a general statement that costs that were not related to legal representation should not be admitted.

39. *It was so decided.*

40. **The Chair**, turning to the Romanian proposal regarding the last sentence of the paragraph, asked whether the Commission wished to expand the paragraph as proposed.

41. **Mr. Popovici** (Romania) said that his delegation's aim was to provide arbitrators with a means of assessing the reasonableness of in-house costs, which should never be higher than similar services provided externally. The Notes should be general enough to be helpful without being prescriptive.

42. **The Chair** said that, although comparing the internal and external costs of the parties was an intelligent method for assessing overall costs, he had not seen it in practice and was therefore hesitant to include it in the Notes. While there appeared to be no support for a separate provision on the issue, it could be useful to include a more general comment on costs as the topic had been of great concern to the arbitral community. Such a comment could be added in paragraph 41, 47, 48 or 49.

43. **Mr. Komarov** (Russian Federation) said that, in the absence of general rules on recovering in-house costs, a reference could be added to the last sentence of paragraph 47 to indicate that in-house costs were taken into account when fixing the recoverable costs.

44. **The Chair** said that it might be useful to highlight the desirability of cost control, in addition to the existing reference to in-house costs in paragraph 47.

45. **Mr. Chen** Jian (China) said that the question of controlling costs was very important, especially given criticisms of the increasing costs of arbitration. Arbitration did have its own unique advantages and was especially effective in practice in the business world. Clear descriptions of costs would certainly be beneficial to practitioners.

46. **The Chair** said that the Secretariat would add a reference on the desirability of cost control to the text.

Introduction (paragraphs 1 to 8)

47. **The Chair** said that the Secretariat would decide whether "2016" should be included in the title of the UNCITRAL Notes on Organizing Arbitral Proceedings. With regard to the introductory section of the Notes, efforts had been made to make it clear that the primary purpose of the Notes was to preserve the diversity and flexibility of arbitration proceedings without creating a prescriptive text.

48. **Mr. Castello** (United States of America) said that the last sentence in paragraph 5 on the non-binding character of the Notes should be modified as, if a tribunal sensed that a matter might become relevant during the proceedings, it should be encouraged to raise that matter at the first procedural conference. The present formulation could imply that such matters should not be addressed until it was considered necessary.

49. **The Chair** said that the suggestion made by the United States brought the text in the right direction by highlighting that the parties should consider what might need to be addressed.

50. **Mr. Pytalev** (Belarus) said that, at the end of paragraph 8, it would be useful to include a provision stating that the arbitral tribunal should take into account the legal traditions of the location of the dispute as far as possible when selecting a set of arbitration rules.

51. **The Chair** said that the proposal of the delegation of Belarus could create new difficulties, as it was unclear which tradition would be examined in cases where multiple States were represented in the parties. While a tribunal was free to refer to the traditions of the place of arbitration, it might wish to avoid doing so.

52. *The Introduction, as amended, was approved.*

Note 1. Consultation regarding the organization of arbitral proceedings; Procedural meetings (paragraphs 9 to 19)

53. **The Chair** said that subsection (a) in Note 1 had been made more general in order to avoid the problems that had previously arisen in interpreting the text.

54. *Note 1 was approved.*

The meeting was suspended at 11.55 a.m. and resumed at 12.35 p.m.

Note 2. Language or languages of the arbitral proceedings (paragraphs 20 to26)

55. *Note 2 was approved.*

Note 3. Place of arbitration (paragraphs 27 to 31)

56. **Mr. Castello** (United States of America) said that his delegation wished to remove the words "the nature and

frequency of" from paragraph 29 (ii) (a) of Note 3 because the concept expressed by those words was already covered in the same sentence by the word "practices".

57. *Note 3, as amended, was approved.*

Note 4. Administrative support for the arbitral tribunal

58. *Note 4 was approved.*

Note 5. Costs of the arbitration (paragraphs 39 to 49)

59. **Mr. Pytalev** (Belarus) said that, with regard to paragraph 49, the rationale behind costs potentially being paid after the award on the merits was unclear. It was more logical for a decision on the costs to be made at the same time as the award and for the Notes to include a statement to that effect.

60. **The Chair** said that decisions on costs were generally made with the final award on the merits, but were sometimes made in the course of proceedings. However, in some jurisdictions the costs were decided by a body or institution other than the judge. That practice was sometimes reflected in arbitration when the decision on the merits was taken before proceedings on the costs took place. The advantage of that practice was that the parties already knew the outcome of the case, but the disadvantage was that the losing party could use the issue of costs to attack the principal award. Therefore, the reference to taking the decision on costs after the award on the merits had been rendered should remain in the text, even though it was not universally considered to be the most effective practice.

61. **Mr. Pytalev** (Belarus) said that he was satisfied with the Chair's explanation.

62. *Note 5 was approved.*

Note 6. Possible agreement on confidentiality; transparency in treaty-based investor-State arbitration (paragraphs 50 to55) and Note 7. Means of communication (paragraphs 56 to 59)

63. *Notes 6 and 7 were approved.*

Note 8. Interim measures (paragraphs 60 to 64)

64. **Mr. Castello** (United States of America) said that paragraph 61 addressed the specific situation of *ex parte* requests for interim measures, while paragraphs 60 and 62 made provisions that were more general in scope. Therefore it would be sensible to reverse the order of paragraphs 61 and 62.

65. **Ms. Van Lith** (International Chamber of Commerce) said that it was unclear whether the scope of Note 8 covered the question of emergency arbitral proceedings, which were typically initiated by an emergency arbitrator in situations where it was not possible to await the constitution of an arbitral tribunal.

66. **The Chair** said that emergency arbitrators indeed operated on the basis of a different set of rules, and reminded the Commission that it had previously addressed the issue raised by ICC and had reached the conclusion that emergency arbitral proceedings were a preliminary step which took place prior to the arbitration proceedings themselves. Therefore a reference to emergency arbitral proceedings was unnecessary in the context of Note 8.

67. *Note 8, as amended, was approved.*

Note 9. Written submissions, witness statements, expert reports and documentary evidence ("submissions") (paragraphs 65 and 66) and Note 10. Practical details regarding the form and method of submissions (paragraph 67)

68. *Notes 9 and 10 were approved.*

Note 11. Points at issue and relief or remedy sought (paragraphs 68 to 71)

69. **Mr. Castello** (United States of America) said that in the interest of clarity, his delegation proposed modifying paragraph 71 so that it would read: "… to ensure the enforceability of any arbitral award that might grant such relief, the arbitral tribunal ...".

70. *Note 11, as amended, was approved.*

Note 12. Amicable settlement (paragraph 72)

71. *Note 12 was approved.*

Note 13. Documentary evidence (paragraphs 73 to 85)

72. **Mr. Castello** (United States of America) proposed modifying the first sentence in paragraph 77 to read: "… but also the reasons for the request, and often, as well, a statement as to why the requested documents are believed to be in the possession of the other party and are not otherwise available to the requesting party." The last sentence of paragraph 78 should also be modified to read: "The arbitral tribunal will often add to the schedule a record of its decision whether to order disclosure on any contested requests."

73. *Note 13, as amended, was approved.*

The meeting rose at 1 p.m.

Summary record of the 1037th meeting, held at Headquarters, New York, on Thursday, 7 July 2016, at 3 p.m.

[A/CN.9/SR.1037]

Chairperson: Mr. Schneider (Vice-Chair) (Switzerland)

Contents

In the absence of Mr. Kenfack Douajni (Cameroon), Mr. Schneider (Switzerland), Vice-Chair, took the Chair.

The meeting was called to order at 3.10 p.m.

Agenda item 5: Consideration of issues in the area of arbitration and conciliation (*continued*)

(a) Finalization and adoption of the revised UNCITRAL Notes on Organizing Arbitral Proceedings (*continued*) (A/CN.9/879; A/CN.9/XLIX/CRP.4)

Note 14. Witnesses of fact (paragraphs 86 to 93)

1. **Mr. Apter** (Israel) said that the wording of the second sentence in paragraph 92 of the Notes (A/CN.9/879) was somewhat strange. Indeed, a practice that was so rare should not even be addressed in the Notes. In addition, the word "securing" in the second sentence was potentially misleading. He suggested keeping only the first sentence of paragraph 92, or replacing "securing" with a word that had a less specific legal connotation.

2. **The Chair** said that the second sentence of paragraph 92 described situations where a party wanted a witness not under its control to appear at a hearing; in such cases, an invitation by the tribunal might help to persuade the witness to appear. It seemed that there was no support for the suggestion made by the delegation of Israel to delete the second sentence. Since the word "securing" might imply that the arbitral tribunal had greater power than it actually had, it could be replaced by "lending support to".

3. **Mr. Castello** (United States of America) suggested that the word "inviting" could be used.

4. **The Chair** said that it could be left to the Secretariat to finalize the wording of paragraph 92 in the light of the comments by Israel and the United States.

5. *It was so decided*.

6. **Mr. Castello** (United States) said that, since the draft revised Notes did not deal with the issue of how a tribunal should decide which witnesses should appear until paragraph 125, paragraphs 91 and 92 should perhaps be combined with that paragraph.

7. **The Chair** said that there appeared to be no objections to the United States suggestion to combine paragraphs 91 and 92 with paragraph 125. He took it that the Commission agreed to the change.

8. *It was so decided*.

9. *Note 14, as amended, was approved*.

Note 15. Experts (paragraphs 94 to 109) and Note 16. Inspection of a site, property or goods (paragraphs 110 to 115)

10. *Notes 15 and 16 were approved*.

Note 17. Hearings (paragraphs 116 to 136)

11. **Mr. Popovici** (Romania) suggested inverting the order of the penultimate and final sentences of paragraph 125 in order to avoid any implication that some weight had already been given to a witness's written statement.

12. **The Chair** said that the third sentence of the paragraph described a situation where the tribunal decided that a witness did not need to testify in the case when there was no request for the witness to appear, whereas the penultimate sentence described a situation where the tribunal chose, for reasons of efficiency or otherwise, to dispense with the testimony of a witness even though the witness had been requested. The last sentence of the paragraph addressed the consequences of a witness not being called and therefore applied to both situations.

13. **Mr. Popovici** (Romania) said that his delegation had understood that the final sentence applied only to the

situation described in the third sentence. Otherwise, it would be implied that a certain amount of weight had been placed on the witness's written statement, namely, sufficient weight to reject the witness's appearance.

14. **Mr. Castello** (United States of America) said that his delegation was concerned not about the penultimate sentence's placement, but rather its wording. As the sentence stood, it appeared to say that, while a tribunal could refuse a witness, if it did so, it might be denying a party the opportunity to present its case. He proposed that, in the penultimate sentence, the words "while this may raise concerns about the requesting party's opportunity to present its case" should be replaced with the words "if the arbitral tribunal deems the proposed testimony, for example, immaterial or purely cumulative, having regard to the requesting party's reasonable opportunity to present its case".

15. **The Chair** said that although the proposed change was an improvement, it did not solve the problem. Moreover, limiting the application of the penultimate sentence to cross-examination might be too restrictive, as it could also apply to any appearance of the witness that might be considered immaterial or cumulative. A more general formulation was therefore needed. While there was some overlap between paragraph 88 and paragraph 125, the submission of a witness statement and the appearance of witnesses were two different issues.

16. In revising the Note, the Commission should clarify the grounds on which a tribunal could decide not to have a witness testify. It must also decide whether the last sentence applied to both the third and fourth sentences equally. Regarding the United States proposal, an alternative would be to invoke the more general notion of concern for efficiency in the proceedings as a justification for dispensing with a witness. He asked whether the changes proposed by the United States clarified the application of the final sentence or whether the order of the last and the penultimate sentence should still be reversed.

17. **Mr. Popovici** (Romania) asked for clarification with regard to the phrase "reasonable opportunity".

18. **The Chair** said that the tribunal's power to decide not to hear a witness was qualified by the words "having regard to the requesting party's reasonable opportunity to present its case".

19. **Mr. Popovici** (Romania) said that there was a contradiction inherent in the idea that the decision not to hear oral testimony would not alter the weight given by the tribunal to a written statement. Though agreeing with the redrafting of the fourth sentence, his delegation maintained that the order should be changed.

20. **The Chair** said that the last sentence would apply in situations where the tribunal had already heard multiple witnesses.

21. **Mr. Popovici** (Romania) said that the draft text had become unbalanced. Concerns could be raised about the requesting party's opportunity to present its case, especially by means of cross-examination. If that party's request was the only one denied, the final sentence of the draft text would only accentuate its unfavourable situation.

22. **The Chair** said that was precisely the reason for including the word "cumulative". If witnesses, including those who did not appear before the tribunal, provided the same testimony, such testimony could be considered cumulative.

23. **Mr. Popovici** (Romania) said his delegation still felt that, if the tribunal considered testimony to be cumulative in such situations, that meant it had already given a certain amount of weight to the written statement, which appeared to be a contradiction.

24. **Mr. Castello** (United States of America), responding to the comments made by the representative of Romania, said that his delegation had understood the wording in question to mean that not cross-examining a specific witness would not change the weight the tribunal would otherwise give to that witness's statement. That reasoning applied to the fourth sentence as well.

25. **The Chair** said he took it that the Commission agreed to the United States amendment.

26. *It was so decided*.

27. *Note 17, as amended, was approved*.

Note 18. Multiparty arbitration (paragraphs 137 and 138)

28. *Note 18 was approved*.

Note 19. Joinder and consolidation (paragraphs 139 to 146)

29. **Mr. Apter** (Israel) said that Note 19 should also make reference to delays in the process and the relevance of the new party. The aim was to introduce a reason against accepting a joinder, since the addition of a new party would delay the process.

30. **Mr. Alcott** (American Bar Association) said that the Commission might wish to refer to conditions that the tribunal could impose with regard to the acceptance of a joinder.

31. **The Chair** said that that proposal went a step further than the proposal made by the representative of Israel, who wished simply to point out that joinder did not necessarily result in improved efficiency. The Commission might deem it sufficient to add a reference, in the penultimate sentence of paragraph 140, to the disadvantages related to joinder and to ask the Secretariat to come up with appropriate wording.

32. *It was so decided*.

33. *Note 19, as amended, was approved*.

Note 20. Possible requirements concerning form, content, filing, registration and delivery of the award (paragraphs 144 to 146)

34. **The Chair** noted that the Working Group had had doubts about addressing the topics covered by Note 20, but there were a number of points relating to the award that did have a bearing on the organization of proceedings.

35. **Mr. Medina Mejías** (Bolivarian Republic of Venezuela) asked whether the Commission would discuss annulments or the setting aside of awards.

36. **The Chair** said that the Note merely provided guidance on organizing the proceedings. The setting aside of awards was not an organizational matter.

37. *Note 20 was approved*.

38. **Mr. Castello** (United States of America) said that his delegation had neglected to raise a point with respect to paragraph 25. The phrase "such that multiple languages could be used during the proceedings, but procedural orders and arbitral awards, for example, would be issued only in the authoritative language" could be interpreted as a requirement to provide translations of all submissions in each language. To make it clear that any of the multiple languages could be used during the proceedings, the Commission could replace "multiple" with the words "any of these".

39. **The Chair** said that the point made by the representative of the United States clarified the meaning of the text.

40. **Mr. Möller** (Observer for Finland) endorsed the United States amendment.

41. *The proposed amendment to paragraph 25 was adopted*.

Draft decision adopting the UNCITRAL Notes on Organizing Arbitral Proceedings
(A/CN.9/XLIX/CRP.4)

42. *The draft decision was adopted*.

(b) Progress report of Working Group II (A/CN.9/861 and A/CN.9/867)

43. **Ms. Montineri** (Secretariat) recalled that during its forty-eighth session, the Commission had decided that Working Group II should begin work on the implementation of agreements that were the outcome of arbitration. The Working Group had been given a broad mandate to take into account a variety of approaches and concerns. During its sixty-third and sixty-fourth sessions, the Group had looked at the scope and possible content of an instrument covering the implementation of agreements resulting from arbitration and it planned to continue its work in those areas.

44. **Ms. Morris-Sharma** (Singapore) said that potential model provisions, guidance texts or legally binding instruments on the enforcement of settlement agreements should be limited to international and commercial conciliated settlement agreements of a commercial nature. Following deliberations, Working Group II had agreed that for the upcoming session later that year the Secretariat should prepare a document of draft provisions grouped into broad categories, without prejudice to the final form of the instrument. Delegations would also report back to the Working Group on their review of and experience with the enforcement of settlement agreements that had been the subject of arbitration.

(c) Establishment and functioning of the transparency repository

45. **Mr. Sorieul** (Secretary of the Commission), referring to the Rules on Transparency in Treaty-based Investor-State Arbitration, recalled the Commission's decision to have the United Nations Secretary-General, or some other institution of its choice, act as the repository of published information. The Commission had expressed its intent to have the Secretariat of the Commission fulfil that role; however, the General Assembly had failed to "request" the Secretary-General to establish and operate the Transparency Registry, leading the Commission to reiterate its wish. Accordingly, the General Assembly had adopted a resolution clearly requesting the Secretary-General to establish and operate through the Commission's Secretariat the repository of published information under the Rules on Transparency (General Assembly resolution 70/115).

46. Voluntary contributions had been received from the OPEC Fund for International Development, which had provided a grant of $125,000, and from the European Union, which had contributed 100,000 euros. A staff member had been recruited in 2016 to oversee the operation of the Transparency Registry.

47. The Commission had received, on a voluntary basis, Canadian cases rendered under the North American Free Trade Agreement. The Transparency Registry listed two cases in which the parties had agreed, in principle, to the application of the Rules on Transparency. An increasing number of enquiries had been received by the Secretariat on how to apply the Rules and submit information. There had also been an increase in the number of capacity-building and technical assistance activities relating to the Commission's standards for transparency, accountability and good governance.

48. The Secretariat was engaged in dialogue with the European Commission and the OPEC Fund for International Development in the hope of obtaining renewed funding. States, international organizations and other interested entities were urged to contribute to the Registry, preferably in the form of multi-year contributions. With the funds remaining from the 2016 contributions, the Secretariat might be able to continue operations until the end of 2017. The Commission might wish to recommend to the General Assembly that it should request the Secretariat of the Commission to continue operating the repository of published information. The Secretariat would keep the General Assembly and the Commission informed of any significant developments in the funding and budgetary situation of the repository.

49. **Mr. Bellenger** (France) asked whether the Transparency Registry received any funding from the United Nations budget. Voluntary contributions could not be relied upon indefinitely.

50. **Mr. Sorieul** (Secretary of the Commission) said that the Registry did not receive any resources from the regular budget of the United Nations. The voluntary contributions that had been received thus far should make it possible to maintain the Registry until the end of 2017. However, the new legal officer post could only continue to exist as long as

the contributions received each year were sufficient to cover the associated salary for the following year. He therefore urged delegations to continue, or to begin, to contribute funds. It would also be useful to receive contributions for more than one year at a time, as questions about the viability of the project would begin to arise if the feasibility of maintaining the Registry had to be reviewed every year.

51. **Ms. Dostie** (Canada) suggested that the Commission should formally reiterate its support for the Transparency Registry.

52. **The Chair** said he took it that the Commission wished to express its strong support for the Transparency Registry and to recommend to the General Assembly that it should request the Secretariat to continue operating the Registry.

53. *It was so decided.*

The meeting was suspended at 4.25 p.m. and resumed at 5.15 p.m.

(e) Secretariat Guide on the New York Convention

54. **Ms. Montineri** (Secretariat) recalled that the Secretariat, in collaboration with two experts and their teams, had been developing a guide on the interpretation and application of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards (New York Convention) for some years. The guide had recently been completed and had been published in an easily navigable format on the website newyorkconvention1958.org. The guide was currently available in English and would be translated into the other official languages of the United Nations by the end of 2016. The website also included case law documents, in their original languages with English translations, and a multi-language library that would be expanded over the course of the year. All of the information on the website was available to the public free of charge.

(f) International commercial arbitration and mediation moot competitions

55. **Mr. Lee** (Secretariat), briefing the Commission on the international commercial arbitration and mediation moot competitions that had been held with the support of the Commission, said that the Association for the Organization and Promotion of the Willem C. Vis International Commercial Arbitration Moot had held its twenty-third Moot, the oral arguments phase of which had taken place in Vienna from 18 to 24 March 2016. A total of 311 teams from 67 jurisdictions had participated in the competition, which had been based on the United Nations Convention on Contracts for the International Sale of Goods. The first-place award for oral arguments had been awarded to the team from the University of Buenos Aires. The twenty-fourth competition would be held in Vienna from 7 to 13 April 2017.

56. The oral arguments phase of the thirteenth William C. Vis East International Commercial Arbitration Moot had taken place in Hong Kong from 6 to 13 March 2016, with the participation of 115 teams from 29 jurisdictions. The best team in oral arguments had been the team from the Singapore Management University. The fourteenth Moot would be held in Hong Kong from 26 March to 2 April 2017.

57. The Carlos III University of Madrid had organized the eighth International Commercial Arbitration Competition, which had been held in Madrid from 25 to 29 April 2016. The legal issues addressed had related to the international sale of goods. A total of 24 teams from 11 jurisdictions had participated in the Moot, which had been conducted in Spanish. The Universidad Peruana de Ciencias Aplicadas had won first prize for oral arguments. The ninth Moot was scheduled to take place from 3 to 7 April 2017.

58. **Mr. Thivierge** (Moot Alumni Association) thanked the Commission for its continued support for the Willem C. Vis International Commercial Arbitration Moot, which was an extremely valuable initiative.

Agenda item 6: Consideration of issues in the area of online dispute resolution: finalization and adoption of Technical Notes on Online Dispute Resolution

(*continued*) (A/CN.9/XLIX/CRP.1/Add.7)

59. **Mr. Chan** (Singapore), Rapporteur, presented the relevant section of the draft report of the Commission on its forty-ninth session (A/CN.9/XLIX/CRP.1/Add.7) for adoption by the Commission.

60. **Mr. Wang** Jianbo (China) said that the draft report did not fully reflect certain concerns that had been expressed during the discussion with regard to paragraphs 19, 33 and 34 of the Technical Notes. In particular, it did not indicate that the reason those paragraphs had had to be revised was because they were contradictory with respect to the actions that marked the commencement of online dispute resolution proceedings. The Commission had opted to deem online dispute resolution proceedings to have commenced when an administrator notified the parties to the dispute. That was a critical decision, but the discussion leading up to it was not reflected in the draft report. It was unclear whether receipt of a notice from one party alone was sufficient to mark the initiation of online dispute resolution proceedings, and the draft report did not reflect that issue either.

61. The Commission should determine at what point in time an electronic notice was considered to have been received. In so doing, it should seek to conform to the relevant existing conventions. His delegation considered that that was an important issue to address.

62. **The Chair** said that, as he had understood it, the Chinese delegation maintained that the draft report did not fully reflect the discussion that had taken place and that the Commission had not fully addressed certain points in its discussion. The purpose of the draft report was to record what had actually been said, not discuss things that should have been said but had not been. Some representatives were scheduled to leave the following day and there was thus some pressure to adopt the report at the current meeting.

63. **Mr. Schoefisch** (Germany) said he agreed that the draft report could not contain anything that had not been said during the discussion. It was preferable to adopt the report at the current meeting to ensure that delegations which had to leave the following day could participate in its adoption. Therefore, the Chinese delegation should propose its additional sentences right away. There was no issue with introducing a few extra sentences to the draft report in order

to make it more fully reflect the Chinese contribution to the discussion. There was, however, a need for the Commission's report to be balanced. If the additions were extensive, it might be necessary to also include other delegations' responses to what the Chinese delegation had said, and time was pressing.

64. **Mr. Decker** (Observer for the European Union), supported by **Mr. Apter** (Israel) and **Mr. Horna** (Observer for Peru), said that the draft report should be adopted at the current meeting. Consultations should be held with the aim of finding, with the help of the Secretariat, wording that would address China's concerns and be acceptable to all delegations.

The meeting was suspended at 5.45 p.m. and resumed at 6 p.m.

65. **The Chair** announced that wording had been found which was a compromise and would allow the draft report to be adopted.

66. **Mr. Lemay** (Secretariat) read out the proposed changes to paragraphs 7 and 8 of document A/CN.9/XLIX/CRP.1/Add.7. A new paragraph 7 would read "The Commission heard the following proposals to amend the draft text which, it was suggested, would remove a contradiction between paragraph 34, on the one hand, and paragraphs 19 and 33, on the other hand, in document A/CN.9/888". Paragraph 8 would read as it currently appeared, but with the addition of a new sentence, to read "It was said that this view better reflected that both paragraphs 19 and 34 reflect consensus regarding how commencement should be measured; however, as there was a conflict in the approach taken in the two paragraphs the approach taken in paragraph 19 is preferable because it is more efficient".

67. *Document A/CN.9/XLIX/CRP.1/Add.7, as amended, was adopted.*

The meeting rose at 6.05 p.m.

Summary record of the 1038th meeting, held at Headquarters, New York, on Friday, 8 July 2016, at 10 a.m.

[A/CN.9/SR.1038]

Chairperson: Mr. Schneider (Vice-Chair) (Switzerland)

Contents

In the absence of Mr. Kenfack Douajni (Cameroon), Mr. Schneider (Switzerland), Vice-Chair, took the Chair.

The meeting was called to order at 10.15 a.m.

Agenda item 5: Consideration of issues in the area of arbitration and conciliation (*continued*)

(d) Possible future work in the area of arbitration and conciliation

Proposal received from the Swiss Arbitration Association (A/CN.9/893)

1. **The Chair** invited the Commission to consider proposals for future work in the area of arbitration and conciliation. He drew the Commission's attention to the proposal received from the Swiss Arbitration Association on the settlement of commercial disputes, contained in document A/CN.9/893.

2. **Mr. Geisinger** (Swiss Arbitration Association) said that the Swiss Arbitration Association (ASA) was a non-profit organization which promoted arbitration as a method of dispute resolution worldwide and around one third of its 1,200 members were based outside Switzerland. However, ASA was a scientific and academic think tank rather than an arbitration institution, as it did not have arbitration rules and did not administer arbitration cases.

3. The ASA toolbox, as presented in document A/CN.9/893, would be an electronic tool that would be available for download free of charge from the organization's website. For each of the main phases of arbitral proceedings, it would describe the various approaches and methods found in practice for addressing the procedural issues that could arise in each phase. The toolbox would have a structure similar to that of the UNCITRAL Notes on Organizing Arbitral Proceedings and each method described would be accompanied by a recommendation as to when it should be used, taking into account the cultural background of the parties and their counsel. The toolbox would also provide drafting proposals and would have a system of electronic red flags to alert parties or tribunals if options they were considering were, for instance, duplicative or mutually incompatible. Owing to resource constraints, the toolbox would be available in English only.

4. Development of the toolbox, which would be tailored to international commercial arbitration rather than investment arbitration, had been a priority for ASA. Since ASA would be using its own resources to carry out the toolbox project, what it was asking of the Commission was to decide whether and how UNCITRAL wished to collaborate with ASA. ASA and the Commission shared a conviction that the main strength of arbitration was diversity rather than standardization, as well as the belief that such diversity must be promoted, which the toolbox would do by providing its users with different ways to tackle the procedural issues arising in arbitration. While the toolbox was closely related to the UNCITRAL Notes in that regard, any collaboration between ASA and the Commission would not involve revisiting or making changes to the Notes. The toolbox was an independent project that would have no direct impact on the Notes and the Commission would not need to allocate any additional resources to the project.

5. As to the form the Commission's support for the toolbox project should take, ASA hoped that the Commission would welcome the project as a useful instrument for the promotion and development of international commercial arbitration and particularly of the diversity of approaches in that area, and that the Commission would task the UNCITRAL secretariat with engaging in discussions with ASA on the details of collaboration between the two bodies. The Commission would not need to endorse the content of the toolbox at the current stage, since developing the content was still a work in progress.

6. In future, the Commission could use the toolbox for its educational training programmes worldwide and, since collaboration should be a two-way street, ASA would be willing to provide trainers. The toolbox could also be hosted on a website developed jointly between ASA and UNCITRAL, although that would imply endorsement of the toolbox content, which would therefore need to be reviewed and discussed within a reasonable time frame.

7. **Mr. Schnabel** (United States of America) said that the toolbox would be useful, especially as it would be freely accessible. His delegation supported coordination and cooperation between UNCITRAL and ASA, which could take many forms. Informal work between ASA and the Secretariat was also desirable and could involve the assistance of experts, while more extensive work could take place in future depending on how the project developed. Before implying or explicitly stating any kind of UNCITRAL endorsement of the substantive content of the toolbox, Working Group II would need to discuss the matter

and that could not take place until the present work on conciliation had been concluded.

8. **Mr. Maradiaga** (Honduras) said that the ASA proposal was reasonable and would provide a comprehensive overview of approaches to arbitration. The Commission should associate itself with the project, but would need to review carefully the related content.

9. **Mr. Moollan** (Mauritius) said that his delegation shared the views of the United States concerning the Commission's support for the ASA project.

10. **Mr. Apter** (Israel) agreed with the statements made by the delegations of the United States, Honduras and Mauritius.

11. **Mr. Medina Mejías** (Bolivarian Republic of Venezuela) said that his delegation supported the toolbox project, which had the merit of being educational and affording access to applied technology.

12. **Mr. Tommo Monthe** (Cameroon) said that his delegation agreed with the approach suggested by the United States, which would allow the Commission to advance work on the project, while reviewing its content at a later stage.

13. **Mr. Sorieul** (Secretary of the Commission), recalling that the Commission conducted a technical assistance programme targeted to developing States in particular, said that the majority of requests for assistance relating to arbitration had come not from arbitration practitioners, but from judicial officials wishing to become familiar with arbitration techniques. It was therefore important to have a range of instruments, such as the Guide to the Convention on the Recognition and Enforcement of Foreign Arbitral Awards (New York Convention) and the Commission' system for collecting case law (CLOUT). The revised UNCITRAL Notes were also important as they would assist in the implementation of a training programme based on the ASA toolbox. The toolbox itself would be particularly valuable and it was hoped that work would proceed on its further development and use.

14. **Mr. Chan** (Singapore) said that his delegation supported the proposal of ASA insofar as it reinforced the Commission's efforts to promote international commercial arbitration. However, while ASA was a very reputable organization, its approaching the Commission for support might encourage other organizations to seek the Commission's collaboration or endorsement for their initiatives and products. As the Commission could not possibly work with every organization that approached it, the Secretariat should develop guidelines and clear criteria for determining when collaboration with external organizations would serve the Commission's interests and objectives.

15. **Mr. Sorieul** (Secretary of the Commission) said that the Secretariat shared the understandable concern expressed by the representative of Singapore. The draft Guide on the New York Convention was also an instrument developed on the initiative of the Secretariat in cooperation with arbitration experts. When selecting potential partnerships, the Secretariat took great care to ensure that the principle of neutrality and the objective of promoting arbitration were upheld. The Secretariat had not yet developed criteria for the consideration of the Commission because, so far, it had not received many requests for collaboration. Upon receiving the current request from ASA, the Secretariat had brought the matter to the Commission's attention as transparently and as soon as possible, while attempting to obtain all of the information necessary for the Commission to evaluate the request.

16. **Mr. Moollan** (Mauritius) said that the Commission should actively promote awareness on the part of arbitration institutions worldwide, including in African countries, of the possibilities for cooperation with the Commission.

17. **Mr. Fornell** (Ecuador) said that the Commission must be extremely cautious when endorsing any institution's ongoing or future project when the Commission had not been involved in the project's development and had no say in the decision-making process. Many other institutions might also be interested in collaborating with the Commission; it would be better therefore to develop a guide on opportunities for collaboration that could be made available to entities in all regions; such a guide would be particularly useful for Latin American and African countries. The Secretariat seemed to have assessed the ASA request on the basis of subjective criteria. The Commission should therefore confine itself to taking note of the ASA proposal; it should study the proposal further and establish guidelines that would promote accessibility and democratization for all regions with regard to cooperation with the Commission.

18. **Mr. Moollan** (Mauritius) supported the proposal made by the representative of the United States, as it adequately addressed the legitimate concerns expressed by the representative of Ecuador. Every proposal must, of course, be assessed on its merits.

19. **The Chair** said he took it that at the current stage the Commission wished to agree to cooperate only in development of the ASA toolbox and that any endorsement of external content would require a separate decision by the Commission.

20. *It was so decided*.

Concurrent proceedings (A/CN.9/881)

21. **Mr. Lee** Jae Sung (Secretariat) reminded the Commission that in 2014 it had agreed to explore concurrent proceedings with a focus on treaty-based investor-State arbitration but without excluding international commercial arbitration. In 2015, the Commission had considered document A/CN.9/848 and had agreed to keep concurrent proceedings on the Commission's agenda, while taking note of developments in that field. In accordance with the Commission's request for the Secretariat to explore the topic further in cooperation with experts and organizations working in that area, an expert group meeting had been held in January 2016. On the basis of the expert group's discussions, the Secretariat had developed document A/CN.9/881 for consideration by the Commission at its current session.

22. **Mr. Schnabel** (United States of America) said that document A/CN.9/881 drew the Commission's attention to the options for UNCITRAL action with respect to concurrent

proceedings in investment arbitration. However, it was not clear whether any of the options suggested merited the time and resources that would be required to develop a new instrument in that field, especially considering that the most prominent case cited as demonstrating problems in the area had occurred over 15 years earlier.

23. Problems did not seem to arise frequently enough in practice for Working Group II to spend several sessions attempting to address them. Furthermore, the various proposed solutions, if developed by the Commission, would seemingly be relevant to only a subset of the few cases in which the issues could arise.

24. A further consideration was that the Commission could provide guidance to arbitral tribunals only in the case of concurrent proceedings conducted under the UNCITRAL Arbitration Rules.

25. In addition, existing investment treaties already provided mechanisms that States could adopt when negotiating new treaties. The option of developing a new multilateral instrument on the topic would be a significant undertaking and it was not certain that States would be willing to become parties to an instrument that would cover only a handful of cases. In that regard, the work carried out by the Secretariat in the past amply demonstrated that efforts by Working Group II to address the topic would probably not be worthwhile. To the extent that it had sufficient time and resources, the Secretariat should instead focus on the topic of ethics in international arbitration.

26. **Mr. Von Walter** (Observer for the European Union) said that addressing concurrent and multiple proceedings in investment dispute settlement was important and challenging. The European Union had held discussions with its partners on tackling scenarios that involved claims initiated by the same claimant in different forums, claims initiated by related claimants on the same dispute, and claims initiated by unrelated claimants. However, as most existing investment treaties contained no guidance for dealing with such situations, the Commission should conduct further work on how tribunals could effectively address the concerns that could emerge from concurrent claims under those treaties. Such work could take the form of soft law guidance for tribunals, as suggested in document A/CN.9/881.

27. It would also be useful to give wider publicity to existing treaty provisions targeted to Governments that had negotiated or might wish to renegotiate investment treaties. Action could be taken in conjunction with the work already carried out by other organizations, such as the United Nations Conference on Trade and Development, but a multilateral instrument could be envisaged if such work proved insufficient. As suggested in paragraph 42 of document A/CN.9/881, future work should cover not only concurrent proceedings but also successive proceedings on the same dispute. The title of the topic could be altered accordingly.

28. While concurrent proceedings in the context of investment dispute settlement should be investigated, it would be less useful to expand work on commercial arbitration given the difficulty of finding solutions, as had been demonstrated in the negotiations on revising European Council Regulation No. 44/2001. The future work of Working Group II should therefore focus on concurrent claims in investment arbitration, which differed from commercial arbitration in terms of both the applicable legal basis and the policy implications for Governments.

29. **Ms. Dostie** (Canada) said that, while her delegation supported work along the lines proposed in section IV (A) of document A/CN.9/881, the Working Group should not take up the topic at the current stage. The Secretariat should instead convene a small group of experts to prepare a first draft of a guidance document that could be examined by the Commission to determine the next steps.

30. **Mr. Moollan** (Mauritius) said that the issue of concurrent proceedings was not hypothetical or historical, but one that occurred in everyday practice, for example through cascading claims. The approach that had been discussed at the expert group level was promising, as it did not involve creating new standards but explaining to new arbitrators, who might have come from commercial arbitration, that there were means they could use to manage concurrent proceedings under article 17 of the UNCITRAL Arbitration Rules.

31. The Commission should continue to focus on investor-State arbitration, but the next area of work should be investment arbitration for concurrent proceedings or a code of ethics for arbitrators, although the latter issue was not a pressing one.

32. **Mr. Apter** (Israel) said that concurrent proceedings, both generally and specifically in investment arbitration, could raise concerns and occurred in practice, albeit sporadically. As the existing bilateral work on concurrent proceedings was sufficient, the topic should not be studied further by UNCITRAL at present. While there might be a need to examine the subject further in future, the Commission should begin work on other more pressing projects.

33. **Ms. Kaufmann-Kohler** (Switzerland) said that concurrent proceedings were an important subject which arose frequently in practice. However, the existing rules and legal framework did not provide guidance for arbitrators on how to deal with concurrent proceedings and the Commission could therefore make a contribution by taking up the topic. While there might be a greater need for guidance in investment arbitration, there were unresolved issues in commercial arbitration, such as what res judicata was or whether an award could be made when there had already been an award on the same issue or a similar one. It would be sensible also to examine successive proceedings and perhaps to refer to multiple proceedings in the title of the Note by the Secretariat. The Brussels I Regulation (European Council Regulation No. 44/2001) laid down detailed rules on how national courts must deal with lis pendens, res judicata and related issues. Nothing of the sort existed for international arbitration, which confirmed the need for UNCITRAL to study the matter.

34. **Mr. Möler** (Observer for Finland) said that examination of concurrent proceedings should not be limited to investment arbitration. There was a particular need for

guidance in the European Union as commercial arbitration was governed by domestic laws. The Brussels I Regulation did not address concurrent arbitration proceedings, but rather only referred to the practice of some courts in certain European States to disregard arbitration agreements. Questions remained concerning the relationship between the Brussels I Regulation and the New York Convention.

35. **Mr. Tufte-Kristensen** (Denmark) agreed that, if the Commission decided to take up the topic of concurrent proceedings, its work should cover commercial arbitration. Although fundamental differences existed between commercial and investment arbitration, the differences were not so great in terms of concurrent proceedings to justify focusing only on investment arbitration.

36. **Mr. Bellenger** (France) said that work should be carried out on concurrent proceedings along the lines suggested in document A/CN.9/881 but not immediately since Working Group II had still not completed its ongoing work.

37. **Mr. Komarov** (Russian Federation) said that, while the issue of concurrent proceedings was topical, the most urgent area of work was outlined in Section IV (B) of document A/CN.9/881. As a review process was under way and new agreements were being created, the inclusion of a provision encouraging States to adopt specific mechanisms in their investment treaties would be desirable. There were many instruments relevant to concurrent proceedings and the most sensible action would be to identify provisions that States could use when concluding new or reviewing existing agreements in order to avoid or solve the problems that could arise in concurrent proceedings. Furthermore, while the development of a multilateral instrument to improve the framework for international dispute settlement would be the most effective approach, it would be a very lengthy undertaking, given the complexity of the issues involved.

38. **Ms. Mackielo** (Argentina) said that issue of concurrent proceedings was a priority because of the frequency with which they occurred and the harm they could cause to the system. At the very least, guidelines would be required to address such situations. As developing countries were both most affected by investment proceedings and least equipped to deal with them, concurrent proceedings should be included on the Commission's agenda with special emphasis on helping those countries.

39. **Mr. Schoefisch** (Germany) said that Working Group II could begin work on concurrent proceedings after the completion of its current mandate. The Working Group could then follow a cumulative approach and ask how the parties to an arbitration agreement or an investment treaty could avoid concurrent proceedings from the outset, and how arbitrators could successfully address concurrent proceedings in order to avoid contradictory decisions by other tribunals and courts. As a result, the Working Group could formulate special clauses for arbitration agreements or investment treaties, and develop best practices for arbitrators dealing with concurrent proceedings in the framework of article 17 of the UNCITRAL Arbitration Rules. The Commission should develop legal and practical advice for companies, legislators and arbitrators on how to avoid concurrent proceedings, rather than elaborate a binding multilateral instrument.

40. **Mr. Medina Mejías** (Bolivarian Republic of Venezuela) said that concurrent proceedings were an important and pressing issue, particularly in investor-State arbitration. He endorsed the views expressed by the delegations of Mauritius and Switzerland, without prejudging the form that the Commission's involvement should take, an issue that should be addressed by Working Group II.

41. **Mr. Ghia** (Italy) said that the Commission should continue to study concurrent proceedings because it was an important issue. By developing provisions governing such proceedings, UNCITRAL would be advancing one of its major objectives, namely to promote efficient and effective arbitration of international commercial disputes.

Possible future work on ethics in international arbitration (A/CN.9/880)

42. **Mr. Lee** Jae Sung (Secretariat) said that in 2015, on the basis of document A/CN.9/855, the Commission had requested that the Secretariat explore the topic of a code of ethics for arbitrators in commercial and investment arbitration taking into account existing laws, rules and regulations as well as any other standards established by other organizations. Accordingly, the Secretariat had prepared the Note in document A/CN.9/880,which examined how ethics in international arbitration were understood and the existing legal framework, and contained suggestions of issues for the Commission's consideration.

43. **Mr. Schnabel** (United States of America) said that the situation in which more than one set of ethical rules could potentially apply in an international arbitration, which arose quite often, should be further studied. In addition to the rules that might be applicable under the law of the place of arbitration, each individual involved might be subject to one or more sets of rules from their home jurisdiction or licensing jurisdiction. The issue was relevant not only for arbitrators but for any attorneys for the parties. Neither that situation and the choice-of-law problems that might emerge from differing or conflicting standards, nor the question of which standards applied if an ethics issue arose had been looked at from a multilateral perspective. While it was not yet clear what UNCITRAL might be able to develop on that topic or what type of instrument might help address those issues, the topic was worth further exploration. Pending completion by Working Group II of its work on conciliation, the Secretariat should focus its future work on a code of ethics for arbitrators, and specifically on the interaction of multiple sets of ethics rules applicable to arbitrators and other lawyers participating in both commercial and investor-State arbitration. With regard to the content of particular standards, any attempt to develop a harmonized substantive standard would be premature, particularly before the interaction of the existing rules was better understood. Investigation should therefore be limited to conflict-of-laws issues and the Secretariat could provide the Commission with a document in 2017 to help determine whether Working Group II could address the topic.

44. **Mr. Apter** (Israel) agreed with the representative of the United States that UNCITRAL should continue to explore the topic and that the Commission could decide in 2017 whether the Secretariat or Working Group II should conduct the work. Furthermore, it would not be sensible to work on harmonizing the standards of ethics for arbitrators; work should be focused instead on resolving potential conflicts between different sets of ethics rules. There should also be an attempt to develop universal minimum ethical standards for arbitrators, particularly in respect of conflict of interest. The Secretariat could look into the possibility of developing such standards, although further work might reveal that it would not be practicable to do so.

45. **The Chair** said that the initial proposal by Algeria at the forty-eighth session had referred specifically to ethics for arbitrators. Ethics for counsel was a different issue and might lead to conflict, whereas, apart from questions of conflict of interest, there were no existing regulations for arbitrators. The Commission should therefore decide whether to broaden the subject to include lawyers generally.

46. **Mr. Schoefisch** (Germany) said that his delegation supported further work on a code of ethics for arbitrators provided that sufficient resources were available in the Secretariat. However, there was no urgent need for such a code, since the principles of impartiality and independence were already incorporated in arbitration rules, including the UNCITRAL Arbitration Rules. If the parties required more personal or substantive qualifications from an arbitrator or wished to regulate the consequences of arbitrators not complying with ethical requirements, they could include special clauses in their agreements or treaties. For example, the European Union proposal for investment protection in the Transatlantic Trade and Investment Partnership (TTIP) included a code of conduct for the judges of the investment court. Parties to an arbitration agreement or international treaty that included arbitration could also agree to apply existing codes of conduct, such as the International Bar Association rules.

47. **Mr. Von Walter** (Observer for the European Union) said that there was a critical need to address potential conflicts of interest of arbitrators or adjudicators in international investment arbitration, especially since such issues could assume importance in negotiations. In its recent investment negotiations, the European Union had included detailed rules on ethics, often as a code of conduct annexed to the agreement, setting forth procedures for challenges, which would be decided by independent external parties. However, other existing sets of rules could be used to address potential conflicts of interest, and the contracting partners in TTIP were working on a code of conduct for investment arbitration. Consequently, it did not seem appropriate for UNCITRAL to develop another set of ethical rules, which might differ from existing instruments. Some work could be done on the interrelation of different instruments, including domestic law obligations, and the resolution of potential conflicts or incompatibilities.

48. **Ms. Kaufmann-Kohler** (Switzerland) said that further work on the topic was not necessary at present as it was already widely regulated. The choice-of- law issue was not particularly relevant to arbitrators, as it was clear that arbitrators were subject to the ethical rules within the framework applicable to a specific arbitration.

49. Further work was also unnecessary due to the content and type of rules. In practice, ethics involved legal norms rather than moral rules. For example, the principles of independence and impartiality, among others that would be included in a code of ethics, were embodied in all national legislation, all international arbitration rules and many soft law texts. A great many institutions had existing codes of ethics or codes of conduct that were often annexed to international treaties. Furthermore, the World Trade Organization had a code of conduct for inter-State dispute settlement, Accordingly, a review of the existing hard and soft law texts, national legislation and institutional rules governing an arbitration would not be a good use of the Commission's time and resources. While issues of conflict of interest, largely relating to arbitrators additionally acting as counsel in investment arbitration, had rightly attracted criticism, they did not justify general work on a code of ethics.

50. **Mr. Komarov** (Russian Federation) said that the issue of ethics in international arbitration was timely, since questions about the ethics of arbitral tribunals were being raised with increasing frequency. In previous decades, it had been routine for questions to be raised about an arbitrator's compliance with ethical demands. The independence and impartiality of arbitrators were required by all legislation. However, a few documents, mainly soft law documents, approached those concepts on the basis of cultural considerations that influenced the situation of arbitrators. In international arbitration cases involving participants from different countries and when intercultural discord was the issue, arbitrators could face different ethical requirements. In such cases, a code of ethics would be desirable to unify ethical requirements and prevent cultural differences from influencing the overall situation. Any such code should not be binding, but rather should recommend ethical standards to which all arbitrators in international arbitration should be held. The work of UNCITRAL would be very useful in that regard and should proceed, bearing in mind the potentially sensitive national and intercultural factors that could arise in international arbitration.

51. **Ms. Pierotic** (Chile) said that work on ethics in international arbitration was particularly relevant in multilateral contexts. Given the existing number of ethical rules, it was necessary to standardize ethical norms in both commercial arbitration and investor-State arbitration. Her delegation supported continued study of the subject by the Secretariat so that Working Group II could take up the topic at a later date.

52. **Mr. Wang** Jianbo (China) said that the idea of code of conduct for international arbitrators was attracting increasing attention. In the absence of a unified standard, UNCITRAL could carry out work to ensure the independence and impartiality of arbitration. The ethics of arbitrators should be emphasized when arbitrators faced external pressures, since it was crucial for them to be able to set aside their personal interests and resist the influence of their ties to specific countries in order to make the correct

legal decisions. The Secretariat should continue to work on the topic.

53. **Ms. Bensaoula** (Observer for Algeria) said that a code of conduct for arbitrators was a necessity given the current realities. There was no good reason why UNCITRAL should not develop its own code of conduct for international arbitration. International arbitrators must resist any attempt from any quarter whatsoever to interfere with the aim of influencing their final decision and eschew any exclusionary attitudes. In addition to demonstrating competence, impartiality, loyalty and independence, the arbitrator must not enter into any agreement with or accept the advice of a party with respect to professional fees. Any violation of the code of conduct would damage the arbitrator's reputation, but should also result in a sanction such as forfeiture or reduction of fees or being removed from the list of arbitrators.

54. **Mr. Alcott** (American Bar Association) said that it would be extremely useful for Working Group II and the Commission to address the issues discussed in the context of the standards governing arbitrators and the standards governing counsel and the parties they represented. The many existing ethical codes presented a problem rather than a solution as it was unclear which would apply in a particular case.

55. **Mr. Hamamoto** (Japan) said that, while the issue of ethics in international arbitration was interesting and important, it was unclear whether the Commission should study it given the volume of work that had already been carried out by other bodies.

56. **Ms. Mackielo** (Argentina) agreed that the number of existing instruments was a problem as it would not necessarily be clear which would be applicable. Since there were a number of unresolved questions, UNCITRAL should continue its work on the topic.

57. **The Chair** said that it remained unclear whether the scope of a code of ethics would concern only arbitrators or whether it would extend to lawyers and the parties involved in an arbitration. The questions of whether a potential code would consist of either substantive rules or conflict rules, and to what extent cultural diversity would be reflected also remained unresolved. Similarly, given the large number of existing regulations and soft law rules on the issue of conflict of interest, opinion differed as to whether UNCITRAL should develop its own additional set of rules or combine the existing rules into an overarching set of rules on conflict of interest.

Presentation of a research paper on the Mauritius Convention on Transparency in Treaty-based Investor-State Arbitration as a possible model for further reforms of investor-State dispute settlement (A/CN.9/890)

58. **Ms. Montineri** (Secretariat) said that, in 2014, the Commission had prepared the Mauritius Convention with the aim of applying the UNCITRAL Rules on Transparency in Investor-State Arbitration to existing investment treaties. Questions had then been asked about use of the approach of the Mauritius Convention for further reforms, and the Secretariat had therefore considered the topic in cooperation with the Center for International Dispute Settlement (CIDS), which had produced its own report (available on the UNCITRAL website). Document A/CN.9/890 did not contain any recommendations for possible future work as that would require the Commission to take a separate decision on whether reforms were to be undertaken on a multilateral basis.

59. **Mr. Potestà** (Center for International Dispute Settlement) said that CIDS had prepared a report, available on the UNCITRAL website, intended to provide a framework for discussion should States decide to consider reforming investor-State arbitration. The report offered a roadmap for possible reform initiatives aimed at either replacing or supplementing the investor-State arbitration regime with a permanent investment tribunal and/or an appeals mechanism for investor-state arbitral awards. As States and both governmental and non-governmental organizations were exploring avenues for reforming the investor-State arbitration regime, the CIDS paper aimed to identify the main legal challenges and potential differences that might arise in designing such a tribunal or mechanism.

60. The report presented the background to the criticism of investor-State arbitration that had developed over the alleged lack of impartiality and accountability of adjudicators, the lack of transparency of the procedure, and the absence of consistency in the case law, all of which had triggered a growing demand for change from States, international organizations and civil society groups. The report also outlined the main options available to States for the reform of investor-State dispute settlement by referencing the experiences of various international courts and tribunals including inter-State dispute settlement bodies, such as the International Court of Justice or the dispute settlement system of the World Trade Organization, as well as such other dispute resolution mechanisms as the Iran-United States Claims Tribunal and regional courts.

61. The creation of an appeals mechanism for investor-State arbitral awards would maintain most of the basic features of current investor-State arbitration. In contrast, the creation of a permanent investment tribunal with features similar to a court would entail a more radical change to the existing model. With regard to the design of an investment tribunal, the report examined whether such a body would be characterized as arbitral or whether it would be considered an international court, as well as considering which law would govern the proceedings. Enforcement of the body's decisions was also examined in the report.

62. Similar issues were explored with regard to an appeals mechanism for arbitral awards, and consideration had been given to whether some of the objectives that were normally pursued through an appeal could be addressed through alternative reform options, such as preliminary rulings. As each of the options envisaged for the new dispute resolution bodies would have strengths and weaknesses, the report did not seek to provide a best solution but to offer a framework for the discussion by identifying difficulties and outlining potential solutions.

63. The report also addressed how States could extend the new dispute resolution options to their existing and future investment treaties. That could be achieved through development of an opt-in convention model based on the

Mauritius Convention. States might also decide to include the new dispute settlement options in their future investment treaties if they deemed it appropriate.

64. A mechanism based on a multilateral opt-in convention would avoid the situation in which States had to pursue the potentially long and complex amendment procedures set out in many bilateral and multilateral investment treaties. Nonetheless, drafting such a convention would raise a number of treaty-law issues. Elements of flexibility could be inserted into the convention to allow States to modulate their level of involvement in the new reforms. The report therefore reviewed options for reservations and opt-in and opt-out declarations which might accommodate State-specific concerns, such as a State's wish not to abandon investor-State arbitration altogether while retaining the permanent investment tribunal as an alternative option in its treaties.

65. **Mr. Moollan** (Mauritius) said that the subject addressed in document A/CN.9/890 should be added to the list of possible future work for consideration by the Commission. Work should also be carried out to make Governments aware of that area of future work so that UNCITRAL could make an informed decision in 2017 as to whether it should be the Commission's next project.

66. The investor-State dispute settlement system had been widely criticized and a number of developing countries had taken unilateral or multilateral steps to try to reform it. The accuracy of the criticism was irrelevant as the topic had a significant impact outside its field, for example with regard to the Transatlantic Trade and Investment Partnership. Accordingly, the proposal for future work would address multiple issues, including concurrent proceedings, although it would be limited to procedure in order to increase the possibility of a successful outcome. The current favourable confluence of circumstances, with developed and developing countries seemingly having shared interests, augured well for such work, which success in reaching political consensus.

67. UNCITRAL was the right organization to carry out work on investor-State dispute settlement given its experience with the Mauritius Convention. It would be more effective than any other body in building a fair and representative consensus. Work on such a substantive issue would require collaborating with other bodies and the representatives of investors.. The subject was too important and the potential benefits too significant for any party to protect only its own vested interests.

68. While future work would raise significant questions for major institutions, all parties should act in the interest of the broader international dispute settlement system. Roles would need to be found for such institutions and their talents and expertise. Other bodies, such as the Organisation for Economic Co-operation and Development and the United Nations Conference on Trade and Development had already been central to the discussion and would continue to contribute to resolving outstanding questions.

69. While trade negotiators and experts who had already worked on the matter, particularly at the European Commission, were understandably wary of opening up a new front, when the existing problems continued to resist solution; they should, however, beware of creating a new fragmented system, one applicable to the European Union alone, before any effort was made to develop a new multilateral system for all. While success was not guaranteed, the potential rewards were greater than those to be gained by establishing yet another code of ethics for arbitrators with limited application or addressing concurrent proceedings in investment arbitration.

70. **Mr. Medina Mejías** (Bolivarian Republic of Venezuela) said that a consequence of using the existing investor-State dispute settlement system had been the development of a body of international law with few checks and balances and little transparency or consistency. Such shortcomings were a cause of serious concern for many developed and developing countries, and many significant claims had already been brought against various States. Additionally, the problem had been exacerbated by a trend toward "megacases", which could result in previously unimaginable multibillion dollar awards against States, as in the case between the shareholders of the Yukos oil company and the Russian Federation.

71. Consequently, some States had reconsidered entering into investment treaties, or had even denounced treaties; others had developed proposals for a new investor-State dispute settlement system. The European Commission, for example, had proposed the creation of an international investment court to replace the existing dispute settlement mechanisms in all of the European Union's ongoing and future investment negotiations, including the Transatlantic Trade and Investment Partnership.

72. The investor-State dispute settlement system was central to national sovereignty, trade and development, including the development of international law, and it was a crucial subject for the exchange of ideas among Member States within Working Group II. The inclusion of misleading terms, such as the "most-favoured-nation" (MFN) clause, occurring in thousands of bilateral investment treaties and international investment agreements, the majority of which had been signed in the 1990s, needed to be addressed. Most-favoured-nation clauses were dangerous and should be avoided owing to the possibility of creating unintended protections for investors. An MFN clause allowed foreign investors to selectively use provisions from other treaties, as in the two multibillion dollar claims brought by the Swedish energy company Vattenfall against the German Government.

73. Billion dollar claims were becoming standard as, for instance, in Ecuador, where the Government owed over a billion dollars, a very large amount for any developing country, to the multinational oil company Occidental. A reading of the facts of that case indicated that mistakes had been made and a different panel of arbitrators could easily have rendered a different decision.

74. The lack of consistency of decisions, alongside the excessive length of procedures and excessive costs, was among the reasons that structural reform at least was required in the existing investor-State dispute settlement system. The absence of an effective appellate mechanism, for instance, made it impossible to reverse incorrect decisions and sanction incompetent arbitrators, while the

lack of transparency affected the disclosure of third-party funding and conflicts of interests among arbitrators, law firms and their clients. Working Group II would be the right forum to consider reforms and alternatives to the investor-State dispute settlement system, and it should take up the topic the following year.

The meeting was suspended at 12.15 p.m. and resumed at 12.50 p.m.

75. **Mr. Schoefisch** (Germany) said that the report of the Center for International Dispute Settlement provided excellent preliminary reflections on reforming the investor-State dispute settlement system. Preliminary work on the topic could continue and a report should be presented to the Commission for discussion in 2017. That report should outline a coherent and workable reform of the investor-State dispute settlement system, enjoying support from a majority of UNCITRAL members and other interested States. It should also explain why UNCITRAL was the appropriate forum for such a complex reform of investment treaties. It was unclear whether all of the proposed changes to existing investment treaties and significant adaptations envisaged for the ICSID Convention were realistic. There were various unresolved questions including how the available options could be combined sensibly and without contradiction or duplication in order to ensure the functioning of the proposed permanent investment tribunal and appeals mechanism; where a permanent investment tribunal should have it seat; and how the recognition and enforcement of judgements would be secured, for example under the New York Convention system or special regulations. A new report would have to provide answers to such questions on the basis of a convincing assessment of all available options in terms of their legal and political viability.

76. **Mr. Rangreji** (India) said that the ambitious proposals described in the CIDS report would not only involve work on a permanent institutional framework for investor-State arbitration, but would also have repercussions for other existing dispute settlement procedures and mechanisms. Nonetheless, UNCITRAL was the right body to undertake a study on the subject, which should be placed on the Commission's agenda for 2017.

77. **Mr. Von Walter** (Observer for the European Union), responding to the representative of Mauritius, said that the European Union had also proposed the idea of a multilateral approach to reforming investment dispute settlement. It had also been explicitly outlined in the concept paper "Investment in TTIP and beyond — the path for reform", which described the European Union's ultimate goal of establishing a multilateral, global dispute settlement system that could replace existing bilateral dispute settlement systems. Furthermore, in the European Union's free trade agreements with Canada and Viet Nam, the contracting parties had a clear commitment to work with other interested countries to create a multilateral investment court.

78. Such commitments were taken seriously and the report of the Center for International Dispute Settlement had provided useful information on the legal and technical aspects of such a project, while also confirming that the Mauritius Convention approach could be used to reform investment dispute settlement further. Any project should adopt an inclusive approach and draw on the expertise of countries, experts and institutions. A number of issues needed to be resolved, including how an inclusive approach could be developed; how adjudicators should be appointed in such a setting; and how a review system, whether at the review, appeal or preliminary ruling stage, could be established. An informal intergovernmental dialogue should be held between all interested countries and governments before a decision was taken on whether the Secretariat or Working Group II should carry out such work.

79. **Mr. Schnabel** (United States of America) said that no more of the Secretariat's resources should be devoted to the subject. As Working Group II had focused on transparency and conciliation, UNCITRAL had not been able to deal with commercial arbitration issues, except to update the UNCITRAL Notes on Organizing Arbitral Proceedings. As other organizations were conducting work on investor-State arbitration, UNCITRAL should explore topics related to commercial arbitration, such as choice-of-law issues concerning ethics in international arbitration or cooperation with the Swiss Arbitration Association.

80. Furthermore, document A/CN.9/890 made it clear that any work on projects such as a dispute settlement body or an appellate mechanism would involve a significant institutional design component to create an organization for those types of functions. Such a project did not seem suitable for UNCITRAL, especially as it was unlikely that any body that might be created would operate under the auspices of UNCITRAL.

81. **The Chair** said that it had been suggested that other organizations could collaborate with UNCITRAL on such a project and asked which other parties the United States delegation would choose in that instance.

82. **Mr. Schnabel** (United States of America) said that the candidates for such work would include the United Nations Conference on Trade and Development and the Organisation for Economic Co-operation and Development, as well as the many other States and stakeholder organizations that had carried out work on the issue. Identifying such parties would be a key issue going forward. Given the discussions on the matter under way elsewhere, UNCITRAL should focus on other topics.

83. **The Chair** asked if the United States delegation could consider the possibility of UNCITRAL partnering with another organization that would take the lead.

84. **Mr. Schnabel** (United States of America) said that it was difficult to speculate on what specific type of involvement might be appropriate, although the Secretariat should continue to be informed of what other organizations were doing on topics relevant to UNCITRAL.

The meeting rose at 1.05 p.m.

Summary record of the 1039th meeting, held at Headquarters, New York, on Friday, 8 July 2016, at 3 p.m.

[A/CN.9/SR.1039]

Chairperson: Mr. Schneider (Vice-Chair) (Switzerland)

Contents

In the absence of Mr. Kenfack Douajni (Cameroon), Mr. Schneider (Switzerland), Vice-Chair, took the Chair.

The meeting was called to order at 3.25 p.m.

Agenda item 5: Consideration of issues in the area of arbitration and conciliation (*continued*)

(d) Possible future work in the area of arbitration and conciliation (*continued*) (A/CN.9/890)

1. **The Chair** recalled that the three proposed areas of the Commission's future work in the area of international arbitration and conciliation were concurrent proceedings, a code of ethics for arbitrators and possible work on the reform of the investor-State dispute settlement system. He invited the Commission to resume its consideration of the note by the Secretariat presenting a research paper on the United Nations Convention on Transparency in Treaty-based Investor-State Arbitration (Mauritius Convention) as a possible model for further reforms of investor-State dispute settlement, contained in document A/CN.9/890.

2. **Mr. Wang** Jianbo (China) said that his delegation supported the inclusion of the reform of the investor-State dispute settlement system in the future work of the Commission. There were shortcomings in the existing system that must be overcome, but further work was needed to determine whether the solutions set out in the research paper were appropriate.

3. **Mr. Fornell** (Ecuador) said that an appeal mechanism and a permanent investment tribunal should be established and, therefore, the Commission's future work should include the matter of investor-State dispute settlement. However, the focus should not be solely on the Mauritius Convention, given that not all States were parties to that instrument.

4. **Mr. Apter** (Israel) said that his delegation had not yet determined its position on a multilateral investment tribunal or appeal mechanism. The Commission could potentially help to bring the necessary inclusiveness to the investor-State dispute settlement system. However, the reform of the system might be beyond the capacity of the Commission to address. He proposed that the topic should remain on the Commission's work programme for another year in able to enable Member States to take a more informed and considered decision at the fiftieth session of the Commission.

5. **Ms. Mackielo** (Argentina) said that the reform of the investor-State dispute settlement system was a priority for her country. The Commission's work in that area should address the appointment and transparency of arbitrators and the consistency of decisions. The prestige and membership of the Commission made it the most suitable forum for addressing the matter, but it could work with other relevant organizations. She suggested that delegates could meet to identify the key topics for consideration before the next session of the Commission.

6. **Ms. Pierotic** (Chile) said that the idea of creating a permanent investment tribunal had gained traction in recent years. The Comprehensive Economic and Trade Agreement between the European Union and Canada and the Free Trade Agreement between the European Union and Viet Nam were pioneering initiatives but, in the interest of inclusiveness, it would be better to create a multilateral mechanism. The Commission was therefore the most appropriate forum for work on the reform of the investor-State dispute settlement system. Its efforts could be supported by interested organizations.

7. **Mr. Maradiaga** (Honduras) said that the Commission should take the lead in the matter of investor-State dispute settlement, as it had the capacity to develop an instrument that would meet the requirements of a constantly evolving society.

8. **Mr. Milassin** (Hungary) said that Working Group II (Arbitration and Conciliation) should complete its current work before undertaking any new initiatives. If it took up the matter of the reform of the investor-State dispute settlement system in the future, it should take care to draw a distinction between commercial arbitration and investment arbitration.

9. **Mr. Moollan** (Mauritius) said that it should be noted that the proposal was not that the Commission should operate an investment court but rather that it should lead the process of designing a potential new court. He suggested the Secretariat should be given a broad mandate to work on all three proposed topics so that the Commission would be in a position to make a decision at its next session on whether to mandate Working Group II to undertake work in any of those

areas. It would be useful for the Secretariat to conduct broad consultations with stakeholders and consider the best way to move forward with the project, should it be taken on, in an inclusive manner. A greater amount of preparatory work would be necessary on the reform of the dispute settlement system than on the other two proposed areas of work.

10. **Mr. Bellenger** (France) said that his delegation would support the continuation of the work on the reform of investor-State arbitration.

The meeting was suspended at 3.55 p.m. and resumed at 4.25 p.m.

11. **Ms. Montineri** (Secretariat) said that, as a result of the consultations during the suspension, agreement had been reached to mandate the Secretariat regarding preparatory work on the possible reform of the investor-State dispute settlement system in the following terms: "The Commission will mandate the Secretariat to review how the project described in document A/CN.9/890 may best be carried forward, if approved as the next topic of future work at the forthcoming session of the Commission, taking into consideration the views of all stakeholders, including how this project may interact with other initiatives in this area and which format and processes should be used. In carrying out this mandate, the Secretariat should consult broadly."

12. **Mr. Mejías** (Bolivarian Republic of Venezuela) proposed replacing the word "stakeholders" with the words "Member States and other stakeholders".

13. **Ms. Dostie** (Canada) said that the term "Member States" excluded observer States and regional organizations with observer status. In response to a suggestion from the Chair, she said that phrase "States and stakeholders" would be acceptable.

14. **Mr. Moollan** (Mauritius) said that the wording of the mandate should not put an emphasis on States, as involvement in the process should be as inclusive as possible.

15. **Mr. Mejías** (Venezuela) said that States should be mentioned to make it clear that while other stakeholders were welcome to participate, the process was primarily an intergovernmental one.

16. **Mr. Schöfisch** (Germany) expressed concern that the Secretariat would not have the capacity to carry out preparatory work on all three topics and that the efforts of the Secretariat would be primarily focused on the investor-State arbitration system even though there appeared to be more support for future work on concurrent proceedings. Any work on concurrent proceedings should differentiate between commercial arbitration and investor-State arbitration.

17. **The Chair** said that the only reason the work of the Secretariat would focus on the investor-State arbitration system was that a significant amount of preparatory work had already been done on the other two topics.

18. **Mr. Sorieul** (Secretary of the Commission) said that the Working Group would complete its current projects before undertaking work on any of the proposed initiatives. The Secretariat was in a position to carry out preparatory work on all three potential topics for future work in the coming year.

19. **Mr. Decker** (Observer for the European Union) agreed that any work on concurrent proceedings should draw a distinction between investment arbitration and commercial arbitration. He suggested that the term "Governments" could be used instead of "States" in the request to the Secretariat concerning the preparatory work on investor-State arbitration reform, in order to include the European Union. However, his delegation did not have a strong view on the matter and would not object to being referred to as a stakeholder.

20. **The Chair** took it that the Commission wished to amend the word "stakeholders" to "States and stakeholders" in the proposed wording for the request to Secretariat concerning the preparatory work for possible work on the reform of the investor-State dispute settlement system.

21. *It was so decided*.

Agenda item 13: Coordination and cooperation (*continued*)

(b) Reports of other international organizations (*continued*)

22. **Mr. Șerban** (International Road Transport Union) said that the Arbitration Court for Transport had been established by the Romanian Association of International Road Transports as a private independent body specializing in the settlement of international disputes concerning transport and transport-related activities. The Court fully applied the UNCITRAL Model Law on International Commercial Arbitration. To further the global promotion of specialized arbitration in the field of transport, it was developing a growing international transport arbitration network through partnerships and agreements with national, regional and international bodies. It also supported the sustainable development of the business environment through public-private partnerships around the world.

Agenda item 21: Adoption of the report of the Commission (*continued*)

Consideration of issues in the area of arbitration and conciliation (A/CN.9/XLIX/CRP.1/Add.6)

23. **Mr. Chan** (Singapore), Rapporteur, introduced document A/CN.9/XLIX/CRP.1/Add.6.

24. **Ms. Montineri** (Secretariat), responding to questions that the Secretariat had received from delegations, said that the unusually formal wording in paragraph 34 was simply intended to enable the Secretariat to access the necessary resources to publish the instrument that would result from the Commission's work on mediation.

25. *Document A/CN.9/XLIX/CRP.1/Add.6 was adopted*.

The meeting rose at 4.45 p.m.

Summary record of the 1040th meeting, held at Headquarters, New York, on Monday, 11 July 2016, at 10 a.m.

[A/CN.9/SR.1040]

Chairperson: Mr. Kenfack Douajni (Cameroon)

Contents

The meeting was called to order at 10.10 a.m.

Agenda item 7: Micro-, small- and medium-sized enterprises: progress report of Working Group I (A/CN.9/860 and A/CN.9/866)

1. **Ms. Clift** (Secretariat), introducing the reports of Working Group I on the work of its twenty-fifth and twenty-sixth sessions respectively (A/CN.9/860 and A/CN.9/866), said that, following its discussion of the documents prepared by the Secretariat on the key principles of business registration, the Working Group had decided to prepare a legislative guide on the subject, without prejudice to its deciding at a later date whether draft legislative provisions or a model law would be more appropriate. It would consider the guide at its spring 2017 session. On the other main focus of its work, namely, the legal issues surrounding the creation of a simplified business entity, it had likewise decided to develop a legislative guide, which would include a discussion of the policy considerations, a commentary and legislative recommendations and which it would consider at its fall 2016 session. The Working Group had also been considering how best to provide an overall context for users of the proposed new texts and of any other texts that might be developed on the subject. It was studying the possibility of preparing an introductory text along the lines of A/CN.9/WG.I/WP.92 that would address issues such as the importance of micro-, small- and medium-sized enterprises (MSMEs) for economic development and the need for a holistic approach to their regulation.

2. **Ms. Malaguti** (Italy), Chair of Working Group I, said that the purpose of the introductory text would be to provide a framework for the preparation of the two legislative guides by the Working Group. Since the Working Group had a broader mandate, it might also address other issues, while taking care not to overlap with the work of other Working Groups; where appropriate, it would explore the possibility of a joint, coordinated approach.

3. **Ms. Fernández** (Chile) recalled that at the recent summit meeting of the Pacific Alliance in Chile, its four member States (Chile, Colombia, Mexico and Peru) had stressed the need for greater financial integration among Latin American countries and, in particular, the importance of broader negotiating mechanisms to finance MSMEs. That would be a prime concern in the coming period, especially for the least developed among them.

4. **Mr. Chan** (Singapore) said that the principles underpinning the work of the Working Group and its intended outcomes were of general relevance. Its title was therefore too narrow and did not reflect its actual work, which was not confined to MSMEs. Its current concern, which was to simplify processes for the establishment of business entities, was crucial and would benefit all business entities, small and large alike. The outcomes would therefore apply not only to MSMEs, which might in any case be expected to become larger and perhaps international in scope.

5. **Mr. Bellenger** (France) said that his delegation continued to be concerned about the scope of the Working Group's work, which should not be confined to establishing a simplified legal status for businesses but should also address the question of individual or single-person enterprises. It had repeatedly raised that question, which had still not been addressed by the Working Group. It would be appreciated if the Secretariat could include as soon as possible consideration of the substantive aspects of the question within the framework of business registration.

6. **Mr. Schnabel** (United States of America) commended the Working Group for its ongoing work on the legislative guides, which needed to be completed as soon as possible; the question of it being allotted additional time for that purpose might usefully be considered. MSMEs were engines of economic growth and job creation in every country, but in the developing world 90 per cent of them operated in the informal sector. It was therefore important to develop an enabling legal environment, particularly as simplified business registration and incorporation would be a gateway for such businesses to enter the formal economy, reach

previously inaccessible markets and compete and seek fair treatment under the law. Benefits would not be limited to the businesses themselves: once in the formal sector, they would be required to pay taxes and comply with labour laws. Moreover, easier start-up laws were conducive to the establishment of new businesses, lower prices and increased product availability.

7. **Mr. Apter** (Israel) said that his delegation welcomed the decision to consider the two proposed draft legislative guides separately. Israel had taken part for the first time in the Working Group's discussions at its most recent session earlier in the year and had noted the low participation of government officials. He called on the Commission to highlight through the Secretariat how crucially important it was that government officials, especially those in charge of company registration, should participate in the discussions, so as to ensure that practitioners could allow countries without company registrars to benefit from their experience.

8. **Ms. Fernández-Tresguerres** (Spain) expressed concern about the lack of coordination between the Working Group and the European Union, which was similarly engaged in efforts concerning a simplified business entity. Her delegation remained favourable to the preparation of a legislative guide rather than a model law; such a guide would be less invasive and would not affect the rights-based systems of European Union States, where a notarial tradition prevailed. What was important was to work in coordination with the European Union with regard to currency controls and statistics and to guard against any increase in costs.

9. **Mr. Maradiaga** (Honduras) said that countries like his own, characterized by a precarious economic situation and very high unemployment, set great hopes on the development of an instrument on business registration. Whether it took the form of a legislative guide or a model law, what was important was that it should give momentum to the development of MSMEs and ensure financing for them, particularly in view of the multiplier effects that would thereby be generated.

10. **Mr. Chandra** (India) said that his Government supported partnerships with MSMEs; they were a crucial source of employment opportunities at comparatively low capital cost and thus played an important role in the industrialization of rural areas, thereby ensuring a more equitable distribution of national income and wealth. His delegation trusted the Secretariat to resolve any problems of overlap with the other Working Groups, in particular in the area of insolvency law.

11. **Ms. Damayanti** (Indonesia) said that MSMEs were the backbone of her country's economy. Her delegation hoped therefore that the Working Group would define their scope, including their registration procedure, in a way best suited to promote their business activities.

12. **Mr. Plakhov** (Russian Federation) said that, judging by States' comments, Working Group I had been right to focus on issues of business registration and a simplified business entity, rather than seeking to address the many issues arising under the broad rubric of MSMEs. He commended the Italian delegation for so ably steering its work.

13. **Ms. Lephilibert** (Thailand) welcomed the progress made in the work to simplify business registration, which was particularly useful for MMEs in her country. Thailand was currently revising its bankruptcy law in the light of that work in order to simplify the debtor process. Once the Working Group had completed its work on the subject, it would be useful to develop a linkage with the work of Working Group V on insolvency law.

14. **Mr. Sorieul** (Secretary of the Commission), responding to the comments made regarding the mandate and title of Working Group I, said that, as a matter of convenience, it was referred to as the Working Group on MSMEs but its official title was Working Group I. It was concerned essentially with matters of corporate law, as had been suggested by the representative of Singapore. The question whether that should be specifically stated or, following the comments made by the representative of France, that there should be an explicit reference to single-person enterprises could be left to the discretion of the Working Group itself as any such additions would remain in parentheses, outside the official title.

15. **Ms. Escobar Pacas** (El Salvador) said that her delegation supported the Working Group's work, which was very important to her country, particularly for the development of legal standards, as reflected in its recent adoption of a law on MSMEs, which included a section on business registration.

Agenda item 8: Consideration of issues in the area of electronic commerce

(a) Progress report of Working Group IV (A/CN.9/863 and A/CN.9/869)

(b) Other work: report of the colloquium on identity management and trust services (A/CN.9/856 and A/CN.9/891)

16. **Mr. Lee** (Secretariat), introducing the reports of Working Group IV on the work of its fifty-second and fifty-third sessions respectively (A/CN.9/863 and A/CN.9/869), said that the Working Group was currently considering the preparation of a Model Law on Electronic Transferable Records, focusing on domestic aspects of the use of such records, equivalent to paper-based transferable records. The international aspects and the use of transferable records existing only in electronic environment would be dealt with at a later stage. It was expected that the draft Model Law together with an explanatory note would be submitted for the Commission's consideration at its next session in 2017.

17. At its forty-eighth session, the Commission had instructed the Secretariat to conduct preparatory work on identity management and trust services, cloud computing and mobile commerce for further discussion in the Working Group, following the current work on transferable records. The Commission had before it a note by the Secretariat on legal issues related to identity management and trust services (A/CN.9/891), summarizing discussions in the UNCITRAL colloquium on the subject held in Vienna in April 2016. Work on the contractual aspects of cloud computing had also begun at the expert level on the basis of a proposal submitted at the Commission's last session (A/CN.9/856). States and

other entities were invited to share with the Secretariat their expertise and other resources in respect of cloud computing. The Commission might wish to confirm the decision to take up work in the fields of identity management and cloud computing as and when the Working Group completed its work on the draft Model Law, which was expected to be finalized at its next session.

18. Work was continuing in the field of paperless trade, including the legal aspects of electronic single window facilities, conducted in cooperation with the United Nations Economic and Social Commission for Asia and the Pacific (ESCAP). UNCITRAL had participated in the preparation of the Framework Agreement on Facilitation of Cross-border Paperless Trade in Asia and the Pacific, adopted by ESCAP at its seventy-second session, and had ensured that the final text was consistent with the principles contained in UNCITRAL texts on electronic commerce. The Framework Agreement, which would be open for signature in October 2016 and would enter into force upon its ratification by five member States of UNESCAP, was designed to complement the World Trade Organization's Trade Facilitation Agreement.

19. **Ms. Sabo** (Canada) welcomed the progress being made on the draft Model Law and the expected timetable for the Commission's work in the area of electronic commerce. That had implications for the priorities and efficiency of its work. The Working Group might wish to use its spring session to focus on the more mature topic of cloud computing and thus allow the Secretariat more time to conduct preparatory work on issues of identity management, which were indeed important in relation to electronic commerce, whether domestic or cross-border. It was not clear, however, what specific work might be undertaken in that area.

20. **Mr. Bellenger** (France) said that his delegation unreservedly supported the upcoming work on issues of identity management and trust services. Those issues were crucial and had arisen repeatedly in the course of the Working Group's current work, where they had proved to be a missing part of the draft Model Law. It would therefore be desirable for such work to be initiated at the earliest opportunity. Necessary documents would soon be prepared. Since it was expected that meeting time would be made available, such time might profitably be allotted to the Working Group so that it could begin the far-reaching work that would be needed on those issues.

21. **Mr. Apter** (Israel) said that Israel stood ready to share its expertise in the area of cloud computing and would appreciate information on the consultations already begun in that regard. It might be useful to seek information from States through a short questionnaire on their relevant legislation and practices, along the lines of the questionnaire used for Working Group II on conciliation and settlement, which had received many responses. His delegation looked forward to the development of a model law or guidelines on identity management and had no objection to the allotment of extra time for that purpose. As to whether work should begin first on identity management or cloud computing, that could be decided in the light of the state of preparation of the two issues. One possibility would be to hold a preliminary discussion on both issues at the February meeting in order to determine their relative maturity so that work could begin accordingly in 2017.

22. **Mr. Chan** (Singapore) said that his delegation appreciated the Secretariat's support for Working Group IV and the Working Group itself: it had set an example to other UNCITRAL Working Groups through its professionalism and mastery of the issues and the efficiency of its work, remaining well within the time frame allotted for electronic transferable records. With regard to future work on the two issues of identity management and cloud computing, already begun by the Secretariat, their order of priority could be left to the Working Group to determine. The deciding factor should not be interest but rather need; nor should the matter be decided on the basis of the comparative state of preparation of the two issues. It would be useful for the Secretariat to make an assessment of the environment to be regulated in order to determine where there was the most pressing need for rules to be developed.

23. **Mr. Schnabel** (United States of America), noting that, while the Working Group was expected to complete its work on the draft Model Law on Electronic Transferable Records soon, it would still be necessary to prepare an accompanying commentary. His delegation would support work by the Working Group on such a commentary parallel to its taking up a new topic. As for identity management and trust services, it was important to distinguish between the two topics. His delegation continued to support work by the Commission in the area of identity management, which had become a critical requirement for most substantive electronic commerce transactions and was also a foundational requirement referred to in UNCITRAL texts on electronic commerce but had yet to be addressed. Identity management was also a subject of legislative efforts across the globe and was therefore an appropriate topic for work by the Commission. Before undertaking any normative work in that area, the Working Group should analyse existing relevant law, including UNCITRAL instruments, so as to be in a position to recommend specific subtopics of identity management on which particular work would be required. The Commission could then discuss and approve a specific and focused mandate on the topic, which was currently lacking. His delegation believed that any work on trust services should be deferred. It supported a renewal of the request made at the Commission's forty-eighth session to the Secretariat to compile information on cloud computing.

24. **Mr. Nawana** (Sri Lanka) said that since 2006, Sri Lanka had legislation on electronic commerce in place, which was currently being updated in line with the United Nations Convention on the Use of Electronic Communications in International Contracts, the primary objective of which was to ensure sustainable development while preserving the global environment. Developing countries like Sri Lanka needed technical assistance in incorporating electronic commerce into their development agenda. His delegation consequently urged the Commission to make robust efforts to extend its technical cooperation to strengthen electronic commerce as appropriate, particularly in developing countries.

25. **Mr. Maradiaga** (Honduras) said that his delegation had been closely following the work on electronic transferable records and look forward to its completion. The draft Model Law was indeed of particular interest to Honduras, which had already adopted a number of laws relating to electronic commerce. It would be appreciated if the Secretariat could determine priorities for the Working Group's future work.

26. **Mr. Chandra** (India) said that the draft Model Law on Electronic Transferable Records was one more example of the Commission's important contribution in the area of electronic data exchange and would help to achieve the goals of increased speed and accuracy and lower business costs. India had already enacted a law on direct benefit transfers and electronic procurement and was currently seeking to establish electronic record interoperability through the introduction of administrative guidelines. His delegation now looked forward to the Secretariat's future work on cloud computing and identity management, with a particular focus on privacy-related laws.

27. **Ms. Castillo Aransaenz** (Observer for Peru) said that since 2000 her country had in place a digital identity platform operated by an autonomous technical body responsible for protecting the digital identity of its citizens, particularly in the context of cross-border transfers. Peru could offer related know-how and technical assistance if so required and would be happy to provide the Secretariat and the Commission with drafts of the laws it was currently developing in that connection. It attached particular importance to the principle of interoperability between States.

28. **Mr. Fernández Valoni** (Argentina) welcomed the progress made in developing the draft Model Law on Electronic Transferable Records while noting that his delegation would seek further discussion regarding the concept of good faith and its inclusion in article 3, on which it reserved its position. Turning to the future work of the Commission, he said that cloud computing was a new business model that deserved to be studied by Working Group I, particularly in terms of its impact. As for the topic of identity management, it was to be hoped that the Working Group would seek to establish a legal framework which, if applied uniformly, would help to promote the development of electronic commerce. Careful attention must be given in that context to the matter of privacy rights on the Internet.

29. **Ms. Sabo** (Canada), responding to comments on the importance of privacy issues in relation to identity management, said that the Commission had a particular mandate, which lay in the area of international trade law. It was important that the Working Group should not exceed that mandate; that would be a difficult in the context of identity management. The challenge for the Working Group would be to work on the topic without touching on privacy issues.

30. **Ms. Malaguti** (Italy) said that the topics of identity management and cloud computing were compatible and could be taken forward together. In any case, the Secretariat was currently drafting preparatory documents on both topics and, once those documents were before the Commission, priorities could be discussed in terms of need and interest, and also of efficiency.

31. **Ms. Damayanti** (Indonesia) said that a number of technical issues still needed to be discussed before an agreement could be reached on the draft Model Law.

32. **Mr. Sorieul** (Secretary of the Commission) said that the Secretariat was, of course, giving priority to the completion of work already begun and that the draft Model Law should consequently be placed before the Commission at its next session in 2017. With regard to its future work, the Secretariat had already begun working on the two new topics of identity management and cloud computing, and expected to continue doing so throughout 2017, under what he hoped would continue to be a flexible mandate from the Commission. It would avail itself of every means for that purpose, including the compilation of information on existing laws; the use of a questionnaire might be envisaged, but it was too early to say. In the past, the Secretariat had found that questionnaires sometimes gave mixed results. On the question of priorities, notably in terms of a possible need, and also in the light of feasibility, he asked the Commission to reserve its position until a higher degree of certainty had been achieved. As for the use to which any possible additional time might be put, that might best be considered when the Commission came to discuss more generally the priorities to be assigned to the work of the various Working Groups. Concerning the possibility of technical assistance for developing countries, and also the offers of such assistance from other countries, and having regard to the chronic shortage of resources available to the Commission, he suggested that the matter be left in abeyance until the Secretariat's technical assistance programme was discussed.

33. **Mr. Apter** (Israel) requested clarification as to how the work on cloud computing would be developed.

34. **Mr. Sorieul** (Secretary of the Commission) said that, unless otherwise instructed, the Secretariat would proceed in the usual manner, by convening meetings of informal groups of experts according to a timetable yet to be determined. Delegations would be duly informed of the meetings.

Agenda item 9: Insolvency law: progress report of Working Group V (A/CN.9/864 and A/CN.9/870)

35. **Ms. Clift** (Secretariat), introducing the reports of Working Group V on the work of its forty-eighth and forty-ninth sessions respectively (A/CN.9/864 and A/CN.9/870), said that, on the first of the three topics on which it was currently working, "Facilitating the cross-border insolvency of multinational enterprise groups", the Working Group had agreed on a set of key principles and the structure of a draft text consolidating the issues addressed through the incorporation of a set of articles on cooperation and coordination based on part three of the UNCITRAL Legislative Guide on Insolvency Law, together with provisions facilitating the development and recognition of a group insolvency solution and the treatment of foreign claims in accordance with applicable law. She recalled that, on the topic of recognition and enforcement of insolvency-related judgements, a text had been developed that would not be referred to the Commission for finalization and approval pending the further development of work on

enterprise groups, mainly because of further obligations that might be added to the text. The Working Group had also considered three drafts of a model law on its third topic, "Obligations of directors of enterprise group companies in the period approaching insolvency". Steps had been taken in that connection to coordinate closely with the work of the Hague Conference on Private International Law, including through attendance at the meeting of its Special Commission on the Judgements Project, held in June 2016. A number of articles being developed in the Hague Conference text on judgements had been included in the UNCITRAL draft model law, but as insolvency was not covered by the Hague text, there were several points of departure for the Commission's work on those provisions. The Secretariat would continue to monitor the work of the Hague Conference as it proceeded to develop its judgements text.

36. Noting that considerable support had been expressed in the Working Group for work on the insolvency of MSMEs, she drew the Commission's attention to paragraph 87 of document A/CN.9/870, which provided possible wording aimed at clarifying its mandate in that connection. It might be appropriate for the Secretariat to prepare in 2017 a note summarizing work on the subject carried out by other international organizations, in particular the International Monetary Fund and the World Bank, as well as a number of States, such as Thailand. Its purpose would be to indicate to the Working Group how it might move forward in its work on insolvency. As for the possibility of a colloquium on the feasibility of negotiating a convention on selected issues of cross-border insolvency, the proposal to that effect had been withdrawn; the Secretariat was nevertheless continuing to study the issue informally, subject to constraints of time and resources.

37. **Mr. Schnabel** (United States of America), expressing strong support for the work of Working Group V, said that the development of legal provisions on enterprise groups could have a significant economic impact as most large cross-border insolvency cases involved groups, while the development of a model law on recognition and enforcement of insolvency-related judgements would help to reduce duplicative and wasteful relitigation of issues in such cases. Both topics were complex and involved difficult issues owing to the different approaches considered appropriate in the different legal cultures. His delegation welcomed the inclusion of relevant aspects of MSMEs in the Commission's work on insolvency issues in view of their significant role globally and supported the proposed clarification of the Working Group's mandate in that regard. The Working Group should give priority to determining what kind of instrument would be most likely to ensure that the end product of its work on the topic merited the resources expended on it. As for the withdrawal of the proposal to hold a colloquium on the feasibility of an international convention in that area, and given that no State had ever asserted that the development of a binding treaty would make any difference to its own adoption of the legislative approach embodied in the proposed model law, there would indeed appear to be good grounds for setting the proposal aside for the time being, with the possibility of reconsidering it later if deemed appropriate.

38. **Ms. Sabo** (Canada) said that Working Group V had made commendable progress on a particularly demanding set of topics. Her delegation supported the proposed clarification of its mandate and welcomed the coordination with the work of the Hague Conference on Private International Law relating to the recognition and enforcement of judgements. The Commission should continue to follow that work closely as it was essential to ensure coordination between the respective texts, even though the UNCITRAL text would not be binding. The idea of a colloquium on the feasibility of a convention was premature. While it was not a priority, the Secretariat might wish, nevertheless, to pursue the matter informally by collecting useful information or organizing expert meetings.

39. **Ms. Morris-Sharma** (Singapore) said that, as a recent member of the Working Group, Singapore looked forward to engaging in particular with the topics on recognition and enforcement of insolvency-related judgements and facilitating the cross-border insolvency of multinational enterprise groups. His delegation supported the revised mandate while reiterating the importance of a clear definition of MSMEs.

40. **Mr. Bellenger** (France) said that, while there was agreement on the progress made by Working Group V, there appeared to be several schools of thought as to the direction in which it should proceed. Caution was therefore in order. His delegation shared the view that, for the time being, it was not advisable to seek to develop a convention on international insolvency issues. It supported the clarified mandate proposed for the Working Group.

41. **Ms. Lephilibert** (Thailand) said that her delegation remained committed to working in the Working Group, especially in regard to the recognition and enforcement of insolvency-related judgements. Thailand was currently revising its Bankruptcy Act in the light of the UNCITRAL Model Law on Cross-border Insolvency. She emphasized the importance of continuing to coordinate with the ongoing work of the Hague Conference on the recognition of foreign judgements in commercial matters.

42. **Ms. Sender** (Observer for the Hague Conference on Private International Law) expressed appreciation of the efforts to guard against any overlap or gaps in the work of the Hague Conference to develop a convention on recognition and enforcement of judgements in civil and commercial matters and the UNCITRAL work on a model law on the recognition and enforcement of insolvency-related judgements. The Hague Conference welcomed the representation of UNCITRAL at its meetings and would continue its efforts to maintain its fruitful cooperation with the Commission.

43. **Mr. Apter** (Israel) noted the positive developments in the work of the Working Group and stressed the importance of continuing coordination with the work of the Hague Conference.

44. **Ms. Escobar Pacas** (El Salvador) joined in commending the Working Group for the work it had carried out and thanked the Secretariat for producing documents that helped States to grapple with the difficult issues under consideration. El Salvador was following the work on

insolvency with particular interest as it was currently developing a law on insolvency with the support of the World Bank Group. Her delegation welcomed the inclusion of MSMEs in the Working Group's mandate for insolvency issues.

45. **Ms. Fernández** (Chile) said that the work of the Working Group was also of particular interest to Chile, which had adopted a bankruptcy law that incorporated a number of its norms. Coordination with the work of the Hague Conference was important not only to ensure complementarity with the work of the Commission but also, as had been noted, to guard against any gaps.

46. **Ms. Clift** (Secretariat), responding to comments about possible work on an insolvency convention, said that it remained to be seen what time and resources might be available to the Secretariat within the limits of its current work programme. The clarification of the Working Group's mandate regarding MSMEs was welcome and would allow the Secretariat to start exploring the topic in 2017 with a view to determining how it might go forward. As it followed the Working Group's efforts to draft a model law on the recognition and enforcement of insolvency-related judgements, the Secretariat would continue to coordinate with the work of the Hague Conference to develop a convention on foreign judgements. In particular, it hoped to attend the next meeting of the Special Commission on the Judgements Project in 2017.

47. The enterprise groups topic had proved particularly difficult in terms both of approach and of the policy goals that might be sought by a draft model text. There was now a firm basis for developing a text and moving forward towards a draft model law for the next session of the Working Group. There appeared to be agreement on the direction of the text and how it fitted in with other UNCITRAL texts on cross-border insolvency. Efforts would therefore focus on the development of a draft model law, while options would remain open.

The meeting was suspended at 11.55 a.m. and resumed at 12.40 p.m.

Agenda item 10: Technical assistance to law reform

(a) General (A/CN.9/872, A/CN.9/874, A/CN.9/882, Add.1 and Add.1/Corr.1, and A/CN.9/883)

48. **Mr. Lemay** (Secretariat) said that the Secretariat's continuing ability to respond to requests from States and regional organizations for technical cooperation and assistance depended on the availability of funds to cover the associated costs. Despite the Secretariat's efforts to seek new donations, the funds available in the Trust Fund for UNCITRAL Symposia were limited. Accordingly, requests for technical cooperation and assistance activities were carefully weighed and were increasingly offered on a cost-share or no-cost basis. The Commission might wish the Secretariat to continue exploring alternative sources of extrabudgetary funding, in particular through permanent missions and other possible public and private sector partners. The Commission might also wish to reiterate its appeal to all States, international organizations and other entities to consider making contributions to the Trust Fund for UNCITRAL Symposia, if possible in the form of multi-year contributions or specific-purpose contributions in order to facilitate planning and meet the increasing number of requests for technical cooperation and assistance activities.

49. The Commission might wish to express its appreciation to the Government of the Republic of Korea and the Government of Indonesia for contributing to the Trust Fund since its forty-eighth session, again to the Government of the Republic of Korea for contributing in respect of the Asia-Pacific Economic Cooperation (APEC) Ease of Doing Business project, to the Government of Austria for contributing to the Trust Fund for Granting Travel Assistance to Developing States Members of UNCITRAL and to organizations that had contributed to the programme by providing funds or hosting seminars.

50. With regard to the UNCITRAL Law Library and web presence and its publications programme, and beyond what was set out in the Secretariat's note on technical assistance (A/CN.9/872), the bibliography of recent writings related to the work of UNCITRAL, available as document A/CN.9/874, reflected the potentially influential academic interest in UNCITRAL texts and was widely used in the law librarian profession. The UNCITRAL Law Library had continued to develop the website in new ways, for example by adding in the preceding year a feature highlighting the Commission's role in support of the Sustainable Development Goals. Furthermore, in line with the Commission's request at its forty-eighth session, the Secretariat had continued to explore social media tools as a means of disseminating information on the work of UNCITRAL. Since its establishment of a microblog and a LinkedIn presence, there had been a nearly 15 per cent increase in users of the UNCITRAL website, attributable in part to the traffic generated by those initiatives. The Secretariat would continue, with the Commission's approval, to experiment with the use of social media, as appropriate.

51. **Ms. Sabo** (Canada) expressed appreciation of the Secretariat's efforts to provide technical cooperation and assistance and its work in connection with the APEC meetings and the development of the UNCITRAL website which, in view of current budgetary constraints on paper publications, was a particularly important communication tool. Her delegation would encourage the Secretariat to continue looking for alternative sources of funding, while exercising its good judgement as to where funding could be appropriately received and where it might raise questions.

52. **Mr. Schnabel** (United States of America) likewise commended the Secretariat for its detailed reporting and technical assistance activities over the preceding year and, particularly, for its continued cooperation with APEC. His delegation looked forward to the Secretariat's participation in the forthcoming APEC workshop on supply chain financing sponsored by the United States in Lima, Peru; that would be a further opportunity to highlight the importance of UNCITRAL texts on cross-border trade. The Commission should reaffirm its support for the Secretariat's action to expand cooperation in promoting the implementation of UNCITRAL instruments in APEC member economies. His delegation supported its efforts to raise the visibility of those instruments and commercial law reform generally within the

United Nations system through the work on a guidance note on strengthening the United Nations support to States, upon their request, to implement sound commercial law reforms (A/CN.9/883) and welcomed the incorporation of States' comments into the draft text. It might be appropriate for the Commission to endorse the text of the draft.

53. **Mr. Chan** (Singapore) expressed appreciation to the Secretariat for its assistance in organizing consultations on the draft Model Law on Electronic Transferable Records. The feedback thereby obtained from people who would be directly using the text would be valuable in finalizing the draft at the next session of the Working Group.

54. **Mr. Apter** (Israel) added his delegation's voice to the expression of thanks for the work of the Secretariat and expressed the hope that it would continue to explore new ways of making the Commission's work more widely known. One way of raising its visibility would be online updates, in particular upon the completion of work on individual topics and the final adoption of texts by the Sixth Committee and the General Assembly.

55. **Mr. Sorieul** (Secretary of the Commission) said that the Secretariat welcomed the support for and trust in it expressed by UNCITRAL members and recognized the need for wider dissemination of information about the Commission's work, particularly in developing countries, which could benefit significantly from it and which all too often remained unaware of its activities. A press release concerning the Commission's adoption of three texts in the preceding two weeks had already been issued in Vienna and appeared on the UNCITRAL website. It should be understood in that connection that model laws and other normative texts were adopted by the Commission, whose decisions were sovereign and final. The General Assembly took note of and expressed support for the Commission's work, to which it lent its prestige. The situation was different in regard to draft Conventions prepared by the Commission: they were either referred to a diplomatic conference or adopted directly by the General Assembly. That being said, the Secretariat would continue to make every effort to give maximum publicity to the decisions of the General Assembly regarding the work of UNCITRAL.

56. On the question of technical cooperation and assistance to Member States, the rather disastrous situation of the two UNCITRAL Trust Funds allowed the Commission to respond only partially to requests, helping either with travel costs or with subsistence costs but not with both. Indonesia was the only country that contributed regularly to the Trust Fund for Symposia, which was almost depleted, while for several years the only country that had contributed to the Trust Fund for Travel Assistance was Austria, through an annual contribution. The Secretariat extended its thanks to those two donor countries and to recipient countries that had agreed to co-financing arrangements. The Secretariat was continuing to seek alternative sources of financing while indeed remaining aware of the need for prudence.

The meeting rose at 1 p.m.

Summary record of the 1041st meeting, held at Headquarters, New York, on Monday, 11 July 2016, at 3 p.m.

[A/CN.9/SR.1041]

Chairperson: Mr. Kenfack Douajni (Cameroon)

Contents

The meeting was called to order at 3.15 p.m.

Agenda item 14: UNCITRAL regional presence (A/CN.9/877)

1. **Mr. Ribeiro** (UNCITRAL Regional Centre for Asia and the Pacific), introducing the note by the Secretariat on the activities of the Regional Centre (A/CN.9/877), said that the note presented the activities undertaken since the Commission's forty-eighth session in support of international trade law reform in States of the region. The main highlights included the ratification by Viet Nam of the United Nations Convention on Contracts for the International Sale of Goods (CISG), which was expected to be soon followed by similar action by several other States, and the ratification by Sri Lanka of the United Nations Convention on the Use of Electronic Communications in International Contracts (e-CC); the enactment of the UNCITRAL Model Law on International Commercial Arbitration, with amendments as adopted in 2006, by Bahrain, Bhutan, Myanmar, the Republic of Korea and by the Abu Dhabi Global Market jurisdiction in the United Arab Emirates; the enactment of the UNCITRAL Model Law on International Commercial Conciliation in Bhutan and Malaysia; 18 technical assistance and capacity-building activities delivered in 12 States; and four annual flagship events, namely, the UNCITRAL Asia-Pacific Spring Conference, the Asia-Pacific Alternative Dispute Resolution Conference, the UNCITRAL Emergence Conference and the UNCITRAL Asia-Pacific Day. The Commission might also note the Regional Centre's hosting of the first UNCITRAL Asia-Pacific Judicial Summit in October 2015. It had been attended by 40 judges from 18 jurisdictions in the region and had sought to promote the uniform interpretation and application of the 1958 Convention on the Recognition and Enforcement of Foreign Arbitral Awards.

2. The Regional Centre had also hosted the UNCITRAL South Pacific Seminar in September 2015, specifically designed to provide capacity building for the small island Pacific States in the fields of the international sale of goods, electronic commerce and arbitration, as well as a workshop for officials, legal officers and academics of the Democratic People's Republic of Korea on international commercial and investment arbitration, international sale of goods, e-commerce and secured transactions. A conference to celebrate 35 years of the United Nations Convention on Contracts for the International Sale of Goods had been held in Singapore in April 2015 and the Regional Centre had conducted the CISG Asia-Pacific Roadshow 2015-2016 to promote the regional accession, ratification and implementation of the Convention through technical briefings to domestic stakeholders. The Regional Centre had similarly been active in promoting the e-CC Convention, particularly in the light of the Framework Agreement on Facilitation of Cross-border Paperless Trade in Asia and the Pacific, holding workshops and briefings for that purpose in several countries. Moreover, in building and participating in regionally based trade-law alliances and partnerships, the Regional Centre had stepped up its efforts to promote UNCITRAL texts in the context of regional economic integration and cooperation. Such efforts were increasingly focusing on three core areas, namely, integrated trade law reforms, sustainable development goals and aid for trade.

3. He drew the Commission's attention to the academic partnership between the Regional Centre and the Asia-Pacific Law Institute of the Seoul National University for the establishment of a transparency observatory to

monitor Asia-Pacific treaty-based investor-State dispute settlements. Growing regional awareness of the Regional Centre's work was reflected in the success of its internship programme and in the increased number of applications for job openings. There was a strong commitment in the region to trade law reform and, while much of the momentum was occurring under the auspices of the World Trade Organization, a growing number of legal reforms related to the fields of arbitration, contract law, e-commerce, secure transactions and insolvency; States were becoming increasingly aware how they could benefit from the Regional Centre's expertise and capacity-building programmes. In 2012, 15 out of 56 States in the region had introduced legislation based on the UNCITRAL Model Law on International Commercial Arbitration; the number now stood at 20 States and the enactment of additional laws was expected in the current year. Furthermore, following the recent promulgation of the new arbitration law in the Republic of Korea, the region accounted for 40 per cent of all States and 56 per cent of all jurisdictions to have adopted the Model Law. As for the Model Law on International Commercial Conciliation, the region's first recognized enactments had been seen in Bhutan and Malaysia, while the number of States parties to the Convention on the Recognition and Enforcement of Foreign Arbitral Awards had risen by four since 2012, more than doubling the rate of ratification in the previous five years.

4. Later in the year, the Regional Centre's five-year pilot project would be ending; should the Commission so approve, the Centre would pursue fund-raising activities based on its ten-year plan. It would then engage with stakeholders in the Asia-Pacific region in order to evaluate its achievements and lessons learned during that initial period. He urged States to make voluntary contributions towards its future operations. Following the signing in 2011 of the Memorandum of Understanding between the United Nations and the Ministry of Justice and Incheon Metropolitan City of the Republic of Korea, the Secretariat had received an offer from the Republic of Korea to extend its financial contribution for the operation of the Regional Centre, while the Incheon Metropolitan City had offered an annual contribution of $450,000 to the Trust Fund for UNCITRAL Symposia for a further five years. A Memorandum of Understanding had also been concluded between the UNCITRAL secretariat and the Government of the Hong Kong Special Administrative Region of China for the loan of a legal expert to the Regional Centre. Moreover, since the opening of the Regional Centre, the latter's work had been well received and supported by States in the region, as reflected in their increasing requests for technical assistance and capacity-building services. Its ability to meet those requests would depend largely on the contributions of States.

5. **Mr. Choi** Taeeun (Republic of Korea) said that his country had greatly benefited from the UNCITRAL regional presence and support, particularly for developing its arbitration system on the basis of the Model Law on International Commercial Arbitration. Over the past five years, his Government had contributed $2.5 million to the Regional Centre, apart from the provision of premises and other facilities. It was disappointing that the Republic of Korea was still the sole contributor to the project. Its annual contribution of $500,000 had been intended as seed money and not as the only means of financing the Centre's operation. His delegation called on other States in the Asia-Pacific region to actively support and participate in UNCITRAL activities and to contribute financially to the project. His country's Ministry of Justice and Incheon Metropolitan City had decided to extend their financial contribution to the project for a further five years, with, however, a 10 per cent reduction due to the current financial situation. The Republic of Korea remained committed to the Regional Centre and hoped that the seed money it had provided would soon grow into the plant it had wished to nurture five years earlier.

6. **Mr. Chirapant** (Thailand) said that, since its opening in 2012, the Regional Centre had played a significant role in providing Member States with technical assistance for the adoption and promotion of UNCITRAL texts. In the past year, Thailand had cooperated closely with the Centre, in particular by hosting workshops on arbitration, e-commerce and cross-border insolvency. The Foreign Ministry and Ministry of Justice of Thailand were currently working with the Regional Centre to organize a conference in Bangkok under the joint auspices of UNCITRAL and the Association of Southeast Asian Nations (ASEAN). His Government remained committed to supporting the harmonization of international trade law among ASEAN member States, since it would greatly contribute to the promotion of trade and investment in the South-east Asia region.

7. **Ms. Damayanti** (Indonesia) noted with appreciation the efforts of countries and jurisdictions to facilitate and host the activities of the Regional Centre. The Commission should continue to support the Centre's capacity-building and technical assistance services in order to promote and enhance international trade law reform and provide the specific assistance required by individual countries.

8. **Mr. Mita** (Japan) expressed his Government's continuing support for the work of the Regional Centre and its appreciation of the efforts of the Government of the Republic of Korea to facilitate the Centre's work.

9. **Mr. Chan** (Singapore) said that his delegation, too, appreciated the work of the Regional Centre, which had exceeded the initial expectations of the countries in the region, in particular by allowing them to benefit from its expertise in developing their trade laws in line with international norms. The Regional Centre had given significant support to the promotion of development of trade law in Singapore, notably in matters of international commercial arbitration. The many events organized by the Centre in the Republic of Korea were greatly appreciated by his Government, especially the annual spring conference, which had become a regular feature of the international trade law calendar in the region. Singapore looked forward to continuing collaboration with the Regional Centre.

10. **Mr. Kang** Yingjie (China) said that his country, too, at UNOV supported the activities of the Regional Centre and had posted one of its experts to work with it for one year. The Chinese Ministry of Commerce had sent officials to the United Nations Office at Vienna (UNOV) at in order to clarify the future forms of its collaboration with the Commission.

11. **Mr. Kim** (United States of America) said that the Commission's provision of technical assistance and its promotion of trade law reform through its Regional Centre were strongly supported by the United States, which recognized the important role played by the Republic of Korea in the Centre's work. His delegation encouraged the Secretariat to expand such efforts through the establishment of further regional centres in other locations.

12. **Mr. Sorieul** (Secretary of the Commission) said that the Commission might wish to renew its appeal to countries in other regions to continue to explore the possibility of setting up similar UNCITRAL regional centres, bearing in mind that additional resources would be required for that purpose, not only in the regions concerned but also in the International Trade Law Division at UNOV. He reminded delegations in that connection that a note verbale had been circulated, requesting them to rate and make suggestions regarding the Secretariat's support for the Commission's work.

Agenda item 11: Promotion of ways and means of ensuring uniform interpretation and application of UNCITRAL legal texts (A/CN.9/873)

(a) Case Law on UNCITRAL texts (CLOUT)

(b) Digests of case law relating to UNCITRAL legal texts

13. **Mr. Lemay** (Secretariat), introducing the note by the Secretariat on the agenda item (A/CN.9/873), said that the note reported on the performance of the CLOUT system since the last note by the Secretariat in 2015. In the intervening period, 97 new abstracts on the various UNCITRAL texts had been published in 166 issues, bringing the total number of abstracts available in the system, established in 1988, to 1,551. The database also contained information, including the full text of decisions, on a limited number of cases for which abstracts had yet to be prepared; such information would henceforth be regularly available to users prior to the publication of abstracts. All UNCITRAL texts were covered, but CLOUT was especially focused on the United Nations Convention on Contracts for the International Sale of Goods (CISG) and the UNCITRAL Model Law on International Commercial Arbitration (MAL). In addition, the case law from the Western European countries continued to predominate, despite efforts to increase information from underrepresented regions.

14. Following the launch of the upgraded CLOUT database in 2015, there had been more than 30,000 users and, as CLOUT now contained full-text decisions, the Secretariat had begun to make those texts accessible to general users, compensating for the scant resources available by resorting to the services of the United Nations Volunteers programme.

15. With regard to the Digests, the revised CISG Digest had been formatted and was to be published in the six official United Nations languages as an e-book; the Digest on the Model Law on Cross-Border Insolvency was in the process of being finalized.

16. He drew the Commission's attention to the information contained in the Secretariat's note regarding the network of national correspondents, stressing that, following the expiry of the mandate of the current members of the network in 2017, the Secretariat would officially request UNCITRAL member and observer States to appoint and/or reappoint their national correspondents.

17. The note, like previous similar documents, provided a brief but informative commentary on the performance of the UNCITRAL-supported website on the New York Convention, launched in 2012 with the aim of making information gathered in the preparation of the related Guide publicly available.

18. The Secretariat wished once again to draw the Commission's attention to the issue of the scant resources available for CLOUT; with increased support. it should be possible to expand services and publish a greater volume of abstracts. The Commission might wish therefore to reiterate its appeal to Member States to actively support the Secretariat's search for appropriate funding sources at the national level so as to ensure the continued and enhanced performance of the CLOUT system.

19. Replying to the Chair, he explained that CLOUT was a system whereby cases were collected and summaries or abstracts of those cases were made available in a database under each of the UNCITRAL legal texts. The Digests, on the other hand, were essentially analytical compilations of cases that discussed the main points arising therefrom on a thematic basis.

20. **Ms. Sabo** (Canada), noting that CLOUT and the Digests were an important means of promoting uniformity of application of the legal instruments covered, commended the Secretariat for its efforts and ingenuity in finding ways within existing resources, including through the use of volunteers, to make information available. Her delegation encouraged it to continue to develop those tools.

21. **Ms. Escobar Pacas** (El Salvador) wondered about how the information on the Model Law on Electronic Signatures had been collected. Her country had used it as a basis for a law that it had recently enacted, but El Salvador was not listed among the countries that had adopted the Model Law. El Salvador was one of the countries with a national correspondent and, while not participating actively in meetings of the network, it nevertheless followed them closely. Her delegation considered it important to maintain that link with the CLOUT system and looked forward to having its national correspondent reconfirmed.

22. **Mr. Sorieul** (Secretary of the Commission) said that the question of a State's inclusion in the list of those applying particular UNCITRAL instruments would be addressed under agenda item 12. With regard to the network of national correspondents, he recalled that, following the decision to establish the CLOUT database and to publish the related abstracts, the network had been put in place as a means of assisting in that undertaking. As the Secretariat had subsequently found that not all the desired information regarding a country's case law could be obtained solely through the network, States had been informed that they were free to appoint several national correspondents and, in particular, to make each one responsible for a particular UNCITRAL text. In addition to the network, the Secretariat had for several years been stressing the importance of

seeking other partnerships, notably with bar associations and academic bodies in a position to collect relevant case law in each country. The network had thus been supplemented by other information sources and the Secretariat continued to welcome all useful contributions from whatever quarter. The Commission might therefore wish to renew its appeal to States to pursue all possible avenues, including but not limited to national correspondents, to provide the fullest possible information on their case law.

23. **Mr. Plakhov** (Russian Federation) asked if there was any UNCITRAL document that clearly explained how the Secretariat understood the concept of case law. For civil law States such as his own, questions might arise. The main concern was whether case law was considered to be universally binding.

24. **Mr. Sorieul** (Secretary of the Commission) said that none of the Commission's documents contained a definition of case law, or "jurisprudence", as it was known in French. However, the concept itself did not imply any position as to whether or not a precedent was binding. While precedent did not have the same weight in all countries, that was not an important consideration in relation to the UNCITRAL texts. The main text covered by the CLOUT system, for which indeed it had first been put in place, was the 1980 United Nations Convention on Contracts for the International Sale of Goods. CLOUT did not require that a precedent should be regarded as binding; it sought merely to meet the obligation set out in article 7 of the relevant Convention that it should be interpreted with regard to its international character and therefore in the light of related judicial decisions handed down in foreign countries. The same reasoning applied to all the legal texts covered by CLOUT and the Digests, notably the Model Law on International Commercial Arbitration and the Model Law on Cross-Border Insolvency. CLOUT had been designed to bring together in one place, in all official languages of the United Nations, relevant decisions taken in different countries, in a form that was readily accessible to all. What judges in any particular country did with that information — whether they used it as a precedent or were simply guided by it — would depend on the national legal system; that was in no way related to the international instrument itself, which remained neutral in that regard.

25. **Mr. Schoefisch** (Germany), responding to a question put by the delegation of the Russian Federation, said that, in order to avoid any confusion, it might be better in future to refer not to "Digests of case law", as in the heading of sub-item 12 (b), but rather to "Digests of cases", as in the commentary on that sub-item in the annotated provisional agenda (document A/CN.9/859), which spoke of an "analytical digest of court and arbitration cases".

Agenda item 12: Status and promotion of UNCITRAL legal texts (A/CN.9/876)

26. **Mr. Lemay** (Secretariat), introducing the note by the Secretariat on the status of conventions and model laws (A/CN.9/876), said that information was provided in the note concerning signatures or ratifications of UNCITRAL conventions or the enactment of legislation on the basis of UNCITRAL model laws in the period since the last note on the subject (A/CN.9/843). The same information was also available and regularly updated on the UNCITRAL website.

27. Since the preparation of the note, the Netherlands had signed the United Nations Convention on Transparency in Treaty-based Investment-State Arbitration; the Republic of Korea had enacted a law based on the UNCITRAL Model Law on International Commercial Arbitration, with amendments as adopted in 2006; and Malaysia had enacted a law based on the UNCITRAL Model Law on International Commercial Conciliation.

28. As requested by the Commission, the status note continued to include a section intended to provide a fuller, albeit still limited, picture of the impact of other selected UNCITRAL texts, namely, the Arbitration Rules and the Rules on Transparency in Treaty-based Investor-State Arbitration. He reminded the Commission that the note was at best but one indicator of the total impact of the various UNCITRAL texts. Another useful indicator was the bibliography of recent writings related to the work of UNCITRAL (A/CN.9/874), which reflected potential academic interest in UNCITRAL texts. Recognizing the importance of that bibliography and wishing to make it as comprehensive as possible, the Commission at its last session had requested NGOs attending its sessions and those of its Working Groups to donate copies of their journals, reports and other publications to the UNCITRAL law library. The Commission might wish to express its appreciation of the many donations it had subsequently received, in particular of high-cost academic and professional journals, and might also wish to reiterate its request for such donations, which were particularly welcome in view of the limited budget available for such acquisitions. They allowed the Secretariat and the Commission to keep abreast of the activities of the NGOs concerned and also helped to build up the UNCITRAL law library.

29. **Mr. Chirapant** (Thailand) said that, as an active member of UNCITRAL for nearly 30 years, Thailand had benefited from the sharing of best practices with other countries, thereby demonstrating its commitment to the promotion of the harmonization and unification of international trade law. His country's recently adopted Secured Transactions Act (2015), which had just entered into force, had been based on the UNCITRAL draft Model Law on Secured Transactions; a ministerial declaration was currently being drafted on registry systems, limited initially to domestic registration, but subsequently to be expanded; the UNCITRAL Model Law on Cross-border Insolvency was being used as a reference in revising the Bankruptcy Act; and Thailand was currently considering legislation to enable it to become a party to the United Nations on Contracts for the International Sale of Goods. His delegation would continue to give its full support to UNCITRAL, which remained an important tool for countries to bring their legislation into line with international norms.

30. **Mr. Apter** (Israel) said that Israel was currently reforming its insolvency legislation in the light of the UNCITRAL Model Law on Cross-border Insolvency and would inform the Secretariat once the process had been completed.

31. **Mr. Sorieul** (Secretary of the Commission) thanked the delegations of El Salvador, Thailand and Israel for the information on legislative developments in their respective countries; it would be duly reflected in the next issue of the status note. Reverting to the question raised by the delegation of El Salvador as to why the annual status note did not always include such information, he said that, while it was easy to keep track of States' participation in UNCITRAL conventions, it was more difficult for the Secretariat to decide whether a particular legislative development implemented a UNCITRAL model law. It had sought to develop objective criteria for the purpose but was not always sufficiently informed. The Secretariat depended on States to let it know when a new law was being prepared or an existing law being revised on the basis of a UNCITRAL text. The status note was compiled annually from information available, which was not always complete. The Commission might wish to draw the attention of States to the matter and invite them not only to inform the Secretariat of the enactment of relevant laws but also to say why they considered the new law to be an implementation of an UNCITRAL text.

32. **Mr. Maradiaga** (Honduras) said that the UNCITRAL legal instruments had been very helpful to his country, which had adopted a number of laws based on UNCITRAL texts, including the Model Law on Public Procurement, the Model Law on Electronic Commerce, the Model Law on International Commercial Arbitration and the Model Law on International Commercial Conciliation.

Agenda item 13: Coordination and cooperation

(a) General (A/C.9/875)

33. **Mr. Lemay** (Secretariat), introducing the note by the Secretariat on coordination activities (A/CN.9/875), said that the note provided information on the activities of international organizations relating to international trade law in which the Secretariat had participated over the previous year. The purpose of such participation was to share information and expertise with those organizations and avoid duplication of work and the resultant work products. The Secretariat usually contributed to the work of those organizations by commenting on documents drafted by them, and by presenting the work of UNCITRAL or providing an UNCITRAL perspective at their meetings and conferences.

34. In the period under review, coordination activities had included ongoing cooperation with the International Institute for the Unification of Private Law (Unidroit) and the Hague Conference on Private International Law. The Secretariat had also been increasingly involved in the initiatives of other organizations, both within and outside the United Nations system: that was a trend in recent years that was consistent with the increase in its technical assistance activities and was expected to continue and even grow in future.

35. **Mr. Lee** Jae Sung (Secretariat) said that since the submission of document A/CN.9/875, the Commission had participated in the May 2016 conference of the International Council for Commercial Arbitration. It had taken the opportunity to ensure coordination with arbitration institutions in the African continent and would be taking steps to enhance such coordination in the future.

(b) Reports of other international organizations

36. **Mr. Faria** (Observer for the International Institute for the Unification of Private Law (Unidroit)) said that in the past year Unidroit had completed the Legal Guide on Contract Farming, prepared in cooperation with the Food and Agriculture Organization of the United Nations (FAO) and the International Fund for Agricultural Development (IFAD). Published in English and French, with a Spanish edition forthcoming, it had already attracted considerable interest and been cited as a source of inspiration for recent legislation on the topic, such as the rules for business venture agreements adopted by the Department for Agrarian Reform of the Philippines.

37. The Unidroit Convention on International Interests in Mobile Equipment has attracted several new accessions, bringing the total number of States parties to 71, while the Aircraft Protocol thereto currently counted 64 States parties. The Rail Protocol had been approved by the European Union and was thus well on the way to being ratified. Progress had also been made on the Space Protocol, for which a preparatory commission had been established; regulations for the international registry had already been approved. Productive study group meetings had been devoted to the future fourth Protocol on matters specific to agricultural, mining and construction equipment, with the valuable cooperation of UNCITRAL. The Governing Council had considered the project to be sufficiently developed to warrant the convening of a committee of governmental experts in early 2017, to which non-member States of Unidroit would be invited as observers.

38. The Governing Council had also approved amendments and additions to the black-letter rules and comments of the current edition of the Unidroit Principles of International Commercial Contracts, which would in future be known as the 2016 Principles. Progress had likewise been made in the development of model Rules on Transnational Civil Procedure adapted to the European context, in cooperation with the European Law Institute, and in the drafting of a proposed legislative guide on principles and rules capable of enhancing trading in securities in emerging markets, which had attracted considerable attention from European Union organs and member States.

39. Other important projects including the preparation in cooperation with the Hague Conference on Private International Law of a guidance document on existing texts in the area of international sales and a project on land investment contracts, to be carried out in cooperation with the Rome-based organizations.

40. Nor could he fail to mention that a succession of important events and conferences had been held in the past year to celebrate the 90th anniversary of Unidroit as an institute of the League of Nations and that many United Nations system bodies had been represented at a high level on those occasions. Unidroit took special care to avoid any overlaps or conflicts in its work with that of other organizations, in particular UNCITRAL, whose continued participation in its activities was as always highly appreciated.

41. **Ms. Pertegás Sender** (Observer for the Hague Conference on Private International Law), noting that some of the most important projects of the Hague Conference had already been referred to under other agenda items, said that her organization provided additional support for the Commission's work in a number of specific ways. Its particular focus was on questions of conflicts of laws, applicable law and the recognition and enforcement of decisions as they sometimes arose in the context of much broader UNCITRAL projects. The Hague Conference sought to the best of its ability and within the limited resources available to engage in a constant dialogue with the Secretariat, as illustrated in particular by the joint proposal on cooperation between the secretariats of UNCITRAL, the Hague Conference and Unidroit in the publication of an explanatory text in the area of international commercial contract law (document A/CN.9/892), to be considered under agenda item 16.

42. The work of the Hague Conference, like that of UNCITRAL and Unidroit, was conducted on two fronts: it developed new instruments, in consultation with the secretariats of those other two organizations, and it conducted surveys downstream, particularly through its regional offices. She noted in particular the very successful cooperation between the Asia and Pacific offices of the Hague Conference and UNCITRAL and looked forward to the inclusion of relevant work of the Commission in the activities of the organization's regional office in Latin America.

(c) International governmental and non-governmental organizations invited to sessions of UNCITRAL and its Working Groups

43. **Ms. Musayeva** (Secretariat) recalled that, in paragraph 9 of the summary of conclusions on UNCITRAL rules of procedure and methods of work, adopted by the Commission in 2010, the Commission had decided to draw up and update as necessary a list of international organizations and non-governmental organizations with which UNCITRAL had long-standing cooperation and which had been invited to sessions of the Commission and its working groups. At its last session, the Commission had requested the Secretariat, when presenting its oral report at future sessions of the Commission on the topic of organizations invited to UNCITRAL, to provide comments on the manner in which invited organizations fulfilled the criteria applied by the Secretariat in making its decision to invite non-governmental organizations.

44. Since the Commission's forty-eighth session, the Caribbean Court of Justice had been added upon its request to the list of invited intergovernmental organizations. One non-governmental organization, the Commonwealth Association of Law Reform Agencies, had been removed upon its request from the list of invited organizations. There had been 12 requests for observer status, of which six had been accepted, five had been rejected and one remained pending. The pending request was from the Chamber of Commerce and Industry of the Republic of Abkhazia, which had been requested by the Secretariat to submit documents proving its international membership and activities, its relevance to the work of UNCITRAL and its ability to make a meaningful contribution to the Commission's deliberations.

45. The six accepted requests were from: the European Commerce Registers' Forum (Working Group I); the Florence International Mediation Chamber (Working Group II), restricted to sessions on arbitration matters; Arbitral Women (Working Group II); the International Academy of Mediators (Working Group II); the International Arbitration Court of the Belarusian Chamber of Commerce and Industry (Working Groups II and V); and the GSM Association (Working Group IV). All those organizations had been found by the Secretariat to fulfil the agreed criteria, namely: they were international in focus and membership; they could be expected to contribute meaningfully to the respective Working Groups' sessions; legal or commercial experience on which they would be reporting was not yet represented by other organizations participating in those sessions; a more balanced representation of major viewpoints or interests in the relevant yield from all areas and regions of the world would thereby be achieved.

46. The five requests for observer status that had been rejected were from: the Association pour le Développement de la Pratique de l'Arbitrage en République Démocratique du Congo (Working Group II), being considered to be not international in focus and membership; the Centre pour l'Environnement et le Développement (Working Group I), being considered to be not relevant to the work of UNCITRAL; the Hong Kong Federation of eCommerce (Working Group IV), being considered to be not international in focus and to have no particular interest in UNCITRAL texts; the Dispute Resolution Foundation (Working Group II), being considered to be not international in membership and to offer no added value to the Working Group; and Xalgorithms Foundation (Working Group IV), being considered to have no established reputation, experience or expertise or to have a demonstrated international focus and membership.

47. Invitations to States and organizations to attend sessions of UNCITRAL and its Working Groups would, in accordance with paragraph 7 of General Assembly resolution 70/115, contain a reminder of the rules of procedure and methods of work of the Commission by way of a reference to a dedicated webpage on the UNCITRAL website.

48. **Ms. Sabo** (Canada) said that the detailed information just provided by the Secretariat was precisely what had been requested by the Commission and adequately conveyed the reasons for the acceptance or rejection of the requests for observer status.

The meeting was suspended at 5.10 p.m. and resumed at 5.45 p.m.

Agenda item 16: Work programme of the Commission (A/CN.9/878, 889 and 892; A/CN.9/XLIX/CRP.1Add.5, Add.7 and Add.8)

49. **Mr. Sorieul** (Secretary of the Commission), introducing the agenda item, drew the Commission's attention to the note by the Secretariat on the joint proposal

on cooperation in the area of international commercial contract law (with a focus on sales) (A/CN.9/892), the note by the Secretariat on the work programme of the Commission (A/CN.9/878), and the note by the Secretariat on possible future work in procurement and infrastructure development (A/CN.9/889).

50. **Mr. Lemay** (Secretariat), introducing the note on possible future work in procurement and infrastructure development (A/CN.9/889), said that the Commission had discussed the topics of suspension and debarment at previous sessions and had agreed on their importance in supporting the effective implementation of a public procurement law and in fighting corruption. Over the past year, the Secretariat had been monitoring related developments and had found that there remained several areas where policy differences were such that it did not yet seem feasible to develop a harmonized text. The differences related to the issue of discretionary as opposed to mandatory debarment, cross-border and inter-system recognition of sanctions and procedural matters such as standards of proof. However, harmonization in definitions of sanctionable conduct and other areas revealed an emerging consensus on desirable policy goals. Continued monitoring was therefore recommended, but legislative activity by the Commission was perhaps still premature.

51. On the question of public-private partnerships (PPPs), the Secretariat had found that three areas might usefully be brought to the Commission's attention. First was the question of the harmonization of the UNCITRAL Model Law on Public Procurement with procurement-related aspects of UNCITRAL texts on Privately Financed Infrastructure Projects (PFIPs). It would be important to allow PPPs to benefit from modern procurement techniques, encourage good capacity development in government and reduce transaction costs for suppliers. The Secretariat felt that it was capable of undertaking such work, which was expected to be straightforward and could be completed for the Commission's 2017 session.

52. A second area where work was required concerned the development of standard contractual provisions. The World Bank, in particular, had surveyed standard clauses such as force majeure, termination and step-in rights, and had found limited variation. In view of the possibility that some developing countries were disadvantaged by onerous terms, it would seem appropriate for the Commission to support Section IV.A of the PFIPs Legislative Guide so that it could be updated by reference to current practice. A harmonized solution was now feasible. The objective was not to regulate the commercial terms of PPPs: freedom of contract and party autonomy must be respected. It was important to ensure that standard clauses reflected all legal traditions. Standard clauses did, however, skew the commercial balance of the contract towards bankers at the expense of developing countries. That was perhaps one of the reasons why work on the topic had not been undertaken in the 1980s. Again, the work envisaged would be limited in scope and would not duplicate capacity-building efforts in, for example, the Economic Commission for Europe. It was recommended that the Secretariat should develop a formal proposal for the Commission to consider in 2017.

53. The third area of interest was the sensitive one of dispute resolution, where the proposal was to update the PFIPs Legislative Guide. There seemed to be an emerging consensus on how to address that issue, notably with regard to the prevention of disputes and the use of informal resolution mechanisms such as dispute boards. Again, the recommendation would be to develop a formal proposal for consideration in 2017.

The meeting rose at 6 p.m.

Summary record of the 1046th meeting, held at Headquarters, New York, on Friday, 15 July 2016, at 10 a.m.

[A/CN.9/SR.1046]

Chairperson: Mr. Kenfack Douajni (Cameroon)

Contents

The meeting was called to order at 10.15 a.m.

Adoption of the report of the Commission (*continued*) (A/CN.9/XLIX/CRP.1, A/CN.9/XLIX/CRP.1/Add.8, A/CN.9/XLIX/CRP.1/Add.9, A/CN.9/XLIX/CRP.1/Add.10, A/CN.9/XLIX/CRP.1/Add.11, A/CN.9/XLIX/CRP.1/Add.12, A/CN.9/XLIX/CRP.1/Add.13, A/CN.9/XLIX/CRP.1/Add.14, A/CN.9/XLIX/CRP.1/Add.15, A/CN.9/XLIX/CRP.1/Add.16, A/CN.9/XLIX/CRP.1/Add.17, A/CN.9/XLIX/CRP.1/Add.18, A/CN.9/XLIX/CRP.1/Add.19, A/CN.9/XLIX/CRP.1 /Add.20, A/CN.9/XLIX/CRP.1/Add.21, A/CN.9/XLIX/ CRP.1/Add.22 and A/CN.9/XLIX/CRP.1/Add.23)

A/CN.9/XLIX/CRP.1/Add.8

1. **Mr. Bellenger** (France) proposed that the word "However" should be removed from paragraph 7, to avoid giving the impression that the Commission had reached the conclusion that the view expressed in that sentence should prevail over the view expressed in the preceding sentence.

2. **Mr. Schoefisch** (Germany) said that his delegation was in favour of the proposed amendment.

3. **Mr. Chan** (Singapore), Rapporteur, suggested that the Commission should decide whether or not to retain the sentence in square brackets in paragraph 1.

4. **Mr. Sorieul** (Secretary of the Commission) said that the square brackets were in paragraph 1 because the document had been drafted before the discussion referred to in the sentence had taken place. He suggested that the square brackets should be removed and the sentence retained, as the sentence was an accurate account of the discussion.

5. **Mr. Schoefisch** (Germany) said that his delegation supported the deletion of the square brackets.

6. **The Chair** said that he took it that the Commission wished to delete the square brackets in paragraph 1 and the word "However" in paragraph 7.

7. *It was so decided.*

8. **Ms. Fernández** (Bolivarian Republic of Venezuela) proposed inserting the word "other" before the word "stakeholders" in paragraph 18.

9. **Mr. Schnabel** (United States of America) proposed that a new sentence should be inserted between the two existing sentences in paragraph 19, to read: "It was also stated that UNCITRAL should not do further work on investor-State arbitration, as this topic is already being adequately addressed elsewhere.".

10. **Ms. Sabo** (Canada) said that her delegations supported the amendment proposed by the representative of the United States.

11. **Mr. Schoefisch** (Germany) said that the proposal by the United States accurately reflected the discussion and should therefore be included in the report.

12. **Mr. Fornell** (Ecuador) proposed that the new sentence should begin "Other delegations stated" rather than "It was stated", to make it clear that there not all delegations had taken that view.

13. **Mr. Meier** (Switzerland) suggested that the sentence could begin with the words "Some delegations stated".

14. **Mr. Sorieul** (Secretary of the Commission) suggested that the Commission should use "Some delegations" because "Other delegations" could give the impression that the delegations in question did not agree with the view expressed in the first sentence of the paragraph.

15. **Ms. Sabo** (Canada) said that the view that the delegation of Ecuador wished to see reflected in the report was already covered in paragraph 17.

16. **Ms. Escobar Pacas** (El Salvador) said that the proposed new sentence should begin with the words "Some delegations".

17. **The Chair** said that he took it that the Commission wished to add between the two sentences of paragraph 19 a new sentence, to read: "Some delegations stated that UNCITRAL should not do further work on investor-State arbitration, as this topic is already being adequately addressed elsewhere.".

18. *It was so decided.*

19. **Mr. Chan** (Singapore) said that his delegation wished to see a new paragraph added as paragraph 21 bis, to read: "It was observed that this conclusion may encourage other organizations to also request UNCITRAL's collaboration in their initiatives. The Secretariat should bear this in mind and work out what the proper responses to such requests should be.".

20. **Mr. Fornell** (Ecuador) said that his delegation supported the proposal made by the representative of Singapore in principle but suggested that the words "The Secretariat" should be replaced by the words "The Commission and the Secretariat".

21. **Mr. Sorieul** (Secretary of the Commission) said that it went without saying that the Commission and the Secretariat must decide how to respond to any requests that

were made. If the intention of the proposal made by the representative of Singapore was to ask the Secretariat to follow up on such requests during the inter-sessional period, he suggested that the Commission might wish to add a paragraph along the proposed lines but to use the phrase "and report to the Commission accordingly" instead of "work out what the proper responses to such requests should be".

22. **Mr. Chan** (Singapore) withdrew his delegation's proposal to add a paragraph 21 bis, as the point his delegation had wished to have included in the report was contained in paragraph 25.

23. **Mr. Schnabel** (United States of America) proposed that the words "at its next session" in the first sentence of paragraph 22 should be replaced by the words "after conclusion of the work on conciliation" to ensure that it was clear that priority should be given to the current work on the enforcement of settlement agreements resulting from conciliation.

24. **Mr. Sorieul** (Secretary of the Commission) said that the existing wording was an accurate reflection of the views expressed during the session. Furthermore, the wording of the United States proposal was problematic, as it would permit the Commission to avoid considering the topics in question at its next session by prolonging the work on conciliation.

25. **Ms. Sabo** (Canada) said that the proposal made by the representative of the United States seemed to be based on a misreading of the text. The intention of the proposal seemed to be to ensure that Working Group II would complete the work on conciliation before taking up any other matters, but the session referred to in paragraph 22 was the next session of the Commission, not the next session of the Working Group.

26. **Mr. Sorieul** (Secretary of the Commission) said that the next Working Group session would take place in September 2016 and would focus on conciliation.

27. **Mr. Schoefisch** (Germany) said paragraph 22 was clearly referring to the next session of the Commission. He proposed that a phrase along the lines of "with a view to deciding on further work" should be inserted at the end of the first sentence of the paragraph to make it clear that no decision had been taken yet on which of the three possible topics for future work would be selected.

28. **Mr. Sorieul** (Secretary of the Commission) said that the proposal made by the representative of Germany was covered in paragraph 21.

29. **Mr. Fornell** (Ecuador) said that paragraph 22 gave the impression that Working Group II could not begin work on investor-State arbitration until the work on conciliation had been completed. He proposed that the paragraph should be amended to make it clear that the Commission had not taken a definitive decision in that regard.

30. **Mr. Schoefisch** (Germany) said that the change suggested by the representative of Ecuador would not accurately reflect the discussions, as the Commission had decided that the Working Group II should complete its current work before the Commission took a decision on next topic for its consideration.

31. **Mr. Sorieul** (Secretary of the Commission) said that paragraphs 21 and 22 accurately reflected the compromise that had been negotiated by delegations, which was that the matter would be discussed at the Commission's session in 2017.

32. *Document A/CN.9/XLIX/CRP.1/Add.8, as orally revised, was adopted.*

A/CN.9/XLIX/CRP.1/Add.9

33. **Mr. Schoefisch** (Germany), supported by **Mr. Schnabel** (United States of America), proposed that the phrase "the Congress would seek to identify new areas" in paragraph 3 should be replaced by "There were proposals that the Congress could seek to identify new areas", or words to that effect, given that a final decision had not been taken. He also proposed that the reference in paragraph 6 to "the usual channels" should be replaced by a statement explicitly indicating that States should receive a note verbale.

34. **Mr. Sorieul** (Secretary of the Commission) suggested that proposed amendment to paragraph 3 should be reworded to make it clear that the proposals in question had not been made during the session of the Commission.

35. **Mr. Schoefisch** (Germany) proposed beginning the amendment to paragraph 3 with a phrase such as "During the call for papers, proposals had been made…".

36. **The Chair** said that he took it that the Commission agreed to the German proposals for amending paragraphs 3 and 6.

37. *It was so decided.*

38. *Document A/CN.9/XLIX/CRP.1/Add.9, as amended, was adopted.*

39. **Mr. Plakhov** (Russian Federation) said that his delegation had not received document A/CN.9/XLIX/CRP.1/Add.9 and therefore wished to reserve the right to comment on it at a later stage.

A/CN.9/XLIX/CRP.1/Add.10

40. **Mr. Schnabel** (United States of America) said that there appeared to be a mistake in footnote 4 in paragraph 5, as document A/CN.9/WG.I/WP.87 did not mention any agreement reached by Working Group I. If the sentence was referring to paragraph 20 of the report of the Working Group on the work of its twenty-fourth session (A/CN.9/831), the reference in the footnote should be corrected and, in line with the language used in the Working Group's report, the wording of the draft report of the Commission should state that the Working Group had tentatively agreed to include a discussion of such options in its further work.

41. **Mr. Sorieul** (Secretary of the Commission) said that the reference to document A/CN.9/WG.I/WP.87 was an error and should therefore be corrected.

42. **Ms. Sabo** (Canada) said that all of the footnotes in the draft report that did not refer General Assembly documents should be deleted, in line with established practice.

43. **Mr. Chan** (Singapore) said that his delegation did not recall anyone saying during the discussions that "…the

Working Group should take care to ensure that its work had a broader impact and would assist enterprises of all sizes", as stated in paragraph 5. If that sentence was intended to reflect the comments made by his delegation, he suggested that it should be reworded to read: "the issues addressed by the Working Group were of a general nature and not specific to MSMEs. Consideration thus can be given to whether the description of this working group as the Working Group on MSMEs reflects correctly the nature of its work.".

44. **Mr. Schoefisch** (Germany) said that some of the footnotes in the draft report must be deleted while others, such as footnote 2, provided references to texts that had been mentioned during the discussions and should therefore be retained.

45. **Mr. Sorieul** (Secretary of the Commission) said that the Commission might wish to delete footnotes 3 and 4 from paragraph 5. The last sentence of that paragraph accurately reflected the discussions during the session, but the text following the words "the Working Group had agreed" could be slightly amended to ensure that it was consistent with the report of the Working Group.

46. **Mr. Schoefisch** (Germany) said that his delegation had no objection to the proposal made by the representative of Singapore; it agreed that footnotes 3 and 4 should be deleted and that the Secretariat should bring the last sentence of paragraph 5 in line with the report of the Working Group.

47. **The Chair** said that he took it that the Commission wished to delete footnotes 3 and 4, amend the first sentence of paragraphs 5 as proposed by the representative of Singapore and request the Secretariat to amend the last sentence of paragraph 5 to ensure that it was consistent with the report of Working Group I.

48. *It was so decided.*

49. *Document A/CN.9/XLIX/CRP.1/Add.10, as amended and revised, was adopted.*

A/CN.9/XLIX/CRP.1/Add.11 and A/CN.9/XLIX/CRP.1/Add.13

50. *Documents A/CN.9/XLIX/CRP.1/Add.11 and A/CN.9/ XLIX/CRP.1/Add.13 were adopted.*

A/CN.9/XLIX/CRP.1/Add.14 and A/CN.9/XLIX/CRP.1/Add.17

51. *Documents A/CN.9/XLIX/CRP.1/Add.14 and A/CN.9/XLIX/CRP.1/Add.17 were adopted.*

The meeting was suspended at 11.30 a.m. and resumed at 12.15 p.m.

A/CN.9/XLIX/CRP.1/Add.12, A/CN.9/XLIX/CRP.1/ Add.15 and A/CN.9/XLIX/CRP.1/Add.16

52. *Documents A/CN.9/XLIX/CRP.1/Add.12, A/CN.9/ XLIX/CRP.1/Add.15 and A/CN.9/XLIX/CRP.1/Add.16 were adopted.*

A/CN.9/XLIX/CRP.1/Add.18

53. **Mr. Schoefisch** (Germany) said that, in the interests of clarity, the beginning of the paragraph 8 should be amended to read: "The Commission also in its final debate about the work programme reaffirmed the decision…".

54. **The Chair** said he took it that the proposal with regard to paragraph 8 was acceptable to the Commission.

55. *It was so decided.*

56. **Ms. Clift** (Secretariat) said that, for the sake of completeness, an additional sentence should be added at the end of paragraph 12, to read: "In addition, the Commission recalled the mandate given to Working Group V on the insolvency of MSMEs." It should be accompanied by a cross reference to paragraph 6 of document A/CN.9/XLIX/CRP.1/Add.12.

57. **Mr. Chan** (Singapore) said that his delegation had referred to the need for a definition of what constituted an MSME. A sentence reflecting that position should be added.

58. **Ms. Clift** (Secretariat) said that it might be more appropriate to include the additional sentence at the end of paragraph 6 of document A/CN.9/XLIX/CRP.1/Add.12, rather than in the context of the work programme.

59. **Ms. Sabo** (Canada) said that she had concerns about including the proposed new sentence in paragraph 12. The report should not give the impression that the working group had been directed to provide such a definition because the working group had discussed the issue and had been unable to produce a definition owing to the difficulty of the task. She agreed with the Secretariat's suggestion.

60. **Mr. Bellenger** (France) said that he felt that the Commission had come to a firmer conclusion regarding the future work on public-private partnerships (PPPs). The third sentence in paragraph 20 could be amended to read that "With regard to PPPs, it was agreed that the Secretariat would update all or parts of the UNCITRAL Legislative Guide…".

61. **Ms. Sabo** (Canada) and **Mr. Meier** (Switzerland) said that they preferred the text as submitted by the Secretariat.

62. **Mr. Rangreji** (India) said that his delegation, along with many others, agreed with the delegation of France. The Secretariat had highlighted the fact that it had been requested to update the UNCITRAL Legislative Guide on Privately Financed Infrastructure Projects. The wording "consider the possibility" diluted the text; "update" would be a more appropriate word.

63. **Ms. Escobar Pacas** (El Salvador) said that "update" was preferable to "consider the possibility".

64. **Mr. Schnabel** (United States of America) said that his delegation agreed with Canada and Switzerland, in particular because, given that the Legislative Guide was an instrument approved by the Commission, it could not be updated by the Secretariat on its own. The Secretariat could do that work, but the Commission would later have to make the decision. Changing the wording to "the Secretariat should update" would be inconsistent with the discussion and would suggest

that the Secretariat could update a Commission document. The existing wording should therefore be retained.

65. **Mr. Meier** (Switzerland) said that the wording "update where necessary" was an option since it had been said that it would be necessary to consider whether there was a need to update or amend the document, but it had not been specifically stated that it would actually be necessary.

66. **Mr. Sorieul** (Secretary of the Commission) said that the current wording of the paragraph was possibly an excessively cautious compromise. The decision to give the Secretariat the responsibility for updating the Legislative Guide when necessary was in any event qualified and limited by the wording of the end of the paragraph, according to which the activities should be undertaken taking into account the resources available to the Secretariat. The Secretariat would also have to pursue its work on promoting the Model Law on Public Procurement and would have no resources to work on updating the Guide. That work would require external expertise. The mandate given to the Secretariat should perhaps be accompanied by the proviso that it was not being given the full update task, since the Commission was ultimately responsible for taking a decision. Consequently, the mandate should perhaps be expressed in terms of "consider updating, where necessary, the UNCITRAL Legislative Guide". In any event, no matter how the decision of the Commission was expressed in the document, the work actually done by the Secretariat in the coming year and before the next Commission session would be the same and fairly limited.

67. **Ms. Sabo** (Canada) and **Mr. Bellenger** (France) said that they accepted the suggestion made by the Secretary.

68. *Document A/CN.9/XLIX/CRP.1/Add.18, as revised, was adopted.*

A/CN.9/XLIX/CRP.1/Add.19

69. **Ms. Mangklatanakul** (Thailand) said that her delegation suggested adding in paragraph 2 a new sentence, along the lines of "It should be noted that the objective is to assist Member States and in no way to impose on Member States the adoption of the guidance note.".

70. **The Chairperson** said that he took it that the Commission agreed to the proposed amendment.

71. *It was so decided.*

72. *Document A/CN.9/XLIX/CRP.1/Add.19, as amended, was adopted.*

A/CN.9/XLIX/CRP.1/Add.20, A/CN.9/XLIX/CRP.1/ Add.21 and A/CN.9/XLIX/CRP.1/Add.22

73. *Documents A/CN.9/XLIX/CRP.1/Add.20, A/CN.9/XLIX/CRP.1/Add.21 and A/CN.9/XLIX/CRP.1/Add.22 were adopted.*

A/CN.9/XLIX/CRP.1/Add.23

74. **Mr. Plakhov** (Russian Federation) expressed concern at any reduction in the available meeting time that would occur if an official holiday fell during any of the future session of the Commission or its working groups.

75. **Mr. Sorieul** (Secretary of the Commission) said that every effort was made to avoid the situation referred to by the representative of the Russian Federation. However, the official holidays for 2017 had not yet been announced.

76. *Document A/CN.9/XLIX/CRP.1/Add.23 was adopted.*

A/CN.9/XLIX/CRP.1

77. *A/CN.9/XLIX/CRP.1 was adopted.*

78. *The draft report as a whole, as amended and revised, was adopted.*

79. After the customary exchange of courtesies, **the Chair** declared the forty-ninth session of the Commission closed.

The meeting rose at 12.55 p.m.

A/CN.9/WG.III/WP.137	Online dispute resolution for cross-border electronic commerce transactions: notes on a non-binding descriptive document reflecting elements and principles of an ODR process	Part two, chap. III, C
A/CN.9/WG.III/WP.138	Online dispute resolution for cross-border electronic commerce transactions: submission by Israel	Part two, chap. III, D

2. Restricted series

A/CN.9/WG.III/XXXII/ CRP.1 and Add. 1-4	Draft report of Working Group III (Online dispute resolution) on the work of its thirty-second session	Not reproduced
A/CN.9/WG.III/XXXII/ CRP.2	Online dispute resolution for cross-border electronic commerce transactions: submission by the Russian Federation (Addendum 2)	Not reproduced
A/CN.9/WG.III/XXXII/ CRP.3	Online dispute resolution for cross-border electronic commerce transactions: submission by Colombia and the United States of America	Not reproduced

3. Information series

A/CN.9/WG.III/XXXII/ INF/1	List of participants	Not reproduced

G. List of documents before the Working Group on Online Dispute Resolution at its thirty-third session

1. Working papers

A/CN.9/WG.III/WP.139	Annotated provisional agenda	Not reproduced
A/CN.9/WG.III/WP.140	Online dispute resolution for cross-border electronic commerce transactions: draft outcome document reflecting elements and principles of an ODR process	Part two, chap. III, F

2. Restricted series

A/CN.9/WG.III/XXXIII/ CRP.1 and Add. 1-4	Draft report of Working Group III (Online dispute resolution) on the work of its thirty-third session	Not reproduced

3. Information series

A/CN.9/WG.III/XXXIII/ INF/1	List of participants	Not reproduced

H. List of documents before the Working Group on Electronic Commerce at its fifty-second session

1. Working papers

A/CN.9/WG.IV/WP.134	Annotated provisional agenda	Not reproduced
A/CN.9/WG.IV/WP.135 and Add.1	Draft Model Law on Electronic Transferable Records	Part two, chap. IV, B

2. Restricted series

A/CN.9/WG.IV/LII/ CRP.1 and Add.1-4	Draft report of Working Group IV (Electronic Commerce) on the work of its fifty-second session	Not reproduced

3. Information series

A/CN.9/WG.IV/LII/ INF.1	List of participants	Not reproduced

I. List of documents before the Working Group on Electronic Commerce at its fifty-third session

1. Working papers

A/CN.9/WG.IV/WP.136	Annotated provisional agenda	Not reproduced
A/CN.9/WG.IV/WP.137 and Add.1	Draft Model Law on Electronic Transferable Records	Part two, chap. IV, D

2. Restricted series

A/CN.9/WG.IV/LIII/ CRP.1 and Add.1-4	Draft report of Working Group IV (Electronic Commerce) on the work of its fifty-third session	Not reproduced

3. Information series

A/CN.9/WG.IV/LIII/ INF.1	List of participants	Not reproduced

J. List of documents before the Working Group on Insolvency Law at its forty-eighth session

1. Working papers

A/CN.9/WG.V/WP.132	Annotated provisional agenda	Not reproduced
A/CN.9/WG.V/WP.133	Facilitating the cross-border insolvency of multinational enterprise groups: key principles	Part two, chap. V, B
A/CN.9/WG.V/WP.134	Facilitating the cross-border insolvency of multinational enterprise groups: revised draft legislative provisions	Part two, chap. V, C
A/CN.9/WG.V/WP.135	Cross-border recognition and enforcement of insolvency-related judgements	Part two, chap. V, D

2. Restricted series

A/CN.9/WG.V/XLVIII CRP.1 and Add. 1-4	Draft report of Working Group V (Insolvency Law) on the work of its forty-eighth session	Not reproduced
A/CN.9/WG.V/XLVIII CRP.2	Proposal from Switzerland, the United Kingdom, the United States and INSOL Europe	Not reproduced

3. Information series

A/CN.9/WG.V/XLVIII/ INF/1	List of participants	Not reproduced

K. List of documents before the Working Group on Insolvency Law at its forty-ninth session

1. Working papers

A/CN.9/WG.V/WP.136	Annotated provisional agenda	Not reproduced
A/CN.9/WG.V/WP.137 and Add.1	Insolvency law - facilitating the cross-border insolvency of multinational enterprise groups: summary	Part two, chap. V, F
A/CN.9/WG.V/WP.138	Cross-border recognition and enforcement of insolvency-related judgements	Part two, chap. V, G
A/CN.9/WG.V/WP.139	Directors' obligations in the period approaching insolvency: enterprise groups	Part two, chap. V, H
A/CN.9/WG.V/WP.140	Cross-border recognition and enforcement of insolvency-related judgements - proposal by the United States of America	Part two, chap. V, I

2. Restricted series

A/CN.9/WG.V/XLIX/ CRP.1 and Add. 1-4	Draft report of Working Group V (Insolvency Law) on the work of its forty-ninth session	Not reproduced

IV. LIST OF DOCUMENTS OF THE UNITED NATIONS COMMISSION ON INTERNATIONAL TRADE LAW REPRODUCED IN PREVIOUS VOLUMES OF THE *YEARBOOK*

The present list indicates the particular volume, year, part and chapter where documents relating to the work of the United Nations Commission on International Trade Law were reproduced in previous volumes of the *Yearbook*; documents that do not appear in the list here were not reproduced in the *Yearbook*. The documents are divided into the following categories:

1. Reports on the annual sessions of the Commission
2. Resolutions of the General Assembly
3. Reports of the Sixth Committee
4. Extracts from the reports of the Trade and Development Board, United Nations Conference on Trade and Development
5. Documents submitted to the Commission (including reports of the meetings of Working Groups)
6. Documents submitted to the Working Groups:
   (a) Working Group I:

   Time-Limits and Limitation (Prescription) (1969 to1971); Privately Financed Infrastructure Projects (2001 to 2003); Procurement (2004 to 2012); Micro, Small and Medium-sized Enterprises (as of 2014)

   (b) Working Group II:

   International Sale of Goods (1968 to 1978); International Contract Practices (1981 to 2000); Arbitration and Conciliation (2000 to 2016)

   (c) Working Group III:

   International Legislation on Shipping (1970 to 1975); Transport Law (2002 to 2008); Online Dispute Resolution (2010 to 2016)

   (d) Working Group IV:

   International Negotiable Instruments (1973 to 1987); International Payments (1988 to 1992); Electronic Data Interchange (1992 to 1996); Electronic Commerce (as of 1997)

   (e) Working Group V:

   New International Economic Order (1981 to 1994); Insolvency Law (1995 to 1999); Insolvency Law (as of 2001)[*]

   (f) Working Group VI:

   Security Interests (as of 2002)[**]
7. Summary records of discussions in the Commission
8. Texts adopted by Conferences of Plenipotentiaries
9. Bibliographies of writings relating to the work of the Commission.

[*] For its 23rd session (Vienna, 11-22 December 2000), this Working Group was named Working Group on International Contract Practices (see the report of the Commission on its 33rd session A/55/17, para. 186).

[**] At its 35th session, the Commission adopted one-week sessions, creating six working groups.
