NOTE

Symbols of United Nations documents are composed of capital letters combined with figures. Mention of such a symbol indicates a reference to a United Nations document.

The footnote numbering follows that used in the original documents on which this *Yearbook* is based. Any footnotes added subsequently are indicated by lower-case letters.

Changes of and additions to wording that appeared in earlier drafts of conventions, model laws and other legal texts are in italics, except in the case of headings to articles, which are in italics as a matter of style.

CONTENTS

Part Three. Annexes

INTRODUCTION

This is the forty-seventh volume in the series of *Yearbooks* of the United Nations Commission on International Trade Law (UNCITRAL).[1]

The present volume consists of three parts. Part one contains the Commission's report on the work of its forty-ninth session, which was held in New York, from 27 June-15 July 2016, and the action thereon by the United Nations Conference on Trade and Development (UNCTAD) and by the General Assembly.

In part two, most of the documents considered at the forty-ninth session of the Commission are reproduced. These documents include reports of the Commission's Working Groups as well as studies, reports and notes by the Secretary-General and the Secretariat. Also included in this part are selected working papers that were prepared for the Working Groups.

Part three contains summary records, the bibliography of recent writings related to the Commission's work, a list of documents before the forty-ninth session and a list of documents relating to the work of the Commission reproduced in the previous volumes of the *Yearbook.*

REPORT OF THE COMMISSION ON ITS ANNUAL SESSION AND COMMENTS AND ACTION THEREON

THE FORTY-NINTH SESSION (2016)

A. Report of the United Nations Commission on International Trade Law, forty-ninth session (New York, 27 June-15 July 2016) (A/71/17)

[Original: English]

Contents

I. Introduction

1. The present report of the United Nations Commission on International Trade Law (UNCITRAL) covers the forty-ninth session of the Commission, held in New York from 27 June to 15 July 2016.

2. Pursuant to General Assembly resolution 2205 (XXI) of 17 December 1966, this report is submitted to the Assembly and is also submitted for comments to the United Nations Conference on Trade and Development.

II. Organization of the session

A. Opening of the session

3. The forty-ninth session of the Commission was opened by the Under-Secretary-General for Legal Affairs and Legal Counsel of the United Nations, Mr. Serpa Soares, on 27 June 2016.

B. Membership and attendance

4. The General Assembly, in its resolution 2205 (XXI), established the Commission with a membership of 29 States, elected by the Assembly. By its resolution 3108 (XXVIII) of 12 December 1973, the Assembly increased the membership of the Commission from 29 to 36 States. By its resolution 57/20 of 19 November 2002, the General Assembly further increased the membership of the Commission from 36 States to 60 States. The current members of the Commission, elected on 14 November 2012, 14 December 2012, 9 November 2015, 15 April 2016 and 17 June 2016 are the following States, whose term of office expires on the last day prior to the beginning of the annual session of the Commission in the year indicated:[1] Argentina (2022), Armenia (2019), Australia (2022), Austria (2022), Belarus (2022), Brazil (2022), Bulgaria (2019), Burundi (2022), Cameroon (2019), Canada (2019), Chile (2022), China (2019), Colombia (2022), Côte d'Ivoire (2019), Czech Republic (2022), Denmark (2019), Ecuador (2019), El Salvador (2019), France (2019), Germany (2019), Greece (2019), Honduras (2019), Hungary (2019), India (2022), Indonesia (2019), Iran (Islamic Republic of) (2022), Israel (2022), Italy (2022), Japan (2019), Kenya (2022), Kuwait (2019), Lebanon (2022), Lesotho (2022), Liberia (2019), Libya (2022), Malaysia (2019), Mauritania (2019), Mauritius (2022), Mexico (2019), Namibia (2019), Nigeria (2022), Pakistan (2022), Panama (2019), Philippines (2022), Poland (2022), Republic of Korea (2019), Romania (2022), Russian Federation (2019), Sierra Leone (2019), Singapore (2019), Spain (2022), Sri Lanka (2022), Switzerland (2019), Thailand (2022), Turkey (2022), Uganda (2022), United Kingdom of Great Britain and Northern Ireland (2019), United States of America (2022), Venezuela (Bolivarian Republic of) (2022) and Zambia (2019).

5. With the exception of Burundi, Colombia, Côte d'Ivoire, Iran (Islamic Republic of), Kenya, Kuwait, Lebanon, Liberia, Malaysia, Mauritania, Pakistan, the Philippines and Poland, all the members of the Commission were represented at the session.

6. The session was attended by observers from the following States: Algeria, Cyprus, Dominican Republic, Finland, Iraq, Netherlands, Peru and Swaziland.

7. The session was also attended by observers from the Holy See and the European Union.

[1] Pursuant to General Assembly resolution 2205 (XXI), the members of the Commission are elected for a term of six years. Of the current membership, 29 were elected by the Assembly at its sixty-seventh session, on 14 November 2012, one was elected by the Assembly at its sixty-seventh session, on 14 December 2012, 23 were elected by the Assembly at its seventieth session, on 9 November 2015, five were elected by the Assembly at its seventieth session, on 15 April 2016, and two were elected by the Assembly at its seventieth session, on 17 June 2016. By its resolution 31/99, the Assembly altered the dates of commencement and termination of membership by deciding that members would take office at the beginning of the first day of the regular annual session of the Commission immediately following their election and that their terms of office would expire on the last day prior to the opening of the seventh regular annual session following their election.

8. The session was also attended by observers from the following international organizations:

(a) *United Nations system*: European Center for Peace and Development (ECPD), International Centre for Settlement of Investment Disputes (ICSID), United Nations Environmental Programme (UNEP) and World Bank;

(b) *Intergovernmental organizations*: the Hague Conference on Private International Law, International Development Law Organization (IDLO), International Institute for the Unification of Private Law (Unidroit), Maritime Organization of West and Central Africa (MOWCA) and Organization for Economic Cooperation and Development (OECD);

(c) *Invited non-governmental organizations*: American Arbitration Association/International Centre for Dispute Resolution (AAA/ICDR), American Bar Association (ABA), American Society of International Law (ASIL), Asia-Pacific Regional Arbitration Group (APRAG), Association Suisse de l'Arbitrage (ASA), Center for International Dispute Settlement (CIDS), China Society of Private International Law (CSPIL), Commercial Finance Association (CFA), European Law Students' Association (ELSA), Factors Chain International and the EU Federation for Factoring and Commercial Finance (FCI+EUF), Forum for International Conciliation and Arbitration (FICACIC), Grupo Latinoamericano de Abogados para el Derecho del Comercio Inernational (GLULACI), Institute of Commercial Law/Penn State Dickinson School of Law, Inter-American Commercial Arbitration Commission (IACAC), Inter-Pacific Bar Association (IPBA), International Bar Association (IBA), International Chamber of Commerce (ICC), International Commercial Arbitration Court at the Ukrainian Chamber of Commerce and Industry (ICAC), International Council for Commercial Arbitration (ICCA), International Institute for Conflict Prevention and Resolution (CPR), International Road Transport Union (IRU), International Women's Insolvency and Restructuring Confideration (IWIRC), Jerusalem Arbitration Center (JAC), London Court of International Arbitration (LCIA), Moot Alumni Association (MAA), National Law Center for Inter-American Free Trade (NLCIFT), New York State Bar Association (NYSBA), Pace Institute of International Commercial Law (PIICL), Regional Centre for International Commercial Arbitration (Lagos, Nigeria) (RCICAL), Universitat de Les Illes Balears (CEDIB), World Association of Former United Nations Interns and Fellows (WAFUNIF) and Wuhan University Institute of International Law (WHU).

9. The Commission welcomed the participation of international non-governmental organizations with expertise in the major items on the agenda. Their participation was crucial for the quality of texts formulated by the Commission and the Commission requested the Secretariat to continue to invite such organizations to its sessions.

C. Election of officers

10. The Commission elected the following officers:

Chair:	Mr. Gaston KENFACK DOUAJNI (Cameroon)
Vice-Chairs:	Mr. Rodrigo LABARDINI FLORES (Mexico) Mr. David MÜLLER (Czech Republic) Mr. Michael SCHNEIDER (Switzerland)
Rapporteur:	Mr. Jeffrey CHAN (Singapore)

D. Agenda

11. The agenda of the session, as adopted by the Commission at its 1024th meeting, on 27 June, was as follows:

1. Opening of the session.
2. Election of officers.
3. Adoption of the agenda.

4. Consideration of issues in the area of security interests:
   (a) Finalization and adoption of a draft Model Law on Secured Transactions;
   (b) Consideration of the draft Guide to Enactment of the draft Model Law on Secured Transactions;
   (c) Possible future work in the area of security interests;
   (d) Coordination and cooperation.
5. Consideration of issues in the area of arbitration and conciliation:
   (a) Finalization and adoption of the revised UNCITRAL Notes on Organizing Arbitral Proceedings;
   (b) Progress report of Working Group II;
   (c) Establishment and functioning of the transparency repository;
   (d) Possible future work in the area of arbitration and conciliation;
   (e) Secretariat Guide on the New York Convention;
   (f) International commercial arbitration and mediation moot competitions.
6. Consideration of issues in the area of online dispute resolution: finalization and adoption of Technical Notes on Online Dispute Resolution.
7. Micro-, small- and medium-sized enterprises: progress report of Working Group I.
8. Consideration of issues in the area of electronic commerce:
   (a) Progress report of Working Group IV;
   (b) Future work in the area of electronic commerce;
   (c) Cooperation with UN/ESCAP in the field of paperless trade.
9. Insolvency law: progress report of Working Group V.
10. Technical assistance to law reform:
    (a) General;
    (b) Consideration of a draft guidance note on strengthening United Nations support to States, upon their request, to implement sound commercial law reforms.
11. Promotion of ways and means of ensuring a uniform interpretation and application of UNCITRAL legal texts:
    (a) Case Law on UNCITRAL texts (CLOUT);
    (b) Digests of case law relating to UNCITRAL legal texts.
12. Status and promotion of UNCITRAL legal texts.
13. Coordination and cooperation:
    (a) General;
    (b) Reports of other international organizations;
    (c) International governmental and non-governmental organizations invited to sessions of UNCITRAL and its Working Groups.
14. UNCITRAL regional presence.
15. Role of UNCITRAL in promoting the rule of law at the national and international levels.
16. Work programme of the Commission.
17. Congress 2017.
18. Relevant General Assembly resolutions.

19. Other business.

20. Date and place of future meetings.

21. Adoption of the report of the Commission.

E. Adoption of the report

12. The Commission adopted the present report by consensus at its 1033rd meeting, on 1 July, at its 1039th meeting, on 8 July, and at its 1046th meeting, on 15 July 2016.

III. Consideration of issues in the area of security interests

A. Finalization and adoption of a draft Model Law on Secured Transactions

1. Introduction

13. The Commission recalled that, at its forty-sixth session, in 2013,[2] it had confirmed its decision taken at its forty-fifth session in 2012, that Working Group VI (Security Interests) should prepare a model law on secured transactions (the "draft Model Law") based on the recommendations of the *UNCITRAL Legislative Guide on Secured Transactions* (the "Secured Transactions Guide")[3] and consistent with all texts prepared by the Commission on secured transactions, including the *United Nations Convention on the Assignment of Receivables in International Trade* (New York, 2001) (the "Assignment Convention"),[4] the *Supplement on Security Rights in Intellectual Property* (the "Intellectual Property Supplement"),[5] and the *UNCITRAL Guide on the Implementation of a Security Rights Registry* (the "Registry Guide").[6]

14. In addition, the Commission recalled that, at its forty-seventh session, in 2014, it had acknowledged the importance of modern secured transactions law for the availability and cost of credit and the need for urgent guidance to States, in particular those with developing economies and economies in transition, and had requested the Working Group to expedite its work so as to complete the draft Model Law, including the definitions and provisions on non-intermediated securities, and to submit it to the Commission for adoption as soon as possible.[7]

15. Moreover, the Commission recalled that, at its forty-eighth session in 2015, it had approved the substance of article 26 of chapter IV of the draft Model Law and articles 1 to 29 of the draft Registry Act (see A/CN.9/852), and had requested the Working Group to expedite its work so as to submit the draft Model Law to the Commission for final consideration and adoption at its forty-ninth session in 2016.[8]

16. At its current session, the Commission had before it the reports of the twenty-eighth and twenty-ninth sessions of the Working Group (A/CN.9/865 and A/CN.9/871, respectively), as well as notes by the Secretariat entitled "Draft Model Law on Secured Transactions" (A/CN.9/884 and addenda 1-4, including the "draft Model Registry-related Provisions" contained in A/CN.9/884/Add.1), "Draft Guide to Enactment of the draft Model Law on Secured Transactions" (A/CN.9/885 and addenda 1-4) and "Draft Model Law on Secured Transactions: Compilation of comments by States" (A/CN.9/886, A/CN.9/887 and A/CN.9/887/Add.1). In addition, the Commission noted with appreciation that, at its twenty-eighth and twenty-ninth sessions, the Working Group adopted the draft Model Law

(A/CN.9/865 and A/CN.9/871) and, at its twenty-ninth session, decided to submit it to the Commission for consideration and adoption at its forty-ninth session (A/CN.9/871, para. 91).

2. Consideration of the draft Model Law (A/CN.9/884 and Addenda 1-4)

Chapter I. Scope of application and general provisions

17. With respect to article 1, it was agreed that paragraph 2 should be revised to: (a) refer to articles 70-80 (see para. 80 below); (b) include the words "by agreement" after the word "receivables" to clarify that the draft Model Law only applied to outright transfers of receivables by agreement and not by law; and (c) delete the text in square brackets, since it referred to terminological issues that were left to article 2. It was also agreed that paragraph 4 should be retained outside square brackets.

18. With respect to article 2, it was agreed that: (a) in the definition of the term "bank account", reference should be made only to "authorized deposit-taking institution"; (b) in the definition of the term "competing claimant", the square bracketed words "[to be specified by the enacting State]" should be deleted, while the draft Guide to Enactment of the draft Model Law (the "draft Guide to Enactment") should give examples of other creditors of the grantor that could have a right in the same encumbered asset; (c) in the definition of the term "debtor of the receivable", the reference to a "transferor in an outright transfer" should be deleted; (d) in the definition of the term "default", the text that appeared within square brackets should be revised to read along the following lines: "and any other event that under the terms of an agreement between the grantor and the secured creditor constitutes default" and be retained outside square brackets; (e) at the end of the definition of the term "encumbered asset", the words "by agreement" should be added in line with the Commission's decision on article 1, paragraph 2 (see para. 17 above) and the text should be retained outside square brackets; (f) in subparagraph (ii) of the definition of the term "grantor", the words "lessee or licensee" should be deleted, and in subparagraph (iii) the word "in" should be replaced with the word "under" and the words "by agreement" should be included at the end (same changes should be made to the definitions of the terms "secured creditor" and "security right"); (g) the definition of the term "insolvency representative" should be deleted, since the term only appeared in the definition of the term "competing claimant", and that term together with other relevant insolvency terms could be briefly explained in the draft Guide to Enactment; (h) in the definition of the term "inventory", reference should be made to "raw materials and work-in-process", and not to "semi-processed materials"; (i) the term "movable asset" should be defined along the following lines: "'movable asset' means a tangible or intangible asset other than immovable property [as defined in the law of the enacting State]"; (j) in the definition of the term "possession", the words "directly or indirectly" should be deleted as they were redundant; (k) the term "registry" should be defined along the following lines: "'registry' means the registry established under article 27 of this Law"; (l) in the definition of the term "secured obligation", the second sentence should be deleted and the draft Guide to Enactment should explain that there was no secured obligation in an outright transfer of a receivable; (m) the bracketed text in the definitions of the term "security agreement" and "security right" should be retained outside square brackets; (n) in the definition of the term "tangible asset", reference should be made to subparagraph (l) instead of subparagraph (k) and, in addition, to article 31; and (o) the term "writing" should be defined along the lines of recommendation 11 of the Secured Transactions Guide.

19. After discussion, the Commission adopted articles 1 and 2 subject to the above-mentioned changes and articles 3-5 unchanged (for subsequent changes made to art. 3, see paras. 96-98, and for subsequent changes made to art. 2, subpara. (t), see para. 100 below).

Chapter II. Creation of a security right

20. With respect to the heading of section "A. General rules" of chapter II, it was agreed that, to address the relationship between the general and the asset-specific provisions in each chapter, a footnote should be added at the beginning of chapter II that would read along the following lines: "In this chapter and all other chapters, the general rules are subject to the asset-specific rules. The enacting State may wish to include in its law a provision reflecting

this principle or otherwise address the relationship between general and asset-specific provisions".

21. With respect to article 6, it was agreed that, to better reflect its content, its heading should be changed to read along the following lines: "Creation of a security right and requirements for a security agreement". (For an additional amendment made to art. 6, see para. 24 below).

22. With respect to article 7, it was agreed that it should be revised to read along the following lines: "A security right may secure one or more obligations of any type, …".

23. With respect to article 8, subparagraph (a), it was agreed that the reference to future assets should be deleted as article 6, paragraph 2, already provided that a security agreement might provide for the creation of a security right in a future asset, but the security right was created only when the grantor acquired rights in that future asset or the power to encumber it.

24. With respect to article 9, it was agreed that it should be revised to apply the same standard to the description of secured obligations, and thus to: (a) refer to secured obligations in the heading and in paragraph 1; and (b) include a third paragraph that would read along the following lines: "A description of secured obligations that indicates that the security right secures all obligations owed to the secured creditor at any time satisfies the standard in paragraph 1". In addition, it was agreed that it was sufficient to refer in paragraph 1 to encumbered assets, rather than "assets encumbered or to be encumbered". Moreover, it was agreed that in article 6, paragraph 3(b), a reference should be included to the description of a secured obligation "as provided in article 9".

25. With respect to article 10, it was agreed that reference should be made to "money or funds", rather than to "assets" or "proceeds", and to the "amount", rather than to the "value", of money or funds. While the Commission initially agreed to also cover in article 10 money or funds as original encumbered assets, and not just as proceeds, it ultimately decided not to do it because: (a) commingling of money or funds as an original encumbered asset was rare in practice; (b) if the matter was addressed in article 10, it would also have to be addressed in the chapter on third-party effectiveness and priority; and (c) the matter could be addressed in the draft Guide to Enactment (by explaining, for example, that the term "proceeds" as defined in art. 2, subpara. (bb), covered situations where funds in a bank account were moved to another bank account, even at the instigation of the deposit-taking institution, and thus art. 10, para. 2, applied to those situations, as the funds in the second bank account were "proceeds").

26. With respect to article 11, it was agreed that paragraph [3][4] should be deleted as the matter was better addressed in article 32, paragraphs 2 and 3. While support was expressed in favour of option A and option B, the concern was also expressed that they were difficult to administer as they presupposed an evaluation of tangible assets before commingling which was said to be rare in practice. In order to address that concern, a third option was proposed. After discussion, the Commission postponed consideration of article 11 until it had a proposal possibly combining the elements of all options into one rule (see para. 99 below).

27. With respect to article 12, it was agreed that it should be revised to provide that a security right would be extinguished when all secured obligations had been discharged and there were no outstanding commitments to extend credit secured by the security right.

28. With respect to article 13, it was agreed that: (a) for reasons of consistency with article 9 of the Assignment Convention and because they were unnecessary, the words "as between the grantor and the secured creditor and as against the debtor of the receivable" in paragraph 1 should be deleted; (b) as the meaning of the term "subsequent" was not clear (because, unlike the Assignment Convention which defined the term "subsequent assignment" in art. 2, subpara. (b), the draft Model Law did not contain a definition of the term "subsequent security right") and on the understanding that the meaning of paragraph 1 would not change, reference should be made to "any" secured creditor rather than to any "subsequent" secured creditor; and (c) also for reasons of consistency with article 9 of the Assignment Convention and to avoid giving the impression that paragraph 3 limited the

protection provided to secured creditors with the last part of paragraph 2, paragraph 3 should be merged into paragraph 2.

29. With respect to article 14, it was agreed that: (a) for reasons of consistency with article 10 of the Assignment Convention, paragraph 2 should be merged into paragraph 1; (b) for the same reason but also to avoid giving the impression that the draft Model Law dealt with the question of whether a right securing or supporting an encumbered receivable should be transferred with or without a new act of transfer, the words "under the law governing it" should be added in paragraph 2 to qualify the word "transferable".

30. After discussion, the Commission adopted articles 6 to 14 subject to the changes mentioned above (for changes made to art. 11 see also para. 99 below) and articles 15 to 17 unchanged.

Chapter III. Effectiveness of a security right against third parties

31. With respect to article 18, further to its decision to include in article 2 a definition of the term "registry" (see para. 18, subpara. (k) above), the Commission agreed that article 18 should be revised to refer to the "Registry", rather than to the "general security rights registry". It was also agreed that the footnote to article 18, paragraph 1, should be moved to the definition of the term "registry" and clarify that, if the enacting State implemented the UNCITRAL Model Law on Secured Transactions and the Model Registry-related Provisions contained therein in one law, it would need to include a definition of the term "registry" only once, rather than twice, as was currently the case in the draft Model Law and the draft Model Registry-related Provisions because of the assumption that they might be implemented in separate statutes or other types of instrument.

32. With respect to article 19, it was agreed that reference should be made in both paragraphs 1 and 2 to a security right in proceeds arising under article 10, so as to cover the point that the security right extended only to "identifiable" proceeds. As a result, it was agreed, the reference to the identifiability of the proceeds in paragraph 2 would be redundant and should thus be deleted.

33. The Commission noted that, while the draft Model Law dealt in article 11 with the creation of a security right in tangible assets commingled in a mass or product and in article 40 with the priority of such a security right, there was no article in the draft Model Law dealing with the third-party effectiveness of such a security right. Thus, the Commission agreed that a new article should be inserted in this part of the draft Model Law to implement recommendation 44 of the Secured Transactions Guide that should read along the following lines: "If a security right in a tangible asset is effective against third parties, a security right in a mass or product to which the security right extends under article 11 is effective against third parties without any further act".

34. With respect to article 22, it was agreed that the reference to a change of the applicable law as a result of a change in the location of the asset or the grantor should be deleted, since under chapter VIII of the draft Model Law the applicable law could change as a result, for example, of a change in the location of the depositary institution maintaining the relevant account. For that reason but also for reasons of clarity, it was agreed that paragraph 1 should be revised to read along the following lines: "If a security right is effective against third parties under the law of another State and this Law becomes applicable, the security right remains effective against third parties under this Law if it is made effective against third parties in accordance with this Law before the earlier of: (a) …; and (b) The expiry of [a short period of time to be specified by the enacting State] after this Law becomes applicable".

35. With respect to article 23, it was agreed that option A should be deleted and option B should be revised to read along the following lines: "An acquisition security right in consumer goods with an acquisition price below [an amount to be specified by the enacting State] is effective against third parties other than a buyer, lessee or licensee upon its creation without any further act" (see para. 102 below for subsequent changes to the agreed text). It was also agreed that, for that rule to make sense, the draft Guide to Enactment should clarify that States should specify a reasonably high price. It was also agreed that there was no need to refer to a transferee other than a buyer, as the term "transferee" could cover a donee to whom article 23 should not apply.

36. The concern was, however, expressed that qualifying the third-party effectiveness of a security right by a reference to certain third parties was in essence a priority rule providing that buyers acquired consumer goods free of acquisition security rights made effective against third parties under article 23. It was also stated that introducing a relative concept of third-party effectiveness would be inconsistent with the approach taken in the draft Model Law which referred to effectiveness against all third parties (without regard to who the third party was) and distinguished third-party effectiveness from priority. After discussion, the Commission postponed consideration of article 23 until it had the opportunity to consider a proposal with respect to a priority rule that would address that concern (see paras. 102-104 below).

37. With respect to article 25, it was agreed that paragraph 3 should be revised to also refer to the return of "the assets covered by the document", not only to "dealing with the assets", while the draft Guide to Enactment should explain that the words "dealing with the assets" covered not only transactions like sale and exchange but also physical actions like loading and unloading.

38. After discussion, the Commission adopted articles 18, 19, 22, 23 and 25 subject to the above-mentioned changes (for art. 23, see also paras. 102-104 below) and articles 20, 21, 24 and 26 unchanged. The Commission also adopted the new article on the third-party effectiveness of a security right in tangible assets commingled in a mass or product that would follow article 19 (see para. 33 above).

Chapter IV. The registry system

39. With respect to article 27, it was agreed that its heading should be revised to read along the following lines: "Establishment of the Registry". Subject to that change, the Commission adopted article 27.

Draft Model Registry-related Provisions

40. The Commission agreed that the draft Model Registry-related Provisions should be called "Model Registry Provisions".

41. With respect to article 1 of the draft Model Registry-related Provisions, it was agreed that the definition of the term "registered notice" and the numbers of all subsequent paragraphs should be retained outside square brackets.

42. With respect to article 5 of the draft Model Registry-related Provisions, it was agreed that reference should be made in paragraph 4 to access "to registry services". It was also agreed that the draft Guide to Enactment should explain that, with respect to initial notices, a registrant would normally meet any secured access requirements in the context of identifying itself (which could include setting up a user account; see the Registry Guide, para. 96), as provided in paragraph 1(b).

43. With respect to article 6 of the draft Model Registry-related Provisions, it was agreed that, for reasons of clarity and avoiding that the Registry would be obliged to accept a notice or a search request if some but not all information was legible, paragraphs 1(a) and 2 should be revised to read along the following lines respectively: "A notice if no information is entered in one of the mandatory designated fields or information entered in one of the mandatory designated fields is illegible" and "The Registry must reject a search request if no information is entered in one of the fields designated for entering a search criterion or information entered in one of the fields designated for entering a search criterion is illegible".

44. With respect to article 8 of the draft Model Registry-related Provisions, it was agreed that the reference to article 9 of the draft Model Registry-related Provisions should be placed before the reference to additional grantor information, as article 9 did not deal with such additional information.

45. With respect to article 11 of the draft Model Registry-related Provisions, it was agreed that, in view of the Commission's decisions with respect to article 9 of the draft Model Law (see para. 24 above): (a) in paragraph 1, reference should be made to "encumbered assets" rather than to "assets encumbered or to be encumbered"; and (b) in paragraph 2, reference should be made to a "generic" rather than to a "particular" category of assets.

46. With respect to article 15 of the draft Model Registry-related Provisions, it was agreed that, for reasons of clarity, paragraph 2(b) should be revised to read along the following lines: "if that person knows that the address has changed, at the most recent address if known or reasonably available to that person".

47. With respect to article 20 of the draft Model Registry-related Provisions, it was agreed that: (a) paragraphs 1(a), 2(a) and 3(a)(i) should be revised to refer to the secured creditor having been informed, rather than knowing, that the grantor would not authorize a registration, as the latter would be almost impossible; (b) a new paragraph 1(c) should be included to read along the following lines: "The grantor authorized the registration of a notice covering those assets but the authorization has been withdrawn and no security agreement covering those assets has been concluded"; and (c) paragraph 4 should also include a reference to the new paragraph 1(c).

48. With respect to article 24 of the draft Model Registry-related Provisions, it was agreed that the draft Guide to Enactment should explain the words "except to the extent it seriously misled third parties that relied on the erroneous information in the registered notice" in paragraph 6 along the lines they were explained in the Registry Guide (see paras. 215 and 217-220 of the Registry Guide). (For changes made to art. 24, paras. 6 and 7, see paras. 105-107 below.)

49. With respect to article 27 of the draft Model Registry-related Provisions, it was agreed that the draft Guide to Enactment should explain that the duties of the registrar would be determined by the relevant supervising authority in a law, regulation or other act implementing the Model Registry-related Provisions.

50. With respect to article 30, option A, paragraph 1, of the draft Model Registry-related Provisions it was agreed that reference should be made to "article 19, including any cancellation notice registered in accordance with article 20, paragraph 3 or 7", in order to avoid inadvertently creating the impression that, before removing any information from the public registry record, the Registry would need to check and ensure that a cancellation notice met the conditions of article 20, paragraph 3 or 7.

51. After discussion, the Commission adopted articles 1, 5, 6, 8, 11, 15, 20 and 30 of the draft Model Registry-related Provisions subject to the above-mentioned changes and articles 2-4, 7, 9, 10, 12-14, 16-19, 21-23, 27-29 and 31-33 of draft Model Registry-related Provisions unchanged (for changes made to arts. 24-26 of the draft Model Registry-related Provisions, see paras. 105-110 below).

Chapter V. Priority of a security right

52. The Commission considered and adopted with some modifications a proposal for revised versions of articles 28, 30, 31, 36 and 39.

53. With respect to article 28, it was agreed that paragraphs 1 and 3 should be revised along the following lines to track more closely recommendation 76 of the Secured Transactions Guide:

> "Subject to articles 31, 36, 37 and 39-41, priority between competing security rights created by the same grantor in the same encumbered asset is determined according to the following rules:
>
> "(a) As between security rights that were made effective against third parties by registration of a notice in the Registry, priority is determined by the order of registration, without regard to the order of creation of the security rights;
>
> "(b) As between security rights that were made effective against third parties otherwise than by registration of a notice in the Registry, priority is determined by the order of third-party effectiveness; and
>
> "(c) As between a security right that was made effective against third parties by registration and a security right that was made effective against third parties otherwise than by registration of a notice in the Registry, priority is determined by the order of registration or third-party effectiveness, whichever occurs first."

54. It was also agreed that the draft Guide to Enactment should explain the application of that rule in cases in which the secured creditor registered a notice and in addition took actions necessary to achieve third-party effectiveness of its security right by another means. It was further agreed that paragraph 2 of article 28, dealing with security rights created by different grantors, should be set out in a separate article.

55. With respect to article 29, it was agreed that it should refer to the "time when", rather the "time period during which" the security right was not effective against third parties.

56. With respect to article 30, it was agreed that it should be made subject to article 39 and revised along the lines proposed to refer to a security right in proceeds of an encumbered asset having the same priority over a competing security right as the security right in the encumbered asset from which the proceeds arose (see para. 61 below).

57. With respect to article 31, it was agreed that it should be revised along the lines proposed and coordinated with article 11 (see para. 101 below).

58. With respect to article 35, it was agreed that: (a) in paragraph 1, the words "the rights of acquisition secured creditors in accordance with" were unnecessary and should be thus deleted; (b) in paragraph 2, the words "or at the same time" should be retained outside square brackets to address the situation where the time when a security right became effective in future assets coincided with the time when a judgement creditor took the steps referred to in paragraph 1; and (c) paragraph 2(a) should be revised to read along the following lines: "Before the secured creditor received a notice from the judgement creditor that the judgement creditor has taken the steps referred to in paragraph 1, or within [a short period of time to be specified by the enacting State] thereafter".

59. With respect to article 36, it was agreed that it should be revised along the lines proposed to address: (a) in paragraph 1, the priority of an acquisition security right in equipment, or in intellectual property or rights of a licensee under a licence of intellectual property primarily used or intended to be used by the grantor in the operation of its business; (b) in paragraph 2, the priority of an acquisition security right in inventory, or in intellectual property or rights of a licensee under a licence of intellectual property held by the grantor for sale or licence in the ordinary course of the grantor's business; and (c) in paragraph 3, the priority of an acquisition security right in consumer goods, or in intellectual property or rights of a licensee under a licence of intellectual property used or intended to be used by the grantor primarily for personal, family or household purposes.

60. With respect to article 37, it was agreed that the words "of a secured creditor other than a seller or lessor, or a licensor of intellectual property" should be deleted, as they were either stating the obvious or were confusing to the extent that they could be read to suggest that there might be more than one seller, lessor or licensor. It was also agreed that the draft Guide to Enactment should explain that an acquisition security right of a seller, lessor or licensor would have priority over all competing security rights held by other types of creditor.

61. With respect to article 39, it was agreed that it should be revised to set out along the lines proposed: (a) in paragraph 1, the rule that a security right in proceeds of an asset that was the subject of an acquisition security right had the same priority over a competing security right that the acquisition security right in the asset from which the proceeds arose had under article 36; and (b) in paragraph 2, the special rules for proceeds of inventory (priority to be determined in accordance with art. 28, if the proceeds were in the form of receivables, etc., and otherwise in accordance with art. 36).

62. With respect to article 49, paragraph 5, it was agreed that the draft Guide to Enactment should explain that, unlike articles 44, paragraph 2, and 47, paragraph 3, which provided a substantive rule for transferees of encumbered negotiable instruments and negotiable documents to acquire their rights free of the security right, article 49, paragraph 5, essentially referred the matter to other law mainly because, with respect to non-intermediated securities, the matter was more complex, and legal systems diverged more widely than with respect to negotiable instruments and negotiable documents.

63. In line with the approach taken in the other chapters of the draft Model Law, it was agreed that the heading of chapter V ("priority") did not need to be repeated in the heading of each article.

64. After discussion, the Commission adopted articles 28-30, 35-37 and 39 subject to the above-mentioned changes and articles 33-34, 38 and 40, 41 and 43-49 unchanged (for changes made to art. 31, see para. 101 below; for changes made to art. 32, see para. 103 below; and for changes made to art. 42, see para. 107 below).

Chapter VI. Rights and obligations of the parties and third-party obligors

65. With regard to article 51 and article 53, paragraph 1(a), it was agreed that the reference to "value" should be deleted, since reasonable care to preserve an encumbered asset would also result in preserving its value; and where preserving the value of an asset would be beyond the control of the person in possession, such a duty would be impossible for the person in possession to perform. It was also agreed that the draft Guide to Enactment could explain that the obligation to preserve both the encumbered asset and its value could arise under article 4, according to which parties should act in good faith and in a commercially reasonable manner.

66. With respect to article 52, it was agreed that, upon extinguishment of a security right, the encumbered assets ought to be returned to the grantor "or a person designated by the grantor" (see also para. 111 below). It was also agreed that the draft Guide to Enactment should explain that: (a) in some jurisdictions, the return to a person designated by the grantor would be viewed as a "return to the grantor"; and (b) the return of encumbered assets to a person designated by the grantor should take place only with the agreement of the secured creditor and in a commercially reasonable manner, and the grantor should bear the costs of such a return.

67. With respect to article 54, it was agreed that, in paragraph 1, reference should be made to a "written" request, and to a transferee under an outright transfer of a receivable by agreement (see para. 17, subpara. (b), above).

68. With respect to article 57, it was agreed it should be aligned more closely with article 14 of the Assignment Convention, on which article 57 was based.

69. With respect to article 59, paragraphs 2(a) and (b), it was agreed that reference should be made to the "contract giving rise to the receivable", rather than to the "original contract", as the term "original contract" was not defined in the draft Model Law (the same change should be made in art. 61, para. 1, and in the heading of art. 64).

70. With respect to article 60, it was agreed that, in paragraph 4, reference should be made to "a security right in a receivable created in favour of a secured creditor by the initial or any other secured creditor" rather than to "a subsequent security right", which was a term that was not defined in the draft Model Law (the same change should be made in art. 61, paras. 5 and 8), and at the end the words "in that receivable" should be added for more clarity.

71. After discussion, the Commission adopted articles 51-54, 57, 59-61 and 64 subject to the above-mentioned changes (for subsequent changes to art. 52, see para. 111 below) and articles 50, 55, 56, 58, 62-63 and 65-69 unchanged.

Chapter VII. Enforcement of a security right

72. With respect to article 72, it was agreed that: (a) both options should be set out in full and retained for each enacting State to choose the option that best fit its legal system; (b) to also cover co-owners of encumbered assets who would not be covered by the term "competing claimant", option A should be revised to refer to "the grantor, any other person with a right in the encumbered asset or the debtor"; and (c) option B should cover people who did not have a right in the encumbered asset (e.g. the insolvency representative in some jurisdictions) and be qualified to somehow narrow the number of people that could be covered by being considered as "affected" by the non-compliance of another person with the provisions of chapter VII.

73. With respect to article 74, paragraph 2, it was agreed that it should be deleted, as it subjected the rights of a higher-ranking secured creditor to rights granted by a lower-ranking secured creditor and was thus inconsistent with article 79, paragraphs 2 and 4.

74. With respect to article 75, it was agreed that: (a) paragraph 1 should be revised to provide that the secured creditor could obtain possession "either by applying or without

applying" to a court or other authority; (b) paragraph 2 should be deleted as it did not refer to any specific conditions and the conditions of the civil procedure law of the enacting State would apply anyway; and (c) paragraph 4 should be retained but the words "or is of a kind sold on a recognized market" should be deleted, as they were unclear and not applicable in the context of the procedure for obtaining possession of the encumbered assets.

75. With respect to article 76, it was agreed that: (a) to align the chapeau of paragraph 4 with the wording of paragraphs 2 and 3, reference should be made to the decision of the secured creditor to "exercise the right provided in paragraph 1"; (b) to avoid confusion with the term "notice of the secured creditor's intention" used in the chapeau of paragraph 4, in paragraph 4(b), the word "notifies" should be replaced with the word "informs"; (c) for reasons of clarity, paragraphs 5-8 should refer to the notice referred to in paragraph 4. It was also agreed that the draft Guide to Enactment should explain that: (a) the period of time referred to in paragraphs 4(b) and 4(c) should be very brief; and (b) the fact that paragraph 8 did not require a notice for the out-of-court sale of an asset that was of a kind sold on a recognized market did not mean that a notice was not required for an out-of-court sale of a controlling stake in a company.

76. In that connection, the Commission considered a proposal that article 76, paragraph 7, should be amended to allow a notice to be sent to recipients other than the grantor in the language of the relevant Registry. That proposal was objected to. It was widely felt that such a safe harbour rule would apply only to some of the recipients of the notice of the secured creditor's intention to sell an encumbered asset out of court and would create uncertainty as the meaning of the term "relevant Registry" was not clear.

77. With respect to article 77, it was agreed that: (a) to better reflect its content, its heading should be revised to read along the following lines: "Distribution of the proceeds of a disposition of an encumbered asset and debtor's liability for any deficiency"; (b) in paragraph 2(a), the word "net" should be deleted as the remaining words clarified the meaning of "net proceeds"; and (c) in paragraph 3, the word "shortfall" should be replaced with the word "amount". It was also agreed that the draft Guide to Enactment should explain that: (a) the distribution of proceeds would require that the secured creditor report and provide an account to the grantor, the debtor and any subordinate competing claimant; and (b) any amount owing to the secured creditor after application of the net proceeds to the secured obligation would be an amount owing after deduction of any amount owing to the grantor by the secured creditor.

78. With respect to article 78, it was agreed that: (a) for reasons of consistency, the text of paragraph 3 should be coordinated with the equivalent text of article 76, paragraph 5(b); (b) for reasons of clarity, paragraph 4 should be revised and set out in two separate paragraphs; and (c) for reasons of clarity and precision, reference should be made in the new paragraph 5 to "consent in writing", rather than to "affirmative consent".

79. With respect to article 79, it was agreed that: (a) in paragraphs 1 and 2, the words "except rights that have priority over the right of the enforcing secured creditor" should be deleted and the remaining text in square brackets should be recast as a question for the enacting State (using words along the lines of the words "whether or not"); and (b) in paragraph 5, the words "provided that it had no knowledge of a violation of the provisions of this chapter that materially prejudiced the rights of the grantor or another person" should be retained outside square brackets.

80. With respect to article 81, it was agreed that: (a) in line with the Commission's decision with respect to article 1 (see para. 17, subpara. (b), above), in paragraph 1, reference should be made to an outright transfer "by agreement", and the words "before or after default of the transferor" that were not relevant in the case of an outright transfer should be replaced with words along the following lines: "at any time after payment becomes due"; and (b) in view of the Commission's decision that articles 70-80 should not apply to outright transfers (see, para. 17, subpara. (a), above), paragraphs 3 and 5 of article 80 should be reiterated in article 81 to ensure that they would apply to outright transfers.

81. After discussion, the Commission adopted articles 72, 74-79 and 81 subject to the above-mentioned changes and articles 70-71, 73 and 80 unchanged.

Chapter VIII. Conflict of laws

82. With respect to article 83, it was agreed that: (a) to cover priority conflicts with the rights of any competing claimant, in paragraph 2, reference should be made to "the right of a competing claimant", rather than to "a competing security right made effective against third parties by another method"; and (b) paragraph 4(a) should be deleted as it simply restated the *lex situs* rule of paragraph 1.

83. With respect to article 85, it was agreed that, for reasons of clarity, it should be revised to read along the following lines: "either arises from the sale or lease of immovable property or is secured by immovable property". In that connection, the Commission considered but did not adopt a proposal to limit the application of article 85 to receivables secured by immovable property identified or identifiable in the contract that gave rise to the receivable. It was stated that, with that revision, it would be easier for the secured creditor to find out that a receivable in which it had a security right was secured by immovable property and, as a result, a different law would apply to its security right in the receivable. It was widely felt, however, that the rule in article 85 was appropriate and should apply to all receivables secured by immovable property.

84. With respect to article 86, it was agreed that the law applicable to the enforcement of a security right in a tangible asset should be the law of the State in which the encumbered asset was located at the time of commencement of enforcement, and thus the reference to the law of the State in which enforcement took place should be deleted.

85. With respect to article 89, paragraph 1(b), it was agreed that the draft Guide to Enactment should explain the meaning of the words "the time the issue arises" with illustrations. It was stated, for example, that: (a) the issue of the priority of a security right over the rights of the grantor's insolvency representative would arise when the insolvency proceedings commenced; (b) the issue of the priority of a security right as against another security right would arise when the acts that gave rise to the priority conflict arose; and (c) an issue would arise in litigation upon commencement of the litigation proceedings.

86. With regard to article 93, it was agreed that it should be revised to conform more closely to recommendation 217 of the Secured Transactions Guide.

87. With respect to article 97, it was agreed that option C should be retained, while options A and B should be deleted. It was widely felt that option C stated a clear and simple rule that would apply to all issues, distinguishing only between debt and equity securities, and preventing the secured creditor from manipulating the applicable law by moving certificated securities from State to State.

88. With respect to article 98, it was agreed that it should be revised to read along the following lines: "If the law applicable to an issue is the law of a State that comprises one or more territorial units each of which has its own rules of law in respect of that issue: (a) any reference in the provisions of this chapter to the law of a State means the law in force in the relevant territorial unit; and (b) the internal conflict of laws rules of that State, or, in the absence of such rules, of that territorial unit determine the relevant territorial unit whose substantive law is to apply". It was also agreed that, as it was not an asset-specific rule, article 98 should be moved to the end of section A of chapter VIII that contained general rules.

89. With respect to the headings of the provisions in chapter VIII, in line with the Commission's decision not to include the chapter title in the title of each article (see para. 63 above), it was agreed that the words "Law applicable" should be deleted from the headings of the provisions in chapter VIII.

90. After discussion, the Commission adopted articles 83, 85, 86, 93, 97 and 98 subject to the above-mentioned changes and articles 82, 84, 87, 88-92 and 94-96 unchanged.

Chapter IX. Transition

91. With respect to article 100, paragraph 1(a), it was agreed that the reference to "the law applicable under the conflict-of-laws rules of the enacting State" should be retained outside square brackets.

92. With respect to article 103, it was agreed that a paragraph 5 should be added that would read along the following lines: "If a prior security right referred to in paragraph 2 was made effective against third parties by registration under prior law, the time of registration under prior law is the time to be used for the purposes of applying the priority rules of this Law that refer to the time of registration of a security right".

93. With respect to article 104, it was agreed that paragraph 1 should be deleted as it might be inconsistent with article 103, paragraph 2, its wording might be unclear, and article 103, as modified, already addressed comprehensively the transitional rules for determining the time of third-party effectiveness of prior security rights for the purposes of applying the priority provisions of the draft Model Law.

94. After discussion, the Commission adopted articles 100, 103 and 104 subject to the above-mentioned changes and articles 99, 101, 102 and 105 unchanged.

Miscellaneous provisions

95. The Commission resumed its discussion of article 2, subparagraph (t), and articles 3, 11, 23, 31, 32, 42 and 52 of the draft Model Law, as well as article 24, paragraph 6, and articles 25 and 26 of the draft Registry-related Provisions.

96. With respect to article 3, it was suggested that a new paragraph should be added to read along the following lines: "Nothing in this Law affects any agreement to the use of alternative dispute resolution, including arbitration, mediation, conciliation and online dispute resolution". Strongly held differing views were expressed.

97. One view was that the proposed text should not be included in article 3. It was stated that that text was either superfluous as it stated the obvious or harmful as it failed to address the issue of arbitrability of disputes arising with respect to security agreements or security rights and the need to protect the rights of third parties, but also inappropriately indicated a preference for alternative dispute resolution (ADR) over judicial proceedings. In addition, it was observed that arbitrability was a matter to be dealt with in arbitration law and thus a matter for Working Group II (Arbitration and Conciliation), on the agenda of which it was since 1999.[9] Moreover, it was said that the fact that a regional text or the national laws of some States in a region of the world included such a provision did not mean that a text prepared by an international body such as UNCITRAL and addressed to the whole world should or could follow the same approach. As a compromise, it was thus suggested that the matter ought to be discussed in the draft Guide to Enactment (see A/CN.9/885/Add.3, paras. 55 and 58) and placed on the future work agenda of the Commission (see para. 125 below).

98. The prevailing view, however, was that the proposed text should be included in article 3. It was stated that the use of ADR to resolve disputes arising with respect to security agreements or security rights was essential, in particular for developing countries, to attract investment. In that connection, it was observed that the often inefficient judicial enforcement mechanisms were bound to have a negative impact on the availability and the cost of credit. In addition, it was pointed out that the proposed text was of significant educational importance as it made a statement in support of ADR, without interfering with the way in which the various legal systems dealt with arbitrability, the protection of rights of third parties or access to justice. Moreover, it was said that the matter involved the relationship between the grantor and the secured creditor and thus it could also be addressed in the chapter on the rights and obligations of the parties. After discussion, it was agreed that the proposed text should be included in article 3 with appropriate explanations in the draft Guide to Enactment, on the understanding that it did not prejudice the discussion of arbitrability, the protection of the rights of third parties or access to justice.

[9] Ibid., *Fifty-fourth Session, Supplement No. 17* (A/54/17), paras. 351-353 and 380. At its forty-fourth session, in 2011, the Commission recalled that the issue of arbitrability should be maintained by the Working Group on its agenda (ibid., *Sixty-sixth Session, Supplement No. 17* (A/66/17), para. 203).

99. With respect to article 11, it was agreed that it should be revised to read along the following lines:

> "1. A security right in a tangible asset that is commingled in a mass extends to the mass. A security right in a tangible asset that is transformed into a product extends to the product.
>
> "2. A security right that extends to a mass is limited to the same proportion of the mass as the quantity of the encumbered asset bore to the quantity of the entire mass immediately after the commingling.
>
> "3. A security right that extends to a product is limited to the value of the encumbered asset immediately before it became part of the product."

100. It was also agreed that the definition of the term "mass or product" in article 2, subparagraph (t), should be revised to read along the following lines: "'Mass' means a tangible asset which results when tangible assets are so commingled with other tangible assets of the same kind that they have lost their separate identity"; and "'Product' means a tangible asset which results when tangible assets are so physically associated or united with other tangible assets of a different kind, or when one or more tangible assets are so manufactured, assembled or processed, that they have lost their separate identity".

101. To coordinate it with article 11 as revised, it was agreed that article 31, paragraph 3, should be revised to read along the following lines: "For the purposes of paragraph 2, the obligation secured by a security right that extends to the mass or product is subject to the limitation determined in accordance with article 11." It was also agreed that appropriate adjustments should be made to the headings of the relevant articles to refer to the "transformation", rather than to commingling, of assets into a product.

102. With respect to article 23, it was agreed that it should be revised to read along the following lines: "An acquisition security right in consumer goods with an acquisition price below [an amount to be specified by the enacting State] is effective against third parties upon its creation without any further act".

103. It was also agreed that, to complete the treatment of acquisition security rights in consumer goods, a priority rule should be added as a new paragraph at the end of article 32 that should read along the following lines: "A buyer acquires its rights free of, and the rights of a lessee are not affected by, an acquisition security right in consumer goods unless the security right is made effective against third parties otherwise than under article 23 before the buyer or lessee acquires its rights in the goods".

104. It was noted that: (a) in both article 23 and the new paragraph of article 32, the reference to a transferee was deleted to avoid covering a donee (see para. 35 above); and (b) the reference to a licensee was deleted because a licence in consumer goods either did not exist at all or might exist only in very rare cases.

105. With respect to article 24, paragraph 6, of the draft Model Registry-related Provisions, it was agreed that it should be revised to read along the following lines:

> "6. Notwithstanding paragraph 4, an error in the period of effectiveness of registration specified in an initial or amendment notice, does not render the registration of the notice ineffective, except to the extent that third parties relied on the erroneous information in the registered notice.
>
> "7. Notwithstanding paragraph 4, an error in the maximum amount for which the security right may be enforced entered in an initial or amendment notice, does not render the registration of the notice ineffective. However, its effectiveness against third parties who relied on the amount stated in the notice is limited to that amount or the maximum amount indicated in the security agreement, whichever is lower".

106. After further discussion, it was agreed that the above-proposed article 24, paragraph 7, should be revised to read along the following lines: "Notwithstanding paragraph 4, an error in the maximum amount specified in an initial or amendment notice does not render the registration ineffective, but the priority of the security right is limited to the maximum amount stated in the notice or in the security agreement, whichever is lower".

107. In addition, it was agreed that the above-proposed and agreed paragraphs 6 and 7 of article 24 should appear in the final text of the Model Registry-related Provisions within square brackets and be accompanied with the relevant footnotes drawing the attention of enacting States to the fact that those provisions would be necessary depending on whether they had decided to implement option B or C of article 14 and article 8, subparagraph (e), respectively, of the Model Registry-related Provisions. Moreover, it was agreed that references to the "maximum amount" throughout the draft Model Law should be coordinated. It was also agreed that article 42, paragraph 3, of the draft Model Law should be deleted as it addressed the same issue addressed in the above-proposed and agreed article 24, paragraph 7 (see para. 106 above).

108. With respect to article 25 of the draft Model Registry-related Provisions, it was agreed that it should be revised to read along the following lines:

"1. Subject to paragraphs 2 and 3, the third-party effectiveness and priority of a security right that was made effective against third parties by registration of a notice is not affected by a change in the identifier of the grantor after the notice is registered.

"2. If the identifier of the grantor changes after a notice is registered, a competing security right created by the grantor that was made effective against third parties after the change has priority over the security right to which the notice relates unless the security right to which the notice relates is made effective against third parties by a method other than registration of a notice, or an amendment notice disclosing the new identifier of the grantor is registered:

"(a) Before the expiry of [a short period of time to be specified by the enacting State] after the change; or

"(b) After the expiry of the period referred to in paragraph 2(a) but before the competing security right is made effective against third parties.

"3. If the identifier of the grantor changes after a notice is registered, a buyer to whom the encumbered asset is sold after the change acquires its rights free of the security right to which the notice relates unless it is made effective against third parties by a method other than registration of a notice, or an amendment notice disclosing the new identifier of the grantor is registered:

"(a) Before the expiry of the period referred to in paragraph 2(a); or

"(b) After the expiry of the period referred to in paragraph 2(a) but before the buyer acquires its rights in the asset.

"4. Paragraphs 2 and 3 do not apply if the information in the registered notice referred to in paragraph 1 would be retrieved by a search using the new identifier of the grantor as a search criterion".

109. It was also agreed that a footnote should be added to draw the attention of the enacting State to the fact that the above-proposed and agreed article 25, paragraph 4, would be necessary only for enacting States that would implement option B of article 23, paragraph 1, of the Model Registry-related Provisions.

110. It was also agreed that article 26 of the draft Model Registry-related Provisions should be revised to read along the following lines:

"**Option A**

"1. Subject to paragraphs 2 and 3, the third-party effectiveness and priority of a security right in an encumbered asset that was made effective against third parties by registration of a notice is not affected by a sale of the encumbered asset after the notice is registered to a buyer that acquires its rights subject to the security right under article 32 of the Law.

"2. If an encumbered asset covered by a registered notice is sold to a buyer that acquires its rights subject to the security right to which the notice relates under article 32 of the Law, a competing security right created by the buyer that is made effective against third parties after the sale has priority over the security right to which the notice relates unless the security right to which the notice relates is made effective against

third parties by a method other than registration of a notice, or an amendment notice is registered adding the buyer as a new grantor:

"(a) Before the expiry of [a short period of time to be specified by the enacting State] after the sale; or

"(b) After the expiry of the period referred to in paragraph 2(a) but before the competing security right is made effective against third parties.

"3. If an encumbered asset covered by a registered notice is sold to a buyer that acquires its rights subject to the security right to which the notice relates under article 32 of the Law, a subsequent buyer to whom the initial buyer sells the encumbered asset acquires its rights free of the security right to which the notice relates unless it is made effective against third parties by a method other than registration of a notice, or an amendment notice adding the initial buyer as a new grantor is registered:

"(a) Before the expiry of the period referred to in paragraph 2(a); or

"(b) After the expiry of the period referred to in paragraph 2(a) but before the subsequent buyer acquires its rights in the encumbered asset.

"4. The third-party effectiveness and priority of a security right in intellectual property that was made effective against third parties by registration of a notice is not affected by a sale of the intellectual property after the notice is registered to a buyer that acquires its rights subject to the security right under article 32 of the Law.

"**Option B**

"1. Subject to paragraphs 2 to 4, the third-party effectiveness and priority of a security right in an encumbered asset that was made effective against third parties by registration of a notice is not affected by a sale of the encumbered asset after the notice is registered to a buyer that acquires its rights subject to the security right under article 32 of the Law.

"2. If an encumbered asset covered by a registered notice is sold to a buyer that acquires its rights subject to the security right to which the notice relates under article 32 of the Law, a competing security right created by the buyer that is made effective against third parties after the secured creditor acquires knowledge of the sale and the identifier of the buyer has priority over the security right to which the notice relates unless the security right to which the notice relates is made effective against third parties by a method other than registration of a notice, or an amendment notice adding the buyer as a new grantor is registered:

"(a) Before the expiry of [a short period of time to be specified by the enacting State] after the secured creditor acquires the relevant knowledge; or

"(b) After the expiry of the period referred to in paragraph 2(a) but before the competing security right is made effective against third parties.

"3. If an encumbered asset covered by a registered notice is sold to a buyer that acquires its rights subject to the security right to which the notice relates under article 32 of the Law, a subsequent buyer to whom the encumbered asset is sold after the secured creditor acquires knowledge of the sale and the identifier of the buyer acquires its rights free of the security right to which the notice relates unless it is made effective against third parties by a method other than registration of a notice, or an amendment notice adding the identifier of the initial buyer as a new grantor is registered:

"(a) Before the expiry of the period referred to in paragraph 2(a); or

"(b) After the expiry of the period referred to in paragraph 2(a) but before the subsequent buyer acquires its rights in the encumbered asset.

"4. If there are one or more subsequent sales of the encumbered asset before the secured creditor acquires knowledge of the sale and the identifier of the buyer, the obligation to register an amendment notice under paragraphs 2 and 3 is satisfied if the secured creditor registers an amendment notice adding the identifier of the most recent buyer of which it has knowledge as a new grantor.

"5. The third-party effectiveness and priority of a security right in intellectual property that was made effective against third parties by registration of a notice is not affected by a sale of the intellectual property after the notice is registered to a buyer that acquires its rights subject to the security right under article 32 of the Law.

"**Option C**

"The third-party effectiveness and priority of a security right in an encumbered asset that is made effective against third parties by registration of a notice is not affected by a sale of the asset after the notice is registered to a buyer that acquires its rights subject to the security right under article 32 of the Law".

111. With respect to article 52 (see para. 66 above), it was agreed that it should be revised to read along the following lines: "Upon extinction of a security right in an encumbered asset, a secured creditor in possession must return the asset to the grantor or deliver the asset to a person designated by the grantor".

112. The Commission next considered a proposal for a new article that would follow article 79 and would read along the following lines: "If the maximum amount entered in an initial or amendment notice is lower than that indicated in the security agreement to which the notice relates, the security right to which the notice relates may be enforced only up to the amount entered in the notice, unless there are no other competing claimants that relied on the maximum amount entered in the notice".

113. While some support was expressed, the proposal was objected to. It was widely felt that the above-proposed and agreed article 24, paragraph 7 (see paras. 106-107 above), was sufficient to address situations in which the maximum amount stated in a registered notice was different from the maximum amount stated in the security agreement by providing that the priority of a security right was limited to the maximum amount stated in the notice or in the security agreement, whichever was lower.

114. After discussion, the Commission adopted article 2, subparagraph (t), and articles 3, 11, 23, 31, 32, 42 and 52 of the draft Model Law, as well as article 24, paragraphs 6 and 7, and articles 25 and 26 of the draft Model Registry-related Provisions subject to the above-mentioned changes.

115. At the close of its deliberations on the draft Model Law, the Commission agreed that the Secretariat should be given a mandate to make the changes approved by the Commission, as well as any consequential editorial changes, avoiding making changes where it was not clear whether a change was editorial or substantive. The Commission also agreed that the Secretariat should review the entire draft Model Law to ensure consistency in the terminology used.

3. Adoption of the UNCITRAL Model Law on Secured Transactions

116. Before adopting the UNCITRAL Model Law on Secured Transactions (the "Model Law"), the Commission considered its name in the official languages other than English. The suggestion was made that in Spanish the Model Law should be named as follows: "Ley Modelo sobre Garantías Mobiliarias". It was stated that that name was more correct in Spanish and more understandable for Spanish language readers. It was also said that that was the Spanish name of the "Model Inter-American Law on Secured Transactions". While initially diverging views were expressed as to whether the word "reales" should be added to qualify the word "garantías" and distinguish proprietary from personal security rights, it was ultimately agreed that that was not necessary as the word "mobiliarias", which could not refer to personal security rights, was sufficient to indicate that only proprietary security rights were meant.

117. The concern was expressed, however, that the suggested new Spanish name of the Model Law might cause confusion as the term "secured transactions" ("opérations garanties" in French, "operaciones garantizadas" in Spanish) had been used for several years in connection with the Secured Transactions Guide. To address that concern, it was agreed that a note should be added at the beginning of the Model Law to explain that, as explained in the Secured Transactions Guide, the term "secured transaction" meant a transaction that created a security right and thus there was no substantive difference in the terminology used.

The concern was also expressed that the suggested new Spanish name of the Model Law would affect the name of the Model Law in the language versions other than English and Spanish. In response, it was noted that the name of the Model Law in those other languages also should be correct and understandable for the readers of those languages.

118. After discussion, it was agreed that the Spanish name of the Model Law should be "Ley Modelo de la CNUDMI sobre Garantías Mobiliarias" and the French name should be "Loi type de la CNUDCI sur les sûretés mobilières" (for the same reason mentioned in para. 116 above for the Spanish version, the term "réelles" did not need to qualify the term "sûretés"). It was also agreed that the name of the Model Law in the language versions other than English, French and Spanish should be as consistent as possible with the name of the Model Law in the English, French and Spanish language versions and, at the same time, use terminology that would be as correct and easily understood as possible by the readers of that language.

119. At its 1032nd meeting on 1 July, the Commission adopted the following decision:

"*The United Nations Commission on International Trade Law*,

"*Recalling* General Assembly resolution 2205 (XXI) of 17 December 1966, which established the United Nations Commission on International Trade Law with the purpose of furthering the progressive harmonization and unification of the law of international trade in the interests of all peoples, in particular those of developing countries,

"*Recalling also* General Assembly resolutions 56/81 of 12 December 2001, 63/121 of 11 December 2008, 65/23 of 6 December 2010 and 68/108 of 16 December 2013 in which the General Assembly recommended that States consider or continue to consider becoming parties to the United Nations Convention on the Assignment of Receivables in International Trade (New York, 2001)[10] and giving favourable consideration to the UNCITRAL Legislative Guide on Secured Transactions (2007),[11] the Supplement on Security Rights in Intellectual Property[12] and the UNCITRAL Guide on the Implementation of a Security Rights Registry,[13] respectively,

"*Further recalling* that, at its forty-sixth session, in 2013, it entrusted Working Group VI (Security Interests) with the preparation of a model law on secured transactions based on the recommendations of the UNCITRAL Legislative Guide on Secured Transactions (2007) and consistent with all texts prepared by UNCITRAL on secured transactions,[14]

"*Noting* that the Working Group devoted six sessions, from 2013 to 2016, to the preparation of the draft model law on secured transactions (the 'draft Model Law'),[15]

"*Further noting* that, at its forty-eighth session, in 2015, the Commission approved the substance of the registry-related provisions of the draft Model Law,[16]

"*Further noting* with satisfaction that the draft Model Law is based on the recommendations of the UNCITRAL Legislative Guide on Secured Transactions and consistent with all texts prepared by UNCITRAL on secured transactions, and with those texts thus provides comprehensive guidance to States with respect to legal and practical issues that need to be addressed when implementing a modern secured transactions regime,

---

[11] United Nations publication, Sales No. E.09.V.12.

[12] United Nations publication, Sales No. E.11.V.6.

[13] United Nations publication, Sales No. E.14.V.6.

[14] *Official Records of the General Assembly, Sixty-eighth Session, Supplement No. 17* (A/68/17), paras. 194 and 332.

[15] For the reports of those sessions of the Working Group, see A/CN.9/796, A/CN.9/802, A/CN.9/830, A/CN.9/836, A/CN.9/865 and A/CN.9/871.

[16] *Official Records of the General Assembly, Seventieth Session, Supplement No. 17* (A/70/17), para. 214.

"*Recognizing* that an efficient secured transactions regime with a publicly accessible security rights registry of the kind provided for in the draft Model Law is likely to increase access to affordable secured credit and thus promote economic growth, sustainable development, the rule of law and financial inclusion, as well as assist in combating poverty,

"*Recognizing also* that the harmonization of national secured transactions regimes and registries on the basis of the draft Model Law is likely to increase the availability of secured credit across national borders and thus facilitate the development of international trade, which, if achieved on the basis of equality and mutual benefit to all States, is an important element in promoting friendly relations among States,

"*Recognizing further* that secured transactions law reform could not be effectively implemented without the establishment of an efficient, publicly accessible security rights registry where information about the potential existence of a security right in movable assets may be registered, and that States urgently need guidance with respect to the establishment and operation of such registries,

"*Expressing* its appreciation to international intergovernmental and non-governmental organizations active in the field of secured transactions law reform for their participation in and support for the development of the draft Model Law,

"*Having considered* the draft Model Law at its forty-ninth session, in 2016,

"*Drawing attention* to the fact that the text of the draft Model Law was circulated for comment before the forty-ninth session of the Commission to all Governments invited to attend sessions of the Commission and the Working Group as members and observers and that the comments received were before the Commission at its forty-ninth session,[17]

"*Considering* that the draft Model Law has received sufficient consideration and has reached the level of maturity for it to be generally acceptable to States,

"1. *Adopts* the UNCITRAL Model Law on Secured Transactions, consisting of the text contained in documents A/CN.9/884 and addenda 1-4, with amendments adopted by the Commission at its forty-ninth session, and authorizes the Secretariat to edit and finalize the text of the UNCITRAL Model Law on Secured Transactions pursuant to the deliberations of the Commission at that session;

"2. *Requests* the Secretary-General to publish the UNCITRAL Model Law on Secured Transactions, including electronically and in the six official languages of the United Nations, and to disseminate it broadly to Governments and other interested bodies;

"3. *Recommends* that all States give favourable consideration to the UNCITRAL Model Law on Secured Transactions when revising or adopting legislation relevant to secured transactions, and invites States that have used the Model Law to advise the Commission accordingly;

"4. *Also recommends* that, where necessary, States continue giving favourable consideration to the UNCITRAL Guide on the Implementation of a Security Rights Registry when revising relevant legislation, administrative regulations or guidelines, and to the UNCITRAL Legislative Guide on Secured Transactions and the Supplement on Security Rights in Intellectual Property when revising or adopting legislation relevant to secured transactions, and invites States that have used the guides to advise the Commission accordingly;

"5. *Also recommends* that all States continue to consider becoming parties to the United Nations Convention on the Assignment of Receivables in International Trade, the principles of which are also reflected in the UNCITRAL Model Law on Secured Transactions, and the optional annex of which refers to the registration of notices with regard to assignments."

[17] A/CN.9/886, A/CN.9/887 and A/CN.9/887/Add.1.

B. Consideration of the draft Guide to Enactment of the draft Model Law on Secured Transactions

120. The Commission recalled that, at its forty-eighth session, in 2015, it had agreed that the draft Guide to Enactment should be prepared and referred that task to the Working Group.[18] The Commission noted that the Working Group, at its twenty-eighth session, had noted that, in order to complete the draft Guide to Enactment, it might need an additional one or two sessions, and, at its twenty-ninth session, decided to request the Commission one or two sessions for that purpose (A/CN.9/865, para. 104, and A/CN.9/871, para. 91, respectively).

121. At its current session, the Commission had before it the draft Guide to Enactment (A/CN.9/885 and addenda 1-4). The Commission noted that the draft Guide to Enactment provided background and explanatory information that could assist States in considering the Model Law for adoption. In addition, the Commission noted with appreciation that the draft Guide to Enactment was already at an advanced stage. Moreover, the Commission noted that a number of issues were referred to the draft Guide to Enactment even at its current session, and thus the draft Guide to Enactment was an extremely important text for the implementation and interpretation of the Model Law.

122. After discussion, the Commission agreed to give the Working Group up to two sessions to complete its work and submit the draft Guide to Enactment to the Commission for final consideration and adoption at its fiftieth session, in 2017. In addition, the Commission agreed that, if the Working Group completed its work in less than two sessions, it should use any time remaining to discuss its future work in a session or in a colloquium to be organized by the Secretariat. Moreover, the Commission agreed that, subject to further discussion of the overall future work of the Commission (see chapter XV below), a colloquium to discuss future work on security interests should be held even if the Working Group used the full time of the two sessions to complete its work on the draft Guide to Enactment.

123. Having mandated work on the draft Guide to Enactment, the Commission requested the Secretariat to reflect that decision in its publications programme and take any other measures to ensure future publication of any final text resulting from that work, including electronically and in the six official languages of the United Nations.

C. Possible future work in the area of security interests

124. The Commission recalled that, at its forty-eighth session, in 2015, it had noted that, at its forty-third session, in 2010, it had placed on its future work programme the preparation of a contractual guide on secured transactions and a uniform law text on intellectual property licensing.[19] At the current session, the Commission decided that those matters should be retained on its future work programme and considered at a future session on the basis of notes to be prepared by the Secretariat, after a colloquium or expert group meeting, to be held within existing resources (see para. 122 above).

125. In addition, the Commission decided that the following topics should also be placed on its future work programme and considered at a future session on the basis of notes to be prepared by the Secretariat, after a colloquium or expert group meeting, to be held within existing resources (see para. 122 above): (a) the question whether the Model Law and the draft Guide to Enactment might need to be expanded to address matters related to secured finance to micro, small and medium-sized enterprises (MSMEs); (b) the question whether any future work on a contractual guide on secured transactions should discuss contractual issues of concern to MSMEs (e.g. transparency issues); (c) any question that might not have already been addressed in the area of warehouse receipt financing (e.g. the negotiability of warehouse receipts); and (d) the question whether disputes arising from security agreements could be resolved through ADR mechanisms (see A/CN.9/871, paras. 83-86, and A.CN.9/885/Add.3, paras. 55 and 58; see also paras. 96 and 97 above).

---

[18] *Official Records of the General Assembly, Seventieth Session, Supplement No. 17* (A/70/17), para. 216.

[19] Ibid., para. 217.

D. Coordination and cooperation

126. The Commission noted with appreciation the efforts of the Secretariat in coordinating and cooperating with a number of organizations active in the area of security interests. It was noted that the Secretariat had provided comments on the World Bank Principles contained in the World Bank Insolvency and Creditor Rights Standard (the "Standard") and was expecting to receive the comments of the World Bank on a revised draft of the Standard that contained the key recommendations of the Secured Transactions Guide. In addition, it was noted that the Secretariat had provided suggestions to the European Commission with a view to ensuring a coordinated approach to the law applicable to the third-party effects of assignments of receivables, taking into account the approach followed in the Assignment Convention, the Secured Transactions Guide and the Model Law, and noted that the European Commission was to issue a proposal on that topic for consultation. Moreover, the Commission noted that Unidroit had referred to an inter-governmental meeting the draft fourth protocol to the Convention on International Interests in Mobile Equipment on matters specific to agricultural, construction and mining equipment, and requested the Secretariat to attend that meeting with a view to ensuring the avoidance of duplication of efforts that could lead to overlap and conflict with the Commission's work on security interests. The Commission also noted with appreciation the Secretariat's coordination efforts with the World Bank Group, the Organization of American States (OAS) and the Asian Pacific Economic Cooperation (APEC) in providing technical assistance and assistance with respect to local capacity-building in the area of security interests.

127. After discussion, the Commission renewed the mandate given to the Secretariat to continue with those coordination and cooperation efforts. It was widely felt that cooperation should continue and expand, focusing on technical assistance and training activities, including with respect to security rights registries. It was also generally agreed that the joint publication *UNCITRAL, Hague Conference and Unidroit Texts on Security Interests*[20] should be updated to include texts adopted by those and other organizations on security interests after the publication was issued. It was further agreed that consideration should be given to including in the publication to be updated references to the Model Inter-American Law on Secured Transactions and, if possible, other regional texts on security interests.

128. Having mandated work on the joint publication on security interests, the Commission requested the Secretariat to reflect that decision in its publications programme and take any other measures to ensure future publication of any final text resulting from that work, including electronically and in the six official languages of the United Nations.

IV. Consideration of issues in the area of arbitration and conciliation

A. Finalization and adoption of the revised UNCITRAL Notes on Organizing Arbitral Proceedings

1. Introduction

129. The Commission recalled its decision at the forty-sixth session, in 2013, that Working Group II (Arbitration and Conciliation) should undertake work on the revision of the UNCITRAL Notes on Organizing Arbitral Proceedings[21] (referred to as the "Notes").[22] The Commission further recalled that, at its forty-seventh session, in 2014, it had agreed that the Working Group should commence work on the revision of the Notes and, in so doing, should focus on matters of substance, leaving drafting to the Secretariat.[23]

130. The Commission recalled that at its forty-eighth session, in 2015, the Commission had before it the draft version of the Notes (contained in document A/CN.9/844), as it resulted from the work of the Working Group at its sixty-first (Vienna, 15-19 September 2014) and

[20] United Nations publication V.12-51563.

[21] *UNCITRAL Yearbook*, vol. XXVII: 1996, part three, annex II.

[22] *Official Records of the General Assembly, Sixty-eighth Session, Supplement No. 17* (A/68/17), para. 130.

[23] Ibid., *Sixty-ninth Session, Supplement No. 17* (A/69/17), para. 128.

sixty-second (New York, 2-6 February 2015) sessions.[24] At that session, the Commission had approved that draft version of the Notes in principle and requested the Secretariat to prepare an updated text in accordance with the deliberations and decisions at that session for finalization and adoption at the forty-ninth session, in 2016.[25] The Commission had also agreed that the Secretariat could seek input from the Working Group on specific issues during its sixty-fourth session (New York, 1-5 February 2016).[26]

131. At its current session, the Commission had before it the report of the Working Group on the work of its sixty-fourth session (A/CN.9/867), during which specific issues in the draft version of the Notes (contained in document A/CN.9/WG.II/WP.194) were considered. The Commission had before it the text of the draft revised Notes as contained in document A/CN.9/879 (referred to below as the "draft revised Notes"), which reflected the deliberations of the Working Group at that session.

2. Consideration of the draft revised Notes

Title of the revised Notes

132. The Commission agreed that the revised Notes should be titled the "2016 UNCITRAL Notes on Organizing Arbitral Proceedings" and also referred to as the second edition of the Notes.

Preface

133. The Commission approved the preface without any modification.

Introduction

134. The Commission agreed to replace the word "needs" by the words "will need" in the last sentence of paragraph 5 of the draft revised Notes to clarify that the arbitral tribunal could raise a matter when appropriate, without having to wait until the matter actually came up. With respect to the last sentence of paragraph 8 of the draft revised Notes, a suggestion to include a reference to the legal tradition at the place of arbitration when choosing a set of arbitration rules for reference purposes did not receive support. Subject to the modification in paragraph 5 of the draft revised Notes, the Commission approved the introduction.

Annotations

135. The Commission approved draft revised Notes 1, 4, 6, 7, 10, 12, 15, 16, 18 and 20 without any modification.

Note 2 (Language or languages of the arbitral proceedings)

136. With respect to the second sentence in paragraph 25 of the draft revised Notes, it was agreed that the words "any of the" should replace the words "that" before the words "multiple languages" to avoid giving the impression that all languages must be used during the arbitral proceedings. Subject to that modification, the Commission approved draft revised Note 2.

Note 3 (Place of arbitration)

137. With respect to paragraph 29 of the draft revised Notes, the Commission agreed that the words "the nature and frequency of" in subparagraph (ii) should be deleted. Subject to that modification, the Commission approved draft revised Note 3.

Note 5 (Costs of arbitration)

138. The Commission noted that paragraph 40 had been included in the draft revised Notes following deliberations of the Working Group at its sixty-fourth session to indicate that in-house costs might also be an item of the arbitration costs. It was noted that a reference to in-house costs was important as the draft revised Notes should not mistakenly imply that only the legal fees of external counsel would be recoverable. It was further noted that the

[24] Ibid., *Seventieth Session, Supplement No. 17* (A/70/17), para. 15.
[25] Ibid., para. 133.
[26] Ibid.

treatment of in-house costs as part of arbitration costs was controversial and thereby paragraph 40 simply aimed at presenting the different approaches.

139. It was widely felt that paragraphs 40 and 41 appropriately addressed the relevant issues in a balanced manner, and contained references to possible criteria used by tribunals in awarding in-house costs. However, a number of suggestions were made in relation to paragraph 40.

140. It was suggested to delete references to "management and other costs" and "managing directors, experts and other staff members", as they indicated too wide and uncertain a category of costs and such costs should not be recoverable. In this regard, it was argued that paragraph 40 should be limited to costs relating to legal representation. That suggestion did not receive support on the ground that there was no basis on which to limit recoverable costs to legal representation.

141. A suggestion was made to highlight in paragraph 40 that "parties" included States and government agencies. It was explained that costs relating to internal counsel or representatives of States and government agencies in investor-State arbitration were usually not referred to as "in-house costs". However, it was agreed that the suggested clarification was not necessary as the draft revised Notes adopted a generic approach and such distinction with regard to the parties were not made in other parts of the draft revised Notes.

142. A suggestion was made that paragraph 40 should provide that some arbitral tribunals had awarded internal legal costs where a party had prepared its defence mainly through use of its own in-house counsel. That suggestion did not receive support as the last sentence of paragraph 40 sufficiently addressed that matter. Another suggestion to clearly define "in-house costs" and to make a clear distinction with other costs also did not receive support.

143. With respect to a further suggestion that the draft revised Notes should distinguish investment arbitration and deal with issues arising from such arbitration in a separate manner, the Commission recalled its decision that the Notes should keep their generic nature and that specific aspects of investment arbitration should only be dealt with separately with respect to transparency as presented in draft revised Note 6.

144. A suggestion was made to provide that when assessing the reasonableness of in-house costs, consideration should be given to the costs that would have been incurred had such services been provided by an external service provider, and that the amount recoverable should be limited thereto. That suggestion did not receive support.

145. After discussion, it was agreed that the first sentence of paragraph 40 should be revised to refer to legal representation generally. The Commission further agreed that draft revised Note 5 should highlight the importance of controlling costs as well as the need to preserve the cost-effectiveness of the arbitration process, possibly in paragraph 47.

146. With respect to paragraph 49 of the draft revised Notes, a suggestion to indicate that it would be more appropriate for decisions on costs to be made simultaneously with the final award did not receive support.

147. Subject to the modifications in paragraph 145 above, the Commission approved draft revised Note 5.

Note 8 (Interim measures)

148. In response to a question raised in connection with draft revised Note 8, it was confirmed that issues pertaining to emergency arbitrator were not dealt with despite their increasing significance, because those issues arose prior to the commencement of the arbitral proceedings and thus were outside the scope of the Notes.

149. The Commission agreed that the order of paragraphs 61 and 62 should be reversed, as paragraphs 60 and 62 dealt with interim measures in a general fashion while paragraph 61 dealt with ex parte interim measures. Subject to that modification, the Commission approved draft revised Note 8.

Note 9 (Written submissions, witness statements, expert reports and documentary evidence ("submissions"))

150. The Commission agreed that reference to the word "pleadings" should be avoided as that word was understood differently in various jurisdictions. Subject to that modification, the Commission approved draft revised Note 9.

Note 11 (Points at issue and relief or remedy sought)

151. The Commission agreed that the words "to ensure the enforceability of the arbitral award", in paragraph 71, should be replaced by the words "to ensure the enforceability of any arbitral award that might grant such relief or remedy". Subject to that modification, the Commission approved draft revised Note 11.

Note 13 (Documentary evidence)

152. The Commission agreed that wording along the following lines should be added at the end of the first sentence of paragraph 77 of the draft revised Notes: "and often as well, a statement as to why the requested documents are believed to be in the possession of the other party and are not otherwise available to the requesting party." With respect to the last sentence of paragraph 78, the Commission agreed that the words ", if necessary, may" should be replaced by the words "will often". Subject to those modifications, the Commission approved draft revised Note 13.

Note 14 (Witnesses of fact)

153. With respect to paragraph 92 of the draft revised Notes, a suggestion to delete the second sentence did not receive support. However, it was agreed that the words "securing the attendance of" could be replaced by the word "inviting". The Commission also agreed that paragraphs 91 and 92 would be better placed in draft revised Note 17, possibly with paragraph 125. Subject to those modifications, the Commission approved draft revised Note 14.

Note 17 (Hearings)

154. With respect to paragraph 125, a suggestion was made that the order of the fourth and fifth sentences should be reversed as a decision by the tribunal not to hear a witness would mean that the tribunal had indeed given weight to the witness statement. That suggestion did not receive support.

155. With respect to the fourth sentence of paragraph 125, the Commission agreed that the words "while this may raise concerns about the requesting party's opportunity to present its case" should be replaced by the words "if the arbitral tribunal deems the proposed testimony, for example, immaterial or purely cumulative, having regard to the requesting party's reasonable opportunity to present to its case." It was further agreed that this should not only apply to cross-examination but also to direct examination. Subject to that modification, the Commission approved draft revised Note 17.

Note 19 (Joinder and consolidation)

156. With respect to paragraph 140 of the draft revised Notes, it was agreed that the fourth sentence could be expanded to refer to the relevance of the new party to be joined as well as to the negative impact that joinder could have on the proceedings including possible delays. Subject to that modification, the Commission approved draft revised Note 19.

3. Approval of the draft revised Notes

157. Upon completion of its deliberation, the Commission approved the draft revised Notes and requested the Secretariat to prepare a final version in accordance with the deliberations and decisions (see section 2 above).

158. At its 1037th meeting on 7 July, the Commission adopted the following decision:

"*The United Nations Commission on International Trade Law*,

"*Recalling* General Assembly resolution 2205 (XXI) of 17 December 1966, which established the United Nations Commission on International Trade Law with a mandate to

further the progressive harmonization and unification of the law of international trade and in that respect to bear in mind the interests of all peoples, in particular those of developing countries, in the extensive development of international trade,

"*Reaffirming* the value and increased use of arbitration as a method of settling disputes,

"*Recognizing* the need for revising the UNCITRAL Notes on Organizing Arbitral Proceedings,[27] initially adopted in 1996, to conform to current arbitral practices,

"*Noting* that the purpose of the UNCITRAL Notes on Organizing Arbitral Proceedings is to list and briefly describe matters relevant to the organization of arbitral proceedings and that the Notes, prepared with a focus on international arbitration, are intended to be used in a general and universal manner, regardless whether the arbitration is administered by an arbitral institution,

"*Noting* that the UNCITRAL Notes on Organizing Arbitral Proceedings do not seek to promote any practice as best practice given that procedural styles and practices in arbitration do vary and that each of them has its own merit,

"*Noting further* that the revision of the UNCITRAL Notes on Organizing Arbitral Proceedings benefited greatly from consultations with Governments, interested intergovernmental and international non-governmental organizations active in the field of arbitration, including arbitral institutions, as well as individual experts,

"1. *Adopts* the 2016 UNCITRAL Notes on Organizing Arbitral Proceedings consisting of the text contained in document A/CN.9/879, with amendments adopted by the Commission at its forty-ninth session, and authorizes the Secretariat to edit and finalize the text of the Notes pursuant to the deliberations of the Commission at that session;

"2. *Recommends* the use of the Notes including by parties to arbitration, arbitral tribunals, arbitral institutions as well as for academic and training purposes with respect to international commercial dispute settlement;

"3. *Requests* the Secretary-General to publish the 2016 UNCITRAL Notes on Organizing Arbitral Proceedings, including electronically, and in the six official languages of the United Nations, and to make all efforts to ensure that the Notes become generally known and available."

4. Promotion of the 2016 UNCITRAL Notes on Organizing Arbitral Proceedings

159. The Commission had before it a proposal by ASA with the aim of cooperating with UNCITRAL in promoting the 2016 UNCITRAL Notes on Organizing Arbitral Proceedings through the development of an online arbitration toolbox (referred to below as the "Toolbox") for users of arbitration (A/CN.9/893). The Commission heard an oral presentation by the president of ASA providing a brief introduction of the Toolbox, which addressed practical issues in commercial arbitration, highlighting the flexible nature of the arbitration proceeding and taking into account the diverse approaches. It was stated that the Toolbox could provide a useful platform for training purposes, which could support the technical assistance and capacity-building activities of UNCITRAL. It was explained that the Toolbox project would be funded entirely by ASA requiring no allocation of resources of UNCITRAL and that the Toolbox would not aim at revisiting issues in the 2016 UNCITRAL Notes on Organizing Arbitral Proceedings but rather complement them. While it was mentioned that a possible form of cooperation could be establishing a joint website presenting the Toolbox, it was clarified that at this stage, ASA would not be seeking the Commission's endorsement of the contents of the Toolbox, which was still being prepared. In concluding, the president of ASA sought the Commission's preliminary support for the project and suggested that the Secretariat be given the mandate to seek possible cooperation on the Toolbox project.

160. After discussion, the Commission expressed its appreciation to ASA for its efforts in preparing a very timely and useful tool, which would be available free of charge, for promotion of the 2016 UNCITRAL Notes on Organizing Arbitral Proceedings and arbitration in general. The Secretariat was requested to seek cooperation with ASA, and to report to the Commission, at its next session, on the concrete form of such cooperation, including the possible reliance on outside experts. It was agreed that, if the Commission

[27] *UNCITRAL Yearbook*, vol. XXVII: 1996, part three, annex II.

were eventually requested to endorse the Toolbox, its content would have to be considered by the Commission.

161. In the course of the deliberation, a general view was expressed that caution should be exercised in choosing organizations with which the Commission or the Secretariat would seek cooperation, and that, in that respect, objective criteria might need to be established. The vigilance of the Secretariat in making rigorous selections aimed at preserving neutrality and encompassing as many organizations as possible was acknowledged.

B. Progress report of Working Group II

162. The Commission recalled that, at its forty-seventh session, in 2014, it had agreed that the Working Group should consider at its sixty-second session the issue of enforcement of international settlement agreements resulting from conciliation proceedings and should report to the Commission on the feasibility and possible form of work in that area.[28] At that session, the Commission had also invited delegations to provide information to the Secretariat in respect of that subject matter.[29]

163. The Commission also recalled that at its forty-eighth session, in 2015, it had before it a compilation of responses received by the Secretariat (A/CN.9/846 and addenda).[30] At that session, it had agreed that the Working Group should commence work at its sixty-third session on the topic of enforcement of settlement agreements to identify relevant issues and develop possible solutions, including the preparation of a convention, model provisions or guidance texts. The Commission had also agreed that the mandate of the Working Group with respect to that topic should be broad to take into account the various approaches and concerns.[31]

164. At the current session, the Commission considered the reports of the Working Group on the work of its sixty-third session (A/CN.9/861), held in Vienna from 7 to 11 September 2015, and sixty-fourth session (A/CN.9/867), held in New York from 1 to 5 February 2016. The Commission was informed that the Working Group, at its sixty-fourth session, requested the Secretariat to prepare a document outlining the issues considered at the session and setting out draft provisions without prejudice to the final form of the instrument, grouping provisions into broad categories (A/CN.9/867, para. 15).

165. After discussion, the Commission commended the Working Group for its work on the preparation of an instrument dealing with enforcement of international commercial settlement agreements resulting from conciliation and confirmed that the Working Group should continue its work on the topic. Having reaffirmed the mandate, the Commission requested the Secretariat to reflect that decision in its publications programme and take any other measures to ensure future publication of any final text resulting from that work, including electronically and in the six official languages of the United Nations.

C. Establishment and functioning of the transparency repository

166. The Commission recalled that, under article 8 of the UNCITRAL Rules on Transparency in Treaty-based Investor-State Arbitration[32] (the "Transparency Rules" or "Rules"), the repository of published information under the Rules (the "transparency repository") had to be established.

167. The Commission further recalled that, at its forty-sixth session, in 2013, it expressed its strong and unanimous opinion that the Secretariat should fulfil the role of the transparency repository.[33] The Commission also recalled that, at its forty-seventh session, in 2014, the Secretariat had reported on steps taken in respect of the repository function to be

---

[29] Ibid.
[30] Ibid., *Seventieth Session, Supplement No. 17* (A/70/17), para. 135.
[31] Ibid., para. 142.
[32] Ibid., *Sixty-eighth Session, Supplement No. 17* (A/68/17), annex I.
[33] Ibid., para. 80.

performed, including the preparation of a dedicated web page (www.uncitral.org/transparency-registry).[34]

168. The Commission further recalled that, at its forty-eighth session, in 2015, it had reiterated its strong and unanimous opinion that the secretariat of the Commission should fulfil the role of the transparency repository and that it should establish and operate the transparency repository, initially as a pilot project.[35] The General Assembly, in its resolution 70/115 of 14 December 2015, noted with approval "the view of the Commission that the repository of published information under the Rules on Transparency in Treaty-based Investor-State Arbitration[36] should be fully operational as soon as possible, as the repository constituted a central feature both of the Rules on Transparency and of the United Nations Convention on Transparency in Treaty-based Investor-State Arbitration (Mauritius Convention on Transparency) by providing a consolidated, transparent and easily accessible global case record database for all investor-State arbitrations conducted pursuant to the Rules on Transparency and the Convention. In this regard, the General Assembly "requested the Secretary-General to establish and operate through the secretariat of the Commission the repository of published information under the Rules on Transparency, in accordance with article 8 of the Rules, initially as a pilot project until the end of 2016, to be funded entirely by voluntary contributions".[37]

169. With respect to the budget situation, the Commission was informed that in early 2016, the Secretariat had received a grant from the Fund for International Development (OFID) of the Organization of the Petroleum Exporting Countries (OPEC) in the amount of 125,000 USD and funding by the European Union in the amount of 100,000 Euro, which allowed the secretariat of the Commission to operate the project on a temporary basis until end of 2016 and beyond. The Commission expressed its appreciation to both the European Union and OFID for their contributions.

170. The Commission noted with satisfaction that a legal officer had been hired in April 2016 to operate the transparency repository. Further, the Commission noted that, since its forty-eighth session, in 2015, information on two additional cases had been made available on the transparency repository where the Rules applied under article 1(2)(a) by agreement of the parties to the disputes, in arbitration arising under the ICSID Rules in one case, and under the UNCITRAL Arbitration Rules administered by the Permanent Court of Arbitration in the other case. Further, the Commission noted that the Secretariat had received an increasing number of inquiries on the Transparency Rules and performed a steadily increasing number of capacity-building activities on the UNCITRAL standards on transparency in treaty-based investor-State arbitration.

171. The Commission was informed that the Secretariat was currently in contact with the European Union and OFID to possibly obtain renewed funding. More generally, the Commission reiterated its appeal to all States, international organizations and other interested entities to consider making contributions to the funding of the transparency repository, preferably in the form of multi-year contributions, so as to facilitate its continued operation.

172. The Commission was informed that the Secretariat would be able to continue operating the transparency repository until the end of 2017 with the funds remaining from the contribution received from the European Union and OFID in early 2016 and taking into account possible new commitments.

173. After discussion, the Commission reiterated its strong and unanimous opinion that the secretariat of the Commission should fulfil the role of the transparency repository and that it should continue to operate the transparency repository. Accordingly, the Commission recommended to the General Assembly that it request the secretariat of the Commission to continue operating the repository of published information in accordance with article 8 of the Transparency Rules, as a pilot project until the end of 2017, to be funded entirely by voluntary contributions. The Commission also requested that the Commission and the General Assembly be informed of developments regarding the funding and budgetary situation of the transparency repository based on its pilot operation.

[37] General Assembly resolution 70/115 of 14 December 2015, para. 2.

D. Possible future work in the area of arbitration and conciliation

174. The Commission held a preliminary discussion regarding future work in the area of international arbitration and conciliation. The conclusions reached during that preliminary discussion were reaffirmed by the Commission upon its consideration of agenda item 16 (Work programme of the Commission) (see chapter XV below).

1. Concurrent proceedings

175. On the issue of concurrent proceedings, the Commission recalled that, at its forty-seventh session, in 2014, it had agreed that the Secretariat should explore the matter further and that work should focus on treaty-based investor-State arbitration, without disregarding the issue in the context of international commercial arbitration.[38] The Commission further recalled that, at its forty-eighth session, in 2015, it had considered a note by the Secretariat in relation to concurrent proceedings in investment arbitration, which outlined the practical issues, the variety of situations that led to concurrent proceedings, the various options available to address those issues, and the possible form of any instrument to be developed in that area (A/CN.9/848).[39] There was general support for retaining the topic of concurrent proceedings on the agenda of the Commission. Accordingly, it was suggested that the Secretariat should keep abreast of developments in that area, provide further analysis and set out the issues and possible solutions in a neutral manner, which would assist the Commission making an informed decision at a later stage. It was suggested that work should also take into consideration concurrent proceedings in international commercial arbitration. At that session, the Commission requested the Secretariat to explore the topic further, in close cooperation with experts including those from other organizations working actively in that area and to report to the Commission at a future session with a detailed analysis of the topic including possible work that could be carried out.[40]

176. In accordance with that request, the Commission, at the current session, had before it a note by the Secretariat in relation to concurrent proceedings in international arbitration (A/CN.9/881). The Commission expressed its appreciation to the Secretariat for the note, which outlined the causes and impact of concurrent proceedings, existing principles and mechanisms to address concurrent proceedings and possible future work in that area.

177. A view was expressed that there was not much merit in retaining the topic of concurrent proceedings on the future work agenda of the Commission and that it would be preferable to utilize resources on other topics. In support of that view, it was stated that concurrent proceedings were rare and sporadic, and that any guidance provided to arbitral tribunals on the topic would be incomplete, as it would be limited to instances where the UNCITRAL Arbitral Rules were applicable. It was also mentioned that there were already existing mechanisms in investment treaties in which States could seek guidance. It was mentioned that, while the Commission might choose to address concurrent proceedings at a later stage, the topic did not warrant further work by the Secretariat at the current stage.

178. Nonetheless, there was general support that the topic of concurrent proceedings, despite the challenges posed, should be kept on the future work agenda of the Commission. It was mentioned that the note by the Secretariat clearly set out the issues that need to be addressed and exemplified that the existing legal framework and relevant rules did not address such circumstances. It was emphasized that concurrent proceedings posed a genuine problem and was of great significance as it could be harmful, particular to developing States, faced with such proceedings.

179. On the possible form of work, as discussed in section IV of document A/CN.9/881, support was expressed for providing guidance to arbitral tribunals faced with concurrent proceedings. It was suggested that such work could address how an arbitral tribunal should deal with concurrent proceedings and avoid contradictory decisions, possibly utilizing its inherent power provided in article 17 of the UNCITRAL Arbitration Rules and similar provisions in other arbitration rules. Support was also expressed for providing prudent guidance to States that might be faced with concurrent proceedings or wanted to avoid them. It was suggested that concrete examples of existing mechanisms or provisions in investment

---

[38] *Official Records of the General Assembly, Sixty-ninth Session, Supplement No. 17* (A/69/17), para. 130.

[39] Ibid., *Seventieth Session, Supplement No. 17* (A/70/17), para. 144.

[40] Ibid., paras. 145-147.

treaties and possible models to be followed could be provided, supplementing the work already done by other organizations. However, some doubts were expressed about the possible preparation of a multilateral instrument to address concurrent proceedings.

180. As to whether the possible work should focus on investment and/or commercial arbitration, it was suggested that a distinction should be made if work were to be undertaken. It was generally felt that there was a more pressing need for work to focus on concurrent proceedings in investment arbitration. It was also mentioned that concurrent proceeding in commercial arbitration deserved a similar level of attention. In addition, it was suggested that possible work on the topic should also address successive proceedings, thus encompassing the full range of instances comprising multiple proceedings.

181. After discussion, the Commission agreed that the Secretariat should continue to explore the topic and further develop possible work that could be undertaken with regard to concurrent proceedings as mentioned in section IV of document A/CN.9/881, for consideration by the Commission at a future session.

2. Code of ethics/conduct for arbitrators

182. The Commission recalled that, at its forty-eighth session, in 2015, it had before it a proposal for future work on a code of ethics for arbitrators in investment arbitration (A/CN.9/855), which suggested that work on the topic could relate to conduct of arbitrators, their relationship with those involved in the arbitration process, and the values that they were expected to share and convey. It was further recalled that the Commission requested the Secretariat to explore the topic in a broad manner, including in the field of both commercial and investment arbitration, taking into account existing laws, rules and regulations as well as any standards established by other organizations. The Secretariat was requested to assess the feasibility of work in that area and report to the Commission at a future session.[41]

183. Pursuant to that request, the Commission had before it a note by the Secretariat in relation to ethics in international arbitration (A/CN.9/880). The Commission expressed its appreciation to the Secretariat for the note, which outlined the concept of ethics in international arbitration as well as existing legal frameworks on ethics and posed some questions to be considered before possibly engaging in future work in that area.

184. In support of retaining the topic of code of ethics on the future work agenda, it was said that there was currently a wide diversity and multiple layers of ethical norms and standards, and that therefore, it would be useful for the Commission to undertake work on the topic. It was underlined that different ethical norms and standards were applicable, and there were currently no clear criteria for determining how they interacted or which should prevail in a given situation. It was suggested that future work on the topic could take various approaches including (a) substantive work on harmonizing such norms or establishing minimum standards, yet taking into account considerations of cultural diversity, and (b) how to address the inter-relationship of multiple layers of norms and standards and providing guidance on which ethical standards would apply. In that respect, a question was raised regarding the scope of work, namely whether such work should focus on a code of ethics that applied to arbitrators only, or that also applied to other participants in the arbitration process, such as counsel and experts. In response, reservations were expressed regarding possible extension of the work to counsel and experts, as different sets of rules on ethics would usually be applicable, such as those governing the bar. It was further mentioned that issues relating to conflicts of interest of arbitrators could usefully be further elaborated.

185. Views were also expressed that the wide array of existing norms and standards on ethics would make it superfluous for the Commission to undertake work on the topic. It was said that notions such as independence and impartiality were already embedded in most domestic arbitration laws, arbitration rules, and institutions' codes of ethics. It was further pointed that in the field of treaty-based investor-State arbitration, codes of ethics were being developed as part of, or as an annex to, investment treaties and, therefore, the timeliness of undertaking work in that field was questioned.

186. After discussion, the Commission requested the Secretariat to continue exploring the topic further, in close cooperation with experts including those from other organizations

[41] Ibid., paras. 148-151.

working actively in that area, and to report to the Commission at a future session on the various possible approaches as outlined above.

3. Possible work on reform of investor-State dispute settlement system

187. The Commission recalled that at its forty-eighth session, in 2015, it had been informed that the Secretariat was conducting a study on whether the Mauritius Convention on Transparency could provide a useful model for possible reforms in the field of investor-State arbitration, in conjunction with the Center for International Dispute Settlement (CIDS) of the University of Geneva and the Graduate Institute of International and Development Studies. The Secretariat was requested to report to the Commission at a future session with an update on that matter.[42]

188. In accordance with that request, the Commission had before it a note providing an update on the study conducted within the framework of a research project of CIDS and a short overview of its outcome (A/CN.9/890). The Commission expressed its appreciation to the Secretariat and to CIDS for the research conducted. In particular, the Commission expressed its appreciation to Gabrielle Kaufmann-Kohler and Michele Potestà for the thorough analysis of the topic.

189. The Commission heard an oral presentation of the CIDS research study, which sought to provide a preliminary analysis of the issues that would need to be considered if a reform of the investor-State dispute settlement system were to be pursued at a multilateral level. It was explained that the research study analysed whether the Mauritius Convention on Transparency could serve as a model for further reforms, and sought to map the main options available in reforming investor-State dispute settlement. It was further explained that the research study borrowed from existing experience with various international courts and tribunals, including inter-state dispute settlement bodies (such as the International Court of Justice and the World Trade Organization (WTO)) as well as other dispute settlement mechanisms, such as the Iran-United States Claims Tribunal and regional courts. It was pointed out that two scenarios were considered in depth in the research study: the design of a permanent investment tribunal and of an appeal mechanism. It was further explained that the final part of the research study addressed how States might extend the proposed new dispute settlement system to their existing and future investment treaties. The research study suggested that, although not the only model that could be envisaged for those purposes, an opt-in convention modelled on the Mauritius Convention on Transparency with certain adaptations could effectively extend new dispute settlement options to existing investment treaties. However, it was pointed out that such a convention would raise treaty law issues, which the research study discussed.

190. Support was expressed for including the topic of reforms of the investor-State dispute settlement system in the future work agenda of the Commission. It was said that criticism had developed towards investor-State arbitration in general, which included the alleged lack of impartiality and accountability of the arbitrators, the lack of transparency of the procedure, and the absence of consistency of the jurisprudence, all of which had triggered a growing demand for changes from a number of States, international organizations and civil society groups. It was further said that reforms had been undertaken to address those criticisms, and it would therefore be timely to consider the matter at a multilateral level to avoid the development of a fragmented system.

191. It was suggested that the Commission would constitute an appropriate forum for considering and possibly coordinating work on the matter, because of its universal composition, and of its experience in the field of international dispute settlement. Some delegations also stated that the Commission should not do further work on investor-State arbitration as that topic was already being adequately addressed elsewhere. However, it was underlined that, if the Commission were to play such a role, close coordination and cooperation would be required with States and other stakeholders already involved in that matter.

192. Another view was that it would be difficult to define the scope of such work and that as currently presented, it might be too ambitious a project for the Commission to embark on. Therefore, it was suggested that preference be given to work relating to commercial arbitration.

[42] Ibid., para. 268.

193. In response to a concern that the Commission would not be an appropriate institution to host or to establish an investment court, it was said that the envisaged role of the Commission would be to lead the process of designing a new dispute settlement system, without necessarily hosting it.

194. After discussion, the Commission requested the Secretariat to review how the project described in document A/CN.9/890 might be best carried forward, if approved as a topic of future work at the forthcoming session of the Commission, taking into consideration the views of all States and other stakeholders, including how this project might interact with other initiatives in this area and which format and processes should be used. In so doing, the Secretariat was requested to conduct broad consultations.

4. Conclusion

195. After deliberation of the three possible topics for future work (see paras. 175-194 above), the Commission decided to retain those topics on its agenda for further consideration at its next session. It further requested that the Secretariat, within its existing resources, continue to update and conduct preparatory work on all the topics so that the Commission would be in a position to make an informed decision whether to mandate its Working Group II to undertake work in any of the topics, following the current work on the enforcement of settlement agreements resulting from conciliation. In that context, it was reaffirmed that priority should be given to the current work by Working Group II so that it could expeditiously complete its work on the preparation of an instrument on the topic.

E. Secretariat Guide on the New York Convention

196. The Commission recalled its discussion at its forty-seventh session, in 2014, regarding the preparation of a guide ("New York Convention Guide") on the Convention on the Recognition and Enforcement of Foreign Arbitral Awards, done at New York on 10 June 1958[43] (the New York Convention).[44]

197. The Commission was informed that the New York Convention Guide had been finalized and published on the website (www.newyorkconvention1958.org) which was set up to make the information gathered in preparation of the New York Convention Guide publicly available. The Commission also heard an oral report on the developments on the website since the last Commission session.

198. The Commission expressed its appreciation for the completion of the New York Convention Guide and the work done by the Secretariat as well as the experts, E. Gaillard (Sciences Po Paris, École de Droit) and G. Bermann (Columbia University School of Law), including their research teams.

F. International commercial arbitration and mediation moot competitions

1. Willem C. Vis International Commercial Arbitration Moot

199. It was noted that the Association for the Organization and Promotion of the Willem C. Vis International Commercial Arbitration Moot had organized the Twenty-third Moot, the oral arguments phase of which had taken place in Vienna from 18 to 24 March 2016. As in previous years, the Moot had been co-sponsored by the Commission. Legal issues addressed by the teams in the Twenty-third Moot were based on the United Nations Convention on Contracts for the International Sale of Goods (Vienna, 1980)[45] (the "United Nations Sales Convention"). A total of 311 teams from 67 countries participated and the best team in oral arguments was the University of Buenos Aires (Argentina). The oral arguments phase of the Twenty-fourth Willem C. Vis International Commercial Arbitration Moot would be held in Vienna from 7 to 13 April 2017.

200. It was also noted that the Vis East Moot Foundation had organized the Thirteenth Willem C. Vis (East) International Commercial Arbitration Moot, which had been

[43] United Nations, *Treaty Series*, vol. 330, No. 4739.

[44] *Official Records of the General Assembly, Sixty-ninth Session, Supplement No. 17* (A/69/17), paras. 111-117.

[45] United Nations, *Treaty Series*, vol. 1489, No. 25567.

co-sponsored by the Commission, the East Asia Branch of the Chartered Institute of Arbitrators and many law firms based in Hong Kong, China. The final phase took place in Hong Kong, China, from 6 to 13 March 2016. A total of 115 teams from 29 jurisdictions participated in the Thirteenth (East) Moot and the best team in oral arguments was Singapore Management University (Singapore). The Fourteenth (East) Moot would be held in Hong Kong, China, from 26 March to 2 April 2017.

2. Madrid Commercial Arbitration Moot 2016

201. It was noted that Carlos III University of Madrid had organized the Eighth International Commercial Arbitration Competition in Madrid from 25 to 29 April 2016, which had been co-sponsored by the Commission. Legal issues addressed by the teams related to an international sale of goods, where the United Nations Sales Convention, the New York Convention, and the Rules of Arbitration of the Madrid Court of Arbitration were applicable. A total of 24 teams from 11 jurisdictions participated in the Madrid Moot 2016, which was held in Spanish. The best team in oral arguments was Universidad Peruana de Ciencias Aplicadas (Peru). The Ninth Madrid Moot would be held from 3 to 7 April 2017.

3. Mediation and negotiation competition

202. It was noted that the second mediation and negotiation competition organized jointly by IBA and the Vienna International Arbitral Centre with the support of the Commission had taken place in Vienna from 28 June to 2 July 2016. Legal issues addressed by the teams had been those addressed at the Twenty-third Willem C. Vis International Commercial Arbitration Moot (see para. 199 above). A total of 30 teams from 17 jurisdictions had participated.

V. Consideration of issues in the area of online dispute resolution: finalization and adoption of Technical Notes on Online Dispute Resolution

203. The Commission recalled its instruction to Working Group III (Online Dispute Resolution), made at its forty-eighth session, in 2015, to continue its work towards elaborating a non-binding descriptive document reflecting elements of an online dispute resolution (ODR) process, on which elements the Working Group had previously reached consensus, excluding the question of the nature of the final stage of the ODR process (arbitration/non-arbitration). It was also recalled that the Working Group had been given a time limit of one year or no more than two Working Group sessions to conclude its work.[46]

204. The Commission took note of the progress of the Working Group, reflected in its reports to the Commission from the two sessions since the instructions referred to above (A/CN.9/862 and A/CN.9/868). The Commission noted that the Working Group had completed its deliberations and submitted a draft document entitled "Technical Notes on Online Dispute Resolution" for the Commission's consideration and eventual adoption at the current session (A/CN.9/868, para. 87).

205. The Commission also heard that the concerns about ensuring language consistency in accurately reflecting the descriptive nature of the text in its title in certain official languages had been satisfactorily addressed (A/CN.9/868, paras. 79-81).

206. The Commission proceeded with the consideration of draft technical notes on online dispute resolution contained in document A/CN.9/888 (the draft Technical Notes). The Commission heard a proposal for an additional paragraph to be included in the draft Technical Notes to read as follows, "These Technical Notes are not intended to supplant or override applicable law", the purpose of which would be to facilitate a correct understanding of the nature of the Technical Notes and so to support their implementation.

207. In response, it was stated that the draft Technical Notes were expressly descriptive in nature, and so they could not override applicable law. In addition, it was observed that the suggested addition was unnecessary and could add confusion.

---

[46] *Official Records of the General Assembly, Seventieth Session, Supplement No. 17* (A/70/17), para. 352.

208. Confirming its understanding that the Technical Notes did not supplant or override applicable law, the Commission decided to leave the text as proposed in document A/CN.9/888.

209. The Commission then heard the following proposals to amend the draft Technical Notes which, it was suggested, would remove a contradiction between paragraph 34 on the one hand and paragraphs 19 and 33 on the other hand in the draft Technical Notes regarding the commencement of ODR proceedings:

(a) To rephrase paragraph 19 as follows: "When a claimant submits a notice through the ODR platform to the ODR administrator (see section VI below), …"; and

(b) To amend the opening phrase of paragraph 33 to read "In order that an ODR proceeding may begin".

210. An alternative proposal was that no changes should be made to paragraphs 19 and 33, and the phrase after the comma in paragraph 34 should be deleted. Paragraph 34 could consequentially be amended to read "ODR proceedings may be deemed to have commenced when the claimant communicates a notice to the ODR administrator. It is desirable that the ODR administrator notify the parties that the notice is available at the ODR platform within a reasonable time." It was said that that view better reflected that both paragraphs 19 and 34 reflect consensus regarding how commencement should be measured; however, as there was a conflict in the approach taken in the two paragraphs, the approach taken in paragraph 19 was preferable because it was more efficient.

211. In response, it was stated that the existing paragraph 34 expressed the consensus in the Working Group that the proceedings "may be deemed to have commenced when, following a claimant's communication of a notice to the ODR administrator, the ODR administrator notifies the parties that the notice is available at the ODR platform."

212. After discussion, it was agreed that the amendments proposed to paragraphs 19 and 33 would be made. It was also confirmed that paragraph 34 would remain unchanged.

213. The Commission also agreed the following amendments to the draft Technical Notes:

(a) To delete the word "claimant's" from the phrase "the claimant's notice" in paragraphs 36 and 51; and

(b) To add the following phrase after the word "neutral" at the end of paragraph 42: "as described in paragraph 46 below".

214. A proposal to add the following sentence to paragraph 51, "The ODR administrator may utilize technical means to accommodate this selection", did not gain support.

215. The Commission also considered paragraph 53 of the draft Technical Notes, and agreed that the following formulation would more accurately reflect the intention of the Working Group (A/CN.9/868, paras. 74-75): "It is desirable that ODR proceedings be subject to the same confidentiality and due process standards that apply to dispute resolution proceedings in an offline context, in particular independence, neutrality and impartiality". It was decided that paragraph 53 of the draft Technical Notes would be amended accordingly.

216. The Commission approved the draft Technical Notes subject to the amendments agreed to be made at the current session.

217. The Commission, after consideration of the draft Technical Notes, adopted the following decision at its 1035th meeting, on 5 July 2016:

"*The United Nations Commission on International Trade Law*,

"*Recalling* its mandate under General Assembly resolution 2205 (XXI) of 17 December 1966 to further the progressive harmonization and unification of the law of international trade, and in that respect to bear in mind the interests of all peoples, and in particular those of developing countries, in the extensive development of international trade,

"*Noting* that the sharp increase of online cross-border transactions has raised a need for mechanisms for resolving disputes which arise from such transactions, and that one such mechanism is online dispute resolution ("ODR"),

"*Observing* that ODR can assist the parties in resolving the dispute in a simple, fast, flexible and secure manner, without the need for physical presence at a meeting or hearing,

"*Also observing* that ODR represents significant opportunities for access to dispute resolution by buyers and sellers concluding cross-border commercial transactions, both in developed and developing countries,

"*Recalling* that at its forty-third session, in 2010, the Commission agreed that a working group should be established to undertake work in the field of ODR,[47]

"*Expressing appreciation* to Working Group III (Online Dispute Resolution) for having prepared the draft Technical Notes on Online Dispute Resolution,

"*Noting further* that the Technical Notes on Online Dispute Resolution are non-binding, descriptive, and reflect principles of impartiality, independence, efficiency, effectiveness, due process, fairness, accountability and transparency,

"*Noting additionally* that the Technical Notes on Online Dispute Resolution are expected to contribute significantly to the development of systems to enable the settlement of disputes arising from cross-border low-value sales or service contracts concluded using electronic communications,

"*Being convinced* that the Technical Notes on Online Dispute Resolution will significantly assist all States, in particular developing countries and States whose economies are in transition, ODR administrators, ODR platforms, neutrals, and the parties to ODR proceedings in developing and using ODR systems,

"1. *Adopts* the Technical Notes on Online Dispute Resolution, as they appear in annex I to the report of UNCITRAL on its forty-ninth session;

"2. *Requests* the Secretary-General to publish the text of the Technical Notes on Online Dispute Resolution, including electronically, in the six official languages of the United Nations, and to disseminate that text broadly, including through electronic means, to Governments and other interested bodies;

"3. *Recommends* that all States and other stakeholders use the Technical Notes on Online Dispute Resolution in designing and implementing ODR systems for cross-border commercial transactions; and

"4. *Requests* all States to support the promotion and use of the Technical Notes on Online Dispute Resolution."

218. It was suggested that the Technical Notes could be endorsed by means of a dedicated draft resolution, which could be introduced to the General Assembly. The Secretariat was requested to bear this suggestion in mind when assisting States with the preparation of submissions to the Sixth Committee later in 2016.

VI. Micro-, small- and medium-sized enterprises: progress report of Working Group I

219. The Commission had before it the reports of Working Group I (MSMEs) on the work of its twenty-fifth and twenty-sixty sessions (A/CN.9/860 and A/CN.9/866, respectively) outlining progress on the two topics on its current work agenda, both of which "aimed at reducing the legal obstacles faced by micro, small and medium-sized enterprises throughout their life cycle and, in particular, those in developing economies":[48]

(a) Key principles in business registration; and

(b) Legal questions surrounding the creation of a simplified business entity.

220. With respect to the work on key principles in business registration, the Commission noted that the Working Group had considered texts prepared by the Secretariat in the form of draft commentary and draft recommendations for a possible legislative guide. The Commission further noted that on the basis of those draft texts, the Working Group had decided to prepare an instrument along the lines of a concise legislative guide, without prejudice to considering at a later time whether draft provisions or a model law might also

[47] Ibid., *Sixty-fifth Session, Supplement No. 17* (A/65/17), para. 257.

[48] Ibid., *Sixty-eighth Session, Supplement No. 17* (A/68/17), para. 321; reiterated ibid., *Sixty-ninth Session, Supplement No. 17* (A/69/17), para. 134; and ibid., *Seventieth Session, Supplement No. 17* (A/70/17), paras. 220, 225, and 340.

be appropriate (A/CN.9/860, para. 73), and that the twenty-eighth session of the Working Group would be devoted in its entirety to consideration of a draft legislative guide on business registration to be prepared by the Secretariat (A/CN.9/866, para. 90).

221. On the second topic of the legal issues surrounding the creation of a simplified business entity, the Commission recalled that the Working Group had proceeded to examine those issues as illustrated by way of working papers and through the text of draft model laws. The Commission noted that at the conclusion of its examination of those issues at its twenty-sixth session, the Working Group decided that a legislative guide reflecting its policy considerations to date and consisting of recommendations and commentary should be prepared for further discussion in the Working Group (A/CN.9/866, paras. 48 to 50). The Commission further noted the Working Group's decision that its twenty-seventh session would be devoted in its entirety to consideration of a draft legislative guide on a simplified business entity (A/CN.9/866, para. 90).

222. The Commission noted that the Working Group had also considered how best to provide an overall context for end-users of current and possible future texts relating to MSMEs. The Working Group was of the view that an introductory document along the lines of A/CN.9/WG.I/WP.92 should preface the two legislative texts currently under preparation, and that such a text could also provide a link for possible future texts relating to MSMEs but that might, for example, be prepared by other Working Groups (A/CN.9/866, paras. 86 to 87).

223. It was observed that although work on the two topics being tackled by the Working Group aimed at reducing the legal obstacles faced by MSMEs, the issues addressed by the Working Group were of the general nature and not specific to MSMEs. Consideration could thus be given to whether the description of the Working Group as a working group on MSMEs reflected correctly the nature of its work. Reference was also made to work being pursued by the European Commission on the topic of single member private limited companies,[49] along with a request that the Secretariat continue to liaise with the secretariat of the European Commission in that regard. A view was also expressed that completion of the current work programme of the Working Group was urgent, and that other topics in relation to MSMEs might be pursued, possibly in coordination with other Working Groups. It was further noted with satisfaction that the Working Group had expressly allotted time at its next session to consider a legal business form that had proven successful in a State (A/CN.9/866, para. 90), and that the Working Group had tentatively agreed at an earlier session to include a discussion in its further work of alternative legislative models for micro and small businesses that provided for the segregation of business assets from personal assets without requiring the creation of an entity with legal personality (A/CN.9/831, para. 20).

224. After discussion, the Commission commended the Working Group for the progress that was being made on the two topics as reported above, and States were encouraged to ensure that their delegations included experts on business registration so as to facilitate work on that topic. It noted that, consistent with the principles contained in General Assembly resolutions on the work of UNCITRAL,[50] the legislative texts resulting from the current work of the Working Group on those two topics should be published, including electronically, and in the six official languages of the United Nations, and be disseminated broadly to Governments and other interested bodies.

VII. Consideration of issues in the area of electronic commerce

A. Progress report of Working Group IV

225. The Commission recalled that at its forty-fourth session, in 2011, it had mandated Working Group IV (Electronic Commerce) to undertake work in the field of electronic

[49] See a Proposal for a Directive of the European Parliament and of the Council on single-member private limited liability companies, European Commission, Brussels, 9.4.2014 (COM (2014) 212 final). The European Commission had previously considered the Proposal for a Council Regulation on the Statute for a European private company (COM (2008) 396)), but that proposal was officially withdrawn (Annex to the Communication on "Regulatory Fitness and Performance (REFIT): Results and Next Steps", COM (2013) 685, 2.10.2013).

[50] E.g. General Assembly resolution 70/115, paras. 16, 19 and 21.

transferable records[51] and that the work had progressed in the preparation of a draft Model Law on Electronic Transferable Records.[52]

226. At its current session, the Commission had before it reports of the Working Group on its fifty-second session (A/CN.9/863), held in Vienna from 9 to 13 November 2015, and fifty-third session (A/CN.9/869), held in New York from 9 to 13 May 2016. It was noted that the draft Model Law on Electronic Transferable Records focused on domestic aspects of the use of electronic transferable records equivalent to paper-based transferable documents or instruments, and that international aspects of the use of those records, as well as the use of transferable records existing only in electronic form, would be addressed at a later stage.[53] The Commission was informed that, given the advanced stage of preparation, it was expected that the draft Model Law with an explanatory note would be submitted for adoption at its fiftieth session, in 2017.

227. The Commission expressed its appreciation to the Working Group for the progress made and commended the Secretariat for its work. The Commission requested the Secretariat to reflect in its publication programme and take any other measures to ensure future publication of the final text of the UNCITRAL Model Law on Electronic Transferable Records with an explanatory note, expected to be adopted at the Commission's fiftieth session, including electronically and in the six official languages of the United Nations, and to disseminate it broadly to Governments and other interested bodies.

B. Future work in the area of electronic commerce

228. The Commission recalled that at its forty-eighth session, in 2015, it had instructed the Secretariat to conduct preparatory work on identity management and trust services, cloud computing and mobile commerce, including through the organization of colloquia and expert group meetings, for future discussion at the Working Group level following the current work on electronic transferable records.[54]

229. Accordingly, the Commission had before it a note by the Secretariat on legal issues related to identity management and trust services (A/CN.9/891) summarising the discussions during the UNCITRAL Colloquium on Legal Issues Related to Identity Management and Trust Services held in Vienna on 21 and 22 April 2016 and complemented by other material. The Commission was also informed that work on contractual aspects of cloud computing had started at the expert level on the basis of a proposal (A/CN.9/856) submitted at the forty-eighth session of the Commission, in 2015.[55]

230. In light of such progress, it was noted that the Working Group could commence consideration of legal issues relating to the use of identity management and trust services and of cloud computing upon completion of its work on the draft Model Law on Electronic Transferable Records, in line with the decision made by the Commission at its forty-eighth session, in 2015.[56]

231. In that context, preference was expressed for work to commence on legal issues relating to cloud computing based on preparatory work already conducted. However, the view was also expressed that additional preparatory work was necessary, which should aim at compiling relevant information. In response to a question about the possible means for conducting preparatory work, the Commission was informed that the Secretariat would undertake a wide range of informal consultations with experts and related organizations, including possibly through the organization of a meeting of experts. States and other concerned entities were invited to share with the Secretariat expertise and other resources useful for that initiative with a view to ensuring regional representation.

232. Preference was also expressed for work to commence on identity management and trust services, as that topic continuously arose during the preparation of the draft Model Law on Electronic Transferable Records, was of general significance in electronic transactions,

---

[51] *Official Records of the General Assembly, Sixty-sixth Session, Supplement No. 17* (A/66/17), para. 238.
[52] Ibid., *Seventieth Session, Supplement No. 17* (A/70/17), para. 228.
[53] Ibid.
[54] Ibid., para. 358.
[55] Ibid., para. 354.
[56] Ibid., para. 358.

and could build on the results of the Colloquium (see para. 229 above). It was mentioned that preparatory work on that topic should involve assessment of existing legal frameworks, which might eventually lead to the identification of a specific subtopic(s), which the Working Group might focus its work. In that context, a suggestion was made that the Secretariat might consider circulating a questionnaire to seek inputs from States on the existing domestic legislative framework on identity management and trust services.

233. During the discussion, a view was expressed that the topics of "identity management" and "trust services" should be distinguished and that focus of the work should be on the former, as it was the subject of legislative efforts by a number of States. Furthermore, it was mentioned that work on trust services should be deferred until further assessment was made.

234. While comments were made that work on the identity management and trust services could touch upon or take into account issues concerning privacy in electronic communications, it was generally felt that caution should be exercised in dealing with such issues, which did not necessarily fall within the overall mandate of the Commission.

235. After discussion, it was agreed that priority should be given to completing the preparation of the draft Model Law on Electronic Transferable Records and the accompanying explanatory note, so that they could be finalized and adopted by the Commission at its next session. It was generally felt that the topics of identity management and trust services as well as of cloud computing should be retained on the work agenda and that it would be premature to prioritize between the two topics. The Commission confirmed its decision that the Working Group could take up work on those topics upon completion of the work on the Model Law on Electronic Transferable Records. In that context, the Secretariat, within its existing resources, and the Working Group were asked to continue to update and conduct preparatory work on the two topics including their feasibility in parallel and in a flexible manner and report back to the Commission so that it could make an informed decision at a future session, including the priority to be given to each topic. In that context, it was mentioned that priority should be based on practical needs rather than on how interesting the topic was or the feasibility of work.

236. Having mandated work in the fields of identity management and trust services and of cloud computing, the Commission requested the Secretariat to reflect that decision in its publications programme and take any other measures to ensure future publication of any final text resulting from that work, including electronically and in the six official languages of the United Nations.

237. During its deliberation of future work, the Commission was informed of legislative developments based on UNCITRAL texts on electronic commerce, which could provide guidance to the current and future work of Working Group IV, especially with respect to certain aspects of interoperability. In addition, the importance of technical assistance and capacity-building activities in the field of electronic commerce was highlighted. The Secretariat was requested to make robust and tangible efforts to expand such assistance for law reforms in that field, especially for developing countries.

C. Cooperation with UN/ESCAP in the field of paperless trade

238. The Commission recalled that at its forty-fourth session, in 2011, it had welcomed the ongoing cooperation between the Secretariat and other organizations on legal issues relating to electronic single window facilities and had asked the Secretariat to contribute as appropriate.[57]

239. At the current session, the Commission was informed about ongoing work in the field of paperless trade, including legal aspects of electronic single window facilities, carried out in cooperation with the United Nations Economic and Social Commission for Asia and the Pacific (UN/ESCAP). In particular, the Commission was informed that on 19 May 2016, UN/ESCAP, during its seventy-second session, adopted the "Framework Agreement on Facilitation of Cross-Border Paperless Trade in Asia and the Pacific"[58] (the "Framework Agreement"). It was noted that the Secretariat had participated in the preparation of the

[57] Ibid., *Sixty-sixth Session, Supplement No. 17* (A/66/17), para. 240.

[58] Available at www.unescap.org/resources/framework-agreement-facilitation-cross-border-paperless-trade-asia-and-pacific.

Framework Agreement from an early stage to ensure consistency with the principles embodied in UNCITRAL texts on electronic commerce.

240. The Commission took note that the objective of the Framework Agreement was to promote and facilitate cross-border electronic exchange of trade data and documents in line with a set of general principles, thus bridging the gap between cross-border trade facilitation and electronic commerce. It was further explained that the Framework Agreement was intended to complement the WTO Trade Facilitation Agreement and might also facilitate the implementation and harmonization of a growing number of bilateral and multilateral cross-border paperless trade initiatives in the Asia and Pacific region, including those regarding regional and subregional single windows.

VIII. Insolvency law: progress report of Working Group V

241. The Commission had before it the reports of the Working Group on the work of its forty-eighth and forty-ninth sessions (A/CN.9/864 and A/CN.9/870, respectively) outlining progress on the three topics on its current work agenda:

(a) Facilitating the cross-border insolvency of multinational enterprise groups, pursuant to a mandate given by the Commission at its forty-third session;[59]

(b) Obligations of directors of enterprise group companies in the period approaching insolvency, pursuant to a mandate given by the Commission at its forty-third session;[60] and

(c) Recognition and enforcement of insolvency-related judgements, pursuant to a mandate given by the Commission at its forty-seventh session.[61]

242. With respect to the work on enterprise groups, the Commission noted that the Working Group had agreed on a set of key principles to underpin its work and a structure for the draft text to be developed. A first draft text consolidating the issues addressed by the key principles with articles on cooperation and coordination, facilitating the development and recognition of a group insolvency solution, and treatment of foreign claims in accordance with applicable law had been considered, enabling a more coherent and comprehensive draft text to be prepared for consideration at a future session.

243. On the second topic of the obligations of directors of enterprise group companies in the period approaching insolvency, the Commission recalled that while the work was already well developed, it would not be referred to the Commission for finalization and approval until the work on enterprise group insolvency was sufficiently advanced to be able to ensure consistency of approach between the two texts.

244. With respect to the work on recognition and enforcement of insolvency-related judgements, the Commission noted with satisfaction the progress that had been made towards the development of a draft model law, as well as the steps that had been taken to facilitate close coordination with the Hague Conference on Private International Law, including attendance by the Secretariat at the recent Special Commission of June 2016 on the Recognition and Enforcement of Foreign Judgements. That coordination has enabled progress on the Hague Conference's judgements project to be taken into consideration in the draft model law being developed by the Working Group. The Commission noted that the Hague Conference had prepared a document on UNCITRAL's work on judgements and settlement agreements for the information of the Special Commission. Stressing the importance of ensuring coordination with the work of the Hague Conference, the Commission encouraged the Secretariat to continue its efforts in that regard.

245. After discussion, the Commission commended the Working Group for the progress that was being made on the three topics on its current work agenda, as reported above (see para. 241). The Commission requested the Secretariat to reflect, in its publications programme, the decisions to mandate work on those topics and to take any other measures necessary to ensure future publication of final texts resulting from that work, including electronically and in the six official languages of the United Nations.

---

[59] *Official Records of the General Assembly, Sixty-fifth Session, Supplement No. 17* (A/65/17), para. 259.

[60] Ibid.

[61] Ibid., *Sixty-ninth Session, Supplement No. 17* (A/69/17), para. 155.

246. The Commission noted that the report of the Working Group's forty-ninth session recommended the Commission clarify the mandate given at its forty-seventh session[62] to Working Group V with respect to the insolvency of MSMEs. The Commission agreed that Working Group V is mandated to develop appropriate mechanisms and solutions, focusing on both natural and legal persons engaged in commercial activity, to resolve the insolvency of MSMEs. While the key insolvency principles and the guidance provided by the UNCITRAL Legislative Guide on Insolvency Law[63] should be the starting point for discussions, the Working Group should aim to tailor the mechanisms already provided in the Legislative Guide to specifically address MSMEs and develop new and simplified mechanisms as required, taking into account the need for those mechanisms to be equitable, fast, flexible and cost efficient. The form the work might take should be decided at a later time based on the nature of the various solutions that were being developed. It was mentioned that the definition of what constituted an MSME would be helpful.

247. The Commission noted that the feasibility of developing a convention on international insolvency issues might continue to be studied informally by an ad hoc, open-ended group of interested participants on the basis of a list of issues prepared and distributed by the Secretariat. However, noting that the agenda of Working Group V was already rather full and that the Secretariat might have little time and few resources with which to conduct this informal work, the Commission agreed that that work should only be undertaken as and when the Secretariat was able to do so.

IX. Technical assistance to law reform

A. General discussion

248. The Commission had before it a note by the Secretariat (A/CN.9/872) describing technical cooperation and assistance activities. The Commission stressed the importance of such activities and expressed its appreciation for the related work undertaken by the Secretariat.

249. The Commission noted that the continuing ability to respond to requests from States and regional organizations for technical cooperation and assistance activities was dependent upon the availability of funds to meet associated costs. The Commission further noted that, despite efforts by the Secretariat to solicit new donations, funds available in the UNCITRAL Trust Fund for Symposia were very limited. Accordingly, requests for technical cooperation and assistance activities continued to be very carefully considered, and the number of such activities, which of late had mostly been carried out on a cost-share or no-cost basis, was limited. The Commission requested the Secretariat to continue exploring alternative sources of extrabudgetary funding, in particular by more extensively engaging permanent missions, as well as other possible partners in the public and private sectors. The Commission also encouraged the Secretariat to seek cooperation and partnership with international organizations, including through regional offices, and bilateral assistance providers in the provision of technical assistance, and appealed to all States, international organizations and other interested entities to facilitate such cooperation and take any other initiative to maximize the use of relevant UNCITRAL standards in law reform.

250. The Commission welcomed the Secretariat's efforts to expand cooperation with the Government of the Republic of Korea on the APEC Ease of Doing Business project in the area of enforcing contracts, to other areas and with other APEC member economies. Support was expressed for the Secretariat's aim to cooperate more closely with APEC and its member economies to improve the business environment in the Asia-Pacific region and to promote UNCITRAL texts.

251. The Commission reiterated its appeal to all States, international organizations and other interested entities to consider making contributions to the UNCITRAL Trust Fund for Symposia, if possible in the form of multi-year contributions or as specific-purpose contributions, in order to facilitate planning and enable the Secretariat to meet the increasing number of requests from developing countries and countries with economies in transition for technical cooperation and assistance activities. The Commission expressed its

[62] Ibid., para. 156.

[63] United Nations publication, Sales No. E.05.V.10.

appreciation to the Governments of the Republic of Korea, and Indonesia for their contributions to the Trust Fund since the Commission's forty-eighth session and to organizations that had contributed to the programme by providing funds or by hosting seminars.

252. The Commission appealed to the relevant bodies of the United Nations system, organizations, institutions and individuals to make voluntary contributions to the trust fund established to provide travel assistance to developing countries that were members of the Commission. The Commission expressed its appreciation to the Government of Austria for contributing to the UNCITRAL Trust Fund since the Commission's forty-eighth session, thereby enabling travel assistance to be granted to developing countries that were members of UNCITRAL.

253. With regard to the dissemination of information on UNCITRAL's work and texts, the Commission noted the important role played by the UNCITRAL website (www.uncitral.org) and the UNCITRAL Law Library.

254. The Commission welcomed the UNCITRAL Law Library's inclusion on the UNCITRAL website of a new feature highlighting UNCITRAL's role in supporting the Sustainable Development Goals.[64] The Commission recalled its request that the Secretariat continue to explore the development of new social media features on the UNCITRAL website as appropriate,[65] noting that the development of such features in accordance with the applicable guidelines was also welcomed by the General Assembly.[66] In this regard, the Commission noted with approval the continued development of the "What's new at UNCITRAL?" Tumblr microblog[67] and the establishment of an UNCITRAL presence on LinkedIn.[68] Finally, recalling the General Assembly resolutions commending the website's six-language interface,[69] the Commission requested the Secretariat to continue to provide, via the website, UNCITRAL texts, publications, and related information, in a timely manner and in the six official languages of the United Nations.

B. Consideration of a draft guidance note on strengthening United Nations support to States, upon their request, to implement sound commercial law reforms

255. The Commission recalled that, at its forty-eighth session, it considered a draft guidance note on strengthening United Nations support to States to implement sound commercial law reforms (A/CN.9/845).[70] After consideration, it requested States to provide to its secretariat any suggestion for revision of the text. It was agreed that the compilation of all comments received from States would be circulated by the Secretariat to all States together with a revised version of the text. It was understood that, if agreement of States on the revised text could be achieved before or during the consideration of the Commission's report in the Sixth Committee of the General Assembly in 2015, the Sixth Committee itself might wish to endorse the text, so as to avoid delay in issuing the document. Otherwise, the matter might need to be brought back to the Commission for consideration at its next session. The Secretariat was requested, in revising the text, to follow closely the wording of General Assembly resolution 2205 (XXI) on the establishment of UNCITRAL and avoid embarking into areas not directly linked to the UNCITRAL mandate.[71]

256. At its current session, the Commission took note of steps taken by the Secretariat to implement the above-referred decisions of the Commission. The Commission was also informed about statements made by States in the Sixth Committee on the subject and the results of informal consultations held in that body on the draft. The Commission also took

[69] General Assembly resolutions 61/32, para. 17; 62/64, para. 16; 63/120, para. 20; 69/115, para. 21; and 70/115, para. 21.

[70] *Official Records of the General Assembly, Seventieth Session, Supplement No. 17* (A/70/17), para. 248.

[71] Ibid., paras. 251-252.

note of paragraph 6 (e) of General Assembly resolution 70/115 on the report of UNCITRAL on the work of its forty-eighth session, by which the General Assembly recalled its resolutions stressing the need to strengthen support to Member States, upon their request, in the domestic implementation of their respective international obligations through enhanced technical assistance and capacity-building, welcomed the efforts of the Secretary-General to ensure greater coordination and coherence among United Nations entities and with donors and recipients, and took note of the ongoing discussion in the Commission of ways to strengthen support to Member States, upon their request, in the implementation of sound commercial law reforms. It was noted that the objective was to assist States but in no way to impose on States the adoption of the guidance note.

257. At the session, the Commission had before it: (a) the compilation of comments by States received by the Secretariat on document A/CN.9/845 in response to a note verbale circulated by the Secretariat to States on 21 July 2015 (A/CN.9/882, section II); (b) a comment by a State (transmitted to the Secretariat in a note verbale of 23 October 2015) on a version of the guidance note prepared pursuant to those comments and circulated to States by the Secretariat in a note verbale of 8 October 2015 (the 8 October 2015 version) (A/CN.9/882, section III); (c) a draft guidance note on strengthening United Nations support to States, upon their request, to implement sound commercial law reforms, prepared pursuant to consultations held in the Sixth Committee, and comments received from States, on the 8 October 2015 version (A/CN.9/883); and (d) a comment by a State (transmitted to the Secretariat in a note verbale of 20 June 2016) on the draft guidance note contained in document A/CN.9/883 (A/CN.9/882/Add.1).

258. The Commission considered the draft guidance note contained in document A/CN.9/883 together with the comment received from one State on that draft and the comments received from States on the earlier versions of the draft guidance note. As regards document A/CN.9/882/Add.1, the delegation author of the comment contained in that document requested the Secretariat to issue a corrigendum to the English and other language versions of that document containing the words "incl. the word 'rule-based'" to the effect that those words would be deleted. It also requested that, in the Russian version of document A/CN.9/883, the phrase "основанные на верховенстве права коммерческие отношения" in the first sentence of paragraph 9, the phrase "основанных на верховенстве права коммерческих отношений и международной торговли" in the first sentence of paragraph 19, and the phrase "коммерческих отношений, основанных на верховенстве права" in the first sentence of paragraph 22, be redrafted. References to the rule of law ("верховенство права") in those phrases were found inappropriate. A more appropriate term in Russian for the term "rule-based" used in the English version of document A/CN.9/883 in those instances would be "основанных на правилах". That other term should be used in the final text of the guidance note in all instances where the English text refers to the rule-based commercial relations and international trade.

259. Concerns were expressed about the proposal to remove the phrase "and respect for the rule of law" in the second sentence of paragraph 9. After discussion, the Commission agreed to replace the phrase "the respect for the rule of law" with the phrase "respect for legality/rule-based order" to make it closer to the French version of the text, with the consequential deletion of footnote 5. The Commission also emphasized the need to pay particular attention to consistency between the various linguistic versions of the guidance note when finalizing the text.

260. The Commission agreed that the footnotes should be removed from the final text of the guidance note except for those intended to guide users of the guidance note to UNCITRAL instruments, online resources and other essential information (footnotes 13 and 15 to 25).

261. As regards the annex and paragraph 12 referring to the checklist of illustrative indicators, the Commission heard a proposal that the annex should not be part of the guidance note and no references thereto should be made in the guidance note. The Commission agreed to that proposal on the understanding that, while not being appended to the guidance note as a policy document, the annex should be used at working level, as an internal document of the UNCITRAL secretariat, when needed in the negotiation of specific projects with relevant stakeholders, donors and possible partners of UNCITRAL in technical cooperation and assistance projects.

262. Subject to the above-mentioned changes, the Commission endorsed the text of the draft guidance note contained in document A/CN.9/883 and requested the Secretary-General to finalize it in the light of deliberations at the current session, and to circulate the final text as broadly as possible to its intended users.

X. Promotion of ways and means of ensuring a uniform interpretation and application of UNCITRAL legal texts

263. The Commission considered document A/CN.9/873 "Promotion of ways and means of ensuring a uniform interpretation and application of UNCITRAL legal texts", which provided information on the current status of the CLOUT system and of the digests of case law relating to the United Nations Sales Convention and the UNCITRAL Model Law on International Commercial Arbitration (the Model Law on Arbitration).

264. The Commission expressed its continuing belief that the system of CLOUT and the digests are an important tool for promoting uniform interpretation of the law relating to UNCITRAL texts and noted with appreciation the increasing number of UNCITRAL legal texts that are currently represented in CLOUT. As at 9 May 2016 (date of A/CN.9/873), 166 issues of compiled case-law abstracts had been prepared, dealing with 1,551 cases. The cases related to the following legislative texts:

- The New York Convention
- Convention on the Limitation Period in the International Sale of Goods (New York, 1974)[72] and Convention on the Limitation Period in the International Sale of Goods as amended by the Protocol of 11 April 1980 (Vienna)[73]
- United Nations Convention on the Carriage of Goods by Sea (Hamburg, 1978)[74]
- United Nations Sales Convention
- United Nations Convention on Independent Guarantees and Stand-by Letters of Credit (New York, 1995)[75]
- United Nations Convention on the Use of Electronic Communications in International Contracts (New York, 2005)[76]
- Model Law on Arbitration
- UNCITRAL Model Law on International Credit Transfers (1992)[77]
- UNCITRAL Model Law on Electronic Commerce (1996)[78]
- UNCITRAL Model Law on Cross-Border Insolvency (1997)[79]
- UNCITRAL Model Law on Electronic Signatures (2001)[80]

265. The Commission took note that the majority of the abstracts published referred to Western European and other States, as indicated in a note by the Secretariat (A/CN.9/840) submitted to the Commission at its forty-eight session, in 2015.[81] When compared with the figures provided in that note, a small increase in case law from Eastern European States and a small decrease in case law from African States could be noted. As to the legislative texts reported in CLOUT, the United Nations Sales Convention and the Model Law on Arbitration were still the most represented in the system, although there was an increase of cases

concerning the UNCITRAL Model Law on Cross-Border Insolvency and the New York Convention.

266. The Commission was informed that eleven new national correspondents had been appointed in the period under review, two of whom replaced previous correspondents, and that the network of national correspondents was composed of 74 experts representing 35 countries. The Commission was also informed that pursuant to a decision taken at its forty-second session, in 2009, [82] the mandate of the current network of national correspondents would expire in 2017 and that States would be requested to appoint and/or reappoint their national correspondents. The Commission noted that since the previous note of the Secretariat (A/CN.9/840), national correspondents had provided approximately 47 per cent of the abstracts published in CLOUT. This figure was consistent with the figure provided to the Commission at its forty-eighth session in 2015.

267. The Commission also heard a short account of the meeting of national correspondents, held in July 2015, at which participants encouraged the Secretariat to increase the UNCITRAL texts available in CLOUT and to initiate cooperation with organizations and institutions dealing with topics pertaining to those texts not yet included in the system so as to identify relevant case law.

268. The Commission commended the continued effort of its secretariat on the promotion of the digests and expressed its appreciation for the new round of updates of the digest of case law relating to the United Nations Sales Convention being finalized.

269. The Commission expressed its appreciation for the functioning of the upgraded CLOUT database and noted with particular interest the cooperation of its secretariat with the United Nations Volunteer programme to populate the database with the full text decisions of the abstracts published in previous years. The Commission also noted with appreciation the performance of the website www.newyorkconvention1958.org (see para. 197 above), and the successful coordination between that website and the CLOUT system.

270. As in previous sessions, the Commission commended the Secretariat for the work on CLOUT, once again taking note of the resource-intensive nature of the system and acknowledging the need for further resources to sustain it. The Commission thus appealed to all States to assist the Secretariat in its search for available funding at the national level to ensure sustained operability of the system.

XI. Status and promotion of UNCITRAL legal texts

271. The Commission considered the status of the conventions and model laws emanating from its work and the status of the New York Convention, on the basis of a note by the Secretariat (A/CN.9/876). The Commission noted with appreciation the information on treaty actions and legislative enactments received since its forty-eighth session.

272. The Commission also noted the following actions and legislative enactments made known to the Secretariat subsequent to the submission of the Secretariat's note:

(a) the Mauritius Convention on Transparency[83] — signature by the Netherlands (one State party);

(b) the Model Law on Arbitration — enactment of the Model Law as amended in 2006 in Republic of Korea (2016);[84]

(c) UNCITRAL Model Law on International Commercial Conciliation (2002)[85] — enactment in Malaysia (2012).

273. Considering the broader impact of UNCITRAL's texts, the Commission also took note of the bibliography of recent writings related to the work of UNCITRAL (A/CN.9/874) and the influence of UNCITRAL legislative guides, practice guides and contractual texts as

[82] Ibid., *Sixty-fourth Session, Supplement No. 17* (A/64/17), para. 370.

[83] The Convention has not yet entered into force; it requires three States parties for entry into force.

[84] The legislation amends previous legislation based on the unamended Model Law.

[85] General Assembly resolution 57/18, annex. See also *Official Records of the General Assembly, Fifty-seventh Session, Supplement No. 17* (A/57/17), annex I.

described in academic and professional literature. The Commission noted the importance of facilitating a comprehensive approach to the creation of the bibliography and the need to remain informed of activities of non-governmental organizations (NGOs) active in the field of international trade law. In this regard, the Commission recalled and repeated its request that NGOs invited to the Commission's annual session donate copies of their journals, reports and other publications to the UNCITRAL Law Library for review. [86] The Commission expressed appreciation to all NGOs that donated materials. The Commission noted, in particular, the addition of current and forthcoming issues of the following journals to the UNCITRAL Law Library collection: *b-Arbitra* (Belgian Centre for Arbitration and Mediation), *Chinese Journal of Private International Law and Comparative Law* (CSPIL), *International Insolvency Review* (INSOL International), *Masaryk University Journal of Law and Technology* (Institute of Law and Technology, Faculty of Law, Masaryk University), *Ports & Harbors* (International Association of Ports and Harbors), *Revue de l'Arbitrage* (Comité Français de l'Arbitrage), *World SME News* (World Association for Small and Medium Enterprises), and *Wuhan University International Law Review* (CSPIL).

XII. Coordination and cooperation

A. General

274. The Commission had before it a note by the Secretariat (A/CN.9/875) providing information on the activities of international organizations active in the field of international trade law in which the Secretariat had participated since the last note to the Commission (A/CN.9/838). The Commission expressed appreciation for the Secretariat engaging with a high number of organizations both within and outside the United Nations system. Among others, the Secretariat had participated in the activities of the following organizations: United Nations Conference on Trade and Development, United Nations Department of Economic and Social Affairs, United Nations Economic Commission for Europe, UNEP, UN/ESCAP, United Nations Inter-Agency Cluster on Trade and Productive Capacity, World Bank, APEC, Hague Conference on Private International Law, OECD, Unidroit and WTO.

275. By way of example of current efforts, the Commission took note with satisfaction of the coordination activities involving the Hague Conference on Private International Law and Unidroit as well as the activities on the rule of law in those areas of work of the United Nations and other entities that were of relevance for the work of UNCITRAL.

276. The Commission also noted that the Secretariat participated in expert groups, working groups and plenary meetings with the purpose of sharing information and expertise and avoiding duplication of work in the resultant work products. The Commission further observed that coordination work often involved travel to meetings of those organizations and the expenditure of funds allocated for official travel. The Commission reiterated the importance of such work being undertaken by UNCITRAL as the core legal body in the United Nations system in the field of international trade law and supported the use of travel funds for that purpose.

277. As regards coordination activities with OECD, the Commission noted the importance of a joint project for the promotion of commercial arbitration and UNCITRAL transparency standards through the co-organization of an annual conference for a Euro-Mediterranean Community of International Arbitration followed by a publication of the conference proceedings. It therefore requested the Secretariat to publish the conference proceedings, including electronically and to disseminate it broadly to any interested bodies.

278. Reference was made to the "Joint proposal on cooperation in the area of international commercial contract law (with a focus on sales)" (A/CN.9/892). It was explained that in the last fifty years a number of international governmental and non-governmental organizations had made several significant contributions at the global and regional levels to the progressive unification and harmonization of contract law. It was added that those legislative efforts were largely complementary but that information on how they related to each other was not always readily available. As a result, different stakeholders interested in adopting, applying

[86] Ibid., *Seventieth Session, Supplement No. 17* (A/70/17), para. 264.

or using that vast legislative corpus could face challenges in identifying the relevant texts and placing them in context.

279. Hence, it was indicated that the proposal aimed at facilitating orientation in the field of uniform contract law, with a focus on sales law, by compiling relevant texts and providing a short illustration thereof, including with respect to their relationship to other texts. Thus, it was explained, the resulting guidance text could significantly contribute to the coherent adoption, interpretation and use of uniform texts, and to strengthen their underlying principles, such as freedom of contract. It was added that that exercise was intended to be carried out with the involvement of experts and within available resources and that work at the working group level was not envisaged in the near future.

280. It was recalled that the Council on General Affairs and Policy of the Hague Conference on Private International Law had welcomed the proposal[87] and that the Governing Council of Unidroit had recommended to the General Assembly of Unidroit inclusion of the project in its Work Programme for the triennium 2017-2019.[88]

281. After discussion, the Commission approved the "Joint proposal on cooperation in the area of international commercial contract law (with a focus on sales)" and asked the Secretariat to implement the Commission's decision in coordination with the Hague Conference on Private International Law and with Unidroit and to report periodically on the progress of that work.

282. Having mandated work in the area of international commercial contract law (with a focus on sales), the Commission requested the Secretariat to reflect that decision in its publications programme and take any other measures to ensure future publication of any final text resulting from that work, including electronically and in the six official languages of the United Nations.

B. Reports of other international organizations

283. The Commission took note of statements made on behalf of the following international intergovernmental organizations: a summary of which is reported below.

1. Unidroit

284. The Secretary-General of Unidroit reported on the main activities of Unidroit since the forty-eighth session of UNCITRAL, in 2015. The Commission was in particular informed about the following:

(a) Following the completion in 2015 of the UNIDROIT/FAO/IFAD Legal Guide on Contract Farming, developed in partnership with the Food and Agricultural Organization of the United Nations (FAO) and the International Fund for Agricultural Development (IFAD), Unidroit continued to cooperate with its partners in the promotion and implementation of that Guide;

(b) The Convention on International Interests in Mobile Equipment ("Cape Town Convention") continued to attract new accessions, as well as the Aircraft Protocol and the Rail Protocol. The fourth session of the Space Protocol Preparatory Commission was held in December 2015, which approved the regulations for the international registry, as well as the draft Rules of Procedure for the Commission of Experts of the Supervisory Authority (CESAIR) in relation to the Protocol to the Convention on International Interests in Mobile Equipment on Matters Specific to Space Assets. Significant progress was also made on the possible fourth Protocol on matters specific to agricultural, mining and construction equipment, for which two very productive Study Group meetings were held in October 2015 and March 2016, with valuable involvement of UNCITRAL. The preliminary draft Protocol had been submitted to the Governing Council;

---

[87] See Conclusions and recommendations adopted by the Council of March 2016, para. 23, available from www.hcch.net/en/governance/council-on-general-affairs.

[88] See Unidroit Governing Council, Summary of the Conclusions, 95th Session, Rome, 18-20 May 2016, C.D. (95) Misc. 2, para. 18, available from www.unidroit.org/english/governments/councildocuments/2016session/cd-95-misc02-e.pdf.

(c) The Governing Council, at its ninety-fifth session, approved the proposed amendments to the Principles of International Commercial Contracts, which aimed at addressing the special needs of long-term contracts and authorized the publication of a new edition, to be known as the "2016 UNIDROIT Principles of International Commercial Contracts";

(d) Unidroit was continuing to work with the European Law Institute to adapt the American Law Institute (ALI)/Unidroit Principles of Transnational Civil Procedure (2004) with a view to drafting Europe-specific regional rules;

(e) The Committee on Emerging Markets Issues, Follow-up and Implementation, established to assist with the promotion and implementation of the Unidroit Convention on Substantive Rules for Intermediated Securities (Geneva Convention), was expected to submit the draft Legislative Guide on Principles and Rules capable of enhancing trading in securities in emerging markets in autumn 2016;

(f) The Governing Council of Unidroit, at its ninety-fifth session, considered the draft Triennial Work Programme for the 2017-2019 period. Among the projects that the Governing Council agreed to recommend for adoption by the Unidroit General Assembly at its seventy-fifth session were the preparation of a guidance document on existing texts in the area of international sales law in cooperation with the Commission and the Hague Conference on Private International Law (see also para. 280 above) and a new project to be carried out in cooperation with the Rome-based organizations relating to land investment contracts. It was noted that in considering the work programme, careful consideration was given to avoid any conflict or overlaps with the work of other organizations, in particular the Commission;

(g) A series of international conferences and lectures were being held to celebrate the ninetieth anniversary of Unidroit.

2. The Hague Conference on Private International Law

285. A representative of the Permanent Bureau expressed appreciation for the continuing cooperation between The Hague Conference, Unidroit and UNCITRAL on a number of different projects. It was noted that, in the context of such cooperation, The Hague Conference had on various occasions shared its expertise in projects of private international law of common interest to the three organizations, and that it was ready to further contribute to other similar projects in the future. It was also requested that the Secretariat also take part in projects being conducted by the Hague Conference to provide valuable input.

C. International governmental and non-governmental organizations invited to sessions of UNCITRAL

286. At its current session, the Commission recalled that, at its forty-third session, in 2010, it had adopted the summary of conclusions on UNCITRAL rules of procedure and methods of work.[89] In paragraph 9 of the summary, the Commission had decided to draw up and update as necessary a list of international organizations and NGOs that had been invited to sessions of the Commission. The Commission also recalled that since that session the Secretariat had been reporting to the Commission annually about organizations added to the list. The Commission also recalled that, at its forty-eighth session, in 2015, it requested the Secretariat, when presenting its oral report on new organizations invited to sessions of UNCITRAL, to provide comments on the manner in which newly invited organizations fulfilled the criteria applied by the Secretariat in making its decision to invite new NGOs.[90]

287. The Commission took note that since its forty-eighth session, in 2015, the following organizations had been added in the list of NGOs invited to sessions of UNCITRAL: ArbitralWomen; European Commerce Registers' Forum; Florence International Mediation Chamber (FIMC); GSM Association (GSMA); International Academy of Mediators (IAM); and International Arbitration Court of the Belarusian Chamber of Commerce and

[89] *Official Records of the General Assembly, Sixty-fifth Session, Supplement No. 17* (A/65/17), annex III.

[90] Ibid., *Seventieth Session, Supplement No. 17* (A/70/17), para. 280.

Industry (IAC). One organization, the Commonwealth Association of Law Reform Agencies (CALRAs), was removed from the list upon their request received by the Secretariat on 23 May 2016. The Commission noted reasons for the Secretariat's decision to invite those additional NGOs to sessions of UNCITRAL and its working groups. It also heard information about NGOs whose requests to be invited to sessions of UNCITRAL and its working groups were rejected and reasons for the rejection.

288. The Commission also took note that since its forty-eighth session, in 2015, the Caribbean Court of Justice (CCJ), upon its request to the Secretariat of 22 December 2015, was added in the list of intergovernmental organizations invited to sessions of UNCITRAL and its working groups. Other changes made by the Secretariat to the lists of intergovernmental and non-governmental organizations invited to sessions of UNCITRAL and its working groups were editorial, reflecting mainly amendments in the names of the organizations and their acronyms.

289. The Commission also took note that, pursuant to General Assembly resolutions 68/106 and 69/115 (para. 8 in both resolutions) and 70/115 (para. 7), all States and invited organizations were reminded, when they were invited to UNCITRAL sessions, about rules of procedure and work methods of UNCITRAL. Such a reminder is effectuated by inclusion in invitations issued to them of a reference to a dedicated web page of the UNCITRAL website where main official documents of UNCITRAL pertaining to its rules of procedure and work methods could be easily accessed.

290. The Commission welcomed the detailed and informative report of the Secretariat presented pursuant to its request at its forty-eighth session, in 2015 (see para. 286 above). It endorsed the decisions of the Secretariat as regards acceptance of new NGOs.

XIII. UNCITRAL regional presence

291. The Commission had before it a note by the Secretariat on the activities undertaken by its Regional Centre for Asia and the Pacific ("the Regional Centre") (A/CN.9/877) and heard an oral report by the head of the Regional Centre.

292. The Commission recognized the tangible progress made, as a result of the regional activities of the Secretariat, in the levels of awareness, adoption and implementation of harmonized and modern international trade law standards, in particular those elaborated by UNCITRAL, and emphasized the growing significance of the Regional Centre in increasing regional contributions to the work of UNCITRAL.

293. Strong support was expressed for the various activities undertaken by the Secretariat, which were aimed at: (a) providing capacity-building and technical assistance services to States in the Asia-Pacific region, including to international and regional organizations, and development banks; (b) supporting public, private and civil society initiatives to enhance international trade and development by promoting certainty in international commercial transactions through the dissemination of international trade norms and standards, in particular those elaborated by UNCITRAL; (c) building and participating in regionally-based international trade law partnerships and alliances, including with other appropriate United Nations funds, programmes and specialized agencies; (d) strengthening information, knowledge and statistics through briefings, workshops, seminars, publications, social media, and information and communications technologies, including in regional languages; and (e) functioning as a channel of communication between States and UNCITRAL for non-legislative activities of the Commission.

294. The Commission took note of the Secretariat's plans to participate in the United Nations Partnership Frameworks (Lao People's Democratic Republic in 2017) and to develop plurennial and systematized regional programmes around three core areas, namely: (a) integrated trade law reforms; (b) the Sustainable Development Goals; and (c) aid-for-trade, pursuing long-term tailor-made capacity-building, in particular in least developed countries, landlocked developing countries and small island developing States in Asia and the Pacific, so as to ensure legal uniformity and general economic stability, and in close cooperation and coordination with institutions active in trade law reform, in the region.

295. The Regional Centre was encouraged to dedicate more of its resources to promoting UNCITRAL texts in the context of regional economic integration and cooperation frameworks, including, but not limited to, the Association of Southeast Asian Nations (ASEAN) and APEC.

296. The Commission requested the Secretariat to actively engage in fundraising activities in order for the Regional Centre to carry out its activities and urged Member States to provide voluntary contributions to the project.

297. The Commission noted that this year marked the fifth year of operation of the Regional Centre. The Commission was informed that the Secretariat would engage with relevant stakeholders in the Asia-Pacific region to evaluate the achievements as well as the lessons learned during that period. Such assessment could also be expected to further define the role of the Regional Centre and to develop a regional priority framework for the implementation of strategies and programmes across the region, in order to respond to the specific needs of the region in terms of capacity-building and technical assistance services.

298. The Commission noted with appreciation the exchange of letters between the United Nations and China on 16 September 2015, and the subsequent signing on 26 October 2015 of a memorandum of understanding between the United Nations and the Government of the Hong Kong Special Administrative Region of China, for the contribution of a non-reimbursable loan of an expert to the Regional Centre, providing a legal expert to engage in technical cooperation and assistance activities of the Regional Centre. The Commission expressed its gratitude to the Government of China for its support to the operations of the Regional Centre.

299. The Government of the Republic of Korea stated its continued willingness to support the operation of the Regional Centre, extending its contribution beyond the initial five-year period agreed in 2011, for an additional five-year period covering 2017 to 2021, with an annual financial contribution of $450,000 to the UNCITRAL Trust Fund for Symposia, in addition to the office premises, equipment and furniture which it had already provided. The Republic of Korea has also extended its offer to provide a legal expert on a non-reimbursable loan basis to engage in technical cooperation and assistance activities for the coming years. The Commission was informed that the Secretariat was formalizing the necessary arrangements for this extension, including the necessary amendments to the Memorandum of Understanding signed on 18 November 2011 between the United Nations, and the Ministry of Justice and the Incheon Metropolitan City of the Republic of Korea.

300. The Commission expressed its gratitude to the Government of the Republic of Korea for its generous gesture to extend its contribution, allowing for the continued operation of the Regional Centre beyond the initial pilot-project, subject to the relevant rules and regulations of the United Nations and the internal approval process in the United Nations Office of Legal Affairs.

301. The Commission encouraged the Secretariat to continue seeking cooperation, including through formal agreements, with regional stakeholders, including development banks, to ensure coordination and funding for its technical assistance and capacity-building activities and services aimed at promoting the adoption of UNCITRAL texts in the region.

302. The Commission recalled the view expressed at previous sessions that, in light of the importance of regional presence for raising awareness of UNCITRAL's work, and especially for promoting the adoption and uniform interpretation of UNCITRAL texts, and in view of the successful activities of the Regional Centre, further efforts should be made to emulate its example in other regions. The Secretariat was requested to pursue consultations on the possible establishment of other UNCITRAL regional centres and/or capacity-building centres. While the Secretariat staff were expected to devote some of their time to operating or otherwise assisting regional centres, including through training of project personnel, a balanced approach was recommended by the Commission to ensure that the benefits resulting from the establishment of a regional centre continued to outweigh any cost associated with the time spent by Secretariat staff on such activities.

XIV. Role of UNCITRAL in promoting the rule of law at the national and international levels

A. Introduction

303. The Commission recalled that the item on the role of UNCITRAL in promoting the rule of law at the national and international levels had been on the agenda of the Commission since its forty-first session, in 2008,[91] in response to the General Assembly's invitation to the Commission to comment, in its report to the General Assembly, on the Commission's current role in promoting the rule of law.[92] The Commission further recalled that since that session, the Commission, in its annual reports to the General Assembly, had transmitted comments on its role in promoting the rule of law at the national and international levels, including in the context of post-conflict reconstruction. It expressed its conviction that the promotion of the rule of law in commercial relations should be an integral part of the broader agenda of the United Nations to promote the rule of law at the national and international levels.[93] That view had been endorsed by the General Assembly.[94]

304. At its forty-ninth session, the Commission heard an oral report by the Secretariat on the implementation of the relevant decisions taken by the Commission at its forty-eighth session.[95] A summary of the report and decisions of the Commission related thereto are contained in section B below.

305. The Commission recalled that at its forty-third session, in 2010, it had indicated that it considered it essential to maintain a regular dialogue with the Rule of Law Coordination and Resource Group (RoLCRG) through the Rule of Law Assistance Unit and to keep abreast of progress made in the integration of the work of UNCITRAL into United Nations joint rule of law activities. To that end, it had requested the Secretariat to organize briefings by the Rule of Law Assistance Unit every other year, when sessions of the Commission were held in New York.[96] Consequently, briefings had taken place at the Commission's forty-fifth and forty-seventh sessions.[97] At the current session, the Commission had another rule of law briefing by the Rule of Law Assistance Unit. Its summary is contained in section C below.

306. The Commission took note of General Assembly resolution 70/118 on the rule of law at the national and international levels, by paragraph 20 of which the General Assembly invited the Commission to continue to comment, in its reports to the General Assembly, on its current role in promoting the rule of law. The Commission decided to focus its comments to the General Assembly on practices of States in the implementation of multilateral treaties emanated from the work of UNCITRAL and practical measures to facilitate access to justice in the commercial law context, in particular by MSMEs, in line with paragraph 23 of that resolution. The comments were formulated following a panel discussion with participation of invited experts. The comments and a summary of the panel discussion are contained in section D below.

---

[91] For the decision of the Commission to include the item on its agenda, see *Official Records of the General Assembly, Sixty-second Session, Supplement No. 17* (A/62/17), part two, paras. 111-113.

[92] General Assembly resolutions 62/70, para. 3; 63/128, para. 7; 64/116, para. 9; 65/32, para. 10; 66/102, para. 12; 67/97, para. 14; 68/116, para. 14; and 69/123, para. 17.

B. Implementation of the relevant decisions taken by the Commission at its forty-eighth session

307. The Commission recalled that at its forty-eighth session it requested States members of UNCITRAL, its Bureau at the current session and its secretariat to take appropriate steps to ensure that the positive developments related to UNCITRAL are retained and if possible reinforced, in subsequent stages of negotiation, adoption and implementation of the post-2015 development agenda, in particular in the outcome documents of the Addis Ababa Conference and the 2015 Summit and in the indicators that would accompany the Sustainable Development Goals and targets.[98]

308. The Commission noted with satisfaction that States, in paragraph 89 of the outcome document of the Third International Conference on Financing for Development, held in Addis Ababa on 13-16 July 2015 (the Addis Ababa Action Agenda),[99] endorsed the efforts and initiatives of UNCITRAL, as the core legal body within the United Nations system in the field of international trade law, aimed at increasing coordination of and cooperation on legal activities of international and regional organizations active in the field of international trade law and at promoting the rule of law at the national and international levels in that field. The Commission took note that the Addis Ababa Action Agenda was an integral part of the 2030 Agenda for Sustainable Development adopted by States on 25 September 2015.[100]

309. The Commission also took note of its relevance to a number of targets in the 2030 Agenda for Sustainable Development and expressed its appreciation for the new web page of the UNCITRAL website that gave a general idea about the role of UNCITRAL in the 2030 Agenda for Sustainable Development, including as regards the promotion of the rule of law (see para. 254 above).

310. The Commission endorsed the participation of its secretariat in the work of the Inter-Agency Task Force (IATF) on Financing for Development (FfD), convened by the Secretary-General to: (a) review progress in implementing the Addis Ababa Action Agenda; and (b) advise the intergovernmental follow-up process thereon. The Commission welcomed the UNCITRAL-related section in the 2016 Inaugural Report of IATF, including the proposed framework for monitoring the progress with the implementation of paragraph 89 of the Addis Ababa Action Agenda.

311. Finally, the Commission was informed about efforts made by its secretariat towards reflecting international commercial law concerns in the global indicator framework being developed by the Inter-Agency and Expert Group on Sustainable Development Goal Indicators (IAEG-SDGs). The Commission called upon States members of the IAEG-SDGs to make sure that the global indicator framework did not overlook areas of work by UNCITRAL.

312. The Commission reiterated its call to its secretariat to continue exploring synergies and expanding outreach to delegations of States to various United Nations bodies with the view of increasing their awareness of the work of UNCITRAL and its relevance to other areas of work of the United Nations.[101] Support was expressed for outreach to various bodies of the United Nations system operating at a country level with the mandate to assist with local law reforms, be it in the promotion of the rule of law, development or other context, so that they appropriately factor in their work the promotion of the rule of law in commercial relations generally and UNCITRAL standards in particular.

[99] General Assembly resolution 69/313.

[100] General Assembly resolution 70/1, para. 40.

[101] *Official Records of the General Assembly, Sixty-ninth Session, Supplement No. 17* (A/69/17), para. 284.

C. Summary of the rule of law briefing

313. The Director of the Rule of Law Assistance Unit in the Executive Office of the Secretary-General briefed the Commission about developments related to the United Nations rule of law agenda that occurred since the 2014 rule of law briefing in UNCITRAL.

314. The Commission noted the integration of rule of law aspects in target 16.3 of the 2030 Agenda for Sustainable Development, the ongoing work on indicators to that target and the cross-cutting impact of the rule of law on the achievement of the Sustainable Development Goals. It noted that efforts of the Rule of Law Assistance Unit towards broadening a global indicator to target 16.3 to issues of civil justice were unsuccessful and that the indicator would most likely focus on criminal law issues. A more comprehensive and contextualized follow-up of progress in the achievement of the Sustainable Development Goals would require the development of additional indicators at the regional and national levels. The national-led processes would play the primary role, as complemented and supported by follow-up and review processes at the global level.

315. The Commission noted that different United Nations entities were implementing initiatives to enhance national capacities for data collection and analysis required to monitor progress with the implementation of the Sustainable Development Goals. The attention of the Commission was brought in particular to two of them:

(a) The Global Alliance, aimed at promoting effective reporting under Goal 16, comprised of representatives from Member States, civil society and the private sector, and facilitated by the United Nations Development Programme (UNDP), which will coordinate and liaise with other United Nations entities and agencies as required; and

(b) The initiative of the United Nations Development Group (UNDG) to support the United Nations County Teams (UNCTs) in the implementation of the new agenda, through their respective United Nations Development Assistance Frameworks (UNDAFs). The initiative is called MAPS — Mainstreaming, Acceleration and Policy Support: mainstreaming refers to the integration of the 2030 Agenda into national and local plans for development, as well as into budget allocations, and the subsequent crafting of UNDAFs around supporting the implementation of those plans; acceleration refers to the targeting of resources according to the priority areas identified in the mainstreaming process; and policy support refers to the timely assistance from the United Nations to national actors with skills and expertise. The MAPS provides a shared resource for the UNCT's substantive engagement with governments and partners on the Sustainable Development Goals, paying special attention to the cross-cutting elements of partnerships, data and accountability.

316. The Commission was informed that reports of the Secretary-General on United Nations rule of law activities continue illustrating examples of rule of law activities by various United Nations entities that are members of the RoLCRG, including by UNCITRAL in the field of international commercial law.

317. The Commission expressed appreciation to the Director of the Rule of Law Assistance Unit for the briefing and reiterated its conviction that the implementation and effective use of modern private law standards in international trade are essential for advancing good governance, sustained economic development and the eradication of poverty and hunger. The promotion of the rule of law in commercial relations should therefore be an integral part of the broader agenda of the United Nations to promote the rule of law at the national and international levels. The Commission encouraged the Secretary-General to devise effective practical mechanisms to achieve such integration. The Commission looked forward to hearing the progress achieved in that respect at the next rule of law briefing scheduled for the fifty-first session of UNCITRAL, in 2018.

D. UNCITRAL comments to the General Assembly

1. Summary of the panel discussion on practices of States in the implementation of multilateral treaties emanated from the work of UNCITRAL

318. The speakers considered the topic timely and important and requiring a further in-depth analysis and follow-ups. The undisputed role of UNCITRAL in promoting the rule of law in commercial relations, in particular by reconciling the views and approaches of countries at various levels of development and between different legal systems, was highlighted.

319. Speakers referred to various factors influencing the implementation by States of treaties emanating from the work of UNCITRAL, highlighting their distinct features compared to international treaties in other areas of law. In particular, the level and intensity of support by domestic non-State actors (industry and other interest groups), in view of the international landscape and changing economic and technological conditions and business practices, were highlighted. The need for a dynamic domestic political landscape that may result in a change of policies and priorities, and the competing need to deal with treaties from other branches of law, were also mentioned as factors to be taken into account. The need to reconcile views at federal and State levels was also to be considered in some countries.

320. The importance of local capacity to ratify and implement a treaty mattered since international commercial law treaties tend to be complex and to require expert knowledge for their understanding. The explanatory notes to treaties, the appropriate participation of a State in treaty-making processes, and the technical assistance provided to a State with treaty implementation were all considered helpful for building such capacity.

321. Nevertheless, practices of States of signing treaties without being committed to their ratification were noted. For an increase of the level of commitment of States to pursue ratification, it was suggested to expand the number of interested State constituencies beyond the foreign and justice ministries to include finance and trade ministries. The importance of regional efforts, such as those within APEC, towards achieving commercial law harmonization and unification within a particular region was also emphasized. The establishment of a dedicated forum at the international and regional levels where States can meet to share and discuss experiences regarding implementation of commercial law conventions was recommended. Such forums could be used for identifying obstacles to ratification and implementation of treaties, and solutions to overcome them, including through possible changes in treaty design and substance. Those processes could be informative, not only with respect to already concluded treaties but also to possible future ones.

322. The importance for effective implementation of treaties of achieving their uniform interpretation and application was noted. Speakers recognized the role of CLOUT and digests (see chapter X above) in that respect. Reference was made to the international commitment of States under international commercial law treaties to interpret them with due regard to their international character and the need to promote uniformity in their application and the observance of good faith in international trade. These commitments presuppose the autonomous interpretation of those treaties rather than their interpretation in light of domestic law and concepts, except when the latter would be acceptable or mandatory under the treaty itself.

323. It was noted that unjustified resort to domestic concepts or concepts of any other preferred law in order to resolve interpretative problems that might arise under the international commercial law treaties defeated the very purpose of these instruments, namely the creation of a uniform law aimed at the creation of legal certainty and the removal of legal barriers in international trade. They might lead to a battle of interpretation trends, and jeopardized the universal acceptability of international commercial law treaties (prompting parties to opt out from the application of a treaty to avoid giving the other party the competitive advantage of reliance on its domestic interpretation of that treaty). The notion of a treaty being a neutral law to which parties can resort when they wish to avoid the application of the domestic law of any of the contracting parties would thus be undermined.

Damage to the predictability and reliability of law which a treaty meant to create, and increased transaction costs would as a result be inevitable.

324. A solution to the disruptive effects of the homeward and outwards trends in interpretations of international commercial law instruments might be achieved by changing the background assumptions and conceptions that justified such trends. To that end, the study of international commercial law standards in law schools, as a distinct autonomous layer of rules that may be applicable to a particular commercial transaction, was considered necessary.

325. Finally, the debate emphasized the importance of coordination and cooperation among rule-formulating bodies in the field of international commercial law, to avoid conflicting rules and interpretations, and to benefit from comparative advantages of agencies involved by using their respective expertise more efficiently. It was noted that the pool of entities relevant to rule formulating in the field of international trade has increased and now includes multilateral development banks and other international financial institutions.

326. Suggestions were made for the coordination and cooperation among relevant entities to become more structured and institutionalized. The current modus operandi was based largely on the good will of secretariats of the respective entities, which was not sufficient to ensure a clear division of labour and strategic work planning in the long run. Examples were given of recent successful cooperation between UNCITRAL, the Hague Conference and Unidroit in the area of international contracts law (see paras. 278-282 above). A similar level of cooperation should be achieved in other areas. In particular an acute need seemed to exist in the area of security interests/secured transactions, which involved at least six organizations.

327. Suggestions were made for monitoring conventions emanated from the work of UNCITRAL, based on already existing examples under other treaties. Distinct features of international commercial law instruments (e.g. party autonomy provisions) would require particular attention, for example through reporting on the use of the texts by private parties, courts and other relevant stakeholders, in addition to reports by States on the status of ratification and implementation of their respective international obligations under those treaties.

328. In ensuing discussions, a point was made that another factor influencing ratification of treaties was the level of complexity of treaties: examples were given of treaties that failed because of their excessive ambition, despite subsequent efforts of States to rectify their scope, structure and substance. Improving coordination was considered important but the efforts should not be limited to inter-secretariat cooperation: the indispensable role of State members of various rule-formulating entities was not to be underestimated.

329. Support was expressed for the idea that the quality of the texts depended on the quality of delegations. However, it was recalled that it was not for international organizations to dictate how States should compose their delegations.

330. A question was raised as to whether case law referred to in CLOUT was intended to have any effect as precedent. In response, the speakers unanimously emphasized that CLOUT cases and digests could never displace the value of precedent under applicable domestic law. However, they were an important source of information for courts and arbitral tribunals, in particular because they could indicate prevailing trends and, for that reason, might be considered persuasive in interpreting international commercial law standards emanated from the work of UNCITRAL.

331. There was general support for holding rule of law panel discussions at future sessions. The Secretariat was requested in composing future rule of law panels to ensure a balanced representation of common and continental systems of law.

2. Summary of the panel discussion on practical measures to facilitate access to justice in the commercial law context, in particular by MSMEs

332. The Rule of Law Declaration,[102] in particular its UNCITRAL-related provisions,[103] was recalled in conjunction with the topic of the discussion. UNCITRAL was praised for removing legal obstacles to international trade by harmonizing international commercial law while carefully promoting the principle of party autonomy, without infringing on domestic systems and political or social values of States, and reconciling interests of various groups. It was also stated that the recent example of Working Group III (ODR) (see chapter V above) demonstrated how the working methods of UNCITRAL respected the rule of law.

333. The role of ODR in the electronic commerce environment was touched upon, with reference to the UNCITRAL Technical Notes on Online Dispute Resolution adopted by the Commission at the current session (see para. 217 above). The Technical Notes on Online Dispute Resolution, although not a normative text, were considered to provide an important reference to both ODR providers and users that currently operate under divergent rules. Being the first international document on the subject, they were expected to be widely used by practitioners and thus harmonize the field of ODR.

334. Speakers referred to the current practices of States to facilitate access to justice, often assisted by intergovernmental and non-governmental organizations active on such issues as mobile courts, electronic justice and informal justice mechanisms. Particular attention was paid to existing and emerging means to facilitate access to justice by MSMEs recognizing that they often carry the heavier burden in dysfunctional justice systems in the commercial law context. Higher transaction costs, problems with access to qualified affordable legal aid, imbalance of power and means in disputes involving larger economic operators and State officials, and corruption were cited as examples of particular issues faced by MSMEs in access to justice.

335. According to the representative of IDLO, a need existed to build increased judicial capacity to handle commercial disputes, especially those involving MSMEs, to increase judicial training generally, especially in least developed countries, and to assist MSMEs with drafting contracts and handling disputes. Examples were given of such activities in a number of countries in which IDLO operates.

336. The existence of various types of MSMEs (differing in size and structure) facing different issues was also recognized. MSMEs, depending on the legal and socioeconomic environment in which they operate, might face a variety of disputes and difficulties, and might thus require different tools to address them.

337. Attempts to create uniform solutions for resolving disputes involving MSMEs were questioned. It was also recalled that the many available dispute resolution mechanisms, each with its advantages and disadvantages, were more or less advisable, depending on the particular circumstances of a dispute and the parties involved. No such mechanism was therefore equally suitable for all disputes for all MSMEs. A dispute resolution method should be fit for the dispute and the parties involved; not the other way around. However the parties themselves, especially MSMEs are seldom in a position to assess their disputes and select the most suitable resolution technique on a case-by-case basis. Disputants are often pushed towards one method or another by various factors and actors (e.g. a legal counsel, court officer, development assistance entities).

338. It was suggested that neutral dispute profiling or an early case assessment tool might resolve that problem. The purpose of such an algorithm-based tool would be to assist private parties in commercial disputes in the choice of the method of dispute settlement most appropriate to the dispute, taking into account time, costs, location, language, applicable law and other considerations. Building such a tool would require extensive interdisciplinary and multicultural research that would also require an analysis of socioeconomic influences and sociocultural contexts. UNCITRAL, professional organizations and universities were invited to consider the desirability and feasibility of such a project, which might result in a tangible facilitation of access to justice, in particular by MSMEs.

---

[102] General Assembly resolution 67/1.

[103] Ibid., para. 8.

3. Comments by the Commission

339. The Commission expressed its appreciation to the panellists for their statements and welcomed further discussion of the novel issues that they had raised at the 2017 Congress (see chapter XVI below).

340. The Commission recalled that, at its forty-seventh session, in 2014, it considered its role in promoting the rule of law by facilitating access to justice,[104] and at its forty-eighth session, in 2015, it considered the role of its multilateral treaty processes in promoting and advancing the rule of law.[105] The Commission noted that issues raised, and its comments conveyed to the General Assembly, in those years were relevant to the subtopics that were discussed during the rule of law panel discussion at the current session.

341. Specifically on the subtopic of practices of States in the implementation of multilateral treaties emanated from the work of UNCITRAL, the Commission noted with appreciation that its views as conveyed to the General Assembly at its previous session were again supported by empirical evidence presented by the panellists. In particular, the reported practices of States supported the view that the quality of implementation of treaties emanating from the work of UNCITRAL often depended on the quality of treaty-making processes, including the level and quality of participation by States and other interested stakeholders in UNCITRAL's rule-formulating work. The Commission reiterated, for consideration by the General Assembly, the conclusions reached at its previous session when discussing issues related to its treaty processes that required attention.[106]

342. On the subtopic of the panel discussion on practical measures to facilitate access to justice in the commercial law context, in particular by MSMEs, the Commission recalled the comments conveyed to the General Assembly in the report on the work of its forty-seventh session.[107] The Commission reiterated the view expressed at that session that its work was relevant to all dimensions of access to justice (normative protection, capacity to seek remedy, and capacity to provide effective remedies). It drew the attention of the General Assembly to the fact that, at the current session of the Commission, UNCITRAL had enlarged the spectrum of its standards in the area of commercial dispute settlement by adopting the UNCITRAL Technical Notes on Online Dispute Resolution (see para. 217 above), which were particularly useful for the resolution of low-value cross-border disputes in an electronic commerce environment, and thus to MSMEs.

XV. Work Programme of the Commission

343. The Commission recalled its agreement to reserve time for discussion of the Commission's overall work programme as a separate topic at each Commission session, as a tool to facilitate effective planning of its activities.[108]

344. The Commission took note of the documents prepared to assist its discussions on this topic (A/CN.9/878, further documents referred to therein and proposals submitted thereafter). It noted that those documents addressed UNCITRAL's main activities, i.e. legislative development and activities designed to support the effective implementation, use and understanding of UNCITRAL texts (collectively referred to as "support activities").

345. The Commission also took note of the progress of its Working Groups and regarding support activities reported earlier in the session (see chapters III to XIV of this report).

A. Legislative development

346. As regards current and future legislative activity, the Commission decided as follows.

---

[104] *Official Records of the General Assembly, Sixty-ninth Session, Supplement No. 17* (A/69/17), paras. 234-240.
[105] Ibid., *Seventieth Session, Supplement No. 17* (A/70/17), paras. 318-324.
[106] Ibid., para. 324.
[107] Ibid., *Sixty-ninth Session, Supplement No. 17* (A/69/17), para. 240.
[108] Ibid., *Sixty-eighth Session, Supplement No. 17* (A/68/17), para. 310.

1. MSMEs

347. The Commission recalled the summary of its discussion on planned and future work in the area of MSMEs (see paras. 219-224 above). After discussion, it reaffirmed the mandate given to Working Group I to work on (a) key principles in business registration, and (b) legal questions surrounding the creation of a simplified business entity, both of which aimed at reducing the legal obstacles faced by MSMEs throughout their life cycle and, in particular, those in developing economies.

2. Arbitration and conciliation

348. The Commission noted that it had finalized and adopted the 2016 UNCITRAL Notes on Organizing Arbitral Proceedings (see paras. 157 and 158 above). The Commission recalled the summary of its discussion of the ongoing and possible future work in the area of arbitration and conciliation (see paras. 162-165 and 174-195 above).

349. After discussion, the Commission reaffirmed the mandate given to Working Group II to work on the preparation of an instrument dealing with enforcement of international commercial settlement agreements resulting from conciliation (see para. 165 above).

350. The Commission, in its final debates on the work programme, also reaffirmed the decision to retain the topics of (a) concurrent proceedings, (b) code of ethics/conduct for arbitrators, and (c) possible work on reform of investor-State dispute settlement system, on its agenda for further consideration at its next session. It further requested that the Secretariat, within its existing resources, continue to update and conduct preparatory work on all the topics so that the Commission would be in a position to make an informed decision whether to mandate its Working Group II to undertake work in any of the topics, following the current work on the enforcement of settlement agreements resulting from conciliation (see para. 195 above).

351. In addition, it was agreed that the Working Group should be referred to as Working Group II (Dispute Settlement), as the scope of its work was not necessarily limited to arbitration and conciliation.

3. Online dispute resolution

352. In light of the finalization and adoption of the UNCITRAL Technical Notes on Online Dispute Resolution (see para. 217 above), the Commission agreed that no future legislative activity should be planned on the topic.

4. Electronic commerce

353. The Commission recalled the summary of its discussion of the ongoing and future work in the area of electronic commerce (see paras. 225 to 237 above). After discussion, it reaffirmed the mandate given to Working Group IV to complete the preparation of the draft Model Law on Electronic Transferable Records and the accompanying explanatory note, and to consider the topics of identity management and trust services as well as of cloud computing upon completion of work on the draft Model Law (see para. 235 above).

5. Insolvency

354. The Commission recalled the summary of its discussion of the ongoing and future work in the area of insolvency (see paras. 241-247 above). After discussion, it reaffirmed the mandate given to Working Group V to continue work on the following three topics: (a) facilitating the cross-border insolvency of multinational enterprise groups; (b) obligations of directors of enterprise group companies in the period approaching insolvency; and (c) recognition and enforcement of insolvency-related judgments (see para. 241 above). In addition, the Commission recalled the mandate given to Working Group V related to insolvency of MSMEs (see para. 246 above).

6. Security interests

355. The Commission noted that it had finalized and adopted the UNCITRAL Model Law on Secured Transactions (see para. 119 above) and recalled the summary of its discussion

on the ongoing, planned and possible future work in the area of security interests (see paras. 120-128 above).

356. After discussion, the Commission reaffirmed the mandate given to Working Group VI to complete its work on the preparation of the draft Guide to Enactment during its next two sessions and submit the draft Guide to Enactment for consideration and adoption by the Commission at its next session (see para. 122 above). It was reaffirmed that, if the Working Group completed its work in less than two sessions, it could use the time remaining to discuss its future work in a session or in a colloquium to be organized by the Secretariat. It was further agreed that the Secretariat could seek, within its existing resources, to hold a colloquium to discuss future work on security interests (see para. 122 above) in addition to the two sessions devoted to Working Group VI.

357. It also reaffirmed the decision to retain on its future work agenda the preparation of a contractual guide on secured transactions and a uniform law text on intellectual property licensing (see para. 124 above) and to also add to its future work agenda the following topics: (a) the question whether the Model Law and the draft Guide to Enactment might need to be expanded to address matters related to secured finance to MSMEs; (b) the question whether any future work on a contractual guide on secured transactions should discuss contractual issues of concern to MSMEs (e.g. transparency issues); (c) any question that might not have already been addressed in the area of warehouse receipt financing (e.g. the negotiability of warehouse receipts); and (d) the question whether disputes arising from security agreements could be resolved through ADR mechanisms (see para. 125 above).

7. Public procurement and infrastructure development

358. As regards possible work in the areas of public procurement and infrastructure development, the Commission took note of the proposals set out in document A/CN.9/889. As regards public-private partnerships (PPPs), the Commission recalled its instructions to the Secretariat at the forty-eighth session to continue to follow developments in PPPs to advance preparations should the topic eventually be taken up, and to report further to the Commission at the current session.[109]

359. The view was expressed that the proposed future work on public procurement as well as on PPPs as set out in document A/CN.9/889 did not deserve work at the working group level and that there was no longer the need to retain those topics on the agenda of the Commission. In support of that view, it was stated that issues relating to PPPs were dealt with by other organizations, the topics were not ripe enough for harmonization as relevant practices were still developing and that resources available should be allocated to more urgent ongoing work, including the preparation of the Congress (see chapter XVI below). Concerns were also expressed with regard to the feasibility of work. Accordingly, it was suggested that the topics could be set aside for the time being and revisited when concrete subjects of interest and feasible projects were identified.

360. On the other hand, it was argued that the topic of PPPs should be retained on the agenda of the Commission particularly due to its importance for developing countries. It was mentioned that quite a number of infrastructure development projects in those countries were conducted in the framework of PPPs and that work by UNCITRAL could provide ample guidance. It was suggested that work could focus on specific topics relating to PPPs including those mentioned in document A/CN.9/889 and that updating of the 2000 UNCITRAL Legislative Guide on Privately Financed Infrastructure Projects[110] with the assistance of experts could be a starting point, and might offer an opportunity to better identify specific topics for possible future work. In that context, differing views were expressed on whether the work should be carried out at the working group level.

361. As regards the proposal for future work on the topic of suspension and debarment in public procurement, it was suggested that the Secretariat should continue to monitor developments in that field and should report periodically thereon to the Commission.

362. After discussions, it was generally felt that the topics relating to public procurement and infrastructure development were of continued importance, while it would be premature

[109] Ibid., *Seventieth Session, Supplement No. 17* (A/70/17), para. 363.
[110] United Nations publication, Sales No. E.01.V.4 (A/CN.9/SER.B/4).

to engage in any type of legislative work. It was agreed that the Secretariat should continue to monitor developments in those areas, particularly with regard to suspension and debarment in public procurement. With regard to PPPs, it was agreed that the Secretariat should consider updating where necessary all or parts of the UNCITRAL Legislative Guide on Privately Financed Infrastructure Projects, involving experts. Finally, it was agreed that the Secretariat should also continue to promote UNCITRAL texts in the area of public procurement, most importantly the Model Law on Public Procurement (2011).[111] In that context, it was highlighted that the above-mentioned activities should be undertaken taking into account the resources available to the Secretariat.

8. Possible colloquium on updating development on commercial fraud

363. The Commission considered a proposal by the Institute of International Banking Law & Practice and the International Law Institute to hold a two-day colloquium for updating developments on commercial fraud. It was suggested that the colloquium could provide the opportunity for experts to discuss developments and the successes and adequacy of efforts to combat commercial fraud. It was further suggested that areas for discussion could include revisiting the Secretariat informational note "Recognizing and Preventing Commercial Fraud: Indicators of Commercial Fraud". Lastly, it was suggested that the colloquium should be conducted in cooperation with the United Nations Office on Drugs and Crime (UNODC), if possible.

364. In response, it was questioned whether the topic of commercial fraud required additional consideration by the Commission, particularly as it dealt with criminal aspects and as the "Recognizing and Preventing Commercial Fraud: Indicators of Commercial Fraud" published by the Secretariat in 2013 was still relevant. After discussion, it was agreed that no resources should be allocated for that purpose. The Commission, however, requested the Secretariat to liaise with the Institute of International Banking Law & Practice and the International Law Institute, should those organizations consider holding a conference to address those topics, which might be reported to the Commission at a future session.

9. Allocation of conference resources

365. With regard to the two weeks of conference time that were available due to the conclusion of work in the area of ODR by Working Group III, the Commission agreed that the Secretariat should consider allocating the two weeks for additional work by Working Group II in the second half of 2016 and by Working Groups I and V in the first half of 2017. The Secretariat was requested to consider all possible options, including possibly sharing of the one-week session by two different Working Groups, which might facilitate discussion of the relevant topics and having back-to-back sessions. The Secretariat was further requested to explore the possibility of holding a colloquium to discuss future work on secured transactions. (For the dates agreed to be allocated to Working Groups I, II and V before the fiftieth session of the Commission, in 2017, see para. 394 below.)

B. Support activities

366. The Commission expressed its appreciation for the support activities described in documents A/CN.9/872, A/CN.9/873, A/CN.9/874, A/CN.9/875, A/CN.9/876, A/CN.9/877, A/CN.9/882 and A/CN.9/883, as considered earlier in the current session (see chapters X to XIV of this report).

367. The Commission recalled that it had emphasized the importance of support activities and the need to encourage such activities at the global and regional levels through the Secretariat, through the expertise available in the Working Groups and the Commission, through member States and through partnering arrangements with relevant international organizations, as well as promoting increased awareness of UNCITRAL's texts in these organizations and within the United Nations system.[112] After discussion, the Commission

[111] *Official Records of the General Assembly, Sixty-sixth Session, Supplement No. 17* (A/66/17), annex I.

[112] Ibid., *Sixty-ninth Session, Supplement No. 17* (A/69/17), paras. 263-265.

reaffirmed its request to the Secretariat to continue with those activities to the extent that its resources permitted.[113]

XVI. Congress 2017

368. The Commission recalled its instruction to the Secretariat to commence preparations for a Congress to commemorate UNCITRAL's fiftieth anniversary.[114] The Commission heard that the Secretariat had established a dedicated web page to publicise the event,[115] and that a Call for Papers had been issued and posted on the web page in June 2016.

369. It was noted that the Congress would be held during the first week of the Commission's fiftieth session in 2017, from 4-6 July, in Vienna.

370. The objectives of the Congress, it was recalled, were to discuss technical issues and to raise awareness of UNCITRAL and its potential to support cross-border commerce. The Commission noted that it had been proposed by consulted stakeholders that the Congress could seek to identify new areas of research and potential legislative activity for UNCITRAL, including (but not limited to): the development of the cross-border digital economy; finance in international trade; access to global supply chains and inputs (credit, transport, infrastructure); exploitation of global public goods; and dispute resolution in sectors such as climate disputes, and resource disputes.

371. The Commission heard that, in addition, consulted stakeholders suggested that the Congress would consider ways to enhance UNCITRAL's role in coordinating and cooperating in relevant work of other organizations, including in treaty-making and methods of legal harmonization. In that regard, the hope was expressed that participants would present ongoing commercial legal reform activities at the national and regional level, and discuss potential contributions to support trade law reform.

372. The Secretariat was urged to set a flexible and broad-ranging agenda, which would include an overview of UNCITRAL's existing and historical activities, and to take active steps to identify possible speakers and themes for discussion. The potential sensitivity of some possible topics, it was noted, indicated that a careful consideration of scope and manner of presentation would be necessary.

373. It was also noted that States would be consulted on the draft programme through the note verbale once the Call for Papers had closed, in the autumn of 2016.

XVII. Relevant General Assembly resolutions

374. The Commission took note of General Assembly resolution 70/115 of 14 December 2015 on the report of the United Nations Commission on International Trade Law on the work of its forty-eighth session, adopted on the recommendation of the Sixth Committee.

[113] Ibid., *Seventieth Session, Supplement No. 17* (A/70/17), para. 365.
[114] Ibid., para. 366.
[115] www.uncitral.org/uncitral/en/commission/colloquia/50th-anniversary.html.

XVIII. Other business

A. Entitlement to summary records

375. The Commission recalled that at its forty-fifth session, in 2012, it decided, while not relinquishing its entitlement to summary records under General Assembly resolution 49/221, to request that digital recordings continue to be provided at its forty-sixth and forty-seventh sessions, in 2013 and 2014, on a trial basis, in addition to summary records, as was done for the forty-fifth session.[116] The Commission also recalled that, at its forty-seventh and forty-eighth sessions, in 2014 and 2015, respectively, the Commission assessed the experience of using digital recordings and on the basis of that assessment decided to prolong the practice of providing to UNCITRAL digital recordings in parallel with summary records.[117]

376. At the current session, the Commission again assessed its experience with the use of digital recordings in the United Nations generally and in UNCITRAL specifically, on the basis of an oral report by the Secretariat. The Commission's attention was brought to General Assembly resolution 70/9 on the pattern of conferences. In that resolution, the General Assembly noted the increased use of digital recordings by intergovernmental bodies, including UNCITRAL and the United Nations Industrial Development Organization, and requested the Secretary-General to continue to report to the General Assembly in that regard. At the same time, the Assembly reiterated that the further expansion of transition from verbatim and summary records to digital recordings of meetings in the six official languages of the Organization as a cost-saving measure would require consideration, including of its legal, financial and human resources implications, by the General Assembly and full compliance with the relevant resolutions of the Assembly.

377. In light of that resolution, in particular its paragraph 90 that stressed that verbatim and summary records remained the only official records of the meetings of United Nations bodies, the Commission was of the view that the transition from summary records to digital recordings of UNCITRAL meetings in the six official languages of the Organization was not currently possible. The Commission requested the Secretariat to prolong the practice of providing to UNCITRAL digital recordings in parallel with summary records and was assured that there were no technical obstacles for that. The Commission reiterated its view that summary records would have to be provided to the Commission until no obstacles existed to making the transition from summary records to digital recordings. The Commission requested the Secretariat to inform the Commission when developments as regards the use of digital recordings in the United Nations so warrant.

B. Internship programme

378. The Commission recalled the considerations taken by its secretariat in selecting candidates for internship and noted with satisfaction the continuing positive implications of changes introduced in 2013 and 2014 in the United Nations internship programme (selection procedures and eligibility requirements) on the pool of eligible and qualified candidates for internship from under-represented countries, regions and language groups.[118]

379. The Commission was informed that, since the Secretariat's oral report to the Commission at its forty-eighth session, in July 2015,[119] twelve new interns had undertaken an internship with the UNCITRAL secretariat in Vienna. Most interns were coming from developing countries and countries in transition.

[119] Ibid., *Seventieth Session, Supplement No. 17* (A/70/17), para. 372.

C. Evaluation of the role of the Secretariat in facilitating the work of the Commission

380. The Commission recalled that at its fortieth session, in 2007,[120] it had been informed of the programme budget for the biennium 2008-2009, which listed among the expected accomplishments of the Secretariat "facilitating the work of UNCITRAL". The performance measure for that expected accomplishment was the level of satisfaction of UNCITRAL with the services provided, as evidenced by a rating on a scale ranging from 1 to 5 (5 being the highest rating).[121] At that session, the Commission had agreed to provide feedback to the Secretariat.

381. From the fortieth session until the forty-fifth session of the Commission, in 2012, the feedback was provided by States attending the annual sessions of UNCITRAL in response to the questionnaire circulated by the Secretariat by the end of the session. That practice had changed since the Commission's forty-fifth session, in 2012, partly because of the need to solicit more responses: instead of an in-session questionnaire, the Secretariat started circulating to all States closer to the start of an annual session of the Commission a note verbale with the request to indicate, by filling-in the evaluation form enclosed to the note verbale, their level of satisfaction with the services provided to UNCITRAL by the UNCITRAL secretariat during a given session. As regards the forty-eighth session of UNCITRAL such a note verbale was circulated to all Member States of the United Nations on 27 May 2016 and the period covered was indicated from the start of the forty-eighth session of UNCITRAL (29 June 2015).

382. The Commission was informed that the request by a note verbale and an additional request during the current session of UNCITRAL had elicited 17 responses and that the level of satisfaction with the services provided to UNCITRAL by the UNCITRAL secretariat, as indicated in those responses, remained high (10 States that responded gave 5 out of 5 and 7 States that responded gave 4 out of 5). The Commission heard that States in their statements to the Sixth Committee of the General Assembly on the report of the Commission often included their views on the work of the UNCITRAL secretariat in servicing the Commission. Such statements did not lend themselves to easy quantitative assessment.

383. The Commission took note of the concern that the level of responses to the request for evaluation remained low. There was general agreement that receiving feedback from more States about the UNCITRAL secretariat's performance would be necessary to allow for a more objective evaluation of the role of the Secretariat, as was required for budgetary and other purposes.

384. The Commission expressed appreciation to the Secretariat for its work in servicing UNCITRAL, highlighting in particular the quality of documents produced and responsiveness to requests of the Commission.

D. Methods of work

385. The Commission had before it proposals by delegations of Israel, Switzerland and the United States regarding its methods of work. When introducing their proposals, the proponents referred to the insufficient representation of States during the discussion of policy issues at annual sessions of UNCITRAL. They expressed their view that some adjustments in the planning and organization of annual sessions of UNCITRAL could facilitate the participation of States, especially from small States, not only during those parts of a session at which specific texts were reviewed for finalization and adoption, but also during more general policy discussions. Advance planning for more structured discussions, a clearer scheduling of agenda items, and the allotment of specific time periods for their consideration were brought forward as possible steps to be considered to that end.

386. Considering that the proposals were made available late in the session, a number of delegates reserved their position until they had had a chance to consult further. Concerns were expressed that the proposals failed to take into account various considerations that

[120] Ibid., *Sixty-second Session, Supplement No. 17* (A/62/17), part one, para. 243.
[121] A/62/6 (Sect. 8) and Corr.1, table 8.19 (d).

would impact their implementation, including the applicable rules on utilization of conference services, and on simultaneous distribution of documents in the six official languages of the United Nations. The implementation of some proposals, such as the earlier election of the bureau of the Commission and the earlier nomination of members of delegations to sessions of UNCITRAL, was considered to be within the exclusive prerogative of States, rather than practices that could be changed by the Secretariat or the Commission itself. Agreement on some of those issues necessitated consultations among States in regional groups. It was considered equally inappropriate or impractical to assume that the Secretariat should exercise much discretion as regards the removal, addition or prioritizing of agenda items and pre-allotting time for their consideration. Retaining flexibility was considered essential especially in the light of sovereign rights of States to speak and to make proposals at United Nations meetings.

387. Regarding the proposal that introduction of issues by the Secretariat during the sessions should be dispensed with to expedite deliberations by the Commission, at least in respect of issues already discussed in documents before the Commission, the proponents were urged to consider the point of view of various delegations, including those that did not work with the English version of documents (and therefore would appreciate a detailed introduction by the Secretariat, particularly in case of late issuance of documents), or that could not afford to participate in working groups, but still wished to have a say in the finalization of texts by the Commission. While the importance of taking those considerations into account was generally acknowledged, a widely shared view was also expressed that annual sessions of the Commission should not be used as substitutes for additional working group sessions. It was recalled that texts submitted by working groups for adoption by the Commission were expected to be sufficiently mature to avoid protracted discussion, especially at more than one annual session of the Commission.

388. Regarding the work programme of the Commission, the value of suggestions that might be made by experts on topics considered by working groups was acknowledged. However, the prevailing view was that the discussion of future work by the Commission should be scheduled for decisions to take place at the end of each session of the Commission. Such decisions should not be made within the working groups or during the finalization of texts submitted to the Commission. As to the duration of Commission sessions, preference was expressed for holding shorter sessions (i.e. to avoid three-week sessions). However, it was widely acknowledged that the workload of the Commission might justify flexibility, including the possibility of holding three-week sessions. It was recalled that the Commission usually had a chance to approve the timing and duration of its next session one year in advance.

389. About the use of online platforms by the Secretariat for intersessional consultations among States, a reservation was expressed, as States themselves should have a chance to consider how those platforms would work in compliance with various applicable rules of the United Nations. The scarcity of resources available to the UNCITRAL secretariat, including the lack of dedicated resources for IT specialists and IT services, was recalled.

390. Some support was expressed for continuing the discussion of the proposals at a future session. The prevailing view was that the issues raised in the proposals were more appropriate for informal discussion among States, and between States and the Secretariat.

391. After discussion, the Commission decided to take note of the proposals and invited States to consult informally, among themselves and with the Secretariat, on possible follow-up. Should any issue require a formal decision by the Commission, it could be brought to its attention at a future session. The Secretariat was invited to consider any technical adjustment to the provisional agenda and any other administrative measure within its control, to facilitate participation of all States during the entire duration of the session. The Secretariat was reminded of the desirability of avoiding United Nations official holidays, if possible, when scheduling sessions.

XIX. Date and place of future meetings

392. At its thirty-sixth session, in 2003, the Commission agreed that: (a) working groups should normally meet for a one-week session twice a year; (b) extra time, if required, could

be allocated from the unused entitlement of another working group provided that such arrangement would not result in the increase of the total number of 12 weeks of conference services per year currently allotted to sessions of all six working groups of the Commission; and (c) if any request by a working group for extra time would result in the increase of the 12-week allotment, it should be reviewed by the Commission, with proper justification being given by that working group regarding the reasons for which a change in the meeting pattern was needed.[122]

A. Fiftieth session of the Commission

393. The Commission approved the holding of its fiftieth session in Vienna from 3 to 21 July 2017. The Commission confirmed that UNCITRAL Congress 2017 would be held in conjunction with its fiftieth session from 4 to 6 July 2017 (see para. 369 above).

B. Sessions of working groups

1. Sessions of working groups between the forty-ninth and fiftieth sessions of the Commission

394. The Commission approved the following schedule of meetings for its working groups:

(a) Working Group I (MSMEs) would hold its twenty-seventh session in Vienna, from 3 to 7 October 2016, and the twenty-eighth session in New York, from 1 to 9 May 2017;

(b) Working Group II (Dispute Settlement) would hold its sixty-fifth session in Vienna, from 12 to 23 September 2016 (13 September is a United Nations official holiday in Vienna), and its sixty-sixth session in New York, from 6 to 10 February 2017;

(c) Working Group IV (Electronic Commerce) would hold its fifty-fourth session in Vienna, from 31 October to 4 November 2016, and its fifty-fifth session in New York, from 24 to 28 April 2017;

(d) Working Group V (Insolvency Law) would hold its fiftieth session in Vienna, from 12 to 16 December 2016, and its fifty-first session in New York, from 10 to 19 May 2017;

(e) Working Group VI (Security Interests) would hold its thirtieth session in Vienna, from 5 to 9 December 2016, and its thirty-first session in New York, from 13 to 17 February 2017.

2. Sessions of working groups in 2017 after the fiftieth session of the Commission

395. The Commission noted that tentative arrangements had been made for working group meetings in 2017 after its fiftieth session, subject to the approval by the Commission at that session:

(a) Working Group I (MSMEs) would hold its twenty-ninth session in Vienna from 2 to 6 October 2017;

(b) Working Group II (Dispute Settlement) would hold its sixty-seventh session in Vienna from 11 to 15 September 2017;

(c) Working Group IV (Electronic Commerce) would hold its fifty-sixth session in Vienna from 16 to 20 October 2017;

(d) Working Group V (Insolvency Law) would hold its fifty-second session in Vienna from 20 to 24 November 2017;

(e) Working Group VI (Security Interests) would hold its thirty-second session in Vienna from 11 to 15 December 2017.

---

[122] *Official Records of the General Assembly, Fifty-eighth Session, Supplement No. 17* (A/58/17), para. 275.

396. The Secretariat has reserved conference services in Vienna during the week of 27 November to 1 December 2017 for a session of Working Group III or another working group or other conference needs of UNCITRAL.

Annex I

Technical Notes on Online Dispute Resolution

Section I — Introduction

Overview of online dispute resolution

1. In tandem with the sharp increase of online cross-border transactions, there has been a need for mechanisms for resolving disputes which arise from such transactions.

2. One such mechanism is online dispute resolution ("ODR"), which can assist the parties in resolving the dispute in a simple, fast, flexible and secure manner, without the need for physical presence at a meeting or hearing. ODR encompasses a broad range of approaches and forms (including but not limited to ombudsmen, complaints boards, negotiation, conciliation, mediation, facilitated settlement, arbitration and others),[123] and the potential for hybrid processes comprising both online and offline elements. As such, ODR represents significant opportunities for access to dispute resolution by buyers and sellers concluding cross-border commercial transactions, both in developed and developing countries.

Purpose of the Technical Notes

3. The purpose of the Technical Notes is to foster the development of ODR and to assist ODR administrators, ODR platforms, neutrals, and the parties to ODR proceedings.

4. The Technical Notes reflect approaches to ODR systems that embody principles of impartiality, independence, efficiency, effectiveness, due process, fairness, accountability and transparency.

5. The Technical Notes are intended for use in disputes arising from cross-border low-value sales or service contracts concluded using electronic communications. They do not promote any practice of ODR as best practice.

Non-binding nature of the Technical Notes

6. The Technical Notes are a descriptive document. They are not intended to be exhaustive or exclusive, nor are they suitable to be used as rules for any ODR proceeding. They do not impose any legal requirement binding on the parties or any persons and/or entities administering or enabling an ODR proceeding, and do not imply any modification to any ODR rules that the parties may have selected.

Section II — Principles

7. The principles that underpin any ODR process include fairness, transparency, due process and accountability.

8. ODR may assist in addressing a situation arising out of cross-border e-commerce transactions, namely the fact that traditional judicial mechanisms for legal recourse may not offer an adequate solution for cross-border e-commerce disputes.

9. ODR ought to be simple, fast and efficient, in order to be able to be used in a "real world setting", including that it should not impose costs, delays and burdens that are disproportionate to the economic value at stake.

---

[123] The order of the list of approaches or forms in brackets is presented in increasing order of formality, reflecting the approach taken in the description of commonly-used, methods for settling disputes contained in UNCITRAL's Legislative Guide on Privately Financed Infrastructure Projects (2000), available at www.uncitral.org/uncitral/uncitral_texts/procurement_infrastructure.html. Furthermore, the terms are illustrative only, relative formality may vary from system to system, and relevant processes in some jurisdictions may be known by more than one of the terms contained in the list itself.

Transparency

10. It is desirable to disclose any relationship between the ODR administrator and a particular vendor, so that users of the service are informed of potential conflicts of interest.

11. The ODR administrator may wish to publish anonymized data or statistics on outcomes in ODR processes, in order to enable parties to assess its overall record, consistent with applicable principles of confidentiality.

12. All relevant information should be available on the ODR administrator's website in a user-friendly and accessible manner.

Independence

13. It is desirable for the ODR administrator to adopt a code of ethics for its neutrals, in order to guide neutrals as to conflicts of interest and other rules of conduct.

14. It is useful for the ODR administrator to adopt policies dealing with identifying and handling conflicts of interest.

Expertise

15. The ODR administrator may wish to implement comprehensive policies governing selection and training of neutrals.

16. An internal oversight/quality assurance process may help the ODR administrator to ensure that a neutral conforms with the standards it has set for itself.

Consent

17. The ODR process should be based on the explicit and informed consent of the parties.

Section III — Stages of an ODR proceeding

18. The process of an ODR proceeding may consist of stages including: negotiation; facilitated settlement; and a third (final) stage.

19. When a claimant submits a notice through the ODR platform to the ODR administrator (see section VI below), the ODR administrator informs the respondent of the existence of the claim and the claimant of the response. The first stage of proceedings — a technology-enabled negotiation — commences, in which the claimant and respondent negotiate directly with one another through the ODR platform.

20. If that negotiation process fails (i.e. does not result in a settlement of the claim), the process may move to a second, "facilitated settlement" stage (see paras. 40-44 below). In that stage of ODR proceedings, the ODR administrator appoints a neutral (see para. 25 below), who communicates with the parties in an attempt to reach a settlement.

21. If facilitated settlement fails, a third and final stage of ODR proceedings may commence, in which case the ODR administrator or neutral may inform the parties of the nature of such stage.

Section IV — Scope of ODR process

22. An ODR process may be particularly useful for disputes arising out of cross-border, low-value e-commerce transactions. An ODR process may apply to disputes arising out of both a business-to-business as well as business-to-consumer transactions.

23. An ODR process may apply to disputes arising out of both sales and service contracts.

Section V — ODR definitions, roles and responsibilities, and communications

24. Online dispute resolution, or "ODR", is a "mechanism for resolving disputes through the use of electronic communications and other information and communication technology". The process may be implemented differently by different administrators of the process, and may evolve over time.

25. As used herein a "claimant" is the party initiating ODR proceedings and the "respondent" the party to whom the claimant's notice is directed, in line with traditional, offline, alternative dispute resolution nomenclature. A neutral is an individual that assists the parties in settling or resolving the dispute.

26. ODR requires a technology-based intermediary. In other words, unlike offline alternative dispute resolution, an ODR proceeding cannot be conducted on an ad hoc basis involving only the parties to a dispute and a neutral (that is, without an administrator). Instead, to permit the use of technology to enable a dispute resolution process, an ODR process requires a system for generating, sending, receiving, storing, exchanging or otherwise processing communications in a manner that ensures data security. Such a system is referred to herein as an "ODR platform".

27. An ODR platform should be administered and coordinated. The entity that carries out such administration and coordination is referred to herein as the "ODR administrator". The ODR administrator may be separate from or part of the ODR platform.

28. In order to enable ODR communications, it is desirable that both the ODR administrator and the ODR platform be specified in the dispute resolution clause.

29. The communications that may take place during the course of proceedings have been defined as "any communication (including a statement, declaration, demand, notice, response, submission, notification or request) made by means of information generated, sent, received or stored by electronic, magnetic, optical or similar means."

30. It is desirable that all communications in ODR proceedings take place via the ODR platform. Consequently, both the parties to the dispute, and the ODR platform itself, should have a designated "electronic address". The term "electronic address" is defined in other UNCITRAL texts.

31. To enhance efficiency it is desirable that the ODR administrator promptly:

(a) Acknowledge receipt of any communication by the ODR platform;

(b) Notify parties of the availability of any communication received by the ODR platform; and

(c) Keep the parties informed of the commencement and conclusion of different stages of the proceedings.

32. In order to avoid loss of time, it is desirable that a communication be deemed to be received by a party when the administrator notifies that party of its availability on the platform; deadlines in the proceedings would run from the time the administrator has made that notification. At the same time, it is desirable that the ODR administrator be empowered to extend deadlines, in order to allow for some flexibility when appropriate.

Section VI — Commencement of ODR proceedings

33. In order that an ODR proceeding may begin, it is desirable that the claimant provide to the ODR administrator a notice containing the following information:

(a) The name and electronic address of the claimant and of the claimant's representative (if any) authorized to act for the claimant in the ODR proceedings;

(b) The name and electronic address of the respondent and of the respondent's representative (if any) known to the claimant;

(c) The grounds on which the claim is made;

(d) Any solutions proposed to resolve the dispute;

(e) The claimant's preferred language of proceedings; and

(f) The signature or other means of identification and authentication of the claimant and/or the claimant's representative.

34. ODR proceedings may be deemed to have commenced when, following a claimant's communication of a notice to the ODR administrator, the ODR administrator notifies the parties that the notice is available at the ODR platform.

35. It is desirable that the respondent communicate its response to the ODR administrator within a reasonable time of being notified of the availability of the claimant's notice on the ODR platform, and that the response include the following elements:

(a) The name and electronic address of the respondent and the respondent's representative (if any) authorized to act for the respondent in the ODR proceedings;

(b) A response to the grounds on which the claim is made;

(c) Any solutions proposed to resolve the dispute;

(d) The signature or other means of identification and authentication of the respondent and/or the respondent's representative; and

(e) Notice of any counterclaim containing the grounds on which the counterclaim is made.

36. As much as is possible, it is desirable that both the notice and response be accompanied by all documents and other evidence relied upon by each party, or contain references to them. In addition, to the extent that a claimant is pursuing any other legal remedies, it is desirable that such information also be provided with the notice.

Section VII — Negotiation

37. The first stage may be a negotiation, conducted between the parties via the ODR platform.

38. The first stage of proceedings may commence following the communication of the respondent's response to the ODR platform and:

(a) Notification thereof to the claimant; or

(b) Failing a response, the lapse of a reasonable period of time after the notice has been communicated to the respondent.

39. It is desirable that, if the negotiation does not result in a settlement within a reasonable period of time, the process proceed to the next stage.

Section VIII — Facilitated settlement

40. The second stage of ODR proceedings may be facilitated settlement, whereby a neutral is appointed and communicates with the parties to try to achieve a settlement.

41. That stage may commence if negotiation via the platform fails for any reason (including non-participation or failure to reach a settlement within a reasonable period of time), or where one or both parties to the dispute request to move directly to the next stage of proceedings.

42. Upon commencement of the facilitated settlement stage of proceedings, it is desirable that the ODR administrator appoint a neutral, and notify the parties of that appointment, and provide certain details about the identity of the neutral as described in paragraph 46 below.

43. In the facilitated settlement stage, it is desirable that the neutral communicate with the parties to try to achieve a settlement.

44. If a facilitated settlement cannot be achieved within a reasonable period of time, the process may move to a final stage.

Section IX — Final stage

45. If the neutral has not succeeded in facilitating the settlement, it is desirable that the ODR administrator or neutral informs the parties of the nature of the final stage, and of the form that it might take.

Section X — Appointment, powers and functions of the neutral

46. To enhance efficiency and reduce costs, it is preferable that the ODR administrator appoint a neutral only when a neutral is required for a dispute resolution process in accordance with any applicable ODR rules. At the point in an ODR proceeding at which a neutral is required for the dispute resolution process, it is desirable that the ODR administrator "promptly" appoint the neutral (i.e., generally at the commencement of the facilitated settlement stage of proceedings). Upon appointment, it is desirable that the ODR administrator promptly notify the parties of the name of the neutral and any other relevant or identifying information in relation to that neutral.

47. It is desirable that neutrals have the relevant professional experience as well as dispute resolution skills to enable them to deal with the dispute in question. However, subject to any professional regulation, ODR neutrals need not necessarily be qualified lawyers.

48. With regard to the appointment and functions of neutrals, it is desirable that:

(a) The neutral's acceptance of his or her appointment operates to confirm that he or she has the time necessary to devote to the process;

(b) The neutral be required to declare his or her impartiality and independence and disclose at any time any facts or circumstances that might give rise to likely doubts as to his or her impartiality or independence;

(c) The ODR system provides parties with a method for objecting to the appointment of a neutral;

(d) In the event of an objection to an appointment of a neutral, the ODR administrator be required to make a determination as to whether the neutral shall be replaced;

(e) There be only one neutral per dispute appointed at any time for reasons of cost efficiency;

(f) A party be entitled to object to the neutral receiving information generated during the negotiation period; and

(g) If the neutral resigns or has to be replaced during the course of the ODR proceedings, the ODR administrator be required to appoint a replacement, subject to the same safeguards as set out during the appointment of the initial neutral.

49. In respect of the powers of the neutral, it is desirable that:

(a) Subject to any applicable ODR rules, the neutral be enabled to conduct the ODR proceedings in such a manner as he or she considers appropriate;

(b) The neutral be required to avoid unnecessary delay or expense in the conduct of the proceedings;

(c) The neutral be required to provide a fair and efficient process for resolving disputes;

(d) The neutral be required to remain independent, impartial and treat both parties equally throughout the proceedings;

(e) The neutral be required to conduct proceedings based on such communications as are before the neutral during the proceedings;

(f) The neutral be enabled to allow the parties to provide additional information in relation to the proceedings; and

(g) The neutral be enabled to extend any deadlines set out in any applicable ODR rules for a reasonable time.

50. While the process for appointment of a neutral for an ODR proceeding is subject to the same due process standards that apply to that process in an offline context, it may be desirable to use streamlined appointment and challenge procedures in order to address the need for ODR to provide a simple, time-, and cost-effective alternative to traditional approaches to dispute resolution.

Section XI — Language

51. Technology tools available in ODR can offer a great deal of flexibility regarding the language used for the proceeding. Even where an ODR agreement or ODR rules specify a language to be used in proceedings, it is desirable that a party to the proceedings be able to indicate in the notice or response whether it wishes to proceed in a different language, so that the ODR administrator can identify other language options that the parties may select.

Section XII — Governance

52. It is desirable for guidelines (and/or minimum requirements) to exist in relation to the conduct of ODR platforms and administrators.

53. It is desirable that ODR proceedings be subject to the same confidentiality and due process standards that apply to dispute resolution proceedings in an offline context, in particular independence, neutrality and impartiality.

Annex II

Guidance Note on Strengthening United Nations Support to States, Upon Their Request, to Implement Sound Commercial Law Reforms

A. About this Guidance Note

1. This Guidance Note provides the guiding principles and framework for strengthening United Nations support to States, upon their request, to implement sound commercial law reforms on the basis of internationally accepted standards. It is framed within the United Nations mandate to promote higher standards of living, full employment, and conditions of economic and social progress and development, as well as solutions of international economic, social and related problems. It is a contribution to the implementation of the international development agenda and General Assembly resolutions calling for: (a) enhanced technical assistance and capacity-building in the international commercial law field; (b) better integration of the work in that field in the broader agenda of the United Nations; (c) greater coordination and coherence among the United Nations entities and with donors and recipients; (d) greater evaluation of the effectiveness of such activities; (e) measures to improve the effectiveness of capacity-building activities; and (f) placement of national perspectives at the centre of United Nations assistance programmes.

2. This Guidance Note is relevant to all United Nations departments, offices, funds, agencies and programmes as well as other donors that deal with: (a) mobilizing finance for sustainable development; (b) reducing or removing legal obstacles to the flow of international trade and achieving international and/or regional economic integration; (c) private sector development; (d) justice sector reforms; (e) increasing the resilience of economies to economic crisis; (f) good governance, including public procurement reforms and e-governance; (g) empowerment of the poor; (h) preventing and combating economic crimes through education (e.g. commercial fraud, forgery and falsification); (i) addressing the root causes of conflicts triggered by economic factors; (j) addressing post-conflict economic recovery problems; (k) addressing specific problems with access to international trade by landlocked countries; and (l) domestic implementation of international obligations in the field of international commercial law and related areas.

B. Guiding principles

1. The United Nations work in the field of international commercial law as an integral part of the broader agenda of the United Nations

3. The establishment of sound rules furthering commercial relations is an important factor in economic development. This is because commercial decisions are taken not in isolation but in the context of all relevant factors, including the applicable legal framework.

4. The modern and harmonized international commercial law framework is the basis for rule-based commercial relations and an indispensable part of international trade, bearing in mind the relevance of domestic law and domestic legal systems in this regard. In reducing or removing legal obstacles to the flow of international trade, especially those affecting developing countries, it also contributes significantly to universal economic cooperation among all States on a basis of equality, equity, common interest and respect for legality, to the elimination of discrimination in international trade and, thereby, to peace, stability and the well-being of all peoples. The implementation and effective use of such frameworks are also essential for advancing good governance, sustained economic development and the eradication of poverty and hunger. Accordingly, they may contribute to the achievement of the purposes of the United Nations Charter and those specified in the United Nations General Assembly resolution 2205 (XXI) of 17 December 1966 on the establishment of the United Nations Commission on International Trade Law (UNCITRAL).

5. For these reasons, the United Nations work in the field of international commercial law should be better integrated, where and as necessary, at the headquarters and country

levels in United Nations operations in development, conflict-prevention, post-conflict-reconstruction and other appropriate contexts.

2. United Nations assistance to States, upon their request, with the assessment of local needs for commercial law reforms and their implementation

6. Commercial law constantly evolves in response to new business practices and global challenges. This necessitates the implementation of commercial law reforms that keep pace with those developments. States often request assistance with the assessment of the need for commercial law reforms and their implementation.

7. To achieve better integration of the United Nations work in the field of international commercial law in the broader agenda of the United Nations, United Nations entities operating on the ground should be able to respond to such requests. For that, they should be aware of standards, tools and expertise readily available in the United Nations system in the field of international commercial law. Guiding principle 5 below provides sources of information about such standards, tools and expertise and section C of this Guidance Note illustrates steps that may need to be taken to assist States with the assessment and implementation of commercial law reforms.

8. United Nations entities should promote the harmonization of the local legal framework regulating commercial relations with internationally accepted commercial law standards, where appropriate. Such harmonization would: (a) facilitate recognition, protection and enforcement of contracts and other binding commitments; (b) make commercial law more easily understandable to commercial parties; (c) promote uniform interpretation and application of international commercial law frameworks; and (d) provide legal certainty and predictability in order to enable parties to commercial transactions to take commercially reasonable decisions.

9. States also often request assistance with the assessment of the effectiveness of their mechanisms for adjudicating disputes and enforcing binding commitments in the context of trade and investment, in particular commercial arbitration and alternative dispute resolution mechanisms (jointly referred to in this Guidance Note as ADR). In this context, United Nations entities should be aware of the applicable internationally accepted standards, compliance with which may help to ensure that such mechanisms operate on the basis of internationally recognized norms and are easily accessible, affordable, efficient and effective. Where ADR is promoted by a State as an option to seeking adjudication of commercial disputes in a neutral forum, United Nations entities should be aware that court reforms may be needed so as to equip the judiciary to efficiently and effectively support ADR.

3. United Nations role in assisting States, upon their request, to implement holistic and properly coordinated commercial law reforms

10. Laws and regulations governing commercial relations and the accompanying institutional framework are not purely technical matters. They embody particular policy preferences. They can produce political and social impacts, including gender-unbalanced impacts, in addition to the obvious, economic impacts.

11. Commercial law reforms should therefore involve close consultation and coordination among all relevant stakeholders, including non-governmental organizations (representing the general public), lawyers, legislators, judges, arbitrators and other legal practitioners, such as officials responsible for drafting legislation. In particular, the close link between policymaking and law-making and institutional reforms needs to be ensured.

12. Commercial law reform is strongly linked to international legal obligations. Involvement of international experts may be desirable to ensure consistency between domestic law and international obligations where risks of creating gaps or conflicts between the two exist. United Nations entities should also support and encourage cooperation and exchanges of good practices between States as an important means of promoting sound commercial law reform.

13. The proper coordination among United Nations entities themselves and between them and other donors, as well as domestic governmental departments, engaging in reform efforts should also be achieved. The results of coordination and cooperation gained at the country

level must be preserved at the headquarters level and vice versa. Such coordination is essential in order to avoid duplication of efforts and promote efficiency, consistency and coherence in the modernization and harmonization of international commercial law.

4. United Nations support to States, upon their request, with building local capacity to effectively implement sound commercial law reforms

14. Adequate local capacity to enact, enforce, implement, apply and interpret sound commercial law frameworks is necessary for the expected benefits of rule-based commercial relations and international trade to accrue. Often States request international assistance with building the required local capacity.

15. The effective way to provide such assistance is through technical cooperation, training and capacity-building sessions aimed at strengthening local expertise to draw on readily available international standards, tools and expertise for carrying out commercial law reforms at the country level. United Nations entities should support the organization of those and similar activities and facilitate participation of local experts therein.

16. In addition, active participation of domestic governmental and non-governmental stakeholders in international legislative forums such as UNCITRAL (see guiding principle 5) (at the level of both working groups and the Commission) can significantly contribute to the understanding of the benefits of using international legal instruments to facilitate commercial law reform. Such participation can allow stakeholders to gain familiarity with the drafting of international commercial law and the different modalities which can be later used domestically. It can also serve as a platform for exchange of best practices with counterparts from a wide and diverse professional and geographical background. Close coordination of a State position in various regional and international rule-formulating bodies active in the field of international commercial law helps to avoid the appearance of conflicting rules and interpretations in those bodies. All efforts should therefore be made by United Nations entities to support States in their endeavours to achieve representation of their position in a sustained and coordinated manner in UNCITRAL and other regional and international rule-formulating bodies active in the field of international commercial law.

17. Achieving transparent, consistent and predictable outcomes in jurisprudence on commercial law matters in compliance with the relevant international obligations of States[124] is important for rule-based commercial relations. Judges, arbitrators, law professors and other legal practitioners play primary roles in this regard. Their capacity to interpret international commercial law standards in a way that would promote uniformity in their application and the observance of good faith in international trade should also be a continuous concern. There are tools specifically designed by the United Nations for such purposes (see guiding principle 5). United Nations entities should promote their development and use.

5. UNCITRAL is the core legal body in the United Nations system in the field of international commercial law and as such should be relied upon by United Nations entities in their support to States, upon their request, to implement sound commercial law reforms

18. UNCITRAL is the law-making body of the United Nations system in the field of international commercial law. It is an intergovernmental forum composed of Member States elected by the General Assembly. Its composition is representative of the various geographic regions and the principal economic and legal systems. Additionally, intergovernmental organizations, professional associations and other non-governmental organizations with observer status participate in its work.

19. UNCITRAL standards represent what the international community considers at a given time to be the best international practice for regulating certain commercial transactions. They equip States with models and guidance to support sound commercial law reforms at

[124] E.g. the United Nations Convention on Contracts for the International Sale of Goods (Vienna, 1980), article 7. United Nations, *Treaty Series*, vol. 1489, No. 25567. Also available at www.uncitral.org/uncitral/en/uncitral_texts/sale_goods/1980CISG.html.

lower costs. Reliance on such standards enhances the quality of enacted legislation in the long run and builds the confidence of the private sector, including foreign investors, in the ease of doing business in a country that adheres to them.

20. Most standards are adaptable to local circumstances and needs of commercial parties.[125] A particular feature of UNCITRAL model laws and similar instruments issued by other international organizations is that they can be used by States as a basis or inspiration for legislation that forms part of commercial law reform: they can be adapted to domestic circumstances, and States can select which provisions are most relevant to their legal systems.

21. In addition to internationally accepted commercial law standards, UNCITRAL provides readily available technical assistance, capacity-building and other tools, such as CLOUT,[126] digests of case law,[127] databases related to the implementation of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards, done at New York, on 10 June 1958[128] (the New York Convention),[129] and other databases and publications,[130] that aim to facilitate the understanding and use of those standards and to disseminate information about modern legal developments, including case law, in the international commercial law field. Those tools are in particular indispensable in training judges, arbitrators, law professors and other legal practitioners on commercial law matters and to the legal empowerment of people in general.

22. The areas covered by UNCITRAL work are: (a) contracts (international sale of goods, international transport of goods, electronic commerce); (b) international commercial and investment dispute settlement (arbitration, conciliation, online dispute resolution (ODR) and investor-State dispute resolution); (c) public procurement and privately financed infrastructure projects; (d) international payments; (e) insolvency law; (f) security interests; (g) commercial fraud; and (h) developing an enabling legal environment for micro-, small and medium-sized enterprises.[131]

C. Operational framework

23. Sections below illustrate steps that may need to be taken by United Nations entities that are requested by States to assist with the assessment and implementation of commercial law reforms.

1. Legal framework

24. States may request technical assistance and capacity-building with their commercial law reform efforts, in particular with identification of local needs for commercial law reforms, with enactment of a law or with updating and modernizing existing rules on a particular commercial law subject. In response, the United Nations should endeavour to assist States with the following, bearing in mind that reform of the legal framework should remain a process which is country led, country owned and country managed:

(a) Preparing a structured workplan that would identify the goals and objectives of the different steps for commercial law reform (for both providing assistance and taking

[131] New areas of work may be added. For the most updated list, please contact the UNCITRAL secretariat at the addresses indicated in the end of this Guidance Note or check the UNCITRAL website (www.uncitral.org).

reform measures), set up a schedule, develop strategies to address the weaknesses or inadequacies of the different legislative norms or practices, appoint appropriate focal points to coordinate a specific reform initiative and allocate resources;

(b) Assessing the general commercial law framework and the status of its implementation in the State, e.g.: (i) whether the State is party to fundamental conventions in the commercial law field (e.g. the New York Convention), which will be conducive to other commercial law reforms; (ii) if yes, the status of their implementation; (iii) if not, measures to be taken to consider becoming a party; and (iv) whether the local commercial law framework is otherwise compliant with internationally accepted commercial law standards;

(c) In the context of a particular commercial law reform:

(i) Identifying an applicable internationally accepted commercial law standard and related readily available tools and expertise designed to facilitate its enactment;

(ii) Identifying all stakeholders relevant to the commercial law reform, including domestic reform constituencies, international experts, various donors working in the same or related field, etc., and appropriate focal points in each entity to coordinate a specific reform, in order to facilitate proper consultations with them, where necessary;

(iii) Preparing a comprehensive legislative package to accompany the adoption of a new law (e.g. other necessary laws, regulations, guidance and/or codes of conduct) and ensuring the proper expert assessment of the legislative package before the law is adopted.

2. State institutions involved in commercial law reforms

25. States may request technical assistance and capacity-building, in particular as regards:

(a) Development of capacity in various State institutions (parliamentary committees, ministries of justice, trade and economic development, public procurement agencies, monitoring and oversight bodies) to handle commercial law reforms and implement commercial law framework. Technical assistance and capacity-building in such cases may take the form of: (i) raising awareness of readily available internationally accepted commercial law standards, and tools and expertise designed to facilitate understanding, enactment and implementation of those standards; (ii) circulating texts of the relevant standards; (iii) organizing briefings or training; (iv) supporting efforts to centralize local expertise on commercial law issues, for example through the establishment of a national centre of commercial law expertise or national research centre and national databases on commercial law issues; and (v) facilitating responsible and continuous representation of local experts in international and regional commercial law standard-setting activities;

(b) Building capacity of local judges, arbitrators and other legal practitioners to better understand internationally accepted commercial law standards, apply them in a uniform way and achieve a better quality of judgments and awards. Means of assistance may include: (i) raising awareness of readily available international tools designed to facilitate understanding and uniform interpretation and application of internationally accepted commercial law standards; (ii) supporting the establishment of a mechanism for collecting, analysing and monitoring national case law related to internationally accepted commercial law standards[132] and collecting relevant statistics, e.g. on the speed of adjudication and enforcement; (iii) supporting continuous learning courses for judges and inclusion in the curricula of such courses of the relevant readily available international tools referred to above; (iv) organizing local judicial training with the participation of experts; and (v) raising awareness about international judicial colloquiums and facilitating participation of local judges therein;

(c) The establishment and functioning of arbitration and conciliation centres. Means of assistance may include: (i) attracting readily available expertise for the establishment of,

[132] In this regard, please consult in particular the UNCITRAL CLOUT system that relies on a network of national correspondents designated by those States that are parties to a Convention, or have enacted legislation based on a Model Law, emanated from the work of UNCITRAL, or the New York Convention www.uncitral.org/uncitral/en/case_law/national_correspondents.html.

and support to, such centres; (ii) facilitating access to the ADR and ODR mechanisms in those centres, for example by raising public awareness about them; (iii) organizing training for separate groups of ADR practitioners with the involvement of relevant experts to assist these mechanisms to become more responsive to the rights and needs of intended end users (e.g. arbitrators on uniform application and interpretation of international commercial standards; mediators and conciliators on conflict resolution skills; and ODR providers on issues specific to e-environment); and (iv) addressing through court reforms and other measures the role of the judiciary in providing appropriate support to ADR and ODR mechanisms.

3. Private sector, academia and general public

26. States may request assistance with:

(a) Raising public awareness, in particular among micro-, small and medium-sized enterprises and individual entrepreneurs, about internationally accepted commercial law standards, the readily available tools designed to facilitate their understanding and use, and commercial opportunities linked thereto (e.g. e-commerce, cross-border trade, access to domestic and foreign public procurement markets, access to credit, viable options for recovery in case of financial difficulties). Assistance in such cases may take the form of: (i) translation of those standards into local languages; (ii) creation of readily available local databases of those standards with links to their international source and supporting tools; and (iii) dissemination of information about those standards by other means;

(b) Supporting community-based institutions that contribute to economic activity, empowerment of the poor, private sector development, access to justice, legal education and skills-building, such as chambers of commerce, bar associations, arbitration and conciliation centres, legal information centres and legal aid clinics;

(c) Maintaining regular dialogue with non-governmental organizations that represent various segments of society (e.g. consumers, local communities, end users of public services, individual entrepreneurs, micro-, small and medium-sized enterprises and academia) as regards their views on measures required to improve the commercial law framework in the State;

(d) Assisting members of academia with developing local legal doctrine on commercial law issues in line with internationally prevailing ones, in particular by facilitating establishment of, or participation in, existing regional and international exchange platforms, including electronic ones;

(e) Educating people on international commercial law issues and increasing their awareness of basic rights and obligations arising from commercial relations as directly relevant to entrepreneurship (e.g. start-up and management of business) and employment opportunities. Means of achieving that include assistance with: (i) including international commercial law subjects in curricula of schools, vocational and technical training courses and universities; (ii) organizing moot competitions and sponsoring participation of local student teams in relevant international moot competitions;[133] and (iii) raising awareness about international courses on international commercial law matters[134] and facilitating participation of interested individuals therein; and

(f) Building capacity of various actors in informal justice systems and ADR (e.g. village elders) to use mediation and conciliation skills in accordance with internationally accepted standards and to better understand international commercial law standards, apply them in a uniform way and achieve a better quality of decisions.

B. United Nations Conference on Trade and Development (UNCTAD): extract from the report of the Trade and Development Board on its sixty-third session (TD/B/63/7)

Progressive development of the law of international trade: forty-ninth annual report of the United Nations Commission on International Trade Law

At its 1147th plenary meeting, the Board took note of the annual report of the United Nations Commission on International Trade Law at its forty-ninth session (A/71/17), held in New York, the United States of America, from 27 June to 15 July 2016.

C. General Assembly: Report of the Sixth Committee on the report of the United Nations Commission on International Trade Law on the work of its forty-ninth session (A/71/507)

[Original: Spanish]

Rapporteur: Mr. Isaias **Medina** (Bolivarian Republic of Venezuela)

I. Introduction

1. At its 2nd plenary meeting, on 16 September 2016, the General Assembly, on the recommendation of the General Committee, decided to include in the agenda of its seventy-first session the item entitled "Report of the United Nations Commission on International Trade Law on the work of its forty-ninth session" and to allocate it to the Sixth Committee.

2. The Sixth Committee considered the item at its 11th, 12th, 19th and 24th meetings, on 10, 11, 20 and 27 October 2016. The views of the representatives who spoke during the Committee's consideration of the item are reflected in the relevant summary records.[1]

3. For its consideration of the item, the Committee had before it the report of the United Nations Commission on International Trade Law on the work of its forty-ninth session (A/71/17).

4. At the 11th meeting, on 10 October, the Chair of the United Nations Commission on International Trade Law at its forty-ninth session introduced the report of the Commission on the work of its forty-ninth session.

II. Consideration of proposals

A. Draft resolution A/C.6/71/L.10

5. At the 19th meeting, on 20 October, the representative of Austria, on behalf of Algeria, Argentina, Austria, Bulgaria, Canada, Chile, Croatia, Cyprus, Czechia, Denmark, El Salvador, Finland, France, Germany, Greece, Hungary, Iceland, India, Italy, Japan, Liechtenstein, Luxembourg, Madagascar, Mauritius, the Netherlands, the Philippines, Poland, Portugal, Romania, Serbia, Slovakia, Spain, Sweden, Thailand, Trinidad and Tobago, the United Kingdom of Great Britain and Northern Ireland and the United States of America, subsequently joined by Australia, Ireland, New Zealand, the Russian Federation, Singapore and Switzerland, introduced a draft resolution entitled "Report of the United Nations Commission on International Trade Law on the work of its forty-ninth session" (A/C.6/71/L.10).

6. At the 24th meeting, on 27 October, Belgium, Israel, the Republic of Moldova and Ukraine joined in sponsoring the draft resolution.

7. At the same meeting, the Committee adopted draft resolution A/C.6/71/L.10 without a vote (see para. 14, draft resolution I).

B. Draft resolution A/C.6/71/L.11

8. At the 19th meeting, on 20 October, the representative of Austria, on behalf of the Bureau, introduced a draft resolution entitled "Model Law on Secured Transactions of the United Nations Commission on International Trade Law" (A/C.6/71/L.11).

9. At its 24th meeting, on 27 October, the Committee adopted draft resolution A/C.6/71/L.11 without a vote (see para. 14, draft resolution II).

[1] A/C.6/71/SR.11, A/C.6/71/SR.12, A/C.6/71/SR.19 and A/C.6/71/SR.24.

C. Draft resolution A/C.6/71/L.12

10. At the 19th meeting, on 20 October, the representative of Austria, on behalf of the Bureau, introduced a draft resolution entitled "2016 Notes on Organizing Arbitral Proceedings of the United Nations Commission on International Trade Law" (A/C.6/71/L.12).

11. At its 24th meeting, on 27 October, the Committee adopted draft resolution A/C.6/71/L.12 without a vote (see para. 14, draft resolution III).

D. Draft resolution A/C.6/71/L.13

12. At the 19th meeting, on 20 October, the representative of Austria, on behalf of the Bureau, introduced a draft resolution entitled "Technical Notes on Online Dispute Resolution of the United Nations Commission on International Trade Law" (A/C.6/71/L.13).

13. At its 24th meeting, on 27 October, the Committee adopted draft resolution A/C.6/71/L.13 without a vote (see para. 14, draft resolution IV).

III. Recommendation of the Sixth Committee

14. The Sixth Committee recommends to the General Assembly the adoption of the following draft resolutions:

Draft resolution I
Report of the United Nations Commission on International Trade Law on the work of its forty-ninth session

The General Assembly,

Recalling its resolution 2205 (XXI) of 17 December 1966, by which it established the United Nations Commission on International Trade Law with a mandate to further the progressive harmonization and unification of the law of international trade and in that respect to bear in mind the interests of all peoples, in particular those of developing countries, in the extensive development of international trade,

Reaffirming its belief that the progressive modernization and harmonization of international trade law, in reducing or removing legal obstacles to the flow of international trade, especially those affecting developing countries, would contribute significantly to universal economic cooperation among all States on a basis of equality, equity, common interest and respect for the rule of law, to the elimination of discrimination in international trade and, thereby, to peace, stability and the well-being of all peoples,

Having considered the report of the Commission,[1]

Reiterating its concern that activities undertaken by other bodies in the field of international trade law without adequate coordination with the Commission might lead to undesirable duplication of efforts and would not be in keeping with the aim of promoting efficiency, consistency and coherence in the unification and harmonization of international trade law,

Reaffirming the mandate of the Commission, as the core legal body within the United Nations system in the field of international trade law, to coordinate legal activities in this field, in particular to avoid duplication of efforts, including among organizations formulating rules of international trade, and to promote efficiency, consistency and coherence in the modernization and harmonization of international trade law, and to continue, through its secretariat, to maintain close cooperation with other international organs and organizations, including regional organizations, active in the field of international trade law,

1. *Takes note with appreciation* of the report of the United Nations Commission on International Trade Law;[1]

2. *Commends* the Commission for the finalization and adoption of the Model Law on Secured Transactions,[2] the 2016 Notes on Organizing Arbitral Proceedings[3] and the Technical Notes on Online Dispute Resolution;[4]

3. *Notes with satisfaction* that the Commission has instructed its secretariat to commence preparations for a Congress to commemorate the Commission's fiftieth anniversary during its fiftieth session, with the objectives to discuss technical issues and to raise awareness of the Commission and its potential to support cross-border commerce;[5]

4. *Also notes with satisfaction* the contributions from the Fund for International Development of the Organization of the Petroleum Exporting Countries and from the European

Union, which allow the operation of the repository of published information under the Rules on Transparency in Treaty-based Investor-State Arbitration[6] until the end of 2016 and beyond, and that the Commission reiterated its strong and unanimous opinion that the secretariat of the Commission should continue to operate the transparency repository, which constitutes a central feature both of the Rules on Transparency and of the United Nations Convention on Transparency in Treaty-based Investor-State Arbitration (Mauritius Convention on Transparency);[7]

5. *Requests* the Secretary-General to continue to operate, through the secretariat of the Commission, the repository of published information in accordance with article 8 of the Rules on Transparency, as a pilot project until the end of 2017, to be funded entirely by voluntary contributions, and to keep the General Assembly informed of developments regarding the funding and budgetary situation of the transparency repository based on its pilot operation;

6. *Takes note with interest* of the decisions taken by the Commission as regards its future work and the progress made by the Commission in its work in the areas of dispute settlement,[8] electronic commerce, insolvency law, security interests[9] and international trade law aimed at reducing the legal obstacles faced by micro-, small- and medium-sized enterprises throughout their life cycle, and encourages the Commission to continue to move forward efficiently to achieve tangible work outcomes;

7. *Endorses* the efforts and initiatives of the Commission, as the core legal body within the United Nations system in the field of international trade law, aimed at increasing coordination of and cooperation on legal activities of international and regional organizations active in the field of international trade law and at promoting the rule of law at the national and international levels in this field, and in this regard appeals to relevant international and regional organizations to coordinate their legal activities with those of the Commission, to avoid duplication of efforts and to promote efficiency, consistency and coherence in the modernization and harmonization of international trade law;

8. *Reaffirms* the importance, in particular for developing countries, of the work of the Commission concerned with technical cooperation and assistance in the field of international trade law reform and development, and in this connection:

(a) Welcomes the initiatives of the Commission towards expanding, through its secretariat, its technical cooperation and assistance programme, and in that respect encourages the Secretary-General to seek partnerships with State and non-State actors to increase awareness about the work of the Commission and facilitate the effective implementation of legal standards resulting from its work;

(b) Expresses its appreciation to the Commission for carrying out technical cooperation and assistance activities and for providing assistance with legislative drafting in the field of international trade law, and draws the attention of the Secretary-General to the limited resources that are made available in this field;

(c) Expresses its appreciation to the Governments whose contributions enabled the technical cooperation and assistance activities to take place, and appeals to Governments, the relevant bodies of the United Nations system, organizations, institutions and individuals to make voluntary contributions to the United Nations Commission on International Trade Law Trust Fund for Symposia and, where appropriate, for the financing of special projects and otherwise to assist the secretariat of the Commission in carrying out technical cooperation and assistance activities, in particular in developing countries;

(d) Reiterates its appeal to the United Nations Development Programme and other bodies responsible for development assistance, such as the World Bank and regional

[9] Ibid., chap. III.

development banks, as well as to Governments in their bilateral aid programmes, to support the technical cooperation and assistance programme of the Commission and to cooperate with the Commission and coordinate their activities with those of the Commission in the light of the relevance and importance of the work and programmes of the Commission for the promotion of the rule of law at the national and international levels and for the implementation of the international development agenda, including the achievement of the 2030 Agenda for Sustainable Development;[10]

(e) Recalls its resolutions stressing the need to strengthen support to Member States, upon their request, in the domestic implementation of their respective international obligations through enhanced technical assistance and capacity-building, welcomes the efforts of the Secretary-General to ensure greater coordination and coherence among United Nations entities and with donors and recipients, notes the endorsement by the Commission of the Guidance Note on Strengthening United Nations Support to States, Upon Their Request, to Implement Sound Commercial Law Reforms,[11] and requests the Secretary-General to circulate the Guidance Note as broadly as possible to its intended users;

9. *Recalls* the importance of adherence to the rules of procedure and methods of work of the Commission, including transparent and inclusive deliberations, taking into account the summary of conclusions as reproduced in annex III to the report on the work of its forty-third session,[12] requests the Secretariat to issue, prior to meetings of the Commission and of its working groups, a reminder of those rules of procedure and methods of work with a view to ensuring the high quality of the work of the Commission and encouraging the assessment of its instruments, and in this regard recalls its previous resolutions related to this matter;

10. *Welcomes* the activities of the United Nations Commission on International Trade Law Regional Centre for Asia and the Pacific, in the Republic of Korea, towards providing capacity-building and technical assistance services to States in the Asia-Pacific region, including to international and regional organizations, expresses its appreciation to the Republic of Korea and China, whose contributions enabled continuing operation of the Regional Centre, notes that the continuation of the regional presence relies entirely on extrabudgetary resources, including but not limited to voluntary contributions from States, welcomes expressions of interest from other States in hosting regional centres of the Commission, and requests the Secretary-General to keep the General Assembly informed of developments regarding the establishment of regional centres, in particular their funding and budgetary situation;

11. *Appeals* to Governments, the relevant bodies of the United Nations system, organizations, institutions and individuals to make voluntary contributions to the Trust Fund established to provide travel assistance to developing countries that are members of the Commission, at their request and in consultation with the Secretary-General, in order to enable renewal of the provision of that assistance and to increase expert representation from developing countries at sessions of the Commission and its working groups, necessary to build local expertise and capacities in those countries to put in place a regulatory and enabling environment for business, trade and investment;

12. *Decides*, in order to ensure full participation of all Member States in the sessions of the Commission and its working groups, to continue, in the competent Main Committee during the seventy-first session of the General Assembly, its consideration of granting travel assistance to the least developed countries that are members of the Commission, at their request and in consultation with the Secretary-General;

13. *Endorses* the conviction of the Commission that the implementation and effective use of modern private law standards in international trade are essential for advancing good governance, sustained economic development and the eradication of poverty and hunger and that

[10] Resolution 70/1.

[11] *Official Records of the General Assembly, Seventy-first Session, Supplement No. 17* (A/71/17), para. 262 and annex II.

[12] Ibid., *Sixty-fifth Session, Supplement No. 17* (A/65/17).

the promotion of the rule of law in commercial relations should be an integral part of the broader agenda of the United Nations to promote the rule of law at the national and international levels, including through the Rule of Law Coordination and Resource Group, supported by the Rule of Law Unit in the Executive Office of the Secretary-General;

14. *Notes* the rule of law panel discussion held at the forty-ninth session of the Commission and the comments transmitted by the Commission pursuant to paragraph 20 of General Assembly resolution 70/118 of 14 December 2015, highlighting its role in promoting the rule of law, in particular the role of the multilateral treaty processes of the Commission in promoting and advancing the rule of law in the field of international trade law and the role of the Commission in promoting the rule of law by facilitating access to justice;[13]

15. *Notes with satisfaction* that, in paragraph 8 of the declaration of the high-level meeting of the General Assembly on the rule of law at the national and international levels, adopted by consensus as resolution 67/1 of 24 September 2012, Member States recognized the importance of fair, stable and predictable legal frameworks for generating inclusive, sustainable and equitable development, economic growth and employment, generating investment and facilitating entrepreneurship and, in this regard, commended the work of the Commission in modernizing and harmonizing international trade law and that, in paragraph 7 of the declaration, Member States expressed their conviction that the rule of law and development were strongly interrelated and mutually reinforcing;

16. *Also notes with satisfaction* that, in paragraph 89 of the Addis Ababa Action Agenda of the Third International Conference on Financing for Development, adopted by the General Assembly by consensus as resolution 69/313 of 27 July 2015, States endorsed the efforts and initiatives of the Commission, as the core legal body within the United Nations system in the field of international trade law, aimed at increasing coordination of and cooperation on legal activities of international and regional organizations active in the field of international trade law and at promoting the rule of law at the national and international levels in this field;

17. *Reiterates its request* to the Secretary-General, in conformity with resolutions of the General Assembly on documentation-related matters,[14] which, in particular, emphasize that any invitation to limit, where appropriate, the length of documents should not adversely affect either the quality of the presentation or the substance of the documents, to bear in mind the particular characteristics of the mandate and functions of the Commission in the progressive development and codification of international trade law when implementing page limits with respect to the documentation of the Commission;[15]

18. *Requests* the Secretary-General to continue the publication of Commission standards and the provision of summary records of the meetings of the Commission, including committees of the whole established by the Commission for the duration of its annual session, relating to the formulation of normative texts, and takes note of the Commission's decision to continue the trial use of digital recordings, in parallel with summary records where applicable, with a view to assessing the experience of using digital recordings and, on the basis of that assessment, taking a decision at a future session regarding the possible replacement of summary records by digital recordings;[16]

19. *Recalls* paragraph 48 of its resolution 66/246 of 24 December 2011 regarding the rotation scheme of meetings between Vienna and New York;

20. *Stresses* the importance of promoting the use of texts emanating from the work of the Commission for the global unification and harmonization of international trade law, and to

this end urges States that have not yet done so to consider signing, ratifying or acceding to conventions, enacting model laws and encouraging the use of other relevant texts;

21. *Notes with appreciation* the work of the Secretariat on the system for the collection and dissemination of case law on Commission texts in the six official languages of the United Nations (the CLOUT system), notes the resource-intensive nature of the system, acknowledges the need for further resources to sustain and expand it, and in this regard welcomes efforts by the Secretariat towards building partnerships with interested institutions, and appeals to Governments, the relevant bodies of the United Nations system, organizations, institutions and individuals to assist the secretariat of the Commission in raising awareness as to the availability and usefulness of the CLOUT system in professional, academic and judiciary circles and in securing the funding required for the coordination and expansion of the system and the establishment, within the secretariat of the Commission, of a pillar focused on the promotion of ways and means of interpreting Commission texts in a uniform manner;

22. *Welcomes* the continued work of the Secretariat on digests of case law related to Commission texts, including their wide dissemination, as well as the continuing increase in the number of abstracts available through the CLOUT system, in view of the role of the digests and the CLOUT system as important tools for the promotion of the uniform interpretation of international trade law, in particular by building local capacity of judges, arbitrators and other legal practitioners to interpret those standards in the light of their international character and the need to promote uniformity in their application and the observance of good faith in international trade;

23. *Recalls* its resolutions affirming the importance of high-quality, user-friendly and cost-effective United Nations websites and the need for their multilingual development, maintenance and enrichment,[17] commends the fact that the website of the Commission is published in the six official languages of the United Nations, and welcomes the continuous efforts of the Commission to maintain and improve its website, including by developing new social media features, in accordance with the applicable guidelines.[18]

[18] Resolution 63/120, para. 20.

Draft resolution II
Model Law on Secured Transactions of the United Nations Commission on International Trade Law

The General Assembly,

Recalling its resolution 2205 (XXI) of 17 December 1966, by which it established the United Nations Commission on International Trade Law with a mandate to further the progressive harmonization and unification of the law of international trade and in that respect to bear in mind the interests of all peoples, in particular those of developing countries, in the extensive development of international trade,

Recalling also its resolutions 56/81 of 12 December 2001, 63/121 of 11 December 2008, 65/23 of 6 December 2010 and 68/108 of 16 December 2013, in which it recommended that States consider or continue to consider becoming parties to the United Nations Convention on the Assignment of Receivables in International Trade[1] and giving favourable consideration to the *UNCITRAL Legislative Guide on Secured Transactions, the Supplement on Security Rights in Intellectual Property* and the *UNCITRAL Guide on the Implementation of a Security Rights Registry*, respectively,

Recalling further that, at its forty-sixth session, in 2013, the Commission entrusted Working Group VI (Security Interests) with the preparation of a model law on secured transactions based on the recommendations of the *UNCITRAL Legislative Guide on Secured Transactions* and consistent with all texts prepared by the Commission on secured transactions,[2]

Noting that Working Group VI devoted six sessions,[3] from 2013 to 2016, to the preparation of the Model Law on Secured Transactions,

Noting also that, at its forty-eighth session, in 2015, the Commission approved the substance of the registry-related provisions of the Model Law,[4]

Noting with satisfaction that the Model Law is based on the recommendations of the *UNCITRAL Legislative Guide on Secured Transactions* and consistent with all texts prepared by the Commission on secured transactions, and with those texts thus provides comprehensive guidance to States with respect to legal and practical issues that need to be addressed when implementing a modern secured transactions regime,

Recognizing that an efficient secured transactions regime with a publicly accessible security rights registry of the kind provided for in the Model Law is likely to increase access to affordable secured credit and thus promote economic growth, sustainable development, the rule of law and financial inclusion, as well as assist in combating poverty,

Recognizing also that the harmonization of national secured transactions regimes and registries on the basis of the Model Law is likely to increase the availability of secured credit across national borders and thus facilitate the development of international trade, which, if achieved on the basis of equality and mutual benefit to all States, is an important element in promoting friendly relations among States,

Recognizing further that secured transactions law reform could not be effectively implemented without the establishment of an efficient, publicly accessible security rights registry where information about the potential existence of a security right in movable assets may be registered, and that States urgently need guidance with respect to the establishment and operation of such registries,

---

[4] *Official Records of the General Assembly, Seventieth Session, Supplement No. 17* (A/70/17), para. 214.

Convinced that the Model Law will contribute to greater legal certainty in the exercise of international commercial activities for the benefit of all States, particularly developing countries and States with economies in transition,

Noting with appreciation that all States and interested international organizations were invited to participate in the preparation of the draft Model Law at all the sessions of the Working Group and at the forty-eighth and forty-ninth sessions of the Commission, either as members or as observers, and that comments received after circulation of the text of the Model Law to all Governments were before the Commission at its forty-ninth session,[5]

Expressing its appreciation to international intergovernmental and non-governmental organizations active in the field of secured transactions law reform for their participation in and support for the development of the Model Law,

1. *Expresses its appreciation* to the United Nations Commission on International Trade Law for completing and adopting the Model Law on Secured Transactions;[6]

2. *Requests* the Secretary-General to publish the Model Law, including electronically, in the six official languages of the United Nations, and to disseminate it broadly to Governments and other interested bodies;

3. *Recommends* that all States give favourable consideration to the Model Law when revising or adopting legislation relevant to secured transactions, and invites States that have used the Model Law to advise the Commission accordingly;

4. *Also recommends* that, where necessary, States continue to give favourable consideration to the *UNCITRAL Guide on the Implementation of a Security Rights Registry* when revising relevant legislation, administrative regulations or guidelines, and to the *UNCITRAL Legislative Guide on Secured Transactions* and the *Supplement on Security Rights in Intellectual Property* when revising or adopting legislation relevant to secured transactions, and invites States that have used the guides to advise the Commission accordingly;

5. *Further recommends* that all States continue to consider becoming parties to the United Nations Convention on the Assignment of Receivables in International Trade,[1] the principles of which are also reflected in the Model Law, and the optional annex to which refers to the registration of notices with regard to assignments.

Draft resolution III
2016 Notes on Organizing Arbitral Proceedings of the United Nations Commission on International Trade Law

The General Assembly,

Recalling its resolution 2205 (XXI) of 17 December 1966, by which it established the United Nations Commission on International Trade Law with a mandate to further the progressive harmonization and unification of the law of international trade and in that respect to bear in mind the interests of all peoples, in particular those of developing countries, in the extensive development of international trade,

Recalling also its resolution 51/161 of 16 December 1996, in which it commended the Commission for the finalization of the Notes on Organizing Arbitral Proceedings,

Reaffirming the value and increased use of arbitration as a method of settling disputes,

Recognizing the need for revising the Notes to conform to current arbitral practices,

Noting that the purpose of the Notes is to list and briefly describe matters relevant to the organization of arbitral proceedings and that the Notes, prepared with a focus on international arbitration, are intended to be used in a general and universal manner, regardless of whether the arbitration is administered by an arbitral institution,

Noting also that the Notes do not seek to promote any practice as best practice, given that procedural styles and practices in arbitration vary and each of them has its own merit,

Recognizing that the revision of the Notes was the subject of due deliberation in the Commission, which benefited greatly from consultations with Governments and interested intergovernmental and international non-governmental organizations active in the field of arbitration, including arbitral institutions, as well as individual experts,

1. *Expresses its appreciation* to the United Nations Commission on International Trade Law for preparing and adopting the 2016 Notes on Organizing Arbitral Proceedings;[1]

2. *Recommends* the use of the 2016 Notes, including by parties to arbitration, arbitral tribunals and arbitral institutions, as well as for academic and training purposes with respect to international commercial dispute settlement;

3. *Requests* the Secretary-General to publish the 2016 Notes, including electronically, in the six official languages of the United Nations, and to make all efforts to ensure that the Notes become generally known and available.

[1] See *Official Records of the General Assembly, Seventy-first Session, Supplement No. 17* (A/71/17), chap. IV, sect. A.

Draft resolution IV
Technical Notes on Online Dispute Resolution of the United Nations Commission on International Trade Law

The General Assembly,

Recalling its resolution 2205 (XXI) of 17 December 1966, by which it established the United Nations Commission on International Trade Law with a mandate to further the progressive harmonization and unification of the law of international trade and in that respect to bear in mind the interests of all peoples, in particular those of developing countries, in the extensive development of international trade,

Recognizing that the sharp increase in online cross-border transactions has raised a need for mechanisms for resolving disputes that arise from such transactions, and recognizing also that one such mechanism is online dispute resolution,

Observing that online dispute resolution can assist the parties in resolving the dispute in a simple, fast, flexible and secure manner, without the need for physical presence at a meeting or hearing,

Observing also that online dispute resolution represents significant opportunities for access to dispute resolution by buyers and sellers concluding cross-border commercial transactions, both in developed and developing countries,

Recalling that, at its forty-third session, in 2010, the Commission agreed that a working group should be established to undertake work in the field of online dispute resolution,[1] and that, at its forty-eighth session, in 2015, the Commission decided that the work should take the form of a non-binding descriptive document reflecting elements of an online dispute resolution process,[2]

Noting that the Technical Notes on Online Dispute Resolution[3] are non-binding and descriptive and reflect the principles of impartiality, independence, efficiency, effectiveness, due process, fairness, accountability and transparency,

Noting also that the Technical Notes are expected to contribute significantly to the development of systems to enable the settlement of disputes arising from cross-border low-value sales or service contracts concluded using electronic communications,

Convinced that the Technical Notes will significantly assist all States, in particular developing countries and States whose economies are in transition, online dispute resolution administrators, online dispute resolution platforms, neutrals and the parties to online dispute resolution proceedings in developing and using online dispute resolution systems,

Noting with appreciation that all States and interested international organizations were invited to participate in the preparation of the Technical Notes either as members or as observers from the forty-fourth to the forty-ninth sessions of the Commission, including through circulation of the text of the draft Technical Notes for comment to all States as well as to international organizations invited to attend the meetings of the Commission as observers,

Noting that the preparation of the Technical Notes was the subject of due deliberation in the Commission and that the draft text benefited from consultations with Governments and interested intergovernmental and international non-governmental organizations,

1. *Expresses its appreciation* to the United Nations Commission on International Trade Law for preparing and adopting the Technical Notes on Online Dispute Resolution as annexed to the report of the Commission on the work of its forty-ninth session;[4]

2. *Requests* the Secretary-General to publish the text of the Technical Notes through all appropriate means, including electronically, in the six official languages of the

United Nations, and to disseminate that text broadly to Governments and other interested bodies;

3. *Recommends* that all States and other stakeholders use the Technical Notes in designing and implementing online dispute resolution systems for cross-border commercial transactions;

4. *Requests* all States to support the promotion and use of the Technical Notes.

D. General Assembly resolutions 71/135, 71/136, 71/137, 71/138 and 71/148

71/135. Report of the United Nations Commission on International Trade Law on the work of its forty-ninth session

The General Assembly,

Recalling its resolution 2205 (XXI) of 17 December 1966, by which it established the United Nations Commission on International Trade Law with a mandate to further the progressive harmonization and unification of the law of international trade and in that respect to bear in mind the interests of all peoples, in particular those of developing countries, in the extensive development of international trade,

Reaffirming its belief that the progressive modernization and harmonization of international trade law, in reducing or removing legal obstacles to the flow of international trade, especially those affecting developing countries, would contribute significantly to universal economic cooperation among all States on a basis of equality, equity, common interest and respect for the rule of law, to the elimination of discrimination in international trade and, thereby, to peace, stability and the well-being of all peoples,

Having considered the report of the Commission,[1]

Reiterating its concern that activities undertaken by other bodies in the field of international trade law without adequate coordination with the Commission might lead to undesirable duplication of efforts and would not be in keeping with the aim of promoting efficiency, consistency and coherence in the unification and harmonization of international trade law,

Reaffirming the mandate of the Commission, as the core legal body within the United Nations system in the field of international trade law, to coordinate legal activities in this field, in particular to avoid duplication of efforts, including among organizations formulating rules of international trade, and to promote efficiency, consistency and coherence in the modernization and harmonization of international trade law, and to continue, through its secretariat, to maintain close cooperation with other international organs and organizations, including regional organizations, active in the field of international trade law,

1. *Takes note with appreciation* of the report of the United Nations Commission on International Trade Law;[1]

2. *Commends* the Commission for the finalization and adoption of the Model Law on Secured Transactions,[2] the 2016 Notes on Organizing Arbitral Proceedings[3] and the Technical Notes on Online Dispute Resolution;[4]

3. *Notes with satisfaction* that the Commission has instructed its secretariat to commence preparations for a Congress to commemorate the Commission's fiftieth anniversary during its fiftieth session, with the objectives to discuss technical issues and to raise awareness of the Commission and its potential to support cross-border commerce;[5]

4. *Also notes with satisfaction* the contributions from the Fund for International Development of the Organization of the Petroleum Exporting Countries and from the European Union, which allow the operation of the repository of published information under the Rules on Transparency in Treaty-based Investor-State Arbitration[6] until the end of 2016 and beyond, and that the Commission reiterated its strong and unanimous opinion that the secretariat of the Commission should continue to operate the transparency repository, which constitutes a central feature both of the Rules on Transparency and of the United Nations

Convention on Transparency in Treaty-based Investor-State Arbitration (Mauritius Convention on Transparency);[7]

5. *Requests* the Secretary-General to continue to operate, through the secretariat of the Commission, the repository of published information in accordance with article 8 of the Rules on Transparency, as a pilot project until the end of 2017, to be funded entirely by voluntary contributions, and to keep the General Assembly informed of developments regarding the funding and budgetary situation of the transparency repository based on its pilot operation;

6. *Takes note with interest* of the decisions taken by the Commission as regards its future work and the progress made by the Commission in its work in the areas of dispute settlement,[8] electronic commerce, insolvency law, security interests[9] and international trade law aimed at reducing the legal obstacles faced by micro-, small- and medium-sized enterprises throughout their life cycle, and encourages the Commission to continue to move forward efficiently to achieve tangible work outcomes;

7. *Endorses* the efforts and initiatives of the Commission, as the core legal body within the United Nations system in the field of international trade law, aimed at increasing coordination of and cooperation on legal activities of international and regional organizations active in the field of international trade law and at promoting the rule of law at the national and international levels in this field, and in this regard appeals to relevant international and regional organizations to coordinate their legal activities with those of the Commission, to avoid duplication of efforts and to promote efficiency, consistency and coherence in the modernization and harmonization of international trade law;

8. *Reaffirms* the importance, in particular for developing countries, of the work of the Commission concerned with technical cooperation and assistance in the field of international trade law reform and development, and in this connection:

(*a*) Welcomes the initiatives of the Commission towards expanding, through its secretariat, its technical cooperation and assistance programme, and in that respect encourages the Secretary-General to seek partnerships with State and non-State actors to increase awareness about the work of the Commission and facilitate the effective implementation of legal standards resulting from its work;

(*b*) Expresses its appreciation to the Commission for carrying out technical cooperation and assistance activities and for providing assistance with legislative drafting in the field of international trade law, and draws the attention of the Secretary-General to the limited resources that are made available in this field;

(*c*) Expresses its appreciation to the Governments whose contributions enabled the technical cooperation and assistance activities to take place, and appeals to Governments, the relevant bodies of the United Nations system, organizations, institutions and individuals to make voluntary contributions to the United Nations Commission on International Trade Law Trust Fund for Symposia and, where appropriate, for the financing of special projects and otherwise to assist the secretariat of the Commission in carrying out technical cooperation and assistance activities, in particular in developing countries;

(*d*) Reiterates its appeal to the United Nations Development Programme and other bodies responsible for development assistance, such as the World Bank and regional development banks, as well as to Governments in their bilateral aid programmes, to support the technical cooperation and assistance programme of the Commission and to cooperate with the Commission and coordinate their activities with those of the Commission in the light of the relevance and importance of the work and programmes of the Commission for the promotion of the rule of law at the national and international levels and for the implementation of the international development agenda, including the achievement of the 2030 Agenda for Sustainable Development;[10]

---

[7] Resolution 69/116, annex.

[8] See *Official Records of the General Assembly, Seventy-first Session, Supplement No. 17* (A/71/17), chaps. IV and V.

[9] Ibid., chap. III.

[10] Resolution 70/1.

(*e*) Recalls its resolutions stressing the need to strengthen support to Member States, upon their request, in the domestic implementation of their respective international obligations through enhanced technical assistance and capacity-building, welcomes the efforts of the Secretary-General to ensure greater coordination and coherence among United Nations entities and with donors and recipients, notes the endorsement by the Commission of the Guidance Note on Strengthening United Nations Support to States, Upon Their Request, to Implement Sound Commercial Law Reforms,[11] and requests the Secretary-General to circulate the Guidance Note as broadly as possible to its intended users;

9. *Recalls* the importance of adherence to the rules of procedure and methods of work of the Commission, including transparent and inclusive deliberations, taking into account the summary of conclusions as reproduced in annex III to the report on the work of its forty-third session,[12] requests the Secretariat to issue, prior to meetings of the Commission and of its working groups, a reminder of those rules of procedure and methods of work with a view to ensuring the high quality of the work of the Commission and encouraging the assessment of its instruments, and in this regard recalls its previous resolutions related to this matter;

10. *Welcomes* the activities of the United Nations Commission on International Trade Law Regional Centre for Asia and the Pacific, in the Republic of Korea, towards providing capacity-building and technical assistance services to States in the Asia-Pacific region, including to international and regional organizations, expresses its appreciation to the Republic of Korea and China, whose contributions enabled continuing operation of the Regional Centre, notes that the continuation of the regional presence relies entirely on extrabudgetary resources, including but not limited to voluntary contributions from States, welcomes expressions of interest from other States in hosting regional centres of the Commission, and requests the Secretary-General to keep the General Assembly informed of developments regarding the establishment of regional centres, in particular their funding and budgetary situation;

11. *Appeals* to Governments, the relevant bodies of the United Nations system, organizations, institutions and individuals to make voluntary contributions to the Trust Fund established to provide travel assistance to developing countries that are members of the Commission, at their request and in consultation with the Secretary-General, in order to enable renewal of the provision of that assistance and to increase expert representation from developing countries at sessions of the Commission and its working groups, necessary to build local expertise and capacities in those countries to put in place a regulatory and enabling environment for business, trade and investment;

12. *Decides*, in order to ensure full participation of all Member States in the sessions of the Commission and its working groups, to continue, in the competent Main Committee during the seventy-first session of the General Assembly, its consideration of granting travel assistance to the least developed countries that are members of the Commission, at their request and in consultation with the Secretary-General;

13. *Endorses* the conviction of the Commission that the implementation and effective use of modern private law standards in international trade are essential for advancing good governance, sustained economic development and the eradication of poverty and hunger and that the promotion of the rule of law in commercial relations should be an integral part of the broader agenda of the United Nations to promote the rule of law at the national and international levels, including through the Rule of Law Coordination and Resource Group, supported by the Rule of Law Unit in the Executive Office of the Secretary-General;

14. *Notes* the rule of law panel discussion held at the forty-ninth session of the Commission and the comments transmitted by the Commission pursuant to paragraph 20 of General Assembly resolution 70/118 of 14 December 2015, highlighting its role in promoting the rule of law, in particular the role of the multilateral treaty processes of the Commission in promoting and advancing the rule of law in the field of international trade

[11] *Official Records of the General Assembly, Seventy-first Session, Supplement No. 17* (A/71/17), para. 262 and annex II.

[12] Ibid., *Sixty-fifth Session, Supplement No. 17* (A/65/17).

law and the role of the Commission in promoting the rule of law by facilitating access to justice;[13]

15. *Notes with satisfaction* that, in paragraph 8 of the declaration of the high-level meeting of the General Assembly on the rule of law at the national and international levels, adopted by consensus as resolution 67/1 of 24 September 2012, Member States recognized the importance of fair, stable and predictable legal frameworks for generating inclusive, sustainable and equitable development, economic growth and employment, generating investment and facilitating entrepreneurship and, in this regard, commended the work of the Commission in modernizing and harmonizing international trade law and that, in paragraph 7 of the declaration, Member States expressed their conviction that the rule of law and development were strongly interrelated and mutually reinforcing;

16. *Also notes with satisfaction* that, in paragraph 89 of the Addis Ababa Action Agenda of the Third International Conference on Financing for Development, adopted by the General Assembly by consensus as resolution 69/313 of 27 July 2015, States endorsed the efforts and initiatives of the Commission, as the core legal body within the United Nations system in the field of international trade law, aimed at increasing coordination of and cooperation on legal activities of international and regional organizations active in the field of international trade law and at promoting the rule of law at the national and international levels in this field;

17. *Reiterates its request* to the Secretary-General, in conformity with resolutions of the General Assembly on documentation-related matters,[14] which, in particular, emphasize that any invitation to limit, where appropriate, the length of documents should not adversely affect either the quality of the presentation or the substance of the documents, to bear in mind the particular characteristics of the mandate and functions of the Commission in the progressive development and codification of international trade law when implementing page limits with respect to the documentation of the Commission;[15]

18. *Requests* the Secretary-General to continue the publication of Commission standards and the provision of summary records of the meetings of the Commission, including committees of the whole established by the Commission for the duration of its annual session, relating to the formulation of normative texts, and takes note of the Commission's decision to continue the trial use of digital recordings, in parallel with summary records where applicable, with a view to assessing the experience of using digital recordings and, on the basis of that assessment, taking a decision at a future session regarding the possible replacement of summary records by digital recordings;[16]

19. *Recalls* paragraph 48 of its resolution 66/246 of 24 December 2011 regarding the rotation scheme of meetings between Vienna and New York;

20. *Stresses* the importance of promoting the use of texts emanating from the work of the Commission for the global unification and harmonization of international trade law, and to this end urges States that have not yet done so to consider signing, ratifying or acceding to conventions, enacting model laws and encouraging the use of other relevant texts;

21. *Notes with appreciation* the work of the Secretariat on the system for the collection and dissemination of case law on Commission texts in the six official languages of the United Nations (the CLOUT system), notes the resource-intensive nature of the system, acknowledges the need for further resources to sustain and expand it, and in this regard welcomes efforts by the Secretariat towards building partnerships with interested institutions, and appeals to Governments, the relevant bodies of the United Nations system, organizations, institutions and individuals to assist the secretariat of the Commission in raising awareness as to the availability and usefulness of the CLOUT system in professional, academic and judiciary circles and in securing the funding required for the coordination and expansion of the system and the establishment, within the secretariat of the Commission, of a pillar

[16] *Official Records of the General Assembly, Sixty-ninth Session, Supplement No. 17* (A/69/17), para. 276.

focused on the promotion of ways and means of interpreting Commission texts in a uniform manner;

22. *Welcomes* the continued work of the Secretariat on digests of case law related to Commission texts, including their wide dissemination, as well as the continuing increase in the number of abstracts available through the CLOUT system, in view of the role of the digests and the CLOUT system as important tools for the promotion of the uniform interpretation of international trade law, in particular by building local capacity of judges, arbitrators and other legal practitioners to interpret those standards in the light of their international character and the need to promote uniformity in their application and the observance of good faith in international trade;

23. *Recalls* its resolutions affirming the importance of high-quality, user-friendly and cost-effective United Nations websites and the need for their multilingual development, maintenance and enrichment,[17] commends the fact that the website of the Commission is published in the six official languages of the United Nations, and welcomes the continuous efforts of the Commission to maintain and improve its website, including by developing new social media features, in accordance with the applicable guidelines.[18]

62nd plenary meeting

[17] Resolutions 52/214, sect. C, para. 3; 55/222, sect. III, para. 12; 56/64 B, sect. X; 57/130 B, sect. X; 58/101 B, sect. V, paras. 61-76; 59/126 B, sect. V, paras. 76-95; 60/109 B, sect. IV, paras. 66-80; and 61/121 B, sect. IV, paras. 65-77.

[18] Resolution 63/120, para. 20.

71/136 Model Law on Secured Transactions of the United Nations Commission on International Trade Law

The General Assembly,

Recalling its resolution 2205 (XXI) of 17 December 1966, by which it established the United Nations Commission on International Trade Law with a mandate to further the progressive harmonization and unification of the law of international trade and in that respect to bear in mind the interests of all peoples, in particular those of developing countries, in the extensive development of international trade,

Recalling also its resolutions 56/81 of 12 December 2001, 63/121 of 11 December 2008, 65/23 of 6 December 2010 and 68/108 of 16 December 2013, in which it recommended that States consider or continue to consider becoming parties to the United Nations Convention on the Assignment of Receivables in International Trade[1] and giving favourable consideration to the *UNCITRAL Legislative Guide on Secured Transactions*, the *Supplement on Security Rights in Intellectual Property* and the *UNCITRAL Guide on the Implementation of a Security Rights Registry*, respectively,

Recalling further that, at its forty-sixth session, in 2013, the Commission entrusted Working Group VI (Security Interests) with the preparation of a model law on secured transactions based on the recommendations of the *UNCITRAL Legislative Guide on Secured Transactions* and consistent with all texts prepared by the Commission on secured transactions,[2]

Noting that Working Group VI devoted six sessions,[3] from 2013 to 2016, to the preparation of the Model Law on Secured Transactions,

Noting also that, at its forty-eighth session, in 2015, the Commission approved the substance of the registry-related provisions of the Model Law,[4]

Noting with satisfaction that the Model Law is based on the recommendations of the *UNCITRAL Legislative Guide on Secured Transactions* and consistent with all texts prepared by the Commission on secured transactions, and with those texts thus provides comprehensive guidance to States with respect to legal and practical issues that need to be addressed when implementing a modern secured transactions regime,

Recognizing that an efficient secured transactions regime with a publicly accessible security rights registry of the kind provided for in the Model Law is likely to increase access to affordable secured credit and thus promote economic growth, sustainable development, the rule of law and financial inclusion, as well as assist in combating poverty,

Recognizing also that the harmonization of national secured transactions regimes and registries on the basis of the Model Law is likely to increase the availability of secured credit across national borders and thus facilitate the development of international trade, which, if achieved on the basis of equality and mutual benefit to all States, is an important element in promoting friendly relations among States,

Recognizing further that secured transactions law reform could not be effectively implemented without the establishment of an efficient, publicly accessible security rights registry where information about the potential existence of a security right in movable assets may be registered, and that States urgently need guidance with respect to the establishment and operation of such registries,

Convinced that the Model Law will contribute to greater legal certainty in the exercise of international commercial activities for the benefit of all States, particularly developing countries and States with economies in transition,

---

[1] Resolution 56/81, annex.

[3] See A/CN.9/796, A/CN.9/802, A/CN.9/830, A/CN.9/836, A/CN.9/865 and A/CN.9/871.

[4] *Official Records of the General Assembly, Seventieth Session, Supplement No. 17* (A/70/17), para. 214.

Noting with appreciation that all States and interested international organizations were invited to participate in the preparation of the draft Model Law at all the sessions of the Working Group and at the forty-eighth and forty-ninth sessions of the Commission, either as members or as observers, and that comments received after circulation of the text of the Model Law to all Governments were before the Commission at its forty-ninth session,[5]

Expressing its appreciation to international intergovernmental and non-governmental organizations active in the field of secured transactions law reform for their participation in and support for the development of the Model Law,

1. *Expresses its appreciation* to the United Nations Commission on International Trade Law for completing and adopting the Model Law on Secured Transactions;[6]

2. *Requests* the Secretary-General to publish the Model Law, including electronically, in the six official languages of the United Nations, and to disseminate it broadly to Governments and other interested bodies;

3. *Recommends* that all States give favourable consideration to the Model Law when revising or adopting legislation relevant to secured transactions, and invites States that have used the Model Law to advise the Commission accordingly;

4. *Also recommends* that, where necessary, States continue to give favourable consideration to the *UNCITRAL Guide on the Implementation of a Security Rights Registry* when revising relevant legislation, administrative regulations or guidelines, and to the *UNCITRAL Legislative Guide on Secured Transactions* and the *Supplement on Security Rights in Intellectual Property* when revising or adopting legislation relevant to secured transactions, and invites States that have used the guides to advise the Commission accordingly;

5. *Further recommends* that all States continue to consider becoming parties to the United Nations Convention on the Assignment of Receivables in International Trade,[1] the principles of which are also reflected in the Model Law, and the optional annex to which refers to the registration of notices with regard to assignments.

62nd plenary meeting
13 December 2016

[5] See A/CN.9/886 and A/CN.9/887 and Add.1.

71/137 2016 Notes on Organizing Arbitral Proceedings of the United Nations Commission on International Trade Law

The General Assembly,

Recalling its resolution 2205 (XXI) of 17December 1966, by which it established the United Nations Commission on International Trade Law with a mandate to further the progressive harmonization and unification of the law of international trade and in that respect to bear in mind the interests of all peoples, in particular those of developing countries, in the extensive development of international trade,

Recalling also its resolution 51/161 of 16 December 1996, in which it commended the Commission for the finalization of the Notes on Organizing Arbitral Proceedings,

Reaffirming the value and increased use of arbitration as a method of settling disputes,

Recognizing the need for revising the Notes to conform to current arbitral practices,

Noting that the purpose of the Notes is to list and briefly describe matters relevant to the organization of arbitral proceedings and that the Notes, prepared with a focus on international arbitration, are intended to be used in a general and universal manner, regardless of whether the arbitration is administered by an arbitral institution,

Noting also that the Notes do not seek to promote any practice as best practice, given that procedural styles and practices in arbitration vary and each of them has its own merit,

Recognizing that the revision of the Notes was the subject of due deliberation in the Commission, which benefited greatly from consultations with Governments and interested intergovernmental and international non-governmental organizations active in the field of arbitration, including arbitral institutions, as well as individual experts,

1. *Expresses its appreciation* to the United Nations Commission on International Trade Law for preparing and adopting the 2016 Notes on Organizing Arbitral Proceedings;[1]

2. *Recommends* the use of the 2016 Notes, including by parties to arbitration, arbitral tribunals and arbitral institutions, as well as for academic and training purposes with respect to international commercial dispute settlement;

3. *Requests* the Secretary-General to publish the 2016 Notes, including electronically, in the six official languages of the United Nations, and to make all efforts to ensure that the Notes become generally known and available.

62nd plenary meeting
13 December 2016

71/138 Technical Notes on Online Dispute Resolution of the United Nations Commission on International Trade Law

The General Assembly,

Recalling its resolution 2205 (XXI) of 17 December 1966, by which it established the United Nations Commission on International Trade Law with a mandate to further the progressive harmonization and unification of the law of international trade and in that respect to bear in mind the interests of all peoples, in particular those of developing countries, in the extensive development of international trade,

Recognizing that the sharp increase in online cross-border transactions has raised a need for mechanisms for resolving disputes that arise from such transactions, and recognizing also that one such mechanism is online dispute resolution,

Observing that online dispute resolution can assist the parties in resolving the dispute in a simple, fast, flexible and secure manner, without the need for physical presence at a meeting or hearing,

Observing also that online dispute resolution represents significant opportunities for access to dispute resolution by buyers and sellers concluding cross-border commercial transactions, both in developed and developing countries,

Recalling that, at its forty-third session, in 2010, the Commission agreed that a working group should be established to undertake work in the field of online dispute resolution,[1] and that, at its forty-eighth session, in 2015, the Commission decided that the work should take the form of a non-binding descriptive document reflecting elements of an online dispute resolution process,[2]

Noting that the Technical Notes on Online Dispute Resolution[3] are non-binding and descriptive and reflect the principles of impartiality, independence, efficiency, effectiveness, due process, fairness, accountability and transparency,

Noting also that the Technical Notes are expected to contribute significantly to the development of systems to enable the settlement of disputes arising from cross-border low-value sales or service contracts concluded using electronic communications,

Convinced that the Technical Notes will significantly assist all States, in particular developing countries and States whose economies are in transition, online dispute resolution administrators, online dispute resolution platforms, neutrals and the parties to online dispute resolution proceedings in developing and using online dispute resolution systems,

Noting with appreciation that all States and interested international organizations were invited to participate in the preparation of the Technical Notes either as members or as observers from the forty-fourth to the forty-ninth sessions of the Commission, including through circulation of the text of the draft Technical Notes for comment to all States as well as to international organizations invited to attend the meetings of the Commission as observers,

Noting that the preparation of the Technical Notes was the subject of due deliberation in the Commission and that the draft text benefited from consultations with Governments and interested intergovernmental and international non-governmental organizations,

1. *Expresses its appreciation* to the United Nations Commission on International Trade Law for preparing and adopting the Technical Notes on Online Dispute Resolution as annexed to the report of the Commission on the work of its forty-ninth session;[4]

2. *Requests* the Secretary-General to publish the text of the Technical Notes through all appropriate means, including electronically, in the six official languages of the

United Nations, and to disseminate that text broadly to Governments and other interested bodies;

3. *Recommends* that all States and other stakeholders use the Technical Notes in designing and implementing online dispute resolution systems for cross-border commercial transactions;

4. *Requests* all States to support the promotion and use of the Technical Notes.

62nd plenary meeting
13 December 2016

71/148 The rule of law at the national and international levels

The General Assembly,

Recalling its resolution 70/118 of 14 December 2015,

Reaffirming its commitment to the purposes and principles of the Charter of the United Nations and international law, which are indispensable foundations of a more peaceful, prosperous and just world, and reiterating its determination to foster strict respect for them and to establish a just and lasting peace all over the world,

Reaffirming that human rights, the rule of law and democracy are interlinked and mutually reinforcing and that they belong to the universal and indivisible core values and principles of the United Nations,

Reaffirming also the need for universal adherence to and implementation of the rule of law at both the national and international levels and its solemn commitment to an international order based on the rule of law and international law, which, together with the principles of justice, is essential for peaceful coexistence and cooperation among States,

Bearing in mind that the activities of the United Nations carried out in support of efforts of Governments to promote and consolidate the rule of law are undertaken in accordance with the Charter, and stressing the need to strengthen support to Member States, upon their request, in the domestic implementation of their respective international obligations through enhanced technical assistance and capacity-building,

Convinced that the advancement of the rule of law at the national and international levels is essential for the realization of sustained economic growth, sustainable development, the eradication of poverty and hunger and the protection of all human rights and fundamental freedoms, and acknowledging that collective security depends on effective cooperation, in accordance with the Charter and international law, against transnational threats,

Reaffirming the duty of all States to refrain in their international relations from the threat or use of force in any manner inconsistent with the purposes and principles of the United Nations and to settle their international disputes by peaceful means in such a manner that international peace and security and justice are not endangered, in accordance with Chapter VI of the Charter, and calling upon States that have not yet done so to consider accepting the jurisdiction of the International Court of Justice in accordance with its Statute,

Convinced that the promotion of and respect for the rule of law at the national and international levels, as well as justice and good governance, should guide the activities of the United Nations and its Member States,

Recalling paragraph 134 (*e*) of the 2005 World Summit Outcome,[1]

1. *Recalls* the high-level meeting of the General Assembly on the rule of law at the national and international levels, held during the high-level segment of its sixty-seventh session, and the declaration adopted at that meeting,[2] takes note of the report of the Secretary-General submitted pursuant to paragraph 41 of the declaration,[3] and requests the Sixth Committee to continue its consideration of ways and means of further developing the linkages between the rule of law and the three pillars of the United Nations;

2. *Acknowledges* the efforts to strengthen the rule of law through voluntary pledges, encourages all States to consider making pledges, individually or jointly, based on their national priorities, and also encourages those States that have made pledges to continue to exchange information, knowledge and best practices in this regard;

3. *Takes note* of the annual report of the Secretary-General on strengthening and coordinating United Nations rule of law activities;[4]

---

[1] Resolution 60/1.

[2] Resolution 67/1.

[3] A/68/213/Add.1.

[4] A/71/169.

4. *Encourages* the Secretary-General and the United Nations system to accord high priority to rule of law activities;

5. *Reaffirms* the role of the General Assembly in encouraging the progressive development of international law and its codification, and further reaffirms that States shall abide by all of their obligations under international law;

6. *Also reaffirms* the imperative of upholding and promoting the rule of law at the international level in accordance with the principles of the Charter of the United Nations;

7. *Further reaffirms* its commitment to work tirelessly for the full implementation of the 2030 Agenda for Sustainable Development,[5] and recalls that the Sustainable Development Goals and targets are integrated and indivisible and balance the three dimensions of sustainable development;

8. *Recognizes* the role of multilateral treaty processes in advancing the rule of law, recalls the constructive debate held on this subtopic in the Sixth Committee during the seventieth session of the General Assembly, and in this regard:

(*a*) Reaffirms its support for the annual treaty event organized by the Secretary-General, and welcomes the organization of workshops on treaty practice by the Treaty Section of the Office of Legal Affairs of the Secretariat, both at the regional level and at United Nations Headquarters, as an important capacity-building initiative, and invites States to continue to support this activity;

(*b*) Commends the Secretary-General for his review of the regulations giving effect to Article 102 of the Charter, and takes note of the recommendations for consideration by the Sixth Committee contained in his annual report;[6]

(*c*) Welcomes the efforts made to develop and enhance the United Nations electronic treaty database, providing online access to comprehensive information on the depositary functions of the Secretary-General and the registration and publication of treaties under Article 102 of the Charter, and encourages the continuation of such efforts in the future, while bearing in mind that many developing countries lack affordable access to information and communications technologies;

(*d*) Recognizes the importance of the legal publications prepared by the Treaty Section, takes note of the information provided by the Secretary-General in his annual report,[7] and stresses the need to update the *Summary of Practice of the Secretary-General as Depositary of Multilateral Treaties* in the light of these new developments and practices;

9. *Recalls* the constructive debate held on the subtopic "Sharing national practices of States in the implementation of multilateral treaties" in the Sixth Committee during the seventy-first session of the General Assembly, welcomes the technical assistance provided by the United Nations system to Member States, upon their request, in the implementation of multilateral treaties at the national level as a tangible contribution to strengthening the rule of law at both the national and international levels, and commends the efforts made by States in this regard;

10. *Also recalls* the constructive debate held on the subtopic "Practical measures to facilitate access to justice for all, including for the poorest and most vulnerable" in the Sixth Committee during the seventy-first session, which highlighted, inter alia, the importance of appropriate tools and measures to promote the legal empowerment of individuals, and recognizes the role of this subtopic in advancing the rule of law;

11. *Welcomes* the dialogue initiated by the Rule of Law Coordination and Resource Group and the Rule of Law Unit in the Executive Office of the Secretary-General with Member States on the topic "Promoting the rule of law at the international level", and calls for the continuation of this dialogue with a view to fostering the rule of law at the international level;

---

[5] Resolution 70/1.

[6] A/71/169, sect. II.D.

[7] Ibid., sect. II.E.

12. *Recognizes* the importance of the United Nations Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law to the furtherance of United Nations rule of law programmes and activities, emphasizes that further technical assistance and capacity-building initiatives, focused on increasing and improving the participation of Member States in the multilateral treaty process, should be examined, and invites States to support these activities;

13. *Stresses* the importance of adherence to the rule of law at the national level and the need to strengthen support to Member States, upon their request, in the domestic implementation of their respective international obligations through enhanced technical assistance and capacity-building in order to develop, reinforce and maintain domestic institutions active in the promotion of rule of law at the national and international levels, subject to national ownership, strategies and priorities;

14. *Reiterates its request* to the Secretary-General to ensure greater coordination and coherence among the United Nations entities and with donors and recipients, and reiterates its call for greater evaluation of the effectiveness of such activities, including possible measures to improve the effectiveness of those capacity-building activities;

15. *Calls*, in this context, for dialogue to be enhanced among all stakeholders, with a view to placing national perspectives at the centre of rule of law assistance in order to strengthen national ownership, while recognizing that rule of law activities must be anchored in a national context and that States have different national experiences in the development of their systems of the rule of law, taking into account their legal, political, socioeconomic, cultural, religious and other local specificities, while also recognizing that there are common features founded on international norms and standards;

16. *Calls upon* the Secretary-General and the United Nations system to systematically address, as appropriate, aspects of the rule of law in relevant activities, including the participation of women in rule of law-related activities, recognizing the importance of the rule of law to virtually all areas of United Nations engagement;

17. *Expresses full support* for the overall coordination and coherence role of the Rule of Law Coordination and Resource Group within the United Nations system, within existing mandates, supported by the Rule of Law Unit and under the leadership of the Deputy Secretary-General;

18. *Requests* the Secretary-General to submit, in a timely manner, his next annual report on United Nations rule of law activities, in accordance with paragraph 5 of its resolution 63/128 of 11 December 2008, addressing, in a balanced manner, the national and international dimensions of the rule of law;

19. *Recognizes* the importance of restoring confidence in the rule of law as a key element of transitional justice;

20. *Recalls* the commitment of Member States to take all necessary steps to provide fair, transparent, effective, non-discriminatory and accountable services that promote access to justice for all, including legal aid, encourages further dialogue and the sharing of national practices and expertise in strengthening the rule of law through access to justice, including with regard to the provision of birth registration for all, appropriate registration and documentation of refugees, migrants, asylum seekers and stateless persons, and legal aid, where appropriate, in both criminal and civil proceedings, and in this regard recognizes the role of knowledge and technology, including in judicial systems, and stresses the need to intensify the assistance extended to Governments upon their request;

21. *Stresses* the importance of promoting the sharing of national practices and of inclusive dialogue, welcomes the proposals made by the Secretary-General, inviting Member States to voluntarily exchange national best practices on the rule of law in informal meetings and on an electronic depository of best practices on the United Nations rule of law website, and invites Member States to do so;

22. *Invites* the International Court of Justice, the United Nations Commission on International Trade Law and the International Law Commission to continue to comment, in their respective reports to the General Assembly, on their current roles in promoting the rule of law;

23. *Invites* the Rule of Law Coordination and Resource Group and the Rule of Law Unit to continue their dialogue with all Member States by interacting with them in a regular, transparent and inclusive manner, in particular in informal briefings, and welcomes the informal briefings held during the seventieth session;

24. *Requests* the Secretary-General to further elaborate on a review of the regulations giving effect to Article 102 of the Charter, taking into account recent developments, and to prepare a report on the registration and publication of treaties and international agreements pursuant to Article 102 of the Charter, to be submitted well in advance of the seventy-second session of the General Assembly;

25. *Stresses* the need for the Rule of Law Unit to carry out its tasks in an effective and sustainable manner and the need to provide it with reasonable means required to that effect;

26. *Decides* to include in the provisional agenda of its seventy-second session the item entitled "The rule of law at the national and international levels", and invites Member States to focus their comments during the upcoming Sixth Committee debate on the subtopic "Ways and means to further disseminate international law to strengthen the rule of law".

62nd plenary meeting
13 December 2016

Part Two

STUDIES AND REPORTS ON SPECIFIC SUBJECTS

I. MICRO, SMALL AND MEDIUM-SIZED ENTERPRISES (MSMEs)

A. Report of the Working Group on MSMEs on the work of its twenty-fifth session (Vienna, 19-23 October 2015)

(A/CN.9/860)

[Original: English]

Contents

I. Introduction

1. At its forty-sixth session, in 2013, the Commission requested that a working group should commence work aimed at reducing the legal obstacles encountered by micro, small and medium-sized enterprises (MSMEs) throughout their life cycle.[1] At that same session, the Commission agreed that consideration of the issues pertaining to the creation of an enabling legal environment for MSMEs should begin with a focus on the legal questions surrounding the simplification of incorporation.[2]

2. At its twenty-second session (New York, 10 to 14 February 2014), Working Group I (MSMEs) commenced its work according to the mandate received from the Commission. The Working Group engaged in preliminary discussion in respect of a number of broad issues relating to the development of a legal text on simplified incorporation[3] as well as on what form that text might take,[4] and business registration was said to be of particular relevance in the future deliberations of the Working Group.[5]

3. At its forty-seventh session, in 2014, the Commission reaffirmed the mandate of Working Group I, as set out above in paragraph 1.[6]

4. At its twenty-third session (Vienna, 17 to 21 November 2014), Working Group I continued its work in accordance with the mandate received from the Commission. Following a discussion of the issues raised in Working Paper A/CN.9/WG.I/WP.85 in respect of best practices in business registration, the Working Group requested the Secretariat to prepare further materials based on parts IV and V of that Working Paper for discussion at a future session. In its discussion of the legal questions surrounding the simplification of incorporation, the Working Group explored the legal questions surrounding the simplification of incorporation by considering the issues outlined in the framework set

out in Working Paper A/CN.9/WG.I/WP.86, and agreed that it would resume its deliberations at its twenty-fourth session beginning with paragraph 34 of that document.

5. At its twenty-fourth session (New York, 13 to 17 April 2015), the Working Group continued its discussion on the legal questions surrounding the simplification of incorporation. After initial consideration of the issues as set out in Working Paper A/CN.9/WG.I/WP.86, the Working Group decided that it should continue its work by considering the first six articles of the draft model law and commentary thereon contained in Working Paper A/CN.9/WG.I/WP.89, without prejudice to the final form of the legislative text, which had not yet been decided. Further to a proposal from several delegations, the Working Group agreed to continue its discussion of the issues included in A/CN.9/WG.I/WP.89, bearing in mind the general principles outlined in the proposal, including the "think small first" approach, and to prioritize those aspects of the draft text in A/CN.9/WG.I/WP.89 that were the most relevant for simplified business entities. The Working Group also agreed that it would discuss the alternative models introduced in A/CN.9/WG.I/WP.87 at a later stage.

6. At its forty-eighth session, in 2015, the Commission noted the progress made by the Working Group in the analysis of the legal issues surrounding the simplification of incorporation and to good practices in business registration, both of which aimed at reducing the legal obstacles encountered by MSMEs throughout their life cycle. After discussion, the Commission reaffirmed the mandate of the Working Group under the terms of reference established by the Commission at its forty-sixth session in 2013 and confirmed at its forty-seventh session in 2014.[7] In its discussion in respect of the future legislative activity, the Commission also agreed that document A/CN.9/WG.I/WP.83 should be included among the documents under consideration by Working Group I for the simplification of incorporation.[8]

II. Organization of the session

7. Working Group I, which was composed of all States Members of the Commission, held its twenty-fifth session in Vienna from 19 to 23 October 2015. The session was attended by representatives of the following States Members of the Working Group: Argentina, Brazil, Canada, China, Colombia, Croatia, Czech Republic, Ecuador, France, Germany, Indonesia, Italy, Japan, Kenya, Malaysia, Mauritania, Mexico, Pakistan, Panama, Poland, Republic of Korea, Russian Federation, Spain, Switzerland, Thailand, Turkey, Uganda, United Kingdom of Great Britain and Northern Ireland, United States of America and Venezuela.

8. The session was attended by observers from the following States: Bolivia, Chile, Cuba, Cyprus, Dominican Republic, Finland, Luxembourg, Peru, Portugal, Qatar, Romania, Saudi Arabia, Slovakia, Sudan and United Arab Emirates.

9. The session was also attended by observers from the European Union.

10. The session was also attended by observers from the following international organizations:

(a) *Organizations of the United Nations system*: United Nations Conference on Trade and Development (UNCTAD); World Bank (WB);

(b) *Invited international non-governmental organizations*: Association for the Promotion of Arbitration in Africa (APAA); Centro de Estudios de Derecho, Economía y Política (CEDEP); Commercial Finance Association (CFA); European Commerce Registers' Forum (ECRF); European Law Students' Association (ELSA); Fondation pour le droit continental; Inter-American Bar Association (IABA); International Bar Association (IBA); International Center for Promotion of Enterprises (ICPE); the Law Association for Asia and the Pacific (LAWASIA); and the National Law Center for Inter-American Free Trade (NLCIFT).

---

[8] Ibid., *Seventieth session, Supplement No. 17* (A/70/17), para. 340.

11. The Working Group elected the following officers:

Chair: Ms. Maria Chiara Malaguti (Italy)

Rapporteur: Ms. Ruenvadee Suwanmongkol (Thailand)

12. In addition to documents presented at its previous sessions (Legal questions surrounding the simplification of incorporation, A/CN.9/WG.I/WP.86; Draft model law on a simplified business entity, A/CN.9/WG.I/WP.89; Best practices in business registration, A/CN.9/WG.I/WP.85; and Observations by the Government of Colombia, A/CN.9/WG.I/WP.83), the Governments of Italy and France (A/CN.9/WG.I/WP.87), and the Government of Germany (A/CN.9/WG.I/WP.90), the Working Group had before it the following documents:

(a) Annotated provisional agenda (A/CN.9/WG.I/WP.91);

(b) A note by the Secretariat on reducing the legal obstacles faced by micro, small and medium-sized enterprises (MSMEs) (A/CN.9/WG.I/WP.92);

(c) Notes by the Secretariat concerning the key principles of business registration (A/CN.9/WG.I/WP.93, Add.1 and Add.2); and

(d) Observations by the Government of the French Republic (A/CN.9/WG.I/WP.94).

13. The Working Group adopted the following agenda:

1. Opening of the session.
2. Election of officers.
3. Adoption of the agenda. After discussion in the Working Group, the agenda was adopted with a modification to paragraph 23 under "Scheduling of Meetings", in that the Working Group decided to devote the time from 19 to 21 October 2015 to a consideration of the materials prepared by the Secretariat further exploring key principles and good practices in business registration and to thereafter continue its discussion from its twenty-fourth session in respect of simplified business entities.
4. Preparation of legal standards in respect of micro, small and medium-sized enterprises.
5. Other business.
6. Adoption of the report.

III. Deliberations and decisions

14. The Working Group engaged in discussions in respect of the preparation of legal standards aimed at the creation of an enabling legal environment for MSMEs, in particular on the legal issues surrounding the simplification of incorporation and related matters on the basis of documents presented at its previous sessions and on Secretariat documents A/CN.9/WG.I/WP.92, A/CN.9/WG.I/WP.93, Add.1 and Add.2, as well as the observations of the Government of the French Republic contained in document A/CN.9/WG.I/WP.94. The deliberations and decisions of the Working Group on these topics are reflected below.

IV. Preparation of legal standards in respect of micro, small and medium-sized enterprises

15. The Secretariat drew the attention of the Working Group to Working Paper A/CN.9/WG.I/WP.92, which contained a general note by the Secretariat in respect of reducing the legal obstacles faced by MSMEs. The Secretariat explained that it had prepared the document with a view to providing context for the overall work of Working Group I, beginning with a general discussion of MSMEs in the global economy and describing the broad heterogeneous nature of MSMEs. The Working Paper also contained a discussion of the disadvantages of enterprises operating in the extralegal economy, and considered how to

make entry into the legally regulated economy simple and desirable for MSMEs, including a description of the advantages for the State and for the entrepreneur(s), and discussing possible incentives to enter into the legally regulated economy. The final section of the Working Paper considered ways to facilitate the entry of MSMEs into the legally regulated economy, including through providing flexible and simplified business forms (for example, as in the draft model law on a simplified business entity — A/CN.9/WG.I/WP.89 — or the forms described in A/CN.9/WG.I/WP.87) and through providing for simplified and streamlined business registration, both of which were being considered by the Working Group.

16. The Secretariat noted that the content of Working Paper A/CN.9/WG.I/WP.92 could be examined in detail later, and that the Working Group may wish to consider whether it, or portions of it, should be included as part of the legislative materials being prepared in respect of MSMEs. A preliminary suggestion was made that the Working Paper could include additional focus on the legal obstacles faced by MSMEs from a cross-border perspective. Some concerns were also raised in respect of the use of the terms "extralegal" business activity and commercial activity occurring within the legally regulated economy.

A. Key principles of business registration

1. Presentation of Working Papers A/CN.9/WG.I/WP.93, Add.1 and Add.2

17. The Working Group considered the issues contained in documents A/CN.9/WG.I/WP.93, A/CN.9/WG.I/WP.93/Add.1 and A/CN.9/WG.I/WP.93/Add.2 which were prepared in response to a request by the Working Group at its twenty-third session, in November 2014.[9] The Secretariat highlighted certain aspects of the Working Papers, which had been prepared in the form of a commentary for a legislative guide (leaving any recommendations for future discussion), but without prejudice to the final form of a future legislative text that the Working Group might decide to adopt on the topic of business registration. Reference was also made to the main sources used in the preparation of the Working Papers, which were indicated in paragraph 6 of A/CN.9/WG.I/WP.93.

18. The Secretariat explained that the documents noted key objectives of an effective business registration system, such as permitting the visibility of enterprises in the marketplace and enabling MSMEs to increase their business opportunities. In addition, an effective business registration system should ensure that: the registration process was time and cost effective, as well as user-friendly; the registered information was easily searchable and retrievable; and that the information was also current, reliable and secure.

19. In keeping with A/CN.9/WG.I/WP.85 (see, for example, para. 10), Working Paper A/CN.9/WG.I/WP.93 noted that while the organization and structure of a business registry could vary considerably among States, there were certain core functions which were common to all registries. These included, among others: recording the identity and disclosing the existence of the business; providing a commercial identity to the business; providing authority for the business to interact with other private and public entities; facilitating trade; and determining whether the enterprise continued to fulfil the conditions to operate in the business sector.

20. Working Paper A/CN.9/WG.I/WP.93 further considered issues of organization and structure of the registry as well as aspects of reform that States should address in streamlining their registration system. In particular, it was highlighted that the use of information technology and electronic services was particularly well-suited to improving registration services as it brought about several benefits, such as: reducing the time and cost of registration; facilitating access to registration for MSMEs; and permitting the handling of increasing demands for company information by other government authorities. However, it was observed that introducing information and communication technology (ICT)-based registration systems usually required an in-depth reengineering of the way the service was delivered, which might involve several aspects of the State's apparatus, such as financial capability, organization and human resources capacity, as well as its legislative framework.

[9] A/CN.9/825, paras. 43-46.

In addition, online registration systems would require careful consideration of several aspects, such as: the scalability of the system; its flexibility; interoperability; and costs.

21. The Working Papers further noted that recommended steps to streamline a business registration system were: determining the scope of the examination to be carried out by the registry; defining the commercial entities that were required to register under the applicable law; and establishing the requirements that businesses should meet in order to be registered. General requirements for the registration of all legal forms and sizes of enterprises were said to be the payment of any required fee, providing information in respect of the business and its founders (i.e. the name and address of the business and information on the person(s) registering the business), as well as indicating the legal form of the business being registered. In order to remain validly registered, businesses should also provide certain information throughout their lifecycle.

22. The Secretariat highlighted that in order to maintain high quality, current and reliable information, States should define in their legislative or regulatory framework the accountability and procedures of the registry system, as well as the requirements of the information and documentation submitted, including the language in which they should be submitted. Facilitating access to business registration services both to businesses that wished to register and to interested users who wanted to search registered information was also noted. In this regard, it was emphasized that information should not only be made available, but that it should also be valuable, meaning of good quality, reliable and accessible, and that States could achieve these goals through various actions.

23. The Secretariat also introduced Working Paper A/CN.9/WG.I/WP.93/Add.2, which provided greater detail on several best practices in the implementation of a business registry and relevant principles previously noted in A/CN.9/WG.I/WP.85. The relevance of one-stop shops, the use of information and ICT technology and unique identifiers were emphasized as important factors to facilitate business registration. In particular, the Secretariat stressed the importance of developing an appropriate legislative framework to support ICT-based registration and the role of unique identifiers in allowing interoperability between the business registry and other government authorities, as well as in furthering cross-border data exchange.

24. The Working Papers also contained a discussion of streamlining business registration, which could entail amending a State's legislative framework in order to reduce the number of steps required for registration and provide a transparent process with clear accountability. The documents further noted that legislative reform might involve changing laws that did not govern the registration system directly, but that affected the registration process in various ways.

25. Finally, the Secretariat observed that the payment of fees in order to ensure the provision of registration and related services was a common practice across jurisdictions and that such fees, although they generated revenue for the registries, could affect the business' decision whether or not to register. Therefore, fees, if any, should be set at a level that encouraged MSMEs to register.

2. General discussion of A/CN.9/WG.I/WP.93, Add.1 and Add.2

26. Following the presentation of the Working Papers by the Secretariat, the Working Group engaged in a general discussion of whether the documents could form an acceptable basis on which to continue its work in the area of business registration. Following a reiteration of certain perspectives on the advantages and disadvantages of a declaratory approach versus an approval system for business registration, the view was expressed that it would probably not be possible to recommend one approach or the other; however, as outlined in the Working Papers, the Working Group could, at this stage, remain neutral and nonetheless agree on principles common to both approaches. The Working Group was in agreement with that suggestion, although a large number of States continued to express a preference for the declaratory system in international instruments.

27. In addition, it was suggested that there appeared to be three important principles that ran through the Working Papers: efficiency, reliability, and transparency, and that these themes formed an appropriate foundation for continuation of the work. There was support in the Working Group for that view.

28. It was observed that enterprises in some States could engage in business through merely obtaining a tax registration number, and that registration was not generally necessary for commercial enterprises to operate legally (except in the case of those with limited liability). It was also noted that MSMEs should not be required to register with the business or commercial registry, but that such enterprises should be given incentives to register. However, it was explained that the Working Papers were prepared on the basis not that all businesses were required to register, but that while each State would decide for itself which businesses were required to register (and how much information they would have to provide), registration of all businesses regardless of size or legal form was thought to be the main conduit through which enterprises had contact with the State. Through the contact provided by registration, States could identify MSMEs to ensure they received appropriate incentives and assistance. There was support in the Working Group for that approach — also described as a "tiered" approach — which could be clarified in the materials.

29. The members of the Working Group were encouraged to use the experience in their respective States to inform the discussion, but urged to remain cognizant of the Working Group's task to prepare legal standards that would be recognized and acceptable in the world community generally.

3. Key objectives of an effective business registration system (para. 10, A/CN.9/WG.I/WP.93)

30. Without prejudice to the final form that the materials might take, the Working Group proceeded to a more detailed examination of the Working Papers, beginning with paragraph 10 of A/CN.9/WG.I/WP.93. Suggestions were made that in subparagraph (a), the term "business registration is the key …" could be made less definitive, possibly by replacing it with "business registration is a key …", and that in subparagraph (b) the term "particularly" could be deleted since paragraph 10 applies to enterprises of all sizes. The Working Group was in agreement with both suggestions.

31. A concern was expressed in respect of the use of the word "reliable" in subparagraph (c)(iii), in that the approach to ensuring the reliability of information in certain States differed from that in others depending upon their use of a declaratory or approval approach. However, it was observed that regardless of which registration system was in place, the information it contained should be reliable, current and secure. There was some support for that view and that it was for States to ensure those features.

32. In response to a question, it was observed by several delegations that the Working Group should not attempt to define in detail to which entities the business registration materials should apply, but that the term "commercial entities", in accordance with the phrase "legally regulated commercial environment" in subparagraph (a), would be a term broad enough to cover different types of enterprises. It would be for the domestic legislation to decide which business forms must be registered.

33. In response to a suggestion to delete the term "as possible" in subparagraph (c)(ii), it was noted that such term was related to the capacity of a State to ensure easy access to registration services. Because of the different level of development of their infrastructure not all States were said to be able to ensure continuous access to the business registry services. States whose registration systems were not based on the extended use of ICT might not be able to provide continuous access. It was further noted that, consistent with A/CN.9/WG.I/WP.93/Add.2, the term "as possible" could also refer to data protection, since in certain States national legislation might require that some types of registered information (for example, personal information) was not publicly disclosed.

4. Core functions of business registries (para. 12, A/CN.9/WG.I/WP.93)

34. A concern was raised regarding subparagraph 12(e), since the core function of determining "whether a business has fulfilled or continues to fulfil the conditions to operate in the commercial sector" could suggest that the business registry had the authority to subjectively delay the granting of registration and thereby delay the start of the business. In response to that concern, it was observed that such paragraph was not intended to refer to a State's consent to start a business, but rather concerned, for example, the authority of the business registry to request the business to file certain information throughout the course of

its lifetime. It was proposed that subparagraph (e) could be clarified in this regard. There was support for that suggestion as well as for the related suggestion to replace the term "authority" in subparagraph (c) with a more appropriate term, so as not to imply the exercise of State power. Additional drafting suggestions were made to commence the list of core functions with the more general statement in subparagraph (d), followed by the more specific functions in subparagraphs (a) to (c).

35. A concern was again expressed in respect of the term "reliable" in subparagraph (d); broad agreement was expressed that provision of reliable information was a core function of the business registry but that the meaning of the term "reliable" could better be understood in the context of the chosen approach of the State to registration.

36. It was suggested that aspects of the concepts in paragraphs 10 and 12 of A/CN.9/WG.I/WP.93 might overlap, and there was agreement in the Working Group that care should be taken to use consistent terminology. For example, it was proposed that the terms "publicly accessible" and "secure" should be used consistently throughout the paper.

5. Overview of standard registration procedures (paras. 14 to 22, A/CN.9/WG.I/WP.93)

37. The Working Group next considered section E of Working Paper A/CN.9/WG.I/WP.93 which provided an overview of the standard business registration procedures. There were no specific comments on draft paragraph 14.

Business name (paras. 15 to 16, A/CN.9/WG.I/WP.93)

38. The Working Group agreed that registration of a business name should be mandatory, and that entrepreneurs should be assisted in searching and registering their business name, a feature not offered in all States. In terms of the business name being sufficiently "distinguishable" from other business names in the jurisdiction (para. 15), it was noted that this feature was not required in all States. Further, it was suggested that businesses could be distinguished by indicating the type of businesses in which the entrepreneur was engaged. Alternatively, it was suggested that the issue of distinguishing between business names might best be left to domestic legislation. In this regard, a concern was raised that duplication of business names could be an issue in some States where registries had no mechanism for resolving the issue.

39. It was further observed that duplication of names could also be a problem in cross-border information exchanges, and that the use of unique identifiers could be important to ensure the identity of a business within and across jurisdictions. Support was expressed for this view, and it was further noted that in at least one jurisdiction, the role of the business registry was to allocate unique identifiers rather than to register commercial business names. It was further suggested that an optimal approach could be for a business registry to first ensure that the chosen business name was unique and then to allocate a unique identifier.

Business entry (paras. 17 to 19, A/CN.9/WG.I/WP.93)

40. In considering paragraphs 17 to 19, different issues were highlighted concerning the role of the business registry in performing a series of checks on the application for registration (para. 17); the payment of registration fees (para. 18); and the public availability of the registered information (paras. 18 to 19). It was suggested that paragraph 17 should also mention the "declaratory registration system" implemented in several States, which was fully automated and where no checks or control procedures were carried out by registry staff. It was further suggested that a distinction should be made between pre- and post-registration payment, as well as to consider the topic of fees at a later stage in relation to paragraphs 72 to 80 of A/CN.9/WG.I/WP.93/Add.2. In regard to registration fees, a view was expressed that while acknowledging the existence of different practices and systems where registration was subject to payment of a fee, the Working Group should consider promoting the adoption of no or low registration fee policies to encourage MSMEs to register. Furthermore, a question was raised regarding the impact of the registration fee on the process of registration.

41. With regard to the availability of information in paragraphs 18 and 19, the importance of public access to registered information at no charge was emphasized, and it was also suggested that information regarding the representative of the business entity and the

business name or the identification number of the entity (para. 19) should mandatorily be made public. It was suggested that paragraph 19 could be amended by replacing the term "sophisticated information" with "more specific information", and that "basic information", such as the names of directors and legal representatives, should be free, while a fee could be charged for "more specific information" such as the voting rights or assets of the business.

42. A concern was raised in regard to the last sentence of paragraph 19, that "in some jurisdictions, the registered information is legally binding upon third parties", which could suggest that third parties were bound by the registered information even if it was not correct. This was also said to be tied to the issue of reliability of the information addressed earlier in the session (see paras. 31 and 35 above). Future drafts of the text may need to be reformulated in this regard.

43. It was also observed that in one State, a special track for business entry was devoted to MSMEs, which permitted the State to monitor and incubate them.

Registration with other public authorities (para. 20, A/CN.9/WG.I/WP.93)

44. A concern was raised that the second sentence of paragraph 20 might suggest that in order to register with other public authorities, entrepreneurs should personally visit those agencies. It was agreed that the text should be consistent with the approach taken elsewhere in the materials that highlighted the importance of one-stop shops as a single interface for business registration and registration with other public authorities. There was broad agreement in the Working Group that establishment of one-stop shops was one of the best practices in business registration and that it should be recommended as a preferred approach to all States wishing to streamline their business registration system.

Life cycle of a business (para. 21, A/CN.9/WG.I/WP.93)

45. The Working Group considered which information businesses should be required to submit to the registry throughout their life cycle in order to keep the registry apprised of the changing circumstances of the business. It was noted that paragraph 21 did not specifically include the filing of annual returns, which were required in many jurisdictions, and should thus be added to the paragraph.

46. It was noted that in terms of financial information, three different aspects were of importance: whether a particular type of business should have to submit financial statements, what amount of detail those statements should contain, and whether that information should be made public. It was noted that while the submission and possible publication of detailed financial statements might be appropriate for public companies, it could not be considered good practice for MSMEs. It was observed that MSMEs in general were required to submit far less detailed financial statements, if at all, and that such statements were unlikely to be made public unless desired by the MSME. It was further noted that although MSMEs may not be required to submit and make public their financial statements, it may be desirable to encourage them to do so in order to improve transparency and accountability (see, for example, footnote 21 in A/CN.9/WG.I/WP.89). Public access to financial data of businesses was, in fact, said to foster competition among service providers, since it provided them with relevant economic information.

47. The Working Group agreed that these considerations could be reflected in the draft text as appropriate, but that further discussion in respect of the submission, required detail and disclosure of financial statements of MSMEs might be required in relation to the Working Group's continuing discussion on simplified business entities.

Deregistration: removal of a business from the registry (para. 22, A/CN.9/WG.I/WP.93)

48. The Working Group next considered paragraph 22 of A/CN.9/WG.I/WP.93, which was generally supported as drafted. It was observed that in some States, the business registry did not play a role in the protection of creditors in cases of insolvency, as that aspect was left to insolvency officials, who advised of business insolvencies in official publications. In addition, it was noted that in some States, there could be "sleeper" businesses, which had only temporarily, but not permanently, ceased to operate, and which were thus maintained on the business registry. It was further observed that, in some cases, the retention of such

businesses on the register could be problematic in the long run if the business register did not have a mechanism to eventually deregister them.

49. A question was raised in respect of whether business registries should retain the historical information on businesses that had been deregistered. There was support in the Working Group for the view that such information should be retained. It was observed that if the business had a unique identifier, the information would in any event remain linked to that identifier, even if the business were deregistered.

50. The Working Group reiterated its view that the business registrar's ability to deregister businesses should be limited to ensuring compliance with clear and objective legal requirements for the continued registration of a business. In addition, it was observed that this section of the paper was not intended to deal with the business law concepts of liquidation or winding-up of a business.

6. Organization of the registry (paras. 23 to 26, A/CN.9/WG.I/WP.93)

51. The Working Group next considered the paragraphs of A/CN.9/WG.I/WP.93 dealing generally with how a business registry could be organized and operated. It was agreed that the draft text should not recommend a specific approach in terms of whether a State should opt for a public, private or combined model, or for a centralized or decentralized approach, since those were policy decisions best left to the State, but that the materials might set out the advantages and disadvantages of the various options.

52. In terms of whether the draft text should recommend that a business registry should be supervised by the executive or by judicial State bodies, the Working Group reiterated a number of views that had been aired in previous sessions in relation to the perceived advantages and disadvantages of each system. A third type of system that consisted of a mixed approval-declaratory system was also identified. It was clarified that even in States where the judiciary had oversight of the business registry, business registrations could be processed and approved in as little as one to three days. In addition, it was noted that judicial supervision of business registration was strictly on an administrative basis, in which the registrar was an administrative entity, and that judicial supervision did not equate with a requirement for prior judicial approval of a business wishing to register. It was further observed that a State could decide to change its system of business registration over time, and that States had sometimes moved from court-based systems to non-court-based systems. Moreover, the Working Group was informed that both systems of business registration were evident in developing and developed States.

53. The Working Group discussed whether the draft text should recommend either the executive or the judicial approach to business registration, and was of the view that it should instead focus for the moment on the principles relevant to good practice (see paras. 26 and 27 above). It was further agreed that the drafting of paragraph 23 should be clarified or adjusted, as necessary, to ensure a balanced approach and a proper understanding of the administrative nature of the judicially supervised system, as well as taking into account that, of course, the judiciary is a branch of government.

54. It was further observed that the final phrase of paragraph 23 would be more accurate if it referred to "the applicable commercial code", which was more frequently the case, rather than the current reference to "the applicable law governing the judiciary."

7. International cooperation among business registries (paras. 27 and 28, A/CN.9/WG.I/WP.93)

55. The Working Group was generally in support of draft paragraphs 27 and 28. It was suggested that some current examples of cross-border information exchange could be added to the text to enhance it, including the cross-border exchange pilot project between Portugal and Estonia, that between Australia and New Zealand, or that established between various provinces in Canada. However, it was cautioned that full international cooperation and cross-border recognition of business registration would require States to make specific policy decisions, and that the most that these materials should do would be to recommend international cooperation.

56. It was further observed that a unique global identifier could assist in terms of international cooperation, but consideration of that issue was deferred until consideration of the issue of unique identifiers would be given in greater detail in paragraphs 28 to 58 of A/CN.9/WG.I/WP.93/Add.2.

8. Preliminary considerations on the use of information technology and electronic services (paras. 29 and 30, A/CN.9/WG.I/WP.93)

57. The Working Group reiterated its support for the use of ICT technology as a good practice in business registration. It was suggested that paragraph 30 might include reference to changes that could be required to the commercial code and company law of a State, provided that these concepts were not sufficiently clearly included in the current phrase "legislative framework".

58. Reference was made to the availability of relatively inexpensive software to establish fully electronic business registries, but caution was expressed in that the context of each State would dictate how expensive that process might be. Further, it was clarified that while the software might be broadly available and relatively inexpensive, the infrastructure and hardware necessary to successfully implement the software could still be very expensive, particularly in developing States.

9. Drafting considerations (para. 31, A/CN.9/WG.I/WP.93)

59. The Working Group was generally in support of paragraph 31 as drafted, observing that it was based on paragraph 72 of the UNCITRAL Guide on the Implementation of a Security Rights Registry. It was observed that additional work done in terms of the draft Model Law on Secured Transactions had suggested that, in that context, the preferred method of enactment was by way of a statutory act.

10. Establishing the business registry (paras. 32 to 55, A/CN.9/WG.I/WP.93)

60. The Working Group had no comment on paragraph 32 as drafted.

Foundations of the business registry (para. 33, A/CN.9/WG.I/WP.93)

61. A concern was expressed that the final three sentences of the paragraph, beginning with "Subject also to the legal systems …" suggested that the reliability of the information contained in the business registry was dependent on whether the State had adopted a declaratory or an approval approach in establishing its business registry system. The Working Group reiterated its support for the view expressed earlier in the session (see paras. 31 and 35 above) that information in the business registry should be reliable, but that it would be left to the State to determine how best to ensure its reliability, regardless of the particular approach adopted in the business registry. It was agreed that the drafting of paragraph 33 should be adjusted, if necessary, to bring it in line with that earlier view. It was further suggested that that approach could be more viable as it would also permit consideration of those systems that adopted a mixed approach, with features borrowed from both systems.

Appointment of the registrar (para. 34, A/CN.9/WG.I/WP.93)

62. With regard to the last sentence of paragraph 34, it was observed that care should be taken to not appear to dictate who the State might name as registrar by too restrictively specifying a registrar's attributes. After discussion, there was agreement in the Working Group on the principles expressed in the paragraph, with the understanding that additional insight might be gained from additional work undertaken by Working Group VI on similar provisions in the secured transactions materials.

Functions of the registry (para. 35, A/CN.9/WG.I/WP.93)

63. There was support in the Working Group for the suggestion that care should be taken in the drafting of paragraph 35 so that it was not seen to impose excessive limitations on the registry. Such a reading could make it more difficult to establish the registry's interoperability with other registries in the jurisdiction, and to access the information maintained in the registry.

Implementation considerations (paras. 36 to 44, A/CN.9/WG.I/WP.93)

64. The Working Group also agreed that, subject to its future deliberations, the entire section D (paras. 36 to 44) might be moved to a more prominent position in the text, such as to the introduction of A/CN.9/WG.I/WP.93 or to A/CN.9/WG.I/WP.92, since it contained key elements to guide the reform process of a business registration system. In addition, it was observed that efforts should be made to ensure that the text in paragraph 44 was consistent with what was previously decided by the Working Group in terms of paragraphs 23 to 26 of A/CN.9/WG.I/WP.93 (see paras. 51 to 54 above).

Registry terms and conditions of use (paras. 45 to 46, A/CN.9/WG.I/WP.93)

65. It was noted that paragraph 45 could address the issue of how to reduce the risk that changes be made in the registry without the authority of the registrant rather than simply advising users of the risk. In that respect, it was suggested that the paragraph might consider the issue of who would be held responsible in such a scenario.

66. The Working Group also heard a view that the services mentioned in subparagraphs (b) and (c) of paragraph 46 should be considered additional and not compulsory services that a registry might offer, since not every State might want to establish registries carrying out those functions. There was agreement in the Working Group for both proposals.

Electronic or paper-based registry (paras. 47 to 55, A/CN.9/WG.I/WP.93)

67. The Working Group agreed that an appropriately balanced presentation of paper-based and mixed paper and electronic registries should also be presented in paragraphs 47 to 55. It was suggested that, while achieving a completely electronic system might be the goal to which all registries could aspire, it would not be appropriate to suggest that a paper-based or mixed system was a less valid or valuable system of business registration, particularly since the chief goal of the materials was to provide guidance on good practice and encourage registration generally. It was observed that the draft should recognize that in several developing States, paper-based registries might be the only option available due to a lack of advanced technological infrastructure, possibly even pointing to positive aspects of a paper-based system. For example, it was noted that although more expensive and cumbersome than electronically-based registries, paper-based registries could allow for "face to face" communication between the registrant and the registry, which might offer an opportunity to clarify aspects of the requirements for registration. Although an increasing number of users in developing States had access to the Internet, it was noted that a digital divide still existed between the developed and the developing world, and the Working Group was encouraged to acknowledge that a mixed or paper-based system might be necessary in many developing States.

68. It was further noted that providing for the electronic filing of documents and applications for registration and providing electronic access to the registry were different aspects, and that each was subject to different technical standards. As such, it was suggested that paragraphs 47 to 55 could be adjusted in order to make a clearer distinction between the adoption of an electronic registry and the possibility of carrying out online registration, perhaps through focusing first on the features required to register, and secondly on the accessibility of the system. Another observation was made that some States might benefit from the implementation of a phased-in approach, starting with the adoption of more simple electronic solutions (like the creation of a searchable database) and then progressing to more sophisticated solutions, including the possibility of registering completely online. The view was expressed that developing States would need technical and capacity building assistance in order to move from paper-based to electronic registries.

11. Approach to additional work on key principles in business registration

69. Having concluded its consideration of A/CN.9/WG.I/WP.93, and prior to embarking on a discussion of the more detailed materials in A/CN.9/WG.I/WP.93/Add.1 and 2, which would take place at its next session, the Working Group took stock of how ongoing work on key principles in business registration should be conducted.

70. A proposal was made that based on the work completed to date, the Working Group should proceed by commencing the preparation of a draft model law on business registration of legal persons which could be structured using the following outline:

Chapter 1. General provisions

Article 1 Scope of application of the law

Article 2 Main definitions

Article 3 Main principles of registration of legal persons and of maintenance of registers

Chapter 2. Registration bodies

Article 4 Bodies responsible for the registration procedure and their powers

Article 5 Requirements applicable to registration bodies

Chapter 3. Registration of legal persons

Article 6 Types of legal person required to register

Article 7 Persons having the right to register a legal person

Article 8 List of documents to be submitted by legal persons for the purposes of registration

Article 9 Registration fee

Article 10 Reservation of the name of a legal person

Article 11 Limits of verification, by the body responsible for registration, of documents submitted by the legal person

Article 12 Legal consequences of registration of a legal person

Article 13 Grounds for refusal to register a legal person

Chapter 4. Rules governing the maintenance of a register

Article 14 Information included in the register

Article 15 Time limit for the storage of information concerning a legal person

Article 16 Language of the register

Article 17 Amendment of the register

Article 18 Exclusion of a legal person from the register and legal consequences thereof

Article 19 Use of information technologies in maintaining a register

Article 20 Furnishing information from a register to third parties

Article 21 Liability of the registrar

71. It was observed that the framework suggested in the paragraph above identified a series of important issues that were also considered in A/CN.9/WG.I/WP.93, Add.1 and Add.2, and that the main issue was for the Working Group to decide which type of legal instrument should be prepared in respect of business registration. There was support for a proposal that consideration of the three Working Papers, particularly paragraphs 5 to 13 of Add.1 on legal forms of the entity registered, should be linked to the alternative business forms described in Working Papers A/CN.9/WG.I/WP.87 and 94.

72. It was further noted that the Working Group had achieved a level of common understanding in respect of certain issues, including that it was positive for MSMEs to move from the informal to the formal economy, that incentives and a demonstration of the advantages of doing so should be provided to them, and that formalization often involved some sort of action along the lines of registration in a business or commercial register. It was proposed that, on that common basis, and taking into account the documents before the Working Group at this session (including A/CN.9/WG.I/WP.92), work could proceed on a legislative guide in which an opening section could consider why MSMEs should formalize

and a second section could set out how to formalize. Further assistance could be provided to MSMEs by adding to the legislative guide a consideration of the possible tools they could use to successfully operate their businesses, including a variety of tools and legal forms they might consider, such as: limited liability; separate legal personality; limited liability companies (LLCs); simplified LLCs; single member LLCs, corporations, sole proprietorships, individual entrepreneurs, partnerships, business network contracts, techniques of segregation of assets, and cooperatives. Additional guidance could be provided in terms of model provisions on those forms that appeared to be of particular utility and relevance to MSMEs. Support was expressed in the Working Group for proceeding with its mandate in general along the lines described in this paragraph.

73. In terms of specific work on key principles in business registration and how best that work could assist States in fostering MSMEs, the Working Group expressed strong support that it should first prepare an instrument along the lines of a concise legislative guide, without prejudice to considering at a later time whether draft provisions or a model law would be appropriate. To that end, the Secretariat was requested to prepare a set of draft recommendations to be read along with Working Papers A/CN.9/WG.I/WP.93, Add.1 and Add.2 when their consideration was resumed at the next session of the Working Group.

12. UNCTAD's work on business registration and facilitation

74. The Working Group heard a presentation[10] by the United Nations Conference on Trade and Development (UNCTAD) on their Business Facilitation Programme (see www.businessfacilitation.org), which aimed at supporting developing States and countries in transition to implement business facilitation through simplification and automation of rules and procedures relating to business creation and operation. Examples of obstacles to business start-up were mentioned and it was stressed that business registration was a complex process that usually required registering with several public authorities rather than only the business registry. Several factors were said to present obstacles to registration for MSMEs, including: a complex administrative apparatus in which multiple administrations were involved in setting up a business; biased and negative control over the applications filed for registration; predominance of form over substance where the information required was often not processed and "nominal" requirements were considered more important than substantial requirements. In addition, multiplicity and disparity of laws governing the registration process; differing interpretation and application of those laws according to the person, the office and administration were also said to negatively affect the decision of MSMEs to register. UNCTAD also maintained "ger.co" which provided links to online business registration websites throughout the world.

75. It was noted that in order to assist States in improving their business registration procedures, UNCTAD had developed various tools including electronic single windows, which could combine the procedures of multiple agencies (for example, the business registry, the tax office, and social security authorities) and allow easy and fast online registration for the user with a single form. Such single windows (eRegistrations) were currently in operation in four States and under construction in two additional States. Other tools developed by UNCTAD included assisting States to establish information portals and to make their regulations transparent (eRegulations), as well as establishing principles to simplify administration procedures (eSimplifications).

B. Draft model law on a simplified business entity

76. The Working Group recalled the work that it had undertaken at its last session in terms of having completed its consideration of the first six articles of the draft model law on a simplified business entity as contained in A/CN.9/WG.I/WP.89, and other relevant documents. Reference was made to the deliberations of the Commission at its forty-eighth session (2015) as noted in paragraph 6 above. In keeping with the working methods of the Working Group to date, delegates were invited to raise any principles included in the model law annexed to A/CN.9/WG.I/WP.83 which were thought to be relevant in the discussion on simplified business forms as it progressed.

[10] See www.businessfacilitation.org/vienna.

77. The Working Group recalled paragraph 6 of A/CN.9/WG.I/WP.89, which noted that while the draft model law had been prepared using a corporate approach, its provisions could be adjusted to accommodate a more flexible business form that might be more suited to MSMEs and would avoid seemingly heavier corporate-type structures. It was also recalled that the Working Group had decided at its twenty-fourth session to use in future texts the term "member" rather than "shareholder" (see para. 48, A/CN.9/831); to place the phrase "simplified business entity" in square brackets throughout the text (see para. 38, A/CN.9/831) pending agreement on the appropriate term; and to find an appropriate term to replace "formation document" and "operating document", but that those changes had not yet been reflected in existing texts such as A/CN.9/WG.I/WP.89. It was further recalled that the Working Group had previously agreed to prepare definitions (see para. 68, A/CN.9/825) and standard forms to assist MSMEs (see para. 63, A/CN.9/800, as well as para. 7, A/CN.9/WG.I/WP.89), but that the draft text would have to be more fully developed before that would be possible.

78. Finally, although some States were said to have a closed approach that did not permit MSMEs to transform into other legal forms, the Working Group referred to its earlier decision to focus on a single legal text that could accommodate the evolution of a business entity from a single member to a more complex multi-member entity (see para. 67, A/CN.9/825 and para. 19, A/CN.9/831). To that end, the Secretariat had been requested in its drafting of the model law to proceed in such a way so as to highlight the rules applicable to the simplest or single member business entity (in respect of which the concepts in A/CN.9/WG.I/WP.86/Add.1 might be useful), as distinct from the rules required for the more complex business forms.

79. It was further recalled that the Working Group had requested the Secretariat to recommend which provisions of the draft model law were considered key to the establishment of a simplified business entity, and might next be considered by the Working Group. In that regard, it was agreed that the next provisions to be taken up would be those in Chapter VI of the draft model law, commencing with draft articles 24 and 25.

1. Chapter VI — Organization of the simplified business entity

80. In commencing its deliberations on Chapter VI, the Working Group considered a number of issues relating to draft articles 24 and 25 of A/CN.9/WG.I/WP.89.

81. It was observed that while all States had some form of general company law, the Working Group was focusing on the creation of a special company law; there was support for the suggestion that the draft model law should clarify its intended interaction with the existing law on business forms in the enacting State. Another proposal was that for greater simplicity, draft article 24(1) should be retained in the text (with revisions), but that the concepts in paragraphs 2 to 8 could be moved to the commentary. While there was some support for that suggestion, it was not taken up by the Working Group due to the perceived dearth of detail that such an approach would provide to assist MSMEs.

82. Another issue raised for discussion was whether the Working Group should reconsider its view on freedom of contract, and opt for more prescriptive drafting in its text so as to provide even the smallest and least sophisticated MSMEs with a legal construct that was complete, stable and could be used immediately to run their business without resort to additional legal advice. There was some support for that view.

83. It was observed that draft article 25 raised certain issues in respect of disclosure of the formation (or operating) document, since the identity of the representative should be publicly available to third parties. The question was also raised whether a manager could be a legal person, particularly in the case where there was only one manager, but the Working Group agreed to defer consideration of that issue to a later discussion.

84. After discussion on each of the following aspects, the Working Group agreed that Chapter VI should be redrafted along the following lines:

(a) First, a general default rule should indicate that it was not necessary for the simplified business entity to have a board of directors unless it was required in the formation (or operating) document, taking into consideration draft section 25 of the annex to A/CN.9/WG.I/WP.83;

(b) Second, in the case of a single member business entity, that member would manage the entity and would represent it, unless otherwise provided in the formation documents;

(c) Third, a manager or board of directors could be named by the member(s) and should consist of one or more persons;

(d) Regardless of whether the simplified business entity was managed by a single member or by a board of directors, the text should include the appropriate procedure to appoint a manager or board of directors, the grounds for their removal, and for naming authorized representatives of the entity, as well as the decision-making procedures;

(e) Any manager or board of directors should be subject to any rules of procedure set out in the formation (or operating) document, as well as to the duties referred to in draft article 24(6) of A/CN.9/WG.I/WP.89; and

(f) In any event, it would not be necessary to include provisions on a supervisory board (draft article 26) at the current stage of development of the draft.

2. Chapter VIII — Dissolution and winding-up

85. In considering draft article 32, it was suggested that, while cognizant that each enacting State would be likely to have a bankruptcy regime, it might be useful to ensure that bankruptcy was included in the scheme established in the list in paragraph 1. Other aspects of bankruptcy were thought to be relevant in relation to this provision, including a requirement for appropriate public notice of any bankruptcy (see draft paragraph 32(2)).

86. A suggestion that voluntary dissolution be prohibited was not taken up. However, related questions were raised in respect of whether a rule on the distribution of remaining assets in the case of a voluntary dissolution was required, and more generally, whether the Model Law should recommend that some mechanism be included for providing notice to creditors in the case of dissolution or winding up. Such rules could be particularly important should the Working Group decide in its future discussion in respect of draft article 5 that a legal person would be entitled to be the sole member of a simplified business entity, and would thus receive transfer of all the assets of the dissolved company, potentially without notice to creditors. There was support for the suggestion that commentary might be included in the text along the lines of suggesting that States ensure that adequate means of protecting creditors were in place.

87. However, concern was raised in respect of the requirement in subparagraph 32(1)(d) that a majority member decision was required for voluntary dissolution of the entity. It was observed that some States required a two-thirds majority, rather than a simple majority, for such decisions. The Working Group embarked upon a general discussion of issues relating to the internal organization of the entity, in effect, on the rules which ought to govern the relationship between members, particularly in terms of the issue of the number of votes required for various actions such as amending the formation document. Other issues raised in the course of discussion concerned voluntary and forced exit rules, minority member rights, and the like (see, generally, the discussion in paras. 31 to 35 of the commentary in A/CN.9/WG.I/WP.89). It was agreed that succession in cases of dissolution and winding up should be carefully considered in terms of deciding on the appropriate decision-making number of votes required among members for various acts, and that efforts should be made to take a consistent approach to such matters in this and other chapters, including any chapter on the interrelationship of members.

88. The Working Group agreed that draft article 32 would generally not be amended, but for consequential adjustments required as a result of other decisions and efforts to render the text as consistent as possible.

89. The Working Group had no comment on draft articles 33 and 34, but for a concern raised in respect of the limit of one year for curing any event of dissolution in draft article 33.

3. Chapter VII — Restructuring

90. The Working Group next considered Chapter VII on restructuring the simplified business entity. In regard to draft articles 27 and 29 (as well as to the threshold for the operation of draft article 28), and in keeping with the previous discussion under Chapter VIII (see paras. 85 to 89 above), views were expressed that a "unanimous" decision might not be the most appropriate number of votes required for MSMEs in these cases. The Working Group agreed that the draft articles should be made consistent with the number of votes required for dissolution and winding up and that draft article 27 should be grouped with similar rules in the draft text, since those norms had a similar economic rationale and therefore should be treated in the same way. A further drafting suggestion was made that the draft provision should be adjusted to clearly cover single member entities as well as multiple member entities.

91. Similarly to the concerns raised above (see para. 83 above), a concern was expressed that draft articles 28 and 29 seemed to focus on the protection of shareholders without any consideration for the protection of third parties. In this regard, it was emphasized that structural changes in the business entity should not result in third parties losing their assets, since the net result of the change was that the same legal entity continued to exist in a different form, and should be liable for its past obligations. A suggestion was made that Chapter VII could deal with third party protection perhaps by way of adopting an ad hoc norm or by reference to national law of the enacting State, or, again, through the inclusion of commentary suggesting that States ensure that adequate means of protecting creditors were in place.

92. A further drafting suggestion was made to group the provisions in Chapter VII according to their increasing complexity, perhaps by grouping restructuring and conversion first, and then grouping split-offs and mergers. It was also observed that there might be inconsistency in terms of the references in the draft model law to existing legal frameworks in some provisions, and the establishment of a "free-standing" model in others. Finally, a suggestion was made that, in light of its purpose, a more appropriate title for this chapter might be "transition", and that special provisions for the transition of the simplified form into the more standard business form already provided for in each jurisdiction should be considered, thus leaving untouched existing restructuring regimes.

4. Chapter IX — Miscellaneous

Article 35 — Financial Statements

93. The Working Group next considered draft paragraph 35 on financial statements, during which the following issues were raised as a matter of importance:

(a) It was clarified that the Working Group had already agreed that in a future iteration of the text, rules in respect of auditing organs should be dealt with in conjunction with the rules applicable to the board of directors or managers;

(b) It was important for members of all sizes of simplified business entity to have regular access to the financial information in respect of the entity;

(c) It might be necessary to find terminology other than "financial statements and annual accounts" in order for the provision not to be confused with the rules in respect of public companies; the suggested term "financial information" was not thought to be sufficiently precise to be suitable, but it was observed that definitions included in the text might be of assistance;

(d) There might be no need for mandatory disclosure of financial statements in the case of MSMEs, particularly in terms of the smaller enterprises, but financial records should be kept by the entity and disclosure of them should be permitted if the entity so desired; and

(e) Simplified accounting was likely to be an important feature for MSMEs, and some examples were available in national law (for example, in A/CN.9/WG.I/WP.94), but other than recommending that an enacting State should permit and enable the use of simplified accounting for MSMEs, it might not be advisable to prepare detailed accounting or bookkeeping rules.

94. The Working Group agreed that the text in draft paragraph 35 was generally acceptable, but that some drafting adjustments should be made to it in order to differentiate it from the usual approach to financial statements of public companies. It was agreed that the phrase "financial statements and annual accounts" in draft paragraph 35(1) should be placed in square brackets to indicate that terminology more in keeping with the context of a simplified business entity (as opposed to a public company) might be identified in a future text. It was further agreed that draft paragraph 35(2) may need to be clarified in order to indicate that it referred to "internal" company books and records, and did not refer to public disclosure by way of a commercial or other registry. The Working Group also agreed that draft paragraph 35(3) should refer to legislation in the enabling State applicable to MSMEs, but that it should separate the concepts of accounting standards and disclosure requirements. Finally, agreement was also reached that more detailed guidance could be included in the commentary to assist enacting States in respect of the matters considered by the Working Group in respect of draft article 35.

95. In respect of A/CN.9/WG.I/WP.89, some States expressed a view that the terminology used in relevant domestic legislation should be maintained and that no changes should be made. Other States did not share that view. It was agreed that that issue would be revisited at a future session.

V. Next session of the Working Group

96. The Working Group recalled that its twenty-sixth session was scheduled to be held from 4 to 8 April 2016 in New York. After discussion in respect of work priorities, the Working Group agreed that in order to take note of all views expressed and to facilitate the planning of attendance by representatives of States and interested organizations, it would devote the time from 4 to 5 April 2016 to a continuation of its consideration of issues relating to a simplified business entity, and the time from 6 to 7 April 2016 to further exploring the topic of key principles and good practices in business registration.

B. Note by the Secretariat on reducing the legal obstacles faced by micro, small and medium-sized enterprises (MSMEs)

(A/CN.9/WG.I/WP.92)

[Original: English]

Contents

I. Micro, small and medium-sized enterprises (MSMEs)

1. At its forty-sixth session, in 2013, the United Nations Commission on International Trade Law (UNCITRAL) decided to commence work on reducing the legal obstacles faced by micro, small and medium-sized enterprises (MSMEs) throughout their life cycle, and in particular, specified that such work should focus on MSMEs in developing economies. This matter was placed on UNCITRAL's work programme for Working Group I, which was requested to begin its mandate with a focus on the legal questions surrounding the simplification of incorporation.[1]

2. In taking up this topic, UNCITRAL has decided to focus its attention, at least initially, on the reduction of legal obstacles that MSMEs face at the beginning of their life cycle. This Working Paper is intended to assist the Working Group in its deliberations on this topic by providing context for its discussions in this regard. Should the Working Group decide to do so, these materials could be adapted for inclusion in any legislative text on MSMEs that is prepared by the Working Group.

3. In light of the disadvantaged position in which many MSMEs are found globally, undertaking this work emphasizes the relevance and importance of UNCITRAL's work and programmes for the promotion of the rule of law at the national and international levels and for the implementation of the international development agenda, including the achievement of the Millennium Development Goals and the preparation of sustainable development goals. The global community has recognized both the importance of fair, stable and predictable legal frameworks for: generating inclusive, sustainable and equitable development, economic growth and employment; generating investment; and facilitating entrepreneurship, as well as UNCITRAL's contribution to the attainment of those goals through its efforts to modernize and harmonize international trade law.[2] Work aimed at supporting and fostering the establishment and growth of MSMEs further underpins UNCITRAL's contribution in

providing internationally acceptable rules in commercial law, and supporting the enactment of those rules to assist in strengthening the economic fibre of States.

4. The international community has underscored the importance of business law as one of four pillars key to strengthening the legal empowerment of the poor, many of whom rely upon micro and small businesses for their livelihood.[3] In addition to other pillars (such as access to justice and the rule of law; property rights; and labour rights), business rights are seen as key to legal empowerment of the less advantaged, not only in terms of employment by others, but in developing micro and small businesses of their own. Business rights may be regarded as a composite of existing rights of groups and individuals to engage in economic activity and market transactions, and which include the right to start a legally recognized business without facing arbitrarily enforced regulations or discrimination, removing unnecessary barriers that limit economic opportunities, and protecting business investments, regardless of their size.[4] Measures that have been called for to strengthen business rights include:

(a) Guaranteeing basic business rights, including the right to sell, the right to have a workspace and the right to have access to the necessary infrastructure and services (for example, to electricity, water and sanitation);

(b) Strengthening, and making effective, economic governance in order to permit entrepreneurs to easily and affordably establish and operate a business, permit them access to markets, and permit them to exit a business;

(c) Expanding the accessibility of entrepreneurs to limited liability entities and to other legal mechanisms that allow owners to separate their business and personal assets;

(d) Promoting inclusive financial services that offer savings, credit, insurance, pensions and other tools for risk management; and

(e) Expanding the access of entrepreneurs to new business opportunities through specialized programmes to familiarize entrepreneurs with new markets, assisting them in creating links with other businesses of all sizes, and in complying with regulations and requirements.[5]

5. The experience of UNCITRAL may assist in the identification of the legal and regulatory framework that can best assist entrepreneurs and MSMEs in establishing business rights, thereby reducing some of the legal obstacles that such businesses face.

A. The importance of MSMEs in the global economy

6. UNCITRAL's decision to work on reducing the legal obstacles faced by MSMEs recognizes the importance of such enterprises to the economic health of the States in which they are found, and to the global economy more generally. This importance is underscored by a number of key facts that illustrate that MSMEs are seen as the backbone of the economy in both the developed and the developing world.

7. The total number of MSMEs worldwide is estimated to be between 420 to 510 million businesses, of which 360 to 440 million (around 86 per cent) are in emerging markets. Of these, 36 to 44 million SMEs globally (comprising about 9 per cent of the total MSME population) are registered, i.e. they are operating within the legally regulated economy, and of these, 25 to 30 million are in emerging markets.[6] In addition, SMEs

The findings of this Commission form an integral part of the United Nations Development Programme's (UNDP) Initiative on Legal Empowerment of the Poor (www.undp.org/content/undp/en/home/ourwork/democraticgovernance/focus_areas/focus_justice_law/legal_empowerment.html) and have contributed to similar work on Legal Empowerment of the Poor in international organizations such as the World Bank Group and the Open Society Foundations (www.opensocietyfoundations.org/projects/legal-empowerment).

[4] Ibid., pp. 30-31.

[5] Ibid., pp. 8-9.

[6] These figures are taken from the Global Partnership for Financial Inclusion (GPFI), which cites a study done by the International Finance Corporation (IFC). GPFI is the main implementing

(operating both within and outside of the legally regulated economy) account for 72 per cent of total employment and 64 per cent of Gross Domestic Product (GDP) in developed economies, while they represent 47 per cent of employment and 63 per cent of GDP in low-income countries. SMEs operating outside of the legally regulated economy provide 48 per cent of all jobs in emerging market countries, and 25 per cent of all jobs in developed countries, but account for only 37 per cent and 16 per cent of GDP in these markets, respectively.[7]

8. It may also be instructive to review some of the statistics on such enterprises on a regional and subregional basis. In the European Union (EU), 99 per cent of all businesses are SMEs, which provide two out of three private sector jobs and contribute to more than half of total value-added created by business in the EU. Further, nine out of ten SMEs in the EU are microenterprises (defined in the EU as having fewer than 10 employees), thus illustrating that the mainstays of Europe's economy are micro firms.[8]

9. Microenterprises are no less influential in other developed States. For example, the United States of America has 25.5 million micro-businesses (defined as enterprises having fewer than 5 employees, including the owner), or 92 per cent of all businesses. In 2011, the direct, indirect and induced effect microenterprises had an impact on over 40 million jobs in the United States: directly accounting for 26 million jobs; indirectly supporting 1.9 million jobs through business purchases; and having an induced effect (through the personal purchasing power of owners and employees of micro-businesses) on an additional 13.4 million jobs.[9]

10. MSMEs are also of great importance in regions of the world where a large number of developing States are found. SMEs represent 99 per cent of all enterprises in the Association of Southeast Asian Nations (ASEAN) region, and contribute from 30 to 60 per cent of the GDP.[10] In the States of the Asia-Pacific Economic Cooperation (APEC), SMEs account for around 90 per cent of all businesses and employ as much as 60 per cent of the work force.[11] In the Caribbean Community and Common Market (CARICOM), MSMEs provide more than 50 per cent of GDP and account for 70 per cent of the jobs,[12] while in Latin America, over 18.5 million MSMEs provide employment to about 70 per cent of the regional workforce and contribute almost 50 per cent of the region's GDP.[13] According to the African Development Bank (AfDB), SMEs in Africa, account for more than 45 per cent of employment and contribute 33 per cent to GDP.[14]

B. Defining MSMEs

11. There is no standardized international definition of what constitutes an MSME, since each economy will define its own parameters for each size of business by taking into account its own specific economic context. For the purposes of work undertaken by UNCITRAL, it is not necessary or advisable to seek consensus on a definition for each category of MSME, since any legislative texts produced will be applied by States or regional economic groups to their MSMEs as defined by each of them, based on each unique economic context. The important common factor from State to State is that MSMEs, regardless of how they are defined in that jurisdiction, are enterprises that, by virtue of being the smallest and most vulnerable, face a number of common obstacles regardless of the particular jurisdiction in which they are found. For that reason, these materials do not offer guidance on how a State should define the different categories of MSMEs.[15]

C. The nature of MSMEs

12. MSMEs are incredibly varied in nature. They may consist of sole entrepreneurs, small family businesses or larger enterprises with several or many employees, and may operate in virtually any commercial sector, including in the service industry and the artisanal and agricultural sectors.

13. Moreover, MSMEs may be expected to vary depending on the local economic conditions, cultural traditions and the different motivations and characteristics of the entrepreneurs establishing them. Enterprises that have entered the legally regulated economy may also take various legal forms, depending on the options available to them under applicable law, and on how those different forms may meet their needs.

14. In addition, although MSMEs may be seen, particularly in the context of developing economies, mainly as a source of livelihood for the working poor, such enterprises need not be static; in fact, MSMEs may also serve a dynamic purpose as a source of entrepreneurial talent in an economy. Indeed, their importance in the world economy suggests that providing for and fostering the growth of MSMEs is a key goal in order to achieve economic progress, innovation and success.

15. However, despite their disparate nature, certain characteristics of MSMEs may be broadly shared. Some of these similarities may include, among others:

(a) Being and remaining small operations;

(b) Facing burdensome regulatory hurdles, which tend to have a disproportionate effect on them;

(c) Reliance on family and friends for loans or risk-sharing;

(d) Limited access to capital or to banking services;

(e) Employees, if any, are often drawn from family and friends and may be unpaid and unskilled;

(f) Markets may be limited to relatives, close friends and local contacts;

(g) Vulnerability to arbitrary and corrupt behaviour;

(h) Limited access to dispute settlement which puts them at a disadvantage in disputes with the State or with larger businesses;

(i) A lack of asset partitioning, so business failure often means that personal assets are also lost;

---

[15] States may wish to note the definitions of the different categories of businesses included in MSMEs that have been established either by various States or by regional economic groups. Those definitions tend to be based on a number of elements, considered separately or along with other factors, including: (i) the number of employees at a specific point in time, such as the end of the financial or calendar year; (ii) the amount of annual revenue or turnover generated by the enterprise, or the balance sheet total of the business; (iii) the asset base of the business; (iv) the total monthly wages paid by the enterprise; or (v) the amount of capital invested in the enterprise.

(j) Vulnerability to financial distress; and

(k) Difficulty in transferring or selling a business and in profiting from both tangible and intangible assets (such as client lists or relationships with customers).[16]

D. Creating sound business environments for all businesses

16. Efforts to assist MSMEs at the start of their life cycle might first begin with consideration of the business environment in which an MSME will be conducting its affairs. A "business environment" may be defined in a number of different ways, but could be said to comprise the policy, legal, institutional and regulatory conditions that govern business activities, as well as the administration and enforcement mechanisms established to implement government policy, and the institutional arrangements that influence the way key actors operate. These key actors may include government agencies, regulatory authorities, business organizations, trade unions, and civil society organizations. All of these factors contribute to affect business performance.[17]

17. Sound business environments clearly have a positive influence on economic growth and poverty reduction. Views differ as to the significance and measurability of the link between the business environment, on one hand, and economic growth and poverty reduction, on the other. However, poor business environments may not provide sufficient incentive and opportunity for entrepreneurs to carry on their commercial activities in the legally regulated economy where their enterprise is more likely to thrive. In addition, poor business environments tend to be more susceptible to corruption and usually have a disproportionate gender impact, since the businesses most vulnerable in a weak business environment are micro-businesses, which are often owned by women.[18]

18. It should be noted that the quality of the business environment varies not only as between States but within their different regions as well. Such regional variations make it unlikely that a single solution will provide the answer for improving the business environment in every State. Similarly, the challenges faced by entrepreneurs, particularly by MSMEs, vary depending on the context in which they are doing business. However, the two concepts are linked, since many of the challenges faced by MSMEs are similar to those considered detrimental to a favourable business environment in general, including: burdensome regulation, high economic inequality, low institutional quality, low quality of public infrastructure, and a lack of access to credit and other resources.[19]

19. Improving the quality of the business environment and assisting MSMEs in overcoming the particular challenges facing them often require a State to take measures towards legal and policy reform. These reforms may include, among others, providing for a simple and effective system of business registration, as well as providing for a range of simplified and flexible business forms so as to meet the varied needs of MSMEs. States most often initiate such business reforms in order to: facilitate business start-up and operations, stimulate investment opportunities, and increase growth rates and employment. Such reforms require careful planning and commitment on the part of the State, as well as the involvement of many different entities at various administrative and governmental levels.[20]

II. The extralegal economy

20. As outlined above in paragraph 15, MSMEs generally face a number of key challenges, some of which are caused, and many of which are exacerbated, by operating in the extralegal

---

[18] Ibid., p. 3; see also, "Making the Law Work for Everyone", Volume I, Report of the Commission on Legal Empowerment of the Poor, supra note 3.

[19] See K. Kushnir, M. L. Mirmulstein and R. Ramalho, "Micro, small and medium enterprises around the world: How many are there, and what affects their count?", 2010, World Bank/IFC.

[20] See Donor Committee for Enterprise Development (DCED), Supporting Business Environment Reforms: Practical Guidance for Development Agencies, Annex: How Business Environment Reform Can Promote Formalisation, 2011.

economy.[21] As noted above, MSMEs are much more prevalent in developing States, which host over 85 per cent of the large number of MSMEs in business globally; of these, an estimated 90 per cent of MSMEs operate in the extralegal economy, which is sometimes referred to as the "informal" economy.

21. "Informality" is by no means a uniform concept. Many "informal" businesses actually operate in fixed premises and according to locally accepted commercial rules. In addition, they may be well-known by local authorities, pay some form of local taxes, and may even engage in cross-border trade. Others, on the other hand, may have little interaction with the State.

22. For greater certainty, these materials will refer to such commercial activity as "extralegal" rather than "informal". Moreover, since the entry point for enterprises wishing to access the legally regulated economy is in most States by way of registration with a commercial or business registry, extralegal enterprises will refer to those that are not entered into the official commercial or business registry of a State, and registration will be considered the main conduit through which businesses are permitted to operate in the legally regulated economy.

23. It should also be noted that the extralegal economy is not related to illegal or criminal activity. Illegal activities are contrary to the law, but informal activities are "extralegal", in that they are not officially declared and do not occur in the context of the legal and regulatory regime that should govern such activities. The discussion in these materials is limited to extralegal commercial activities and does not address trade in illicit goods or services.

24. In addition, extralegal commercial activity may be mainly of a different nature in some States, such as in developed economies. In such States, the extralegal economy may consist mainly of formal firms and workers that underreport their income to tax authorities, or that use undeclared labour in certain business domains.[22] These types of extralegal activities are not the focus of these materials.

25. It is also important to note that although extralegal business activity, particularly in the developing world, may exist largely as a result of economic necessity, as noted above in respect of MSMEs in general,[23] components of the extralegal economy may also be seen as quite dynamic and as an incubator for business potential that in fact provides economies with a large number of potential contributors to business development. In fact, such extralegal enterprises may be seen to provide a pool of talent and an important base of operations from which entrepreneurs can access, and graduate into, the legally regulated economy. There is increasing recognition that the extralegal sector is growing and that it should not be considered a marginal or peripheral sector, but rather as an important building block of a State's overall economy.[24]

26. In fact, a majority of the world's working population operates in the extralegal economy; that number is projected to grow to two-thirds of the global work force by 2020.[25] Although the very nature of such enterprises prevents the identification of precise statistics, estimates of the regional prevalence of extralegal economic activity as a percentage of GDP are as follows: 38 per cent in sub-Saharan Africa; 18 per cent in East Asia and the Pacific; 36 per cent in Europe and Central Asia; 35 per cent in Latin America and the Caribbean; and 27 per cent in the Middle East and North Africa. By way of comparison, the level of the extralegal economy as a percentage of GDP is estimated at 13 per cent in high-income OECD States, and at 17 per cent globally.[26]

27. The institution of reforms to improve the business environment, as noted above in paragraphs 16 to 19, may encourage and facilitate the creation of enterprises through official registration and the migration of extralegal businesses to the legally regulated economy. However, in order to achieve success, policies that encourage businesses to enter the legally regulated economy should take into account the different motivations and characteristics of entrepreneurs operating in the extralegal sector. Such motivations will vary depending on the economy, and may include: micro and small businesses that cannot access the legally regulated economy due to high entry barriers and costs (including taxes and other social contributions); subsistence entrepreneurs that lack alternative job opportunities; and those entrepreneurs that consider that the costs of entering the legally regulated economy outweigh the benefits they expect to receive.[27]

28. Variations in the size and characteristics of the extralegal economy are also apparent from region to region. An analysis of one region, for example, indicates high levels of extralegal commercial activity, partially due to the fact that the extralegal economy is where most new jobs are found, and in which many entrepreneurs must trade by necessity.[28] In this region, a job, an enterprise and a household are often the same thing,[29] and lack of entrepreneurial skills, access to credit, and infrastructure are seen as the most restrictive constraints to growth. In other regions, the extralegal sector tends to behave like a typical small business sector, and is often the main entry point for young, uneducated workers seeking employment, as well as for those seeking part-time work.[30] Other regions have experienced growth of the extralegal economy in recent years, apparently driven by a lack of jobs in the legally regulated sector and reduced demand for goods and services from those employed in that sector.[31]

29. The debate on the reasons for the extralegal sector, on its effect on national economies and on how to approach the issue has been vibrant for decades and has in recent years had a major influence on policymaking. The view that extralegal commercial activity is the result of burdensome regulation and costly procedures required by the State for businesses to enter the legally regulated economy, and that a reduction of those barriers will help extralegal MSMEs move towards a greater degree of business registration, has generated strong momentum for reforming regulations and laws in order to simplify business entry into the legally regulated economy.[32] A wide array of policies have been designed and implemented in several States and regions of the world, since, as noted earlier, the variable nature of the extralegal sector, and the different levels of development of States, render elusive the identification of a single optimal approach. The most successful interventions have been comprehensive policy packages that aimed at achieving various goals, such as economic growth, social protection, and inclusion, and which often include:

(a) Reducing the costs of a business entering (and remaining in) the legally regulated sector, which include entry costs, taxes, fees and social contributions, and costs of compliance;

(b) Improving the benefits of entering the legally regulated economy by reducing the bureaucracy and expense involved in obtaining fixed premises, and obtaining access to business development services and new markets;

(c) Improving the general business environment, so that policies to reduce costs and to improve the benefits of entering the legally regulated economy also assist firms already operating in that sector; and

(d) Strengthening the enforcement of a State's legal regime in order to encourage entry to the legally regulated economy.[33]

III. Making entry into the legally regulated economy simple and desirable for MSMEs

30. In order to encourage MSMEs to start their enterprises in the legally regulated economy or to move their extralegal businesses into that sector, States may wish to consider how best to effectively convey to MSMEs the availability and advantages of that approach. In addition, States should also consider what steps they can take to motivate such behaviour by making it a desirable, easily accessible process, which will pose the least burden possible on the MSME.

A. Explain what entering the legally regulated economy means

31. To ensure widespread understanding of the advantages available to MSMEs, steps must be taken to explain to them the meaning of participating in the legally regulated economy. The State should consider how best to effectively convey relevant information to MSMEs, including the minimum requirements for such businesses to register in the jurisdiction and to operate in the legally regulated economy. This information should advise entrepreneurs of the benefits of official registration, as well as what business forms are available to them and the advantages of each, as well as what additional registrations might be necessary, for example for the purposes of licensing, taxation, social services, and the like. Information should be specifically adapted so that it is clear and easily understandable for the target audience, and it should be conveyed in a manner that is tailored for them.

1. The advantages of the legally regulated economy

32. Part of the message that must be conveyed to MSMEs in order to persuade them to operate their businesses in the legally regulated economy is to explain to them the advantages of that approach. The following sections outline the advantages of encouraging businesses to operate in the legally regulated economy for the State and for entrepreneurs.

(a) Advantages for the State

33. States have a clear interest in encouraging MSMEs to operate in the legally regulated economy. One of the reasons often cited for that interest is in terms of taxation, since encouraging MSMEs to migrate to, or to operate in, the legally regulated economy will broaden the tax base of the State.[34] It may also help reduce any friction that may exist with enterprises that are already operating in the legally regulated economy and are tax contributors, but that must compete for market share with extralegal businesses. However, there are additional reasons for the State to take action to encourage migration from the extralegal economy, such as, depending upon the specific economic sector, ensuring consumer protection and in generally engendering trust in business and commerce in the State for stakeholders including consumers, business partners and banks.

34. Other advantages to the State may be less direct, but are no less valuable. For example, providing previously extralegal businesses with the means to enter the formally regulated economy will permit those MSMEs to grow, to create jobs, and to increase their earnings and contribution to the creation of wealth and the reduction of poverty in the State. Businesses that enter the legally regulated economy can be expected to attract more qualified employees and to stay in business longer, thus making investment in the training of personnel and the acquisition of capital more profitable. The increase in the number of businesses registered will mean that there is more and better economic data available by way of the business registry, and that information exchange in respect of such businesses will

[33] International Labour Organization (ILO), GIZ, Enterprise formalization: fact or fiction?, A quest for case studies, 2014, p. 24.

[34] States may wish to note that reduced taxation rates and administration may be an incentive offered to MSMEs to join the legally regulated economy, and that too great an emphasis on expanding the tax base may be counterproductive.

increase and become more transparent. All of these effects will have an overall positive impact on the economy of the State.[35]

(b) Advantages for entrepreneurs

35. However, States must also ensure to convey clearly and effectively to MSMEs and entrepreneurs the benefits of doing business in the legally regulated economy. The following factors are often cited as key advantages for MSMEs that operate in the legally regulated economy.

(a) Visibility to the public and to markets

Registering a business is the primary means through which it becomes visible to the public and to markets, thus providing a means for exposure to potential clients and business contacts, and an expansion of market opportunities. This membership in the marketplace may provide opportunities both in terms of becoming a supplier of goods and services and in accessing them under favourable conditions, and can dramatically improve the profitability of the business. Moreover, such visibility enables, and reduces the costs of, MSMEs trading in economic circles beyond their relatives, friends and local contacts, thus opening up new markets for them.

(b) Visibility to the banking system

Business registration can also provide an enterprise with improved access to banking and financial services, including to bank accounts, loans and credit. This permits MSMEs to move away from financial reliance on relatives and friends and makes it easier for them to raise capital from a broader group of investors, as well as lowering the cost of that capital. This, in turn, permits businesses to expand, to make new investments, to diversify their risk, and to take up new business opportunities.

(c) Public procurement

In most States, public procurement contracts are only available to those businesses that are registered and are part of the legally regulated economy. Access to such contracts may be enhanced for certain groups, since some States have developed specific programmes to ensure that a certain percentage of public procurement contracts are granted to less entitled entrepreneurs, including women, youth, the disabled and the elderly.

(d) Legal validation

Officially registering a business permits it to operate commercially in the jurisdiction and provides the entrepreneur with documentation proving that status, and that the business is in compliance with the registration requirements. This status also permits registered businesses to enter into and enforce contracts more easily, and to have access to justice for commercial purposes, including in respect of reorganization or liquidation. In some legal systems, registration provides additional legal rights for the entrepreneur operating in the commercial sector, including flexible provisions on commercial contracts, specialized commercial court divisions, a relaxation of certain requirements in terms of legal form, and the like.

(e) Legal compliance

While related to the concept of legal validation, compliance with the law can itself be seen as an advantage, since it alleviates entrepreneurial anxiety in respect of operating extralegally, and makes it less likely that fines may be imposed. Being in compliance with the law will also reduce the business' vulnerability to corruption and bribery, and should assist the entrepreneur by providing recourse in cases of tax and other inspections.

(f) Access to flexible business forms and asset partitioning

Through registration, the entrepreneur will be entitled to choose the legal form available in the jurisdiction that is best suited for the business, and ideally, the State will provide for a range of legal business forms for that purpose. Most jurisdictions have at least one legal form that permits the entrepreneur to separate personal finances from business finances; such asset partitioning can be invaluable to a business, particularly if financial difficulty is encountered, as the entrepreneur is not in danger of losing all personal assets, and the value of the business

[35] See, for example, supra, note 21, pp. 14 et seq.

assets can be maximized in the case of reorganization or liquidation. Moreover, the value of a business with separate assets may be greater and can be more readily transferred.

(g) Unique name and intangible assets

Business registration usually requires an enterprise to operate under a sufficiently unique business name. This unique name translates through the business registry and other means into a market identity that can develop a value of its own, and that can be traded to a subsequent owner. Other intangible assets that can add to the value of a business and can be traded, particularly in the case of asset partitioning and a separate legal business identity, include client lists and commercial relationships.

(h) Opportunities for growth

In addition to the advantages of visibility set out above, business registration provides an enterprise with access to a much larger business network, which can permit it to grow the business and operate it on a much greater scale. Some States permit a registered business to become a member of the Chamber of Commerce or other trade organization, which can greatly enhance an enterprise's opportunities for development.

(i) Opportunities for specialization of labour

Registered businesses tend to be less constrained in their hiring practices and may be able to hire employees outside of family and friends. This can permit the business to have access to a larger pool of talent and to permit specialization among employees to make better use of their talent and improve overall productivity.

(j) Access to government assistance programmes

Many States provide specific assistance programmes for MSMEs or for specific types of disadvantaged entrepreneurs. Registration in the legally regulated economy will permit an enterprise to access all forms of government assistance available to such businesses.

(k) Empowerment and emancipation effects

Registration of businesses owned by women, youth, the disabled, the elderly and other less advantaged groups may have important empowerment and emancipation effects. This may be particularly so in respect of women entrepreneurs, many of whom are micro entrepreneurs and who are often exposed to greater risk as a result of corruption and abuse of authority.

(l) Longer term gains

Business registration is also the main conduit for the growth of an enterprise into cross-border trading. It is also possible that, in the longer term, robust business registration will lead to an increase in cross-border trading and foreign investment — advantages not only for the enterprise, but for the State as well.

2. Communication and education

36. Communication of, and education on, the advantages of legal and policy reforms undertaken by the State to assist MSMEs will be key to the success of those reforms. While this might seem a relatively small detail, in the context of States and regions in transition or with remote areas, all potential entrepreneurs may not be well-served by mass media or have dependable and regular access to telecommunications or the Internet. In such contexts, the potential obstacles to communication and education, and thus to the success of the reforms, can be expected to be more numerous.

37. An additional consideration for a State in developing communication and education strategies should be to consider that many micro entrepreneurs may face literacy challenges and that particular steps may need to be taken to overcome this hurdle. For example, pictograms could be used in addition to text in order to inform potential businesses of the programmes and advantages offered to them. Additional options could include using other culturally significant means of communicating with such groups, including through songs and storytelling. One example demonstrates how,[36] in order to publicize its programmes

[36] See, for example, efforts of the Democratic Republic of Congo in publicizing its OHADA "entreprenant" programme (www.ohada.com/actualite/2609/ohada-rdc-campagne-mediatique-de-

aimed at fostering micro entrepreneurs, a State launched a national campaign illustrating the benefits of those programmes by way of broadcasting on radio and television a simple and interesting scenario using well-known national actors performing in the national languages of the State.

38. In designing its communication and education plan, a State must be cognizant of the potential impediments outlined above and think practically how best to bridge such gaps. Possible solutions could include:

(a) Providing for mobile education and communication efforts, and for mobile business registration and facilitation counters, so as to enable travel to the entrepreneur's location;

(b) Using trade organizations or informal workers' associations to assist in publicizing the programmes;

(c) Using mass media that is broadly available, including radio, television and print media, as well as posters and billboards;

(d) Making blanket announcements via text on mobile phones; this may be particularly effective in areas where mobile payments are being used;

(e) Ensuring that communication and education is in the local language;

(f) Making use of social media; while less practical in terms of States that face technological hurdles, social media may be an effective tool, particularly to disseminate information among younger entrepreneurs and family members;

(g) Developing courses for gender-specific trading or involving other disadvantaged groups could be developed; and

(h) Using educational techniques that may be particularly useful in the context.[37]

B. Make it desirable for MSMEs to enter the legally regulated economy

39. Another component of the communication package that should be conveyed to prospective business registrants is clear information on the incentives that a State provides to MSMEs to encourage them to register and participate in the legally regulated economy.

40. The effectiveness of the incentives offered by the State will vary according to the specific economic, business and regulatory context. As such, it is not possible to specify precisely which incentives should be offered to encourage initiation in, or migration of extralegal MSMEs to, the legally regulated economy. However, States may wish to consider the following possible incentives, each of which, often in combination with others, has been found to be an effective means of encouraging MSMEs to enter the legally regulated economy. In addition, in planning for the creation of these incentives, States may need to ensure coordination with international organizations active in this area (including, for example, the World Bank Group, UNCTAD, UNIDO, the Asian Development Bank, or OHADA), business registration officials, local business incubators, the tax authority, and banks in order to maximize the impact of the incentives chosen.

41. The following is a non-exhaustive list of the incentives that States may consider offering to MSMEs in order to persuade them to start their businesses in the legally regulated economy or to migrate them from the extralegal economy. [The Working Group may wish

[37] One such method may be "participatory learning and action", which has been described as an approach traditionally used with rural communities in the developing world. It combines participatory and visual methods with natural interviewing techniques and is intended to facilitate a process of collective analysis and learning. The approach can be used in identifying needs, planning, monitoring or evaluating projects and programmes, and offers the opportunity to go beyond mere consultation and promote the active participation of communities in the issues and interventions that shape their lives. See, for example, "What is Participatory Learning and Action (PLA): An Introduction", Sarah Thomas (http://idp-key-resources.org/documents/0000/d04267/000.pdf) or www.iied.org/participatory-learning-action.

to note that each of these incentives, and any additional ones suggested for inclusion, could be described in a brief paragraph, if desired.] A State may consider programmes along the following lines:

(a) Simplification of the business registration process;[38]

(b) Assistance in the business registration process;[39]

(c) Free (or very low-cost, if necessary) business registration;[40]

(d) Receipt of an official certificate indicating the registered status and legal form of the business;

(e) Organized access to and support with banking services (bank accounts and chequing accounts);

(f) Promoting access to credit for registered businesses;

(g) Accounting training and services;

(h) Assistance in the preparation of a business plan;

(i) Training (including managing inventory and finances);

(j) Providing credits for training costs;

(k) Protection against potential administrative abuse, possibly through access to mediation or other dispute resolution;

(l) Simpler and more equitable taxation (lower, simplified taxation rates), including tax mediation services;

(m) Business counselling services;

(n) Permitting a transition period to give new businesses time to comply fully with applicable laws;

(o) Providing a temporary "tax holiday" for small and microenterprises upon their initial registration;

(p) Providing lump sum monetary compensation or government subsidies and programmes[41] to foster MSME growth;

(q) Providing public communication and promotion of the registered business, for example through free memberships in industry organizations;

(r) Tailoring specific public procurement programmes to encourage small and micro-businesses or those owned by disadvantaged groups to have access to contracts; and

(s) Providing low-cost technological infrastructure.

C. Make it easy for MSMEs to enter the legally regulated economy

42. One of the most often-cited reasons given by MSMEs for their reluctance to register their business is the cost and administrative burden of doing so. Two areas of reform that States may undertake to assuage these concerns are to provide for flexible and simplified business forms for MSMEs and to simplify and streamline the procedures necessary to register a business.

1. Flexible and simplified business forms for MSMEs

43. Another aspect of creating an enabling legal environment and an attractive business registration programme for MSMEs is for the State to permit them simple access to flexible,

---

[38] See, for example, the good practices outlined in Working Papers A/CN.9/WG.I/WP.93, Add.1 and Add.2.

[39] Ibid.

[40] Ibid.

[41] For example, some States have programmes to encourage young nationals who have been educated abroad to return to their State and start businesses.

legally recognized business forms. Many micro and small businesses are either sole proprietorships or family enterprises that do not possess a legal identity or a business form distinct from that of the owner. An entrepreneur should be permitted to easily and inexpensively register a business with a legally recognized form in that jurisdiction. States may wish to permit business registration of a range of different legal forms so as to provide entrepreneurs with sufficient flexibility to meet the needs of MSMEs, and to encourage their registration and foster their growth.

44. For some businesses, registering in the official business register as a simple sole proprietor may be sufficient for their purposes. However, some States and regional economic organizations have created a legal business form for individual entrepreneurs (defined as those whose business turnover is below a certain amount) which adds through simple business registration certain benefits to those otherwise available to the sole proprietor.[42] These benefits tend to include being subject to a simplified scheme for the calculation and payment of taxes and social security contributions, as well as fast, simplified and low (or no) cost registration requirements and formalities. In addition, States may also adopt a number of incentives available to such businesses which may include: assistance in opening a bank account and gaining access to banking services, access to mediation services (for example, in respect of taxation and legal services) and practical training and advisory services in key business areas (for example, in accounting, management and inventory, legal and tax obligations, financial education and awareness, business planning, and restructuring and growth strategies). Nonetheless, such schemes typically do not change the unlimited personal liability of a sole proprietor, whose personal and professional assets are all available to meet any business debt.

45. An important business right that should be offered to MSMEs is the opportunity for an enterprise to partition its business assets from the personal assets of its owner(s). The legal ability of an enterprise to partition its business assets from the personal assets of its owner(s) is an important building block for the encouragement of entrepreneurial activity since, even though a business may fail, the personal assets of the entrepreneur(s) will be protected.

46. Asset partitioning is seen as one of the defining features of a limited liability business entity, which is said to be among the most productivity enhancing legal institutions available. Offering entrepreneurs the opportunity to take on legal personality and limited liability through the adoption of a simplified business form is certainly a feature that States should consider in making policy decisions on legal forms to adopt in order to reduce the legal obstacles encountered by MSMEs. The key issues involved in adopting a legal regime for simplified business entities with these features, but adapted for MSMEs (including sole proprietors), is being dealt with in detail by the Working Group in parallel discussions.[43] However, it should be noted that the benefits of asset partitioning for MSMEs registering their businesses may also be available in a legal structure that stops short of full limited liability and legal personality, and is thus subject to fewer formal requirements.

47. One such model that has been adopted is that which permits an individual entrepreneur to officially allocate (and register with the business registry) a certain share of personal assets to the entrepreneur's professional activity. This approach permits the entrepreneur to segregate professional assets from personal assets so that, in the event of financial difficulty of the business, creditors will have access only to the professional assets of the entrepreneur.[44]

48. Another model that has been used in this regard is the establishment of a separate capital fund that has been established for a specific purpose. Such a fund may be established by individuals (and their spouses), into which specific assets can be placed that are identified

---

[42] See, for example, the "auto-entrepreneur" in France, A/CN.9/WG.I/WP.87, paras. 22-23, and pp. 10 et seq., or the "entreprenant" in OHADA, Acte Uniforme Révisé Portant sur le Droi Commercial General, adopted 15 December 2011, entry into force 16 May 2011 (www.ohada.com/actes-uniformes/940/acte-uniforme-revise-portant-sur-le-droit-commercial-general.html).

[43] See Working Papers A/CN.9/WG.I/WP.82; A/CN.9/WG.I/WP.83; A/CN.9/WG.I/WP.86; and A/CN.9/WG.I/WP.89; and the reports of the twenty-second, twenty-third and twenty-fourth sessions (A/CN.9/800, A/CN.9/825, and A/CN.9/831, respectively).

[44] See A/CN.9/WG.I/WP.87, paras. 26-27.

as necessary for the family requirements of the individuals. Such assets are then protected from seizure in the case of business insolvency. A variation on this model may also be created by a corporation, which can establish a separate capital fund devoted to a specific purpose or which can agree that the earnings of an activity be dedicated to the repayment of loans obtained for the execution of certain specified activities. The establishment of such a fund is subject to certain requirements, including that its existence by made public by way of the business registry, and that it be open to opposition by existing creditors of the corporation. Once the fund is constituted, it is segregated from the other funds of the company, and may only be used to satisfy the claims of creditors arising as a result of the relevant activities. Other variations on the creation of a segregated fund may include the declaration of the fund to a specific purpose to the benefit of a natural or legal person, a public administrative body, or other entity, provided that the fund is established by public deed and is registered.[45]

49. An additional example of asset partitioning that stops short of providing legal personality and limited liability is the concept of "business network contracts". This legal tool can be used by a group of entrepreneurs (of various types and sizes, including sole proprietors, companies, public entities, and non-commercial and not-for-profit entities) who undertake a joint venture as agreed in the business network contract, which may be in respect of certain services or common activities within the scope of their business, or even with respect to the exchange of information. The goal of such an approach is to strengthen the individual businesses involved in the contract, as well as the network itself, at the national and international levels, so as to enable access to business opportunities not available to an individual enterprise, and thus to improve competitiveness. The contract must meet the formal requirements established by the State (for example, be duly executed in writing, indicate the objectives of the venture, its duration, the rights and obligations of participants, etc.), and be registered with the business registry. In addition, the contract must establish a capital fund to carry out the programme of the business network; this fund is then segregated from the individual assets of the founding entrepreneurs, and is available only to satisfy claims deriving from the activities performed within the scope of the network, and not for creditors of the individual entrepreneurs that created the business network.[46]

2. Simplified and streamlined business registration

50. One aspect of making it simple and desirable for an MSME to enter the legally regulated economy is to make the procedures for business registration accessible, simple and clear. In order to facilitate a migration of MSMEs from the extralegal to the legally regulated economy, and to encourage entrepreneurs to start their business in the legally regulated economy, States may wish to take steps to rationalize and streamline their systems of business registration. Improvements made by States to their business registration system may be expected to assist not only MSMEs, but businesses of all sizes, including those already operating in the legally regulated economy. Importantly, care must also be taken to effectively communicate these changes and their advantages to MSMEs and potential entrepreneurs throughout the jurisdiction.

51. Working Paper A/CN.9/WG.I/WP.93 and its addenda explore in detail the steps that can be taken by a State to simplify, streamline and adopt good practices in its system of business registration.

C. Note by the Secretariat on key principles of business registration

(A/CN.9/WG.I/WP.93 and Add.1-2)

[Original: English]

At its twenty-third session (Vienna, 17 to 21 November 2014), the Working Group considered issues outlined in Working Paper A/CN.9/WG.I/WP.85 on best practices in respect of business registration and related reform, which the Secretariat had prepared in response to a request by the Working Group at its twenty-second session. The Working Group was of the view that the issues and principles considered in that Working Paper should be explored more deeply in future discussions; in particular, parts IV (Best practices in business registration, paras. 18-47) and V (Reforms underpinning business registration, paras. 48-60) of A/CN.9/WG.I/WP.85 were thought to be particularly relevant.

This Working Paper and its addenda (A/CN.9/WG.I/WP.93/Add.1 and A/CN.9/WG.I/WP.93/Add.2) have been prepared in response to that request of the Working Group, but without prejudice to the final form of any future legislative text that the Working Group might wish to adopt on the topic of business registration.

Contents

Introduction

1. This Working Paper has been prepared on the understanding that, for the reasons described in document A/CN.9/WG.I/WP.92, it is in the interests of States and of micro, small and medium-sized enterprises (MSMEs) operating in the extra legal economy that such businesses migrate to the legally regulated economy. In addition, this Working Paper is also intended to reflect the idea that entrepreneurs that have not yet commenced a business may be persuaded to do so in the legally regulated economy if the requirements for formally starting their business are not considered overly burdensome. Finally, these materials are prepared on the understanding that, regardless of the particular nature or legal structure of the business, the primary means for an MSME to enter the legally regulated economy in most cases is through registration of their business.

2. In order to facilitate a migration of MSMEs from the extra legal to the legally regulated economy, and to encourage entrepreneurs to start their business in the legally regulated economy, States may wish to take steps to rationalize and streamline their systems of business registration. General improvements made by the State to its business registration system may be expected to assist not only MSMEs, but businesses of all sizes, including those already operating in the legally regulated economy. Many studies support the approach that faster and simpler procedures to start a business will assist in business formation and migration to the legally regulated economy. For these reasons, simplification and streamlining of business registration has become one of the most pursued reforms by States in all regions and at all levels of development. This trend has generated several best practices, whose features are shared among the best performing economies.[1] In order to assist States wishing to reform their business registration procedures so as to take into consideration the particular needs of MSMEs, or simply to adopt additional good practices to streamline existing procedures, these materials set out key principles and best practices in respect of business registration, and how to achieve the necessary reforms.

3. This Working Paper has been prepared in the form of a guide, which addresses legal, technological, administrative and operational issues of a business registration system. It is intended to facilitate the discussion of the Working Group by presenting an illustration of how the principles of an effective and efficient business registration system could appear in a future legislative text aiming at providing guidance to States. The materials are not intended to pre-empt any deliberation of the Working Group, which may agree that a different type of legislative text is better suited to assist States in the goal of streamlining their business registration system. Following the Working Group's decision on the form in which such guidance for States should be prepared, recommendations could be added to the text for the consideration of the Working Group.

A. Purpose of UNCITRAL guidance on business registration

4. Business registries are public entities, established by law, that record and update information on new and existing businesses — throughout the course of their lifespan — that are operating in the jurisdiction of the registry.[2] This process not only enables such businesses to comply with their obligations under the domestic legal and regulatory framework applicable to them, but it empowers them to participate fully in the legally regulated economy, including permitting them to benefit from legal and financial services not otherwise available to unregistered businesses.[3] Moreover, when information is appropriately maintained and shared by the registry, it allows the public to access business information, thus facilitating the search for potential business partners and/or clients and reducing risk when entering into business partnerships.[4] In performing its functions, the registry can thus play a key role in the economic development of a State.

[3] See World Bank and International Finance Corporation, Doing Business, 2015, p. 47.

[4] Ibid.

5. Business registration systems vary greatly across States and regions, but a common thread to all is that the obligation to register can apply to businesses of all sizes depending on the legal requirements applicable to them under domestic legislation. Approaches to business registration reforms are thus most often "neutral" in that they aim at improving the functioning of the registries without differentiating between large scale business activities and much smaller business entities. Evidence suggests, however, that when business registries are structured and function in accordance with certain features, they are likely to facilitate the registration of MSMEs, as well as operating more efficiently for businesses of all sizes.

6. This Working Paper draws on the lessons learned through the wave of reforms of business registration systems implemented since the beginning of the year 2000 by various developed and developing economies.[5] Furthermore, these materials have benefitted from various tools prepared by international organizations that have supported those reform processes, in particular in developing and middle income economies. Data made available through the activity of international networks of business registries that, among other activities, survey and compare the practices of their affiliates have also been referenced. The main sources used in the preparation of this Working Paper include:

- Innovative Solutions for Business Entry Reforms: A Global Analysis (Investment Climate, World Bank Group, 2012)
- Reforming Business Registration: A Toolkit for the Practitioners (Investment Climate, World Bank Group, 2013)
- The International Business Registers Report 2015 (prepared by ASORLAC, CRF, ECRF and IACA)[6]
- The International Business Registers Report 2014 (prepared by ECRF)[7]
- The Business Facilitation Programme website (developed by the United Nations Conference on Trade and Development).[8]
- [… …]

[*The Working Group may wish to note that other resources will be added as the materials are further developed*.]

7. Should the Working Group decide to prepare a legislative text on the issue of facilitating business registration for MSMEs, those materials should be addressed to all stakeholders that are interested or actively involved in the design and implementation of business registration, as well as to those that may be affected by or interested in the establishment and operation of such a registry, including:

(a) Policymakers;

(b) Registry system designers, including technical staff charged with the preparation of design specifications and with the fulfilment of the hardware and software requirements for the registry;

(c) Registry administrators and staff;

(d) Registry clientele, including businesspersons, consumers, and creditors, as well as the general public and all others with an interest in the appropriate functioning of the business registry;

(e) Credit agencies and other entities that will provide credit to a business;

(f) The general legal community, including academics, judges, arbitrators and practising lawyers; and

---

[5] See A/CN.9/WG.I/WP.85, para. 8.

[6] The report was prepared by the following registry organizations: Association of Registrars of Latin America and the Caribbean (ASORLAC); Corporate Registers Forum (CRF); European Commerce Registers' Forum (ECRF); and International Association of Commercial Administrators (IACA). These organizations include State registry officials from around the globe.

[7] The European Commerce Registers' Forum.

[8] See http://businessfacilitation.org/index.html.

(g) All those involved in company law reform and the provision of technical assistance in the simplification of business registration, such as international organizations, bilateral donors, multilateral development banks and non-governmental organizations active in the field of business registration.

8. This Working Paper seeks to use neutral and generic legal terminology so that any future guidance resulting from the Working Paper can be adapted easily to the diverse legal traditions and drafting styles of different States. The present materials also take a flexible approach, which will allow the guidance they contain to be implemented in accordance with local drafting conventions and legislative policies regarding which rules must be incorporated in principal legislation and which may be left to subordinate regulations or to ministerial or other administrative rules.

B. Terminology

9. The following paragraphs explain the meaning and use of certain expressions that appear frequently in this Working Paper:

- *Annual accounts*: The term "annual accounts" means the accounts prepared at the end of a financial year.
- *Annual returns*: The term "annual returns" means an annual statement which gives essential information about a business' composition, activities, and financial position, and which, subject to legislation, active incorporated or registered businesses must file with an appropriate authority.
- *Deregistration*: The term "deregistration" means the removal of a business from the registry once the business, for whatever reason, has permanently ceased to operate, including as a result of a merger or forced liquidation due to bankruptcy.
- *ICT*: "ICT" refers to information and communications technology.
- *Jurisdiction*: As used in this Working Paper, the term "jurisdiction" refers to the territory over which a State extends its authority.
- *Micro, small and medium-sized enterprises (MSMEs)*: As used in this Working Paper, the term "MSMEs" refers to micro, small and medium-sized enterprises as they are defined in the laws and regulations of the State undertaking the business registration reforms.
- *One-stop shop*: As used in this Working Paper, the term "one-stop shop" refers to an office or an organization that carries out more than one function relating to business registration.
- *Registered business or entity*: The term "registered business or entity" refers to those business entities that, further to filing an application for registration, have been officially registered in the business registry.
- *Registered information*: The term "registered information" means information contained in the registry.
- *Registrant*: As used in this Working Paper, the term "registrant" means the natural or legal person that submits the prescribed application form and documents to a business registry.
- *Registrar*: The term "registrar" means the person appointed pursuant to domestic law and/or regulation to supervise and administer the operation of the registry.
- *Registration*: The term "registration" means the entry of information required by domestic law and/or regulation into the registry.
- *Registration number*: The term "registration number" means a unique number assigned to a registered business and that is associated with that business during its life cycle.

- *Registry/Registration system*: The term "registry or registration system" means a State's system for receiving, storing and making accessible to the public certain information about business entities.

- *Unregistered business/entity*: The term "unregistered business or entity" means those business entities that are not included in the business registry.

- *Unique identifier*: The term "unique identifier" means a set of characters (numeric or alphanumeric) that is allocated only once to a business entity, that will never change throughout the business' lifetime and that remains unique across public agencies.

[*The Working Group may wish to note that the list of defined terms will be adjusted as the materials are further developed*.]

C. Key objectives of an effective business registration system

10. An effective system of business registration, as envisaged in these materials, is governed by the following overarching principles:

(a) Business registration is the key to permitting enterprises of all sizes and legal forms to be visible in the marketplace and to operate in the legally regulated commercial environment;

(b) Business registration is particularly important to enable MSMEs to increase their business opportunities and to improve the profitability of their businesses; and

(c) To be effective in registering businesses of all sizes, a business registration system should ensure that:

(i) The registration process is as simple, time and cost efficient, user-friendly and publicly accessible as possible;

(ii) The registered information on business entities is as easily searchable and retrievable as possible; and

(iii) The registered information is current, reliable and secure.

D. Core functions of business registries

11. There is no standard approach in establishing a business registry or in streamlining an existing one: models of organization and levels of complexity can vary greatly depending on a State's level of development, its priorities and its legal framework. However, regardless of the structure and organization of the registry, certain core functions can be said to be common to all registries.

12. The core functions of business registries are to:

(a) Record the identity and disclose the existence of a business to other businesses, to the public and to the State (ideally in a comprehensive database);

(b) Provide a commercial identity to the business which, depending on the applicable law of a State, may include legal personality and limited liability;

(c) Provide authority for the business to interact with business partners, the public and the State;

(d) Facilitate trade and interactions between business partners, the public and the State through the publication of the reliable, current and accessible information that business must provide in order to be registered; and

(e) Determine whether a business has fulfilled or continues to fulfil the conditions to operate in the commercial sector.

13. Effective and efficient performance of these functions will be examined in greater detail in A/CN.9/WG.I/WP.93/Add.1 and A/CN.9/WG.I/WP.93/Add.2.

E. Overview of standard registration procedures

14. Notwithstanding differences in the way business registries operate, efficient business registries perform similar steps when carrying out the registration of a new business or in recording the changes that may occur in respect of an existing business. A generic description of these steps may help to better understand the goals and impact of reforms aimed at streamlining the business registration process in a way that is more responsive to MSME needs. The following paragraphs intend to provide a non-exhaustive account of registration procedures, without reference to any specific legal form or size of business.

1. Business name

15. In a standard registration process, the entry point for entrepreneurs to business registries is often the support provided to them in choosing a unique name for the new business that they wish to establish. When registering, businesses are usually required to have a name which must be sufficiently distinguishable from other business names within that jurisdiction so that the business will be recognized and identifiable under that name.

16. Business registries usually assist entrepreneurs at this stage with a procedure that can be optional or mandatory, or they may provide business name searches as an information service. Registries may also offer a name reservation service prior to registering a new business entity, so that no other business can use that name. Such a name reservation service may be provided either as a separate procedure (again, which can be optional or mandatory), or as a service integrated into the overall business registration procedure.

2. Business entry

17. Business registries provide forms (either in paper or electronic form) and various types of guidance to entrepreneurs preparing the application and other necessary documents for registration.[9] Once the application is submitted, the registry performs a series of checks and control procedures to ensure that all the necessary information and documents are included in the application. In particular, a registry verifies the chosen business name as well as any requirements for registration that have been established in the State's applicable law, such as the legal capacity of the entrepreneur to operate the business. Some legal regimes may require the registry to perform simple control procedures (such as establishing that the name of the business is sufficiently unique), which means that if all of the basic legal and administrative requirements are met, the registry must accept the information as filed and record it. Other legal regimes may require more thorough verification of the information filed, such as ensuring that the business name does not violate any intellectual property requirement or that the rights of businesses with similar names are not infringed. All such information is archived by the registry, either before or after the registration process is complete.[10]

18. Payment of a registration fee (if any) must usually be made before the registration is complete, at which point the registry issues a certificate that confirms the registration and contains information about the business. Since the registered information must be disclosed to interested parties, registries make it publicly available through various means, including through publication on a website, or in publications such as the National Gazette or newspapers. Where the infrastructure permits, registries may offer, as an additional service, subscriptions to announcements of specific types of new registrations.

19. Registered information made available to the public can include basic information about the business, like the telephone number and address, or, depending on the requirements of applicable law, more sophisticated information on the business structure, such as who is authorized to sign on behalf of the business or who serves as the enterprise's legal representative. In some jurisdictions, the registered information is legally binding on third parties.

---

[9] Examples of registry forms could be attached in future to these materials as annexes.

[10] See Investment Climate (World Bank Group), Innovative Solutions for Business Entry Reforms: A Global Analysis, 2012, (2012), p. 9.

3. Registration with other public authorities

20. A new business must usually register with several government agencies, such as taxation and social services authorities, which often require the same information as that gathered by the business registry. The business registry normally provides to entrepreneurs information on the necessary requirements of other agencies and refers them to the relevant agencies. In States with more developed registration systems, businesses may be assigned a registration number that also functions as a unique identifier (see A/CN.9/WG.I/WP.93/Add.2, paras. 38-49) which can then be used in all of the interactions that the business has with government agencies, other businesses and banks. This greatly simplifies business start-up since it allows the business registry to more easily exchange information with the other public institutions involved in the process. In several States that have reformed their registration systems, business registries function as "one-stop shops" (see A/CN.9/WG.I/WP.93/Add.2, paras. 2-11) to support registration with other authorities. The services operated by such outlets may include providing any necessary licensing, or they may simply provide information on the procedures to obtain such licences and refer the entrepreneur to the relevant agency.

4. Life cycle of a business

21. In addition to the function performed in the registration of an enterprise, business registries typically support businesses throughout their life cycle. In many jurisdictions, entrepreneurs have a legal obligation to inform the registries of any changes occurring in the business, whether these are factual changes (for example, address or telephone number) or whether they pertain to the structure of the business (for example, a change in the legal form of business entity). Information exchange between business registries and different government agencies operating in the same jurisdiction also serves the same purpose. In some cases, registries publish annual accounts or financial statements of enterprises that are useful sources of information on businesses in that jurisdiction for investors, clients, potential creditors and government agencies.

5. Deregistration: removal of a business from the registry

22. Deregistration is the removal of a business from the register once the business, for whatever reason, has permanently ceased to operate, including in cases of merger, forced liquidation due to bankruptcy, or cases where applicable law permits the registrar to deregister the business for failing to fulfil certain legal requirements. The registry, upon receiving notification of a business dissolution, which in the case of bankruptcy may be made available through insolvency registries, may issue an announcement stating that creditors have a certain length of time during which to advance their claims. After that period has passed, the business is removed from the register. This procedure ensures that businesses do not dissolve without providing creditors the opportunity to protect their rights.

F. Organization of the registry

23. In establishing or reforming a business registry, States will have to decide in which form the business registry will be organized and operated. Different approaches can be taken,[11] the most common of which is based on oversight by the government. In such States, a government department or agency, staffed by civil servants, and usually established under the authority of a particular government department or ministry, operates the registration system. Another type of organization of business registries is one which is subject to oversight by the judiciary: in such contexts, the registration body might be a court or a judicial registry, but in any event, that function is usually specified in the applicable law governing the judiciary.

24. States may also decide to outsource some or all of the registry operations through a contractual or other legal arrangement that may involve public-private partnerships or the

[11] According to The International Business Registers' Report 2015, registries can be organized in the following ways: 82 per cent of business registries are state governed; 7 per cent are organized as public-private partnerships; 5 per cent are governed by the judiciary and 1 per cent are operated by privately owned companies.

private sector.[12] When registration is outsourced to the private sector, it remains a function of the government, but the day-to-day operation of the system is entrusted to privately-owned companies. In one jurisdiction, for instance, such an outsourcing was accomplished by way of appointing a private company, in accordance with the law, as the assistant registrar with full authority to run the registration function.[13] However, operating the registry through public-private partnerships or private sector companies does not yet appear to be as common as the operation of the registry by a government agency. One reason might be that arrangements involving contracting with the private sector to provide business registration services require careful consideration of several legal and policy issues, such as the responsibilities of the government and the private provider, the form of the arrangements, the allocation of risk, and dispute resolution.[14] States may also decide to form entities with separate legal personality, such as Chambers of Commerce, with the object of managing and developing the business registry,[15] or to establish by law registries as autonomous or quasi-autonomous agencies, which can have their own business accounts and operate in accordance with the applicable regulations governing public agencies. In one State, for example, the registry is a separate legal person that acts under the supervision of the Ministry of Justice,[16] while in another State the registry is an executive agency of a government department, which is administratively separate from that department, but does not have separate legal status.[17] However, not all of these forms can be implemented in every State. In deciding which form of organization to adopt, States will have to consider their specific domestic circumstances, evaluate the challenges and trade-offs of the various forms of organization and then determine which one best suits the State's priorities and its human, technological and financial resources.

25. When organizing a business registry, the question of how it should be structured is another key issue. This can be done in one of two ways. The first approach would be to adopt a centralized registration system with an electronic format. Such a registry allows for consistency in identifying and classifying businesses, which usually permits more efficient collection of data from business and avoids duplication of procedures. In order to function efficiently, an electronic central registry should be accessible by terminals in the various regions and/or cities of a State, where other registry offices are located. This central system should also be able to process and store information from the local registries, even if this information is provided to those registries in paper format. Centralized registry systems with such features will allow equality of access for users in remote locations, assuming they have Internet or other electronic access, who otherwise might be at a great disadvantage. In one State, for instance, registration is conducted at the local commercial courts which are connected via a network to the central registry.[18] Recent international experience of States that have undertaken a reform of the registration system shows that maintaining a central registry (in electronic format) is the most common approach.

26. When the establishment of an electronic central registry is not possible, States turn to a decentralized structure where registries can also be organized as either autonomous or non-autonomous local offices. However, decentralization of the registration system may pose problems. In States where the registration process and its regulatory oversight is delegated to the local level, confusion can arise if each locality follows its own approach rather than adhering to a central vision. In States with a federal system that requires

[12] See European Commerce Registers' Forum, International Business Registers Report, 2014, p. 15.

[13] For instance, Gibraltar, cited in Investment Climate (World Bank Group), Outsourcing of Business Registration Activities, Lessons from Experience, 2010, p. 55 ff.

[14] The Working Group may wish to consider whether further details on the implications of operating the registry by way of private-public partnership should be included in a future annex to this Working Paper.

[15] See Luxembourg, supra footnote 13, p. 52 ff. In Luxembourg, the State, the Chamber of Commerce and the Chamber of Crafts formed an economic interest grouping, i.e. an entity with separate legal personality, with the object of managing and developing the business registry.

[16] See Latvia; for further reference see also A. Lewin, L. Klapper, B. Lanvin, D. Satola, S. Sirtaine, R. Symonds, Implementing Electronic Business Registry (e-BR) Services, Recommendations for policy makers based on the experience of the EU Accession Countries, 2007, p. 44.

[17] See the United Kingdom of Great Britain and Northern Ireland; for further reference see also Lewin and others, cited above, p. 44.

[18] See Austria; for further reference see also Lewin and others, cited above, p. 46.

companies to register in the locality where they regularly conduct their business, companies may have to undertake the cumbersome process of registering in every locality where they would like to open an office.[19] While it is possible to imagine the physical integration of decentralized registries, the goals of efficiency, accessibility and transparency in the registration system are more fully achieved through consolidation and centralization of an electronic-form registry.

G. International cooperation among business registries

27. The internationalization of businesses of all sizes creates an increasing demand for access to information on companies operating outside their national borders. Making the exchange of such information across borders as simple and fast as possible is of key importance in order to ensure the traceability of companies, the transparency of their operations and to create a more business-friendly environment. However, official information on registered businesses is not always readily available on a cross-border basis and business clients and other interested parties must search the register on a State-by-State basis when in need of information. This can result in a time-consuming and expensive effort that many interested users of the business registry may not be able to undertake due to travel distances, high costs and other potential obstacles.

28. States are increasingly aware of the importance of improving the cross-border exchange of data between registries; sustained progress in information and communication technology (ICT) now allows this aspect to be addressed. Accordingly, States implementing reforms to streamline their business registration system may wish to consider adopting solutions that will, in future, facilitate such information exchanges between registries from different jurisdictions and to consult with States that have already implemented approaches that allow for such interoperability (see A/CN.9/WG.I/WP.93/Add.2, paras. 55-58).

H. Preliminary considerations on the use of information technology and electronic services

29. The use of modern technology in business registration procedures is becoming a widespread practice in many States and is often part of larger programmes to establish e-government solutions. Such solutions are considered particularly well-suited to promote better governance and transparency, as well as to improve service performance and to eliminate bottlenecks in the service delivery process. Automation of business registration processes can bring about several benefits: it reduces the time and cost required for business registration; it improves access for smaller firms that operate at a distance from the registrar's offices (in many States entrepreneurs must still go to the capital city to register); and it permits the handling of increasing demands for company information from other government authorities and the consequent need for government databases to share information. Automation also provides revenue opportunities from other businesses and financial institutions that seek company information to inform their risk analysis of potential trading counterparties and borrowers.

30. Introducing ICT-based registration processes, however, often requires an in-depth re-engineering of the way the service is delivered, which may involve several core aspects of the State's apparatus in addition to their level of technological infrastructure, including: financial capability, organization and human resources capacity, legislative framework and institutional setting. Therefore, States launching a reform process aiming at the automatization of business registries would be advised to carry out a careful assessment of the various issues outlined above in order to identify those areas where reforms are needed and to adopt those technology solutions that are most appropriate to their current needs and capabilities.

[19] See supra footnote 2, p. 11.

I. Drafting considerations

31. States implementing the guidance contained in these materials should consider whether to place the various principles reflected in the commentary (and any recommendations that the Working Group may agree to include) in a law, in a subordinate regulation, in administrative guidelines or in more than one of these texts. This matter would be for States to decide in accordance with their own legislative drafting conventions.

I. Establishing the business registry

32. Streamlining business registration in order to meet the key objective of making the registration process simpler, time and cost efficient and user friendly (both for registrants and stakeholders searching the registry) usually requires undertaking reforms that address the State's legal and institutional framework. It may also be necessary to reform the business processes that support the registration system. Sometimes reforms are needed in all of these areas (see also para. 30 above). As already noted, the approach taken in these reforms may vary considerably among States as the design and features of a registration system are influenced by the State's level of development, priorities and legal framework. There are, however, several common issues that States should consider and several similar recommended steps for reform regardless of jurisdictional differences that may exist. These issues are examined in the sections below.

A. Foundations of the business registry

33. States should set the foundations of a business registry either by way of law or regulation. The opening provisions of such law or regulation will provide for the establishment of the registry and set out explicitly that the purpose of the registry is to receive, store and make available to the public relevant information relating to registered business entities. The applicable law in each State will determine which business entities must be registered, but it should be noted that these materials identify business registration as the key means by which businesses of all sizes, including MSMEs participate effectively in the legally regulated economic milieu. Subject also to the legal system of the State, whether influenced by particular legal traditions, or other policy considerations, States may establish that the information deposited in the registry has legal effect and ensure the protection of third parties in the framework of the mandatory provisions of private law. This means that the information can be relied upon by users in the form in which it is deposited in the registry. When States opt for a business registration system in which the registered information is considered to have such legal effect, the law or the regulation should establish the principle that the information stored in the business registry is original and legally valid.

B. Appointment of the registrar

34. The law or the regulation established by the State should identify, either directly or by reference to the relevant law, the authority that is empowered to appoint a natural or legal person as the registrar, to determine the registrar's duties, and generally to supervise the registrar in the performance of those duties. To ensure flexibility in the administration of the registry, the term "registrar" should be understood as referring to a natural or legal person, and that the term also includes a group of persons appointed to perform the registrar's duties under the registrar's supervision.

C. Functions of the registry

35. The opening provisions of the law or the regulation should also include a provision that lists the various functions of the registry, with cross references to the relevant provisions of the law or the regulation in which those functions are addressed in detail. The advantage of this approach is clarity and transparency as to the nature and scope of the issues that are dealt with in detail later in the law or regulation. The possible disadvantage is that the list

may not be comprehensive or may be read as implying unintended limitations on the detailed provisions of the law or regulation to which cross reference is made. Accordingly, implementation of this approach requires special care to avoid any omissions or inconsistencies.

D. Implementation considerations[20]

1. The reform catalysts

36. Business registration reform is a multifaceted reform process which addresses various aspects of the State apparatus; its implementation requires the participation of a broad range of stakeholders and a thorough understanding of the State's legal and economic conditions, as well as of the practical needs of the registry personnel and the intended users of the registry. To be successful, the reform must be driven by the need to improve private sector development and, for this reason, it is advisable that the reform be part of a larger private sector development or public sector modernization programme.[21] It is thus essential to gain an understanding of the importance of business registration in relation to other business environment challenges and of its relationship to other potential reforms. Part of this analysis will require, as a crucial step, ensuring that domestic circumstances are amenable to a business reform programme, that incentives for such a reform exist and that there is support in the government and in the private sector prior to embarking on any reform effort.

(a) Relevance of a reform advocate

37. As demonstrated by the example of several States, support or even leadership from the highest levels of government is of key importance for the success of the reform process. The engagement of relevant government ministries and political leadership in the reform facilitates the achievement of consensus on the steps required. This can be particularly important to facilitate access to financial resources, to make and implement decisions or when it is necessary to move business registry functions from one branch of government to another or to outsource them.[22]

(b) The reform committee

38. In order to oversee the day-to-day progress of the reform and to manage difficulties as they may arise, it is advisable that a steering committee be established to assist the State representative or body leading the reform. In addition to experts with technological, legal and administrative expertise, this committee should be composed of representatives of the public and private sector and should include a wide range of stakeholders, including those who can represent the perspectives of intended users. It may not always be necessary to create such a committee, since it may be possible to use existing mechanisms; in any event, a proliferation of committees is to be avoided, as their overall impact will be weakened.[23]

39. Experience indicates that reform committees should have clearly defined functions and accountability; it is advisable that their initial setup be small and grow progressively as momentum and stakeholder support increase. Although linked to the high level government body which is spearheading and advocating for the reform, the committee should operate transparently and independently from the executive branch. In certain jurisdictions, regulatory reform bodies have later been transformed into more permanent institutions that drive ongoing work on regulatory governance and regulatory impact analysis.

40. The reform committee must nurture the reform process and consider how to address concerns raised in respect of it.[24] Concerns could include those arising from bureaucratic

[21] See A. Mikhnev, Building the capacity for business registration reform, 2005, p. 16.

[22] See Investment Climate, (World Bank Group) Reforming Business Registration: A Toolkit for the practitioners, 2013, p. 23.

[23] See World Bank Group, Small and Medium Enterprise Department, Reforming Business Registration Regulatory Procedures at the National Level, A Reform Toolkit for Project Teams, 2006, p. 39.

[24] See supra footnote 22, p. 25.

inertia, or fears that registry employees may lose their jobs if their ICT skills are weak or if technology replaces human capital. Thus, it is likely to be important for the body overseeing the reform to be able to consider diverse interests and fully inform potential beneficiaries and political supporters.

(c) The project team

41. In collaboration with the reform committee, it is advisable that a project team be assigned the task of designing a reform programme tailored to country circumstances and providing technical expertise to implement the reforms. A successful reform will require a team of international and local specialists, with expertise and experience in business registration reform, in legal and institutional reform, and in a variety of ICT matters (for example, software design, hardware, database and Web specialists).

(d) Awareness-raising strategies

42. States embarking on a reform process should consider appropriate communication strategies aimed at familiarizing business entities and other potential registry users with the operation of the registry and of the legal and economic significance of business registration. Effective communication may also be expected to encourage the development of new enterprises and the registration of existing unregistered businesses, as well as providing signals to potential investors about the government's efforts towards improvement of the business environment. Awareness-raising strategies should commence early in the reform process and should be maintained throughout it, including after the enactment of the new business registry system. In coordination with the reform committee, the project team should determine which cost-effective media can best be used: these can include private-public dialogues, press conferences, seminars and workshops, television and radio programmes, newspapers, online and print advertisements, and preparing detailed instructions on submitting registration documentation and conducting searches.[25] In order to raise the awareness of MSMEs of the reforms to the business registry system, it may be advisable to consider communications strategies tailored specifically to that audience (see, for example, the "Communication" section of A/CN.9/WG.I/WP.92).

2. Phased reform process

43. The duration of a reform process can vary considerably, depending on the types of reform implemented and on other circumstances relevant to the particular economy. States may thus wish to consider a phased implementation of the reform. Lessons learned from experience in various jurisdictions demonstrate, for instance, that in countries with a large number of unregistered businesses, a reform process that adopts a "think small" approach at the outset of the reform process, might be more effective than a reform with a broader focus, which could be introduced at a later stage.[26] For example, if the main objective is to promote the registration of MSMEs, simple solutions addressing the needs of MSMEs operating at the local level may be more successful than introducing sophisticated automated systems that require high-level technological infrastructures, changes in the legal and institutional framework and that may be more appropriate to larger businesses or businesses operating in the international market. Even when the reform is carried out in more developed jurisdictions, it may be advisable to "start small" and pilot the reforms at a local level (for example, in a district or the capital) before extending them state-wide. Success in a pilot stage can have a strong demonstration effect, and is likely to build support for continued reform.[27]

3. Authority responsible for the registry

44. It will be necessary at an early stage to determine whether the registry is to be operated by a State entity, such as governmental agency or the judicial system, or whether it will be operated in partnership with a private sector firm with demonstrated technical experience and a proven record of financial accountability (see para. 24 above). However, while the day-to-day operation of the registry may be delegated to a private sector firm, the enacting

[25] Ibid., pp. 26-27.
[26] See supra footnote 10, p. 26.
[27] See supra footnote 23, p. 45.

State should always retain the responsibility of ensuring that the registry is operated in accordance with the applicable law or regulation. In addition, for the purposes of establishing public trust in the business registry and preventing the unauthorized commercialization or fraudulent use of information in the registry record, the enacting State should retain ownership of the registry record and, when necessary, the registry infrastructure (see para. 51 below).

E. Registry terms and conditions of use

45. The rules relating to access to business registry services are typically set out either in the applicable law or regulation, or both. They may also be addressed in the "terms and conditions of use" established by the registry in standard form agreements entered into with registry users. For example, the terms and conditions of access may address user concerns regarding the security and confidentiality of their financial and other data or the risk of changes being made to registration information without the authority of the registrant.

46. As noted in paragraphs 15-22 above, some registries may provide additional services, including the following: (a) assisting the registrant in searching an appropriate name for the business and offering a name reservation service pending the finalizations of registration formalities; (b) offering users a subscription service for announcements of certain kinds of business registrations; (c) preparing reports relating to the operation of the business registry that may provide registry designers, policymakers and academic researchers with useful data (for example, on the volume of registrations and searches, operating costs, or registration and search fees collected over a given period).[28]

F. Electronic or paper-based registry

47. An important aspect to consider when streamlining a business registration system is the form in which the application for registration should be filed and in which information contained in the registry should be stored and searchable. Paper-based registration requires sending the documents (usually completed in handwritten form) by mail or delivering them by hand to the registry for manual processing. Hand delivery and manual processing are not unusual in developing States where registration offices are often located in municipal areas which may not be easily reachable for many entrepreneurs, including MSMEs, in rural areas.[29] In addition, any copies of the documents required must usually also be provided on paper. The labour-intensive nature of this procedure normally results in a time-consuming and expensive process (for example, it may require more than one visit to the business registry), both for the registries and for the users, and it may easily lead to data entry errors. Furthermore, paper-based systems require considerable storage space as the documents with the registered information must be stored as hard copies. Finally, business registrations and search requests transmitted by paper, fax or telephone also give rise to delays, since registrants and searchers must wait until registry staff manually carry out the business registration or search and certify the registration or report the results.

48. In comparison, ICT-supported registration systems allow for improved efficiency of the registry and for more user-friendly services. This approach requires, at a minimum, that the information provided by the registrant be stored in electronic form in a computer database; the most advanced electronic registration systems, however, permit the direct electronic submission of business registration applications and relevant documents as well as of search requests by the users over the Internet or via direct networking systems as an alternative to paper-based submissions. The adoption of such systems enhances data integrity, information security, registration system transparency, and verification of business compliance, as well as permitting the avoidance of unnecessary or redundant information storage. Furthermore, when electronic submission of applications is allowed, business registries can produce standard forms that are easier to understand and therefore easier to complete correctly. Although the use of ICT solutions can carry with them risks of bugs and

[28] See, for instance, the Report of the Australian Business Registrar, 2013-2014, available at: abr.gov.au.

[29] See A/CN.9/WG.I/WP.85, para. 43.

errors, electronic systems do more to reduce those risks by providing automated error checks and other appropriate solutions. ICT is also instrumental in the development of integrated registration systems and the implementation of unique identification numbers (see A/CN.9/WG.I/WP.93/Add.2, paras. 38-49).

49. In addition to these features, which result in a more streamlined process and user-friendly services, electronic business registration and searching also offer the following advantages:

(a) A very significant reduction in the time required to perform the various registration steps, and consequently in the time required before successful registration of a business, as well as in the day-to-day cost of operating the registry;

(b) Reduced opportunity for fraudulent or corrupt conduct on the part of registry staff;

(c) A reduction in the potential liability of the registry to users who otherwise might suffer loss as a result of the failure of registry staff to enter registration information or search criteria at all or to enter such information accurately; and

(d) When direct registration and searches are allowed, the possibility for the user to access registration and search services outside of normal business hours.

50. If the State opts to implement an electronic registration system, the registry should be designed to permit registry users to submit registrations and conduct searches from any private computer, as well as from computer facilities made available to the public at branch offices of the registry or other locations. To further facilitate access to business registry services, the registry conditions of use may permit intermediaries (for instance, lawyers, notaries or private sector third-party service providers) to carry out registrations and searches on behalf of their clients when the applicable law permits or requires the involvement of such intermediaries. If the technological infrastructure of the State permits, or at a later stage of the reform, States should also consider adopting systems that will allow registration to be carried out through the use of mobile technology. This solution may be particularly appropriate for MSMEs in developing economies where mobile services are often easier to access than ICT services.

51. When the business registry record is computerized, the hardware and software specifications should be robust and should employ features that minimize the risk of data corruption, technical error and security breaches. Even in a paper-based registry, measures should be taken to ensure the security and integrity of the registry record, but this is more efficiently and easily accomplished if the registry record is electronic. In addition to database control programs, software will also need to be developed to manage user communications, user accounts, payment of any required fees, financial accounting, computer-to-computer communication and the gathering of statistical data. When the State technological infrastructure is not sufficiently advanced to allow these features to be implemented, it is nevertheless important that the software put in place be flexible enough to accommodate additional and more sophisticated features in the future.

52. Implementing an online registration system will require defining the technical standards of the online system, a careful evaluation of the hardware and software needs of the business registry to make those standards operational in the context of the national technological infrastructure, and deciding whether it is feasible to develop the necessary hardware and software in-house or whether it must be purchased from private suppliers. In making that determination, it will be key to investigate whether an off-the-shelf product is available that can easily be adapted to the needs of the State. If different suppliers are used for the hardware and the software, it is important that the software developer or provider is aware of the specifications for the hardware to be supplied, and vice versa.

53. Following more recent technological advances, one option States may want to consider is whether to rely on traditional software or to move to more sophisticated applications such as cloud computing, which is an Internet-based system and allows the delivery of different services, such as storing and processing of data, to an organization’s computers through the Internet, The use of cloud computing allows for considerable reduction in the resources needed to operate an ICT supported registration system, since the registry does not have to maintain its own ICT infrastructure. However, data and information

security can represent an issue when introducing such a system and it would be advisable for States to conduct a careful risk analysis before establishing a system exclusively based on cloud applications.[30]

54. Additional aspects that States may consider when adopting an ICT supported registry should include:

(a) Scalability of the ICT infrastructures, so that the system can handle an increasing volume of clientele over time as well as traffic peaks that may occasionally arise;

(b) Flexibility: as already noted (para. 51 above), the ICT infrastructure of the registry should be easily adaptable to new user and system requirements;

(c) Interoperability: the registry should be designed to allow (even at a later stage) integration with other automated systems, such as other governmental registries operating in the jurisdiction (see A/CN.9/WG.I/WP.93/Add.2, paras. 38-49) and online or mobile payment portals;

(d) Costs: the ICT infrastructure should be financially sustainable both in term of initial and operating costs (see also para. 37, A/CN.9/WG.I/WP.93/Add.2); and

(e) Intellectual property rights: in order to avoid risks deriving from adverse circumstances affecting the intellectual property rights owner, for example, if the owner ceases to operate or is prohibited from doing business with the government, the State should always either be granted ownership of the system or an unrestricted license to the source code (see also para. 44 above).[31]

55. One important issue that would likely arise when the online business registry is able to offer full-fledged services would be whether to abolish any paper-based submissions or whether to maintain both paper-based and online registration (see A/CN.9/WG.I/WP.93/Add.2, para. 20). In many jurisdictions, registries choose to have mixed solutions with a combination of electronic and paper documents or electronic and manual processing during case handling. This approach may result in considerable cost for the registries, since the two systems require different tools and procedures. However, if this option is chosen, States would be advised to establish rules to determine the order of priority between paper-based and electronic submissions. Paper applications will have to be processed in any case, so that the information included in a hard document can be transformed into data that can be processed electronically; this can be done by way of scanning the paper-based application. However, since even the most advanced systems struggle with handwritten forms, either the registry must impose strict requirements for handwriting on paper applications or it must carefully check that the scanned record correctly represents the application.[32]

[Note by the Secretariat on key principles of business registration

ADDENDUM

Contents

II. Core functions of a business registry

1. As previously noted, the core functions of business registries include the registration of new and existing businesses of all sizes; the maintenance and update of reliable and secure information on those businesses throughout their life cycle; and the provision of easy access to that information by public and private users of the registry. When establishing or streamlining a business registration system, States should consider several elements that will enable the registry to discharge these and other functions in a simple, time and cost efficient way, in keeping with the key objectives of an effective business registration system as outlined in paragraph 10 of A/CN.9/WG.I/WP.93. The following paragraphs discuss these elements and their implications.

A. Registering a business

1. Scope of examination by the registry

2. As has been observed in A/CN.9/WG.I/WP.93, the method through which a business is registered varies from State to State,[1] ranging from those that tend to regulate less and rely on the legal framework that governs business behaviour, to States that opt for ex ante screening of businesses before their registration is allowed.[2] In this regard, a jurisdiction aiming at reforming the registration system must first decide which approach it will take so as to determine the scope of the examination that will have to be carried out by the registry. The jurisdiction may thus choose to have a system where the registry only records facts or a system where the registry is required to perform legal verifications and decide whether the business meets the criteria to register.

3. Evidence shows that the approach taken in a jurisdiction may often be a result of the particular State's legal tradition. Jurisdictions opting for ex ante verification of legal requirements and authorization before businesses can register often have court-based registration systems in which the judiciary, notaries and lawyers perform a key role in the registration process.[3] Other States structure their business registration as a declaratory system, in which no ex ante approval is required before business start-up and where registration is an administrative process. In such declaratory systems, verification of an event's legal status is made after it has taken place, and registration is under the oversight of the Government, which can choose whether to operate the system directly or to adopt other arrangements (see para. 24 of A/CN.9/WG.I/WP.93).[4]

4. Both the approval and the declaratory system have their advantages and disadvantages. Approval systems are usually said to help prevent errors or omissions prior to registration. Notaries and/or lawyers and courts exercise a formal review and, when appropriate, also a substantive review of the pre-requirements for the registration of business. By contrast, declaratory systems are said to be easier to manage and better-suited to deter corruption by avoiding opportunities for official decisions to be made with a view towards personal gain; furthermore, they seem to have lower maintenance costs.

2. Legal forms of entity registered and requirements to form a new entity

5. Not only must States decide on the scope of examination that should be conducted by a business registry, they must also define which commercial entities are required to register under the applicable law. As noted in paragraph 12 of A/CN.9/WG.I/WP.93, one of the key objectives of business registration is to permit businesses of all sizes and legal forms to be visible in the marketplace and to operate in the commercial environment. This objective is of particular importance in assisting MSMEs to participate effectively in the economy, and States may wish to consider requiring or permitting businesses of all sizes and legal forms to register in an appropriate business registry, or creating a single business registry that is tailored to accommodate registration by a range of different sizes and different legal forms of business.

6. Laws requiring the registration of businesses vary greatly from State to State, but one common aspect is that they all require registration of a particular legal form of economic entity. The nature of the legal forms of economic entity that are required or permitted to register in a given jurisdiction is, of course, determined by the applicable law.[5] In some legal traditions, it is common to require registration of all businesses, including sole proprietorships, professionals, and government bodies, since they are all said to constitute

[5] See L. Klapper, R. Amit, M. F. Guillén, J. M. Quesada, Entrepreneurship and Firm Formation Across Countries, 2007, pages 6 ff.

an economic entity;[6] while in other legal traditions, only corporations and similar entities (with legal personality and limited liability) are required to register.[7] This approach can exclude businesses like partnerships and sole proprietorships from mandatory registration, but variations on these regimes also exist, and some jurisdictions permit voluntary registration for businesses that would not otherwise be required to register, for example, because they are not economic entities or because they are not engaged in business activities.[8]

7. In several jurisdictions, when entrepreneurs decide to establish and to register their business, they tend to choose the simplest legal form available to them in order to minimize the regulatory and financial burden, as well as the expense, required to establish the business. A sole proprietorship or similar type of business with low legal and regulatory requirements is thus often the most popular business form. Some jurisdictions require that even simple business forms such as these be registered, and some jurisdictions have carried out reforms to facilitate the registration process for sole proprietorships or for simplified new types of limited liability entities.[9]

(a) Registration requirements

8. As a general rule, businesses must meet certain requirements in order to be registered; those requirements are determined by the State based on its legal and economic framework. In addition, the registered information required may vary depending on the legal form of business being registered — i.e. sole proprietorships and simplified business entities may be required to submit relatively simple details in respect of their business, while businesses such as public and private limited liability companies will be required to provide more complex and detailed information. Although the requirements for registration of each legal form of business will vary according to the applicable law of the relevant jurisdiction, there are, however, some requirements that can be said to be common for all businesses in most States, both during the initial registration process and throughout the business life of the enterprise.[10]

9. General requirements for the registration of all legal forms of enterprise are likely to include the following:

(a) Payment of any required fees to the registry; and

(b) Providing information in respect of the business and its founders, such as:

(i) The name and address of the business;

(ii) The name(s) and address(es) of the person(s) registering the business; and

(iii) The legal form of business that is being registered.

10. Other information that may be required for registration, depending on the jurisdiction of the registry and the legal form of the business being registered, can include:

(a) The names and addresses of the board of directors;

(b) The rules governing the operation or management of the business; and

(c) Information relating to the capitalization of the business.

11. Once a business has been registered, in order for it to remain validly registered, certain information is typically required by the registry throughout the course of the business life of the entity. Information required in this regard usually includes:

(a) (i) Changes in the name, address or legal form of the business;

(ii) Changes in the name(s) and address(es) of the person(s) founding the business;

---

[6] See A/CN.9/825, para. 23.

[7] See supra footnote 5.

[8] Ibid.

[9] See A/CN.9/WG.I/WP.85, para. 51.

[10] It should be noted that information required for the registration of a simplified business entity is likely to be a less comprehensive list, and that this portion of the materials should be made consistent with what the Working Group agrees in respect of the simplified business entity.

(iii) The submission of financial information in respect of the business, depending on its legal form; and

(iv) Changes in any of the information that was initially required for the registration of the business;[11] and

(b) In some jurisdictions, information concerning insolvency proceedings, liquidation or mergers (see paras. 18-19 below) must also be registered.

12. Depending on the legal form of the business being registered, other details may be required in order to finalize the registration process. In some jurisdictions, proof of the share capital, the name of the chairperson, the identity of the person(s) or entity(ies) who may legally bind the business, information on the type of business engaged in by the entity, and agreements in respect of non-cash property constitute information that may also be required by registries in respect of certain legal forms of business.[12] In addition, in several jurisdictions, registration of shareholder details and any changes therein may be required; in a few cases, registration of shareholder details is carried out by a different authority.[13] In some other jurisdictions, it is now practice to register beneficial ownership details and changes in those details,[14] although the business registry is not always the authority entrusted with this task.[15] Transparency in the beneficial ownership of businesses can help prevent the misuse of corporate vehicles, including MSMEs, for illicit purposes.

13. The requirements enumerated above may be applicable to all businesses, regardless of their size. As previously noted, in order to facilitate MSME registration, States should consider including a range of possible legal forms in their business registry systems, and should adapt their registration requirements according to the level required by the complexity of each legal form. The goal should be for States to provide simplified registration procedures and only the minimum necessary requirements for MSMEs and simplified legal forms of business. The draft legislative text on simplified business entities that is currently being discussed by this Working Group will assist States in identifying such minimum necessary requirements (see A/CN.9/WG.I/WP.83, A/CN.9/WG.I/WP.86 and A/CN.9/WG.I/WP.89).

(b) Enforcement mechanisms

14. Requiring businesses to submit certain data is, however, not sufficient to ensure an efficient registration system. The State should have the ability to enforce proper compliance with initial and ongoing registration requirements. States with high quality registration systems usually possess enforcement mechanisms in respect of the information that the business is required to file throughout its life cycle as well as additional required reporting.[16] In some jurisdictions, for instance, law establishes sanctions on businesses that fail to submit timely or complete and accurate information (see also paras. 24-27 below).[17]

3. Registration of branches

15. Most States require the registration of national branches of a foreign company in order to permit those branches to operate in their jurisdiction and to ensure the protection of

[15] A "beneficial owner" is the natural person(s) who ultimately owns or controls a legal person or arrangement even when the ownership or control is exercised through a chain of ownership or by means of control other than direct control. These vehicles may include not only corporations, trusts, foundations, and limited partnerships, but also simplified business forms, and may involve the creation of a chain of cross-border company law vehicles created in order to conceal their ownership. See also, A/CN.9/825, paras. 47-55. The Working Group may wish to consider whether further details on this topic should be included in these materials, possibly as an annex.

domestic creditors, businesses and other interested parties that deal with those branches. Registration of a company branch might not appear to be immediately relevant for micro- and very small entrepreneurs, whose main concern is more likely to be to consolidate their business without exceeding their human and financial capacity. However, this issue is relevant for those slightly larger business entities that, being of a certain size and having progressed to a certain volume of business, look to expand beyond their local or domestic market. In addition, even micro- and very small businesses may be highly successful and may wish to expand their operations. For such businesses, establishing branches abroad may be both an attractive goal and a realistic option. Although it may seem to be a daunting prospect, in fact, when a business expands to another State, it may find that setting up a foreign branch is cheaper and requires fewer formalities than establishing a local subsidiary.[18]

16. There may be considerable differences among those jurisdictions that register foreign company branches in terms of what triggers the obligation of those companies to register their branches. Some approaches are based on a wide interpretation of the concept of foreign establishment, for example, those which include not only a branch, but also any establishments with a certain degree of permanence or recognizability, such as a place of business in the foreign State.[19] Other approaches define more precisely the elements that constitute a branch which needs to be registered. They may include the presence of some sort of management, the maintenance of an independent bank account, the relation between the branch and the parent company, or the requirement that the parent company has its main office registered abroad.[20] Not all States define the notion of branch in their legislation, or state under what circumstances a foreign establishment in the State should be registered: laws may simply refer to the existence of a foreign branch. In these cases, registries may fill the gap by issuing guidelines that clarify the conditions under which such a registration should be carried out.[21] When this occurs, the guidelines should not be seen as an attempt to legislate by providing their own definition of branch, but rather as a tool to explain the features required by a branch of a foreign business in order to be registered.

17. When simplifying or establishing their business registration system, States should consider enacting provisions governing the registration of branches of foreign companies. Those provisions should address, at minimum, issues such as timing of registration, disclosure requirements, information on the persons who can legally represent the branch and the language in which the registration documents should be submitted.[22]

4. Status of the business and deregistration

18. One important aspect that States should take into account when establishing a business registration system is whether the registry should also be required to record certain procedures that affect the status of the business, for example bankruptcy, merger, winding up, or liquidation. The approach to such changes in status appears to vary from State to State.

19. Evidence suggests that registering bankruptcy, mergers, winding-up and liquidation may be performed by some registries, although this is subject to considerable regional variation. For instance, in some more developed States, registries are often also entrusted with the registration of bankruptcy cases. In developing States or economies in transition, registries tend not to perform this function. In certain jurisdictions, registries are also given the task of registering mergers as well as the winding-up and liquidation of businesses.[23]

20. In addition, States should consider the role of the registry in deregistering a business. In most jurisdictions, deregistration of a business is included as one of the core functions of the registry. It appears to be less common, however, to entrust the registry with the decision whether or not a business should be deregistered.[24] In jurisdictions where this function is

[18] See K. E. Sørensen, Branches of companies in the EU: balancing the Eleventh Company Law Directive, national company law and the right of establishment, 2013, page 9.

[20] Ibid.
[21] Ibid., page 13.
[22] The Working Group may wish to consider whether further details on this topic should be included in a future annex to these materials.
[23] See supra footnote 13, pages 33 ff.
[24] Ibid. and see supra footnote 12, pages 40 ff.

included, statutory provisions determine the cause of the deregistration and the procedures to follow. In order to deregister a business, registries are generally required to have reasonable cause to believe that a registered enterprise has not carried out business or that it has not been in operation for a certain period of time. Such a situation may arise, for example, when a business has failed to submit its annual statutory filings within a certain period following the filing deadline. In several States, before commencing deregistration procedures, the registry must inform the business in writing of its intended deregistration and allow time for the business to reply. Only if the registry receives a reply that the business is no longer active or if no reply is received within the time prescribed by the law, will the business be struck from the registry. A common requirement for a deregistration to become effective is that notice of it be published (see also para. 34 below).[25]

B. Maintaining the information contained in the business registry

21. Maintaining high quality, current and reliable information is imperative for the business registry in order to make the information useful for the registry users and to establish users' confidence in business registry services. This applies not only to the information provided when applying to register a business, but also to the information that the entrepreneur submits during the lifetime of the business. Moreover, in several States, the information deposited in the registry, or part of that information, has third party effectiveness, that is by virtue of registration, all parties dealing with a business are deemed to have had notice of such information. In such States the applicable law or regulation usually prescribes that the information provided to the registry must be accurate and correct. However, even in those States where the registry does not validate the veracity of the information provided by the registrant, it is important that the information meets certain requirements in the way it is submitted to the registry and then made available to searchers. For these reasons, States should devise provisions that allow the registry to operate according to principles of transparency and efficiency in the way information is collected, maintained and released.

1. General considerations concerning the registration of the business and any subsequent changes

22. As mentioned in paragraphs 2 to 3 above, a series of checks and control procedures are required to ensure that the necessary information and documentation is provided in order to register the business; however, the extent of such controls vary according to the jurisdiction. In those legal regimes where the registry performs simple control procedures, if all the basic legal and administrative requirements established by the domestic legal and regulatory framework are met, the registry must accept the information as filed and record it. When the legal regime requires a more thorough verification of the information filed, registries may have to check whether any mandatory provisions of the law are infringed by the content of the application and documentation submitted, or any changes thereto. Whatever approach is chosen, States should define in their legislative or regulatory framework which requirements the information and documentation to be submitted to the registry should meet. In certain jurisdictions, the registrar is given the authority to impose requirements as to the form, authentication and manner of delivery of documents to be submitted to the registry.[26] In keeping with the discussion of Working Group I on the legal questions surrounding the simplification of incorporation,[27] it would be advisable, when registration concerns an MSME, that such requirements should be kept at a minimum in order to facilitate the registration process of MSMEs. This will reduce administrative hurdles and help in promoting business registration among such businesses.

23. Registration of MSMEs would also be facilitated if the registry is granted the power to accept and register documents that do not fully comply with the requirements for proper submission and to rectify clerical mistakes in order to bring the entry in the register into

[25] See Lexis PSL Corporate, Striking off and dissolution — overview, www.lexisnexis.com/uk/lexispsl/corporate/document/391387/55YB-2GD1-F186-H4MP-00000-00/Strikingoffanddissolutionoverview. See also T. F. MacLaren, in Eckstrom's Licensing in Foreign and Domestic Operations: Joint Ventures, 2015 [as it appears in Westlaw], page 30.

[26] See, for instance, Section 1068, UK Companies Act 2006.

[27] See A/CN.9/WG.I/WP.83, A/CN.9/WG.I/WP.86 and A/CN.9/WG.I/WP.89.

conformity with the documents submitted by the registrant. This will avoid imposing the potentially costly and time-consuming burden of requiring the registrant to resubmit documents. When the registry is entrusted with these responsibilities, however, the law or the regulation should also determine under which conditions the responsibilities should be discharged. When the information provided is not sufficient to comply with the requirements for registration, the registry should be granted the authority to request from the business additional information in order to finalize the registration process.

24. States should provide that registries may reject the registration of an application if it does not meet the requirements prescribed by the legislative and/or regulatory framework for registration. This approach is implemented in several jurisdictions regardless of their legal tradition. In order to prevent any arbitrary use of such power, however, the registry must provide, in writing, a notice of the rejection of an application and the reasons for which it was rejected, and the registrant must be allowed time to appeal against that decision.

25. In cases where the application is submitted in paper form and the reason for its rejection is that the application was incomplete or illegible, there might be some delay between the time of receipt of the application by the registry and the time of communication of its rejection, and the reasons therefor, to the registrant. In a registry system that allows registrants to electronically submit applications and the relevant documents directly to the registry, the system should be designed, when permitted by the State's technological infrastructure, so as to automatically reject the submission of incomplete or illegible applications and to display the reasons for the rejection on the registrant's screen.

26. In order to ensure that reliable information is always submitted to the registry, States should also adopt provisions that establish the responsibility of the registrant for any misleading, false or deceptive information that the registrant has knowingly, or recklessly, submitted to the registry. Adoption of similar provisions might be particularly relevant in States that chose business registration systems in which the registry only records facts and does not perform any ex ante legal verification.

27. Once the information is collected and properly recorded, it is imperative that it be kept current in order to be of value to its users. It would thus be advisable for States to have in place provisions that enable the registration system to achieve this purpose. Evidence shows that different methods can be adopted. One approach (also see para. 78 below) is for the State to require that the business re-register at regular intervals. Another similar approach is to require the business to file at regular intervals, for example once a year, an updating declaration stating that certain core information contained in the register concerning the business is accurate or, as applicable, stating what changes should be made. Although these approaches may be valuable as a means of identifying dormant companies that may be struck off the registry and may not necessarily be burdensome for larger business with sufficient human resources, they could be quite demanding for less generously staffed MSMEs, in particular if there is a cost associated with making such submissions. A third approach, which seems preferable as it better takes into account the needs of MSMEs, is for the State to update the information in the registry only when a change in any piece of the registered information occurs. The risk of this approach, which is largely dependent on the registrant complying with the rules, may be that the filing of changes is delayed or does not occur. To prevent this, States could adopt a system pursuant to which regular prompts are sent (electronically, in the best case scenario) to businesses to request updated information. Such an approach might be preferable for dealing with less experienced MSMEs than the alternative, through which States could adopt provisions declaring the liability of the registrant on conviction to a fine if the change is not filed within the time prescribed by the law or the regulation. In addition, enhancing the interconnectivity and the exchange of information between business registries and other public registries would help mitigate any potential deterioration of the information collected in the business registry.

28. Regardless of the approach chosen to maintain an updated information record, it would be advisable that the formalities for updating MSME records be as simple as possible. This could involve extending the period for such businesses to declare a change; harmonizing the information needed when the same information is required in various declarations; or exempting MSMEs from certain obligations in specific cases.

2. Period of effectiveness of registration

29. States may adopt one of two approaches in terms of determining the period of effectiveness of the registration of a business. Under the first approach, the registration of the business is subject to a maximum period of duration established by law. It follows that unless the registration is renewed, the registration of the business will expire on the date stated in the certificate of registration or upon the termination of the business.[28] As seen in paragraph 27 above, while this approach provides certainty as to the existence of the business and the reliability of the information provided, it however imposes a burden on the registrant to regularly re-register or risk termination of the business. This danger could be particularly onerous for MSMEs, that often operate with limited staff and knowledge of the applicable rules. In addition, if more information or documentation is required and not furnished by the applicant, renewal of the registration could also be refused, thus further threatening the existence of the business.

30. Under the second approach, no maximum period of validity is established for the registered business and the registration is effective until the business ceases to operate and is deregistered. While this approach may provide less certainty in terms of the currency of the information in the registry, it simplifies the intake process and both encourages and reduces the burden of registration on businesses, in particular on MSMEs.

3. Time of effectiveness of registration and of changes to the registered information

31. In the interests of transparency and predictability of a business registration system, States should determine the time when the registration of a business or any later change to the information recorded is effective. It would be advisable for the registration to become effective when the information contained in the application or in the notification of changes is entered into the registry record rather than when the information is received by the registry. In addition, the effective time of registration of an application or a later change should be indicated in the registry record relating to the relevant business entity.

32. As mentioned in paragraphs 29 to 30 of A/CN.9/WG.I/WP.93, States are advised to adopt registries supported by the use of ICT. If the registry is designed to enable users to electronically submit information, whether an application or a change, without the intervention of registry staff and to use online payment methods for the registration, the registry software should ensure that the information becomes effective immediately or nearly immediately after it is transmitted. As a result, any delay between the electronic transmission of the information and the effective time of registration will be eliminated.

33. In registry systems that permit or require registration information to be submitted to the registry using a paper form, registry staff must enter the information on the paper form into the registry record on behalf of registrants. In these systems, there will inevitably be some delay between the time when the paper form is received in the registry office and the time when the information set out on the form is entered into the registry record. In these cases, the domestic legislative or regulatory framework should provide that the registry must enter the information received into the registry record as soon as practicable and possibly set a deadline by which the application or the changes should be registered. In a hybrid registry system which permits information to be submitted in both paper and electronic form, registrants who elect to use the paper form should be alerted that this method may result in some delay in the time of effectiveness of registration.

4. Time of effectiveness of business deregistration

34. Transparency is equally required with regard to the deregistration of a business. The time of effectiveness of the cancellation should be established in a law or regulation, which should distinguish between deregistration on registrar's initiative and deregistration at the request of the registrant. While the requirements of these two types would vary, in both cases

[28] It should be noted that the general law of the enacting State for calculating time periods will apply to the calculation of the period of effectiveness, unless the applicable law or regulation provides otherwise. For example, if the general law of the enacting State provides that, if the applicable period is expressed in whole years from the day of registration, the year runs from the beginning of that day.

it would be advisable that the notice of deregistration issued by the registry states the date of effect of the deregistration, in addition to the reasons therefor. Moreover, in cases where deregistration is decided by the registrar, the registrant should be given sufficient time to oppose that decision. As in the case of the application for registration or a subsequent change, the effective date and time of registration of a notice of deregistration should be indicated on the registry record relating to that deregistration. If the notice of the deregistration is submitted electronically, the time between receipt of that notice and amendment of the information on the registry record will be very short. If notice of deregistration is submitted in paper form, there will be a greater time lag.

5. Preservation of records

35. Those States with paper-based or hybrid registration systems, should adopt rules that specify a minimum period of time for which documents submitted in hard copy should be kept in the registry. The length of the preservation period would be influenced by the way the registry operates, i.e. if it is an ICT supported registry or whether the system is paper-based or is a hybrid system.

36. In the case of ICT supported registries, original documents submitted in hard copies could be kept for a short period (for example, not over 5 years after they were received by the registry) providing that the information contained in such documents has been recorded in the registry.

37. In the case of a paper-based registry which cannot convert the documents received into an electronic form or other non-paper forms (for instance, microfilm) that allow transmission, storage, reading, and printing of the documents, the records will have to be preserved until the business is deregistered and for an appropriate period of time after deregistration has occurred. It will be for the State to decide the length of such an appropriate period. States may also decide to apply their general rules on preservation of public documents.

6. Preserving the integrity and security of the registry record

38. As already noted, a registry can be organized in several ways, including delegating the day-to-day operation of the registry to a private entity. However, for the purposes of establishing public trust in the registry, the State should always retain the responsibility of monitoring the operation of the registry, the ownership of the registry record and, if necessary, of the registry infrastructure (see para. 44 of A/CN.9/WG.I/WP.93).

39. Other steps to ensure the integrity and security of the registry record include: (a) requiring the registry to request and maintain the identity of the registrant; (b) obligating the registry to promptly notify the applicant business about the registration; and (c) eliminating any discretion on the part of registry staff to reject users' access to registry services. With regard to (b), however, it can be noted that, in order to improve the efficiency of the business registries, some States have introduced "silence is consent" rules pursuant to which when a business does not receive a decision on its registration application within a certain time limit (established by law or regulation), it is considered to be registered.[29]

40. States may also consider adopting additional measures in order to ensure that the integrity of the registry record is preserved. A short account is provided in the paragraphs below.

41. First, by way of law or regulation, it should be established that registry staff may not alter or remove registered information, except as specified in the law or the regulation and that any change can be made only in accordance with the law or the regulation. As seen in paragraph 23 above, however, to ensure the smooth functioning of the registry, in particular when registrants submit registration information using paper forms, it would be advisable that the registry be authorized to correct clerical errors made in the forms submitted. This would, of course, include any errors made by registry staff in entering the registration information on the paper forms into the registry record. If this approach is adopted, notice of the correction should promptly be sent to the registrant (and a notification of the nature of the correction and the date it was effected should be added to the public registry record

[29] See A/CN.9/WG.I/WP.85, para. 50.

linked to the relevant business). Alternatively, the State could require the registry to notify the registrant of its error and that person could then submit an amendment free of charge.

42. Second, to protect the registry record against the risk of physical damage or destruction, the State should maintain back-up copies of the registry record. Any rules governing the security of other public records in the enacting State might be applicable in this context.

43. Third, the potential for registry staff corruption should be minimized by: (a) designing the registry system to make it impossible for registry staff to alter the time and date of registration or any registered information entered by a registrant; (b) instituting financial controls that strictly monitor staff access to cash payments of fees and to the financial information submitted by clients who use other modes of payment; and (c) designing the registry infrastructure so as to ensure that it can preserve the information and the documents concerning the cancelled business for as long as prescribed by the law or the regulation.

44. Fourth, it should be made clear to registry staff and registry users, inter alia, that registry staff are not allowed to give legal advice on the legal requirements for effective registration and searching, or on the legal effects of registrations and searches, nor should staff make recommendations on which intermediary (if any) the entrepreneur should choose to perform its registration or any amendments thereto. However, registry staff should be able to give practical advice with respect to the registration and search processes. In States that opt for a judiciary-based registry system, this measure should of course not be applicable to the judges, notaries and lawyers entrusted with the registration procedures.

45. Finally, as already discussed, the registry should be designed, if possible, to enable registrants and searchers to directly submit information for registration and search requests electronically as an alternative to using paper forms and having registry staff enter the registration or conduct a search on their behalf. Under this approach, users bear the sole responsibility for any errors or omissions they make in the registration or search process and carry the burden of making the necessary corrections or amendments. Consequently, the potential for corruption or misconduct on the part of registry staff is greatly minimized, since their duties are essentially limited to managing and facilitating electronic access by users, processing fees, overseeing the operation and maintenance of the registry system and gathering statistical data.

7. Liability of the registry

46. The State, by way of law or regulation, should provide for the allocation of responsibility for loss or damage caused by an error or negligence in the administration or operation of the registration and searching system.[30]

47. As noted above, the registrants or users bear responsibility for any errors or omissions in the information contained in an application or search request they submit to the registry, and carry the burden of making the necessary corrections or amendments. If applications and search requests are directly submitted by users electronically without the intervention of registry staff, the potential liability of the enacting State should, therefore, be limited to system malfunction, since any other error would be attributable to the users. However, if application forms or search requests are submitted using a paper form, the State will need to address the existence or the extent of its potential liability for the refusal or failure of the registry to correctly enter information contained in the application into the registry record or to correctly carry out search requests.

48. While it should be made clear that registry staff are not allowed to give legal advice (subject to the type of registration system chosen), the State will also need to address whether and to what extent it should be liable if registry staff nonetheless provide incorrect or misleading information on the requirements for effective registration and searching or on the legal effects of registration.

---

[30] In Norway, for instance, the registrar is liable if it supplies incorrect information in transcripts, certificates or public notices, which causes damage to persons who relied on the incorrect information. See The Business Enterprise Registration Act (Act of 15 June 2001, No. 59 and Act of 19 December 2003, No. 120), § 10-3, available at www.brreg.no.

49. If States accept legal responsibility for loss or damage caused by system malfunction or error or misconduct by registry staff, they may consider whether to allocate part of the registration and search fees collected by the registry to a compensation fund to cover possible claims, or whether the claims should be paid out of general revenue. States might also decide to set a maximum limit on the monetary compensation payable in respect of each claim.

8. Confidentiality

50. To maintain the integrity and reputation of the registry as a trusted collector of information that has public relevance and, in some States, legal effect, and while access to the registries should be granted to all interested entities and to the public at large (see section C below), access to sensitive data should be controlled to avoid any breach of confidentiality. States should thus put in place proper disclosure procedures. They can do so by adopting provisions that list which information is not available for public disclosure or they can follow the opposite approach and adopt provisions that list the information that is publicly accessible and at the same time state that information that is not listed cannot be disclosed.

9. Language of the documents to be submitted

51. When entering information, one important issue for the State to consider is the language in which the required documents or electronic records must be submitted. Language can be a barrier and can cause delays in registration if documents need to be translated into the language of the registry.[31] On the other hand, a business can be registered only if the content of the documents or electronic records can be verified by the registry staff. For this reason, it is not common for jurisdictions to allow documents or electronic records to be submitted in a foreign language. States, however, can consider whether such documents can be accepted. There are some States which allow all or some documents to be submitted in a foreign language. Should States opt for this approach, it would be advisable to establish that the documents or electronic records must be accompanied by a sworn-in court interpreter's translation into the registry's national language(s) or any other form of authenticating the documents or electronic records that is used in the State.[32]

52. Another issue is whether the documents submitted to the registry include information, such as names and addresses, which uses a set of characters different from the characters used in the language of the registry. In this case, the State should provide guidance on how the characters are to be adjusted or transliterated to conform to the language of the registry.

53. A number of States have more than one official language. In these States, registration systems are usually designed to accommodate registration in all official languages. To ensure that information on businesses operating in the State is available to all registrants and searchers, different approaches can be adopted. States may require parties to make their registration in all official languages; or they may permit filing in one language only, but then require the registry to prepare and register duplicate copies in all official languages. Both these approaches, however, may be quite costly and invite error. A more efficient way of dealing with multiple official languages, any one of which may be used to register, would be to allow registrants to carry out registration in only one of those official languages. Such a language could be that of the province or the region where the registry office or the registry branch is located and where the registrant has its place of business. This approach would also take into account the financial constraints of MSMEs and, according to circumstances, possible literacy issues, as entrepreneurs may not be equally fluent in all official languages spoken in a State. When such an approach is chosen, however, States should ensure that the registration and search interface on the website are available in all official languages of the registry. Whatever approach is taken, however, States will have to consider ways to address this matter so as to ensure that the registration and any subsequent change can be carried out in a cost effective way for both the registrant and the registry and, at the same time, ensure that information can be understood by the registry's users.

C. Making information available

54. In order for the business registries to facilitate trade and interactions between business partners, the public and the State, easy access to business services should be provided both to businesses that want to register and to interested stakeholders who want to search registered information.

1. Information to register a business

55. For business wanting to register, surveys often show that many microbusinesses operating in the extra-legal sector are not aware of the process of registering or of its costs: often they overestimate time and cost, even after efforts to simplify the registration process.[33] Easily retrievable information on the registration process and the relevant fees can reduce compliance costs, and make the outcome of the application more predictable, thus encouraging entrepreneurs to register. Restricted access to such information, on the contrary, might require meetings with registry officials in order to be apprised of the registration requirements, or the involvement of intermediaries to facilitate the registration process.

56. In jurisdictions with developed ICT infrastructures, information on the registration process and documentation requirements should be available on the registry website or the website of the government agency overseeing the process. As already discussed, States should consider whether the information included on the website should be offered in a foreign language in addition to official and local languages. States with more than one official language should make the information available in all such languages (see para. 53 above).

57. Lack of new technology, however, should not prevent access to information that could be ensured through other means, such as the posting of communication notes at the relevant agency or dissemination through public notices. In some jurisdictions, for instance, it is required to have large signs in front of business registry offices stating their processes, time requirements and fees.[34] In any event, information for businesses that want to register should be made available at no cost.

2. Operating hours

58. The approach to the operating days and hours of the registry depends on whether the registry is designed to permit direct electronic registration and searching by users or whether it requires their physical presence at an office of the registry. In the former case, electronic access should be available continuously except for brief periods to undertake scheduled maintenance; in the latter case, the registry offices should operate during reliable and consistent hours that are compatible with the needs of potential registry users. In view of the importance of ensuring ease of access to registry services for users, these recommendations should be incorporated in the law or regulation governing business registration or in administrative guidelines published by the registry, and the registry should ensure that its operating days and hours are widely publicized.

59. If the registry provides services through a physical office, the minimum operating days and hours should be the normal business days and hours of the public offices in the State. To the extent that the registry requires or permits the registration of paper-based submissions, the registry should be aimed at ensuring that the paper-based information is entered into the registry record and made available to searchers as soon as practicable, but preferably on the same business day that the information is received by the registry. Search requests submitted in paper form should likewise be processed on the same day they are received. To achieve this goal, the deadline for submitting paper based information or search requests may be set independently from the business hours.[35] Alternatively, the registry office could continue to

---

[33] M. Bruhm, D. McKenzie, Entry Regulation and Formalization of Microenterprises in Developing Countries, 2013, pages 7-8.

[34] See Bangladesh and Guinea cited in A/CN.9/WG.I/WP.85, para. 31.

[35] For example, the law, regulation or administrative guidelines of the registry could stipulate that, while the registry office is open between, for example, 9 a.m. and 5 p.m., all applications, changes and search requests must be received by an earlier time (for example, by 4 p.m.) so as to ensure that the registry staff has sufficient time to enter the information included in the application into the

receive paper forms (regardless if they are applications or changes) and search requests throughout its business hours, but set a "cut off" time after which information received may not be entered into the registry record, or searches performed, until the next business day. A third approach would be for the registry to undertake that information will be entered into the registry record and a search will be performed within a stated number of business hours after receipt of the application or search request.

60. The law, regulation or administrative guidelines of the registry could also enumerate, in either an exhaustive or an indicative way, the circumstances under which access to the registry services may temporarily be suspended. An exhaustive list would provide more certainty, but there is a risk that it might not cover all possible circumstances. An indicative list would provide more flexibility but less certainty. Circumstances justifying a suspension of registry services would include any event that makes it impossible or impractical to provide those services (such as force majeure, for example, fire, flood, earthquake or war, or if the registry provides users with direct electronic access, a breakdown in the Internet or network connection).

3. Modes of access to the registry

61. Working Paper A/CN.9/WG.I/WP.93 and this Addendum have highlighted in several paragraphs the benefits of an ICT based registration system over a paper-based one. Most obviously, one of the advantages of the use of modern technologies is that they simplify access to the registry, whether this means filing an application, submitting information on a change or performing a search. This is especially true when the systems authorize direct electronic submission of registrations and the electronic submission and retrieval of search requests and search results by clients and stakeholders. Direct access significantly reduces the costs of operation and maintenance of the system and also enhances the efficiency of the registration process by putting direct control over the timing of the business registration into the hands of the registrant. Direct electronic access eliminates any time lags between submission of information to the registry and the actual entry into the database of that information. In some States,[36] for instance, electronic access (either from a client's premises or from a branch office of the registry) is the only available mode of access for both registration and searching. As the data to be registered is submitted in electronic form, no paper record is ever generated. A fully electronic system of this kind places the responsibility for accurate data entry directly on registrants. As a result, staffing and operational costs of the registry are minimized and the risk of registry personnel making an error in transcribing documents is eliminated (see paras. 46-49 above).

62. Other States provide for electronic registration and searches but also give clients the option of submitting a registration or search request in other forms. The information is distributed through other channels that can complement the use of the Internet or that may even represent the main method of distribution if an online registration system is not yet fully developed. The following means of sharing information are also used in some States:

(a) Telephone services to provide information on registered businesses and product ordering;

(b) Subscription services to inform subscribers about events pertaining to specified businesses;

(c) Ordering services to enable access to various products, most often using an Internet browser; and

(d) Delivery services to convey various products, such as transcripts of registered information on a business, paper lists, or electronic files with selected data.

63. However, in many States, electronic submission is by far the most prevalent mode of data submission and it is used in practice for the vast majority of registrations. It is thus recommended that, to the extent possible, States should establish a business registry that is computerized and that permits direct electronic access by registry clientele. Nonetheless, given the practical considerations involved in establishing an electronic registry, multiple

---

registry record or conduct the searches.

[36] See A/CN.9/WG.I/WP.85, para. 44.

modes of access should be made available to registry clientele at least in the early stages of implementation in order to reassure users who are unfamiliar with the system. Finally, to facilitate use, the registry should be organized to provide for multiple points of access for both electronic and paper submissions and search requests. However, even where States continue to use paper-based registries, the overall objective is the same: that is, to make the registration and searching process as simple, transparent, efficient, inexpensive and accessible as possible.

4. Access to search services

64. In keeping up with its functions as a collector and disseminator of business-related information, the registry should make publicly available all information on a registered business that is relevant for those that interact with the business (whether they be public authorities or private entities) to be fully aware of the business identity and status of that enterprise. This will allow interested users to make informed decisions about who they wish to do business with, and for organizations and other stakeholders to gather business intelligence. This function of a business registry is demonstrably valuable to the economy of a State. Moreover, in several States the information deposited in the registry, or part of that information, is of a legal nature and has third-party effectiveness, so that searchers of the registry can rely upon the information as it appears on the registry, and assert that information against third parties.

65. While providing public disclosure of the registered information is an approach followed in most States, the way in which stakeholders access information, the format in which the information is presented and the type of information available, varies greatly from State to State. This variation is not only a function of the technological advances of a State, but of an efficient accessing framework, including that provided by national legislation.[37] For instance, an aspect on which States may differ concerns the criteria that may be used to search the registry.

66. This Working Paper takes the view that in order to achieve the objectives of a business registration system, a registry must facilitate access to the registered information by the general users, which enhances certainty of and transparency in the way the registry operates. Because of its importance, this principle of public access to the information deposited in the registry should be stated in the law or the regulation governing business registration.

67. Further, in order to facilitate dissemination of information, information should be made available at no cost or for a low cost. This approach may be greatly facilitated, as seen in paragraph 45 above, by the development of ICT supported registries that allow users to submit applications or make searches electronically without the need to rely on intermediation by registry personnel. Such an approach is also much cheaper for the registry. Where registration systems are paper-based, customers must either visit the registry office and conduct the research on site (whether manually or using ICT facilities that are available) or the information is sent to them on paper. In both cases, registry staff may need to assist the customer to locate the information and prepare it for disclosure. As previously noted, this is associated with higher costs, delay and the potential of error and liability for the registry. Making registered data available electronically would also allow for the provision of regularly updated information, as compared with paper-based information which can sometimes be outdated by the time it reaches the intended user.

(a) Entitlement to search the registry

68. Evidence shows that in most States public access to search the registry is generally unqualified. Permitting full public access does not compromise the confidentiality of information, which can be protected by allowing users to search only certain types of information. This approach avoids any unnecessary cost and delay in initiating a search.

69. It is not recommended that States restrict access to search the business registry or that searchers be required to demonstrate a reason to request access. Such a policy could seriously compromise the core function of the registry to publish and disseminate information on registered entities. Moreover, if a discretionary element is injected into

[37] See supra footnote 5, page 8.

granting an information request, equal public access to the information in the registry could be impeded, and some potential searchers might not have access to information that was available to others.

70. For these reasons, it is recommended that the registry should be fully accessible to the public, subject only to necessary confidentiality restrictions in respect of certain information.

71. The applicable business registration law or regulation can however make access to the registry subject to certain procedural requirements, such as requiring that users submit the search request in the prescribed form and pay, or make arrangements to pay, any prescribed fee. If a searcher does not use the prescribed registry form or pay the necessary fee, the searcher may be refused access to the search services of the registry. As in the case of refusing access to registration services, the registry should be obliged to give the specific reason for refusing access to search services as soon as practicable so that the searcher can remedy the problem.

72. Unlike the approach adopted for registrants, the registry should not request and maintain evidence of the identity of a searcher as a precondition to obtaining access to the search services of the registry since a searcher is merely retrieving information contained in registered information from the public registry record. Accordingly, identification evidence should be requested of searchers only if it is necessary for the purposes of collecting search fees, if any.

73. The applicable law or regulation should also provide that the registry may reject a search request if the searcher does not enter a search criterion in a legible manner in the designated field and must provide the grounds for a rejection as soon as practicable. In registry systems that permit registrants to electronically submit search requests to the registry, the software should be designed to automatically prevent the submission of search requests that do not include a legible search criterion in the designated field and to display the reason for the refusal on the electronic screen.

(b) Type of information provided

74. Information can be of particular value to stakeholders if it is available to the public, although the type of registered information that is available will depend on the legal form of the business being searched. Information available from the business registry that may be of value includes: the company profile and company officers (directors, auditors); annual accounts (in both e-format and paper format); a list of the company's business divisions or places of business; the certificate of registration or incorporation; the publication of companies' memorandums, articles of association, or other rules governing the operation or management of the business; existing company names; company history; insolvency-related information; information on the company's registration process; company share capital; related laws and regulations; certified copies of registry documents; information on registry fees; notifications of events (late filing of annual accounts, newly submitted documents, etc.).[38] According to a recent survey, information on company data, annual accounts and annual returns, as well as information about fees, are the most popular pieces of information and the most requested by the public.[39]

75. If the State is one where shareholder details are registered, access to such information would also be advisable. Most States that register shareholder details make the relevant information available to the public.[40] A similar approach can be recommended with regard to information on beneficial ownership, although, as previously noted, to date, not many jurisdictions collect information on beneficial ownership. A State may also consider making information on beneficial ownership available to the public in order to allay concerns over the potential misuse of business entities. However, the sensitive nature of the information on beneficial ownership may require the State to exercise caution before opting for disclosure of beneficial ownership without any limitation.

---

[38] See, for instance, supra footnote 13, pages 77 ff.

[39] See supra footnote 12, page 131.

[40] See supra footnote 13, pages 30 ff.

(c) Bulk information

76. In addition to making individual information available, business registries in some jurisdictions also offer the possibility of obtaining "bulk" information,[41] i.e. a compilation of data on selected, or all, registered businesses. Such information can be requested for commercial or non-commercial purposes and is often used by public agencies as well as private organizations (such as banks) that deal with businesses and perform frequent data processing on them. Distribution of bulk information varies according to the needs and capability of the receiving entity. In performing this function, one approach would be for the registry to ensure the electronic transfer of selected data on all registered entities, combined with the transfer of data about all new registrations, amendments, and deregistrations during a specified period. Another option for the registry would be to make use of web-based or similar services for system-to-system integration that provides both direct access to selected data on specific entities and name searches. Direct access avoids unnecessary and redundant storage of information by the receiving organization and States where such services are not yet available should consider it as a viable option when streamlining their business registration system.[42] Distribution of bulk information can represent a practicable approach for the registry to derive self-generated funds (see also para. 76 in A/CN.9/WG.I/WP.93/Add.2).

(d) Actual use of the information

77. Simply because information is made available for use does not necessarily equate to that information being used. It would be useful for the State to devise effective means that encourage customers to actually use the information services of the registry. As previously mentioned, adoption of ICT supported registries that permit direct and continuous access to stakeholders (except for periods of scheduled maintenance) will promote the actual use of the information. Communication campaigns on the services available at the registry will also contribute to the active take-up of registry services by its potential users (see para. 42 of A/CN.9/WG.I/WP.93).

(e) Quality and reliable information

78. Another aspect that will contribute to making business registry services valuable for the public is ensuring that the information maintained in the registry is of good quality and that it is reliable. The registry can implement certain actions in order to improve the quality of the information provided, such as taking action to prevent corporate identity theft (see para. 30 of A/CN.9/WG.I/WP.93/Add.2) through the use of monitoring systems, checks by an intermediary, or establishing access through the use of passwords. Another way to ensure that the data kept in the registry is reliable would be the adoption of identity verification methods for those who deliver information to the business register and the secure signature requirements for the provision of that information (such as through the use of electronic signatures or electronic certificates). Paragraphs 27 to 30 of A/CN.9/WG.I/WP.93/Add.2 discuss these two topics extensively. A third approach that would contribute to the quality of the information deposited in the registry may be to require businesses to reregister at certain intervals, which would provide a means of confirming whether the information in the register is up to date.[43] However, adoption of such an approach could impose a considerable burden on businesses and on MSMEs in particular, as already discussed (see para. 27 above). A fourth method to protect the reliability and quality of the information would be through attention paid to the interval with which the registry is updated. Updating the registry in real time would be the preferable approach, or where this is not possible, daily updates of the registry should be ensured.[44]

(f) Accessibility

79. Finally, the registry needs to ensure that searchable information is easily accessible. Even though the information is available, it does not always mean that it is easy for

---

[41] See supra footnote 3, page 14.
[42] Ibid.
[43] See supra footnote 12, page 134.
[44] Ibid., pages 119 ff.

stakeholders to access. There are often different barriers to accessing the information, such as the format in which the information is presented: if special software is required to read the information, or if it is only available in one particular format, it cannot be said to be accessible. In several States, some information is made available in paper and electronic formats; however, information available only on paper likely entails reduced accessibility. Other barriers that may make information less accessible are charging fees for it, requiring users to register prior to providing access to the information, and if there is a fee connected to the user registration. States should find the most appropriate solutions according to their needs, their conditions and their legal framework.

80. One often overlooked barrier to accessing information, whether in order to perform a search or to register a business, is a lack of knowledge of the official language(s). Providing forms and instructions in other languages is likely to make the registry more accessible to users. However, recent evidence shows that, with the exception of Europe, business registries seldom offer services in languages additional to the official language(s). [45] Although making all information available in additional languages may incur some expense for the registry, a more modest approach may be to consider making information on only core aspects of registration, for instance instructions or forms, available in a foreign language(s). In deciding which foreign language would be most appropriate, the registry may wish to base its decision on historical ties, the economic interests of the jurisdiction and the geographic area in which the jurisdiction is situated.

Note by the Secretariat on key principles of business registration

ADDENDUM

Contents

III. Implementation of a business registry

1. As already noted in several paragraphs, business registration can be implemented through many different organizational tools that vary according to jurisdiction. States embarking on a reform process to simplify registration will have to identify the most appropriate and efficient solutions to deliver the service, given the prevailing domestic conditions. Regardless of the approach chosen by the State, aspects such as the general legal

and institutional framework affecting business registration, the legal foundation and accountability of the entities mandated to operate the system and the budget needed by such entities should be carefully taken into account. Evidence[1] shows that reform efforts rely to a different extent on a core set of tools, including: establishment of single interfaces for business start-up (better known as "one-stop shops"); the use of ICT; and ensuring interconnectivity between the different authorities involved in the registration process (with the possible adoption of a unique business identifier). Other important components include a domestic legal framework that is generally supportive of business registration, establishing appropriate pricing policies for the use of the registry and developing the capacity of registry operators. As outlined in paragraph 42 of A/CN.9/WG.I/WP.93, awareness-raising strategies to promote business registration will also play a key role in the in the implementation of an efficient registry.

A. A single interface for business registration and registration with other authorities: one-stop shops

2. As discussed above, a new business is usually required to register with several different government agencies, which often require the same information that has already been gathered by the business registry. Entrepreneurs must often personally visit each agency and fill out multiple forms. Taxation, justice, employment and social services agencies are usually involved in this process; other administrative offices and institutions, specific to each jurisdiction, may also be involved. This often results in multiple procedures governed by different applicable laws, duplication of information and lack of ownership or full control of the process by the agencies involved. Possibly worst for MSMEs wishing to register, the overall process can require weeks, if not months.[2]

3. Establishment of "one-stop shops" have thus become one of the most popular reforms to streamline business registration in recent years. One-stop shops are single interfaces where entrepreneurs receive all of the information and forms they need in order to complete the necessary procedures to establish their business rather than having to visit several different government agencies. Some States have several one-stop shops throughout their territory.

4. Beyond this general definition, the scope of the one-stop shops can vary according to the services offered. Some one-stop shops only provide business registration services, which may still be an improvement if the registration process previously involved a number of separate visits to the relevant authorities; others carry out other functions related to business start-up.[3] The most common of these other functions is tax registration, although there are also examples of one-stop shops dealing with registration for social security and statistical purposes. In rare cases,[4] one-stop shops assist entrepreneurs not only with business licences and permits but also with investment, privatization procedures, tourism-related issues and State-owned property management.

5. One-stop shops can be virtual or physical offices. Physical premises, when in rural areas, are particularly appropriate for businesses with limited access to municipal centres. Of course, online business registration can also be offered as one option available for registering, the other being visiting the one-stop shop (or the registration office). Online one-stop shops take advantage of solutions supported by ICT, which allows for rapid completion of several formalities due to the use of dedicated software. Such online portals may provide a fully integrated facility or still require separate registration in respect of some requirements, for example taxation services.[5]

[5] See supra footnote 3, page 4.

1. Different approaches to establish a one-stop shop

6. When establishing one-stop shops, in particular those performing functions in addition to business registration, States can choose among different approaches. In the "one door" approach, representatives of different government agencies involved in registration are brought together in one physical place, but the applicant must deal separately with each representative (for example, the commercial registry official dealing with the approval of the business name, the clerks checking the documents, the taxation official, and the notary public), although the different agencies liaise among themselves.[6] As may be apparent, this solution is relatively uncomplicated and would normally not require any change in legislation or ministerial responsibilities, but it would involve establishing effective cooperation between the different government ministries. One issue States should consider when opting for this approach would be how much authority the representatives of each agency should have; for example, should they have the discretion to process the registration forms on site or would they simply be acting on behalf of their agencies and be required to take the documents to their home agencies for further processing?[7] Similarly, it is also important to consider clarifying the lines of accountability of the various representatives from the different agencies to the one-stop shop administrator.[8]

7. Another form of one-stop shop is the so-called "one window" or "one table" version, which offers a higher level of integration of the different agencies involved in the start-up of a business.[9] In this case, the one-stop shop combines the process for obtaining business and other registrations, such as for taxation and social services, with other arrangements, like publishing the registration in a National Gazette or newspapers, when required. All relevant documents are submitted to the one-stop shop administrator who is authorized, and properly trained, to accept them on behalf of the various government agencies involved. Documents are then dispatched, electronically or by hand or courier, to the competent agency for processing. This type of one-stop shop requires detailed coordination between the different government agencies, which must modify their procedures to ensure an effective flow of information. A memorandum of understanding between the key agencies involved may be needed in order to establish the terms in respect of the sharing of company information.[10] In some cases, taking such an approach may also require a change in legislation.[11]

8. A third approach, which is less common, is based upon the establishment of a separate entity to coordinate the business registration function and to deal with other requirements that the entrepreneurs must meet, such as making tax declarations, obtaining the requisite licences, and registering with social security authorities. Pursuant to this model, the entrepreneur would apply to the coordinating entity after having registered with the business registry in order to fulfil the various additional aspects of the procedures necessary prior to commencing business. Although this approach results in adding a step, it could be useful to some States since it avoids having to restructure the bodies with the main responsibility for business registration. On the other hand, the adoption of such a structure could involve an increase in the cost of the administrative functions and may only reduce timeframes to the extent that it allows the various functions to take place successively or enables participants in the one-stop shop to network with the other agencies to speed up their operations. From the registrant's perspective, however, the advantage of being able to deal with a single organization remains.[12]

9. Finally, in States with developed ICT infrastructures, the functions of the agencies concerned with registration could be fully integrated through the use of a common database, which is operated by one of the agencies involved and provides simultaneous registration for various purposes, i.e. business registration, taxation, social services, etc. In some

[12] See Benin and France, ibid., page 4.

jurisdictions, a public agency (such as the tax administration) is responsible for the registration of business entities, or ad hoc entities have been set up to perform such simultaneous registration.[13]

2. Authority overseeing the one-stop shop

10. One issue that States should consider when establishing a one-stop shop is its location. It is usually advisable for the one-stop shop to be directly connected to the business registry office, either because it is hosted there or because the registry is part of the one-stop shop. The organization(s) responsible for the one-stop shop could thus be the same as that/those which oversee(s) the business registration process. This approach should take into account whether such organizations are equipped to administer the one-stop shop. Examples from various jurisdictions indicate that where authorities such as executive agencies are responsible for business registration, they possess the skills to perform one-stop shop functions as well. The same can be said of chambers of commerce, government commissions, and regulatory authorities.[14] There are very few examples of courts that have adopted a one-stop shop approach in those States where business registration is court-based.

3. Requirements of one-stop shops

11. Although one-stop shops do not necessarily require changes in the domestic legal framework, as seen in the paragraphs above, it is important for the operation of such mechanisms to be legally valid, which may involve adapting existing laws to the new structure and method of proceeding. The extent of the changes will thus vary according to the different needs of States. In addition, one-stop shops should be given a sufficient budget, since they can be quite expensive to establish and maintain, they should be staffed with well-trained personnel, and they should have their performance regularly monitored by the supervising authority in accordance with client feedback.

B. Use of information and communications technology (ICT)

1. Introducing an ICT supported business registry

12. As seen in paragraphs 47 to 55 of A/CN.9/WG.I/WP.93, an important aspect of streamlining a business registration system is deciding upon the form in which the system will operate, i.e. whether it should be supported by paper or by modern technology. Referring to available evidence, this Working Paper has expressed the view in several paragraphs that, whenever the state of domestic technology permits, ICT solutions should be used to operate the business registration system since they present the most efficient and effective means of performing registration functions.

13. Subject to the level of development of the implementing State, introducing ICT supported business registration, can be expensive and difficult, since it may require reforming legislation to allow for electronic signature or information security laws, and/or establishing complex e-government platforms or other ICT infrastructures. For instance, in several developing States and mid-level economies, only information about registering a business is available online, while a functioning electronic registry has not yet been implemented. This could be explained by the fact that making information electronically available is less expensive and less difficult to achieve than is the establishment of an electronic registry, nor does it require any legislative reform or specialized ICT.

14. In locations where Internet penetration is not extensive, a phased in approach may be an appropriate way forward.[15] Automation would start with the use of simple databases and workflow applications for basic operations, such as name searches or the sharing of information with other government agencies, and then would progress to more sophisticated web-based systems that would enable customers to conduct business with the registry

[13] See the Albania's National Registration Center, ibid.

[14] Ibid., page 7.

[15] The technical assistance experience of international organizations, in particular of the World Bank, has provided most of the background material upon which this section and the following one are based. See, in particular, Investment Climate (World Bank Group), Reforming Business Registration: A Toolkit for the practitioners, 2013, pages 12 ff.

entirely online. These web-based systems could be quite convenient for smaller businesses operating at a distance from the registry, provided that those entrepreneurs were able to access the system. The final phase of the approach would be to accommodate ICT interoperability between those agencies involved in business registration.

15. The methods used to establish the online system should be consistent with the reforms required as they would determine the success or the failure of the initiative. Moving directly to a full online solution before reengineering registry business processes would be a mistake in many cases, as the solutions designed would not be able to capture the technology's full benefits.[16]

16. The simplest approach for States beginning their activity in this area would be to develop a content-rich website that consolidates registration information, provides downloadable forms, and enables users to submit feedback. This simple resource would allow users to obtain information and forms in one place and would make registries more efficient by enabling users to submit e-mail inquiries before going to registry offices with the completed forms.[17] Since this solution does not require a stable Internet connection, it may appeal to States with limited Internet access.

17. If only limited Internet bandwidth is available, then automatizing front-counter and back-office operations prior to moving online would be a suitable approach. If the registry has branches outside its main location (for instance, in rural areas), it would be important to establish a dedicated Internet connection with them. This approach would still require entrepreneurs to visit the registry, but at least it would establish a foundation on which the registry could later develop a more sophisticated web platform. A key factor even at this basic stage, would be for the system to be able to digitize historical records and capture key information, such as the names of shareholders and directors, in the registry database.[18]

18. Once the government capacity in ICT and Internet penetration allows for digital commerce, then platforms that enable businesses to apply and pay for registration online as well as to file annual accounts and update registration details as operations change can be developed. With regard to online payment of a registration fee, it should be noted that ICT supported solutions would depend on a State's available modes of payment and on the regulatory framework that establishes the modes of payment a public authority can accept. When the jurisdiction has enacted laws that allow for online payment, experience shows that the most efficient option is to combine the filing of the electronic application and the fee payment into one step. ICT systems incorporating this facility should include error checks, so that applications are not submitted before payments are completed and registry officials can see payment information along with the application.[19] When fee payment is required before registration, this constitutes a separate procedural step and the use of ICT solutions in order to be user-friendly would require streamlining the procedures for filing the applications and for payment.

19. When a State has developed the ICT infrastructure to achieve full registry automation, integration of online registration processes with registration required for taxation, social security and other purposes could be considered. Even if no integration with other registrations is built into the system, it would nevertheless be advisable that States implement data interchange capabilities so that the relevant company information could be shared across government agencies. A final improvement would be the development of mechanisms for disseminating business information products to all interested parties. Such products could substantially contribute to the financial sustainability of the registry (see para. 76 below): in States with highly developed online registration systems, registries can derive up to 40 per cent of their operating revenues by selling such information.[20]

20. One issue that would likely arise when the online registry is able to offer full-fledged services would be whether to abolish any paper-based submission or to maintain both paper-based and online registration. In many jurisdictions, registries choose to have

[16] Ibid.
[17] Ibid.
[18] Ibid.
[19] See Investment Climate (World Bank Group), Innovative Solutions for Business Entry Reforms: A Global Analysis, 2012, page 13.
[20] See supra footnote 15, page 13.

mixed solutions with a combination of electronic and paper documents or electronic and manual processing during case handling (see also paras. 47 to 55 A/CN.9/WG.I/WP.93). This approach may result in considerable cost for registries, since the two systems require different tools and procedures. Moreover, if this option is chosen, it is important to establish rules to determine the time of registration as between paper-based and electronic submissions. Finally, paper applications must be processed in any case, so that the information included in a hard document can be transformed into data that can be processed electronically; this can be done by way of scanning the paper-based application. However, in order to ensure that the record made by scanning correctly represents the paper application, the registry will likely have to employ staff to check that record, thus adding a step that increases costs and reduces the benefits of using an online system.[21]

2. Other registration-related services supported by ICT solutions

21. Automation should enable the registry to perform other functions in addition to the processing of applications. Where jurisdictions require user-friendly electronic filing and repopulated forms,[22] for instance, it can assist businesses in the mandatory filing of annual returns and/or annual accounts. Electronic filing and automated checks also help reduce processing time by the registry.[23]

22. ICT supported registration could also assist the registry in deregistration procedures. These usually require an official announcement that a business will be deregistered (see para. 22 of A/CN.9/WG.I/WP.93 and para. 20 of A/CN.9/WG.I/WP.93/Add.1). ICT can provide for automation of such announcements, from initiating the process to producing a standard notice, thus helping registries to ensure that businesses are not deregistered before the creditors' time limit has elapsed and to reduce processing time. In order to be fully effective, however, adoption of an ICT-based system needs to be supported by streamlined procedures that enable businesses to deregister in a simplified and quick way.[24]

23. ICT solutions could also support follow-up and enforcement procedures of business registries when businesses fail to comply with registration requirements. In one jurisdiction, for instance, the back-office system of the registry monitors the records of businesses and detects whether certain circumstances suggest that the business is not in compliance with statutory requirements. An automatic notice to the business is then produced in order for it to remedy the situation. Should the business fail to do so within the statutory deadline, the ICT solution starts a new procedure to forward the case to the district court, which may make a decision on the compulsory liquidation of the business. Upon an order for compulsory liquidation, the court notifies the registry which deregisters the business.[25]

3. The legislative framework supporting ICT-based registries

24. Establishing an ICT supported registration system requires a well-designed legal and regulatory framework that supports simplicity and flexibility and avoids, to the greatest extent possible, discretionary power and exception-making. For instance, provisions requiring the interpretation of several documents and the collection of several pieces of information are difficult to adapt to electronic processing; the same applies to the use of discretionary power and complex structures of rules and exceptions.

25. States should adopt legislation that facilitates the implementation of electronic solutions, although the obligation to use these solutions should be considered only when the various stakeholders concerned with the registration process (including the registrant, government agencies, and other relevant authorities) are prepared to comply. Furthermore, when developing such legislation, States should take into account that while certain elements of a legal framework can be checked electronically, the most complex aspects of the process

---

[21] See supra footnote 19, page 13. See also A/CN.9/WG.I/WP.93/Add.1, para. 14.

[22] Repopulated forms allow for selected fields to be automatically filled based on information previously provided by the registrant or maintained in their user account. When changes in the registrant's information occur, the registrant is not required to fill out the entire form again, but only to enter the relevant changes. Information included in the repopulated form is stored and may be made accessible to and exchangeable with other relevant agencies.

[23] See supra footnote 19, page 15.

[24] Ibid., page 16.

[25] See Norway, supra footnote 19, page 16.

will need to be addressed by a registry official. For instance, the electronic system may check plain numbers (for example, if the stated share capital meets any minimum requirement), while the registry official will have to check if the share capital recorded accords with that in the documentation.[26]

26. Since information technology is a field marked by rapid technological evolution, it would be advisable to establish guiding legal principles in the primary legislation, leaving secondary legislation to stipulate the specific provisions regulating the detailed functioning and the requirements of the system (see para. 59 below).[27] Once the registration process is fully automated, States should establish provisions (preferably in the secondary legislation) or policies that discipline government-to-government data exchange in order to avoid any lack of cooperation among different agencies.

(a) Electronic documents and electronic signatures

27. Entering information into an ICT supported registry is a business-to-government transaction that should be subject to the same treatment, under domestic legislation, as any other electronic transaction.[28] Therefore, if an appropriate domestic legislative framework for electronic transactions is not in place, a preliminary step for a reform aimed at supporting electronic business registration would be to recognize and regulate the use of such electronic transactions. Among other things, States should adopt laws permitting electronic signatures and the submission of electronic documents (see also para. 32 below).[29] In some States, for instance, the use of an advanced electronic signature is mandatory when transmitting information to a business registry. When laws on electronic communications are enacted, they should establish, at minimum, principles of non-discrimination, technological neutrality and functional equivalence allowing for equal treatment of paper-based and electronic information. The principle of non-discrimination ensures that a document would not be denied legal effect, validity or enforceability solely on the grounds that it is in electronic form. The principle of technological neutrality mandates the adoption of provisions that are neutral with respect to the technology used. The principle of functional equivalence lays out criteria under which electronic communications and electronic signatures may be considered equivalent to paper-based communications and hand-written signatures.

28. Further, it would be advisable that the laws include provisions to mitigate the risks that the use of ICT can carry with it and that can affect the validity, and in certain jurisdictions the legal validity, of the information transmitted through the electronic means. The most common risks include: confirming the identity of the entrepreneur filing for registration (referred to as “authentication”); preventing conscious or unconscious alteration of information during transmission (referred to as “integrity”); ensuring that sending and receiving parties cannot deny having sent or received the transferred message (referred to as “non-repudiation”) and preventing disclosure of information to unauthorized individuals or systems (referred to as “confidentiality”).[30] In those States where the law does not require business registries to check the veracity of the information submitted during the registration process, these risks may be more problematic as it can be relatively easy to manipulate registration systems and filing processes.

29. Verifying the identity of the registrant and ensuring the integrity of the application and the attached documents are key elements to ensure trust in ICT supported registration systems and their corresponding use. Consequently, States should carefully consider the requirements that electronic signatures and electronic documents should have in order to minimize any risks of corporate identity theft[31] and invalid information (see also para. 78 of A/CN.9/WG.I/WP.93/Add.1).

[29] UNCITRAL has adopted several texts dealing with electronic commerce. Those texts and relevant information on them can be found on the UNCITRAL website at: www.uncitral.org.

[30] See supra footnote 19, page 12.

[31] Corporate identity theft can occur through the theft or misuse of key business identifiers and credentials, manipulation or falsification of business filings and records, and other related criminal

30. Whether or not the adoption of legislation on electronic signatures is premature due to the technological infrastructure of the State, various other techniques can prevent corporate identity theft and ensure security. The experience of several States has laid the groundwork for practices that may be replicated in other regions. Simple methods include the use of appropriate user names and passwords; electronic certificates; biometric verification (for example, fingerprints); monitoring systems and/or e-mail systems that notify registered users about changes or whenever documents are filed on their business record; and the implementation or increase of penalties for false and/or misleading information submitted to the commercial registries. An approach followed in some jurisdictions is to require the identity of the person registering the business to be checked by a notary public or by another designated authority. Where this is not possible, entrepreneurs may be required to visit the registry office in order for their identity to be verified. Another approach, employed in other jurisdictions, allows only those individuals expressly identified in the law to submit an application for entry into the register or to change an entry in the register. This application must then be legalized by a public notary or another designated authority (if submitted in paper form). However, recourse to a notary or other intermediary or personal visits to the registry office may present expensive and time-consuming barriers for businesses wishing to register, in particular for MSMEs. Therefore, in order to facilitate MSME registration, States may wish to opt for the adoption of simpler ways to ensure the authentication of business entrepreneurs, such as the use of appropriate user names and passwords. This could be particularly appropriate in the case of micro-businesses or in cases where MSMEs intend to register but choose a simplified business form.

(b) Dispatch and receipt of electronic messages[32]

31. Another issue to consider when implementing a business registry through the use of ICT solutions is that electronic registries may make it difficult to ascertain the time and place of dispatch and receipt of information. This is an aspect that may acquire relevance due to the time sensitivity of certain submissions, such as establishing the exact time and place at which a business has been registered. For this reason, it would be key to have clear rules that define the time of "dispatch" and "receipt" of electronic messages. If such rules are not clearly defined in a State legislative framework, or if they are not defined with the specificity required for the purposes of time-sensitive registration applications, then ad hoc laws addressing the issue of dispatch and receipt may be required.

(c) UNCITRAL Model Laws

32. States that enact legal regimes on electronic communications and electronic signatures may wish to consider the UNCITRAL Model Law on Electronic Commerce and the UNCITRAL Model Law on Electronic Signatures.[33] These two legislative texts establish those principles of reliability, noted above, that are needed to ensure equal treatment between paper-based and electronic communications and deal extensively with provisions covering the issues of legal validity of electronic documents and signatures, authentication, and the time and place of dispatch and receipt of electronic messages. Because of the way these Model Laws, as well as all other UNCITRAL legislative texts, are negotiated and adopted, they offer solutions appropriate to different legal traditions and to States at different stages of economic development. Furthermore, domestic legislation based on the UNCITRAL Model Laws will greatly facilitate cross-border recognition of electronic documents and signatures.

(d) Operating the ICT supported registry

33. When establishing an ICT supported registry, States will have to consider issues concerning the treatment of personal data that is included in the application for registration (on this matter, see also para. 8 of A/CN.9/WG.I/WP.93/Add.1 and para. 52 below) and its

---

activities. Despite the use of the term "corporate", corporations are not the only business entities that are victimized by this crime. Any type of business or organization of any size or legal structure, including sole proprietorships, partnerships and limited liability companies can be targets of business identity theft.

[32] See supra footnote 28, page 48.

[33] See www.uncitral.org.

protection, storage and use. Appropriate legislation should be in place to ensure that data is protected. In the European Union, for instance, several Directives apply when data concerning individuals (for instance, information on officers or directors) is included in the application.

34. Another aspect that may warrant consideration by States is that of natural hazards or other accidents that can affect the processing, collection, transfer and protection of the data housed in the electronic registry and under the responsibility of the registry office. Given the expectations of the users of the reliable functioning of the registry, the registry office will want to ensure that any interruptions in operations are brief, infrequent and minimally detrimental to users, as well as to States.[34] For this reason, States should devise appropriate measures to facilitate protection of the ICT-based registry.

(e) Possible threats to ICT supported registries

35. The threats that can affect an ICT supported registry are not only confined to disruptions relating to the daily operation of the registry, but also include criminal activities that may be committed through the use of ICT. Providing effective enforcement remedies would thus be an important part of a legislative framework aimed at supporting the use of electronic solutions for business registration. Typical issues that should be addressed by States would include unauthorized access or interference with the electronic registry; unauthorized interception of or interference with data; misuse of devices; fraud and forgery.[35]

(f) E-payment legislation

36. As seen in paragraphs 51 of A/CN.9/WG.I/WP.93 and 18 above, once States have reached a certain level of technological maturity, they could consider developing electronic platforms that enable businesses to pay online when filing their application with the registry. This will require enacting appropriate legislation concerning e-payments in order to enable the registry to accept online payments. By way of example, such laws should address issues like who should be allowed to provide the service and under which conditions; access to online payment systems; liability of the institution providing the service; customer liability and error resolution. Furthermore, such laws should be consistent with the general policy of the country on financial services.

4. Cost and security considerations

37. When establishing an electronic registration system, the level of security needed and its relevant cost must also be carefully addressed. In particular, it is important to align the risk attached to a specific interaction (between the registry and the business or the registry and other public agencies) with the costs and administration required to make that interaction secure. Low security may deter parties from using electronic services (unless it is mandatory), but costly high security measures could have the same effect.[36]

C. Interoperability between the business registry and other government authorities and use of the unique identifier

38. As noted in paragraph 2 above, businesses are usually required to register with several government agencies (for example, for taxation, social services and pension purposes) which often entails providing the same information as that collected by the business registry. In jurisdictions where these agencies operate in isolation from each other, it is not unusual for this procedure to result in duplication of systems, processes and efforts, which is not only expensive but may also cause errors. Moreover, if agencies assign registration numbers to the businesses they register, and the use and uniqueness of those numbers is restricted to the authority assigning them, information exchange among the agencies requires each authority to map the different identification numbers applied by the other agencies. Even when electronic solutions are used, they can facilitate such mapping, but they cannot exclude the

[34] See supra footnote 19, page 49.
[35] Ibid.
[36] Ibid., page 12.

possibility that different entities will have the same identifier, thus reducing the benefits (in terms of cost and usefulness) obtained from the use of such tools.[37]

39. In recent years, several jurisdictions have thus adopted integrated registration systems in which the application submitted for business registration includes all of the information required by the different agencies. Once completed, the information in the application for business registration is transmitted by the registry to all relevant authorities. Information and any necessary approvals from the other agencies are then communicated back to the registry, which immediately forwards the information and approvals to the entrepreneur.[38] While this is beneficial for all businesses, regardless of their size, it is particularly valuable for MSMEs, which may not have the resources necessary to cope with the compliance requirements of multiple government authorities in order to establish their business.

40. States aiming at fostering such integration among different agencies may wish to consider that in recent years some international organizations have developed tools that facilitate inter-agency cooperation. For instance, one international organization has developed an online system that allows for the interoperability of the various public agencies involved in business registration with minimal or no changes at all in the internal processes of the participating agencies nor in their computer systems.[39]

41. Some developed States have introduced a more sophisticated approach, which considerably improves information exchange throughout the life cycle of a business. This approach requires the use of a single unique business identification number or unique identifier, which ties information to a given business and allows for information in respect of it to be shared among different public and private agencies.

42. A unique identifier is structured as a set of characters (they may be numeric or alphanumeric) which distinguishes registered entities from each other; it is allocated only once (usually upon establishment) to a single business and does not change during the existence of that business. The same unique identifier is used for that business by all agencies, which permits information about that particular registered entity to be shared within or between the public and private sectors.[40]

43. The experience of States that have adopted unique identifiers has demonstrated their usefulness. As noted above, they permit all government agencies to easily identify new and existing companies and cross-check information in respect of them. In addition, the use of unique identifiers improves the quality of the information contained in the business registry, since the identifiers ensure that information is linked to the correct entity even if its identifying attributes (for example name, address, and type of business) change. Moreover, unique identifiers prevent the situation where, intentionally or unintentionally, businesses are assigned the same identification; this can be especially important where financial benefits are granted to legal entities or where liability to third parties is concerned.[41] Unique identifiers have been found to produce benefits for businesses as well, in that they considerably simplify business administration procedures: entrepreneurs do not have to manage different identifiers from different authorities, nor are they required to provide the same or similar information to different authorities.

44. The effective use of unique identifiers is enhanced by the adoption of full electronic solutions which do not require manual intervention. However, electronic solutions are not a mandatory prerequisite to introducing unique identifiers, as they can also be effective in a paper-based environment.[42] When unique identifiers are connected to an online registration system, it is important that the solution adopted fits the existing technology infrastructure.

---

[37] Ibid., page 22.

[38] See supra footnote 15, page 9.

[39] The United Nations Conference on Trade and Development Business Facilitation Programme provides for an online tool designed to computerize simple or complex administrative procedures (eRegistration) and that can handle simultaneous operations involving multiple agencies (such as the business registry, tax office, and social services) thus promoting interoperability among these different agencies. See http://businessfacilitation.org/ and A/CN.9/WG.I/WP.81, para. 40.

[40] See supra footnote 19, page 20.

[41] Ibid., page 22.

[42] Ibid.

1. Prerequisites

45. The use of unique identifiers requires sustained cooperation and coordination among the authorities involved, and a clear definition of their roles and responsibilities, as well as trust and collaboration between the public and business sectors. Since the introduction of a unique identifier does not of itself prevent government agencies from asking a business for information that has already been collected by other agencies, States should ensure that any reform process in this respect start with a clear and common understanding of the reform objectives among all the stakeholders involved. Moreover, States should ensure that a strong political commitment is in place. Potential partners should ideally include the business registry, the taxation authority, the statistics office, the social services agency, the pension fund, and any collateral registries. If agreement among these stakeholders is elusive, at a minimum, the business register and taxation authority should be involved. Information on the identifiers in use at the other authorities and within the business sector is also a prerequisite for reform, as is a comprehensive assessment to identify the needs of all stakeholders.

46. In order to permit the introduction of a unique identifier, the domestic legal framework should include provisions on a number of issues including:

(a) Identification of the authority charged with allocating the unique identifier;

(b) Allocation of the unique identifier before or immediately after registration with the authorities involved in business entry;

(c) Listing of the information that will be related to the identifier, including at least the name, address and type of business;

(d) The legal mandate of the public authorities to use the unique identifier and related information, as well as any restrictions on requesting information from businesses;

(e) Access to registered information by public authorities and the private sector;

(f) Communication of business registrations and amendments among the public authorities involved; and

(g) Communication of deregistration of closed businesses.[43]

2. Introducing unique identifiers

47. Adoption of a unique business identifier normally requires a centralized database linking the businesses to all relevant government agencies whose information and communication systems must be interoperable. This requirement can be a major obstacle when implementing this in practice if the technological infrastructure of the State is not sufficiently advanced.

48. States can introduce the unique business identifier in one of two ways. In the first approach, business registration is the first step and includes the allocation of a unique identifier, which is made available (together with the identifying information) to the other authorities involved in the registration process (for instance taxation and social security authorities), and which is re-used by those authorities. In the second approach, the allocation of a unique business identifier represents the beginning of the process. The unique identifier and all relevant information are then made available to the government agencies involved in business registration, including the business registry, and is then re-used by all agencies.[44] Either of these two approaches can be followed by the authority entrusted with allocating unique business identifiers, regardless of whether the authority is the business register, a facility shared by public agencies or the taxation authority. It is important to note that in some States, the use of a unique identifier may be restricted: in some jurisdictions, certain government agencies still allocate their own identification number although the business carries a unique identifier.[45]

---

[43] See supra footnote 15, page 32.

[44] See supra footnote 19, page 20 and A/CN.9/WG.I/WP.85, paras. 34 ff.

[45] Ibid.

49. Introducing a unique business identifier usually requires adaptation both by public authorities in processing and filing information and by businesses in communicating with public authorities or other businesses. A unique business identifier requires the conversion of existing identifiers; this can be accomplished in various ways. Taxation identifiers are often used as a starting point in designing a new identifier, since the records of the taxation authorities cover most types of businesses and are often the most current.[46] Examples also exist in which, rather than introducing a completely new number, the taxation number itself is retained as the enterprise's unique number. New identification numbers can also be created using other techniques according to a country's registration procedures. In such a situation, it is important that each business, once assigned the new number, verifies the related identifying information, such as name, address, and type of activity.[47]

3. Unique identifiers and individual businesses

50. One issue a State may have to consider when introducing unique identifiers is that of individual businesses that do not possess a separate legal status from their owners. In such cases, taxation authorities may prefer to rely on the identifier for the individual, who may be a natural person, rather than on the business identifier.

51. Situations may arise in which different agencies in the same jurisdiction allocate identifiers to businesses based on the particular business form of the enterprise. In order to avoid a situation where several identifiers may be allocated to one business or where several businesses may be allocated the same identifier, a common regime should be established for the identification of all possible business forms in a particular jurisdiction.[48]

4. Information-sharing and data protection

52. While facilitating information-sharing, it is important that unique business identifiers protect sensitive data and privacy. National legislation often includes provisions on data protection and privacy and in some States, registered information related to businesses is considered private and is not publicly available. However, a major trend towards increased transparency in order to avoid misuse of corporate vehicles for illicit purposes (see also para. 75 of A/CN.9/WG.I/WP.93/Add.1) has resulted from international efforts to fight money-laundering and terrorist and other illicit activities, as well as from the adoption of policies to know your customers and business counterparts. Such an enhanced quest for transparency has an impact on the way the information retained in the registry is shared among the different authorities. When a State introduces interoperability among different authorities, it should address issues of individual privacy[49] so that no protected information about the business is made public, but that information that must be made public by the registry can legally be made public.[50]

5. Interoperability

53. As discussed in paragraphs 47 to 49 above, the interoperability of the different agencies' ICT systems could be a major obstacle when implementing unique business identifiers. The ability of different information technology infrastructures to exchange and interpret data, however, is only one aspect of interoperability that States should consider. Another issue is that of semantic interoperability, which can also pose a serious threat to a successful exchange of information among the agencies involved as well as between relevant agencies and users in the private sector. For this reason, it is important to ensure that the precise meaning of the information exchanged is understood and preserved throughout the process and that semantic descriptions are available to all of the stakeholders involved. Measures to ensure interoperability would thus require State action on a dual level: i.e. agreement on common definitions and terminology on one hand, and development of appropriate technology standards and formats on the other. This approach should be based

---

[46] See Belgium in A/CN.9/WG.I/WP.85, para. 35.
[47] See Norway, ibid.
[48] Ibid., paras. 36 ff. and see supra footnote 19, page 21.
[49] See A/CN.9/WG.I/WP.85, para. 37.
[50] See supra footnote 28, page 50.

on a mutual understanding of the legal foundation, responsibilities and procedures among all those involved in the process.[51]

6. Integration of registration functions

54. In some jurisdictions, advanced interconnectivity among the different agencies involved in the registration process has resulted in a single form for registration with all agencies. As a result, businesses are required to submit only one form instead of several, and authorities need not ask repeatedly for the same information. Examples exist of consolidated (electronic) registration forms that can be repopulated[52] with information from the different authorities concerned. Integration of registration functions can be facilitated by the use of one common database. In jurisdictions where this approach has been developed, agencies perform regular file transfers to update the database as well as their own records; they have direct access to the common database and use the same back-office systems to update it; and the information registered is regularly verified by trusted staff of the agencies. Such strong coordination among the concerned agencies is often based on regulatory provisions that allocate roles and responsibilities among the various agencies involved. Appropriate funding should also be allocated from the State's budget.[53]

7. Cross-border data exchange

55. Introducing unique business identifiers that enable different public authorities to exchange information about the business among themselves is relevant not only at the national level, but also in an international context. Unique identifiers allow interoperability among business registries located in different States as well as between business registries and public authorities in different States. Implementation of cross-border exchange of data can result in more reliable information for consumers and existing or potential business partners, including small businesses that provide cross-border services.

56. In the European Union (EU), for instance, EU-Directive 2012/17[54] requires Member States to ensure that companies have a unique identifier "to be unequivocally identified" in the new system of interconnected business registries that the Directive aims to establish.[55] This will facilitate exchanging information between the registry of a company and those of its branches in other Member States on the opening and termination of any winding-up or insolvency proceedings of the company and on the deregistration of the company from the registry. As a result, when a company has been dissolved or otherwise stricken from the registry, its foreign branches are likewise removed from the register without undue delay.

57. There are, at present, no other examples of similar initiatives in other regions of the world. However, the adoption of unique identifiers by non-EU States could lay the groundwork for future coordination in the regulatory community in order to create international standards for a global unique identifier.

58. Introducing unique identifiers does not only benefit businesses that have branches outside their State. It is also beneficial for local entrepreneurs since it enables those entrepreneurs to establish commercial relationships with multinationals or other foreign businesses that are active in the domestic markets where the local entrepreneurs operate. In a global economy, it is often difficult for a micro-entrepreneur to become a supplier or a customer of larger companies since it may not be easy for those companies to obtain information on the existence and the reliability (for instance, in terms of their financial situation) of the small businesses. A unique identifier, recognizable worldwide, would assist in creating a safe and reliable "connection" between a business and all of the information that relates to it, thus making it possible for the small business to obtain visibility in bigger markets.

[54] See Directive 2012/17/EU of the European Parliament and of the Council of 13 June 2012.
[55] Ibid., and see A/CN.9/WG.I/WP.85, para. 32.

D. Changes to underlying laws and regulations

59. Business registration reform can entail amending either primary legislation or secondary legislation or both. Primary legislation concerns texts such as laws and codes that must be passed by the legislative bodies of a State. Reforms that consider this type of legislation thus require the involvement of the legislature and, for this reason, can be quite time-consuming. Secondary legislation is that body of texts composed of regulations, directives and other similar acts made by the executive branch within the boundaries laid down by the legislature. Reform of secondary legislation does not need to be reviewed by the legislature and thus it can be carried out in a shorter time frame. Therefore, when domestic circumstances allow, it can thus be a more viable option than the reform of primary legislation.

60. In addition to legislation that is meant to govern the way business registration is carried out, States may need to update or change laws that affect the registration process in various ways, but which no longer respond to the needs of MSMEs. There is no single solution in this process that will work for all States, since the reforms will be influenced by the State's legislative framework. However, the reforms should aim at developing a domestic legal framework that supports business registration with features such as: transparency and accountability, clarity of the law and use of flexible legal entities.

61. Regardless of the approach chosen, i.e. whether to implement a reform though primary or secondary legislation, and the extent of the reform, changes in the domestic legal framework should carefully consider the potential costs and benefits of this process, as well as the capacity and the will of the government and the human resources available. An important preparatory step of a reform programme thus involves a thorough inventory of the laws that are relevant to business registration and a thorough legal analysis of them[56] with the view to evaluating the need for change, the possible solutions, and the prospects for effective reform. In some cases, this assessment could result in deferring any major legislative reform, if significant gains to the simplification process can be achieved by the introduction of operational tools[57] or, as mentioned above, by adopting or reforming secondary legislation. Once it has been decided what changes should be made and how, ensuring their implementation is equally important. In order to avoid the possible risk of unimplemented reforms, the government, the reform steering committee and the project teams should carefully monitor the application of the new legal regime. The following paragraphs offer some examples of approaches that can be taken to streamline domestic laws and regulations with a view to simplifying business registration and to making it more accessible to MSMEs.

1. Transparency and accountability

62. A legal framework that fosters a transparent and accountable registration system will have a number of advantages. It will allow registration to occur with a limited number of steps, and it will require limited interaction with authorities, permit short time limits, be inexpensive, result in registration of a long-term or unlimited duration, apply countrywide and make registration very accessible for applicants.

63. Some of these objectives can be achieved by introducing short statutory time limits on business registration procedures and/or "silence is consent" rules, as seen in paragraph 39 of A/CN.9/WG.I/WP.93/Add.1. As a result of the "silence is consent" rules, when a business does not receive a decision on its registration application within a given time limit (established by law or regulation) it is considered to be duly registered.[58]

64. Another approach that can be, and often is, used in association with the previous one, is the use of standard registration forms. Such forms can easily be filled out by businesses without the need to seek the assistance of an intermediary, thus reducing the cost and de facto contributing to the promotion of business registration among MSMEs. These forms also help prevent errors by the registries, thus speeding up the overall process. In some

[56] See supra footnote 10, page 40.
[57] Ibid., page 74.
[58] See A/CN.9/WG.I/WP.85, paras. 49 ff.

jurisdictions, the adoption of standardized documents has been instrumental in streamlining the registration requirements and disposing of unnecessary documents.[59]

2. Clarity of the law

65. For jurisdictions wishing to facilitate business start-up, in particular of MSMEs, it is important to review the existing legal framework so as to identify possible impediments to the simplification of the registration process. The nature of the reform would very much depend on the status of the domestic legal framework and a variety of examples, based on States' experiences, are available.

66. These reforms may include decisions by States to shift the focus of the law towards private companies (such as the simplified business entities being considered by the Working Group), as opposite to public limited companies, particularly if the former currently account for the majority of the firms in the State. Reforms could also include the decision to move the legal provisions pertaining to small companies to the beginning of any new company law in order to make them easier to find or to use simpler language in any updated company law.[60]

67. One particularly relevant reform that would especially serve the purpose of clarity of the law would be a comprehensive review of the legal framework on business registration and a resulting unification of the various rules into a single piece of legislation. This could also allow for some flexibility to be built into the system, with the adoption of certain provisions as regulations or simply providing for the development of the necessary legal basis in order to introduce legal obligations by way of regulation at a later stage.[61]

3. Flexible legal entities[62]

68. As seen in paragraph 7 of A/CN.9/WG.I/WP.93/Add.1, evidence suggests that entrepreneurs tend to choose for their business the simplest legal form available when they decide to register and that States with rigid legal forms have an entry rate considerably lower than States with more flexible requirements. Jurisdictions should thus consider having simplified registration for sole proprietorships as well as introducing new types of business forms including limited liability vehicles, such as the simplified business entity, to meet MSME needs. For instance, in one State that has introduced a new legal form for business, the registration process for that new business type is much simpler. Entrepreneurs are not required to publish the articles of association (or other rules governing the operation or management of the business) in the Official Gazette; instead, these can be posted online through the Commercial Registry; and the involvement of a lawyer, notary or other intermediary is not obligatory for the preparation of documents or conducting a business name search.[63]

69. Abolishing or reducing the minimum paid in capital requirement,[64] would also facilitate MSME registration, since micro- and small businesses may not have the funds to meet a minimum capital requirement, and if they do, they may be unwilling or unable to commit part, or all, of their capital in order to establish their business. Instead of relying on a minimum capital requirement to protect creditors and investors, States have implemented alternative approaches such as the inclusion of provisions on solvency safeguards in their

---

[59] The Working Group may wish to note in this regard its decision to prepare standard forms in respect of its work on a legislative text on simplified business entities (see A/CN.9/800, para. 63).

[60] See A/CN.9/WG.I/WP.85, para. 56.

[61] See Investment Climate (World Bank Group), Business Registration Reform case study: Norway, 2011.

[62] For this section the Working Group may wish to note its discussion in respect of a legislative text on a simplified business entity. As those materials develop, their content will be reflected in this section on flexible legal entities.

[63] See, for example, Greece in V. Saltane, J. Pan, Getting Down to Business: Strengthening Economies through Business Registration Reforms, 2013, page 2. Other examples, including Colombia, exist (see A/CN.9/WG.I/WP.83).

[64] For a more thorough discussion on minimum capital requirements and simplified business entities, see A/CN.9/825, paras. 75-79.

legislation; conducting solvency tests; or preparing audit reports that show that the amount a company has invested is enough to cover the establishment costs.[65]

70. Introducing new simplified forms of limited liability and other enterprises is often coupled with a considerable reduction or complete abolition of the minimum capital requirements that other legal forms of enterprise are required to deposit upon formation. In several States that have adopted simplified business entities, the minimum capital requirement has been abolished completely, and in other cases, initial registration or incorporation has been allowed upon deposit of a nominal amount of capital. In other States, progressive capitalization has been introduced, requiring the business to set aside a certain percentage of its annual profits until its reserves and the share capital jointly total a required amount.[66] In other cases, progressive capitalization is required only if the simplified limited liability enterprise intends to graduate into a full-fledged limited liability company, for which a higher share capital would be required. There is however no obligation to do so.[67]

71. Another reform that would be conducive to improved business registration is to provide freedom to entrepreneurs to conduct all lawful activities without requiring them to specify the scope of their venture.[68] This is particularly relevant in those jurisdictions where entrepreneurs are required to list in their articles of association the specific activity or activities in which they intend to engage so as to restrain firms from acting beyond the scope of their goals and, according to certain literature, to protect shareholders and creditors. Allowing for the inclusion in the articles of association (or other rules governing the operation or management of a business) of a so-called "general purpose clause" which states that the company's aim is to conduct any trade or business and grants it the power to do so, facilitates business registration. This approach is far less likely to require additional or amended registration in the future, as enterprises may change their focus since entrepreneurs could change activities without amending their registration, provided that the new business activity is a lawful one and that the appropriate licences have been obtained. Additional options to the inclusion of a general purpose clause, which would support the same goal, could be passing legislation that makes unrestricted objectives the default rule in the jurisdiction, or abolishing any requirement for businesses, in particular privately held companies, to state objectives for registration purposes.[69]

E. Business registration and other fees

72. Payment of a fee in order to ensure the provision of registration services can be said to be a standard procedure across jurisdictions, including in those jurisdictions whose registries are run by the government and receive public funding. The most common types of fees are those for registration and for information products, while fines may also generate funding to a lesser extent. In some jurisdictions, registries may also charge an annual fee to keep a company in the registry (these fees are unrelated to any particular activity), as well as fees to register annual accounts or financial statements.[70]

73. Although they generate revenue for the registries, fees can affect a business' decision whether to register, since they may impose a heavy burden on businesses, in particular on MSMEs. Fees for new registrations, for instance, can prevent businesses from registering, while annual fees to keep a company in the registry or to register annual accounts could encourage businesses not to maintain their registered status. States should take these and other indirect effects into consideration when establishing fees for registration services. A registration system aiming to support MSMEs and increase the number of them that register should adopt a balanced approach between recovering capital and operational costs within a reasonable period of time and encouraging MSMEs to register.

[66] See Italy, ibid., para. 29.

[67] See, for instance, Germany, in Simplified business forms in the context of small and medium enterprises, the German approach, presentation at the UNCITRAL International Colloquium on Microfinance (16-18 January 2013), available at www.uncitral.org.

[68] This is a feature on which the Working Group has already agreed in its discussion of a legislative text on a simplified business entity (see A/CN.9/825, para. 70).

[69] See A/CN.9/WG.I/WP.85, para. 52.

[70] See European Commerce Registers' Forum Report 2013, page 72.

1. Registration fees

74. Several States see business registration as a public service that should encourage enterprises to enter the legally regulated economy rather than as a revenue-generating mechanism, and have thus set registration fees at a level that encourages businesses to register. In such States, the use of flat fee schedules for registration, regardless of the size of the business, is the most common approach. There are also examples of States that provide business registration free of charge. This approach may encourage businesses to register.

2. Fines

75. Fines for breaching obligations related to business registration, such as late filing, can represent a means of revenue generation. Their collection, however, again requires a balanced approach. Several jurisdictions use fines as disincentives for businesses to operate extra-legally. In some cases, legislative provisions link the company's enjoyment of certain benefits to the timely filing of required submissions; in others, a sequence of increasing fines for late filing is enforced that ultimately can result in compulsory liquidation. However, if fines are used as the main source of funding for the registry, as occurs in certain jurisdictions, it can have a detrimental effect on the efficiency of the registry. Since registries would lose revenue as a result of improved business compliance, they could have weak motivation to improve it. It is thus recommended that States should not consider fines as the main source of revenue of a registry, but that they determine fines at a level that encourages business registration without negatively affecting the funding of registries when compliance improves.

3. Fees from information products

76. As is the case in various jurisdictions, fees from information products can be a more viable option for registries to derive their self-generated funding. Such fees also motivate registries to provide valuable information to their clients, to maintain the currency of their records and to offer additional information services. A recommended good practice for jurisdictions aiming at improving this type of revenue generation would be to avoid charging fees for basic services, such as name searches, but to charge for more sophisticated services (for example, direct downloading or providing bulk information). Since fees for information products may influence consumers' choice of products, they should be set at a level low enough to make the use of less expensive products attractive to businesses; otherwise, businesses may request information products that are more costly for the registry to produce (for example, ordering printed versions by telephone).[71]

4. Fee determination

77. It is evident from the above paragraphs that striking a balance between the sustainability of the registry operations and the promotion of business registration is a key consideration when setting fees, regardless of the type of fee. One recommended approach, followed in many States, is to apply the principle of "cost recovery" according to which there should be no profit from fees generated in excess of cost. When applying such a principle, States would be required to first assess the level of revenue from registry fees needed to achieve cost recovery. In carrying out the assessment, account should be taken not only of the initial start-up costs related to the establishment of the registry but also of the costs necessary to fund its operation. By way of example, these costs may include: (a) the salaries of registry staff; (b) upgrading and replacing hardware and software; (c) ongoing staff training; and (d) promotional activities and training for registry users. In the case of ICT supported registries, if the registry is developed in partnership with a private entity, it may be possible for the private entity to make the initial capital investment in the registry infrastructure and recoup its investment by taking a percentage of the service fees charged to registry users once the registry is operational.

78. Evidence shows, however, that even when the cost-recovery approach is followed, there is considerable room for variation among States, as the approach requires a determination of which costs should be covered, which can be interpreted in many different ways. In one jurisdiction, for instance, fees for new registrations are calculated according to

[71] See supra footnote 19, page 17.

costs incurred by an average business for registration activities over the life cycle of the business. In this way, potential amendments, apart from those requiring official announcements, are already covered by the fee that companies pay for new registration. This approach is said to result in several benefits, such as: (a) rendering most amendments free of charge, which encourages compliance among registered businesses; (b) saving resources related to fee payment for amendments for both the registry and the businesses; and (c) using the temporary surplus produced by advance payment for amendments to improve registry operations and functions. In other cases, jurisdictions have decided to charge fees below the actual costs registries need to sustain in order to promote business registration. In these cases, however, the services provided to businesses would likely be subsidized with public funds.

79. Regardless of the approach taken to determine the applicable fees, States should clearly establish which registration and information fees are due from the registry users. One approach would be to set out the fees in a "regulation", which could be either a formal regulation or more informal administrative guidelines that the registry can revise according to its needs. If administrative guidelines are used, this approach would provide greater flexibility to adjust the fees in response to subsequent events, such as the need to reduce the fees once the capital cost of establishing the registry has been recouped. The disadvantage of this approach, however, is that the lack of a formal arrangement may be abused by the registry to unjustifiably adjust the fees upwards. Alternatively, a State may choose not to specify the registry fees in such a regulation, but rather to designate the administrative authority that is permitted to set the registry fees. The State may also wish to consider specifying in the law or the regulation on business registration the types of service that the registry may provide free of charge.

80. In setting fees in a hybrid (paper and electronic) registry system, it may be reasonable for the State to decide to charge higher fees to process applications and search requests submitted in paper form because they must be processed by registry staff, whereas electronic applications and search requests are directly submitted to the registry and do not require attention from registry staff. Charging higher fees will also encourage the user community to eventually transition to using the direct electronic registration and search functionalities. However, in making this decision, States may wish to consider whether charging such fees may have a disproportionate effect on MSMEs that may not have easy access to electronic services.

F. Capacity development

81. Once a reform of the registration system has been initiated, developing the capacity of the personnel entrusted with registration functions is an important aspect of the process. Poor service often affects the efficiency of the system and it can result in errors or necessitate multiple visits to the registry by users.[72] Capacity development of registry staff could not only focus on enhancing their performance and improving their knowledge of the new registration processes, ICT solutions and client orientation, but staff could also be trained in new ways of improving registration.[73]

82. As seen in various States, different approaches can be followed, from the more traditional training methods based on lectures and classroom activities, to more innovative ways that can be driven by the introduction of new registration systems. In some jurisdictions, team-building activities and role-playing have been used with some success, since reforms often break barriers between various government departments and require the improvement of the flow of information among them, as well as an understanding of different aspects of the procedures with which specific registry staff may not be familiar.[74] In other cases, States have opted for developing action plans with annual targets for improving in international rankings, and linking promotions and bonuses for staff to the achievement of the action plan's goals. In still other cases, States have decided to introduce new corporate values in order to enhance the public service system, including business registration.[75] Although the

[74] Ibid., see also K. Rada and U. Blotte, Improving business registration procedures at the sub-national level: the case of Lima, Peru, 2007, page 3.
[75] See A/CN.9/WG.I/WP.85, para. 60 and supra footnote 15, page 21.

relevant governmental authority will usually take the lead in organizing capacity development programmes for the registry staff, the expertise of the legal and business communities could be enlisted to assist.

83. Peer-to-peer learning and international networks are also effective approaches to build capacity to operate the registry. These tools enable registry staff to visit other jurisdictions and States with efficient and effective registration systems. In order to maximize the impact of such visits, it is important that they occur in jurisdictions familiar to the jurisdiction undergoing the reform. This approach has been followed with success in several jurisdictions engaging in business registration reform. International forums and networks also provide platforms for sharing knowledge and exchanging ideas among registry personnel around the world for implementing business registration reform.[76]

84. It is equally important that potential registry users, whether they are business registrants or searchers, are given clear advice on the practical logistics of the registration and searching processes, for example, through the dissemination of guidelines and tutorials (ideally in both printed and electronic form) and the availability of in-person information and training sessions (see also para. 7 of A/CN.9/WG.I/WP.93/Add.1). In some States, for instance, prospective users of the system are referred to classroom-based and/or eLearning opportunities available through local educational institutions or professional associations.[77]

D. Note by the Secretariat on observations by the Government of the French Republic

(A/CN.9/WG.I/WP.94)

[Original: French]

The Government of the French Republic has submitted to the Secretariat of the United Nations Commission on International Trade Law (UNCITRAL) the following observations in order to provide the Working Group with additional information for its deliberations. The text of the observations is reproduced as an annex to this note in the form in which it was received by the Secretariat, with formatting changes.

Contents

Annex

Observations by the Government of the French Republic

1. The present document complements document A/CN.9/WG.I/WP.87, prepared at the request of the Working Group, and is submitted in preparation for future work on simplified business registration.

1. The need for an effective scheme to protect individual entrepreneurs

1.1. The importance of individual entrepreneurs

2. Today in France over 1.5 million business heads, representing almost half of all existing enterprises, are self-employed. Seventy per cent of enterprises set up in 2014 were done so on a self-employment basis, reflecting the appeal of this status for entrepreneurs.

3. The entry into force of the tax and social security regime for *auto-entrepreneurs* [simplified form of self-employment], aimed exclusively at the self-employed, has contributed substantially to the increase in this modus operandi.

4. Thus, in 2014, of the 550,000 new enterprises established, 390,000 were in the form of sole proprietorships [*entreprises individuelles*], including 280,000 under the *auto-entrepreneur* regime. New enterprises in the form of companies account for less than one third of the total number of new enterprises.

5. Figures also show that while individual entrepreneurs account for more than half of all enterprises, they are, in fact, small enterprises, 75 per cent of which have no employees. The share of such enterprises in added value, understood as turnover less all intermediate consumption expenditure on delivering the services or products sold, is around 20 per cent.

6. In fact, individuals seeking to establish and develop a business, whether of a commercial, agricultural, artisanal or professional nature, alone or with employees, mostly choose the self-employment option owing to its great simplicity.

7. However, while self-employment today remains the preferred modus operandi of small entrepreneurs, the latter and their families are at risk if the business fails: the entrepreneur is liable for professional commitments from the totality of his assets, whether those assets are allocated to the enterprise or not, owing to the lack of distinction between the assets of the enterprise and the personal assets of the entrepreneur.

8. Very small enterprises are often vulnerable. In 2009, 61,595 business failures were recorded. The sole proprietorship constitutes a form of enterprise that is exposed to the risk of bankruptcy, making it vulnerable if a client defaults on payment or if it is a subcontractor of larger entities that are themselves in difficulty. Failures of sole proprietorships account for 15,500 failures, or around one failure in four. Ninety per cent of these latter cases involve craftspeople or retailers (13,710 failures in 2009).

1.2. Inadequate protection provided by schemes for individual entrepreneurs

9. Prior to the “Individual Entrepreneur with Limited Liability” (EIRL) scheme, there were two main schemes for limiting the liability of an individual entrepreneur. It is worth recalling such schemes here, as, by showing their limitations, they highlight the inadequacy of certain responses to the needs of small entrepreneurs:

(i) Formation of a Single-Member Private Limited Liability Company (EURL);

(ii) Declaration of unseizability allowing the individual entrepreneur to render exempt from seizure certain property from his personal assets.

10. (i) Use of the EURL form of company, introduced in 1985, has remained limited, despite successive reforms that have greatly simplified the formation and operation of such companies. Such reforms include the abolition of a minimum capital for multi-member and single-member limited liability companies (Economic Initiative Act of 1 August 2003); the introduction of model statutes (Small and Medium-Sized Enterprises Act of 2 August 2005); the lightening of the occupational legal publication regime, and the automatic

implementation by default of model statutes (Economic Modernization Act of 4 August 2008).

11. However, after 25 years in operation, the EURL scheme has been largely unused by entrepreneurs. In 2008, EURLs accounted for only 6.2 per cent of all enterprises.

12. There may be a number of reasons for this relative lack of success:

(a) Many entrepreneurs believe that the obligations arising from EURL status (maintaining a record of decisions, accounting and financial management) are an obstacle to initiative;

(b) Psychological barriers remain for some entrepreneurs who are not seeking to create a legal personality separate from themselves for their entrepreneurial activities;

(c) In fact, the changeover to company status is for many only contemplated once an enterprise has reached a sufficient level of growth, when the individual entrepreneur seeks to develop his business together with other partners, or when development and the attendant fiscal and accounting implications require the formation of a legal person.

13. (ii) The declaration of unseizability enables the self-employed person to declare as exempt from seizure his rights on the immovable property which constitutes his principal place of residence (Economic Initiative Act of 1 August 2003) and, more generally, his rights on any land or building not allocated to business use (since the Economic Modernization Act of 4 August 2008).

14. However, this measure has had limited success. It appears to concern only a small number of entrepreneurs. Thus, by late 2009, only a cumulative total of around 10,000 declarations of unseizability had been registered since the scheme's inception in 2003.

15. This is due to the partial nature of the protection afforded, which relates only to immovable assets and not to savings or movable assets, which may in some instances be more significant. Such protection is therefore useful only if the entrepreneur owns immovable property; this is not always the case, especially at the start-up phase for new enterprises.

1.3. Individual Entrepreneur with Limited Liability (EIRL) scheme

16. Creating allocated assets consists, for a natural person, in allocating assets to his professional activity that are segregated from his personal assets, but without creating a legal person that is separate from the natural person.

17. The concept of allocated assets challenges the civil law principle, hitherto uncontested on account of the unity of legal personality, of the unity of assets, as it may be understood from article 2284 of the Civil Code, which provides that "[w]hoever has bound himself personally, must fulfil his commitment from all his movable and immovable property, present and future". Likewise, article 2285 provides that "[t]he property of a debtor is the common pledge of his creditors; and the proceeds of its sale shall be distributed among them pro rata, unless there are lawful causes of preference among the creditors".

18. According to the unity of assets principle, to one person corresponds one set of assets, the basis of assessment for the creditors' general right of pledge. Therefore, all the debtor's assets serve to cover the contracted obligations, subject to the availability of securities. It is irrelevant whether the debts are of a personal nature or arose in the context of the professional activity.

19. In France, the EIRL Act of 15 June 2010 therefore constituted a departure based on two principles:

(a) Freedom of choice for the entrepreneur, who is not forced to set up a company to protect his assets and family;

(b) Encouragement for entrepreneurship by preventing the bankruptcy of a business from automatically leading to personal and family ruin.

20. It is notable that such a legal status already existed in many countries, both developed and developing. Those countries include: Liechtenstein since 1926 (under the title *Einzelunternehmung mit beschränkter Haftung*), Costa Rica since 1964, Panama since 1966,

El Salvador since 1970, Chile since 2003, Peru since 2005, Dominican Republic since 2009, Brazil since 2012 (under the titles *Empresa individual de responsabilidad limitada* in Spanish, and *Empresa individual de responsabilidade limita* in Portuguese), and Portugal since 1986 (under the title *Estabelecimento mercantile individual de responsabilidade limitada*).

21. In France, since the EIRL status came into operation in 2011, more than 30,000 EIRLs have been registered.

2. How the EIRL scheme operates

2.1. Scope of application

22. The status of individual entrepreneur with limited liability is open to any natural person engaged on their own behalf in a business activity of a commercial, craft, professional or agricultural nature. *Auto-entrepreneurs* who are individual entrepreneurs are therefore eligible for the scheme. The place of filing of the allocation declaration may differ depending on the activity carried out by the EIRL.

2.2. Formation of allocated assets

23. The regulations seek to combine simplicity with third-party protection, either at the time the allocated assets are formed or during the lifetime of the activity.

24. The allocated assets shall be formed pursuant to the filing of an allocation declaration containing:

(a) A description of the nature, quality, quantity and value of the property, rights, obligations or securities allocated to the professional activity;

(b) A reference to the object of the professional activity to which the assets are allocated;

(c) Where applicable, documents certifying the completion of additional formalities required in the case of allocation of immovable property, jointly-owned or undivided property, or valuable property.

25. The allocation declaration must be filed:

(a) Either with the occupational legal publications register with which the individual entrepreneur is required to register (i.e. the commercial and companies register for traders and the trades register for craftspeople);

(b) Or with the occupational legal publications register chosen by the individual entrepreneur in the case of dual registration (this applies to craftspeople registered with the trades register who may also have to register with the register of companies if they also carry out commercial transactions), in which case, a note will be inserted on the other register;

(c) Or, for natural persons not required to register with an occupational legal publications register (i.e. members of the liberal professions and *auto-entrepreneurs* exempt from registration) and for farmers (as there is not yet an agricultural register), with a register held at the registry of the court ruling on commercial matters with jurisdiction over their principal place of business. The regulations prescribe a special register at the registry of the commercial court, which is also responsible for holding the commercial and companies register. The publishing conditions of this register shall be set out in a Council of State decree.

26. Allocation does not constitute a contribution as it does not entail transfer of title in consideration of company shares. Nevertheless, certain formalities relating to contributions to a company have been included in the regulations in order to protect third parties. Thus, the allocation of immovable property must be notarized and published in the mortgage registry, while the allocation of jointly-owned or undivided property requires the express consent of spouses or undivided co-owners and proof that they have been informed about the rights of creditors on the allocated assets.

27. Lastly, the allocation of property exceeding an amount fixed by decree (30,000 euros) must be valued by an expert along the lines of a valuation by a valuer of contributions in the case of a contribution in kind to a company. However, it has been agreed,

in the interest of simplicity and cost savings, to allow the valuation to be made not only by an external auditor, but also by a public accountant, management and accounting association or notary (the latter may only value immovable property).

28. Failure to observe these formalities when forming allocated assets or during the lifetime of the activity shall result in the unenforceability of the property allocation.

2.3. Composition of allocated assets

29. The composition of assets must comply with certain rules of allocation that are both objective and subjective:

(a) The property, rights, obligations or securities needed to carry out the professional activity must be allocated. The concept of necessary property is somewhat restrictive: in essence it pertains to property that is work-related in nature (e.g. business or goodwill);

(b) The property, rights, obligations or securities used to carry out the professional activity may also be allocated if the entrepreneur so decides, to enable the entrepreneur to provide a broader basis for assessment for his business assets (this may include mixed property).

30. The assets comprise property and liabilities. The allocation of debts attached to property follows the rules mentioned in the preceding paragraphs: where debt is attached to necessary property, it must be allocated, whereas when it is attached to property that is used, the entrepreneur is free to decide whether or not to allocate it.

2.4. Consequences of allocation declaration

31. The allocation declaration effects the segregation of assets and thereby reduces the basis for assessment for the right of pledge of the EIRL's business creditors and the other creditors against whom the declaration is enforceable: the entrepreneur's liability is thus limited both with regard to his business creditors, whose rights have arisen in the context of the professional activity to which the assets are allocated and whose sole general right of pledge are the allocated assets, and with regard to the other creditors, whose sole general right of pledge are the unallocated assets. However, these other creditors retain, in the event that the unallocated assets are insufficient, a right of pledge on the profits made by the EIRL during the financial year ended. This is a consideration granted to personal creditors who, unlike in the case of incorporation, do not get back shares in the corporate assets of their debtor.

2.5. Development of allocated assets

32. All assets are subject to change in accordance with the developing professional activity of the entrepreneur. In the interest of simplicity, there is no requirement to file an allocation declaration each time a new allocation is made. If, however, property is allocated during the lifetime of the professional activity, certain formalities need to be completed.

33. The law provides that third parties must be notified of the composition and value of the assets allocated through the filing of annual accounts, which the EIRL, unlike other individual entrepreneurs, is obliged to do. The annual accounts are filed with the registry where the allocation declaration was filed. This formality ensures that third parties are properly notified insofar as the accounts are prepared pursuant to the financial obligations applicable to traders. Thus, the balance sheet of the EIRL shows the assets and liabilities of the allocated fund, and thus its development from one year to the next. A decree sets out the simplified accounting obligations for *auto-entrepreneurs*, intended to reconcile the accounting simplicity inherent in the *auto-entrepreneur* regime with proper notification of third parties of the development of the allocated assets.

3. Rules governing the EIRL scheme

Article L. 526-6 of the Commercial Code

Any individual entrepreneur may allocate separate assets to his professional activity as distinct from his personal assets, without creating a legal person.

These assets shall comprise all property, rights, obligations or securities held by the individual entrepreneur and that are necessary to carry out his professional activity. It may also include property, rights, obligations or securities held by the individual entrepreneur, used for carrying out his professional activity and which he decides to allocate to his professional activity. The same property, right, obligation or security may only be part of a single allocation of assets.

As an exception to the preceding paragraph, individual entrepreneurs carrying out an agricultural activity as set out in article L. 311-1 of the Rural and Maritime Fisheries Code have the option of not allocating the land used for their farm to their professional activity. This option applies to all land owned by the farmers.

In order to carry out the professional activity to which the assets are allocated, individual entrepreneurs shall use a name incorporating their name, immediately preceded or followed by the words "Individual Entrepreneur with Limited Liability" or the initials "EIRL".

Article L. 526-7 of the Commercial Code

The allocated assets shall be formed pursuant to a declaration filed:

1. Either with the occupational legal publications register with which the individual entrepreneur is required to register;

2. Or with the occupational legal publications register chosen by the individual entrepreneur in the case of dual registration, in which case a note will be inserted on the other register;

3. Or, for natural persons not required to register with an occupational legal publications register, with a register held at the registry of the court ruling on commercial matters with jurisdiction over their principal place of business;

4. Or, for farmers, with the relevant chamber of agriculture.

When the individual entrepreneur is transferred to another registry or attached to another registry during the course of the activity, his allocation declaration, the other declarations provided for under this section, any entries made in the register and all the public records filed are transferred by the former body maintaining the register to the newly competent body. In this case, the newly competent body shall be exempted from the verifications referred to in article L. 526-8 and a note regarding the transfer shall be entered on the first register. The transfer shall be effected digitally and shall not give rise to any charges or fees.

Article L. 526-8 of the Commercial Code

Bodies charged with keeping the registers mentioned in article L. 526-7 shall only accept the filing of a declaration referred to in that same article after verifying that it includes:

1. A description of the property, rights, obligations or securities allocated to the professional activity, in terms of nature, quality, quantity and value;

2. Reference to the object of the professional activity to which the assets are allocated. A change to the object shall give rise to a note entered in the register where the declaration provided for under article L. 527-7 was filed;

3. Where necessary, the documents certifying the completion of formalities referred to in articles L. 526-9 to L. 526-11.

Without prejudice to compliance with the valuation and allocation rules provided for under this section, if the individual entrepreneur was exercising his professional activity prior to filing the declaration, he may submit as a description the balance sheet of his last financial year, provided that the said balance sheet was closed at least four months prior to the date of filing of the declaration. In this case, all the elements contained in the balance sheet comprise the description, and the transactions effected since the date of the last financial year for which the accounts have been closed are included in the first financial year of the individual entrepreneur with limited liability.

Article L. 526-9 of the Commercial Code

The allocation of an immovable property or part thereof shall be received by notarial deed and published in the mortgage registry or, in the departments of Bas-Rhin, Haut-Rhin and Moselle, in the land registry where the property is located. Where the individual entrepreneur allocates only a portion of one or more immovable properties, he shall identify this in a description of the division of property.

The drafting of the notarial deed and the completion of the land registration formalities shall give rise to the payment to notaries of fees for which the ceiling is determined by decree.

Where the allocation of an immovable property or portion thereof occurs after the formation of the allocated assets, a supplementary declaration shall be filed in the register where the declaration stipulated under article L. 526-7 was filed. Article L. 526-8 shall apply, with the exception of 1 and 2.

Non-compliance with the rules set out in this article shall result in the allocation being ineffective against third parties.

Article L. 526-10 of the Commercial Code

Any part of the allocated assets other than liquid assets with a declared value higher than a total sum fixed by decree shall be valued based on a report appended to the declaration and drawn up, under their responsibility by an external auditor, a public accountant, an association for accounting and management or a notary appointed by the individual entrepreneur. Valuation by a notary may only relate to immovable property.

Where property referred to in the first paragraph is allocated after the formation of allocated assets, it shall be valued in the same way and shall give rise to the filing of a supplementary declaration in the register where the declaration set out under article L. 526-7 was filed. Article L. 526-8 shall apply, with the exception of 1 and 2.

Where the declared value is higher than that proposed by the external auditor, public accountant, association for accounting and management or notary, the individual entrepreneur shall be responsible, for a period of five years in respect of third parties for all of its allocated and unallocated assets up to the difference between the value proposed by the external auditor, public accountant, association for accounting and management or notary and the declared value.

Where an external auditor, public accountant, association for accounting and management or notary has not been used, the individual entrepreneur shall be responsible for a period of five years in respect of third parties for all its allocated and unallocated assets, up to the difference between the actual value of the property at the time of allocation and the declared value.

Article L. 526-11 of the Commercial Code

Where all or some of the allocated property is jointly owned or undivided, the individual entrepreneur shall provide proof that the spouse or undivided co-owners have consented to the allocation and that they have been informed of the rights of creditors as set out in 1 of article L. 526-12 on the allocated assets. The same jointly-owned or undivided property or the same part of a jointly-owned or undivided immovable property may only be allocated to a single set of allocated assets.

Where the allocation of jointly-owned or undivided property or part thereof occurs after the formation of the allocated assets, a supplementary declaration shall be filed in the register where the declaration stipulated under article L. 526-7 was filed. Article L. 526-8 shall apply, with the exception of 1 and 2.

Non-compliance with the rules set out in this article shall result in the allocation being ineffective against third parties.

Article L. 526-12 of the Commercial Code

The allocation declaration referred to in article L. 526-7 shall be enforceable by operation of law against creditors whose rights arose after it was filed.

It is enforceable against creditors whose rights arose prior to its filing provided that the individual entrepreneur with limited liability mentions this in the allocation declaration and notifies the creditors as set out in conditions fixed by regulation.

In this case, the creditors concerned may lodge an objection to the declaration being effective against them within a period fixed by regulation. A court order shall reject the objection or order either the repayment of the debts or the formation of guarantees if the individual entrepreneur offers them and if they are judged adequate.

Failing repayment of the claims or formation of the guarantees ordered, the declaration shall not be enforceable against the creditors whose objection has been accepted.

Objections made by a creditor shall not have the effect of preventing the formation of the allocated assets.

As an exception to articles 2284 and 2285 of the Civil Code:

1. Creditors against whom the allocation declaration is effective and whose rights arose during the exercising of professional activity to which the assets are allocated shall have as sole general right of pledge the allocated assets;

2. The other creditors against whom the declaration is effective shall have as sole right of general pledge the unallocated assets.

However, the individual entrepreneur with limited liability shall be responsible from all of his assets and rights in the case of fraud or in the event of a serious breach of the rules set out in the second paragraph of article L. 526-6 or of the obligations set out in article L. 526-13.

Where the unallocated assets are insufficient, the general right of pledge of creditors mentioned in 2 of this paragraph may be exercised on the profits made by the individual entrepreneur with limited liability over the financial year ended.

Article L. 526-13 of the Commercial Code

The professional activity to which the assets are allocated shall be determined by self-balancing accounting, performed in conditions defined in articles L. 123-12 to L. 123-23 and L. 123-25 to L. 123-27.

As an exception to article L. 123-28 and to the first paragraph of this article, simplified accounting obligations shall apply to the professional activity of persons coming under the taxation systems defined in articles 50-0, 64 and 102 ter of the General Tax Code.

The individual entrepreneur with limited liability shall be required to open one or more bank accounts in a credit institution, exclusively dedicated to the activity to which the assets have been allocated.

Article L. 526-14 of the Commercial Code

The annual accounts of the individual entrepreneur with limited liability or, where applicable, the document or documents arising from simplified accounting obligations as set out under the second paragraph of article L. 526-13 shall be filed each year in the register where the declaration set out under article L. 526-7 was filed, and appended thereto. They shall be transmitted, for appending thereto, to the register set out under 3 of article L. 526-7 where the declaration is filed with the trades register in the case set out under 1 of the same article and, where applicable, with the commercial and companies register in the case provided for under 2 of the same article. From the date of filing, they shall constitute an update to the formation and value of the allocated assets.

In the case of non-compliance with the obligation referred to in the first paragraph, the presiding judge of the court, ruling by way of summary proceedings may, at the request of any interested party or the Office of the Public Prosecutor and subject to a coercive progressive fine, enjoin the individual entrepreneur with limited liability to file his annual accounts or, where applicable, the document or documents arising from the simplified accounting obligations set out under the second paragraph of article L. 526-13.

Article L. 526-15 of the Commercial Code

In the event of a waiver by the individual entrepreneur with limited liability or the death of the individual entrepreneur, the allocation declaration shall cease to be effective. However, in the event of cessation of the professional activity to which the assets are allocated and concurrent with the waiver or in the event of death, the creditors referred to in 1 and 2 of article L. 526-12 shall retain as sole general right of pledge that right which was theirs at the time of cessation or death.

In the case of a waiver, the individual entrepreneur shall have a note entered in the register where the declaration provided for under article L. 526-7 was filed. In the event of death, an heir, legal successor or any other person authorized for this purpose shall have the note entered in the register.

Article L. 526-16 of the Commercial Code

As an exception to article L. 526-15, the allocation shall not cease where one of the deceased individual entrepreneur's heirs or legal successors expresses his intention to continue the professional activity to which the assets were allocated, subject to compliance with the inheritance provisions. The person having expressed his intention to continue the professional activity shall have a note entered in the register where the declaration referred to in article L. 526-7 is filed within three months from the date of death.

The taking over of the allocated assets, where applicable after the partition and sale of some allocated assets for inheritance purposes, is subject to the filing of a takeover declaration in the register where the declaration referred to in article L. 526-7 was filed.

Article L. 526-17 of the Commercial Code

I. — The individual entrepreneur with limited liability may assign against payment, transfer inter vivos free of charge or contribute to the company all of his allocated assets and transfer title thereof under the terms set out in II and III of this article without liquidating the assets.

II. — Assignments against payment or transfers inter vivos free of charge of the allocated assets to a natural person shall entail their takeover with allocation retained to the assets of the assignee or donee. Such assignment or transfer shall lead to the assignor or donor filing a declaration of transfer in the register where the declaration referred to in article L. 526-7 was filed and shall be published. The takeover shall not be enforceable against third parties until these formalities have been completed.

The assignment or contribution of allocated assets to a legal person shall entail the transfer of title to the assignee's or the company's assets but the allocation thereof shall not be retained. It shall give rise to the publication of a notice. Transfer of title shall not be effective against third parties until this formality has been completed.

III. — The declaration or notice mentioned in II shall be accompanied by a description of the property, rights, obligations or securities comprising the allocated assets.

Articles L. 141-1 to L. 141-22 shall not apply to the assignment or contribution to a company of a business occurring subsequent to the assignment or contribution to a company of the allocated assets.

The assignee, donee or beneficiary of the contribution shall be indebted to the creditors of the individual entrepreneur with limited liability referred to in 1 of article L. 526-12 in place of the latter, without this replacement leading to novation in their respect.

The creditors of the individual entrepreneur with limited liability referred to in 1 of article L. 526-12 whose claim predates the publication date mentioned in II of this article, as well as the creditors against whom the declaration is not effective and whose rights arose prior to the filing of the declaration referred to in article L. 526-7, may, where the allocated assets are the subject of a donation inter vivos, lodge an objection to the transfer of the allocated assets within a fixed period set by regulation. A court order shall reject the objection or order either the repayment of the debts or the formation of guarantees if the assignee or donee offers them and if they are judged adequate.

Failing repayment of the claims or formation of the guarantees ordered, the transfer of the allocated assets shall not be binding on those creditors whose objection has been accepted.

Objections made by a creditor shall not have the effect of preventing the transfer of the allocated assets.

Article L. 526-18 of the Commercial Code

The individual entrepreneur with limited liability shall determine the income he shall pay into the unallocated assets.

Article L. 526-19 of the Commercial Code

The scales of charges for the formalities for filing and transferring declarations and for registering the notes referred to in this section, as well as for the filing and transfer of annual accounts or of the document or documents arising from simplified accounting obligations provided for under the second paragraph of article L. 526-13 shall be fixed by decree.

The formality of filing the declaration referred to in article L. 526-7 shall be free of charge where the declaration is filed simultaneously with the application for registration in the occupational legal publications register.

Article L. 526-20 of the Commercial Code

The Office of the Public Prosecutor and any interested party may apply to the presiding judge of the court ruling by way of summary proceedings to enjoin the individual entrepreneur with limited liability, subject to a progressive fine, to display the company name on all deeds and documents, immediately preceded or followed by the words “Individual Entrepreneur with Limited Liability” or the initials “EIRL”.

Article L. 526-21 of the Commercial Code

The implementing provisions of the present section shall be determined in a State Council decree.

E. Report of the Working Group on MSMEs on the work of its twenty-sixth session (New York, 4-8 April 2016)

(A/CN.9/866)

[Original: English]

Contents

I. Introduction

1. At its forty-sixth session, in 2013, the Commission requested that a working group should commence work aimed at reducing the legal obstacles encountered by micro, small and medium-sized enterprises (MSMEs) throughout their life cycle.[1] At that same session, the Commission agreed that consideration of the issues pertaining to the creation of an enabling legal environment for MSMEs should begin with a focus on the legal questions surrounding the simplification of incorporation.[2]

2. At its twenty-second session (New York, 10 to 14 February 2014), Working Group I (MSMEs) commenced its work according to the mandate received from the Commission. The Working Group engaged in preliminary discussion in respect of a number of broad issues relating to the development of a legal text on simplified incorporation[3] as well as on what form that text might take,[4] and business registration was said to be of particular relevance in the future deliberations of the Working Group.[5]

3. At its forty-seventh session, in 2014, the Commission reaffirmed the mandate of Working Group I, as set out above in paragraph 1.[6]

4. At its twenty-third session (Vienna, 17 to 21 November 2014), Working Group I continued its work in accordance with the mandate received from the Commission. Following a discussion of the issues raised in working paper A/CN.9/WG.I/WP.85 in respect of best practices in business registration, the Working Group requested the Secretariat to prepare further materials based on parts IV and V of that working paper for discussion at a future session. In its discussion of the legal questions surrounding the simplification of incorporation, the Working Group considered the issues outlined in the framework set out in working paper A/CN.9/WG.I/WP.86, and agreed that it would resume its deliberations at its twenty-fourth session beginning with paragraph 34 of that document.

5. At its twenty-fourth session (New York, 13 to 17 April 2015), the Working Group continued its discussion of the legal questions surrounding the simplification of

incorporation. After initial consideration of the issues as set out in Working Paper A/CN.9/WG.I/WP.86, the Working Group decided that it should continue its work by considering the first six articles of the draft model law and commentary thereon contained in Working Paper A/CN.9/WG.I/WP.89, without prejudice to the final form of the legislative text, which had not yet been decided. Further to a proposal from several delegations, the Working Group agreed to continue its discussion of the issues included in A/CN.9/WG.I/WP.89, bearing in mind the general principles outlined in the proposal, including the "think small first" approach, and to prioritize those aspects of the draft text in A/CN.9/WG.I/WP.89 that were the most relevant for simplified business entities. The Working Group also agreed that it would discuss the alternative models introduced in A/CN.9/WG.I/WP.87 at a later stage.

6. At its forty-eighth session, in 2015, the Commission noted the progress made by the Working Group in the analysis of the legal issues surrounding the simplification of incorporation and to good practices in business registration, both of which aimed at reducing the legal obstacles encountered by MSMEs throughout their life cycle. After discussion, the Commission reaffirmed the mandate of the Working Group under the terms of reference established by the Commission at its forty-sixth session in 2013 and confirmed at its forty-seventh session in 2014.[7] In its discussion in respect of the future legislative activity, the Commission also agreed that document A/CN.9/WG.I/WP.83 should be included among the documents under consideration by Working Group I for the simplification of incorporation.[8]

7. At its twenty-fifth session (Vienna, 19 to 23 October 2015), the Working Group continued its preparation of legal standards aimed at the creation of an enabling legal environment for MSMEs, exploring the legal issues surrounding the simplification of incorporation and on good practices in business registration. In terms of the latter, following presentation by the Secretariat of documents A/CN.9/WG.I/WP.93, Add.1 and Add.2 on key principles of business registration and subsequent consideration by the Working Group of A/CN.9/WG.I/WP.93, it was decided that a document along the lines of a concise legislative guide on key principles in business registration should be prepared, without prejudice to the final form that the materials might take. To that end, the Secretariat was requested to prepare a set of draft recommendations to be considered by the Working Group when it resumed its consideration of Working Papers A/CN.9/WG.I/WP.93, Add.1 and Add.2 at its next session.[9] In respect of the legal issues surrounding the simplification of incorporation, the Working Group resumed its consideration of the draft model law on a simplified business entity as contained in working paper A/CN.9/WG.I/WP.89, starting with Chapter VI on organization of the simplified business entity, and continuing on with Chapter VIII on dissolution and winding up, Chapter VII on restructuring, and draft article 35 on financial statements (contained in Chapter IX on miscellaneous matters).[10] The Working Group agreed to continue discussion of the draft text in Working Paper A/CN.9/WG.I/WP.89 at its twenty-sixth session, commencing with Chapter III on shares and capital, and continuing with Chapter V on shareholders' meetings.

II. Organization of the session

8. Working Group I, which was composed of all States members of the Commission, held its twenty-sixth session in New York from 4 to 8 April 2016. The session was attended by representatives of the following States Members of the Working Group: Armenia, Canada, China, Colombia, Croatia, Czech Republic, Ecuador, El Salvador, France, Germany, Hungary, India, Indonesia, Israel, Italy, Japan, Mexico, Namibia, Panama, Philippines, Poland, Republic of Korea, Russian Federation, Switzerland, Thailand, Turkey, Uganda, and United States of America.

[8] Ibid., *Seventieth session, Supplement No. 17* (A/70/17), para. 340.

[9] See Report of Working Group I (MSMEs) on the work of its twenty-fifth session, A/CN.9/860, para. 73.

[10] Ibid., paras. 76 to 96.

9. The session was attended by observers from the following States: Iraq, Jamaica, Latvia, Libya, Mozambique, Netherlands, Romania, Sudan and Syrian Arab Republic.

10. The session was attended by the following non-member States having received a standing invitation to participate as observer in the sessions and the work of the General Assembly: Holy See.

11. The session was also attended by observers from the European Union.

12. The session was also attended by observers from the following international organizations:

(a) *Organizations of the United Nations system*: United Nations Conference on Trade and Development (UNCTAD); World Bank (WB);

(b) *Invited intergovernmental organizations*: Organisation pour l'Harmonisation en Afrique du Droit des Affaires (OHADA);

(c) *Invited international non-governmental organizations*: American Bar Association (ABA); American Society of International Law (ASIL); Commercial Finance Association (CFA); Conseil des Notariats de l'Union Européenne (CNUE); European Commerce Registers' Forum (ECRF); European Law Students' Association (ELSA); Fondation pour le droit continental (FDC); and the National Law Center for Inter-American Free Trade (NATLAW).

13. The Working Group elected the following officers:

Chair: Ms. Maria Chiara Malaguti (Italy)

Rapporteur: Mr. Jerry T. Clavesillas (Philippines)

14. In addition to documents presented at its previous sessions (Reducing the legal obstacles faced by micro, small and medium-sized enterprises (MSMEs), A/CN.9/WG.I/WP.92; Key principles of business registration, A/CN.9/WG.I/WP.93, Add.1 and Add.2; and Observations by the Government of the French Republic, A/CN.9/WG.I/WP.94), the Working Group had before it the following documents:

(a) Annotated provisional agenda (A/CN.9/WG.I/WP.95); and

(b) Draft recommendations on key principles of business registration (A/CN.9/WG.I/WP.96 and Add.1).

15. The Working Group adopted the following agenda:

1. Opening of the session.
2. Election of officers.
3. Adoption of the agenda.
4. Preparation of legal standards in respect of micro, small and medium-sized enterprises.
5. Other business.
6. Adoption of the report.

III. Deliberations and decisions

16. The Working Group engaged in discussions in respect of the preparation of legal standards aimed at the creation of an enabling legal environment for MSMEs, in particular on the legal issues surrounding the simplification of incorporation and on good practices in business registration on the basis of documents presented at its previous sessions and on Secretariat documents A/CN.9/WG.I/WP.96 and Add.1. The deliberations and decisions of the Working Group on these topics are reflected below.

IV. Preparation of legal standards in respect of micro, small and medium-sized enterprises

17. The Working Group was reminded that it had had before it at its previous session Working Paper A/CN.9/WG.I/WP.92, which contained a general note by the Secretariat in respect of reducing the legal obstacles faced by MSMEs. It was further recalled that while that document had been introduced (paras. 15 and 16, A/CN.9/860), the Working Group had not had time at its previous session to consider its contents. With a view to keeping in mind the contents of Working Paper A/CN.9/WG.I/WP.92 in order to discuss it in greater detail at the end of the session, the Secretariat briefly explained that it had prepared the document to provide context for the overall work of Working Group I. It was noted that the document had been conceived to provide an overarching framework for all of UNCITRAL's current and possible future work on MSMEs by explaining the reasons for undertaking the MSME work, and indicating that the preparation of legal texts was only one aspect of an overall policy approach that States might wish to adopt to support and foster MSMEs. The legal texts that were being and might in future be prepared by UNCITRAL could then be described as legal pillars that provided support to the overarching MSME policy context. The Working Group was encouraged to consider that possible approach to the preparation of MSME texts for discussion later in the session (see below, paras. 86 to 88).

18. Reference was also made to the items listed in paragraph 66 of document A/CN.9/800.

19. The Working Group also recalled the decision at its previous session to commence the current session with a continuation of its consideration of the draft model law on a simplified business entity for the first two days of the session, and to continue for the next two days of the session by taking up the further exploration of key principles and good practices in business registration (para. 95, A/CN.9/860).

20. During its current session, the Working Group heard a presentation by the United Nations Environment Program (UNEP) on its work to promote sustainable development through international trade and investment regulation, and on the importance of providing capacity-building and policy advice for MSMEs in this regard. In addition, the Working Group was advised that a toolkit was being prepared to facilitate the incorporation of environmental and social sustainability factors in regional trade and investment agreements.

21. The Working Group heard presentations from several delegations on legislative reforms carried out by them to assist MSMEs. One delegation informed the Working Group of their recently reformed General Law of Commercial Corporations which adopted a simplified regime for incorporation and registration of MSMEs. Another delegation gave an introduction of their recently adopted legislation designed to protect MSMEs and facilitate their development, ultimately aiming to stimulate migration of MSMEs from the informal to the formal economy. This legislation had, among others, introduced a simplified procedure for business registration and technical assistance to MSMEs.

A. Draft model law on a simplified business entity

1. Previous consideration of the draft model law (A/CN.9/WG.I/WP.89)

22. The Working Group recalled the decision at its twenty-fifth session to resume its consideration of the draft model law on a simplified business entity contained in document A/CN.9/WG.I/WP.89. It was further recalled that at previous sessions, the Working Group had considered Chapters I (General provisions) and II (Formation and proof of existence) of the draft model law (paras. 36 to 75 of A/CN.9/831), as well as additional provisions thought to be of central importance to the draft text in Chapters VI (Organization of the simplified business entity), VII (Restructuring) and VIII (Dissolution and winding-up), and draft article 35 (Financial statements) (paras. 80 to 95 of A/CN.9/860). In keeping with its earlier decision to examine issues in the draft model law in the order of their importance to the final text, the Working Group decided to commence its discussion on Chapter III of the draft model law on shares and capital and Chapter V on shareholders' meetings.

2. Chapter III — Shares and capital (A/CN.9/WG.I/WP.89)

General discussion on terminology and approach used in the draft model law

23. The Working Group was reminded that the draft model law had been prepared on the basis of certain principles, as set out in paragraph 2 of A/CN.9/WG.I/WP.89. It was further recalled that although discussion was continuing on the basis of the draft model law, the Working Group had not yet made a decision in terms of the form that the final text should take (for that decision, see below, paras. 48 to 50).

24. The view was expressed that since States and regional groups had established criteria to determine which enterprise should be considered micro, small or medium-sized in their particular economic context, the draft model law might usefully separate its treatment of different sizes of enterprise by referring to considerations such as the amount of revenue of the business. However, it was observed that the Working Group had considered this approach at previous sessions, and had decided that it was unnecessary in the draft model law to seek to harmonize such criteria, since States would simply apply the model law to the different sizes of business as established in their particular context. Instead, it had been agreed that the main concern had been to ensure that an individual business person was included in the model law, and that the text should accommodate the growth of an enterprise from a small and simple business to a more complex and multi-member enterprise (paras. 23 to 24 of A/CN.9/800, and para. 68 of A/CN.9/825).

25. Concerns were raised in respect of the use of specific terminology in the draft model law. Although the Working Group had previously decided to refer to "members" rather than to "shareholders" (para. 48 of A/CN.9/831), the view was expressed that the draft text should use the terminology "share" and "shareholders", as those terms were said to be used broadly in the existing company law regimes of various States. However, there was support for the alternative view expressed that the term "share" was unclear in some languages since it generally referred to an ownership document, but did not necessarily include in it the concept of membership in the enterprise, and that several jurisdictions used terms other than "share", such as "quota", "part" or "interest". In light of that concern, it was suggested that in order to achieve a common understanding, the next draft of the text should include an explanation of what was intended by the word "share", along with suggestions for possible alternative and more neutral terms which could be considered by the Working Group at a future session. That suggestion received broad support in the Working Group.

26. In general reference to Chapter III, a proposal was made that the entire chapter should be greatly simplified, with its primary focus on distributions and limitations thereon, while simply permitting a simplified business entity to create shares, but leaving any detailed mention of them to the operating agreement. In pursuit of that general suggestion, it was proposed that draft articles 7, 8, 10 and 13 could be deleted in favour of appropriate references being made in the operating agreement, while article 9 could simply refer to what the default position on distributions should be unless otherwise agreed, and discussion of the content of draft article 12 could proceed. No conclusions were reached on that proposal, but its content was kept in mind as the Working Group proceeded with its review of the chapter.

Article 7. Shares

27. The Working Group commenced its consideration of Chapter III of the draft model law with a discussion of draft article 7. There was support for the view that draft article 7 was too complex and sophisticated to assist the simple enterprises for which the model law was intended. Support was expressed for the view that the model law should contain the broadest possible flexibility for members to decide on the structure of an entity, but that the draft provision was not suitable for a member wishing to start a simple business. A proposal was made that the provision could be redrafted to start with the simplest model, establishing the default rule to be one of equal voting rights and equal distributions unless otherwise agreed in the operating document, followed by rules permitting the establishment of more complex structures and clearly indicating that even simple businesses were permitted to issue shares. After discussion, the Working Group expressed its support for that proposal, noting that more detailed information on classes of shares could be included in the commentary.

28. It was also observed that draft article 7 referred to the publication of information on the classes of shares in the simplified business entity in the operating document, but that such information should be made available to third parties dealing with the entity. A proposal made to resolve that problem was that the model law could require the existence of any different classes of shares to be noted in the operating document. It was also suggested that reference in the text to par value shares should be deleted, as the modern trend was away from the issuance of par value shares, which were said to be misleading for shareholders and failed to protect creditors. In that regard, it was observed that paragraph 22 of document A/CN.9/WG.I/WP.89 made reference to States that may have abolished the notion of par value, and there was support for the view that the matter should be left to the decision of implementing States.

Article 8. Special rights

29. The view was expressed that draft article 8 of the model law was also too complex for the MSME context and that it could be deleted given the broader agreement of the Working Group on a simple default rule of equal voting rights and equal distributions. However, it was observed that draft article 8 should be maintained for larger, more complex enterprises that might have more than a single class of shares and that would opt out of the default rule. The Working Group agreed that draft article 8 was a more specific rule for larger companies and that the concept should be reflected in the commentary.

Article 9. Distributions

30. In considering draft article 9, there was agreement in the Working Group that the article should be retained as being important to protect creditors, but that paragraphs 1 to 3 would require simplification. In particular, it was noted that paragraph 3 might be too onerous for micro and small businesses in setting out either an insolvency test in subparagraph (a) or a balance sheet test in subparagraph (b) as the standard for determining whether distributions could properly be made. Additional views were expressed that the purpose of the rules included in draft article 9 was also to protect members and future members of the business entity. It was suggested that a more viable approach for such businesses would be for the draft model law to set out more specifically what could be distributed to the shareholders, with specific reference to maintaining certain amounts due to creditors and other third parties in a reserve fund. An additional proposal was made to delete the test in subparagraph (a) of draft article 9(3) as being the more complex of the two. A concern was also raised that paragraphs 1 and 2 might overlap, and it was further noted that a definition of "distribution" should be considered but that it should not include payments of reasonable compensation for services rendered. In respect of the drafting of article 9, a proposal was made to simplify it along the lines of deleting in paragraph 1 the phrase "the board of management or shareholders or" and deleting in paragraph 2 the phrase "The board of management of every simplified business entity or shareholders or", as well as deleting the latter part of paragraph 3 following the phrase "sum of its total liabilities". It was also suggested that references to "classes of shares" in the text should be made consistent with drafting decisions made earlier in respect of article 7.

31. After discussion, it was agreed that the Secretariat would redraft article 9 on the basis of the suggestions made and that it would propose different variants for consideration by the Working Group.

Article 10. Redemption

32. The Working Group agreed that draft article 10 could be deleted.

Article 11. Liability for improper distributions

33. Support was expressed in the Working Group for draft article 11 in its current form, but a concern was raised that the provision appeared to be silent on the liability of decision makers of the simplified business entity responsible for the improper distribution. In this vein, it was suggested that the title of the article could be adjusted to better reflect its content by deleting the phrase "Liability for". The Working Group agreed to retain article 11 as drafted and to make reference in the commentary to the liability of the entity's decision makers for improper distributions, noting other provisions of the model law that set limits

on the decision maker's authority to declare and pay dividends in draft article 9(2), and to the possibility of including fiduciary duties in the text (para. 38, A/CN.9/WG.I/WP.89). It was further agreed that article 11 should only refer to actual knowledge by the shareholder that a distribution had violated article 9 paragraph 3 and that the phrase "ought reasonably to have known" should be deleted.

Article 12. Consideration for shares

34. The Working Group continued its consideration of Chapter III of the draft model law with a discussion of draft article 12. There was broad support for the view that in order to facilitate the establishment of a simplified business entity, the draft article should allow for maximum flexibility and leave it to members to decide how much and in what form they would contribute to the entity. It was further noted that such an approach would need to preserve the principle that in the case of simplified business entities with several shareholders, contributions should be in equal portions unless otherwise agreed by the shareholders. In addition, there was support for the view that members were in the best position to determine the value of their contributions and that they should be permitted to do so.

35. However, it was observed that provision of the contribution to the simplified business entity in the form of intangible benefits such as promissory notes and services to be performed could raise issues in some cases. In one State, for instance, shares needed to be paid in full in order to be issued, which precluded the issuance of shares for promissory notes or for the provision of future services to the enterprise. In another State, contributions to the business entity were associated with the type of company liability and in case of limited liability companies, contributions were required to be tangible and accounted for in order to protect third parties and creditors. In this regard, it was observed that provision of future services to the simplified business entity would not guarantee that protection. In other States, mainly civil law systems, domestic legislation would simply not permit the provision of services as a contribution to the establishment of a business entity. The view was expressed that such specific concerns should be addressed in the commentary as matters to be left for States to decide when adopting the model law.

36. In specific reference to paragraph 3 of draft article 12, there was some support for the view that the value of contributions to the establishment of a simplified business entity through the provision of services and/or labour, promissory notes and future assets should be audited to protect third parties and creditors, but only when such contributions comprised share capital and when it was required or permitted by the law of the enacting State or agreed by the members. It was, however, noted that such a practice would be burdensome for MSMEs and that it would be inconsistent with the purpose of the draft model law to simplify the legal framework applicable to MSMEs. It was also observed that the burden of risk of financing a simplified business entity should rest on its voluntary creditors and that protection of third parties in case of bankruptcy of the business entity was usually ensured by imposing upon members the burden of proving that there had been sufficient consideration when the business entity was established. There was some support, however, for the view that liability should be imposed on members of the business entity for miscalculation of the value of consideration other than cash.

37. After discussion, it was agreed that the Secretariat should be requested to redraft paragraphs 1 to 3 of draft article 12 along the lines of allowing the business entity's members maximum flexibility to agree on the type and amount of contribution, making observations on the specific issues related to the different types of consideration in the commentary. It was also observed that while the provision did not deal squarely with the issue of liability for fraudulent or negligent miscalculation of the value of contributions, links could be provided in the commentary to protection available to third parties and to other members in such cases. It was further agreed that paragraph 4 could be deleted and that paragraph 5 should either be simplified as being too detailed for MSMEs or deleted.

Article 13. Partly paid shares

38. In keeping with the earlier suggestion to delete several articles of the draft model law in favour of appropriate references being made in the operating agreement (see paras. 26 to 28 above), the Working Group agreed to delete draft article 13.

3. Chapter V — Shareholders' meetings (A/CN.9/WG.I/WP.89)

General discussion

39. In general reference to Chapter V, concern was raised in the Working Group that the provisions as drafted were too sophisticated and complex for micro and small enterprises. In this regard, the Working Group was urged to be mindful not to include requirements in the model law that placed unnecessary burdens on simple enterprises. Concern was also expressed that the detailed requirements for shareholders' meetings contained in Chapter V might interfere too much with the autonomy of the members of the enterprise. A proposal was made that Chapter V be deleted altogether, but that certain concepts be kept and reflected in other chapters of the model law. With regard to the structure of Chapter V, the Working Group agreed that the chapter should first contain a general rule reflecting the freedom of the members to decide how to organize their shareholders' meetings, before setting out the default rules containing the requirements applicable in the absence of any agreement between the members.

Article 17. Meetings

40. The Working Group commenced its consideration of the draft articles contained in Chapter V with a discussion of whether the requirement reflected in article 17 that shareholders' meetings must be held at least once a year should be kept. After discussion, there was support in the Working Group for the view that that requirement should be omitted as being potentially too burdensome for MSMEs. However, recalling that the Working Group had previously agreed that financial statements and annual accounts must be submitted to the shareholder's meeting for approval (A/CN.9/860, para. 94), concern was raised in respect of maintaining consistency in the model law. After discussion on this issue, the Working Group supported the view that yearly meetings should only be required when necessary to adopt such annual financial statements, bearing in mind that meetings need not be held in person.

41. Support was also expressed in the Working Group that a provision be included in the model law to reflect that members have the right to demand that a shareholders' meeting be held at any time, but that this right should be subject to certain limitations. Several delegations expressed support for the view that the model law should require that a minimum amount of shares be held by a member in order to be eligible to call for a meeting, however that no restriction should be placed on the topics that may be addressed at such meetings. Further, one delegation expressed the view that it should be reflected in the model law that all members have the right to attend all shareholders' meetings.

42. In addition, it was suggested that, where applicable, the board of directors should also be permitted to designate the place of the shareholders' meeting. The Working Group agreed that the specific drafting of the provision should be left to the Secretariat for discussion at a future session.

Article 18. Conduct of the shareholders' meeting

43. After consideration, the Working Group agreed to delete article 18 of the draft model law as being unnecessary in that members should be left free to decide upon the conduct of their meetings.

Article 19. Meetings by technological means or by written consent

44. Although a view was expressed that the provision should clarify that meeting in person should have greater priority than voting by written consent, the Working Group was in general agreement with the first sentence of the draft article permitting the holding of shareholder meetings through any available technological means or by written consent. However, concerns were raised in respect of the remainder of the draft provision in respect of the keeping of minutes, with one suggestion being that such matters were best left to be agreed by the members. There was support in the Working Group for the view that it was important that minutes of meetings be recorded to increase legal certainty and to inform shareholders who had not attended the meeting of the outcome, but there were differing views on whether that information should be made public or simply recorded in the records

of the business. It was further observed that MSMEs often operated quite informally, and that the establishment of mandatory rules such as keeping minutes was impractical, potentially burdensome (particularly if there were literacy issues) and likely to be ignored, and might be better reflected as a recommendation. The general view, however, was that there should be some sort of record prepared representing the minutes of shareholder meetings. In terms of whether there should be a time limit within which such minutes should be prepared, the Working Group was of the view that while it was better for such minutes to be prepared as soon as practicable, no time limit need be included in the draft provision, and discussion of the importance of the time frame could best be made in the commentary.

Article 20. Notice of meeting

45. There was agreement in the Working Group that draft article 20 could be simplified, and that in any event, the provision should not be expressed as a mandatory obligation. Although a view was expressed that section 20 of the annex to document A/CN.9/WG.I/WP.83 was a better approach, it was observed that that provision was actually more restrictive of members' freedom. Instead, it was agreed that members should be free to decide on how notice of meetings should be provided, and it was proposed that the default rule could be that notice should be in writing or in any other form, with an explanation in the commentary of what other forms that notice might take. The Working Group agreed that while it was difficult to conclude on what should be included in the text of a model law, if the text were along the lines of a legislative guide it should confirm that the members could decide for themselves how to convene their meetings, but that a legislative guide could recommend that notice for the meeting be provided in writing or any other form. In addition, it was observed that reference should be made (possibly in the commentary) to what information should be included in the notice, for example, whether a copy of financial statements or more detailed information on the content of the agenda should be included with the notice.

Article 21. Waiver of notice

46. The Working Group agreed that it should be possible for a member to waive the receipt of notice of a meeting, and that the substance of draft article 21 could be supported.

Article 22. Quorum and majorities and Article 23. Cumulative voting

47. The Working Group did not have sufficient time to consider draft articles 22 and 23, but requested the Secretariat to refer to the discussions in the Working Group on the draft model law in general and to prepare a revised version of the text for future consideration.

4. Model law, legislative guide or another form

48. In concluding its consideration of the draft model law on a simplified business entity at its current session, the Working Group recalled that it had at previous sessions considered what would be the best form for its legislative work on a simplified business entity (A/CN.9/800, paras. 34 to 38; and A/CN.9/831, paras. 28 and 33 to 35), but that it had decided to reserve its decision on the form that the text should take until after it had further considered the issues that would be included in the text, as well as what it should achieve (A/CN.9/800, para. 38). Having substantially completed its review of those issues through its consideration of documents A/CN.9/WG.I/WP.86 and A/CN.9/WG.I/WP.89, and taking into account the annex to document A/CN.9/WG.I/WP.83, the Working Group turned its focus once more to what form the legislative text on a simplified business entity should take.

49. Several delegations expressed support for the preparation of a model law, citing its perceived greater influence and easier utility for States seeking a solution for a simplified business form. In addition, it was observed that the Working Group had previously expressed its support for the preparation of standard forms relating to the creation of simplified business entities but that such forms were likely to be more easily created in relation to a model law. Another possible form suggested for the text was a limited form of key recommendations or principles of ten main elements (see the list in A/CN.9/825, para. 66(b)(ii) and as reflected in A/CN.9/WG.I/WP.89, para. 2), which could be supplemented with an annex illustrating how those key elements had been reflected in the laws of various States. A third proposal, which received the greatest support in the Working

Group, was for the preparation of a legislative guide, which was thought to be the approach most likely to be successful, to provide sufficient flexibility for States, and on which the Working Group could achieve consensus.

50. In light of its support for the preparation of a legislative guide on a simplified business entity, the Working Group requested the Secretariat to prepare a legislative guide, consisting of recommendations and commentary, that should reflect its policy discussions to date in respect of A/CN.9/WG.I/WP.86 and the draft model law in A/CN.9/WG.I/WP.89. The Working Group would begin its consideration of that draft legislative guide at a future session.

B. Key principles of business registration

1. Presentation of Working Papers A/CN.9/WG.I/WP.96 and Add.1 and introductory observations

51. The Working Group resumed the consideration commenced at its last session of the draft commentary contained in documents A/CN.9/WG.I/WP.93, Add.1 and Add.2, this time in conjunction with the draft recommendations on key principles of business registration contained in documents A/CN.9/WG.I/WP.96 and Add.1, which had been prepared in response to a request by the Working Group at its twenty-fifth session in October 2015.[11] The Secretariat highlighted certain aspects of Working Papers A/CN.9/WG.I/WP.96 and Add.1, which had been prepared in the form of draft recommendations of a legislative guide. In particular, the Working Group was advised that A/CN.9/WG.I/WP.96 and Add.1 did not follow the order of the draft commentary in A/CN.9/WG.I/WP.93, Add.1 and Add.2, but that the draft recommendations had been reordered in a manner thought to be more logical and more efficient, moving from the objectives of a business registry, to its functions and establishment, to its operation, and then to registration and post-registration matters. It was noted that following each draft recommendation, a paragraph had been inserted noting the relevant supporting paragraphs in the draft commentary (A/CN.9/WG.I/WP.93, Add.1 and Add.2), and highlighting any additional information that it was thought might be considered for inclusion in the commentary. The Working Group was advised that the two sets of documents (including any adjustments agreed by the Working Group) would be combined into a single draft legislative guide for the review of the Working Group at a future session, and that the draft commentary would be revised and consolidated from its current state in A/CN.9/WG.I/WP.93, Add.1 and Add.2.

52. It was further highlighted that throughout the draft recommendations, the term “the Regulation” had been used to indicate the body of rules adopted by the enacting State with respect to the business registry, whether such rules were found in administrative guidelines or in the specific law governing business registration. The term “law of the enacting State”, on the other hand, had been used to denote those provisions of domestic law in the broader sense that were somehow relevant to and touched upon issues related to business registration.

53. The Working Group then proceeded with its consideration of the two sets of documents containing a draft commentary and draft recommendations. The Working Group may wish to note that the heading of each of the draft recommendations below also lists the relevant cross reference to the draft commentary contained in A/CN.9/WG.I/WP.93, Add.1 and Add.2.

54. It was suggested that the draft recommendations and commentary on key principles of business registration, applicable to all mandatory registries, contained a level of detail that could inhibit core principles from being communicated sufficiently clearly to developing States. In this regard, it was suggested that principles found by the Working Group to be the most essential to assist MSMEs could be set out at the beginning of the legislative guide. For example, it was suggested that the materials could focus on three key principles: setting out the reasons for registering a business; permitting registration through one integrated service (including one form, one set of information and one payment); and that information on those services should be widely communicated to all entrepreneurs.[12] It was further

[11] A/CN.9/860, para. 73.

[12] These and other matters were outlined by the United Nations Conference on Trade and

suggested that draft recommendation 12 on a single interface for business registration could be moved to the beginning of the legislative guide. The Working Group decided, however, to leave such specific drafting and structural considerations to be discussed at a later time.

55. With regard to the terminology and approach adopted in the draft recommendations, concern was raised that use of the terms "business registry" and "single interface for business registration" could be confusing, since a single interface should ideally be the sole portal through which an entrepreneur would access all necessary approvals to commence a business (for example, tax identification numbers, social services and the like) and was not limited to access to the business registry. Support was expressed that the meaning of these terms and the overall approach of providing a single interface for all businesses to enter the formal economy (which would nonetheless preserve the functions of the various regulatory agencies), should be clearly established in the introductory paragraphs of the legislative guide. In response to the suggestion that the draft text could reconsider the use of the term "Regulation", it was observed that appropriate terminology could be arrived at through a consideration of the draft recommendations, with appropriate reference to additional sources.

2. Objectives of a Business Registry (A/CN.9/WG.I/WP.96, paras. 4 to 7)

Recommendation 1: Registration permitted for all businesses (A/CN.9/WG.I/WP.93, paras. 10 and 33)

56. After discussion, the Working Group agreed that it should be left for the enacting State to decide which businesses should be required to register. However, support was expressed that the commentary should note that States typically require registration for more sophisticated business forms, particularly those that were granted limited liability. The Working Group also agreed that the recommendation should require that all businesses be permitted to register.

57. Two delegations informed the Working Group of new legislation establishing a single window approach for their MSME registration. One example, in particular, had taken the same approach to the registry reform as the draft legislative guide, i.e. the system permitted the registration of any business wishing to register, but did not require all businesses to be registered.

58. Concern was expressed that the wording in draft recommendation 1 "permits and facilitates" referred to two different concepts, and therefore should be separated into two different recommendations: one stating that registration should be permitted and a second that registration should be facilitated. However, after discussion, support was expressed for the suggestion that the word "facilitates" be deleted from recommendation one, and that the principle that registration should be facilitated could be reflected elsewhere. Support was expressed in the Working Group for the drafting suggestion that the phrase "legal forms" in recommendation 1 could be changed to terminology along the lines of "businesses". A further drafting suggestion was that the title of draft recommendation 1 could be changed to better reflect the content of the recommendation. Concern was also expressed that the reference to businesses of "all sizes" could divert attention away from MSMEs, however, the Working Group was reminded that while the recommendations were aimed at streamlining business registry practices to assist MSMEs, such improvements would ultimately assist businesses of all sizes and levels of sophistication.

Recommendation 2: Purposes of the business registry (A/CN.9/WG.I/WP.93, para. 33)

59. It was observed that draft recommendation 2 might not be expressed in clear enough terms as in, for example, the phrase "an identity recognised by the enacting State". The Working Group agreed that the draft recommendation should be clarified.

Development (UNCTAD) in its paper "Lessons learned on business registration" (see under "References" at www.ger.co), to be submitted as an official document prior to the next session of the Working Group. See, also, the report of the previous session of the Working Group (A.CN.9/860, paras. 74-75).

Recommendation 3: Key features of a business registration system (A/CN.9/WG.I/WP.93, para. 10)

60. A concern was expressed with respect to the use of the word "reliable" in paragraph (d) of the draft recommendation, and the possible perception that the recommendation could be suggesting that the registry was responsible for the accuracy of the registered information. That concern also suggested that use of the word "reliable" in the draft recommendation could be seen to be favouring the approval system of business registration, given the emphasis of that system on ex ante verification of information.

61. It was also observed that the word "reliable" in paragraph (d) might refer to either the reliability of the information or of the system itself. It was noted that if the term referred to the information, it was possible that the draft recommendations in respect of the effects of registration that appeared later in the text might deal appropriately with the issue (for example, whether the registrant should be held responsible for the accuracy of the information it submitted). It was also observed that draft recommendations appearing later in the text also considered certain aspects of the reliability of the system, including, for example, recommendations on access to services and preservation of records.

62. The Working Group recalled that the issue of the reliability of the information contained in the business registry and whether or not the use of the term "reliable" connoted a preference for the declaratory or approval systems had been extensively considered at its previous session (A/CN.9/860, paras. 31, 35 and 61). The conclusion of the Working Group at its previous session had been that there was broad agreement that the provision of reliable information was a core function of the business registry and that the use of the term "reliable" did not indicate acceptance of either the declaratory or approval system, and that its meaning could be understood in the context of the chosen system of each State (A/CN.9/860, para. 35). Moreover, it had been decided at the previous session that information in the business registry should be reliable, but that it would be left to the State to determine how best to ensure its reliability, regardless of the particular approach adopted in the business registry (A/CN.9/860, para. 61).

63. Support was reiterated for the position taken by the Working Group at its previous session in the terms outlined in the paragraph above. However, one delegation expressed its view that the term "reliable" was defined as "able to be trusted" and insisted that the information contained in business registries in its jurisdiction was not reliable or trustworthy, and that the term "reliable" should thus not be used. Other delegations did not support the use of the term "reliable".

64. A proposal was made to address the matter by revising the chapeau of the draft recommendation to read "The Regulation should ensure the following key features:". Another proposal was to split the draft recommendation into two recommendations, with one dealing with the reliability of the system, and the other dealing with the reliability of the information. Those suggestions did not receive broad support, nor did the suggestion to solve the apparent impasse by deleting the word "reliable" in paragraph (d).

65. Another question was raised concerning the use of the term "current" in draft recommendation 3. The Working Group agreed to place paragraph (d) in square brackets for inclusion in a future iteration of the text, along with additional information in the commentary referring to the consideration of the issues as outlined in paragraphs 60 to 64 above. The Working Group again agreed that the text in this regard should be very clear to avoid appearing to favour either the declaratory system or the approval system of business registration.

Recommendation 4: Minimum regulatory burden on micro, small and medium-sized enterprises (A/CN.9/WG.I/WP.93/Add.1, paras. 5, 13, 22 and 28)

66. The Working Group agreed that the principles expressed in the draft recommendation, i.e. that MSMEs should be subject to the minimum obligations necessary for entry into the formal economy, should be retained in the commentary or in an introductory section, and should appropriately be emphasized. Further, the Working Group agreed that draft recommendation 4 should be deleted (see, however, paras. 71 and 74 below).

3. Establishment and functions of the business registry (A/CN.9/WG.I/WP.96, paras. 8 to 13)

Recommendation 5: Responsible authority (A/CN.9/WG.I/WP.93, paras. 23, 24 and 44)

67. The view was expressed that there was no need to establish the authority of the State over the operation of the registry nor its ownership of the registry record, since those were matters under the State's responsibility and each State should choose how best to legislate on those aspects in light of its domestic legal framework. After discussion, the Working Group agreed that the introductory sentence of the draft recommendation ("The Regulation should establish that the organization and operation of the business registry is a function of the enacting State") should be retained as a draft recommendation, while paragraphs (a) and (b) should be deleted and their contents appropriately reflected in the commentary to the recommendation.

Recommendation 6: Appointment of the registrar (A/CN.9/WG.I/WP.93, para. 34)

68. Concern was expressed that draft recommendation 6 might not include the practice of those States that did not designate an authority to appoint a registrar, and it was suggested that the principle expressed in the draft recommendation could be moved to the commentary. It was further suggested that if the draft recommendation were to be retained, its text should be clarified in order to indicate that the primary or secondary legislation should set out rather than "determine" the registrar's duties.

69. The view was also expressed that draft recommendations 5 and 6 appeared to be linked, and might possibly be merged. The Working Group requested the Secretariat to consider merging the two draft recommendations.

Recommendation 7: Simple and predictable legislative framework (A/CN.9/WG.I/WP.93/Add.2, paras. 24 to 25)

70. It was suggested that, since draft recommendation 7 appeared to deal with what was said to be a general principle of legislative drafting rather than a legal principle applicable to business registration, the concept expressed could be moved to the commentary or to the introduction to the draft legislative guide. It was also observed that the concepts expressed in the second part of the recommendation, which made reference to the "unnecessary use of exceptions and discretionary power" were not sufficiently clear and could be misunderstood since, if the law was silent on a matter, it would be desirable for the registrar to have a certain amount of discretion. There was some support for the view that draft recommendation 7 should be deleted.

71. The Working Group also heard a view that the principles included in draft recommendation 4, which the Working Group had agreed to delete (see para. 66 above), could be combined with those contained in draft recommendation 7 to possibly be included in a new draft recommendation. That recommendation would set out more general principles, including that the legislative framework applicable to business registration should be simple and predictable and that the business registration system should provide for simplified registration and post-registration procedures for MSMEs. There was support in the Working Group for the view that the principles expressed in draft recommendations 4 and 7 were crucial for establishing a system promoting registration of MSMEs and that, as such, they should be properly reflected in the recommendations themselves.

72. It was suggested that lessons learned from a technical assistance programme for business registration reforms (see footnote 12 above) indicated that the general principles of transparency and simplicity were key to success. In this respect, transparency was said to entail making known the necessary documents and other requirements for entering the formal economy, while simplicity was requiring the minimum steps possible from potential entrepreneurs. It was observed that these principles were similarly found in the draft recommendations and the draft commentary under consideration by the Working Group (e.g. draft recommendations 4, 7, 8, 17 and 40). Further, there was support for concern expressed that the Working Group should not too hastily delete large swaths of the draft

recommendations during its initial review of the materials, but that it should take a measured approach so as not to lose any of the important concepts arrived at from a distillation of principles from earlier Working Papers (e.g. A/CN.9/WG.I/WP.85, and A/CN.9/WG.I/WP.93, Add.1 and Add.2).

73. A discussion ensued in the Working Group on the form that the recommendations in the legislative guide should take and whether they should be drafted as a checklist referring to broad principles, or whether they should be more detailed and based on legal standards supported by commentary, which could provide States with more detailed guidance in order to properly assist them in the legislative reform of their system of business registration. It was observed that UNCITRAL's legislative function meant that it prepared legal standards, and that it was not in the business of preparing checklists, although its specific legislative recommendations could be used functionally by States to track whether they were meeting the necessary requirements. After discussion, it was agreed that the Working Group would continue its consideration of the materials in A/CN.9/WG.I/WP.96 and A/CN.9/WG.I/WP.96/Add.1 in the form of draft recommendations for a legislative guide, which would be clearly drafted, and which States could use to implement and monitor the progress of their reform process.

74. The Working Group agreed to request the Secretariat to draft a new recommendation 1 that would include the principles expressed in draft recommendations 4 and 7, which also reflected the general principle of the need for transparent and simplified methods of registration.

Recommendation 8: Transparency and accountability (A/CN.9/WG.I/WP.93/Add.2, paras. 62 to 64)

75. The view was expressed in the Working Group that the meaning of the term "accountability" and its applicability to the business registry rather than to a person might be unclear. After discussion, it was agreed that "accountability" could be deleted from recommendation 8, but that the concept might be retained, possibly in the draft commentary, particularly if the emphasis of that term was on issues related to corruption. However, if the concept were retained, the Working Group was of the view that the meaning of the term should be established clearly either in a recommendation or in the commentary.

76. It was drawn to the attention of the Working Group that the concept of capacity-building was addressed in the commentary related to recommendation 8 (A/CN.9/WG.I/WP.93/Add.2, paras. 81 to 83), but that it had not been reflected in a recommendation itself. There was support in the Working Group for the proposal that a new draft recommendation could be added to reflect this concept, despite the reservations expressed by one delegation that the issue of capacity-building might not be appropriate for a recommendation on a legal standard. After discussion, the Working Group agreed to ask the Secretariat to draft a separate recommendation reflecting the concepts currently contained in A/CN.9/WG.I/WP.93/Add.2, paragraphs 81 to 83, bearing in mind UNCITRAL's focus on the preparation of legal standards, for it to be discussed by the Working Group at a future session.

77. In addition, there was support in the Working Group to request the Secretariat to draft a recommendation reflecting the considerations contained in A/CN.9/WG.I/WP.93/Add.2, paragraph 64 on the use of standard registration forms.

78. As indicated through an initial discussion earlier in the session (see para. 72 above), there was broad agreement in the Working Group that transparency was an important feature of an effective business registration system. A view was expressed that the issue of transparency might be dealt with in more general legislation requiring transparency and that specific mention of it in the draft recommendation might not be necessary. Another view was that the concept of transparency could be clarified either in the recommendation itself or in the commentary, possibly through reflecting in more specific terms what measures should be undertaken to ensure transparency.

79. The Working Group entered into a discussion regarding whether recommendations 8 and 17 reflected the same rule, and consequently should be merged. There was some support for the suggestion that the two draft recommendations should be combined. However, after discussion, it was agreed that the scope of the recommendations should be clarified to

establish whether they reflected different concepts before a final decision on the matter could be made by the Working Group. In a similar vein, after a brief discussion on whether draft recommendation 8 should be expanded to include the requirement that information in respect of the business registry should be made available online, and having observed that draft recommendations later in the text might deal with this concern in greater detail, the Working Group agreed to leave the issue for consideration at a future session.

80. Following from this discussion, the Working Group entered into a more general discussion on the relation between the general principles set out in the beginning of the legislative guide and the more specific application of those general principles throughout the legislative guide. The Working Group recalled that the draft legislative guide set out general principles at the outset, and then reflected the specific application of those principles throughout the more detailed recommendations in the remainder of the guide. The suggestion that cross references between the general principles and the related recommendations could be included in the commentary was widely supported in the Working Group.

Recommendation 9: Functions of the business registry (A/CN.9/WG.I/WP.93, paras. 12, 35, 45 and 46)

81. The Working Group was reminded that the draft commentary underlying draft recommendation 9 had been considered at its previous session (A/CN.9/860, paras. 34-36, 63, and 65-66), and that the Working Group had at that time requested a few clarifications and made some drafting suggestions. In respect of the chapeau, it was suggested that it might read "the Regulation could" rather than "the Regulation should", in order to indicate the non-mandatory nature of some of its paragraphs. However, there was support in the Working Group for the alternative proposal that some of the paragraphs should be mandatory as they set out the most fundamental functions of a business registry, while others might be of a less mandatory nature, and that the draft recommendation should differentiate between the two.

82. There was support for the proposal that the Working Group should set aside its review of draft recommendation 9 until it had reviewed the rest of the draft recommendations and had a better sense of the entire draft. That approach was taken up by the Working Group, on the understanding that a decision to separate the paragraphs in draft recommendation 9 into a list of those functions that should be established and those of a less fundamental nature that could be established could be made after that review had taken place.

Recommendation 10: Storage of and access to information contained in the registry (A/CN.9/WG.I/WP.93, paras. 25 to 26)

83. It was noted that the term "registry's users" in the draft recommendation might be broader than intended and it was suggested that it be replaced with a narrower reference, such as "registrants and registry staff".

84. Concern was expressed that reference to "a centralized registration system" in the first sentence of the recommendation, would not be accurate enough as it did not consider States where local and/or regional registration offices were reciprocally interconnected. There was some support for the suggestion that the recommendation could include reference to such an approach (so that the first sentence would read: "the Regulation should establish a centralized or interconnected registration system …"). The view was expressed that interconnected registries might not be mutually consistent so that stored information might not be accessible from throughout the system, and that the recommendation should emphasize the need for such consistency. In addition, it was observed that regardless of the architecture of the system, information on registered businesses should be stored and made accessible in digital format through a single national database that would allow exchange of information.

85. The Working Group agreed that the Secretariat would accommodate the comments above in the draft recommendation and the commentary, as appropriate.

C. Document A/CN.9/WG.I/WP.92 and the structure of MSME work

86. The Working Group recalled that Working Paper A/CN.9/WG.I/WP.92 had been prepared by the Secretariat to provide context for the overall work of Working Group I on MSMEs (see para. 17 above). The Working Group was also reminded that potential future topics relating to MSMEs had been mentioned at a previous session (see para. 18 above and A/CN.9/800, para. 66, which stated "that the Working Group acknowledged and welcomed the Commission's mandate relative to the establishment of an enabling legal environment to facilitate the life cycle of MSMEs"); however, the Commission had not yet given a mandate to a Working Group to consider those topics. In that light, it was thought that the consideration of how to structure the MSME legislative texts should encompass the two topics currently being considered in Working Group I, in addition to Working Group V's anticipated discussion of simplified insolvency provisions for MSMEs, as well as possible future but as yet undecided MSME projects that might be considered in Working Group I or in other relevant Working Groups. Reference was also made to recent legislative efforts on MSMEs in relation to insolvency, in respect of which, it was noted, a State had recently adopted a framework specifically for MSMEs.

87. With the considerations outlined in paragraph 86 above in mind, there was broad support in the Working Group for the proposal that its MSME work be accompanied by an introductory document along the lines of A/CN.9/WG.I/WP.92, which, once specifically considered and adopted by the Working Group, would form a part of the final texts and would provide an overarching framework for current and future work on MSMEs. Attached to and underpinning that contextual framework as legal pillars would be the current two legislative texts on MSMEs being discussed by Working Group I, as well as any future MSME texts. Importantly, the framework could be expanded with any additional legislative texts as they were adopted by the Commission.

88. The Working Group made the following drafting suggestions in respect of A/CN.9/WG.I/WP.92, bearing in mind that it (or a revised version of it) would be considered in detail by the Working Group at a future session:

(a) It was suggested that for greater clarity, paragraph 41 setting out a non-exhaustive list of possible incentives for MSMEs to join the formal economy could be separated into pre-formalization (e.g. subparas. (a) to (c)) and post-formalization (e.g. subparas. (g) to (s)) incentives;

(b) It was suggested that "organized access to and support with health insurance" could be added to paragraph 41;

(c) It was suggested that information could be added to the text on the potential cross-border activities of MSMEs, as well as reference to how electronic commerce and the Internet have improved those possibilities;

(d) It was suggested that a footnote to the main text in A/CN.9/WG.I/WP.92 could include reference to the history of Working Group I and to possible future work on MSMEs;

(e) It was suggested that a footnote to the main text in A/CN.9/WG.I/WP.92 could include reference to other UNCITRAL texts that could have a positive impact on MSMEs; and

(f) Additional aspects of the document "Lessons learned" referred to above in footnote 12 could be considered for addition, as appropriate, to the text in A/CN.9/WG.I/WP.92.

D. Other matters

89. The Working Group recalled that its twenty-seventh session was scheduled to be held in Vienna from 3 to 7 October 2016. If an additional week of conference time in Vienna were to become available (due to the completion of the work in another Working Group), possibly the week of 5 to 9 September 2016, the Working Group considered whether it wished to avail itself of that additional week so as to spend one full week considering a legislative guide on key principles of business registration and a separate full week considering a legislative guide on a simplified business entity. Some delegations expressed

concern that they might have budgetary problems in attending two full sessions of Working Group I in Vienna in the latter part of 2016, and, in any event, it was noted that the Commission would make the decision on the allocation of conference time to Working Groups at its session in June-July 2016.

90. The Working Group next considered whether it should continue to discuss both legislative projects for two days each at its upcoming sessions. In order to make more progress, the Working Group decided that it would spend the entire week of its twenty-seventh session considering a draft legislative guide on a simplified business entity, and that it would spend the entire week of its twenty-eighth session considering the draft legislative guide on key principles of business registration. The Working Group also agreed to consider A/CN.9/WG.I/WP.94 at its next session.

F. Note by the Secretariat on draft recommendations on key principles of business registration

(A/CN.9/WG.I/WP.96 and Add.1)

[Original: English]

Contents

Introduction

1. At its twenty-fifth session (Vienna, 19-23 October 2015), the Working Group, had before it three documents on Key principles of business registration (A/CN.9/WG.I/WP.93, A/CN.9/WG.I/WP.93/Add.1, and A/CN.9/WG.I/WP.93/Add.2), which the Secretariat had been requested to prepare at a previous session (twenty-third session, paras. 43-46, A/CN.9/825). Without intending to pre-empt any decision by the Working Group on the form that a legislative text on business registration might take, those documents were prepared in the form of a draft commentary for a possible legislative guide and were intended to be considered together to facilitate discussion in the Working Group on how the principles of an effective and efficient business registration system could appear in a future legislative text. At its twenty-fifth session, the Working Group considered the first of those documents, A/CN.9/WG.I/WP.93, and strongly supported the view that the Working Group should prepare an instrument along the lines of a concise legislative guide on business registration, without prejudice to considering other texts at a later date. To that end, the Secretariat was requested to prepare a set of draft recommendations to be read along with the draft commentary in Working Papers A/CN.9/WG.I/WP.93, Add.1, and Add.2 when the Working Group resumed its consideration of them at its twenty-sixth session (para. 73, A/CN.9/860). This Working Paper and A/CN.9/WG.I/WP.96/Add.1 are intended to be read together as a response to that request by the Working Group.

2. The order of the draft recommendations in this document and A/CN.9/WG.I/WP.96/Add.1 reflects the order in which it was thought that a draft legislative guide on business registration could most efficiently and logically be presented. The order of these draft recommendations does not precisely follow the order of the draft commentary reflected in Working Papers A/CN.9/WG.I/WP.93, Add.1, and Add.2, and as such, each of the draft recommendations is followed by a brief paragraph, which begins with a cross-reference to the relevant paragraphs of those documents in order to facilitate the reading of the draft commentary with the related draft recommendation. When the two sets of materials are combined into one draft legislative guide in a future iteration, the order in which they are presented will follow the order of the draft recommendations, as adjusted by the Working Group, and each draft recommendation will be preceded by the relevant discussion in the draft commentary. To the extent that the current draft commentary in A/CN.9/WG.I/WP.93, Add.1, and Add.2 needs to be supplemented with additional information on the particular draft recommendation, the brief paragraph following each draft recommendation will suggest possible additional commentary. In addition, not all paragraphs of the draft commentary are reflected in a draft recommendation, and, in any event, the Working Group is encouraged to make suggestions for additional draft recommendations where there are any perceived gaps.

3. The Working Group may also wish to note that the draft recommendations in this Working Paper refer to both "the Regulation" and the "law of the enacting State". The Regulation is intended to mean the body of rules adopted by the enacting State with respect to the business registry, whether such rules are found in administrative guidelines or in the law of the enacting State governing business registration. The term "law of the enacting State" is intended to denote those provisions of domestic legislation in the enacting State in the broader sense that are somehow relevant to and touch upon issues related to business registration. The Working Group may also wish to note that the term "business", as used in these draft recommendations is not intended to include those professions that are otherwise regulated by professional bodies. These and other important terms will form a section on terminology and interpretation in a future iteration of the draft legislative guide.

Draft Recommendations

I. Objectives of a Business Registry

Recommendation 1: Registration permitted for all businesses

The Regulation should establish a system for the registration of businesses that permits and facilitates registration of businesses of all sizes and of all legal forms, but that requires the registration of only those legal forms as established by the law of the enacting State.

4. The Working Group may wish to note that paragraphs 10 and 33 of the draft commentary in A/CN.9/WG.I/WP.93 explain that the approach taken by the draft legislative guide is to recommend that all businesses should be permitted to register, since business registration is considered as the key means through which all businesses, including micro, small and medium-sized enterprises (MSMEs), can participate effectively in the economy. The applicable law in each State should determine which businesses are required to register, and which additional conditions they may have to fulfil as part of that requirement.

Recommendation 2: Purposes of the business registry

The Regulation should provide that the business registry is established for the purposes of:

(a) Providing an identity recognized by the enacting State to a business that fulfils the requirements established by law; and

(b) Making accessible to the public information in respect of those businesses that are required or permitted to register.

5. The Working Group may wish to note that this draft recommendation should be read alongside paragraph 33 of the draft commentary in A/CN.9/WG.I/WP.93, which clarifies that States should set the foundations of a business registry either by way of law or regulation. The opening provisions of such law or regulation should set out explicitly the purpose of a system for the registration of businesses.

Recommendation 3: Key features of a business registration system

The Regulation should ensure that the system for business registration contains the following key features:

(a) The registration process is publicly accessible, simple, user-friendly and time and cost-efficient;

(b) The registration process is adapted to the needs of micro, small and medium-sized enterprises (MSMEs);

(c) The registered information on businesses is easily searchable and retrievable; and

(d) The registered information is current, reliable and secure.

6. The Working Group may wish to note that this draft recommendation should be read alongside paragraph 10 of the draft commentary in A/CN.9/WG.I/WP.93, which enumerates the key features of an effective system for the registration of businesses that are included in this recommendation and are informed by international good practice in the domain of business registration. Such good practice has been outlined in the following Working Papers: A/CN.9/WG.I/WP.85, A/CN.9/WG.I/WP.93, A/CN.9/WG.I/WP.93/Add.1 and A/CN.9/WG.I/WP.93/Add.2.

Recommendation 4: Minimum regulatory burden on micro, small and medium-sized enterprises (MSMEs)

The Regulation should ensure that micro, small and medium-sized enterprises (MSMEs) are subject to the minimum obligations necessary pursuant to the Regulation, except where such a business is subject to additional requirements under the law of the enacting State as a consequence of its particular legal form.

7. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 5, 13, 22 and 28 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1, which emphasize that in order to promote registration of MSMEs, business registration systems should provide for simplified registration and post-registration procedures. However, it should be noted that MSMEs may be subject to additional requirements as a result of their particular legal form.

II. Establishment and functions of the business registry

Recommendation 5: Responsible authority

The Regulation should establish that the organization and operation of the business registry is a function of the enacting State and that:

(a) The enacting State retains the authority over the operation of the registry in accordance with the applicable law of the enacting State regardless of the entity responsible for the daily operation of the registry; and

(b) The enacting State retains ownership of the registry record and, where appropriate, the registry infrastructure.

8. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 23 to 24 and 44 of the draft commentary in A/CN.9/WG.I/WP.93, which clarify that the business registry can be operated by the State in various ways, including by way of partnership with a private sector firm. However, the State should always retain responsibility for ensuring that the registry is operated in accordance with the applicable law or regulation. State ownership of the registry record and, when necessary, of the registry infrastructure is meant to establish public trust in the business registry and prevent the unauthorized commercialization or fraudulent use of information in the registry record.

Recommendation 6: Appointment of the registrar

The Regulation should provide that the person or entity authorized by the enacting State has the authority to appoint and dismiss the registrar, to determine the registrar's duties and to monitor the registrar's performance.

9. The Working Group may wish to note that this draft recommendation should be read alongside paragraph 34 of the draft commentary in A/CN.9/WG.I/WP.93, which clarifies that the term "registrar" should be understood as referring to a natural or legal person, and that the term also includes a group of persons appointed to perform the registrar's duties under the registrar's supervision.

Recommendation 7: Simple and predictable legislative framework

The Regulation should adopt a simple structure for rules governing the business registry and should avoid the unnecessary use of exceptions or discretionary power.

10. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 24 to 25 of the draft commentary in A/CN.9/WG.I/WP.93/Add.2, which explain that an electronic registration system requires a legal framework that supports simplicity and flexibility. Should the Working Group decide to retain this recommendation, the commentary may be adjusted accordingly and in line with paragraphs 59 to 71 of A/CN.9/WG.I/WP.93/Add.2, which provide an overview of the necessary features of the laws and regulations underlying business registration.

Recommendation 8: Transparency and accountability

The Regulation should ensure that rules or criteria that are developed are made public to ensure transparency of the registration procedures and accountability of the business registry.

11. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 62 to 64 of the draft commentary in A/CN.9/WG.I/WP.93/Add.2, which provide some examples of features required for a legislative framework promoting transparency and accountability in business registration. It should also be noted that paragraphs 81 to 83 of the draft commentary in A/CN.9/WG.I/WP.93/Add.2 suggest that appropriate institutional mechanisms should be established and sufficient financial means provided to ensure appropriate capacity-building programmes for personnel and supervisory authorities responsible for business registration services.

Recommendation 9: Functions of the business registry

The Regulation should establish that the functions of the business registry include:

(a) Registering the business when the business fulfils the necessary conditions established by the law of the enacting State;

(b) Providing guidance, particularly to the registrants of MSMEs, on the registration process and on the business's rights and obligations in connection thereto;

(c) Providing access to the services of the business registry;

(d) Assisting businesses in searching and registering a business name;

(e) Listing all the documents that must be submitted in support of an application to the registry;

(f) Providing the reason for any rejection of an application for business registration;

(g) Entering the information contained in the application submitted to the registry into the registry record, and indicating the time and date of each registration;

(h) Assigning a unique business identifier to the registered business;

(i) Sharing information among public agencies;

(j) Providing the person identified in the application as the registrant of the business with a copy of the notice of registration;

(k) Ensuring that any required fees for registration have been paid;

(l) Providing public notice of the registration in the means specified by the enacting State;

(m) Ensuring that the information in the registry is kept as current as possible;

(n) Entering the information contained in an amendment notice into the registry record;

(o) Entering the information on, including the date of and any reasons for, the declaration of deregistration of a business from the registry record;

(p) Publicizing the means of access to the services of the business registry, and the opening days and hours of any office of the registry;

(q) Indexing or otherwise organizing the information in the registry record so as to make it searchable;

(r) Protecting the integrity of the information in the registry record;

(s) Archiving information removed from the registry record; and

(t) Offering services incidental to or otherwise connected with business registration.

12. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 12, 35 and 45 to 46 of the draft commentary in A/CN.9/WG.I/WP.93, which clarify that listing the various functions of the business registry in the opening provisions of the law or the regulation governing business registration promotes clarity and transparency as to the nature and scope of the issues that are dealt with in detail later in the law or regulation. It is, however, important that such a list is read as an overview of the functions of the business registry and is not read as implying unintended limitations on the detailed provisions of the law or regulation.

Recommendation 10: Storage of and access to information contained in the registry

The Regulation should establish a centralized registration system that would process and store all information received from the registry's users. Such a central repository should permit access by satellite registry offices through the use of modern technology.

13. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 25 to 26 of the draft commentary in A/CN.9/WG.I/WP.93, which explain that centralized registration systems with an electronic format that are able to process data from the local registries permit a more efficient collection of data from businesses and avoid the duplication of procedures. In States where the registration process and its regulatory oversight are delegated to the local level, confusion can arise if each locality follows its own approach rather than adhering to a central vision. In order to function efficiently, an electronic central registry should be accessible by terminals in the various regions and/or cities of a State, where other registry offices are located.

III. Operation of the business registry

Recommendation 11: Electronic, paper-based or mixed registry

The Regulation should provide that the optimal medium to operate an efficient business registry is electronic. Should full adoption of electronic services not yet be possible, such an approach should nonetheless be implemented to as great an extent as permitted by the current technological infrastructure of the enacting State, as well as its institutional and legal framework, and expanded as that infrastructure improves.

14. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 47 to 55 of the draft commentary in A/CN.9/WG.I/WP.93, and paragraphs 12 to 23 of the draft commentary in A/CN.9/WG.I/WP.93/Add.2, which explain in broad terms the different media in which the application for registration should be filed and which information contained in the registry should be stored and searchable. In accordance with the consideration of these issues by the Working Group at its twenty-fifth session (paras. 67-68, A/CN.9/860), this draft recommendation and the relevant draft commentary take the view that achieving a registration system fully based on the use of modern technology should be the goal to which all registries should aspire. These materials, however, recognize that in several States, paper-based or mixed registration systems are in place and that such systems might be the only option available due to a lack of advanced technological infrastructure. Those States might benefit from the implementation of a phased-in approach, starting with the adoption of more simple electronic solutions and then progressing to more sophisticated solutions.

Recommendation 12: A single interface for business registration and registration with other authorities

The Regulation or the law of the enacting State should establish a single interface for business registration and registration with other public agencies, including designating

which public agency should have overall authority for the single interface. Such an interface:

(a) May consist of virtual or physical offices; and

(b) Should integrate the services of as many public agencies requiring the same information as possible, but at a minimum should include taxation and social service agencies.

15. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 2 to 11 of the draft commentary in A/CN.9/WG.I/WP.93/Add.2, which clarify that establishing a single interface, also known as a "one-stop shop", for the registration of businesses is one of the most effective approaches to streamline business registration. As a new business is usually required to register with several different government agencies, which often require the same information that has already been gathered by the business registry, the adoption of a "one-stop shop" permits businesses to, at a minimum, receive all the information and forms they need in order to complete the necessary procedures to establish their business by visiting one single office.

Recommendation 13: Use of unique business identifiers

The Regulation should provide that a unique business identifier should be allocated to each registered business and should:

(a) Be structured as a set of numeric or alphanumeric characters;

(b) Be unique to the business to which it has been allocated; and

(c) Remain unchanged until [x period of time] after any deregistration of the business.

15. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 38 to 44 of the draft commentary in A/CN.9/WG.I/WP.93/Add.2, which clarify the importance of interoperability between the business registry and other public agencies with which the business is required to register. This draft recommendation and its related commentary promote the view that integrated registration systems should be adopted based on the use of a unique business identifier, which ties information to a given business and allows for information in respect of it to be shared among different public and private agencies. The appropriate period of time in paragraph (c) should be chosen by the enacting State in keeping with its laws on the preservation of records.

Recommendation 14: Allocation of unique business identifiers

The Regulation or the law of the enacting State should specify that the allocation of a unique business identifier should be carried out either by the business registry upon registration of the business, or before registration by a legally-designated authority. In either case, the unique business identifier should then be made available to all other public agencies sharing the information associated with that identifier, and should be used in all official communication in respect of that business.

16. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 45 to 49 of the draft commentary in A/CN.9/WG.I/WP.93/Add.2, which provide examples of different ways to allocate unique business identifiers.

Recommendation 15: Implementation of a unique business identifier

The Regulation or the law of the enacting State should ensure that, when adopting a unique business identifier across different public agencies:

(a) There is interoperability between the technological infrastructure of the business registry and of the other public agencies sharing the information associated with the identifier; and

(b) That existing identifiers are linked to the unique business identifier.

17. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 47 to 49 and 53 to 54 of the draft commentary in A/CN.9/WG.I/WP.93/Add.2, which clarify that adoption of a unique business identifier normally requires a centralized database linking the businesses to all relevant government agencies whose information and communication systems must be interoperable. Use of a unique identifier also requires adaptation by public authorities of their existing identifiers, which can be accomplished in various ways.

Recommendation 16: Unique business identifiers and individual businesses

The Regulation or the law of the enacting State should adopt a verification system to avoid multiple unique business identifiers being allocated to the same business by different public agencies.

18. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 50 to 51 of the draft commentary in A/CN.9/WG.I/WP.93/Add.2, which explain that situations may arise in which different agencies in the same jurisdiction allocate identifiers to businesses based on the particular business form of the enterprise. This may result in one business being allocated several identifiers or in several businesses being allocated the same identifier.

IV. Registration

Recommendation 17: Accessibility of information on how to register

The Regulation should specify that information on the registration process and the applicable fees, if any, should be widely publicized, readily retrievable, and available free of charge.

19. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 55 to 57 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1 and paragraph 84 of the draft commentary in A/CN.9/WG.I/WP.93/Add.2, which explain that in order to encourage businesses to register, it is important to make available to the registry's users information concerning the registration process and the relevant fees. The commentary notes that while developed technological infrastructures facilitate sharing such information, lack of modern technology should not prevent access to information, which could be ensured through other means.

Recommendation 18: Businesses required or permitted to register

The Regulation or the law of the enacting State should specify:

(a) Which businesses are required to register; and

(b) Which businesses are permitted to register.

20. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 5 to 7 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1, concerning which commercial entities are required to register. In accordance with draft recommendation 1, this recommendation requires that it be made clear which businesses are required to register and which are permitted to register. The commentary could clarify that such a distinction should be made in the law establishing the business registry or in the law specifying the legal form of the business, but that, in any event, the two bodies of law should be consistent.

Recommendation 19: Minimum information required for registration

The Regulation or the law of the enacting State should establish the minimum information and supporting documents required for the registration of a business, including at least:

(a) The name and address of the business or, in cases where the business does not have a standard form address, the precise description of the geographical location of the business;

(b) The identity of the person or persons registering the business;

(c) The identity of the person or persons who are authorized to act on behalf of the business; and

(d) The legal form of the business being registered.

21. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 8 to 9 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1, which explain the requirements businesses must meet in order to be registered. Although such requirements are determined by the State based on its legal and economic framework and may vary depending on the legal form of the business being registered, the common minimum requirements for business registration are thought to be those listed in subparagraphs (a) to (d) of this draft recommendation.

Recommendation 20: Language in which information submitted

The Regulation should provide that the information and documents submitted to the business registry must be expressed in the language or languages specified by the enacting State, and in the character set as determined and publicized by the registry.

22. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 51 to 53 and 80 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1, which explain that in most States, the business registration request can only be submitted in the official language(s) of the State or region of the business registry. There are States, however, where information can be submitted in a foreign language. The commentary further clarifies that States with multiple official languages should ensure that the registration, post-registration and information services of the registry are available to all users regardless of the official language with which they are conversant.

Recommendation 21: Notice of registration

The Regulation should establish that the business registry should notify the registrant whether or not its registration is effective as soon as practicable, and in any event no later than [x] business days following receipt of the application for registration.

23. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 38 to 45 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1, which clarify the importance for the business registry of ensuring the integrity and the security of the registry record. Again, the enacting State is to choose the shortest possible appropriate time period within which the registrant should be notified of the effectiveness of the business registration.

Recommendation 22: Content of notice of registration

The Regulation should provide that the notice of registration may be in the form of a certificate, notice or card, and that it should contain the following information:

(a) The unique business identifier;

(b) The date of registration;

(c) The name of the business; and

(d) The legislation under which the registration has been effected.

24. The Working Group may wish to note that there is no specific paragraph in the draft commentary that supports this recommendation, but that if the draft recommendation is retained, an appropriate addition should be made to the draft commentary currently found in paragraphs 22 to 26 of A/CN.9/WG.I/WP.93/Add.1.

Recommendation 23: Period of effectiveness of registration

The Regulation should clearly establish that the registration is valid until the business is deregistered.

25. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 29 to 30 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1, which clarify the approaches a State can adopt in order to determine the period of effectiveness of the registration of a business. Under the first approach, the registration of the business is subject to a maximum period of duration established by law, so that unless the registration is renewed, the registration of the business will expire on the date stated in the certificate of registration (or upon termination of the business). This recommendation opts for the second approach under which no maximum period of validity is established for the registered business.

Recommendation 24: Time and effectiveness of registration

The Regulation should:

(a) Require the business registry to time and date stamp applications for registration and to process them in the order in which they are received and as soon as practicable, but in any event not later than [x] business days after their receipt;

(b) Establish that the registration of the business is effective from the moment the notice of registration is issued; and

(c) Specify that the registration of the business must be entered into the business registry as soon as practicable thereafter, and in any event within [x] business days.

26. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 31 to 33 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1, which explain that the requirement to determine the time when the registration of a business is effective ensures the transparency and predictability of the business registration system. The Working Group may wish to note that paragraph (a) of the recommendation takes into consideration both electronic registry systems in which the registry software usually time and date stamp the information submitted as well as registry systems in which the information to be registered is submitted in paper form and must be entered into the registry record by the registry staff. Again, the enacting State is to choose the shortest possible appropriate time period within which the registration of the business should be entered into the business registry.

Recommendation 25: Refusal to register and incorrect or incomplete information

The Regulation should provide that the business registrar:

(a) Must refuse registration of the business if the application does not meet the requirements specified in the Regulation or the law of the State and is required to provide to the registrant the reasons for refusal in written form; and

(b) Is granted the authority to correct its own errors as well as any incidental errors that may appear in the information and documents submitted in support of the registration of the business. The Regulation should strictly determine the conditions under which the registrar may exercise this authority.

27. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 22 to 26 and 38 to 39 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1, which explain that while the business registrar does not have the discretion to refuse to register a business for reasons other than those established by law, the registrar should be given the authority to rectify its own clerical mistakes and any incidental errors that may be noted in the information and documents submitted in support of the business registration. Such an approach could avoid imposing a potentially costly and time-consuming burden on the registrant to resubmit information and documents.

Recommendation 26: Registration of branches

The Regulation should ensure that:

(a) Registration of branches of businesses established outside the jurisdiction of the business registry is required or permitted;

(b) Any definition of "branch" for registration purposes is consistent with the definition provided in the law of the enacting State; and

(c) Provisions regarding branch registration should address the following issues:

(i) Time and date of registration of the branch;

(ii) Disclosure requirements, such as name, address of the person or persons registering the branch; name and address of the branch and copy of the notice of registration of the parent company;

(iii) Information on the person or persons who can legally represent the branch; and

(iv) The language in which the registration documents should be submitted.

28. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 15 to 17 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1, which outline the advantages of permitting the registration in the enacting State of branches of a foreign company. It would also be possible to include in the draft recommendation reference to the situation where a person or branch does not have a standard form address and should instead include a precise description of the geographical location.

V. Post-registration

Recommendation 27: Information required after registration

The Regulation should specify that after registration, the registered business must file with the business registry the following information:

(a) Annual or periodic reports and financial documents as required by the law of the enacting State;

(b) The identity of the owner of the business if different from that of the registrant, and as required by the law of the enacting State;

(c) Amendments to the current information in the business registry in respect of changes as they occur:

(i) In the name, address, description of geographical location, or legal status of the business;

(ii) In the identity of the person or persons authorized to act on behalf of the business; and

(iii) Any other changes to the information that was initially required for the registration of the business.

29. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 11 to 13 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1, which explain that registered businesses, in order to remain validly registered, are usually

required to provide certain information throughout their life cycle. The information enumerated in this recommendation should be required from all registered businesses regardless of their size or legal form. Depending on the legal form of the business being registered, additional information may be required pursuant to the law of the enacting State.

Recommendation 28: Maintaining a current registry

The Regulation should require the registrar to ensure that the information in the business registry is kept current, including through:

(a) Sending an automated request to registered businesses at intervals of [x] year(s) requiring them to report whether the information maintained in the registry continues to be accurate or stating which changes should be made; and

(b) Updating the registry immediately upon receipt of the amending information or as soon as practicable thereafter.

30. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 27 and 78 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1, which stress that the information maintained in the registry must be of good quality, current and reliable in order to make the services of the business registry valuable for the users. The commentary provides examples of various approaches that have been adopted in this regard. If the Working Group decides to retain this recommendation, it may wish to include in the commentary an additional clarification on the advantages and disadvantages of the various approaches and in particular of the approach recommended in this recommendation. With regard to paragraph (a) of the recommendation, the Working Group may also wish to note that the enacting State should determine the length of the interval at which the automated request to the registered business should be sent.

Recommendation 29: Time and effectiveness of amendments to registered information

The Regulation should:

(a) Require the business registry to time and date stamp amendments to registered information and to process them in the order in which they are received;

(b) Notify the registered business as soon as practicable that its registered information has been amended; and

(c) Establish that amendments to the registered information are effective from the moment the notice of amendment is issued.

31. The Working Group may wish to note that this recommendation mirrors draft recommendation 24 which discusses the time and effectiveness of registration. As explained in paragraphs 31 to 33 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1, it is also important to establish the time and effectiveness of amendments to registered information in order to ensure the transparency and predictability of the business registration systems. Paragraph (a) of the draft recommendation takes into consideration both electronic registry systems in which the registry software usually time and date stamp the information submitted as well as registry systems in which the information to be registered is submitted in paper form and must be entered into the registry record by the registry staff.

(A/CN.9/WG.I/WP.96/Add.1) (Original: English)

Note by the Secretariat on draft recommendations on key principles of business registration

ADDENDUM

Contents

Draft Recommendations (*continued*)

VI. Accessibility and information-sharing

Recommendation 30: Public access to the business registry

The Regulation should permit any person to access the services of the business registry and the information contained in the registry.

1. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 64 to 67 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1, which stress that in order to achieve the objectives of a business registration system (see draft recommendations 2 and 3) the system must facilitate access by general users of the registered information. The principle of public access enhances certainty and transparency in the operation of the business registry, and due to its importance, it should be stated in the Regulation governing business registration.

Recommendation 31: Hours of operation

The Regulation should provide that:

(a) If access to the services of the business registry is provided through a physical office:

(i) Each office of the registry is open to the public during [the days and hours to be specified by the enacting State]; and

(ii) Information about any registry office locations and their opening days and hours is publicized on the registry's website, if any, or otherwise widely publicized, and the opening days and hours of registry offices are posted at each office;

(b) If access to the services of the business registry is provided electronically, access is available at all times; and

(c) Notwithstanding subparagraphs (a) and (b) of this recommendation:

(i) The business registry may suspend access to the services of the registry in whole or in part for a period of time that is as short as practicable; and

(ii) Notification of the suspension and its expected duration is published on the registry's website, if any, or otherwise widely publicized, in advance when feasible and, if not feasible, as soon thereafter as reasonably practicable, and, if

the registry provides access to its services through physical offices, the notification is posted at each office.

2. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 58 to 60 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1, which explain that the approach to establish the operating days and hours of the business registry depends on whether the registry requires users to be physically present at the business registry office or whether they may access its services electronically from another location. With regard to paragraph (c) of the draft recommendation, the commentary provides a non-exhaustive list of events justifying a suspension of registry services, such as fire, flood, earthquake or war, or if the registry provides users with direct electronic access, a breakdown in the Internet or network connection. Further, the Working Group may wish to consider whether it would be useful to add information to the draft commentary in respect of acceptable time periods for such service interruptions.

Recommendation 32: Electronic access to submit registration, to search and to request amendments

The Regulation should establish that, where information and communication technology is available, registrants should be permitted to enter and submit their information, and the public should be permitted to search the business registry, without requiring the physical presence in the business registry office of the user of the services or the intermediation of the registry staff.

3. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 45, 61 to 63 and 67 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1, which explain that when business registries are operated electronically, they should allow users to submit applications or make searches without the need to rely on intermediation by the registry staff.

Recommendation 33: Unnecessary barriers to accessibility

The Regulation should ensure the facilitation of access to business registration and registered information by avoiding the creation of unnecessary barriers such as requirements for the installation of specific software; charging prohibitively expensive access fees; requiring users of information services to register; or unduly limiting the languages in which information on the registration process is available.

4. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 79 to 80 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1, which clarify that information being publicly available does not mean that information is also easily accessible to users. States should thus identify potential barriers that prevent easy access to business registry services and implement the necessary measures to remove those barriers or minimize their negative effect.

Recommendation 34: Public availability of information

The Regulation should specify that all registered information is available to the public unless it is restricted for reasons of confidentiality as set out in the law of the enacting State, or for reasons of personal security.

5. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 68 to 73 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1, which clarify that permitting full public access to the registered information should not compromise the confidentiality of private data, which can be protected by allowing users to search only certain types of information.

Recommendation 35: Where information is not made public

In cases where information in the business registry is not made public, the Regulation should:

(a) Establish which information concerning the registered business is subject to the applicable rules in the enacting State on public disclosure of private data and require the registrar to list the types of information that cannot be publicly disclosed; and

(b) Specify the circumstances in which the registrar may use or disclose information that is subject to confidentiality restrictions.

6. The Working Group may wish to note that this draft recommendation should be read alongside paragraph 50 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1 and paragraph 33 of the draft commentary in A/CN.9/WG.I/WP.93/Add.2, which explain that in order to maintain the integrity of the registry, access to sensitive data, such as dates of birth or personal addresses, should be controlled.

Recommendation 36: Sharing of private data between public agencies

The Regulation should ensure that rules for the sharing of private data between public agencies pursuant to the unique business identifier system adopted:

(a) Conform with the applicable rules in the enacting State on public disclosure of private data;

(b) Permit public agencies to access private data included in the unique business identifier system only in order to carry out their official functions; and

(c) Permit public agencies to access private data included in the unique business identifier system only in relation to those businesses with respect to which they have statutory authority.

7. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 33, 52 and 55 to 58 of the draft commentary in A/CN.9/WG.I/WP.93/Add.2, which clarify that increased transparency to avoid misuse of the business for illicit purposes may affect the sharing of information among the different public authorities linked by the unique business identifier.

Recommendation 37: Exchange of information among business registries

The Regulation should specify that systems for the registration of businesses should adopt solutions that facilitate information exchange between registries from different jurisdictions.

8. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 27 to 28 of the draft commentary in A/CN.9/WG.I/WP.93.

VII. Fees

Recommendation 38: Fees charged for registry services

The Regulation should establish fees for registration and post-registration services, if any, at a level that is low enough that it encourages business registration, and that, in any event, does not exceed a level that enables the business registry to cover the cost of performing those services.

9. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 74, 77 to 78 and 80 of the draft commentary in A/CN.9/WG.I/WP.93/Add.2, which explain that business registration is a public service that should encourage businesses to register and that it should not serve as a revenue-generating mechanism.

Recommendation 39: Fees charged for information

The Regulation should establish that information contained in the business registry should be available to the public free of charge, but should permit modest fees to be charged for value-added information products produced or developed by the registry.

10. The Working Group may wish to note that this draft recommendation should be read alongside paragraph 76 of the draft commentary in A/CN.9/WG.I/WP.93/Add.2, which explains that providing information products upon the payment of a fee can be a viable option for registries to derive self-generated funding. However, fees should not be charged for basic services, such as name searches or access to the raw information contained in the business registry, but only for more sophisticated services.

Recommendation 40: Publication of fee amounts and methods of payment

The Regulation should provide that information that clearly establishes the amount of any fees for registration and information services should be widely publicized, as should acceptable methods of payment. Such methods of payment should include permitting users to enter into an agreement with the business registry to establish a user account for the payment of fees.

11. The Working Group may wish to note that this draft recommendation should be read alongside paragraph 79 of the draft commentary in A/CN.9/WG.I/WP.93/Add.2, which provides examples of how information on the amount of fees for registration and other services provided by the business registry could be publicized.

VIII. Sanctions and liability

Recommendation 41: Sanctions

The Regulation should establish and ensure wide publication of sanctions (including fines, deregistration and loss of access to services) that may be imposed on a business for a breach of its obligations under the Regulation. Such rules may include provisions pursuant to which a breach of obligation may be forgiven provided it is rectified within a specified time.

12. The Working Group may wish to note that this draft recommendation should be read alongside paragraph 14 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1 and paragraph 75 of the draft commentary in A/CN.9/WG.I/WP.93/Add.2, which suggest that it is important for a State to have the ability to enforce proper compliance with initial and ongoing registration requirements. It should also be noted that it would be possible to add a draft recommendation reflecting paragraph 35 of the draft commentary in A/CN.9/WG.I/WP.93/Add.2, which suggests that the law of the enacting State should include legislative and other measures to prevent unauthorized access to or interference with the business registry system; unauthorized interception of or interference with data; and misuse of devices and fraud and forgery.

Recommendation 42: Liability for submission of misleading, false or deceptive information

The Regulation or the law of the enacting State should establish the liability of the registrant or the registered business for any misleading, false, incomplete or deceptive information that the registrant or business has knowingly submitted to the business registry.

13. The Working Group may wish to note that this draft recommendation should be read alongside paragraph 26 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1, which clarifies that in order to ensure that reliable information is always submitted to the registry, the liability of the registrant should be established for any deliberate act that results in serious inaccuracies in the information delivered to the business registry.

Recommendation 43: Liability of the business registry

The Regulation or the law of the enacting State should establish the liability of the business registry for loss or damage caused by error or negligence in the registration of businesses or the administration or operation of the registry.

14. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 46 to 49 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1, which clarify that the registry is liable for its errors or negligence in the registration of businesses or in the administration or operation of the business registry.

IX. Deregistration

Recommendation 44: Voluntary deregistration

The Regulation should require the registrar to deregister a business on the application of the business for a declaration of deregistration that fulfils the requirements according to the law of the enacting State.

15. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 18 to 20 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1, which explain that deregistration is the removal of a business from the business registry record once the business, for whatever reason, has permanently ceased to operate.

Recommendation 45: Compulsory deregistration

The Regulation should:

(a) Require the registrar to deregister a business when it is ordered to do so by a specified competent authority or the court; and

(b) Provide that the decision or order for deregistration of the business must be placed on the registry.

16. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 18 to 20 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1.

Recommendation 46: Process of deregistration

The Regulation should provide that:

(a) A written notice of the request for a declaration of deregistration is sent to the registered business; and

(b) The declaration of deregistration is publicized in accordance with the legal requirements of the enacting State.

17. The Working Group may wish to note that this draft recommendation should be read alongside paragraph 34 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1, which explains that the law or regulation should distinguish between voluntary and compulsory deregistration and that in those cases where deregistration does not occur at the request of the business, the business should be given sufficient time to oppose that decision.

Recommendation 47: Revocation of deregistration

The Regulation or the law of the enacting State should specify the circumstances under which and the time limit within which the registrar is required to restore a business entity that has been deregistered.

18. The Working Group may wish to note that this draft recommendation is not currently supported by any corresponding paragraphs in the draft commentary, but that should the draft recommendation be retained, appropriate information could be inserted into the commentary.

Recommendation 48: Time and effectiveness of deregistration

The Regulation should:

(a) Specify when the deregistration of a business has legal effect;

(b) Specify that any required notice of the deregistration for that legal form of business has been publicized in accordance with the law of the enacting State; and

(c) Specify the legal effects of deregistration.

19. The Working Group may wish to note that this draft recommendation should be read alongside paragraph 34 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1, which clarifies that the time and effectiveness of the deregistration should be established by law or regulation, and that regardless of whether the deregistration is voluntary or compulsory, a notice of deregistration should be issued by the registry stating the date of effect of the deregistration, and the reasons therefor.

X. Preservation of records

Recommendation 49: Preservation of records

The Regulation should provide that:

(a) Documents and information submitted by the registrant and the registered business, including information in respect of deregistered businesses, should be preserved by the registry for a specified period of time in a manner that enables the information to be retrieved by the registry and other interested users;

(b) Where paper documents have been submitted and the information contained in them has been entered into an electronic registry that meets the reliability standards established by the State, the period of preservation should be [x] years, to be specified by the enacting State; and

(c) Where paper documents have been submitted and the information contained in them has not been entered into an electronic registry, the period of preservation should be longer, up to [x] years, to be specified by the enacting State.

20. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 35 to 37 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1, which highlight the importance of preservation of the documents submitted by the registrant and the registered business. The length of the preservation period would be influenced by the way the registry operates, i.e. if it is electronic, paper-based or mixed.

Recommendation 50: Amendment or deletion of information

The Regulation should provide that the business registry does not have the authority to amend or delete information contained in the registry record except in those cases specified in the Regulation or elsewhere in the law of the enacting State.

21. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 41 and 43 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1.

Recommendation 51: Protection against loss of or damage to the business registry record

The Regulation or the law of the enacting State should require the business registry to protect the registry records from loss or damage by maintaining back-up mechanisms to allow for any necessary reconstruction of the registry record.

22. The Working Group may wish to note that this draft recommendation should be read alongside paragraph 42 of draft commentary in A/CN.9/WG.I/WP.93/Add.1, which explains that preserving the integrity and the security of the registry record also requires the business registry to implement measures to permit reconstruction of the business registry. Rules governing the security of other public records in the enacting State might be applicable in this context.

Recommendation 52: Safeguards from accidental destruction

The Regulation should provide that appropriate procedures should be established to mitigate risks from force majeure, natural hazards, or other accidents that can affect the processing, collection, transfer and protection of data housed in electronic or paper-based registries.

23. The Working Group may wish to note that this draft recommendation should be read alongside paragraph 34 of the draft commentary in A/CN.9/WG.I/WP.93/Add.2, which considers the risk-management procedures that the business registry should implement in order to ensure the reliable functioning of the registry. The Working Group may wish to note that while this draft recommendation refers to both electronic and paper-based registries, the draft commentary refers to electronic registries only, and should be amended accordingly if the draft recommendation is retained.

XI. The underlying legislative framework

Recommendation 53: Clarity of the law

The law of the enacting State should, to the extent possible, consolidate legal provisions pertaining to business registration in a single legislative text, which is clearly written and uses simple language that can be easily understood.

24. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 59 to 61 and 65 to 67 of the draft commentary in A/CN.9/WG.I/WP.93/Add.2, which clarify that States wishing to promote business registration, in particular of MSMEs, should consider reviewing their existing legal framework in order to identify possible impediments to the simplification of the registration process.

Recommendation 54: Flexible legal forms

The law of the enacting State should permit flexible and simplified legal forms for business in order to facilitate and encourage registration of businesses of all sizes, including those forms considered in the [UNCITRAL model law on a simplified business entity].

25. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 68 to 71 of the draft commentary in A/CN.9/WG.I/WP.93/Add.2. The Working Group may also wish to consider whether the results of its ongoing discussion in respect of a legislative text on a simplified business entity should be reflected in this draft recommendation.

Recommendation 55: Primary and secondary legislation to accommodate the evolution of technology

The law of the enacting State should establish guiding legal principles in relation to electronic registration in primary legislation, and should set out specific provisions on the detailed functioning and requirements of the electronic system in secondary legislation.

26. The Working Group may wish to note that this draft recommendation should be read alongside paragraph 26 of the draft commentary in A/CN.9/WG.I/WP.93/Add.2, which explains that since information technology is a field marked by rapid technological evolution, it would be advisable to establish guiding legal principles in the primary legislation, leaving secondary legislation to stipulate the specific provisions regulating the detailed functioning and the requirements of the system.

Recommendation 56: Electronic documents and electronic authentication methods

The law of the enacting State should:

(a) Permit and encourage the use of electronic documents as well as of electronic signatures and other equivalent identification methods; and

(b) Regulate such use pursuant to the following principles:

(i) Documents cannot be denied legal effect, validity or enforceability solely on the grounds that they are in electronic format, or they are signed electronically;

(ii) The place of origin of the electronic signature should not determine whether and to what extent the electronic signature is legally effective;

(iii) Different technologies that may be used to communicate, store and/or sign information electronically should be subject to the same legal treatment; and

(iv) Electronic documents and electronic signatures have the same purpose and function as their paper-based counterparts and are thus functionally equivalent to them; and

(c) Establish criteria to reliably identify the person submitting an electronic document and/or using an electronic signature or equivalent authentication method.

27. The Working Group may wish to note that this draft recommendation should be read alongside paragraphs 27 to 32 of the draft commentary in A/CN.9/WG.I/WP.93/Add.2 and paragraph 78 of the draft commentary in A/CN.9/WG.I/WP.93/Add.1, which clarify the main features of a legislative reform undertaken to support electronic business registration. Such features include the adoption of laws permitting electronic signatures and the submission of electronic documents, which should establish, at a minimum, principles of non-discrimination, technological neutrality and functional equivalence allowing for equal treatment of paper-based and electronic information. The commentary further notes that whether or not legislation on electronic signatures is adopted, various other techniques could and should be used by the business registry to prevent identity theft of the users of the electronic registry and ensure security of the information by them.

Recommendation 57: Electronic payments

The law of the enacting State should include legislation to enable and facilitate electronic payments.

28. The Working Group may wish to note that this draft recommendation should be read alongside paragraph 36 of the draft commentary in A/CN.9/WG.I/WP.93/Add.2, which clarifies that once the technological infrastructure of the State is sufficiently developed, users of the business registry should be enabled to pay electronically any required fees.

II. DISPUTE SETTLEMENT

A. Report of Working Group on Arbitration and Conciliation on the work of its sixty-third session (Vienna, 7-11 September 2015)

(A/CN.9/861)

[Original: English]

Contents

I. Introduction

1. At its forty-seventh session, the Commission had before it a proposal for future work in relation to enforceability of settlement agreements resulting from international commercial conciliation (A/CN.9/822). The Commission agreed that the Working Group should consider at its sixty-second session the issue of enforcement of international settlement agreements resulting from conciliation proceedings and should report to the Commission at its forty-eighth session, in 2015, on the feasibility and possible form of work in that area.[1]

2. At its sixty-second session, the Working Group considered that topic on the basis of notes by the Secretariat (A/CN.9/822 and A/CN.9/WG.II/WP.187). After discussion, the Working Group agreed to suggest to the Commission that it be given a mandate to work on the topic of enforcement of settlement agreements, to identify the relevant issues and develop possible solutions, including the preparation of a convention, model provisions or guidance texts. Considering that differing views were expressed as to the form and content, as well as the feasibility, of any particular instrument, it was also agreed to suggest that a mandate on the topic be broad enough to take into account the various approaches and concerns (A/CN.9/832, para. 59).

3. At its forty-eighth session, the Commission had before it the report of the Working Group on the work of its sixty-second session (A/CN.9/832) as well as comments by States on their legislative framework in relation to enforcement of settlement agreements

[1] *Official Records of the General Assembly, Sixty-ninth Session, Supplement No. 17* (A/69/17), para. 129.

(A/CN.9/846 and its addenda). After discussion, the Commission agreed that the Working Group should commence work at its sixty-third session on the topic of enforcement of settlement agreements to identify relevant issues and develop possible solutions, including the possible preparation of a convention, model provisions or guidance texts. The Commission also agreed that the mandate of the Working Group with respect to that topic should be broad to take into account the various approaches and concerns.[2]

4. At its forty-eighth session, the Commission also approved the draft text of the revised UNCITRAL Notes on Organizing Arbitral Proceedings in principle and requested the Secretariat to revise the draft text in accordance with the deliberations and decisions of the Commission. The Commission agreed that the Secretariat could seek input from the Working Group on specific issues, if necessary, during its sixty-fourth session and further requested that the draft revised Notes be finalized for adoption by the Commission at its forty-ninth session, in 2016.[3]

5. Further, at that session, the Commission considered the topic of concurrent proceedings and the preparation of a code of ethics/conduct, in the field of both investor-State and purely commercial arbitration. Regarding concurrent proceedings, the Commission requested the Secretariat to explore the topic further, in close cooperation with experts including those from other organizations working actively in that area and to report to the Commission at a future session with a detailed analysis of the topic including possible work that could be carried out. Regarding the preparation of a code of ethics/conduct, the Secretariat was requested to assess the feasibility of work in that area and report to the Commission at a future session.[4]

6. In addition, the Commission agreed that the Secretariat should continue to coordinate with organizations in relation to the various types of arbitration to which UNCITRAL standards were applicable, and to closely monitor developments, further exploring areas for cooperation and coordination. In relation to investor-State arbitration, the Commission noted that the current circumstances posed a number of challenges and proposals for reforms had been formulated by a number of organizations.[5]

II. Organization of the session

7. The Working Group, which was composed of all States members of the Commission, held its sixty-third session in Vienna, from 7-11 September 2015. The session was attended by the following States members of the Working Group: Algeria, Argentina, Armenia, Australia, Austria, Belarus, Brazil, Bulgaria, Canada, China, Colombia, Croatia, Czech Republic, Denmark, Ecuador, El Salvador, France, Germany, Hungary, India, Indonesia, Iran (Islamic Republic of), Israel, Italy, Japan, Kenya, Kuwait, Malaysia, Mexico, Pakistan, Panama, Paraguay, Philippines, Poland, Republic of Korea, Russian Federation, Singapore, Spain, Switzerland, Thailand, Turkey, United States of America and Venezuela (Bolivarian Republic of).

8. The session was attended by observers from the following States: Angola, Bangladesh, Belgium, Bolivia (Plurinational State of), Chile, Dominican Republic, Finland, Lebanon, Luxembourg, Netherlands, Niger, Norway, Peru, Portugal, Qatar, Romania, Slovakia, Somalia, South Africa, Sweden and Viet Nam.

9. The session was attended by observers from the European Union.

10. The session was also attended by observers from the following international organizations:

(a) *United Nations system*: Food and Agriculture Organization of the United Nations (FAO);

(b) *Intergovernmental organization*: Central American Court of Justice (CCJ);

---

[2] Ibid., *Seventieth Session, Supplement No. 17* (A/70/17), paras. 135-142.
[3] Ibid., para. 133.
[4] Ibid., paras. 143-147.
[5] Ibid., para. 268.

(c) *Invited non-governmental organizations*: American Bar Association (ABA), American Society of International Law (ASIL), Arbitration Institute of the Stockholm Chamber of Commerce (SCC), Asociacion Americana de Derecho Internacional Privado (ASADIP), Association Suisse de l'Arbitrage (ASA), Association for the Promotion of Arbitration in Africa (APAA), Belgian Center for Arbitration and Mediation (CEPANI), Center for International Legal Studies (CILS), China International Economic and Trade Arbitration Commission (CIETAC), Construction Industry Arbitration Council (CIAC), European Law Students' Association (ELSA), Florence International Mediation Chamber (FIMC), G.C.C. Commercial Arbitration Centre (GCCCAC), German Institution of Arbitration (DIS), International Commercial Arbitration Court at the Ukrainian Chamber of Commerce and Industry (ICAC-UCCI), International Council for Commercial Arbitration (ICCA), International Insolvency Institute (III), International Mediation Institute (IMI), Korean Commercial Arbitration Board (KCAB), Madrid Court of Arbitration, Miami International Arbitration Society (MIAS), Milan Club of Arbitrators (MCA), Moot Alumni Association (MAA), New York International Arbitration Centre (NYIAC), P.R.I.M.E. Finance Foundation (PRIME), Pakistan Business Council (PBC), Queen Mary University of London, School of International Arbitration (QMUL), Regional Centre for International Commercial Arbitration-Lagos (RCICAL) and Vienna International Arbitral Centre (VIAC).

11. The Working Group elected the following officers:

Chairperson: Ms. Natalie Yu-Lin Morris-Sharma (Singapore)

Rapporteur: Ms. Ximena Bustamante (Ecuador)

12. The Working Group had before it the following documents: (a) provisional agenda (A/CN.9/WG.II/WP.189); (b) notes by the Secretariat, enforceability of settlement agreements (A/CN.9/WG.II/WP.190, A/CN.9/WG.II/WP.191 and A/CN.9/WG.II/WP.192).

13. The Working Group adopted the following agenda:

1. Opening of the session.
2. Election of officers.
3. Adoption of the agenda.
4. Enforceability of settlement agreements.
5. Organization of future work.
6. Adoption of the report.

III. Deliberations and decisions

14. The Working Group then considered agenda item 4 on the basis of documents prepared by the Secretariat. The deliberations and decisions of the Working Group with respect to agenda item 4 are reflected in chapter IV.

IV. Enforceability of settlement agreements

15. The Working Group recalled that UNCITRAL had developed two instruments aimed at harmonizing international commercial conciliation: the Conciliation Rules (1980) and the Model Law on International Commercial Conciliation (2002) (the "Model Law on Conciliation" or the "Model Law"), which formed the basis of an international framework for conciliation. The issue of enforcement of agreements settling a dispute (referred to as "settlement agreement(s)") had been considered when preparing the Model Law on Conciliation resulting in article 14 which provided as follows: "If the parties conclude an agreement settling a dispute, that settlement agreement is binding and enforceable ... [*the enacting State may insert a description of the method of enforcing settlement agreements or refer to provisions governing such enforcement*]."

16. The Working Group agreed to consider, on a preliminary basis, questions underlying enforceability of settlement agreements as presented in section C of document A/CN.9/WG.II/WP.190.

A. Settlement agreements resulting from conciliation

17. The Working Group considered whether an instrument to be prepared on enforcement of settlement agreements (referred to as the "instrument") should be limited to settlement agreements resulting from conciliation.

18. The Working Group noted that one possible approach would be to address enforcement of settlement agreements, regardless of the procedure that led to their conclusion, as long as their purpose was to settle a dispute. That approach did not receive support because such an approach could over-complicate the enforcement procedure, as the enforcing authority would have to determine whether there existed a dispute in the first instance and whether the purpose of the agreement was to settle that dispute.

19. Broad support was expressed for limiting the scope of the instrument to settlement agreements that resulted from conciliation, as that approach would: (i) be consistent with the mandate given to the Working Group and in line with the proposal considered by the Commission (see above, paras. 1-3); (ii) promote conciliation as an effective means of solving disputes; (iii) bring certainty to the enforcement procedure which would favour settlement agreements over ordinary contracts; and (iv) avoid additional disputes on whether or not a settlement agreement fell within the scope of the instrument.

1. Notion of conciliation

20. The Working Group then considered how the term "conciliation" should be understood in the instrument. In so doing, the Working Group identified a wide range of issues with the understanding that it was premature at that stage to agree on a preferred approach.

Article 1(3) of the Model Law

21. It was widely felt that the broad definition of "conciliation" in article 1(3) of the Model Law provided a useful reference. In that context, it was suggested that the notion of "conciliation" in the instrument should be broad and inclusive to cover different types of conciliation techniques, while the Working Group would be free to exclude certain types at a later stage. It was suggested that the notion should be clear so that it would be understood uniformly in various jurisdictions and provide sufficient certainty regarding the trustworthiness of the conciliation process.

22. It was highlighted that, according to the definition in article 1(3) of the Model Law, a conciliator did not have the authority to impose upon the parties a solution to the dispute. A question was raised whether that characteristic should be retained in the notion of conciliation in the instrument.

Possible additional characteristics

23. It was further suggested that additional characteristics of the conciliation procedure such as the qualifications of conciliators and the professional nature of the procedure might need to be taken into account, either as part of the definition or as separate conditions, reflecting the objective of the instrument and depending on its form.

Origin of the conciliation process and its impact on the scope of the instrument

24. The Working Group noted that a settlement agreement might find its origin in an agreement to submit a dispute to conciliation, or it might be concluded in the course of a dispute resolution process including judicial or arbitral proceedings, which might not necessarily contain a conciliation component. In that context, situations were described where parties might reach an agreement that would resolve their dispute in the course of a judicial or an arbitral proceeding. As a result, that agreement might be recorded in the form of a judicial decision or an arbitral award on agreed terms. It was said that those situations would need to be taken into account when defining the scope of the instrument.

25. In that respect, various views were expressed. One view was that the scope of the instrument should be limited to agreements resulting only from conciliation. It was mentioned that work beyond that scope could overlap with ongoing work by other

international organizations with respect to enforcement of court judgements (for instance, the judgements project of the Hague Conference on Private International Law), as well as the 1958 Convention on the Recognition and Enforcement of Foreign Arbitral Awards ("the New York Convention") particularly with respect to an award on agreed terms. It was noted that in certain jurisdictions, agreements arising from conciliation processes within courts had the same effect as court judgements and were enforceable as such. It was suggested that a careful assessment should be made whether there would be any overlap that could be problematic.

26. Another view was that the scope of the instrument should include situations where the parties had reached an agreement in the course of judicial or arbitral proceedings. In support of that view, it was noted that many commercial disputes did not necessarily begin with a conciliation process and that parties, after submitting a dispute to a court or an arbitral tribunal, might at a later stage reach an agreement during the judicial or arbitral proceedings. In that context, attention was drawn to article 1(8) of the Model Law which addressed the basis upon which the conciliation procedure could be undertaken, such as an agreement between the parties, a direction or suggestion of a court, arbitral tribunal or competent authority.

27. In response, it was stated that if such an approach were to be adopted in the instrument, it should be limited to situations where there was a conciliation process during the judicial or arbitral proceedings and where the agreement was not recorded in a judicial decision or an arbitral award. Furthermore, attention was drawn to article 1(9) which excluded from the scope of the Model Law situations where a judge or an arbitrator, in the course of judicial or arbitral proceedings, attempted to facilitate a settlement. It was underlined that the judicial process was not consensual, and therefore it was questioned whether agreements reached following such a procedure would have the same nature as agreements reached as a result of a conciliation process.

28. A view was expressed that agreements reached in the course of judicial or arbitral proceedings should not be considered in relation to the notion of conciliation but rather as possible exclusions from the scope of the instrument.

2. Domestic or international conciliation process

29. The Working Group then considered whether the instrument should address agreements resulting from conciliation generally, regardless of whether the conciliation process was domestic or international.

30. One view was that the scope of the instrument should be limited to settlement agreements arising from an "international" conciliation process, distinct from a domestic process. It was said that the instrument should generally not interfere with domestic regimes. Furthermore, it was stated that it would be difficult or cumbersome for jurisdictions that already had a regime in place for enforcement of settlement agreements resulting from a domestic conciliation process to adopt or opt-in to a regime which would encompass both international and domestic conciliation processes. It was mentioned that flexibility should be provided to permit States to decide whether to adopt a regime applicable to international conciliation processes for domestic conciliation processes, if they so wished.

31. Another view was that there was no need to make a distinction between international and domestic conciliation processes, as the focus of the instrument was not on the conciliation process but rather on the enforcement of settlement agreements, which would involve cross-border or international aspects. It was further mentioned that many jurisdictions did not differentiate between international and domestic conciliation processes. Moreover, it was stated that if the instrument were to deal with both international and domestic conciliation processes, it would have a greater impact on harmonizing the regime for enforcement of settlement agreements in a general manner.

32. During that discussion, it was also suggested that the form of the instrument would determine whether there was a need to distinguish an international conciliation process from a domestic one. It was mentioned that, for example, if a convention were to be prepared, settlement agreements arising from a domestic conciliation process should be excluded from its scope. The Working Group agreed to further consider the matter in light of its deliberations on the international aspect of settlement agreements (see below, paras. 33-39).

3. Domestic, foreign and international settlement agreements

33. The Working Group then considered whether a distinction should be drawn between "international" and "domestic" settlement agreements and whether to focus its work on "foreign" settlement agreements as opposed to "international" settlement agreements.

Foreign settlement agreements

34. One view was that the approach adopted under the New York Convention should be followed, and the instrument should address enforcement of foreign settlement agreements. For example, the instrument could apply to the enforcement of a settlement agreement made in the territory of a State other than the State where the enforcement of such settlement agreement was sought; it would also apply to settlement agreements not considered as domestic settlement agreements in the State where the enforcement was sought. It was explained that that would simplify the implementation of the instrument as a practice had already developed on those matters under the New York Convention. In support, it was said that the objective of the instrument should be to facilitate cross-border enforcement rather than to provide a regime for enforcement of settlement agreements in general.

35. However, it was pointed out that settlement agreements could not be treated in a similar fashion as arbitral awards as it was not always easy to identify the factor connecting settlement agreements to a specific place or legal seat of conciliation, whereas arbitral awards usually had a place of issuance which determined their "foreign" nature.

International settlement agreements

36. In that context, attention was drawn to article 35 of the Model Law on International Commercial Arbitration ("Model Law on Arbitration") that treated awards rendered in international commercial arbitration in a uniform manner irrespective of where they were made. The Model Law on Arbitration distinguished between "international" and "non-international" awards instead of relying on the traditional distinction between "foreign" and "domestic" awards. It was suggested that a similar approach could be considered for the instrument.

37. Along the same lines, a suggestion was made that "international" settlement agreements could be defined following the approach adopted in article 1(4)(a) of the Model Law on Conciliation. Consequently, a settlement agreement would be considered international where at least two parties to the settlement agreement had their places of business in different States at the time of the conclusion of the settlement agreement.

38. On whether to limit international elements to the places of business being in different States, it was suggested that they should be expanded to consider other elements mentioned in article 1(4)(b) of the Model Law on Conciliation. It was mentioned that the enforcement of a settlement agreement between parties having their places of business in the same State might also have an international element, for example, if one of the parties had to enforce that agreement in another State where assets were located. It was further mentioned that other criteria might need to be considered, including the law applicable to the conciliation process and the nationality of the conciliator.

39. In conclusion, it was generally agreed that the instrument should focus on international settlement agreements as distinct from domestic settlement agreements. It was said that States should be given the flexibility to apply the regime designed for international settlement agreements to domestic settlement agreements, if they so wished. It was also suggested that the determination of the international element of settlement agreements should be considered in a broad manner taking into account the views expressed above and other possible approaches such as a territorial or a personal approach as well as private international law criteria. It was mentioned that such criteria should be objective and relevant to achieving the purpose of the instrument.

4. Content of and parties to the settlement agreements

Commercial settlement agreements

40. It was generally felt that the scope of the instrument should be limited to the enforcement of "commercial" settlement agreements. In that context, it was suggested that

the definition of "commercial" in the Model Law as well as other UNCITRAL texts provided a useful reference.

41. There was general agreement to exclude settlement agreements involving consumers from the scope of the instrument and reference was made to article 2(a) of the United Nations Convention on Contracts for the International Sale of Goods (1980) as well as article 2 of the Convention on Choice of Court Agreements (2005) as possible models of formulation.

42. It was generally felt that settlement agreements dealing with family and labour law matters and other areas where party autonomy was limited due to overriding mandatory rules or public policy should also be excluded from the scope of the instrument. However, it was noted that if the scope of the instrument were to be limited to "commercial" settlement agreements, such exclusions would not be necessary as they would generally not fall within the scope of the instrument.

43. While it was generally considered that it was premature to decide whether the instrument should have an illustrative list of subject matters to be covered or a negative list of those excluded, it was pointed out that a negative list could run the risk of not being exhaustive.

Agreements involving government entities

44. As regards settlement agreements involving government entities, it was suggested that those agreements should be excluded from the scope of the instrument as, in some jurisdictions, government entities were not authorized to conclude them. In response, it was said that, in those jurisdictions, that situation could be addressed under the defences to enforcement through wording that might be extrapolated from article V(1)(a) of the New York Convention (see below, section E), instead of excluding settlement agreements involving government entities entirely from the instrument.

45. It was said that issues relating to sovereign immunity would need to be considered in light of existing standards and reference was made to the United Nations Convention on Jurisdictional Immunities of States and Their Property (2004), yet to enter into force. It was said that the instrument would not need to delve into issues of state immunity. It was further said that such questions should be left to be decided by the enforcing authority on the basis of the applicable rules on foreign state immunity.

46. The view generally shared by the Working Group was that it would not be desirable for the instrument to include a blanket exclusion of settlement agreements involving government entities as there were government entities that engaged in commercial activities and that might seek to use conciliation to resolve disputes in the context of those activities. It was noted that excluding settlement agreements involving government entities would deprive those entities of the opportunity to enforce such agreements against their commercial partners. It was suggested that a possible manner to address that issue would be to allow States wishing to exclude such agreements to formulate a reservation or a declaration, if the instrument were to be a convention.

Pecuniary and non-pecuniary as well as conditional obligations

47. As to obligations covered by settlement agreements, it was generally felt that the instrument should apply to settlement agreements in their entirety regardless of whether they included pecuniary or non-pecuniary obligations. It was said that settlement agreements might contain both types of obligations, and therefore the enforcement of only pecuniary obligations would be overly limitative and create an imbalance between the parties. It was also noted that any issues that might arise in enforcing non-pecuniary obligations could be handled by the enforcing authority in accordance with the applicable law. In that context, it was stated that domestic enforcement systems had developed to address the enforcement of such obligations.

48. It was noted that the flexible nature of settlement agreements, which allowed for conditional obligations, was a key feature of conciliation that made it attractive to parties and thus, the need to preserve such a feature was highlighted. It was said that the instrument could include as a defence to enforcement the non-fulfilment of certain conditions in the settlement agreement.

49. A suggestion was made that settlement agreements stating declarations of intent should be excluded from the scope of the instrument. In response, it was said that such agreements would generally not include enforceable obligations.

50. After discussion, it was generally agreed that the scope of the instrument should not be limited to pecuniary settlement agreements but rather cover all types of settlement agreements without any limitation as to the nature of the remedies or obligations provided under those agreements.

5. Form requirements of the settlement agreements

51. The Working Group considered the requirements that a settlement agreement would need to meet for it to be enforceable under the regime envisaged by the instrument. It was said that the purpose of determining requirements was to give the necessary level of certainty to the enforcing authority faced with a request for enforcing an agreement and to determine the elements that would need to be considered by the enforcing authority with regard to the settlement agreement. It was underlined that the instrument should clearly and objectively differentiate settlement agreements from other agreements so as to avoid enforcement of agreements other than those reached through conciliation under the regime envisaged by the instrument.

Writing requirement

52. It was suggested that settlement agreements should be in writing to be enforceable under the regime envisaged by the instrument. The Working Group recalled its works on the writing requirement in relation to arbitration agreements, including article 7 of the Model Law on Arbitration and the 2006 recommendation on the interpretation of article II(2) of the New York Convention. It was generally agreed that any writing requirement would need to be determined in a flexible manner reflecting current practices, including the use of other means that would be considered equivalent.

Parties' signature

53. It was said that the consensual nature of conciliation and the settlement agreement resulting from that process made the signature of the parties significant. Therefore, it was suggested that the settlement agreement should be signed by the parties or that at least, it should be clearly established that the parties concluded the agreement. The need to take into account current practices, including the use of electronic signatures, was mentioned.

Requirements to ascertain the involvement of the conciliator in the process

54. The Working Group considered various means to indicate the involvement of a conciliator in the procedure that led to the conclusion of the settlement agreement.

55. In relation to the suggestion that the settlement agreement should be signed by the conciliator, it was said that in certain jurisdictions, signature by the conciliator was not common practice, for example, due to potential liability issues. In response, it was pointed out that if conciliators signed the settlement agreement, it would generally be for the purpose of certifying that he or she was involved in the conciliation, which would be unlikely to give rise to liability issues.

56. In that context, it was explained that conciliators were usually not involved in the drafting or preparation of settlement agreements so as to respect party autonomy and to avoid any complications that might arise (for example, a conciliator by signing the settlement agreement might be called as a witness in a dispute involving the agreement).

57. It was suggested that the settlement agreement could include information about the identity of the conciliator. However, it was pointed out that in practice, information about the conciliator would usually not be included in the settlement agreement.

58. It was suggested that the conciliator could be required to prepare a declaration separate from the settlement agreement stating that he or she acted as a conciliator in relation to the dispute concerned.

59. In response to a suggestion that the settlement agreement should include a reference to the qualifications of the conciliator, it was said that not all jurisdictions required such qualifications, and that, in principle, requirements in domestic legislation should not result in limiting the enforceability of settlement agreements under the regime envisaged by the instrument.

Inclusion of information about the dispute in the settlement agreement

60. A suggestion was made that settlement agreements should include various information on the dispute (such as a brief description of the basis on which the dispute arose) and whether the dispute was settled in whole or in part. In response, it was said that the conciliation process usually focused on solutions, and requiring the parties to provide information about their disputes might inadvertently exacerbate the differences.

Indication by the parties that they agreed to enforcement under the instrument

61. It was suggested that the parties should indicate in their settlement agreement their willingness to subject the agreement to the enforcement regime envisaged by the instrument. It was further underlined that, as conciliation was fully consensual, the enforcement regime envisaged by the instrument should apply only where the parties consented to it.

62. Views were expressed that it would be cumbersome to require such an opt-in mechanism and that it might result in an instrument, which would be less commonly used. It was suggested that further consultations with the users of conciliation on the possible effects in practice of such an opt-in mechanism might be useful.

63. It was suggested that an alternative approach would be for the parties to expressly exclude the enforcement regime envisaged by the instrument in their settlement agreement.

Non bis in idem

64. It was suggested that settlement agreements did not always resolve a dispute in its entirety, and therefore a question was raised whether the *non bis in idem* principle should be considered under the instrument. In response, it was said that that question should be left to be addressed by the enforcing authority depending on the applicable law and the circumstances of the case.

Treatment of different requirements

65. As to form requirements in general, it was said that the requirements should not be overly prescriptive nor too detailed, as that could complicate the enforcement procedure, possibly by resulting in additional claims about whether the requirements were met. Reference was made to paragraph 9 of document A/CN.9/WG.II/WP.192, which contained a proposed definition of "settlement agreement". It was stated that a stricter form requirement could harm the informal nature and amicable atmosphere of the conciliation process and that the variance in conciliation practice would need to be considered. It was further noted that as the purpose of the instrument should not be to harmonize domestic legislative framework or the manner in which conciliation was carried out in many jurisdictions but rather to focus on enforcement of international settlement agreements resulting from conciliation, it would be preferable to simply set minimum requirements, providing States with the flexibility to introduce any other requirements if they so wished. In that context, it was mentioned that the New York Convention did not include any form requirements of arbitral awards and that article 31 of the Model Law on Arbitration included minimum form requirements, some of which might not necessarily be applicable to settlement agreements (for example, the reasons upon which the settlement agreement was based).

66. Furthermore, it was suggested that the issue of form requirements could be left to the enforcing authority as it would need to determine whether those requirements were met. It was also mentioned that certain form requirements or elements might be better considered in the context of the enforcement or review mechanism, where the party applying for enforcement would need to furnish certain proof of those elements and the party against whom the settlement agreement was being invoked could object to the enforcement by furnishing proof to support its defence. Lastly, it was mentioned that if the instrument were

to be a convention, States should be given flexibility to formulate a reservation or declaration regarding those form requirements.

67. After discussion, the Working Group agreed that there was a need to provide for form requirements that would allow settlement agreements to be distinguished from other agreements, which would facilitate their expedited enforcement. It was generally felt that those requirements should not be prescriptive and should be set out in a brief manner or as minimum requirements, to preserve the flexible nature of the conciliation process. It was widely felt that settlement agreements to be enforceable under the regime envisaged by the instrument should be in writing and indicate the agreement of the parties to be bound by the terms of the settlement (for example, by signing or by concluding the agreement). There were diverging views on whether those requirements would be the only or minimum requirements, or whether additional elements would need to be provided for in the instrument, for example indications that (i) a conciliator was involved in the process (for example, by him/her signing the settlement agreement, indicating his/her identity in the settlement agreement or submitting a separate statement to that purpose); (ii) the settlement agreement resulted from a conciliation process; (iii) the parties to the settlement agreement were informed of the enforceability of the agreement upon its conclusion; or (iv) the parties opted in to the regime envisaged by the instrument.

B. Agreement to submit a dispute to conciliation

68. It was generally agreed that the instrument would not need to address the agreement to submit a dispute to conciliation, as the bases upon which conciliation might be carried out were diverse including not only the agreement between the parties, but also mandatory provisions of the law or an order by a competent authority. It was underlined that the outcome of the conciliation procedure, i.e., the settlement agreement, should be the focus of the instrument. It was, however, noted that the agreement to submit a dispute to conciliation could be produced in the enforcement procedure as possible evidence that conciliation took place and that it resulted in the settlement agreement.

69. During that discussion, it was pointed out that settlement agreements might resolve matters not contemplated when the conciliation started or matters not discussed during the conciliation. Whether such practice could have an impact on the enforcement procedure was questioned. It was suggested that settlement agreements could be defined as those "resulting from" conciliation so as to avoid issues at the enforcement stage.

70. While a suggestion was made that the Working Group should consider streamlining certain aspects of the conciliation procedure, it was agreed that that was outside of the mandate of the Working Group.

C. Recognition of settlement agreements

71. The Working Group considered whether a distinction should be made between recognition and enforcement of settlement agreements and whether the instrument would need to address recognition in addition to enforcement. It was recalled that the New York Convention provided for the recognition of arbitration agreements as well as arbitral awards. It was said that under the New York Convention, "recognition" of arbitral awards referred to the process of considering an arbitral award as binding but not necessarily enforceable, while "enforcement" referred to the process of giving effect to the award.

72. Diverging views were expressed regarding the need for the instrument to provide for the recognition of settlement agreements, due to a wide range of domestic recognition procedures as well as different understandings regarding the notions of both recognition and settlement agreements (as private contracts or special instruments resulting from a dispute resolution procedure). A suggestion was to avoid using the term "recognition" in the instrument as that term might carry different meanings depending on the jurisdictions and to first describe the envisaged procedure and its legal effects.

Addressing recognition in the instrument

73. Views were expressed in favour of addressing recognition of settlement agreements in the instrument on the basis that recognition would give legal effect to the settlement agreement and was, in certain jurisdictions, a necessary procedural step triggering the enforcement procedure. It was suggested that the recognition procedure could be straightforward and expedited, allowing the defendant to raise defences against recognition. The practical effect would be that settlement agreements would be given legal value before being considered for enforcement. It was further mentioned that there might be instances where parties might require recognition of settlement agreements containing non-pecuniary obligations without necessarily pursuing enforcement.

74. It was pointed out that settlement agreements might be recognized by courts in a variety of situations, such as, for dismissing a claim as the dispute had already been resolved by the settlement agreement and for the purposes of set-off. It was stated that in such circumstances, courts could use other processes to recognize or take account of settlement agreements.

Addressing only enforcement in the instrument

75. Views were expressed in support of the instrument only addressing enforcement as recognition of settlement agreements would be inappropriate and superfluous. It was said that recognition was a procedure usually applied to give legal effect to a public act emanating from another State, such as court decisions, whereas settlement agreements were of a private nature.

76. In addition, it was said that recognition would not have any practical effect. It was also said that the recognition procedure could have a negative impact on the expeditious enforcement of settlement agreements as, at the recognition stage, the validity of the conciliation procedure and its outcome might be examined. It was further said that settlement agreements might become void, be terminated or amended by the parties at any time including after the recognition of the agreement by a court, which could raise legal difficulties. It was pointed out that inclusion of a recognition procedure would generally require formalities in relation to settlement agreements, which were usually not required in relation to ordinary contracts.

Recognition and enforcement — proposals

77. It was proposed that the instrument should not seek to provide specific rules on the recognition procedure (such as filing of the settlement agreement with a court or homologation by a court). It was suggested that article III of the New York Convention could provide a useful model. Another suggestion was that it might be worthwhile to consider the instrument explicitly requiring that settlement agreements be treated at least as favourably as arbitral awards under the New York Convention.

78. During the discussion, reference was made to the recognition of foreign proceedings and reliefs as dealt with in the UNCITRAL Model Law on Cross-border Insolvency as possible guidance.

79. It was suggested that the instrument could refer to both recognition and enforcement of settlement agreements, without providing details on the recognition procedure, leaving that matter to domestic regimes which, in any case, could not easily be harmonized. It was further suggested that that matter should be revisited after consideration of issues relating to enforcement.

D. Direct enforcement or review mechanism as a prerequisite for enforcement

80. The Working Group then considered whether the instrument would provide an enforcement mechanism where a party to a settlement agreement would be able to seek enforcement directly at the place of enforcement (referred to as “direct enforcement”) or incorporate a review or control mechanism in the State where the settlement agreement was originating from (referred to as “originating state”) as a precondition for enforcement.

81. A number of concerns were raised with regard to requiring or establishing a review or control mechanism in the originating state. One was that unlike court judgements and arbitral awards, it could be very difficult to determine the originating state of settlement agreements as the connecting factor might be subject to different determinations. It was also mentioned that a review mechanism was likely to result in double exequatur, which would be at odds with the purpose of the instrument to provide an efficient and simplified enforcement mechanism. Furthermore, it was stated that any defences to enforcement could be raised at the court where enforcement was sought, making any review by a court at the originating state superfluous.

82. It was further mentioned that direct enforcement would not deprive courts at the originating state to review the validity of the settlement agreement. In that context, questions were raised on the consequences of concurrent court proceedings on enforcement and on the validity of the settlement agreement.

83. The view was expressed that providing for a simple review mechanism at the originating State could facilitate the overall enforcement procedure. It was noted that courts at the originating state would be better placed to determine prima facie certain questions, such as the validity of the settlement agreement and fulfilment of procedural requirements pertaining to the conciliation process. It was suggested that such a simple review mechanism would not amount to double exequatur, as it would only ascertain matters such as the validity of the settlement agreement before such an agreement could be enforced in other jurisdictions. Under that approach, the grounds for refusing enforcement would be limited.

84. After discussion, it was generally agreed that the instrument should provide a mechanism where a party to a settlement agreement would be able to seek direct enforcement (at the place of enforcement) without imposing a requirement for a review of the settlement agreement at the originating state. It was further noted that the concerns raised about such an approach could be further considered in the context of defences to enforcement and reference was made to article V(1)(e) of the New York Convention as a possible model.

E. Defences to enforcement of settlement agreements

85. The Working Group considered the question of defences to enforcement of settlement agreements with the assumption that a party to the settlement agreements subject to the regime envisaged by the instrument would be able to seek direct enforcement (at the place of enforcement) without review or control at the originating State (see above, para. 84). The Working Group exchanged preliminary views on defences that should be included in the instrument, how they should be presented, and how to determine the law applicable to defences.

Possible defences to enforcement

86. The Working Group considered defences as listed under paragraph 46 of document A/CN.9/WG.II/WP.190 and paragraph 18 of document A/CN.9/WG.II/WP.192. In the discussion, reference was made to defences contained in legislation of certain jurisdictions (see document A/CN.9/846 and its addenda) as well as to articles II(3) and V of the New York Convention.

87. Document A/CN.9/WG.II/WP.190 listed defences in relation to the capacity of the parties, their consent, and existence of duress, unconscionability, undue influence, misrepresentation, mistake or fraud, defences in relation to the purpose of the agreement, its cause, validity, formalities, public policy and non-compliance with mandatory provisions, and defences in relation to whether the subject matter of the dispute was capable of being resolved by conciliation.

88. While there was general support for the inclusion of fraud, public policy and the subject matter not capable of being conciliated as defences, diverging views were expressed on other possible defences and how they should be presented (see below, paras. 93-97).

89. A suggestion was made that the enforcement process should include some scrutiny over the conciliation procedure. It was pointed out that certain legislations on conciliation imposed homologation procedures or formal requirements which could constitute a ground

for refusing enforcement when those mandatory procedures or requirements were not complied with. In response, it was pointed out that importing specific requirements of domestic legislation into the contemplated international enforcement regime might be detrimental to the enforcement process, and run contrary to the objective of the instrument. It was further pointed out that the instrument should take into account the various techniques of conciliation.

90. It was suggested that lack of due process in conciliation should be considered as a specific defence and that any settlement agreement that disregarded due process should not be enforced. In support of that view, it was stated that elements of due process in conciliation would be, for example, impartiality and neutrality of the conciliator, confidentiality of the proceedings and equal treatment of the parties. In response, it was said that the outcome of conciliation was an agreement and not a binding decision imposed by a third party, and therefore, due process in conciliation could not be equated to that in judicial or arbitral proceedings. In addition, it was said that due process was usually considered in the broader context of procedural public policy, and thus need not constitute a separate defence under the instrument.

91. During the discussion on possible defences, questions were raised with regard to situations where the settlement agreement might not necessarily be the final resolution of the dispute, as it was modified, amended or terminated by the parties, as it was found to be null and void by a competent authority or where the obligations therein were partially or fully performed by the parties, or were conditional. One view was that those issues could constitute possible defences, which could be handled by the enforcing authority in a flexible manner. Another suggestion was that those issues could be resolved by including a finality aspect in the definition of settlement agreements and as a consequence, excluding from the scope of the instrument any settlement agreement that had been modified or amended.

92. It was suggested that a possible model to address those issues could be found in article II(3) of the New York Convention and article 8(1) of the Model Law on Arbitration, which referred to arbitration agreements being deprived of effect when found to be "null and void, inoperative or incapable of being performed". It was suggested that those terms had been interpreted by courts in a number of jurisdictions in a harmonized fashion and therefore could be used in the instrument.

Presentation of defences in the instrument

93. It was generally agreed that defences to be provided in the instrument should be limited and not cumbersome to implement in order to allow for a simple and efficient verification by the enforcing authority of the grounds for refusing enforcement. It was widely felt that the grounds for refusing enforcement under the instrument should also be exhaustive and stated in general terms, giving flexibility to the enforcing authority with regard to their interpretation.

94. It was suggested that the draft provision in paragraph 18 of document A/CN.9/WG.II/WP.192 provided a useful basis. As a further illustration of a simplified approach to enforcement, it was suggested that the instrument could provide that enforcement should be denied if a party to conciliation did not sign, or consent to, the agreement; the settlement agreement was obtained by fraud; or the settlement agreement did not accurately reflect the terms agreed to by the parties. It was further mentioned that the enforcement procedure should not be detrimental to the rights of the parties involved.

95. The possibility of the instrument setting out limited defences and giving flexibility to States to incorporate other defences was mentioned as a possible approach.

96. It was noted that when considering defences to enforcement, the consensual nature of settlement agreements needed to be highlighted.

97. It was suggested that possible defences identified should be broadly categorized and set out in general terms. As to the possible categories of defences, reference was made to those pertaining to the genuineness of the settlement agreement (reflecting the parties' consent, not being fraudulent), those pertaining to the readiness or validity of the settlement agreement to be enforced (being final, not having been modified or performed, binding on the parties) and those pertaining to international public policy. Another category identified

was where the subject matter of the settlement agreement was not capable of being settled through a conciliation process and the obligations contained in the settlement agreement were not capable of being enforced at the place of enforcement. In that context, it was said that some categories of defences might also be considered by the enforcing authority at its own initiative.

98. During the discussion, a view was expressed that a court of the originating state might be better suited to review some of the defences mentioned above for procedural efficiency, and it was suggested that a review mechanism should be incorporated at the originating state. In response, the difficulties in determining the originating state were reiterated.

99. With respect to defences to be included in the instrument, it was mentioned that it was important to consider whether they could increase forum shopping.

Applicable law

100. The Working Group considered how the law applicable with respect to defences in the enforcement procedure should be addressed in the instrument. It was generally felt that that raised complex issues, particularly as different laws might be applicable depending on the defences. For example, the competent authority might need to consider the law applicable to the parties (in relation to capacity), to the enforcement procedure, to the settlement agreement and to the conciliation process. Doubts were expressed whether the place of conciliation and the place of conclusion of the settlement agreement would have any relevance to the determination of the applicable law.

101. It was noted that while parties might have chosen the law applicable to the settlement agreement, that would not necessarily have any bearing on the determination of the law applicable to defences nor exclude application of other laws in the enforcement procedure. Another illustration was that the law governing the underlying contract under which the dispute arose might be different from the law governing the settlement agreement, which might create uncertainty regarding the applicable law.

102. After discussion, it was generally felt that the instrument should not address the laws applicable with respect to defences in the enforcement procedure, with the assumption that the enforcing authority or the court seized with the matter would usually apply the conflict-of-law rules at the place of enforcement and where relevant, consideration of the parties' choice of law in the settlement agreement. It was stated that the instrument could state that principle in broad terms. It was further suggested that the instrument should seek to provide unambiguous guidance regarding the laws applicable to defences to the extent possible.

Possible impact of judicial or arbitral proceedings

103. The Working Group then considered the possible impact that other judicial or arbitral proceedings relating to the settlement agreement could have on the enforcement procedure. A question was raised whether the enforcing authority would need to adjourn its procedure in such circumstances. It was said that that question would be treated differently, depending on whether the proceedings were taking place in the same jurisdiction, or in another jurisdiction. In the former case, lis pendens rules would provide clear rules while in the latter case, there was a risk that the courts would not coordinate.

104. One view was that there was no need to establish a link between the judicial or arbitral proceedings and the enforcement procedure as they dealt with issues of a different nature. Another view was that the instrument should require the enforcing authority to take into account court decisions. It was also mentioned that evidence of the absence of review of the settlement agreement by the court at the originating state could be a precondition for the enforcement.

105. It was suggested that the approach adopted in article V(1)(e) and VI of the New York Convention could provide useful guidance. Accordingly, it was suggested that the enforcing authority might, if it considered proper, adjourn its decision on the enforcement when a judicial proceeding was pending or refuse enforcement if that settlement agreement had been found to be null and void by a competent court. It was further suggested to refer to court decisions that were capable of being recognized by the court of the State where enforcement would be sought instead of generally referring to decisions made by a competent authority,

thereby providing that the enforcing authority should only take account of judicial decisions that could be recognized in the State where enforcement would be sought, be it through a treaty or through the operation of the private international law rules. In response, it was said that that suggestion might complicate the procedure, and in certain instances, be too limitative. It was suggested that the approach in the instrument should mirror that of the New York Convention and should provide discretion to the enforcing authority.

106. In that context, a question was raised whether court decisions that considered the validity of the settlement agreement as a precondition for the relief sought should also be taken into account or only those decisions that would be declaratory, for example, nullifying the settlement agreement.

107. After discussion, while it was widely felt that the instrument would need to indicate the possible impact judicial or arbitral proceedings could have on the enforcement procedure, it was said that it was premature to make a decision on how that question should be addressed.

F. Possible form of the instrument

108. The Working Group recalled the mandate given by the Commission that the Working Group should consider developing possible solutions to address enforcement of settlement agreements, including a convention, model provisions or guidance texts. The Working Group had a preliminary discussion on the possible form that the instrument could take. The prevailing view was that there were a number of issues that would require further consideration before a decision could be made on the form of the instrument. Nonetheless, a number of delegations expressed preference for preparing a convention, as a convention could more efficiently contribute to the promotion and harmonization of conciliation.

109. After discussion, it was agreed that progress could be made based on draft provisions without prejudging the final outcome. In order to facilitate further consideration, the Working Group requested the Secretariat to prepare a document outlining the issues considered at the session and setting out possible draft provisions, including those that would be relevant if the instrument were to be a convention (for example, possible reservations or declarations). It was generally felt that the final form would be decided upon at a later stage.

B. Note by the Secretariat on settlement of commercial disputes: international commercial conciliation: enforceability of settlement agreements

(A/CN.9/WG.II/WP.190)

[Original: English]

Contents

I. Introduction

1. At its forty-seventh session (New York, 7-18 July 2014), the Commission agreed that the Working Group should consider at its sixty-second session the issue of enforcement of international settlement agreements resulting from conciliation proceedings and should report to the Commission, at its forty-eighth session, in 2015, on the feasibility and possible form of work in that area.[1]

2. At that session, the Commission had before it a proposal to undertake work on the preparation of a convention on the enforceability of international commercial settlement agreements reached through conciliation (A/CN.9/822). In support of that proposal, it was said that one obstacle to greater use of conciliation was that settlement agreements reached through conciliation might be more difficult to enforce than arbitral awards. In general, it was said that settlement agreements reached through conciliation were already enforceable as contracts between the parties but that enforcement under contract law cross-border could be burdensome and time-consuming. It was further said that the lack of easy enforceability of such contracts was a disincentive to commercial parties to mediate. Consequently, it was proposed that the Working Group develop a multilateral convention on the enforceability of international commercial settlement agreements reached through conciliation, with the goal of encouraging conciliation in the same way that the Convention on the Recognition and Enforcement of Foreign Arbitral Awards (1958) ("New York Convention") had facilitated the growth of arbitration.[2]

3. Support was expressed for possible work in that area on many of the bases expressed above. Doubts were also expressed as to the feasibility of the proposal and questions were raised in relation to that possible topic of work, including: (a) whether the new regime of enforcement envisaged would be optional in nature; (b) whether the New York Convention was the appropriate model for work in relation to mediated settlement agreements;

[1] *Official Records of the General Assembly, Sixty-ninth Session, Supplement No. 17* (A/69/17), para. 129.

[2] Ibid., para. 123.

(c) whether formalizing enforcement of settlement agreements would in fact diminish the value of mediation as resulting in contractual agreements; (d) whether complex contracts arising out of mediation were suitable for enforcement under such a proposed treaty; (e) whether other means of converting mediated settlement agreements into binding awards obviated the need for such a treaty; and (f) what the legal implications for a regime akin to the New York Convention in the field of mediation might be.[3]

4. It was furthermore observed that UNCITRAL had previously considered that issue when preparing the UNCITRAL Model Law on International Commercial Conciliation (2002) ("Model Law on Conciliation"),[4] and particular reference was made to article 14 of the Model Law on Conciliation and paragraphs 90 and 91 of the Guide to Enactment and Use of that text.[5]

5. At its forty-eighth session (Vienna, 29 June-16 July 2015), the Commission noted that the Working Group considered the topic of enforcement of settlement agreements resulting from international commercial conciliation at its sixty-second session (A/CN.9/832, paras. 13-59). At that session of the Working Group, while a number of questions and concerns were expressed, it was generally felt that they could be addressed through further work on the topic (A/CN.9/832, para. 58). The Working Group, therefore, suggested that it be given a mandate to work on the topic of enforcement of settlement agreements, to identify the relevant issues and develop possible solutions, including the preparation of a convention, model provisions or guidance texts. Considering that differing views were expressed as to the form and content, as well as the feasibility, of any particular instrument, the Working Group also suggested that a mandate on the topic be broad enough to take into account the various approaches and concerns (A/CN.9/832, para. 59).

6. At the forty-eighth session of the Commission, there was general support to resume work in that area with the aim to promote conciliation as a time- and cost-efficient alternative dispute resolution method. It was said that an instrument in favour of easy and fast enforcement of settlement agreements resulting from conciliation would further contribute to the development of conciliation. It was further pointed out that the lack of a harmonized enforcement mechanism was a disincentive for businesses to proceed with conciliation, and that there was a need for greater certainty that any resulting settlement agreement could be relied on. However, doubts were expressed on whether it would be desirable to have a harmonized enforcement mechanism as it might have a negative impact on the flexible nature of conciliation. Another concern was whether it would be feasible to provide a legislative solution on enforcement of settlement agreements beyond article 14 of the Model Law on Conciliation. Furthermore, it was pointed out that procedures for enforcing settlement agreements varied greatly between legal systems and were dependent upon domestic law, which did not easily lend themselves to harmonization. Nonetheless, it was stated that legislative frameworks on enforcement of settlement agreements were being developed domestically and that it might be timely to consider developing a harmonized solution. It was suggested that work on the topic should generally not dwell into the domestic procedures; instead, a possible approach could be to introduce a mechanism to enforce international settlement agreements, possibly modelled on article III of the New York Convention.[6]

[4] Discussions by UNCITRAL on enforcement of settlement agreements resulting from conciliation when it prepared of the Model Law on Conciliation may be found in the following documents: Notes by the Secretariat: A/CN.9/460, paragraphs 16-18; A/CN.9/WG.II/WP.108, paragraphs 34-42; A/CN.9/WG.II/WP.110, paragraphs 105-112; A/CN.9/WG.II/WP.113/Add.1, footnote 39; A/CN.9/WG.II/WP.115, paragraphs 45-49; A/CN.9/WG.II/WP.116, paragraphs 66-71; A/CN.9/514, paragraphs 77-81; Reports of Working Group II (Arbitration and Conciliation): thirty-second session (A/CN.9/468, paras. 38-40); thirty-fourth session (A/CN.9/487, paras. 153-159); thirty-fifth session (A/CN.9/506, paras. 38-48; 133-139; 160 and 161); Report of the Commission on the work of its thirty-fifth session: *Official Records of the General Assembly, Fifty-seventh Session, Supplement No. 17* (A/57/17), paras. 119-126 and 172.

[5] *Official Records of the General Assembly, Sixty-ninth Session, Supplement No. 17* (A/69/17), para. 125.

[6] Report of the Commission on the work of its forty-eighth session, under preparation.

7. After discussion, the Commission agreed that the Working Group should commence work at its sixty-third session on the topic of enforcement of settlement agreements to identify relevant issues and develop possible solutions, including the possible preparation of a convention, model provisions or guidance texts. The Commission also agreed that the mandate of the Working Group with respect to that topic should be broad to take into account the various approaches and concerns.[7]

8. To facilitate discussions of the Working Group, the present note seeks to identify the existing legal frameworks under which settlement agreements can be enforced, the issues underlying the enforceability of settlement agreements as well as the possible forms of work.

II. Enforceability of settlement agreements[8]

A. General remarks

9. UNCITRAL had developed two instruments aimed at harmonizing international commercial conciliation/mediation:[9] the Conciliation Rules, in 1980, and the Model Law on Conciliation, in 2002, which form the basis of an international framework for conciliation. The Conciliation Rules were the first international step taken in harmonizing that field. Upon their adoption, the United Nations General Assembly recognized that the use of conciliation "results in significant benefits, such as reducing the instances where a dispute leads to the termination of a commercial relationship, facilitating the administration of international transactions by commercial parties and producing savings in the administration of justice by States."[10]

10. Since the adoption of the two instruments, the use of conciliation for settling commercial disputes has increased considerably. Legislation on conciliation has been enacted in a growing number of jurisdictions;[11] conciliation and mediation institutes have proliferated, as well as trainings for conciliators and mediators (see A/CN.9/WG.II/WP.187, paras. 16-18 and Annex I).

11. Enforcement of settlement agreements is often cited as one crucial aspect that would make conciliation a more efficient tool for resolving disputes. In preparing the Model Law on Conciliation, the Commission was generally in agreement with the general policy that "easy and fast enforcement of settlement agreements should be promoted".[12] Accordingly, the Model Law on Conciliation includes a provision on enforcement of settlement agreements stating the principle that settlement agreements should be enforceable, without attempting to specify the method by which such settlement agreements may actually be enforced, a matter that is left to each enacting State. Article 14 of the Model Law on Conciliation (Enforceability of settlement agreement) reads as follows: "If the parties conclude an agreement settling a dispute, that settlement agreement is binding and enforceable ... [*the enacting State may insert a description of the method of enforcing settlement agreements or refer to provisions governing such enforcement*]."

---

[7] Ibid.

[8] The term "settlement agreement" is used to generally refer to an agreement that resolves a dispute, in all or in part and is to be differentiated from the "agreement to submit a dispute to conciliation".

[9] The terms "conciliation" and "mediation" are used in this note as broad notions referring to proceedings in which a third person or persons assists the parties in their attempt to reach an amicable settlement of their dispute (see article 1(3) of the Model Law on Conciliation and para. 5 of its Guide to Enactment and Use).

B. Existing legal frameworks on enforcement of settlement agreements

12. Replies to the questionnaire circulated by the Secretariat to collect information regarding the legislative framework and practices with respect to enforcement of settlement agreements were published in document A/CN.9/846 and its addenda. An overview of the current legislative trends is contained in document A/CN.9/WG.II/WP.187, paras. 20 to 30.

13. Replies to the questionnaire illustrate that some jurisdictions have no specific legislation on enforcement of settlement agreements, which are treated as commercial agreements between private parties, and enforced accordingly. In jurisdictions that have provided for a method of enforcing settlement agreements, the purpose of such legislation is generally to ensure that settlement agreements should benefit from some form of expedited recognition of their enforceability. In that respect, three main approaches have been identified.

14. One approach is that a settlement agreement can be enforced through a court procedure, which usually requires compliance with formalities (for example, deposition or registration of the settlement agreement before the competent court). Another approach is that a settlement agreement can be enforced once it has been notarized according to the regime applicable to notarized documents. Yet another approach is that a settlement agreement can be enforced through an arbitration procedure where an arbitral tribunal is appointed for the purpose of issuing a consent award based on the settlement agreement. Some jurisdictions have adopted more than one of the approaches mentioned above.

15. In most jurisdictions, no distinction is made between international and domestic settlement agreements in relation to the enforcement procedure. However, a few jurisdictions have legislative provisions specific to cross-border enforcement of international settlement agreements.

16. In one jurisdiction, an international settlement agreement is enforceable as long as it is enforceable in the State where it was concluded; no particular form or procedural steps are required. Nevertheless, the enforcement court in that jurisdiction may refuse enforcement, if the parties lacked capacity, if the subject matter of the dispute could not be subject to conciliation, or if the settlement agreement would contradict public policy, general principles of law or good faith. In another jurisdiction, an international settlement agreement is enforceable through a judicial ruling confirming the validity of the agreement. In a few jurisdictions, an international settlement agreement can be enforced if recorded in the form of a notarized document in the State where the settlement agreement was concluded, provided that the agreement is not contrary to public policy of the jurisdiction where enforcement is sought.

17. There is currently no uniform international or regional instrument addressing enforceability of settlement agreements. However, it might be possible to utilize existing international or regional instruments, such as conventions on recognition and enforcement of arbitral awards, and judgements.

18. For example, the New York Convention can be used in countries where parties who have settled a dispute through conciliation may appoint an arbitrator to issue an award based on the settlement agreement. When settlement of a dispute is reached during an arbitration procedure, the arbitral tribunal may record the settlement agreement in the form of an arbitral award on agreed terms, if requested by the parties.

19. It should be noted that the New York Convention is silent on the question of its applicability to decisions that record the terms of a settlement between parties. The travaux préparatoires of the New York Convention show that the issue of the application of the New

York Convention to consent awards was raised during its deliberations, while no decision was made.[13] There is no reported case law on this issue.[14]

20. A settlement agreement which is recorded as a court judgement could be recognized and enforced under the conventions on enforcement of foreign judgements.

C. Questions underlying enforceability of settlement agreements

21. In accordance with the mandate of the Commission (see above, para. 7), this section seeks to outline issues that the Working Group may wish to address in considering the preparation of an instrument (convention, model legislative provisions or guidance texts) for the enforcement of settlement agreements, with the objective being that settlement agreements would be granted enhanced enforceability compared to ordinary contracts.

1. Settlement agreements

(a) Relevance of the procedure

22. The Model Law on Conciliation does not include provisions concerning the formation of settlement agreements, their definition or their enforcement procedure, and leaves those matters to be determined in accordance with the applicable domestic law.

23. The term "settlement agreement" generally refers to an agreement between the parties to resolve a dispute, in all or in part. It may find its origin in an agreement to submit a dispute to conciliation, or it may be concluded in the course of a dispute resolution process including arbitral or court proceedings. In considering the scope of its work, the Working Group may wish to consider whether to use the term "settlement agreement" in a broad manner or to limit it as the result of a conciliation procedure.

- *Any agreement settling a dispute regardless of the procedure*

24. One possible approach would be to address enforcement of settlement agreements, regardless of the procedure that led to their conclusion, as long as their purpose is to settle a dispute. Such an approach would make it possible to include settlement agreements resulting from mere negotiation between the parties (see A/CN.9/832, para. 42). However, in considering the enforcement procedure, the question would arise whether the competent authority for the enforcement of the settlement agreement would then have to determine whether there existed a dispute in the first instance and whether the purpose of the agreement was to settle that dispute.

- *Settlement agreements resulting from a process with a neutral assisting the parties*

25. Another possible approach would be to limit the scope of work to enforcement of settlement agreements resulting from conciliation, i.e., a process in which a third-party intermediary assisted the parties with the settlement. This approach would make it necessary to define the procedure under which the settlement agreement was concluded.

26. For instance, article 1(3) of the Model Law on Conciliation provides a broad definition of "conciliation"[15] aimed at clarifying the procedural features in generic terms, as follows: "For the purposes of this Law, "conciliation" means a process, whether referred to by the expression conciliation, mediation or an expression of similar import, whereby parties request a third person or persons ("the conciliator") to assist them in their attempt to reach

[15] See also para. 5 of its Guide to Enactment and Use.

an amicable settlement of their dispute arising out of or relating to a contractual or other legal relationship. The conciliator does not have the authority to impose upon the parties a solution to the dispute."

27. It may be noted that the various techniques, that lead to settlement agreements referred to under the terms "conciliation", "mediation", "neutral evaluation", may be subject to different legal regimes depending on the jurisdiction. Therefore, any definition of the process that led to the settlement agreement would need to be either wide enough to include the numerous forms of alternative dispute resolutions known under different terminology (following the approach adopted under the Model Law on Conciliation) and ensure that such definition would be understood in the same manner in various jurisdictions, or distinctive enough to exclude certain forms of alternative dispute resolution.

28. The Working Group may wish to consider whether an instrument on enforcement of settlement agreements would address certain characteristics or requirements with respect to the conciliation procedure (for instance, that the third-party neutral assisting the parties fulfil certain qualifications). If such requirements are to be included, the Working Group may wish to consider how to ascertain that the procedure that led to the conclusion of the settlement agreement has been followed, without adopting too formalistic an approach (such as requiring that the settlement agreement bears certain mentions, or is signed by the conciliator or parties' counsels).

- *Whether the process would need to be international*

29. In addition, the Working Group may wish to consider whether the scope of its work should focus on conciliation procedures that are international. In that respect, it may be noted that the Model Law on Conciliation refers to "international commercial conciliation", whereas a vast majority of jurisdictions do not differentiate between international and domestic commercial conciliation, generally applying the same procedure for both (see above, para. 15). Therefore, the Working Group may wish to consider whether an instrument on enforcement of settlement agreements should address generally settlement agreements resulting from conciliation, regardless whether the procedure is domestic or international.

- *The basis upon which the process is initiated*

30. Furthermore, the Working Group may wish to consider whether the basis upon which the conciliation procedure started would have any relevance. In that respect, it should be noted that article 1(8) of the Model Law on Conciliation provides as follows: "This Law applies irrespective of the basis upon which the conciliation is carried out, including agreement between the parties whether reached before or after a dispute has arisen, an obligation established by law, or a direction or suggestion of a court, arbitral tribunal or competent governmental entity".

(b) International and domestic settlement agreements

31. The Working Group may wish to consider whether to (i) distinguish between "international" and "domestic" settlement agreements; (ii) deal with "foreign" as opposed to "international" settlement agreements (A/CN.9/832, para. 26); or (iii) only address settlement agreements that need to be enforced cross-border, without any distinction. Consideration of that question might differ based on the instrument to be developed.

32. If the Working Group would consider it necessary to determine the notion of "international" or "foreign" and the relevant criteria for such determination, it may wish to consider how those notions have been defined in UNCITRAL texts.

33. For example, the notion of "foreign" settlement agreement could be determined based on a territorial approach (place where the conciliation took place, place of conclusion of the settlement agreement), a personal approach (parties' place of business), the law applicable to the settlement agreement, or any other private international law criteria (A/CN.9/832, para. 27).

34. In its consideration of the matter, the Working Group may wish to refer to article 1(4), (5) and (6) of the Model Law on Conciliation which provides as follows: "4. A conciliation is international if: (a) The parties to an agreement to conciliate have, at the time of the

conclusion of that agreement, their places of business in different States; or (b) The State in which the parties have their places of business is different from either (i) The State in which a substantial part of the obligations of the commercial relationship is to be performed; or (ii) The State with which the subject matter of the dispute is most closely connected. 5. For the purposes of this article: (a) If a party has more than one place of business, the place of business is that which has the closest relationship to the agreement to conciliate; (b) If a party does not have a place of business, reference is to be made to the party's habitual residence. 6. This Law also applies to a commercial conciliation when the parties agree that the conciliation is international or agree to the applicability of this Law."

35. As a further illustration, article 35 of the Model Law on International Commercial Arbitration ("Model Law on Arbitration") treats awards rendered in international commercial arbitration in a uniform manner irrespective of where they were made. The Model Law on Arbitration distinguishes between "international" and "non-international" awards instead of relying on the traditional distinction between "foreign" and "domestic" awards. A similar approach could be considered for an instrument on enforcement of settlement agreements, delineating application based on substantive grounds rather than territorial borders, which may be inappropriate in view of the difficulty to determine the place where the settlement is concluded, in certain instances.

(c) Parties to the settlement agreement

36. UNCITRAL instruments usually apply to commercial matters, defined in a broad manner. In that context, the Working Group may wish to consider whether the scope of its work should exclude settlement agreements involving consumers (A/CN.9/832, para. 43). The Working Group may also wish to consider how to take account of settlement agreements concluded by government entities.

(d) Content of the settlement agreement

37. The Working Group may wish to consider whether its work should take into account the substantive contents of settlement agreements. For example, it might be envisaged to limit the scope of work to enforcement of pecuniary settlement agreements. Another approach would be to cover all types of settlement agreements, without limitations as to the remedies or nature of obligations that are provided under those agreements (A/CN.9/832, para. 41).

38. The obligations stipulated in a settlement agreement might be broad. The Working Group may wish to consider elements of complexities pertaining to settlement agreements, such as reciprocal or conditional obligations and conditions for the implementation of obligations and their impact on enforcement of settlement agreements. Further, the Working Group may wish to consider whether and, in the affirmative, how to address enforcement of settlement agreements that are conditional on certain future events.

(e) Form of the settlement agreement

39. The Working Group may wish to consider whether to address form requirement with respect to settlement agreements (for example, agreements in writing, containing all relevant terms and conditions of the settlement, signed by the parties, or their representatives and, if relevant, the conciliator). In so doing, the Working Group may wish to consider article 31 of the Model Law on Arbitration, which addresses form and contents of an award, and requires that an award shall be made in writing, and shall be signed by the arbitrators. Furthermore, the Working Group may wish to keep in mind that form requirements should not undermine the flexibility that characterizes conciliation.

2. Agreement to submit a dispute to conciliation

40. At the sixty-second session of the Working Group, a question was raised whether the agreement to submit a dispute to conciliation should also be included in the scope of work on the matter. That question was considered in light of a proposal to develop a convention on enforcement of settlement agreements modelled on the New York Convention. It was said that, in the field of arbitration, the exclusive nature of an arbitration agreement (referring a dispute to arbitration) created the need for its recognition, which did not necessarily arise

with respect to conciliation (A/CN.9/832, para. 25). Article II (1) of the New York Convention provides: "Each Contracting State shall recognize an agreement in writing under which the parties undertake to submit to arbitration all or any differences which have arisen or which may arise between them in respect of a defined legal relationship, whether contractual or not, concerning a subject matter capable of settlement by arbitration." Article II (3) of the New York Convention and article 8(1) of the Model Law on Arbitration provide for the obligation of courts to refer the parties to arbitration.

41. It should be noted that the basis upon which conciliation is carried out may be diverse, which may include the agreement of the parties, a mandatory provision under law or an order by the court (see above, para. 30). While the arbitration agreement is the basis for the arbitration procedure representing the agreement of the parties to be bound by the decision of the arbitral tribunal, the outcome of conciliation is fully consensual. Therefore, addressing recognition of the agreement to submit a dispute to conciliation may be superfluous.

3. Enforcement procedure

(a) Recognition

42. The Working Group may wish to consider whether a distinction should be made between recognition and enforcement of a settlement agreement and whether its work would need to address recognition in addition to enforcement.

(b) Direct enforcement or a review mechanism as a prerequisite for enforcement

43. The Working Group may wish to recall its discussions at its sixty-second session on whether an instrument on enforcement of settlement agreements would make settlement agreements directly enforceable, incorporate a review mechanism in the jurisdiction where the settlement agreement is originating from or include a combination of the two options (A/CN.9/832, paras. 50-55).

44. If an instrument on enforcement of settlement agreements were to promote the approach that settlement agreements should be directly enforceable, it would set out the minimum requirements that a settlement agreement would need to meet to be enforceable (A/CN.9/832, para. 51). Emphasis would also be on the procedure that led to the settlement agreement and the guarantees required to make the agreement resulting from that procedure directly enforceable (for example, the obligation stipulated in the agreement should be capable of being enforced in that State and the conciliation procedure should comply with due process). That matter is closely related to the question whether all settlement agreements or only those resulting from a conciliation procedure would be included within the scope of an instrument on enforcement.

45. An instrument on enforcement of settlement agreements incorporating a review mechanism in the jurisdiction where the settlement agreement is originating from would provide that, to be enforceable, a settlement agreement would need to be first authenticated or endorsed by a competent authority and some formal requirements would have to be met in order for the agreement to benefit from an enforcement procedure in another State. If the Working Group considers that that approach should be further explored, it may wish to consider how to determine the jurisdiction competent to review the settlement agreement in the first place for it to be enforceable abroad and whether a minimum standard should be established to give international effect to domestic enforcement procedures (A/CN.9/832, para. 54). For instance, if a settlement agreement would need to be authenticated to benefit from any enforcement procedure, questions such as the competent authority (the conciliator, an institution or a court) and the procedure for obtaining authentication would need to be further addressed (A/CN.9/832, para. 50). The efficiency of such an approach compared to existing available enforcement mechanisms would also need to be considered.

4. Defences to enforcement of settlement agreements

46. The Working Group may wish to consider whether, and in the affirmative, how, to determine the defences to enforcement of settlement agreements. When enforcing settlement agreements, the following issues may become relevant: (i) in relation to the parties, their capacity, their consent, and existence of duress, unconscionability, undue influence,

misrepresentation, mistake or fraud; (ii) in relation to the agreement, its purpose, cause, validity, formalities required, non-contradiction with public policy and compliance with mandatory provisions.

47. Various questions would need consideration, such as:

-Whether a competent authority considering the enforcement of a settlement agreement:

- o Would have jurisdiction to also consider the validity of that agreement (A/CN.9/832, para. 44);
- o Should limit itself to examining the legality of that agreement, without considering the merits;
- o Would give effect to a determination in a different jurisdiction that the settlement agreement is invalid or otherwise not enforceable;

- What law would be relevant to the consideration of the settlement agreement, in particular its validity;
- How to address parallel proceedings, for instance, a proceeding on the validity of the agreement in one jurisdiction and an enforcement procedure in another jurisdiction; on that matter, the Working Group may wish to note article VI of the New York Convention, which addresses the situation where a party seeks to set aside an award in the country where it was issued, while the other party seeks to enforce it elsewhere; article VI achieves a compromise between the concerns of promoting the enforceability of foreign arbitral awards and preserving judicial oversight over awards by granting courts of contracting States the discretion to decide whether or not to adjourn enforcement proceedings;
- How to address the interrelation between an instrument on enforcement of settlement agreements and existing mechanisms (for example, if parties decide to enforce their settlement agreement under contract law or by any other means);
- Whether and, in the affirmative, how, an enforcement mechanism should address possible subsequent procedure on rectification if unforeseen circumstances arise in the course of enforcement;
- How to address the interrelation between a contractual claim based on the breach of a settlement agreement and the enforcement of the settlement agreement itself (A/CN.9/832, para. 38); and
- Whether and to what extent dispute settlement clauses usually contained in settlement agreements would have an impact on enforcement (A/CN.9/832, para. 34).

D. Possible forms of work

1. Convention

48. A its forty-seventh session, the Commission had before it, a proposal to undertake work on the preparation of a convention on the enforceability of international commercial settlement agreements resulting from conciliation (A/CN.9/822). At the sixty-second session of the Working Group, it was noted that a convention could provide a clear and uniform framework for facilitating enforcement of settlement agreements in different jurisdictions (A/CN.9/832, para. 18). To the contrary, another view was that an international regime created by a convention might result in a more cumbersome review of settlement agreements than under domestic mechanisms, as currently settlement agreements could circulate as contracts without any formalities or control in any State, the situation being different for foreign judgements and arbitral awards (A/CN.9/832, para. 21). Paragraphs 49 to 56 below provide a summary of that proposal with comments made during the sixty-second session of the Working Group.

49. Under the proposal, the scope of a convention could provide that it would apply to “international” settlement agreements (such as when the parties have their principal places of business in different States) and settlement agreements resolving “commercial” disputes (excluding agreements involving consumers). As to the substance, it could include

provisions on the form of settlement agreements (for example, agreements in writing, signed by the parties and the conciliator) and stating that settlement agreements falling within the scope of the convention are binding and enforceable.

50. It could also include certain limited exceptions similar, but not identical, to those provided in article V of the New York Convention. For example, the fact that a party to the settlement agreement was coerced to conclude such an agreement could be an additional reason for refusing enforcement. On the other hand, the conciliation procedure not being in accordance with the agreement of the parties or the applicable law (mirroring article V 1(d) of the New York Convention) might not be so relevant.

51. A convention would, in any case, need to build on existing domestic legislation. Modelled on the New York Convention, a convention could set forth that States would need to provide through their domestic legal systems a mechanism to enforce settlement agreements, without trying to harmonize the specific procedure for reaching that goal. Therefore, it would not address the procedural aspects dealt with in domestic legislation and would only introduce a mechanism to enforce international settlement agreements (A/CN.9/832, para. 22). It would also not seek to harmonize rules on the conciliation process nor address matters related to the attachment or execution of assets, both of which are not dealt with under the New York Convention. Article III of the New York Convention does not provide specific rules with respect to the procedure (formalities) for enforcement (such as filing of the agreement with a court or homologation by a court) nor with respect to the competent authority, both of which are left to domestic legislation.

52. If a convention were to be prepared, the interaction of the regime created by a convention with the principle of party autonomy might need to be addressed (for example, whether the regime under a convention would be optional in nature and allow parties to a settlement agreement to either opt-in or out of that regime). In relation to party autonomy, the Working Group may also wish to consider whether consent of the parties to the enforceability of a settlement agreement would be required to make that agreement enforceable. The Working Group may also wish to take note of the view expressed at its sixty-second session that a convention should not deprive the parties of any contractual remedies they might have under the applicable contract law (A/CN.9/832, para. 36).

53. If a convention were to be prepared, the Working Group may also wish to consider the flexibility to be given to States, more specifically the issue of possible declarations or reservations. One example would be a declaration whereby a State could exclude settlement agreements involving government entities from the scope of the convention (A/CN.9/832, para. 55).

2. Model legislative provisions

54. During the sixty-second session of the Working Group, it was mentioned that a more gradual approach to harmonize the regime of enforcement of settlement agreements could be preferable, starting from the harmonization of domestic legislation (A/CN.9/832, para. 19). In line with that suggestion, another possible form of work may be the preparation of model legislative provisions, which would be proposed for enactment by States in their domestic legislation.

55. Such work would generally build upon article 14 of the Model Law on Conciliation, which leaves the method of enforcement to each enacting State. Provisions along the lines of articles 28 to 36 of the Model Law on Arbitration could be considered (for example, the form and contents of the settlement agreement, corrections and interpretation of the settlement agreement, recourse against the settlement agreement and recognition and enforcement of the settlement agreement). Alternatively, work could be limited to recognition and enforcement of the settlement agreement (including a minimum uniform rule on defences to enforcement), which could complement article 14 of the Model Law on Conciliation. As mentioned above in relation to preparation of a convention (see above, para. 51), one approach would be to not reopen procedural issues addressed by domestic legislation.

56. In this respect, the footnote to article 14 recommends to States that they consider whether the enforcement procedure should be mandatory or not. Further, the Guide to

Enactment encourages States to adopt expedited or simplified enforcement procedures. These aspects could also be reflected in the model legislative provisions.

57. Work on model legislative provisions might necessitate revising other articles of the Model Law on Conciliation (and possibly the Conciliation Rules) to ensure consistency (for example, including a definition of "settlement agreement", possible form requirements and issues that could be addressed in the settlement agreement).

3. Guidance text

58. Another possible form of work could be to expand paragraphs 87 to 92 of the Guide to Enactment of the Model Law on Conciliation or to prepare a legislative guide with relevant recommendations and commentary. Such a text could set out information about various approaches taken in different jurisdictions based on replies received by the Secretariat in that respect and presented in document A/CN.9/846 and addenda. It could also include specific legislative recommendations including, for example, a recommendation on the application of the New York Convention to consent awards.

C. Note by the Secretariat on settlement of commercial disputes: enforcement of settlement agreements: compilation of comments by Governments

(A/CN.9/WG.II/WP.191)

Contents

I. Introduction

1. At its forty-seventh session, in 2014, the Commission agreed that the Working Group should consider at its sixty-second session the issue of enforcement of settlement agreements resulting from international commercial conciliation and should report to the Commission at its forty-eighth session, in 2015, on the feasibility and possible form of work in that area. The Commission invited delegations to provide information to the Secretariat in respect of that subject matter.[1] For the preparation of possible future work on the matter, and to facilitate the collection of information by delegations, the Secretariat circulated to States a questionnaire, reproduced in section II of document A/CN.9/846. The replies received by the Secretariat before the commencement of the forty-eighth session of the Commission have been reproduced in document A/CN.9/846 and its addenda. A reply received after that date is reproduced below.

II. Compilation of comments

1. India

[Original: English]
[Date: 14 July 2015]

Question 1: Information regarding the legislative framework

As per Indian domestic law, the terms "mediation" and "conciliation" are not used as synonym to each other. Both terms are having their own meaning. The Supreme Court of India in *Salem Advocate Bar Assn. (II) v. Union of India, (2005) 6 SCC 344*, while considering the Report submitted by a Committee under the chairmanship of the then Chairman Law Commission appointed by the Supreme Court so as to ensure that amendments made in the Code of Civil Procedure, 1908 in 1999 and 2002 related to Alternative Disputes Resolution method become effective and quicker dispensation of justice, observed as under:

> "61. It seems clear from the Report that while drafting the model rules, after examining the Mediation Rules in various countries, a fine distinction is tried to be maintained between conciliation and mediation, accepting the views expressed by the British author Mr. Brown in his work on India that in 'conciliation' there is a little more latitude and a conciliator can suggest some terms of settlements too."

The said Committee defined the term mediation and conciliation in the following words:

Settlement by "conciliation" means the process by which a conciliator who is appointed by parties or by the Court, as the case may be, conciliates the disputes between the parties to the suit by the application of the provisions of the Arbitration and Conciliation Act, 1996 (26 of 1996) insofar as they relate to conciliation, and in particular, in exercise of his powers

[1] *Official Records of the General Assembly, Sixty-ninth session, Supplement No. 17* (A/69/17), para. 129.

under Sections 67 and 73 of that Act, by making proposals for a settlement of the dispute and by formulating or reformulating the terms of a possible settlement; and has a greater role than a mediator.

Settlement by "mediation" means the process by which a mediator appointed by parties or by the Court, as the case may be, mediates the dispute between the parties to the suit by the application of the provisions of the Mediation Rules, 2003 in Part II, and in particular, by facilitating discussion between parties directly or by communicating with each other through the mediator, by assisting parties in identifying issues, reducing misunderstandings, clarifying priorities, exploring areas of compromise, generating options in an attempt to solve the dispute and emphasizing that it is the parties' own responsibility for making decisions which affect them.

There is no specific law dealing with "mediation" except it has been referred to in Section 89 of the Code of Civil Procedure, 1908. On the other hand, "conciliation" is a non-adjudicatory alternative dispute resolution process, which is governed by the provisions of the Arbitration and Conciliation Act, 1996. There can be a valid reference to conciliation only if both parties to the dispute agree to have negotiations with the help of a third party or third parties either by an agreement or by the process of invitation and acceptance provided in Section 62 of the Arbitration and Conciliation Act, 1996 followed by appointment of conciliator(s) as provided in Section 64 of the said Act. Section 73 of the Act provides for settlement agreement. If the parties to a dispute reach a settlement, they may draw up and sign a written agreement. The signed agreement is final and binding on the parties and persons claiming under them respectively. As provided in Section 74, the settlement agreement shall have the same status and effect as if it is an arbitral award on agreed terms on the substance of the dispute rendered by an arbitral tribunal under Section 30 of the Arbitration and Conciliation Act, 1996.

Further, when a dispute is already referred to the Arbitral Tribunal, it may with the agreement of the parties use mediation, conciliation or other procedures at any time during the arbitral proceedings to encourage settlement. If, during arbitral proceedings, the parties settle the dispute, the Arbitral Tribunal shall terminate the proceedings and, if requested by the parties and not objected to by the Arbitral Tribunal, record the settlement in the form of an arbitral award on agreed terms. An arbitral award on agreed terms shall be made in accordance with Section 31 of the Arbitration and Conciliation Act, 1996 and shall state that it is an arbitral award. Such an arbitral award on agreed terms shall have the same status and effect as any other arbitral award on the substance of the dispute.

Further, when a dispute is already filed in the Civil court, and if it appears to the court that there exist elements of a settlement which may be acceptable to the parties, the said court is required to formulate the terms of settlement and give them to the parties for their observations and after receiving the observations of the parties, the court may reformulate the terms of a possible settlement and refer the same for alternative disputes resolutions mechanism such as arbitration, conciliation or mediation. Where a dispute had been referred to arbitration or conciliation, the provisions of the Arbitration and Conciliation Act, 1996 shall apply for mediation, the court can effect a compromise between the parties and shall follow such procedure as may be prescribed.

The enforcement of "international commercial settlement agreement" arising out of mediation/conciliation depends upon the seat/place of such settlement agreement.

(i) If the place of settlement is outside India — Part II of the Arbitration and Conciliation Act, 1996 deals with enforcement of foreign awards. The definition of the term "foreign award" is provided in Section 44, in respect of New York Convention awards and in Section 53 in respect of Geneva Convention awards. If any international commercial settlement agreement arising out of conciliation proceeding falls within the definition of "foreign award" as provided in Sections 44 or 53, such an agreement is enforceable in India as provided in Sections 49 and 58 of the Arbitration and Conciliation Act, 1996;

(ii) If the place of settlement is India — If such settlement agreement has been arrived and signed in India, the same is binding on the parties in terms of Section 74 of the Arbitration and Conciliation Act, 1996.

As per Section 74 of the Arbitration and Conciliation Act, 1996, the status of the written settlement agreement signed by the parties arising out of the conciliation proceedings shall have same status and effect as if it is an arbitral award on agreed terms on the substance of the dispute rendered by an arbitral tribunal under Section 30.

There are no procedures for expedited enforcement of international commercial settlement agreements.

If a settlement agreement comes into existence under Section 73 of the Arbitration and Conciliation Act, 1996 satisfying the requirements stated therein, it gets the status and effect of an arbitral award on agreed terms on the substance of the dispute rendered by an Arbitral Tribunal under Section 30 of the Act and it is enforceable in terms of Section 36.

(2) A settlement agreement should result from conciliation proceedings as envisaged in Part III of the Arbitration and Conciliation Act, 1996. It should be in writing and signed by the parties and should be authenticate by the conciliator.

(3) If an award on agreed terms falls within the definition of foreign awards contemplated in Section 44 of the Arbitration and Conciliation Act, 1996, courts consider such awards enforceable under the New York Convention.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

If the settlement agreement comes into existence under Section 73 of the Arbitration and Conciliation Act, 1996 satisfying the requirements stated therein, it gets the status and effect of an arbitral award on agreed terms on the substance of the dispute rendered by an Arbitral Tribunal under Section 30 of the Act and it is enforceable in terms of Section 36 of the Act.

Question 3: Validity of international commercial settlement agreements

There are no specific criteria that international commercial settlement agreements need to meet to be deemed valid.

D. Note by the Secretariat on settlement of commercial disputes: enforcement of settlement agreements: comments by Israel and the United States of America (A/CN.9/WG.II/WP.192)

[Original: English]

In preparation for the sixty-third session of Working Group II (Arbitration and Conciliation), during which the Working Group is expected to consider the question of the enforceability of settlement agreements, the Governments of Israel and the United States of America, on 31 July 2015, submitted comments for consideration by the Working Group. The text of the comments is reproduced as an annex to this note in the form in which it was received by the Secretariat.

Annex

Comments by Israel and the United States of America

1. Israel and the United States would like to thank the Secretariat for the paper, A/CN.9/WG.II/WP.190, that has been prepared for the sixty-third session of Working Group II. The paper concisely sets forth many of the issues that the Working Group may need to address in developing an instrument on the recognition and enforcement of conciliated settlement agreements, and very helpfully identifies key questions that the Working Group will need to address.

2. In advance of the Working Group's session, Israel and the United States would like to provide the following comments on some of the issues identified in sections C and D of the Secretariat's paper.

3. In our view, the intended goal of the project by the Working Group should not be to harmonize domestic legislation on conciliation. The aim is merely to facilitate, and increase, the use of conciliation and settlement agreements to support international trade, by providing them with the appropriate international legal framework which is currently lacking.

4. As a general note, the draft provisions proposed below are not necessarily intended to reflect the specific positions of Israel and the United States, but rather are meant to provide initial drafting language for the Working Group's consideration and as illustration of potential text.

Section C.1 — Settlement agreements

5. The Secretariat raises several questions regarding the scope of the instrument that the Working Group will develop. At this stage, we believe that several restrictions on the scope would be prudent, particularly if the Working Group determines that the instrument should be a convention.

6. First, the instrument should be restricted to settlement agreements resulting from conciliation. A primary purpose of this project is to promote the use of conciliation as a means of settling cross-border commercial disputes; developing an instrument specific to conciliation would ensure that conciliation is not disadvantaged relative to other forms of dispute resolution such as arbitration or litigation (which are addressed, respectively, by the New York Convention and by the in-progress Hague Conference work on judgements). Broadening the scope beyond such settlements would make reaching consensus on rules regarding recognition and enforcement much more difficult.

7. Second, the instrument should only apply to "international" settlement agreements — i.e., those in which the parties to the dispute had their places of business in different States at the time of the settlement.

8. Third, not only should consumer disputes be excluded, as suggested in paragraph 36 of the Secretariat paper, but the instrument should restrict its scope to "commercial" settlements (excluding settlements in areas such as employment law or family law).

9. The following draft definitions illustrate how some of these issues might be addressed:

> "Conciliation" is a process whereby parties attempt to reach an amicable settlement of their dispute with the assistance of a third person or persons lacking the authority to impose a solution upon the parties to the dispute. This definition includes cases in which parties to a dispute reached a settlement agreement in the course of arbitration proceedings.[1]
>
> A dispute is not "Commercial" if it involves employment law or family law, or if a consumer — acting for personal, family, or household purposes — is a party.[2]
>
> A "Settlement Agreement" is an agreement in writing (a) that is concluded by the parties to a Commercial dispute, (b) that results from Conciliation, and (c) that resolves all or part of the dispute.
>
> A Settlement Agreement is "International" if at least two parties to the Settlement Agreement had their places of business in different States at the time of the conclusion of the Settlement Agreement. If a party has more than one place of business, the place of business is that which has the closest relationship to the dispute resolved by the Settlement Agreement, having regard to the circumstances known to or contemplated by the parties at any time before or at the conclusion of the Settlement Agreement.[3]

10. The recognition and enforcement regime would then apply only to "International Settlement Agreements." In addition, the instrument could allow a State to tailor its scope of application, such as by a declaration mechanism if the instrument takes the form of a convention. For example, paragraphs 37 and 38 of the Secretariat paper note a number of questions regarding the content of settlement agreements, such as non-monetary elements of settlements and other complex obligations that may be included. While creative approaches to settling disputes can be one of the main advantages of conciliation, not all legal systems may deem expedited recognition and enforcement appropriate for all types of obligations. Thus, a declaration mechanism could allow States to decline to apply the instrument to certain classes or types of settlements, including limiting them solely to monetary settlements. Similarly, paragraph 36 notes the issue of settlements concluded by government entities; this issue, too, may be one for which States should be able to tailor the extent of the instrument's application. Another useful option would be to allow States to declare whether the instrument would apply by default (allowing parties to a settlement to opt out of its application, as discussed below) or only apply when parties specifically invoke the instrument in the settlement itself.

11. To provide these options (as well the possibility for States to apply the instrument only on the basis of reciprocity) without limiting other potential reservations and declarations that may be provided for, text such as the following might be appropriate, if the instrument takes the form of a convention:

> A Party to this Convention may make declarations providing for any or all of the following:
>
> 1. It shall apply this Convention to International Settlement Agreements to which a government or government entity is a party only to the extent specified in a declaration, including their exclusion from the applicability of this Convention.
>
> 2. A party to an International Settlement Agreement shall not be eligible to seek recognition and enforcement of an International Settlement Agreement under this Convention if that party has its place of business in a State that is not a Party to this Convention.[4]

---

[1] This definition would be based on Article 1.3 of the UNCITRAL Model Law on International Commercial Conciliation. Additional consideration may need to be given to the applicability of the convention to consent awards.

[2] The description of "consumer" matters draws on Article 2(a) the United Nations Convention on Contracts for the International Sale of Goods (CISG).

[3] This definition draws on Article 1.4(a) of the Model Law on International Commercial Conciliation as well as Article 10 of the CISG.

[4] Such a declaration would be similar to that permitted by Article I(3) of the New York Convention.

3. It shall not apply this Convention to certain classes or forms of International Settlement Agreements specified in a declaration.[5]

4. It shall only apply this Convention to International Settlement Agreements in which the parties to the International Settlement Agreement have explicitly agreed that the Convention would apply.

Section C.3 — Enforcement procedure

12. The core of the instrument should be an obligation similar to Article III of the New York Convention, requiring recognition and enforcement of International Settlement Agreements but not dictating a particular procedure for domestic use. Nor should the instrument require a "review mechanism" as a prerequisite for recognition and enforcement of a conciliated settlement. Requiring such a review in some country deemed the "competent" jurisdiction, as described in paragraph 45 of the Secretariat paper, would be equivalent to the "double exequatur" procedures required for arbitral awards prior to the New York Convention.

13. A question that has been raised is whether a conciliated settlement is sufficiently "trustworthy" to be recognized and enforced without a review mechanism. The experience of the New York Convention has demonstrated that even without judicial review of arbitral awards in the State of origin, courts in other jurisdictions are adequately able to determine whether recognition and enforcement should be denied under the New York Convention. The exceptions in Article V provide a sufficient basis for denying recognition and enforcement of arbitral awards that are not sufficiently "trustworthy," even though that Convention neither requires double exequatur nor dictates the use of particular arbitration rules to ensure the adequacy of the arbitration process.

14. We believe the same approach would work for recognition and enforcement of conciliated settlements, with some adaptations. For both arbitration and conciliation, the trustworthiness of the award or settlement agreement will depend on the specifics of the process used to resolve the particular dispute. In either type of process, problems can arise that would caution against recognizing or enforcing the result. But just as the exceptions in Article V of the New York Convention suffice to address these situations in the context of arbitration, an analogous set of exceptions should suffice for conciliation, to ensure that only sufficiently "trustworthy" settlements are recognized and enforced.

15. Thus, rather than simply copying Article III of the New York Convention, it might be worthwhile to consider that the instrument also explicitly require that International Settlement Agreements be treated at least as favourably as international arbitral awards under the New York Convention. For example, if the instrument takes the form of a convention, it could require that States "not impose substantially more onerous conditions or higher fees or charges on the recognition or enforcement of International Settlement Agreements to which they apply this Convention than they impose on the recognition or enforcement of arbitral awards or of other Settlement Agreements."

Section C.4 — Defences

16. If the instrument requires recognition and enforcement of International Settlement Agreements as suggested above, it would then need to include a range of exceptions, similar to Article V of the New York Convention. Courts should be able to refuse recognition and enforcement in instances when a party lacked the capacity to conclude the settlement or concluded it due to coercion or fraud. In this context, it may be worthwhile to consider providing additional defences surrounding the unique circumstances of the concluding an International Settlement Agreement.

---

[5] Such a declaration would be similar to that permitted by Article 25(4) of the ICSID Convention. It would permit limits on enforcement under the Convention for Settlement Agreements that pose particular problems under a State's domestic legal system. For example, a State could exclude Settlement Agreements with long-term or complex obligations (other than an obligation by one party to pay a sum to another party) if it considers that its courts may not be able to evaluate them in a streamlined enforcement process and that those International Settlement Agreements may be more appropriately addressed under contract law.

17. The instrument should also include equivalents to Articles V(2)(a) and (b) of the New York Convention, permitting a refusal to recognize or enforce due to a subject matter not capable of settlement or due to incompatibility with public policy of the State where recognition and enforcement is sought. Finally, and without prejudice to other potential exceptions that might be agreed by the Working Group, recognition and enforcement should not be required when it would be contrary to the terms of the International Settlement Agreement itself. Such an exception could apply when the International Settlement Agreement includes a forum selection clause specifying that recognition and enforcement could only occur in a different jurisdiction, or when the International Settlement Agreement includes other limitations on remedies (e.g., requiring any disputes to be brought back to the conciliator before recognition and enforcement is sought, requiring disputes to be settled by arbitration rather than recognition and enforcement in court, or providing that recognition and enforcement under the convention is unavailable). Such an exception would, in effect, allow parties to an International Settlement Agreement to opt out of the recognition and enforcement regime in whole or in part (while other States might use the declaration mechanism described above to require parties to affirmatively opt into the recognition and enforcement regime).

18. Again, for the purpose of illustration, these exceptions could be provided through text such as the following:

> Recognition and enforcement of an International Settlement Agreement may be refused, at the request of the party against whom it is invoked, only if that party furnishes to the competent authority where the recognition and enforcement is sought, proof that:
>
> A. The party against whom the International Settlement Agreement is invoked was, under the law applicable to it, under some incapacity or concluded the International Settlement Agreement due to coercion or fraud; or
>
> B. The subject matter of the International Settlement Agreement is not capable of settlement under the law of the country where recognition and enforcement is sought; or
>

Section D — Possible forms of work

19. Given the number of substantive issues to be discussed, the Working Group does not need to decide at this session what form the instrument should take.

20. In considering these issues preliminarily, however, the development of a convention would seem to have several advantages. As noted in paragraph 51 of the Secretariat paper, using certain aspects of the New York Convention as a model would enable the Working Group to avoid some particularly difficult issues, such as "trying to harmonize the specific procedure for reaching [the] goal" of recognition and enforcement, as noted at the outset — issues that could be harder to avoid if drafting model legislative provisions. Additionally, in choosing the form of an instrument, the technical elements are not the only relevant considerations. As noted above, other forms of dispute resolution are already the subject of treaties — existing or in-progress — establishing frameworks for cross-border recognition and enforcement. By developing an analogous convention for conciliation, UNCITRAL would underscore that conciliation should be seen as an important form of dispute resolution. This type of endorsement, in combination with the creation of a cross-border framework that would provide greater confidence in the ability to obtain recognition and enforcement of a settlement in another jurisdiction, could help to encourage the use of conciliation around the globe.

E. Note by the Secretariat on settlement of commercial disputes: enforcement of settlement agreements resulting from international commercial conciliation/mediation: compilation of comments by Governments

(A/CN.9/846 and Add.1-5)

[Original: English/French/Russian/Spanish]

Contents

I. Introduction

1. At its forty-seventh session, in 2014, the Commission agreed that the Working Group should consider at its sixty-second session the issue of enforcement of settlement agreements resulting from international commercial conciliation and should report to the Commission at its forty-eighth session, in 2015, on the feasibility and possible form of work in that area. The Commission invited delegations to provide information to the Secretariat in respect of that subject matter.[1]

2. For the preparation of possible future work on the matter, and to facilitate the collection of information by delegations, the Secretariat circulated to States a questionnaire, reproduced below in section II. The replies are reproduced below in section III in the form in which they were received.

[1] *Official Records of the General Assembly, Sixty-ninth session, Supplement No. 17* (A/69/17), para. 129.

II. Questionnaire

A. Questions regarding the legislative framework with respect to enforcement of settlement agreements resulting from international commercial conciliation/mediation

3. In August 2014, the Secretariat circulated to States a questionnaire on the legislative framework on enforcement of international settlement agreements resulting from mediation. The questionnaire aimed at collecting information on whether States have already adopted legislation addressing enforcement of settlement agreements. It was circulated a second time in February 2015 in accordance with a request of the Working Group (A/CN.9/832, para. 21). The questionnaire contained the following questions:

(1) Please provide information regarding the legislative framework or other rules in your jurisdiction regarding the enforcement of international commercial settlement agreements arising out of mediation/conciliation[2] proceedings.

In particular, does the law applicable to the enforcement of international commercial settlement agreements include:

i. Specific enforcement procedures if those agreements result from mediation/conciliation proceedings?

ii. Any procedure for expedited enforcement of international commercial settlement agreements? (In the affirmative, what are the conditions for the procedure to apply?)

iii. Any provision to the effect that an international commercial settlement agreement be treated as a final award rendered by an arbitral tribunal?

In the affirmative, please indicate:

1. Whether arbitral proceedings have to take place (possibly in a simplified form, with the only purpose of recording in an award the terms of the settlement between the parties) or whether the settlement agreement can be treated as an award on agreed terms without involving the actual commencement of any arbitral proceedings;

2. Whether specific conditions are required: for instance, should the settlement agreement result from mediation/conciliation proceedings? Should it be in writing, and signed by the parties/their representatives and the mediator(s)/conciliator(s)?

3. Whether courts in your jurisdiction consider awards on agreed terms enforceable under the New York Convention on the Recognition and Enforcement of Arbitral Awards (1958)?

(2) What are the grounds for refusing enforcement of a commercial settlement agreement in your jurisdiction?

(3) Are there any criteria that international commercial settlement agreements need to meet to be deemed valid? Are there any bases in law for challenging the validity of an agreement to refer a dispute to mediation/conciliation or the validity of the resulting mediated/conciliated settlement agreement?

(4) Please add any comment you may wish to make on the question of enforcement of international mediated/conciliated settlement agreement.

[2] Please note that in the questions below, the terms “mediation” or “conciliation” are used interchangeably as broad notions both referring to proceedings in which a person or a panel of persons assist parties in their attempt to reach an amicable settlement of their disputes.

B. Reference to the questionnaire

4. In the remainder of this note and its addenda, the above questions are referred as follows:

Question 1: Information regarding the legislative framework

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

Question 3: Validity of international commercial settlement agreements

Question 4: Any other comment

III. Compilation of comments

1. Armenia

[Original: English]
[Date: 5 November 2014]

Question 1: Information regarding the legislative framework

The legal relations subject matter of the questions below are regulated by the Law of the Republic of Armenia on Commercial Arbitration.

(i) The Law does not contain any specific enforcement procedures considering the agreements result from conciliation/mediation proceedings.

(ii) There is not any expedited procedure for enforcement of international commercial agreements.

(iii) There is no provision to the effect that an international commercial settlement agreement can be treated as a final award rendered by an arbitral tribunal.

If, during arbitral proceedings, the parties settle the dispute, the arbitral tribunal shall terminate the proceedings and, if requested by the parties and not objected to by the arbitral tribunal, shall make an award on reconciliation agreement on agreed terms.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

The law of the Republic of Armenia on Commercial Arbitration does not settle this issue.

Question 3: Validity of international commercial settlement agreements

The Law of the Republic of Armenia on Commercial Arbitration does not settle this issue.

2. Austria

[Original: English]
[Date: 10 March 2015]

Question 1: Information regarding the legislative framework

Austria has no specific legal regime regarding this kind of enforcement. International commercial settlement agreements arising out of mediation/conciliation proceedings are per se no executory title according to Austrian law. By the way the same is true for national settlement agreements.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

As most other laws, Austrian law refuses to immediately enforce any kind of private agreements. If a party wants to enforce a right arising out of a contract (even if the contract was aimed at settling a dispute between the parties), they have to refer to the competent court to gain an executory title in a court proceeding. It is however possible to convert an agreement into a "*vollstreckbarer Notariatsakt*" according to Sec. 3 of our Notarial Code

(*Notariatsordnung* — NO) or into a court agreement (*prätorischer Vergleich*) according to Sec. 433 Civil Procedure Code (Zivilprozessordnung — ZPO) and in this manner create a title without recourse to a contentious court proceeding.

As yet there seem to exist no standards for mediation/conciliation proceedings (both on the national and on the international level) that warrant sufficient trust in the proceeding itself, its independence from either party and from negative influence from outside, the quality of mediators/conciliators, the quality of the outcome and the fact that the outcome is not agreed upon by the parties to the detriment of a third person. Such trust, however, seems indispensable if one considers rendering the result of such a proceeding directly enforceable.

Question 4: Any other comment

Austria is very sceptical towards an attempt to find and regulate sufficient criteria for mediation/conciliation proceedings that could justify immediate enforceability of their results. We also doubt the necessity of such an endeavour as there already exist functioning structures for generating enforceability, in particular international arbitration which allows for converting an agreement into an arbitral award and thereby making it enforceable under the regime of the 1958 New York Convention. A possible parallel structure might have little or no added value. It could even reduce the value of existing structures by enhancing legal complexity in the field and thus confusing market participants. In addition the necessity to formalize mediation/conciliation proceedings in order to create reliable structures for a "product", the outcome of which might warrant immediate enforcement, runs the danger of compromising, if not destroying, one of the most important merits of mediation/conciliation namely its flexibility and the relative absence of red tape.

3. Belarus

[Original: Russian]
[Date: 12 January 2015]

Question 1: Information regarding the legislative framework

The execution of settlement agreements resulting from mediation/conciliation proceedings is governed in the Republic of Belarus by the following basic legislative acts:

- Code of Economic Procedure of the Republic of Belarus (hereinafter "CEP");
- Code of Civil Procedure of the Republic of Belarus (hereinafter "CCP");
- Mediation Act of the Republic of Belarus (hereinafter "Mediation Act"); and
- Act of the Republic of Belarus "On the International Arbitration Court" (hereinafter "Arbitration Act").

Under article 2 of the Mediation Act, mediation/conciliation may be conducted either prior to recourse by the parties to civil or economic court proceedings or subsequent to the commencement of court proceedings.

A mediation/conciliation agreement reached subsequent to the commencement of court proceedings by the parties through mediation/conciliation and approved by the court as an amicable settlement may constitute the final outcome of the proceedings (article 157 of the CEP, article 285(1) of the CCP, and article 39 of the Arbitration Act).

The execution of such agreements is provided for in the general rules on the execution of judicial decisions, including on enforcement (article 461 of the CCP, article 124 of the CEP, and article 39 of the Arbitration Act).

As a general rule, settlement/conciliation/mediation agreements are executable on the basis of the principles of voluntariness and good faith of the parties (article 15 of the Mediation Act, and articles 124 and 157 of the CEP).

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

The Mediation Act provides for a number of requirements the non-fulfilment of which excludes the possibility of enforcement of a mediation agreement. Thus, under article 15 of

the Mediation Act, the following types of mediation agreement are not executable under procedural law, i.e. they are not enforceable:

- Those not approved by the court as settlement agreements for disputes adjudicated in accordance with civil procedural law; (*In the event that the parties conclude a mediation agreement, the court shall establish a time limit for the execution thereof (article 285 of the CCP). In the event that the parties conclude a mediation agreement and that in this connection an application for approval of the settlement agreement is submitted to the court, the court shall resume the suspended proceedings and consider the application for approval of the settlement agreement (article 285(1) of the CCP)*).
- Those not meeting the requirements of the economic procedural law on settlement agreements; (*The settlement agreement must be approved by the court (article 123 of the CEP) in form and substance (article 122 of the CEP)*).
- Those concluded with the participation of a mediator not included in the Register of Mediators.

Enforcement of mediation agreements:

Under article 461 of the CCP, settlement agreements approved by the court shall be executed in accordance with the provisions of the CCP. Under article 462 of the CCP, court orders include the writ of execution, which is issued by the court pursuant to international agreements approved by the court in order to ensure the execution, including where necessary the enforcement, thereof.

Under article 40(1) of the CEP, in the event of non-execution of a voluntary mediation agreement meeting the requirements of the CEP for settlement agreements, a court order for the enforcement of the mediation agreement shall be issued by the economic court in accordance with the rules established by articles 262(1) to 262(3) of the CEP.

Under article 262(1) of the CEP, an application for the issuance of a court order for the enforcement of a mediation agreement shall be filed by the interested party to the mediation agreement with the economic court that has jurisdiction over the location or place of residence (place of stay) of the debtor or that has jurisdiction over the location of the debtor's property if the debtor's location or place of residence (place of stay) is unknown.

Article 262(1) of the CEP also defines the content of the application for the issuance of a court order for the enforcement of a mediation agreement and the list of documents to be attached thereto. The said article also provides for the possibility of filing an application and attached documents electronically. An application for the issuance of a court order for the enforcement of a mediation agreement may be submitted within six months of the date of expiry of the period for voluntary execution of the mediation agreement.

4. Brunei Darussalam

[Original: English]
[Date: 6 January 2015]

Question 1: Information regarding the legislative framework

Brunei Darussalam has in force the International Arbitration Order 2009 (IAO 2009) which came into force on 23 February 2010. Part III of the IAO 2009 deals with foreign awards. The IAO 2009 is limited to arbitral award resulting from an arbitration, and it does not cover mediation/conciliation. Brunei Darussalam currently does not have laws and regulations governing mediation or conciliation.

However, the following are responses to some of the questions relating to agreements arising out of an arbitration proceeding.

Question 1 (iii): An international commercial settlement agreement arising out of an arbitration proceeding may be treated as a final award (See sections 42(2) and 31(1) of the IAO 2009).

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

The grounds for refusing enforcement of international commercial settlement agreements arising out of an arbitration proceeding are provided under section 44 of the IAO 2009.

Question 3: Validity of international commercial settlement agreements

An international commercial settlement agreement arising out of an arbitration proceeding is valid where (Section 42(1) of the IAO 2009) the said agreement is from a country which is a party to the Convention on the Recognition and Enforcement of Foreign Arbitral Awards, and which recognizes and will enforce awards made in Brunei Darussalam.

In a court proceeding, the parties must produce: (i) the duly authenticated original award or a duly certified copy thereof; (ii) the original arbitration agreement or a duly certified copy thereof, and (iii) where the agreement is in a foreign language, a translation of it in the English language.

5. Canada

[Original: English/French]
[Date: 8 December 2014]

Question 1: Information regarding the legislative framework

(i) In Canada, the enforcement of mediation agreements, except agreements involving the federal Crown or relative to subject matters falling under federal legislative powers, are generally governed by provincial contract law. A settlement agreement resulting from conciliation or mediation proceedings can be presented in a court of law for enforcement if a party to the agreement refuses to comply with the terms of the settlement. In that situation, the settlement agreement would need to be presented according to normal rules on presenting documentary evidence in a court of law. Two Canadian provinces, Ontario and Nova Scotia, have adopted legislation based on the UNCITRAL Model Law on International Commercial Conciliation, which provides a framework for the enforcement of commercial conciliation agreements. In Quebec, a mediated agreement can constitute a settlement (called transaction) which is *res judicata* between the parties (sec. 2631 to 2637 and 2848 Code civil (« C.c.Q. »; see also new sec. 613 Nouveau Code de procédure civile (« N.C.p.c. »)). Transactions enforceable at their places of origin are recognized and, where applicable, declared to be enforceable in Québec, on the same conditions as judicial decisions, to the extent that those conditions apply to the transactions (sec. 3163 C.c.Q.). These conditions are provided for by articles 3155 and following.

(ii) Under Ontario law, a party to a commercial conciliation settlement may apply to the Superior Court of Justice for an order authorizing the registration of the agreement with the court. On the filing of a true copy of the settlement agreement with the registrar pursuant to an order authorizing the registration of the agreement, the settlement agreement is registered with the court and has the same force and effect as if it were a judgement obtained and entered in the Superior Court of Justice on the date of the registration (see Commercial Mediation Act, 2010 S.O. 2010, Chapter 16, Schedule 3, s. 13).

In Nova Scotia, a settlement agreement is binding on the parties. On application to the Supreme Court of Nova Scotia with notice to all parties, the agreement may be filed with the Court. Once filed, the agreement is enforceable as if it were a judgement of that court (see Commercial Mediation Act, S.N.S. 2005, c. 36, s. 15).

In Quebec, in order for a settlement to be subject to compulsory execution, it must be homologated by a court (sec. 2633 C.c.Q. according to the process detailed in section 885 a) of the Code de procédure civile (« C.p.c. »)).

(iii) In general, no provision to the effect that an international commercial settlement agreement be treated as a final award rendered by an arbitral tribunal.

1. In Quebec, the Code of Civil Procedure provides that if the parties settle the dispute, the arbitrators shall record the agreement in an arbitration award (sec. 945.1 C.p.c.; sec. 642(4) par. N.C.p.c.). In that case, the arbitral process shall take place. The

New Code of Civil Procedure, scheduled to come into force in 2015, provides that the arbitrator's mission also includes attempting to reconcile the parties, if they so request and circumstances permit, and continuing the arbitration process, with the parties' express consent, if the conciliation attempt fails (sec. 620(2) N.C.p.c.).

In situations where no arbitration proceeding took place, the agreement can constitute a settlement (called transaction) which is res judicata between the parties (sec. 2631 to 2637 and 2848 Code civil; sec. 613 N.C.p.c.).

2. In Quebec, an award must be in writing and signed by the arbitrators (sec. 945.2 C.p.c.; sec. 642(1) N.C.p.c.). Settlement agreements are not subject to any particular form requirements (sec. 2811 and 2827 C.c.Q.).

3. In Quebec, the legislation does not distinguish between arbitral awards and awards on agreed terms, which means that both should be enforceable under the New York Convention. There is no reported case law confirming this interpretation.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

The grounds for refusing the enforcement of a commercial settlement agreement depend on whether there is a specific framework on enforcement of settlement agreements or enforcement is achieved by application of contract law.

Where enforcement is done under contract law, enforcement of the contract can be denied on the basis of existing grounds such as duress, unconscionability, illegality, undue influence, misrepresentation, mistake or fraud.

Specific legislation in Ontario, mentioned under 1 above, provides that no judgement or order shall be granted or made if it is shown to the court that, a party to the mediation against whom the applicant is seeking to enforce the settlement agreement did not sign the agreement or otherwise consent to the terms of the agreement that the applicant is seeking to enforce; the settlement agreement was obtained by fraud; or the settlement agreement does not accurately reflect the terms agreed to by the parties in settlement of the dispute to which the agreement relates (see Commercial Mediation Act, *S.O. 2010*, Chapter 16, Schedule 3, s. 13 (6)).

The legislation in Nova Scotia is silent on this issue.

In Quebec, the homologating court only examines the legality of the act and as a general rule it cannot rule on its advisability or merits (sec. 527 and 528 N.C.p.c.).

Question 3: Validity of international commercial settlement agreements

Under contract law, there are no rules specific to commercial settlement agreements. The general contract law rules govern the validity of the agreement.

Where a legislative framework exists, a commercial settlement agreement needs to address commercial disputes, that is, the subject matter does not cover family or household disputes. The settlement agreement must be signed by more than one party to the mediation, or minutes of settlement signed by more than one of the parties, that disposes of one or more issues in dispute in the mediation. There is no need for the agreement to be signed by an accredited mediator or conciliator in order to be valid (see Commercial Mediation Act, *S.O.* 2010, Chapter 16, Schedule 3, ss 2, 3, 12 and 13).

The legislation in Nova Scotia is silent on this issue.

In Quebec, the Civil Code provides specific ground for annulling a settlement agreement as well as a number of exceptions to the general contract law rules (sec. 1398, 1399, 1411, 1413, 2631 to 2637 C.c.Q.).

Question 4: Any other comment

See document A/CN.9/WG.II/WP.188.

6. Colombia

[Original: Spanish]
[Date: 30 December 2014]

Question 1: Information regarding the legislative framework

The legislative framework of Colombia does not contain any specific laws governing the cross-border enforcement of commercial settlements.

Colombia has a General Code of Procedure (Act 1564 of 2012), which contains, at articles 605 to 607, rules for the recognition and enforcement of foreign judgements, and the Arbitration Statute (Act 1563 of 2012), which regulates, at articles 111 to 116, the procedure for recognition and enforcement of foreign awards with the same requirements as those of the New York Convention.

However, the Arbitration Statute contains a specific article on settlements in international arbitration as a form of terminating arbitral proceedings and provides that, if the parties agree and the tribunal does not object, the agreements reached may be included in an award, and the award shall have the same effects as an award rendered on the merits of the claim. As mentioned, this situation is regulated within the arbitration process conducted in accordance with the Statute, but it is not intended specifically for commercial settlements concluded abroad. (*"Article 103. Settlements. If during arbitral proceedings the parties reach a settlement or conciliation/mediation agreement resolving the dispute, the tribunal shall terminate the proceedings. If requested by both parties and the tribunal does not object, the tribunal shall include in an award the terms agreed by the parties. The award shall have the same effects as any other award rendered on the merits of the claim."*)

In Colombia, a settlement agreement may be understood as an enforceable title, that is to say, clear, express, due and payable obligations contained in documents coming from the debtor or from the originator of the documents evidencing those obligations, or obligations arising from a judgement or decision issued by a judge or tribunal of any jurisdiction, or from another legal source (article 422 of the General Code of Procedure). This category could include commercial settlement agreements, which would be enforced pursuant to the provisions on enforcement in Section II, Title I of the aforementioned Code.

7. Cyprus

[Original: English]
[Date: 11 November 2014]

It is recalled that the Republic of Cyprus is a Member State of the European Union where the principles of the Single Market apply. It is thus clarified that the information below concerns only commercial settlements between Cyprus and non-EU Member States.

Question 1: Information regarding the legislative framework

International commercial arbitration in the Republic of Cyprus is governed by two laws: "*The International Commercial Arbitration Law of 1987*" and "*The Arbitration Law*". None of these two laws makes reference to international commercial mediation/conciliation proceedings.

The Republic of Cyprus is a contracting State to the New York Convention on the Recognition and Enforcement of Arbitral Awards (1958) since 29 December 1980. Declaration made upon accession: "*The Republic of Cyprus will apply the Convention, on the basis of reciprocity, to the recognition and enforcement of awards made only in the territory of another Contracting State; furthermore it will apply the Convention only to differences arising out of legal relationships, whether contractual or not, which are considered as commercial under its national law.*"

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

Please see answer (1) above.

Question 3: Validity of international commercial settlement agreements

Please see answer (1) above.

8. Ecuador

[Original: Spanish]
[Date: 2 March 2015]

Question 1: Information regarding the legislative framework

In Ecuador, the mediation instrument (*acta de mediación*), which contains the agreement, has the effect of an enforceable ruling and of res judicata. It is therefore enforced in the same way as a final ruling, through a court order, and the judge who enforces it may accept no challenges other than those brought after the mediation instrument is signed.

In order for the mediation instrument to have that effect, it must be signed by the parties and the mediator as part of mediation proceedings conducted in accordance with the Arbitration and Mediation Act of Ecuador. That is, even if the matter involves an international commercial settlement, the mediation proceedings from which the settlement arises must be conducted at a mediation centre registered with the Council of the Judiciary, in accordance with Ecuadorian law.

There is no legislation regulating the effect of mediation instruments resulting from proceedings in other States. The National Assembly is currently considering a proposal which, if adopted, would give mediation instruments concluded in other States and recognized in Ecuador the same force as international treaties and agreements currently in force; in the absence of such treaties, such mediation instruments would be enforced as a ruling, without the possibility of review of the substance of the matter.

It should be noted that a settlement agreement has the effect of res judicata under the Civil Code of Ecuador. Moreover, under the Code of Civil Procedure, settlement instruments have the effect of an enforceable instrument and are therefore enforced by means of a court order. In such cases there are no prior mediation proceedings.

(i) As mentioned above, as in the case of final rulings, a mediation instrument that has been signed as part of domestic proceedings is enforced by court order even if it contains an international commercial settlement agreement.

Thus, once a request to enforce a mediation instrument has been submitted, the judge's first step is to issue an enforcement order whereby: (1) the debtor is ordered to pay or deliver goods within 24 hours; (2) the debtor is compelled to deliver the good; (3) the action is performed at the expense of the debtor; or (4) the debtor is ordered to pay compensation for failure to deliver the good or perform the action.

Upon the issue of the enforcement order, the debtor must comply with the order or apply for extinction or modification of the obligation, provided that that application is made after the instrument has been signed. If the debtor fails to comply or to raise an objection, the debtor's assets are confiscated and auctioned and the proceeds of their sale paid to the creditor.

There is no legislation regulating the effect of mediation instruments signed as part of proceedings in another State; consequently, the issue of enforcement of such instruments is unclear.

(ii) The issuing of court orders as described above is a procedure for the expedited enforcement of mediation instruments signed as part of mediation proceedings conducted in Ecuador. In order for the procedure to apply, a mediation instrument concluded in accordance with the Arbitration and Mediation Act is required. There are no other requirements or procedures.

There is no procedure for the enforcement of mediation instruments concluded in another State.

(iii) In accordance with the Arbitration and Mediation Act, once arbitration proceedings have begun, such proceedings may end in a settlement agreement that has the same effect as

an arbitral award, i.e., the effect of an enforceable final ruling and of res judicata, and that is enforced by means of a court order.

Accordingly, article 28 of the Arbitration and Mediation Act provides that "Where arbitration ends in a settlement, that settlement shall be of the same nature and have the same effect as an arbitral award and shall be in writing and in accordance with article 26 of this Act."

However, an award rendered as part of foreign arbitral proceedings that includes an international commercial settlement agreement is considered an award in Ecuador in accordance with Ecuadorian legislation on arbitration. Such an award would therefore be enforced in Ecuador in the same way as an award rendered in Ecuador, that is, by means of a court order.

A draft general code of procedure that would establish a procedure for the recognition of foreign arbitral awards, following which the awards would be enforced in the same way as domestic awards, is currently under discussion.

1. Arbitral proceedings may end in a settlement but must begin with an actual dispute. The law does not provide for arbitral proceedings of which the sole purpose is to enable a settlement between the parties to be treated as an award. In particular, given that a settlement instrument (which does not result from mediation proceedings) has the effect of res judicata, and that a mediation instrument (resulting from mediation proceedings) has the same effect as an award, i.e. the effect of an enforceable ruling and of res judicata, and is enforceable by means of a court order, the parties may not, by agreement, give a settlement agreement the effect of an award.

2. Even if the mediation instrument contains an international commercial settlement agreement, in order for that instrument to have the effect of an enforceable ruling and of res judicata, it must result from mediation proceedings with the participation of a mediator accredited by a mediation centre registered with the Council of the Judiciary.

   The mediation instrument must be in writing and contain, at a minimum, an account of the facts that led to the dispute, a clear description of the obligations of each party and the electronic fingerprints or signatures of the parties and of the mediator, as provided for in article 47 of the Arbitration and Mediation Act.

3. If awards on agreed terms are treated as awards under arbitration law, they are enforceable in Ecuador on the basis of the New York Convention and the Inter-American Convention on International Commercial Arbitration (Panama Convention).

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

During enforcement proceedings, the only objections that may be raised with respect to a mediation instrument signed as part of domestic proceedings are those arising after that instrument is signed. Such objections relate to the extinction or modification of the obligation set forth in the instrument.

Question 3: Validity of international commercial settlement agreements

In order for an international commercial settlement agreement to be considered valid, it must fulfil the same validity requirements as those that apply to contracts (capacity, consent free of defect, lawful purpose, legitimate cause and the formalities required). In addition, it should deal with a matter on which settlement can be reached in accordance with Ecuadorian law.

There is no legal basis for challenging the validity of a mediation agreement (an agreement whereby a dispute is referred to mediation). In accordance with article 46, paragraph (a), of the Arbitration and Mediation Act, where a mediation agreement has been concluded, judges must refrain from considering petitions concerning the dispute that is the subject of the agreement unless there is no possibility of settlement being reached or there is an express or implied waiver by the parties. In any case, in Ecuador, mediation is voluntary; consequently, even if such proceedings have been initiated, the defendant may withdraw from those proceedings without being compelled to continue to participate.

The validity of the mediation instrument (settlement agreement resulting from mediation) may be challenged on the basis of defects in the contracts between the parties (lack of capacity, defect of consent, unlawful purpose, illegal cause or lack of formalities); on the ground that it does not relate to a matter on which settlement can be reached; on the basis of failure to summons or notify the Counsel-General of the State in cases involving public entities, in accordance with article 6 of the Act on the Office of the Counsel-General of the State; on the basis of lack of authorization or delegation by the Counsel-General of its signature in cases involving public sector entities, in accordance with article 12 of the Act on the Office of the Counsel-General of the State; or if the mediator is not accredited by a mediation centre, or if the centre that has accredited the mediator is not registered with the Council of the Judiciary, in accordance with articles 48 and 52 of the Arbitration and Mediation Act.

It should be noted that there is no specific procedure for challenging the validity of a mediation instrument.

Question 4: Any other comment

Ecuador has detailed legislation relating to mediation that gives mediation instruments the effect of enforceable rulings and of res judicata and permits their enforcement in the same way that rulings are enforced. This provision, contained in article 47 of the Arbitration and Mediation Act, has raised concerns with regard to its application in a civil-law system, but those concerns have been dispelled by practice.

Clarity is needed with regard to the effect that mediation instruments resulting from foreign mediation proceedings should have.

9. Egypt

[Original: English]
[Date: 11 November 2014]

Question 1: Information regarding the legislative framework

According to the Egyptian law, international commercial agreements do not benefit from special nor expedited enforcement procedures.

Egyptian law does not treat an international commercial settlement as a final award rendered by an arbitral tribunal.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

Requests for enforcement of commercial settlement agreements can be denied if its provisions contradict with Egyptian public order.

Question 3: Validity of international commercial settlement agreements

Only officially authenticated international agreement can be directly enforced according to the Egyptian law.

An ordinary international settlement agreement may be enforced through a judicial ruling confirming its validity.

10. Germany

[Original: English]
[Date: 17 November 2014]

Question 1: Information regarding the legislative framework

(i) Under German law, agreements resulting from mediation/conciliation are governed by the rules that apply to agreements resulting from negotiations between parties. They are regarded as contracts and thus subject to the applicable general rules of contract law. There

are different ways of having such agreements/contracts declared enforceable in Germany. No specific enforcement procedures exist for foreign commercial settlement agreements.

Agreements/contracts can be made enforceable as follows:

(A) Action in court

- Internal: First, an action can be brought before a German court requesting the other party to comply with the contract/agreement; subsequently, the German court decision must be enforced.
- International: If mediation/conciliation agreements have been confirmed by court decisions in other States, such court decisions may be recognized and declared enforceable in Germany.

1. Court decisions from an EU Member State are declared enforceable under a simplified procedure (Article 38 et seqq. of Regulation (EC) No. 44/2001). As of 10 January 2015, the procedure for declaring the enforceability of court decisions from EU Member States will be done away completely (Article 39 et seqq. of Regulation (EU) No. 1215/2012). Recognition of the decision can, on the application of the person against whom enforcement is sought, in general be refused especially if certain procedural errors have occurred in the original proceedings or if the result of compulsory enforcement would violate the German *ordre public*.
2. Court decisions from a Contracting State of the Lugano Convention are declared enforceable under a simplified procedure (Article 38 et seqq. of the Lugano Convention of 30 October 2007).
3. Decisions by courts of other States have to be declared enforceable under the German procedure to obtain a declaration of enforceability. The preconditions for recognition and enforcement are governed by German international civil procedure law (sections 328, 722 and 733 of the Code of Civil Procedure (*Zivilprozessordnung*, ZPO)).

(B) Submission to immediate enforcement in a public document drawn up by a German notary

- Internal: Second, parties may include the agreement in a public document drawn up by a German notary or a German court and add a declaration by the party concerned, in which he or she accepts to submit to immediate enforcement in relation to an obligation resulting from that agreement.
- International: If such a document has been drawn up abroad by a civil law notary (notaries public are not included) and if it is enforceable under the law of the State of origin (the State in which it has been drawn up), it can be declared enforceable under the Lugano Convention or under Regulation (EC) No. 44/2001, or under a bilateral agreement with another State if such an agreement exists. It is a matter of dispute in German legal literature as to whether foreign documents which include a declaration of submission to enforcement may be recognized or not in the absence of such an agreement between States.

(C) Court settlement

- Internal: Third, the settlement agreement (mediation/conciliation agreements generally represent settlement agreements between the parties) may be declared enforceable by a German court or a German notary; this is subject to the proviso that one of the parties has its habitual residence in Germany and the agreement has been negotiated by attorneys representing the parties to the settlement and lodged with the competent court in Germany. Enforcement of an out-of-court settlement concluded by attorneys will be refused if the settlement agreement is void or invalid, or if its recognition would be contrary to the German *ordre public*.
- International: If the settlement agreement has been concluded between foreign parties abroad, it can also be declared enforceable under the Lugano Convention or under Regulation (EC) No. 44/2001, or under a bilateral agreement with another State if such an agreement exists. In respect of these cases as well, it is a matter of dispute in

German legal literature as to whether foreign documents which include a declaration of submission to enforcement may be recognized or not.

The compulsory enforcement of German court decisions, German enforceable public documents and German settlement agreements is subject to German law governing compulsory enforcement, as is the compulsory enforcement of foreign decisions, foreign enforceable documents and foreign settlement agreements which have been declared enforceable in Germany. In other words, compulsory enforcement as such follows identical rules once the foreign decision or public document or settlement has been declared enforceable.

(ii) There is no special procedure guaranteeing the expedited enforcement of international commercial settlement agreements in German law (see answer re (i)).

(iii) German law does not contain any provisions in which international commercial settlements are regarded as arbitral awards. In view of the distinct procedures that lead either to this type of settlement on the one hand, or to arbitral awards on the other, Germany does not see any possibility of automatic legal conversion or equal treatment and will therefore oppose any endeavours to this effect at international level.

(1) A settlement agreement can on no account be regarded as an award on agreed terms without an arbitral tribunal having reviewed the conclusion of the settlement (including, at least, the procedure, the applicable law and the result). It is conceivable, however, that a settlement agreement from another State — upon the joint request of both parties, or upon the request of one party provided that this party is able to produce an arbitration agreement — could be followed by simplified arbitral proceedings in the State of origin or in the State of enforcement, which may then result in an award on agreed terms. In the case of foreign arbitral awards, the State of enforcement must retain a general possibility of review and at least the ordre public exception. Whether it is necessary to convert a settlement agreement into an arbitral award in order to improve the enforcement of such settlements at international level still needs to be examined in detail.

(2) Subsequent simplified arbitral proceedings should only be opened for international commercial settlement agreements. A precondition for this is, of course, that such a settlement (including the claimed content) has been concluded effectively between the parties. The minimum requirements for this are that the document is available in written form (which may include a secured electronic form), that it is signed, and that it contains comprehensible statements which can form the basis of an award and a declaration of enforceability.

(3) An award on agreed terms can be recognized and declared enforceable in Germany under the New York Convention on the Recognition and Enforcement of Foreign Arbitral Awards of 1958 if no grounds exist for refusing recognition.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

If and insofar as an international commercial settlement can be converted into a German enforceable instrument in Germany by using the procedure available for internal settlement agreements, no additional declaration of enforceability is required before compulsory enforcement can commence.

If a settlement agreement concluded abroad and enforceable under its law of origin is intended to be enforced in Germany without being converted, in general this first requires a declaration of enforceability (see answer to question 1). The grounds for refusing enforcement are laid down in the applicable European or international law instruments governing enforcement procedure (Regulation (EC) No. 44/2001 and Article 38 et seqq. of the Lugano Convention of 30 October 2007; bilateral agreements with other States). If no such instrument is applicable, there is no explicit provision on enforceability, and it is disputed whether such agreements concluded abroad and enforceable under their law of origin can be declared enforceable. However, in any event, even if they were capable of being declared enforceable, as for internal settlements (see above), enforcement will be refused if the settlement agreement is void or invalid, or if its recognition would be contrary to the German *ordre public*.

Question 3: Validity of international commercial settlement agreements

Since mediation/conciliation agreements are regarded as contracts in Germany, the question as to their validity is governed by the contract law applicable under the conflict of laws provisions. Agreements to mediate/conciliate as well as agreements resulting from mediation/conciliation are regarded as contracts subject to the applicable contract law rules.

Under German law, an international commercial settlement agreement may be invalid in particular if it has been challenged due to an error made by a party to the contract, or due to a threat made against the other party to the contract, or due to the intentional deception of the latter. The same applies if the international commercial settlement agreement violates a statutory prohibition applicable in Germany or is *contra bonos mores*. Beyond that, German law does not contain any special requirements for the validity of such an agreement.

Question 4: Any other comment

See document A/CN.9/WG.II/WP.188.

11. Hungary

[Original: English]
[Date: 2 December 2014]

Question 1: Information regarding the legislative framework

(i) Hungary has not enacted special provisions on the enforceability of mediation settlement agreements. Therefore, mediation settlement agreements are only enforceable in the same way as any other contract between the parties.

(ii) There is no procedure for expedited enforcement of international commercial settlement agreements.

(iii) (1) According to Section 39(2) of the Act LXXI of 1994 on Arbitration if requested by the parties, the arbitration tribunal shall fix the settlement in the form of an award under the agreed terms, provided that it finds the settlement in compliance with the law. Arbitral proceedings have to take place in this case.

(2) No other specific conditions are required.

(3) According to Section 39(3) of the Act LXXI of 1994 on Arbitration, an award on agreed terms has the same effect as that of any other award made by the arbitration tribunal.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

The grounds for refusing enforcement of a commercial settlement agreement as an award on agreed terms are the same as in case of the arbitral awards according to Section 59 of the Act on Arbitration. The court shall refuse to execute the award of the arbitration tribunal if, in its judgement: (a) the subject matter of the dispute is not subject to arbitration under Hungarian law; or (b) the award is contrary to Hungarian public policy.

Question 3: Validity of international commercial settlement agreements

The Hungarian Act on Conciliation has no provisions on enforceability of a mediation settlement agreement; according to the Act on Arbitration, the criteria of the award on agreed terms is the same as the criteria of the arbitral award.

(A/CN.9/846/Add.1)(Original: English/French)

Note by the Secretariat on settlement of commercial disputes: enforcement of settlement agreements resulting from international commercial conciliation/mediation: compilation of comments by Governments

ADDENDUM

Contents

III. Compilation of comments

12. Indonesia

[Original: English]
[Date: 29 October 2014]

Question 1: Information regarding the legislative framework

The enforcement of international commercial settlement agreements arising out of mediation/conciliation proceedings is regulated by the Government of the Republic Indonesia in the Law Number 30 Year 1999 on Arbitration and Alternative Dispute Resolution (Arbitration Law). This Law regulates the resolution of dispute or difference of opinion between the parties in a particular legal relationship that have entered into an arbitration agreement which explicitly states that those disputes or differences of opinion arising or which may arise from a legal relationship will be resolved by arbitration or through alternative dispute resolutions. Arbitration means a method of settling commercial disputes outside the general courts, based on an arbitration agreement made in writing by the parties to the dispute and Alternative Dispute Resolution means a mechanism for the resolution of dispute or difference of opinion through procedures agreed by the parties, such as resolutions outside the courts by consultation, negotiation, mediation, conciliation, or expert assessment.

Indonesia's Arbitration Law takes the territorial view of the nature of arbitration, meaning that all arbitrations conducted in Indonesia are considered domestic. Those conducted outside of the archipelago are considered "international", regardless of the nationality of the parties, governing law, or location of the subject of dispute. This Law also regulates

enforcement of international awards which rendered in any other State signatory to the New York Convention on the Recognition and Enforcement of Foreign Arbitral Awards (1958) which deemed as in the questions "International Commercial Settlement Agreement arising out of mediation and conciliation proceedings". Article 5, paragraph 1, of the Arbitration Law stipulates that the only disputes which may be settled by arbitration are disputes in the commercial sector concerning rights which, according to the law and regulations, have the force of law and are fully controlled by the parties in dispute.

(a) Recognition and Enforcement of Awards

In accordance with Article 66 of Arbitration Law, international arbitration awards will only be recognized and may be enforced in the jurisdiction of the Republic of Indonesia if they fulfil the following criteria: (1) The international arbitration award is rendered by an arbitrator or arbitration panel in a country which is bound to the Republic of Indonesia by a bilateral or multilateral treaty on the recognition and enforcement of international arbitration awards; (2) The international arbitration awards stated in paragraph 1 are limited to awards which are included within the scope of commercial law under Indonesian law; (3) The international arbitration awards stated in paragraph 1, which may only be enforced in Indonesia, are limited to those which do not conflict with public order; (4) An international arbitration award may be enforced in Indonesia after obtaining a writ of execution from the Chairman of the Central Jakarta District Court; and (5) The international arbitration awards stated in paragraph 1, which involve the Republic of Indonesia as one of the parties to the dispute, may only be enforced after obtaining an exequatur from the Supreme Court of the Republic of Indonesia, which will then delegate it to the Central Jakarta District Court. […]

(b) Provisions to the Effect that an International Commercial Settlement Agreement Be Treated as a Final Award Rendered by an Arbitral Tribunal

The Arbitration Law does not allow for appeal of any arbitration award. This is clear from the provision of Article 60 which stipulates that arbitration awards shall be final and binding.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

There are several grounds for refusal enforcement of an award including where both the nature of the dispute and the agreement to arbitrate do not meet the requirements set out in the Arbitration Law as follow: (a) The dispute must be commercial in nature and within the authority of the parties to settle and the arbitration clause must be contained in a signed writing; or (b) Where the award is in conflict with public morality and order (Articles 4, 5 and 6 of the Arbitration Law).

Question 3: Validity of international commercial settlement agreements

There is no provision in the Arbitration Law concerning the criteria of international commercial settlement agreements to be deemed valid.

13. Israel

[Original: English]
[Date: 5 January 2015]

Question 1: Information regarding the legislative framework

(i) Article 79C(h) of the Courts Law, 1984 (the "Law") authorizes a court to give effect to a mediated settlement agreement (a "Settlement") as a court judgement — provided that the Settlement was reached in a mediation process that complies with the Law and the Courts Regulations (Mediation), 1993 (the "Regulations") — whether the Settlement was achieved as a result of a referral by the court or in stand-alone mediation proceedings.

The Law does not preclude the use of this mechanism in respect of a Settlement of an international commercial dispute, so long as the Settlement was reached in the framework of mediation proceedings that meet the requirements of the Law and Regulations.

(ii) According to the Regulations there are two mechanisms for giving effect to a Settlement as a court judgement:

(1) According to article 9, the mediator in a mediation referred by the court must notify the court "as soon as possible" that the parties achieved a Settlement, and if the parties agree to ask the court to give effect to the Settlement as a court judgement, the mediator must attach it to his notice. The court is authorized to request clarifications on the Settlement from the parties prior to giving effect to the Settlement as a court judgement. The request to the court is contingent upon the agreement of both parties; this allows a party, for example, to prevent publication of the agreement. However, article 4 of the "model mediation agreement", which applies by default unless the parties have agreed otherwise, provides that each party undertakes to sign the settlement agreement and understands that such agreement is a contract which can be granted the status of a court judgement.

(2) According to article 10 of the Regulations, in a stand-alone mediation, the parties together or each party independently may request the Court, by way of an "expedited application", to give effect to a Settlement as a court judgement.

(iii) There is no provision referring specifically to the treatment of international commercial settlement agreements. Article 29A of the Israel Arbitration Law, 1968, provides that arbitral awards to which an international convention applies (i.e., awards governed by the New York Convention on the Recognition and Enforcement of Foreign Arbitral Awards) are to be enforced in accordance with the terms of such Convention. Accordingly, if a settlement agreement were to be given the effect of an award as part of the arbitral proceedings ("consent award"), it would likely be enforceable as an ordinary arbitral award pursuant to Article 29A.

(1) There is no provision in Israeli law dealing specifically with the matter [whether the settlement agreement can be treated as an award on agreed terms without involving the actual commencement of arbitral proceedings].

(2) Article 9(A) of the Regulations (Settlement reached within the framework of a pre-existing court case) provides that the agreement must be in writing, it must contain all relevant terms and conditions of the settlement, and it must be signed by the parties and the mediator.

With respect to an application for validation of a Settlement resulting from stand-alone mediation proceedings, article 10(B) of the Regulations requires that the facts of the dispute and the details of the agreement be described. In addition, the agreement, signed by the parties and the mediator, must be included.

(3) Courts consider awards on agreed terms enforceable under the New York Convention.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

As provided above.

Question 3: Validity of international commercial settlement agreements

The applicable criteria for the validity of an international commercial settlement agreement would presumably be the same as those that apply to contracts generally.

Additional information: According to article 5(h) of the Regulations, after the termination of the mediation, the parties may agree that the mediator be appointed as arbitrator in the dispute. In such a case, the parties can also agree to empower the mediator to issue a consent award.

14. Japan

[Original: English]
[Date: 4 November 2014]

Question 1: Information regarding the legislative framework

(i) Civil Conciliation Act (Act No. 222 of 1951, last amended by Act No. 53 of 2011) provides: "When a dispute arises over civil affairs, a party may file with a court a petition for conciliation." (Art. 2) The Act is also applicable to international commercial conciliation (Art. 3(4)). Article 16 provides: "When an agreement is reached between the parties at conciliation in court entered in a record, conciliation becomes successful, and such entry shall have the same effect as a judicial settlement." The legal effect of judicial settlements is stipulated in Art. 267 of the Code of Civil Procedure (Act No. 109 of 1996, last amended by Act No. 30 of 2012), which provides: "When a settlement or a waiver or acknowledgement of a claim is stated in a record, such statement shall have the same effect as final and binding." Art. 22 of the Civil Execution Act (Act No. 4 of 1979, last amended by Act No. 96 of 2013) provides: "Compulsory execution shall be carried out based on any of the following […] (i) A final and binding judgment".

Regarding international commercial settlement agreements other than those reached at conciliation in court, see (iii) below.

(ii) There is no procedure for expedited enforcement of international commercial settlement agreements.

(iii) 1. The Code of Civil Procedure provides: "With regard to a civil dispute, a party may file a petition for settlement with the summary court that has jurisdiction over the location of the general venue of the opponent, by indicating the object and statement of claim as well as the actual circumstances of the dispute." (Art. 275(1)) The legal effect of such settlements is also governed by Art. 267 of the Code of Civil Procedure. The settlement prior to filing of action is used when the disputing parties have agreed to a settlement before coming to the court, which ascertains the validity of the settlement.

2. The settlement needs to be made in writing (Art. 275(1), Code of Civil Procedure). The disputing parties must appear before the summary court (Art. 275(3), idem.).

3. Arbitration Act (Act No. 138 of 2003, last amended by Act No. 147 of 2004) provides: "An arbitral award (irrespective of whether or not the place of arbitration is in Japan; hereinafter the same shall apply in this Chapter) shall have the same effect as a final and binding judgement; provided, however, that a civil execution based on such arbitral award requires an execution order under the provisions of the following Article." (Art.45(1)), "A party, who intends to have a civil execution based on an arbitral award carried out, may file an application with the court for an execution order (meaning an order allowing the civil execution based on an arbitral award; the same shall apply hereinafter), by specifying the obligor as the respondent."(Art.46(1))

The Japan Commercial Arbitration Association submitted on 13 November 2014 the following complementary information on question 1 as follows:

With respect to the above subject matter, the Japan Commercial Arbitration Association (JCAA) has the International Commercial Mediation Rules effective as of January 1, 2009 (the "Rules") in which under Rule 11 of the Rules, the parties, upon arriving at a settlement agreement, may agree to appoint the mediator as an arbitrator and request him or her to make an arbitral award which incorporates with the settlement agreement. Under the present Japanese law, a mediated settlement agreement is merely an agreement between the parties and it cannot be enforceable equally as an arbitral award.

On the other hand, however, like the UNCITRAL Arbitration Model Law, under Article 38 of the Japanese Arbitration Law, if, during arbitral proceedings, the parties have reached the settlement agreement and the parties so request, the arbitral tribunal may make a ruling on agreed terms, which shall have the same effect as an arbitral award. Rule 11 of the Rules

aims to make the settlement agreement an enforceable arbitral award under Article 38 of the Arbitration Law.

In this respect, the JCAA recognizes that there is a view that if the dispute has been settled by the agreement of the parties in the mediation proceedings before the parties appoint the arbitrator, the arbitrator has no jurisdiction because there is nothing for the arbitrator to arbitrate. However, there is also a different view that even if the parties have reached the settlement in the mediation proceedings, the dispute may still exist between the parties in that if the parties request the arbitrator to make an arbitral award based on the agreed terms, the dispute has not been ultimately settled between the parties and it will be finally settled when the arbitrator renders the arbitral award.

As a matter of fact, there have been no Japanese court decisions on this issue while in practice, such a med-arb case can be found in a sufficient number of the domestic mediation cases particularly at the dispute resolution centres operated by the local bar associations in Japan. In the context of international dispute settlement, whether a mediated settlement agreement can be enforceable under the New York Convention still remains untested while the similar provision can be found in Article 14 of the Mediation Rules of the Arbitration Institute of the Stockholm Chamber of Commerce, providing that in case of settlement, the parties may, subject to the consent of the mediator, agree to appoint the mediator as an arbitrator and request him/her to confirm the settlement agreement in an arbitral award.

Under such present circumstances, in view of the benefit of the final settlement of the disputes for parties and the possibility that a mediated settlement agreement can become an enforceable arbitral award, this provision was introduced in the JCAA Rules in 2009.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

With respect to a settlement reached at conciliation in court (1)(i) above) or to a settlement prior to filing of action (1)(iii)(1) above), the court may refuse its enforcement if it finds any illegality in the enforcement procedure or if it finds that the claim pertaining to the title of obligation is absent or has disappeared.

Question 3: Validity of international commercial settlement agreements

In cases of conciliation in court, an agreement between the parties is necessary (see (1)(i) above). However, where the conciliation committee[3] finds that the agreement reached is inappropriate, it may close the case, considering that conciliation is unsuccessful (Art. 14, Civil Conciliation Act).

In cases of settlement prior to filing of action (1)(iii)(1) above), the validity of the agreement between the parties is verified by the court, as indicated above.

15. Mauritius

[Original: English]
[Date: 3 November 2014]

Question 1: Information regarding the legislative framework

(i) In Mauritius, there is no law applicable to the enforcement of international commercial settlement agreements arising out of conciliation or mediation proceedings. The closest applicable mechanism would be the Supreme Court (Mediation) Rules 2010 (hereinafter the "Mediation Rules"). The Mediation Rules cater specifically for a civil suit, action, cause or matter which has been brought and is pending before the Supreme Court and which the Chief Justice refers for mediation before a Judge of the Mediation Division of the Supreme Court. Any party to the civil action may also apply to the Chief Justice for the matter to be referred to mediation.

[3] Upon application, the court conducts conciliation by a conciliation committee (Art. 5(1), Civil Conciliation Act). A conciliation committee shall be composed of a chief conciliator and two or more civil conciliation commissioners (Art. 6).

Under the Mediation Rules, where the parties have reached a formal agreement, the mediation judge records the settlement agreement in the form of a memorandum setting out the terms of the agreements. The agreement which is embodied in the memorandum is thereafter executed in the same manner as if it were a judgement of the court of Mauritius by consent of and between the parties who have signed it.

(ii) No procedure for expedited enforcement of international commercial settlement agreement is available in Mauritius.

(iii) There are no legal provisions to the effect that an international commercial settlement agreement be treated in Mauritius as a final award rendered by an arbitral tribunal.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

As set out in paragraph l(i) above, there is no legislative framework in Mauritius for the enforcement of international commercial settlement agreements arising out of mediation proceedings.

A commercial settlement agreement arising out of mediation proceedings in Mauritius is given the full force and effect of a judgement of the Supreme Court.

Question 3: Validity of international commercial settlement agreements

Please refer to responses above.

Strictly speaking, as stated above, there is no specific law in Mauritius governing the enforcement of international commercial settlement agreements arising out of mediation/conciliation proceedings.

However, there is nothing, in an appropriate case, to prevent a party from challenging the validity of an agreement to refer a dispute to mediation/conciliation or the validity of the resulting mediated/conciliated settlement agreement, where that party claims that the agreement has been entered into by mistake or has been procured by misrepresentation, duress or undue influence (Article 1109 of the Mauritius Civil Code).

16. Norway

[Original: English]
[Date: 5 October 2014]

Question 1: Information regarding the legislative framework

According to section 4-1 of the Enforcement Act and section 19-16 of the Civil Procedure Act, a foreign settlement agreement may be recognized and enforced only if it can be considered as a decision rendered by a foreign court or as a foreign arbitral award. Of particular importance for the former is the 2007 Lugano Convention, and for the latter the 1958 New York Convention.

The legislation of the country of origin would be of importance to determine whether the foreign settlement may be considered as a court decision or as an arbitral award from that country.

In domestic Norwegian legislation (sections 8-3ff. of the Civil Procedure Act), a settlement may be considered as a court decision if it was reached in the framework of court mediation. Court mediation is offered to all parties who initiated a civil law suit, and requests the consent of both parties to be carried out. It can be carried out by a judge of the competent court or by a mediator appointed by the competent judge. If the court mediation results in a settlement agreement, this will have the status and effect as a court judgement. Settlement agreements deriving from out-of-court mediation proceedings do not have the status or effect as a court decision.

In domestic Norwegian legislation (section 35 of the Arbitration Act) a settlement may be considered as an arbitral award if the parties reached a settlement during an arbitration proceeding, asked the arbitral tribunal to record the settlement in an award and the arbitral tribunal rendered an award based on the settlement agreement.

17. Republic of the Congo

[Original: French]
[Date: 22 October 2014]

Question 1: Information regarding the legislative framework

In the Republic of the Congo, there is no specific legislative framework laying down rules for enforcing international commercial settlement agreements resulting from mediation/conciliation proceedings.

(i) Concerning difficulties arising from the enforcement of commercial settlement agreements, no distinction is made between those arising from domestic agreements and those from international agreements. These issues are brought before the commercial courts and commercial divisions of the national courts of appeal. As the Congo is a member of the Organization for the Harmonization of Business Law in Africa (OHADA), appeals in commercial disputes are brought before the Common Court of Justice and Arbitration (CCJA) of the OHADA, based in Abidjan, Republic of Côte d'Ivoire. Under the founding Treaty and the uniform acts of the OHADA, specific procedures are implemented for the settlement of disputes arising from the enforcement of commercial settlement agreements in general.

(ii) With regard to procedures for the expedited enforcement of international commercial settlement agreements, it should be noted that the Congo has recourse to the Uniform Act on Simplified Recovery Procedures of the OHADA, which was adopted on 10 April 1998 (OHADA Official Journal No. 6 of 1 July 1998).

(iii) In Congolese positive law, an international commercial settlement agreement is treated as a final award rendered by an arbitral tribunal solely between the parties by virtue of the principle of *pacta sunt servanda* (contracts entered into serve as law for the parties).

1. Recognition of a private settlement agreement as an award rendered by an arbitral tribunal may ensue only from a specific arbitral proceeding ending in an award separate from the settlement agreement, and furthermore the parties must previously have included in their international commercial settlement agreement an arbitration clause or must agree to settle their dispute by arbitration.

2. In Congolese positive law as it stands, a written document remains the supreme form of proof of commitments made by parties in commercial settlement agreements, all the more so in international agreements. The process of recognizing a commitment signed by one of the parties to an agreement begins with authentication of the signature of the counterparty to whom the undertaking is imputed. That is the principal task of the ombudsman institution or arbitrator/conciliator.

3. With regard to third parties, awards on agreed terms are enforceable only on the basis of a decision of the competent court authorizing the affixation of the enforcement order at the conclusion of an approval process. This is because the Congo is not a party to the New York Convention on the Recognition and Enforcement of Foreign Arbitral Awards (1958).

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

There are no specific grounds for refusing enforcement of a commercial settlement agreement in the Congo except for non-compliance with the legal provisions in force as defined in paragraphs (iii)(1) and (iii)(2) above. With that sole proviso, an international commercial settlement agreement may be enforced in Congolese territory only on the initiative of the parties concerned, who must seek approval of the agreement before the competent court of the place of enforcement.

Question 3: Validity of international commercial settlement agreements

In addition to the standard conditions of validity of agreements (capacity of the parties, mutual consent, and lawfulness of the object and the cause), the Congo does not impose specific conditions that do not reflect the will of the parties themselves.

Question 4: Any other comment

International commercial trade has always been the basis of human solidarity and interdependence. It follows that international society is not the result of coexistence and the proximity of States but of the intermingling of peoples through international commerce. The Congolese authorities conclude that it would be senseless not to support the harmonization of global trade standards. That is why the process of expedited ratification of a number of UNCITRAL instruments is under way.

18. Republic of Korea

[Original: English]
[Date: 4 December 2014]

Question 1: Information regarding the legislative framework

A. Under Article 731 of the Civil Act of Korea, a compromise shall become effective when the parties have agreed to terminate a dispute between them by mutual concessions. Also under Article 732, a contract of compromise shall have the effect that the rights conceded by one of the parties are thereby extinguished and the other party will in turn acquire the pertinent rights by virtue of the compromise.

Where the compromise was worked out through private mediation or conciliation (as opposed to court-annexed conciliation), however, if the terms of the contractual agreement is not fulfilled, the offended party has no recourse but to take a legal action or resort to binding arbitration for compulsory execution/enforcement of the agreed terms.

Compulsory execution of the settlement terms may be commenced only when the names of an applicant therefor, and of the person subject to such execution have been indicated in the execution titles with an execution clause attached thereto (Article 39, Paragraph 1, of the Civil Execution Act).

- An execution title refers to a notarial act which indicates the existence and scope of the right to claim performance in private law and recognizes the legal enforceability of the claimed right.
- Primarily, judicial judgement or comparable court decisions have effect as execution titles, but certified notarial acts done by a notary public or a law firm, etc., in compliance with the entrustment of the parties, can become execution titles as well.
- The executor, contents and scope of enforcement is determined according to the execution titles.
- The execution titles must have an execution clause which is a clause that a court official performing his/her notarial functions ex officio, adds at the end of execution titles in order to notarize the executory power of the execution titles and the relevant parties thereto (Article 29, Paragraphs 1 and 2, of the Civil Execution Act).

An execution clause is granted upon an application for compulsory enforcement, and a creditor shall attach and submit such execution clause when he/she applies for compulsory execution by an executing institution (the court of execution or an execution officer).

There is no specific enforcement procedures, no procedure for expedited enforcement of international commercial settlement agreement and no provision to the effect that an international commercial settlement agreement be treated as a final award rendered by an arbitral tribunal.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

Because a commercial settlement agreement is treated like any other agreement between private parties, to have such commercial settlement agreement enforced, the applying party needs to acquire execution titles with an execution clause attached thereto. Enforcement of a commercial settlement agreement will be refused in absence of execution titles.

Question 3: Validity of international commercial settlement agreements

There are no specific criteria for validity that only apply to international commercial settlement agreements. Nothing that specifically applies only to mediation/ conciliation.

19. Singapore

[Original: English]
[Date: 27 October 2014]

Question 1: Information regarding the legislative framework

There is presently no legislation in Singapore that addresses international commercial mediation. Enforcement of international commercial settlement agreements is governed by the usual common law principles of contract.

However, the proposed introduction of a Mediation Act is presently in the works, which contemplates provisions allowing parties to additionally enforce certain mediated settlement agreements as orders of court. The details are still being worked through.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

Commercial settlement agreements can be reviewed and invalidated at common law, under the usual contractual principles, if there are vitiating factors that render the agreement or part of it, either void or voidable, or which allow the court to order the rescission of the agreement. Such vitiating factors include the incapacity of one or more parties to the agreement, misrepresentation, mistake, duress and undue influence.

Question 3: Validity of international commercial settlement agreements

Please see the answer to question 2 above. A commercial settlement agreement may be deemed void if there are vitiating factors rendering it invalid.

There is no legislative basis governing the validity or enforcement of an agreement to mediate. The validity of an agreement to mediate and any resulting settlement agreement will be determined according to general contractual principles. Thus, for example, a mediation clause may be struck down for want of certainty.[4] Nonetheless, the Singapore courts are supportive of the mediation process, and generally will not refuse to enforce express dispute resolution clauses requiring private mediation where the nature of the exercise and the extent of parties' obligations are clear.[5]

Question 4: Any other comment

Singapore is generally supportive of mediation/conciliation processes, and the enhanced enforceability of international mediated/conciliated settlement agreements will be useful for mediation users. That said, it would be useful to hear more about what the proposers have in mind for such a multilateral convention on the enforceability of international commercial settlement agreements reached through mediation, bearing in mind that the implementation details of such a convention will have to be carefully worked out, taking into account different approaches across jurisdictions.

[4] See e.g. *Insigma Technology Co Ltd v Alstom Technology Ltd* [2009] 1 SLR(R) 23, where a clause requiring a dispute to be referred to parties for "settlement through friendly consultations" was held to be too uncertain to be enforceable.

[5] See e.g. *International Research Corp PLC v Lufthansa Systems Asia Pacific Pte Ltd and another* [2013] 1 SLR 973, citing the Court of Appeal's comments in *HSBC Institutional Trust Services (Singapore) Ltd v Toshin Development Singapore Pte Ltd* [2012] 4 SLR 738, to note that Asian and Western perspectives on negotiation and mediation dispute resolution clauses differed, and in considering the enforceability of such clauses, "clearly, it is in the wider public interest in Singapore as well to promote such an approach towards resolving differences".

20. Slovakia

[Original: English]
[Date: 3 November 2014]

Question 1: Information regarding the legislative framework

(i) Agreements resulting from mediation as agreements on the successful resolution of the dispute through mediation are enforceable if these are drafted in the form of enforceable notarial act with the consent of the parties to the dispute with the execution or if agreements on mediation as a settlement are approved by a general court or arbitration body — the Court of Arbitration.

(ii) Relatively flexible enforcement procedure of international settlement agreements is governed by Act. No. 244/2002 Coll. Arbitration Act, as amended (the "ZRK"), which allows enforceability of the settlement agreement in case the agreement was approved by the arbitration body under the rules of arbitration and on this basis becomes immediately enforceable. In this connection we also pay attention to amendment of the Arbitration Act (parliamentary papers no. 1126), that significantly makes arbitration flexible, with reference to former changes of the UNCITRAL rules.

(iii) A settlement agreement resulting from arbitration is according to ZRK regulated in Art. 39, which provides: "(1) Where the parties to arbitration partway conclude a settlement, the arbitration court stops arbitration. At the request of the parties to arbitration, the tribunal records the settlement in the form of a closed arbitration award on agreed terms. "(2) […] The arbitral award on agreed terms shall have the same effect as an arbitration award on the merits."

In any case, the settlement agreement cannot be approved by the arbitration body without the beginning of the arbitration procedure.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

(1) Slovak law recognizes, in principle, two cases of settlement agreements as enforcement orders which must meet the following conditions:

(a) In the case of a settlement agreement approved by the arbitration body — the essentials of the arbitration award on agreed terms, which are the same as in case of the final arbitration award;

(b) In the case of a settlement agreement approved by a general court — the essentials of resolution of the approval of court settlement under the provisions of Act no. 99/1963 Coll. Code of Civil Procedure, as amended;

(c) In the case of a settlement agreement, respectively mediation agreement drawn up in form of a notarial act — the requirements under Art. 41, paragraph 2, of Act no. 233/1995 Coll. on Judicial Distrainers and Execution proceedings (Execution Code).

In all three cases, the written form agreed by the parties to the dispute must be preserved and the agreement shall be approved by competent national authorities.

Courts consider awards on agreed terms enforceable under the New York Convention.

(2) The refusal of settlement agreement's enforcement may be invoked in the execution proceedings, e.g. the person can bring the action for annulment of an arbitration award, for the annulment of the court settlement (within three years of its approval), for annulment of mediation agreement drawn up in a form of notarial act. If the effects of the settlement agreement will be revoked, or if the conflict with the substantive law will affect the enforceability of the execution title, it will lead to discontinuance of execution.

(3) In accordance with the classification set out in paragraph (1) Slovak law recognizes the following remedies: (a) an action for annulment of an arbitration award, (b) an action for annulment of the court settlement, (c) the application for annulment of legal action drawn up in the form of a notarial act.

21. Sweden

[Original: English]
[Date: 3 March 2015]

Question 1: Information regarding the legislative framework

(i) Under the Swedish Act (2011:860) on mediation in civil and commercial matters an agreement resulting from mediation can be rendered enforceable. An application for declaration on enforceability shall be submitted to a District Court. The local jurisdiction is primarily decided by the place of domicile of any of the parties. The Swedish legislation implements Directive 2008/52/EC of the European Parliament and of the Council of 21 May 2008 on certain aspects of mediation in civil and commercial matters.

(ii) There is no particular procedure for expedited enforcement of international commercial agreements.

(iii) There is no provision in Swedish law to the effect that an international commercial settlement agreement be treated as a final award rendered by an arbitral tribunal.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

A precondition under the Mediation Act is that the agreement resulting from mediation concerns an obligation that is enforceable in Sweden.

There are also objections to enforcement that can be made during the enforcement stage (that is after a declaration of enforceability has been rendered by the court). Pursuant to the Swedish Enforcement Code (1981:774) enforcement may not take place if the defendant shows that he or she has satisfied an obligation to pay or other obligation to which the application concerning enforcement relates. This also applies if the defendant as a set-off refers to a claim, which has been confirmed by an enforcement title that may be enforced or which is based on a promissory note or other written evidence of debt, and the general preconditions for set-off exist. Nor may enforcement take place if the defendant claims that another circumstance involving the relationship of the parties constitutes an impediment to enforcement and if the objection cannot be ignored.

Question 3: Validity of international commercial settlement agreements

See reply to question 2.

22. Thailand

[Original: English]
[Date:17 November 2014]

Question 1: Information regarding the legislative framework

Under the Thai judicial system, conciliation and/or mediation proceedings are based on the consent of parties to the dispute. Thailand has no legal requirements for the parties to the dispute to resort to these types of alternative dispute resolution. In addition, there are no specific laws (*lex specialis*) on the enforcement of international commercial settlement agreements ("settlement agreements") arising out of mediation and/or conciliation proceedings.

(i) The Thai legislation has no specific provisions on enforcement of, or enforcement procedure for, the settlement agreement arising out of mediation or conciliation proceedings.

However, the settlement agreements are considered contracts of compromise under the Thai Civil and Commercial Code, Title XVII (Compromise), Sections 850-852. Such contract of compromise can be enforced by a court decision if it is in writing and signed by the party held liable in that particular case or by his/her agent.

Incidentally, the Act on Conflict of Laws of B.E. 2481 (A.D. 1938), Section 13 will apply in case where there is a question as to which law is applicable to the settlement agreements

that are international in nature, i.e. concluded by the disputing parties having different nationalities or residing in different countries.

(ii) Under the Thai laws, there are no specific provisions on procedure for expedited enforcement of the settlement agreement. In this connection, the period of limitation for such settlement agreements is ten years, as stipulated in the Thai Civil and Commercial Code, Title VI, Prescription, Chapter II (Period of Limitation), Section 193/30. Thus, if a disputing party fails to fulfil his/her obligations under the settlement agreement, the other party can file an application to the competent court to enforce such agreement within ten years from the date of the conclusion of the agreement.

(iii) The Thai legislation has no provision treating the settlement agreement arising out of mediation and/or conciliation proceedings as a final award rendered by an arbitral tribunal. Such settlement agreement can be enforced under the relevant provisions regarding a contract of compromise, as mentioned above.

However, the parties may give the effect to the settlement agreement by mutually agreeing to submit the dispute to an arbitral tribunal with a request to settle the dispute in accordance with the settlement agreement. As a consequence, the settlement agreement shall enjoy the same status and effect as a final award by an arbitral tribunal in accordance with the Arbitration Act of B.E. 2545 (A.D. 2002), Section 36. The award must be made in accordance with Section 37, and like other final awards rendered by an arbitral tribunal, can be enforced within three years from the date that the award is enforceable in accordance with Section 42 of the Arbitration Act.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

The settlement agreements which fulfils the conditions of a contract under Thailand's Civil and Commercial Code shall bind the disputing parties and can be enforced under the law of compromise, as mentioned above.

Consequently, the grounds for refusing enforcement of a settlement agreement are based on the same grounds for refusing enforcement of a contract that is void or voidable under the laws due to, inter alia, the lack of legal capacity, fraud, prohibition by laws or contrary to the public order and good morals.

Question 3: Validity of international commercial settlement agreements

The validity of those settlement agreements and legal bases for challenging their validity are the same as those for a contract and a contract of compromise under Thailand's Civil and Commercial Code, as explained in (1) and (2) above.

23. Turkey

[Original: English]
[Date: 7 January 2015]

Question 1: Information regarding the legislative framework

There is no legislation concerning the reconciliation/mediation actions emerging from the execution of international commercial reconciliation agreements. Therefore, no answer is available for the questions set forth in the paragraphs (i), (ii) and (iii). Our country has got legislation regarding the recognition and enforcement of foreign arbitral awards and court decisions. Foreign arbitral decisions may be executed according to the New York Convention of 1958. If a country is not a party to the said Convention, then an arbitral decision rendered in that country may be implemented according to the International Private and Procedural Law. Likewise, the enforcement of foreign court decisions shall be done according to the relevant provisions of that International Private and Procedural Law.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

There is no regulation related to rejection of execution, because there is no legislation concerning the reconciliation/mediation actions emerging from the execution of international commercial reconciliation agreements. Liabilities of enforcement are regulated

by the New York Convention and International Private and Procedural Law. As it was stated above, validity criteria are not in place, because no legal legislation exists regarding the international commercial reconciliation agreements. There is no legal regulation concerning the nature of an agreement rendered through mediation agency of a foreign State. Thus, it is considered to be a convention concluded between the parties. Inconsistency with this convention shall be another matter of dispute. Information on the current Law concerning mediation is as follows. Our country adopted the Law on Mediation in Civil Disputes No. 6325 in 2012. This law is applied only for the settlement of private law disputes emerging from cases or actions that the parties can freely dispose, including the ones that have the nature of foreignness.

Article 18 of the Law on Mediation in Civil Disputes No. 6325 states that: (1) The scope of the agreement reached as the result of the mediation activity shall be determined by the parties; in case of preparation of an agreement document, this document shall be signed by the parties and the mediator. (2) Should the parties reach an agreement at the end of the mediation process, they may submit such agreement to an enforcement court — whose authority is to be determined according to the rules of authority concerning the actual dispute — and may demand for the issuance of a commentary regarding its enforceability. The agreement containing such commentary shall be considered as a document with the force of a verdict.

Question 3: Validity of international commercial settlement agreements

The issuance of the commentary of enforceability is an undisputed judgement affair, and the examination concerning this is carried out on the file. However the examination concerning family law disputes suitable for mediation shall hold by oral hearing. The scope of such examination is limited to whether the content of the agreement is suitable for mediation and compulsory enforcement. In case that an application is made to the court for the issuance of commentary of enforceability for the agreement document, and in case that the concerned party appeals decisions given upon such application, the fixed fees shall be collected. Should the parties wish to use the agreement document in another official transaction without obtaining a commentary of enforceability, then fixed stamp duty shall also be collected. Therefore, if the parties fulfil their responsibilities in a dispute settled by mediation, including the ones having the nature of foreignness, they shall not encounter a lawsuit in terms of enforceability. If one of the parties does not fulfil its responsibilities, the other party has the right to bring the mediation agreement to the authorized court and get endorsement of enforceability, except disputes of family law, without any hearing. Such a mediation agreement containing endorsement of enforceability is considered to be a document in the capacity of a writ. This agreement text is considered to be enforceable in the framework of general provisions of Execution and Bankruptcy Law No. 2004.

24. United States of America

[Original: English]
[Date: 30 October 2014]

Question 1: Information regarding the legislative framework

(1)(i) through (1)(iii)(2): In the United States, settlement agreements (whether or not reached through conciliation) would generally be enforceable as contracts under existing state law. See, e.g., Snyder-Falkinham v. Stockburger, 457 S.E. 2d 36, 39 (Va. 1995); 15B Am. Jur.2d Compromise & Settlement §10 (2014). At least one U.S. state imposes additional requirements on the content of settlement agreements in the context of mediation, see Minn. Stat. §572.35, while another provides that settlements can be enforceable as court orders if they are presented to and approved by a court, see Colo. Rev. Stat. §13-22-308.

However, at least five states — California, Texas, Ohio, North Carolina, and Oregon — have regimes in place that provide special treatment for settlement agreements resulting from conciliation in international, commercial disputes. For these regimes to apply, either the conciliation agreement or the underlying transaction must be "international," see Cal. Civ. Pro. §1297.13; Tex. Civ. Prac. & Rem. Code §172.003; Ohio Rev. Code §2712.03; N.C. Gen. Stat. §1-567.31; Or. Rev. State. §36.454, as well as "commercial," see Cal. Civ. Pro.

§1297.16; Tex. Civ. Prac. & Rem. Code §172.004; Ohio Rev. Code §2712.04; N.C. Gen. Stat. §1-567.31; Or. Rev. State. Ann. §36.450. If an agreement settling such a dispute is in writing signed by the parties (or their representatives) and the conciliator, the agreement will be given the same effect as an arbitral award. Cal. Civ. Pro. §1297.401; Tex. Civ. Prac. & Rem. Code §172.211; Ohio Rev. Code §2712.87; N.C. Gen. Stat. §1-567.84; Or. Rev. State. §36.546. No arbitral proceedings need to have taken place for these regimes to apply.

(1)(iii)(3): U.S. courts have not resolved the issue of whether an arbitral award on agreed terms would be deemed eligible for enforcement under the New York Convention.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

(2) through (3): With respect to the special regimes that five states have in place for international commercial settlement agreements, the case law applying these statutory schemes does not appear to resolve whether the grounds for refusing enforcement are identical to those available for arbitral awards. Otherwise, as noted above, settlement agreements are generally governed by contract law in the United States; thus, the defences generally available under contract law would apply (e.g., duress and incapacity). Similarly, agreements to mediate may also be enforceable under contract law. See, e.g., Santana v. Olguin, 41 Kan. App. 2d 1086, 208 P.3d 328 (2009).

Question 3: Validity of international commercial settlement agreements

See question 2 above.

Question 4: Any other comment

See document A/CN.9/WG.II/WP.188.

(A/CN.9/846/Add.2) (Original: Chinese/English/Spanish)

Note by the Secretariat on settlement of commercial disputes: enforcement of settlement agreements resulting from international commercial conciliation/mediation: compilation of comments by Governments

ADDENDUM

Contents

III. Compilation of comments

25. Australia

[Original: English]
[Date: 13 April 2015]

Question 1: Information regarding the legislative framework

There is no statutory basis for the enforcement of international commercial settlement agreements out of mediation in Australian legislation. Further, there are no provisions regarding the enforcement of mediation settlement agreements (or mediation at all) in the International Arbitration Act 1973 (Cth) or in the Civil Dispute Resolution Act 2011 (Cth), which imposes requirements for litigants to take genuine steps to resolve disputes before initiating court proceedings.

(i) There are no provisions in Australian legislation that specifically govern the enforcement of international or domestic mediation settlement agreements. Common law principles apply to the enforcement of domestic settlement agreements, in two specific scenarios:

A. Where the parties have not yet initiated court proceedings, the mediated outcome is classified as a contract. Therefore, in ascertaining the validity of the mediation settlement agreement, the court will apply the ordinary principles of contract law.

These require that the agreement results from an intention to create legal relations, that the document contains the terms of the agreement and that the agreement involves consideration, or is in the form of a deed.[6] Consequently, the remedies available to the creditor, if the other party does not fulfil its obligations under the settlement agreement are the same remedies available as to any contractor. The creditor can commence a legal proceeding alleging breach of contract and ask for specific performance or other available remedies. In order to enforce the settlement agreement, a court must hold a hearing where the onus is on the creditor to prove the

[6] J Hambrook, C Wappett and B Whittaker, Australian Encyclopaedia of Forms and Precedents, Lexis Nexis (online, accessible here: www.lexisnexis.com/au/legal/docview/getDocForCuiReq?lni=4DMK-W3X0-TWN4-60HD&csi=267952&oc=00240&perma=true) at [30-225].

existence of the agreement and its validity. Therefore, the court has to consider the merit of the dispute mediated, and not just the enforcement of the solution that has been reached in the mediation process.[7]

B. Where the parties choose to mediate after court proceedings have been initiated, theoretically the mediated outcome will be decided by the court as a consensual judgement or settlement, or as it is expressed in many Australian laws as a "consent order".[8] Therefore, any subsequent proceedings relating to the order before the court will be enforcement proceedings.[9]

In practice, however, where proceedings have been commenced and parties negotiate/mediate a settlement, they will typically enter into a contract (by agreement or deed) whereby: (a) monetary compensation (or some other remedy) will be agreed upon; (b) releases (either unilateral or mutual) will be given; (c) the parties will agree to the steps to be taken to finalize the proceedings (whether by discontinuance, dismissal or entry of judgement).

The parties to the dispute/litigation are then in a situation where they can, if necessary: (a) bring proceedings against each other for breach of the settlement agreement; (b) have consent orders set aside and continue the litigation.

The industry practice of ADR practitioners may be a relevant factor in determining whether there was an intention for the agreement to be binding. The courts are more likely to presume that an agreement made between parties involved in a commercial dispute was created with an intention to create legal relations.[10]

(ii) There are no procedures for expedited enforcement of international commercial settlement agreements.

(iii) There are no provisions to the effect that an international commercial settlement agreement be treated as a final award rendered by an arbitral tribunal.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

This issue only arises if the settlement agreement was reached before court proceedings were initiated (in which case the agreement is classified as a contract, criteria for validity see above 1A).

Question 3: Validity of international commercial settlement agreements

See above 1A and B.

With regard to the validity of an agreement to refer a dispute to mediation/conciliation:[11]

There is no legislative basis for the enforcement of an agreement to mediate. Under the common law,[12] there is a list of minimum requirements for a mediation clause to be enforceable:

- The mediation clause must be in a form that operates to make mediation a condition precedent to litigation (rather than a replacement of litigation);
- The clause must be sufficiently certain. If agreement is subsequently needed on some other aspect of the process before mediation can proceed then, should the parties fail to reach agreement, the mediation clause will only amount to an agreement to agree and will not be enforceable.

---

[7] *EL SIDDIK Abbas*, Enforceability of the mediation outcome, in: eLaw Journal: Murdoch University Electronic Journal of Law (2010) 17(2), p. 17 f.

[8] See for example Federal Court Rules 2011 (Cth) — Rule 28.25; Civil Procedure Act 2005 (NSW) — Sect 29 (1); Supreme Court Act 1935 (SA) — Sect 65 (7).

[9] *EL SIDDIK Abbas*, Enforceability of the mediation outcome, in: eLaw Journal: Murdoch University Electronic Journal of Law (2010) 17(2), p. 18 f.

[10] Hambrook, above n 1.

[11] See also Hambrook above n 1.

[12] Aiton Australia Pty Ltd v Transfield Pty Ltd (1999) 153 FLR 236.

- The mediation clause should set out the rules for selecting a mediator and determining the mediator's remuneration. The clause should also specify a mechanism for a third party to select the mediator where the parties cannot reach agreement.
- The clause should also set out in detail the mediation procedure to be followed or incorporate these rules by reference to the rules of a particular institution. These rules will also need to state with particularity the mediation model that will be used.

With regard to the validity of a mediated/conciliated settlement agreement arising from an agreement to refer a dispute to mediation/conciliation:

It was held in the New South Wales Supreme Court that dispute resolution clauses, in the correct form, merely postpone a party's right to commence proceedings, and therefore generally do not offend the rule against ousting the jurisdiction of the court.[13] By extension, a mediated or conciliated agreement arising from an agreement to refer a dispute to mediation/conciliation is enforceable at common law.

Question 4: Any other comment

While Australia lacks a statutory regime for the enforcement of mediated settlements, the flexibility of the common law allows parties to tailor their dispute resolution process to their individual needs. We question whether a Convention will be useful in light of the aim of mediation to be a more flexible and informal method of dispute resolution.

There may also be some practical barriers to implementing a New York Convention style of enforcement for mediation in Australia, given that there must be a clear constitutional basis for parliament to implement this treaty and the obligations under the Convention must not impose non-judicial functions on the courts.

However, establishing an international framework for the enforcement of settlement agreements may go toward increasing the popularity and utility of a mediation and conciliation.

26. China

[Original: English/Chinese]
[Date: 10 April 2015]

I. The basis of legislative framework for cross-border enforcement of foreign settlement agreements in three cases

1. Arbitration procedure

Article 283: If an award made by a foreign arbitral organ requires the recognition and enforcement by a people's court of the People's Republic of China, the party concerned shall directly apply to the intermediate people's court of the place where the party subjected to enforcement has his domicile or where his property is located. The people's court shall deal with the matter in accordance with the international treaties concluded or acceded to by the People's Republic of China or with the principle of reciprocity.

2. Judicial procedure

Article 281: If a legally effective judgement or written order made by a foreign court requires recognition and enforcement by a people's court of the People's Republic of China, the party concerned may directly apply for recognition and enforcement to the intermediate people's court of the People's Republic of China which has jurisdiction. The foreign court may also, in accordance with the provisions of the international treaties concluded or acceded to by that foreign country and the People's Republic of

[13] *Aiton*, above n 7.

China or with the principle of reciprocity, request recognition and enforcement by a people's court.

3. Currently, there is no legislative framework providing for cross-border enforcement of settlement agreement reached only by the parties abroad.

II. The confirmed procedures of Chinese law on settlement agreements reached in domestic proceedings

1. Judicial procedure

Civil Procedure Law of the People's Republic of China

Article 93: In the trial of civil cases, the people's court shall distinguish between right and wrong on the basis of the facts being clear and conduct conciliation between the parties on a voluntary basis.

Article 97: When a settlement agreement through conciliation is reached, the people's court shall draw up a conciliation statement. The conciliation statement shall clearly set forth the claims, the facts of the case, and the result of the conciliation.

The conciliation statement shall be signed by the judges and the court clerk, sealed by the people's court, and served on both parties.

Once it is signed for receipt by the two parties concerned, the conciliation statement shall become legally effective.

2. Arbitration procedure

Arbitration Law of the People's Republic of China

Article 51: The arbitration tribunal may carry out conciliation prior to giving an arbitration award. The arbitration tribunal shall conduct conciliation if both parties voluntarily seek conciliation. If conciliation is unsuccessful, an arbitration award shall be made promptly.

If conciliation leads to a settlement agreement, the arbitration tribunal shall make a written conciliation statement or make an arbitration award in accordance with the result of the settlement agreement. A written conciliation statement and an arbitration award shall have equal legal effect.

Article 52: A written conciliation statement shall specify the arbitration claim and the results of the settlement agreed upon between the parties. The written conciliation statement shall be signed by the arbitrators, sealed by the arbitration commission, and then served on both parties.

The written conciliation statement shall become legally effective immediately after both parties have signed for receipt thereof.

If the written conciliation statement is repudiated by a party before he signs for receipt thereof, the arbitration tribunal shall promptly make an arbitration award.

III. The situations that Chinese court does not confirm the domestic commercial settlement agreements

In 2011 Supreme People's Court — "The certain Provisions on the judicial confirmation process of people's mediation agreement"

Article 7: In one of the following circumstances, the court shall refuse to enforce a commercial settlement agreement:

(1) In violation of the provisions of laws, administrative regulations and mandatory;

(2) Infringe on the interests of the state, social and public interests;

(3) Against the legitimate rights and interests of the third parties;

(4) Damage to public order and good morals;

(5) The content is not clear, can not be confirmed;

(6) Another situation that is not a judicial confirmation.

27. Georgia

[Original: English]
[Date: 14 April 2015]

Question 1: Information regarding the legislative framework

In Georgia, there exists no special enforcement regime for those international commercial settlement agreements that are concluded as a result of mediation/conciliation proceedings. Therefore, there is no procedure for expedited enforcement of such agreements either. All settlement agreements are treated as ordinary agreements between the parties. Georgian arbitration law, however, provides a possibility for a settlement agreement concluded by the parties to arbitration proceedings to be adopted as an award by the arbitral tribunal. Georgia has implemented the UNCITRAL Model Law on International Commercial Arbitration in its arbitration legislation and according to Article 38(1) of the Law of Georgia "on Arbitration", "if requested by the parties, the arbitral tribunal has a right to approve the settlement of the parties in accordance with the agreed terms by way of rendering an arbitral award." It can be seen from the wording that these agreements are not automatically approved through arbitral awards. The tribunal has a right to refuse to record the parties' settlement in the form of an arbitral award and, in that case, the agreement will operate just like an ordinary contract between the parties.

According to Article 38(3), "an arbitral award on settlement shall be rendered in accordance with the provisions of Article 39 of th[e] Law." Article 39 sets the requirements for an arbitral award. However, there is no provision in Georgian legislation that would stipulate any specific conditions for the settlement agreement subject to the adoption in the form of the award.

As Article 38(3) indicates, an arbitral award on agreed terms "has the same legal force as any other arbitral award rendered as a result of examination of the merits of the case." Hence, such arbitral awards will fall under the recognition and enforcement regime of the New York Convention on the Recognition and Enforcement of Arbitral Awards (1958).

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

As noted above, a special regime for the enforcement of international commercial settlement agreements does not exist in Georgia. Every commercial settlement agreement is treated as a regular contract and its fulfilment is a matter of contract law, regulated by the Civil Code of Georgia. In case of those settlement agreements which are approved through the arbitral awards, the New York Convention applies mutatis mutandis, due to the reason that those settlement agreements become awards and fall under the recognition and enforcement regime of the arbitral awards.

Question 3: Validity of international commercial settlement agreements

There are no different or additional criteria that international commercial settlement agreements need to meet. Criteria for the validity of commercial agreements, regardless of their subject matter, are stipulated in the Civil Code of Georgia.

28. Paraguay

[Original: Spanish]
[Date: 30 March 2015]

Question 1: Information regarding the legislative framework

The Paraguayan legal system recognizes the enforcement of foreign judgements, arbitral awards and judicial decisions, but not international commercial settlement agreements, whether arising out of negotiations or mediation/conciliation proceedings, that have not been judicially approved.

Rules are prioritized simply according to the hierarchy that exists within the legal system, with the aim of ensuring that they are correctly applied. Kelsen outlined his theory in a pyramid, in which each higher rule is the basis of the validity of the lower rule. Thus, it is stated in our National Constitution — the Basic Law of the Republic — at article 137 on the Supremacy of the Constitution: "The supreme law of the Republic is the Constitution. The Constitution, the approved and ratified international treaties, conventions and agreements, the laws adopted by Congress and other lower-ranking legal provisions constitute Paraguay's positive law in the stated order of priority." Likewise, it is stated at article 145 on the Supranational Legal Order: "The Republic of Paraguay, on an equal footing with other States, recognizes a supranational legal order which guarantees the validity of human rights, peace, justice, cooperation and development in the political, economic, social and cultural fields." […]

International commercial settlement agreements arising out of non-judicially approved mediation or conciliation proceedings would be treated as private agreements between parties, which should be submitted to a court for judicial approval, as is the case with all commercial settlement agreements arising out of mediation proceedings whether conducted at a private mediation centre or by the Judiciary's Mediation Directorate.

(i) The Montevideo Treaties of 1888 and 1940 respectively establish the aforementioned requirements […]. Where no treaty exists, procedures are governed by article 532 of the Civil Procedure Code. Similarly, agreements that are not judicially approved in the country where they were drafted may not be enforced, unless judicial approval is sought before our courts.

(ii) The Paraguayan legal system does not provide for procedures for the expedited enforcement of international commercial settlement agreements.

(iii) Act No. 1879/02 Art. 10.- Form of the arbitration agreement. The arbitration agreement shall be in writing. The agreement shall be deemed to be in writing when it is contained in a document signed by the parties or in an exchange of letters or telegrams in which said agreement is established; or in an exchange of written statements of claim and defence in which the existence of an agreement and its terms is affirmed by one party without being denied by the other. The reference in a contract to a document containing an arbitration clause constitutes an arbitration agreement provided that the contract is in writing and the reference implies that the clause forms part of the contract.

The Arbitration and Mediation Act is very clear concerning the form of the arbitral agreement or award, and, on the basis of the aforementioned, for such an agreement to be enforceable in Paraguay it must meet all the requirements of the Montevideo Treaties and Acts Nos. 889/91 and No. 1879/02. […]

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

No further conditions are required other than those established in laws for the recognition and enforcement of international commercial settlement agreements.

The Convention on the Recognition and Enforcement of Foreign Arbitral Awards was approved and ratified by Paraguay, in accordance with Act No. 948/96, article 1 of

which reads: "The Convention on the Recognition and Enforcement of Foreign Arbitral Awards, adopted in New York, United States of America, on 10 June 1958, is hereby adopted." As it is an Act, the courts are obliged to implement the provisions contained therein.

If a commercial settlement agreement was judicially approved in its place of origin, and if it complies with all the legal provisions established for its enforcement, under no circumstances may its enforcement be refused; however, if the agreement was not judicially approved in its place of origin, naturally the judge will refuse enforcement of that agreement.

Question 3: Validity of international commercial settlement agreements

The criteria indicating whether an international commercial settlement agreement is valid are those that have been established in the treaties and laws, and national judges and courts may only rule in accordance with current provisions and rules, therefore the criteria for the validity or invalidity of an agreement are established by the treaties and laws.

Question 4: Any other comment

While the terms "mediation" and "conciliation" are used interchangeably in the questionnaire, Paraguayan legislation makes a clear distinction between them. Article 53 of Arbitration and Mediation Act No. 1879/02 establishes the definition of mediation, and article 55 of that Act clearly establishes that mediation and conciliation are different from one another.

Further, article 170 of the Civil Procedure Code states that conciliation shall be conducted solely and exclusively by judges.

[Article 53.- Definition. Mediation is a voluntary mechanism aimed at conflict resolution, by which two or more persons seek for themselves an amicable settlement of their differences, with the assistance of a qualified and neutral third party known as a mediator.

Article 55.- Effects of the mediation hearing. If, prior to conducting a conciliation hearing as provided for in the procedural rules, the parties decide to resort to mediation, the written report prepared by the mediator or the Mediation Centre stating that the parties have attended at least one mediation hearing, shall have the same legal effect as the conciliation hearing provided for in the said procedural rules.

Article 170.- EFFECTS. Conciliation agreements concluded by the parties before a judge and approved by the judge shall have the authority of res judicata. They shall be prepared in the form required for judgement enforcement procedures. If the agreement is only partial, it shall be enforced in respect of the relevant part, the process continuing as and when pending claims are settled].

[Original: English]
[Date: 15 April 2015]

Question 1: Information regarding the legislative framework

(i) The conciliation/mediation agreements, with the exception of agreements concluded before the court or validated by it, are considered private agreements. With regard to agreements in the form of notary deed there is a possibility to include into it the statement of voluntary submission to enforcement — in such a case an agreement is an enforcement title under article 777, paragraph 1, points 4, 5 and 6 of the Civil Procedure Code.

(ii) The above mentioned procedure (voluntary submission to enforcement in the notary deed) can be considered as the expedited procedure. Such a notary deed constitutes the enforcement title: after having been appended by the court with the so

called enforcement clause (klauzula wykonalności) and it can be basis for enforcement by the bailiff.

(iii) There are no rules which provide for the same treatment of international commercial agreements as the ones applicable to final arbitral awards under New York Convention on the Recognition and Enforcement of Arbitral Awards (1958).

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

As regards sub question 2, the Civil Procedure Code provides for mediation as voluntary procedure (art. 1831, para. 1). The mediation starts following the agreement on mediation between the parties or as a result of the common court's decision referring the parties to mediation. The mediation can start also when the other party agrees to it following the request for the mediation filed with the mediator by the first party. Art. 1831, para. 3 provides that agreement on mediation should stipulate the subject of mediation and designate the mediator (or define the way for its selection). There are no specific rules on the form of the agreement on mediation.

As regards question (2) the commercial settlement can be treated as the civil law agreement, and specifically as a mutual obligation agreement in the meaning of article 487, paragraph 2, of the Civil Code. The usual procedure for the enforcement of civil claims applies to such agreements. The request should be submitted to the competent court.

Question 3: Validity of international commercial settlement agreements

As regards question (3), in order to answer this question it is necessary to determine the law applicable to the international (foreign) settlement. Such law allows to establish the validity of the agreement.

30. Portugal

[Original: English]
[Date: 15 April 2015]

Question 1: Information regarding the legislative framework

(i) In Portugal, the Law 29/2013 of 19 April establishes in article 15 that the provisions of the present section (Civil and Commercial Mediation) are applicable, with the necessary adaptations, to the mediation procedures carried out in another Member State of the European Union, insofar as these respect the principles and standards of the legal system of this State.

According to article 14 (1): "In those cases in which the law does not determine its obligation, the parties have the option to request the judicial homologation of the settlement agreement obtained through pre-court mediation".

According to article 9 (4) the mediation settlement agreement obtained through mediation carried out in another Member State of the European Union that respects the provisions of subparagraphs (a) and (d) of paragraph 1 (that concerns a dispute that may be subjected to mediation and for which the law does not demand judicial homologation; for which the parties had capacity to agree hereon; that is obtained through mediation carried out pursuant to the terms legally foreseen; and the content of which does not violate public policy) are enforceable, without the need for judicial homologation, if the legal system of this State also attributes it enforceability.

(ii) There are no procedures for expedited enforcement of international commercial settlement agreements. All the enforcement procedures have the same rules.

(iii) There are no provisions to the effect that an international commercial settlement agreement be treated as a final award rendered by an arbitral tribunal.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

The grounds for refusing enforcement of international commercial settlement agreements are the following:

- The dispute can't be the subject of mediation;
- Parties incapacity to agree hereon;
- The agreement does not respect the general principles of law or the good faith;
- It constitutes an abuse of law;
- Its content violates public policy.

Question 3: Validity of international commercial settlement agreements

It can be deemed valid an international commercial settlement agreement that concerns a dispute that may be the subject of mediation, for which the parties had capacity to agree hereon, if it respects the general principles of law, if it respects good faith, if it does not constitute an abuse of law and if its content does not violate public policy.

(A/CN.9/846/Add.3) (Original: English/French/Spanish)

Note by the Secretariat on settlement of commercial disputes: enforcement of settlement agreements resulting from international commercial conciliation/mediation: compilation of comments by Governments

ADDENDUM

Contents

III. Compilation of comments

31. Algeria

[Original: French]
[Date: 20 April 2015]

Question 1: Information regarding the legislative framework

i. There is no specific procedure in the existing laws and regulations in Algeria concerning international commercial settlement agreements resulting from conciliation/mediation proceedings.

However, the general civil procedure regime includes as enforceable titles:

- Records of conciliation or agreements approved by Algerian judges and filed with a court registry.
- Notarized documents and certified documents and instruments prepared abroad which may be enforced in Algeria only if they have been declared enforceable by Algerian courts.

ii. There is no procedure for expedited enforcement of international commercial settlement agreements.

iii. There are no provisions to the effect that an international commercial settlement agreement be treated as an arbitral award given that our Civil Procedure Code provides for only two types of arbitration: ad-hoc arbitration and institutional arbitration.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

There are no specific grounds for refusing enforcement of a commercial settlement agreement in our country, but the general rule applicable to any agreement is that it must not be contrary to Algerian legislation, public policy or morality.

Question 3: Validity of international commercial settlement agreements

There are no specific conditions for international commercial settlement agreements to be deemed valid, but the general rule applicable to any agreement is that it must not be contrary to Algerian legislation, public policy or morality.

There are no bases in law for challenging the validity of an agreement to refer a dispute to mediation/conciliation or the validity of the resulting mediated/conciliated settlement agreement. However, the parties may provide, in their agreement, an arbitration clause on mediation or conciliation, subject to the legal conditions provided for in the Civil Procedure Code.

Question 4: Other comments

Mediation/conciliation remains the most appropriate procedure to resolve commercial disputes.

The international community would benefit from promoting mediation/conciliation by developing provisions to ensure the enforcement of international settlement agreements resulting from mediation/conciliation.

Algeria is willing to make its contribution to that end.

32. Cameroon

[Original: French]
[Date: 20 April 2015]

Question 1: Information regarding the legislative framework

Act No. 2007/001 of 19 April 2007 establishes the office of enforcement judge and also establishes the conditions for the enforcement in Cameroon of foreign judicial decisions and public acts, as well as foreign arbitral awards.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

According to the provisions of the above-mentioned Act, foreign arbitral awards have the effect of res judicata and may be recognized and rendered enforceable in Cameroon by the enforcement judge, subject to the conditions provided for in the applicable international conventions or, in the absence of such conventions, under the same conditions as those set forth in the provisions of the Uniform Act on Arbitration Law of the Organization for the Harmonization of Business Law in Africa (OHADA) and Act No. 2003/009 of 10 July 2003 designating competent courts under the Uniform Act on Arbitration Law and establishing the procedure for referral to those courts.

Accordingly, foreign public acts, in particular foreign notarized instruments that are enforceable in the State in which they were issued, are declared enforceable in Cameroon by the president of the court of first instance of the place where enforcement is taking place or is envisaged or by a judge of the same court who has been appointed by the president for that purpose.

The enforcement judge verifies that such acts fulfil the necessary conditions with respect to their authenticity in their countries of origin and that they are not contrary to public order in Cameroon.

Question 3: Validity of international commercial settlement agreements

In accordance with the aforementioned Act, the president of the court of first instance or the judge delegated by him or her is the judge responsible for determining whether foreign court rulings and public acts, as well as foreign arbitral awards, are enforceable.

A party requesting the recognition or enforcement of an instrument relating to a civil, commercial or social matter must submit the following documents to the judge: a

certified copy of the decision that fulfils the necessary conditions with respect to its authenticity; the original of the record of service of the decision or any other legal instrument confirming service of the decision; a court registrar's certificate to the effect that the decision has not been subject to challenge or appeal; if appropriate, a copy of the notice or summons issued to a party that has failed to appear before the court, a certified copy issued by the registrar of the court that issued the decision and any other documents required in order to establish that the notice or summons reached the party in good time.

The enforcement judge is required only to verify that: the decision was issued by a competent court in the country of origin; the parties have been duly summonsed, represented and declared in default; the decision is enforceable in its country of origin; the decision is contrary neither to public order in Cameroon nor to a final court decision rendered in Cameroon.

Question 4: Any other comment

In view of the foregoing, it can be said that Cameroonian legislation contains provisions on the enforceability of foreign public acts and foreign arbitral awards and thus agreements resulting from conciliation/mediation, which are enforceable as any contract between the parties. In other words, a written conciliation statement and a written arbitration award would have equal legal validity and effect.

The enforcement judge is required simply to record in his or her decision the outcome of his or her verifications. Enforcement may be granted in part, with respect to any part of the decision in question.

The decision of the enforcement judge may be challenged only through an appeal to the Supreme Court. Failure to submit one of the above-listed documents to the judge may also be considered as a ground for challenging the validity of an international commercial agreement resulting from mediation/conciliation proceedings and for rendering the agreement unenforceable.

33. Chile

[Original: Spanish]
[Date: 20 April 2015]

Question 1: Information regarding the legislative framework

In Chile, mediation, broadly understood as an alternative dispute resolution mechanism in which a mediator assists parties in their attempt to reach an amicable settlement to their dispute, has been progressively incorporated into the domestic legal system in various areas, for example in family law and labour law. However, it has not yet been provided for in national legislation in the area of international commercial settlements.

In particular, with regard to alternative means of dispute resolution, it should be noted that articles 2446 et seq. of the Chilean Civil Code regulate settlement agreements, defining them as agreements in which the parties settle pending disputes out of court, or take steps to prevent possible future disputes.

In addition, articles 262 et seq. of the Civil Procedure Code provide for conciliation proceedings, which may be conducted in any civil action in which settlement is admissible, with certain exceptions specifically identified.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement — Question 3: Validity of international commercial settlement agreements

However, it should be noted that the enforcement of international mediation or settlement agreements is not specifically regulated in national law. As regards decisions on disputes tried abroad, Chilean legislation regulates the enforcement of foreign decisions in articles 242 to 251 of the Civil Procedure Code, Title XIX

No. 2 “On decisions passed by foreign courts”, which establish the rules governing the recognition and enforcement of decisions handed down by foreign courts. These rules also apply to the decisions issued by judges in arbitral proceedings. In this regard, the law provides that decisions delivered in foreign countries shall have the same force in Chile as they are granted by the relevant treaties and shall be enforced according to the procedures established by Chilean law, unless otherwise modified by the treaties.

In the absence of relevant treaties with the State where the decisions originate, the decisions shall be given the same force as those issued in Chile. In cases where the aforementioned rules cannot be applied, the decisions of foreign courts shall have the same force in Chile as if they had been issued by Chilean courts, provided that they meet the conditions expressly provided for in the Civil Procedure Code.

Therefore, in accordance with the Chilean legal system, it is possible to confer enforceability on international commercial settlement agreements through their recognition by a court.

Furthermore, it should be noted that article 30 of Act No. 19.971 on international commercial arbitration provides that, during arbitral proceedings, the parties may reach a settlement resolving the dispute, allowing the arbitral tribunal to terminate proceedings, and, at the request of both parties and if the arbitral tribunal has no objections, the settlement may be recorded in the form of an arbitral award under the terms agreed by the parties. Consequently, it is also possible to confer enforceability on an international commercial settlement agreement concluded within arbitral proceedings.

34. Mexico

[Original: Spanish]
[Date: 16 April 2015]

Question 1: Information regarding the legislative framework

Concept of “international commercial settlement agreement”

The concept of “international commercial settlement agreement” does not exist in Mexican law. Furthermore, the Government of Mexico is unaware of the existence of such a concept in comparative law.

The concept may therefore be understood in two ways. The first would be as the result of international conciliation proceedings. It is likely that some States have enacted legislation defining international commercial settlement agreements for the purposes of their domestic law.

If that is the case, since there are no provisions in Mexican legislation for the enforcement of such agreements under a special regime, the general regime described below would apply.

The second way in which the concept may be understood would be that an international commercial settlement exists if the parties reach a settlement with respect to a dispute arising from a relationship or contract that is considered to be international in accordance with provisions in force that govern such status. No special regime would apply to such settlements under Mexican law. For example, in the case of a settlement agreement resulting from a dispute concerning an international sales contract in the terms of the United Nations Convention on Contracts for the International Sale of Goods, the Code of Commerce would apply to the enforcement of that agreement.

Consequently, the responses to the secretariat’s questionnaire refer exclusively to settlement agreements in general with respect to legal relations under Mexican commercial law.

Conciliation proceedings excluded

Mexico is one of the countries that regulate civil law and commercial law separately. Civil law applies according to local jurisdiction, as a result of which each federal entity has a civil code and a code of civil procedure. Consequently, provisions are established in each federal entity with respect to the enforcement of settlement agreements reached in relation to civil cases.

Following a trend that appears to be universal, laws on conciliation have been enacted in all or most of the federal entities of Mexico. Since those entities are State-level jurisdictions, settlement agreements in such cases are typically non-commercial. However, in many cases, the parties agree to conciliation proceedings in accordance with the provisions of those laws and conclude agreements that settle their disputes. By virtue of the rule that the will of the parties prevails, such settlement agreements may be considered valid and enforceable under the legislation of the federal entity concerned.

Such laws usually establish special procedures facilitating the enforcement of settlement agreements reached through or formalized by a conciliator. They typically establish requirements of nationality and professional qualification that are incompatible with conciliation in relation to international commerce and have therefore not been taken into account in the completion of this questionnaire.

There are other relations for which separate regulatory provisions are established, such as employer-employee relations and relations between providers of goods and services and consumers.

Legal regulation of conciliation

The law applicable to commercial settlement agreements is the Code of Commerce. The Federal Civil Code supplements the Code of Commerce. Since the Code of Commerce has no specific provisions regarding settlement agreements, the following provisions of the Federal Civil Code apply: 10.1 “Article 2944. A settlement is a contract whereby the parties end or prevent a dispute by making reciprocal concessions.” 10.2 “Article 2945. In the case of a settlement that prevents future disputes, if the value exceeds 200 pesos, that fact must be recorded in writing.” 10.3 “Article 2953. The settlement shall have, with respect to the parties, the same effect and force as res judicata; however, a request to terminate the settlement agreement or render it null and void may be made in the cases permitted by law.”

The following provisions of the Code of Commerce are relevant to the enforcement of settlement agreements: 11.1 “Article 1391. Enforcement proceedings take place where an action is based on an enforceable document. The following documents are enforceable [...] II. Public instruments, as well as statements and certified copies thereof issued by a notary public; […] VII. … any other commercial contracts signed and legally recognized by the debtor ...”

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

The grounds for refusing enforcement of a commercial settlement agreement in Mexico are the same as those for refusing enforcement of any other contract under the applicable law of obligations and contracts.

Agreements to settle disputes through conciliation and settlement agreements that have been concluded in another State in accordance with the laws of that State are recognized in Mexico (Federal Civil Code, article 13-I). However, if a settlement agreement involves the creation, regulation and extinguishment of rights in rem in respect of immovable property, leasing contracts or contracts for the temporary use of such property and movable property, it is governed by the law of the jurisdiction in which it was concluded, even if the parties to the agreement are foreign.

There are no specific provisions for the enforcement of international settlement agreements.

Commercial settlement agreements as awards

In Mexican law there is no provision for the treatment of a commercial settlement agreement as a final award. The only possibility for a settlement agreement to take the form of an award is under article 1447 of the Code of Commerce (the text of which is identical to that of article 30 of the UNCITRAL Model Law on International Commercial Arbitration), which provides for the recording of the settlement in the form of an award on the terms agreed by the parties if requested by the parties and not objected to by the arbitral tribunal.

Under Mexican law it would be legally impossible to initiate arbitration proceedings with the sole objective of recording a settlement between the parties as an award. According to the definition of "arbitration agreement" as set out in article 1416-I of the Code of Commerce and article 7 of the Model Law on International Commercial Arbitration, disputes which have arisen or which may arise between the parties are the subject of arbitration. A settlement constitutes the resolution of the dispute (Federal Civil Code, article 2944, and Code of Commerce, article 78) and requires only the agreement of the parties, as a result of which arbitration would be inappropriate because there is no dispute for the arbitrator to resolve.

Question 3: Validity of international commercial settlement agreements

In Mexican law, no specific conditions or formalities are required in order for the settlement agreement to be valid and binding. Article 78 of the Code of Commerce provides that, under commercial agreements, each party agrees to become bound in the manner and on the terms that they wish; the validity of the agreement does not depend on the fulfilment of specific requirements or formalities. The Federal Civil Code does not establish any requirements with regard to the settlement of a dispute that has arisen between parties. Requirements are established only with regard to disputes that may arise in the future, and then only when the value of the dispute exceeds 200 pesos (currently 0.2 pesos).

However, in order for enforcement to take place with respect to a commercial matter, it is necessary for the settlement to be recorded in a public instrument (i) issued by a notary public or commercial notary public or (ii) signed before or recognized by a judicial authority (Code of Commerce, article 1391).

Unlike awards on terms agreed between the parties that have been issued in Mexico in accordance with article 1440 of the Code of Commerce (article 30 of the UNCITRAL Model Law on International Commercial Arbitration), it is doubtful whether such an award rendered abroad falls within the scope of the 1958 New York Convention. There is no indication in published case law that Mexican courts have ruled on this matter.

Draft legislation

A draft law enacting the UNCITRAL Model Law on International Commercial Conciliation is to be submitted to Congress, containing the following provisions:

21.1 "Article 14. If the parties, by means of conciliation or negotiation, reach an agreement settling a dispute, that agreement shall constitute a commercial settlement." "The settlement shall have, with respect to the parties, the same effect and force as res judicata; however, nullity or termination of the settlement agreement may be requested in the cases permitted by law." "The commercial settlement shall be binding and enforceable as a commercial settlement, in accordance with the [special procedure established for the recognition and enforcement of awards]." "With the exception of [provisions relating to the transfer of rights and strict interpretation], the provisions [of the Federal Civil Code relating to settlement agreements] shall also apply to commercial settlements."

21.2 "Article 15. If the recognition and enforcement of a commercial settlement is requested, only exceptions made after the settlement has been reached or specifically provided for by law may be admitted, and such exceptions must be supported by

documentary evidence or replies to interrogatories. Once those exceptions are ruled on, no further exceptions may be admitted."

21.3 "Article 16. If, in the commercial settlement agreement, the parties have agreed on an arbitration clause, any disputes arising from or relating to the commercial settlement shall, unless otherwise agreed, be settled by arbitration. If a party applies to a judicial authority, proceedings shall take place in accordance with article 1424 of the Code of Commerce (article 8 of the UNCITRAL Model Law on International Commercial Arbitration)."

35. Philippines

[Original: English]
[Date: 17 April 2015]

Question 1: Information regarding the legislative framework

The following are the legislative framework in the Philippines relating to the enforcement of international commercial settlement agreements arising out of mediation/conciliation proceedings: Republic Act (RA) No. 9285,[1] otherwise known as the "Alternative Dispute Resolution Act of 2004", which was issued on 2 April 2004; Implementing Rules and Regulations (IRR) of the Alternative Dispute Resolution Act of 2004 (ADR Act),[2] as embodied in the Philippine Department of Justice's Department Circular No. 98 dated 4 December 2009; Special Rules of Court on Alternative Dispute Resolution (Special ADR Rules), which took effect on October 30, 2009.

(i) Section 17 of the ADR Act provides for the enforcement of mediated settlement agreements, to quote: […] "(a) A settlement agreement following successful mediation shall be prepared by the parties with the assistance of their respective counsel, if any, and by the mediator. The parties and their respective counsels shall endeavour to make the terms and conditions thereof complete and make adequate provisions for the contingency of breach to avoid conflicting interpretations of the agreement. (b) The parties and their respective counsels, if any, shall sign the settlement agreement. The mediator shall certify that he/she explained the contents of the settlement agreement to the parties in a language known to them. (c) If the parties so desire, they may deposit such settlement agreement with the appropriate Clerk of a Regional Trial Court of the place where one of the parties resides. Where there is a need to enforce the settlement agreement, a petition may be filed by any of the parties with the same court, in which case, the court shall proceed summarily to hear the petition, in accordance with such rules of procedure as may be promulgated by the Supreme Court."

Complementary to the foregoing is Article 3.20 of the IRR of the ADR Act, as embodied in the Philippine Department of Justice's Department Circular No. 98 dated 4 December 2009. […]

Likewise, Rule 15 of the Special Rules of Court for ADR specifically laid down the rules for the deposit and enforcement of mediated settlement agreements. It states: […] "Rule 15.5. Enforcement of mediated settlement agreement. - Any of the parties to a mediated settlement agreement, which was deposited with the Clerk of Court of the Regional Trial Court, may, upon breach thereof, file a verified petition with the same court to enforce said agreement. Rule 15.6. Contents of petition. - The verified petition shall: a. Name and designate, as petitioner or respondent, all parties to the mediated settlement agreement and those who may be affected by it; b. State the following: (i). The address of the petitioner and respondents; and (ii). The ultimate facts that would show that the adverse party has defaulted to perform its obligations under said agreement; and c. Have attached to it the following: (i). An authentic copy

[1] "An Act to institutionalize the use of an alternative dispute resolution system in the Philippines and to establish the office for alternative dispute resolution, and for other purposes".
[2] A.M. NO.07-11-08-SC.

of the mediated settlement agreement; and (ii). Certificate of Deposit showing that the mediated settlement agreement was deposited with the Clerk of Court. Rule 15.7. Opposition. - The adverse party may file an opposition, within fifteen (15) days from receipt of notice or service of the petition, by submitting written proof of compliance with the mediated settlement agreement or such other affirmative or negative defences it may have. Rule 15.8. Court action. - After a summary hearing, if the court finds that the agreement is a valid mediated settlement agreement, that there is no merit in any of the affirmative or negative defences raised, and the respondent has breached that agreement, in whole or in part, the court shall order the enforcement thereof; otherwise, it shall dismiss the petition."

(ii) The procedure stated above does not include a procedure for expedited enforcement of international commercial settlement agreements.

(iii) Under Paragraph (d), Section 17 of the ADR Act, it is provided therein that a settlement agreement shall be treated as an arbitral award, if the parties agree in the settlement agreement that the mediator shall become a sole arbitrator for the dispute. As the settlement agreement is treated as an arbitral award it shall be subject to enforcement under RA No. 876, otherwise known as "The Arbitration Law". It states: […] "(d) The parties may agree in the settlement agreement that the mediator shall become a sole arbitrator for the dispute and shall treat the settlement agreement as an arbitral award which shall be subject to enforcement under Republic Act No. 876, otherwise known as the Arbitration Law, notwithstanding the provisions of Executive Order No. 1008 for mediated disputes outside of the CIAC." A restatement of this provision was made in Paragraph (d), Article 3.20 of the IRR of the ADR Act […].

As mentioned in the immediately preceding paragraphs, the provisions of RA No. 876[3] shall apply to a settlement agreement that shall be treated as an arbitral award. […] Relevant to the foregoing is Section 40 of the ADR Act […].

To reiterate, the provisions of RA No. 876 shall apply to a settlement agreement that shall be treated as an arbitral award. Hence, for the confirmation of a settlement agreement that was considered as an arbitral award, Section 28 of RA No. 876 requires the following: "SEC. 28. Papers to accompany motion to confirm, modify, correct, or vacate award. - The party moving for an order confirming, modifying, correcting, or vacating an award, shall at the time that such motion is filed with the court for the entry of judgement thereon also file the following papers with the Clerk of Court: (a) The submission, or contract to arbitrate; the appointment of the arbitrator or arbitrators; and each written extension of the time, if any, within which to make the award. (b) A verified copy of the award. (c) Each notice, affidavit, or other paper used upon the application to confirm, modify, correct or vacate such award, and a copy of each of the court upon such application."

RA No. 876 is silent with respect to the application of the 1958 Convention on the Recognition and Enforcement of Foreign Arbitral Awards to awards on agreed terms.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

RA No. 9285 or the ADR Act and its IRR as well as the Special Rules of Court on ADR are silent with respect to the grounds for refusing to enforce a commercial settlement agreement.

Question 3: Validity of international commercial settlement agreements

For the validity of international commercial settlement agreements, the procedure prescribed under Section 17 of the ADR Act, Article 3.20 of the IRR of the ADR Act and Rule 15 of the Special Rules of Court for ADR should be followed.

RA No. 9285 or the ADR Act and its IRR and the Special Rules of Court on ADR are silent with respect to the question on challenging the validity of an agreement to

[3] "An Act to authorize the making of arbitration and submission agreements, to provide for the appointment of arbitrators and the procedure for arbitration in civil controversies, and for other purposes".

refer a dispute to mediation/conciliation or the validity of the resulting mediated/conciliated settlement agreement.

36. Qatar

[Original: English]
[Date: 5 May 2015]

Question 1: Information regarding the legislative framework

Mediation or conciliation is a recognized pattern for the amicable settlement of disputes under Qatari Law. Several contracts include the agreement of the parties to resort to mediation or conciliation before either going to litigation or arbitration.

There is no legal framework organizing mediation practice. Therefore, the concerned partners are free to organize the mediation according to their wishes and concerns.

Within the Chamber of Commerce & Industry of Qatar, the Qatar International Center for Conciliation & Arbitration (QICCA) has issued in 2012 a specific set of mediation rules largely inspired from the UNCITRAL Conciliation Rules. Article l5 of the QICCA conciliation rules governs the "settlement agreement" reached by the parties with the assistance of the conciliator. Such agreement is subject to the general rules of contract under the Qatari Civil Code issued by law n. 22 of 2004. Also, a settlement agreement may be considered in respect of the so-called "contract of compromise" which is regulated by art. 573-581 of the Qatari Civil Code. The applicable law to the enforcement of the conciliation agreement shall be the law decided by the parties (autonomy of the parties principle).

There is no difference in the applicable rules whether the enforcement of the settlement (or compromise) agreement results from conciliation or not.

No procedure exists for "expedited" enforcement of international commercial settlement agreements.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

A settlement agreement is not treated as a final award rendered by an arbitral tribunal. The parties enjoy full liberty to organize the conciliation and to draft the settlement agreement in the form they consider appropriate.

In case a settlement between parties is reached during arbitration proceedings, it may happen that the parties opt for requesting from the arbitral tribunal to record the settlement in the form of an arbitral award on agreed terms (see art. 37 of QICCA Arbitration Rules).

A settlement agreement should be in writing, signed by the parties and the conciliator. Qatari Courts shall consider "awards on agreed terms" enforceable under the New York Convention of 1958. Yet, there are not many applications of the enforcement of foreign arbitral awards in Qatar.

The traditional grounds for refusing the enforcement of a commercial settlement agreement are the same for any contract such as in case the subject of the contract is contrary to public order, or in case the parties are under legal capacity, etc.

Question 3: Validity of international commercial settlement agreements

There are no specific criteria regarding the validity of the settlement agreement in Qatar.

37. Spain

[Original: Spanish]
[Date: 16 April 2015]

Question 1: Information regarding the legislative framework

The regulatory framework for the enforcement of international commercial settlement agreements arising out of mediation/conciliation proceedings in Spain consists of the following legislation:

(a) Act No. 5/2012 of 6 July 2012 on mediation in civil and commercial matters (hereinafter "the Mediation Act");

(b) Act No. 1/2000 of 7 January 2000 on civil procedure (hereinafter "the Civil Procedure Act").

(a) The Mediation Act regulates mediation in civil or commercial matters, including cross-border disputes, provided that such mediation does not affect rights and obligations unavailable to the parties under the applicable legislation.

Its preamble states that the advantages of mediation include the fact that it provides practical, effective and financially beneficial solutions to certain disputes between parties and is therefore an alternative to legal proceedings or arbitration, from both of which it must be clearly distinguished. Mediation consists of the appointment of a neutral professional mediator who facilitates settlement of the dispute by the parties themselves in an equitable way, enabling underlying relationships to be maintained and allowing the parties to retain control over the outcome of the dispute.

Furthermore, the preamble to the Mediation Act defines as one of the Act's primary objectives the establishment of a general regime applicable to any mediation proceedings that take place in Spain and that have binding legal effect. The Act applies only to civil and commercial matters and is part of a model that takes into account the provisions of the UNCITRAL Model Law on International Commercial Conciliation of 24 June 2002.

The following are excluded from the scope of application of the Mediation Act: mediation in criminal cases; mediation in disputes involving government entities; mediation in labour disputes; and mediation in consumer matters.

The scope of application of the Mediation Act includes mediation in cross-border disputes, which are defined as follows: "1. A dispute is cross-border when at least one of the parties is domiciled or habitually resident in a State other than that in which any other party is domiciled and the parties agree to refer the dispute to mediation or mediation is obligatory under the applicable law. Disputes covered by or resolved by means of mediation agreements shall also be regarded as cross-border disputes, regardless of the place where the mediation agreement is concluded, if, as a consequence of transfer of domicile of any of the parties, the enforcement of the agreement or of any of its consequences is sought in the territory of a different State. 2. In cross-border litigation between parties residing in different member States of the European Union, domicile shall be determined pursuant to articles 59 and 60 of Council Regulation (EC) No. 44/2001 of 22 December 2000 on jurisdiction and the recognition and enforcement of judgements in civil and commercial matters."

(b) The Civil Procedure Act regulates the enforcement by Spanish judicial bodies of agreements arising from mediation. To that end, the Act establishes a finite list of instruments (documents) that are enforceable by Spanish courts.

Extrajudicial mediation agreements are recognized as enforceable, as are agreements between the parties to terminate legal proceedings that have already commenced, the latter being referred to as "court settlement" agreements. The Civil Procedure Act thus recognizes the following as enforceable: arbitral awards or decisions and mediation agreements, with the requirement that the latter be recorded in a notarial instrument in accordance with the Mediation Act; court rulings that approve or confirm court settlements and agreements reached during proceedings, accompanied,

if necessary in order to record their specific content, by the corresponding official copies of the record of proceedings.

i. On specific enforcement procedures, it is important to differentiate between:

(a) Requirements of form with respect to mediation agreements of a general nature;

(b) Additional formalities required for the enforcement of such mediation agreements; and

(c) Additional requirements for the enforcement of cross-border or international mediation agreements.

(a) With respect to mediation agreements of a general nature, both the Mediation Act and the Civil Procedure Act require the mediation agreement to comply with a series of requirements of form. Furthermore, the mediation agreement is required to be recorded in a public instrument in the presence of a notary public.

The mediation agreement must meet the following requirements: it must be in writing; it may deal with a part or the whole of the matter submitted to mediation; it must state the identity and domicile of the parties and the place and date of its signature; it must state the obligations assumed by each party; it must certify that mediation proceedings have been conducted in line with the provisions of the Mediation Act, indicating the mediator or mediators that have taken part in those proceedings and, where applicable, the mediation institution where the proceedings were conducted; it must be signed by the parties or their representatives.

(b) In addition to the requirements set out above, the mediation agreement must be recorded in a public instrument before a notary public in order to be considered by the courts to be enforceable. If an agreement is reached after legal proceedings have commenced, it is submitted for approval by the court or judicial body considering the case rather than being recorded in a notarial instrument. The mediation agreement is submitted by the parties to a notary public, accompanied by a copy of the records of the constitutive and closing sessions of the proceedings, without the presence of the mediator being required. In order for the mediation agreement to be recorded in a notarial instrument, the notary public must verify that it complies with the requirements of the Mediation Act and that its content is not contrary to law.

Where the mediation agreement is to be enforced in another State, in addition to being recorded in a notarial instrument, it must comply with the requirements, if any, of the relevant international conventions to which Spain is a party and of the relevant European Union instruments.

Where an agreement has been reached through mediation conducted after legal proceedings have begun, the parties may request the court to approve it.

(c) With respect to the enforcement of cross-border mediation agreements, the Mediation Act distinguishes between those mediation agreements that have become enforceable in the State in which they were concluded and those that have not. Mediation agreements are enforceable if declared as such by the judicial authority and/or the entity concerned. If the agreement is not enforceable, it must be recorded in a public instrument before a Spanish notary public at the request of the parties.

The Mediation Act and the Civil Procedure Act thus establish that: “1. Without prejudice to the terms set forth in the relevant European Union instruments and the international conventions in force in Spain, a mediation agreement that has already become enforceable in another State may be enforced in Spain only if it is declared enforceable by a competent authority that carries out functions equivalent to those performed by the Spanish authorities. 2. A mediation agreement that has not been declared enforceable by a foreign authority may be enforced in Spain only if it has been recorded in a public instrument by a Spanish notary public at the request of the parties, or at the request of one of the parties with the express consent of the others. 3. A foreign document may not be enforced when it is manifestly contrary to Spanish public order.”

ii. As indicated in the response to question i. above, a mediation agreement that has already become enforceable in another State may be enforced in Spain if it is declared enforceable by a competent authority that carries out functions equivalent to those performed by the Spanish authorities.

A mediation agreement that has not been declared enforceable by a foreign authority may be enforced in Spain only if it has been recorded in a public instrument by a Spanish notary public at the request of the parties, or at the request of one of the parties with the express consent of the others.

iii. The Arbitration Act (Act No. 60/2003) of 23 December 2003 enables parties to reach a settlement agreement in the course of arbitral proceedings. Such settlement agreements end the arbitral proceedings. They take the form of an award and the content agreed upon by the parties is enforceable in the same way as an award rendered by an arbitral tribunal.

Article 36 of the Arbitration Act thus provides as follows: "Award by agreement of the parties 1. If, during arbitration proceedings, the parties reach an agreement that settles the dispute wholly or partially, the arbitrators shall terminate the proceedings with respect to the matters agreed upon and, if they are requested by both parties to do so and consider that there are no grounds to object to that request, shall record the settlement in an award on the terms agreed by the parties. 2. The award shall be rendered in accordance with the following article and shall have the same legal consequences as any other award rendered on the merits of the case."

Such agreements constitute genuine arbitral awards that comply with the requirements of form applicable to an arbitral award. The proceedings resulting in the award are conducted by arbitrators rather than mediators or conciliators.

Awards on terms agreed by the parties as described above are enforceable under the New York Convention.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

As a rule, a nullity action may be filed with respect to the terms agreed upon in a mediation agreement only on the ground of contract invalidity.

If the contents of the mediation agreement meet the general requirements of form and the requirements for its enforcement, as described in the response to question (1) i. of this questionnaire, there are very limited grounds for refusing enforcement.

The party to the agreement against whom an action is to be enforced may, within 10 days following notice of issue of the writ of execution by the judicial authority concerned, object to the enforcement in writing on the basis that payment has been made or the action required of that party under the mediation agreement has been performed, providing documentary evidence thereof.

An objection may also be raised with respect to the time limit for enforcement and to any agreements or settlements that have been agreed upon in order to avoid enforcement, provided that such agreements and settlements are recorded in a notarial instrument.

Furthermore, in international mediation agreements, a foreign document may not be enforced if it is manifestly contrary to Spanish public order.

Question 3: Validity of international commercial settlement agreements

There are no such bases or criteria in domestic Spanish law beyond the general requirements set out in the response to question (1) i. of this questionnaire. It should also be borne in mind that no agreement may be enforced if it is contrary to public order; consequently, there is no scope in such cases for challenging the validity of the agreement.

38. Switzerland

[Original: English]
[Date: 14 April 2015]

Swiss law has no specific rules as to the enforcement of commercial settlement agreements resulting from international mediation or conciliation proceedings. Agreements of that kind are not treated in any different way than other commercial agreements between private parties.

39. Viet Nam

[Original: English]
[Date: 29 May 2015]

Viet Nam's legal documents relevant to this issue include the 2004 Code of Civil Procedure and the 2010 Law on Commercial Arbitration. These legal documents contain provisions on the enforcement of commercial settlement agreements mediated by a domestic court or an arbitral tribunal established in accordance with the Vietnamese Law on Arbitration, provided that these agreements are recorded in the form of decisions by that court or tribunal. Currently, Viet Nam is considering regulations on procedures for Vietnamese courts to recognize and enforce commercial settlement agreements mediated by mediation centres established under Vietnamese laws.

However, Vietnamese laws do not provide for the cross-border enforcement of international commercial settlement agreements resulting from international commercial mediation and conciliation proceedings.

Likewise, Vietnamese laws remain silent on the issues stated in the UNCITRAL's list of questions, including those on the grounds for refusing enforcement of a commercial settlement agreement, criteria for the validity of commercial settlement agreements, bases in law for commercial settlement agreements to be deemed as invalid.

40. Russian Federation

[Original: Russian]
[Date: 11 June 2015]

Responses to the questions of UNCITRAL Secretariat regarding legislative framework with respect to cross-border enforcement of international commercial settlement agreements (resulting from international commercial mediation/conciliation proceedings)

1. In the Russian Federation, the main regulatory acts applicable in resolving the issue of enforcement of international commercial settlement agreements are Federal Act No. 193-FZ of 27 July 2010 on the alternative dispute settlement procedure with the participation of an intermediary (mediation procedure), Russian Federal Act No. 5338-1 of 7 July 1993 on international commercial arbitration, and Russian Federal Arbitration Procedure Code No. 95-FZ of 24 July 2002.

(i) An amicable agreement on the settlement of a dispute (mediation agreement) is enforceable as a normal court judgement if it has been approved by a court. This rule applies if an agreement is reached as a result of a conciliation proceeding (mediation) held following referral of the dispute to a court or arbitral tribunal. In order to be approved by the court, the mediation agreement must be concluded in writing and contain information about the parties, the matter in dispute, the mediation proceeding, the mediator and the obligations, conditions and time frame for their implementation agreed by the parties. If a settlement agreement was reached by the parties as a result of a mediation proceeding without the referral of the dispute to a court or arbitral tribunal, such an agreement is regarded as a civil transaction, to which the rules of civil law on compensation for termination of contract, novation, debt forgiveness, offset of counterclaims of a similar kind and compensation for harm apply. The protection of rights violated as a result of non-enforcement or improper enforcement of such a mediation agreement is exercised by means provided for in civil law.

(ii) Federal Act No. 193-FZ of 27 July 2010 on the alternative dispute settlement procedure with the participation of an intermediary (mediation procedure) imposes no restrictions on nationality or objective content as regards a conciliation proceeding (mediation) carried out on the territory of the Russian Federation. Further, the current legislation does not provide for special procedures for the enforcement of international commercial settlement agreements, where such agreements are the result of a conciliation/mediation proceeding (mediation). There is no procedure for the expedited enforcement of international commercial settlement agreements.

(iii) Under Russian legislation on international commercial arbitration, parties who have concluded an international commercial settlement agreement may request

an international arbitral tribunal within the territory of the Russian Federation to make an arbitral award on agreed terms in accordance with the commercial settlement agreement submitted by them.

The enforcement of an international commercial settlement agreement which has been formalized as an arbitral award on agreed terms is governed by the legislation on international commercial arbitration.

(1) There are no special rules in Russian legislation relating to the procedure for the rendering, content and drafting of an award on agreed terms. In particular, there is no obligation whatsoever to conduct arbitral proceedings if the parties have requested the arbitral tribunal to make an arbitral award on the basis of a settlement agreement submitted by them.

(2) Russian legislation does not contain any specific requirements, as regards either form or content, applicable to a settlement agreement submitted by the parties to an arbitral tribunal for approval and for the issuance of an award on agreed terms. It is not stipulated in the legislation that a settlement agreement submitted to the arbitral tribunal for an award on agreed terms must have been reached by the parties as a result of conciliation proceedings (mediation). It is reasonable to conclude therefore that, when making an arbitral award on agreed terms, an arbitral tribunal will apply the general provisions that apply when making conventional international arbitral awards.

(3) There is currently no information on judicial practice relating either to the challenging or enforcement of international arbitral awards on agreed terms made in the Russian Federation, or to the recognition and enforcement of foreign arbitral awards in accordance with the United Nations Convention on the Recognition and Enforcement of Foreign Arbitral Awards (New York, 1958) and the European Convention on International Commercial Arbitration (Geneva, 1961). Nevertheless, we may assume that if such situations arise, Russian courts will approach the enforcement of international arbitral awards on agreed terms in the same way as they approach normal international arbitral awards. In particular, they will consider whether under Russian law the matter in dispute settled by the agreement is admissible as the subject of the arbitration proceeding, and consider whether the arbitral award on agreed terms is contrary to the public policy of the Russian Federation.

2. According to established judicial practice, if a settlement agreement is presented for approval by the court, the court may refuse to approve the settlement agreement and thereby exclude the possibility of its enforcement if the conditions of the agreement are inconsistent with the existing legislation or violate the rights and legitimate interests of others. If the settlement agreement takes the form of an arbitral award on agreed terms, its enforcement will be denied unconditionally if the object of the dispute to which the settlement agreement relates may not under Russian law be admitted as a subject of arbitral proceedings, and if the content of the settlement agreement would be contrary to the public policy of the Russian Federation.

3. Russian legislation does not impose any criteria with which an international commercial settlement agreement must comply in order to be considered valid. A general requirement of Federal Act No. 193-FZ of 27 July 2010 on the alternative dispute settlement procedure with the participation of an intermediary (mediation procedure) is that the settlement agreement (mediation agreement) must be in writing and contain information about the parties, the matter in dispute, the mediation proceeding, the mediator and the obligations, conditions and time frames of their implementation agreed by the parties. In accordance with this law, an agreement to have the dispute dealt with in the framework of a mediation proceeding must be in writing. Moreover, such an agreement must contain information on the matter in dispute; on the mediator, mediators or organization handling the mediation procedure; on the procedure for conducting the mediation proceeding; on the conditions of the sharing of costs related to the mediation by the parties; and on the time periods for

conducting the mediation proceeding. The question of whether flaws in the agreement to participate in conciliation may be grounds for challenging a settlement agreement reached as a result of the procedure provided for by this agreement is not resolved directly in law. Further, the law does not provide for any procedure or grounds for challenging the validity of a settlement (mediation) agreement reached within the framework of mediation/conciliation proceedings.

4. In the Russian Federation, the practice of using mediation/conciliation proceedings in commercial relations is currently in the very early stages of development. The business community in the Russian Federation has not yet gained the necessary experience for a broad application of this alternative method of settling disputes and differences of opinion in both domestic and international trade. However, it appears that the use of this method of settling commercial disputes in international commercial trade is unlikely to become more frequent in the coming years because, as practice shows, the availability of international arbitration procedures to contractors on the whole meets the demand dictated by the current level of development of international economic relations. Almost all international contracts drawn up in the vast majority of commercial transactions in international commercial trade include an arbitration clause. This allows contractors who have reached a settlement agreement resulting from mediation/conciliation proceedings to have such an agreement enforced, having requested an arbitral tribunal to convert their settlement agreement into an arbitral award on agreed terms. Even when the counterparties to an international commercial transaction have the opportunity to apply to a court for approval of a settlement agreement, they are unlikely to prefer this way, because in many cases this will mean involving a national court in their relationship, which they sought to avoid by including an arbitration clause in their contract. In view of the range of problems arising in this area of legal regulation, it appears that the legal mechanism needed to enforce international settlement agreements is unlikely to be less complex than the current mechanism for enforcing international arbitral awards. In addition, to develop it will require unified solutions, which will be extremely difficult to achieve given the rather profound differences in approach in this matter among domestic legal systems, which largely reflect their prevailing cultural and legal traditions.

III. Compilation of comments

41. Czech Republic

[Original: English]
[Date: 29 June 2015]

Responses to the questions of UNCITRAL Secretariat regarding legislative framework with respect to cross-border enforcement of international commercial settlement agreements (resulting from international commercial mediation/conciliation proceedings)

1. (i) There is no specific legislative framework with regard to the enforcement of international commercial settlement agreements arising out of mediation or conciliation proceedings. For the purposes of presented questions the Act No. 202/2012 Coll., on mediation which covers only the enforcement of domestic mediation agreement (the final act of mediation) will be applied.

The mediation agreement is binding as a private contract. However, it is not enforceable by itself. In the case that the mediation agreement is not carried on voluntary, there are three ways of enforcing it.

The enforceability of the mediation agreement is possible through the institution of the court proceedings in which the court recognizes such agreement as being equivalent to the court decision which can be subject to enforcement proceedings. The court examines the validity of the mediation agreement by itself. For further enforcement of the mediation agreement in another EU member State, the Council Regulation No. 44/2001, on jurisdiction and the recognition and enforcement of judgements in civil and commercial matters is applied.

The second possible way is the notarial record with enforcement clause, which is issued by a notary. The notary draws up a document which has character of a public document and which is subject to statutory requirements.

The last option for enforcement of the mediation agreement is through arbitral proceedings. On the request of the parties the arbiter may issue the settlement as an arbitral award. As opposed to the previous methods the settlement of the parties does not arise from mediation but from arbitration proceedings.

(ii) No.

(iii) As it has been already mentioned, the settlement of dispute may be issued as an arbitral award only on the request of the parties. However, it arises from arbitral proceedings and not from mediation. The mediation agreement itself is not treated as a final award rendered by an arbitral tribunal.

(1) The commencement of arbitral proceedings is not required. In general the mediation commences by conclusion of an agreement on mediation. The agreement must contain following information: identification of the parties,

identification of mediator, the subject matter, the remuneration of mediator and the determination of period during which is the mediation held.

(2) Under the Czech law is required writing form of the mediation agreement which includes signature of parties, date and signature of mediator.

(3) No.

2. Grounds for refusing enforcement of the mediation agreement:

- The subject matter of the mediation agreement is not capable of settlement by mediation or conciliation under the Czech law.
- The mediation agreement is in conflict with the provisions of substantive law and the public order of the Czech Republic.
- The mediation agreement is not valid under legal incapacity (undue duress; minors; insanity).
- The mediation agreement is not valid or enforceable in the state of origin.
- The mediation agreement was cancelled in the state of origin.

3. As it has been already mentioned, the mediation agreement must be valid and enforceable in the state of origin. Its subject matter must be capable of settlement by mediation under the Czech law and cannot be in conflict with the provisions of substantive law and the public order of the Czech Republic.

F. Report of the Working Group on Arbitration and Conciliation on the work of its sixty-fourth session (New York, 1-5 February 2016)

(A/CN.9/867)

[Original: English]

Contents

I. Introduction

1. At its forty-eighth session, the Commission had before it the report of the Working Group on the work of its sixty-second session (A/CN.9/832) as well as comments by States on their legislative framework in relation to enforcement of settlement agreements (A/CN.9/846 and its addenda). After discussion, the Commission agreed that the Working Group should commence work at its sixty-third session on the topic of enforcement of settlement agreements to identify relevant issues and develop possible solutions, including the possible preparation of a convention, model provisions or guidance texts. The Commission also agreed that the mandate of the Working Group with respect to that topic should be broad to take into account the various approaches and concerns.[1] The Working Group commenced its consideration of that topic at its sixty-third session (A/CN.9/861).

2. At its forty-eighth session, the Commission considered the work undertaken by the Working Group in relation to the revision of the UNCITRAL Notes on Organizing Arbitral Proceedings (also referred to below as the "Notes"). The Commission approved the revised draft of the Notes in principle (contained in document A/CN.9/844) and requested the Secretariat to provide an updated draft in accordance with the deliberations and decisions of the Commission. The Commission also agreed that the Secretariat could seek input from the Working Group on specific issues, if necessary, during its sixty-fourth session and further requested that the revised Notes be finalized for adoption by the Commission at its forty-ninth session, in 2016.[2]

3. Further, at that session, the Commission considered items for possible future work, including the topic of concurrent proceedings and the preparation of a code of ethics/conduct, in the field of both investor-State and purely commercial arbitration. Regarding concurrent proceedings, the Commission requested the Secretariat to explore the topic further, in close cooperation with experts including those from other organizations working actively in that area and to report to the Commission at a future session with a detailed analysis of the topic including possible work that could be carried out.[3] Regarding the preparation of a code of

[1] *Official Records of the General Assembly, Seventieth Session, Supplement No. 17* (A/70/17), paras. 135-142.
[2] Ibid., para. 133.
[3] Ibid., paras. 143-147.

ethics/conduct, the Secretariat was requested to assess the feasibility of work in that area and report to the Commission at a future session.[4]

4. In addition, the Commission agreed that the Secretariat should continue to coordinate with organizations in relation to the various types of arbitration to which UNCITRAL standards were applicable, and to closely monitor developments, further exploring areas for cooperation and coordination. In relation to investor-State arbitration, the Commission noted that the current circumstances posed a number of challenges, and proposals for reforms had been formulated by a number of organizations.[5]

5. The most recent compilation of historical references regarding the consideration by the Commission of works of the Working Group can be found in document A/CN.9/WG.II/WP.193, paragraphs 5-7 and 12-15.

II. Organization of the session

6. The Working Group, which was composed of all States members of the Commission, held its sixty-fourth session in New York, from 1-5 February 2016. The session was attended by the following States members of the Working Group: Argentina, Armenia, Australia, Austria, Belarus, Brazil, Bulgaria, Canada, China, Croatia, Czech Republic, Denmark, Ecuador, El Salvador, France, Germany, Greece, India, Iran (Islamic Republic of), Israel, Italy, Japan, Kuwait, Malaysia, Mexico, Namibia, Pakistan, Panama, Philippines, Republic of Korea, Russian Federation, Singapore, Spain, Switzerland, Thailand, Turkey, Uganda and United States of America.

7. The session was attended by observers from the following States: Albania, Belgium, Chile, Cyprus, Egypt, Finland, Iraq, Lebanon, Libya, Mozambique, Netherlands, Norway, Qatar, South Africa, Sudan, Sweden and Viet Nam.

8. The session was also attended by observers from the Holy See and the European Union.

9. The session was also attended by observers from the following international organizations:

(a) *Intergovernmental organizations*: International Cotton Advisory Committee (ICAC);

(b) *Invited non-governmental organizations*: American Arbitration Association/International Centre for Dispute Resolution (AAA/ICDR), American Bar Association (ABA), American Society of International Law (ASIL), Arab Association for International Arbitration (AAIA), ArbitralWomen, Association for the Promotion of Arbitration in Africa (APAA), Association Suisse de l'Arbitrage (ASA), Belgian Center for Arbitration and Mediation (CEPANI), Cairo Regional Centre for International Commercial Arbitration (CRCICA), Chartered Institute of Arbitrators (CLARB), China International Economic and Trade Arbitration Commission (CIETAC), CISG Advisory Council (CISG-AC), Construction Industry Arbitration Council (CIAC), Cámara de Comercio de Lima (CCL), European Law Students' Association (ELSA), Florence International Mediation Chamber (FIMC), Forum for International Conciliation and Arbitration (FICACIC), G.C.C. Commercial Arbitration Centre (GCCAC), Institute of International Commercial Law (IICL), Inter-American Bar Association (IABA), Inter-American Commercial Arbitration Commission (IACAC), International Chamber of Commerce (ICC), International Council for Commercial Arbitration (ICCA), International Insolvency Institute (III), International Law Association (ILA), International Mediation Institute (IMI), Kuala Lumpur Regional Centre for Arbitration (KLRCA), Miami International Arbitration Society (MIAS), Milan Club of Arbitrators (MCA), Moot Alumni Association (MAA), New York City Bar Association (NYCBAR), New York International Arbitration Centre (NYIAC), P.R.I.M.E. Finance Foundation (PRIME), Queen Mary University of London School of International Arbitration (QMUL), Regional Centre for International Commercial Arbitration-Lagos (RCICAL) and Swedish Arbitration Association (SAA).

[4] Ibid., paras. 148-151.
[5] Ibid., para. 268.

10. The Working Group elected the following officers:

Chairperson: Ms. Natalie Yu-Lin Morris-Sharma (Singapore)

Rapporteur: Mr. Jeremy Shelly (Australia)

11. At the invitation of the Chairperson, Mr. Michael E. Schneider (Vice-Chair of UNCITRAL, Switzerland) presided over the discussion on the revision of the UNCITRAL Notes on Organizing Arbitral Proceedings (agenda item 4).

12. The Working Group had before it the following documents: (a) provisional agenda (A/CN.9/WG.II/WP.193); and (b) notes by the Secretariat regarding the revision of the UNCITRAL Notes on Organizing Arbitral Proceedings (A/CN.9/WG.II/WP.194) and regarding enforceability of settlement agreements resulting from international commercial conciliation (A/CN.9/WG.II/WP.195 and A/CN.9/WG.II/WP.196).

13. The Working Group adopted the following agenda:

1. Opening of the session.
2. Election of officers.
3. Adoption of the agenda.
4. Revision of the UNCITRAL Notes on Organizing Arbitral Proceedings.
5. International commercial conciliation: enforceability of settlement agreements.
6. Organization of future work.
7. Adoption of the report.

III. Deliberations and decisions

14. The Working Group considered agenda items 4 and 5 on the basis of the notes prepared by the Secretariat (A/CN.9/WG.II/WP.194, A/CN.9/WG.II/WP.195 and A/CN.9/WG.II/WP.196 and its Addendum). The deliberations and decisions of the Working Group with respect to agenda items 4 and 5 are reflected in chapters IV and V, respectively.

15. At the close of its deliberations, in relation to agenda item 4, the Working Group requested the Secretariat to prepare an updated draft of the UNCITRAL Notes on Organizing Arbitral Proceedings based on its deliberations and discussions for consideration by the Commission at its forty-ninth session. In relation to agenda item 5, the Working Group requested the Secretariat to prepare a document outlining the issues considered at the session and setting out draft provisions without prejudice to the final form of the instrument, grouping provisions into broad categories.

IV. Revision of the UNCITRAL Notes on Organizing Arbitral Proceedings

16. The Working Group commenced its consideration of the draft revised UNCITRAL Notes on Organizing Arbitral Proceedings as contained in paragraph 6 of document A/CN.9/WG.II/WP.194. The Working Group noted that the draft revised Notes had been prepared taking account of the decisions of the Working Group at its sixty-first and sixty-second sessions and of the Commission at its forty-eighth session.

Introduction

Paragraph 5

17. The Working Group agreed that the word “dictate” in paragraph 5 should be replaced by the word “indicate”.

Paragraph 7

18. With respect to the second sentence of paragraph 7, which addressed the benefits of selecting a set of arbitration rules, it was agreed that the advantage of such rules as having been widely interpreted by arbitral tribunals and courts and analysed in detail through a wide range of publications should be highlighted.

Annotations

Note 1 (Consultation for decisions on the organization of arbitral proceedings and procedural meetings)

Paragraph 9

19. While a suggestion was made that the first sentence of paragraph 9 should be elaborated to specifically deal with instances where a decision by the arbitral tribunal would require a subsequent agreement of the parties, it was generally felt that paragraph 9 sufficiently set forth the principle of requiring consultation between parties and the arbitral tribunal and that paragraph 15 also dealt with such circumstances.

Paragraph 10

20. It was agreed that the first sentence of paragraph 10 should make a distinction between the situation where the agreement of the parties affected the organization of the arbitral proceedings, in which case consultation with the arbitral tribunal would be sufficient, and the situation where the agreement of the parties affected the planning of the arbitrators, in which case the parties would be advised to not only consult but also seek the agreement of the arbitral tribunal.

21. It was further agreed that the last sentence of paragraph 10 should be revised to indicate that the parties would "usually" secure the agreement of the arbitral tribunal in addition to that of the arbitral institution when they agreed that an arbitral institution would administer the arbitration after the arbitral tribunal had been constituted.

Paragraph 13

22. With respect to paragraph 13, it was suggested that the paragraph could include a list of specific issues that might be discussed at the first procedural meeting, for example, bifurcation of the proceedings, possible use of conciliation/mediation, rules on evidence, and possibility of joinder. While there was some support for that suggestion, it was generally felt that retaining a general approach would be adequate as those issues might not necessarily arise in all arbitrations. In that context, reference was made to the last sentence of paragraph 5 which provided guidance on when to raise a matter. After discussion, it was agreed that the first sentence of paragraph 13 should remain unchanged, stating in general terms that a number of issues covered by the Notes would be addressed at the first procedural meeting.

23. Another suggestion with respect to paragraph 13 was that, where relevant, a reference to statutory and/or mandatory time limits imposed on the arbitral tribunal for rendering an arbitral award should be included as an item for consideration in the procedural timetable. Noting that there was a wide range of different approaches to imposing such limits and of practices, it was questioned whether such limits should be discussed at the first procedural meeting and included in the procedural timetable. It was also stated that that issue could be dealt with in paragraph 143 of the Notes. After discussion, it was agreed that paragraph 13 should be revised to indicate that it would be advisable for the parties and the arbitral tribunal to consider any statutory and/or mandatory time limits for rendering an award.

24. It was further agreed that time limits for communication of documentary evidence should also be mentioned in the list of items to be included in the procedural timetable.

Paragraph 14

25. With respect to paragraph 14, it was agreed that the word "regularly" in the last sentence should be replaced by the word "accordingly".

Paragraph 15

26. With respect to the first sentence of paragraph 15, it was suggested that the words "preferably with the prior consent of the parties" should be inserted after the words "revisited and modified" to highlight the need for the parties' prior agreement. In response, it was recalled that the Working Group had agreed to include a general statement in the Notes, referring to the need for the arbitral tribunal to consult and where possible, to seek the agreement of the parties (paragraph 9 of the Notes) without repeatedly mentioning that provision throughout the Notes. After discussion, it was agreed that paragraph 15 should not be amended as suggested. It was further agreed to consider revising the heading of Note 1 and restructuring its sections to highlight the general application of paragraph 9.

27. It was further agreed that the last sentence of paragraph 15 should be revised to not rule out the possibility of the arbitral tribunal modifying a procedural arrangement agreed by the parties by seeking their agreement to such modification.

Paragraph 16

28. With respect to paragraph 16, it was agreed that the last sentence should be revised so as not to imply that the production of transcripts might limit open discussion at procedural meetings. It was further agreed that the paragraph may include a cross-reference to paragraph 134 of the Notes dealing with arrangements for a record of hearings.

Paragraph 18

29. With respect to paragraph 18, it was agreed that the words "at all" should be inserted after the words "in a procedural meeting" in the first sentence to clearly indicate that the hypothesis addressed in that paragraph related to the non-participation of a party as well as its representative in a procedural meeting.

Note 2 (Language or languages of the arbitral proceedings)

Paragraph 20

30. While preference for the use of a single language for the arbitral proceedings was suggested in the Notes, it was agreed that the first sentence of paragraph 20 should nevertheless mention "language or languages" in order to indicate that the parties would be free to choose either a single language or multiple languages. Paragraph 20 should then be restructured to deal with the choice of one language by the parties.

Paragraph 21

31. It was clarified that the phrase "a single template translation for similar documents with largely pictorial or numeric content" at the end of paragraph 21 referred more generally to documents that included standard content, and therefore the words "similar documents" should be replaced by the words "documents of similar or standardized content".

Paragraph 26

32. With respect to the second sentence of paragraph 26, it was agreed that, for the sake of clarity, the word "however" should be replaced by words along the lines of "irrespective of who paid the costs when they were incurred".

Note 3 (Place of arbitration)

Paragraph 28

33. With respect to paragraph 28, it was agreed that the second sentence should be revised to clarify that the "determination" of the place of arbitration had legal consequences. It was further agreed that the sentence should mention that such determination would have an impact on the determination of the court competent with respect to the arbitral proceedings. In addition, it was agreed to add the words "and challenges" after the words "appointment".

34. A suggestion that the third sentence of paragraph 28 should be expanded to provide for the need for the parties and the arbitral tribunal to familiarize themselves with not only

the "law" but also "practice", and "enforcement" law in addition to the arbitration law and any other relevant procedural law, did not receive support.

Paragraph 29

35. With respect to paragraph 29, a suggestion was made that certain aspects of subparagraphs (ii)(a) and (iii) might be redundant and should be clarified.

36. Another suggestion was that rules or regulations on confidentiality should be included as one of the prominent legal factors in selecting the place of arbitration. That suggestion did not receive support.

Paragraph 31

37. Recalling the discussions at the forty-eighth session of the Commission (A/70/17, para. 41), the Working Group agreed that paragraph 31 should include an additional sentence providing that the parties and the arbitral tribunal should consider that holding all hearings outside of the place of arbitration might have an impact at the stage of judicial review, setting aside or enforcement of the arbitral award in certain jurisdictions.

Note 4 (Administrative support for the arbitral tribunal)

38. A suggestion to expand Note 4 to address legal support in addition to administrative support was objected to as it fell outside the scope of the Notes.

Paragraph 36

39. The Working Group considered the two options contained at the end of paragraph 36 regarding the role of secretaries in relation to the decision-making of the arbitral tribunal. Preference was expressed for option 2 with the following modifications: (i) the word "typically" should be deleted, so as to clarify that secretaries should not be involved in any decision-making, save in relation to specific types of arbitration or in exceptional circumstances; (ii) concrete examples of such types of arbitration and exceptional circumstances should be provided; (iii) the word "function" should be deleted; (iv) the notion of secretaries performing tasks related to decision-making should be replaced by the notion of secretaries being involved or participating in the decision-making process. After discussion, it was agreed that paragraph 36 should be revised accordingly.

Paragraph 38

40. The suggestion to add the words "particularly if the secretaries carry out substantive tasks", after the words "performed by the secretary" in the first sentence of paragraph 38 did not receive support. It was said that such an addition would put too much emphasis on the substantive tasks carried out by the secretaries and might raise questions about what constituted a substantive task.

Note 5 (Costs of arbitration)

Paragraph 39

41. It was suggested that the in-house costs of the parties should be included in the list of costs mentioned in paragraph 39, possibly under subparagraph (iv), or as a separate paragraph providing information on the nature of those costs. It was pointed out that a reference to those costs would be important as the Notes should not mistakenly imply that only the legal fees of external counsel would be recoverable.

42. It was further mentioned that the treatment of in-house costs as part of arbitration costs was a controversial matter and the Notes should indicate the different approaches. After discussion, the Working Group agreed that that matter, which had not been previously discussed, should be brought to the attention of the Commission at its forthcoming session.

Paragraph 40

43. It was agreed to redraft paragraph 40 along the following lines: "It is useful for the arbitral tribunal to identify at the outset of the arbitral proceedings principles in determining

the costs of arbitration and the allocation thereof unless the agreement between the parties, the applicable arbitration law or arbitration rules adequately address those matters."

Paragraph 42

44. It was agreed that a reference to paragraph 39 (iii) should be added in the first sentence of paragraph 42, as the fees and expenses of arbitral institutions would usually be included in the deposit for costs.

Paragraph 43

45. It was suggested that paragraph 43 should clarify that the payment by a party of the deposit should not have an impact on that party's ability to challenge the jurisdiction of the arbitral tribunal. That suggestion received support.

Paragraph 46

46. The Working Group agreed to delete the words "portion of the" in the first sentence of paragraph 46 in order to make clear that the decision on costs concerned not only whether costs were recoverable in full or in part, but also whether certain items of the costs claimed were admissible or reasonable.

Paragraph 47

47. It was suggested that more detailed information should be given in paragraph 47 on how the costs should be allocated. It was said that, for instance, a party could be successful on certain claims and unsuccessful on others. After discussion, the Working Group agreed to add the words "in whole or in part" after the words "the costs of the arbitration should be borne by the unsuccessful party or parties" in the third sentence.

48. It was suggested that the last sentence of paragraph 47 should be redrafted along the following lines: "Conduct so considered might include a party's failure to comply with procedural orders of the arbitral tribunal or a party's procedural requests (for example, document requests, procedural applications and cross-examination requests) that are unreasonable, to the extent that any such failure or any unreasonable request actually had a direct impact on the costs of the arbitration and/or are determined by the arbitral tribunal to have unnecessarily delayed or obstructed the arbitral proceedings." That suggestion received support.

49. While a suggestion was made to include a reference to the complexity of the case as an additional element to be taken into consideration by the arbitral tribunal when allocating the costs, that suggestion did not receive support.

Paragraph 48

50. It was suggested that the last sentence of paragraph 48 should be simplified to state that decisions on costs could also be made when proceedings terminated without a final award. That suggestion did not receive support. It was explained that paragraph 48 adequately reflected that a decision on costs could be made at any stage of the arbitral proceedings. After discussion, it was agreed that the last sentence should be retained with additional examples.

Note 6 (Possible agreement on confidentiality; transparency in treaty-based investor-State arbitration)

Paragraph 51

51. With respect to the first sentence of paragraph 51, it was suggested that the duration of the confidentiality obligation (whether it was indefinite or for a set period) was also a matter to be covered in an agreement on confidentiality. With respect to the last sentence of paragraph 51, it was suggested that reference might also be made to all persons associated with the parties during the arbitration proceedings in addition to witnesses and experts. It was further suggested that subsection (iii) in paragraph 51 could be expanded to cover instances where a State that was a party to arbitration might be obliged to disclose certain

information under its laws, for example, legislation relating to providing public access to that information.

Paragraph 53

52. With respect to paragraph 53 which dealt with certain information or material deemed to be confidential to one of the parties, it was agreed that information relating to national security should also be included as an example, as this would be relevant in arbitration involving a State or a government entity.

Paragraph 54

53. A suggestion was made that the Notes should deal with issues that arose where a State or a government entity was a party to the arbitration in a comprehensive manner (see above, paras. 51 and 52). That suggestion was objected to on the basis that the Notes were intended to be used in a general and universal manner (see paragraph 1 of the Notes) without distinguishing different types of arbitration. It was further stated that paragraph 54 reflected a consensus reached by the Working Group that the issue of transparency in treaty-based investor-State arbitration, a topic worked on by UNCITRAL, deserved a different treatment and did not necessarily imply that it should be expanded to deal with arbitration involving States in a general manner.

54. With respect to the second sentence of paragraph 54, the suggestion to insert the words "and exceptions thereto" at the end of the penultimate sentence did not receive support. It was recalled that the purpose of that paragraph was to highlight that treaty-based investor-State arbitration might be subject to provisions on transparency, by contrast to commercial arbitration where confidentiality was viewed as an inherent characteristic. After discussion, it was agreed that paragraph 54 should remain unchanged.

Note 7 (Means of Communication)

Paragraph 55

55. With respect to paragraph 55, it was suggested that reference could be made under subparagraph (i) to the growing practice of using databases for uploading and sharing documents.

Note 8 (Interim measures)

Paragraph 60

56. With respect to the first sentence of paragraph 60, it was agreed that, for the sake of clarity, the words "for interim relief" should be deleted.

Paragraph 61

57. Recalling the discussion at the forty-eighth session of the Commission (A/70/17, para. 70), the Working Group agreed that the list of issues in paragraph 61 should include the possible conflict between an arbitral tribunal's decision on an interim measure and a court-ordered interim measure.

Note 11 (Points at issue and relief or remedy sought)

Paragraph 67

58. With respect to paragraph 67, a number of suggestions were made. One suggestion was that the words "and obtain the parties' approval of the list" should be added at the end of the first sentence. In response, it was said that requiring such approval did not reflect usual practice. A further suggestion was that paragraph 67 should reflect the practice of the parties preparing the list of points at issue. In response, it was state that such practice was not frequent and that such a list was normally prepared by the arbitral tribunal to clarify its understanding of the issues at stake. Yet another suggestion was that the paragraph could illustrate circumstances where the preparation of a list of points at issue might be unhelpful or inconvenient, for example, when the arbitration dealt with a complex case. Those suggestions did not receive support.

59. Furthermore, it was proposed that the list of points at issue should be characterized as being indicative and not exhaustive. It was further said that the list was often prepared in consultation with the parties and explicit reference to such consultation should be included in paragraph 67. It was mentioned that the preparation of such a list might be perceived as being distinct from decisions on the organization of arbitral proceedings, which was generally covered under paragraph 9 of the Notes. To reflect those suggestions, the Working Group agreed that the first sentence of paragraph 67 should be revised along the following lines: "It is often considered helpful for the arbitral tribunal to prepare, in consultation with the parties, an indicative list of points at issue (…) parties' submission."

Paragraph 69

60. With respect to paragraph 69, the Working Group agreed to add the words "a separate" before "judicial review" in the second sentence to highlight the situation where, under the applicable arbitration law, partial awards were subject to review before the final award was rendered.

Paragraph 70

61. With respect to paragraph 70, the Working Group recalled that, at the forty-eighth session of the Commission, it was mentioned that depending on the circumstances (including the applicable arbitration law), it might not always be appropriate for the arbitral tribunal to inform the parties of its concerns (for instance, if it found that the relief or remedy sought was not sufficiently precise) (A/70/17, para. 78). After discussion, the Working Group agreed that the current text sufficiently covered the views expressed at the Commission.

Note 12 (Amicable Settlement)

Paragraph 71

62. A suggestion was made that the following sentences should be inserted after the first sentence of paragraph 71: "Such initiative by the arbitral tribunal should not be considered a prejudgement of the outcome of the proceedings before the relevant body. No draft or proposal of settlement agreement should limit the rights of any party in any subsequent proceeding." It was further suggested that paragraph 71 could refer to the diversity of practices, in addition to referring to the different legislative approaches. After discussion, the Working Group recalled that the current text of paragraph 71 was the result of a compromise reached by the Working Group reflecting such concerns and agreed that it should remain unchanged.

Note 13 (Documentary evidence)

Paragraph 75

63. A suggestion was made that the words "the reasons for the request" in the second sentence of paragraph 75 should be replaced by more detailed wording along the following lines, which was found in the IBA Rules on the Taking of Evidence in International Arbitration: "a statement as to how the documents requested are relevant to the case and material to its outcome". That suggestion did not receive support as the Notes did not refer to specific standards or guidance texts and as the current formulation of paragraph 75 provided a more general and neutral approach.

Paragraph 77

64. The Working Group agreed that paragraph 77, which highlighted the different approaches to, and practices regarding, disclosure of documents, could be placed before paragraph 75.

65. A suggestion was made to add at the end of paragraph 77 the words "and adverse inferences, if any, resulting from non-disclosure". While it was agreed that that wording could be added as it reflected common practice, it was suggested that it could be better placed possibly in paragraph 73, as a tribunal would generally not make an advance determination on inferences that it would draw from non-disclosure.

Paragraph 79

66. It was suggested that paragraph 79 should note that certain arbitration rules prevented an arbitral tribunal from taking steps to obtain documentary evidence from a third party without obtaining the consent of the parties. After discussion, the Working Group agreed to insert the words "and permitted by applicable arbitration law and rules" after the words "where necessary".

Paragraph 81

67. The Working Group agreed that a reference to the "completeness", in addition to provenance and authenticity, of evidence should be inserted in paragraph 81.

Notes 14 to 18

68. Before the close of the session devoted to the consideration of the Notes, the Working Group heard suggestions with respect to the remaining parts of the Notes, which would be reflected in the updated draft of the Notes for consideration by the Commission.

Note 14 (Witnesses of fact)

69. With respect to paragraph 86, the opening words "Subject to the applicable arbitration laws and arbitration rules" should be deleted.

70. With respect to paragraph 87, the words "sufficient to" should be replaced by the words "that may", in the first sentence; the second sentence should be placed at the end of that paragraph.

71. With respect to paragraph 89, the first sentence should refer to the party in addition to the persons related to that party and refer to divergent approaches in how a party not eligible to testify as a witness could nevertheless be heard.

72. With respect to paragraph 90, the second sentence should include a reference to contacts made to seek information about the facts of the case, in addition to contacts in relation to the preparation of written witness statements and oral testimony. Paragraph 90 should indicate that international arbitration could differ from domestic court practice in respect of the permissibility of pre-testimony contact, as well as in respect of the nature of such contact. The last sentence of that paragraph should be expanded to reflect the controversial nature and divergent approaches to the preparation of the witness for the hearing.

73. Paragraph 91 should mention that the parties should be informed that the arbitral tribunal might draw inferences from non-appearance of a witness.

74. With respect to paragraph 92, the words "or to lend support to the efforts of parties by inviting the appearance of a witness" should be added at the end of that paragraph.

Note 15 (Experts)

75. With respect to paragraph 94, the words "or otherwise assisting it in matters requiring specialized knowledge or skills" should be added at the end of that paragraph.

76. With respect to paragraph 97, the words ", factual assumptions" should be inserted before the words "and issues to be covered" in the first sentence.

77. As the parties would always be entitled to comment on a single joint report of the experts, the last sentence of paragraph 100 should be amended accordingly. Further, the question of whether the parties would be bound by the conclusions of the joint report by experts should be addressed.

78. Paragraph 104 should reflect that parties would usually be given an opportunity to comment on the expert's mandate, in addition to expert's qualification, impartiality and independence.

79. Paragraph 106 should expand on the question of ex-parte communication between an expert and a party and clarify how an expert's ex-parte communication would be treated.

80. Paragraph 107 should clarify the meaning of "formal and informal submissions" including the possibility for the parties to comment on the tribunal-appointed expert's report through their own expert's report.

Note 16 (Inspection of a site, property or goods)

81. The words "and the manner" should be inserted after the words "time schedule" in paragraph 111.

Note 17 (Hearings)

82. With respect to paragraph 118, the words "before or during the hearings" should be added at the beginning of the first sentence. The last sentence of paragraph 118 should state that the parties would be able to provide a summary of the case as it presented itself at the end of the proceedings.

83. With respect to paragraph 122, the manner in which time should be kept throughout the proceedings should be mentioned in a general fashion.

84. With respect to paragraph 125, cross-reference should be made to paragraph 132 of the Notes, which illustrated the order of questioning witnesses. The last sentence of paragraph 125 could be deleted as it did not reflect current practice.

85. With respect to paragraph 126, the second sentence should refer not only to "experts" but also to "witnesses".

86. With respect to paragraph 128, the Notes should indicate the flexibility given to the arbitral tribunal to not examine or cross-examine a witness even when requested by a party as a means to effectively manage the proceedings. In response, it was mentioned that such flexibility could raise concerns about due process and would require further consideration.

87. With respect to paragraph 129, reference to "managing directors or executives" should be included in addition to the example of "in-house legal counsel".

88. With respect to paragraph 131, the words "or when no arbitration rules apply" in the last sentence should be deleted.

Note 18 (Multiparty arbitration)

89. With respect to the second sentence of paragraph 137, the following could be added: "for example, if all the parties do not have an equal say in the appointment of the arbitral tribunal, it may raise concerns about the fairness of the proceedings".

V. International commercial conciliation: enforceability of settlement agreements

90. Upon completing its deliberation of the revision of the UNCITRAL Notes on Organizing Arbitral Proceedings, the Working Group considered the topic of enforceability of settlement agreements on the basis of document A/CN.9/WG.II/WP.195. It was agreed that section B on validity and content of settlement agreements would be considered in conjunction with section D on enforcement procedure and defences to enforcement. Furthermore, the Working Group agreed to consider the formulations of possible provisions contained in document A/CN.9/WG.II/WP.195 with the aim of delineating the various issues and focusing the discussion. Paragraphs referred to in the sections below are those contained in document A/CN.9/WG.II/WP.195.

91. A comment was made that the Working Group should be mindful of the need to ensure that the work on enforceability of settlement agreements would not result in duplication of efforts with work undertaken by the Hague Conference on Private International Law (the Convention on the Choice of Court Agreements (2005) and the Judgments Project). Further, it was said that the scope of a possible instrument on enforcement of settlement agreements (referred to below as the "instrument") should be limited to apply to settlement agreements resulting from conciliation and should preserve the flexible nature of conciliation. It was generally felt that those matters could be dealt with as the Working Group made progress.

A. International commercial settlement agreements resulting from conciliation

92. Recalling the understanding of the Working Group at its sixty-third session that the instrument should apply to enforcement of international commercial settlement agreements resulting from conciliation, the Working Group engaged in discussion on the different aspects to be considered.

"International" settlement agreements

93. Recalling the discussions during the preparation of the UNCITRAL Model Law on International Commercial Conciliation (referred to below as the "Model Law"), which only provided a definition of an international conciliation process, a suggestion was made that there was no need to limit the scope of the instrument to international settlement agreements and that the aim should be to provide an enforcement mechanism regardless of whether the settlement agreement was international or not. It was stated that such an approach would increase the usefulness of the instrument and take into account the evolving and global business practices. That suggestion did not receive support.

94. It was widely felt that the scope of the instrument should be limited to "international" settlement agreements and that the instrument should provide clear and simple criteria for determining whether or not a settlement agreement fell under the scope of the instrument. It was further noted that subjective elements should not form the basis of such criteria.

95. In that context, it was pointed out that the formulations in paragraphs 10 and 11 provided for a useful basis. However, it was noted that they were slightly distinct as the formulation in paragraph 11 not only defined what an "international" settlement agreement was but also provided the scope of application of a possible convention, thus elaborating the conditions for its application (i.e. that the State where enforcement was sought would need to be a Contracting State).

96. The Working Group then considered the formulation in paragraph 10. It was widely felt that subparagraph (a) as contained in paragraph 10 provided clear and objective criteria, which would be sufficient for the purposes of the instrument.

97. In that context, a suggestion was made that the instrument might provide a more detailed explanation of what was meant by a "party", taking into account the current global business practices as well as complex corporate structures. For instance, it was suggested that consideration be given to the shareholding of the parties. It was stated that such an approach could effectively broaden the scope of the instrument.

98. With respect to subparagraph (b) as contained in paragraph 10, a number of concerns were expressed: (i) that it introduced unnecessary complexities, (ii) that it might touch upon certain aspects of domestic law or laws governing domestic settlement agreements, and (iii) that it would be difficult to ascertain whether a settlement agreement fell within that category. While there was some support for retaining subparagraphs (b)(i) and (ii) in paragraph 10, doubts were expressed with regard to subparagraph (b)(iii). It was generally felt that the instrument should not apply to the enforcement of a settlement agreement concluded by parties that had their places of business in the same State, even if the enforcement was sought in another State. Accordingly, there was general support to delete subparagraph (b)(iii) in paragraph 10 and subparagraph (ii) in paragraph 11. Nonetheless, there was some support to retain subparagraph (b)(iii) in paragraph 10.

99. Another suggestion was that reference could be made to article 1(3)(c) of the UNCITRAL Model Law on International Commercial Arbitration, which provided that an arbitration was also international if the parties expressly agreed that the subject matter of the arbitration agreement related to more than one country.

100. With respect to the formulation in paragraph 12, a number of suggestions were made. One was that the last sentence could be deleted as the scope of the instrument would be limited to "commercial" settlement agreements, which presupposed that parties would usually have a place of business. In response, it was pointed out that non-business entities and natural persons might also engage in commercial activities and conclude settlement agreements, which would require a reference to their habitual residence. It was further

pointed out that there existed sufficient guidance on the notion of place of business. Another view was that the notion of "place of business" should be defined in the instrument.

101. Another suggestion was that the concept of "habitual residence" could be further developed based on the statutory seat, the law of incorporation, the place of central administration, or the principal place of business.

"Commercial" settlement agreements

Notion of "commercial"

102. The Working Group recalled that, at its sixty-third session, it was generally felt that the instrument should apply generally to the enforcement of "commercial" settlement agreements. The Working Group reiterated its understanding that the instrument should apply to enforcement of settlement agreements of a commercial nature. The Working Group considered how to define the commercial nature of the settlement agreement.

103. Preference was generally expressed for stating in general terms that the instrument would apply to commercial settlement agreements, without providing for an illustrative list or definition of the term "commercial" as suggested in footnote 8.

104. It was suggested that, depending on the form of the instrument, the notion of commercial could be considered through the scope provisions of the instrument. In that respect, the following drafting suggestion was made: "The instrument shall apply in commercial matters".

105. Suggestions were made that the definition of "commercial" should be considered in conjunction with the grounds for refusing enforcement particularly in relation to grounds indicated in subparagraphs A and B in paragraph 55. It was further suggested that the definition of the term "commercial" should be considered in light of its possible impact on the enforcement of settlement agreements.

Exclusions and reservations

106. It was generally felt that consumers, family and employment law matters should be explicitly excluded. It was also generally felt that there were no other exclusions to be mentioned in the instrument. A suggestion was made that the instrument should refer to family or employment "matters" instead of "law". In response, it was stated that family "matters" could encompass commercial disputes involving family member even without family law aspects, such as divorce or custody, and such disputes would actually be best suited for resolution by conciliation.

107. It was suggested that the use of the term "consumer" in option 2 in paragraph 18 should be avoided as it was too generic, and understood differently in various jurisdictions. As a drafting suggestion, reference was made to "settlement agreements concluded by one of the parties for personal or household purposes".

108. It was mentioned that the scope of family law matters was different in various jurisdictions and that clarification might be necessary possibly with examples (for example, religious bequests, inheritance and guardianship).

109. The Working Group reiterated its understanding that it would not be desirable for the instrument to include a blanket exclusion of settlement agreements involving government entities as those entities also engaged in commercial activities and might seek to use conciliation to resolve disputes.

110. It was suggested that if the instrument applied to commercial settlement agreements and a settlement agreement between a government entity and an investor was considered to be of a commercial nature under the applicable law, such an agreement should fall under the scope of the instrument.

111. It was suggested that if the instrument were to take the form of a convention, option 1 of paragraph 21 should be amended to only permit a State to declare that it would not apply the instrument to settlement agreements to which its government or governmental entities or agencies were a party.

112. It was suggested that the words "including their exclusion from the applicability of the instrument" could be inserted in option 2 of paragraph 21.

113. It was suggested that the instrument should not apply to liability of a State for its acts or omissions in the exercise of its authority (*Acta jure imperii*). It was suggested that the instrument should not refer to notions of State immunity.

114. After discussion, the Working Group agreed to further consider options 1 and 2 in paragraph 21 as well as the option provided above (see above, para. 113).

Settlement agreements resulting from "conciliation"

115. A suggestion was made that the instrument should apply to settlement agreements regardless whether they resulted from conciliation or not, as long as the parties to the settlement agreement expressly agreed to the application of the instrument. Although it was mentioned that the objective should be to promote all types of alternative dispute resolution methods without favouring conciliation over other means, that suggestion did not receive support. The Working Group reiterated its understanding that the instrument should apply to settlement agreements resulting only from conciliation.

116. With respect to the possible definition of the term "conciliation", it was reiterated that it should be broad and inclusive to cover different types of conciliation techniques. There was general support that the definition contained in article 1(3) of the Model Law as well as the formulation provided in paragraph 23, which built on article 1(3) of the Model Law with some minor adjustments, provided a good basis for discussion.

117. A suggestion was made that "conciliation" should be defined as a "structured" process to emphasize that the process involved a third person that facilitated the settlement agreement and to differentiate settlement agreements resulting from conciliation and those resulting from mere negotiation. While there was some support for that insertion, it was noted that it would constitute a departure from the definition contained in the Model Law and the purported aim of that insertion was already sufficiently highlighted in that definition. It was further mentioned that the term "structured" was not commonly used to qualify the conciliation process and could be understood differently, possibly introducing domestic requirements on conciliation into the instrument.

118. Another proposal was that the definition in article 1(3) of the Model Law should be supplemented by words along the following lines: "This definition excludes settlement agreements approved by a court or concluded before a court in the course of proceedings, as well as those formalized as awards on agreed terms issued by arbitral tribunals." The possible implication of that proposal in situations where an agreement would be enforced in more than one jurisdiction and could be approved by one of the courts as part of that process was questioned. In response, it was clarified that that exclusion should not apply in such circumstances. It was generally felt that it would not be appropriate to place such text within the definition of "conciliation". It was agreed that the proposed text would be considered when the Working Group discussed issues relating to settlement agreements reached during judicial or arbitral proceedings (see below, paras. 122-131).

119. A question was raised whether the term "conciliation" as defined in the instrument would cover conciliation administered by, or undertaken under, the auspices of an institution. In response, it was widely felt that the two formulations mentioned above (see para. 116) were broad enough to cover such type of conciliation and that it would not be necessary to include an explicit reference.

120. A view was expressed that the instrument should refer to "mediation" instead of "conciliation", as it was a more widely used term.

121. After discussion, it was widely felt that the definition of "conciliation" should not be overly prescriptive and should illustrate the key features of the process (i.e. that a third person assisted the parties to reach an amicable settlement of their dispute) irrespective of the terminology used to refer to that process. In that context, general support was expressed for using the definition in article 1(3) of the Model Law as a basis for future work, possibly incorporating the adjustments provided in the formulation in paragraph 23.

Settlement agreements reached during judicial or arbitral proceedings

122. The Working Group then considered whether settlement agreements reached during judicial or arbitral proceedings should fall within the scope of the instrument. It was mentioned that such settlement agreements could be broadly categorized into those that were recorded in a judicial decision or an arbitral award (on agreed terms) and those that were not recorded as such.

123. With respect to those that were recorded in a judicial decision or an arbitral award, it was mentioned that inclusion of such settlement agreements within the scope of the instrument could lead to overlap or conflict with the Convention on Choice of Court Agreements and the Judgements Project of the Hague Conference on Private International Law as well as the New York Convention on the Recognition and Enforcement of Foreign Arbitral Awards (referred to below as the ''New York Convention''). It was cautioned that their inclusion could result in unnecessary complications in the implementation of the instrument and possibly open doors to abuse by parties. It was further stated that a single legal text should not be subject to different enforcement regimes. Along the same line, it was mentioned that even if a judicial decision or an arbitral award recorded the terms of a settlement agreement, it deserved a different treatment and should be duly enforced under the relevant regime. Accordingly, it was generally felt that a settlement agreement recorded in a judicial decision or an arbitral award should not fall within the scope of the instrument.

124. Nonetheless, views were expressed that such exclusion would result in depriving the parties of the opportunity to utilize the enforcement regime envisaged by the instrument. It was also noted that possible complications resulting from multiple enforcement regimes should be left to be addressed by courts where enforcement was sought. A concern was expressed with respect to the possibility of an award on agreed terms not being subject to court enforcement, for example, if the court found such an award to not fall within the scope of the New York Convention. It was stated that in such a scenario, in addition to not being able to enforce the award, the affected party would be deprived of the opportunity to resort to the enforcement mechanism envisaged by the instrument.

125. With respect to settlement agreements reached during judicial or arbitral proceedings but not recorded in a judicial decision or an arbitral award, it was widely felt that they should fall within the scope of the instrument. It was mentioned that even if the parties initially sought to resolve their dispute through judicial or arbitral proceedings, that should not result in excluding the settlement agreement from the scope of the instrument, as long as the agreement resulted from conciliation and was not recorded in a judicial decision or an arbitral award.

126. A number of different approaches to address issues relating to settlement agreements reached during judicial or arbitral proceedings were suggested.

127. One approach was that the definition of "conciliation" would expressly carve out settlement agreements recorded in a judicial decision or an arbitral award from the scope of the instrument (see above, para. 118).

128. Another approach was to address the issues in the scope provisions of the instrument along the following lines: "The instrument applies to settlement agreements, which were made in the course of judicial or arbitral proceedings but not recorded as a judgement or an arbitral award".

129. Yet another approach was to provide States with the flexibility in addressing issues relating to settlement agreements reached during judicial or arbitral proceedings, possibly through a declaration or a reservation, if the instrument were to be a convention. It was noted that such an approach would avoid blanket exclusions in the instrument, which would carve out settlement agreements reached during judicial or arbitral proceedings entirely, and provide States that wished to do so the option to apply the instrument to such settlement agreements. It was, however, cautioned that such an approach could result in multiple regimes complicating the enforcement procedure and possibly in forum shopping by parties seeking enforcement.

130. A fourth approach was that there would be no need to specify or highlight those issues in the instrument, as it should be left to the courts to determine whether the instrument would apply to settlement agreements reached during judicial or arbitral proceedings.

131. In that context, the Working Group also considered the possible impact that the involvement of a judge or an arbitrator in the conciliation process could have on the applicability of the instrument to settlement agreements resulting from that process. It was mentioned that there could be instances where a judge or an arbitrator might initiate the conciliation process with a third party acting as a conciliator and where the judge or the arbitrator might itself facilitate an amicable settlement, if permitted to do so. It was felt that a settlement agreement resulting from both scenarios would fall under the scope of the instrument and that mere involvement of a judge or an arbitrator should not result in excluding the settlement agreement from the scope of the instrument.

Definition of "settlement agreement"

132. It was suggested that a definition of "settlement agreement" could read as follows: "A settlement agreement is an agreement in writing that is concluded by the parties to a commercial dispute, that results from conciliation, and that resolves all or part of the dispute." It was mentioned that the elements therein could be included either in the definition or formulated as form requirements. The Working Group agreed to further consider the issue at a later stage.

B. Form and other requirements of settlement agreements

A written agreement concluded by the parties

133. With respect to form requirements of settlement agreements, it was reiterated that those requirements should not be prescriptive and should be set out in a brief manner preserving the flexible nature of the conciliation process. It was generally agreed that the instrument should require that the settlement agreement should be in writing and indicate the agreement of the parties to be bound by the terms of the settlement agreement. It was also widely felt that the principle of functional equivalence embodied in UNCITRAL texts on electronic commerce could be reflected in the instrument, allowing for the use of electronic and other means of communication to meet the form requirements therein.

134. A suggestion was made that the instrument should require that the settlement agreement be in a "single document" as distinct from mere exchange of communication between the parties. While there was some support for that suggestion, it was questioned whether the notion of "single document" was clear and whether it would be feasible to implement such a requirement considering that settlement agreements varied greatly in form and in content. It was also cautioned that such a requirement might result in excluding certain documents explicitly mentioned in the single document. In that context, attention was drawn to a wide range of contract formulation practices, including incorporation by reference.

135. Another suggestion was that there should be an indication in the settlement agreement that it superseded all previous relevant agreements between the parties. Yet another suggestion was that the instrument should require that a settlement agreement be recorded or deposited with a public or supervisory body so that its performance could be monitored. Those suggestions did not receive support.

Other requirements

136. The Working Group considered possible additional requirements in paragraph 42, which would be an indication: (i) that a conciliator was involved in the process; (ii) that the settlement agreement resulted from conciliation; (iii) that the parties to the settlement agreement were informed of the enforceability of the settlement agreement before or upon its conclusion; and (iv) that the parties opted into the enforcement mechanism envisaged by the instrument.

137. In relation to requirements (i) and (ii) in paragraph 42, it was widely felt that they were relevant, and could be retained, in particular following the understanding of the Working

Group that the instrument should cover settlement agreements resulting from conciliation (see above, para. 92).

138. However, diverging views were expressed on how to formulate such additional requirements. A view was that specific form requirements should be provided for (such as that the conciliator should sign the settlement agreement certifying that a conciliation took place, or that he or she should indicate his/her identity in the settlement agreement or submit a separate document for that purpose). One advantage of such form requirements, it was said, would be to avoid uncertainty about the applicability of the instrument. Those favouring that approach expressed different views on whether such requirements should be recorded in the settlement agreement itself or in a separate document.

139. A different view was that formulating such form requirements would run contrary to the objective of providing a simple and straightforward enforcement mechanism, aimed at promoting conciliation. In addition, formalities required in the conciliation process and its outcome varied among jurisdictions and such specific requirements would add another layer of complexity. It was said that form requirements in the instrument would bring more rigidity, without improving certainty. Further it was said that a number of States did not have legislation on conciliation and that requiring formalities might be detrimental to the development of conciliation in those States not familiar with conciliation.

140. Therefore, it was suggested that a preferable approach would be to avoid detailed form requirements which would be an impediment to the use of the instrument and that the instrument should only include those requirements necessary to ascertain that a settlement agreement fell within its scope. As an illustration of such an approach, a proposal was made that the parties could be required to show through appropriate means that conciliation took place. It was said that such an approach would take into account the context in which the conciliation took place, promote flexibility, while giving the necessary level of certainty as to the process that led to the settlement agreement. It was suggested that that proposal should be elaborated for further consideration.

141. The requirement (iii) in paragraph 42 was generally considered to be superfluous, particularly if the requirement (iv) were to be retained.

142. Diverging views were expressed in relation to the requirement (iv) in paragraph 42 (see also below, paras. 180-182). In favour of including that requirement in the instrument, it was said that an opt-in mechanism would ensure that parties would be aware of the expedited enforcement mechanism envisaged by the instrument. It was highlighted that the requirement for express consent would avoid the situation where the parties to conciliation would find a strengthen regime imposed upon them, which they might not find desirable. Contrary views were expressed that such an opt-in mechanism would limit the application of the instrument and should thus be avoided. In addition, it was observed that the New York Convention did not require parties to opt-in. From a practical perspective, it was said that, in most cases, it would be unlikely for the parties to agree to an expedited enforcement at the final stages of the conciliation process.

143. It was pointed out that form requirements in domestic laws governing conciliation were diverse and a possible approach for including form requirements in the instrument would be to permit States to make declarations, yet on a limited number of requirements. A further suggestion was that the instrument should focus on the requirements necessary to enforce "international" settlement agreements, thereby avoiding any application of requirements found in domestic legislation.

144. During the discussion on possible additional requirements, the need to find a balance between, on the one hand, the formalities that would be required to ascertain that the settlement agreement resulted from conciliation and, on the other, the need for the instrument to preserve the flexible nature of the conciliation process, was underlined. As a general comment, it was said that such additional requirements could be formulated as a pre-condition for applying for enforcement or as defences for resisting enforcement.

C. Enforcement procedure and defences to enforcement

Direct enforcement

145. With respect to the formulation in paragraph 45, it was suggested that reference should be made to "recognition" in both paragraphs therein (see also below para. 146). It was further suggested that the placement of that formulation in the instrument would need to be reconsidered as it dealt with the procedural aspects of obtaining enforcement and should follow the provisions on conditions for enforceability.

Notion of recognition

146. The Working Group considered whether a settlement agreement would need to be given effect through a procedure akin to recognition and what legal value such a procedure would give to settlement agreements. Different views were expressed. One was to adopt the approach of the New York Convention and refer to both recognition and enforcement. Another was that it would be preferable to avoid referring to the notion of "recognition". It was explained that the term "recognition" was understood in certain jurisdictions to have res judicata effect and the application of that principle might bear different consequences depending on the jurisdiction. Another view was that the notion of recognition should be qualified or its meaning elaborated in the instrument. The Working Group agreed to consider that matter further at a future session.

Defences to enforcement and applicable law

147. The Working Group considered the possible defences to enforcement, based on the assumption that the instrument would provide direct enforcement. It was reiterated that the defences in the instrument should be limited and not cumbersome for the enforcement authority to implement.

148. As a general comment, it was said that the standard for enforcement, including the defences to be provided in the instrument should not be lower than those provided for enforcement of arbitral awards under the New York Convention. Further, a preferable approach would be to differentiate between defences that could be raised by the parties and those that might be raised by the enforcing authority at its own initiative (ex officio), as provided in the formulation in paragraph 56.

149. A suggestion was made to determine, for the purposes of the discussion, whether settlement agreements were to be treated as contracts between private parties or acts of a particular nature resulting from a specific dispute resolution procedure.

150. The Working Group proceeded to consider the list of defences contained in paragraphs 55 and 56 as a basis for substantive discussion and not for drafting purposes.

Incapacity, coercion and fraud (subparagraph A in paragraph 55 and subparagraph 1(a) in paragraph 56)

151. A suggestion was made that incapacity should not be included as a defence as that matter would normally have been raised by the parties during the conciliation process or at the time of the conclusion of the settlement agreement. The example of institutional rules addressing the parties' capacity or authority to conclude the settlement agreement at the outset of the conciliation process was given.

152. In response, it was said that lack of capacity, as a ground for refusing enforcement, covered a wide range of situations (for instance, incapacity in the context of bankruptcy) and was commonly found in international instruments as well as domestic legislation. After discussion, it was generally felt that incapacity should be retained in the list of defences.

153. Support was also expressed for retaining "coercion" and "fraud" as defences, with the suggestion that alternative or more general wording might be preferable. For instance, it was suggested that paragraph 1(c) of the formulation in paragraph 56 could constitute a general provision that would also cover matters relating to coercion and fraud (see below, para. 159). It was further suggested that it might be desirable to provide that that defence would only

apply when the party enforcing the settlement agreement was involved in the coercion or fraud.

Subject matter of the settlement agreement not capable of settlement (subparagraph B in paragraph 55 and subparagraph 2 (a) in paragraph 56)

154. There was general agreement to retain "the subject matter of the agreement not capable of settlement by conciliation" as a defence, which could also be considered by the enforcing authority ex officio, as proposed in the formulation in paragraph 56.

Subject matter of the settlement agreement contrary to public policy (subparagraph C in paragraph 55 and subparagraph 2 (b) in paragraph 56)

155. There was general agreement to retain public policy in the list of defences, which could also be considered by the enforcing authority ex officio.

156. It was noted that public policy covered both substantive and procedural aspects. It was said that the flexible nature of conciliation could be easily used by parties to resist enforcement using the procedural public policy defence. In response, it was said that the enforcing authority would duly take into account the characteristics of conciliation in assessing such defence.

157. It was proposed that reference should be made to "international" public policy, as that notion would be more restrictive. In response, it was said that there was an established trend in case law that interpreted "public policy" more narrowly when there was an element of extraneity. It was suggested that the notion of international public policy might be understood as public policy shared by a number of States, which would make it more difficult for States to adopt the instrument.

Contrary to the terms and conditions of the settlement agreement (subparagraph 1 (b) in paragraph 56)

158. No comments were made with respect to subparagraph 1 (b) in paragraph 56.

Validity of the settlement agreement (subparagraph 1 (c) in paragraph 56)

159. It was suggested that subparagraph 1(c) in paragraph 56 could constitute a provision that would address matters relating to the validity of the settlement agreement in general terms. It was suggested that the words in square brackets could be retained for further consideration.

160. Concerns were expressed that subparagraph 1(c) would open the possibility of refusing enforcement in a wide range of circumstances, and result in the application of domestic legislation requirements, that might be too broad and include formal requirements thereby increasing the complexity and uncertainty of the outcome of enforcement under the instrument. In response, it was said that the inclusion of a provision in the instrument that the standard for enforcement would not be lower than those provided for enforcement of arbitral awards under the New York Convention (see above, para. 148) could accommodate those concerns on the understanding that such a provision would also apply to form requirements. It was suggested that following the decision of the Working Group at its sixty-third session that there should be no review mechanism as a pre-requisite to enforcement (A/CN.9/861, paras. 80-84), the instrument should not give the enforcement authority the ability to interpret the validity defence to impose requirements in domestic law. Suggestions were made to either omit validity in the list of defences, or to limit it to the validity of the settlement agreement, determined in accordance with the law deemed applicable to it by the enforcing authority. In that context, it was pointed out that it might be useful to differentiate the grounds for resisting enforcement and the grounds for challenging the validity of the settlement agreement, which might not necessarily fall under the competence of the enforcing authority. After discussion, there was a general understanding that consideration of the validity of the settlement agreement by the enforcing authority should not extend to form requirements.

161. Views were expressed that the terms "[not valid]" should be deleted from subparagraph 1(c), so that the provision would only refer to the settlement agreement being

"null and void, (…) enforced" following wording used in article II of the New York Convention and article 8 of the Model Law on International Commercial Arbitration.

The settlement agreement is not binding, is not final, has been subsequently modified or the obligations therein have been performed (subparagraph 1 (d) in paragraph 56)

162. It was generally felt that the provisions of subparagraph 1(d) in paragraph 56 could be retained and encompass other situations, such as when the settlement agreement contained conditional or reciprocal obligations and when certain obligations in the settlement agreement had been breached.

Enforcement of the settlement agreement would be contrary to a decision of another court or competent authority (subparagraph 1(e) in paragraph 56)

163. With respect to subparagraph 1(e), in paragraph 56, a few questions were raised. One was with regard to the meaning of "another court or competent authority". To avoid ambiguity, it was suggested that reference should be made to "the competent court or authority at the place where the settlement agreement was concluded or the place chosen by the parties". In response, it was noted that such a provision would be at odds with certain instruments or approaches, for example, the Convention on Jurisdiction and the Recognition and Enforcement of Judgments in Civil and Commercial Matters (Lugano, 2007). It was generally felt that there was no need to provide for such specificity in the instrument, particularly as it would be difficult to determine the place where the settlement agreement was concluded.

164. In response to a question on what types of decisions by another court or competent authority would be taken into account by the enforcing authority, it was mentioned that they could be decisions on the validity of the settlement agreement as well as those in relation to the recognition and enforcement of the settlement agreement in another State. In that context, a suggestion was made to limit the types of decisions to those that found a settlement agreement null and void. However, it was also suggested that decisions by another court or competent authority which found, for example, that an obligation had been performed or performed in part, might also be a valid ground on which an enforcement authority might wish to rely for refusing enforcement.

165. Diverging views were expressed with respect to whether subparagraph 1(e) should be retained in the instrument. One view was that there was merit in retaining the defence, as it was presented in a permissive manner ("may be refused") and it could accommodate the interest of States that might have obligations under certain treaties regarding recognition of decisions by foreign courts. It was highlighted that the enforcing authority would, in any case, have the final word in the enforcement process.

166. Another view was that there was no need to retain the defence in the instrument. It was pointed out that the provision as currently drafted could invite forum shopping by parties as it was not clear which would be the competent court or authority making the decision, possibly hindering the enforcement stage. It was also noted that the provision might inadvertently expand the principle of *res judicata* to those decisions that did not have such effect. In addition, it was stated that a refusal of enforcement by a court or competent authority in another State should not have an impact on the decision to be made by an enforcing authority.

Additional defences

167. In addition to the defences provided in the formulations in paragraphs 55 and 56, the following were suggested as possible defences: non-compliance with the form requirements contained in the instrument, mistake or misrepresentation in the settlement agreement and that the settlement agreement was obtained by duress or deceit.

Relationship of enforcement proceedings with judicial or arbitral proceedings

168. The Working Group then considered whether the instrument should include a provision on the impact judicial or arbitral proceedings with respect to settlement agreements could have on their enforcement process. Acknowledging the benefits of and the need for the enforcing authority to duly respect decisions by a court or

an arbitral tribunal, it was suggested that the instrument could provide for a non-mandatory rule that the enforcing authority might adjourn the enforcement process in such circumstances.

169. After discussion, it was widely felt that the instrument could include a provision based on article VI of the New York Convention, for example, providing that the enforcing authority might, if it considered proper, adjourn the enforcement process when there existed an application for a judicial or arbitral proceedings about the settlement agreement, in accordance with the rules of procedure of the enforcing State.

D. Conciliation process and content of settlement agreements

Impact of the conciliation process and the conduct of conciliators

170. The Working Group then engaged in a discussion on whether the conciliation process or the conduct of a conciliator could have an impact on the validity of the settlement agreement and its enforceability.

171. One view was that non-compliance by conciliators with standards of conduct or relevant domestic legislation (for example, misconduct or lack of impartiality), should have an impact on the settlement agreement and that the instrument should include a provision along the lines of article V(1)(d) of the New York Convention. It was mentioned that if a party furnished proof to the enforcing authority that the conciliation process had been tainted, the enforcing authority might refuse the enforcement of the settlement agreement. It was also noted that serious non-compliance would fall under the public policy defence.

172. In response, the voluntary nature of the conciliation process was highlighted. It was emphasized that parties were free to withdraw from the process at any time, that the conciliator lacked the authority to impose a settlement and that a settlement was a result reached voluntarily between the parties. It was also mentioned that conciliators were not subject to the same impartiality requirements as arbitrators or judges and as such, the breach of impartiality by a conciliator should not amount to a defence for refusing enforcement. It was reiterated that it was the parties themselves that concluded the final settlement agreement. In that context, a question was posed whether a different approach would be required if one of the parties became aware of the misconduct of the conciliator or of the other party only after the conclusion of the settlement agreement. After discussion, it was generally felt that such misconduct would usually qualify as one of the defences provided in the formulation in paragraph 56 (see above, paras. 153 and 167).

173. In that context, it was noted that there were existing resources that provided information about issues which arose at the stage of enforcement of settlement agreements. Delegations were invited to provide information to the Secretariat so as to assess current practice.

174. During the discussion, a suggestion was made that, while the instrument need not deal with the impact of the conciliator's conduct on the enforceability of the settlement agreement, it might be necessary to ensure consistency of the instrument with the Model Law which included a mandatory provision, article 6 (3), which required the conciliator to maintain fair treatment of the parties.

175. After discussion, there was an emerging view that serious misconduct during the conciliation process, which had an impact on its outcome, would probably be covered by the other defences to be provided for in the instrument. Delegates were encouraged to review the experience of those jurisdictions where the enforcement of settlement agreements had been the subject of litigation. It was suggested that that experience might be of assistance in confirming the emerging view of the Working Group.

Set-off

176. A suggestion was made that the instrument should not deal with instances where the settlement agreement might be used for set-off purposes based on the same reasons that it would be inappropriate for the instrument to deal with the recognition of settlement agreements. That issue was left for further discussion by the Working Group.

Dispute resolution clause in settlement agreements and party autonomy

177. Acknowledging that a settlement agreement might include a dispute resolution clause (for example, an arbitration clause or a choice of court provision), the Working Group considered whether it would be necessary for the instrument to deal with those issues. It was generally felt that the instrument would not need to include any provisions on the matter, as the treatment of such dispute resolution clauses were dealt with in other texts (for example, the New York Convention or the Convention on Choice of Court Agreements) and as the objective of the instrument was to facilitate enforcement.

178. In that context, the following example was provided: if a party were to seek enforcement of a settlement agreement which included an arbitration clause without engaging in arbitration, the party against whom the enforcement was invoked could raise a defence under subparagraph 1(b) in paragraph 56, as it would be contrary to the terms and conditions of the settlement agreement. If the enforcing authority were to be a court, it would also refer the parties to arbitration in accordance with article II(3) of the New York Convention.

179. It was generally felt that the parties' choice of dispute resolution included in the settlement agreement should be respected. It was noted that a distinction should be made between the dispute in merit and the enforcement process. However, it was also noted that such a distinction might not be practical.

Parties' agreement to apply the instrument (opt-in)

180. While the issue of whether the application of the instrument would depend on the parties' agreement to its application would remain under discussion at a future session, diverging view were expressed (see also above, para. 142).

181. There was support for the opt-in mechanism so as to provide parties with that option, to highlight the voluntary nature of the conciliation process and to raise the parties' awareness on the enforceability. However, it was also mentioned that requiring an opt-in by the parties might run contrary to the instrument having a broad scope, raise complexities if the instrument were to be a convention, which allowed for declaration by the States, and might not be practical at the conclusion of the settlement agreement. It was further pointed out that the opt-in by the parties should be distinguished from the possible options provided to States in the instrument (if it were to be a convention) to make a separate declaration requiring the parties' agreement to apply the enforcement mechanism envisaged by the instrument.

182. Although there was support for the opt-in requirement for the parties, it was felt that it was premature to make a decision, as it would largely depend on the form of the instrument and the mechanism envisaged therein.

G. Note by the Secretariat on settlement of commercial disputes: revision of the UNCITRAL Notes on Organizing Arbitral Proceedings

(A/CN.9/WG.II/WP.194)

[Original: English]

Contents

I. Introduction

1. Further to initial discussions at its twenty-sixth session, in 1993,[1] the Commission finalized the UNCITRAL Notes on Organizing Arbitral Proceedings (also referred to below as the "Notes") at its twenty-ninth session, in 1996.[2] At its forty-seventh session, in 2014, the Commission agreed that the Working Group should commence work on the revision of the Notes and, in so doing, should focus on matters of substance, leaving drafting to the Secretariat.[3]

2. At its forty-eighth session, in 2015, the Commission had before it the draft revised Notes (contained in document A/CN.9/844), as it resulted from the work of the Working Group at its sixty-first[4] (Vienna, 15-19 September 2014) and sixty-second[5] (New York, 2-6 February 2015) sessions.

3. The Commission approved the draft revised Notes in principle, and requested the Secretariat to revise the Notes in accordance with its deliberations and decisions.[6] It was further agreed that the Secretariat could seek input from the Working Group on specific issues during its sixty-fourth session. Accordingly, this note contains a revised version of the Notes for consideration by the Working Group. The Commission further requested that the draft revised Notes be finalized for adoption at its forty-ninth session, in 2016.[7]

II. Revision of the UNCITRAL Notes on Organizing Arbitral Proceedings

A. Specific issues for consideration

4. The Working Group may wish to consider the following issues.

(a) Introduction: the introduction of the draft revised Notes focuses on the purpose and non-binding nature of the Notes, as well as on the general characteristics of arbitration. Matters which relate to the organization of the arbitral proceedings and were previously contained in the introduction (such as consultations and procedural meetings) have been moved to the annotations.

(b) Note 1 (Consultation for decisions on the organization of arbitral proceedings and procedural meetings): consultations between the parties and the arbitral tribunal as well as procedural meetings are essential aspects of the organization of arbitral proceedings, and therefore, it is proposed to deal with those topics in Note 1. The substance of Note 1 of the 1996 version ("Set of arbitration rules") has been placed in the introduction of the draft revised Notes (in para. 7), as it relates to the characteristics of arbitration.

(c) Note 2 (Language or languages of the arbitral proceedings): Note 2 has been restructured to highlight that the selection of multiple languages in arbitral proceedings raises difficulties, and should not be presented as a usual practice.

(d) Note 4 (Administrative support for the arbitral tribunal): a wide range of views were expressed at the forty-eighth session of the Commission in relation to the last sentence of paragraph 35 of the draft revised Notes (as contained in document A/CN.9/844) which provided that "secretaries would normally not be involved in the arbitral tribunal's decision-making functions".[8] The Working Group may wish to consider the options contained in the last sentence of paragraph 36 of the draft revised Notes below.

(e) Note 6 (Possible agreement on confidentiality; transparency in treaty-based investor-State arbitration): a suggestion was made at the forty-eighth session of the Commission that paragraphs 51 and 52 of the draft revised Notes (as contained in document A/CN.9/844) should be elaborated to illustrate instances where parties from different jurisdictions might be subject to different obligations in relation to confidentiality or disclosure under the law applicable to them or to their counsel in their respective jurisdiction. The Commission agreed that further consideration should be given as to whether a more detailed provision on the issue would be required.[9] The Working Group may wish to consider paragraphs 52 and 53 of the draft revised Notes below in that light.

(f) Note 11 (Points at issue and relief or remedy sought): at the forty-eighth session of the Commission, it was mentioned that depending on the circumstances (including the applicable arbitration law), it might not always be appropriate for the arbitral tribunal to inform the parties of concerns, for example, if it finds that the relief or remedy sought is not sufficiently precise.[10] The Working Group may wish to further consider the revised version of paragraph 70 of the draft revised Notes below.

(g) Note 14 (Witnesses of fact): the Working Group may wish to consider whether paragraph 90 of the draft revised Notes below sufficiently explains the various approaches to pre-testimony contact by a party with witnesses and to issues raised by the parties' involvement in the preparation of oral testimony by witnesses.[11]

(h) Note 15 (Experts): at the forty-eighth session of the Commission, it was said that the question of ex-parte communication by the tribunal-appointed expert was treated differently in various jurisdictions.[12] In that context, the Working Group may wish to consider whether paragraph 106 of the draft revised Notes below adequately deals with that question.

---

[8] Ibid., paras. 44 to 48.
[9] Ibid., para. 59.
[10] Ibid., para. 78.
[11] Ibid., para. 101.
[12] Ibid., para. 118.

(i) Notes 18 (Multiparty arbitration) and Note 19 (Joinder and consolidation): the Working Group may wish to consider whether Notes 18 and 19 below sufficiently provide information about the issues that might arise from multiple arbitration agreements and from parallel proceedings.[13]

5. The Working Group may wish to note that, in order to avoid unnecessary repetitions, provisions in Note 14 (Witnesses of fact) on "Manner of taking oral evidence of witnesses" (paras. 90 to 93 of the draft revised Notes contained in document A/CN.9/844) have been deleted from that Note and grouped with similar provisions in Note 17 (Hearings).

B. Draft revised UNCITRAL Notes on Organizing Arbitral Proceedings

6. The Working Group may wish to consider the draft revised Notes below. References to discussions of the Working Group at its sixty-first and sixty-second sessions and of the Commission at its forty-eighth session are contained below.

"**2016 UNCITRAL Notes on Organizing Arbitral Proceedings**

"Preface

"The United Nations Commission on International Trade Law (UNCITRAL) adopted the first edition of the Notes at its twenty-ninth session, in 1996. UNCITRAL finalized a second edition of the Notes at its [forty-ninth] session, [in 2016]. In addition to representatives of the 60 member States of UNCITRAL, representatives of many other States and of international organizations participated in the deliberations. In preparing the second edition of the Notes, the Secretariat consulted with experts from various legal systems, national and international arbitration bodies, as well as international professional associations.

"List of matters for possible consideration in organizing arbitral proceedings

"Introduction

"**Purpose of the Notes** [*A/CN.9/826, paras. 13 to 15 and 28; A/CN.9/832, para. 61*]

"1. The purpose of the Notes is to list and briefly describe matters relevant to the organization of arbitral proceedings. The Notes, prepared with a focus on international arbitration, are intended to be used in a general and universal manner, regardless whether the arbitration is administered by an arbitral institution.

"2. Given that procedural styles and practices in arbitration vary widely, the Notes do not seek to promote any practice as best practice.

"**Non-binding character of the Notes** [*A/CN.9/832, para. 62*]

"3. The Notes do not impose any legal requirement binding on the parties or the arbitral tribunal. The parties and the arbitral tribunal may use or refer to the Notes at their discretion and to the extent they see fit and need not adopt or provide reasons for not adopting any particular element of the Notes.

"4. The Notes are not suitable to be used as arbitration rules, since they do not oblige the parties or the arbitral tribunal to act in a particular manner. Various matters discussed in the Notes may be covered by applicable arbitration rules. The use of the Notes does not imply any modification to such arbitration rules.

[13] Ibid., para. 126.

"5. The Notes, while not exhaustive, cover a broad range of situations that may arise in arbitral proceedings. In many arbitrations, however, only a limited number of the matters addressed in the Notes will arise or need to be considered. The specific circumstances of the arbitration will dictate which matters it would be useful to consider and at what stage of the arbitral proceedings those matters should be considered. Therefore, it is advisable not to raise a matter unless and until it appears likely that the matter needs to be addressed.

"**Characteristics of arbitration** [*A/CN.9/826, paras. 30, 31 and 41 to 50; A/CN.9/832, paras. 76 to 79; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 27 to 34*]

"6. Arbitration is a flexible process to resolve disputes; the parties are free to agree on the procedure to be followed by the arbitral tribunal in conducting the arbitral proceedings, subject to mandatory provisions of the applicable arbitration law. The autonomy of the parties in determining the procedure is of special importance in international arbitration. It allows the parties to select and tailor the procedure according to their specific wishes and needs, unimpeded by possibly conflicting legal practices and traditions.

"7. The parties exercise their autonomy usually by agreeing on a set of arbitration rules to govern the arbitral proceedings. The benefits of selecting a set of arbitration rules are that the procedure becomes more predictable and that the parties and the arbitral tribunal may save time and costs by using an established set of arbitration rules that has been widely applied, has been carefully drafted by experienced practitioners, and may be familiar to the parties. In addition, the selected set of arbitration rules (as modified by the parties, to the extent permitted) usually prevails over the non-mandatory provisions of the applicable arbitration law and may better reflect the objectives of the parties than the default provisions of the applicable arbitration law. Where the parties have not agreed at an earlier stage on a set of arbitration rules, they may still agree on a set of arbitration rules after the arbitration has commenced (see below, para. 10).

"8. To the extent that the parties have not agreed on the procedure to be followed by the arbitral tribunal or on a set of arbitration rules to govern the arbitral proceedings, the arbitral tribunal has the discretion to conduct such proceedings in the manner it considers appropriate, subject to the applicable arbitration law. Arbitration laws usually grant the arbitral tribunal broad discretion and flexibility in the conduct of arbitral proceedings, provided that a fair, equitable and efficient process is observed.[14] A set of arbitration rules selected by the parties would also shape the arbitral tribunal's discretion to conduct the arbitral proceedings, either by strengthening or limiting that discretion. Discretion and flexibility are useful as they enable the arbitral tribunal to make decisions on the organization of arbitral proceedings that take into account the circumstances of the case and the expectations of the parties, while complying with due process requirements. In determining how the arbitral proceedings will be conducted where the parties did not agree on the procedure or on arbitration rules, the arbitral tribunal may use, as a reference, a set of arbitration rules.

[14] For example, article 19 of the UNCITRAL Model Law on International Commercial Arbitration (with amendments as adopted in 2006) provides as follows: "(1) Subject to the provisions of this Law, the parties are free to agree on the procedure to be followed by the arbitral tribunal in conducting the proceedings. (2) Failing such agreement, the arbitral tribunal may, subject to the provisions of this Law, conduct the arbitration in such manner as it considers appropriate. The power conferred upon the arbitral tribunal includes the power to determine the admissibility, relevance, materiality and weight of any evidence."

"**Annotations**

"**1. Consultation for decisions on the organization of arbitral proceedings and procedural meetings** [*A/CN.9/826, paras. 27, 33 to 35 and 39; A/CN.9/832, paras. 66 to 75; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 22 to 26*]

"**(a) Consultation between the parties and the arbitral tribunal**

"9. It is usual for the arbitral tribunal to involve the parties in making decisions on the organization of the arbitral proceedings and, where possible, to seek their agreement. Such consultations are inherent to the consensual nature of arbitration and are relevant to most matters addressed in the Notes. For the purpose of keeping the Notes concise, the need for such consultation is not necessarily repeated in the relevant parts of the Notes.

"10. Likewise, it is usual for the parties to consult the arbitral tribunal whenever they agree between themselves on any issue that might affect the organization of the arbitral proceedings and the planning of the arbitrators. Moreover, if the parties agree after the arbitral tribunal has been constituted that an arbitral institution will administer the arbitration, the parties would usually inform the arbitral tribunal in addition to securing the agreement of that institution.

"**(b) Procedural meetings**

"*(i) First procedural meeting*

"11. It is advisable for the arbitral tribunal to give the parties a timely indication as to the organization of the arbitral proceedings and the manner in which it intends to proceed. In particular, in international arbitrations, parties may be accustomed to differing styles of arbitral proceedings and, without such guidance, they may find certain aspects of the arbitral proceedings unpredictable and difficult to prepare for.

"12. As a method of consultation with the parties, the arbitral tribunal may consider holding at the outset of the arbitral proceedings, a meeting or case management conference at which it determines the organization of the arbitral proceedings and a procedural timetable ('procedural meeting(s)').

"13. A number of issues covered by the Notes would usually be addressed at the first procedural meeting, and thus create the basis for a common understanding of the procedure among the parties and the arbitral tribunal. If a procedural timetable is established, it may serve, for instance, to indicate time limits for the communication of written submissions, witness statements and expert reports so that the parties are aware of such limits early in the arbitral proceedings. A procedural timetable may also include provisional dates for hearings.

"*(ii) Subsequent procedural meetings*

"14. The arbitral tribunal usually holds additional procedural meetings (sometimes referred to as 'preparatory conferences' or 'pre-hearing conferences') at subsequent stages of the arbitral proceedings. Procedural meetings are significant as they set the stage for the arbitral proceedings and aim at ensuring their efficiency. Procedural meetings may be used, for instance, for the arbitral tribunal to reassess whether further submissions are required or further evidence ought to be adduced. The procedural timetable can be updated regularly as the arbitral proceedings progress.

"*(iii) Modification of decisions on the organization of arbitral proceedings*

"15. Decisions on the organization of arbitral proceedings can be revisited and modified at relevant stages of the arbitral proceedings by the arbitral tribunal. However, the arbitral tribunal should exercise caution in modifying procedural arrangements, in particular where the parties have taken steps in reliance on those arrangements. Moreover, the arbitral tribunal may not be able to modify procedural arrangements to the extent that those arrangements result from an agreement between the parties.

"*(iv) Record of the outcome of a procedural meeting*

"16. A record of the outcome of a procedural meeting can take various forms depending on its significance, such as a procedural order, a summary minute, or an ordinary communication among the parties and the arbitral tribunal. Usually, the arbitral tribunal records the rules of procedure that have been determined to apply to the arbitral proceedings in a procedural order. The outcome of a procedural meeting can be made in writing or first made orally and recorded in writing at a later stage after the procedural meeting. The parties and the arbitral tribunal may consider whether to produce transcripts, which could provide a precise record of the procedural meeting but also limit open discussion at such meeting.

"*(v) Attendance of the parties*

"17. It is usually advisable that the parties themselves, in addition to any representatives they may have appointed, are present at procedural meetings.

"18. If a party does not participate in a procedural meeting, the arbitral tribunal should nevertheless ensure that the non-participating party will have an opportunity to participate in the further stages of the arbitral proceedings and to present its case. The procedural timetable, if established, should provide for such opportunity.

"19. Procedural meetings can be held either in the physical presence of all participants, or remotely via technological means of communication. The arbitral tribunal may consider, in each case, whether it would be preferable to hold the meeting in-person, which may facilitate personal interaction, or to use remote means of communication, which may reduce costs.

"**2. Language or languages of the arbitral proceedings** [*A/CN.9/826, paras. 51 to 60; A/CN.9/832, paras. 80 to 86; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 35 to 37*]

"**(a) Determination of the language**

"20. The parties may agree on the language of the arbitral proceedings. Such agreement ensures that the arbitral proceedings can be tailored to suit the common language of the parties, or at least that the parties have the capacity to communicate in the language in which the arbitral proceedings will be conducted. In the absence of such agreement, the language is usually determined by the arbitral tribunal. Common criteria for that determination are the primary language of the contract(s) or other legal instruments under which the dispute arose, and the language commonly used by the parties in their communication.

"**(b) Possible need for translation and interpretation**

"21. The parties may rely on documentary evidence, judicial decisions and juridical writings ('legal authorities') that are not in the language of the arbitral proceedings. In determining whether to provide for translation of those documents in full or in part, the arbitral tribunal may consider whether the parties and the arbitral tribunal are able to understand their content without translation and whether cost-efficient measures are available in lieu of translation in full (such as translation of part of documents, or a single template translation for similar documents with largely pictorial or numeric content).

"22. Interpretation may be necessary where witnesses or experts appearing at a hearing are unable to testify in the language of the arbitral proceedings. Witnesses and experts familiar with the language of the arbitral proceedings might still require occasional interpretation, rather than full interpretation. If interpretation is necessary, it is advisable to consider whether the interpretation will be simultaneous or consecutive. While simultaneous interpretation is less time-consuming, consecutive interpretation allows for a closer monitoring of the accuracy of the interpretation.

"23. The responsibility for arranging translation and/or interpretation typically lies with the parties even in arbitrations administered by an arbitral institution.

"**(c) Multiple languages**

"24. Because of the logistical difficulties and considerable extra costs that often arise from conducting arbitral proceedings in more than one language, the parties and the arbitral tribunal usually choose a single language to conduct the arbitral proceedings unless there are particular circumstances that would require the use of more than one language.

"25. When multiple languages are to be used in arbitral proceedings, the parties and the arbitral tribunal may need to decide whether:

(i) The languages are to be used interchangeably without any translation or interpretation;

(ii) One of the languages should be designated as authoritative for the purpose of the arbitral proceedings (such that multiple languages could be used during the proceedings, but procedural orders and arbitral awards, for example, would be issued in the authoritative language); or

(iii) All communication and documents need to be translated, and interpretation is required into all the languages; or, in the interests of economy and efficiency, it would be acceptable to limit translations to the relevant sections of documents or to exempt certain types of documents, such as legal authorities (see para. 21 above), from translation.

"**(d) Costs of translation and interpretation**

"26. When taking decisions about translation and interpretation, it is advisable for the arbitral tribunal to decide whether any or all of the costs are to be paid by the parties at the time the costs are incurred. However, if the arbitral tribunal considers that these costs are to be included in the costs of arbitration, it may later have to decide how these costs, along with other costs, will ultimately be allocated between the parties (see below, paras. 46 to 48).

"**3. Place of arbitration** [*A/CN.9/826, paras. 61 to 66; A/CN.9/832, paras. 87 to 94; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 38 to 42*]

"**(a) Determination of the place of arbitration**

"27. The parties may agree on the place (or 'seat') of arbitration. If the place of arbitration has not been agreed by the parties, typically the arbitral tribunal or the arbitral institution administering the arbitration will have to determine the place of arbitration at the outset of the arbitral proceedings. Arbitration rules of some institutions contain a default place of arbitration, applicable where the parties have not chosen one.

"**(b) Legal and other consequences of the place of arbitration**

"28. The place of arbitration normally determines the applicable arbitration law. The place of arbitration has legal consequences on various matters, such as on the requirements relating to the appointment of arbitrators, whether and on what grounds a party can seek judicial review or setting aside of an arbitral award, as well as the conditions for recognition and enforcement of an arbitral award in other jurisdictions. It is advisable that the parties and the arbitral tribunal familiarize themselves with the arbitration law and any other relevant procedural law at the place of arbitration, in particular, any mandatory provisions.

"29. Selection of the place of arbitration is influenced by various legal and other factors, the relative importance of which varies from case to case. Among the more prominent legal factors are:

(i) The suitability of the arbitration law at the place of arbitration;

(ii) The law and practices at the place of arbitration regarding (a) the nature and frequency of court intervention in the course of arbitral proceedings, (b) the

scope of judicial review or of grounds for setting aside an award, and (c) any qualification requirements with respect to arbitrators and counsel representation;

(iii) The jurisprudence at the place of arbitration in relation to arbitral procedure and other relevant matters; and

(iv) Whether the State where the arbitration takes place and hence where the arbitral award will be made is a Party to the Convention on the Recognition and Enforcement of Foreign Arbitral Awards (1958, the 'New York Convention') and/or to any other multilateral or bilateral treaty on enforcement of arbitral awards.

"30. When it is expected that hearings will be held at the place of arbitration, other factors may become relevant in selecting the place of arbitration including:

(i) The convenience of the location for the parties and the arbitrators, including travel to the location;

(ii) The availability and costs of support services;

(iii) The location of the subject matter in dispute and proximity of evidence; and

(iv) Any qualification restrictions with respect to counsel representation.

"**(c) Possibility of holding hearings and meetings at a location different from the place of arbitration**

"31. The place of arbitration is not necessarily the place where hearings and/or meetings are held, although often the two are the same. In certain circumstances, it may be more expeditious or convenient for the parties and the arbitral tribunal to hold hearings and/or meetings at a location different from the place of arbitration, or remotely via technological means of communication. Many arbitration laws and arbitration rules expressly allow the arbitral tribunal to hold hearings and meetings elsewhere than at the place of arbitration.[15]

"**4. Administrative support for the arbitral tribunal** [*A/CN.9/826, paras. 67 to 73; A/CN.9/832, paras. 95 to 102; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 43 to 48*]

"**(a) Administrative support and arbitral institutions**

"32. The arbitral tribunal may need administrative support (for example, reserving hearing rooms) to carry out its functions. The arbitral tribunal and the parties should consider who will be responsible for arranging for such support.

"33. When a case is administered by an arbitral institution, the arbitral institution may provide some administrative support to the arbitral tribunal. The availability and nature of such support vary greatly depending on the arbitral institution. Certain arbitral institutions offer administrative support to arbitrations not conducted under their institutional rules. Some arbitral institutions have entered into cooperation agreements with a view to providing mutual assistance in supporting arbitral proceedings.

"34. Unless the administrative arrangements for the proceedings are made by an arbitral institution, they will usually be made by the parties or the arbitral tribunal. Some services and hearing facilities may be procured from entities, such as chambers of commerce, hotels or specialized firms providing such support services. Specialized arbitration hearing centres have been established in some cities. It may also be acceptable to leave some of the arrangements to one of the parties, subject to the agreement of the other party or parties.

[15] See, for example, article 20(2) of the UNCITRAL Model Law on International Commercial Arbitration (with amendments as adopted in 2006) and article 18(2) of the UNCITRAL Arbitration Rules (as revised in 2010).

"**(b) Secretary to arbitral tribunal**

"35. Administrative support might be obtained by engaging a secretary of the arbitral tribunal to carry out tasks under the direction of the arbitral tribunal. These or similar services may also be rendered by a registrar, clerk or administrator. Some arbitral institutions routinely assign secretaries to cases administered by them. Where this is not the case, some arbitrators frequently engage secretaries, at least in certain types of cases, whereas other arbitrators do not.

"36. Functions and tasks performed by secretaries are broad in range. Secretaries may provide purely organizational support, such as making reservations for hearing and meeting rooms and providing or coordinating administrative services. Some arbitral tribunals wish to have secretaries carry out more substantive functions including legal research and other professional assistance, such as preparing a summary of the facts or the procedural history of the arbitral proceedings, collecting or summarizing case law or published commentaries on legal issues defined by the arbitral tribunal, and preparing draft procedural decisions. [*Option 1*: In any event, secretaries would not exercise the decision-making function of the arbitral tribunal.] [*Option 2*: However, it is recognized that secretaries do not typically perform any decision-making function of the arbitral tribunal.]

"37. Secretaries are expected to be and remain impartial and independent during the arbitral proceedings. It is the arbitral tribunal's responsibility to ensure this. Some arbitral tribunals do this by requesting the secretary to sign a declaration of independence and impartiality.

"38. If the arbitral tribunal wishes to appoint a secretary, it would normally disclose this fact to the parties, along with the identity of the proposed secretary, the nature of the tasks to be performed by the secretary, and the amount and source of any proposed remuneration. The parties may wish to agree on the role and practices to be adopted in respect of the secretaries, as well as on the financial conditions applicable to their services. Institutional guidelines on secretaries may provide useful information to the parties.

"**5. Costs of arbitration** [*A/CN.9/826, paras. 22, 23 and 74 to 78; A/CN.9/832, paras. 103 to 112; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 49 to 56*]

"**(a) Items of costs**

"39. The costs of arbitration usually include:

(i) The fees of the arbitral tribunal;

(ii) The expenses incurred by the arbitral tribunal, such as for (a) travel and accommodation, (b) administrative support, if not directly covered by the parties, (c) tribunal-appointed experts (including their fees, travel and accommodation) and other assistance required by the arbitral tribunal, and (d) translation and interpretation, if required and to the extent the arbitral tribunal considers that these costs are to be included in the arbitration costs (see above, para. 26);

(iii) The fees and expenses of the arbitral institution; and

(iv) The expenses incurred by the parties, such as (a) legal fees and disbursements, and (b) expenses relating to witnesses (including their travel and accommodation) and experts (including their fees, travel and accommodation).

"40. If the agreement between the parties, the applicable arbitration law or arbitration rules do not address the costs of arbitration and the allocation thereof, it is useful for the arbitral tribunal to identify at the outset of the arbitral proceedings principles in determining those costs.

"41. The parties and the arbitrators may have to consider how to treat taxes on services, in particular value-added taxes, when determining costs.

"**(b) Deposit of costs**

"42. The arbitral tribunal usually requests the parties to deposit an amount as an advance for the costs referred to in paragraph 39(i) and (ii). Unless the matter is handled by an arbitral institution, the arbitral tribunal will have to estimate the amount to be deposited. If, during the arbitral proceedings, it emerges that the costs will be higher than anticipated (for example, because of the prolongation of the arbitral proceedings, additional hearings, appointment of an expert by the arbitral tribunal), supplementary deposits may be requested. Deposits can be paid in full or in instalments, and bank guarantees can be a means to secure such deposits.

"43. Many arbitration rules have provisions regarding these matters, including whether the deposit should be made in equal amounts by the parties and the consequences of the failure of a party to make the payment.[16]

"44. Where the arbitration is administered by an arbitral institution, the institution's services may include holding, managing and accounting for the deposits. If the arbitral institution does not offer such services, the parties or the arbitral tribunal will have to make necessary arrangements, for example, with a bank or other external provider. In any case, it might be useful to clarify matters, such as the type and the location of the account in which the deposit will be kept and how the deposit will be managed, including matters such as interest on the deposit.

"45. The parties, the arbitral tribunal and the arbitral institution should be aware of regulatory restrictions that may have an impact on the handling of deposits of costs, such as restrictions in bar regulations, financial regulations relating to the identity of beneficiaries and restrictions on trade or payment.

"**(c) Fixing and allocating the costs**

"46. The arbitral tribunal usually determines which portion of the costs incurred by the parties referred to in paragraph 39(iv) would be recoverable. In arbitrations administered by an arbitral institution, some of the costs referred to in paragraph 39 may be set by the arbitral institution. In fixing the recoverable costs, the arbitral tribunal would usually consider the reasonableness of the costs as well as the proportionality of the costs to the amount in dispute and decide whether to require evidence that the costs have actually been incurred.

"47. After fixing the costs of the arbitration, the arbitral tribunal determines how to allocate the costs between the parties. In so doing, the arbitral tribunal usually takes into account the allocation method agreed by the parties or provided in the applicable arbitration law or arbitration rules. There are various methods for allocating costs, the general rule being that costs follow the event, i.e., the costs of the arbitration should be borne by the unsuccessful party or parties. The arbitral tribunal may also consider the conduct of the parties in allocating costs. Conduct so considered might include failure to comply with procedural orders of the arbitral tribunal or procedural requests by a party (for example, document requests, procedural applications and cross-examination requests) to the extent that any such failure actually had a direct impact on the costs of the arbitration and/or is determined by the arbitral tribunal to have unnecessarily delayed or obstructed the arbitral proceedings.

"48. At an appropriate time during the arbitral proceedings, the arbitral tribunal may request from the parties that they make submissions on costs. Decisions by the arbitral tribunal on costs and their allocation do not necessarily need to be made in conjunction with a final award. Rather, decisions on costs may be made at any time during the arbitral proceedings (for example, where the proceedings terminate without a final award) as well as after the final award has been rendered.

[16] See, for example, article 43 of the UNCITRAL Arbitration Rules (as revised in 2010).

"**6. Possible agreement on confidentiality; transparency in treaty-based investor-State arbitration** [*A/CN.9/826, paras. 26, 79 to 89, 185 and 186; A/CN.9/832, paras. 114 to 121; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 57 to 60*]

"**(a) Agreement on confidentiality**

"49. A widely held view is that there is an inherent requirement of confidentiality in commercial arbitration and that confidentiality is an advantageous and helpful feature of international commercial arbitration. Nevertheless, there is no uniform approach in domestic laws or arbitration rules regarding the extent to which the participants in an arbitration are under a duty to maintain the confidentiality of information relating to the arbitral proceedings.

"50. Should confidentiality be a concern or priority and should the parties not be satisfied by the treatment of that issue in the applicable arbitration law or arbitration rules, the parties may agree on the desired confidentiality regime to the extent not precluded by the applicable arbitration law.

"51. An agreement on confidentiality might cover one or more of the following matters: (i) the material or information that is to be kept confidential (for example, the fact that the arbitration is taking place, identity of the parties and the arbitrators, pieces of evidence, written and oral submissions, content of the award); (ii) measures for maintaining confidentiality of such information and of the hearings; (iii) circumstances in which confidential information may be disclosed in whole or in part to the extent necessary to protect a legal right; and (iv) other circumstances in which such disclosure might be permissible (for example, information in the public domain, or disclosures required by law or a regulatory body). The parties may wish to consider how to extend the obligation of confidentiality to witnesses and experts.

"52. Whereas the obligation of confidentiality imposed on the parties and their counsel may vary with the circumstances of the case as well as the applicable arbitration law and arbitration rules, arbitrators are generally expected to keep the arbitral proceedings, including any information related to or obtained during those proceedings, confidential.

"53. There are also circumstances in which certain information or material is deemed to be confidential to one of the parties in an arbitration, for example, commercial secrets or intellectual property. Arrangements to protect such information or material may be made by the parties and, in certain circumstances, by the arbitral tribunal, for example, by restricting access to such information or material to a limited number of designated persons.

"**(b) Transparency in treaty-based investor-State arbitration**

"54. Adopting a regime of transparency in treaty-based investor-State arbitration may reflect the specific characteristics of arbitration between an investor and a State arising under an investment treaty. In such arbitration, the investment treaty may include specific provisions on publication of documents, open hearings, and confidential or protected information. Also, the applicable arbitration rules referred to in investment treaties may contain specific provisions on transparency.[17] Further, parties to a treaty-based arbitration may agree to apply certain transparency provisions.[18]

[17] See, for example, the UNCITRAL Rules on Transparency in Treaty-based Investor-State Arbitration (the Rules on Transparency); the Rules on Transparency may also have an impact on various aspects of the arbitral proceedings, for example, regarding submissions by third parties, and conduct of the hearings.

[18] For example, under article 1(2)(a) of the Rules on Transparency.

"**7. Means of communication** [*A/CN.9/826, paras. 25 and 91 to 102; A/CN.9/832, paras. 123 and 124; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), para. 61*]

"**(a) Determination of the means of communication**

"55. It is useful for the parties and the arbitral tribunal to determine the means of communication at the outset of the arbitral proceedings. Factors that might be considered in selecting the means of communication include ensuring that:

(i) Documents are accessible and easily retrievable by the parties and the arbitral tribunal;

(ii) Receipt of the communication can be ascertained;

(iii) The means of communication is acceptable under the applicable arbitration law; and

(iv) The costs involved in the use of the selected means of communication are reasonable.

"56. Although more than one means of communication may be used (for example, paper-based as well as electronic means), the parties may wish to consider issues arising from the use of multiple means of communication, including which will be the authoritative means and, where time limits for submission apply, what action will constitute submission.

"**(b) Electronic means of communication**

"57. The use of electronic means of communication can make the arbitral proceedings more expeditious and efficient. However, it is advisable to consider whether all parties have access to, or are familiar with, such means. The parties and the arbitral tribunal may need to consider issues of compatibility, storage, access, data security as well as related costs when selecting electronic means of communication.

"**(c) Flow of communication**

"58. Communications are usually exchanged directly between the arbitral tribunal and the parties, unless an arbitral institution is acting as an intermediary. It is usual that all parties are copied on all communications to and from the arbitral tribunal.

"**8. Interim measures** [*A/CN.9/826, para. 24; A/CN.9/832, para. 113; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 62 to 74*]

"**(a) Granting of interim measures**

"59. During the course of the arbitration, a party may need to seek an interim measure, which is temporary in nature, either from the arbitral tribunal or a domestic court. Most arbitration laws and arbitration rules provide that the arbitral tribunal may, at the request of a party, grant interim measures.[19] Arbitration laws also provide for courts to grant interim measures in relation to an arbitration. An established principle is that any request made by a party to a domestic court for an interim measure before or during the arbitral proceedings is not incompatible with an agreement to arbitrate.

"60. Depending on the applicable arbitration laws or rules, a party may apply on an ex parte basis for an interim measure and, at the same time, for a preliminary order for interim relief (the purpose of which is to direct the parties to preserve the status quo while the arbitral tribunal decides whether to grant the requested interim measure). A party would normally only make such a request in circumstances where prior

[19] See, for example, chapter IV A of the UNCITRAL Model Law on International Commercial Arbitration (with amendments as adopted in 2006) and article 26 of the UNCITRAL Arbitration Rules (as revised in 2010).

disclosure of the request for the interim measure to the party against whom it is directed risks frustrating the purpose of the measure.[20]

"61. Issues to be considered by the parties and the arbitral tribunal in connection with application for interim measures include:

(i) The applicable law in relation to interim measures, including whether the granting of interim measures is within the scope of the arbitral tribunal's competence;

(ii) The type of measures that the arbitral tribunal may grant;

(iii) The conditions for requesting and granting interim measures;

(iv) The available mechanisms for enforcement of interim measures; and

(v) The limitations in granting interim measures when a third party may be affected by the measures.

"**(b) Costs and damages arising from interim measures; security for costs and damages**

"62. The party requesting an interim measure may be liable under the applicable law for costs and damages caused by the interim measure, if the arbitral tribunal later determines that, in the circumstances prevailing when the measure was ordered, the measure should not have been granted. The parties and the arbitral tribunal may determine a procedure for presenting claims on costs and damages arising from interim measures, indicating, for instance, at which point during the arbitral proceedings a party may make such claims and the arbitral tribunal may award such costs and damages.

"63. The party requesting an interim measure may be required by the arbitral tribunal to provide security for possible costs and damages arising therefrom.

"**9. Written submissions, witness statements, expert reports and documentary evidence ('submissions')** [*A/CN.9/826, paras. 103 to 109; A/CN.9/832, para. 125; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), para. 75*]

"64. During the arbitral proceedings, the parties usually submit a wide range of documents: written submissions, witness statements, expert reports and documentary evidence (referred to generally as "submissions"). Submissions comprise all written pleadings that the parties include in the records of the proceedings, such as a statement of claim and a statement of defence. A second round of rebuttal submissions is also common although the parties and the arbitral tribunal may consider whether more than one round of submissions is necessary.

"65. Submissions may be communicated consecutively, i.e., where one party (usually the party making the application or seeking the relief) makes its submission after which the other party or parties make a counter submission. Alternatively, all parties may be required to make their submissions simultaneously. The approach used may depend on the type of issues to be commented upon, the stage of the arbitral proceedings, and the time provided to the parties to comment. Most arbitration rules address this matter, sometimes detailing the sequences of submissions and required content.

"**10. Practical details regarding the form and method of submissions** [*A/CN.9/826, paras. 110 and 111; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 76 and 77*]

"66. Certain arbitration rules contain provisions on practical details concerning submissions. Depending on the volume and kind of submissions to be handled, the

[20] See, for example, section 2 of Chapter IV A of the UNCITRAL Model Law on International Commercial Arbitration (with amendments as adopted in 2006).

parties and the arbitral tribunal may consider whether it would be helpful to agree on practical details concerning, for instance, the following:

(a) The form in which submissions will be made (for example, in hard copy, electronic form or through a shared platform), including their format (for example, specific electronic formats, such as original or native format where applicable, search features);

(b) The particulars of management of submissions; the system for organizing, labelling, identifying and referencing submissions, including whether they can be presented in an efficiently accessible way (for example, by using hyperlinks);

(c) The organization of certain types of submissions (for example, whether large spreadsheets or diagrams, or other types of documents ought to be presented separately);

(d) The preservation and storage of submissions; in certain instances, the applicable law may require a specific procedure to preserve documentary evidence prior to the commencement of the arbitration; and

(e) The particulars of data protection (for instance, in relation to information on witnesses).

"**11. Points at issue and relief or remedy sought** [*A/CN.9/826, paras. 112 to 116; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), para. 78*]

"**(a) Preparation of a list of points at issue**

"67. It is often considered helpful for the arbitral tribunal to prepare a list of points at issue (as opposed to those that are undisputed) based on the parties' submissions. Such a list, when prepared at an appropriate stage of the arbitral proceedings and updated as necessary, can assist the parties in focusing their arguments on the issues identified as critical by the arbitral tribunal, thereby improving the efficiency of the arbitral proceedings and reducing costs.

"**(b) Determination of the order in which the points at issue will be decided; possibility of bifurcated proceedings**

"68. Subject to any agreement of the parties, the arbitral tribunal has the flexibility and discretion to determine the sequence of the arbitral proceedings and may deal with all the points at issue collectively or sequentially depending on the circumstances of the arbitration.

"69. Depending on the points at issue, the arbitral tribunal may consider the appropriateness of making a determination on certain claims or issues (such as jurisdiction, liability or other discrete issues whose resolution will likely advance the resolution of the case) before deciding on other points. In deciding on such an approach, the arbitral tribunal may wish to consider whether, under the applicable arbitration law, such determination is open to judicial review. Where the arbitral tribunal decides to adopt that approach, submissions and, where applicable, disclosure of documents may be organized in separate stages to reflect that staged organization of the arbitral proceedings. Such an approach may have an impact on the adjudicative process, and therefore, the arbitral tribunal may wish to consider carefully the implications of such a staged process on the overall proceedings, including on time and costs.

"**(c) Relief or remedy sought**

"70. If the arbitral tribunal considers that the relief or remedy sought by a party is not sufficiently precise, for example, to ensure the enforceability of the arbitral award, the arbitral tribunal may consider informing the parties of its concerns, bearing in mind that the arbitral tribunal would usually avoid suggesting new relief on its own initiative.

"**12. Amicable settlement** [*A/CN.9/826, paras. 117 to 124; A/CN.9/832, para. 126; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 79 to 81*]

"71. In appropriate circumstances, the arbitral tribunal may raise the possibility of a settlement between the parties. In some jurisdictions, the arbitration law permits facilitation of a settlement by the arbitral tribunal with the agreement of the parties. In other jurisdictions, it is not permissible for the arbitral tribunal to do more than raise the prospect of a settlement that would not involve the arbitral tribunal. Where the applicable arbitration law permits the arbitral tribunal to facilitate a settlement, it may, if so requested by the parties, guide or assist the parties in their negotiations. Certain sets of arbitration rules provide for facilitation of a settlement by the arbitral tribunal.

"**13. Documentary evidence** [*A/CN.9/826, paras. 125 to 136; A/CN.9/832, paras. 127 to 129; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 82 to 94*]

"**(a) Time limits for submission of documentary evidence by the parties; consequences of failure to submit or late submission**

"72. The arbitral tribunal usually fixes time limits for the submission of documentary evidence at the outset of the arbitral proceedings. The arbitral tribunal may direct the parties to submit evidence relied upon along with their written submissions or at a subsequent stage.

"73. The arbitral tribunal may clarify the consequences of late submissions of evidence and how it intends to deal with requests to accept late submissions. The arbitral tribunal may require a party seeking to submit evidence after the time limit to provide reasons for the delay. The arbitral tribunal, in determining whether to accept late submissions, would need to consider the procedural efficiency achieved by refusing late submissions, the possible usefulness of accepting them, and the interests of the parties (for example, providing the other party an opportunity to comment or submit further evidence with respect to the late submission).

"74. The arbitral tribunal may remind the parties that if a party makes submissions that were not scheduled, the arbitral tribunal may consider whether such submissions could be accepted. Also, if a party requested to submit evidence to support its case fails to do so within the time limit without showing sufficient cause for such failure, the arbitral tribunal may make the award solely on the evidence before it.

"**(b) Requests to disclose documents**

"75. A party may request the other party or parties to disclose certain documents. Such requests may be made in various ways but are typically recorded in a schedule, which sets out not only the documents requested, but also the reasons for the request. The other party may then state in the schedule whether it agrees with the request and if not, the reasons. Usually, the parties exchange among themselves disclosed documents and determine which of the disclosed documents to submit as evidence.

"76. Where requests for disclosure of documents are contested, the requesting party may decide whether to submit the contested requests to the arbitral tribunal for its consideration. The arbitral tribunal, if necessary, may add to the schedule its decision on any contested requests.

"77. When considering requests by the parties to disclose documents and ordering disclosure of documents for possible submission as evidence, the arbitral tribunal should be mindful that approaches of arbitration laws and practices vary. Therefore, it may be useful for the arbitral tribunal to clarify with the parties whether a party may request the other party to disclose documents and, if so, to set out the relevant time limits, the form of disclosure requests, and the procedures for contesting requests, if relevant.

"**(c) Admissibility of evidence**

"78. It is generally accepted that the arbitral tribunal would usually consult the parties if it has any concern regarding the admissibility of documentary evidence.

"**(d) Evidence obtained by the arbitral tribunal from third parties**

"79. Where necessary and after having consulted the parties, the arbitral tribunal itself may take appropriate steps to obtain documentary evidence from a third party.

"**(e) Assertions about the provenance and authenticity of documentary evidence**

"80. Unless a party raises objections to any of the following conclusions within a specified period of time, it is normally understood that:

(i) Documentary evidence is accepted as having originated from the source indicated in it;

(ii) A dispatched communication is accepted without further proof that it has been received by the addressee; and

(iii) A copy is accepted as a reproduction of the original; a statement by the arbitral tribunal to this effect can simplify the introduction of evidence and discourage unfounded and dilatory objections.

"81. If there are issues regarding the provenance and authenticity of evidence, the arbitral tribunal may require that the authenticity of the evidence and the integrity of the information contained therein are ascertained and that the evidence in its original form remains accessible to the parties and the arbitral tribunal.

"**(f) Presentation of documentary evidence**

"82. In order to avoid duplicate submissions, it is usual for the parties to agree or for the arbitral tribunal to direct that, once a given piece of documentary evidence is submitted in the record by one party, it will not be resubmitted by the other party.

"83. After each party has submitted its documentary evidence, the arbitral tribunal may encourage the parties to prepare, before the hearing, a joint set of evidence. It may also be practical for the parties and/or the arbitral tribunal to select the frequently used pieces of evidence and establish a set of 'working' or 'core' documents, regardless of whether these have been submitted jointly or otherwise.

"84. The presentation of certain evidence may be facilitated given its volume or nature if its content is summarized by way of a report from a counsel or an expert (for example, a public accountant or a consulting engineer). The report may present the information in the form of summaries, tabulations or charts. Depending on the evidence at issue, such presentation may be combined with arrangements that give the parties and the arbitral tribunal an opportunity to review the underlying data and the methodology used for the preparation of the report, as well as to verify any assumptions made in its preparation.

"85. Note 10 above provides for other practical details that the parties and the arbitral tribunal may wish to consider regarding the presentation of documentary evidence.

"**14. Witnesses of fact** [*A/CN.9/826, paras. 141 to 149; A/CN.9/832, paras. 130 to 135; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 94 to 111*]

"**(a) Identification of witnesses of fact; contact with the parties and their representatives**

"*(i) Witness statements and advance notice*

"86. Subject to the applicable arbitration laws and arbitration rules, the arbitral tribunal may consider requiring that each party give advance notice to the arbitral tribunal and the other party or parties of any witness it intends to present for oral

testimony. The arbitral tribunal may also wish to clarify with the parties whether written witness statements would be submitted.

"87. A witness statement is a document sufficient to serve as evidence from that witness. It is helpful that the witness statement identifies all documentary evidence upon which it relies. Where a witness statement is presented, it is generally accepted that this statement need not be repeated orally at the hearing. Often it is accepted as the witness' full testimony and only a short oral statement that summarizes, confirms or updates the written statement is required at the hearing. Further, a written witness statement may eliminate the need to hear a witness of uncontroversial facts, as not all witnesses who have submitted written statements need to be heard at a hearing (see below, para. 128).

"88. Where witness statements will not be submitted, the arbitral tribunal may wish to consider what form of advance notice it wishes to receive. As to the content of the advance notice, the following is an example of what might be required, in addition to the names and addresses of the witnesses:

(a) The subject and facts upon which the witnesses will testify;

(b) The language in which the witnesses will testify;

(c) The nature of the relationship with any of the parties;

(d) The qualifications and experience of the witnesses, if and to the extent these are relevant to the dispute or the testimony; and

(e) How the witnesses learned about the facts on which they will testify.

"*(ii) Whether persons related to a party may be heard as witnesses*

"89. International arbitration can differ from domestic court practice in respect of whether certain persons related to a party may be heard as witnesses (for example, its executives, employees or agents). While under some legal systems, such persons can only be heard as representatives of a party and not as witnesses, arbitration rules may provide otherwise. Therefore, it may be necessary to determine which persons may or may not testify as witnesses and submit witness statements, and the weight that may be given to statements by those determined not eligible as a witness.

"*(iii) Nature of the contact of a party or its representative with witnesses*

"90. The arbitral tribunal may consider clarifying at the outset of the arbitral proceedings the nature of the contact a party or its representative is permitted to have with its witnesses. This applies to contacts in relation to the preparation of written witness statements and oral testimony. International arbitration can differ from domestic court practice in respect of the permissibility of pre-testimony contact between a party or its representatives and the witnesses presented by that party. In international arbitration, pre-testimony contacts with witnesses are widely accepted. One common practice is to permit parties or their representatives to interview their witnesses about the facts of the dispute prior to their oral testimony and/or assist them in the preparation of their witness statements, if they are to be submitted.

"*(iv) Non-appearance of a witness*

"91. The arbitral tribunal may consider addressing the consequences of a witness who was invited to testify at the hearing not appearing. The arbitral tribunal usually has some flexibility in dealing with such non-appearances, including whether that witness' written statement, if submitted, may still be considered and, if so, what weight is to be given to such statement.

"*(v) Invitation of a witness by the arbitral tribunal*

"92. The arbitral tribunal may have to take appropriate steps to invite a witness, for instance, if the parties fail to call a key witness that the arbitral tribunal wishes to examine.

"**(b) Manner of taking oral evidence of witnesses**

"93. While arbitration laws and arbitration rules typically grant the arbitral tribunal broad discretion concerning the manner of taking oral evidence of witnesses (oral testimony), practices vary. In order to facilitate the parties' preparation for a hearing, the arbitral tribunal may consider clarifying some or all of the issues referred to in Note 17 below.

"**15. Experts** [*A/CN.9/826, paras. 150 and 151; A/CN.9/832, para. 136; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 112 to 122*]

"94. Many arbitration laws and arbitration rules provide for the participation of one or more experts in arbitral proceedings. Frequently, the parties will present a report of experts engaged by them (referred to as 'expert witnesses' or 'party-appointed experts') to address points at issue. An arbitral tribunal may appoint its own expert (referred to as 'tribunal-appointed expert') to present a report on issues requiring expert guidance.

"95. Experts are usually required to provide information on their expertise in a resume or list of recent experiences prior to being engaged or appointed. Arbitral institutions, chambers of commerce and other specialized organizations may be of assistance to the parties and the arbitral tribunal in relation to the selection of experts, if needed.

"**(a) Reports presented by party-appointed experts (expert witnesses)**

"96. Each party may instruct its own expert regarding the issues to be addressed in his or her report or the parties may agree on a joint list of issues to be addressed by the experts.

"97. The arbitral tribunal may require the party-appointed experts to agree on the scope of the reports and issues to be covered. It may further require them to submit a joint report identifying the points on which they agree and disagree, which may narrow issues to be dealt with in subsequent proceedings. Based on a joint understanding by the experts of the points of agreement and of disagreement, only those points of disagreement can be addressed in their respective reports.

"98. For instance, the arbitral tribunal may request the party-appointed experts to exchange their reports, and then hold an informal meeting where the points on which the experts agree or disagree are discussed. With this approach, the experts may respond to each other's questions more effectively, find common ground and/or take the time to discuss any specific issues. The reports of the experts can then be modified accordingly or the outcome of such procedure can be communicated by the experts at the hearing.

"99. Where the party-appointed experts express conflicting opinions, the arbitral tribunal may consider requesting supplementary or responsive expert witness statements to address the points at issue.

"100. Occasionally, it may be possible for the parties to agree on a single joint expert or to agree that the experts appointed by them will issue a single joint report. Such approaches have the benefit of reducing costs and streamlining the arbitral proceedings. In such circumstances, the parties normally are entitled to comment on the report.

"101. The arbitral tribunal may consider addressing whether expert reports should be filed consecutively or simultaneously as well as the timing of their submission, particularly whether such submission should be made along with a statement of claim or of defence.

"102. In addition, the arbitral tribunal may wish to clarify the nature and extent of communication between the parties or their representatives and their experts, and whether such communications will be treated as confidential.

"**(b) Report presented by a tribunal-appointed expert**

"*(i) Function of the tribunal-appointed expert*

"103. The function of an expert appointed by the arbitral tribunal usually consists in preparing a report on one or several specific points requiring specialized knowledge or assisting the arbitral tribunal in understanding certain technical issues. In deciding whether to appoint its own expert, the arbitral tribunal usually takes into account the efficiency of the arbitral proceedings. In some instances, the arbitral tribunal may decide to appoint an expert at a later stage of the arbitral proceedings, for example, if the opinions of the party-appointed experts diverge widely.

"104. Before appointing an expert, the arbitral tribunal will normally ensure that the expert has the required qualification and obtain a statement of his or her impartiality and independence. The arbitral tribunal usually gives the parties an opportunity to comment on the expert's qualification, impartiality and independence.

"105. It may be advisable for the arbitral tribunal to consult with the expert upon his or her appointment to clarify the scope of the report and the issues to be covered. The arbitral tribunal may also wish to consult with the expert before the completion of his or her report, in particular when more than one expert is appointed by the arbitral tribunal.

"106. The arbitral tribunal may consider clarifying the nature and extent of communication its expert may have with the parties and their representatives, jointly or separately, and how to deal with communications on confidential matters. Further, the arbitral tribunal may wish to instruct its expert to refrain from ex-parte communication.

"107. Where a tribunal-appointed expert has presented his or her report, the parties are normally entitled to comment on the report either through formal or informal submissions, and to question the tribunal-appointed expert at a hearing.

"*(ii) Terms of reference of the tribunal-appointed expert*

"108. The purpose of the terms of reference of a tribunal-appointed expert is to indicate the questions on which the expert is to provide his or her opinion, thereby avoiding opinions on points that are not for the expert to assess, and to commit the expert to a time schedule. The terms of reference also ensures transparency regarding the relation between the arbitral tribunal and the tribunal-appointed expert.

"109. The terms of reference usually set out details regarding which documents the expert will have access to, and how the expert will receive relevant information or have access to relevant documents, goods or other property necessary for the expert to prepare the report. In order to facilitate the evaluation of the expert's report, it is advisable to require the expert to include in the report the terms of reference as well as information on the method used in arriving at his or her conclusions and the factual assumptions made in preparing the report. The remuneration of a tribunal-appointed expert is usually indicated in the terms of reference.

"**16. Inspection of a site, property or goods** [*A/CN.9/826, paras. 137 to 140; A/CN.9/832, para. 137; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 123 and 124*]

"110. In some arbitrations, the arbitral tribunal may need to assess physical evidence other than documentary evidence, for example, by inspecting goods or property, or visiting a specific site. Physical or virtual site inspections may be evidentiary in nature or may serve an illustrative function for the arbitral tribunal for improving its understanding of the case.

"**(a) Physical evidence**

"111. If physical evidence will be submitted, the arbitral tribunal may fix the time schedule for presenting such evidence, make arrangements for the other party or

parties to prepare for the presentation of the evidence and take measures for safekeeping the items of evidence.

"**(b) Inspections of site, property or goods**

"112. The arbitral tribunal may consider whether inspection of a site, property or goods is useful or required. If so, it may consider whether the inspection requires the arbitrators' physical presence or whether a virtual inspection might be possible or adequate in the interest of efficiency or cost savings.

"113. If a physical inspection of a site, property or goods takes place, the arbitral tribunal will need to consider various issues. These include timing, cost allocation, arrangements necessary to ensure that all parties are able to be present or represented at the inspection and an indication of who will guide the inspection and provide explanations. Prior to the inspection, it may be useful for the parties and the arbitral tribunal to agree on an inspection protocol and on the scope of the inspection.

"114. The site, property or goods to be inspected are often under the control of one of the parties. If so, it may be advisable to allow the other party to visit the place of inspection before the arbitral tribunal does, in order to provide that party with the opportunity to acquaint itself with the state and condition of the site, property or goods and to request that the arbitral tribunal view additional or different evidence at the place of inspection.

"115. Where an employee or a representative of a party controlling the site, property or goods gives guidance or explanations to the arbitral tribunal, this is usually done in the presence of the other party or its representative. It should be borne in mind that such statements, in contrast to statements those persons might make as witnesses of fact in a hearing, are usually not treated as evidence in the arbitral proceedings.

"**17. Hearings** [*A/CN.9/826, paras. 159 to 174; A/CN.9/832, paras. 138 and 139; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), para. 125*]

"**(a) Decision whether to hold hearings; post-hearings submissions**

"116. Arbitration laws and arbitration rules often allow any party to request a hearing for the presentation of evidence by witnesses and experts and/or for oral argument. Where none of the parties requests a hearing, the arbitral tribunal may determine whether to hold a hearing. The need for a hearing might be reconsidered at a later stage in light of the parties' submissions.

"117. It is a widely accepted practice to have written submissions, witness statements, expert reports and other documentary evidence presented prior to the hearing. This may assist in focusing the issues that have to be dealt with at the hearing and avoid a lengthy hearing. In order to facilitate the parties' preparations, to avoid any misunderstanding and to prevent unexpected issues being raised, the arbitral tribunal may discuss this matter with the parties at the outset of the arbitral proceedings as well as in advance of any hearing.

"118. The parties and the arbitral tribunal will have to decide whether any additional submissions are to be made by the parties after the hearing and, if so, a corresponding timetable will have to be established. Such submissions may be necessary in order to allow the parties to address a specific issue that arose during the hearing, or to provide them with a final opportunity to address the impact on their case of the evidence that emerged during the hearing.

"119. Hearings can be held in-person or remotely via technological means. The decision whether to hold a hearing in-person or remotely is likely to be influenced by factors, such as the importance of the issues at stake, the availability of parties, witnesses and experts as well as the cost and possible delay of holding a hearing in-person. The parties and the arbitral tribunal may need to consider technical matters, such as the compatibility of the technological means to be used at different locations.

"**(b) Scheduling of hearings**

"120. Dates for hearings are normally set at the earliest possible opportunity so as to ensure availability of the participants. A common practice is to hold hearings in a single, consecutive period. However, holding hearings over separate periods is, in some instances, necessary in order to accommodate the different schedules of the parties, witnesses, experts and the arbitral tribunal.

"121. The length of a hearing primarily depends on the complexity of the issues and evidence as well as the number of witnesses and experts to be presented. The length also depends on the procedural style used in the arbitration.

"122. It may be useful to limit the aggregate amount of time each party has for making oral statements, questioning witnesses and experts it presents and questioning witnesses and experts of the other party or parties. In general, each party is allocated the same aggregate amount of time, unless the arbitral tribunal considers, after having heard the parties, that a different allocation is justified.

"123. Such time allocation, provided that it is realistic, fair and subject to supervision by the arbitral tribunal, will make it easier for the parties to plan their presentation of the various items of evidence and argument, reduce the likelihood of running out of time towards the end of the hearing and avoid any actual or perceived unfairness resulting from the parties having unequal time.

"124. The arbitral tribunal usually sets aside time for its deliberations throughout the duration of the arbitral proceedings as well as before and shortly after the close of the hearings.

"**(c) Manner of conducting hearings**

"*(i) Manner in which witnesses of fact and expert witnesses ('witnesses') will be heard*

"125. Arbitration laws and practices differ as to who will question the witnesses, and the degree of control the arbitral tribunal exercises over the hearing of witnesses. For example, when the parties question the witnesses, some arbitrators prefer to permit the parties to ask questions freely and directly to the witnesses, but may disallow a question particularly upon a well-founded objection by another party. Other arbitrators tend to exercise more control and may disallow questions by a party or require that questions from the parties be asked through the arbitral tribunal.

"126. If hearings are to be held for the purpose of presenting expert reports, the procedures in relation thereto should also be set out in advance by the arbitral tribunal. For example, where the parties present their own experts, the arbitral tribunal may consider whether the experts should be heard separately or together. In the latter case, the questioning is often led by the arbitral tribunal. The parties would usually be allowed to cross-examine any expert appointed by the other party.

"*(ii) Whether oral testimony will be given under oath or affirmation and, if so, in what form*

"127. Arbitration laws and practices differ as to whether oral testimony must be given under oath or similar affirmation of truthfulness. In some legal systems, the arbitral tribunal may require witnesses to take an oath, but it is usually within their discretion whether they want to do so. In other legal systems, oral testimony under oath is either unknown in arbitration or may even be considered improper, as only an official such as a judge or a notary is empowered to administer oaths. In such circumstances, the witnesses may simply be asked to affirm that they will testify truthfully. It may be necessary to clarify who will administer the oath or affirmation. Where applicable, the arbitral tribunal may draw the witnesses' attention to potential criminal sanctions for giving false testimony.

"*(iii) Deciding which witnesses will provide oral testimony*

"128. When the parties have already submitted written statements or reports from their witnesses, the arbitral tribunal may ask each party, prior to the hearing, which of the other party's or parties' witnesses it wishes to examine at the hearing. A party is normally responsible for making available any of its own witnesses at the hearing if another party has indicated that it wishes to examine that witness. If no other party wishes to examine a witness and the tribunal itself does not wish to examine the witness, the tribunal may decide, for the sake of efficiency, that the witness should not testify at the hearing. A decision not to hear oral testimony from a witness in these circumstances should not alter the consideration that would otherwise be given to that witness' written statement.

"*(iv) Whether witnesses may be in the hearing room when they are not testifying*

"129. Practices vary in relation to the presence of witnesses in the hearing room before and after they have testified. Some arbitrators consider, as a general rule, that witnesses should not be allowed in the hearing room except when they are testifying. The purpose is to prevent the witness from being influenced by statements of other witnesses and to prevent the possibility of one witness' presence influencing another witness. When witnesses are not allowed in the hearing room, measures would usually be taken to avoid that witnesses have access to any contemporaneous transcripts of the hearings. Other arbitrators consider that it is useful for witnesses to be present when other witnesses are testifying in order to deter untrue statements and clarify or reduce contradictions between witnesses. The arbitral tribunal may decide what approach to follow for each witness. For example, a separate rule may be appropriate for witnesses who also appear as representatives of a party (for example, an in-house legal counsel) as such representatives may need to be present throughout the hearing. As a general rule, witnesses should refrain from discussing their testimony during any breaks in their testimony.

"130. The arbitral tribunal may leave questions of witness presence in the hearing room to be decided during a hearing, or may give guidance on the question in advance, for example, where it may affect the organization of the hearing.

"*(v) Order in which the witnesses will be called and questioned*

"131. The arbitral tribunal has broad latitude to determine the order of presentations at hearings. Within that latitude, practices differ, for example, as to whether opening or closing statements are heard and if they are, their sequence and duration, and which of the parties has the last word. The broad latitude of the arbitral tribunal also applies to the manner and sequence in which witnesses and experts are heard and to other issues addressed at any hearing. When several witnesses are to be heard and longer testimony is expected, it is useful to determine in advance the order in which they will be called. This is likely to reduce costs and facilitate scheduling. Each party might be invited to suggest the order in which it proposes to have its own witnesses testify. In view of such differences, or when no arbitration rules apply, it may foster efficiency of the arbitral proceedings if the arbitral tribunal clarifies to the parties, in advance of the hearings, the manner in which it will conduct the hearings, at least in broad terms.

"132. Unless the witnesses are first examined by the arbitral tribunal, general practice is for witnesses to be examined first by the party calling that witness if necessary and then cross-examined by the other party or parties. After cross-examination, the witness might be re-examined by the party calling the witness with questions limited to issues raised during the cross-examination. Thereafter, the cross-examining party or parties as well as the arbitral tribunal may further question the witness.

"133. The arbitral tribunal may wish to discourage parties from submitting new evidence at hearings, or require further submissions so that the other party may respond.

"**(d) Arrangements for a record of the hearings**

"134. The arbitral tribunal may consider the method of preparing a record of oral statements and testimony during hearings as well as who will be responsible for making the necessary arrangements. Audio recording and transcription services are commonly used.

"135. The parties and the arbitral tribunal may consider whether audio recording should be transcribed, and clarify whether the audio recording would constitute the official record of the hearings. It may be advisable that the transcripts of audio recordings are made by a person who was present at the hearing. If transcripts are to be produced, the arbitral tribunal may consider whether and how the parties will be given an opportunity to check the transcripts. For example, it may be determined that any change to the record must be approved by the parties and, failing their approval, referred to the arbitral tribunal for determination.

"**18. Multiparty arbitration** [*A/CN.9/826, paras. 175 and 176; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 126 and 127*]

"136. When a single arbitration involves more than two parties (multiparty arbitration), many procedural issues remain the same as in two-party arbitration. However, caution may need to be exercised where the parties grouped together as claimants or defendants have divergent interests or seek different relief.

"137. The Notes, which identify matters that may be considered in organizing arbitral proceedings in general, do not cover the drafting of arbitration agreements or the constitution of the arbitral tribunal. Those matters give rise to special questions in multiparty arbitration as compared to arbitration involving only two parties. They may be dealt with under arbitration rules.[21]

"**19. Joinder and consolidation** [*A/CN.9/826, paras. 175 and 176; A/CN.9/832, para. 140; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 126 and 127*]

"**(a) Joinder**

"138. Joinder means adding a new party into an existing arbitration. Not all joinder applications necessarily require the contemporaneous consent of all parties (i.e. the parties to the arbitration and the new party). The new party may already be bound by the arbitration agreement and the joinder process might be authorized by the arbitration agreement, the applicable arbitration laws and/or the applicable arbitration rules.

"139. Parties may wish to join a new party to the arbitration in situations where they would be unable to fully present their claims without that new party's participation. Certain arbitration rules have addressed joinder by providing that the arbitral tribunal may, at the request of a party, allow one or more new parties to be joined to the arbitration, provided that the new party is bound by the arbitration agreement.[22] Other arbitration rules do not require that the party to be joined be bound by the arbitration agreement under which the claim arises, provided that it is bound by another relevant arbitration agreement that also binds the existing parties. In deciding whether to accept joinder, the arbitral tribunal may consider the procedural efficiency that may result therefrom, fairness to existing parties, or prejudice to any party. The arbitral tribunal may also consider its powers and the manner in which it was constituted.

"140. It is recommended that any new party be joined as early as possible in the arbitral proceedings. Many arbitration rules that address joinder restrict the ability to seek joinder after the arbitral tribunal has been appointed. For example, a party may

[21] See, for example, article 10(1) of the UNCITRAL Arbitration Rules (as revised in 2010), which provides that "(…) where three arbitrators are to be appointed and there are multiple parties as claimant or as respondent, unless the parties have agreed to another method of appointment of arbitrators, the multiple parties jointly, whether as claimant or as respondent, shall appoint an arbitrator."

[22] See, for example, article 17(5) of the UNCITRAL Arbitration Rules (as revised in 2010).

request the joinder when filing its response to the notice of arbitration.[23] In such a case, the new party could be joined to the procedure before the arbitral tribunal is appointed. Depending on the applicable arbitration law and arbitration rules, a third party may also be joined after the appointment of the arbitral tribunal if certain conditions are fulfilled.

"**(b) Consolidation**

"141. The question of consolidation arises in situations where several distinct arbitrations are initiated under the same or different arbitration agreements. Consolidation refers to the merging of separate arbitrations, regardless of whether or not the related arbitrations have been commenced pursuant to the same or a different arbitration agreement. Consolidation can increase efficiency and avoid inconsistent outcomes on related issues. However, one or more parties may have a justified interest in having several disputes dealt with separately, for example because one of the disputes may have priority or the consolidation of several cases would render the arbitral proceedings more complex and time consuming.

"142. An increasing number of arbitration rules address consolidation. Arbitration rules that expressly permit consolidation of two or more pending arbitrations do so upon consideration of various factors, such as whether (i) consolidation has been requested by a party, (ii) all the parties agree to consolidation, (iii) the disputes arise in connection with the same legal relationship or under the same arbitration agreement and, if not, whether those agreements are compatible, and (iv) an arbitral tribunal has been appointed in any of the arbitrations.

"**20. Possible requirements concerning form, content, filing, registration and delivery of the award** [*A/CN.9/826, paras. 177 to 181; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 128 to 132*]

"143. The parties and the arbitral tribunal should bear in mind the applicable arbitration law and the law at the potential place(s) of enforcement of the award, as well as the applicable arbitration rules, in considering any requirements as to the form, content, filing, registering or delivering of the award.

"144. Some laws require that arbitral awards be filed or registered with a court or similar authority, or that they be delivered in a particular manner or through a competent authority. Those laws differ with respect to, for example, the type of award to which the requirement applies (for example, to all awards or only to awards not rendered under the auspices of an arbitral institution); the time periods for filing, registering or delivering the award (in some cases those time periods may be rather short); and the consequences of failing to comply with such requirements.

"145. If such requirements exist, it is useful, before the issuance of an award, to determine who will take the necessary steps to meet the requirements and to decide how the costs are to be allocated. The failure to comply with such requirements might affect the validity and/or enforceability of the award."

[23] See, for example, article 4(2)(f) of the UNCITRAL Arbitration Rules (as revised in 2010).

H. Note by the Secretariat on settlement of commercial disputes: international commercial conciliation: enforceability of settlement agreements

(A/CN.9/WG.II/WP.195)

[Original: English]

Contents

I. Introduction

1. At its forty-seventh session, in 2014, the Commission had before it a proposal to undertake work on the preparation of a convention on the enforceability of international commercial settlement agreements reached through conciliation (A/CN.9/822). [1] The Commission agreed that the Working Group should consider at its sixty-second session the issue of enforcement of international settlement agreements resulting from conciliation proceedings and should report to the Commission, at its forty-eighth session, in 2015, on the feasibility and possible form of work in that area.[2]

2. At its sixty-second session, the Working Group considered the topic of enforcement of settlement agreements resulting from international commercial conciliation (A/CN.9/832,

[1] *Official Records of the General Assembly, Sixty-ninth Session, Supplement No. 17* (A/69/17), para. 123.

[2] Ibid., para. 129.

paras. 13-59). While a number of questions and concerns were expressed, it was generally felt that they could be addressed through further work on the topic (A/CN.9/832, para. 58). The Working Group, therefore, suggested that it be given a mandate to work on the topic of enforcement of settlement agreements, to identify the relevant issues and develop possible solutions, including the preparation of a convention, model provisions or guidance texts. Considering that differing views were expressed as to the form and content, as well as the feasibility, of any particular instrument, the Working Group also suggested that a mandate on the topic be broad enough to take into account the various approaches and concerns (A/CN.9/832, para. 59).

3. At the forty-eighth session of the Commission, in 2015, there was general support to resume work on enforcement of settlement agreements with the aim to promote conciliation as a time- and cost-efficient alternative dispute resolution method. It was said that an instrument in favour of easy and fast enforcement of settlement agreements resulting from conciliation would further contribute to the development of conciliation. It was further pointed out that the lack of a harmonized enforcement mechanism was a disincentive for businesses to proceed with conciliation, and that there was a need for greater certainty that any resulting settlement agreement could be relied on. However, doubts were expressed on whether a harmonized enforcement mechanism would be desirable as it might have a negative impact on the flexible nature of conciliation. Another concern was whether it would be feasible to provide a legislative solution on enforcement of settlement agreements beyond article 14 of the UNCITRAL Model Law on International Commercial Conciliation ("the Model Law"). Furthermore, it was pointed out that procedures for enforcing settlement agreements varied greatly between legal systems and were dependent upon domestic law, which did not easily lend themselves to harmonization. Nonetheless, it was stated that legislative frameworks on enforcement of settlement agreements were being developed domestically and that it might be timely to consider developing a harmonized solution. It was suggested that work on the topic should generally not dwell into the domestic procedures; instead, a possible approach could be to introduce a mechanism to enforce international settlement agreements, possibly modelled on article III of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards (New York, 1958) ("the New York Convention").[3]

4. After discussion, the Commission agreed that the Working Group should commence work at its sixty-third session on the topic of enforcement of settlement agreements to identify relevant issues and develop possible solutions, including the preparation of a convention, model provisions or guidance texts. The Commission also agreed that the mandate of the Working Group with respect to that topic should be broad to take into account the various approaches and concerns.[4]

5. At its sixty-third session, the Working Group had preliminary exchange of views on the matter.[5] The present note outlines the issues considered by the Working Group and sets out possible drafting formulations, including those that would be relevant if the Working Group were to prepare a convention (for example, possible reservations or declarations), yet with the understanding that the final form would be decided upon at a later stage (A/CN.9/861, para. 109).

II. Preparation of an instrument on enforcement of settlement agreements: scope of application and enforcement procedure

A. International commercial settlement agreements resulting from conciliation

6. At its sixty-third session, the Working Group considered the scope of application of a possible instrument on enforcement of settlement agreements (referred to below as the "instrument"). There was general agreement that the instrument should apply to the

[3] Ibid., *Seventieth Session, Supplement No. 17* (A/70/17), paras. 138-140.
[4] Ibid., para. 142.
[5] The report of the Working Group on the work of its sixty-third session is contained in document A/CN.9/861.

enforcement of international commercial settlement agreements resulting from conciliation (A/CN.9/861, paras. 19, 39 and 40).

1. "International" settlement agreements

7. At the sixty-third session of the Working Group, it was generally agreed that the instrument should apply to "international" settlement agreements and that the determination of the "international" character of a settlement agreement should be considered in a broad manner. It was also mentioned that the criteria for such characterization should be objective and relevant to achieving the purpose of the instrument (A/CN.9/861, para. 39).

8. In that context, it was suggested that criteria for determining that a settlement agreement was "international" under the instrument could mirror those under article 1(4)(a) of the Model Law. [6] Accordingly, a settlement agreement would be considered "international" where at least two parties to the settlement agreement had their places of business in different States at the time of the conclusion of that agreement (A/CN.9/861, para. 37). It was further suggested that elements mentioned in article 1(4)(b) of the Model Law could also be considered for characterizing a settlement agreement as "international" under the instrument (A/CN.9/861, para. 38).[7]

9. The Working Group may wish to consider whether the instrument should also apply to the enforcement of settlement agreements concluded by parties that had their places of business in the same State, provided that its enforcement is sought in another State (A/CN.9/861, para. 38). The purpose would be to ensure that the instrument would apply to cross-border enforcement of a settlement agreement in addition to being applicable to international settlement agreements.

10. For drafting purposes, the Working Group may wish to consider the following draft formulation based on article 1(4) of the Model Law:

"*A settlement agreement is international if:*

(a) [The parties] [at least two parties] to the settlement agreement have, at the time of the conclusion of that agreement, their places of business in different States; or

(b) The State in which the parties have their places of business is different from:

(i) The State in which [a substantial part of] the obligation is to be performed under the settlement agreement;

(ii) The State with which [the subject matter of] the dispute is most closely connected; or

(iii) The State in which [recognition and] enforcement of the settlement agreement is sought."

11. If the instrument were to take the form of a convention, the Working Group may wish to consider the following draft formulation based on article 1(1) of the United Nations Convention on Contracts for International Sale of Goods (1980) (CISG):

"*This Convention applies to the [recognition and] enforcement of settlement agreements concluded by parties whose places of business are (i) in different States or (ii) in a State different from the State where [recognition and] enforcement of settlement agreements is sought provided that:*

a. The State where [recognition and] enforcement is sought is a Contracting State; or

---

[6] Article 1(4)(a) of the Model Law provides that: "*A conciliation is international if: (a) The parties to an agreement to conciliate have, at the time of the conclusion of that agreement, their places of business in different States; or (b) […]*".

[7] Article 1(4)(b) of the Model Law provides that: "*A conciliation is international if: (b) The State in which the parties have their places of business is different from either: (i) The State in which a substantial part of the obligations of the commercial relationship is to be performed; or (ii) The State with which the subject matter of the dispute is most closely connected*.".

b. The rules of private international law lead to the application of the law of a Contracting State."

12. In both instances, the following draft formulation could be added to provide guidance with regard to the determination of a party's place of business.

"*If a party has more than one place of business, the relevant place of business is that which has the closest relationship to [the dispute resolved by the settlement agreement][or any other criteria], having regard to the circumstances known to, or contemplated by, the parties at the time of the conclusion of the settlement agreement. If a party does not have a place of business, reference is to be made to the party's habitual residence.*"

2. "Commercial" settlement agreements

(a) Notion of "commercial"

13. At the sixty-third session of the Working Group, it was generally felt that the instrument should apply generally to the enforcement of "commercial" settlement agreements, without any limitation as to the nature of the remedies or obligations provided under those agreements (A/CN.9/861, paras. 40, 47 and 50). For example, it was agreed that the scope of the instrument should not be limited to pecuniary settlement agreements (A/CN.9/861, para. 47).

14. The Working Group may wish to further consider whether the "commercial" nature of the settlement agreement is to be derived from (i) the parties involved, (ii) the subject matter of the dispute being resolved, (iii) the obligation to be performed under the settlement agreement, or (iv) any of the above. For example, there may be obligations stipulated in the settlement agreement which are commercial in nature, whereas the parties are not necessarily commercial entities and the dispute itself could have arisen from a non-commercial relationship. The Working Group may wish to consider whether the instrument should address such circumstances in conjunction with other possible exclusions (see below, paras. 15-21).

(b) Possible exclusions

15. At the sixty-third session of the Working Group, it was generally considered that it was premature to decide whether the instrument should include an illustrative list of subject matters to be covered or a negative list of those to be excluded. However, it was pointed out that a negative list could run the risk of not being exhaustive (A/CN.9/861, para. 43).[8]

(i) Settlement agreements involving consumers, family and employment law matters

16. At the sixty-third session of the Working Group, there was general agreement that settlement agreements involving consumers should be excluded from the scope of the instrument. For drafting purposes, reference was made to article 2(a) of the CISG[9] as well as article 2 of the Convention on Choice of Courts Agreements (2005)[10] as possible models (A/CN.9/861, para. 41). The Working Group may wish to note that the CISG provision

---

[8] In that respect, the Working Group may wish to note that footnote 1 of article 1 of the Model Law contains an illustrative list of commercial transaction, which provides that: "*The term 'commercial' should be given a wide interpretation so as to cover matters arising from all relationships of a commercial nature, whether contractual or not. Relationships of a commercial nature include, but are not limited to, the following transactions: any trade transaction for the supply or exchange of goods or services; distribution agreement; commercial representation or agency; factoring; leasing; construction of works; consulting; engineering; licensing; investment; financing; banking; insurance; exploitation agreement or concession; joint venture and other forms of industrial or business cooperation; carriage of goods or passengers by air, sea, rail or road*."

[9] Article 2(a) of the CISG provides as follows: "*This Convention does not apply to sales: (a) of goods bought for personal, family or household use, unless the seller, at any time before or at the conclusion of the contract, neither knew nor ought to have known that the goods were bought for any such use; [...]*".

[10] Article 2(1) of the Choice of Court Convention provides as follows: "*This Convention shall not apply to exclusive choice of court agreements: a) to which a natural person acting primarily for personal, family or household purposes (a consumer) is a party; b) relating to contracts of employment, including collective agreements.*".

focuses on the purpose of the transaction whereas the Choice of Court Convention provision focuses on the party to the agreement as well as the content of that agreement.

17. The Working Group may wish to determine whether the instrument should expressly exclude from its scope settlement agreements dealing with certain matters, such as family or employment law or whether such exclusions would not be necessary as settlement agreements dealing with those matters would generally not fall within the category of "commercial" settlement agreements (A/CN.9/861, para. 42).

18. For drafting purposes, the Working Group may wish to consider the following draft formulations:

> Option 1 (based on the CISG): *"This [instrument] does not apply to settlement agreements: (a) concluded by one of the parties for personal, family or household purposes; and (b) relating to family or employment law."*
>
> Option 2 (based on the proposed text in paragraph 9 of document A/CN.9/WG.II/WP.192): *"A dispute is not "commercial" if it involves employment law or family law, or if a consumer — acting for personal, family, or household purposes — is a party."*

(ii) Settlement agreements involving government entities

19. The view generally shared by the Working Group at its sixty-third session was that it would not be desirable for the instrument to include a blanket exclusion of settlement agreements involving government entities as those entities also engaged in commercial activities and might seek to use conciliation to resolve disputes. It was noted that excluding settlement agreements involving government entities would deprive those entities of the opportunity to enforce such agreements against their commercial partners (A/CN.9/861, para. 46). The Working Group may wish to confirm this understanding.

20. It may be noted that for States that would wish to exclude settlement agreements involving government entities from the scope of the instrument, a model legislative text would provide for such flexibility. In addition, as the currently suggested list of defences to enforcement includes lack of capacity, such ground could be invoked by government entities in jurisdictions where those entities are not authorized to conclude settlement agreements (A/CN.9/861, para. 44) (see below, paras. 55 and 56).

21. If the instrument were to take the form of a convention, States may be allowed to formulate a reservation or a declaration for that purpose (A/CN.9/861, para. 46). Depending on the scope of the instrument, the Working Group may wish to consider the following formulations:

> Option 1: "*A Party to this Convention may declare that it shall not apply this Convention to settlement agreements to which a government, a governmental agency or any person acting for a State is a party, unless otherwise indicated in the declaration*."
>
> Option 2 (based on the proposed text in paragraph 11 of document A/CN.9/WG.II/WP.192): "*A Party to this Convention may declare that it shall apply this Convention to settlement agreements to which a government, a governmental agency or any person acting for a State is a party only to the extent specified in a declaration*."

3. Settlement agreements resulting from "conciliation"

(a) Notion of "conciliation"

22. At the sixty-third session of the Working Group, broad support was expressed for limiting the scope of the instrument to settlement agreements that resulted from conciliation (A/CN.9/861, para. 19). Nonetheless, it was suggested that the notion of "conciliation" in the instrument should be broad and inclusive to cover different types of conciliation

techniques. It was widely felt that the definition of "conciliation" in article 1(3) of the Model Law provided a useful reference (A/CN.9/861, para. 21).[11]

23. For drafting purposes, the Working Group may wish to also consider the proposed text in paragraph 9 of document A/CN.9/WG.II/WP.192,which provides as follows:

> "*'Conciliation' is a process whereby parties attempt to reach an amicable settlement of their dispute with the assistance of a third person or persons lacking the authority to impose a solution upon the parties to the dispute. […]*"

24. The Working Group may wish to note that both article 1(3) of the Model Law and the proposed text (see above, para. 23) underline that the conciliator would "lack the authority to impose a solution upon the parties to the dispute".

25. In addition, the Working Group may wish to consider whether the instrument should include provisions to ascertain that the settlement agreement actually resulted from conciliation (see below, paras. 42-43).

(b) Settlement agreements reached during judicial or arbitral proceedings

26. Confining the scope of the instrument to settlement agreements resulting from conciliation would generally exclude those resulting from any other dispute resolution methods, including judicial or arbitral proceedings. However, settlement agreements may be concluded in the course of such proceedings, as reflected in article 1(8) of the Model Law.[12] By way of illustration, the proposed text in paragraph 9 of document A/CN.9/WG.II/WP.192 provides as follows: "*'Conciliation' is a process […]. This definition includes cases in which parties to a dispute reached a settlement agreement in the course of arbitration proceedings.*"

27. Therefore, the Working Group may wish to consider whether the instrument should also apply where the parties have reached a settlement agreement in the course of judicial, arbitral or any other proceedings (A/CN.9/861, paras. 24-28). Diverging views were expressed at the sixty-third session of the Working Group on that question. One view was that the scope of the instrument should be limited to settlement agreements where the resolution of the dispute was initiated through conciliation and by no other means, in order to avoid overlap with other instruments (for instance, the judgements project of the Hague Conference on Private International Law, as well as the New York Convention) (A/CN.9/861, para. 25). A different view was that the resolution of many commercial disputes did not necessarily begin with a conciliation process and that parties, after submitting a dispute to a court or an arbitral tribunal, might reach an agreement during judicial or arbitral proceedings, in some cases through a conciliation process (A/CN.9/861, para. 26).

28. The Working Group may wish to consider whether the scope of the instrument should be expanded to settlement agreements concluded during judicial or arbitral proceedings and, in the affirmative, whether to then limit application to situations where there was a conciliation process that led to the settlement agreement and where the agreement was not recorded in a judicial decision or an arbitral award (A/CN.9/861, para. 27).

B. Validity and content of settlement agreements

29. The term "settlement agreement" is generally used to refer to an agreement that resolves a dispute, in all or in part and is to be distinguished from the agreement to submit a

---

[11] Article 1(3) of the Model Law provides as follows: "*'Conciliation' means a process, whether referred to by the expression conciliation, mediation or an expression of similar import, whereby parties request a third person or persons ("the conciliator") to assist them in their attempt to reach an amicable settlement of their dispute arising out of or relating to a contractual or other legal relationship. The conciliator does not have the authority to impose upon the parties a solution to the dispute*.".

[12] Article 1(8) of the Model Law provides as follows: "*This Law applies irrespective of the basis upon which the conciliation is carried out, including agreement between the parties whether reached before or after a dispute has arisen, an obligation established by law, or a direction or suggestion of a court, arbitral tribunal or competent governmental entity*".

dispute to conciliation. The Working Group may wish to consider whether the instrument would need to provide a definition of the term "settlement agreement". In this context, it should be noted that the New York Convention does not define the term "award".

1. Validity of settlement agreements

30. The Working Group may wish to consider whether, and in the affirmative, at what stage of the procedure, the validity of settlement agreements should be considered under the instrument (A/CN.9/861, paras. 82-83). At the sixty-third session of the Working Group, it was suggested that a possible model to address that issue could be found in article II(3) of the New York Convention and article 8(1) of the UNCITRAL Model Law on International Commercial Arbitration, which referred to an arbitration agreement being deprived of effect when found to be "null and void, inoperative or incapable of being performed". It was suggested that those terms had been interpreted by courts in a number of jurisdictions in a harmonized fashion and therefore could be used if the instrument were to include a provision on the assessment of the validity of settlement agreements (A/CN.9/861, para. 92).

31. In this context, the Working Group may wish to consider whether the enforcing authority would be responsible for assessing the validity of the settlement agreement, the law applicable to that determination, and the possible legal consequences of that determination.

32. The Working Group may also wish to consider whether to address the possible impact of the conciliation process on the validity of the settlement agreement, for example, if the conciliation procedure was not in accordance with the law of the State where the conciliation took place.

2. Partial resolution of the dispute, finality of the settlement agreement, conditional provisions, set-off

33. As mentioned above, a settlement agreement may resolve a dispute in all or in part (see above, para. 29). The Working Group may wish to confirm that the instrument would apply to settlement agreement which partially resolve a dispute (A/CN.9/861, para. 64).

34. Settlement agreements are not necessarily final: they may be modified, amended or terminated by the parties, and such process may not necessarily involve conciliation. The Working Group may wish to consider whether such situations should be addressed under the instrument and in the affirmative, whether they could be treated as possible defences.

35. Another related question is whether and how the instrument would deal with situations where the obligations to be performed under the settlement agreement are conditional or have been partially performed by the parties and where the settlement agreement may be used for set-off purposes in a procedure. The Working Group may wish to consider whether the instrument should address those matters. At the sixty-third session of the Working Group, one view was that those circumstances could constitute possible defences, which could be handled by the enforcing authority in a flexible manner (A/CN.9/861, para. 91).

3. Dispute resolution clause in settlement agreements and party autonomy

36. Party autonomy plays a central role in conciliation. Parties may decide to enforce their settlement agreement under contract law or by any other means. They may provide for an arbitration clause in their settlement agreement as a means to resolve any dispute that could arise therefrom. In such circumstances, the Working Group may wish to consider whether the instrument should provide that the enforcing authority should refer the parties to arbitration (in accordance with article II of the New York Convention or the applicable arbitration law), or whether it should proceed with enforcement in accordance with the instrument.

37. Parties can also include a choice of court provision in the settlement agreement to determine the court competent to hear any dispute in relation to that agreement. In that

respect, the Working Group may wish to consider how to ensure that the instrument would effectively operate with the Choice of Court Convention.[13]

38. The Working Group may wish to consider whether the application of the instrument would depend on party autonomy, in particular if the instrument were to take the form of a convention (A/CN.9/861, paras. 61-63). Along those lines, the enforcement mechanism could be provided on an opt-in basis whereby the parties to the settlement agreement would agree to its application or on an opt-out basis whereby the parties would be free to exclude its application by agreement (see below, para. 42). If the Working Group considers that such a mechanism should be included in the instrument, it may wish to consider whether that mechanism would be optional for States Parties to the convention, and could be adopted or withdrawn through a declaration.

C. Form and other requirements of settlement agreements

1. A written agreement concluded by the parties

39. At its sixty-third session, the Working Group agreed that the instrument should provide certain form requirements of settlement agreements that would distinguish them from other agreements. Only those fulfilling such form requirements would be granted expedited enforcement under the instrument (A/CN.9/861, para. 51).

40. It was generally felt that those requirements should not be prescriptive and should be set out in a brief manner to preserve the flexible nature of the conciliation process (A/CN.9/861, para. 67). It was further noted that it would be preferable for the instrument to set minimum form requirements, providing States with the flexibility to introduce any other requirements if they so wished (A/CN.9/861, para. 65).

41. For example, the instrument may require that a settlement agreement should be in writing and indicate the agreement of the parties to be bound by the terms of the settlement agreement (by signing or by concluding the agreement) (A/CN.9/861, paras. 52, 53 and 67). In that respect, the Working Group may wish to consider how to formulate such requirements in the instrument, taking into account the use of electronic means of communication.

2. Other requirements

42. The Working Group may wish to consider whether the requirements referred to above (paras. 40-41) would be the only or minimum requirements and whether the instrument should require additional elements (A/CN.9/861, para. 67). By way of illustration, other elements might include an indication that: (i) a conciliator was involved in the process (for example, by him/her signing the settlement agreement, indicating his/her identity in the settlement agreement or submitting a separate statement to that purpose) (A/CN.9/861, paras. 54-58); (ii) the settlement agreement resulted from conciliation (see above, para. 25); (iii) the parties to the settlement agreement were informed of the enforceability of the settlement agreement before or upon its conclusion; or (iv) the parties opted into the enforcement mechanism envisaged by the instrument (A/CN.9/861, paras. 61-63 and 67; see also above, para. 38).

43. The Working Group may wish to consider whether the instrument would require these elements to be indicated in the settlement agreement. The Working Group may also wish to consider whether some of these elements could be taken into account in the definition of settlement agreements, if any. Alternatively, the instrument could provide that parties applying for the enforcement of settlement agreements are required to supply proof of these elements following article IV of the New York Convention (see below, para. 45).

---

[13] Article 5(1) of the Convention reads as follows: "*The court or courts of a Contracting State designated in an exclusive choice of court agreement shall have jurisdiction to decide a dispute to which the agreement applies, unless the agreement is null and void under the law of that State. A court that has jurisdiction under paragraph 1 shall not decline to exercise jurisdiction on the ground that the dispute should be decided in a court of another State*.".

D. Enforcement procedure and defences to enforcement

1. Direct enforcement mechanism

44. At its sixty-third session, the Working Group generally agreed that the instrument should provide a mechanism where a party to a settlement agreement would be able to seek enforcement directly at the State of enforcement (referred to as "direct enforcement") without incorporating a review or control mechanism in the State where the settlement agreement was originating from (referred to as "originating State") as a pre-condition (A/CN.9/861, para. 80). In support of that approach, it was stated that (i) it could be very difficult to determine the originating State as the connecting factor might be subject to different determinations, and (ii) a review or control mechanism was likely to result in double exequatur, which would be at odd with the purpose of the instrument to provide an efficient and simplified enforcement mechanism. It was further noted that concerns raised by direct enforcement could be addressed in the context of possible defences to enforcement (A/CN.9/861, para. 84).

45. For drafting purposes, the Working Group may wish to consider the following formulation based on articles III and IV of the New York Convention:

> "*1. Settlement agreements shall be enforced in accordance with the rules of procedures of the [territory][place][State] where enforcement is sought, under the conditions laid down in [the instrument]*.
>
> *2. To obtain enforcement of a settlement agreement, the party applying for enforcement shall, at the time of application, supply* [form and other requirements mentioned above, in paras. 39-42]."

2. Notion of recognition

46. At its sixty-third session, the Working Group considered whether the instrument would need to provide for "recognition" of the settlement agreement by a court or competent authority at the place of enforcement (A/CN.9/861, paras. 71-79).

47. Diverging views were expressed regarding the need for the instrument to provide for the recognition of settlement agreements by a court or competent authority. This resulted from different understandings of the notions of "recognition" and "settlement agreements" as the subject of such recognition (as contracts between private parties or acts of a particular nature resulting from a dispute resolution procedure) (A/CN.9/861, para. 72).

48. By way of background on the reference to "recognition" in international texts, the concept of recognition of non-judicial/State action appears as early as the Geneva Protocol on Arbitration Clauses (1923) and the Geneva Convention on the Execution of Foreign Arbitral Awards (1927). Those conventions call for the recognition of arbitration agreements "as valid" and the recognition of arbitral awards "as binding". The notion of "recognition" of a non-judicial/State action absent any qualifier (e.g., "as binding" or "as valid") appears to have originated with the New York Convention with regards to recognition of arbitration agreements (article II (1)) and arbitral awards (article III which requires that they be recognized "as binding").

49. The Working Group may wish to consider whether a settlement agreement would need to be given effect through a procedure akin to recognition and which legal value such a procedure would give to settlement agreements. As an alternative, the Working Group may wish to consider clarifying the meaning of "recognition" in the context of the instrument, and refer, for instance, to the need to give legal effect to the settlement agreements.

50. If the recognition of settlement agreements is dealt with under the instrument, the Working Group may also wish to consider whether and how recognition would relate to the assessment of the validity of the settlement agreement (see above, paras. 30-32).

3. Defences to enforcement and applicable law

51. At its sixty-third session, the Working Group considered the question of defences to enforcement of settlement agreements with the assumption that the instrument would

provide direct enforcement (see above, paras. 44 and 45). The Working Group exchanged preliminary views on defences that should be included in the instrument, how they should be presented, and how to determine the law applicable to defences (A/CN.9/861, para. 85).

52. The Working Group agreed that defences in the instrument should be limited and not cumbersome for the enforcing authority to implement allowing for a simple and efficient verification of the grounds for refusing enforcement. It was widely felt that defences in the instrument should be exhaustive and stated in general terms, giving flexibility to the enforcing authority with regard to their interpretation (A/CN.9/861, para. 93). It was suggested that defences in the instrument should be broadly categorized and set out in general terms. As to the possible categories of defences, reference was made to those pertaining to: (i) the genuineness of the settlement agreement (reflecting the parties' consent, not being fraudulent), (ii) the readiness or validity of the settlement agreement to be enforced (being final, not having been modified or performed, binding on the parties) and (iii) international public policy. As to who could raise these defences, it was said that some categories of defences might also be considered by the enforcing authority at its own initiative (A/CN.9/861, para. 97).

53. At its sixty-third session, the Working Group considered some possible grounds for resisting enforcement of settlement agreements. There was general support that existence of fraud, violation of public policy and the subject matter not capable of being conciliated could be raised as defences (A/CN.9/861, para. 88). In addition, it was suggested that the instrument should provide that enforcement should be denied if a party to the settlement agreement did not sign, or consent to, the agreement (see above, paras. 39-41), and the settlement agreement did not reflect the terms agreed to by the parties.

54. At its sixty-third session, the Working Group also considered the question of the law or laws applicable to defences in the enforcement procedure and how it should be addressed. After discussion, it was generally felt that the instrument should not address the laws applicable with respect to defences in the enforcement procedure, with the assumption that the enforcing authority or the court seized with the matter would usually apply the conflict-of-law rules at the place of enforcement and where relevant, consideration of the parties' choice of law in the settlement agreement. It was stated that the instrument could state that principle in broad terms and provide unambiguous guidance regarding the laws applicable to defences to the extent possible (A/CN.9/861, paras. 100-102). The Working Group may wish to consider that for certain defences, the law applicable at the place of enforcement may be relevant and should be mentioned (for instance, public policy).

55. For drafting purposes, the Working Group may wish to consider the proposed text in paragraph 18 of document A/CN.9/WG.II/WP.192, which provides as follows:

> "*Recognition and enforcement of an International Settlement Agreement may be refused, at the request of the party against whom it is invoked, only if that party furnishes to the competent authority where the recognition and enforcement is sought, proof that:*
>
> > *A. The party against whom the International Settlement Agreement is invoked was, under the law applicable to it, under some incapacity or concluded the International Settlement Agreement due to coercion or fraud; or*
> >
> > *B. The subject matter of the International Settlement Agreement is not capable of settlement under the law of the country where recognition and enforcement is sought; or*
> >
> > *C. The recognition or enforcement of the International Settlement Agreement would be contrary to the public policy of the country where recognition and enforcement is sought; or*
> >
> > *D. Recognition or enforcement would be contrary to the terms of the International Settlement Agreement itself; or […]*"

56. As an alternative, the Working Group may wish to consider the following draft formulation based on article V of the New York Convention and discussions at the sixty-third session of the Working Group:

"*1. Enforcement of a settlement agreement may be refused, at the request of the party against whom it is invoked, only if that party furnishes to the competent authority where enforcement is sought, proof that:*

(a) A party to the settlement agreement was under some incapacity under the law applicable to it; or

(b) The enforcement of the settlement agreement would be contrary to its terms and conditions (including the agreement by the parties that [the instrument] would not be applicable); or

(c) The settlement agreement was [null and void, inoperative or incapable of being enforced][not valid] under the law to which the parties have subjected it or failing any indication thereon, under the law deemed applicable by the competent authority; or

(d) The settlement agreement is not binding on the parties, is not a final resolution of the dispute, has been subsequently modified by the parties or the obligations therein have been performed; or

(e) Enforcement of the settlement agreement would be contrary to a decision of another court or competent authority.

2. Enforcement of a settlement agreement may also be refused by [the competent authority where enforcement is sought] if it finds that:

(a) The subject matter of the settlement agreement is not capable of settlement by conciliation under the law of the State where enforcement is sought; or

(b) The enforcement of the settlement agreement would be contrary to the public policy of the State where enforcement is sought."

4. Relationship of enforcement proceedings with judicial or arbitral proceedings

57. At the sixty-third session of the Working Group, it was widely felt that the instrument would need to address the possible impact that other related judicial or arbitral proceedings could have on the enforcement procedure (A/CN.9/861, para. 107). It was suggested that the approach adopted in article V(1)(e) and VI of the New York Convention could provide useful guidance. For instance, the instrument might provide that the enforcing authority might, if it considers proper, adjourn its decision on the enforcement of the settlement agreement when there exists an application for a judicial or arbitral proceeding about the settlement agreement.

III. Possible form of instrument

58. At its sixty-third session, the Working Group had a preliminary discussion on the possible form of the instrument, which could be a convention, model legislative provisions or a guidance text. The prevailing view was that there were a number of issues that would require further consideration before a decision could be made on the final form of the instrument. Nonetheless, a number of delegations expressed preference for preparing a convention, as it could more efficiently contribute to the promotion and harmonization of conciliation (A/CN.9/861, para. 108).

A. Convention

59. The proposal considered by the Commission (A/CN.9/822, see above, para. 1) was based on the preparation of a convention modelled on the New York Convention. One key feature of the proposal was that the proposed convention would provide the framework for the enforcement of international settlement agreements without seeking to harmonize the domestic legislation. Therefore, it would not address the procedural aspects dealt with in the domestic legislation and would only introduce a cross-border mechanism to enforce

international settlement agreements (A/CN.9/832, para. 22). It would also not seek to harmonize rules governing the conciliation process nor address matters related to the attachment or execution of assets, both of which are not dealt with under the New York Convention.

60. If a convention were to be prepared, the Working Group may wish to consider the flexibility to be given to States possibly through reservations or declarations (for example, see above, para. 21).

61. The Working Group may wish to note that the proposal further suggests that settlement agreements under the proposed convention should be treated at least as favourably as foreign arbitral awards under the New York Convention (see A/CN.9/WG.II/WP.192, para. 15 and A/CN.9/861, para. 77, see also Guide to Enactment of the Model Law, para. 87).Thus, if the instrument were to takes the form of a convention, it would require that States "*not impose substantially more onerous conditions or higher fees or charges on the [recognition or] enforcement of settlement agreements to which they apply this Convention than they impose on the recognition or enforcement of arbitral awards or of other settlement agreements.*"

B. Model legislative provisions

62. During the sixty-second session of the Working Group, it was mentioned that a more gradual approach to harmonize the regime of enforcement of settlement agreements could be preferable, starting from the harmonization of domestic legislation (A/CN.9/832, para. 19). In line with that suggestion, another possible form of work may be the preparation of model legislative provisions, which would be adopted and enacted by States in their domestic legislation. Such an instrument would likely build upon article 14 of the Model Law, which leaves the method of enforcement to each enacting State.

63. Some of the aspects that could be addressed in the model legislative provisions would be whether the enforcement procedure would be mandatory (see footnote to article 14 of the Model Law) and whether the procedure should provide for expedited or simplified enforcement.

C. Guidance text

64. Another possible form of work could be to expand paragraphs 87 to 92 of the Guide to Enactment on article 14 of the Model Law and to prepare a legislative guide with relevant recommendations and commentary. Such a guidance text could set out information about various approaches taken in different jurisdictions based on replies received by the Secretariat (see document A/CN.9/846 and addenda as well as document A/CN.9/WG.II/WP.193 and A/CN.9/WG.II/WP.196). It could also include specific legislative recommendations including, for example, a recommendation on the application of the New York Convention to consent awards.

Contents

I. Introduction

1. At its forty-seventh session, in 2014, the Commission agreed that the Working Group should consider at its sixty-second session the issue of enforcement of settlement agreements resulting from international commercial conciliation and should report to the Commission at its forty-eighth session, in 2015, on the feasibility and possible form of work in that area. The Commission invited delegations to provide information to the Secretariat in respect of that subject matter.[1] For the preparation of possible future work on the matter, and to facilitate the collection of information by delegations, the Secretariat circulated to States a questionnaire, reproduced in section II of document A/CN.9/846. The replies received by the Secretariat before the commencement of the forty-eighth session of the Commission have been reproduced in document A/CN.9/846 and its addenda. Replies received after that date have been reproduced in document A/CN.9/WG.II/WP.191 and in this note.

II. Compilation of comments

[Date: 30 September 2015]

Question 1: Information regarding the legislative framework

At present, there is no Law that regulates commercial mediation/conciliation judgements in the Kingdom. The organization, rules and procedures of the Reconciliation Center — operating in the Kingdom — do not make any reference to the enforcement of international commercial agreements resulting from mediation/conciliation procedures. There is, however, an arbitration/conciliation law that stipulates procedures for enforcement of judgements and agreements, as follows.

After ascertaining the procedural validity — subject matter and territorial jurisdiction — of the judgements and agreements to be enforced in the Kingdom, after ascertaining the formal procedures to be followed regarding the judgements and agreements resulting from arbitration and conciliation in Saudi laws, after ascertaining that these judgements and agreements do not contravene a judgement or decision rendered by a tribunal, commission or body having the competence to decide on the subject of dispute in the Kingdom, and after ascertaining that these judgements and agreements do not contain anything that contravenes the tenets of Islamic Law and public order in the Kingdom (if possible, the judgement or agreement may be split and the part not containing a contravention be enforced), the competent tribunal or its appointee shall issue an order enforcing the international commercial judgements and agreements resulting from mediation/conciliation procedures. The request is submitted to the tribunal together with the following: the original of the agreed

[1] *Official Records of the General Assembly, Sixty-ninth Session, Supplement No. 17* (A/69/17), para. 129.

document or a certified copy thereof; a true copy thereof; an Arabic translation thereof, certified by an accredited body (if written in a foreign language); and proof of its submission to the competent tribunal within 15 days of its issuance.

The Law in the Kingdom makes no distinction regarding the enforcement of international commercial settlement agreements, since they are adjudicated expeditiously in all cases. Therefore, the requirements are the same in regular and expeditious cases.

The Saudi laws do not provide for treating an international commercial settlement agreement as a final award rendered by an arbitral tribunal. They do, however, treat settlement/conciliation agreements — after all procedures and requirements stipulated in Saudi laws have been applied — as awards rendered by an arbitral tribunal, which leads to the same result as regards enforcement.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

The judicial system in the Kingdom does not reject local or international commercial settlement agreements, but encourages them in fulfilment of the Holy Koran verse ("And reconciliation Is better"). It does, however, highlight the need for the procedural validity — as stipulated in the Saudi laws — of the functioning of these agreements to ensure their enforcement.

Question 3: Validity of international commercial settlement agreements

The laws in the Kingdom specify all criteria to be applied to ensure that local or international commercial agreement resulting from mediation/conciliation procedures are enforceable. This is done by virtue of the Arbitration Law established by Royal Decree No. m/34 dated 24/5/1433 H [15 April 2012] and the Enforcement Law established by Royal Decree No. m/53 dated 13/8/1433 H [2 July 2012]. There are no bases in Saudi laws for challenging the validity of a settlement agreement resulting from mediation/conciliation other than what is mentioned in the Arbitration Law.

II. Compilation of comments

1. Italy

[Original: English]
[Date: 22 January 2016]

Question 1: Information regarding the legislative framework

Italian Decree No. 28/2010 on Mediation in Civil and Commercial disputes entered into force on the 20th of March 2010 and it has been amended with Law No. 98 of 2013. This decree sets up a mediation procedure for disputes regarding disposable civil and commercial rights, which can be resolved by conciliation (note: conciliation in this context refers to its legal meaning in Italian law, referring to the settlement agreement arising from a mediation proceeding). This particular kind of mediation has specific features provided by the law. The mediation procedure must be administered by accredited mediation institutions composed of certified (trained by accredited training centres) mediators. These mediation institutions are listed in a Registry at the Ministry of Justice.

In some cases, an attempt at mediation is mandated either by Italian law or by the order of a judge and in these cases the lawyers of all parties are obliged to be present. In other cases, the parties agree voluntarily and/or are obliged by contractual stipulations (conciliation clauses) to attempt mediation within the parameters of the decree.

Following the procedure set up by the decree, several legal guarantees — including guarantees of confidentiality, the suspension of the limitation period and the enforceability of the mediation clause — are granted. There are certain relevant advantages in following this procedure, such as fiscal benefits and especially the enforceability of settlement agreements resulting from this mediation procedure.

i. The enforceability of the agreement, as a result of a mediation proceedings as governed by Decree No. 28, including both pecuniary and non-pecuniary obligations, can be reached in two different ways (as per art. 12 of the Decree No. 28). All other settlement agreements, for example those arising from ad-hoc mediation, are treated by the law as contracts.

- First way: each party can present the settlement agreement to the Court to be ratified by the President of the Tribunal, provided its formal regularity and its compliance with imperative norms and public order have been verified;
- Second way, if the lawyers, having certified the conformity of the agreement with imperative norms and public order, agree to sign it, the settlement agreement becomes directly enforceable on the Italian territory.

Such provision does represent a significant development, making the procedure more attractive in the considerable number of cases where the parties have an interest in reaching a settlement within a short timescale and with a reasonable degree of certainty that they will be able to enforce any agreement reached.

ii. There is no express mention, in the Decree, of the enforceability of such agreements outside the Italian territory.

The only provision for expedited enforcement of international commercial settlement agreements is the one contained at the first paragraph of art. 12 of the Decree No. 28: "In the cross border disputes of art. 2 of EU Parliament and Council Directive 2008/52/CE dated 21 May 2008, the agreement is ratified ('omologato') by the President of the Tribunal where the Agreement has to be executed."

iii. There is no provision to the effect that an international commercial settlement agreement be treated as a final award rendered by an arbitral tribunal.

Question 2: Grounds for refusing enforcement of a commercial settlement agreement

Refusal of enforcement of a commercial settlement agreement may result from the failure to comply with formal requirements, imperative norms or public order.

Question 3: Validity of international commercial settlement agreements

Since mediation/conciliation agreements (clauses) are regarded as contracts in Italy, the question as to their validity is governed by the contract law applicable under the conflict of law provisions. Agreements to mediate/conciliate, as well as agreements resulting from mediation/conciliation, are regarded as contracts subject to the applicable contract law rules.

J. Note by the Secretariat on settlement of commercial disputes: revision of the UNCITRAL Notes on Organizing Arbitral Proceedings

(A/CN.9/879)

[Original: English]

Contents

I. Introduction

1. Further to initial discussions at its twenty-sixth session, in 1993,[1] the Commission finalized the UNCITRAL Notes on Organizing Arbitral Proceedings (also referred to below as the "Notes") at its twenty-ninth session, in 1996.[2] At its forty-seventh session, in 2014, the Commission agreed that the Working Group should commence work on the revision of the Notes and, in so doing, should focus on matters of substance, leaving drafting to the Secretariat.[3]

2. At its forty-eighth session, in 2015, the Commission had before it the draft revised Notes (contained in document A/CN.9/844), as it resulted from the work of the Working Group at its sixty-first[4] (Vienna, 15-19 September 2014) and sixty-second[5] (New York, 2-6 February 2015) sessions.

3. The Commission approved the draft revised Notes in principle, and requested the Secretariat to revise the Notes in accordance with its deliberations and decisions.[6] It was further agreed that the Secretariat could seek input from the Working Group on specific issues during its sixty-fourth session. The Commission further requested that the revised Notes be finalized for adoption at its forty-ninth session, in 2016.[7]

4. Accordingly, the Working Group considered the draft revised Notes (contained in document A/CN.9/WG.II/WP.194) at its sixty-fourth session (New York, 1-5 February 2016) and requested the Secretariat to prepare an updated draft of the Notes based on the deliberations and discussions for consideration by the Commission.[8] This note contains the draft revised Notes for finalization and approval by the Commission.

II. Revision of the UNCITRAL Notes on Organizing Arbitral Proceedings

A. Specific issues for consideration

5. The Commission may wish to note the following:

(a) Note 5 (Costs of arbitration): At its sixty-fourth session, the Working Group agreed that the question whether in-house costs of the parties should be included in the list of arbitration costs should be further considered by the Commission as that question had not been discussed previously, and is not fully settled in practice (A/CN.9/867, paras. 41 and 42); provisions on in-house costs are contained in the draft below in paragraphs 40 and 41;

(b) Notes 14 to 18: At its sixty-fourth session, the Working Group heard suggestions which were not discussed due to lack of time with respect to Notes 14 to 18 (A/CN.9/867, paras. 68-89); those suggestions are reflected in the draft below for consideration by the Commission.

B. Draft revised UNCITRAL Notes on Organizing Arbitral Proceedings

6. The Commission may wish to consider the draft revised Notes below. References to discussions of the Working Group at its sixty-first, sixty-second and sixty-fourth sessions and of the Commission at its forty-eighth session are contained below.

"2016 UNCITRAL Notes on Organizing Arbitral Proceedings

"Preface

"The United Nations Commission on International Trade Law (UNCITRAL) adopted the first edition of the Notes at its twenty-ninth session, in 1996. UNCITRAL finalized a second edition of the Notes at its [forty-ninth] session, [in 2016]. In addition to representatives of the 60 member States of UNCITRAL, representatives of many other States and of international organizations participated in the deliberations. In preparing the second edition of the Notes, the Secretariat consulted with experts from various legal systems, national and international arbitration bodies, as well as international professional associations.

"List of matters for possible consideration in organizing arbitral proceedings

"Introduction

"**Purpose of the Notes** [*A/CN.9/826, paras. 13 to 15 and 28; A/CN.9/832, para. 61*]

"1. The purpose of the Notes is to list and briefly describe matters relevant to the organization of arbitral proceedings. The Notes, prepared with a focus on international arbitration, are intended to be used in a general and universal manner, regardless whether the arbitration is administered by an arbitral institution.

"2. Given that procedural styles and practices in arbitration do vary and that each of them has its own merit, the Notes do not seek to promote any practice as best practice.

"**Non-binding character of the Notes** [*A/CN.9/832, para. 62; A/CN.9/867, para. 17*]

"3. The Notes do not impose any legal requirement binding on the parties or the arbitral tribunal. The parties and the arbitral tribunal may use or refer to the Notes at their discretion and to the extent they see fit and need not adopt or provide reasons for not adopting any particular element of the Notes.

"4. The Notes are not suitable to be used as arbitration rules, since they do not oblige the parties or the arbitral tribunal to act in any particular manner. Various matters discussed in the Notes may be covered by applicable arbitration rules. The use of the Notes does not imply any modification of such arbitration rules.

"5. The Notes, while not exhaustive, cover a broad range of situations that may arise in arbitral proceedings. In many arbitrations, however, only a limited number of the matters addressed in the Notes will arise or need to be considered. The specific circumstances of the arbitration will indicate which matters it would be useful to consider and at what stage of the arbitral proceedings those matters should be considered. Therefore, it is advisable not to raise a matter unless and until it appears likely that the matter needs to be addressed.

"**Characteristics of arbitration** [*A/CN.9/826, paras. 30, 31 and 41 to 50; A/CN.9/832, paras. 76 to 79; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 27 to 34; A/CN.9/867, para. 18*]

"6. Arbitration is a flexible process to resolve disputes; the parties are free to agree on the procedure to be followed by the arbitral tribunal in conducting the arbitral proceedings, subject to mandatory provisions of the applicable arbitration law. The autonomy of the parties in determining the procedure is of special importance in international arbitration. It allows the parties to select and tailor the procedure according to their specific wishes and needs, unimpeded by possibly conflicting legal practices and traditions.

"7. The parties exercise their autonomy usually by agreeing on a set of arbitration rules to govern the arbitral proceedings. The benefits of selecting a set of arbitration rules are that the procedure becomes more predictable and that the parties and the arbitral tribunal may save time and costs by using an established set of arbitration rules that may be familiar to the parties, that has been carefully drafted by experienced practitioners, and that has often been widely applied and interpreted by arbitral tribunals and courts and commented by practitioners and academics. In addition, the selected set of arbitration rules (as modified by the parties, to the extent permitted) usually prevails over the non-mandatory provisions of the applicable arbitration law and may better correspond to the objectives of the parties than the default provisions of the applicable arbitration law. Where the parties have not agreed at an earlier stage on a set of arbitration rules, they may still agree on such a set after the arbitration has commenced (see below, para. 10).

"8. To the extent that the parties have not agreed on the procedure to be followed by the arbitral tribunal or on a set of arbitration rules to govern the arbitral proceedings, the arbitral tribunal has the discretion to conduct such proceedings in the manner it considers appropriate, subject to the applicable arbitration law. Arbitration laws usually grant the arbitral tribunal broad discretion and flexibility in the conduct of arbitral proceedings, provided that a fair, equitable and efficient process is observed.[9] A set of arbitration rules selected by the parties would also shape the arbitral tribunal's discretion to conduct the arbitral proceedings, either by strengthening or limiting that discretion. Discretion and flexibility are useful as they enable the arbitral tribunal to make decisions on the organization of arbitral proceedings that take into account the circumstances of the case and the expectations of the parties, while complying with due process requirements. Where the parties did not agree on the procedure or on arbitration rules, the arbitral tribunal may nevertheless take guidance from, and use as a reference, a set of arbitration rules.

[9] For example, article 19 of the UNCITRAL Model Law on International Commercial Arbitration (with amendments as adopted in 2006) provides as follows: "(1) Subject to the provisions of this Law, the parties are free to agree on the procedure to be followed by the arbitral tribunal in conducting the proceedings. (2) Failing such agreement, the arbitral tribunal may, subject to the provisions of this Law, conduct the arbitration in such manner as it considers appropriate. The power conferred upon the arbitral tribunal includes the power to determine the admissibility, relevance, materiality and weight of any evidence."

"**Annotations**

"**1. Consultation regarding the organization of arbitral proceedings; Procedural meetings** [*A/CN.9/826, paras. 27, 33 to 35 and 39; A/CN.9/832, paras. 66 to 75; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 22 to 26; A/CN.9/867, paras. 19 to 29*]

"**(a) General principle of consultation between the parties and the arbitral tribunal**

"9. It is usual for the arbitral tribunal to involve the parties in making decisions on the organization of the arbitral proceedings and, where possible, to seek their agreement. Such consultations are intrinsic to the consensual nature of arbitration and are normally undertaken with respect to most organizational decisions addressed in the Notes. However, in order to remain concise, the need for such consultation is not necessarily repeated in the Notes each time consultation is expected to occur.

"10. Likewise, it is usual for the parties to consult the arbitral tribunal whenever they agree between themselves on any issue that might affect the organization of the arbitral proceedings. When the agreement of the parties affects the planning of the arbitrators, the parties would usually also seek the agreement of the arbitral tribunal. Moreover, if the parties agree after the arbitral tribunal has been constituted that an arbitral institution will administer the arbitration, the parties would usually secure the agreement of both the arbitral tribunal and that institution.

"**(b) Procedural meetings**

"*(i) First procedural meeting*

"11. It is advisable for the arbitral tribunal to give the parties a timely indication as to the organization of the arbitral proceedings and the manner in which it intends to proceed. In particular, in international arbitrations, parties may be accustomed to differing styles of arbitral proceedings and, without such guidance, they may find certain aspects of the arbitral proceedings unpredictable and difficult to prepare for.

"12. As a method of consultation with the parties, the arbitral tribunal may consider holding, at the outset of the arbitral proceedings, a meeting or case management conference at which it determines the organization of the arbitral proceedings and a procedural timetable.

"13. A number of issues covered by the Notes would usually be addressed at the first procedural meeting, and thus create the basis for a common understanding of the procedure among the parties and the arbitral tribunal. If a procedural timetable is established, it may serve, for instance, to indicate time limits for the communication of written submissions, witness statements, expert reports and documentary evidence, so that the parties may plan early in the arbitral proceedings. A procedural timetable may include provisional dates for hearings. In preparing the procedural timetable, the parties and the arbitral tribunal may also wish to consider whether any statutory and/or mandatory time limits on the duration of the arbitral proceedings are provided for in the applicable arbitration law or arbitration rules.

"*(ii) Subsequent procedural meetings*

"14. The arbitral tribunal usually holds additional procedural meetings (including what are sometimes referred to as 'preparatory conferences' or 'pre-hearing conferences') at subsequent stages of the arbitral proceedings. Procedural meetings are significant as they set the stage for the arbitral proceedings and aim at ensuring their efficiency. Procedural meetings may be used, for instance, for the arbitral tribunal to reassess whether further submissions are required or further evidence ought to be presented as well as to discuss matters relating to the organization of a hearing. The procedural timetable can be updated accordingly as the arbitral proceedings progress.

"*(iii) Modification of decisions on the organization of arbitral proceedings*

"15. Decisions on the organization of arbitral proceedings can be revisited and modified at relevant stages of the arbitral proceedings by the arbitral tribunal. However,

the arbitral tribunal should exercise caution in modifying procedural arrangements, in particular where the parties have taken steps in reliance on those arrangements. Moreover, the arbitral tribunal may not be able to modify procedural arrangements to the extent that those arrangements result from an agreement between the parties. If a modification is required, the arbitral tribunal would usually seek the agreement of the parties thereon.

"*(iv) Record of the outcome of a procedural meeting*

"16. A record of the outcome of a procedural meeting can take various forms depending on its significance, such as a procedural order, summary minutes, or an ordinary communication among the parties and the arbitral tribunal. Usually, the arbitral tribunal records the rules of procedure that have been determined to apply to the arbitral proceedings in a procedural order. The outcome of a procedural meeting can be made in writing or first made orally and recorded in writing after the procedural meeting. The parties and the arbitral tribunal may consider whether to produce transcripts, which could provide a precise record of the procedural meeting (see below, para. 135).

"*(v) Attendance of the parties*

"17. It is usually advisable that the parties themselves, in addition to any representatives they may have appointed, be present at procedural meetings.

"18. If a party neither participates nor is represented in a procedural meeting, the arbitral tribunal should nevertheless ensure that the non-participating party has an opportunity to participate in the further stages of the arbitral proceedings and to present its case. The procedural timetable, if established, should provide for such opportunity.

"19. Procedural meetings can be held either in the physical presence of all participants, or remotely via technological means of communication. The arbitral tribunal may consider, in each case, whether it would be preferable to hold the meeting in-person, which may facilitate personal interaction, or to use remote means of communication, which may reduce costs (see also below, para. 124).

"**2. Language or languages of the arbitral proceedings** [*A/CN.9/826, paras. 51 to 60; A/CN.9/832, paras. 80 to 86; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 35 to 37; A/CN.9/867, paras. 30 to 32*]

"**(a) Determination of the language**

"20. The parties may agree on the language or languages in which the arbitral proceedings will be conducted. Such agreement ensures that the parties have the capacity to communicate in the language or languages of the arbitral proceedings. In the absence of such agreement, the arbitral tribunal will usually determine the language or languages. Common criteria for that determination are the primary language of the contract(s) or other legal instruments under which the dispute arose, and the language commonly used by the parties in their communication. The parties and the arbitral tribunal usually choose a single language to conduct the arbitral proceedings (see below, para. 24).

"**(b) Possible need for translation and interpretation**

"21. The parties may rely on documentary evidence, judicial decisions and juridical writings ('legal authorities') that are not in the language of the arbitral proceedings. In determining whether to require translation of those documents in full or in part, the arbitral tribunal may consider whether the parties and the arbitral tribunal are able to understand the content of such documents without translation and whether cost-efficient measures are available in lieu of translation in full (such as translation of the relevant part of documents, or a single template translation for documents of similar or standardized content).

"22. Interpretation may be necessary where witnesses or experts appearing at a hearing are unable to testify in the language of the arbitral proceedings. Witnesses and experts familiar with the language of the arbitral proceedings might still require occasional interpretation, rather than full interpretation. If interpretation is necessary, it is advisable to consider whether the interpretation will be simultaneous or consecutive. While simultaneous interpretation is less time-consuming, consecutive interpretation allows for a closer monitoring of the accuracy of the interpretation.

"23. The responsibility for arranging translation and/or interpretation typically lies with the parties even in arbitrations administered by an arbitral institution.

"**(c) Multiple languages**

"24. Because of the logistical difficulties and considerable extra costs that often arise from conducting arbitral proceedings in more than one language, the parties and the arbitral tribunal usually choose to conduct the arbitral proceedings in a single language unless there are particular circumstances that would require the use of more than one language.

"25. When multiple languages are to be used in arbitral proceedings, the parties and the arbitral tribunal may need to decide whether the languages are to be used interchangeably without any translation or interpretation, or whether all communications and documents need to be translated and oral evidence interpreted into all the languages of the arbitration. As an alternative, the parties and the arbitral tribunal may decide that one of the languages will be designated as authoritative for the purpose of the arbitral proceedings (such that multiple languages could be used during the proceedings, but procedural orders and arbitral awards, for example, would be issued only in the authoritative language). In any case, where translation is required, the parties and the arbitral tribunal may need to consider whether, in the interest of economy and efficiency, it would be acceptable to limit translation to relevant sections of documents or to exempt certain types of documents, such as legal authorities (see above, para. 21), from translation.

"**(d) Costs of translation and interpretation**

"26. When making decisions about translation and interpretation, it is advisable for the arbitral tribunal to decide whether any or all of the costs are to be paid by the parties at the time the costs are incurred. Irrespective of who pays the costs when they are incurred, the arbitral tribunal may later have to decide how these costs, along with other costs, will ultimately be allocated between the parties, if the arbitral tribunal considers that these costs are to be included in the costs of arbitration (see below, paras. 39 and 47 to 49).

"**3. Place of arbitration** [*A/CN.9/826, paras. 61 to 66; A/CN.9/832, paras. 87 to 94; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 38 to 42; A/CN.9/867, paras. 33 to 37*]

"**(a) Determination of the place of arbitration**

"27. The parties may agree on the place (or 'seat') of arbitration. If the place of arbitration has not been agreed by the parties, typically the arbitral tribunal or the arbitral institution administering the arbitration will have to determine the place of arbitration at the outset of the arbitral proceedings. Arbitration rules of some institutions contain a default place of arbitration, applicable where the parties have not chosen one.

"**(b) Legal and other consequences of the place of arbitration**

"28. The place of arbitration normally determines the applicable arbitration law. Such determination has a legal impact on various matters, such as the requirements relating to the appointment and challenge of arbitrators, whether and on what grounds a party can seek judicial review or setting aside of an arbitral award, which court is competent with respect to the arbitral proceedings, as well as the conditions for recognition and enforcement of an arbitral award in other jurisdictions. It is advisable that the parties

and the arbitral tribunal familiarize themselves with the arbitration law and any other relevant procedural law at the place of arbitration, including in particular any mandatory provisions.

"29. Selection of the place of arbitration is influenced by various legal and other factors, the relative importance of which varies from case to case. Among the more prominent legal factors are:

(i) The suitability of the arbitration law at the place of arbitration;

(ii) The law, jurisprudence and practices at the place of arbitration regarding (a) the nature and frequency of court intervention in the course of arbitral proceedings, (b) the scope of judicial review or of grounds for setting aside an award, and (c) any qualification requirements with respect to arbitrators and counsel representation; and

(iii) Whether the State where the arbitration takes place and hence where the arbitral award will be made is a Party to the Convention on the Recognition and Enforcement of Foreign Arbitral Awards (1958, the 'New York Convention') and/or to any other multilateral or bilateral treaty on enforcement of arbitral awards.

"30. When it is expected that hearings will be held at the place of arbitration, other factors may become relevant in selecting the place of arbitration including:

(i) The convenience of the location for the parties and the arbitrators, including travel to the location;

(ii) The availability and cost of support services;

(iii) The location of the subject matter in dispute and proximity of evidence; and

(iv) Any qualification restrictions with respect to counsel representation.

"**(c) Possibility of holding hearings and meetings at a location different from the place of arbitration**

"31. The place of arbitration is not necessarily the place where hearings and/or meetings are held, although often the two are the same. In certain circumstances, it may be more expeditious or convenient for the parties and the arbitral tribunal to hold hearings and/or meetings at a location different from the place of arbitration, or remotely via technological means of communication. Many arbitration laws and arbitration rules expressly allow the arbitral tribunal to hold hearings and meetings elsewhere than at the place of arbitration.[10] Nonetheless, the parties and the arbitral tribunal may need to consider whether holding all hearings outside the place of arbitration may create difficulties at the stage of judicial review, setting aside or enforcement of the arbitral award.

"**4. Administrative support for the arbitral tribunal** [*A/CN.9/826, paras. 67 to 73; A/CN.9/832, paras. 95 to 102; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 43 to 48; A/CN.9/867, paras. 38 to 40*]

"**(a) Administrative support and arbitral institutions**

"32. The arbitral tribunal may need administrative support to carry out its functions. The arbitral tribunal and the parties should consider who will be responsible for arranging such support.

"33. When a case is administered by an arbitral institution, that institution may provide some administrative support to the arbitral tribunal. The availability and nature of such support vary greatly depending on the arbitral institution. Certain arbitral

[10] See, for example, article 20(2) of the UNCITRAL Model Law on International Commercial Arbitration (with amendments as adopted in 2006) and article 18(2) of the UNCITRAL Arbitration Rules (as revised in 2010).

institutions offer administrative support even to arbitral proceedings not conducted under their institutional rules. Some arbitral institutions have entered into cooperation agreements with a view to providing mutual assistance in supporting arbitral proceedings.

"34. Unless the administrative arrangements for the proceedings are made by an arbitral institution, they will usually be made by the parties or the arbitral tribunal. Hearing facilities, including related services, may be procured from specialized arbitration hearing centres which have been established in some cities and are sometimes linked to arbitral institutions. Otherwise, such hearing facilities and related services may be procured from other entities, such as chambers of commerce, hotels or specialized firms providing such support services. It may also be acceptable to leave some of the arrangements to one of the parties, subject to the agreement of the other party or parties.

"**(b) Secretary to arbitral tribunal**

"35. Administrative support might be obtained by engaging a secretary to carry out tasks under the direction of the arbitral tribunal. Such services may also be rendered by a registrar, clerk or administrator. Some arbitral institutions routinely assign secretaries to cases administered by them. Where this is not the case, some arbitrators frequently engage secretaries, particularly in large or complex cases, whereas other arbitrators do not.

"36. Functions and tasks performed by secretaries are broad in range. Secretaries may provide purely organizational support, such as making reservations for hearing and meeting rooms and providing or coordinating administrative services. Some arbitral tribunals wish to have secretaries carry out more substantive functions including legal research and other professional assistance, such as preparing a summary of the facts or the procedural history of the arbitral proceedings, collecting or summarizing case law or published commentaries on legal issues defined by the arbitral tribunal, and preparing draft procedural decisions. However, it is recognized that secretaries are not involved and do not participate in the decision-making of the arbitral tribunal, except in certain rare, specialized types of arbitration (for example, where the specific arbitral rules provide that secretaries are expected to provide legal advice in relation to the decision of the arbitral tribunal if and when the arbitral tribunal is composed only of non-lawyer, subject matter specialists).

"37. Secretaries are expected to be and remain impartial and independent during the arbitral proceedings. It is the arbitral tribunal's responsibility to ensure this. Some arbitral tribunals do this by requesting the secretary to sign a declaration of independence and impartiality.

"38. If the arbitral tribunal wishes to appoint a secretary, it would normally disclose this fact to the parties, along with the identity of the proposed secretary, the nature of the tasks to be performed by the secretary, and the amount and source of any proposed remuneration. The parties may wish to agree on the role and practices to be adopted in respect of the secretaries, as well as on the financial conditions applicable to their services. Institutional guidelines on secretaries may provide useful information to the parties.

"**5. Costs of arbitration** [*A/CN.9/826, paras. 22, 23 and 74 to 78; A/CN.9/832, paras. 103 to 112; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 49 to 56; A/CN.9/867, paras. 41 to 50*]

"**(a) Items of costs**

"39. The costs of arbitration usually include:

(i) The fees of the arbitral tribunal;

(ii) The expenses incurred by the arbitral tribunal, such as for (a) travel and accommodation, (b) administrative support, if not directly covered by the parties, and (c) tribunal-appointed experts (including their fees, travel and accommodation) and other assistance required by the arbitral tribunal;

(iii) The fees and expenses of the arbitral institution; and

(iv) The costs incurred by the parties, such as (a) legal fees and disbursements, (b) expenses relating to witnesses (including their travel and accommodation) and experts (including their fees, travel and accommodation), and (c) translation and interpretation costs (see above, para. 26).

"40. While it is widely accepted that costs incurred by the parties in respect of external legal counsel, witnesses and experts are recoverable, most arbitral rules are silent on internal legal, management and other costs (referred to as 'in-house costs') that parties may incur in pursuing or defending arbitral claims, leaving the issue of their recoverability to the discretion of the arbitral tribunal. Such in-house costs may represent a large portion of a party's total costs when in-house counsel, managing directors, experts and other staff members take a proactive role before and during the arbitral proceedings. There is no principle prohibiting the recovery of in-house costs incurred in direct connection with the arbitration. Some arbitral tribunals have awarded such costs insofar as they were necessary, did not unreasonably overlap with external counsel fees, were substantiated in sufficient detail to be distinguished from ordinary staffing expenses and were reasonable in amount.

"41. If not adequately addressed by the agreement between the parties, the applicable arbitration law or arbitration rules, it may be useful for the arbitral tribunal to identify whether in-house costs incurred by the parties will be recoverable and, if so, what records will need to be submitted to substantiate such cost claims.

"42. The parties and the arbitrators may have to consider how to treat taxes on services, in particular value-added taxes, when determining costs.

"**(b) Deposit of costs**

"43. Unless the matter is handled by an arbitral institution, the arbitral tribunal usually requests the parties to deposit an amount as an advance for the costs referred to in subparagraphs (i), (ii) and (iii) of paragraph 39. Payment of such deposit by a party does not mean that such party has waived any objection it may have to the arbitral tribunal's jurisdiction. If, during the arbitral proceedings, it emerges that the costs will be higher than anticipated (for example, because of the prolongation of the arbitral proceedings, additional hearings, appointment of an expert by the arbitral tribunal), supplementary deposits may be requested. Deposits can be paid in full or in instalments, and bank guarantees can be a means to secure such deposits.

"44. Many arbitration rules have provisions regarding these matters, including whether the deposit should be made in equal amounts by the parties and the consequences of the failure of a party to make the payment.[11]

"45. Where the arbitration is administered by an arbitral institution, the institution's services may include fixing the amount of the deposit as well as holding, managing, and accounting for the deposits. If the arbitral institution does not offer such services, the parties or the arbitral tribunal will have to make necessary arrangements, for example, with a bank or other external provider. In any case, it is useful to clarify matters, such as the type and the location of the account in which the deposit will be kept, how the deposit will be managed and whether interest on the deposit will accrue.

"46. The parties, the arbitral tribunal and the arbitral institution should be aware of regulatory restrictions that may have an impact on the handling of deposits of costs, such as restrictions in bar regulations, financial regulations relating to the identity of beneficiaries and restrictions on trade or payment.

"**(c) Fixing and allocating the costs**

"47. The arbitral tribunal usually determines which costs incurred by the parties referred to in subparagraph (iv) of paragraph 39 and in-house costs referred to in paragraphs 40 and 41 will be recoverable. In arbitrations administered by an arbitral institution, some of the costs referred to in paragraph 39 may be set by the arbitral

[11] See, for example, article 43 of the UNCITRAL Arbitration Rules (as revised in 2010).

institution. In fixing the recoverable costs, the arbitral tribunal usually considers the reasonableness of the costs and decides whether to require evidence that the costs have actually been incurred.

"48. After fixing the costs of the arbitration, the arbitral tribunal determines how to allocate the costs between the parties. In so doing, the arbitral tribunal usually takes into account the allocation method agreed by the parties or provided in the applicable arbitration law or arbitration rules. There are various methods for allocating costs, the general rule being that costs follow the event, i.e., the costs of the arbitration should be borne by the unsuccessful party or parties in whole or in part. In allocating costs, the arbitral tribunal may also consider certain conduct of the parties. Conduct so considered might include a party's (i) failure to comply with procedural orders of the arbitral tribunal or (ii) procedural requests (for example, document requests, procedural applications and cross-examination requests), that are unreasonable, to the extent that such conduct actually had a direct impact on the costs of the arbitration and/or is determined by the arbitral tribunal to have unnecessarily delayed or obstructed the arbitral proceedings.

"49. At an appropriate time during the arbitral proceedings, the arbitral tribunal may request from the parties that they make submissions on costs. Decisions by the arbitral tribunal on costs and their allocation do not necessarily need to be made in conjunction with a final award. Decisions on costs may be made at any time during the arbitral proceedings (for example, when a partial award or a procedural decision is rendered) as well as after the award on the merits has been rendered.

"**6. Possible agreement on confidentiality; transparency in treaty-based investor-State arbitration** [*A/CN.9/826, paras. 26, 79 to 89, 185 and 186; A/CN.9/832, paras. 114 to 121; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 57 to 60; A/CN.9/867, paras. 51 to 54*]

"**(a) Agreement on confidentiality**

"50. A widely held view is that there is an inherent requirement of confidentiality in commercial arbitration and that confidentiality is an advantageous and helpful feature of international commercial arbitration. Nevertheless, there is no uniform approach in domestic laws or arbitration rules regarding the extent to which the participants in an arbitration are under a duty to maintain the confidentiality of information relating to the arbitral proceedings.

"51. Should confidentiality be a concern or priority and should the parties not be satisfied by the treatment of that issue in the applicable arbitration law or arbitration rules, the parties may agree on the desired confidentiality regime to the extent not precluded by the applicable arbitration law.

"52. An agreement on confidentiality might cover one or more of the following matters: (i) the material or information that is to be kept confidential (for example, the fact that the arbitration is taking place, the identity of the parties and the arbitrators, pieces of evidence, written and oral submissions, the content of the award); (ii) measures for maintaining the confidentiality of such information and of the hearings and the duration of the obligation on confidentiality; (iii) circumstances in which confidential information may be disclosed in whole or in part to the extent necessary to protect a legal right; and (iv) other circumstances in which such disclosure might be permissible (for example, information in the public domain, or disclosures required by law or a regulatory body). The parties may wish to consider how to extend the obligation of confidentiality to witnesses and experts as well as to other persons associated with the party in the arbitral proceedings.

"53. Whereas the obligation of confidentiality imposed on the parties and their counsel may vary with the circumstances of the case as well as the applicable arbitration law and arbitration rules, arbitrators are generally expected to keep the arbitral proceedings, including any information related to or obtained during those proceedings, confidential.

"54. There are also circumstances in which certain information or material is deemed to be confidential to one of the parties in an arbitration (for example, commercial secrets, intellectual property, or information relating to national security in an arbitration involving a State or a government entity). Arrangements to protect such information or material may be made by the parties and, in certain circumstances, by the arbitral tribunal, for example, by restricting access to such information or material to a limited number of designated persons involved in the arbitration.

"**(b) Transparency in treaty-based investor-State arbitration**

"55. The specific characteristics of investor-State arbitration arising under an investment treaty have prompted the development of transparency regimes for such arbitrations. The investment treaty under which the investor-State arbitration arises may include specific provisions on publication of documents, open hearings, and confidential or protected information. In addition, the applicable arbitration rules referred to in those investment treaties may contain specific provisions on transparency.[12] Further, parties to a treaty-based arbitration may agree to apply certain transparency provisions.[13]

"**7. Means of communication** [*A/CN.9/826, paras. 25 and 91 to 102; A/CN.9/832, paras. 123 and 124; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), para. 61; A/CN.9/867, para. 55*]

"**(a) Determination of the means of communication**

"56. It is useful for the parties and the arbitral tribunal to determine at the outset the means of communication to be used during the arbitral proceedings. Factors that might be considered in selecting the means of communication include ensuring that:

(i) Documents are accessible and easily retrievable by the parties and the arbitral tribunal, including through the use of a database for uploading and sharing documents;

(ii) Receipt of the communication can be ascertained;

(iii) The means of communication is acceptable under the applicable arbitration law; and

(iv) The costs involved in the use of the selected means of communication are reasonable.

"57. Although more than one means of communication may be used (for example, paper-based as well as electronic means), the parties may wish to consider issues arising from the use of multiple means of communication, including which will be the authoritative means and, where time limits for submission apply, what action will constitute submission.

"**(b) Electronic means of communication**

"58. The use of electronic means of communication can make the arbitral proceedings more expeditious and efficient. However, it is advisable to consider whether all parties have access to, or are familiar with, such means. The parties and the arbitral tribunal may need to consider issues of compatibility, storage, access, data security as well as related costs when selecting electronic means of communication.

[12] See, for example, the UNCITRAL Rules on Transparency in Treaty-based Investor-State Arbitration ('the Rules on Transparency'); the Rules on Transparency may also have an impact on various aspects of the arbitral proceedings, for example, regarding submissions by third parties, and conduct of the hearings.

[13] For example, under article 1(2)(a) of the Rules on Transparency.

"**(c) Flow of communication**

"59. Communications are usually exchanged directly between the arbitral tribunal and the parties, unless an arbitral institution is acting as an intermediary. It is usual that all parties are copied on all communications to and from the arbitral tribunal.

"**8. Interim measures** [*A/CN.9/826, para. 24; A/CN.9/832, para. 113; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 62 to 74; A/CN.9/867, paras. 56 and 57*]

"**(a) Granting of interim measures**

"60. During the course of the arbitration, it is possible that a party may need to seek an interim measure, which is temporary in nature, either from the arbitral tribunal or a domestic court. Most arbitration laws and arbitration rules provide that the arbitral tribunal may, at the request of a party, grant interim measures.[14] Arbitration laws may also provide that courts may grant interim measures in relation to an arbitration. An established principle is that any request made by a party to a domestic court for an interim measure before or during the arbitral proceedings is not incompatible with an agreement to arbitrate.

"61. Depending on the applicable arbitration laws or arbitration rules, a party may be able to apply on an *ex parte* basis (i.e., without notice to any other party) for an interim measure and to apply, at the same time, for what is often referred to as a 'preliminary order', i.e. an order usually directing the parties not to frustrate the purpose of the requested interim measure while the arbitral tribunal decides whether to grant it. A party would normally only make such an *ex parte* request in circumstances where disclosing the request for the interim measure (prior to the arbitral tribunal's issuance of a preliminary order securing the status quo) may prompt the party against whom the requested measure is directed to take action that could frustrate the purpose of the measure (for example, sequestering assets or removing goods in dispute to another jurisdiction).[15]

"62. Issues to be considered by the parties and the arbitral tribunal in connection with application for interim measures include:

(i) The applicable law in relation to interim measures, including whether the granting of interim measures is within the scope of the arbitral tribunal's competence;

(ii) The type of measures that the arbitral tribunal may grant;

(iii) The conditions for requesting and granting interim measures;

(iv) The available mechanisms for enforcement of interim measures;

(v) The limitations in granting interim measures when a third party may be affected by the measures; and

(vi) The possible conflict between an arbitral tribunal's decision on an interim measure and a court-ordered interim measure.

"**(b) Costs and damages arising from interim measures; security for costs and damages**

"63. The party requesting an interim measure may be liable under the applicable law for costs and damages caused by the interim measure, if the arbitral tribunal later determines that, in the circumstances prevailing when the measure was ordered, the measure should not have been granted. The parties and the arbitral tribunal may determine a procedure for presenting claims on costs and damages arising from interim

[14] See, for example, chapter IV A of the UNCITRAL Model Law on International Commercial Arbitration (with amendments as adopted in 2006) and article 26 of the UNCITRAL Arbitration Rules (as revised in 2010).

[15] See, for example, section 2 of chapter IV A of the UNCITRAL Model Law on International Commercial Arbitration (with amendments as adopted in 2006).

measures, indicating, for instance, at which point during the arbitral proceedings a party may make such claims and the arbitral tribunal may award such costs and damages.

"64. The party requesting an interim measure may be required by the arbitral tribunal to provide security for possible costs and damages arising therefrom.

"**9. Written submissions, witness statements, expert reports and documentary evidence ('submissions')** [*A/CN.9/826, paras. 103 to 109; A/CN.9/832, para. 125; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), para. 75*]

"65. During the arbitral proceedings, the parties usually submit a wide range of documents: written submissions, witness statements, expert reports and documentary evidence (referred to generally as 'submissions'). Submissions are all written pleadings that are placed in the record of the proceedings, such as a statement of claim and a statement of defence and any second round of rebuttal submissions that the parties and the arbitral tribunal may consider necessary.

"66. Submissions may be made consecutively, i.e., where one party (usually the party making the application or seeking the relief) makes its submission after which the other party or parties make a counter submission. Alternatively, all parties may be required to make their submissions simultaneously. The approach used may depend on the type of issues to be addressed in the pleading, the stage of the arbitral proceedings, and the time provided to the parties to prepare their submissions. Most arbitration rules address this matter, sometimes detailing the sequences of submissions and required content.

"**10. Practical details regarding the form and method of submissions** [*A/CN.9/826, paras. 110 and 111; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 76 and 77*]

"67. Regarding the form and method of submissions, practical details including those mentioned in Note 7 need to be considered. Certain arbitration rules contain relevant provisions on the matter. Depending on the volume and kind of submissions to be handled, the parties and the arbitral tribunal may consider whether it would be helpful to agree on practical details concerning, for instance, the following:

(a) The form in which submissions will be made (for example, in hard copy, electronic form or through a shared platform), including their format (for example, specific electronic formats, such as original or native format where applicable, search features);

(b) The particulars of management of submissions; the system for organizing, labelling, identifying and referencing submissions, including whether they can be presented in an efficiently accessible way (for example, by using hyperlinks to cite documentary evidence or legal authorities);

(c) The organization of certain types of submissions (for example, whether large spreadsheets or diagrams, or other types of documents ought to be presented separately);

(d) The preservation and storage of submissions; in certain instances, the applicable law may require a specific procedure to preserve documentary evidence prior to the commencement of the arbitration; and

(e) The particulars of data protection (for instance, in relation to information on witnesses).

"**11. Points at issue and relief or remedy sought** [*A/CN.9/826, paras. 112 to 116; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), para. 78; A/CN.9/867, paras. 58 to 61*]

"**(a) Preparation of a list of points at issue**

"68. It is often considered helpful for the arbitral tribunal to prepare, in consultation with the parties, an indicative list of points at issue (as opposed to those that are undisputed) based on the parties' submissions. Such a list, when prepared at an appropriate stage of the arbitral proceedings and updated as necessary, can assist the parties in focusing their arguments on the issues identified as critical by the arbitral tribunal, thereby improving the efficiency of the arbitral proceedings and reducing costs.

"**(b) Determination of the order in which the points at issue will be decided; possibility of bifurcated proceedings**

"69. Subject to any agreement of the parties, the arbitral tribunal has the flexibility and discretion to determine the sequence of the arbitral proceedings and may deal with all the points at issue collectively or sequentially depending on the circumstances of the arbitration.

"70. Depending on the points at issue, the arbitral tribunal may consider the appropriateness of deciding on certain claims or issues (such as jurisdiction, liability or other discrete issues whose determination will likely advance the resolution of the case) before others. In contemplating such an approach, the arbitral tribunal may wish to consider whether, under the applicable arbitration law, partial awards or decisions on those prioritized claims or issues are subject to judicial review before the final award is rendered. Where the arbitral tribunal decides to adopt a bifurcated approach to resolving certain issues, the parties' submissions and, where applicable, their disclosure of documents may be organized in separate stages to reflect that staged organization of the arbitral proceedings. Such an approach may have an impact on the adjudicative process, and therefore, the arbitral tribunal may wish to consider carefully whether such a staged process is likely to save time and costs of the overall proceedings or to have the opposite effect.

"**(c) Relief or remedy sought**

"71. If the arbitral tribunal considers that the relief or remedy sought by a party is not sufficiently precise, for example, to ensure the enforceability of the arbitral award, the arbitral tribunal may consider informing the parties of its concerns, bearing in mind that the arbitral tribunal would usually avoid suggesting on its own initiative that a new relief be requested.

"**12. Amicable settlement** [*A/CN.9/826, paras. 117 to 124; A/CN.9/832, para. 126; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 79 to 81; A/CN.9/867, para. 62*]

"72. In appropriate circumstances, the arbitral tribunal may raise the possibility of a settlement between the parties. In some jurisdictions, the arbitration law permits facilitation of a settlement by the arbitral tribunal with the agreement of the parties. In other jurisdictions, it is not permissible for the arbitral tribunal to do more than raise the prospect of a settlement that would not involve the arbitral tribunal. Where the applicable arbitration law permits the arbitral tribunal to facilitate a settlement, it may, if so requested by the parties, guide or assist the parties in their negotiations. Certain sets of arbitration rules provide for facilitation of a settlement by the arbitral tribunal.

"**13. Documentary evidence** [*A/CN.9/826, paras. 125 to 136; A/CN.9/832, paras. 127 to 129; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 82 to 94; A/CN.9/867, paras. 63 to 67*]

"**(a) Time limits for submission of documentary evidence by the parties; consequences of failure to submit or late submission**

"73. The arbitral tribunal usually fixes time limits for the submission of documentary evidence at the outset of the arbitral proceedings. The arbitral tribunal may direct the parties to submit evidence relied upon along with their written submissions or no later than a specified subsequent point in time.

"74. The arbitral tribunal may clarify the consequences of late submissions of evidence and how it intends to deal with requests to accept late submissions. It may require a party seeking to submit evidence after the time limit to provide reasons for the delay. The arbitral tribunal, in determining whether to accept late submissions, would need to consider the procedural efficiency achieved by refusing late submissions, the possible usefulness of accepting them, and the interests of the parties (for example, providing the other party an opportunity to comment or submit its own further evidence in response to the late submission).

"75. The arbitral tribunal may remind the parties that if a party makes submissions that were not scheduled, the arbitral tribunal may consider whether to accept such submissions. Also, if a party is requested to submit evidence to support its case but fails to do so within the time limit without showing sufficient cause for such failure, the arbitral tribunal may make the award solely on the evidence before it.

"**(b) Requests to disclose documents**

"76. Approaches of arbitration laws and practices vary on whether a party may request the other party or parties to disclose specified documents and to what extent the arbitral tribunal should order such disclosure (for possible submission as evidence), when the requested party refuses to disclose voluntarily. Therefore, it may be useful for the arbitral tribunal to clarify with the parties at an early stage of the proceedings whether a party may request the other party to disclose documents and, if so, to indicate the scope of such disclosure, and to set out the relevant time limits, the form of disclosure requests and the procedures for contesting requests, if relevant.

"77. Requests for disclosure of documents may be made in various ways but are typically recorded in a schedule that is provided to the other party and sets out not only the documents requested, but also the reasons for the request. The other party may then state in the schedule whether it agrees with the request and if not, the reasons. Usually, the parties first exchange the disclosed documents only among themselves and then they determine which of the disclosed documents to submit as evidence.

"78. Where requests for disclosure of documents are contested, the requesting party may decide to submit the contested requests to the arbitral tribunal for its determination whether to order either or both parties to disclose documents. The arbitral tribunal, if necessary, may add to the schedule a record of its decision whether to order disclosure on any contested requests.

"**(c) Evidence obtained by the arbitral tribunal from third parties**

"79. Where necessary and permitted by applicable arbitration law and arbitration rules, the arbitral tribunal may itself take appropriate steps to obtain evidence from a third party after consulting the parties. This applies in relation to documentary evidence as well as other evidence (see below, Note 16).

"**(d) Assertions about the provenance and authenticity of documentary evidence**

"80. At an early stage of the arbitral proceedings, the arbitral tribunal will often specify that unless a party raises objections to any of the following conclusions within a specified period of time, it will be understood that: (i) documentary evidence is accepted as having originated from the source indicated in it; (ii) a dispatched

communication is accepted without further proof that it has been received by the addressee; and (iii) a copy is accepted as a faithful reproduction of the original. A statement by the arbitral tribunal to this effect can simplify the introduction of evidence and discourage unfounded and dilatory objections.

"81. If there are issues regarding the provenance, authenticity or completeness of documentary evidence, the arbitral tribunal may require verification thereof; it may further require that the evidence in its original form remain accessible to the parties and the arbitral tribunal.

"**(e) Presentation of documentary evidence**

"82. In order to avoid duplicate submissions, it is usual for the parties to agree or for the arbitral tribunal to direct that, once a given piece of documentary evidence is submitted in the record by one party, it does not need to be resubmitted by the other party.

"83. After each party has submitted its documentary evidence, the arbitral tribunal may encourage the parties to prepare, before the hearing, a joint set of evidence. It may also be practical for the parties and/or the arbitral tribunal to select the frequently used pieces of evidence and establish a set of 'working' or 'core' documents, regardless of whether these have been submitted jointly or otherwise.

"84. The presentation of certain evidence may be facilitated given its volume or nature if its content is summarized by way of a report from counsel or from an expert (for example, a public accountant or a consulting engineer). The report may present the information in the form of summaries, tabulations or charts. Such presentation may be combined with arrangements that give the parties and the arbitral tribunal an opportunity to review the underlying data and the methodology used for the preparation of the report, as well as to verify any assumptions made in its preparation.

"85. Notes 7 and 10 address other practical details that the parties and the arbitral tribunal may wish to consider regarding the presentation of documentary evidence.

"**14. Witnesses of fact** [*A/CN.9/826, paras. 141 to 149; A/CN.9/832, paras. 130 to 135; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 94 to 111; A/CN.9/867, paras. 69 to 74*]

"**(a) Identification of witnesses of fact; contact with the parties and their representatives**

"*(i) Witness statements and advance notice*

"86. The arbitral tribunal may clarify with the parties whether witnesses of fact will be presented and if so, whether written witness statements will be submitted (see below, para. 88).

"87. The arbitral tribunal may also clarify how witnesses and the scope of their expected testimony will be identified in advance of any hearing. In particular, the arbitral tribunal may request from the parties the following information regarding the proposed witnesses in addition to their names and addresses:

(a) The subject and facts upon which the witnesses will testify;

(b) The language in which the witnesses will testify;

(c) The nature of the witnesses' relationship with any of the parties and the dispute;

(d) The qualifications and experience of the witnesses, if and to the extent these are relevant to the dispute or the testimony; and

(e) How the witnesses learned about the facts on which they will testify.

"88. A witness statement is a document that may serve as evidence from that witness and would usually include the information contained in paragraph 87. It is helpful if a witness statement identifies all documentary evidence upon which it relies. Where a witness statement is submitted, it is generally accepted that this statement need not be

repeated orally at the hearing. Often it is accepted as the witness' full direct testimony and only a short oral statement that confirms (possibly highlighting certain points) or that updates the written statement is required at the hearing. A written witness statement may eliminate the need to hear a witness of undisputed facts, as not all witnesses who have submitted witness statements need to be heard at the hearing (see below, para. 125). The arbitral tribunal may require each party to identify which of the other party's or parties' witnesses it wishes to examine at the hearing.

"*(ii) Whether a party or persons related to a party may be heard as witnesses*

"89. International arbitration can differ from domestic court practice in respect of whether a party or certain persons related to a party may be heard as witnesses (for example, its executives, employees or agents). Under some legal systems, a party or such persons may not be permitted to testify as witnesses in court proceedings, but may be heard in a different capacity (such as a party or person having relevant information). Nonetheless, in international arbitration, such distinction is rarely observed and a party or such persons can typically be heard as witnesses.

"*(iii) Nature of the contact of a party or its representative with witnesses*

"90. The practice in international arbitration can differ from that in domestic courts as to the permissibility of pre-testimony contact between a party or its representative and the witnesses presented by that party, and the nature of such contact. In international arbitration, pre-testimony contacts are widely accepted, although some bar rules prohibit counsel from discussing the witness' testimony in advance of a court hearing or arbitration. The arbitral tribunal may consider clarifying at the outset of the arbitral proceedings the nature of the contact a party or its representative is permitted to have with its witnesses, when inquiring about the facts of the case, when preparing written witness statements and when a witness is preparing to give oral testimony. While one common practice is to permit parties or their representatives to interview their witnesses about the facts of the dispute and/or assist them in the preparation of their witness statements, there exist divergent views as to how far a party or its representative may assist witnesses in preparing for the hearing.

"*(iv) Non-appearance of a witness*

"91. The arbitral tribunal may consider informing the parties about the possible consequences of a witness who was invited to testify at the hearing not appearing. The arbitral tribunal usually has some flexibility in dealing with such non-appearances, including regarding whether that witness' written statement may still be considered and, if so, what weight is to be given to such statement.

"*(v) Invitation of a witness by the arbitral tribunal*

"92. The arbitral tribunal may have to take appropriate steps to invite a witness to testify, for instance, where the parties fail to call a witness that the arbitral tribunal wishes to examine. The arbitral tribunal may also lend support to the parties by securing the attendance of a witness not under their control.

"**(b) Manner of taking oral evidence of witnesses**

"93. While arbitration laws and arbitration rules typically grant the arbitral tribunal broad discretion concerning the manner of taking oral evidence of witnesses (oral testimony), practices vary in this respect. In order to facilitate the parties' preparation for a hearing, the arbitral tribunal may consider clarifying some or all of the issues referred to below in Note 17.

"**15. Experts** [*A/CN.9/826, paras. 150 and 151; A/CN.9/832, para. 136; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 112 to 122; A/CN.9/867, paras. 75 to 80*]

"**(a) Types of experts and selection**

"94. Many arbitration laws and arbitration rules provide for the participation of one or more experts in arbitral proceedings. Frequently, the parties will present a report of one or more experts engaged by them (referred to as 'party-appointed experts' or 'expert witnesses') to address points at issue. An arbitral tribunal may appoint its own expert (referred to as 'tribunal-appointed expert') to present a report on issues requiring expert guidance or to assist it in matters requiring specialized knowledge or skills.

"95. Arbitral institutions, chambers of commerce and other specialized organizations may be of assistance to the parties and the arbitral tribunal in the selection of experts, if needed. Experts are usually required to provide information on their expertise and recent experiences in a résumé prior to being engaged or appointed.

"**(b) Party-appointed experts (expert witnesses)**

"96. Each party may instruct its own experts ('party-appointed experts' or 'expert witnesses') regarding the issues to be addressed in their reports or the parties may agree on a joint list of issues to be addressed by the experts.

"97. The arbitral tribunal may subsequently invite the party-appointed experts who are addressing the same topic to submit a joint report identifying the points on which they agree and disagree, which may narrow issues to be dealt with later in the proceedings.

"98. Where the party-appointed experts express conflicting opinions, the arbitral tribunal may consider requesting supplementary or responsive expert reports to address the points at issue.

"99. The arbitral tribunal may also request the party-appointed experts to exchange their reports, and then hold an informal meeting where the points on which the experts agree or disagree are discussed. With this approach, the experts may respond to each other's questions more effectively, find common ground and/or take the time to discuss any specific issues. The reports of the experts can then be modified accordingly or the outcome of such procedure can be communicated by the experts at the hearing.

"100. Occasionally, it may be possible for the parties to agree on a single joint expert or to agree that the experts appointed by them will issue a single joint report, on which the parties are entitled to comment. Such approaches may have the benefit of reducing costs and streamlining the arbitral proceedings. When agreeing on a single joint expert or the issuance of a single joint report, it may be necessary to clarify at the outset whether the parties would be bound by the conclusions of the joint expert or those contained in the joint report.

"101. The arbitral tribunal may consider addressing whether expert reports should be filed consecutively or simultaneously as well as the timing of their submission, particularly whether such submission should be made along with a statement of claim or of defence.

"102. In addition, the arbitral tribunal may wish to clarify the nature and extent of communication between the parties or their representatives and their experts, and whether a party might be requested to disclose such communications.

"**(c) Tribunal-appointed experts**

"*(i) Function of the tribunal-appointed expert*

"103. The function of an expert appointed by the arbitral tribunal usually consists in preparing a report on one or several specific points requiring specialized knowledge or assisting the arbitral tribunal in understanding certain technical issues. In deciding whether to appoint its own expert, the arbitral tribunal usually takes into account also

the efficiency of the arbitral proceedings. In some instances, the arbitral tribunal may decide to appoint an expert at a later stage of the arbitral proceedings, for example, if the opinions of the party-appointed experts do not allow the arbitral tribunal to reach a conclusion.

"104. Before appointing an expert, the arbitral tribunal will normally ensure that the expert has the required qualification and obtain a statement of his or her impartiality and independence. The arbitral tribunal usually gives the parties an opportunity to comment on the expert's proposed mandate, qualification, impartiality and independence.

"105. It may be advisable for the arbitral tribunal to consult with the expert upon his or her appointment to clarify the scope of the report and the issues to be covered. The arbitral tribunal may also wish to consult with the expert before the completion of his or her report to ensure that the report is responsive to the proposed mandate.

"106. The arbitral tribunal may consider clarifying the nature and extent of communication its expert may have with the parties and their representatives, jointly or separately, and how to deal with communications on confidential matters.

"107. Where a tribunal-appointed expert has presented his or her report, the parties are normally entitled to comment on the report either through formal or informal submissions (including through a report by their own experts), and to question the tribunal-appointed expert at a hearing.

"*(ii) Terms of reference of the tribunal-appointed expert*

"108. The purpose of the terms of reference of a tribunal-appointed expert is to indicate the questions on which the expert is to provide his or her opinion, thereby avoiding opinions on points that are not for the expert to assess, and to commit the expert to a time schedule. The terms of reference also ensure transparency regarding the relation between the arbitral tribunal and the tribunal-appointed expert.

"109. The terms of reference usually set out details regarding the documents and sites, property or goods that the expert can access, and how the expert will receive such information to prepare the report. In order to facilitate the evaluation of the expert's report, it is advisable to require the expert to include in the report the terms of reference as well as information on the method used in arriving at his or her conclusions, the sources of information relied upon, and the factual assumptions made in preparing the report. The remuneration of a tribunal-appointed expert is usually indicated in the terms of reference.

"**16. Inspection of a site, property or goods** [*A/CN.9/826, paras. 137 to 140; A/CN.9/832, para. 137; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 123 and 124; A/CN.9/867, para. 81*]

"110. In some arbitrations, the arbitral tribunal may need to assess physical evidence other than documentary evidence, for example, by inspecting goods or property, or visiting a specific site. Physical or virtual site inspections may be evidentiary in nature or may serve an illustrative function, improving the arbitral tribunal's understanding of the case.

"**(a) Physical evidence**

"111. If physical evidence will be submitted, the arbitral tribunal may fix the time schedule and the manner for presenting such evidence, make arrangements for the other party or parties to prepare for the presentation of the evidence and take measures for safekeeping the items of evidence.

"**(b) Inspections of site, property or goods**

"112. The arbitral tribunal may consider whether inspection of a site, property or goods is useful or required. If so, it may consider whether the inspection requires the arbitrators' physical presence or whether a virtual inspection might be possible or adequate in the interest of efficiency or cost savings.

"113. If a physical inspection of a site, property or goods takes place, the arbitral tribunal will need to consider various issues. These include timing, cost allocation, arrangements necessary to ensure that all parties are able to be present or represented at the inspection and an indication of who will guide the inspection and provide explanations. Prior to the inspection, it may be useful for the parties and the arbitral tribunal to agree on an inspection protocol and on the scope of the inspection.

"114. The site, property or goods to be inspected are often under the control of one of the parties. If so, it may be advisable to allow the other party to visit the place of inspection before the arbitral tribunal does, in order to provide that party with the opportunity to acquaint itself with the state and condition of the site, property or goods and to request that the arbitral tribunal view additional or different evidence at the place of inspection.

"115. Where an employee or a representative of a party controlling the site, property or goods gives guidance or explanations to the arbitral tribunal, this is usually done in the presence of the other party or its representative. It should be borne in mind that such explanations, in contrast to statements those persons might make as witnesses of fact in a hearing, are usually not treated as evidence in the arbitral proceedings.

"**17. Hearings** [*A/CN.9/826, paras. 159 to 174; A/CN.9/832, paras. 138 and 139; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), para. 125; A/CN.9/867, paras. 82 to 88*]

"**(a) Decision whether to hold hearings**

"116. Arbitration laws and arbitration rules often allow any party to request a hearing for the presentation of evidence by witnesses and experts and/or for oral argument. Where none of the parties requests a hearing, the arbitral tribunal may determine whether to hold a hearing. The need for a hearing might be reconsidered at a later stage in light of the parties' submissions.

"117. It is a widely accepted practice to have written submissions, witness statements, expert reports and other documentary evidence submitted prior to the hearing. This may assist in focusing the issues that have to be dealt with at the hearing and avoid a lengthy hearing. In order to facilitate the parties' preparations, to avoid any misunderstanding and to prevent unexpected issues being raised, the arbitral tribunal may discuss this matter with the parties at the outset of the arbitral proceedings as well as in advance of any hearing.

"**(b) Scheduling of hearings**

"118. Dates for hearings are normally set at the earliest possible opportunity so as to ensure availability of the participants. A common practice is to hold hearings in a single, consecutive period. However, holding hearings over separate periods is, in some instances, necessary in order to accommodate the different schedules of the parties, witnesses, experts and the arbitral tribunal.

"119. The length of a hearing primarily depends on the complexity of the issues and evidence as well as the number of witnesses and experts to be heard. The length also depends on the procedural style used in the arbitration.

"120. It may be useful to limit the aggregate amount of time each party has for making oral statements, questioning witnesses and experts it presents and questioning witnesses and experts of the other party or parties. In general, each party is allocated the same aggregate amount of time, unless the arbitral tribunal considers that a different allocation is justified. It is useful to determine the manner in which time would be kept throughout the hearing.

"121. Such time allocation, provided that it is realistic, fair and subject to supervision by the arbitral tribunal, will make it easier for the parties to plan their presentation of the various items of evidence and argument, reduce the likelihood of running out of time towards the end of the hearing and avoid any actual or perceived unfairness resulting from the parties' having unequal time.

"122. The arbitral tribunal usually sets aside time for its deliberations throughout the duration of the arbitral proceedings as well as before and shortly after the close of the hearings.

"**(c) Manner of conducting hearings**

"*(i) Different practices*

"123. In view of the broad latitude of the arbitral tribunal in the conduct of hearings and of the different practices in relation thereto, it may foster efficiency of the arbitral proceedings if the arbitral tribunal clarifies to the parties, in advance of the hearings, the manner in which it will conduct the hearings, at least in broad terms.

"*(ii) Holding of a hearing in-person or remotely*

"124. Hearings can be held in-person or remotely via technological means (see also above, para. 19). The decision whether to hold a hearing in-person or remotely is likely to be influenced by various factors, such as the importance of the issues at stake, the desirability of interacting directly with the witnesses, the availability of parties, witnesses and experts as well as the cost and possible delay of holding a hearing in-person. The parties and the arbitral tribunal may need to consider technical matters, such as the compatibility of the technological means to be used at different locations.

"*(iii) Deciding which witnesses of fact and expert witnesses ('witnesses') will provide oral testimony*

"125. Where the parties have already submitted written statements or reports from their witnesses, the arbitral tribunal may ask each party, prior to the hearing, which of the other party's or parties' witnesses it wishes to examine at the hearing (see above, para. 88). A party is normally responsible for making available any of its own witnesses at the hearing if another party or the arbitral tribunal has indicated that it wishes to examine that witness. If no other party wishes to examine the witness and the arbitral tribunal itself does not wish to do so, the arbitral tribunal may decide that the witness need not testify at the hearing. For the sake of efficiency, the arbitral tribunal may make a similar decision even when another party has requested the opportunity to cross-examine a witness, while this may raise concerns about the requesting party's opportunity to present its case. A decision not to hear oral testimony from a witness in these circumstances should not alter the weight that would otherwise be given to that witness' written statement.

"*(iv) Whether oral testimony will be given under oath or affirmation and, if so, in what form*

"126. Arbitration laws and practices differ as to whether oral testimony must be given under oath or similar affirmation of truthfulness. In some legal systems, the arbitral tribunal may in its discretion require witnesses to take an oath. In other legal systems, oral testimony under oath is either unknown in arbitration or may even be considered improper, as only an official such as a judge or a notary is empowered to administer oaths. In such circumstances, the witnesses may simply be asked to affirm that they will testify truthfully. It may be necessary to clarify who will administer any oath. Where applicable, the arbitral tribunal may draw the witnesses' attention to potential criminal sanctions for giving false testimony.

"*(v) Order of presentations at hearings*

"127. The arbitral tribunal has broad latitude to determine the order of presentations at hearings. Within that latitude, practices differ, for example, as to whether opening or closing statements are heard and if they are, their sequence and duration, and which of the parties has the last word.

"128. The broad latitude of the arbitral tribunal also applies to the manner and sequence in which witnesses are heard and to other issues addressed at any hearing. When several witnesses are to be heard and longer testimony is expected, it is useful to determine in advance the order in which they will be called. In certain circumstances,

it may be desirable to hear collectively several witnesses on the same subject matter. This is likely to reduce costs and facilitate scheduling. Each party might be invited to suggest the order in which it proposes to have its own witnesses testify.

"*(vi) Manner in which witnesses of fact and expert witnesses ('witnesses') will be heard*

"129. Witnesses may be first examined by the arbitral tribunal. Otherwise, the general practice is for witnesses to be examined first by the party calling that witness (to the extent permitted and if required, see above, paras. 88 and 125) and then cross-examined by the other party or parties. In this context, the question may arise whether cross-examination shall be restricted to the scope of the witness statement and oral testimony. The parties and the arbitral tribunal may wish to clarify this issue in advance of the submission of witness statements and the hearing. After cross-examination, the witness might be re-examined by the party calling the witness with questions limited to issues raised during the cross-examination. Thereafter, the cross-examining party or parties may further question the witness. The arbitral tribunal may normally ask questions at any time.

"130. Arbitration laws and practices differ as to the degree of control the arbitral tribunal exercises over the questioning of witnesses by the parties. For example, some arbitrators permit the parties to ask questions freely and directly to the witnesses. Other arbitrators apply stricter rules and limitations concerning the form of direct or cross-examination similar to those applied in court proceedings.

"*(vii) Whether witnesses of fact may be in the hearing room when they are not testifying*

"131. Practices vary in relation to the presence of witnesses of fact in the hearing room before and after they have testified. Some arbitrators consider, as a general rule, that witnesses of fact should not be allowed in the hearing room except when they are testifying. The purpose is to prevent the witnesses of fact from being influenced by statements of other witnesses and to prevent the possibility of one witness' presence influencing another witness' testimony. When witnesses of fact are not allowed in the hearing room, measures would usually be taken to avoid that they have access to any contemporaneous transcripts of the hearings. Other arbitrators consider that it is useful for witnesses of fact to be present when other witnesses are testifying in order to deter untrue statements and to clarify or reduce contradictions between witnesses. As a general rule, witnesses of fact should refrain from discussing their testimony during any breaks in their testimony. The arbitral tribunal may wish to give guidance on these questions in advance, as it may affect the organization of the hearing.

"132. The arbitral tribunal may decide what approach to follow for each witness of fact. For example, a separate rule may be appropriate for witnesses of fact who also appear as representatives of a party (for example, managing directors, executives or in-house counsel), as such representatives may need to be present throughout the hearing in order to oversee the presentation of their case.

"*(viii) Submission of new evidence*

"133. The arbitral tribunal may wish to emphasize to the parties that new evidence will usually not be accepted during a hearing. In exceptional circumstances where the arbitral tribunal admits such new evidence, it may have to consider whether to permit further submissions so that the other party may respond.

"**(d) Arrangements for a record of the hearings**

"134. The arbitral tribunal may consider the method of preparing a record of oral statements and testimony during hearings as well as who will be responsible for making the necessary arrangements. Audio recording and transcription services are commonly used.

"135. The parties and the arbitral tribunal may consider whether audio recording should be transcribed, and clarify whether the audio recording would constitute the official record of the hearings (see also above, para. 16). If transcripts are to be

produced, the arbitral tribunal may consider whether and how the parties will be given an opportunity to check the transcripts. For example, it may be determined that any change to the record must be approved by the parties and, failing their approval, referred to the arbitral tribunal for determination.

"**(e) Post-hearing submissions**

"136. Before or during the hearings, the parties and the arbitral tribunal usually decide whether any additional submissions are to be made by the parties after the hearing and, if so, a corresponding timetable is usually established. Such post-hearing submissions may be necessary in order to allow the parties to provide a summary of the case, to address specific issues that arose during the hearing, or to address the impact on their case of the evidence that emerged during the hearing.

"**18. Multiparty arbitration** [*A/CN.9/826, paras. 175 and 176; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 126 and 127; A/CN.9/867, para. 89*]

"137. When a single arbitration involves more than two parties (multiparty arbitration), many procedural issues remain the same as in two-party arbitration. However, difficulties may arise in multiparty arbitration. For example, the arbitral tribunal should be mindful not to assume that parties grouped together as claimants or respondents will necessarily have the same interest, will make similar submissions, or will seek the same relief.

"138. In addition, a further difficulty is ensuring the fairness of the proceedings and that the various parties have an equal opportunity to participate in the appointment of the arbitral tribunal. The Notes, which identify matters that may be considered in organizing arbitral proceedings in general, do not cover the drafting of arbitration agreements or the constitution of the arbitral tribunal. Those matters give rise to special questions in multiparty arbitration as compared to arbitration involving only two parties, and are addressed under certain arbitration rules.[16]

"**19. Joinder and consolidation** [*A/CN.9/826, paras. 175 and 176; A/CN.9/832, para. 140; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 126 and 127*]

"**(a) Joinder**

"139. Joinder means adding a new party or parties into an existing arbitration. Not all joinder applications necessarily require the contemporaneous consent of all parties (i.e. the parties to the arbitration and the new party). The new party may already be bound by the arbitration agreement and the joinder process might be authorized by the arbitration agreement, the applicable arbitration laws and/or the applicable arbitration rules.

"140. Parties may wish to join a new party to the arbitration in situations where they would be unable to fully present their claims without that new party's participation or wish to avoid conflicting decisions with respect to different parties. Certain arbitration rules have addressed joinder by providing that the arbitral tribunal may, at the request of a party, allow one or more new parties to be joined to the arbitration, provided that the new party is bound by the arbitration agreement.[17] Other arbitration rules do not require that the party to be joined be bound by the arbitration agreement under which the claim arises, provided that it is bound by another relevant arbitration agreement that also binds the existing parties. In deciding whether to accept joinder, the arbitral tribunal may consider the procedural efficiency that may result therefrom, fairness to

[16] See, for example, article 10(1) of the UNCITRAL Arbitration Rules (as revised in 2010), which provides that "(…) where three arbitrators are to be appointed and there are multiple parties as claimant or as respondent, unless the parties have agreed to another method of appointment of arbitrators, the multiple parties jointly, whether as claimant or as respondent, shall appoint an arbitrator."

[17] See, for example, article 17(5) of the UNCITRAL Arbitration Rules (as revised in 2010).

existing parties, or prejudice to any party. The arbitral tribunal may also consider its powers and the manner in which it was constituted.

"141. It is recommended that any new party be joined as early as possible in the arbitral proceedings. Many arbitration rules that address joinder restrict the ability to seek joinder after the arbitral tribunal has been appointed. For example, a party may request the joinder when filing its response to the notice of arbitration.[18] In such a case, the new party could be joined to the procedure before the arbitral tribunal is appointed. Depending on the applicable arbitration law and arbitration rules, a third party may also be joined after the appointment of the arbitral tribunal if certain conditions are fulfilled.

"**(b) Consolidation**

"142. The question of consolidation arises in situations where several distinct arbitrations are initiated under the same or different arbitration agreements. Consolidation refers to the merging of separate arbitrations, regardless of whether or not the related arbitrations have been commenced pursuant to the same or a different arbitration agreement. Consolidation can increase efficiency and avoid inconsistent outcomes on related issues. However, one or more parties may have a justified interest in having several disputes dealt with separately, for example because one of the disputes has priority or the consolidation of several cases would render the arbitral proceedings more complex and time-consuming. It may not always be feasible to consolidate arbitrations if an arbitral institution is not involved.

"143. An increasing number of arbitration rules address consolidation. Arbitration rules that expressly permit consolidation of two or more pending arbitrations do so upon consideration of various factors, such as whether (i) consolidation has been requested by a party, (ii) all the parties agree to consolidation, (iii) the disputes arise in connection with the same legal relationship or under the same arbitration agreement and, if not, whether those agreements are compatible, and (iv) an arbitral tribunal has been appointed in any of the arbitrations.

"**20. Possible requirements concerning form, content, filing, registration and delivery of the award** [*A/CN.9/826, paras. 177 to 181; Official Records of the General Assembly, Seventieth Session, Supplement No. 17 (A/70/17), paras. 128 to 132*]

"144. The parties and the arbitral tribunal should bear in mind the applicable arbitration law and the law at the potential place(s) of enforcement of the award, as well as the applicable arbitration rules, in considering any requirements as to the form, content, filing, registering or delivering of the award.

"145. Some laws require that arbitral awards be filed or registered with a court or similar authority, or that they be delivered in a particular manner or through a competent authority. Those laws differ with respect to, for example, the type of award to which the requirement applies (for example, to all awards or only to awards not rendered under the auspices of an arbitral institution); the time periods for filing, registering or delivering the award (in some cases those time periods may be rather short); and the consequences of failing to comply with such requirements.

"146. If such requirements exist, it is useful, before the issuance of an award, to determine who will take the necessary steps to meet the requirements and to decide how the costs are to be allocated. The failure to comply with such requirements might affect the validity and/or enforceability of the award."

[18] See, for example, article 4(2)(f) of the UNCITRAL Arbitration Rules (as revised in 2010).

III. ONLINE DISPUTE RESOLUTION

A. Report of the Working Group on Online Dispute Resolution on the work of its thirty-second session (Vienna, 30 November-4 December 2015)

(A/CN.9/862)

[Original: English]

Contents

I. Introduction

1. At its forty-third session (New York, 21 June-9 July 2010), the Commission agreed that a Working Group should be established to undertake work in the field of online dispute resolution relating to cross-border electronic commerce transactions.

2. At its forty-fourth session (Vienna, 27 June-8 July 2011), the Commission reaffirmed the mandate of Working Group III relating to cross-border electronic transactions, including B2B and B2C transactions.[1] The Commission decided inter alia at that session that, in general terms, in the implementation of its mandate, the Working Group should also consider specifically the impact of its deliberations on consumer protection and that it should report to the Commission at its forty-fifth session.[2]

3. At its forty-fifth session (New York, 25 June-6 July 2012), the Commission reaffirmed the mandate of the Working Group in respect of low-value, high-volume cross-border electronic transactions, and the Working Group was encouraged to continue to explore a range of means of ensuring that online dispute resolution outcomes were effectively implemented, and to continue to conduct its work in the most efficient manner possible.[3] It was further agreed that the Working Group should consider and report back at a future session of the Commission on how the draft rules would respond to the needs of developing countries and those facing post-conflict situations, in particular with regard to the need for an arbitration phase to be part of the process; and that the Working Group should continue to include in its deliberations the effects of online dispute resolution on consumer protection in developing and developed countries and countries in post-conflict situations.[4] The Commission furthermore requested the Working Group to continue to explore a range of means of ensuring that online dispute resolution outcomes were effectively implemented, including arbitration and possible alternatives to arbitration.[5]

[3] Ibid., *Sixty-seventh Session, Supplement No. 17* (A/67/17), para. 79.

[4] Ibid.

[5] Ibid.

4. At its forty-sixth[6] and forty-seventh[7] sessions, the Commission affirmed the decisions made at its forty-fifth session.

5. At its forty-eighth[8] session (Vienna, 29 June-16 July 2015), the Commission instructed Working Group III to continue its work towards elaborating a non-binding descriptive document reflecting elements of an ODR process, on which elements the Working Group had previously reached consensus, excluding the question of the nature of the final stage of the ODR process (arbitration/non-arbitration). It was also agreed that the Working Group would be given a time limit of one year or no more than two Working Group sessions, after which the work of the Working Group would come to an end, whether or not a result had been achieved.

6. A compilation of historical references regarding the consideration by the Commission of the work of the Working Group between 2000 and 2014 can be found in document A/CN.9/WG.III/WP.126, paragraphs 5-15.

II. Organization of the session

7. Working Group III (Online Dispute Resolution), which was composed of all States members of the Commission, held its thirty-second session in Vienna, from 30 November to 4 December 2015. The session was attended by representatives of the following States members of the Working Group: Argentina, Austria, Belarus, Brazil, China, Colombia, Czech Republic, El Salvador, France, Germany, Hungary, Indonesia, Iran (Islamic Republic of), Israel, Italy, Japan, Kenya, Kuwait, Malaysia, Mexico, Pakistan, Panama, Philippines, Republic of Korea, Russian Federation, Singapore, Spain, Thailand, Uganda, United States of America and Venezuela (Bolivarian Republic of).

8. The session was also attended by observers from the following States: Bolivia (Plurinational State of), Cyprus, Dominican Republic, Luxemburg, Moldova, Netherlands, Peru, Romania, Senegal, Slovakia, Syrian Arab Republic, United Arab Emirates.

9. The session was also attended by observers from the European Union (EU).

10. The session was also attended by observers from the following non-governmental organizations: American Bar Association (ABA), Asia Pacific Regional Arbitration Group (APRAG), Asociación Americana de Derecho Internacional Privado (ASADIP), Chartered Institute of Arbitrators (CIARB), China International Economic and Trade Arbitration Commission (CIETAC), China Society of Private International Law — Wuhan University (CSPIL), Electronic Consumer Dispute Resolution — University College Dublin (ECODIR), Eurochambres, European Law Institute (ELI), European Law Students' Association (ELSA), Forum for International Conciliation and Arbitration C.I.C. (FICACIC), ICC International Court of Arbitration (ICC), Institute of International Commercial Law (IICL), Institute of Law and Technology — Masaryk University (ILT), International Bar Association (IBA), Law Association for Asia and the Pacific (LAWASIA), Regional Centre for International Commercial Arbitration-Lagos (RCICAL).

11. The Working Group elected the following officers:

Chairman: Mr. Jeffrey Wah-Teck CHAN (Singapore)

Rapporteur: Mr. Nasir AYYAZ (Pakistan)

12. The Working Group had before it the following documents:

(a) Annotated provisional agenda (A/CN.9/WG.III/WP.135);

(b) A note by the Secretariat on a non-binding descriptive document reflecting elements and principles of an ODR process (A/CN.9/WG.III/WP.137);

(c) A note by the Secretariat on the proposal by the Russian Federation (A/CN.9/WG.III/WP.136); and

---

[6] Ibid., *Sixty-eighth Session, Supplement No. 17* (A/68/17), para. 222.
[7] Ibid., *Sixty-ninth Session, Supplement No. 17* (A/69/17), para. 140.
[8] Ibid., *Seventieth Session, Supplement No. 17* (A/70/17), para. 352.

(d) A note by the Secretariat on the proposal by Israel (A/CN.9/WG.III/WP.138).

13. The Working Group adopted the following agenda:

1. Opening of the session.
2. Election of officers.
3. Adoption of the agenda.
4. Consideration of the notes on a non-binding descriptive document reflecting elements and principles of an ODR process.
5. Other business.
6. Adoption of the report.

III. Deliberations and decisions

14. The Working Group resumed its work on agenda item 4 on the basis of notes prepared by the Secretariat (A/CN.9/WG.III/WP.137) and other proposals submitted during the session. The deliberations and decisions of the Working Group with respect to this item are reflected in chapter IV.

IV. Draft non-binding descriptive document reflecting elements and principles of an ODR process

15. The Working Group heard a proposal by Colombia and the United States of America for Technical Notes on Online Dispute Resolution (referred to herein as the Proposal). The proponents informed the Working Group that the proposal had been prepared to implement the Commission's mandate and to reflect existing UNCITRAL documents, notably its Notes on Organizing Arbitral Proceedings.[9] It was added that the Proposal closely followed the elements and description of A/CN.9/WG.III/WP.137, and the contents of its paragraph 44 (addressing next steps that the Working Group might wish to take), so as to take the form of a draft outcome document.

16. For these reasons, the proponents noted, the Proposal set out introductory paragraphs presenting the purpose, character and overview of an ODR process. It was added that the document had been submitted in order to assist the Working Group in finalizing its text on the ODR process in the very short time available.

17. The delegation submitting A/CN.9/WG.III/WP.138 presented the proposal therein, and noted that the two proposals reflected similar areas for discussion for the Working Group.

18. The Working Group proceeded to base its deliberations on A/CN.9/WG.III/WP.137, with appropriate reference to the equivalent paragraphs of the other proposals noted above. The discussion from paragraphs 20 through 118 herein is based upon and follows the structure of the Proposal. Another delegation stated that it would make further proposals as that process continued. It was noted that the Working Group would record its agreements on the substance of a draft outcome document in its Report of the session, and that it would finalize the editing thereof at the next session.

19. Reference was made to paragraph 44 of A/CN.9/WG.III/WP.137. As regards paragraph 44(a), it was agreed that the question of the title of the document would be considered at a later time. As regards paragraph 44(b), it was agreed on a preliminary basis that an introductory text for an ODR process in the outcome document could read as set out in the Proposal.[10]

---

[9] See UNCITRAL Notes on Organizing Arbitral Proceedings (1996).

[10] For the purposes of this Report only, and in order to avoid confusion between the numbered paragraphs of A/CN.9/WG.III/WP.137 and this Report, and the paragraphs of the Proposal, references to "item numbers" in this document are to the numbered paragraphs of the Proposal.

A. The Proposal for an outcome document

1. Section I of the Proposal

20. The Working Group proceeded to consider an introductory text to describe an ODR process for which the following text was proposed.

"***Section I — Introduction***

Purpose of Technical Notes

§1. The purpose of the Technical Notes is to foster the development of ODR as a form of dispute resolution by assisting the participants in an Online Dispute Resolution (ODR) system in the conduct of ODR proceedings.

§2. The Technical Notes apply to the online resolution of disputes arising from cross-border low-value sales or service contracts concluded using electronic communications. Given that procedural styles and practices in ODR proceedings vary widely, the Technical Notes are intended to be of assistance regardless of the structure or framework of an ODR system.

§3. The Technical Notes are intended to assist the full range of potential participants in an ODR system, including ODR administrators, ODR platforms, neutrals, and the parties to the dispute.

§4. The Technical Notes reflect approaches to ODR systems that reflect principles of fairness, due process, transparency and accountability that are essential to any ODR system, but they are not intended to be an exhaustive or exclusive summary of approaches that incorporate such principles. The Technical Notes do not promote any practice of ODR as best practice.

Non-binding Character of the Technical Notes

§5. The Technical Notes do not impose any legal requirement binding on the parties or any persons and/or entities administering or facilitating an ODR proceeding.

§6. The Technical Notes are not suitable to be used as rules for any ODR proceeding, since they are only of a descriptive nature and do not establish any obligation on the parties or on persons and/or entities administering or facilitating an ODR proceeding to act in a particular manner. Accordingly, the use of the Technical Notes does not imply any modification to any ODR rules that the parties may have selected.[11]

Overview of ODR

§7. In tandem with the sharp increase of cross-border transactions concluded via the Internet, there has been extensive discussion regarding the use of information and communication technology tools for resolving disputes which arise from such online transactions.

§8. One such tool is online dispute resolution ('ODR'), which has emerged as having the potential to provide a simple, fast, flexible and effective option for the resolution of such disputes, in particular when they relate to low-value transactions. ODR encompasses a broad range of approaches, including the potential for hybrid processes including both online and offline elements. ODR systems can be designed to facilitate communications in an efficient and user-friendly manner, in order to obtain an outcome without the need for physical presence at a meeting or hearing. ODR can provide a more cost-effective alternative to traditional approaches, the latter of which in some cases may be overly complex, costly and time-consuming in light of the nature and value of the dispute. As such, ODR represents significant opportunities for access to dispute resolution by buyers and sellers concluding cross-border commercial transactions, both in the developed and developing world."

[11] See UNCITRAL Notes on Organizing Arbitral Proceedings (1996), paras. 2-3.

21. It was agreed that any further comments on the proposed text would take the form of proposed amendments to the wording itself.

22. It was suggested, as regards the remainder of the document, that the repeated phrase in the proposal "*it is advisable that*" could be replaced with an introductory phrase to express the concept throughout the document. It was also suggested that the location of the definitions in the outcome document would be considered at a later stage.

23. It was noted that an UNCITRAL document would not generally contain footnotes but that, as subparagraph 44(c) of A/CN.9/WG.III/WP.137 indicated, relevant elements of the elaboration process could be set out in the outcome document so as to assist the reader.

24. It was suggested that (a) the outcome document could be called a "Guideline", and (b) items 1-8 of the Proposal be shortened by replacing them with the following sentences:

> "*Guideline on Online Dispute Resolution (ODR) for cross-border electronic commerce transactions of UNCITRAL (hereinafter referred to as Guideline) aims to provide an easy, fast, cost-effective convenient and efficient procedure for dispute resolution in low-value, high-volume cross-border electronic commerce transactions. The Guideline is a non-binding descriptive document reflecting present common commercial practices of ODR process*."

25. The suggestion to reduce the length of the text received support, though a concern expressed was that the suggested revised text might not include all elements that could be considered necessary. It was said that a revised text could be proposed at a later stage (see paras. 128 and 129 below).

2. Section II of the Proposal

26. The Working Group then proceeded to consider the principles that would underpin an ODR process, for which the following text was proposed.[12]

> "***Section II — Principles***
>
> *§9. Certain principles that should underpin any ODR process include fairness, transparency, due process and accountability.*"[13]

27. An alternative proposal was that this item should read, "*The principles that underpin any ODR process include fairness, transparency, due process and accountability*". After discussion, this proposal was accepted and the Working Group proceeded with the consideration of items 10 to 16.

> "*§10. ODR may assist in addressing a situation arising out of cross-border e-commerce transactions, namely the fact that traditional judicial mechanisms for legal recourse may not offer an adequate solution for cross-border e-commerce disputes.*[14]
>
> *§11. ODR ought to be simple, fast and efficient, in order to be able to be used in a "real world setting", including that it should not impose costs, delays and burdens that are disproportionate to the economic value at stake.*"[15]
>
> "***Transparency***
>
> *§12. It is advisable to disclose any contractual relationship between the ODR administrator and a particular vendor, so that users of the service are informed of potential conflicts of interest.*[16]

[12] Commentary and proposals made during the session are included under each relevant item of the Proposal.
[13] A/CN.9/WG.III/WP.137, para. 3.
[14] Ibid., para. 4.
[15] Ibid., para. 5.
[16] A/CN.9/WG.III/WP.138, para. 1.

§13. The ODR administrator may wish to publish anonymized data or statistics on its decisions, in order to enable parties to assess its overall record.[17]

§14. All relevant information should be available on the ODR administrator's website in a user-friendly and accessible manner."[18]

"***Independence***

§15. It would be advisable for the ODR administrator to adopt a code of ethics for its neutrals, in order to guide neutrals as to conflicts of interest and other rules of conduct.[19]

§16. It would be useful for the ODR administrator to adopt internal policies dealing with identifying and handling conflicts of interest."[20]

28. It was noted that while these policies might be internal, their existence might be publicly-acknowledged. Accordingly, it was agreed that this item should read, "*It would be useful for the ODR administrator to adopt policies dealing with identifying and handling conflicts of interest.*" and the Working Group proceeded with the consideration of items 17 and 18.

"***Expertise***

§17. The ODR administrator may wish to implement comprehensive policies governing selection and training of neutrals.[21]

§18. An internal oversight/quality assurance process could help the ODR administrator to ensure that neutrals' decisions conform with the standards it has set for itself."

29. It was proposed that a discussion of confidentiality and of the mode of agreement of ODR rules should be included in this section of the outcome document, given the importance of these concepts.

30. In this regard, an additional item, to read as follows, was proposed: "*The ODR administrator should adopt and implement appropriate confidentiality measures.*" While support was expressed for this proposal, it was queried whether including the question of confidentiality had previously been agreed in the Working Group. In response, it was stated that the principle had been implicit in earlier discussions in the Working Group, though had not been addressed extensively. After discussion, the proposal was deferred to a later stage in the session.

31. A further proposal was to include the following paragraph: "*It is desirable for the ODR administrator to provide the means by which the parties can indicate their consent to ODR process and awareness of its stages and procedures.*" While support was expressed for this proposal, to reflect the principle that there should be no ODR without consent, it was suggested that this issue would be better addressed in a dispute resolution clause, as the ODR administrator would not always be engaged at the relevant time. In response, it was stated that the proposal could be qualified so that the provision would apply only where the ODR administrator was engaged in the process, or that the principle could be expressed in more general terms. After discussion, it was agreed that the principle would be phrased as "*The ODR process should be based on the explicit and informed consent of the parties*".

32. Subject to the amendments to items 9 and 16 of the Proposal, and the additional text in paragraph 31 immediately above, the Working Group agreed the text of this Section as proposed.

[17] Ibid., para. 2.
[18] Ibid., para. 3.
[19] Ibid., para. 4.
[20] Ibid., para. 5.
[21] Ibid., para. 6.

3. Section III of the Proposal

33. The Working Group then proceeded to consider the stages of an ODR process, for which the following text was proposed.[22]

> "***Section III. Stages of an ODR Process***
>
> "*§19. The process of an online dispute resolution proceeding may consist of stages including: negotiation; facilitated settlement; and a third (final) stage.*"[23]

34. An alternative proposal, that this item should read, "*The process of an online dispute resolution proceeding consists of three stages, namely negotiation; facilitated settlement; and a third (final) stage*", did not gain support and the Working Group proceeded with the consideration of items 20 and 21.

> "§*20. The ODR process may commence when a claimant submits a notice of claim through the ODR platform to the ODR administrator. The ODR administrator informs the respondent of the existence of the claim and the claimant of the response. The first stage of proceedings — a technology-enabled negotiation — commences, in which the claimant and respondent negotiate directly with one another through the ODR platform.*[24]
>
> *§21. If that negotiation process fails (i.e. does not result in a settlement of the claim, the process may move to a second, 'facilitated settlement' stage (see, further, paragraphs 40-42 below). In that stage of proceedings, the ODR administrator appoints an individual that will assist the parties in settling or resolving the dispute (a 'neutral'), who communicates with the parties in an attempt to reach a settlement.*"[25]

35. The Working Group included a definition of the term "neutral" in this item pending a final decision on the location of the definitions section in the outcome document and proceeded with the consideration of item 22.

> "*§22. If facilitated settlement fails, a third and final stage of proceedings might commence.*"[26]

36. The Working Group agreed items 19-21 of the section as proposed and deferred its consideration of item 22 to a later time.

4. Section IV of the Proposal

37. The Working Group then proceeded to consider the scope of an ODR process, for which the following text was proposed.[27]

> "***Section IV. Scope of ODR Process***
>
> *§23. An ODR process may be particularly useful for disputes arising out of cross-border, low-value e-commerce transactions. An ODR process may apply to disputes arising out of both a business-to-business as well as business-to-consumer transactions.*"[28]

38. It was further proposed that the types of claims should be limited to (a) goods sold or services rendered that were not delivered, not timely delivered, that were not properly charged or debited, and/or that were not provided in accordance with the sales or service contract; and (b) where full payment was not received for goods or services provided. The proposal, however, did not gain support and the Working Group proceeded with the consideration of item 24.

---

[22] Commentary and proposals made during the session are included under each relevant item of the Proposal.
[23] A/CN.9/WG.III/WP.137, para. 7.
[24] Ibid., para. 8.
[25] Ibid., para. 9.
[26] Ibid., para. 10.
[27] Commentary and proposals made during the session are included under each relevant item of the Proposal.
[28] A/CN.9/WG.III/WP.137, para. 11.

"*§24. An ODR process may apply to disputes arising out of both sales and service contracts.*"[29]

39. The importance of the issue of consent to ODR, notably as regards whether any such consent should be required at the time of the transaction, was recalled. Accordingly, it was suggested that paragraph 13 of A/CN.9/WG.III/137 should be included in the text. In response, it was suggested that the Working Group had considered that consent to ODR could be given at a later time such as when a dispute arose. After discussion, it was agreed that the agreed wording in paragraph 31 above would address this issue satisfactorily, and that reference to the issue of consent in this item was not necessary.

40. The Working Group agreed the Section as proposed.

5. Section V of the Proposal

41. The Working Group then proceeded to consider provisions on definitions, roles and responsibilities, and communications in an ODR process, for which the following text was proposed.[30]

"***Section V. ODR Definitions, Roles and Responsibilities, and Communications***

§25. Online dispute resolution, or 'ODR', is a 'mechanism for resolving disputes facilitated through the use of electronic communications and other information and communication technology'. The process may be implemented differently by different administrators of the process, and may evolve over time.[31]

§26. As used herein a 'claimant' is the party initiating ODR proceedings and the 'respondent' the party to whom the notice of proceedings is directed, in line with traditional, offline, alternative dispute resolution nomenclature. The 'individual that assists the parties in settling or resolving the dispute' is the 'neutral'.[32]

§27. ODR requires a technology-based intermediary. In other words, unlike offline alternative dispute resolution, an ODR process cannot be conducted on an ad hoc basis involving only the parties to a dispute and a neutral adjudicator (that is, without an administrator). Instead, to enable the use of technology to facilitate a dispute resolution process, an ODR process requires a system for generating, sending, receiving, storing, exchanging or otherwise processing communications. Such a system is referred to herein as an "ODR platform."[33]

42. It was agreed that the term "facilitate" in items 25 and 27 was used in a different sense from that in items 19 and 21 of the Proposal, and that, to avoid confusion, an alternative term would be found. The Working Group then proceeded with the consideration of items 28 to 32.

"*§28. An ODR platform must be administered and coordinated. The entity that carries out such administration and coordination is referred to herein as the 'ODR administrator.' The ODR administrator may be separate from or part of the ODR platform.*[34]

§29. In order to enable ODR communications, it is desirable that both the ODR administrator and the ODR platform should be specified in the dispute resolution clause.[35]

§30. The communications that may take place during the course of proceedings have been defined as 'any communication (including a statement, declaration, demand, notice, response, submission, notification or request) made by means of information

[29] A/CN.9/WG.III/WP.137, para. 12.
[30] Commentary and proposals made during the session are included under each relevant item of the Proposal.
[31] A/CN.9/WG.III/WP.137, para. 15.
[32] Ibid., para. 16.
[33] Ibid., para. 17.
[34] Ibid., para. 18.
[35] Ibid., para. 19.

generated, sent, received or stored by electronic, magnetic, optical or similar means.'[36]

§31. It is desirable that all communications in ODR proceedings take place via the ODR platform. Consequently, both the parties to the dispute, and the ODR platform itself, should have a designated 'electronic address'. The term 'electronic address' is also defined in other UNCITRAL texts.[37]

§32. To enhance efficiency it is desirable that the ODR administrator promptly:

(a) Acknowledge receipt of any communication by the ODR platform;

(b) Notify parties of the availability of any communication received by the ODR platform; and

(c) Keep the parties informed of the commencement and conclusion of different stages of the proceedings."[38]

43. A suggestion to delete the phrase "to enhance efficiency" did not gain support and the Working Group proceeded with the consideration of item 33.

"*§33. In order to avoid loss of time, it is desirable that a communication be deemed to be received by a party when the administrator notifies that party of its availability on the platform; deadlines in the proceedings would run from the time the administrator has made that notification. At the same time, the ODR administrator should be empowered to extend deadlines, in order to allow for some flexibility when appropriate.*"[39]

44. Subject to reconsideration of the word "facilitated" in items 25 and 27 of the Proposal, the Working Group agreed the Section as proposed.

6. Section VI of the Proposal

45. The Working Group then proceeded to consider the commencement of an ODR process, for which the following text was proposed.[40]

"***Section VI. Commencement of ODR proceedings***

§34. ODR proceedings may be deemed to have commenced when, following a claimant's communication of a notice to the ODR administrator, the ODR administrator notifies the respondent and the parties that the notice is available at the ODR platform.[41]

§35. In order to commence an ODR proceeding and to enable it to proceed in an administratively efficient manner, it is desirable that the notice contain:

(a) The name and electronic address of the claimant and of the claimant's representative (if any) authorized to act for the claimant in the ODR proceedings;

(b) The name and electronic address of the respondent and of the respondent's representative (if any) known to the claimant;

(c) The grounds on which the claim is made;

(d) Any solutions proposed to resolve the dispute;

(e) The claimant's preferred language of proceedings;

(f) The signature or other means of identification and authentication of the claimant and/or the claimant's representative;[42] *and*

(g) The location of the claimant."

46. It was suggested that sub-item (g) be deleted, on the basis that the Working Group had not come to consensus on the inclusion of this provision in such a notice (with reference to the Working Group reports A/CN.9/739, paras. 78-80, A/CN.9/795, para. 84, A/CN.9/833, para. 77, for example). On the other hand, it was recalled that the issue of location of the claimant had been discussed in the context of separate tracks of earlier draft Rules on ODR, and that agreed text on notice provisions included the location of the claimant (with reference to A/CN.9/801, para. 77, for example). It was suggested that this inclusion indicated that a consensus had been reached to include the location of the claimant.

47. It was noted, however, that there had been no clear understanding of what the term "location" might mean in the context of a single approach to an ODR process, which, it was suggested, indicated that clear consensus had not been reached.

48. Reference was also made to the mandate given to the Working Group, which, it was said, would allow the Working Group to build on issues in one Track of the earlier draft Rules upon which earlier consensus had been achieved in the Working Group.

49. It was added that the language proposed was not prescriptive and that the intention of the proposed inclusion of the location of the claimant was to provide practical rather than legal parameters for the administration of ODR claims.

50. It was noted, among other things, that the Working Group reports above set out no clear understanding in the Working Group on the meaning of location and so indicated that the issue had not achieved consensus. Accordingly, it was concluded that reference to the location of the claimant and therefore sub-item (g) would be deleted.

51. An alternative formulation of items 34 and 35 above was proposed as follows. It was explained that this formulation sought to set out the steps of the process and the time at which they should be taken:

First paragraph: "*The claimant shall communicate to the ODR administrator a notice when disputes arise*."

Second paragraph: "*The notice [should/could] contain the following:*

(a) The name and electronic address of the claimant and of the claimant's representative (if any) authorized to act for the claimant in the ODR proceedings;

(b) The name and electronic address of the respondent and of the respondent's representative (if any) known to the claimant;

(c) The grounds on which the claim is made;

(d) Any solutions proposed to resolve the dispute;

(e) The claimant's preferred language of proceedings; and

(f) The signature or other means of identification and authentication of the claimant and/or the claimant's representative."

Third paragraph: "*The ODR administrator shall promptly notify the respondent that the notice is available at the ODR platform.*"

Fourth paragraph: "*ODR proceedings may be deemed to have commenced when, following a claimant's communication of a notice to the ODR administrator, the ODR administrator notifies the respondent and the parties that the notice is available at the ODR platform.*"

52. Reference in this regard was made to paragraph 352 of the Commission report A/70/17 and the mandate set out therein. The first and third paragraphs of the alternative proposal were derived, it was clarified, from proposals made to the Working Group at earlier sessions; the second and fourth paragraphs reordered items 34 and 35 of the Proposal (and repeated their contents, save for a minor change to the chapeau to the second paragraph). It was emphasized that these provisions sought to explain, first, what the claimant should do when a dispute arose (that is, to send a notice to the ODR administrator), and that this step would commence the ODR process. Second, the provisions set out the contents of the notice, and

third, they identified what the ODR administrator should do upon receipt of that notice. The fourth element sought to determine when the proceeding commenced.

53. The structure of the proposal as so explained received support.

54. On the other hand, it was stated that the language and structure of the alternative proposal would be more reflective of prescriptive rules for an ODR process, particularly as compared with the Proposal regarding items 34 and 35, which, it was said, were facilitative, included explanations for the provisions, and had been designed to reflect the non-binding descriptive nature of the outcome document.

55. Another view was to combine item 34 of the Proposal with the second paragraph of the alternative proposal.

56. After discussion, it was suggested that the first two items of the Section could read as follows, and that this text could replace items 34 and 35 in the Proposal:

> First paragraph: "*In order to commence an ODR proceeding, it is desirable that the claimant provide to the ODR administrator a notice containing the following information:*
>
> *(a) The name and electronic address of the claimant and of the claimant's representative (if any) authorized to act for the claimant in the ODR proceedings;*
>
> *(b) The name and electronic address of the respondent and of the respondent's representative (if any) known to the claimant;*
>
> *(c) The grounds on which the claim is made;*
>
> *(d) Any solutions proposed to resolve the dispute;*
>
> *(e) The claimant's preferred language of proceedings; and*
>
> *(f) The signature or other means of identification and authentication of the claimant and/or the claimant's representative.*"
>
> Second paragraph: "*ODR proceedings may be deemed to have commenced when, following a claimant's communication of a notice to the ODR administrator, the ODR administrator notifies the respondent and the parties that the notice is available at the ODR platform.*"

57. After deciding to remove the superfluous words "*the respondent and*" from the second paragraph, this suggestion to replace items 34 and 35 was accepted.

58. It was queried whether the term "parties" should also be defined. In answer to that question, it was recalled that item 26 of the Proposal (see para. 41 above) explained that the parties comprised the claimant and respondent which, it was considered, would be sufficient for the purposes of the outcome document. The Working Group then proceeded with the consideration of item 36.

> "§36. *In order to enable a response to an ODR proceeding to proceed in an administratively efficient manner, it is desirable that the respondent's response to the notice should include:*
>
> *(a) The name and electronic address of the respondent and the respondent's representative (if any) authorized to act for the respondent in the ODR proceedings;*
>
> *(b) A response to the grounds on which the claim is made;*
>
> *(c) Any solutions proposed to resolve the dispute;*
>
> *(d) The signature or other means of identification and authentication of the respondent and/or the respondent's representative;*
>
> *(e) Notice of any counterclaim containing the grounds on which the counterclaim is made;*[43] *and*
>
> *(f) The location of the respondent.*"

[43] A/CN.9/WG.III/WP.137, para. 28.

59. For reasons of consistency with the earlier decision regarding proposed sub-item 35(g), it was agreed that sub-item (f) would be deleted.

60. As regards proposed sub-item (b), it was queried whether an "electronic address" alone would be sufficient. In response, the discussions in the Working Group that had led to this provision were recalled.

61. It was proposed that the amendments agreed for item 34 should be reflected in the chapeau to item 36 as follows: "*It is desirable that the respondent communicate its response to the ODR administrator within a reasonable time of being notified of the availability of the claimant's notice on the ODR platform, and that the response include the following elements …*" (and continuing with sub-items (a) to (e) as proposed).

62. In connection with this suggestion, it was queried why the reference to a reasonable time frame was included in the chapeau. In response, it was explained that the reference would enable the effective application of item 38(b) of the Proposal (see para. 72 below).

63. As regards proposed sub-item (b), it was suggested that the sub-item should read as follows: "*A response to the claim made by the claimant and to the grounds on which the claim is made*". It was clarified that the Proposal reflected the earlier consensus of the Working Group that references in the notices of both the claimant and the respondent to the "grounds of claim" encompassed references to the claim and responses as well as to the grounds upon which they were made. Accordingly, it was considered that that additional text would not be necessary.

64. In conclusion, it was agreed that the chapeau to item 36 in the Proposal would read, "*It is desirable that the respondent communicate its response to the ODR administrator within a reasonable time of being notified of the availability of the claimant's notice on the ODR platform, and that the response include the following elements …*"; that sub-item (f) would be deleted and that item 36 would otherwise remain unchanged. The Working Group then proceeded with the consideration of item 37.

> "*§37. As much as is possible, it is preferable that both the notice of claim and response be accompanied by all documents and other evidence relied upon by each party, or contain references to them. In addition, to the extent that a claimant is pursuing any other legal remedies, it is desirable that such information also be provided with the notice.*"[44]

65. It was suggested that the evidential burden indicated by the reference to "*all documents and other evidence*" might be onerous, and that the phrase should be replaced by the alternative phrase "*the documents and other evidence*". It was noted, in response, that the reference had been included to encourage a single submission of all documents in the possession of either party upon which that party sought to rely. In addition, it was recalled that the item envisaged that any documents that were unavailable to a party could be produced through references to those documents in the notices themselves.

66. As regards the phrase "[i]n addition, to the extent that a claimant is pursuing any other legal remedies, it is desirable that such information also be provided with the notice," it was stated that provision of this information would contradict practice in one jurisdiction. Consequently, clarification why this element had been included was sought. In response, it was recalled that the purpose was to avoid multiple or parallel proceedings, an issue that had been discussed at some length in the Working Group, and so as to ensure full disclosure to this end.

67. In conclusion, it was agreed to leave item 37 as per the Proposal.

Additional proposal (A/CN.9/WG.III/WP.136)

68. The Working Group heard a presentation of A/CN.9/WG.III/WP.136. The submitting delegation proposed that additional text be included in items 35 (f) and 36 (d) of the Proposal. The text proposed was based on the text of draft Articles 4A and 4B in A/CN.9/WG.III/WP.136 (under the heading "Comment to the attention of the experts of Working Group III UNCITRAL "Online dispute resolution — ODR"), and it was suggested

[44] Report of Working Group III, (Vienna, 18-22 November 2013), A/CN.9/795, para. 92.

that reference should also be made to the contents of a UN-CEFACT document." The document, it was said, was named Recommendation for ensuring legally significant trusted trans-boundary electronic interaction and was available online at: www1.unece.org/cefact/platform/download/attachments/55378391/Rec+draft+v.0.91+08.09.15.pdf. It was added that references in the proposed text to "defendant" should be understood as references to "respondent" for the purposes of an ODR process.

69. It was recalled that the Working Group had not earlier reached consensus on this element of an ODR process and, in that context, it was observed that the existing mandate of the Working Group would not encompass a discussion of this proposal.

70. It was noted that the proposal raised issues of identification and authentication of (in this context) a claimant and a respondent respectively, which were issues that UNCITRAL's Working Group IV (Electronic Commerce) had addressed. The Secretariat was therefore requested to present the proposals set out in A/CN.9/WG.III/WP.136 to that Working Group for its consideration.

71. The Working Group agreed to a revised formulation of items 34 and 35 as noted above; to item 36 of the Proposal as revised and to item 37 of the Proposal.

7. Section VII of the Proposal

72. The Working Group then proceeded to consider the negotiation stage of an ODR process, for which the following text was proposed.[45]

> "***Section VII. Negotiation***
>
> *§38. The first stage of proceedings may commence following the communication of the respondent's response to the ODR platform and:*
>
> *(a) Notification thereof to the claimant, or*
>
> *(b) Failing a response, the lapse of a certain period of time after the notice has been communicated to the respondent.*[46]
>
> *§39. This first stage may be referred to as 'negotiation', comprising 'negotiation between the parties via the ODR platform'.*"[47]

73. It was suggested that the order of the items be reversed, so as to ensure consistency in presentation with Section VI above (Commencement of ODR proceedings).

74. A concern was raised that so doing might indicate that the negotiation stage was mandatory, contrary to the intended flexibility in the envisaged outcome document, and as set out in item 19 of the Proposal.

75. In response, it was stated that the phrasing of items 38 and 39 would not indicate that the negotiation stage was mandatory.

76. A further suggestion was for the definition set out in item 39 to be located together with other definitions (see, further, para. 22 above).

77. Two additional sub-items were proposed, as follows. It was explained that the intention was to expand the scope of Section VII so to set out all steps for the negotiation phase upon which the Working Group had previously reached consensus.

> First paragraph: "*The parties could settle their dispute by negotiation within a reasonable period of time of the commencement of the negotiation stage of proceedings.*"
>
> Second paragraph: "*The parties may agree to a one-time extension of the deadline for reaching settlement. However no such extension shall be for more than for a reasonable period of time.*"

---

[45] Commentary and proposals made during the session are included under each relevant item of the Proposal.

[46] A/CN.9/WG.III/WP.137, para. 30.

[47] Ibid., para. 31.

78. In response to these suggestions, it was observed that the proposed language could be construed as being prescriptive, and that an alternative approach could be to state that it would be desirable for the ODR platform to issue guidelines on timelines and any appropriate extension.

79. After discussion, it was agreed that Section VII would read in its entirety as follows:

"*§38. The first stage may be a negotiation, conducted between the parties via the ODR platform.*

§39. The first stage of proceedings may commence following the communication of the respondent's response to the ODR platform and:

(a) Notification thereof to the claimant, or

(b) Failing a response, the lapse of a reasonable period of time after the notice has been communicated to the respondent."

§39bis. It is desirable that, if the negotiation does not result in a settlement within a reasonable period of time, the process proceeds to the next stage."

8. Section VIII of the Proposal

80. The Working Group then proceeded to consider the facilitated settlement stage of an ODR process, for which the following text was proposed.[48]

"***Section VIII. Facilitated settlement***

§40. The second stage of ODR proceedings may be facilitated settlement, whereby a 'neutral' individual is appointed and communicates with the parties to try to achieve a settlement.

§40bis. That stage may commence if negotiation via the platform fails for any reason (including non-participation or failure to reach a settlement within a reasonable period of time), or where one or both parties to the dispute request to move directly to the next stage of proceedings.[49]

§41. Upon commencement of the facilitated settlement stage of proceedings, it is desirable that the ODR administrator appoints a 'neutral' individual, and notifies the parties of that appointment, and certain details about the identity of the neutral.[50]

§42. In the facilitated settlement stage, it is desirable that the neutral communicates with the parties to try to achieve a settlement."[51]

81. After discussion, an additional item 42bis was proposed, as follows: "*If a facilitated settlement cannot be achieved within a reasonable period of time, the process may move to a final stage.*"

82. A proposal to include the phrase "*Subject to the agreement of the parties*" at the beginning of item 42bis did not gain support.

83. It was noted that item 42bis would apply where the parties in fact engaged in a facilitated settlement stage of an ODR proceeding, so that the provision would not prevent the parties from agreeing to bypass a facilitated settlement phase, if they so choose.

84. It was noted that the Working Group would consider whether to add any further reference to the final stage in item 42bis if and when it revisited item 22 of the Proposal.

85. The Working Group agreed the text of the proposed items 40-42bis, as amended.

---

[48] Commentary and proposals made during the session are included under each relevant item of the Proposal.

[49] A/CN.9/WG.III/WP.137, para. 32.

[50] Ibid., para. 33.

[51] Ibid., para. 34.

9. Section IX of the Proposal

86. The Working Group then proceeded to consider the appointment and powers of the neutral in an ODR process, for which the following text was proposed.[52]

> "***Section IX. Appointment and powers of the neutral***
>
> "*§43. To enhance efficiency and reduce costs, it is preferable that the ODR administrator not appoint a neutral until a neutral is required for a dispute resolution process in accordance with the applicable rules of procedure. At the point in an ODR proceeding at which a neutral is required for the dispute resolution process, it is desirable that the ODR administrator 'promptly' appoint the neutral (i.e., generally at the commencement of the facilitated settlement stage of proceedings). Upon appointment, it is desirable that the ODR administrator promptly notify the parties of the name of the neutral and any other relevant or identifying information in relation to that neutral.*"[53]

87. It was clarified that the "applicable rules of procedure" referred to whatever rules the parties had agreed to use in the ODR proceedings concerned, and that the text would therefore be amended to refer to the "*agreed ODR rules*".

88. It was proposed that the following words in item 43 be deleted: "*To enhance efficiency and reduce costs, it is preferable that the ODR administrator not appoint a neutral until a neutral is required for a dispute resolution process in accordance with the applicable rules of procedure. At the point in an ODR proceeding at which a neutral is required for the dispute resolution process, …*". It was observed that this introductory language repeated points of general application in the process, and was therefore unnecessary.

89. Alternative views were that the proposed text in the Proposal should be retained.

90. Regarding the phrase "*[t]o enhance efficiency and reduce costs*", it was observed that an online dispute resolution process differed from a traditional (offline) process in which the neutral would generally be appointed at the outset, and so this phrase served to highlight the greater flexibility available in the online context (and the consequent possibility of minimizing costs). An alternative suggestion was that the objective of minimizing costs could be included as a general principle earlier in the document. In response, it was observed that the point merited emphasis in this item.

91. Regarding the phrase, "*it is preferable that the ODR administrator not appoint a neutral until a neutral is required for a dispute resolution process*", it was said that this statement again highlighted the possibility of minimizing costs. It was also suggested that a revised formulation, "*it is preferable that the ODR administrator appoint a neutral only when a neutral is required for a dispute resolution process*", would remove any unintended negative tone in the item.

92. Regarding the phrase, "*[a]t the point in an ODR proceeding at which a neutral is required for the dispute resolution process, …*" it was stated that this phrase provided context and would enable a clearer understanding of the remainder of the sentence as presented in the Proposal.

93. After discussion, it was agreed to replace the first sentence of item 43 in the Proposal with the following sentence: "*To enhance efficiency and reduce costs, it is preferable that the ODR administrator only appoint a neutral when a neutral is required for a dispute resolution process in accordance with the applicable ODR rules.*"

94. Subject to this amendment, the Working Group agreed the text of item 43 as it was presented in the Proposal and proceeded with the consideration of item 44.

---

[52] Commentary and proposals made during the session are included under each relevant item of the Proposal.

[53] A/CN.9/WG.III/WP.137, para. 35.

"*§44. It is desirable that neutrals should have the relevant professional experience as well as dispute resolution skills to enable them to deal with the dispute in question. However, ODR neutrals need not be lawyers.*"[54]

95. It was observed that the relevant laws of national systems might prescribe requirements to practise as a lawyer and whether lawyers were allowed to act as ODR neutrals and that this formulation might contradict domestic provisions. Another view was that there was nothing in the outcome document that could contradict locally applicable law.

96. It was added that the first sentence alone would provide sufficient assurance, and that the second sentence was both unnecessary and could be interpreted as implying that ODR neutrals should not be lawyers.

97. In light of these points, it was stated that the second sentence should be deleted.

98. It was noted that reasons for retaining the second sentence included that disputes might focus on issues of fact rather than of law, that the decisions to be taken in an ODR process need not be of a judicial nature, and so as to minimize costs.

99. A discussion in the Working Group in 2010 was recalled: "There was consensus that conciliators or members of the arbitral tribunal ("neutrals") ought not necessarily to be lawyers, although they should be required to have relevant professional experience as well as dispute resolution skills to enable them to deal with the dispute in question".[55] It was also recalled that the Working Group had come to a general understanding that a neutral need not be a lawyer.

100. It was suggested that the second sentence could read "*However, ODR neutrals need not necessarily be lawyers*".

101. Further suggestions were that the second sentence could read "*ODR neutrals may include, but are not limited to, lawyers*"; "*Any legally-qualified professionals could be ODR neutrals*"; and "*However, subject to any professional regulation, ODR neutrals need not necessarily be lawyers*", and to refer to "*legally-qualified persons*" or "*qualified lawyers*", rather than to "*lawyers*".

102. After discussion, and noting the provision was permissive and not restrictive in nature, it was agreed that the second sentence of item 44 would read as follows: "*However, subject to any professional regulation, ODR neutrals need not necessarily be qualified lawyers*". The Working Group agreed the text of the first sentence of item 44 as per the Proposal.

103. An additional suggestion was to include in the introduction to the document a statement that "*These Technical Notes do not supplant or override applicable law*".

104. The Working Group then proceeded with the consideration of item 45.

"*§45. In respect of the process of appointment of a neutral, it is desirable that:*"

105. An alternative formulation for the chapeau was suggested, as follows:

"*With regard to the appointment and functions of neutrals, the following are desirable*:

(a) The neutral by accepting confirms that he or she has the time necessary to devote to the process;

(b) The neutral shall declare his or her impartiality and independence and disclose at any time any facts or circumstances that might give rise to likely doubts as to his or her impartiality or independence;

(c) The parties shall have a method for objecting to the appointment of a neutral;

(d) The ODR administrator shall make a determination as to whether the neutral shall be replaced;"

[54] Report of Working Group III, Vienna, 13-17 December 2010, A/CN.9/716, paras. 62-63.
[55] Ibid., para. 63.

106. It was suggested that the words "*In the event of an objection to an appointment of a neutral*" be at the beginning of the sentence, so as to clarify when the determination in question would be made.

> "*(e) There be only one neutral per dispute appointed at any time for reasons of cost efficiency;*
>
> *(f) A party may object to the neutral receiving information generated during the negotiation period; and*
>
> *(g) If the neutral resigns or has to be replaced during the course of the ODR proceedings, the ODR administrator will appoint a replacement subject to the same safeguards as set out during the appointment of the initial neutral.*"[56]

107. Subject to the inclusion of the amendments proposed to the chapeau and to sub-item (d), the Working Group agreed item 45.

108. In the light of the amendments made, it was agreed to revise the title of Section IX to read "*Appointment, powers and functions of the neutral*". The Working Group then proceeded with the consideration of item 46.

> "*46. In respect of the powers of the neutral, it is preferable that:*
>
> *(a) Subject to any Rules, the neutral may conduct the ODR proceedings in such a manner as he or she considers appropriate;*"

109. It was agreed to replace the words "*any Rules*" with the words "*any applicable ODR rules*" to ensure consistency throughout the outcome document.

> "*(b) The neutral shall conduct the proceedings without unnecessary delay or expense, shall provide a fair and efficient process for resolving disputes, and shall remain independent, impartial and treat both parties equally;*"

110. It was decided that sub-item (b) would read as follows, "*[t]he neutral shall avoid unnecessary delay or expense in the conduct of the proceedings and shall provide a fair and efficient process for resolving disputes*," and that an additional sub-item (b)bis would be included, as follows: "*The neutral shall remain independent, impartial and treat both parties equally throughout the proceedings*".

> "*(c) The neutral shall conduct proceedings based on the communications made during the proceedings;*"

111. It was observed that this sub-item referred to the entire ODR proceedings rather than to the negotiation stage as per item 45(f), and that these items should be aligned in scope. Accordingly, it was agreed that the sub-item be reworded as follows: "*The neutral shall conduct proceedings based on such communications as are before the neutral during the proceedings*".

> *"(d) The neutral may allow the parties to provide additional information in relation to the proceedings; and*
>
> *(e) The neutral has discretion to extend deadlines set out in any Rules*."[57]

112. It was agreed to refer to "*any applicable ODR rules*" as per sub-item (a) above. A suggestion that the sub-item be reworded to provide: "*The neutral has discretion to extend deadlines, subject to the applicable ODR rules*", did not gain support. It was recalled that the Working Group had earlier reached consensus on the principle that the neutral should have the discretion to extend deadlines for a reasonable time, and consequently that this provision reflected a core or fundamental principle of the process. It was also agreed that the words "*for a reasonable time*" be included in the sub-item, so that it would read as follows: "*The neutral has discretion to extend any deadlines set out in any applicable ODR rules for a reasonable time*".

113. Subject to the amendments agreed to sub-items (a), (b), (c) and (e), the Working Group agreed item 46 and proceeded with the consideration of item 47.

---

[56] A/CN.9/WG.III/WP.137, para. 36.
[57] Ibid., para. 37.

"*§47. While the process for appointment of a neutral for an ODR process is subject to the same due process standards that apply to that process in an offline context, it may be desirable to use streamlined appointment and challenge procedures in order to address the need for ODR to provide a simple, time-, and cost-effective alternative to traditional approaches to dispute resolution.*"[58]

114. In response to a query, it was explained that the time periods in question should be expedited in the context of an ODR process (as compared with the UNCITRAL Arbitration Rules, for example), without prejudice to due process standards. Suggestions were made to remove the introductory words in the item, "*[w]hile the process for appointment of a neutral for an ODR process is subject to the same due process standards that apply to that process in an offline context*", on the basis that they were superfluous, and to replace the reference to "*time-effective*" with the word "*speedy*". After discussion, it was agreed to retain the item as proposed.

10. Section X of the Proposal

115. The Working Group then proceeded to consider the language used in an ODR process, for which the following text was proposed.[59]

"***Section X — Language***

§48. Technology tools available in ODR can offer a great deal of flexibility regarding the language used for the proceeding. Even where an ODR agreement or ODR rules specify a language to be used in proceedings, a party to the proceedings should be able to indicate in the notice or response whether it wishes to proceed in a different language so that the ODR administrator can identify other language options."[60]

116. It was queried why the words "that the parties may select", which had appeared in the equivalent text in A/CN.9/WG.III/WP. 137 were not included in the Proposal, on the basis that the missing language could be of significant importance to the parties in practice. In response, it was stated that the ODR administrator might not be able to operate in all languages that the parties might select, and that the missing language would be implicit in the item as proposed. After discussion, it was decided to include the words "*that the parties may select*", and the item was otherwise agreed as proposed.

11. Section XI of the Proposal

117. The Working Group then proceeded to consider the governance of an ODR process, for which the following text was proposed.[61]

"***Section XI — Governance***

§49. It is desirable for guidelines (and/or minimum requirements) to exist in relation to the conduct of ODR platforms and administrators.[62]

§50. ODR proceedings are subject to the same due process standards that apply to that process in an offline context, in particular independence, neutrality and impartiality."[63]

118. The Working Group agreed the Section as proposed.

---

[58] Ibid., para. 38.

[59] Commentary and proposals made during the session are included under each relevant item of the Proposal.

[60] A/CN.9/WG.III/WP.137, para. 39.

[61] Commentary and proposals made during the session are included under each relevant item of the Proposal.

[62] A/CN.9/WG.III/WP.137, para. 40.

[63] Ibid., para. 41.

B. A/CN.9/WG.III/WP.137, paragraphs 42 and 43

119. As regards the suggestions in sub-paragraphs 42(a), (b) and (c), and paragraph 43 of the document A/CN.9/WG.III/WP.137, the Working Group decided that further provision in the draft outcome document would not be necessary, particularly in light of the limited mandate of the Working Group and the proposals made regarding the outcome document during the course of the session. In addition, and as regards the suggestion regarding confidentiality in paragraph 42(c), and the outstanding proposal to include confidentiality as a principle to be followed in the ODR process which was made earlier in the session (see paras. 29 and 30 above), the Working Group decided not to address confidentiality in the outcome document. The Working Group was urged, however, to bear the importance of confidentiality in mind when finalizing the outcome document.

C. Proposed additional text for item 22 of the Proposal and proposal for a new section, Section IX bis

120. The Working Group heard a proposal for additional text for item 22 of the Proposal (see paragraph 36 above), in the following terms: "*In that stage of proceeding, the ODR administrator may remind the parties, or set out for the parties, possible process options to choose.*"

121. The Working Group also heard a proposal for a new section, Section IX bis, in the following terms: "*If the neutral has not succeeded in facilitating the settlement, it is desirable that the ODR administrator, on the basis of information submitted by the parties, remind the parties of, or set out for the parties, the possible process options of final stage, and ensure that the parties are aware of the legal consequences of the choice of the process.*"

122. It was agreed to consider these proposals sequentially.

123. As regards the proposed addition to item 22, it was stated that this proposal went beyond the mandate of the Working Group as it sought to address the nature of the final stage of an ODR process, and further that the proposal sought to address an element of an ODR process upon which there had been no consensus.

124. In response, the proponents agreed that the mandate as set out in paragraph 352 of document A/70/17 required that the outcome document should exclude the nature of the final stage of the ODR process. However, the proponents stated that the reference to the "nature of the final stage" should be construed so as to exclude only a discussion of whether the final stage should be arbitration/non-arbitration. They added that paragraph 352 of document A/70/17 also reflected the Commission's agreement that the outcome document should build upon the consensus reached in earlier sessions. In the view of the proponents, the proposed addition discussed the role of the ODR administrator when facilitated settlement failed, and was necessary so as to complete the outcome document. In this regard, it was said, the proposal went no further than items 19-22 of the Proposal in terms of referring to the final stage. It was added that there had been consensus, when the two Tracks of earlier draft Rules were merged, that there would be a single track for third stage of the ODR process. For these reasons, the role of the administrator at this stage needed to be clarified.

125. In response, it was said that the substance of the proposed addition was already addressed in item 32(c) of the Proposal.

126. It was also said that a new Section IX bis was necessary as the introductory text of the Proposal referred to a number of approaches to an ODR process.

127. The Working Group did not complete its consideration of these proposals and deferred them to its next session.

D. Proposed revised introductory text for the outcome document

128. The Working Group heard a revised proposal for the introductory items of the outcome document, in the following terms:

"***I. Introduction***

Overview of ODR

§1. In tandem with the sharp increase of online cross-border transactions, there has been a need for mechanisms for resolving disputes which arise from such transactions.

§2. One such mechanism is online dispute resolution ('ODR'), which can assist the parties in resolving the dispute in a simple, fast, and flexible manner, without the need for physical presence at a meeting or hearing. ODR encompasses a broad range of approaches, including the potential for hybrid processes including both online and offline elements. As such, ODR represents significant opportunities for access to dispute resolution by buyers and sellers concluding cross-border commercial transactions, both in developed and developing countries.

Purpose of the Technical Notes[/Guidelines]

§3. The purpose of the Technical Notes [/Guidelines] is to foster the development of ODR and to assist ODR administrators, ODR platforms, neutrals, and the parties to ODR proceedings.

§4. The Technical Notes [/Guidelines] reflect approaches to ODR systems that embody principles of impartiality, independence, efficiency, effectiveness, due process, fairness, accountability and transparency.

§5. The Technical Notes [/Guidelines] are intended for use in disputes arising from cross-border low-value sales or service contracts concluded using electronic communications. They do not promote any practice of ODR as best practice.

Non-binding nature of the Technical Notes [/Guidelines]

§6. The Technical Notes [/Guidelines] are a descriptive document. They are not intended to be exhaustive or exclusive, nor are they suitable to be used as rules for any ODR proceeding. They do not impose any legal requirement binding on the parties or any persons and/or entities administering or facilitating an ODR proceeding, and do not imply any modification to any ODR rules that the parties may have selected."

129. The Working Group did not consider this proposal and deferred it to its next session.

E. Drafting instructions

130. In response to suggestions that the language in some items could be considered prescriptive, it was noted that the draft outcome document sought to distinguish between elements of the process which the Working Group considered as core or fundamental principles or steps, and other, more flexible, principles or steps. As regards the core or fundamental principles or steps (generally expressed using the word "shall" in the proposed text), it was suggested that these elements could be expressed in terms that it would be desirable for the neutral to be required to follow those principles and undertake those steps respectively. As regards other elements, it was observed that the document could be expressed in terms that it would be desirable for the neutral to be permitted to undertake or follow elements as appropriate.

131. The Working Group requested the Secretariat, in revising the draft outcome document:

(a) To ensure that the provisions in the outcome document were appropriately located;

(b) To ensure consistency in drafting between the chapeau and operative provisions in relevant items;

(c) To ensure consistency in drafting between the headings and text within the document; and

(d) To avoid unnecessary repetition.

B. Note by the Secretariat on online dispute resolution for cross-border electronic commerce transactions: submission by the Russian Federation

(A/CN.9/WG.III/WP.136)

[Original: English]

Contents

The Government of the Russian Federation has submitted to the Secretariat a document containing a vision and conceptual approaches regarding online dispute resolution for cross-border electronic commerce transactions. The document was submitted to the Secretariat prior to an earlier session of Working Group III (Online Dispute Resolution) but it is now to be made available to the Working Group. The text received by the Secretariat is reproduced as an annex to this note in the form in which it was received.

Annex

Vision and conceptual approaches to elaboration in specialized United Nations agencies and in relevant international organizations a family of recommendations on establishing and functioning of a trans-boundary trust space

Introduction

"Trans-boundary trust space" (hereinafter — TTS) is proposed to mean a combination of legal, **organizational and technical conditions recommended by relevant specialized United Nations agencies (departments) and** international organizations with the aim of ensuring trust (confidence in authenticity) in international exchange of electronic documents and data between electronically interacting parties (subjects).

"Electronically interacting parties (subjects)" is proposed to mean the entirety of public authorities, physical and legal persons interacting within relations arising from forming, sending, transmitting, receiving, storage and using electronic documents and data.

These proposals purpose to identify approaches and issues to be discussed in the context of development of a set of Recommendations on forming and functioning trans-boundary trust space (TTS Recommendations) in related United Nations organizations. It intends facilitating the building of technical, institutional and legal infrastructure for practical use of the TTS Recommendations.

Interested delegates and experts from state agencies and business are welcome to participate in this discussion.

Possible WTO role and contribution to TTS. The establishing of TTS will contribute to the facilitation and development of international trade and WTO attention to TTS issues will help to mobilize the support from governments and business to its practical implementation. Another area of concern is the lack of a coordination of work (and often of interoperability of final outputs) between numerous international and regional organizations (for example, ISO, ITU, UNECE/CEFACT, UNCITRAL, APEC, etc.) which are working on e-standards and related issues. The assigning to WTO a coordinating role in this process will make the international standardization in this area more efficient and effective.

Conceptual approaches

1. TTS Recommendations are proposed to be aimed to guarantee ensuring rights and legal interests of citizens and organizations under the jurisdiction of United Nations Member States while performing legally significant information transactions in electronic form using the Internet and other open ICT systems of mass usage.

2. The mentioned institutional guarantees are proposed to be ensured within business activity of specialized operators which:

- Provide users with a set of trusted ICT services;
- Operate within established legal regimes, which include but are not limited to restrictions imposed by processing of personal data.

3. It is proposed to give a description of different possible legal regimes:

- Based on international agreements (conventions) and/or on directly applicable international regulation;
- Based on commercial agreements and/or common trade practice;
- Without special international regulation.

Legal regimes can be additionally supported by traditional institutes (governmental authorities, judicial settlement, risk insurances, notary ship and others) through mutual recognition of electronic documents secured by trusted ICT services.

Established legal regimes can also provide for imposing special requirements on the material and financial support of the business activity of specialized operators in case of damage to their users, including cases of compromising personal data.

Issues of institutional guarantees and legal regimes for forming and functioning regional and global TTS-clusters as well as for functional services provided in the frames of these clusters are proposed to be considered in a separate UNCITRAL Recommendation.

4. It is proposed to give a description of the possible sets of trusted infrastructural ICT services in conjunction with the criticality of functional applications. The services and their available levels of trust can be determined by the operators of functional information systems dependent on threats, risks, agreed legal regimes and users' demands. In order to ensure required levels of trust the operators of functional information systems can operate in a neutral international environment defined by given legal regimes. It is proposed to describe organizational infrastructures necessary for establishing and maintaining the neutral international environment.

Common provisions on forming and functioning of regional and global TTS clusters, functional services provided in the frames of these clusters as well as sets of trusted infrastructural ICT services can be considered in the UNECE-UN/CEFACT "Recommendation for ensuring legally significant trusted trans-boundary electronic interaction".

Description of single trusted ICT-services can be a subject of technical standards and recommendations ITU, JTC-1, ETSI and others.

5. Sets of identification attributes can be defined by the legal regimes for the business activity of operators specialized in performing identification and functional operators and can be maintained by the related trusted ICT services. Operators' activity can be regulated by special organizational and technical requirements directed, besides others, on personal data protection.

Sets of identification attributes and identification procedures themselves can serve as the basis for the definition of the trust levels of identification schemes. The levels of trust of identification schemes can be of essence for regulation of interaction between different clusters of trust (see item 9).

6. It is proposed to describe the mechanisms of interaction of particular states and their international unions with other international formats in the frames of forming of a common TTS:

6.1. On the basis of accession to an existing legal regime, which ensures institutional guarantees to the subjects of electronic interaction:

- A complete accession of a state to an existing legal regime on the basis of international treaties and/or directly applicable international regulation, in which frames a task on forming a regional TTS has already been set or solved, including functional services provided in the frames of this TTS;

- A partial accession of a state to an existing legal regime on the basis of international treaties and/or directly applicable international regulation, in part of provisions on forming of regional and/or functional TTS;

6.2. On the basis of interaction between different international unions:

- In the first stage, a group of states creates an isolated regional TTS cluster, including functional TTS services provided in the frames of this TTS, ensuring institutional guarantees for the subjects of electronic interaction within the legal regime specified by these states;

- In the second stage, the protocols of trusted interaction with other international unions are specified as related to mutual recognition of different legal regimes. This mutual recognition shall regard to institutional guarantees and information security requirements appertaining to each of the international formats, possibly on the basis of an information security gateway (ISG) being operated in the frames of a special legal regime.

6.3. On the basis of interaction of a state with other states or international unions:

- In the first stage, a state creates an isolated national TTS cluster functioning in the frames of national legal regime specified by this state;

- In the second stage, the protocols of trusted interaction with other states and/or international unions are specified as related to mutual recognition of different legal regimes. This mutual recognition shall regard to institutional guarantees and information security requirements appertaining to these states and international formats, possibly on the basis of an information security gateway (ISG) being operated in the frames of a special legal regime.

7. It is proposed to describe cluster-forming mechanisms, similar to item 6, for legal regimes based on commercial agreements and/or common trade practice.

8. It is proposed to describe the mechanisms of forming of a global TTS based on integration of different clusters into a matrix formed according to the following characteristics:

- Functional services and regional scope;

- Different legal regimes and their modifications.

9. It is proposed to describe approaches to forming several types of information security gateways (ISG) as key elements of building a global TTS matrix.

The aim of creation of such gateways can be enabling of interaction between different clusters of the global TTS. Gateways forming can consider all the necessary aspects: legal, organizational and technological.

Approaches to forming typical information security gateways can take into account the existence of different possible levels of interaction between different TTS clusters. In particular, gateways forming can be done both: at only legal and organizational levels and at a complex level: legal, organizational and technical one.

Approaches to forming of typical information security gateways can regard usage of transition profiles describing and configuring transitions from one cluster to another. These transition profiles can consider the trust levels of the identification schemes used inside the interacting clusters, see item 5.

Description of several types of information security gateways (ISG) can be a subject of technical standards and recommendations ITU and JTC-1.

Summary

The problem of trans-boundary exchange of electronic documents is topical and is noted in global and regional declarations, such as:

- Promote research and cooperation enabling effective use of data and software in particular electronic documents and transactions including electronic means of

authentication and improve security methods (WSIS+10 Vision for WSIS Beyond 2015, C5. Building confidence and security in the use of ICTs, para. f.).

- Promote confidence and trust in electronic environments globally by encouraging secure cross border flows of information, including electronic documents and efforts to expand and strengthen the Asia-Pacific Information Infrastructure and to build confidence and security in the use of ICT (2012 APEC Leaders' Declaration, Vladivostok Declaration — Integrate to Grow, Innovate to Prosper).

There are several good practices of solving such a task in the world now:

- In the European Commission — on the basis of the Regulation of the European Parliament and of the Council on electronic identification and trust services for electronic transactions in the internal market (project — eIDAS[1]);
- In the Eurasian Economic Union — on the basis of the Treaty on the Eurasian Economic Union and of the Conception of using services and legally significant electronic documents in interstate informational interaction;[2]
- In the Asia Pacific Region — on the basis of PAN ASIAN e COMMERCE ALLIANCE (PAA).[3]

The global economy development needs, especially in crisis periods, demand an activation of integration processes in different economic and social areas including through the use of modern ICT-technologies based on innovations. These are the tasks the family of the TTS Recommendations proposed for development is aimed to solve.

Comment to attention of the experts of Working Group III UNCITRAL "Online dispute resolution — ODR"

The problem of identification of claimants and defendants in ODR can be solved in the context of the above proposed model (the model of forming and functioning of the trans-boundary trust space as a matrix, built of regional and global clusters, connected between each other and including the functional services provided in the frames of this TTS) as follows:

- One organizes a functional TTS cluster specialized in support of ODR procedures as regards to trans-boundary electronic commerce transactions;
- All the United Nations Member States can be involved in this cluster's geography;
- The functioning of this cluster is maintained by the business activity of a specialized operator or a group of related operators;
- The subject of the specialized operators' business activity can be provision of packages of trusted ID-services based on a set of ID-schemes adopted in the frames of electronic trade platforms;
- Legal regime for the specialized operators' business activity shall be established by agreements with trade platforms.

On the basis of the above stated the following amendments to ODR Procedural rules draft are proposed:

Article 4A, paragraph 4 (h) should be reworded as follows:

A signature or other means of identification and authentication of a claimant and/or the claimant's representative as set forth by the UN/CEFACT "Recommendation for ensuring legally significant trusted trans-boundary electronic interaction".

[1] http://ec.europa.eu/dgs/connect/en/content/electronic-identification-and-trust-services-eidas-regulatory-environment-and-beyond.

[2] www.eurasiancommission.org/docs/Download.aspx?IsDlg=0&print=1&ID=5713.

[3] www.paa.net/.

Article 4B, paragraph 2 (g) should be reworded as follows:

A signature or other means of identification and authentication of a defendant and/or the defendant's representative as set forth by the UN/CEFACT "Recommendation for ensuring legally significant trusted trans-boundary electronic interaction".

The addendum to Vision and conceptual approaches to elaboration in specialized UN agencies and in relevant international organizations a family of recommendations on establishing and functioning of a trans-boundary trust space

Common trust infrastructure for legally significant trans-boundary electronic interaction

White paper

Development purpose

The Internet has become a habitual tool for obtaining electronic services for individuals and entities of various states. The advantages of such services are evident but there is a number of organizational and legal issues, preventing their wide usage in those activity areas where users need a certain level of trust in these services. One of the main issues is **ensuring validity of e documents and legal significance of electronic interaction in general**. This problem is urgent on both the national level — within given jurisdictions, and the trans-boundary one — by interaction of participants relating to jurisdictions of different states. These issues were repeatedly considered at different international forums, including the United Nations (UN/CEFACT, UNCITRAL), as well as on the regional level — in the CIS, EU and APEC. But a satisfactory solution has not yet been found.

In order to enable a trusted trans-boundary electronic interaction, the RCC[4] experts initiated creation of the trans-boundary trust space (hereinafter — the TTS) based on the common trust infrastructure (hereinafter — the CTI). Its **primary objective is to provide trust services of different qualifications (basic, medium, high) to the CTI users in the process of their electronic interaction**. This will make it possible to attach legal significance to an electronic interaction at users' discretion regardless of their location and jurisdiction.

The TTS system is a fundamental, easily scalable platform providing a unified access to electronic trust services. Herewith, the existing electronic systems are taken into account, so the requirements to their updating for including into the TTS are expected to be minimal.

In the course of work on the TTS system, the CTI architecture was proposed, interconnections of its different components and their interaction with users were described, with projecting being carried out simultaneously in three aspects: legal, organizational and technological. The analysis of variants of practical realization and scripts of the CTI use allowed creating a list of documents necessary for a complete specification of the system.

The next step in promoting the new product, in our view, could be a discussion of the accumulated experience and knowledge with different partners (experts and organizations) interested in facilitating, simplifying trans-boundary electronic services and at the same time giving them legal validity.

There should also be developed sets of normative, organizational and technological documents ensuring the interoperability within the framework of a respective "trust domain"[5] (see chap. 4 § 3).

Further, there are plans to proceed to particular work involving forming the trans-boundary trust space, beginning with creation of international coordination bodies and the CTI architecture within the framework of a respective "trust domain", following which the practical realization of systems of legally significant trans-boundary electronic interaction will start.

Ensuring international trust: CTI Architecture

The development of the TTS is being carried out at three levels: legal, organizational and technological. A complex description allows correct functioning of the system as a whole and its single elements.

The CTI architecture is selected in such a way that it can be easily scaled. It broadens easily at any level of consideration due to the accession of new participants, such as new

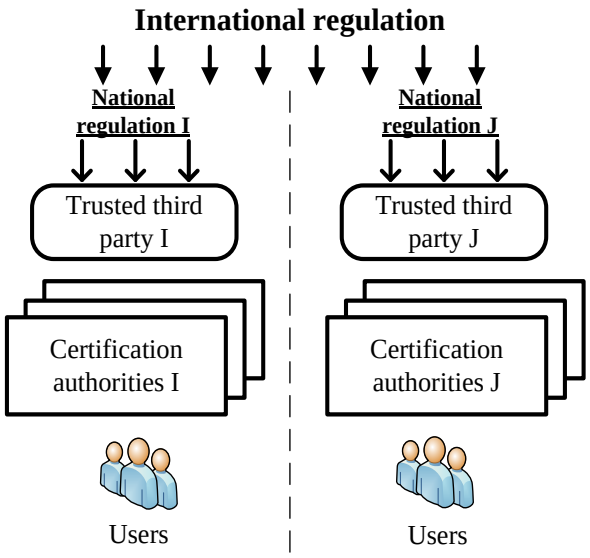
[4] The Regional Commonwealth in the field of communications. www.rcc.org.ru.
[5] Information and legal space using the same CTI.

jurisdictions, new supranational participants, new operators of trust services, and register systems.

Legal level

The TTS can be built on a single- or multi-domain basis. In the context of legal and organizational regulation, the multi-domain basis is the most complicated variant. The multi-domain system involves applying means of a trusted third party (hereinafter — TTP). Fig. 1 gives a general scheme of a legal regulation.

Figure 1
Legal regulation of trans-boundary trust space



Legal regulation of legally significant trans-boundary information interaction can be divided in two parts: international and national. The international legal regulation is carried out on the basis of the following types of documents:

- International treaties/agreements;
- Acts of different international organizations;
- International standards and regulations;
- Agreements between participants of trans-boundary information interaction on given issues;
- Model acts.

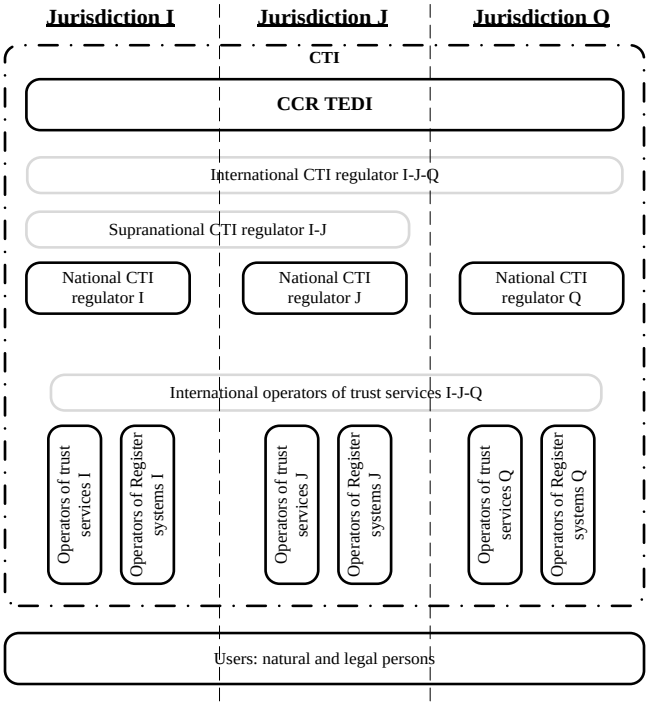
The national legal regulation is built on a complex of normative documents that are standard in each particular jurisdiction.

Organizational level

Mutual legally significant recognition of trust services provided under jurisdiction of various states is reached through creation and operation of the Coordination Council of Regulators of Trusted Electronic Data Interchange (hereinafter — CCR TEDI). The activity of this body is regulated by the CCR TEDI Statute which is to be recognized and signed by all its authorized members — that is the Regulation Bodies of the Electronic Data Interchange represented primarily by the National Regulators of the CTI.

The organizational regulation can be presented by the following diagram (see Fig. 2):

Figure 2
Organizational regulation of the trans-boundary trust space (optional elements are identified by the grey frame)



The CCR TEDI issues a number of documents interconnected with its Statute:

- Requirements for the CCR TEDI members, correspondence to which is a prerequisite for the full membership in the CCR TEDI;
- Guidelines on carrying out “shadow” supervision for admittance to the CCR TEDI and periodic mutual audit for maintaining voluntary membership in the CCR TEDI;
- Compliance criteria which are to be met by operators of the CTI services and operators of the register systems, and the methodology for applying these criteria;
- Scheme of estimation/verification of operators of the CTI services and operators of the register systems with respect to their meeting these criteria.

In the TTS, each jurisdiction is presented by the National CTI regulator (see Fig. 2, National CTI regulators I, J, Q) which regulates the activity of operators of the trust services and operators of the register systems within their jurisdiction.

For groups of states with high degree of integration (for example, EurAsEC or EU) there is the possibility of forming a Supranational CTI regulator (see. Fig. 2, Supranational CTI regulator I J). Thus, one Supranational CTI regulator I-J substitutes a group of National CTI regulators I and J.

The natural CTI scalability is enabled through the procedure for admitting new members to the CCR TEDI (new jurisdictions and supranational participants) and the scheme for verifying the operators of the CTI services and the operators of the register systems with respect to their meeting the Criteria issued by the CCR TEDI (new operators of the services and register systems).

If the CCR TEDI members (see below) have reached conditionally “medium” trust level, they can initiate creation of the International CTI regulator and International operators of the trust services (see. Fig. 2, International CTI regulator I J Q and International operators of the trust services I J Q). The International CTI regulator will coordinate interaction of international operators of the trust services and National CTI regulators (under the CCR TEDI Statute) and/or National CTI regulators.

In order to become a National operator of the trust service or an operator of the register system, a supplier of the respective services shall undergo accreditation with the National

CTI regulator of the same jurisdiction. International operators of the trust services shall undergo accreditation with the International CTI regulator. The requirements for accreditation of the operators of the trust services and the operators of the register systems, as well as the requirements to their activity are regulated by the Compliance Criteria issued by the CCR TEDI and possible national supplements issued by the respective regulator.

In the TTS, the users of electronic services can be both individuals and legal entities. The users select the necessary level of trust service qualification at their discretion or in an agreement.

The services are provided by the respective suppliers — the operators of the trust services. In some cases, the services can be provided by the operators of the register systems as well. The operators of the trust services and the operators of the register systems are integrated by the common trust infrastructure.

The trust services as the TTS elements can have different variants of realization depending on the level of trust between the participants of information interaction. For example, with conditionally "high" or "medium" level of mutual trust between the CCR TEDI members, it is efficient to use centralized international services applied according to the standards agreed upon. In case of conditionally "low" level of trust, the trust services are built according to the decentralized principle — national services in each state.

Technological level

There can be a great number of technological options for trust services' realization. The main requirement to the CTI elements is interoperability. Regulation at this level is carried out with application of different standards and instructions set forth by the CCR TEDI documents.

The technological functioning of the trust services can be demonstrated by verification of an electronic signature (hereinafter — ES) in the process of trans-boundary electronic interaction. For comparison, two variants of the CTI realization are given: the decentralized option — at conditionally "low" level of trust between the participants of information interaction (see Fig. 3) and the centralized option at "medium" level of trust between them (see Fig. 4).

Figure 3
ES verification within the framework of the TTS with "low" trust level (decentralized option)

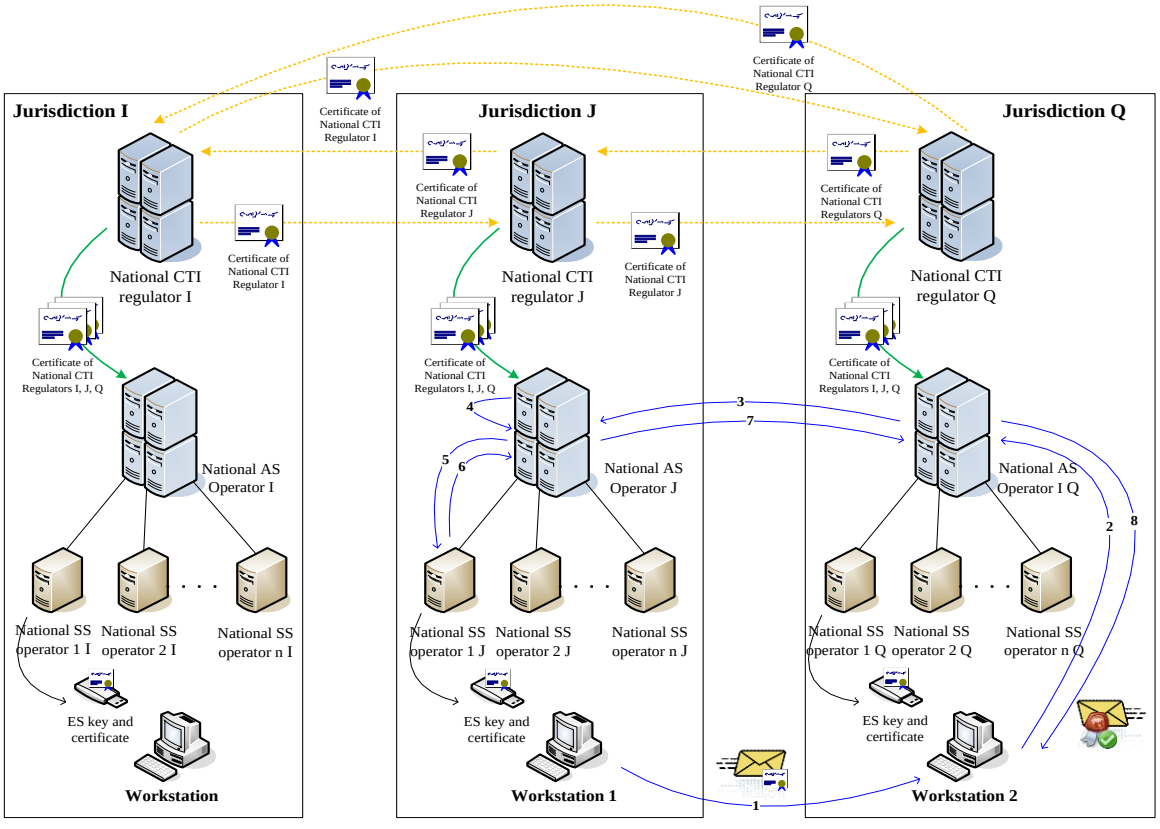


Figure 4
ES verification within the framework of the TTS with "medium" trust level (centralized option)

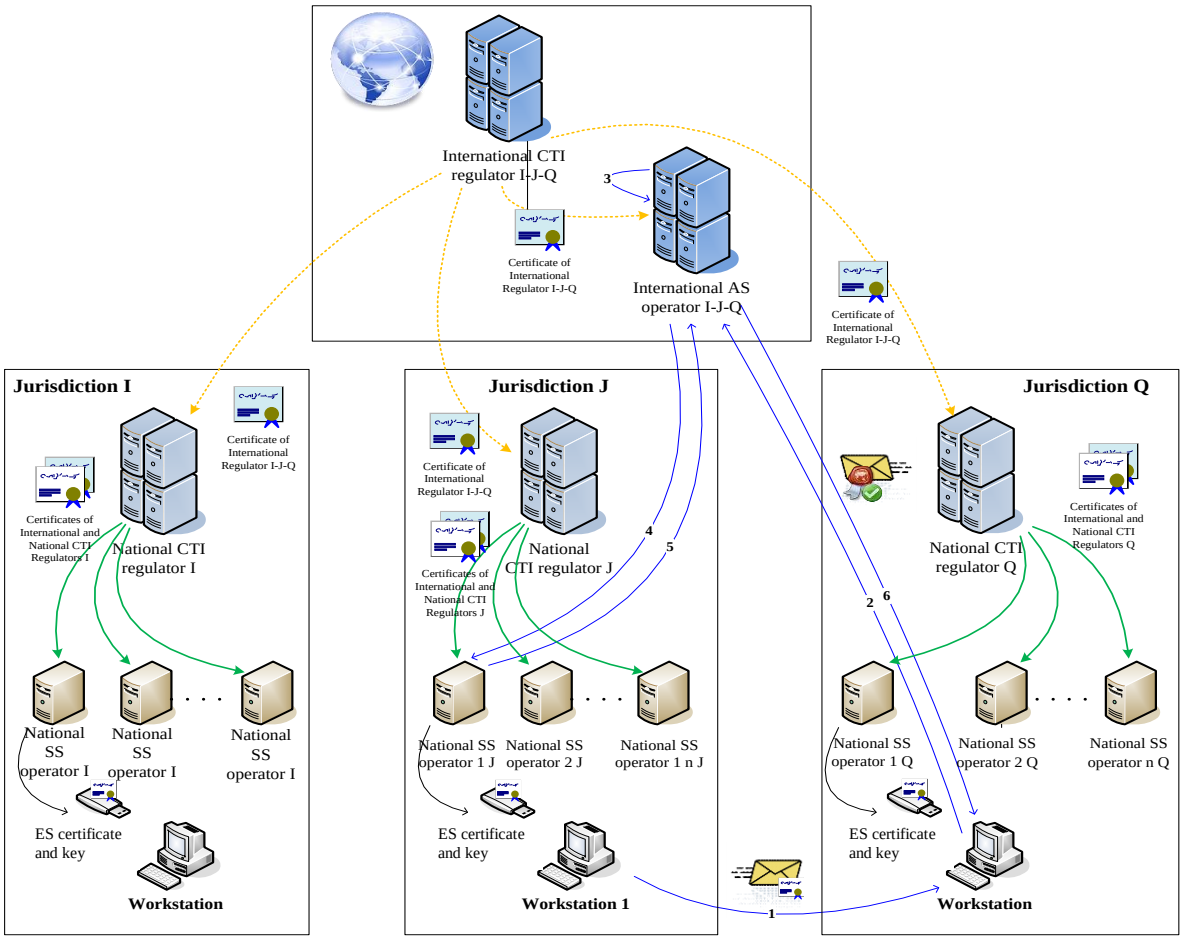

Table 1 shows the specifics of the decentralized and centralized CTI options. The ES verification procedure for the two variants of CTI realization is described in Table 2.

Table 1
CTI specifics for information interaction with "low" and "medium" level of trust

Low level of trust (Fig. 3)	Medium level of trust (Fig. 4)
1. Apostille services are provided by the National operators of apostille service (AS). 2. International organizations (operators and regulators) are unavailable. 3. The National Regulators interact directly, exchanging certificates among themselves (⇢). 4. The National Regulators provide the National operators of the trust services belonging to their jurisdiction with their certificate and the certificates of the National Regulators of other jurisdictions (→).	1. Apostille services are provided by the International operators AS. 2. International organizations present: the International CTI Regulator and the International operators of the trust services. 3. The National CTI Regulators interact only through the International CTI Regulator. Likewise, the National operators of the trust services interact through the respective International operator. 4. The International CTI Regulator provides the National operators of the trust services and the National CTI Regulators with the certificates in the centralized manner (⇢). 5. The National Regulators provide the National operators of the trust services belonging to their jurisdiction with their certificate and the International Regulator's certificate (→).

Procedure for ES verification for the options with "low" and "medium" level of trust

Low level of trust (Fig. 3)	Medium level of trust (Fig. 4)
1. Individual/entity 1 sends the documents signed with ES in jurisdiction **J**, meanwhile selecting the necessary qualification level of the trust services in use provided by the CTI (basic, medium or high). 2. A request for verifying documents with ES of jurisdiction **J** is forwarded to the National operator of the apostille service (AS) belonging to jurisdiction **Q**. 3. A request for verifying documents is forwarded to the National AS operator belonging to jurisdiction **J**. 4. Mathematic verification of ES of jurisdiction **J** is carried out. 5/6. A request/response concerning certificate status is sent to the National operator of the signature service (SS) of jurisdiction **J**. 7. The National operator of the AS belonging to jurisdiction **Q** receives a receipt on the correctness of the ES of jurisdiction **J**. 8. The National AS operator of jurisdiction **Q** certifies the receipt and forwards it to individual/entity 2.	1. Individual/entity 1 sends the documents signed with ES in jurisdiction **J**, meanwhile selecting the necessary qualification level of the trust services in use provided by the CTI (basic, medium or high). 2. A request for verifying documents with ES of jurisdiction **J** is forwarded to International AS operator **I-J-Q**. 3. Mathematic verification of ES of jurisdiction **J** is carried out. 4/5. A request/response concerning certificate status is sent to the National operator of the signature service (SS) of jurisdiction **J**. 6. International AS operator **I-J-Q** certifies the receipt and forwards it to individual/entity 2.

Identification of claimants and defendants in online dispute resolution

In the context of above mentioned model of forming and functioning of the trans-boundary trust space as a matrix, built of connected between each other regional and global clusters, including the functional services provided in the frames of this TTS, the problem of identification of claimants and defendants in online dispute resolution (hereafter ODR) can be solved as follows:

- One organizes a functional TTS cluster specialized in support of ODR procedures as regards to trans-boundary electronic commerce transactions;
- All the United Nations Member States can be involved in this cluster's geography;
- The functioning of this cluster is maintained by the business activity of a specialized operator or a group of related operators;
- The subject of the specialized operators' business activity can be provision of packages of trusted ID-services based on a set of ID-schemes adopted in the frames of electronic trade platforms;
- Legal regime for the specialized operators' business activity shall be established by agreements with trade platforms.

Further steps

1. The next stage in promoting this development could be a discussion of the accumulated experience and knowledge with different partners (experts and organizations) interested in facilitating, simplifying trans-boundary electronic services and at the same time giving them legal validity.

Among such interested partners can be primarily political and economic.[6] The political formats already partially involved in this work area are both supranational organizations (for

[6] Other humanitarian formats can also be interested in this product, for example, in the field of law, the Hague conference on private international law, as well as in the area of medicine and education; however, in our view, such organizations are more likely to use the TTS already created than support its new product.

example, CIS, APEC, EU, SCO) and bilateral relations between some states. The economic formats interested in achieving this goal can be, for example, respective United Nations structures such as UNCEFACT/UNECE, UNCITRAL (Working groups III and IV), as well as UNECE, EEA, EurAsEC and others.

2. Further, there are plans to proceed to particular work involving forming the trans-boundary trust space, beginning with the creation of an international coordination body (Coordination Council of Regulators of Trusted Electronic Data Interchange (see Fig. 2). This Council shall adopt its Statute and other regulatory documents governing its activity (see chap. 3.2), determine a specific architecture of the Common Trust Infrastructure (CTI), a set of the CTI trust services to be provided and a possible level of their qualification (possibly, depending on jurisdictions of the operators providing these services).

The existing natural peculiarities (historical, cultural, political, economic, technical, etc.) of different world regions can lead to different formats creating "their own" coordination bodies (CCR TEDI) and CTI architectures according to the level of trust within each format and the natural peculiarities mentioned above.

Therefore, we assume that at the initial stages of this project there will not be a single "trust domain" for the whole planet (for example at a level of some United Nations body), but rather several "trust domains".[7]

3. After the CTI architecture is selected (in a respective "trust domain"), it will be possible to proceed to drafting a further set of organizational, normative and technological documents agreed upon within the framework of the CCR TEDI. The systematic character of this document set is determinable by the results in step 2. This way, interoperability within the framework of a respective "trust domain" will be ensured.

International organizations developing and harmonizing standards can make a significant contribution to the support of these projects.

4. Adopting this set of documents by the CCR TEDI members (in a respective "trust domain") will make it possible to proceed to the final stage of implementation of the systems of legally significant trans-boundary electronic interaction.

[7] Informational and legal space using the same CTI.

C. Note by the Secretariat on online dispute resolution for cross-border electronic commerce transactions: notes on a non-binding descriptive document reflecting elements and principles of an ODR process

(A/CN.9/WG.III/WP.137)

[Original: English]

Contents

I. Introduction

1. At the Commission's forty-eighth session (Vienna, 29 June-16 July 2015), it was agreed that any future text should build upon the progress achieved in the context of prior Working Group sessions and the Commission instructed Working Group III to continue its work towards elaborating a non-binding descriptive document reflecting elements of an ODR process, on which elements the Working Group had previously reached consensus, excluding the question of the nature of the final stage of the ODR process.[1]

2. This note consequently sets out (a) the principles of an online dispute resolution process on which the Working Group has expressed agreement as contained in the earlier drafts of ODR Rules considered by the Working Group; (b) the areas of the ODR process on which the Working Group has achieved consensus; and identifies (c) areas on which the Working Group may wish to confirm consensus.

II. Principles

3. The Working Group has consistently emphasized certain principles that underpin the content of the Rules, namely fairness, transparency, due process and accountability.[2]

4. The Working Group has revisited on multiple occasions the underlying purpose of its work in drafting procedural rules for ODR arising out of cross-border e-commerce transactions, namely to address the fact that traditional judicial mechanisms for legal

[1] *Official Records of the General Assembly, Seventieth Session, Supplement No. 17* (A/70/17), para. 352.

[2] See in particular A/CN.9/801, paras. 15 and 29; A/CN.9/WG.III/WP.128, paras. 17 et seq.; as well as submissions by the Government of Canada: A/CN.9/WG.III/WP.114; and the CILE: A/CN.9/WG.III/WP.115.

recourse do not offer an adequate solution for cross-border e-commerce disputes, and that a global online dispute resolution process could provide a solution.[3]

5. It has also been generally agreed that such a global system ought to be simple, fast and efficient, in order to be able to be used in a "real world setting",[4] including that it should not impose costs,[5] delays and burdens that are disproportionate to the economic value at stake.[6]

6. The Working Group has also observed the need for a global standard to accommodate evolution of ODR practice.[7] It has been generally agreed by the Working Group that in practice procedural rules for ODR would not necessarily be administered word for word by ODR administrators, but rather would be adapted, customized and improved upon by the private sector, similarly to practice in relation to the UNCITRAL Arbitration Rules.[8]

III. Stages of an ODR process

7. The Working Group has broadly agreed on the process of an online dispute resolution proceeding (save for the nature of a final stage of proceedings) which would take place pursuant to ODR Rules. That process consists of three stages: negotiation; facilitated settlement; and a third (final) stage.

8. As envisaged in the Working Group, the ODR process commences when a claimant submits a notice of claim through the ODR platform to the ODR administrator.[9] The ODR administrator informs the respondent of the existence of the claim and the claimant of the response.[10] The first stage of proceedings — a technology-enabled negotiation — commences, in which the claimant and respondent negotiate directly with one another through the ODR platform.[11]

9. If that negotiation process fails (i.e. does not result in a settlement of the claim), the process moves to a second, "facilitated settlement" stage (see, further, paras. 32-34 below). In that stage of proceedings, the ODR administrator appoints a neutral adjudicator (a "neutral"), who communicates with the parties in an attempt to reach a settlement.[12]

10. If facilitated settlement fails, a third and final stage of proceedings might commence, but the nature of that stage of proceedings, and the means of enforcement of any outcome, has not been agreed by the Working Group, and is expressly excluded from the scope of this Note.

IV. Scope of ODR process

11. The Working Group has agreed in principle that an ODR process should apply to disputes arising out of cross-border, low-value e-commerce transactions.[13] The term low-value has not been defined.[14] The Working Group has considered that an ODR

---

[3] The original mandate to the Working Group was based, inter alia, on this notion: see A/65/17, para. 254.

[4] A/CN.9/801, para.14; A/CN.9/827, para. 44.

[5] The Working Group has specifically agreed that the fees of ODR proceedings themselves should be reasonable: see A/CN.9/WG.III/WP.133, draft article 17.

[6] A/65/17, para. 254. See also the Proposal by China as set out in A/CN.9/833 at para. 73.

[7] A/CN.9/801, para. 32.

[8] A/CN.9/827, para. 54; A/CN.9/795, para. 15. The Working Group has recognized that the process will be subject to applicable provisions of law: see A/CN.9/WG.III/WP.133, Draft article 1(3); A/CN.9/827, para. 68; and A/CN.9/WG.III/WP.119, para. 5.

[9] A/CN.9/WG.III/WP.133, Draft article 4A.

[10] A/CN.9/WG.III/WP.133, Draft article 4B.

[11] A/CN.9/WG.III/WP.133, Draft article 5. See, also, para. 32 below.

[12] A/CN.9/WG.III/WP.133, Draft article 6. See, also, the definition in para. 17 below.

[13] The language used by the Working Group has been "disputes arising out of cross-border, low-value transactions conducted by means of electronic communication." (A/CN.9/WG.III/WP.133, preamble, para. 1). This Working Paper refers simply to "low-value e-commerce transactions" for simplification of terminology.

[14] A/CN.9/795, paras. 25, 31-32; A/CN.9/739, para. 16. At its thirty-first session, the Working Group considered that it might consider "at a later stage" whether the terms "low-value" and "consumers"

process would apply to disputes arising out of both business-to-business as well as business-to-consumer transactions.[15]

12. It has been agreed that an ODR process may apply to disputes arising out of both sales and service contracts.[16]

13. The Working Group has agreed that parties to an e-commerce transaction should explicitly agree at the time of the transaction to be bound by an ODR process in the event that a dispute arises at a later stage.[17]

V. ODR definitions[18]

14. The Working Group has agreed on a number of definitions in relation to the parties to an online dispute resolution proceeding, as well as the technological components required for an online dispute resolution process.

15. The Working Group has defined online dispute resolution, or "ODR", as a "mechanism for resolving disputes facilitated through the use of electronic communications and other information and communication technology". [19] The Working Group has acknowledged that the process may be implemented differently by different administrators of the process, and may evolve over time.[20]

16. The Working Group has consistently referred respectively to a "claimant" and "respondent" as the party initiating ODR proceedings and the party to whom the notice of proceedings is directed, in line with traditional, offline, alternative dispute resolution nomenclature. The term the Working Group has agreed upon to define the "individual that assists the parties in settling or resolving the dispute" is the "neutral".

17. The Working Group has undertaken its work on the basis that ODR requires a technology-based intermediary. In other words, unlike offline alternative dispute resolution, an ODR process cannot be conducted on an ad hoc basis involving only the parties to a dispute and a neutral adjudicator (that is, without an administrator). Instead, to enable the use of technology to facilitate a dispute resolution process, an ODR process requires a system for generating, sending, receiving, storing, exchanging or otherwise processing communications. Such a system has been referred to in the Working Group as an "ODR platform."[21]

18. The Working Group has also proceeded on the premise that the ODR platform must be administered and coordinated. The entity that carries out such administration and coordination has been referred to by the Working Group as the "ODR administrator." The Working Group has observed that the ODR administrator may administer the platform, but alternatively may also be a separate entity[22] from the ODR platform.[23]

19. The Working Group has indicated that both the ODR administrator and the ODR platform should be specified in the dispute resolution clause that forms part of the contract between the parties at the time of the e-commerce transaction.[24] It has been said that such specification would increase transparency and accountability insofar as parties to a

---

needed to be defined: A/CN.9/833, para. 34. See, also, A/CN.9/WG.III/WP.128, para. 36.

[15] *Official Records of the General Assembly, Sixty-fifth Session, Supplement No. 17* (A/65/17), para. 257; A/CN.9/716, para. 14.

[16] A/CN.9/WG.III/WP.133, Draft article 1(1)(a); A/CN.9/801, para. 36; A/CN.9/795, para. 40.

[17] A/CN.9/WG.III/WP.133, Draft article 1(1)(a).

[18] A/CN.9/WG.III/WP.133, Draft article 2.

[19] A/CN.9/WG.III/WP.133, Draft article 2(1).

[20] A/CN.9/801, para. 32.

[21] A/CN.9/WG.III/WP.133, Draft article 2(3); A/CN.9/WG.III/WP.130, Draft article 2(3). The relevant draft article in A/CN.9/WG.III/WP.133 has not yet been considered by the Working Group; accordingly citations here and later in this Note refer to both Working Papers.

[22] The Working Group has not ruled out that these could be two separate legal entities.

[23] A/CN.9/WG.III/WP.133, Draft article 2(2); A/CN.9/WG.III/WP.130, Draft article 2(2).

[24] A/CN.9/WG.III/WP.133, Draft article 13.

transaction would have relevant information on the dispute at the time they agreed to the dispute resolution clause, rather than only at the time the dispute were to arise.[25]

20. The Working Group has defined the communications that may take place during the course of proceedings as "any communication (including a statement, declaration, demand, notice, response, submission, notification or request) made by means of information generated, sent, received or stored by electronic, magnetic, optical or similar means."[26]

VI. Communications

21. The Working Group has agreed that all communications in ODR proceedings must take place via the ODR platform.[27] Consequently, both the parties to the dispute, and the ODR platform itself, must have a designated "electronic address".[28] The term "electronic address" has been defined in line with other UNCITRAL texts.[29]

22. The Working Group has agreed that the ODR administrator must:

(a) Acknowledge receipt of any communication by the ODR platform;[30]

(b) Notify parties of the availability of any communication received by the ODR platform;[31]

(c) Keep the parties informed of the commencement and conclusion of different stages of the proceedings.[32]

23. The Working Group has agreed that the ODR administrator must make these notifications "promptly".[33]

24. The Working Group has proceeded on the basis that a communication is deemed to be received by a party when the administrator notifies that party of its availability on the platform;[34] deadlines in the proceedings run from the time the administrator has made that notification.[35]

VII. Commencement of ODR proceedings[36]

25. The Working Group has agreed that ODR proceedings are deemed to have commenced when, following a claimant's communication of a notice to the ODR administrator, the ODR administrator notifies the respondent and the parties that the notice is available at the ODR platform.[37]

---

[25] A/CN.9/801, paras. 53 and 134; A/CN.9/WG.III/WP.133, Draft article 13; A/CN.9/WG.III/WP.130/Add.1, Draft article 13.

[26] A/CN.9/WG.III/WP.133, Draft article 2(7); A/CN.9/WG.III/WP.130, Article 2(7); A/CN.9/795, paras. 52-53.

[27] A/CN.9/WG.III/WP.133, Draft article 3(1).

[28] A/CN.9/WG.III/WP.133, Draft article 2(8) and Draft article 3(1).

[29] A/CN.9/801, paras. 57-59.

[30] A/CN.9/WG.III/WP.133, Draft article 3(3).

[31] A/CN.9/WG.III/WP.133, Draft article 3(4). The notifications would advise, for example, that notices from the claimant and/or responses are available on the ODR platform, such as those notices envisaged under A/CN.9/WG.III/WP.133, Draft article 4A(2); A/CN.9/WG.III/WP.130, Draft article 4A(2). See also A/CN.9/WG.III/WP.133, Draft articles 3, 4A and 4B, and 5.

[32] A/CN.9/WG.III/WP.133, Draft article 3(5); A/CN.9/795, para. 110. See A/CN.9/WG.III/WP.133, Draft article 12, in relation to notification of deadlines, which was not agreed by the Working Group.

[33] See, for example, A/CN.9/WG.III/WP.133, Draft article 3(3); A/CN.9/WG.III/WP.130, Draft article 3(3).

[34] A/CN.9/WG.III/WP.133, Draft article 3(2).

[35] A/CN.9/WG.III/WP.133, Draft article 3(2); A/CN.9/WG.III/WP.130, Draft article 3(2).

[36] See generally, A/CN.9/WG.III/WP.133, Draft articles 4A and 4B.

[37] A/CN.9/WG.III/WP.133, Draft article 4A(3).

26. The Working Group has agreed that the notice should contain:

(a) The name and electronic address of the claimant and of the claimant's representative (if any) authorized to act for the claimant in the ODR proceedings;

(b) The name and electronic address of the respondent and of the respondent's representative (if any) known to the claimant;

(c) The grounds on which the claim is made;

(d) Any solutions proposed to resolve the dispute;

(e) The claimant's preferred language of proceedings; and

(f) The signature or other means of identification and authentication of the claimant and/or the claimant's representative.[38]

27. The Working Group has considered, but not yet achieved consensus, as to whether information in addition to these areas ought to be included in the notice.[39]

28. The Working Group has also agreed that the respondent's response to the notice should include:

(a) The name and electronic address of the respondent and the respondent's representative (if any) authorized to act for the respondent in the ODR proceedings;

(b) A response to the grounds on which the claim is made; and

(c) Any solutions proposed to resolve the dispute; and

(d) The signature or other means of identification and authentication of the respondent and/or the respondent's representative.[40]

29. As with the notice of claim, the Working Group has considered, but not yet achieved consensus, as to whether additional information ought to be included in the response.[41]

VIII. Negotiation[42]

30. The Working Group has generally agreed that the first stage of proceedings commences following the communication of the respondent's response to the ODR platform and:

(a) Notification thereof to the claimant; or

(b) Failing a response, the lapse of a certain period of time after the notice has been communicated to the respondent.[43]

31. This first stage is "negotiation", which the Working Group has agreed comprises "negotiation between the parties via the ODR platform."[44]

IX. Facilitated settlement

32. If negotiation via the platform fails for any reason (including non-participation or failure to reach a settlement within a certain time period), or where one or both parties to the

---

[38] A/CN.9/WG.III/WP.133, Draft article 4A(4); A/CN.9/WG.III/WP.130, Draft article 4A(4).

[39] Areas that remain under consideration include for example whether additional information may be provided by the claimant at the time it submits its notice, including information in support of its claim and information in relation to the pursuit of other legal remedies: A/CN.9/WG.III/WP.133, para. 15.

[40] As regards issues of language, see para. 43 below.

[41] See A/CN.9/WG.III/WP.133, Draft article 4B(2)(d)-(g). Areas that remain under consideration include for example whether additional information may be provided by the respondent at the time it submits its notice, including information in support of its response or its pursuit of other legal remedies: A/CN.9/WG.III/WP.133, para. 16.

[42] See generally A/CN.9/WP. 133, Draft article 5.

[43] A/CN.9/WG.III/WP.133, Draft article 5(1).

[44] A/CN.9/WG.III/WP.133, Draft article 5(2).

dispute request to move directly to the next stage of proceedings, the Working Group has agreed that the second, facilitated settlement stage of proceedings commences.[45]

33. Upon commencement of the facilitated settlement stage of proceedings, the ODR administrator appoints a "neutral" individual,[46] and notifies the parties of that appointment, and certain details about the identity of the neutral.[47]

34. In the "facilitated settlement" stage, the neutral communicates with the parties to try to achieve a settlement.[48]

X. Appointment and powers of the neutral

35. The Working Group has agreed that the ODR administrator should "promptly" appoint the neutral at the commencement of the facilitated settlement stage of proceedings. Upon appointment, the ODR administrator would promptly notify the parties of the name of the neutral any other relevant or identifying information in relation to that neutral.[49]

36. In respect of the process of appointment of a neutral, the Working Group has agreed:[50]

(a) That the neutral by accepting confirms that he or she has the time necessary to devote to the process;

(b) That the neutral shall declare his or her impartiality and independence and disclose at any time any facts or circumstances that might give rise to likely doubts as to his or her impartiality or independence;

(c) That the parties shall have a method for objecting to the appointment of a neutral;

(d) That the ODR administrator shall make a determination as to whether the neutral shall be replaced;

(e) That there shall be only one neutral per dispute appointed at any time;[51]

(f) That a party may object to the neutral receiving information generated during the negotiation period; and

(g) That if the neutral resigns or has to be replaced during the course of the ODR proceedings, the ODR administrator will appoint a replacement subject to the same safeguards as set out during the appointment of the initial neutral.[52]

37. In respect of the powers of the neutral, the Working Group has agreed:

(a) That subject to the Rules, the neutral may conduct the ODR proceedings in such a manner as he or she considers appropriate;

(b) The neutral shall conduct the proceedings without unnecessary delay or expense, shall provide a fair and efficient process for resolving disputes, and shall remain independent, impartial and treat both parties equally;

(c) The neutral shall conduct proceedings based on the communications made during the proceedings;

(d) The neutral may allow the parties to provide additional information in relation to the proceedings;

(e) The neutral has discretion to extend deadlines set out in the Rules.[53]

---

[45] A/CN.9/WG.III/WP.133, Draft article 5(3) and Draft article 5(4).

[46] The Working Group has determined that a "neutral" must be a "physical person" rather than a "legal person": A/CN.9/795, para. 60.

[47] A/CN.9/WG.III/WP.133, Draft article 6(1).

[48] A/CN.9/WG.III/WP.133, Draft article 6(2).

[49] A/CN.9/WG.III/WP.133, Draft article 6(1); A/CN.9/WG.III/WP.130, Draft article 6(1); A/CN.9/795, para. 128; A/CN.9/801, para. 114.

[50] A/CN.9/WG.III/WP.133, Draft article 9.

[51] See A/CN.9/WG.III/WP.133, Draft article 6(1); A/CN.9/WG.III/WP.130, Draft article 6(1).

[52] A/CN.9/WG.III/WP.133, Draft article 10.

[53] A/CN.9/WG.III/WP.133, Draft article 11(5).

38. The Working Group has generally expressed agreement that the appointment and challenge procedures for neutrals should be simple and time-effective.[54]

XI. Language

39. The Working Group has not agreed on the basis for selecting the language of proceedings. However, it has agreed that even where an ODR agreement or ODR rules specify a language to be used in proceedings, a party to the proceedings should be able to indicate in the notice or response whether it wishes to proceed in a different language so that the ODR administrator can identify other language options that the parties may select.[55]

XII. Governance

40. The Working Group has broadly agreed that it is desirable for guidelines (and/or minimum requirements) to exist in relation to the conduct of ODR platforms and administrators.[56] However, the Working Group has not determined the content of those guidelines nor whether they ought to form part of a description of the process (see further below para. 42 (c)).[57]

41. The Working Group has also broadly agreed on the importance of independence, neutrality and impartiality of the neutral in the ODR process[58] and reference was made to the importance of a code of conduct in that context.[59] The appropriate professional skills and experience required of a neutral could also be addressed.

XIII. Additional areas on which the Working Group may wish to confirm consensus

42. The Working Group may wish to confirm consensus on additional areas that could be covered in the descriptive document, as guidelines on general points of principle or procedure.[60] For example:

(a) The Working Group may wish to address whether the above description of an ODR process is sufficient to reflect current practice in the ODR field; and also whether it is sufficiently flexible to evolve with changing practice in a technology-enabled field;[61]

(b) The Working Group may wish to address further whether such a process would apply globally and to all stakeholders within the ODR process (including ODR platforms, administrators and neutrals) or rather to the contractual parties to the transaction concerned only;[62] and

(c) The Working Group may wish to address further its earlier considerations as regards how and whether confidentiality, processing and transfer of information, data security, and archiving, should be addressed in a global description of an ODR process,[63] and on the responsibilities of the ODR platform and administrator for procedural issues including fairness, due process, transparency, accountability, neutral appointment or selection, and the performance capabilities of the ODR platform.[64]

---

[54] A/CN.9/833, para. 63.

[55] A/CN.9/WG.III/WP.133, Draft article 15; A/CN.9/WG.III/WP.130/Add.1, Draft article 14. See also A/CN.9/WG.III/WP.128, para. 53; and A/CN.9/762, paras. 71, 74.

[56] A/CN.9/795, para. 57; A/CN.9/WG.III/WP.128, para. 4.

[57] A/CN.9/WG.III/WP.128, paras. 13-15; A/CN.9/WG.III/WP.133, preamble; A/CN.9/827, para. 26; A/CN.9/801, para. 113.

[58] A/CN.9/716, para. 66.

[59] A/CN.9/716, para. 67.

[60] See, e.g. A/CN.9/WG.III/WP.128.

[61] A/CN.9.801, paras. 14, 27-32.

[62] By application of the issues set out in A/CN.9/WG.III/WP.128, paras. 9-12.

[63] A/CN.9/795, para. 123; see also A/CN.9/WG.III/WP.128, paras. 33-35.

[64] See in particular A/CN.9/801, paras. 15 and 29; A/CN.9/WG.III/WP.128, paras. 17 et seq.; as well as submissions by the Government of Canada: A/CN.9/WG.III/WP.114; and the CILE:

43. The Working Group may also wish to confirm more detailed points of procedure: for example, as regards the ODR administrator, whether the ODR administrator could provide parties with an overview of the ODR process or processes, including neutral selection, the order and progression of the process (such as the status of all filings and communications that are available on the ODR platform) and costs; whether the location of the claimant could be included in the claimant's notice; whether the respondent's response could include the location of the respondent, notice of any counterclaim and the supporting evidence therefor, whether the respondent agrees with the language of proceedings provided by the claimant, or whether another language of proceedings is preferred. The Working Group may also wish to consider questions of supporting evidence, and procedures for appointment of the neutral and challenge procedures.

XIV. Next steps

44. The Working Group may wish to consider the scope and content of the above description of an ODR process. The Working Group may also wish to address:

(a) The style of such a document. First, how it should be described (such as Technical Notes) and, secondly, how the guidance should be phrased. For example, whether the principles and procedures should be prefaced with the words "the system may address", "it is desirable that", or another approach to reflect the flexibility that the Working Group has acknowledged is inherent in its approach;

(b) The extent to which the descriptive paragraphs should themselves be prefaced with a general statement of purpose and/or benefits of ODR proceedings;

(c) Whether a description of the UNCITRAL process in elaborating the eventual document should also be included.

A/CN.9/WG.III/WP.115.

D. Note by the Secretariat on online dispute resolution for cross-border electronic commerce transactions: submission by Israel

(A/CN.9/WG.III/WP.138)

[Original: English]

Contents

The Government of Israel has submitted to the Secretariat a document regarding draft provisions for Recommended Standards for ODR Administrators. The text received by the Secretariat is reproduced as an annex to this note in the form in which it was received.

Annex

Draft provisions for Recommended Standards for ODR Administrators

Further to the mandate given to UNCITRAL Working Group III at the 2015 Commission session, "[1] and building upon the notes submitted at that session,[2] the State of Israel submits the following draft provisions that could be included in a non-binding ODR instrument, for the Working Group's consideration. For the sake of convenience, the instrument will be referred to as the "Recommended Standards for ODR Administrators" (the "**ODR Recommended Standards**" (it can also be entitled "ODR Notes", if the Working Group so decides).

It is envisaged that the scope of the ODR Recommended Standards would be limited to the types of claims as agreed by the Working Group (non-delivery, late delivery, non-payment, etc., in low-value transactions), and that they would focus on transparency, independence, expertise, confidentiality and procedural fairness as key principles according to which ODR administrators should to govern themselves.

What follows are some draft illustrative provisions that could be included in such an instrument with respect to each of these key principles. The proposals herein are intended as a platform to facilitate a broader discussion and are not necessarily reflective of Israel's specific or definitive position on each item. Furthermore, they do not preclude the development of another instrument, such as a non-binding technical Note describing elements of an ODR process, consistent with the Working Group's mandate.

Transparency[3]

1. "It is recommended that the ODR administrator disclose its roster of neutrals and a short summary of their nationality and credentials. In addition, it is advisable to disclose any contractual relationship between the ODR administrator and a particular vendor, so that users of the service are informed of potential conflicts of interest."

2. "The ODR administrator may wish to publish anonymized data or statistics on its decisions, in order to enable parties to assess its overall record."

3. "All relevant information should be available on the ODR administrator's website in a user-friendly and accessible manner."

---

[1] Report of the United Nations Commission on International Trade Law, Forty-eighth session (29 June-16 July 2015), A/70/17, para. 352.

[2] Notes by the State of Israel (A/CN.9/857), and by Columbia, Honduras and the United States (A/CN.9/858).

[3] Based on the UNCITRAL Secretariat's Note — Online dispute resolution for cross-border electronic commerce transactions: draft guidelines — A/CN.9/WG.III/WP.128, par.23-32.

Independence

4. "It would be advisable for the ODR administrator to adopt a code of ethics for its neutrals, in order to guide neutrals as to conflicts of interest and other rules of conduct."[4]

5. "It would be useful for the ODR administrator to adopt internal policies dealing with identifying and handling conflicts of interest."[5]

Expertise

6. "The ODR administrator may wish to implement comprehensive policies governing selection and training of neutrals."[6]

7. "An internal oversight/quality assurance process could help the ODR administrator to ensure that neutrals' decisions conform with the standards it has set for itself."

Confidentiality

8. "Adequate data protection measures and practices, covering inter alia the confidentiality of communications between the parties to the proceedings and the ODR administrator and neutral, are an important component of the ODR administrator's relationship with the parties and help foster a trusting environment for the ODR process occur."[7]

Procedural fairness

9. "The applicable rules surrounding the ODR process should be clear, straightforward and fair, with the different stages of the process being clearly delineated, and with expedited yet flexible time frames."

10. "The applicable rules would typically be expected to include provisions regarding the notification of commencement of proceedings, response and counterclaims, and the manner of providing evidence."[8]

11. "One or more model ODR clauses, for use by prospective parties, should be published on the ODR administrator's website, and the technical means by which the parties can signal their informed consent should be provided."

12. "Where relevant and feasible, the ODR administrator could offer mechanisms to (a) facilitate a settlement between the parties without the intervention of a neutral, (b) enable the parties to object to a neutral's appointment, and (c) appoint a replacement neutral.

13. It is recommended that the ODR administrator provide the ODR services in a language which the users can understand, to the extent feasible."

---

[4] While no consensus was achieved in previous Working Group 3 regarding the adoption of a Code of Ethics per se, various iterations of the draft ODR Rules contemplated, in the preamble, the inclusion of "Guidelines and minimum requirements for neutrals".

[5] A/CN.9/WG.III/WP.128, par.18.

[6] A/CN.9/WG.III/WP.128, par.31.

[7] A/CN.9/WG.III/WP.128, par.33-35.

[8] Recent versions of the Draft ODR Rules (WP.133, WP.133/Add.1) contained detailed provisions regarding these matters, which achieved general consensus. While the proposed ODR Recommended Standards need not include detailed procedural provisions, certain key elements from these provisions could be incorporated as well.

E. Report of the Working Group on Online Dispute Resolution on the work of its thirty-third session (New York, 29 February-4 March 2016)

(A/CN.9/868)

[Original: English]

Contents

I. Introduction

1. At its forty-third session (New York, 21 June-9 July 2010), the Commission agreed that a Working Group should be established to undertake work in the field of online dispute resolution relating to cross-border electronic commerce transactions.

2. At its forty-fourth session (Vienna, 27 June-8 July 2011), the Commission reaffirmed the mandate of Working Group III relating to cross-border electronic transactions, including B2B and B2C transactions.[1] The Commission decided inter alia at that session that, in general terms, in the implementation of its mandate, the Working Group should also consider specifically the impact of its deliberations on consumer protection and that it should report to the Commission at its forty-fifth session.[2]

3. At its forty-fifth session (New York, 25 June-6 July 2012), the Commission reaffirmed the mandate of the Working Group in respect of low-value, high-volume cross-border electronic transactions, and the Working Group was encouraged to continue to conduct its work in the most efficient manner possible.[3] It was further agreed that the Working Group should consider and report back at a future session of the Commission on how the draft rules would respond to the needs of developing countries and those facing post-conflict situations, in particular with regard to the need for an arbitration phase to be part of the process; and that the Working Group should continue to include in its deliberations the effects of online dispute resolution on consumer protection in developing and developed countries and countries in post-conflict situations.[4] The Commission furthermore requested the Working Group to continue to explore a range of means of ensuring that online dispute resolution

[3] Ibid., *Sixty-seventh Session, Supplement No. 17* (A/67/17), para. 79.
[4] Ibid.

outcomes were effectively implemented, including arbitration and possible alternatives to arbitration.[5]

4. At its forty-sixth[6] and forty-seventh[7] sessions, the Commission affirmed the decisions made at its forty-fifth session.

5. At its forty-eighth[8] session (Vienna, 29 June-16 July 2015), the Commission instructed Working Group III to continue its work towards elaborating a non-binding descriptive document reflecting elements of an ODR process, on which elements the Working Group had previously reached consensus, excluding the question of the nature of the final stage of the ODR process (arbitration/non-arbitration). It was also agreed that the Working Group would be given a time limit of one year or no more than two Working Group sessions, after which the work of the Working Group would come to an end, whether or not a result had been achieved.

6. A compilation of historical references regarding the consideration by the Commission of the work of the Working Group between 2000 and 2014 can be found in document A/CN.9/WG.III/WP.126, paragraphs 5-15.

II. Organization of the session

7. Working Group III (Online Dispute Resolution), which was composed of all States members of the Commission, held its thirty-third session in New York, from 29 February-4 March 2016. The session was attended by representatives of the following States members of the Working Group: Argentina, Armenia, Austria, Brazil, Bulgaria, Canada, China, Colombia, Czech Republic, Ecuador, El Salvador, Fiji, Germany, Greece, Honduras, Hungary, India, Indonesia, Israel, Italy, Japan, Mexico, Namibia, Pakistan, Philippines, Republic of Korea, Russian Federation, Singapore, Spain, Thailand, Turkey, United States of America and Venezuela (Bolivarian Republic of).

8. The session was also attended by observers from the following States: Egypt, Iraq, Libya, Netherlands, Romania, Saudi Arabia and Syrian Arab Republic.

9. The session was also attended by observers from the following Non-Member States and Entities: Holy See.

10. The session was also attended by observers from the European Union (EU).

11. The session was also attended by observers from the following intergovernmental organizations: World Intellectual Property Organization (WIPO).

12. The session was also attended by observers from the following non-governmental organizations: American Arbitration Association/International Centre for Dispute Resolution (AAA/ICDR), American Bar Association (ABA), Asia Pacific Regional Arbitration Group (APRAG), Centre de recherche en droit public (CRDP), Chartered Institute of Arbitrators (CIARB), China International Economic and Trade Arbitration Commission (CIETAC), China Society of Private International Law (CSPIL), European Law Students' Association (ELSA), Institute of International Commercial Law (Pace Law School) (IICL), International Technology Law Association (ITECHLAW), Internet Bar Organization (IBO), Jerusalem Arbitration Center (JAC), Law Association for Asia and the Pacific (LAWASIA), National Center for Information Technology and Dispute Resolution (NCITDR), New York State Bar Association (NYSBA).

13. The Working Group elected the following officers:

Chairman: Mr. Jeffrey Wah-Teck CHAN (Singapore)

Rapporteur: Mr. Isaias MEDINA (Venezuela)

---

[6] Ibid., *Sixty-eighth Session, Supplement No. 17* (A/68/17), para. 222.
[7] Ibid., *Sixty-ninth Session, Supplement No. 17* (A/69/17), para. 140.
[8] Ibid., *Seventieth Session, Supplement No. 17* (A/70/17), para. 352.

14. The Working Group had before it the following documents:

(a) Annotated provisional agenda (A/CN.9/WG.III/WP.139);

(b) A note by the Secretariat on a draft outcome document reflecting elements and principles of an ODR process (A/CN.9/WG.III/WP.140).

15. The Working Group adopted the following agenda:

1. Opening of the session.
2. Election of officers.
3. Adoption of the agenda.
4. Consideration of the note on a draft outcome document reflecting elements and principles of an ODR process.
5. Other business.
6. Adoption of the report.

III. Deliberations and decisions

16. The Working Group resumed its work on agenda item 4 on the basis of notes prepared by the Secretariat (A/CN.9/WG.III/WP.140). The deliberations and decisions of the Working Group with respect to this item are reflected in chapter IV.

IV. Draft non-binding descriptive document reflecting elements and principles of an ODR process

Consideration of A/CN.9/WG.III/WP.140

Title and Section I

17. The Working Group decided to defer discussion on the title of the proposed outcome document and proposals for "Section I — Introduction" until later in the session, and to address the other outstanding issues in A/CN.9/WG.III/WP.140 sequentially.

Section II — Principles

18. It was recalled that the section should group all relevant principles in a logical manner.

19. As regards the bracketed text in paragraph 16, the importance of confidentiality in ODR proceedings was recalled. It was noted, in that context, that the proceedings might take place in conflict and other sensitive situations, and that reaching a resolution might require the full frankness of the parties. It was consequently suggested that the square brackets should be deleted, so that the phrase in square brackets would be included in the outcome document.

20. A proposal to address the security of ODR proceedings in part of the outcome document was also made, noting that the ODR process was Internet-based and could be vulnerable to hacking. It was suggested, in this regard, to expand the bracketed text to read, "The ODR administrator and ODR platform should adopt and implement appropriate confidentiality and other measures to ensure the security of the ODR process". Support was expressed for the proposal, emphasizing the particular importance of security in the context of ODR.

21. It was agreed that the concepts of confidentiality and security were linked and raised important issues for an ODR process. Objection was made to raising new issues at this stage of the process, however, particularly given the need to conclude deliberations on the outcome document at this session.

22. It was added that the proposed sentence would not be appropriate under the subheading "expertise". It was also recalled that the draft outcome document itself expressly stated that

its contents were not intended to be exhaustive. For these reasons, it was proposed that the sentence in square brackets should be deleted. Support was expressed for this proposal.

23. The Working Group recalled its decision at its previous session not to address confidentiality in the outcome document (A/CN.9/862, para. 119). Some delegations queried whether the Working Group's decision was also that the outcome document should avoid mention of confidentiality entirely, as the Working Group had also agreed to bear in mind the importance of the issue of confidentiality in the outcome document. It was added that failing to mention confidentiality might indicate that confidentiality was not an important issue, contrary to the stated position of the Working Group.

24. It was recalled that the Working Group had previously agreed the importance of standards for security of data exchange for ODR providers (A/CN.9/862, para. 82), and that data security was an important element of "confidentiality". It was also stated that the notion of "confidentiality" extended beyond data security, and that there was no consensus on the scope of the term itself.

25. After further discussion, it was agreed that the text in square brackets would be deleted, and that the issue of data security would be addressed in paragraph 26 of the outcome document, to be discussed later in the session. As regards other aspects of confidentiality, it was noted that the question of information passing between the parties and the neutral was already addressed in paragraph 47(f) of the draft outcome document, and that a reference to "confidentiality" might be included in Section I of the document or elsewhere in Section II, a point that would be addressed at a later time in the session.

26. It was also agreed to replace the words "neutrals' decisions" in paragraph 16 with a reference to the neutral itself, as the standards concerned would also refer to the neutral's action and conduct.

27. It was observed that paragraph 17 of the draft outcome document currently appeared under the heading "Expertise", and it was proposed that it would be better introduced under an additional subheading, namely "Consent". This proposal was accepted.

28. As regards paragraph 10, it was proposed that the term "contractual" be deleted, so as to avoid unnecessarily limiting the scope of the paragraph. This proposal was accepted.

29. As regards paragraph 11, it was proposed that the term "anonymized" be deleted, as some systems allowed names to be disclosed (under, for example, "naming and shaming" mechanisms). In response, the Working Group was urged not to delete the term "anonymized", because, it was said, there would be a risk of inappropriate disclosure of information about the parties, their transactions and the dispute concerned. In this regard, it was proposed that permission to publish data and statistics should expressly be subject to applicable principles of confidentiality. There was support for these proposals taken together and also recalling the earlier statements of the Working Group on similar issues (see para. 77 of A/CN.9/716). It was agreed that the words "consistent with the applicable principles of confidentiality" should be added to paragraph 11.

30. An alternative formulation to refer to the consent of the parties did not gain support.

31. It was also added that the proposed addition to paragraph 11 could also be regarded as addressing the outstanding issues relating to confidentiality (see, further, paras. 19-25 above). In response, it was objected that the issue of confidentiality was of a broader nature than publishing data or statistics, and a more general statement of principle should be included in the outcome document.

32. It was also proposed that the term "decisions", which might be construed too narrowly, be replaced with the term "outcomes". This proposal was accepted.

Section III — Stages of an ODR Process

Paragraph 21

33. As regards the first bracketed text in paragraph 21, it was agreed that a reference to the possibility of a third and final stage would be appropriate at this point in the draft outcome document. It was therefore agreed to delete the square brackets and include the text in the final outcome document.

34. As regards the second bracketed text in paragraph 21, it was recalled that there was no consensus on the nature of the third and final stage, and that the text concerned might therefore exceed the mandate given to the Working Group. It was added that the first sentence alone might provide sufficient comment on that final stage.

35. It was recalled that the mandate excluded "the question of the nature of the final stage of the ODR process" (A/70/17, para. 352). Nonetheless, the Working Group had proceeded on the basis that there would or could be a final stage if facilitated settlement failed, and that it might take different forms. The deliberations of the Working Group on a proposal to include the language now found in the second bracketed text at the previous session (A/CN.9/862, paras. 120-127) were also recalled, noting that the Working Group had deferred its consideration thereof.

36. It was observed that the second bracketed text was linked with bracketed language in paragraphs 44 and 53 of the draft outcome document.

37. It was stated that, in the absence of a facilitated settlement at the end of the second stage, the nature of the process would effectively require the ODR administrator to advise the parties of any further options available to them. It was also suggested that the neutral might undertake this role.

38. As the nature of the final stage would not be addressed in the outcome document, it was suggested that the better action would be not to include the second bracketed text of paragraph 21 of the draft outcome document. On the other hand, it was noted that the outcome document would be incomplete without any mention of the point at issue, though the point might be better located elsewhere, it was added.

39. It was consequently proposed that the second bracketed text could be replaced with the phrase, "in which case the ODR administrator or neutral may inform the parties of the nature of such stage". The proposal received support.

40. It was suggested that the word "nature" required greater precision. In response, it was noted that the word "nature" in this context carried the same meaning as its use in paragraph 352 of A/70/17.

41. It was agreed that the second bracketed language would be deleted from paragraph 21, and that the additional language in paragraph 39 above would be inserted in its place.

Section IV — Scope of ODR Process

Paragraph 26

42. Further to the Working Group's consideration of data security issues earlier in the session (see, further, para. 20 above), it was agreed to add the words "in a manner that ensures data security" at the end of the penultimate sentence of paragraph 26.

Section VIII — Facilitated settlement

Paragraph 44

43. It was queried whether this paragraph should remain in the light of the Working Group's decision on paragraph 21 (see para. 41 above). It was observed, in response, that to include the paragraph would be consistent with the presentation of the first stage of the process as described in paragraphs 37 to 39 of the draft outcome document, and that the reference to "a reasonable time" in the paragraph was helpful in describing the end of this stage of the process. In light of these matters, it was decided to remove the square brackets and to include the bracketed language in the outcome document.

Section X — Paragraph 53 of the draft outcome document

44. It was stated that this paragraph was unnecessary in light of the Working Group's decisions on paragraphs 21 and 44 of the draft outcome document (see paras. 41 and 43 above). It was added that the inclusion of the paragraph would exceed the limited mandate that the Commission had given to this Working Group, in particular as there was no consensus on the possible process options for the final stage of the process. Support for these views was expressed.

45. An alternative view was that the outcome document would be incomplete without further reference to the final stage, so that the scope of the paragraph and its inclusion as a separate section would be appropriate. It was added that the mere mention of the third stage would not contradict the limited mandate of this Working Group, and that to do so would assist users in understanding the scope of the ODR process as a whole. Support for these views was also expressed.

46. In this regard, it was suggested that a description of the types of process that might comprise the final stage could also be included to ensure completeness, but that any such description should not indicate preferences among those processes or address their legal consequences.

47. It was also suggested that the point could be addressed at the end of Section VIII or as a new section after Section VIII, perhaps by including the substance of the text added to paragraph 21 earlier in the session (see para. 41 above). This suggestion also received support.

48. After discussion, it was agreed that an additional provision addressing the final stage of the process would be included in the outcome document, to be located as a new Section VIII bis.

49. As regards the text for such a provision, three possible formulations were proposed:

(a) "The ODR administrator may inform the parties of the nature of the final stage";

(b) "While not addressing here the nature of the final stage of the ODR process (arbitration/non-arbitration), if facilitated settlement fails, a third and final stage might commence, in which case the ODR administrator may inform the parties of the nature of the final stage";

(c) To retain the language in paragraph 53 without the final phrase, so that it would read "If the neutral has not succeeded in facilitating the settlement, it is desirable that the ODR administrator, on the basis of information submitted by the parties, remind the parties of, or set out for the parties, the possible process options for the final stage".

50. Support was expressed for elements of these proposals, and the need to avoid reopening discussion on the nature of the final stage was re-emphasized. It was agreed that the provision should be descriptive and informative for users.

51. After discussion, it was agreed that the provision would read as follows, "If the neutral has not succeeded in facilitating the settlement, it is desirable that the ODR administrator or neutral informs the parties of the nature of the final stage, and of the form that it might take." In consequence, it was agreed that paragraph 53 and its introductory heading would be deleted from the draft outcome document. It was also agreed that the subtitle for the section would be "Final Stage".

Section I — Introduction

General remarks

52. The Working Group recalled that it had deferred its consideration of the two formulations for this Section to this session, and agreed to consider the individual parts of the two formulations together, as denoted by the subheadings in each formulation.

53. The first issue raised was the sequencing of the three parts of the Section. It was noted that the first formulation followed UNCITRAL's Notes on Organization of Arbitral Proceedings, and so could be retained; another view was that the second formulation would be more logical in the context of the ODR outcome document, and as the title of the document had yet to be finalized.

54. Following informal consultations, it was agreed that the Working Group would proceed to discuss the draft introduction on the basis of the second formulation as set out in document A/CN.9/WG.III/WP.140.

55. It was noted that reference was made to the title of the outcome document in several places in the draft introduction, and that the title remained to be agreed.

Section I — Overview of ODR

56. The subtitle "Overview of ODR" and the language of paragraph 1 of the second formulation were agreed.

57. It was proposed that an additional sentence be included after the first sentence of paragraph 2 of the second formulation, as follows: "Online dispute resolution is a mechanism for resolving disputes through which the full range of traditional forms of dispute resolution (including but not limited to negotiations, mediation, conciliation, arbitration, adjudication and expert determination) where applicable, are facilitated by the use of electronic communications, other information and communication technology".

58. There was support for the inclusion of some additional text in the paragraph.

59. Alternative formulations for the phrase "the full range of traditional forms of dispute resolution options", were also proposed, including that the words "the full range" be replaced with "a broad range", to refer to "modern" as well as to "traditional" forms and to refer to "dispute resolution", without qualification.

60. It was said that users of the outcome document, and particularly consumers in developing countries, would benefit from a brief description of the possible range of forms of ODR, as provided by the bracketed language.

61. It was also observed that ODR could encompass non-traditional forms of dispute resolution in addition to those described, and that the field was a developing one. It was therefore queried whether the proposed list was sufficiently comprehensive and would stand the test of time. In response, the non-exclusive nature of the list was emphasized, and it was said that the broad reference to electronic communications and other technologies would allow for developments in ODR.

62. A further view was that if the illustrative list in bracketed text included forms of ODR that were not mentioned or explained in the remainder of the outcome document, the result might be confusing, particularly for consumers. It was added that removing the list would by implication operate to include all possible forms of ODR. For these reasons, it was stated that the bracketed text should not be included.

63. On the other hand, support was expressed in favour of the inclusion of an illustrative list such as that in the bracketed text. There were proposals for additional forms of ODR to feature in such a list, including "ombudsmen", "complaints boards", and "conciliation". An additional view was that such a list should also include newer forms of ODR, such as blind bidding, reputational systems, consumer complaint systems and credit-card charge-backs.

64. A further proposal was to replace the proposed additional sentence with the following text, to be included after the word "approaches" in the second sentence: "and forms (including but not limited to negotiation, mediation, conciliation, arbitration, adjudication and expert determination)". It was also stated that this formulation, combined with the existing reference to "hybrid processes" in paragraph 2, would also encompass all relevant forms of communications and technologies. In response, it was added that an additional reference to a "broad range" or "full range" of forms would enhance the understanding of the user. Support for these two proposals, taken together, was expressed.

65. After consultation, it was proposed that the second sentence of paragraph 2 be amended to read as follows, "ODR encompasses a broad range of approaches and forms (including but not limited to conciliation, mediation, arbitration, ombudsmen, complaints boards, and others), including the potential for hybrid processes including both online and offline elements."

66. After further discussion, the prevailing view was that an illustrative list would be included in the revised second sentence of paragraph 2.

67. It was proposed that the illustrative list should include, in addition to the forms of ODR set out in paragraph 64 above, the terms "negotiation" and "facilitated settlement", as these forms were addressed in the draft outcome document. Support was expressed for this proposal.

68. It was also proposed that additional forms, such as those set out in paragraph 63 above, be included in the illustrative list. In response, it was queried whether all the forms enumerated were in fact forms of ODR, and it was added that inclusion of all the forms might make the list excessively long. Including such terms, it was also said, might be confusing for the user, particularly if the list did not distinguish between forms of ODR that were and were not addressed in the outcome document.

69. A further proposal to insert the words "modern" and "traditional" before the word "approaches", and to include the term "expert determination", did not gain support.

70. After discussion, it was decided that the forms "negotiation" and "facilitated settlement" would be added to those set out in paragraph 65 above. It was agreed that the illustrative list as it appeared in the outcome document would therefore comprise the forms of ODR set out in paragraph 65 above, together with the forms "negotiation" and "facilitated settlement". The Secretariat was instructed to insert the latter two forms at appropriate places in the illustrative list.

71. It was also proposed that the word "secure" be added in the first sentence of paragraph 2, so as to reflect the Working Group's decision to address data security in the draft outcome document made earlier in the session. Support was expressed for this proposal. Another view was that it was not necessary to add language in paragraph 2 as the matter was appropriately addressed elsewhere, and that the focus of this paragraph was different. It was decided to include the word "secure" as proposed.

Section I — Purpose of the Technical Notes

Paragraph 4

72. It was proposed that the word "confidentiality" be included in the paragraph, after the word "fairness".

73. The discussion of confidentiality earlier in the session was recalled, and it was stated that the matter had been addressed in the revisions to paragraphs 11 and 26 of the draft outcome document (see paras. 29 and 42 above). It was added that including the words "confidentiality" and "transparency" in the same paragraph would be confusing.

74. An alternative approach, it was suggested, would be to replace the words "due process standards" in paragraph 52 of the draft outcome document with the phrase "standards of confidentiality and due process". This proposal received support.

75. It was agreed to address the issue of confidentiality, as proposed, in paragraph 52, and consequently that paragraph 4 in the outcome document would remain as set out in the second formulation.

Conclusions as regards Section 1 — Introduction of the outcome document

76. There being no proposals to amend the subsection of the second formulation entitled "Non-binding Character of the Technical Notes" or to amend the proposed additional text in the second formulation, it was agreed to include the second formulation, as amended in paragraphs 70, 71 and 75 above, as the Introduction to the outcome document.

Title of the outcome document

77. It was proposed that the term "Guidelines" in the subheading of the introduction would be more accessible to potential users, and should be used as the title for the outcome document. Support was expressed for that proposal.

78. An alternative proposal was that the term should be "Technical Notes". It was said that this term had appeared in an earlier iteration of the draft outcome document, and better reflected the mandate of the Working Group. It was also stated that the term "Technical Notes" would avoid confusion with the different scope of other UNCITRAL texts including the word "Guide" in their title. It was added that there was no UNCITRAL document entitled "Guidelines", and that the term "Notes" had been used in another UNCITRAL text, the "UNCITRAL Notes on Organizing Arbitral Proceedings", whose scope, it was said, was similar to that of the draft outcome document. It was also observed that the term "Technical

Notes" would avoid any implication that the outcome document might include prescriptive rules. Support was also expressed for this proposal.

79. In addition, it was said that the use of the title "Technical Notes" in Chinese might lead to misunderstanding, in that there was no literal translation of the term in Chinese that would carry the intended meaning of "Technical Notes". While the use of the term "Technical Notes" might accurately reflect the contents of the outcome document in the English version, it was stated that the term "技术指引" should be used in the Chinese language version, so as to convey accurately the intended meaning of the title and content of the outcome document. It was also stated that the scope and intended use of the "UNCITRAL Notes on Organizing Arbitral Proceedings" were different from the draft outcome document.

80. The prevailing view was in favour of the use of the term "Technical Notes", and so that the outcome document would be entitled "Technical Notes on Online Dispute Resolution".

81. After hearing a concern that the term "Technical Notes" in Russian would also not convey that the outcome document included issues with a legal context, the Secretariat was instructed to ensure that the appropriate scope and meaning of the outcome document was reflected in the title of that document in all official languages.

82. It was confirmed that the outcome document would be entitled "Technical Notes on ODR", subject to the questions of language noted in paragraphs 79 and 81 above.

Final reading of the draft outcome document

83. The Working Group proceeded to conduct a final review of the draft outcome document. No further comments were made, other than as regards Section X — Language (paragraph 50 of the draft outcome document).

84. It was proposed that the phrase "it is desirable that the ODR administrator provide the ODR process in a language that the users can understand" be added in paragraph 50 of the outcome document, to replace the final phrase of the paragraph or as additional text elsewhere in the paragraph. The proposal received support.

85. Another view was that earlier discussions on the language provisions in the Working Group had not reached consensus on elements other than those set out in paragraph 50 of A/CN.9/WG.III/WP.140. It was added that an ODR system might also not be able to accommodate all languages. For these reasons, objection to the proposal was made.

86. After discussion, it was agreed that paragraph 50 would remain as set out in A/CN.9/WG.III/WP.140.

87. The Working Group agreed that the draft outcome document would be submitted to the Commission in the form set out in A/CN.9/WG.III/WP.140 as revised in the course of this session.

F. Note by the Secretariat on online dispute resolution for cross-border electronic commerce transactions: draft outcome document reflecting elements and principles of an ODR process

(A/CN.9/WG.III/WP.140)

[Original: English]

Contents

I. Introduction

1. At the Commission's forty-eighth session (Vienna, 29 June-16 July 2015), it was agreed that any future text should build upon the progress achieved in the context of prior Working Group sessions and the Commission instructed Working Group III to continue its work towards elaborating a non-binding descriptive document reflecting elements of an ODR process, on which elements the Working Group had previously reached consensus, excluding the question of the nature of the final stage of the ODR process.[1]

2. At its thirty-second session, the Working Group discussed a draft outcome document on the basis of several proposals made at that session.[2] Several proposals for specific parts or provisions of the outcome document remained to be discussed, and it was agreed to defer the consideration thereof to the next session.[3] It was also agreed, at the 32nd session, that the Working Group would finalize the draft outcome document at the next session.

3. This note consequently sets out the draft outcome document reflecting elements and principles of an ODR process as it stood at the end of the 32nd session. It also sets out outstanding issues to be further considered by the Working Group at its 33rd session.

II. Draft outcome document

4. At the 32nd session of the Working Group, it was agreed that the draft outcome document would contain nine sections as set out below. A proposed tenth section which appears at the end of the note between square brackets also remains to be discussed. Similarly, in each relevant section, the specific provisions which are identified as outstanding issues appear thereafter in square brackets.

5. It was also agreed that the eventual outcome document would commence with an introductory section. Two proposals for an introductory text were made and both are first reproduced below.

[2] Report of the Working Group III, (Vienna, 30 November-4 December 2015), A/CN.9/862, paras. 15-19.

[3] Report of the Working Group III, (Vienna, 30 November-4 December 2015), A/CN.9/862, paras. 19, 30, 36, 127 and 129, in particular as regards the title of the document, the introductory text, items 18, 22, 42bis and section IX bis (now paras. 16, 21, 44 and draft Section X).

"**[Technical Notes on Online Dispute Resolution]**[4]

Section I — Introduction"

First formulation:[5]

"**[Purpose of Technical Notes**

1. The purpose of the Technical Notes is to foster the development of ODR as a form of dispute resolution by assisting the participants in an Online Dispute Resolution (ODR) system in the conduct of ODR proceedings.

2. The Technical Notes apply to the online resolution of disputes arising from cross-border low-value sales or service contracts concluded using electronic communications. Given that procedural styles and practices in ODR proceedings vary widely, the Technical Notes are intended to be of assistance regardless of the structure or framework of an ODR system.

3. The Technical Notes are intended to assist the full range of potential participants in an ODR system, including ODR administrators, ODR platforms, neutrals, and the parties to the dispute.

4. The Technical Notes reflect approaches to ODR systems that reflect principles of fairness, due process, transparency and accountability that are essential to any ODR system, but they are not intended to be an exhaustive or exclusive summary of approaches that incorporate such principles. The Technical Notes do not promote any practice of ODR as best practice.

Non-binding Character of the Technical Notes

5. The Technical Notes do not impose any legal requirement binding on the parties or any persons and/or entities administering or facilitating an ODR proceeding.

6. The Technical Notes are not suitable to be used as rules for any ODR proceeding, since they are only of a descriptive nature and do not establish any obligation on the parties or on persons and/or entities administering or facilitating an ODR proceeding to act in a particular manner. Accordingly, the use of the Technical Notes does not imply any modification to any ODR rules that the parties may have selected.

Overview of ODR

7. In tandem with the sharp increase of cross-border transactions concluded via the Internet, there has been extensive discussion regarding the use of information and communication technology tools for resolving disputes which arise from such online transactions.

8. One such tool is online dispute resolution ("ODR"), which has emerged as having the potential to provide a simple, fast, flexible and effective option for the resolution of such disputes, in particular when they relate to low-value transactions. ODR encompasses a broad range of approaches, including the potential for hybrid processes including both online and offline elements. ODR systems can be designed to facilitate communications in an efficient and user-friendly manner, in order to obtain an outcome without the need for physical presence at a meeting or hearing. ODR can provide a more cost-effective alternative to traditional approaches, the latter of which in some cases may be overly complex, costly and time-consuming in light of the nature and value of the dispute. As such, ODR represents significant opportunities for access to dispute resolution by buyers and sellers concluding cross-border commercial transactions, both in the developed and developing world.]"

---

[4] Ibid., para. 19.

[5] The first formulation was contained in the Colombia/USA proposal (referred to as the "Proposal" in A/CN.9/862) and was agreed on a preliminary basis at the beginning of the 32nd session of the Working Group. See A/CN.9/862, paras. 19 and 20.

Second formulation:[6]

"[Overview of ODR

1. In tandem with the sharp increase of online cross-border transactions, there has been a need for mechanisms for resolving disputes which arise from such transactions.

2. One such mechanism is online dispute resolution ("ODR"), which can assist the parties in resolving the dispute in a simple, fast, and flexible manner, without the need for physical presence at a meeting or hearing. ODR encompasses a broad range of approaches, including the potential for hybrid processes including both online and offline elements. As such, ODR represents significant opportunities for access to dispute resolution by buyers and sellers concluding cross-border commercial transactions, both in developed and developing countries.

Purpose of the Technical Notes [/Guidelines]

3. The purpose of the Technical Notes [/Guidelines] is to foster the development of ODR and to assist ODR administrators, ODR platforms, neutrals, and the parties to ODR proceedings.

4. The Technical Notes [/Guidelines] reflect approaches to ODR systems that embody principles of impartiality, independence, efficiency, effectiveness, due process, fairness, accountability and transparency.

5. The Technical Notes [/Guidelines] are intended for use in disputes arising from cross-border low-value sales or service contracts concluded using electronic communications. They do not promote any practice of ODR as best practice.

Non-binding nature of the Technical Notes [/Guidelines]

6. The Technical Notes [/Guidelines] are a descriptive document. They are not intended to be exhaustive or exclusive, nor are they suitable to be used as rules for any ODR proceeding. They do not impose any legal requirement binding on the parties or any persons and/or entities administering or facilitating an ODR proceeding, and do not imply any modification to any ODR rules that the parties may have selected.]"

Additional proposed paragraph:

"[These Technical Notes do not supplant or override applicable law]"[7]

"Section II — Principles[8]

7. The principles that underpin any ODR process include fairness, transparency, due process and accountability.[9]

8. ODR may assist in addressing a situation arising out of cross-border e-commerce transactions, namely the fact that traditional judicial mechanisms for legal recourse may not offer an adequate solution for cross-border e-commerce disputes.

9. ODR ought to be simple, fast and efficient, in order to be able to be used in a "real world setting", including that it should not impose costs, delays and burdens that are disproportionate to the economic value at stake.

---

[6] Report of the Working Group III, (Vienna, 30 November-4 December 2015), A/CN.9/862, paras. 25 and 128.

[7] Ibid., para. 103.

[8] For ease of reference, the numbering of the remainder of the draft outcome document follows on from the end of the second formulation of the introductory section.

[9] Report of the Working Group III, (Vienna, 30 November-4 December 2015), A/CN.9/862, para. 27.

Transparency

10. It is desirable to disclose any contractual relationship between the ODR administrator and a particular vendor, so that users of the service are informed of potential conflicts of interest.

11. The ODR administrator may wish to publish anonymized data or statistics on its decisions, in order to enable parties to assess its overall record.

12. All relevant information should be available on the ODR administrator's website in a user-friendly and accessible manner.

Independence

13. It is desirable for the ODR administrator to adopt a code of ethics for its neutrals, in order to guide neutrals as to conflicts of interest and other rules of conduct.

14. It is useful for the ODR administrator to adopt policies dealing with identifying and handling conflicts of interest.

Expertise

15. The ODR administrator may wish to implement comprehensive policies governing selection and training of neutrals.

16. An internal oversight/quality assurance process may help the ODR administrator to ensure that neutrals' decisions conform with the standards it has set for itself. [The ODR administrator should adopt and implement appropriate confidentiality measures.][10]

17. The ODR process should be based on the explicit and informed consent of the parties.

Section III — Stages of an ODR Process

18. The process of an online dispute resolution proceeding may consist of stages including: negotiation; facilitated settlement; and a third (final) stage.

19. The ODR process may commence when a claimant submits a notice of claim through the ODR platform to the ODR administrator. The ODR administrator informs the respondent of the existence of the claim and the claimant of the response. The first stage of proceedings — a technology-enabled negotiation — commences, in which the claimant and respondent negotiate directly with one another through the ODR platform.

20. If that negotiation process fails (i.e. does not result in a settlement of the claim), the process may move to a second, "facilitated settlement" stage (see paragraphs 40-44 below). In that stage of proceedings, the ODR administrator appoints a neutral (see para. 25 below), who communicates with the parties in an attempt to reach a settlement.[11]

[21. If facilitated settlement fails, a third and final stage of proceedings might commence.][12] [In that stage of proceeding, the ODR administrator may remind the parties, or set out for the parties, possible process options to choose.][13]

Section IV — Scope of ODR Process

22. An ODR process may be particularly useful for disputes arising out of cross-border, low-value e-commerce transactions. An ODR process may apply to disputes arising out of both a business-to-business as well as business-to-consumer transactions.

23. An ODR process may apply to disputes arising out of both sales and service contracts.

Section V — ODR Definitions, Roles and Responsibilities, and Communications

24. Online dispute resolution, or "ODR", is a "mechanism for resolving disputes through the use of electronic communications and other information and communication

[10] Ibid., para. 30.
[11] Ibid., para. 35.
[12] Ibid., para. 36.
[13] Ibid., para. 120 and 123-125.

technology". The process may be implemented differently by different administrators of the process, and may evolve over time.

25. As used herein a "claimant" is the party initiating ODR proceedings and the "respondent" the party to whom the notice of proceedings is directed, in line with traditional, offline, alternative dispute resolution nomenclature. A neutral is an individual that assists the parties in settling or resolving the dispute.[14]

26. ODR requires a technology-based intermediary. In other words, unlike offline alternative dispute resolution, an ODR process cannot be conducted on an ad hoc basis involving only the parties to a dispute and a neutral adjudicator (that is, without an administrator). Instead, to permit the use of technology to enable[15] a dispute resolution process, an ODR process requires a system for generating, sending, receiving, storing, exchanging or otherwise processing communications. Such a system is referred to herein as an "ODR platform".

27. An ODR platform should be administered and coordinated. The entity that carries out such administration and coordination is referred to herein as the "ODR administrator". The ODR administrator may be separate from or part of the ODR platform.

28. In order to enable ODR communications, it is desirable that both the ODR administrator and the ODR platform be specified in the dispute resolution clause.

29. The communications that may take place during the course of proceedings have been defined as "any communication (including a statement, declaration, demand, notice, response, submission, notification or request) made by means of information generated, sent, received or stored by electronic, magnetic, optical or similar means."

30. It is desirable that all communications in ODR proceedings take place via the ODR platform. Consequently, both the parties to the dispute, and the ODR platform itself, should have a designated "electronic address". The term "electronic address" is defined in other UNCITRAL texts.[16]

31. To enhance efficiency it is desirable that the ODR administrator promptly:

(a) Acknowledge receipt of any communication by the ODR platform;

(b) Notify parties of the availability of any communication received by the ODR platform; and

(c) Keep the parties informed of the commencement and conclusion of different stages of the proceedings.

32. In order to avoid loss of time, it is desirable that a communication be deemed to be received by a party when the administrator notifies that party of its availability on the platform; deadlines in the proceedings would run from the time the administrator has made that notification. At the same time, it is desirable that, the ODR administrator be empowered to extend deadlines, in order to allow for some flexibility when appropriate.

Section VI — Commencement of ODR proceedings

33. In order to commence an ODR proceeding, it is desirable that the claimant provide to the ODR administrator a notice containing the following information:

(a) The name and electronic address of the claimant and of the claimant's representative (if any) authorized to act for the claimant in the ODR proceedings;

(b) The name and electronic address of the respondent and of the respondent's representative (if any) known to the claimant;

(c) The grounds on which the claim is made;

(d) Any solutions proposed to resolve the dispute;

---

[14] See footnote 11.

[15] Report of the Working Group III, (Vienna, 30 November-4 December 2015), A/CN.9/862, para. 42.

[16] The outcome document will cross refer to those texts.

(e) The claimant's preferred language of proceedings; and

(f) The signature or other means of identification and authentication of the claimant and/or the claimant's representative.

34. ODR proceedings may be deemed to have commenced when, following a claimant's communication of a notice to the ODR administrator, the ODR administrator notifies the parties that the notice is available at the ODR platform.[17]

35. It is desirable that the respondent communicate its response to the ODR administrator within a reasonable time of being notified of the availability of the claimant's notice on the ODR platform, and that the response include the following elements:

(a) The name and electronic address of the respondent and the respondent's representative (if any) authorized to act for the respondent in the ODR proceedings;

(b) A response to the grounds on which the claim is made;

(c) Any solutions proposed to resolve the dispute;

(d) The signature or other means of identification and authentication of the respondent and/or the respondent's representative; and

(e) Notice of any counterclaim containing the grounds on which the counterclaim is made.

36. As much as is possible, it is desirable that both the notice of claim and response be accompanied by all documents and other evidence relied upon by each party, or contain references to them. In addition, to the extent that a claimant is pursuing any other legal remedies, it is desirable that such information also be provided with the notice.

Section VII — Negotiation

37. The first stage may be a negotiation, conducted between the parties via the ODR platform.

38. The first stage of proceedings may commence following the communication of the respondent's response to the ODR platform and:

(a) Notification thereof to the claimant; or

(b) Failing a response, the lapse of a reasonable period of time after the notice has been communicated to the respondent.

39. It is desirable that, if the negotiation does not result in a settlement within a reasonable period of time, the process proceed to the next stage.

Section VIII — Facilitated settlement

40. The second stage of ODR proceedings may be facilitated settlement, whereby a neutral is appointed and communicates with the parties to try to achieve a settlement.

41. That stage may commence if negotiation via the platform fails for any reason (including non-participation or failure to reach a settlement within a reasonable period of time), or where one or both parties to the dispute request to move directly to the next stage of proceedings.

42. Upon commencement of the facilitated settlement stage of proceedings, it is desirable that the ODR administrator appoint a neutral, and notify the parties of that appointment, and provide certain details about the identity of the neutral.

43. In the facilitated settlement stage, it is desirable that the neutral communicate with the parties to try to achieve a settlement.

[17] Report of the Working Group III, (Vienna, 30 November-4 December 2015), A/CN.9/862, para. 57.

[44. If a facilitated settlement cannot be achieved within a reasonable period of time, the process may move to a final stage.][18]

Section IX — Appointment, powers and functions of the neutral

45. To enhance efficiency and reduce costs, it is preferable that the ODR administrator appoint a neutral only when a neutral is required for a dispute resolution process in accordance with any applicable ODR rules.[19] At the point in an ODR proceeding at which a neutral is required for the dispute resolution process, it is desirable that the ODR administrator "promptly" appoint the neutral (i.e., generally at the commencement of the facilitated settlement stage of proceedings). Upon appointment, it is desirable that the ODR administrator promptly notify the parties of the name of the neutral and any other relevant or identifying information in relation to that neutral.

46. It is desirable that neutrals have the relevant professional experience as well as dispute resolution skills to enable them to deal with the dispute in question. However, subject to any professional regulation, ODR neutrals need not necessarily be qualified lawyers.

47. With regard to the appointment and functions of neutrals, the following are desirable that:

(a) The neutral's acceptance of his or her appointment operates to confirm that he or she has the time necessary to devote to the process;

(b) The neutral be required to declare his or her impartiality and independence and disclose at any time any facts or circumstances that might give rise to likely doubts as to his or her impartiality or independence;

(c) The ODR system provides parties with a method for objecting to the appointment of a neutral;

(d) In the event of an objection to an appointment of a neutral, the ODR administrator be required to make a determination as to whether the neutral shall be replaced;

(e) There be only one neutral per dispute appointed at any time for reasons of cost efficiency;

(f) A party be entitled to object to the neutral receiving information generated during the negotiation period; and

(g) If the neutral resigns or has to be replaced during the course of the ODR proceedings, the ODR administrator be required to appoint a replacement, subject to the same safeguards as set out during the appointment of the initial neutral.

48. In respect of the powers of the neutral, it is desirable that:

(a) Subject to any applicable ODR rules,[20] the neutral be enabled to conduct the ODR proceedings in such a manner as he or she considers appropriate;

(b) The neutral be required to avoid unnecessary delay or expense in the conduct of the proceedings;

(c) The neutral be required to provide a fair and efficient process for resolving disputes;

(d) The neutral be required to remain independent, impartial and treat both parties equally throughout the proceedings;

(e) The neutral be required to conduct proceedings based on such communications as are before the neutral during the proceedings;

(f) The neutral be enabled to allow the parties to provide additional information in relation to the proceedings; and

---

[18] Ibid., para. 84.

[19] Ibid., paras. 87 and 109. For consistency, the same expression is used in paragraphs 45 and 48 of the draft outcome document.

[20] Ibid., paras. 87 and 109. For consistency, the same expression is used in paragraphs 45 and 48 of the draft outcome document.

(g) The neutral be enabled to extend any deadlines set out in any applicable ODR rules for a reasonable time.

49. While the process for appointment of a neutral for an ODR process is subject to the same due process standards that apply to that process in an offline context, it may be desirable to use streamlined appointment and challenge procedures in order to address the need for ODR to provide a simple, time-, and cost-effective alternative to traditional approaches to dispute resolution.

Section X — Language

50. Technology tools available in ODR can offer a great deal of flexibility regarding the language used for the proceeding. Even where an ODR agreement or ODR rules specify a language to be used in proceedings, it is desirable that a party to the proceedings be able to indicate in the notice or response whether it wishes to proceed in a different language, so that the ODR administrator can identify other language options that the parties may select.

Section XI — Governance

51. It is desirable for guidelines (and/or minimum requirements) to exist in relation to the conduct of ODR platforms and administrators.

52. It is desirable that ODR proceedings be subject to the same due process standards that apply to that process in an offline context, in particular independence, neutrality and impartiality.

[Section X — …

53. If the neutral has not succeeded in facilitating the settlement, it is desirable that the ODR administrator, on the basis of information submitted by the parties, remind the parties of, or set out for the parties, the possible process options of final stage, and ensure that the parties are aware of the legal consequences of the choice of the process.]"[21]

G. Note by the Secretariat on online dispute resolution for cross-border electronic commerce transactions: Technical Notes on Online Dispute Resolution

(A/CN.9/888)

[Original: English]

Contents

I. Introduction

1. At its forty-third session (New York, 21 June-9 July 2010), the Commission agreed that a Working Group should be established to undertake work in the field of online dispute resolution relating to cross-border electronic commerce transactions.

2. At its forty-fourth session (Vienna, 27 June-8 July 2011), the Commission confirmed that the work should include B2B and B2C transactions,[1] and should take account of issues of consumer protection.[2]

3. At its forty-fifth session (New York, 25 June-6 July 2012), the Commission agreed that the Working Group should also consider how the draft rules would respond to the needs of developing countries and those facing post-conflict situations.[3] The Commission also requested the Working Group to continue to explore a range of means of ensuring that online dispute resolution outcomes were effectively implemented, including arbitration and possible alternatives to arbitration.[4]

4. At its forty-eighth session (Vienna, 29 June-16 July 2015),[5] the Commission instructed Working Group III to elaborate a non-binding descriptive document reflecting elements of an online dispute resolution process, on which elements the Working Group had previously reached consensus, excluding the question of the nature of the final stage of the online dispute resolution process (arbitration/non-arbitration). It was also agreed that this work should not extend beyond two further Working Group sessions.

5. The Working Group continued its deliberations on a draft text entitled "Technical Notes on Online Dispute Resolution", in accordance with the Commission's instructions, at its thirty-second and thirty-third sessions (Vienna, 30 November-4 December 2015 and New York, 29 February-4 March 2016),[6] and has completed its consideration thereof.

6. This note contains the "Technical Notes on Online Dispute Resolution" which the Working Group submits to the Commission for its consideration and possible adoption (A/CN.9/868, para. 87).

II. Technical Notes on Online Dispute Resolution

Section I — Introduction

Overview of online dispute resolution

1. In tandem with the sharp increase of online cross-border transactions, there has been a need for mechanisms for resolving disputes which arise from such transactions.

---

[1] *Official Records of the General Assembly, Sixty-sixth Session, Supplement No. 17* (A/66/17), para. 218.

[2] Ibid.

[3] Ibid.

[4] Ibid.

[5] Ibid., *Seventieth Session, Supplement No. 17* (A/70/17), para. 352.

[6] A/CN.9/862 and A/CN.9/868.

2. One such mechanism is online dispute resolution ("ODR"), which can assist the parties in resolving the dispute in a simple, fast, flexible and secure manner, without the need for physical presence at a meeting or hearing. ODR encompasses a broad range of approaches and forms (including but not limited to ombudsmen, complaints boards, negotiation, conciliation, mediation, facilitated settlement, arbitration and others),[7] and the potential for hybrid processes comprising both online and offline elements. As such, ODR represents significant opportunities for access to dispute resolution by buyers and sellers concluding cross-border commercial transactions, both in developed and developing countries.

Purpose of the Technical Notes

3. The purpose of the Technical Notes is to foster the development of ODR and to assist ODR administrators, ODR platforms, neutrals, and the parties to ODR proceedings.

4. The Technical Notes reflect approaches to ODR systems that embody principles of impartiality, independence, efficiency, effectiveness, due process, fairness, accountability and transparency.

5. The Technical Notes are intended for use in disputes arising from cross-border low-value sales or service contracts concluded using electronic communications. They do not promote any practice of ODR as best practice.

Non-binding nature of the Technical Notes

6. The Technical Notes are a descriptive document. They are not intended to be exhaustive or exclusive, nor are they suitable to be used as rules for any ODR proceeding. They do not impose any legal requirement binding on the parties or any persons and/or entities administering or enabling an ODR proceeding, and do not imply any modification to any ODR rules that the parties may have selected.

Section II — Principles

7. The principles that underpin any ODR process include fairness, transparency, due process and accountability.

8. ODR may assist in addressing a situation arising out of cross-border e-commerce transactions, namely the fact that traditional judicial mechanisms for legal recourse may not offer an adequate solution for cross-border e-commerce disputes.

9. ODR ought to be simple, fast and efficient, in order to be able to be used in a "real world setting", including that it should not impose costs, delays and burdens that are disproportionate to the economic value at stake.

Transparency

10. It is desirable to disclose any relationship between the ODR administrator and a particular vendor, so that users of the service are informed of potential conflicts of interest.

11. The ODR administrator may wish to publish anonymized data or statistics on outcomes in ODR processes, in order to enable parties to assess its overall record, consistent with applicable principles of confidentiality.

12. All relevant information should be available on the ODR administrator's website in a user-friendly and accessible manner.

[7] The order of the list of approaches or forms in brackets is presented in increasing order of formality, reflecting the approach taken in the description of commonly-used, methods for settling disputes contained in UNCITRAL's Legislative Guide on Privately Financed Infrastructure Projects (2000), available at www.uncitral.org/uncitral/uncitral_texts/procurement_infrastructure.html. Furthermore, the terms are illustrative only, relative formality may vary from system to system, and relevant processes in some jurisdictions may be known by more than one of the terms contained in the list itself.

Independence

13. It is desirable for the ODR administrator to adopt a code of ethics for its neutrals, in order to guide neutrals as to conflicts of interest and other rules of conduct.

14. It is useful for the ODR administrator to adopt policies dealing with identifying and handling conflicts of interest.

Expertise

15. The ODR administrator may wish to implement comprehensive policies governing selection and training of neutrals.

16. An internal oversight/quality assurance process may help the ODR administrator to ensure that a neutral conforms with the standards it has set for itself.

Consent

17. The ODR process should be based on the explicit and informed consent of the parties.

Section III — Stages of an ODR Proceeding

18. The process of an ODR proceeding may consist of stages including: negotiation; facilitated settlement; and a third (final) stage.

19. The ODR proceeding may commence when a claimant submits a notice through the ODR platform to the ODR administrator (see section VI below). The ODR administrator informs the respondent of the existence of the claim and the claimant of the response. The first stage of proceedings — a technology-enabled negotiation — commences, in which the claimant and respondent negotiate directly with one another through the ODR platform.

20. If that negotiation process fails (i.e. does not result in a settlement of the claim), the process may move to a second, "facilitated settlement" stage (see paras. 40-44 below). In that stage of ODR proceedings, the ODR administrator appoints a neutral (see para. 25 below), who communicates with the parties in an attempt to reach a settlement.

21. If facilitated settlement fails, a third and final stage of ODR proceedings may commence, in which case the ODR administrator or neutral may inform the parties of the nature of such stage.

Section IV — Scope of ODR Process

22. An ODR process may be particularly useful for disputes arising out of cross-border, low-value e-commerce transactions. An ODR process may apply to disputes arising out of both a business-to-business as well as business-to-consumer transactions.

23. An ODR process may apply to disputes arising out of both sales and service contracts.

Section V — ODR Definitions, Roles and Responsibilities, and Communications

24. Online dispute resolution, or "ODR", is a "mechanism for resolving disputes through the use of electronic communications and other information and communication technology". The process may be implemented differently by different administrators of the process, and may evolve over time.

25. As used herein a "claimant" is the party initiating ODR proceedings and the "respondent" the party to whom the claimant's notice is directed, in line with traditional, offline, alternative dispute resolution nomenclature. A neutral is an individual that assists the parties in settling or resolving the dispute.

26. ODR requires a technology-based intermediary. In other words, unlike offline alternative dispute resolution, an ODR proceeding cannot be conducted on an ad hoc basis

involving only the parties to a dispute and a neutral (that is, without an administrator). Instead, to permit the use of technology to enable a dispute resolution process, an ODR process requires a system for generating, sending, receiving, storing, exchanging or otherwise processing communications in a manner that ensures data security. Such a system is referred to herein as an "ODR platform".

27. An ODR platform should be administered and coordinated. The entity that carries out such administration and coordination is referred to herein as the "ODR administrator". The ODR administrator may be separate from or part of the ODR platform.

28. In order to enable ODR communications, it is desirable that both the ODR administrator and the ODR platform be specified in the dispute resolution clause.

29. The communications that may take place during the course of proceedings have been defined as "any communication (including a statement, declaration, demand, notice, response, submission, notification or request) made by means of information generated, sent, received or stored by electronic, magnetic, optical or similar means."

30. It is desirable that all communications in ODR proceedings take place via the ODR platform. Consequently, both the parties to the dispute, and the ODR platform itself, should have a designated "electronic address". The term "electronic address" is defined in other UNCITRAL texts.

31. To enhance efficiency it is desirable that the ODR administrator promptly:

(a) Acknowledge receipt of any communication by the ODR platform;

(b) Notify parties of the availability of any communication received by the ODR platform; and

(c) Keep the parties informed of the commencement and conclusion of different stages of the proceedings.

32. In order to avoid loss of time, it is desirable that a communication be deemed to be received by a party when the administrator notifies that party of its availability on the platform; deadlines in the proceedings would run from the time the administrator has made that notification. At the same time, it is desirable that the ODR administrator be empowered to extend deadlines, in order to allow for some flexibility when appropriate.

Section VI — Commencement of ODR proceedings

33. In order to commence an ODR proceeding, it is desirable that the claimant provide to the ODR administrator a notice containing the following information:

(a) The name and electronic address of the claimant and of the claimant's representative (if any) authorized to act for the claimant in the ODR proceedings;

(b) The name and electronic address of the respondent and of the respondent's representative (if any) known to the claimant;

(c) The grounds on which the claim is made;

(d) Any solutions proposed to resolve the dispute;

(e) The claimant's preferred language of proceedings; and

(f) The signature or other means of identification and authentication of the claimant and/or the claimant's representative.

34. ODR proceedings may be deemed to have commenced when, following a claimant's communication of a notice to the ODR administrator, the ODR administrator notifies the parties that the notice is available at the ODR platform.

35. It is desirable that the respondent communicate its response to the ODR administrator within a reasonable time of being notified of the availability of the claimant's notice on the ODR platform, and that the response include the following elements:

(a) The name and electronic address of the respondent and the respondent's representative (if any) authorized to act for the respondent in the ODR proceedings;

(b) A response to the grounds on which the claim is made;

(c) Any solutions proposed to resolve the dispute;

(d) The signature or other means of identification and authentication of the respondent and/or the respondent's representative; and

(e) Notice of any counterclaim containing the grounds on which the counterclaim is made.

36. As much as is possible, it is desirable that both the claimant's notice and response be accompanied by all documents and other evidence relied upon by each party, or contain references to them. In addition, to the extent that a claimant is pursuing any other legal remedies, it is desirable that such information also be provided with the notice.

Section VII — Negotiation

37. The first stage may be a negotiation, conducted between the parties via the ODR platform.

38. The first stage of proceedings may commence following the communication of the respondent's response to the ODR platform and:

(a) Notification thereof to the claimant; or

(b) Failing a response, the lapse of a reasonable period of time after the notice has been communicated to the respondent.

39. It is desirable that, if the negotiation does not result in a settlement within a reasonable period of time, the process proceed to the next stage.

Section VIII — Facilitated settlement

40. The second stage of ODR proceedings may be facilitated settlement, whereby a neutral is appointed and communicates with the parties to try to achieve a settlement.

41. That stage may commence if negotiation via the platform fails for any reason (including non-participation or failure to reach a settlement within a reasonable period of time), or where one or both parties to the dispute request to move directly to the next stage of proceedings.

42. Upon commencement of the facilitated settlement stage of proceedings, it is desirable that the ODR administrator appoint a neutral, and notify the parties of that appointment, and provide certain details about the identity of the neutral.

43. In the facilitated settlement stage, it is desirable that the neutral communicate with the parties to try to achieve a settlement.

44. If a facilitated settlement cannot be achieved within a reasonable period of time, the process may move to a final stage.

Section IX — Final Stage

45. If the neutral has not succeeded in facilitating the settlement, it is desirable that the ODR administrator or neutral informs the parties of the nature of the final stage, and of the form that it might take.

Section X — Appointment, powers and functions of the neutral

46. To enhance efficiency and reduce costs, it is preferable that the ODR administrator appoint a neutral only when a neutral is required for a dispute resolution process in accordance with any applicable ODR rules. At the point in an ODR proceeding at which a neutral is required for the dispute resolution process, it is desirable that the ODR administrator "promptly" appoint the neutral (i.e., generally at the commencement of the facilitated settlement stage of proceedings). Upon appointment, it is desirable that the ODR administrator promptly notify the parties of the name of the neutral and any other relevant or identifying information in relation to that neutral.

47. It is desirable that neutrals have the relevant professional experience as well as dispute resolution skills to enable them to deal with the dispute in question. However, subject to any professional regulation, ODR neutrals need not necessarily be qualified lawyers.

48. With regard to the appointment and functions of neutrals, it is desirable that:

(a) The neutral's acceptance of his or her appointment operates to confirm that he or she has the time necessary to devote to the process;

(b) The neutral be required to declare his or her impartiality and independence and disclose at any time any facts or circumstances that might give rise to likely doubts as to his or her impartiality or independence;

(c) The ODR system provides parties with a method for objecting to the appointment of a neutral;

(d) In the event of an objection to an appointment of a neutral, the ODR administrator be required to make a determination as to whether the neutral shall be replaced;

(e) There be only one neutral per dispute appointed at any time for reasons of cost efficiency;

(f) A party be entitled to object to the neutral receiving information generated during the negotiation period; and

(g) If the neutral resigns or has to be replaced during the course of the ODR proceedings, the ODR administrator be required to appoint a replacement, subject to the same safeguards as set out during the appointment of the initial neutral.

49. In respect of the powers of the neutral, it is desirable that:

(a) Subject to any applicable ODR rules, the neutral be enabled to conduct the ODR proceedings in such a manner as he or she considers appropriate;

(b) The neutral be required to avoid unnecessary delay or expense in the conduct of the proceedings;

(c) The neutral be required to provide a fair and efficient process for resolving disputes;

(d) The neutral be required to remain independent, impartial and treat both parties equally throughout the proceedings;

(e) The neutral be required to conduct proceedings based on such communications as are before the neutral during the proceedings;

(f) The neutral be enabled to allow the parties to provide additional information in relation to the proceedings; and

(g) The neutral be enabled to extend any deadlines set out in any applicable ODR rules for a reasonable time.

50. While the process for appointment of a neutral for an ODR proceeding is subject to the same due process standards that apply to that process in an offline context, it may be desirable to use streamlined appointment and challenge procedures in order to address the need for ODR to provide a simple, time-, and cost-effective alternative to traditional approaches to dispute resolution.

Section XI — Language

51. Technology tools available in ODR can offer a great deal of flexibility regarding the language used for the proceeding. Even where an ODR agreement or ODR rules specify a language to be used in proceedings, it is desirable that a party to the proceedings be able to indicate in the claimant's notice or response whether it wishes to proceed in a different language, so that the ODR administrator can identify other language options that the parties may select.

Section XII — Governance

52. It is desirable for guidelines (and/or minimum requirements) to exist in relation to the conduct of ODR platforms and administrators.

53. It is desirable that ODR proceedings be subject to the same due process standards that apply to that process in an offline context, in particular independence, neutrality and impartiality.

IV. ELECTRONIC COMMERCE

A. Report of the Working Group on Electronic Commerce on the work of its fifty-second session (Vienna, 9-13 November 2015)

(A/CN.9/863)

[Original: English]

Contents

I. Introduction

1. At its forty-fourth session, in 2011, the Commission mandated Working Group IV to undertake work in the field of electronic transferable records.[1] The Commission agreed that work regarding electronic transferable records might include certain aspects of other topics such as identity management, use of mobile devices in electronic commerce and electronic single window facilities.[2]

2. At its forty-fifth session (Vienna, 10-14 October 2011), the Working Group began its work on various legal issues relating to the use of electronic transferable records, including possible methodology for future work by the Working Group (A/CN.9/737, paras. 14-88).

3. At its forty-fifth session, in 2012, the Commission reaffirmed the mandate of the Working Group relating to electronic transferable records and requested the Secretariat to continue reporting on relevant developments relating to electronic commerce.[3]

4. At its forty-sixth session (Vienna, 29 October-2 November 2012), the Working Group continued its examination of the various legal issues that arose during the life cycle of electronic transferable records (A/CN.9/761, paras. 24-89). At its forty-seventh session (New York, 13-17 May 2013), the Working Group had the first opportunity to consider the draft provisions on electronic transferable records. It was reaffirmed that the draft provisions should be guided by the principles of functional equivalence and technology neutrality, and should not deal with matters governed by the underlying substantive law (A/CN.9/768, para. 14).

5. At its forty-sixth session, in 2013, the Commission reaffirmed the mandate of the Working Group and agreed that work towards developing a legislative text in the field of electronic transferable records should continue.[4] It was further agreed that whether that work would extend to identity management, single windows and mobile commerce would be assessed at a future time.[5]

6. At its forty-eighth session (Vienna, 9-13 December 2013), the Working Group continued its work on the preparation of draft provisions on electronic transferable records. The Working Group also took into consideration legal issues related to the use of electronic transferable records in relationship with the Convention Providing a Uniform Law for Bills of Exchange and Promissory Notes (Geneva, 1930) and the Convention Providing a Uniform

[2] Ibid., para. 235.
[3] Ibid., *Sixty-seventh Session No. 17* (A/67/17), para. 90.
[4] Ibid., *Sixty-eighth Session, Supplement No. 17* (A/68/17), para. 230.
[5] Ibid., para. 313.

Law for Cheques (Geneva, 1931) (A/CN.9/797, paras. 109-112). At its forty-ninth session (New York, 28 April-2 May 2014), the Working Group continued its work on the preparation of draft provisions as presented in document A/CN.9/WG.IV/WP.128 and Add.1. At its forty-seventh session, in 2014, the Commission reaffirmed the mandate of the Working Group to develop a legislative text on electronic transferable records that would greatly assist in facilitating electronic commerce in international trade.[6]

7. At its fiftieth session (Vienna, 10-14 November 2014), the Working Group continued its work on the preparation of draft provisions as presented in document A/CN.9/WG.IV/WP.130 and Add.1. Subject to a final decision to be made by the Commission, the Working Group agreed to proceed with the preparation of a draft model law on electronic transferable records (A/CN.9/828, para. 23). At its fifty-first session (New York, 18-22 May 2015), the Working Group continued its work on the preparation of draft provisions as presented in document A/CN.9/WG.IV/WP.132 and Add.1.

8. At its forty-eighth session, in 2015, the Commission encouraged the Working Group to finalize the current work in order to submit its results at the Commission's forty-ninth session bearing in mind that an UNCITRAL model law on electronic transferable records would be accompanied by explanatory materials.[7]

II. Organization of the session

9. The Working Group, composed of all States members of the Commission, held its fifty-second session in Vienna from 9 to 13 November 2015. The session was attended by representatives of the following States members of the Working Group: Argentina, Austria, Belarus, Brazil, Canada, China, Colombia, Croatia, Czech Republic, Denmark, France, Germany, Honduras, India, Indonesia, Italy, Japan, Jordan, Kenya, Kuwait, Malaysia, Mauritania, Mexico, Pakistan, Paraguay, Philippines, Poland, Republic of Korea, Russian Federation, Singapore, Spain, Thailand, United States of America and Venezuela (Bolivarian Republic of).

10. The session was also attended by observers from the following States: Bangladesh, Belgium, Bolivia (Plurinational State of), Cyprus, Dominican Republic, Peru, Romania, Saudi Arabia, Slovakia, Sweden, Syrian Arab Republic and United Arab Emirates.

11. The session was also attended by observers from the European Union.

12. The session was also attended by observers from the following international organizations:

(a) *International non-governmental organizations*: Brazilian Chamber of Electronic Commerce (CAMARA-E.NET), Centre for Commercial Law Studies (Queen Mary, University of London) (CCLS), China International Economic and Trade Arbitration Commission (CIETAC), CISG Advisory Council, European Law Students' Association (ELSA), Inter-American Bar Association (IABA), International Air Transport Association (IATA), International Bar Association (IBA), International Center for Promotion of Enterprises (ICPE), International Federation of Freight Forwarders Associations (FIATA) and Law Association for Asia and the Pacific (LAWASIA).

13. The Working Group elected the following officers:

Chairperson: Ms. Giusella Dolores FINOCCHIARO (Italy)

Rapporteur: Mr. Aliaksandr ZAPOLSKI (Belarus)

14. The Working Group had before it the following documents: (a) Annotated provisional agenda (A/CN.9/WG.IV/WP.134); and (b) A note by the Secretariat entitled "draft Model Law on Electronic Transferable Records" (A/CN.9/WG.IV/WP.135 and Add.1).

15. The Working Group adopted the following agenda:

1. Opening of the session.

---

[6] Ibid., *Sixty-ninth Session, Supplement No. 17* (A/69/17), para. 149.
[7] Ibid., *Seventieth Session, Supplement No. 17* (A/70/17), para. 231.

2. Election of officers.
3. Adoption of the agenda.
4. Consideration of the draft Model Law on Electronic Transferable Records.
5. Technical assistance and coordination.
6. Other business.
7. Adoption of the report.

III. Deliberations and decisions

16. The Working Group engaged in discussions on the draft Model Law on Electronic Transferable Records on the basis of documents A/CN.9/WG.IV/WP.135 and Add.1. The deliberations and decisions of the Working Group are reflected in chapter IV below. The Secretariat was requested to revise the draft provisions to reflect those deliberations and decisions.

IV. Draft provisions on electronic transferable records

Draft article 1. Scope of application

17. It was recalled that the deliberations of the Working Group focused on provisions dealing with electronic transferable records functionally equivalent to paper-based transferable documents or instruments (A/70/17, para. 228). In light of that focus, it was proposed to delete paragraph 3 since it dealt with issues arising in connection with electronic transferable records existing only in an electronic environment. It was added that the current draft of that paragraph offered limited clarity and its interpretation could pose challenges. It was indicated that concerned jurisdictions could in any case exclude certain types of electronic transferable records from the scope of application of the law. It was also indicated that that provision could be considered again at a later stage, when reviewing the applicability of the draft Model Law to electronic transferable records existing only in an electronic environment.

18. In response, it was said that paragraph 3 provided needed guidance and flexibility to enacting States. It was added that the scope and operation of paragraph 3 depended on the definition of electronic transferable records and that its consideration should be postponed accordingly.

19. After discussion, the Working Group agreed to retain paragraph 3 in square brackets for further consideration.

Draft article 2. Exclusions

20. It was indicated that paragraph 1 constituted an application of the principle contained in draft article 1, paragraph 2, and could therefore be deleted. However, it was suggested that an explicit reference to consumer protection law could be added in draft article 1, paragraph 2, in order to clarify that point.

21. It was noted that paragraph 3 applied to cases in which the enacting jurisdiction was a party to the Convention Providing a Uniform Law for Bills of Exchange and Promissory Notes (Geneva, 1930) and to the Convention Providing a Uniform Law for Cheques (Geneva, 1931) (the “Geneva Conventions”) and considered those Conventions incompatible with the draft Model Law. It was indicated that the current text of paragraph 3 could be misread as inviting enacting States to exclude paper-based transferable documents or instruments of great practical importance. It was suggested that an open-ended list of exclusions would be more appropriate as it would encourage enacting States to selectively identify those paper-based transferable documents or instruments excluded from the scope of the law. It was also suggested that explanatory materials on exclusions from the scope of the law should refer to issues related to the Geneva Conventions.

22. After discussion, the Working Group agreed to: (i) delete draft article 2, paragraph 1; (ii) include the words "including any rule of law applicable to consumer protection" at the end of draft article 1, paragraph 2; (iii) retain the text of draft article 2, paragraph 2, as draft article 1, paragraph 4; (iv) delete draft article 2, paragraph 3; and (v) add the words ", and to […]" at the end of draft article 1, paragraph 4.

Draft article 12. Indication of time and place in electronic transferable records

23. The view was expressed that provisions on determination of time and place were not specific to electronic transferable records but contained in substantive law. Another view was expressed that the indication of time and place in electronic transferable records was already adequately addressed in draft article 10, subparagraph 1 (a). Moreover, it was indicated that paragraphs 2 and 3 were designed for contractual transactions. For those reasons, it was suggested that draft article 12 should be deleted.

24. It was noted that paragraph 1 was not technology neutral as it implied the use of a registry-based system and therefore was not adequate for the use of token-based or blockchain-based systems. It was suggested that that provision should be drafted in technology neutral terms. However, it was also suggested that the availability of specific technologies and methods, such as those used for time-stamping, should be taken into consideration when redrafting that provision. In response, it was added that caution should be exercised in drafting any new substantive rule.

25. Support was expressed for retaining draft provisions on the determination of place of business inspired by article 6 of the United Nations Convention on the Use of Electronic Communications in International Contracts (New York, 2005) (the "Electronic Communications Convention") and contained in A/CN.9/WG.IV/WP.135/Add.1, paragraph 5. However, it was noted that those provisions did not offer positive elements for the determination of the place of business and it was suggested that further elements should be provided. In response, it was indicated that positive elements were provided by paragraphs 2 and 3 or, alternatively, would be found in applicable substantive law, such as article 10 of the United Nations Convention on Contracts for International Sale of Goods, while the suggested draft provisions had only an enabling effect, clarifying that certain elements specific to the use of electronic means did not have, per se, conclusive evidentiary value.

26. After discussion, the Working Group agreed to: (i) retain paragraph 1 for future consideration; (ii) delete paragraphs 2 and 3; and (iii) include the draft provisions contained in A/CN.9/WG.IV/WP.135/Add.1, paragraph 5 in a separate article.

Draft article 18. Presentation

27. It was noted that the current draft presented certain challenges with respect to its operation as functional equivalent both for presentation and for surrender. It was further noted that that article did not adequately deal with instances when presentation took place for acceptance. It was added that the alternative text contained in A/CN.9/WG.IV/WP.135/Add.1, paragraph 31 did not provide sufficient guidance, and that it might be preferable to continue deliberations on the basis of a new provision containing a functional equivalence rule on demonstration of control.

28. The Working Group agreed to further discuss draft article 18 on the basis of the following draft provision:

> "Where the law requires the demonstration of possession of a paper-based transferable document or instrument, that requirement is met with respect to an electronic transferable record if a reliable method is used to demonstrate control of the electronic transferable record".

29. The view was expressed that the new text did not provide sufficient guidance on presentation as it actually did not relate to presentation, but rather to a consequence of possession, and should therefore be deleted. It was suggested that a provision on functional equivalence of presentation should instead be introduced in the draft Model Law based on draft article 18 as contained in A/CN.9/WG.IV/WP.135/Add.1.

30. The view was also expressed that the new text provided a functional equivalence rule that was already set forth in draft article 17, establishing exclusive control as functional equivalent of possession, and should therefore be deleted. It was suggested that the explanatory materials to the draft Model Law should clarify that draft article 17 would operate also with respect to presentation.

31. Another view was expressed that presentation as such did not require a functional equivalence rule, but that the steps needed for presentation, including demonstration of possession of the paper-based transferable document or instrument, required that rule. It was added that the new text of draft article 18 was useful in providing for all cases in which the law required demonstration of possession, including presentation.

32. It was further suggested that a provision on presentation should also refer to the functional equivalent of delivery of the paper-based transferable document or instrument. In response, it was noted that the functional equivalence rule of delivery of a paper-based transferable document or instrument already existed and consisted of the transfer of exclusive control on the electronic transferable record. It was added that a provision on delivery had been deleted from the draft Model Law (A/CN.9/834, paras. 31-33).

33. It was indicated that presentation was a necessary step in the life cycle of electronic transferable records and that the omission of a provision on presentation in the draft Model Law might pose practical challenges. In response, it was said that the system agreement would usually include provisions on the ability of control and the manner to indicate control, including those relevant for presentation.

34. It was explained that presentation could have a different meaning in the various jurisdictions and require different actions, such as provision of information, submission of a request for performance or acceptance and delivery of a transferable document or instrument. In that regard, it was noted that the draft Model Law already contained equivalence rules for several functions pursued by those actions, such as signature, written form and transfer of control. It was added that a core element of the concept of presentation was demonstration of possession of a paper-based transferable document or instrument, and that demonstration of control of an electronic transferable record was its functional equivalent (see para. 28 above).

35. A suggestion was to include the words “for presentation” after the words “transferable document or instrument” in the alternative text of draft article 18 contained in paragraph 28 above in order to better reflect its purpose.

36. After discussion, the Working Group agreed to delete draft article 18 and reflect the discussion on the core elements of presentation in the explanatory materials. The Working Group was of the view that presentation did not raise issues of functional equivalence in the context of the Model Law.

Draft article 11. General reliability standard

37. The Working Group started its deliberations by considering the following drafting proposal:

> “For the purposes of this Law, a method shall be considered reliable if it is:
>
> (1) As reliable as appropriate for the fulfilment of the function for which the method is being used, in the light of any relevant agreement, or, in the absence of such agreement, of all relevant circumstances, which may include:
>
> (a) The level of assurance of data integrity;
>
> (b) The ability to prevent unauthorized access to and use of the method;
>
> (c) The expertise and resources deployed in the setting up and continued administration of the method;
>
> (d) The regularity and extent of audit by an independent body, if any;
>
> (e) The existence of a declaration, if any, by a supervisory or accreditation body or voluntary scheme regarding the reliability of the method;
>
> (f) Information on past performance of the method;

(g) Any applicable industry standard;

(h) The maturity of the technology used and its proven ability to perform the relevant function; or

(2) Proven in fact to have fulfilled the function for which the method is being used, by itself or together with further evidence."

38. It was explained that that alternative draft gave prevalence to contractual agreements in assessing reliability in order to support developments in technology and business practices. It was also explained that the list of criteria for the determination of reliability was illustrative and non-exhaustive, and that it would find application only in absence of any contractual agreement.

Chapeau of the alternative proposal

39. It was indicated that the general reference to "for the purposes of this Law" contained in the chapeau was inappropriate since each article referring to the use of a reliable method pursued a different function. It was added that each reliability requirement associated with a function should be fulfilled separately. Accordingly, it was suggested that reference should be made to each specific article.

Paragraph 1 of the alternative proposal

40. Concerns were expressed that paragraph 1 gave excessive prevalence to contractual agreements that could lead to validation of a non-reliable standard. It was added that that result was undesirable since it could ultimately affect property, including that of third parties.

41. In response, it was indicated that contractual agreements should prevail over other factors when assessing reliability as parties were in the best position to assess risks and allocate resources. Reference was made to draft article 5 on party autonomy as a general provision enabling the parties to establish the desired level of reliability.

42. Support was expressed for including in the draft article a list of factors relevant in assessing reliability. However, concerns were expressed on several listed factors. In particular, it was noted that assurance of data integrity was an absolute notion that could not be expressed by reference to a level.

Paragraph 2 of the alternative proposal

43. It was explained that paragraph 2 aimed at preventing frivolous litigation by validating methods that had in fact achieved their function regardless of any abstract assessment of their reliability. In that light, broad support was expressed for the retention of paragraph 2.

Ex post and ex ante assessment of reliability

44. Consensus was expressed on the view that the draft provision should adopt a technology neutral approach and not a prescriptive one. It was further explained that, while the draft provision aimed at providing guidance on the assessment of the reliability standard in case of dispute ("ex post" reliability assessment), its content would necessarily also influence the design of the system ("ex ante" reliability assessment).

45. In light of the above considerations, the Working Group agreed to continue its deliberations on the basis of draft article 11 as contained in A/CN.9/WG.IV/WP.135 with (i) the incorporation of a reference to parties' agreement in paragraph 1; (ii) the deletion of the words "level of" in subparagraph 2 (a); and (iii) the retention of paragraph 2 of the alternative proposal as a new paragraph 3, as follows:

"1. The standard of reliability required shall be assessed in the light of the purpose for which the information contained in the electronic transferable record was generated and in the light of all the relevant circumstances, including any contractual agreement.

"2. In determining whether, or to what extent, a method is reliable [for the purposes of articles ...], regard may be had to the following factors:

(a) Assurance of data integrity;

(b) Ability to prevent unauthorized access to and use of the system;

(c) Quality of hardware and software systems;

(d) Regularity and extent of audit by an independent body;

(e) The existence of a declaration by a supervisory body, an accreditation body or a voluntary scheme regarding the reliability of the method;

(f) Any other relevant factor.

"3. A method shall be considered reliable if proven in fact to have fulfilled the function for which the method is being used, by itself or together with further evidence."

46. It was explained that the list of factors contained in paragraph 2 was illustrative and not exhaustive. It was added that caution should be exercised so that the list would not be interpreted as encouraging litigation.

The role of party agreement in assessing reliability

47. Concerns were expressed on the reference to party agreement contained in paragraph 1 of the alternative proposal. It was said that the use of paper-based transferable documents or instruments relied on objective elements such as possession, while the reference to party agreement introduced a subjective element that could interfere with functional equivalence rules, thus affecting, inter alia, singularity of claims. The concern was also expressed that party agreement could be used to circumvent requirements contained in substantive law or public policy provisions.

48. In that line, it was noted that the reliability of the system had to be determined in a uniform manner across the ecosystem, which could be achieved only by courts applying objective standards. It was added that subjective reliability standards could affect third parties that were not a party to any agreement on those standards. In view of those concerns, it was suggested that reference to party agreement should be deleted in order to improve third party protection and, ultimately, the appeal of electronic transferable records to the market.

49. In response, it was said that draft article 11 did not aim at affecting substantive rights or the validity of an electronic transferable record but only at allowing to address system standards contractually. It was added that the use of electronic transferable records involved the use of a system and the existence of a contractual agreement, and that parties not confident in the reliability of a system could refuse to use it. In response, it was noted that the existence of such agreement when using token-based or blockchain-based systems was not always evident.

50. The view was expressed that the contractual agreement should be only one of the elements relevant to determine the level of reliability. The view was also expressed that contractual agreements should be considered only when objective standards could not be satisfied. According to yet another view, objective and subjective standards for the assessment of reliability were not in contradiction but complementary since party agreement could complete and qualify objective standards.

Safety clause

51. It was indicated that the provision contained in paragraph 3 of the alternative proposal would provide additional certainty by discouraging frivolous litigation when a method had in fact fulfilled its function. It was clarified that the provision referred to fulfilment of the function in the specific case under dispute and did not aim at predicting reliability based on past performance of the method.

52. It was noted that paragraph 3 of the alternative draft proposal did not aim at establishing when a method was reliable, but was actually operating as an alternative to the assessment of the reliability of the method. It was suggested that the provision should be redrafted accordingly.

53. In light of the above comments, the following proposal was submitted for the consideration of the Working Group:

"1. For the purposes of articles […] the method referred to shall be:

(a) As reliable as appropriate for the fulfilment of the function for which the method is being used, in the light of all relevant circumstances, which may include:

(i) The operational rules governing the system;

(ii) The assurance of data integrity;

(iii) The ability to prevent unauthorized access to and use of the system;

(iv) The quality of hardware and software systems;

(v) The regularity and extent of audit by an independent body;

(vi) The existence of a declaration by a supervisory body, an accreditation body or a voluntary scheme regarding the reliability of the method;

(vii) Any applicable industry standard;

(viii) Any other relevant factor; or

(b) Proven in fact to have fulfilled the function by itself or together with further evidence.

"2. In the event of a dispute on method reliability between parties to a contract, regard shall be had to the agreement between the parties in so far as relevant."

54. The view was expressed that reference to each method and its respective function introduced a number of new standards, thus making the provision unnecessarily complex and difficult to interpret. In response, it was said that such reference actually clarified the operation of the draft provision, given that each reference to a reliable method contained in the draft Model Law referred to a different function, which had to be fulfilled individually.

55. It was suggested that a reference to "the purpose for which the information contained in the electronic transferable record was generated" should be inserted in the draft provision.

56. It was indicated that the reference to any applicable industry standard in subparagraph 1 (a)(vii) would allow keeping flexibility while providing guidance. It was added that those standards would have to be internationally recognized. Yet, it was responded that some standards might not be appropriate for certain types of transactions, for instance those involving consumers, and that therefore the qualifier "as appropriate" should be added. It was replied that, on the one hand, the application of consumer protection rules was not affected by the draft Model Law and, on the other hand, electronic transferable records were usually handled by highly-skilled professionals. Another view suggested referring to "industry best practices" instead.

57. With respect to the reference to operational rules in subparagraph 1 (a)(i), it was explained that those rules were usually contained in an operating manual whose application could be monitored by an oversight body and that, as such, did not have a purely contractual nature, although they could be included in an agreement between the system provider and the user. It was suggested that that reference should be limited to "operational rules on the assessment of reliability" so as not to refer to rules irrelevant for the draft provision.

Scope of paragraph on party autonomy

58. It was explained that paragraph 2 aimed at clarifying that parties could allocate liability arising from the use of a system by agreeing on the level of system reliability. It was also explained that the provision would ensure that parties would be bound by their agreements without affecting third parties. It was further clarified that paragraph 2 did not aim at interfering with substantive law, for instance by allowing validation of an otherwise invalid electronic transferable record through agreement of the parties on the use of an unreliable method.

59. In response, the concern was again expressed that paragraph 2 might be interpreted as introducing a separate subjective legal regime for electronic transferable records, and that that legal regime could be used to circumvent substantive law and provisions of mandatory application. It was added that the relation between paragraph 1, in particular the reference to

"the operational rules governing the system", and paragraph 2 was not clear. It was therefore suggested that paragraph 2 should be deleted.

60. A third view was that paragraph 2 was not useful, since it stated the obvious rule that any agreement on system reliability would be relevant among the parties to that agreement. It was noted that draft article 5 already allowed for concluding such an agreement.

61. It was noted that the reference to disputes in paragraph 2 was redundant and that the drafting technique was unusual. It was also noted that the only relevant disputes under paragraph 2 of the proposal were disputes relating to reliability of the method.

62. In light of the concerns expressed, a new draft of paragraph 2 was proposed:

> "For the purposes of assessing [the required level of] reliability between parties to an agreement, regard shall be had to such agreement in so far as relevant."

63. It was said that the new proposal did not address the concerns expressed in relation to the prevalence of party agreement and the introduction of subjective standards.

64. In light of the different views on the scope of paragraph 2, the Working Group agreed that the intended scope should be better clarified. It was suggested that the relation between paragraphs 1 and 2 be clarified as well.

Paragraph 1

65. The Working Group considered the following draft of paragraph 1:

> "1. For the purposes of articles […] the method referred to shall be:
>
> (a) As reliable as appropriate for the fulfilment of the function for which the method is being used, [in the light of the purpose for which the information contained in the electronic transferable record was generated and] in the light of all relevant circumstances, which may include:
>
> (i) The operational rules on the assessment of reliability governing the system;
>
> (ii) The assurance of data integrity;
>
> (iii) The ability to prevent unauthorized access to and use of the system;
>
> (iv) The quality of hardware and software systems;
>
> (v) The regularity and extent of audit by an independent body;
>
> (vi) The existence of a declaration by a supervisory body, an accreditation body or a voluntary scheme regarding the reliability of the method;
>
> (vii) Any applicable industry best practices; or
>
> (b) Proven in fact to have fulfilled the function agreed to by itself or together with further evidence."

66. It was explained that reference to "any other relevant factor" had been omitted from the list of factors since the words "which may include" sufficiently clarified that the list was not exhaustive and had an illustrative nature only. It was also explained that, depending on the final form of draft article 11, other articles referring to a reliable method, such as draft articles 9, 10 and 17, would be modified accordingly.

The purpose for which the information was generated

67. It was said that the words "all relevant circumstances" included the purpose for which the information contained in the electronic transferable record was generated, and that therefore the bracketed text in subparagraph 1 (a) should be deleted.

Operational rules

68. It was explained that the reference to rules on assessment of reliability aimed to clarify that only operational rules regarding the reliability of the system, and not operational rules in general, should be considered (see para. 57 above). It was suggested to replace the word "on" with "relevant to" to better specify which rules on reliability were relevant.

Data integrity

69. It was suggested that data integrity had a different nature than other listed factors, as it was a parameter of a functional equivalence rule and, as such, already contained in draft article 10. For that reason, it was added, its inclusion in draft article 11 would introduce a circular argument. In that light, it was suggested that the reference to data integrity be deleted.

70. In response, it was said that data integrity should be retained as draft article 11 served as a general reliability standard applicable also to draft articles that did not mention integrity. It was added that, due to the illustrative nature of the list of circumstances relevant for the assessment of reliability, neither retention nor deletion of the reference to data integrity would affect consideration of that element when relevant.

Any applicable industry best practices

71. With regard to "industry best practices", it was noted that reference to "industry standards" was preferable since those standards could be more easily ascertained. However, it was also noted that caution should be exercised in referring to industry standards, since that reference could lead to violating the principle of technology neutrality. It was therefore suggested that the reference to industry standards should be deleted.

Subparagraph 1 (b)

72. The view was expressed that subparagraph 1 (b) should be deleted as it introduced a standard assessing reliability based on past performance of the method. In response, it was explained that a similar rule was contained in article 9(3)(b)(ii) of the Electronic Communications Convention and had proven to be useful. In further response, it was said that the draft Model Law was different in scope from the Electronic Communications Convention and that technological developments since the adoption of that Convention should also be taken into account. In reply, it was indicated that, although the scope of the two texts was different, the purpose of the provision was the same, namely avoiding frivolous litigation, which was deemed particularly useful.

73. After discussion, the Working Group agreed with respect to paragraph 1 to: (i) delete the words "in the light of the purpose for which the information contained in the electronic transferable record was generated" in subparagraph (a); (ii) to replace the word "on" with "relevant to" in subparagraph (a)(i); (iii) retain the reference to "the assurance of data integrity" in subparagraph (a)(ii) with clarification in explanatory materials on its purpose and relation with other provisions; (iv) insert the word "industry standards" instead of "best practices" in subparagraph (a)(vii); and (v) retain subparagraph (b).

Paragraph 2

74. With respect to paragraph 2, in the alternative text provided in paragraph 62 above, it was indicated that a reference to contractual agreements could assist significantly when assessing the level of reliability of a method since those agreements often contained useful guidance on technical details. In that respect, reference was made to service level agreements. However, it was also suggested that paragraph 2 might be redundant, since draft article 5 already provided for party autonomy. It was also said that, if paragraph 2 was maintained, explanatory materials should clarify that the provision was simply an application of the fundamental contract law principle of party autonomy.

75. After discussion, there was broad consensus that the scope of paragraph 2 was limited to allocation of liability arising from an agreement on the reliability of the method. There was also broad consensus that paragraph 2 should not affect third parties. Broad consensus was further expressed that paragraph 2 should not affect mandatory substantive law provisions such as those relating to the validity of electronic transferable records.

76. On the basis of that shared understanding, the Working Group agreed to retain paragraph 2 in square brackets for further consideration.

Draft article 25. Non-discrimination of foreign electronic transferable records

77. The importance of legally enabling the cross-border use of electronic transferable records was stressed. It was noted that draft article 25 aimed at achieving that goal by

preventing discrimination on the basis of the geographic origin of the electronic transferable record, while, at the same time, respecting the application of relevant private international law rules.

78. It was indicated that the creation of a special private international law regime for electronic transferable records was not necessary, as the regime applicable to equivalent paper-based transferable documents or instruments would suffice. It was added that a dual private international law regime would not be desirable.

79. In response, it was noted that an electronic transferable record might be issued in a jurisdiction that did not recognize the use of electronic transferable records, and that recognition of its validity could be sought in a jurisdiction that allowed that use. In that case, it was added, it could be useful to permit recognition of the validity of the electronic transferable record in the latter jurisdiction, provided legal requirements set forth in that jurisdiction were met.

80. Reference was made to the possibility of introducing reciprocity standards in the cross-border recognition of electronic transferable records. Reference was also made to the practical relevance of trust frameworks and, in general, of third-party service providers in facilitating that cross-border recognition.

81. It was explained that one policy goal of the draft Model Law was to promote widespread use of electronic transferable records in business practice and that that goal could be achieved by enabling the cross-border use of electronic transferable records regardless of the number of jurisdictions enacting the draft Model Law.

82. After discussion, the Working Group decided to further consider draft article 25 at a future session.

Draft article 20. Amendment

83. It was suggested that the words “modification of information contained in” should replace the first occurrence of the words “amendment of” in draft article 20. In response, it was indicated that reference to “amendment of” was more accurate than reference to “modification of information contained in” and should be retained.

“readily”

84. It was suggested that the word “readily” should be deleted as it introduced a subjective standard and that reference to “identifiable” was sufficient. Concern was expressed that such requirement could impose excessive burden and cost on system operators.

85. In response, it was indicated that users should be able to easily identify the amended information in an electronic environment in a manner similar to the paper-based environment (A/CN.9/828, para. 88 and A/CN.9/WG.IV/WP.135/Add.1, para. 40).

86. A further view was that the insertion of a qualifier to “identifiable” was important, but that another term, such as “clearly”, “easily” or “obviously”, could be used to address the concerns expressed. It was also suggested to replace “identifiable” with “identified” to introduce an objective standard.

87. After discussion, the Working Group agreed to: (i) retain in draft article 20 the text contained in A/CN.9/WG.IV/WP.135/Add.1, para. 39; (ii) delete the word “readily”; and (iii) replace the word “identifiable” with “identified”.

Draft article 3. Definitions

“amendment”

88. It was noted that the term “amendment” occurred only in draft article 20, which contained a functional equivalence rule. In that light, the Working Group agreed to delete the definition of amendment.

“issuer”, “replacement” and “obligor”

89. The Working Group agreed to delete the definition of “issuer”, “replacement” and “obligor” since those terms no longer appeared in the draft Model Law.

"performance of obligation"

90. The Working Group agreed to delete the definition of "performance of obligation" since that definition was a matter of substantive law.

"electronic transferable record"

91. It was indicated that the definition of electronic transferable record contained in paragraph 30 of A/CN.9/WG.IV/WP.135 reflected the functional equivalent approach. It was added that the definition did not apply to electronic transferable records that existed only in an electronic environment, for which a different definition would be needed. It was indicated that the commentary to accompany the Model Law should state that the Model Law did not preclude the development and use of electronic transferable records that did not have a paper equivalent as those records would not be governed by the Model Law.

92. The Working Group agreed to retain the definition of electronic transferable record contained in paragraph 30 of A/CN.9/WG.IV/WP.135.

"paper-based transferable document or instrument"

93. As an editorial matter and in the English language only, it was agreed that the words "paper-based" should be deleted throughout the draft Model Law since the definition of transferable document or instrument sufficiently clarified that those documents or instruments were paper-based. The Secretariat was asked to verify in which other languages that deletion was possible in light of the terminology used.

94. The Working Group agreed to delete the indicative list of transferable documents or instruments from the definition of "transferable document or instrument" and to insert that list for illustrative purposes only in explanatory materials, which would also indicate that applicable substantive law would clarify which documents or instruments were transferable in the various jurisdictions.

95. The Working Group agreed to retain the word "indicated" outside square brackets in the definition of "transferable document or instrument".

"electronic record"

96. It was indicated that the definition of "electronic record" should reflect the composite nature of an electronic transferable record, which, in turn, was particularly relevant for the notion of "integrity" contained in paragraph 2 of draft article 10. For that purpose, it was suggested to retain the words "including, where appropriate, all information logically associated with or otherwise linked" outside the square brackets. It was also suggested to retain the word "not" outside the square brackets and to delete the word "subsequently", since the generation of metadata did not necessarily take place after the generation of a record, but could also precede it.

97. It was explained that the word "logically" in the definition of "electronic record" referred to computer software and not to human logic.

98. The Working Group agreed to retain the following definition of "electronic record":

> "electronic record" means information generated, communicated, received or stored by electronic means, including, where appropriate, all information logically associated with or otherwise linked together so as to become part of the record, whether generated contemporaneously or not.

"Control"

99. The Working Group considered the definition of "control" in conjunction with draft article 17 on control as a functional equivalent of possession.

100. It was indicated that there was no need to define "control" since that definition was implicit in draft article 17. It was added that the current definition of "control" was not in line with draft article 17. It was suggested that any useful element present in the definition of "control" could be incorporated in draft article 17.

101. It was stated that both control and possession were factual situations and that the person in control of an electronic transferable record was in the same position as the possessor of an equivalent transferable document or instrument. It was also stated that control could not affect or limit the legal consequences arising from possession and that those legal consequences would be determined by applicable substantive law. Broad consensus was expressed on those statements. It was further stated that parties could agree on the modalities for the exercise of possession, but not modify the notion of possession itself.

102. Based on that shared understanding, to be reflected in explanatory materials, the Working Group agreed to delete the definition of "control".

V. Other business

A. Future work

103. The Working Group recalled that, at its forty-eighth session, the Commission instructed the Secretariat to conduct preparatory work on identity management and trust services, cloud computing and mobile commerce, including through the organization of colloquia and expert group meetings, for future discussion at the Working Group level following the current work on electronic transferable records. It also recalled that the Commission asked the Secretariat to share the result of that preparatory work with Working Group IV, with a view to seeking recommendations on the exact scope, possible methodology and priorities for the consideration of the Commission at its forty-ninth session (A/70/17, para. 358).

104. Reference was made to the proposal submitted to the Commission at its forty-eighth session on possible future work related to identity management and trust services (A/CN.9/854). It was explained that laws and practices already existed in that area, and that their harmonization should be a matter of priority. It was added that it was particularly important to ensure inclusion of all regions, economic and legal systems and, for that reason, it was suggested that a colloquium should be organized to better define scope and methodology of the future work, with a view to reporting the findings to the Commission at its next session.

105. Reference was also made to the proposals submitted to the Commission for its consideration at its forty-seventh and forty-eighth sessions on possible future work related to cloud computing (A/CN.9/823 and A/CN.9/856). It was explained that those proposals relied on significant work already carried out at the national and international levels. Specific reference was made to the relevant recommendations contained in the UNCTAD Information Economy Report 2013 — The Cloud Economy and Developing Countries (UNCTAD/IER/2013) as a valuable starting point for future work. In that light, it was suggested that preparatory work should be carried out in an inclusive manner through informal expert consultations with a view to preparing a reference document on the nature of suggested work, the intended approach and tentative content for the consideration of the Commission at its next session.

106. The Working Group asked the Secretariat to provide support, within available resources, to the above proposals, including by exploring the possibility to hold a colloquium on legal issues related to identity management and trust services. It was noted that, in line with the decision of the Commission, the Working Group should prioritize the finalization of its current work on the draft Model Law on Electronic Transferable Records. In that light, the Working Group agreed that no colloquium should be held during the fifty-third session of the Working Group.

B. Technical assistance and other activities

107. With respect to technical assistance and other activities, it was said that the recently-adopted Protocol on the Legal Framework to Implement the ASEAN Single Window made specific reference to the Electronic Communications Convention as a relevant principle for transactions between national single windows in the ASEAN single

window environment. Furthermore, it was said that Chapter 14 (Electronic Commerce), Section 5.1 of the Trans-Pacific Partnership indicated that State parties to that treaty should maintain a legal framework governing electronic transactions consistent with the principles of the UNCITRAL Model Law on Electronic Commerce or the Electronic Communications Convention.

108. It was added that UNCITRAL continued to provide active contribution to the negotiation of a Regional Arrangement for the Facilitation of Cross-border Paperless Trade conducted at UN/ESCAP, and that technical assistance to legislative reform in the field of electronic commerce and paperless trade was being provided, in cooperation with UN/ESCAP, to the Republic of the Maldives.

B. Note by the Secretariat on a draft model law on electronic transferable records (A/CN.9/WG.IV/WP.135 and Add.1)

[Original: English]

Contents

I. Introduction

1. At its forty-fourth session, in 2011, the Commission mandated the Working Group to undertake work in the field of electronic transferable records.[1]

2. At its forty-sixth session (Vienna, 29 October-2 November 2012), broad support was expressed by the Working Group for the preparation of draft provisions on electronic transferable records, to be presented in the form of a model law without prejudice to the decision on the final form of its work (A/CN.9/761, paras. 90-93).

3. At its forty-seventh session (New York, 13-17 May 2013), the Working Group began reviewing the draft provisions on electronic transferable records as provided in document A/CN.9/WG.IV/WP.122 and noted that while it was premature to start a discussion on the final form of work, the draft provisions were largely compatible with different outcomes that could be achieved.

4. At its forty-eighth session (Vienna, 9-13 December 2013), the Working Group continued its consideration of the draft provisions as contained in document A/CN.9/WG.IV/WP.124 and Add.1.

5. At its forty-ninth session (New York, 28 April-2 May 2014), the Working Group continued its work on the preparation of draft provisions as presented in document A/CN.9/WG.IV/WP.128 and Add.1. The Working Group focused its discussion on concepts of original, uniqueness, and integrity of an electronic transferable record.

6. At its fiftieth session (Vienna, 10-14 November 2014), the Working Group continued its work on the preparation of draft provisions as presented in document A/CN.9/WG.IV/WP.130 and Add.1. Subject to a final decision to be made by the Commission, the Working Group agreed to proceed with the preparation of a draft model law on electronic transferable records (A/CN.9/828, para. 23). It was suggested that the draft Model Law should provide for both electronic equivalents of paper-based transferable documents or instruments and for transferable records that existed only in an electronic environment. It was agreed that priority should be given to the preparation of provisions dealing with electronic equivalents of paper-based transferable documents or instruments, and that those provisions should be subsequently reviewed and adjusted, as appropriate, to accommodate the use of transferable records that existed only in an electronic environment (A/CN.9/828, para. 30).

7. At its fifty-first session (New York, 18-22 May 2015), the Working Group continued its work on the preparation of the draft Model Law as presented in document A/CN.9/WG.IV/WP.132 and Add.1. The Working Group focused its discussion on the definitions of electronic transferable record, possession and control. Part II of this note

[1] *Official Records of the General Assembly, Sixty-sixth Session, Supplement No. 17* (A/66/17), para. 238.

contains the draft provisions reflecting the deliberations and decisions of the Working Group during that session (A/CN.9/834, paras. 21-108).

II. Draft Model Law on Electronic Transferable Records

A. General

"**Draft article 1. Scope of application**

"1. This Law applies to electronic transferable records.

"2. Other than as provided for in this Law, nothing in this Law affects the application to an electronic transferable record of any rule of law governing a paper-based transferable document or instrument.

"[3. This Law applies to electronic transferable records other than as provided by [the law governing a certain type of electronic transferable record to be specified by the enacting State].]"

Remarks

8. Draft article 1 reflects the Working Group's deliberations at its forty-eighth session (A/CN.9/797, paras. 16-17).

9. Draft paragraph 2 sets forth the general principle that the draft Model Law does not affect substantive law applicable to paper-based transferable documents or instruments and to their electronic equivalents. This principle applies to each step of the life cycle of an electronic transferable record. For instance, it enables the issuance of an electronic transferable record to bearer when permitted under substantive law (A/CN.9/797, para. 65). It also allows changing the modalities for circulation of an electronic transferable record issued to bearer in an electronic transferable record to a named person and the reverse case ("blank endorsement") when permissible under substantive law (A/CN.9/828, para. 82).

10. Draft paragraph 3 aims at allowing the application of the draft Model Law also to electronic transferable records that exist only in an electronic environment without interfering with substantive law. In that respect, it should be noted that, in principle, electronic transferable records that are functional equivalent of paper-based transferable documents or instruments and electronic transferable records that exist only in an electronic environment may co-exist in the same jurisdiction. Hence, draft paragraph 3 would not be necessary in jurisdictions where those electronic transferable records do not exist (A/CN.9/797, para. 17).

11. However, the Working Group may wish to note that a law applicable to electronic transferable records that exist only in an electronic environment is likely to define its substantive scope of application. Moreover, the substantive law applicable to an electronic transferable record equivalent to a paper-based transferable document or instrument is defined by reference to that equivalent paper-based transferable document or instrument. The Working Group may wish to consider whether to retain draft paragraph 3 in light of those considerations.

"**Draft article 2. Exclusions**

"1. This Law does not override any rule of law applicable to consumer protection.

"2. This Law does not apply to securities, such as shares and bonds, and other investment instruments.

"3. [This Law does not apply to bills of exchange, promissory notes and cheques.]"

Remarks

12. Draft article 2 reflects the Working Group's deliberations at its forty-eighth session (A/CN.9/797, paras. 18-20).

13. The Working Group may wish to discuss whether draft paragraph 1 should be retained in light of the fact that draft article 1, paragraph 2, already indicates that the draft Model Law does not affect substantive law. In case it is retained, the Working Group may also wish to consider whether that draft provision should be placed elsewhere in the Model Law, for instance in draft article 1, as it may not constitute an exclusion from the scope of application of the law.

14. The term "securities" in draft paragraph 2 does not refer to the use of electronic transferable records as collateral and therefore the Model Law does not prevent the use of electronic transferable records for security rights purposes (A/CN.9/834, para. 73).

15. The term "investment instrument" is understood to include derivative instruments, money market instruments and any other financial product available for investment (A/CN.9/797, para. 19).

16. The Working Group may wish to confirm that shares and bonds are excluded from the scope of application of the Model Law also when considered negotiable instruments in the relevant jurisdictions.

17. Draft paragraph 3 reflects a view that certain paper-based transferable documents or instruments should be excluded from the scope of application of the Model Law in order to avoid conflicts with treaties such as the Convention Providing a Uniform Law for Bills of Exchange and Promissory Notes (Geneva, 1930) and the Convention Providing a Uniform Law for Cheques (Geneva, 1931) (the "Geneva Conventions") in jurisdictions where those treaties are in force (A/CN.9/797, paras. 20, 109-112; see also A/CN.9/WG.IV/WP.125).

18. The Working Group may wish to consider whether paragraph 3 should be retained in the draft Model Law to provide guidance to those jurisdictions that are parties to the Geneva Conventions as well as any other relevant conventions when they wish to enact the Model Law.

19. Alternatively, the Working Group may wish to consider whether draft paragraph 3 should be drafted as an open-ended exclusion clause along the following lines: "This Law does not apply to […]" to permit selective application of the Model Law in light of the features of the enacting jurisdiction. That approach could also provide additional flexibility in including in the list, if so wished, certain instruments or documents, such as letters of credit, whose legal status under the Model Law may be unclear.

"**Draft article 3. Definitions**

"For the purposes of this Law:"

Remarks

20. The definitions in draft article 3 have been prepared as a reference and should be examined in the context of the relevant draft articles. The terms are presented in the order they appear throughout the draft Model Law (A/CN.9/768, para. 34). Remarks for consideration by the Working Group have been placed after each definition. The Working Group may wish to review the draft definitions once the draft articles of the Model Law have been fully considered and the use of the defined terms ascertained (A/CN.9/828, para. 66).

21. All references to "holder" with respect to an electronic transferable record in the draft provisions have been deleted and replaced with "person in control" (A/CN.9/804, para. 85). The Working Group may wish to clarify in draft article 3 that a "person" may either be a natural or a legal person.

"*electronic transferable record*" means [an electronic record] [containing authoritative information] that entitles the person in control to claim the performance of the obligation [indicated] in the record and that is capable of transferring the right to performance of the obligation [indicated] in the record through the transfer of that record.

Remarks

22. The definition of "electronic transferable record" reflects the Working Group's deliberations at its forty-eighth (A/CN.9/797, paras. 21-28) and fifty-first (A/CN.9/834, paras. 23-26, 88 and 95-98 and 100) sessions.

23. The definition of "electronic transferable record" aims at covering both electronic transferable records that are equivalent to paper-based transferable documents or instruments and electronic transferable records that exist only in an electronic environment (A/CN.9/797, para. 23). The Working Group may wish to consider whether that definition should be reviewed in light of the decision to prepare on a priority basis provisions dealing with electronic equivalents of paper-based transferable documents or instruments.

24. The definition of "electronic transferable record" does not aim at affecting the fact that substantive law shall determine whether the person in control is the rightful person in control as well as the substantive rights of the person in control. It also does not aim at describing all the functions possibly related to the use of an electronic transferable record. For instance, an electronic transferable record may have an evidentiary value; however, the ability of that record to discharge that function will be assessed under law other than the draft Model Law.

25. The Working Group confirmed that certain documents or instruments, which are generally transferable, but whose transferability is limited due to other agreements, such as straight bills of lading, would not fall under this definition and that the draft Model Law should only focus on "transferable" documents (A/CN.9/797, paras. 27-28).

26. The words "[containing authoritative information]" were included for further consideration pursuant to a discussion on draft article 10 (A/CN.9/834, paras. 26 and 88) and should therefore be considered in conjunction with that draft article.

27. The Working Group may wish to consider whether the term "[indicated]" is appropriate or whether other terms such as "represented by", "incorporated", "specified" or "contained" (A/CN.9/797, para. 22) shall be used.

28. The Working Group may wish to take into account the definition of "electronic record" when considering the definition of "electronic transferable record" (see below, para. 74).

29. At the Working Group's fifty-first session different views were expressed with respect to the need of retaining the definition of "electronic transferable record" (A/CN.9/834, paras. 95-98). In particular, the view was expressed that an electronic record complying with the requirements set forth in draft article 10 would be an electronic transferable record functionally equivalent to the corresponding paper-based transferable document or instrument. Hence, a definition of electronic transferable record may not be necessary or may be limited to reference to the requirements set forth in draft article 10.

30. In the same line, at that session the following definition of electronic transferable record was suggested, containing a reference to the information requirement in a paper-based transferable document or instrument and the requirements set forth in draft article 10 (A/CN.9/834, para. 100):

> "*electronic transferable record*" [is an electronic record that contains all of the information that would make a paper-based transferable document or instrument effective and that complies with the requirements of article 10].

31. Different considerations could apply with respect to a definition of "electronic transferable records" applicable to electronic transferable records existing only in electronic form, which are to be discussed at a later stage.

> "*paper-based transferable document or instrument*" means a transferable document or instrument issued on paper that entitles the holder to claim the performance of the obligation [indicated] in the document or instrument and that is capable of transferring the right to performance of the obligation [indicated] in the document or instrument through the transfer of that document or instrument.
>
> Paper-based transferable documents or instruments include bills of exchange, cheques, promissory notes, [consignment notes,] bills of lading and warehouse receipts.

Remarks

32. The definition of "paper-based transferable document or instrument" reflects the Working Group's deliberations at its forty-eighth session (A/CN.9/797, paras. 21-28). It does not aim at affecting substantive law.

33. The Working Group may wish to consider whether the definition of paper-based transferable document or instrument should be retained in light of its substantive law implications.

34. The Working Group may wish to consider whether the indicative list of paper-based transferable documents or instruments, which is inspired by article 2, paragraph 2, of the United Nations Convention on the Use of Electronic Communications in International Contracts (New York, 2005) (the "Electronic Communications Convention"), should be included in the definition of "paper-based transferable document or instrument" or in explanatory material (A/CN.9/768, para. 34 and A/CN.9/797, paras. 25-26), bearing also in mind the content of draft article 2, paragraph 3. The Working Group may also wish to consider whether to retain the reference to consignment notes, which are not transferable in certain jurisdictions.

> "*electronic record*" means information generated, communicated, received or stored by electronic means [, including, where appropriate, all information logically associated with or otherwise linked [together] [thereto] [to it] [so as to become part of the record], whether generated contemporaneously or [not] [subsequently]].

Remarks

35. The definition of "electronic record" is based on the definition of "data message" contained in the UNCITRAL Model Law on Electronic Commerce (1996) and in the Electronic Communications Convention. The bracketed text aims at highlighting the fact that information may be associated with the electronic transferable record at the time of issuance or thereafter (e.g., information related to endorsement) (A/CN.9/797, paras. 43-45). That bracketed text is also meant to clarify that some electronic records could, but do not need to, include a set of composite information (A/CN.9/797, para. 43). The Working Group may also wish to recall its discussion of "electronic record" with respect to draft article 10 (A/CN.9/828, para. 31).

> "*issuer*" means a person that issues, directly or with the assistance of a third party, an electronic transferable record.

Remarks

36. The Working Group may wish to consider deleting the definition of "issuer", which is not used in the draft Model Law after the deletion of draft provisions on issuance (A/CN.9/797, paras. 64-67) and on retention (A/CN.9/834, para. 77).

37. The words ", directly or with the assistance of a third party," aim at clarifying that when an electronic transferable record is issued by a third-party service provider upon the issuer's request, the third-party service provider is not considered an issuer under the draft provision (A/CN.9/768, para. 33).

> ["*control*" of an electronic transferable record means the [de facto power to deal with or dispose of that electronic transferable record] [power to factually deal with or dispose of the electronic transferable record] [control in fact of the electronic transferable record].]

Remarks

38. The draft definition of "control" has been placed in square brackets further to a decision of the Working Group at its fiftieth session made in conjunction with its consideration of draft article 17 on possession (A/CN.9/828, paras. 66-67). Draft article 17 aims at setting forth the requirements necessary to establish control as the functional equivalent of possession. In light of the fact that possession is a notion defined in substantive law, the Working Group may wish to consider whether a definition of "control" is necessary (A/CN.9/834, para. 83).

"*amendment*" means the modification of information contained in the electronic transferable record in accordance with the procedure set out in draft article 20.

Remarks

39. The Working Group may wish to consider deleting this definition in light of the fact that the term "amendment" occurs only in draft article 20, which, in turn, currently contains a functional equivalence rule. Moreover, defining the term "amendment" might be interpreted as having unintended substantive law implications.

"*performance of obligation*" means the delivery of goods or the payment of a sum of money as specified in a paper-based transferable document or instrument or an electronic transferable record.

Remarks

40. The Working Group may wish to consider whether to retain this definition in light of its substantive law implications. The draft definition refers generally to the delivery of goods or the payment of a sum of money as mentioned in article 2, paragraph 2, of the Electronic Communications Convention (A/CN.9/761, para. 22). The term "performance of obligation" appears in the definitions of "electronic transferable record" and of "paper-based transferable document or instrument".

"*obligor*" means the person [indicated] in a paper-based transferable document or instrument or in an electronic transferable record as having the obligation to perform [the obligation contained in that document, instrument or record].

Remarks

41. The definition of "obligor" has been reviewed in order to further clarify that it has only descriptive value and that substantive law shall determine who the obligor is. The Working Group may wish to consider whether the definition of "obligor" should be retained in light of the fact that the notion may be defined under substantive law.

42. The term "obligor" currently appears only in draft article 18 on presentation. The Working Group may wish to consider the continued relevance of that draft definition in light of the final form of that article.

43. If the definition of "obligor" is retained, the Working Group may wish to consider whether the term "[indicated]" is appropriate or whether another term may be used (see para. 27 above).

"*replacement*" means substitution of an electronic transferable record for a paper-based transferable document or instrument or [vice versa] [conversely] [substitution of a paper-based transferable document or instrument for an electronic transferable record].

Remarks

44. The Working Group may wish to consider deleting the definition of the term "replacement" since that term no longer appears in the draft Model Law.

"**Draft article 4. Interpretation**

"1. This Law is derived from a model law of international origin. In the interpretation of this Law, regard is to be had to the international origin and to the need to promote uniformity in its application [and the observance of good faith].

"2. Questions concerning matters governed by this Law which are not expressly settled in it are to be settled in conformity with the general principles on which this Law is based."

Remarks

45. Draft article 4 is intended to draw the attention of courts and other authorities to the fact that domestic enactments of the Model Law should be interpreted with reference to their

international origin in order to facilitate uniform interpretation (A/CN.9/768, para. 35). Similar wording is found in article 3 of the UNCITRAL Model Law on Electronic Commerce and in article 4 of the UNCITRAL Model Law on Electronic Signature.

46. The words "This Law is derived from a model law of international origin" have been included pursuant to a decision made by the Working Group at its forty-seventh session, in order to emphasize that the law constituted an enactment of a model law with international origin (A/CN.9/768, para. 35). Those words do not appear in other UNCITRAL texts. Alternatively, the Working Group may wish to consider whether that language should be contained and the underlying notion be further developed in guidance materials.

47. The Working Group may wish to consider whether the words "[and the observance of good faith]" should be retained in light of the possible substantive law implications, and, in particular, of the relevance that the notion of good faith has in the substantive law of paper-based transferable documents or instruments. Reference to good faith is contained in several other UNCITRAL texts, including those on electronic commerce. Alternatively, the Working Group may wish to clarify whether that reference is intended as to good faith in the application of the law.

48. The notion of "general principles" contained in paragraph 2 has been used in several UNCITRAL texts. Article 7 of the United Nations Convention on Contracts for the International Sale of Goods (Vienna, 1980) ("CISG") is the provision containing that notion that has been most interpreted by case law.

49. The notion of "general principles" contained in draft paragraph 2 refers to the general principles of electronic communications (A/CN.9/797, para. 29), including those already stated in relevant UNCITRAL texts. In this line, the Working Group may wish to confirm that the fundamental principles of non-discrimination against electronic communications, technological neutrality and functional equivalence are general principles underlying the draft Model Law. Other general principles might be identified as the work of the Working Group progresses.

50. Some of the general principles underlying the CISG, such as party autonomy and good faith, may also be relevant to define the notion of general principles contained in the draft Model Law.

> "**Draft article 5. Party autonomy [and privity of contract]**
>
> "1. The parties may derogate from or vary by agreement the provisions of this Law [except articles 1, 2, 4, 5 paragraph 2, 6, 7, […]][, unless that agreement would not be valid or effective under applicable law].
>
> "2. Such an agreement does not affect the rights of any person that is not a party to that agreement."

Remarks

51. The Working Group highlighted the importance of party autonomy in the draft provisions (A/CN.9/797, para. 30) and, based on the general applicability of that principle, agreed to identify which draft articles could not be derogated from (A/CN.9/797, para. 32).

52. While party autonomy is a fundamental principle underpinning commercial law and UNCITRAL texts, the Working Group may wish to note that that principle has found some limits in its implementation in UNCITRAL texts on electronic commerce in order to avoid conflicts with rules of mandatory application, such as those on public policy. Article 4 of the UNCITRAL Model Law on Electronic Commerce and article 5 of the UNCITRAL Model Law on Electronic Signature provide examples of that approach. The words "[, unless that agreement would not be valid or effective under applicable law]", contained in article 5 of the UNCITRAL Model Law on Electronic Signature, have been inserted in draft article 5 of the Model Law to reflect that approach.

53. Alternatively, the possibility of derogating from or varying a provision of the draft Model Law could be indicated by inserting specific language, such as "unless otherwise agreed by the parties", in the provision that may be derogated from or varied by the parties.

"**Draft article 6. Information requirements**

"Nothing in this Law affects the application of any rule of law that may require a person to disclose its identity, place of business or other information, or relieves a person from the legal consequences of making inaccurate, incomplete or false statements in that regard."

54. The Working Group decided to retain draft article 6 with the understanding that it reminds parties of the need to comply with possible disclosure obligations that might exist under other law (A/CN.9/797, para. 33).

B. Provisions on electronic transactions

55. The Working Group at its forty-eighth session decided to retain draft articles 7-9 as a separate section (A/CN.9/797, para. 34). The Working Group may wish to review its decision in light of the final form of the draft Model Law as well as the content of those articles.

"**Draft article 7. Legal recognition of an electronic transferable record**

"An electronic transferable record shall not be denied legal effect, validity or enforceability on the sole ground that it is in electronic form."

Remarks

56. Draft article 7 sets forth the principle of non-discrimination. At its forty-ninth session, the Working Group decided to retain draft article 7 in its current form (A/CN.9/804, para. 17, see also A/CN.9/768, para. 39).

"**Draft article 8. Writing**

"Where the law requires that information should be in writing, that requirement is met with respect to an electronic transferable record if the information contained therein is accessible so as to be usable for subsequent reference."

Remarks

57. Draft article 8 reflects the Working Group's deliberations at its forty-ninth session (A/CN.9/804, paras. 18-19). It establishes the requirements for the functional equivalence of the written form with respect to information contained in or related to electronic transferable records (A/CN.9/797, para. 37). The general rule on functional equivalence between electronic and written form should be contained in the law on electronic transactions (A/CN.9/797, para. 38). Draft article 8 refers to the notion of "information" instead of "communication" as not all relevant information might necessarily be communicated (A/CN.9/797, para. 37).

58. Pursuant to a decision of the Working Group at its fifty-first session, the explanatory material to the draft provisions will reflect the understanding that any legal requirement contained in the draft Model Law implies consequences for the case it is not met, making it not necessary to explicitly refer to those consequences (A/CN.9/834, paras. 43 and 46). Accordingly, the words "or provides consequences for the absence of a writing" have been deleted from draft article 10 and elsewhere throughout the draft Model Law since they are redundant.

59. At the forty-ninth session, it was suggested that draft article 8 might not be necessary as the fulfilment of the functional equivalence of the "writing" requirement was implied in the definition of "electronic transferable record" in draft article 3. In response, it was stated that a rule on the "writing" requirement was necessary in light of the other rules on functional equivalence contained in the draft provisions (A/CN.9/804, para. 18). The Working Group may wish to consider the desirability of maintaining draft article 8 in light of draft articles 10 and 11.

60. In case of law applicable to electronic transferable records existing only in electronic form, the Working Group may wish to confirm that the law governing those records should

set forth the same requirements contained in draft article 8, i.e. that information should be accessible so as to be usable for subsequent reference (A/CN.9/768, para. 42).

"**Draft article 9. Signature**

"Where the law requires a signature of a person, that requirement is met [with respect to] [in relation to] [by] an electronic transferable record if:

(a) A method is used to identify that person and to indicate that person's intention in respect of the information contained in the electronic record; and

(b) The method used is either:

(i) As reliable as appropriate for the purpose for which the electronic record was generated, in the light of all the relevant circumstances, including any relevant agreement; or

(ii) Proven in fact to have fulfilled the functions described in subparagraph (a) above, by itself or together with further evidence."

Remarks

61. Draft article 9 reflects the Working Group's deliberations at its forty-ninth session (A/CN.9/804, para. 20). It establishes the requirements for the functional equivalence of "signature" (ibid.) when substantive law either contains an explicit signature requirement or provides consequences for the absence of a signature (implicit signature requirement) (A/CN.9/797, para. 46; see also A/CN.9/834, para. 43). Draft article 9 is based on the text of article 9, paragraph 3, of the Electronic Communications Convention. The words "or provides consequences for the absence of a signature" have been deleted pursuant to a decision of the Working Group at its fifty-first session (A/CN.9/834, para. 46).

62. The reference in draft subparagraph (b)(i) to "as reliable as appropriate" is similar to that contained in article 9, paragraph 3, of the Electronic Communications Convention and is distinct from the references contained in other draft articles to a "reliable method". The Working Group may wish to clarify whether that reference is distinct from the reference to a method "as reliable as appropriate" contained in draft article 17 since that draft article deals with functional equivalence of possession, which is not discussed in the Electronic Communications Convention.

63. The explanatory note to the Electronic Communications Convention provides guidance on the content and operation of the notion of "reliability" in the context of article 9, paragraph 3, of that Convention.[2] The Working Group may wish to confirm that the guidance provided in that explanatory note would be appropriate in interpreting draft article 9, subparagraph (b)(i).

64. In that respect, the Working Group may wish to clarify whether the general reliability standard contained in draft article 11 would also apply to draft article 9, subparagraph (b)(i) (A/CN.9/804, para. 20).

65. Another option would be to include in draft article 9 text similar to the requirements set forth in article 6, paragraph 3, of the Model Law on Electronic Signatures, thus providing a specific reliability standard applicable only to draft article 9, subparagraph (b)(i). It should, however, be noted that the Working Group had already agreed that such "two-tier" approach would not be adopted in the draft provisions (A/CN.9/797, para. 40).

66. The Working Group may wish to consider whether the text of draft article 9 should better clarify that that provision applies to electronic transferable records only and not to other electronic records that are not transferable but are somehow related to an electronic transferable record. Alternative wording is suggested to that end. The words "with respect to" have been used in the chapeau of draft article 9. The words "in relation to" are used in article 9, paragraph 3, of the Electronic Communications Convention. The word "by" has

[2] United Nations, Explanatory note by the UNCITRAL secretariat on the United Nations Convention on the Use of Electronic Communications in International Contracts, New York, 2007, paras. 161-164.

been used in other UNCITRAL provisions on functional equivalence and may suggest a narrower application of draft article 9.

Remarks on "original"

67. After noting that the notion of "original" in the context of electronic transferable records was different from that adopted in other UNCITRAL texts (A/CN.9/797, para. 47) and that the main purpose of a functional equivalence rule for that notion in the context of electronic transferable records should be the prevention of multiple claims (A/CN.9/804, para. 21), the Working Group agreed that there was no need to include a functional equivalence rule for "original" in the draft provisions (A/CN.9/804, para. 40). It was explained that the goal of avoiding multiple claims in the context of electronic transferable records could be achieved through the notion of "control". It was further explained that the notion of "control" could identify both the person entitled to performance and the object of control (A/CN.9/804, para. 39).

C. Use of electronic transferable records

"Draft article 10. [Paper-based transferable document or instrument] [Operative electronic record] [Electronic transferable record]

"1. Where the law requires a paper-based transferable document or instrument, that requirement is met by an electronic record if:

(a) The electronic record contains the information that would be required to be contained in an equivalent paper-based transferable document or instrument; and

(b) A method is employed:

(i) That is as reliable as appropriate to identify that electronic record as the [authoritative] record constituting the electronic transferable record;

(ii) [To render] [That renders] that electronic record capable of being subject to control from its creation until it ceases to have any effect or validity; and

(iii) That is as reliable as appropriate, to retain the integrity of the electronic transferable record".

"2. The criteria for assessing integrity shall be whether information contained in the electronic transferable record, including any [authorized] change that arises from its creation until it ceases to have any effect or validity, has remained complete and unaltered apart from any change which arises in the normal course of communication, storage and display. The standard of reliability required shall be assessed in the light of the purpose for which the information contained in the electronic transferable record was generated and in the light of all the relevant circumstances."

Remarks

68. Draft article 10 has been recast in light of the Working Group's deliberations at its fifty-first session (A/CN.9/834, paras. 21-30, 85-94 and 99). The current text aims at combining the two prevalent approaches to avoid multiple claims for performance, i.e. "singularity" and "control" (A/CN.9/834, para. 86).

69. Draft article 10 aims to offer a functional equivalence rule for the use of paper-based transferable documents or instruments by setting forth the requirements to be met by an electronic record. The Working Group agreed to introduce draft article 10 in light of its discussions on the notion of uniqueness and its decision to delete a rule on uniqueness (A/CN.9/804, paras. 71 and 74). It was added that resorting to the notion of "control" would make it possible not to refer to the notion of "uniqueness", which posed technical challenges (A/CN.9/804, para. 38).

70. The Working Group agreed that reference to the definition of "electronic record" would suffice to provide for cases when, as it may happen in certain registry systems, there

might be data elements that, taken together, provided the information constituting the electronic transferable record, with no discrete record constituting the electronic transferable record (A/CN.9/828, para. 31).

71. The words "or provides consequences for its absence" have been deleted in draft paragraph 1 pursuant to a decision of the Working Group at its fifty-first session (A/CN.9/834, para. 46).

72. Subparagraph 1(a) states that the electronic record should contain the information required in a paper-based transferable document or instrument. The Working Group may wish to consider whether the word "equivalent" before the word "paper-based" could be misleading in view of the purpose of draft article 10 to provide a rule on functional equivalence. Alternative drafting, such as the use of the word "respective", might also be considered.

73. Subparagraph 1(b)(i) sets forth the requirement to identify an electronic record as the record containing the operative or authoritative information necessary to establish that record as an electronic transferable record. That requirement implements the "singularity" approach (A/CN.9/834, para. 86). The reliability standard contained in subparagraph 1(b)(i) should be assessed against general reliability standards (A/CN.9/828, para. 37).

74. The Working Group may wish to consider whether to retain the word "authoritative" to identify the electronic transferable record (A/CN.9/834, paras. 101-104) in light of the fact that information establishing the electronic record as an electronic transferable record is, by itself, authoritative and therefore that qualification might, on the one hand, be unnecessary and, on the other hand, have the unintended effect of fostering litigation on the meaning of the term "authoritative".

75. If the Working Group decides not to retain the word "authoritative", it may further wish to consider whether the provision might be further simplified as follows:

> "(i) That is as reliable as appropriate to identify that electronic record as the electronic transferable record;".

76. Subparagraph 1(b)(ii) sets forth the requirement that the electronic transferable record should be capable of being controlled from its creation until it ceases to have any effect or validity, particularly in order to allow for its transfer. That requirement implements the "control" approach (A/CN.9/834, para. 86). Subparagraph 1(b)(ii) is not subject to a reliability test as draft article 17 provides the reliability standard to assess the method used to establish control (A/CN.9/828, para. 38). The suggestion of using the words "that renders" instead of "to render" is meant to be purely editorial.

77. The draft provision reflects the view that an electronic transferable record might not necessarily be actually subject to control (A/CN.9/804, para. 61). This could happen, for instance, when a token-based electronic transferable record is lost.

78. With regard to paragraph 2, at its fiftieth session, the Working Group agreed to insert a provision on the assessment of the reliability standard for the notion of integrity (A/CN.9/828, para. 49). That provision indicates that an electronic transferable record retains integrity when any set of information related to legally relevant changes from its creation until it ceases to have any effect or validity (as opposed to changes of purely technical nature) remains complete and unaltered (A/CN.9/804, para. 29). It is inspired by article 8, paragraph 3, of the UNCITRAL Model Law on Electronic Commerce.

79. The Working Group may wish to consider whether the word "authorized" in draft paragraph 2 should be retained in light of its discussions on the desirability to record all or only selected changes, and on the difference between authorized and legitimate changes (A/CN.9/834, paras. 27-30; A/CN.9/828, paras. 42-44; A/CN.9/804, paras. 30-32).

80. The Working Group may wish to consider the definition of an electronic transferable record in draft article 3 in conjunction with its deliberations on draft article 10 (see paras. 22-31 above, and A/CN.9/834, paras. 95-100).

"**Draft article 11. General reliability standard**

"1. The standard of reliability required shall be assessed in the light of the purpose for which the information contained in the electronic transferable record was generated and in the light of all the relevant circumstances.

"2. In determining whether, or to what extent, a method is reliable [for the purposes of articles 10, 17 and …], regard may be had to the following factors:

(a) Level of assurance of data integrity;

(b) Ability to prevent unauthorized access to and use of the system;

(c) Quality of hardware and software systems;

(d) Regularity and extent of audit by an independent body;

(e) The existence of a declaration by a supervisory body, an accreditation body or a voluntary scheme regarding the reliability of the method;

(f) [Any agreement among the parties;]

(g) Any other relevant factor."

Remarks

81. Draft article 11 aims at providing a general reliability standard. At the Working Group's forty-ninth session, different views were expressed with respect to the desirability of inserting such provision (A/CN.9/804, paras. 41-49).

82. On the one hand, it was indicated that the draft provisions should provide general guidance on the meaning of reliability and set out the criteria for meeting that standard. It was added that, while party autonomy could suffice to establish reliability standards in closed systems, there was still a need for the draft provisions to set out reliability standards applicable to open systems. It was further mentioned that if a general reliability standard were to be included, it should be drafted in a manner mindful of technological neutrality (A/CN.9/804, para. 43).

83. Moreover, the inclusion of additional factors to assess reliability was suggested. Those factors related to: quality of staff; sufficient financial resources and liability insurance; existence of a notification procedure for security breaches and of reliable audit trails (A/CN.9/804, paras. 44-45).

84. However, at that session the view was also expressed that the existing and newly-suggested reliability factors were too detailed and that the provision was regulatory in nature. It was added that the adoption of such detailed requirements could impose excessive costs on business and ultimately hamper electronic commerce. It was further noted that those requirements could lead to increased litigation based on complex technical matters. It was suggested that a reference to reliable methods based on internationally accepted standards and practices should instead be inserted in the draft provisions (A/CN.9/804, para. 46).

85. In that same line, it was stated that the presence of a general reliability standard could hamper use of electronic transferable records as legal consequences of failure to meet those standards were not clear. It was further indicated that caution should be exercised so as not to make the draft provisions untenable in practice. It was also noted that there was no need for a general reliability standard as each draft article containing a reliability standard should include in itself a provision specific to that context (A/CN.9/804, para. 42).

86. In conclusion, the Working Group agreed to further consider draft article 11 as a possible general rule on system reliability. The Working Group also agreed to consider the adoption of specific standards for each draft provision referring to a reliable method (A/CN.9/804, para. 49).

87. At its fiftieth session, the Working Group agreed to incorporate in draft article 11 text providing general guidance on the reliability standard (A/CN.9/828, paras. 47 and 49). That language, inspired also by article 17, paragraph 4, of the UNCITRAL Model Law on Electronic Commerce, has been inserted as paragraph 1 of draft article 11.

88. Draft articles 10, on the information constituting the electronic transferable record, 12 on indication of time and place, 20 on amendment, 22 and 23 on change of medium, and 24 on division and consolidation refer to the use of a reliable method. The Working Group may wish to confirm that draft article 11 would suffice to assess the reliability of the various methods referred to in those draft articles.

89. In that respect, the Working Group may wish to consider whether the word "required" in paragraph 1 is adequate to describe the relation between the general reliability standard and the various provisions where that standard is relevant.

90. Draft articles 9 on signature, 10 with respect to integrity, and 17 on possession and control contain a specific standard for the assessment of reliability. The Working Group may wish to clarify the relation, if any, between the general reliability standard contained in draft article 11 and the specific reliability standards contained in those draft articles.

91. In case no relation between the general reliability standard contained in draft article 11 and the specific reliability standards contained in draft articles 9, 10 and 17 existed, the Working Group may wish to consider adopting language excluding those articles from the scope of application of the general reliability standards, for example, by adding the following statement at the beginning of draft article 11, paragraph 1: "Unless otherwise provided in this Law,".

92. The Working Group may wish to discuss whether subparagraph 2(a) should refer to data integrity in the system, to integrity of the electronic transferable record or to both, in light also of draft article 10.

93. The Working Group may also wish to discuss whether subparagraph 2(b) should refer to unauthorized access and use of the system or rather to unauthorized access and use of the method employed to establish control in light also of draft article 17. In that respect, the Working Group may wish to clarify the relation between the reference to a "system" contained in subparagraph 2(b) and the reference to "hardware and software systems" contained in subparagraph 2(c).

94. The Working Group may further wish to consider dealing with system reliability in the explanatory material discussing third-party service providers (A/CN.9/834, para. 78).

95. Draft subparagraph 2(f) was inserted to highlight the relevance of any agreement of the parties when assessing reliability.

(A/CN.9/WG.IV/WP.135/Add.1) (Original: English)

Note by the Secretariat on a draft model law on electronic transferable records

ADDENDUM

Contents

II. Draft Model Law on Electronic Transferable Records (*continued*)

C. Use of electronic transferable records (Articles 12-24)

"**Draft article 12. Indication of time and place in electronic transferable records**

"1. Where the law requires or permits the indication of time or place with respect to a paper-based transferable document or instrument, a reliable method shall be employed to indicate that time or place with respect to an electronic transferable record.

["2. An electronic transferable record is deemed to be dispatched at the place where the originator has its place of business and is deemed to be received at the place where the addressee has its place of business.

"3. This article applies notwithstanding that the place where the information system supporting an electronic address is located may be different from the place where the electronic transferable record is deemed to be received under paragraph 2.]"

Remarks

1. Draft article 12 reflects the Working Group's deliberations at its fifty-first session (A/CN.9/834, paras. 36-46). At that session, the Working Group took note that time and place of dispatch and receipt had different relevance for contract formation and management, and for the use of electronic transferable records and decided to review the draft provision accordingly (A/CN.9/834, para. 36).

2. At that session, the Working Group also noted that registry systems would record the relevant events in the life cycle of the electronic transferable record with time-stamping, thus determining time automatically. It was further noted that applicable law could allow parties to amend that automatic determination by agreement. Moreover, it was indicated that users of registry systems would agree to contractual rules containing a choice of applicable law. It was concluded that those elements reduced the practical relevance of determining time and place with respect to electronic transferable records (A/CN.9/834, para. 36). However, the Working Group may wish to note that the determination of time and place with respect to an electronic transferable record may occur otherwise in token-based systems.

3. Draft paragraph 1 refers to the words "or permits" in order to clarify its application to cases in which the law merely permits but not requires the indication of time or place with respect to a paper-based transferable document or instrument (A/CN.9/834, para. 42).

4. Draft paragraphs 2 and 3 are based on article 10 of the Electronic Communications Convention (A/CN.9/797, para. 61; see also A/CN.9/768, paras. 68-69), which, however, provides a rule on time of receipt and dispatch designed for the exchange of electronic communications and, in particular, for contract formation. In light of its deliberations at its fifty-first session (A/CN.9/834, paras. 36-46), and of the fact that substantive law is likely to contain provisions on time and place, the Working Group may wish to consider whether draft paragraphs 2 and 3 should be retained.

5. The Working Group may wish to consider whether the adoption of a provision relating to the irrelevance of the location of information systems for the determination of the place of business, when such determination is required by substantive law, would be desirable. The scope of such provision would be limited to clarifying that the location of an information system, or parts thereof, is not, as such, an indicator of a place of business. That clarification might be particularly useful in light of the likelihood that third-party service providers would use equipment and technology located in various jurisdictions. Such provision, based on article 6 of the Electronic Communications Convention, could read as follows:

"1. A location is not a place of business merely because that is:

(a) Where equipment and technology supporting an information system used by a party in connection with electronic transferable records are located; or

(b) Where the information system may be accessed by other parties.

2. The sole fact that a party makes use of an electronic address or other element of an information system connected to a specific country does not create a presumption that its place of business is located in that country."

6. Alternatively, the Working Group may wish to confirm whether the provisions relating to the irrelevance of the location of information systems for the determination of the place of business, and contained in other UNCITRAL texts on electronic commerce, could be relevant as general principles on which this Model Law is based under draft article 4, paragraph 2 of the Model Law.

"**Draft article 13. Consent to use an electronic transferable record**

"1. Nothing in this Law requires a person to use an electronic transferable record without that person's consent.

"2. The consent of a person to use an electronic transferable record may be inferred from the person's conduct."

Remarks

7. Draft article 13 reflects the Working Group's deliberations at its forty-eighth session (A/CN.9/797, paras. 62-63). The Working Group may wish to consider whether draft article 13 should be placed after draft article 5 on party autonomy.

"**Draft article 14. Issuance of multiple originals**

"1. Where the law permits the issuance of more than one original of a paper-based transferable document or instrument, this may be achieved with respect to electronic transferable records by issuance of multiple electronic transferable records.

"[2. Where the law requires the indication of the total number of multiple original paper-based transferable documents or instruments issued, the total number of multiple electronic transferable records issued shall be indicated in those multiple records.]"

Remarks

8. Draft article 14 reflects the Working Group's deliberations at its forty-eighth (A/CN.9/797, paras. 47 and 68) and fifty-first (A/CN.9/834, paras. 47-52) sessions. The possibility of issuing multiple originals of a paper-based transferable document or instrument exists in several fields of trade (A/CN.9/WG.IV/WP.124, para. 49) and is recognized in article 47, subparagraph 1(c) of the United Nations Convention on Contracts for the International Carriage of Goods Wholly or Partly by Sea (New York, 2008) (the "Rotterdam Rules"). Draft article 14 aims at enabling that possibility in an electronic environment (A/CN.9/834, para. 47), in line with a survey of existing practice that evidenced the use of multiple originals of electronic bills of lading.

9. An alternative approach to drafting paragraph 1, based on the general principle contained in draft article 1, paragraph 2, could focus on clarifying that:

> "Nothing in this Law precludes the issuance of multiple electronic transferable records."

10. The Working Group may wish to confirm that each electronic transferable record in a set of multiple electronic transferable records may be controlled by a different entity, if parties so agree.

11. Some of the functions pursued with the issuance and use of multiple paper-based transferable documents or instruments may be achieved in an electronic environment, especially if using a registry system, by attributing control on one electronic transferable record selectively to multiple entities. Based on the general principle contained in draft article 1, paragraph 2, the Model Law does not preclude control of an electronic transferable record by multiple entities, where allowed by substantive law.

12. Paragraph 2 has been redrafted pursuant to the Working Group's decision at its fifty-first session to limit its scope to cases where substantive law contained a requirement to indicate the number of multiple originals (A/CN.9/834, para. 51).

13. The Working Group may wish to consider whether a provision dealing with the co-existence of multiple originals issued on different media should be inserted in the draft Model Law.

> "**Draft article 15. Substantive information requirements of electronic transferable records**
>
> "Nothing in this Law requires additional [substantive] information for [the issuance of] an electronic transferable record beyond that required for [the issuance of] a paper-based transferable document or instrument."

Remarks

14. Draft article 15 reflects a decision of the Working Group at its forty-eighth session (A/CN.9/797, para. 73). It states that no additional substantive information is required for the issuance of an electronic transferable record than that required for a corresponding paper-based transferable document or instrument.

15. The Working Group may wish to consider whether to retain draft article 15 in light of the fact that the current text of draft article 10 sets forth that an electronic transferable record should contain all information contained in a paper-based document or instrument.

16. The Working Group may wish to consider whether draft article 15 contains a general rule applicable from the time of creation of the electronic transferable record until it ceases to have any effect or validity. In that case, the Working Group may wish to delete the reference to "the issuance of" as it might limit the scope of the draft article.

17. The Working Group may wish to also consider whether the word "substantive" should be included between the words "additional" and "information" to align the article with its title.

> "**Draft article 16. Additional information in electronic transferable records**
>
> "Nothing in this Law precludes the inclusion of information in an electronic transferable record in addition to that contained in a paper-based transferable document or instrument."

Remarks

18. Draft article 16 states that an electronic transferable record may contain information in addition to that contained in a paper-based transferable document or instrument. In particular, dynamic information, i.e. information that may change periodically or continuously based on an external source, may be included in an electronic transferable record due to its nature but not in a paper-based document or instrument (A/CN.9/768, para. 66, and A/CN.9/797, para. 73).

"**Draft article 17. [Possession] [Control]**

"1. Where the law requires the possession of a paper-based transferable document or instrument, that requirement is met with respect to an electronic transferable record if:

(a) A method is used to establish exclusive control of that electronic transferable record by a person and to reliably [identify] [establish] that person as the person in control; and

(b) The method used is either:

(i) As reliable as appropriate for the purpose for which the electronic transferable record was generated, in light of all the relevant circumstances, including any relevant agreement; or

(ii) Proven in fact to have fulfilled the functions described in subparagraph (a) above, by itself or together with further evidence.

"2. Where the law requires transfer of possession of a paper-based transferable document or instrument, that requirement is met with respect to an electronic transferable record through the transfer of control over the electronic transferable record."

Remarks

19. Draft article 17 reflects the Working Group's deliberations at its forty-eighth (A/CN.9/797, para. 83), forty-ninth (A/CN.9/804, paras. 51-62 and 63-67), fiftieth (A/CN.9/828, paras. 50-56) and fifty-first (A/CN.9/834, paras. 34 and 35 and 91-94) sessions. It sets forth control of an electronic transferable record as the functional equivalent of possession of a paper-based transferable document or instrument.

20. The words "or provides consequences for the absence of possession" in draft paragraph 1 and "or provides consequences for the absence of transfer of possession" in draft paragraph 2 have been deleted pursuant to a decision of the Working Group at its fifty-first session (A/CN.9/834, para. 46).

21. With regard to draft paragraph 1(a), it was explained that reference to the person in control of the electronic transferable record does not imply that that person is also the rightful person in control of that record as this is for substantive law to determine (A/CN.9/828, para. 61) and that reference to the person in control does not exclude the possibility of having more than one person in control (A/CN.9/828, para. 63).

22. With respect to "identify", the Working Group may wish to note that the electronic transferable record in itself does not necessarily identify the person in control, but rather the method or system employed to establish control as a whole performs that function (A/CN.9/828, para. 63). Moreover, identification should not be understood as implying an obligation to name the person in control, as the draft Model Law allows for the issuance of electronic transferable records to bearer, which implies anonymity (A/CN.9/828, para. 51). However, anonymity for commercial law purposes may not preclude the possibility of identifying the person in control for other purposes, such as law enforcement.

23. With respect to "establish", the Working Group may wish to consider whether that word has substantive law implications.

24. Draft paragraph 2 sets forth that transfer of control over an electronic transferable record is the functional equivalent of delivery, i.e. transfer of possession, of a paper-based transferable document or instrument (A/CN.9/834, paras. 31-33).

25. The Working Group may also wish to consider whether "Control" would be an appropriate title for draft article 17 in light of its content.

26. The Working Group may also wish to consider whether draft article 17 should be placed consecutively after draft article 10 (A/CN.9/834, para. 92).

27. The Working Group may wish to clarify the relationship between draft article 17 and draft article 11, which contains a general reliability standard.

28. The Working Group may wish to refer to the draft definition of "control" in draft article 3 when considering draft article 17 (A/CN.9/828, para. 66 and A/CN.9/834, para. 83).

"**Draft article 18. Presentation**

"Where the law requires a person to present [for performance or acceptance] a paper-based transferable document or instrument, that requirement is met with respect to an electronic transferable record by the transfer of an electronic transferable record to the obligor, with endorsement if required[, for performance or acceptance]."

Remarks

29. Draft article 18 reflects the Working Group's deliberations at its fiftieth session (A/CN.9/828, para. 73). The words "or provides consequences for non-presentation" have been deleted pursuant to a decision of the Working Group at its fifty-first session (A/CN.9/834, para. 46).

30. Draft article 18 was intended to provide both for presentation and for surrender of a paper-based transferable document or instrument for its performance (A/CN.9/WG.IV/WP.124/Add.1, para. 12). However, presentation is not limited to requests for performance, but may extend to acceptance (see paragraph 33 below). Moreover, transfer of a paper-based transferable document or instrument may not be required for presentation, as the person in control requires performance or demands acceptance upon demonstration of its control of the paper-based transferable document or instrument, but does not transfer that document or instrument (see, for instance, article 24 of the Convention Providing a Uniform Law For Bills of Exchange and Promissory Notes, 1930).

31. In light of the above, the Working Group may wish to consider the following text of draft article 18:

"Where the law requires a person to present [for performance or acceptance] a paper-based transferable document or instrument, that requirement is met with respect to an electronic transferable record if a reliable method is used to present the electronic transferable record."

32. In that respect, the Working Group may wish to note that in existing electronic systems presentation of an electronic transferable record on a due date may be automatic, which is not possible in a paper-based environment.

33. The Working Group may wish to consider whether the words "for performance or acceptance" should be retained in light of the fact that under substantive law presentation could refer to a number of purposes, such as presentation of a bill of exchange for acceptance (A/CN.9/804, para. 78).

34. With regard to surrender of the electronic transferable record, the Working Group may wish to consider that the design of the system for electronic transferable records management may not require the transfer of control of an electronic transferable record to the obligor upon performance, especially in case of third-party registries. In that case, the registry operator may terminate and archive the electronic transferable record directly, upon confirmation of performance. In that regard, the Working Group may also wish to note its decision to delete a draft article on termination of electronic transferable records (A/CN.9/834, para. 68).

"**Draft article 19. Endorsement**

"Where the law requires or permits the endorsement in any form of a paper-based transferable document or instrument, that requirement is met with respect to an electronic transferable record if information [relating to the endorsement] [constituting endorsement] [indicating the intention to endorse] is [logically associated or otherwise linked to] [included in] that electronic transferable record and that information is compliant with the requirements set forth in articles 8 and 9."

Remarks

35. Draft article 19 reflects the Working Group's deliberations at its fiftieth session (A/CN.9/828, para. 80). The words "or provides consequences for the absence of endorsement" have been deleted pursuant to a decision of the Working Group at its fifty-first session (A/CN.9/834, para. 46).

36. The Working Group may wish to consider the substitution of the words "relating to the endorsement" with the words "indicating the intention to endorse" to better specify that the satisfaction of the generic requirements for writing and signature set forth in articles 8 and 9 should be accompanied by the expression of the intent to endorse. Another drafting option may use the words "constituting endorsement".

37. The Working Group may wish to further consider the use of the words "logically associated with or otherwise linked to" and "included in" in light of the considerations expressed at its fiftieth session (A/CN.9/828, paras. 78 and 80) as well as of the definition of "electronic record" in draft article 3, and with a view to providing guidance on their uniform use throughout the Model Law.

"**Draft article 20. Amendment**

"Where the law requires or permits the amendment of a paper-based transferable document or instrument, that requirement is met with respect to an electronic transferable record if a reliable method is employed for amendment of information in the electronic transferable record whereby the amended information is reflected in the electronic transferable record and is readily identifiable as such."

Remarks

38. Draft article 20 has been recast in light of the suggestions received at the Working Group's fiftieth session (A/CN.9/828, paras. 86 and 90). It aims at providing a functional equivalence rule for instances in which an electronic transferable record may be amended. The words "or provides consequences for the absence of an amendment" have been deleted pursuant to a decision of the Working Group at its fifty-first session (A/CN.9/834, para. 46).

39. Based on the consideration that readily identifiable amended information is necessarily reflected in the electronic transferable record, the Working Group may wish to consider whether the second part of draft article 20 may be drafted along the following lines:

"[…] if a reliable method is employed for amendment of information in the electronic transferable record so that the amended information is readily identifiable as such."

40. The word "readily" aims at introducing a stringent standard ensuring that users may easily distinguish amendments (A/CN.9/828, para. 88). This standard relates to the fact that amendments in a paper-based environments may be easy to identify due to the nature of that medium, while that may not be the case in an electronic environment. In that respect, the Working Group may wish to clarify that the draft article does not intend to introduce a new information requirement, which might contradict draft article 15.

"**Draft article 21. Reissuance**

"Where the law permits the reissuance of a paper-based transferable document or instrument, an electronic transferable record may be reissued."

Remarks

41. Draft article 21 reflects the Working Groups deliberations at its forty-eighth (A/CN.9/797, para. 104) and fiftieth (A/CN.9/828, para. 93) sessions. It indicates that, similar to paper-based transferable documents or instruments, electronic transferable records may be reissued where substantive law so permits, such as in case of loss or destruction of the original.

42. The Working Group may wish to consider whether draft article 21 should be retained due to its declaratory value, or it should be deleted as the possibility of reissuing an electronic transferable record is already available under draft article 1, paragraph 2.

"**Draft article 22. [Change of medium] [Replacement of a paper-based transferable document or instrument with an electronic transferable record]**

"1. A change of medium of a paper-based transferable document or instrument to an electronic transferable record may be performed if a method that is as reliable as appropriate for the purpose of the change of medium is used.

2. For the change of medium to take effect, the following requirements shall be met:

(a) The electronic transferable record shall include all the information contained in the paper-based transferable document or instrument; and

(b) A statement indicating a change of medium shall be inserted in the electronic transferable record.

3. Upon issuance of the electronic transferable record in accordance with paragraph 2, the paper-based transferable document or instrument ceases to have any effect or validity.

4. A change of medium in accordance with paragraphs 1 and 2 does not affect the rights and obligations of the parties."

Remarks

43. Draft article 22 has a substantive nature due to the fact that substantive law is unlikely to contain a rule on change of medium. It aims at satisfying two main goals, i.e., enabling change of medium without loss of information and ensuring that the replaced document or record would not further circulate (A/CN.9/828, para. 95).

44. Draft article 22 reflects the suggestions made at the Working Group's forty-eighth (A/CN.9/797, paras. 102-103), fiftieth (A/CN.9/828, para. 102) and fifty-first (A/CN.9/834, paras. 57-64) sessions. By omitting the reference to substantive legal notions such as "issuer", "obligor", "holder" and "the person in control", this approach aims at accommodating the variety of schemes used in the various paper-based transferable documents or instruments. Consequently, and in light also of the need to consent to the use of electronic means set forth in draft article 13, draft article 22 does not contain any reference to consent. Substantive law, including parties' agreement, would identify those parties whose consent is relevant for change of medium (A/CN.9/834, paras. 62).

45. The Working Group may wish to consider the following draft of paragraph 1, provided for editorial purposes only:

"An electronic transferable record may replace a paper-based transferable document or instrument if a method that is as reliable as appropriate for the purpose of the change of medium is used."

46. The requirements set forth in paragraph 2 (a) and (b) are concurrent. The legal consequence for non-compliance with any of them would be the invalidity of the change of medium (A/CN.9/834, para. 58).

47. Draft paragraph 3 sets forth that, when the change of medium has taken place, the paper-based transferable document or instrument ceases to have any effect or validity. This is necessary to avoid multiplicity of claims for performance.

48. Draft paragraph 4 is intended to clarify as a statement of law that the rights and obligations of the parties are not affected by the change of medium (A/CN.9/834, para. 61).

"**Draft article 23. [Replacement of an electronic transferable record with a paper-based transferable document or instrument]**

"1. A change of medium of an electronic transferable record to a paper-based transferable document or instrument may be performed if a method that is as reliable as appropriate for the purpose of the change of medium is used.

2. For the change of medium to take effect, the following requirements shall be met:

(a) The paper-based transferable document or instrument shall include all the information contained in the electronic transferable record; and

(b) A statement indicating a change of medium shall be inserted in the paper-based transferable document or instrument.

3. Upon issuance of the paper-based transferable document or instrument in accordance with paragraph 2, the electronic transferable record ceases to have any effect or validity.

4. A change of medium in accordance with paragraphs 1 and 2 does not affect the rights and obligations of the parties."

Remarks

49. Draft article 23 provides for the case of replacement of an electronic transferable record with a paper-based transferable document or instrument. Its content mirrors that of draft article 22 (A/CN.9/834, paras. 64). A survey of business practice indicates that such replacement is the more frequent case due to the fact that a party whose involvement was not envisaged at the time of the creation of the electronic transferable record does not wish or is not in a position to use electronic means.

50. Under certain national laws, the paper-based print-out of an electronic record may fall under the definition of electronic record. However, under draft article 23, a print-out of an electronic transferable record that does not meet the requirements of that draft article would have no effect as a paper-based transferable document or instrument replacing the corresponding electronic transferable record.

51. The Working Group may wish to consider the following draft of paragraph 1, provided for editorial purposes only:

"A paper-based transferable document or instrument may replace an electronic transferable record if a method that is as reliable as appropriate for the purpose of the change of medium is used."

"**Draft article 24. Division and consolidation of an electronic transferable record**

"1. [Where the law permits the division or consolidation of a paper-based transferable document or instrument, an electronic transferable record may be divided or consolidated if:

(a) A reliable method is used to divide or consolidate the electronic transferable record[; and

(b) The divided or consolidated electronic transferable record contains a statement identifying it as such].]

"2. [Upon division or consolidation, the pre-existing divided or consolidated electronic transferable records cease to have any effect or validity]."

Remarks

52. In light of the suggestions made at the Working Group's fiftieth session, draft article 24 has been recast as a more generic functional equivalence rule including certain elements of the previous draft article (A/CN.9/828, para. 104).

53. The Working Group may wish to consider whether draft paragraph 1 should be retained for declaratory purposes, or whether draft article 1, paragraph 2 might suffice to enable division and consolidation of electronic transferable records.

54. The Working Group may also wish to consider whether draft paragraph 1(b) introduces a substantive rule and, in that case, whether it is justified in light of the use of electronic means.

55. The Working Group may further wish to consider whether to retain draft paragraph 2, which introduces a substantive rule that may not be compatible with the law and practice of securitization. Alternatively, the Working Group may wish to clarify that substantive law shall determine the effect or validity of electronic transferable records after division or consolidation.

56. In considering the standards for assessing the reliability of the method used for division and consolidation of electronic transferable records, the Working Group may wish to refer to draft article 11, on a general reliability standard, and related considerations (A/CN.9/WG.IV/WP.132, paras. 65-77).

"**Third-party service providers**"

Remarks

57. The Working Group may wish to note that, pursuant to a decision at its fifty-first session (A/CN.9/834, para. 78), the subject of third-party service providers as set out in A/CN.9/WG.IV/WP.132/Add.1, paras. 75-78 would be addressed in explanatory materials or a guidance document.

D. Cross-border recognition of electronic transferable records (Article 25)

"**Draft article 25. Non-discrimination of foreign electronic transferable records**

"1. An electronic transferable record shall not be denied legal effect, validity or enforceability on the sole ground that it was issued or used [in a foreign State] [abroad] [outside [the enacting jurisdiction]] [, or that its issuance or use involved the services of a third party based, in part or wholly, [in a foreign State] [abroad] [outside [the enacting jurisdiction]]] [, if it offers a substantially equivalent level of reliability].

"2. Nothing in this Law affects the application of rules of private international law governing a paper-based transferable document or instrument to electronic transferable records."

Remarks

58. At the forty-fifth session of the Commission in 2012, the need for an international regime to facilitate the cross-border use of electronic transferable records was emphasized.[1] The Working Group also reiterated the importance of cross-border legal recognition of electronic transferable records (A/CN.9/761, paras. 87-89).

59. Draft article 25 aims at eliminating obstacles to cross-border recognition of an electronic transferable record arising exclusively from its electronic nature. The words "in a foreign State", "abroad" and "outside [the enacting jurisdiction]" are alternatives on how to refer to the foreign jurisdiction provided for the Working Group's consideration.

60. The Working Group may wish to clarify if under draft article 25 an electronic transferable record issued in a jurisdiction that does not permit the issuance and use of electronic transferable records, but otherwise compliant with substantive law requirements of that jurisdiction, could be recognized in another jurisdiction enacting draft article 25.

61. The Working Group may wish to consider whether a requirement of substantially equivalent level of reliability should be introduced in the draft provisions. The words ", if it offers a substantially equivalent level of reliability" are inspired by article 12, paragraph 3, of the UNCITRAL Model Law on Electronic Signatures.

62. Alternatively, the Working Group may wish to clarify that draft article 25 aims only at preventing the place of origin of the electronic transferable record from being a reason in itself to deny legal validity or effect to an electronic transferable record. However, in order to achieve legal validity or effect in a certain jurisdiction, an electronic transferable record

[1] *Official Records of the General Assembly, Sixty-seventh Session, Supplement No. 17* (A/67/17), para. 83.

of foreign origin would have to comply with the substantive law requirements of that jurisdiction.

63. Paragraph 2 reflects the Working Group's understanding that the draft Model Law should not displace existing private international law applicable to paper-based transferable documents or instruments (A/CN.9/768, para. 111).

C. Report of the Working Group on Electronic Commerce on the work of its fifty-third session (New York, 9-13 May 2016)

(A/CN.9/869)

[Original: English]

Contents

I. Introduction

1. At its forty-fourth session, in 2011, the Commission mandated Working Group IV to undertake work in the field of electronic transferable records.[1]

2. At its forty-fifth session (Vienna, 10-14 October 2011), the Working Group began its work on various legal issues relating to the use of electronic transferable records, including possible methodology for future work by the Working Group (A/CN.9/737, paras. 14-88).

3. At its forty-fifth session, in 2012, the Commission reaffirmed the mandate of the Working Group relating to electronic transferable records and requested the Secretariat to continue reporting on relevant developments relating to electronic commerce.[2]

4. At its forty-sixth session (Vienna, 29 October-2 November 2012), the Working Group continued its examination of the various legal issues that arose during the life cycle of electronic transferable records (A/CN.9/761, paras. 24-89). At its forty-seventh session (New York, 13-17 May 2013), the Working Group had the first opportunity to consider the draft provisions on electronic transferable records. It was reaffirmed that the draft provisions should be guided by the principles of functional equivalence and technology neutrality, and should not deal with matters governed by the underlying substantive law (A/CN.9/768, para. 14).

5. At its forty-sixth session, in 2013, the Commission reaffirmed the mandate of the Working Group and agreed that work towards developing a legislative text in the field of electronic transferable records should continue.[3]

6. At its forty-eighth session (Vienna, 9-13 December 2013), the Working Group continued its work on the preparation of draft provisions on electronic transferable records. The Working Group also took into consideration legal issues related to the use of electronic transferable records in relationship with the Convention Providing a Uniform Law for Bills of Exchange and Promissory Notes (Geneva, 7 June 1930) and the Convention Providing a Uniform Law for Cheques (Geneva, 19 March 1931) (A/CN.9/797, paras. 109-112). At its forty-ninth session (New York, 28 April-2 May 2014), the Working Group continued its work on the preparation of draft provisions as presented in document A/CN.9/WG.IV/WP.128 and Add.1.

7. At its forty-seventh session, in 2014, the Commission reaffirmed the mandate of the Working Group to develop a legislative text on electronic transferable records that would greatly assist in facilitating electronic commerce in international trade.[4]

[2] Ibid., *Sixty-seventh Session, Supplement No. 17* (A/67/17), para. 90.

[3] Ibid., *Sixty-eighth Session, Supplement No. 17* (A/68/17), paras. 230 and 313.

[4] Ibid., *Sixty-ninth Session, Supplement No. 17* (A/69/17), para. 149.

8. At its fiftieth session (Vienna, 10-14 November 2014), the Working Group continued its work on the preparation of draft provisions as presented in document A/CN.9/WG.IV/WP.130 and Add.1. Subject to a final decision to be made by the Commission, the Working Group agreed to proceed with the preparation of a draft model law on electronic transferable records (A/CN.9/828, para. 23). At its fifty-first session (New York, 18-22 May 2015), the Working Group continued its work on the preparation of draft provisions as presented in document A/CN.9/WG.IV/WP.132 and Add.1.

9. At its forty-eighth session, in 2015, the Commission encouraged the Working Group to finalize the current work in order to submit its results at the Commission's forty-ninth session bearing in mind that an UNCITRAL model law on electronic transferable records would be accompanied by explanatory materials.[5]

10. At its fifty-second session (Vienna, 9-13 November 2015), the Working Group continued its work on the preparation of draft provisions as presented in document A/CN.9/WG.IV/WP.135 and Add.1. The Working Group proceeded with its deliberations of the notions of electronic transferable records and of control as functional equivalent of possession as well as of a general reliability standard.

II. Organization of the session

11. The Working Group, composed of all States members of the Commission, held its fifty-third session in New York from 9 to 13 May 2016. The session was attended by representatives of the following States members of the Working Group: Armenia, Belarus, Brazil, China, Colombia, Côte d'Ivoire, Czech Republic, Ecuador, El Salvador, France, Germany, Honduras, India, Indonesia, Italy, Japan, Kenya, Kuwait, Namibia, Nigeria, Pakistan, Panama, Republic of Korea, Russian Federation, Singapore, Spain, Thailand, Turkey, Uganda, United States of America and Venezuela (Bolivarian Republic of).

12. The session was also attended by observers from the following States: Belgium, Iraq, Peru, Qatar, Senegal, Sudan, Sweden, Syrian Arab Republic, Tunisia and United Republic of Tanzania.

13. The session was also attended by observers from the Holy See and the European Union.

14. The session was also attended by observers from the following international organizations:

(a) *United Nations system*: World Bank;

(b) *Intergovernmental organizations*: Caribbean Court of Justice (CCJ), Organisation Maritime de l'Afrique de L'Ouest et du Centre (OMAOC);

(c) *International non-governmental organizations*: American Bar Association (ABA), CISG Advisory Council, European Law Students' Association (ELSA), International Federation of Freight Forwarders Associations (FIATA), International Technology Law Association (ITECHLAW) and Law Association for Asia and the Pacific (LAWASIA).

15. The Working Group elected the following officers:

Chairperson: Ms. Giusella Dolores FINOCCHIARO (Italy)

Rapporteur: Ms. Omotunde M. OKE (Nigeria)

16. The Working Group had before it the following documents: (a) Annotated provisional agenda (A/CN.9/WG.IV/WP.136); and (b) A note by the Secretariat entitled "Draft Model Law on Electronic Transferable Records" (A/CN.9/WG.IV/WP.137 and Add.1).

17. The Working Group adopted the following agenda:

1. Opening of the session.

[5] Ibid., *Seventieth Session, Supplement No. 17* (A/70/17), para. 231.

2. Election of officers.
3. Adoption of the agenda.
4. Consideration of the draft Model Law on Electronic Transferable Records.
5. Technical assistance and coordination.
6. Other business.
7. Adoption of the report.

III. Deliberations and decisions

18. The Working Group engaged in discussions on the draft Model Law on Electronic Transferable Records on the basis of documents A/CN.9/WG.IV/WP.137 and Add.1. The deliberations and decisions of the Working Group are reflected in chapter IV below. The Secretariat was requested to revise the draft provisions to reflect those deliberations and decisions.

IV. Draft Model Law on Electronic Transferable Records

Draft article 1. Scope of application

Paragraphs 3 and 4

19. It was recalled that paragraph 3 had been included in draft article 1 to clarify that certain documents that might be considered transferable in some jurisdictions did not fall under the scope of the Model Law. It was added that the list of excluded documents was open-ended to provide desired flexibility to enacting States, since there was no uniformity in national legislation with regard to defining documents or instruments as transferable.

20. It was recalled that, at its fifty-second session, the Working Group agreed that States parties to the Convention Providing a Uniform Law for Bills of Exchange and Promissory Notes (Geneva, 1930) and the Convention Providing a Uniform Law for Cheques (Geneva, 1931) (the "Geneva Conventions") could exclude under paragraph 3 the documents or instruments falling under the scope of the Geneva Conventions from the scope of application of the Model Law, thus avoiding potential conflicts between the Geneva Conventions and the Model Law (A/CN.9/863, paras. 21 and 22).

21. It was suggested to delete paragraph 4, since the open-ended exclusion list in paragraph 3 was viewed as sufficient to cover the issue addressed in paragraph 4. In response, it was said that the two paragraphs were different in scope, as paragraph 3 excluded documents or instruments that could not be issued in electronic form, while paragraph 4 dealt with the exclusion of electronic transferable records existing in a purely electronic environment.

22. It was explained that paragraph 4 aimed at allowing the application of the Model Law to electronic transferable records that existed only in an electronic environment on a residual basis as in case of conflict the Model Law would not prevail over the law applicable to electronic transferable records that existed only in an electronic environment. However, concerns were expressed on the desirability of extending general principles contained in the Model Law to laws of a different nature.

23. After discussion, the Working Group agreed that paragraph 4 should be deleted and that paragraph 3 should, in addition to the current text, contain a reference to documents and instruments falling under the scope of the Geneva Conventions in square brackets as well as a reference to the law governing electronic transferable records only existing in electronic form, also in square brackets.

Draft article 2. Definitions

"electronic transferable record"

24. The Working Group referred to its conclusion that certain documents or instruments, which were generally transferable, but whose transferability was limited due to other agreements, such as straight bills of lading, would not fall under the definition of "transferable document or instrument" and that the Model Law would therefore not apply to those documents or instruments (A/CN.9/797, paras. 27 and 28). The Working Group clarified that that statement should not be interpreted as preventing the issuance of those documents or instruments in an electronic system designed to handle electronic transferable records since that prohibition was likely to result in unnecessary multiplication of systems and increase of costs.

25. In light of the information requirements contained in draft article 9, the Working Group after discussion agreed that the definition of "electronic transferable record" should read: "'electronic transferable record' is an electronic record that complies with the requirements of article 9". The view was expressed that that definition should be reviewed upon completion of the consideration of all articles of the Model Law to evaluate its appropriateness for each instance where the defined term was used.

"transferable document or instrument"

26. A reference was made to article 965 of the Swiss Code of Obligations as a possible alternative source of inspiration for the definition of "transferable document or instrument".

27. The Working Group agreed to retain the definition with editorial modifications, so that it would read "'transferable document or instrument' means a document or instrument issued on paper that entitles the holder to claim the performance of the obligation indicated in the document or instrument and to transfer the right to performance of the obligation indicated in the document or instrument through the transfer of that document or instrument".

Draft article 3. Interpretation

28. It was noted that the principle of "good faith" was a general principle of international trade law contained in a number of UNCITRAL texts, including those on electronic commerce. It was added that the principle of "good faith" was not related to interpretation.

29. In response, it was indicated that the principle of good faith had a specific meaning with respect to transferable documents or instruments, which was distinct from the general principle of good faith in international trade law. It was added that, while other UNCITRAL texts on electronic commerce focused on contracts, the Model Law on Electronic Transferable Records focused on documents or instruments. For those reasons, it was suggested that reference to a principle of "good faith" in the Model Law was not appropriate.

30. After discussion, the Working Group agreed to delete the words "and the observance of good faith" in paragraph 1. It was understood that the principle of good faith as a general principle of international law could be included in the general principles on which the draft Model Law was based under paragraph 2.

General principles

31. The Working Group agreed that the general principles underlying the Model Law would be discussed at a future session.

Draft article 4. Party autonomy [and privity of contract]

Paragraph 1

32. Different views were expressed with respect to the content and purpose of draft article 4, paragraph 1.

33. It was indicated that party autonomy was a general principle of international trade law and that limiting party autonomy could hinder technological innovation and the development of new business practices. It was added that the implementation of the Model Law required a high level of flexibility, which had to be achieved through party autonomy.

34. In response, it was noted that party autonomy in other UNCITRAL texts, including those on electronic commerce, referred to derogations with respect to contracts, and that those derogations concerned only parties to those contracts, while derogations under the Model Law could have an impact also on third parties. It was added that mandatory provisions contained in substantive law applicable to transferable documents or instruments should apply also to electronic transferable records, and that it should not be possible to avoid application of those mandatory provisions by means of party autonomy.

35. In that line, it was indicated that an analysis of each provision of the Model Law was necessary in order to ascertain which ones could be derogated from or varied. It was said that draft article 12 was possibly one of those provisions. It was noted that draft article 10, paragraph 2, made reference to agreement as one circumstance relevant to assess reliability. It was added that draft article 13 was not relevant for that analysis, as it dealt with consent to the use of electronic transferable records, which was by definition voluntary.

36. The Working Group considered different drafting options.

37. It was suggested to identify the provisions that could be derogated from or varied in draft article 4, paragraph 1. The view was also expressed that the list of those provisions should be left blank so that each enacting jurisdiction could identify the relevant provisions, which could differ in the various jurisdictions.

38. Another suggestion was the deletion of draft article 4, paragraph 1 and the insertion of the words "Unless the parties agree otherwise" at the beginning of each non-mandatory provision.

39. Yet another suggestion referred to recasting draft article 4, paragraph 1, along the following lines: "The parties may derogate from or vary by agreement the provisions of this Law, unless that agreement would not be valid or effective under applicable law or would affect the rights of any person that is not a party to that agreement." It was explained that that suggestion was inspired by article 4 of the UNCITRAL Model Law on Electronic Commerce that limited party autonomy to contractual matters in a manner that did not affect third parties (see Guide to Enactment of the UNCITRAL Model Law on Electronic Commerce (1996), paras. 44 and 45).

40. It was indicated that the identification of provisions of law of mandatory nature differed from jurisdiction to jurisdiction. Therefore, it was said that the text of draft article 4, paragraph 1 as contained in A/CN.9/WG.IV/WP.137, paragraph 35 should contain an open-ended list of provisions, so as to give flexibility to States.

41. The suggestion was also made to draft the provision so as to indicate that all articles of the Model Law were of mandatory application. Yet another view was that the Model Law should not be interpreted as allowing derogation of mandatory substantive law and, to that end, the alternative draft contained in paragraph 39 above was preferable.

42. After discussion, the Working Group agreed on the following draft of paragraph 1:

"The parties may derogate from or vary by agreement [provisions of this Law]."

43. The Working Group also agreed that explanatory materials would explain that the purpose of that paragraph was to enable States to identify which provisions could be derogated from.

Paragraph 2

44. The Working Group deferred the consideration of paragraph 2 to a future session.

Draft article 5. Information requirements

45. It was explained that draft article 5 referred to information relating to a person, while draft articles 15 and 16 referred to information contained in the electronic transferable record. It was further explained that the information requirements referred to in draft article 5 were contained in law other than the Model Law, such as regulatory requirements to prevent money-laundering. It was added that the obligation to comply with those information requirements would in any case arise under draft article 1, paragraph 2, and that draft article 5 contained a useful reminder.

46. The concern was raised that the reference to "other information" could be too broad and possibly conflict with draft article 15. In response, it was said that other law would specifically identify the required information, but that those requirements could change in light of their purpose and of available means, among others, and that therefore a certain level of flexibility in referring to them was desirable.

47. After discussion, the Working Group decided to retain draft article 5 unchanged.

Draft article 8. Signature

48. The Working Group considered the drafting options contained in draft article 8. It was indicated that the provision was meant to apply only to electronic transferable records and not to electronic records that were not transferable, though used in connection with electronic transferable records. For that reason, it was added, the use of the word "by" was preferable.

49. After discussion, the Working Group decided to retain the word "by" outside square brackets and to delete the words "[with respect to]" and "[in relation to]".

Draft article 9. [Electronic transferable record]

Paragraph 1

"equivalent"

50. The view was expressed that the word "equivalent" was necessary to clarify that an electronic transferable record required the same information contained in the transferable document or instrument of the same type. The words "corresponding" or "as having the same purpose" were suggested as alternative drafts. In response, it was indicated that the use of a qualifier was not necessary in view of the purpose of draft article 9 to provide a rule on functional equivalence. It was added that an electronic transferable record would necessarily contain the information identifying it as the functional equivalent of a transferable document or instrument, and that insertion of a further qualifier such as "equivalent" could create uncertainty.

51. After discussion, the Working Group agreed that an electronic transferable record should contain the same information as the transferable document or instrument of the same type. On the basis of that understanding, the Working Group agreed to delete the word "equivalent".

"authoritative"

52. It was recalled that paragraph 1 set forth the requirements for the functional equivalence between an electronic transferable record and a transferable document or instrument by combining the "control" and the "singularity" approaches (A/CN.9/834, para. 86). It was added that the word "authoritative" was necessary to identify the operative record that was transferable under the singularity approach, which was precisely the function pursued with subparagraph 1(b)(i). It was noted that the use of the word "authoritative" in domestic legislation did not seem to pose particular interpretative challenges. The use of the word "definitive" was suggested as an alternative draft.

53. In response, it was indicated that, while it was correct that draft article 9 was based on both the "control" and the "singularity" approaches, the purpose of the provision was to identify the electronic transferable record as opposed to other electronic records that were not transferable, and that that alone could suffice to express the singularity approach. It was added that the word "authoritative" created significant interpretative challenges, especially in certain languages. It was therefore suggested that all bracketed text in subparagraph 1(b)(i) should be deleted. In turn, it was indicated that, at least in certain languages, the resulting text did not provide sufficient clarity and actually introduced a circular argument.

54. After discussion, the Working Group confirmed that paragraph 1 was based on the singularity and the control approaches and that it was necessary to appropriately reflect both approaches in the draft provision. The Working Group also took note of the fact that drafting

challenges to reflecting accurately the singularity approach in subparagraph 1(b)(i) remained.

55. It was suggested that the word "only" should replace the word "authoritative" in order to adequately address linguistic challenges arising from the use of the word "the" to identify the electronic transferable record. However, the view was expressed that the word "only" was not acceptable since it implied the notion of "uniqueness" that the Working Group had, after extensive discussions, decided to abandon in favour of the concept of singularity. In response, the view was expressed that the word "only" merely referred to the concept that the electronic record would be identified as the operative electronic transferable record and was not to be understood as referring to the notion of uniqueness.

56. The Working Group recalled its agreement that draft article 9 was meant to combine the singularity and the control approaches (A/CN.9/834, para. 86). The Working Group recalled its previous discussions and deliberations on the notion of "uniqueness" (A/CN.9/804, paras. 38, 71 and 74; see also A/CN.9/834, paras. 22-26 and 86). It was also reiterated that the notion of "singularity" related to the reliable identification of the electronic transferable record that allowed requesting performance of the obligation indicated in it, so that multiple claims of the same obligation would be avoided.

57. Different alternatives were suggested to replace the word "authoritative" and overcome linguistic and interpretative challenges. Suggested words included: "definitive", "reliable", "primary", "necessary" and "required".

58. The Working Group confirmed its agreement that draft article 9 was meant to combine the singularity and the control approaches (A/CN.9/834, para. 86). It also confirmed that the word "the" in the English, French and Spanish languages was intended as a qualifier referring to the singularity approach.

59. Different proposals were made with respect to the text of draft article 9, paragraph 1(b)(i). Concerns were expressed that the word "only" could be interpreted as referring to the notion of uniqueness, which, as the Working Group had repeatedly indicated, was not relevant for the purposes of the Model Law. In response, it was said that the word "only" did not imply uniqueness, as it was precisely because more than one electronic record containing the information could exist, that there was a need to use the word "only". The Working Group decided not to use the word "only".

60. After discussion, the Working Group requested the Secretariat to identify adequate translations in all official languages for the words "to identify that electronic record as the electronic transferable record" which the Working Group had agreed upon in the English, French and Spanish languages.

Paragraph 2

"authorized"

61. It was indicated that paragraph 2 related to system integrity and that therefore that provision should refer to authorized changes, i.e. changes allowed by the system, but should not refer to legitimate changes, which presupposed a legal assessment. It was explained that an unauthorized change, for instance performed by a hacker, would necessarily compromise the integrity of the electronic transferable record.

62. After discussion, the Working Group agreed to retain the word "authorized" in paragraph 2.

Integrity

63. It was noted that the notion of integrity had been considered as an absolute one (A/CN.9/863, para. 42). In that respect, it was explained that the notion of integrity referred to a fact and, as such, was absolute or objective, i.e. either an electronic transferable record retained integrity or not. However, it was added, the reference to the reliable method used to retain integrity was relative or subjective, and the assessment of that method was subject to the general reliability standard contained in draft article 10.

64. The question was asked whether the reference to a reliable method contained in subparagraph (1)(b)(ii) was appropriate. In response, it was confirmed that that reference

was appropriate and that it referred to the reliability of the system used to render the electronic record capable of being subject to control.

65. It was noted that the last sentence of paragraph 2 was redundant since it repeated in part draft article 10(1)(a), a general provision on the assessment of the reliability standard applicable also to draft article 9.

66. After discussion, the Working Group agreed to retain subparagraph 1(b)(ii) without amendments and to delete the last sentence of paragraph 2.

Draft article 9 and electronic transferable records existing only in electronic form

67. It was asked whether an electronic transferable record existing only in electronic form could satisfy the requirements of draft article 9 and, thus, could fall under the definition of electronic transferable record contained in draft article 2. In response, it was said that, while an electronic transferable record existing only in electronic form could satisfy the requirements of draft article 9, paragraph 1(b), that record would need to define autonomously the information requirements and therefore would not satisfy the requirements of draft article 9, paragraph 1(a). It was added that, if an electronic transferable record did not define autonomously the information requirements, it would be functionally equivalent of the transferable document or instrument whose information requirements it satisfied, and therefore it would not be an electronic transferable record existing only in electronic form.

Title

68. Several suggestions were made with respect to the title of draft article 9. After discussion, the Working Group agreed on "transferable document or instrument" as an appropriate title, since it was in line with the drafting style used for other articles providing for a functional equivalent in the draft Model Law.

Draft article 10. General reliability standard

Subparagraph 1(a)

69. The Working Group agreed to replace the word "quality" with the word "security" in subparagraph 1(a)(iv) since quality did not lend itself easily to an objective assessment. It was added that the notion of security was more directly relevant for assessing the reliability of the method.

70. A suggestion was made to add a reference to "state of the art" in subparagraph 1(a)(vii) since it was a well-known term commonly referred to in commercial practice, but the Working Group decided not to do so.

Subparagraph 1(b)

71. It was suggested that the words "agreed to" should be deleted as the provision did not relate only to functions that had been agreed upon contractually. It was also suggested that the words "for which the method has been used" should replace the words "agreed to" to better clarify the scope of the provision. It was noted that that suggestion would further align subparagraph 1(b) with article 9, subparagraph 3(b)(ii) of the United Nations Convention on the Use of Electronic Communications in International Contracts (New York, 2005).

72. Another suggestion was that the word "necessary" should be included before the word "functions" and the words "elements of facts" should replace the word "evidence", but the Working Group decided not to do so.

73. After discussion, the Working Group agreed that the words "agreed to" should be deleted.

Paragraph 2

74. Different views were expressed with respect to paragraph 2.

75. It was indicated that the parties should not be allowed to derogate from the requirements set forth in draft article 10 for assessing the reliability of an electronic

transferable record. It was explained that admitting that contractual derogation would amount to introducing different standards for the assessment of reliability whose application would depend on the parties involved, and that that could result in inconsistent findings in respect of the validity of the electronic transferable record, and therefore affect third parties. It was added that party autonomy should be limited to allocation of liability under the limits set forth in applicable law (see also A/CN.9/863, para. 75). For those reasons, it was suggested that paragraph 2 should be deleted.

76. Another view was that paragraph 2 did not refer to the possibility for the parties to contractually agree on the validity of the electronic transferable record, but to agree on risk allocation. It was explained that, since agreement on risk allocation was possible under draft article 4, paragraph 2 was redundant and should be deleted. It was added that the assessment of the reliability of the electronic transferable record under a legislative objective standard and the allocation of risks among parties under an agreed subjective standard were actually complementary.

77. A third view was that paragraph 2 fulfilled a useful function by explicitly recognizing the importance of contractual agreements, especially when applicable to closed systems or reflecting industry standards. Thus, the provision supported technological innovation and the allocation of related risks. It was indicated that any party agreement on the level of reliability would not affect third parties. One proposal was that the reference to contractual agreements should be listed as one of the relevant circumstances under subparagraph 1(a).

78. After discussion, the Working Group agreed that the draft Model Law did not prevent parties from contractually allocating some liability. The Working Group agreed to delete paragraph 2.

Draft article 11. Indication of time and place in electronic transferable records

79. It was indicated that draft article 11 did not fulfil any useful function as it was not a functional equivalence rule and that it should be replaced by a provision offering actual guidance on the determination of time and place, possibly drafted following the approach adopted in article 10 of the Electronic Communications Convention.

80. In response, it was said that significant legal consequences were attached to the notions of time and place in the life-cycle of transferable documents and instruments. Hence, it was added, draft article 11 offered a useful reminder of the importance of indicating that information in electronic transferable records.

81. It was added that the reference to the use of a reliable method in indicating time pointed at the desirability of using trust services such as trusted time-stamping in the management of electronic transferable records.

82. After discussion, the Working Group agreed that draft article 11 should be retained with the square brackets deleted.

Draft article 12. [Location of parties] [Determination of place of business]

83. It was said that draft article 12 offered elements useful with respect to contractual exchanges, but not relevant with regard to electronic transferable records. In response, it was noted that the determination of place of business was relevant, in particular, for the cross-border use of electronic transferable records. It was explained that important legal consequences, such as determination of scope of application and of jurisdiction, were attached to the place of business.

84. It was indicated that parties would often agree on matters related to the place of business, but that the law could limit party autonomy in that respect. It was further indicated that a set of suppletive rules on the determination of the place of business could usefully complement parties' agreements.

85. It was noted that draft article 12 offered guidance only on elements not to be taken solely into consideration in order to ascertain the determination of the place of business. It was suggested to recast draft article 12 so that it would also provide positive elements for that determination.

86. In that line, an alternative draft of article 12 was suggested, based on article 10 of the Electronic Communications Convention:

"Draft article 12. Place of Dispatch and Receipt

1. An electronic transferable record is deemed to be dispatched at the place where the originator has its place of business and is deemed to be received at the place where the addressee has its place of business.

2. This article applies notwithstanding that the place where the information system supporting an electronic address is located may be different from the place where the electronic transferable record is deemed to be received under paragraph 1.

3. For the purposes of this Law, a party's place of business is presumed to be the location indicated by that party, unless another party demonstrates that the party making the indication does not have a place of business at that location.

4. If a party has not indicated a place of business and has more than one place of business, then the place of business for the purposes of this Law is that which has the closest relationship to the electronic transferable record, having regard to the circumstances known to or contemplated by the parties at any time before or at the time of dispatch or receipt of the electronic transferable record.

5. If a natural person does not have a place of business, reference is to be made to the person's habitual residence.

6. A location is not a place of business merely because that is:

(a) Where equipment and technology supporting an information system used by a party in connection with electronic transferable records are located; or

(b) Where the information system may be accessed by other parties.

7. The sole fact that a party makes use of an electronic address or other element of an information system connected to a specific country does not create a presumption that its place of business is located in that country."

87. It was explained that the alternative draft did not aim at displacing existing rules but only at supplementing them with respect to the use of electronic means. It was added that offering such guidance was essential to enable cross-border use of electronic transferable records. Some support was expressed for that proposal.

88. However, it was also said that the proposal focused on the notions of dispatch and receipt that were applicable to contract formation but not to electronic transferable records, for which concepts such as the time of issuance, transfer and presentation were legally relevant. It was added that the application of the provision could lead to a multiplication of legally relevant locations, which introduced uncertainty and unpredictability.

89. It was further said that under the substantive law, a dispatch and receipt of an electronic transferable record could be an issuance or transfer of the electronic transferable record (depending on whether the person was the issuer or transferor). Therefore, it was relevant for draft article 12 to refer to notions of dispatch and receipt without referring to the substantive law notions.

90. It was explained that draft article 11 dealt satisfactorily with all matters relating to time and place relevant to the use of electronic transferable records. In response, it was indicated that draft article 11 referred to indication of time and place, while draft article 12, especially in its suggested new formulation, aimed at providing guidance on the determination of a location when electronic means were used.

91. With respect to the title of the provision, support was expressed for retaining the words "determination of place of business" since it best reflected the content of the article. The words "determination of location" were also suggested in order to encompass all possible references to determination of a location in connection with an electronic transferable record.

92. After discussion, the Working Group agreed to retain draft article 12 with the title "determination of place of business".

Draft article 13. Consent to use an electronic transferable record

93. It was suggested that consent was a matter pertaining to the general provisions of the draft Model Law and that draft article 13 should be positioned accordingly. It was also suggested that draft article 13 should be merged with draft article 6, thus following the structure of article 8 of the Electronic Communications Convention.

94. The Working Group agreed to merge draft article 13 with draft article 6.

Draft article 14. Issuance of multiple originals

95. Different views were heard on the desirability of recognizing the practice of issuing multiple originals in an electronic environment and on the relevance of that practice for business.

96. The view was expressed that the alternative draft of paragraph 1 contained in paragraph 12 of A/CN.9/WG.IV/WP.137/Add.1 was preferable as it was clearer. However, the view was also expressed that that alternative draft did not convey effectively that the law did not preclude the issuance of multiple authoritative copies of the same electronic transferable record.

97. It was indicated that paragraph 2 had become redundant since draft article 9, paragraph 1(a) already required that the electronic transferable record should contain an indication of the issuance of multiple originals whenever substantive law set forth that requirement.

98. The question was raised whether the draft Model Law should deal with the possibility of issuing simultaneously multiple originals in both electronic and paper form.

99. After discussion, the Working Group agreed to delete paragraph 2.

Draft article 15. [Substantive] information requirements of electronic transferable records

100. The Working Group agreed that draft article 15 should be deleted as redundant since the information requirements contained in draft article 9, paragraph 1(a) already satisfied its purpose.

Draft article 16. Additional information in electronic transferable records

101. A suggestion was made to delete draft article 16 as redundant in light of the information requirements contained in draft article 9, paragraph 1(a). In response, it was indicated that draft article 16 aimed to clarify that draft article 9 did not prevent the inclusion in an electronic transferable record of any additional information that might not be contained in a transferable document or instrument due to the different nature of the two media. Therefore, draft article 16 contained an additional element to draft article 9.

102. After discussion, the Working Group agreed to retain draft article 16 without modification.

Draft article 17. [Control]

Placement

103. The Working Group agreed to place draft article 17 consecutively after draft article 9 as the two articles were logically related.

Title

104. It was suggested to use the word “possession” as a title in line with the naming style used in the draft Model Law. In response, it was said that, although an exception to that naming style, the word “control” was preferable as it referred to a particularly relevant notion in the draft Model Law and therefore better highlighted the content of draft article 17.

105. The Working Group agreed to retain as title the word “control” outside the square brackets.

"identify" or "establish"

106. Support was expressed for retaining the word "identified" in subparagraph 1(b) since its clear meaning avoided substantive law implications associated with the word "establish". It was clarified that the word "identify" did not contain any obligation to name the person in control (see A/CN.9/828, para. 63).

107. Another suggestion was to use the word "demonstrate", since that word would best reflect the purpose of the provision to clearly indicate who the person in control was.

108. After discussion, the Working Group agreed to retain the word "identify" outside the square brackets in subparagraph 1(b).

"a person"

109. It was clarified that the word "person" in subparagraph 1(b) could refer to natural or legal persons. It was noted that, in practice, in most cases, a legal person would be in control.

110. The view was reiterated that reference to a person in control did not exclude the possibility of having more than one person exercising control (see also A/CN.9/828, para. 63).

Draft article 18. Endorsement

111. Different views were expressed with regard to draft article 18.

112. It was said that the words "included in" were sufficiently accurate for the purpose of the provision and should be retained, while the reference to "indicating the intention to endorse" was neither appropriate nor necessary.

113. In response, it was said that the words "included in" did not reflect the composite nature of an electronic transferable record and that the words "logically associated with or otherwise linked to so as to be included" should be used instead. It was replied that, in light of the definition of electronic record, the words "included in" should be understood as encompassing instances when the information was logically associated with or otherwise linked to the electronic transferable record.

114. After discussion, the Working Group agreed to retain the following draft of article 18 on the understanding that the words "included in" should be understood as encompassing instances when the information was logically associated with or otherwise linked to the electronic transferable record:

> "Where the law requires or permits the endorsement in any form of a transferable document or instrument, that requirement is met with respect to an electronic transferable record if the information required for the endorsement is included in the electronic transferable record and that information is compliant with the requirements set forth in articles 7 and 8."

Draft article 20. Reissuance

115. It was indicated that the reissuance of an electronic transferable record was a matter of substantive law and, as such, was already permitted under draft article 1, paragraph 2. Accordingly, the Working Group agreed to delete draft article 20 as redundant.

Draft article 21. Replacement of a transferable document or instrument with an electronic transferable record

Paragraph 1

116. It was said that the alternative draft contained in paragraph 40 of A/CN.9/WG.IV/WP.137/Add.1 was preferable since it avoided ambiguity by being drafted in the active voice. However, a concern was expressed that the word "replace" could be misinterpreted as referring to the notion of reissuance. In response, it was said that reissuance and change of medium were distinct concepts, and that draft article 21 clearly referred to the latter.

117. After discussion, the Working Group agreed to retain the draft of paragraph 1 contained in paragraph 40 of A/CN.9/WG.IV/WP.137/Add.1.

Paragraph 3

118. It was suggested to insert the words "shall be made inoperative and" before the word "ceases" to reflect that the transferable document or instrument could not be further transferred after change of medium. It was added that the suggested addition would leave sufficient flexibility to industry on the choice of the method to render the transferable document or instrument inoperative. In that respect, it was noted that a transferable document or instrument could fulfil other functions besides those typical of a transferable document or instrument, such as providing evidence of a contract for the carriage of goods and of receipt of the goods, and that those additional functions would continue to be fulfilled after the document or instrument had been made inoperative.

119. Another suggestion was to include in paragraph 3 a reference to paragraph 1 in order to clarify that the electronic transferable record had to be issued in accordance with both paragraphs 1 and 2.

120. After discussion, the Working Group agreed on the following draft of paragraph 3: "Upon issuance of the electronic transferable record in accordance with paragraphs 1 and 2, the transferable document or instrument shall be made inoperative and ceases to have any effect or validity."

Draft article 22. Replacement of an electronic transferable record with a transferable document or instrument

121. In light of the fact that draft article 22 mirrored the structure of draft article 21, the Working Group agreed that the modifications agreed upon with respect to draft article 21 should apply also to draft article 22.

122. The view was expressed that draft article 21 and 22 should be subject to party autonomy. In that line, it was suggested that, in case of deletion of draft article 4, the words "Unless the parties agree otherwise" should be added at the beginning of those two articles.

Draft article 23. Division and consolidation of an electronic transferable record

123. It was indicated that division and consolidation of an electronic transferable record were a matter of substantive law and, as such, permitted under draft article 1, paragraph 2. Accordingly, the Working Group agreed to delete draft article 23 as redundant.

Draft article 24. Non-discrimination of foreign electronic transferable records

Paragraph 1

124. It was indicated that paragraph 1 should provide solely a rule on non-discrimination of foreign electronic transferable records and that that goal could be achieved by the following draft:

> "An electronic transferable record shall not be denied legal effect, validity or enforceability on the sole ground that it was issued or used abroad".

125. It was recalled that paragraph 1 aimed exclusively at preventing that the place of issuance or of use of the electronic transferable record could be considered in themselves reasons to deny legal effect, validity or enforceability of an electronic transferable record (see A/CN.9/WG.IV/WP.137/Add.1, para. 55) and that it did not affect substantive law, including private international law. Thus, for instance, it was explained that paragraph 1 could not per se lead to the recognition of an electronic transferable record issued in a jurisdiction that did not recognize the legal validity of electronic transferable records.

126. The view was expressed that a provision on non-discrimination such as the suggested paragraph 1 did not suffice to actively promote cross-border use of electronic transferable records. It was added that explicit reference to a substantially equivalent level of reliability was necessary to achieve that goal as well as to encourage technological development. Another suggestion referred to the insertion of a reference to interoperability besides the one to the substantially equivalent level of reliability.

127. In the same line, it was noted that the alternative draft of paragraph 1 contained in paragraph 59 of A/CN.9/WG.IV/WP.137/Add.1 aimed to offer elements that went beyond establishing non-discrimination of foreign electronic transferable records and towards establishing mutual legal recognition. However, it was added, the impact of that draft was limited by its negative formulation.

128. After discussion, the Working Group agreed that paragraph 1 should aim to provide only for non-discrimination and should therefore be retained as follows: "An electronic transferable record shall not be denied legal effect, validity or enforceability on the sole ground that it was issued or used abroad." A proposal was made to include a reference to the substantially equivalent level of reliability in draft article 10, paragraph 2, but the proposal was not retained.

Paragraph 2

129. It was recalled that paragraph 2 reflected the Working Group's understanding that the draft Model Law should not displace private international law rules applicable to transferable documents or instruments (A/CN.9/768, para. 111). It was noted that, though the paragraph restated a principle already contained in article 1, paragraph 2 of the draft Model Law, its retention was desirable since private international law rules could be considered procedural rules and therefore the term "substantive law" could be interpreted as not including private international law.

130. It was explained that, since paragraph 1 referred only to non-discrimination while paragraph 2 related to private international law, the two paragraphs operated on different levels and did not interfere.

131. After discussion, the Working Group agreed to retain paragraph 2 without modification.

V. Other business

A. Future work

Identity management

132. One delegation expressed the intention to submit a proposal on identity management for the consideration of the Working Group at its next session, subject to confirmation by the Commission that identity management would be included on the agenda of the Working Group at that session. Delegations were invited to submit information on identity management with a view to facilitating consideration of the topic.

Cloud computing

133. The view was expressed that UNCITRAL work on cloud computing was desirable and urgent. In particular, it was said that the preparation of a guidance document on contractual aspects of cloud computing would promote the use of cloud computing services, which were in increasing demand. States were encouraged to share expertise on that issue in preparation of the future work of UNCITRAL.

B. Other matters

134. Concerns were expressed with regard to the use of informal consultations. In response, reference was made to the desirability of using informal consultations in order to maximize efficient use of conference time (A/CN.9/638, para. 22).

D. Note by the Secretariat on a draft model law on electronic transferable records (A/CN.9/WG.IV/WP.137 and Add.1)

[Original: English]

Contents

I. Introduction

1. At its forty-fourth session, in 2011, the Commission mandated the Working Group to undertake work in the field of electronic transferable records.[1]

2. At its forty-sixth session (Vienna, 29 October-2 November 2012), broad support was expressed by the Working Group for the preparation of draft provisions on electronic transferable records, to be presented in the form of a model law without prejudice to the decision on the final form of its work (A/CN.9/761, paras. 90-93).

3. At its forty-seventh session (New York, 13-17 May 2013), the Working Group began reviewing the draft provisions on electronic transferable records as provided in document A/CN.9/WG.IV/WP.122 and noted that while it was premature to start a discussion on the final form of work, the draft provisions were largely compatible with different outcomes that could be achieved.

4. At its forty-eighth session (Vienna, 9-13 December 2013), the Working Group continued its consideration of the draft provisions as contained in document A/CN.9/WG.IV/WP.124 and Add.1.

5. At its forty-ninth session (New York, 28 April-2 May 2014), the Working Group continued its work on the preparation of draft provisions as presented in document A/CN.9/WG.IV/WP.128 and Add.1. The Working Group focused its discussion on concepts of original, uniqueness, and integrity of an electronic transferable record.

6. At its fiftieth session (Vienna, 10-14 November 2014), the Working Group continued its work on the preparation of draft provisions as presented in document A/CN.9/WG.IV/WP.130 and Add.1. Subject to a final decision to be made by the Commission, the Working Group agreed to proceed with the preparation of a draft model law on electronic transferable records (A/CN.9/828, para. 23). It was agreed that priority should be given to the preparation of provisions dealing with electronic equivalents of paper-based transferable documents or instruments, and that those provisions should be subsequently reviewed and adjusted, as appropriate, to accommodate the use of transferable records that existed only in an electronic environment (A/CN.9/828, para. 30).

7. At its fifty-first session (New York, 18-22 May 2015), the Working Group continued its work on the preparation of the draft Model Law as presented in document A/CN.9/WG.IV/WP.132 and Add.1. The Working Group focused its discussion on the definitions of electronic transferable record, possession and control.

8. At its fifty-second session (Vienna, 9-13 November 2015), the Working Group continued its work on the preparation of draft provisions as presented in document A/CN.9/WG.IV/WP.134 and Add.1. In particular, the Working Group discussed the relation

[1] *Official Records of the General Assembly, Sixty-sixth Session, Supplement No. 17* (A/66/17), para. 238.

between draft articles referring to a "reliable method" and a general reliability standard, as well as the elements relevant for assessing reliability, which include party agreement.

9. Part II of this note contains the draft provisions reflecting the deliberations and decisions of the Working Group during that session (A/CN.9/863, paras. 17-102).

II. Draft Model Law on Electronic Transferable Records

A. General

"**Draft article 1. Scope of application**

"1. This Law applies to electronic transferable records.

"2. Other than as provided for in this Law, nothing in this Law affects the application to an electronic transferable record of any rule of law governing a transferable document or instrument including any rule of law applicable to consumer protection.

"3. This Law does not apply to securities, such as shares and bonds, and other investment instruments, and to […].

"[4. This Law applies to electronic transferable records other than as provided by [the law governing a certain type of electronic transferable record to be specified by the enacting State].]"

Remarks

10. Draft article 1 reflects the Working Group's deliberations at its forty-eighth (A/CN.9/797, paras. 16 and 17) and fifty-second (A/CN.9/863, paras. 17-22) sessions. The words "paper-based" have been deleted, as an editorial matter, in paragraph 2 pursuant to a decision of the Working Group at its fifty-second session (A/CN.9/863, para. 93).

11. Paragraph 1 states the scope of application of the draft Model Law.

12. Paragraph 2 sets forth the general principles that the substantive law applicable to an electronic transferable record is identified by reference to the substantive law applicable to the equivalent transferable document or instrument and that the draft Model Law does not affect substantive law applicable to transferable documents or instruments. Those general principles apply to each step of the life cycle of an electronic transferable record. The reference to consumer protection law aims at clarifying that those principles should apply also in that respect (A/CN.9/863, paras. 20 and 22).

13. In application of paragraph 2, the issuance of an electronic transferable record to bearer is possible only when permitted under substantive law (A/CN.9/797, para. 65). Likewise, the modalities for circulation of an electronic transferable record issued to bearer in an electronic transferable record to a named person and the reverse case ("blank endorsement") may be changed only when permissible under substantive law (A/CN.9/828, para. 82).

14. Paragraph 3 was included pursuant to a decision of the Working Group at its fifty-second session (A/CN.9/863, para. 22). It clarifies that the draft Model Law does not apply to securities and other investment instruments. The term "securities" in paragraph 3 does not refer to the use of electronic transferable records as collateral and therefore the Model Law does not prevent the use of electronic transferable records for security rights purposes (A/CN.9/834, para. 73). The term "investment instrument" is understood to include derivative instruments, money market instruments and any other financial product available for investment (A/CN.9/797, para. 19).

15. Moreover, paragraph 3 includes an open-ended exclusion list that permits application of the draft Model Law according to the needs of each enacting jurisdiction. The insertion of an exclusion list aims at providing both flexibility and clarity on the scope of application of the Model Law. For instance, it would be possible to include in the exclusion list certain instruments or documents, such as letters of credit, which may be considered transferable documents or instruments in some jurisdictions but not in others. Similarly, State parties to the Convention Providing a Uniform Law for Bills of Exchange and Promissory Notes (Geneva, 1930) and the Convention Providing a Uniform Law for Cheques (Geneva, 1931)

(the "Geneva Conventions") (A/CN.9/797, paras. 109-112) may consider excluding the documents or instruments falling under the scope of the Geneva Conventions in order to avoid potential conflicts between those Conventions and the Model Law.

16. Electronic transferable records that are functional equivalent of transferable documents or instruments and electronic transferable records that exist only in an electronic environment may co-exist in the same jurisdiction. Draft paragraph 4 aims at allowing the application of the draft Model Law also to electronic transferable records that exist only in an electronic environment within the limits set forth in substantive law applicable to those electronic transferable records. Hence, the provision would not be necessary in jurisdictions where those records do not exist (A/CN.9/797, para. 17).

17. At its fifty-second session, the Working Group considered deleting paragraph 4 in view of concerns on its scope and limited clarity (A/CN.9/863, para. 17). However, support had also been expressed for retaining paragraph 4 as providing guidance and flexibility to States. At that session, it was agreed to postpone a decision on paragraph 4 since the content of that paragraph depended on the final form of the definition of electronic transferable record (ibid., paras. 18 and 19).

18. The Working Group may wish to consider whether to retain paragraph 4 in light of those considerations as well as of the fact that a law applicable to electronic transferable records that exist only in an electronic environment is likely to define its scope, including by reference to the draft Model Law. Therefore, the need to exclude electronic transferable records that exist only in an electronic environment from the scope of application of the draft Model Law would arise only if those electronic transferable records existed at the time of the enactment of the Model Law. However, in that case, the exclusion could be effectively addressed by indicating those electronic transferable records in the open-ended exclusion list contained in paragraph 3.

"**Draft article 2. Definitions**

"For the purposes of this Law:"

Remarks

19. The definitions in draft article 2 have been prepared as a reference and should be examined in the context of the relevant draft articles. The terms are presented in the order they appear throughout the draft Model Law (A/CN.9/768, para. 34). Remarks for consideration by the Working Group have been placed after each definition.

"*electronic transferable record*" [is an electronic record that contains all of the information that would [make a transferable document or instrument effective] [be required to be contained in an equivalent transferable document or instrument] and that complies with the requirements of article 9].

Remarks

20. The definition of "electronic transferable record" reflects the Working Group's deliberations at its forty-eighth (A/CN.9/797, paras. 21-28), fifty-first (A/CN.9/834, paras. 23-26, 88, 95-98 and 100) and fifty-second (A/CN.9/863, paras. 91 and 92) sessions.

21. The definition of "electronic transferable record" reflects the functional equivalent approach (A/CN.9/863, paras. 91 and 92) and aims at covering electronic transferable records that are equivalent to transferable documents or instruments. However, it does not cover electronic transferable records that exist only in an electronic environment, for which a different definition is needed (A/CN.9/863, para. 91; see also A/CN.9/797, para. 23), to be discussed at a later stage.

22. In that respect, it should be noted that the Model Law does not preclude the development and use of electronic transferable records that do not have a paper equivalent as those records would not be governed by the Model Law (A/CN.9/863, para. 91; see also paras. 16-18 above).

23. The definition of "electronic transferable record" does not aim at affecting the fact that substantive law shall determine whether the person in control is the rightful person in control

as well as the substantive rights of the person in control. Likewise, it does not aim at describing all the functions possibly related to the use of an electronic transferable record. For instance, an electronic transferable record may have an evidentiary value; however, the ability of that record to discharge that function will be assessed under law other than the draft Model Law.

24. The Working Group may wish to consider whether the words "be required to be contained in an equivalent transferable document or instrument" should be retained, as those words are used in draft article 9, paragraph 1(a). Alternatively, the Working Group may wish to consider whether reference to information is necessary in light of the fact that draft article 9, which is referred to in the draft definition, contains the same requirement.

25. The Working Group confirmed that certain documents or instruments, which are generally transferable, but whose transferability is limited due to other agreements, such as straight bills of lading, would not fall under the definition and that the draft Model Law should only focus on "transferable" documents (A/CN.9/797, paras. 27 and 28).

26. The Working Group may wish to take into account the definition of "electronic record" when considering the definition of "electronic transferable record" (see below, para. 30).

> "*transferable document or instrument*" means a transferable document or instrument issued on paper that entitles the holder to claim the performance of the obligation indicated in the document or instrument and that is capable of transferring the right to performance of the obligation indicated in the document or instrument through the transfer of that document or instrument.

Remarks

27. The definition of "transferable document or instrument" reflects the Working Group's deliberations at its forty-eighth (A/CN.9/797, paras. 21-28) and fifty-second (A/CN.9/863, paras. 93-95) sessions. It does not aim at affecting substantive law.

28. The Working Group may wish to note that, as an editorial matter, the words "paper-based" were deleted from the term "transferable document or instrument" in the English language version throughout the draft Model Law (A/CN.9/863, para. 93), since the definition of transferable document or instrument sufficiently clarified that those documents or instruments were paper-based. Upon consultation, the same words have been deleted in the Arabic, Chinese and Russian language versions of the Model Law, but not in the French and Spanish language versions. The Working Group may wish to confirm that editorial decision.

29. Applicable substantive law shall determine which documents or instruments are transferable in the various jurisdictions (A/CN.9/863, para. 94; see also paragraph 15 above). An indicative list of transferable documents or instruments, inspired by article 2, paragraph 2, of the United Nations Convention on the Use of Electronic Communications in International Contracts (New York, 2005) (the "Electronic Communications Convention") includes: bills of exchange; cheques; promissory notes; consignment notes; bills of lading and warehouse receipts (A/CN.9/863, para. 94; see also A/CN.9/768, para. 34; A/CN.9/797, paras. 25 and 26). Cargo insurance certificates and air waybills may be additional examples of transferable documents or instruments.

> "*electronic record*" means information generated, communicated, received or stored by electronic means, including, where appropriate, all information logically associated with or otherwise linked together so as to become part of the record, whether generated contemporaneously or not.

Remarks

30. The definition of "electronic record" is based on the definition of "data message" contained in the UNCITRAL Model Law on Electronic Commerce (1996) and in the Electronic Communications Convention. The definition reflects the composite nature of an electronic transferable record, which, in turn, is particularly relevant for the notion of "integrity" contained in paragraph 2 of draft article 9 (A/CN.9/863, para. 96). It highlights the fact that information may be associated with the electronic transferable record at the time

of issuance or thereafter (e.g., information related to endorsement) and aims to clarify that some electronic records could, but do not need to, include a set of composite information (A/CN.9/797, paras. 43-45; see also A/CN.9/804, para. 71). The word "logically" refers to computer software and not to human logic (A/CN.9/863, para. 97).

"**Draft article 3. Interpretation**

"1. This Law is derived from a model law of international origin. In the interpretation of this Law, regard is to be had to the international origin and to the need to promote uniformity in its application [and the observance of good faith].

"2. Questions concerning matters governed by this Law which are not expressly settled in it are to be settled in conformity with the general principles on which this Law is based."

Remarks

31. Draft article 3 is intended to draw the attention of courts and other authorities to the fact that domestic enactments of the Model Law should be interpreted with reference to their international origin in order to facilitate uniform interpretation (A/CN.9/768, para. 35). Similar wording is found in article 3 of the UNCITRAL Model Law on Electronic Commerce and in article 4 of the UNCITRAL Model Law on Electronic Signature.

32. The words "This Law is derived from a model law of international origin" were included pursuant to a decision made by the Working Group at its forty-seventh session, in order to emphasize that the law constituted an enactment of a model law with international origin (A/CN.9/768, para. 35). Those words do not appear in other UNCITRAL texts. Alternatively, the Working Group may wish to consider whether that language should be retained and the underlying notion should be further developed in guidance materials.

33. The Working Group may wish to consider whether the words "[and the observance of good faith]" should be retained in light of the possible substantive law implications, and, in particular, of the existence of a specific notion of good faith in the law of transferable documents or instruments. Alternatively, the Working Group may wish to clarify whether that reference is intended as to the general notion of good faith in international trade (see also para. 35 below). Reference to good faith is contained in several other UNCITRAL texts, including article 3, paragraph 1 of the UNCITRAL Model Law on Electronic Commerce and article 4, paragraph 1 of the UNCITRAL Model Law on Electronic Signatures.

34. The notion of "general principles" contained in paragraph 2 has been used in several UNCITRAL texts. Article 7 of the United Nations Convention on Contracts for the International Sale of Goods (Vienna, 1980) ("CISG") is the provision containing that notion that has been most interpreted by case law.

35. The notion of "general principles" contained in paragraph 2 refers to the general principles of electronic communications (A/CN.9/797, para. 29), including those already stated in relevant UNCITRAL texts. In this line, the Working Group may wish to confirm that the fundamental principles of non-discrimination against electronic communications, technological neutrality and functional equivalence are general principles underlying the draft Model Law. Other general principles might be identified as the work of the Working Group progresses. For instance, the provisions in other UNCITRAL texts on electronic commerce relating to the irrelevance of the location of information systems for the determination of the place of business could be relevant as general principles on which the Model Law is based (see A/CN.9/WG.IV/WP.137/Add.1, para. 7). The notion of good faith in international trade could also be considered as a general principle relevant for the Model Law. The interpretation and application of the Model Law will further identify its general principles, in a manner akin to other UNCITRAL texts.

"**Draft article 4. Party autonomy [and privity of contract**]

"1. The parties may derogate from or vary by agreement the provisions of this Law [except articles […]][, unless that agreement would not be valid or effective under applicable law].

"2. Such an agreement does not affect the rights of any person that is not a party to that agreement."

Remarks

36. The Working Group highlighted the importance of party autonomy in the draft provisions (A/CN.9/797, para. 30) and, based on the general applicability of that principle, agreed to identify which draft articles could not be derogated from (A/CN.9/797, para. 32).

37. While party autonomy is a fundamental principle underpinning commercial law and UNCITRAL texts, the Working Group may wish to note that the principle has found some limits in its implementation in UNCITRAL texts on electronic commerce in order to avoid conflicts with rules of mandatory application, such as those on public policy. Article 4 of the UNCITRAL Model Law on Electronic Commerce and article 5 of the UNCITRAL Model Law on Electronic Signature provide examples of that approach. The words "[, unless that agreement would not be valid or effective under applicable law]", contained in article 5 of the UNCITRAL Model Law on Electronic Signature, have been inserted in draft article 4 of the Model Law to reflect that approach.

38. Alternatively, the possibility of derogating from or varying a provision of the draft Model Law could be indicated by inserting specific language, such as "unless otherwise agreed by the parties", in each provision that may be derogated from or varied by the parties.

39. Paragraph 2 was inserted to reflect the concerns of the Working Group that derogations and variations to the Model Law shall not affect third parties (A/CN.9/768, para. 36), in particular, by circumventing the principle of numerus clausus. The Working Group may wish to consider whether that draft provision is necessary in light of draft article 1, paragraph 2 of the Model Law.

"**Draft article 5. Information requirements**

"Nothing in this Law affects the application of any rule of law that may require a person to disclose its identity, place of business or other information, or relieves a person from the legal consequences of making inaccurate, incomplete or false statements in that regard."

40. The Working Group decided to retain draft article 5 with the understanding that it reminds parties of the need to comply with possible disclosure obligations that might exist under other law (A/CN.9/797, para. 33).

41. The Working Group may wish to consider draft article 5 in conjunction with draft articles 15 and 16, which also pertain to information requirements. The Working Group may further wish to consider whether those articles should be retained in light of draft article 1, paragraph 2 and of the possibility to provide guidance in explanatory materials.

B. Provisions on electronic transactions

42. The Working Group at its forty-eighth session decided to retain draft articles 6-8 as a separate section (A/CN.9/797, para. 34). The Working Group may wish to review its decision in light of the final form of the draft Model Law as well as the content of those articles.

"**Draft article 6. Legal recognition of an electronic transferable record**

"An electronic transferable record shall not be denied legal effect, validity or enforceability on the sole ground that it is in electronic form."

Remarks

43. Draft article 6 sets forth the principle of non-discrimination. At its forty-ninth session, the Working Group decided to retain draft article 6 in its current form (A/CN.9/804, para. 17; see also A/CN.9/768, para. 39).

"**Draft article 7. Writing**

"Where the law requires that information should be in writing, that requirement is met with respect to an electronic transferable record if the information contained therein is accessible so as to be usable for subsequent reference."

Remarks

44. Draft article 7 reflects the Working Group's deliberations at its forty-ninth session (A/CN.9/804, paras. 18 and 19). It establishes the requirements for the functional equivalence of the written form with respect to information contained in or related to electronic transferable records (A/CN.9/797, para. 37). The general rule on functional equivalence between electronic and written form should be contained in the law on electronic transactions (A/CN.9/797, para. 38). Draft article 7 refers to the notion of "information" instead of "communication" as not all relevant information might necessarily be communicated (A/CN.9/797, para. 37).

45. Pursuant to a decision of the Working Group at its fifty-first session, the explanatory materials to the draft provisions will reflect the understanding that any legal requirement contained in the draft Model Law implies consequences for the case it is not met, making it not necessary to explicitly refer to those consequences (A/CN.9/834, paras. 43 and 46). Accordingly, the words "or provides consequences for the absence of a writing" have been deleted throughout the draft Model Law since they are redundant.

46. At the Working Group's forty-ninth session, it was suggested that draft article 7 might not be necessary as the fulfilment of the functional equivalence of the "writing" requirement was implied in the definition of "electronic transferable record" in draft article 2. In response, it was stated that a rule on the "writing" requirement was necessary in light of the other rules on functional equivalence contained in the draft provisions (A/CN.9/804, para. 18). The Working Group may wish to clarify the relationship between draft article 7 and draft article 9, setting forth information and integrity requirements for the functional equivalence of transferable documents or instruments.

47. In its future deliberations on a law applicable to electronic transferable records existing only in electronic form, the Working Group may wish to confirm that the law governing those records should set forth the same requirements contained in draft article 7, i.e. that information should be accessible so as to be usable for subsequent reference (A/CN.9/768, para. 42).

"**Draft article 8. Signature**

"Where the law requires a signature of a person, that requirement is met [with respect to] [in relation to] [by] an electronic transferable record if a reliable method is used to identify that person and to indicate that person's intention in respect of the information contained in the electronic record."

Remarks

48. Draft article 8 reflects the Working Group's deliberations at its forty-ninth (A/CN.9/804, para. 20) and fifty-second (A/CN.9/863, paras. 66 and 73) sessions. It establishes the requirements for the functional equivalence of "signature" (A/CN.9/804, para. 20) when substantive law either contains an explicit signature requirement or provides consequences for the absence of a signature (implicit signature requirement) (A/CN.9/797, para. 46; see also A/CN.9/834, para. 43).

49. The text of draft article 8, originally based on the text of article 9, paragraph 3, of the Electronic Communications Convention, reflects the changes made pursuant to the Working Group's decision at its fifty-second session with regard to draft article 10 on the general reliability standard (A/CN.9/863, paras. 66 and 73). Accordingly, the reliability of the method referred to in draft article 8 shall be assessed according to the general reliability standard contained in draft article 10.

50. The Working Group may wish to consider whether the text of draft article 8 should better clarify that that provision applies to electronic transferable records only and not to other electronic records that are not transferable but are somehow related to an electronic

transferable record. Alternative wording is suggested to that end. The words "with respect to" have been used in the chapeau of draft article 8. The words "in relation to" are used in article 9(3) of the Electronic Communications Convention. The word "by" has been used in other UNCITRAL provisions on functional equivalence and may suggest a narrower application of draft article 8.

Remarks on "original"

51. After noting that the notion of "original" in the context of electronic transferable records was different from that adopted in other UNCITRAL texts (A/CN.9/797, para. 47) and that the main purpose of a functional equivalence rule for that notion in the context of electronic transferable records should be the prevention of multiple claims (A/CN.9/804, para. 21), the Working Group agreed that there was no need to include a functional equivalence rule for "original" in the draft provisions (A/CN.9/804, para. 40). It was explained that the goal of avoiding multiple claims in the context of electronic transferable records could be achieved through the notion of "control". It was further explained that the notion of "control" could identify both the person entitled to performance and the object of control (A/CN.9/804, para. 39).

C. Use of electronic transferable records

"**Draft article 9. [Electronic transferable record]**

"1. Where the law requires a transferable document or instrument, that requirement is met by an electronic record if:

(a) The electronic record contains the information that would be required to be contained in an [equivalent] transferable document or instrument; and

(b) A reliable method is used:

(i) To identify that electronic record as the [authoritative] [record constituting the] electronic transferable record;

(ii) To render that electronic record capable of being subject to control from its creation until it ceases to have any effect or validity; and

(iii) To retain the integrity of the electronic transferable record."

"2. The criterion for assessing integrity shall be whether information contained in the electronic transferable record, including any [authorized] change that arises from its creation until it ceases to have any effect or validity, has remained complete and unaltered apart from any change which arises in the normal course of communication, storage and display. The standard of reliability required shall be assessed in the light of the purpose for which the information contained in the electronic transferable record was generated and in the light of all the relevant circumstances."

Remarks

52. Draft article 9 has been recast in light of the Working Group's deliberations at its fifty-first (A/CN.9/834, paras. 21-30, 85-94 and 99) and fifty-second (A/CN.9/863, paras. 66 and 73) sessions. The current text aims at combining the two prevalent approaches to avoid multiple claims for performance, i.e. "singularity" and "control" (A/CN.9/834, para. 86) and reflects the changes made pursuant to the Working Group's decision at its fifty-second session with regard to draft article 10 on the general reliability standard (A/CN.9/863, paras. 66 and 73). Accordingly, the reliability of the method referred to in draft article 9 shall be assessed according to the general reliability standard contained in draft article 10.

53. Draft article 9 intends to offer a functional equivalence rule for the use of transferable documents or instruments by setting forth the requirements to be met by an electronic record. The Working Group agreed to introduce draft article 9 in light of its discussions on the notion of uniqueness and its decision to delete a rule on uniqueness (A/CN.9/804, paras. 71 and 74). It was added that resorting to the notion of "control" would make it possible not to

refer to the notion of "uniqueness", which posed technical challenges (A/CN.9/804, para. 38).

54. The Working Group agreed that reference to the definition of "electronic record" would suffice to provide for cases when, as it may happen in certain registry systems, there might be data elements that, taken together, provided the information constituting the electronic transferable record, with no discrete record constituting the electronic transferable record (A/CN.9/828, para. 31).

55. Subparagraph 1(a) states that the electronic record should contain the information required in a transferable document or instrument. The Working Group may wish to consider whether the word "equivalent" before the words "transferable document or instrument" could be misleading in view of the purpose of draft article 9 to provide a rule on functional equivalence. Alternative drafting, such as the use of the words "respective" or "corresponding", may be considered.

56. Subparagraph 1(b)(i) sets forth the requirement to identify an electronic record as the record containing the operative or authoritative information necessary to establish that record as an electronic transferable record. That requirement implements the "singularity" approach (A/CN.9/834, para. 86).

57. The Working Group may wish to consider whether to retain the word "authoritative" to identify the electronic transferable record (A/CN.9/834, paras. 101-104) in light of the fact that information establishing the electronic record as an electronic transferable record is, by itself, authoritative and therefore that qualification might, on the one hand, be unnecessary and, on the other hand, have the unintended effect of fostering litigation on the meaning of the term "authoritative".

58. If the Working Group decides not to retain the word "authoritative", it may further wish to consider whether the provision might be further simplified by deleting the words "record constituting the".

59. Subparagraph 1(b)(ii) sets forth the requirement that the electronic transferable record should be capable of being controlled from its creation until it ceases to have any effect or validity, particularly in order to allow for its transfer. That requirement implements the "control" approach (A/CN.9/834, para. 86).

60. The draft provision reflects the view that an electronic transferable record might not necessarily be actually subject to control (A/CN.9/804, para. 61). This could happen, for instance, when a token-based electronic transferable record is lost.

61. With regard to paragraph 2, at its fiftieth session, the Working Group agreed to insert a provision on the assessment of the notion of integrity (A/CN.9/828, para. 49). That provision indicates that an electronic transferable record retains integrity when any set of information related to legally relevant changes (as opposed to changes of purely technical nature) remains complete and unaltered from the time of the creation of the electronic transferable record until it ceases to have any effect or validity (A/CN.9/804, para. 29). It is inspired by article 8, paragraph 3, of the UNCITRAL Model Law on Electronic Commerce.

62. The Working Group may wish to clarify the relation between the reference to the use of a reliable method to retain the integrity of the electronic transferable record contained in paragraph 1(b)(iii) and the reference to the criterion for assessing integrity contained in paragraph 2, in light also of the considerations expressed with respect to draft article 10(1)(a)(ii) (see below, para. 70).

63. In that respect, the Working Group may also wish to consider whether reference to "the standard of reliability required shall be assessed in the light of the purpose for which the information contained in the electronic transferable record was generated and in the light of all the relevant circumstances" in paragraph 2 should be retained as the same notion is contained in draft article 10.

64. The Working Group may wish to consider whether the word "authorized" in draft paragraph 2 should be retained in light of its discussions on the desirability to record all or only selected changes and on the difference between authorized and legitimate changes (A/CN.9/834, paras. 27-30; A/CN.9/828, paras. 42-44 and A/CN.9/804, paras. 30-32).

65. The Working Group may wish to consider the definition of an electronic transferable record in draft article 2 in conjunction with its deliberations on draft article 9 (see paras. 20-26 above, and A/CN.9/834, paras. 95-100).

"**Draft article 10. General reliability standard**

"1. For the purposes of articles [8, 9, 11, 17, 19, 21, 22, 23] the method referred to shall be:

(a) As reliable as appropriate for the fulfilment of the function for which the method is being used, in the light of all relevant circumstances, which may include:

(i) The operational rules relevant to the assessment of reliability governing the system;

(ii) The assurance of data integrity;

(iii) The ability to prevent unauthorized access to and use of the system;

(iv) The quality of hardware and software systems;

(v) The regularity and extent of audit by an independent body;

(vi) The existence of a declaration by a supervisory body, an accreditation body or a voluntary scheme regarding the reliability of the method;

(vii) Any applicable industry standards; or

(b) Proven in fact to have fulfilled the function agreed to by itself or together with further evidence.

"[2. For the purposes of assessing [the required level of] reliability between parties to an agreement, regard shall be had to such agreement in so far as relevant.]"

Remarks

66. Draft article 10 reflects the deliberations of the Working Group at its forty-ninth (A/CN.9/804, paras. 41-49), fiftieth (A/CN.9/828, paras. 41-49), fifty-first (A/CN.9/834, paras. 66, 73 and 76) and fifty-second (A/CN.9/863, paras. 37-82) sessions.

67. Draft article 10 provides a general standard on the assessment of reliability. That standard applies throughout the Model Law whenever reference is made to a "reliable method". The provision, which is technology neutral (A/CN.9/863, para. 44), provides for a consistent standard to assess reliability throughout the draft Model Law. In that respect, it should be noted that each provision of the Model Law referring to the use of a reliable method aims at fulfilling a different function (A/CN.9/863, para. 54). Accordingly, the reference to "the purposes of articles" contained in the chapeau of draft article 10 aims to clarify that the assessment of the reliability of each relevant method should be carried out separately in light of the function specifically pursued with the use of that method (A/CN.9/863, para. 39).

Paragraph 1

68. Subparagraph 1(a) contains a list of circumstances to assist in the determination of the reliability in subparagraphs (i)-(vi). The words "which may include" are used to clarify that the list is not exhaustive and has an illustrative nature only (A/CN.9/863, paras. 46 and 66).

69. Subparagraph 1(a)(i) refers to "operational rules" that are usually contained in an operating manual whose application could be monitored by an oversight body and that, as such, may not have a purely contractual nature. The words "relevant to the assessment of" aim to clarify that only operational rules regarding the reliability of the system, and not operational rules in general, should be considered (A/CN.9/863, paras. 57 and 68).

70. Subparagraph 1(a)(ii) refers to the "assurance of data integrity" as an absolute notion, since data integrity cannot be expressed by reference to a level (A/CN.9/863, para. 42). The Working Group may wish to discuss whether subparagraph 1(a)(ii) should refer to data integrity in the system, to integrity of the electronic transferable record or to both, in light also of draft article 9. In that respect, the Working Group may wish to note that the reference

to integrity contained in subparagraph 1(a)(ii) operates as a general reliability standard applicable throughout the Model Law, while the reference to integrity contained in draft article 9 operates as a specific parameter in establishing functional equivalence for negotiable documents or instruments (A/CN.9/863, paras. 69 and 70).

71. The circumstances referred to in subparagraphs 1(a)(iv), (v) and (vi) are also referred to in article 10(b), (e) and (f) of the UNCITRAL Model Law on Electronic Signatures. The Working Group may wish to clarify whether the guidance provided on those provisions of the UNCITRAL Model Law on Electronic Signatures[2] could be useful also with respect to the corresponding provisions of the Model Law on Electronic Transferable Records.

72. The Working Group may also wish to discuss whether subparagraph 1(a)(iii) should refer to unauthorized access and use of the system or rather to unauthorized access and use of the method employed to establish control, also in light of the requirement relating to establishment of exclusive control contained in draft article 17. In that respect, the Working Group may also wish to clarify the relation between the reference to a "system" contained in subparagraph 1(a)(iii) and the reference to "hardware and software systems" contained in subparagraph 1(a)(iv).

73. The Working Group may wish to consider dealing with system reliability in the explanatory material discussing third-party service providers (A/CN.9/834, para. 78).

74. The reference to "any applicable industry standards" contained in subparagraph 1(a)(vii) shall not be interpreted so as to violate the principle of technology neutrality (A/CN.9/863, para. 71). In order to do so, those standards should be internationally recognized (A/CN.9/863, para. 56).

75. Subparagraph 1(b) provides a "safety clause" with the purpose of preventing frivolous litigation by validating methods that had in fact achieved their function regardless of any abstract assessment of their reliability (A/CN.9/863, para. 43). It refers to the fulfilment of the function in the specific case under dispute and does not aim at predicting reliability based on past performance of the method (ibid., para. 51). Thus, the legal mechanism contained in paragraph 2 shall operate as an alternative to that contained in paragraph 1 (ibid., para. 52). Article 9(3)(b)(ii) of the Electronic Communications Convention contains a rule similar to that set forth in paragraph 2.

Paragraph 2

76. Paragraph 2, which is an application of the principle of party autonomy, aims to highlight the relevance of any agreement of the parties when assessing reliability. It was explained that those agreements often contain useful guidance on technical details (A/CN.9/863, para. 74). It was added that reference to those agreements could be useful to provide legal recognition to developments in technology and business practices (ibid., para. 38).

77. The Working Group may wish to note that the scope of paragraph 2 is limited to the allocation of liability arising from an agreement on the reliability of the method. As such, the provision contained in paragraph 2 should not affect third parties or mandatory substantive law provisions such as those relating to the validity of electronic transferable records (A/CN.9/863, para. 75).

Note by the Secretariat on a draft model law on electronic transferable records

ADDENDUM

Contents

II. Draft Model Law on Electronic Transferable Records (*continued*)

C. Use of electronic transferable records (Articles 11-23)

"**Draft article 11. Indication of time and place in electronic transferable records**

["Where the law requires or permits the indication of time or place with respect to a transferable document or instrument, a reliable method shall be used to indicate that time or place with respect to an electronic transferable record."]

Remarks

1. Draft article 11 reflects the Working Group's deliberations at its fifty-first (A/CN.9/834, paras. 36-46) and fifty-second (A/CN.9/863, paras. 23-26) sessions.

2. At its fifty-first session, the Working Group took note that time and place of dispatch and receipt had different relevance for contract formation and management, and for the use of electronic transferable records and decided to review the draft provision accordingly (A/CN.9/834, para. 36). At that session, the Working Group also noted that registry systems would record the relevant events in the life cycle of the electronic transferable record with time-stamping, thus determining time automatically. It was further noted that applicable law could allow parties to amend that automatic determination by agreement. Moreover, it was indicated that users of registry systems would agree to contractual rules containing a choice of applicable law. It was concluded that those elements reduced the practical relevance of determining time and place with respect to electronic transferable records (A/CN.9/834, para. 36).

3. At its fifty-second session, it was noted that the determination of time and place with respect to an electronic transferable record might occur differently in registry-based and in other systems and that therefore a technology-neutral approach was necessary (A/CN.9/863, para. 24). In addition, different views were expressed on the merits of retaining the draft article (ibid., paras. 23-25). In support of its deletion, it was said that the determination of time and place were not specific to electronic transferable records but contained in substantive law. Moreover, it was explained that the reference in draft article 9 to the information "required to be contained in an equivalent transferable document or instrument" would adequately address any requirement to indicate time and place in electronic transferable records.

4. Draft article 11 contains the words "or permits" in order to clarify its application to cases in which the law merely permits, but does not require the indication of time or place with respect to a transferable document or instrument (A/CN.9/834, para. 42).

"**Draft article 12. [Location of parties] [Determination of place of business]**

"1. A location is not a place of business merely because that is:

(a) Where equipment and technology supporting an information system used by a party in connection with electronic transferable records are located; or

(b) Where the information system may be accessed by other parties.

"2. The sole fact that a party makes use of an electronic address or other element of an information system connected to a specific country does not create a presumption that its place of business is located in that country."

5. At its fifty-second session, the Working Group decided to include in the draft Model Law a provision on the determination of place of business inspired by article 6 of the United Nations Convention on the Use of Electronic Communications in International Contracts (New York, 2005) (the "Electronic Communications Convention") (A/CN.9/863, paras. 25 and 26). The scope of draft article 12 is limited to clarifying that the location of an information system, or parts thereof, is not, as such, an indicator of a place of business. That clarification might be particularly useful in light of the likelihood that third-party service providers would use equipment and technology located in various jurisdictions.

6. The Working Group may wish to confirm that further elements useful in determining the place of business should be found in applicable substantive law.

7. Alternatively, the Working Group may wish to consider whether the provisions relating to the irrelevance of the location of information systems for the determination of the place of business, which are contained in other UNCITRAL texts on electronic commerce, could be relevant as general principles on which the Model Law is based under draft article 3, paragraph 2.

8. Draft article 12 refers to the notion of place of business, which is defined in substantive law. The Working Group may wish to consider whether the location of the information system and the place where the information system could be accessed should be disregarded for the purpose of recognising the validity of the electronic form of the transferable record (see para. 59 below).

"**Draft article 13. Consent to use an electronic transferable record**

"1. Nothing in this Law requires a person to use an electronic transferable record without that person's consent.

"2. The consent of a person to use an electronic transferable record may be inferred from the person's conduct."

Remarks

9. Draft article 13 reflects the Working Group's deliberations at its forty-eighth session (A/CN.9/797, paras. 62 and 63). The Working Group may wish to consider whether draft article 13 should be placed after draft article 4 on party autonomy.

"**Draft article 14. Issuance of multiple originals**

"1. Where the law permits the issuance of more than one original of a transferable document or instrument, this may be achieved with respect to electronic transferable records by issuance of multiple electronic transferable records.

"[2. Where the law requires the indication of the total number of multiple original transferable documents or instruments issued, the total number of multiple electronic transferable records issued shall be indicated in those multiple records.]"

Remarks

10. Draft article 14 reflects the Working Group's deliberations at its forty-eighth (A/CN.9/797, paras. 47 and 68) and fifty-first (A/CN.9/834, paras. 47-52) sessions.

11. The possibility of issuing multiple originals of a transferable document or instrument exists in several fields of trade (A/CN.9/WG.IV/WP.124, para. 49) and is recognized in article 47, subparagraph 1(c) of the United Nations Convention on Contracts for the International Carriage of Goods Wholly or Partly by Sea (New York, 2008) (the "Rotterdam Rules"). Draft article 14 aims at enabling that possibility in an electronic environment (A/CN.9/834, para. 47), in line with a survey of existing practice that evidenced the use of

multiple originals of electronic bills of lading. The provision may be relevant also with respect to bills of exchange.

12. Under an alternative approach based on the general principle contained in draft article 1, paragraph 2, paragraph 1 could indicate that:

> "Nothing in this Law precludes the issuance of multiple electronic transferable records".

13. Some of the functions pursued with the issuance and use of multiple transferable documents or instruments may be achieved in an electronic environment, by attributing selectively to multiple entities control on one electronic transferable record. Based on the general principle contained in draft article 1, paragraph 2, the Model Law does not preclude control of an electronic transferable record by multiple entities, where allowed by substantive law.

14. The Working Group may wish to confirm that each electronic transferable record in a set of multiple electronic transferable records may be controlled by a different entity, if parties so agree.

15. Paragraph 2 has been redrafted pursuant to the Working Group's decision at its fifty-first session to limit its scope to cases where substantive law contained a requirement to indicate the number of multiple originals (A/CN.9/834, para. 51).

16. The Working Group may wish to consider whether a provision dealing with the co-existence of multiple originals issued simultaneously on different media should be inserted in the draft Model Law.

> "**Draft article 15. [Substantive] information requirements of electronic transferable records**
>
> "Nothing in this Law requires additional [substantive] information for [the issuance of] an electronic transferable record beyond that required for [the issuance of] a transferable document or instrument."

Remarks

17. Draft article 15 reflects a decision of the Working Group at its forty-eighth session to insert a provision dealing with substantive information requirements (A/CN.9/797, para. 73). It states that no additional substantive information is required for the issuance of an electronic transferable record than that required for a corresponding transferable document or instrument.

18. The Working Group may wish to clarify the relation between draft article 15 and draft article 9, which requires that an electronic record should contain all information contained in a transferable document or instrument in order to be an electronic transferable record functionally equivalent to that transferable document or instrument.

19. The Working Group may wish to consider whether draft article 15 contains a general rule applicable from the time of creation of the electronic transferable record until it ceases to have any effect or validity. In that case, the Working Group may wish to delete the reference to "the issuance of" as it might limit the scope of the draft article.

20. The Working Group may wish to also consider whether the word "substantive" should be included between the words "additional" and "information" to align the article with its title.

> "**Draft article 16. Additional information in electronic transferable records**
>
> "Nothing in this Law precludes the inclusion of information in an electronic transferable record in addition to that contained in a transferable document or instrument."

Remarks

21. Draft article 16 reflects a decision by the Working Group to clarify that, while draft article 15 of the Model Law does not impose any additional information requirement for electronic transferable records, it also does not prevent the inclusion in those records of additional information that may not be contained in a transferable document or instrument (A/CN.9/797, para. 73). Examples of such additional information include information that can be displayed only in electronic form or necessary due to technical reasons.

22. In particular, dynamic information, i.e. information that may change periodically or continuously based on an external source, may be included in an electronic transferable record due to its nature but not in a transferable document or instrument (A/CN.9/768, para. 66 and A/CN.9/797, para. 73). The price of a publicly-traded commodity and the position of a vessel are examples of such information.

"**Draft article 17. [Control]**

"1. Where the law requires the possession of a transferable document or instrument, that requirement is met with respect to an electronic transferable record if a reliable method is used:

(a) To establish exclusive control of that electronic transferable record by a person; and

(b) To [identify] [establish] that person as the person in control.

"2. Where the law requires or permits transfer of possession of a transferable document or instrument, that requirement is met with respect to an electronic transferable record through the transfer of control over the electronic transferable record."

Remarks

23. Draft article 17 reflects the Working Group's deliberations at its forty-eighth (A/CN.9/797, para. 83), forty-ninth (A/CN.9/804, paras. 51-62 and 63-67), fiftieth (A/CN.9/828, paras. 50-56), fifty-first (A/CN.9/834, paras. 34, 35 and 91-94) and fifty-second (A/CN.9/863, paras. 66 and 73) sessions. It sets forth control of an electronic transferable record as the functional equivalent of possession of a transferable document or instrument.

24. The Working Group may wish to note that, pursuant to a decision at its fifty-second session, the definition of "control" has been deleted from the draft Model Law as being implicit in draft article 17 (A/CN.9/863, para. 102). At that session, there was broad consensus on the statement that both control and possession were factual situations and that the person in control of an electronic transferable record was in the same position as the possessor of an equivalent transferable document or instrument. There was also broad consensus on the statement that control could not affect or limit the legal consequences arising from possession and that those legal consequences would be determined by applicable substantive law. At that session, it was further stated that parties could agree on the modalities for the exercise of possession, but not modify the notion of possession itself (ibid., para. 101).

25. With regard to paragraph 1, it was explained that reference to the person in control of the electronic transferable record does not imply that that person is also the rightful person in control of that record as this is for substantive law to determine (A/CN.9/828, para. 61). It was also explained that reference to the person in control does not exclude the possibility of having more than one person exercising control (A/CN.9/828, para. 63, and para. 13 above; see also para. 14 above, regarding the possibility of having different persons in control of each record in a set of multiple electronic transferable records). The Working Group may wish to clarify that a "person" may either be a natural or a legal person.

26. With respect to "identify", the Working Group may wish to note that the electronic transferable record in itself does not necessarily identify the person in control, but rather the method or system employed to establish control as a whole performs that function (A/CN.9/828, para. 63). Moreover, identification should not be understood as implying an

obligation to name the person in control, as the draft Model Law allows for the issuance of electronic transferable records to bearer, which implies anonymity (A/CN.9/828, para. 51). However, anonymity for commercial law purposes may not preclude the possibility of identifying the person in control for other purposes, such as law enforcement.

27. The Working Group may wish to consider whether the word "establish" has substantive law implications.

28. Paragraph 2 sets forth that transfer of control over an electronic transferable record is the functional equivalent of delivery, i.e. transfer of possession, of a transferable document or instrument (A/CN.9/834, paras. 31-33). It includes the words "or permits" in order to clarify its application to cases in which the law merely permits, but does not require transfer of possession of a transferable document or instrument.

29. The Working Group may wish to consider whether "Control" would be an appropriate title for draft article 17 in light of its content.

30. The Working Group may also wish to consider whether draft article 17 should be placed consecutively after draft article 9 (A/CN.9/834, para. 92).

"**Draft article 18. Endorsement**

"Where the law requires or permits the endorsement in any form of a transferable document or instrument, that requirement is met with respect to an electronic transferable record if information [relating to the endorsement] [constituting endorsement] [indicating the intention to endorse] is [logically associated with or otherwise linked to] [included in] that electronic transferable record and that information is compliant with the requirements set forth in articles 7 and 8."

Remarks

31. Draft article 18 reflects the Working Group's deliberations at its fiftieth session (A/CN.9/828, para. 80).

32. The Working Group may wish to consider substituting the words "relating to the endorsement" with the words "indicating the intention to endorse" to better specify that the satisfaction of the generic requirements for writing and signature set forth in draft articles 7 and 8 should be accompanied by the expression of the intent to endorse. The use of the words "constituting endorsement" may provide another drafting option.

33. The Working Group may wish to provide guidance on the use of the words "logically associated with or otherwise linked to" and "included in" throughout the draft Model Law, in light of the considerations expressed at its fiftieth session (A/CN.9/828, paras. 78 and 80) and of the draft definition of "electronic record" contained in draft article 2 (A/CN.9/WG.IV/WP.137, para. 30).

"**Draft article 19. Amendment**

"Where the law requires or permits the amendment of a transferable document or instrument, that requirement is met with respect to an electronic transferable record if a reliable method is used for amendment of information in the electronic transferable record so that the amended information is identified as such."

Remarks

34. Draft article 19 reflects the Working Group's deliberations at its fiftieth and (A/CN.9/828, paras. 86 and 90) and fifty-second (A/CN.9/863, paras. 83-87) sessions. It provides a functional equivalence rule for instances in which an electronic transferable record may be amended.

35. Draft article 19 sets forth an objective standard for the identification of amended information in an electronic environment in a manner similar to the paper-based environment (A/CN.9/828, paras. 86 and 87), as indicated by the use of the word "identified". The rationale for requesting the identification of the amended information lies in the fact that, while amendments may be easily identifiable in a paper-based environment due to the nature of that medium, that may not be the case in an electronic environment.

"**Draft article 20. Reissuance**

"Where the law permits the reissuance of a transferable document or instrument, an electronic transferable record may be reissued."

Remarks

36. Draft article 20 reflects the Working Group's deliberations at its forty-eighth (A/CN.9/797, para. 104) and fiftieth (A/CN.9/828, para. 93) sessions. It indicates that electronic transferable records may be reissued where substantive law so permits, such as in case of loss or destruction of the original. Thus, the draft article presupposes the prior existence of an electronic transferable record for its reissuance.

37. The Working Group may wish to consider whether draft article 20 should be retained due to its declaratory value, or it should be deleted as the possibility of reissuing an electronic transferable record is already available under draft article 1, paragraph 2.

"**Draft article 21. Replacement of a transferable document or instrument with an electronic transferable record**

"1. A change of medium of a transferable document or instrument to an electronic transferable record may be performed if a reliable method for the change of medium is used.

2. For the change of medium to take effect, the following requirements shall be met:

(a) The electronic transferable record shall include all the information contained in the transferable document or instrument; and

(b) A statement indicating a change of medium shall be inserted in the electronic transferable record.

3. Upon issuance of the electronic transferable record in accordance with paragraph 2, the transferable document or instrument ceases to have any effect or validity.

4. A change of medium in accordance with paragraphs 1 and 2 does not affect the rights and obligations of the parties."

Remarks

38. Draft article 21 has a substantive nature due to the fact that substantive law is unlikely to contain a rule on change of medium. It aims at satisfying two main goals, i.e., enabling change of medium without loss of information and ensuring that the replaced transferable document or instrument would not further circulate (A/CN.9/828, para. 95).

39. Draft article 21 reflects the suggestions made at the Working Group's forty-eighth (A/CN.9/797, paras. 102 and 103), fiftieth (A/CN.9/828, para. 102), fifty-first (A/CN.9/834, paras. 57-64) and fifty-second (A/CN.9/863, paras. 66 and 73) sessions. By omitting the reference to substantive legal notions such as "issuer", "obligor", "holder" and "the person in control", this approach aims at accommodating the variety of schemes used in the various transferable documents or instruments. Consequently, and in light also of the need to consent to the use of electronic means set forth in draft article 13, draft article 21, does not contain any reference to consent. Substantive law, including parties' agreement, would identify those parties whose consent is relevant for the change of medium (A/CN.9/834, para. 62).

40. The Working Group may wish to consider the following draft of paragraph 1, provided for editorial purposes only:

"An electronic transferable record may replace a transferable document or instrument if a reliable method for the change of medium is used."

41. The requirements set forth in paragraph 2 (a) and (b) are concurrent. The legal consequence for non-compliance with any of them would be the invalidity of the change of medium and, consequently, of the electronic transferable record (A/CN.9/834, para. 58).

42. Draft paragraph 3 sets forth that, when the change of medium has taken place, the transferable document or instrument ceases to have any effect or validity. This is necessary to avoid multiple claims for performance. In that respect, a transferable document or instrument may be destroyed or otherwise invalidated on the wrong assumption of the validity of the electronic transferable record replacing it. In that case, the Working Group may wish to confirm that substantive law would apply to the reissuance of the transferable document or instrument, or, alternatively, that the electronic transferable record shall be issued in compliance with draft article 21.

43. Draft paragraph 4 is intended to clarify as a statement of law that the rights and obligations of the parties are not affected by the change of medium (A/CN.9/834, para. 61).

> "**Draft article 22. Replacement of an electronic transferable record with a transferable document or instrument**
>
> "1. A change of medium of an electronic transferable record to a transferable document or instrument may be performed if a reliable method for the change of medium is used.
>
> 2. For the change of medium to take effect, the following requirements shall be met:
>
> (a) The transferable document or instrument shall include all the information contained in the electronic transferable record; and
>
> (b) A statement indicating a change of medium shall be inserted in the transferable document or instrument.
>
> 3. Upon issuance of the transferable document or instrument in accordance with paragraph 2, the electronic transferable record ceases to have any effect or validity.
>
> 4. A change of medium in accordance with paragraphs 1 and 2 does not affect the rights and obligations of the parties."

Remarks

44. Draft article 22 provides for the replacement of an electronic transferable record with a transferable document or instrument. Its content mirrors that of draft article 21 (A/CN.9/834, para. 64). A survey of business practice indicates that such replacement is the more frequent case due to the fact that a party whose involvement was not envisaged at the time of the creation of the electronic transferable record does not wish or is not in a position to use electronic means.

45. Under certain national laws, the paper-based print-out of an electronic record may fall under the definition of electronic record. However, under draft article 22, a print-out of an electronic transferable record that does not meet the requirements of that draft article would have no effect as a transferable document or instrument replacing the corresponding electronic transferable record.

46. Draft paragraph 3 sets forth that, when the change of medium has taken place, the electronic transferable record ceases to have any effect or validity. This is necessary to avoid multiple claims for performance. In that respect, an electronic transferable record may be destroyed or otherwise invalidated on the wrong assumption of the validity of the transferable document or instrument replacing it. In that case, the Working Group may wish to confirm that, where substantive law allows, the electronic transferable record shall be reissued in compliance with draft article 20, or, alternatively, that the transferable document or instrument shall be issued in compliance with draft article 22.

47. The Working Group may wish to consider the following draft of paragraph 1, provided for editorial purposes only:

> "A transferable document or instrument may replace an electronic transferable record if a reliable method for the change of medium is used."

"**Draft article 23. Division and consolidation of an electronic transferable record**

"[1. Where the law permits the division or consolidation of a transferable document or instrument, an electronic transferable record may be divided or consolidated if:

(a) A reliable method is used to divide or consolidate the electronic transferable record[; and

(b) The divided or consolidated electronic transferable record contains a statement identifying it as such].]

"[2. Upon division or consolidation, the pre-existing divided or consolidated electronic transferable records cease to have any effect or validity.]"

Remarks

48. In light of the suggestions made at the Working Group's fiftieth session, draft article 23 has been recast as a more generic functional equivalence rule including certain elements of the previous draft article (A/CN.9/828, para. 104).

49. The Working Group may wish to consider whether paragraph 1 should be retained for declaratory purposes, or whether draft article 1, paragraph 2 might suffice to enable division and consolidation of electronic transferable records.

50. The Working Group may also wish to consider whether subparagraph 1(b) introduces a substantive rule and, in that case, whether it is justified in light of the use of electronic means.

51. The Working Group may further wish to consider whether to retain draft paragraph 2, which introduces a substantive rule that may not be compatible with the law and practice of securitization. Alternatively, the Working Group may wish to clarify that substantive law shall determine the effect or validity of electronic transferable records after division or consolidation.

D. Cross-border recognition of electronic transferable records (Article 24)

"**Draft article 24. Non-discrimination of foreign electronic transferable records**

"1. An electronic transferable record shall not be denied legal effect, validity or enforceability on the sole ground that it was issued or used [abroad] [outside [the enacting jurisdiction]] [, or that its issuance or use involved the services of a third party based, in part or wholly, [abroad] [outside [the enacting jurisdiction]]] [, if it offers a substantially equivalent level of reliability].

"2. Nothing in this Law affects the application to electronic transferable records of rules of private international law governing a transferable document or instrument."

Remarks

52. At the forty-fifth session of the Commission in 2012, the need for an international regime to facilitate the cross-border use of electronic transferable records was emphasized.[1] The Working Group also stressed the importance of cross-border legal recognition of electronic transferable records (A/CN.9/761, paras. 87-89 and A/CN.9/863, para. 77).

53. At the Working Group's fifty-second session, several views were expressed on the draft article. On the one hand, there was the desire not to displace existing private international law rules and to avoid the creation of a dual regime with a special set of provisions for electronic transferable records. On the other hand, there was awareness of the importance of aspects relating to the international use of the Model Law for its success and expression of the desire to favour the cross-border application of the Model Law regardless of the number of enactments (A/CN.9/863, paras. 77-82).

[1] *Official Records of the General Assembly, Sixty-seventh Session, Supplement No. 17* (A/67/17), para. 83.

54. In that line, the Working Group may wish to confirm that the promotion of the international use of the Model Law should be pursued with respect to issues of validity related to the electronic form of the transferable record, while issues of substantive law, including private international law aspects thereof, should not be affected by the Model Law.

55. Paragraph 1 aims at eliminating obstacles to cross-border recognition of an electronic transferable record arising exclusively from the place of origin or of use of the electronic transferable record. In other words, paragraph 1 aims to prevent that the place of origin or of use of the electronic transferable record could be considered in themselves reasons to deny legal validity or effect to an electronic transferable record. The words "abroad" and "outside [the enacting jurisdiction]" are editorial alternatives on how to refer to a jurisdiction other than the enacting one. In considering those alternatives, the Working Group may wish to keep in mind the needs of States comprising more than one territorial unit.

56. At the Working Group's fifty-second session, it was noted that an electronic transferable record might be issued in a jurisdiction that did not recognise the use of electronic transferable records, and that recognition of its validity could be sought in a jurisdiction that allowed that use. In that case, it was added, it could be useful to permit recognition of the validity of the electronic transferable record in the latter jurisdiction, provided legal requirements set forth in that jurisdiction were met (A/CN.9/863, para. 79).

57. Hence, the Working Group may wish to confirm that under paragraph 1 an electronic transferable record issued or used in a jurisdiction that does not allow the issuance and use of electronic transferable records, and that otherwise complies with the requirements of applicable substantive law, could be recognized in a jurisdiction enacting the Model Law.

58. At the Working Group's fifty-second session, reference was also made to the possibility of introducing reciprocity standards in the cross-border recognition of electronic transferable records (A/CN.9/863, para. 80). In that respect, the Working Group may wish to consider whether a requirement of substantially equivalent level of reliability should be introduced in the draft provisions. The words "if it offers a substantially equivalent level of reliability" are inspired by article 12, paragraph 3, of the UNCITRAL Model Law on Electronic Signatures.

59. Alternatively, the Working Group may wish to consider the following alternative draft of paragraph 1, based on the notion of irrelevance of the place of issuance and use of electronic transferable records, as well as of the location of information systems or of the place where those systems may be accessed. The scope of the proposed alternative draft of paragraph 1 is limited to validity issues relating to the electronic nature of the record. That approach could be particularly appropriate in light of the distributed nature of block-chain-based systems and of the difficulty of determining their exact geographic location.

> "In determining whether, or to what extent, an electronic transferable record is legally effective, valid or enforceable because of its electronic form, no regard shall be had:
>
> (a) To the location where the electronic transferable record is issued or used;
>
> (b) To the location of the information system, or parts thereof, used in connection with the electronic transferable record; or
>
> (c) To the location where the information system used in connection with the electronic transferable record may be accessed."

60. Paragraph 2 reflects the Working Group's understanding that the draft Model Law should not displace existing private international law applicable to transferable documents or instruments (A/CN.9/768, para. 111). This paragraph restates a general principle already contained in article 1, paragraph 2 of the draft Model Law. The Working Group may wish to consider retaining paragraph 2 in light of the fact that private international law rules are often considered procedural rules and that therefore the term "substantive law" could be interpreted as not including private international law.

61. In order to achieve broader cross-border use of electronic transferable records, the Working Group may also wish to consider positively promoting their recognition under private international law by adopting a provision along the following lines:

> "When the rules of private international law lead to the application of a law that does not recognize the issuance and use of electronic transferable records because of their form, this Law shall apply."

62. The effect of the proposed provision would be to displace rules of private international law that do not allow for the recognition of electronic transferable records due to their electronic form only. It does not aim at permitting the issuance and use of electronic transferable records that do not comply with substantive law requirements, as determined by applicable private international law rules. The draft provision would be applicable as lex fori or, where possible, as law chosen by the parties.

63. The Working Group may wish to note that the words "When the rules of private international law lead to the application of a law" are found in article 1(1)(b) CISG and that judicial precedents on the interpretation and application of those words could provide useful guidance also in the context of the draft Model Law.

V. INSOLVENCY LAW

A. Report of the Working Group on Insolvency Law on the work of its forty-eighth session (Vienna, 14-18 December 2015)

(A/CN.9/864)

[Original: English]

Contents

I. Introduction

A. Facilitating the cross-border insolvency of multinational enterprise groups

1. At its forty-fourth session (December 2013), Working Group V (Insolvency Law) agreed to continue its work on cross-border insolvency of multinational enterprise groups by developing provisions on a number of issues, some of which would extend the existing provisions of the UNCITRAL Model Law on Cross-Border Insolvency (the Model Law) and part three of the UNCITRAL Legislative Guide on insolvency law (the Legislative Guide) and involve reference to the UNCITRAL Practice Guide on Cross-Border Insolvency Cooperation (A/CN.9/798, para. 16). Discussion of those issues commenced at the forty-fifth session of Working Group V (April 2014) (A/CN.9/803), and continued at the forty-sixth (December 2014) (A/CN.9/829) and forty-seventh sessions (May 2015) (A/CN.9/835).

B. Directors' obligations in the period approaching insolvency: enterprise groups

2. At its forty-fourth session, the Working Group had also agreed on the importance of addressing the obligations of directors of enterprise group companies in the period approaching insolvency, given that there were clearly difficult practical problems in this area and that solutions would be of great benefit to the operation of efficient insolvency regimes (A/CN.9/798, para. 23). At the same time, the Working Group noted that there were issues

that needed to be considered carefully so that solutions would not hinder business recovery, make it difficult for directors to continue to work to facilitate that recovery, or influence directors to prematurely commence insolvency proceedings. In light of those considerations, the Working Group agreed that it would be helpful to have the next steps taken informally in an expert group, whose task would be to examine how part four of the Legislative Guide could be applied in the enterprise group context and to identify any additional issues (such as conflicts between a director's duty to its own company and the interests of the group, as well as issues of governing law) that might need to be addressed. The informal expert group reported back in the second half of 2014 with a draft text for consideration by the Working Group at its forty-sixth session (A/CN9/WG.V/WP.125). That draft text was considered at the forty-sixth (A/CN.9/829, paras. 12 to 32) and forty-seventh (A/CN.9/835, paras. 13 to 22) sessions.

3. The report of the forty-seventh session of the Working Group indicated that a new draft of the text addressing the obligations of directors of enterprise group companies in the period approaching insolvency would be prepared for consideration at its forty-eighth session (A/CN.9/835, para. 13). That draft has not yet been prepared on the basis that more progress needed to be made on the work on facilitating the cross-border insolvency of multinational enterprise groups before it was possible to identify how the draft text on directors' obligations might need to be adjusted to ensure consistency. Depending on the progress made during the forty-eighth session of the Working Group, it was noted that it might be possible to provide that new draft text for its forty-ninth session.

C. Recognition and enforcement of insolvency-derived judgements

4. At its forty-fourth session (December 2013), Working Group V had further agreed (A/CN.9/798, para. 30) that it should seek at an appropriate time a mandate from the Commission to commence work on the recognition and enforcement of insolvency-derived judgements, which had been discussed at the colloquium held in conjunction with the forty-fourth session in December 2013 (A/CN.9/815). At its forty-fifth session, the Working Group agreed (A/CN.9/803, para. 39(b)) that it should seek that mandate from the Commission at its forty-seventh session (2014). At that session, the Commission agreed that, in addition to the two topics concerning treatment of enterprise groups in insolvency, Working Group V's other priority should be to develop a model law or model legislative provisions to provide for the recognition and enforcement of insolvency-derived judgements, which was said to be an important area for which no explicit guidance was contained in the UNCITRAL Model Law on Cross-Border Insolvency. The Commission approved a mandate in accordance with those terms (A/69/17, para. 155). The Working Group commenced its deliberations on the topic at its forty-sixth session (December 2014) (A/CN.9/829) and continued them at its forty-seventh session (May 2015) (A/CN.9/835).

II. Organization of the session

5. Working Group V, which was composed of all States members of the Commission, held its forty-eighth session in Vienna from 14-18 December 2015. The session was attended by representatives of the following States Members of the Working Group: Algeria, Argentina, Armenia, Austria, Brazil, Canada, China, Colombia, Croatia, Czech Republic, Denmark, El Salvador, France, Germany, Greece, Indonesia, Israel, Italy, Japan, Kenya, Kuwait, Malaysia, Mexico, Namibia, Poland, Republic of Korea, Russian Federation, Singapore, Spain, Switzerland, Thailand, Turkey, Uganda, United Kingdom of Great Britain and Northern Ireland, United States of America and Venezuela (Bolivarian Republic of).

6. The session was attended by observers from the following States: Bolivia (Plurinational State of), Chile, Cyprus, Dominican Republic, Lebanon, Luxembourg, Netherlands, Peru, Republic of Moldova, Slovakia, Sudan, Tunisia and United Arab Emirates.

7. The session was also attended by observers from the European Union.

8. The session was also attended by observers from the following international organizations:

(a) *Organizations of the United Nations system*: World Bank;

(b) *Invited international non-governmental organizations*: American Bar Association (ABA), European Law Students Association (ELSA), Fondation pour le Droit Continental (FDC), INSOL Europe, INSOL International, International Bar Association (IBA), International Insolvency Institute (III), International Women's Insolvency and Restructuring Confederation (IWIRC), Islamic Development Bank (ISDB), Law Association for Asia and the Pacific (LAWASIA), Moot Alumni Association (MAA), New York City Bar Association (NYCBAR), and Union Internationale des Avocats (UIA).

9. The Working Group elected the following officers:

Chairman: Mr. Carlos SÁNCHEZ MEJORADA Y VELASCO (Mexico)

Rapporteur: Ms. Michal ELBAZ (Israel)

10. The Working Group had before it the following documents:

(a) Annotated provisional agenda (A/CN.9/WG.V/WP.132);

(b) A note by the Secretariat on facilitating the cross-border insolvency of multinational enterprise groups: key principles (A/CN.9/WG.V/WP.133);

(c) A note by the Secretariat on facilitating the cross-border insolvency of multinational enterprise groups: revised draft legislative provisions (A/CN.9/WG.V/WP.134); and

(d) A note by the Secretariat on the cross-border recognition and enforcement of insolvency-derived judgements (A/CN.9/WG.V/WP.135).

11. The Working Group adopted the following agenda:

1. Opening of the session.
2. Election of officers.
3. Adoption of the agenda.
4. Consideration of: (a) facilitating the cross-border insolvency of multinational enterprise groups; and (b) the recognition and enforcement of insolvency-derived judgements.
5. Other business.
6. Adoption of the report.

III. Deliberations and decisions

12. The Working Group commenced its deliberations on the cross-border insolvency of multinational enterprise groups on the basis of documents A/CN.9/WG.V/WP.128 (recalling that articles 8 to 18 had not been considered at the forty-seventh session), A/CN.9/WG.V/WP.133 and A/CN.9/WG.V/WP.134, followed by the recognition and enforcement of insolvency-derived judgements on the basis of document A/CN.9/WG.V/WP.135. The deliberations and decisions of the Working Group on these topics are reflected below.

IV. Facilitating the cross-border insolvency of multinational enterprise groups

A. Key principles of a regime to address insolvency in the context of enterprise groups

13. The Working Group commenced its discussion of this topic on the basis of the principles contained in document A/CN.9/WG.V/WP.133.

14. A new principle was proposed for insertion before principle 1 along the following lines:

> "The principles that follow are each subject to two fundamental underpinning principles:
>
> "(a) The jurisdiction of the courts in the State in which the centre of main interests (COMI) of an enterprise group member is located is [and remains] unaffected; and
>
> "(b) The principles do not replace or interfere with any process or procedure (including any permission, consent or approval) required by the jurisdiction in which the COMI of an enterprise group member is located, in respect of that enterprise group member's participation [to any extent] in a group solution."

15. The Working Group approved the additional principle as proposed. It was observed that the new principle would cover some issues raised in connection with other principles, for example, the requirements for participation in the coordination process as contemplated in principle 5.

16. The Working Group approved principles 1 to 8 with the following observations. It was noted that the reference to refusing the commencement of proceedings in paragraph 5 might not be possible in all jurisdictions, as it would be dependent upon domestic law. Use of the words "rather than substantive" in principle 3 should be deleted and the word "exclusively" should be added before the word "procedural".

17. Noting that substantive consolidation had been discussed in part three of the Legislative Guide, it was suggested that it should also be discussed in the cross-border context and any reasons for not including it in this draft text as a possible tool in resolving cross-border insolvency should be explained.

18. Having approved the principles, the Working Group considered how to approach the draft text on enterprise groups contained in documents A/CN.9/WG.V/WP.128 (articles 8 to 18) and WP.134. A proposal was made that the various topics contained in those documents could be divided into five main areas, the first three of which would form a set of basic provisions with the fourth and fifth being supplemental for those States wishing to go beyond the first three. The first topic, for example, could address coordination and cooperation as set out in draft articles 9 to 18 of A/CN.9/WG.V/WP.128. The second topic could include the elements needed for the development of a group solution involving multiple entities and approval of that solution, as well as voluntary participation in the solution, and obtaining relief to support that solution. The third topic could cover the use of synthetic proceedings in lieu of commencing non-main proceedings. The fourth and fifth supplemental topics could address the use of synthetic proceedings in lieu of commencing main proceedings and approval of the group solution on a more streamlined basis that assessed whether the interests of creditors of the affected group member were adequately protected by that solution.

19. Endorsing that general approach, the Working Group agreed to first consider articles 9 to 18 of A/CN.9/WG.V/WP.128.

B. Draft legislative provisions on the cross-border insolvency of enterprise groups (A/CN.9/WG.V/WP.128)

1. Cooperation with foreign courts and foreign representatives

Article 9. Cooperation and direct communication between a court of this State and foreign courts or foreign group member representatives

20. There was general support in the Working Group for article 9 as drafted.

Article 10. Cooperation to the maximum extent possible under article 9

21. There was general support in the Working Group for article 10 as drafted, with the following comments:

(a) Some preference was expressed in favour of deleting the square brackets in paragraph (c) and retaining the text "participating in a group insolvency solution", although it was noted that consistency with the definition of that phrase needed to be maintained;

(b) An additional paragraph might be added to the draft article to address cooperation among courts on how to allocate and provide for the costs associated with cross-border cooperation; and

(c) A cross reference to the UNCITRAL Practice Guide on Cross-Border Insolvency Cooperation might be added to the draft article.

Article 11. Conditions applicable to cross-border communication involving courts

22. There was support in the Working Group for the deletion of draft article 11 on the basis that it was already contained in part three of the Legislative Guide and was more appropriate to that text than a model law.

Article 12. Effect of communication under article 9

23. There was some support for deleting draft article 12 as covering issues not addressed in the Model Law; however, there was also support for retaining it on the basis that it facilitated common understanding about the effect of communication. In that regard, it was noted that in jurisdictions less familiar with cross-border cooperation, there was uncertainty as to the effect of this type of communication, and that retaining draft article 12 could facilitate effective implementation of this text. It was agreed that the draft article would be retained for further consideration.

Article 13. Coordination of hearings and Article 14. Cooperation and direct communication between the […] and foreign courts and foreign group member representatives

24. There was general support in the Working Group for articles 13 and 14 as drafted.

Article 15. Cooperation to the maximum extent possible under article 14

25. There was general support in the Working Group for article 15 as drafted, with the following comments:

(a) Some preference was expressed in favour of deleting the square brackets in paragraph (d) and retaining the text "participating in a group insolvency solution"; and

(b) The language of article 27(d) of the Model Law, i.e. "agreements concerning the coordination of proceedings" should be used in paragraph (b) in place of "cross-border insolvency agreement".

26. It was noted that the draft text did not contain a draft article 16.

Article 17. Authority to enter into cross-border insolvency agreements

27. There was general support in the Working Group for article 17 as drafted, but it was suggested that the title and the substance of draft article 17 should incorporate the language of article 27(d) of the Model Law, i.e. "agreements concerning the coordination of proceedings" in place of "cross-border insolvency agreement".

Article 18. Appointment of a single or the same insolvency representative

28. Subject to giving some consideration in the next draft of the text to the use of the phrase "a single or the same insolvency representative" to provide greater clarity, there was general support in the Working Group for article 18 as drafted.

Article 8. Protection of creditors and other interested persons

29. The Working Group recalled that it had not considered draft article 8 at its previous session (as noted above in para. 12). There was general support for article 8 as drafted.

2. Coordination of concurrent proceedings (A/CN.9/WG.V/WP.128, section D)

30. There was some agreement that the draft model law may need to incorporate provisions addressing issues covered by articles 28 to 32 of the Model Law. At this stage, however, the Working Group was not clear what might be required and noted that this matter should be reverted to in future discussions.

C. Draft legislative provisions on the cross-border insolvency of enterprise groups (A/CN.9/WG.V/WP.134)

31. The Working Group next considered the revisions made to articles 1 to 7 of the draft text based on the conclusions reached at its forty-seventh session (A/CN.9/835, paras. 23-46).

Article 2. Definitions

32. Some support was expressed in favour of retaining Variant 2 of paragraphs (h) "foreign group proceeding" and (i) "enterprise group insolvency solution". It was felt that those variants better reflected the desire to focus on recognition of the coordinating proceeding.

Article 3. Recognition of a foreign group proceeding

33. The following proposals were made in respect of draft article 3:

(a) There was support for the proposal that the words in subparagraph 3(a) "that court has not prohibited participation of that group member in the" should be deleted and that the second sentence should end as follows: "any approval which may be required under the domestic law of the State of the opening of proceedings for the participation in the [foreign group proceeding] [enterprise group insolvency solution] has been obtained";

(b) That in the same subparagraph, the word "proposed" be added before the phrase "enterprise group insolvency solution";
