(c) That in the same subparagraph, it might be clarified whether the words "subject to insolvency proceedings" referred to insolvency proceedings that had already commenced and it was proposed that some consideration might need to be given as to whether this subparagraph was consistent with principle 4 of A/CN.9/WG.V/WP.133; and

(d) That subparagraph 3(b) should also require a statement identifying all members of the enterprise group.

Article 5. Decision to recognize a foreign group proceeding

34. The following proposals and observations were made in respect of draft article 5:

(a) It was questioned whether the phrase "subject to any applicable public policy exception" in paragraph 1 was necessary; it was noted that the answer to that question might be resolved by the form that the draft text ultimately took;

(b) That subparagraph 1(i) could be deleted on the basis that it repeated elements of the definition of "foreign group proceeding";

(c) That since subparagraphs 1(g) and (h) were generally supported, the square brackets around them could be deleted and the text retained, with attention to consistency with the discussion at subparagraph 40(d) below; and

(d) That paragraph 1 bis should be deleted on the basis that it overlapped with the definition of "foreign group proceeding".

35. In respect of subparagraph 1(f), some concern was expressed that it revealed an overall problem with the drafting, given the definition that had been agreed for "foreign group proceeding" in draft article 2. Because of that change, the meaning of draft article 5 had been altered and, in particular, subparagraph 1(f) was somewhat circular in that it repeated elements of that definition. In addition, subparagraph 1(f) referred to other types of proceeding, for example, those commenced on the basis of the presence of assets in the jurisdiction, which would not be recognizable under the Model Law, but which may nevertheless be a necessary part of a group solution. An issue to be considered was therefore whether there should be a departure in the group context from the Model Law approach of recognizing proceedings on the basis of COMI or establishment. In considering those other types of proceedings, and the manner in which they might be involved in the group solution, it was suggested that it would be important to resolve the function of a group proceeding in achieving that group solution. For example, if the group proceeding was to simply coordinate negotiation of that solution, it would not supplant the COMI as a basis for commencement of proceedings in respect of a group member.

Article 6. Relief that may be granted upon application for recognition of a foreign group proceeding

36. There was general support in the Working Group for article 6 as drafted, with the following comments:

(a) It was agreed that the word "appropriate" should be added to the chapeau before the words "relief of a provisional nature";

(b) In respect of subparagraphs 1(a) and (b), some support was expressed in favour of retaining the words in square brackets, and also in favour of deleting those words. Those who preferred to retain the text in square brackets agreed that the word "procedural" was not necessary and could be deleted. After discussion, it was agreed that the square bracketed text should be deleted as being inappropriate for inclusion in a text to be enacted as domestic law. It was observed that the relief that might be granted under draft article 6 was discretionary and that, in any event, the court could only order relief that it was permitted to order under domestic law. It was also observed that that idea should be expressed clearly in any commentary or guide to enactment prepared for the draft text;

(c) In respect of subparagraph 1(d), support was also expressed in favour of its deletion on the basis of its potential to conflict with subparagraph 1(b), and on the basis of the potential for loss of value through the continuation of funding, which was contrary to the focus on preservation measures in draft article 6(1) and might create problems if recognition was subsequently denied. It was observed, however, that continuation of funding could be critical to achieving a successful reorganization and the provision should thus be retained. After discussion, it was agreed that subparagraph 1(d) should be retained, with the addition of the words "subject to any appropriate safeguards the receiving court may apply";

(d) It was agreed that subparagraph 1(e) should be deleted as being too broad and not consistent with the urgency required for provisional relief; and

(e) Some support was expressed in favour of retaining the text in both sets of square brackets in paragraph 4. Another suggestion was to replace that text with the words "a proceeding in the court located at the COMI of a group member participating in the group solution".

Article 7. Recognition of a foreign group proceeding

37. There was general support in the Working Group for article 7 as drafted, with the following comments:

(a) As noted in respect of draft article 6 above (see subpara. 36(b)), the square bracketed text in subparagraphs 1(a) and (b) should be deleted; and

(b) It was agreed that the phrase "Where the funding group member is participating in the group coordination plan, and where permitted by relevant laws [of the receiving court]" should be inserted in subparagraph 1(h).

D. Proposal in respect of the cross-border insolvency of enterprise groups

38. In keeping with the general approach endorsed in paragraphs 18 and 19 above, the Working Group considered the detail of a proposal by Switzerland, the United Kingdom, the United States and INSOL Europe. Having considered the topic of coordination and cooperation as contained in articles 9 to 18 of A/CN.9/WG.V/WP.128, there was general agreement that the proposal provided a viable way forward, separating the more contentious issues from those which were more amenable to broad agreement. It was noted that the proposal should not be considered as complete, since it included policy statements and legislative texts, and might generally require further elaboration and refinement. The Working Group discussed the specific elements of the proposal as set out below.

39. The first article considered was as follows:

"**Article A — Definitions**

"(1) 'Group Member' means an enterprise that has a separate legal identity and that is interconnected, by control or significant ownership, with one or more other enterprises.

"(2) 'Group Representative' means a person or body who is appointed pursuant to Article B(3) and who is responsible for seeking to develop a Group Solution.

"(3) 'Group Solution' means a set of proposals adopted in a Planning Proceeding:

"(a) For the reorganization, sale, or liquidation of all or some of the operations or assets of more than one Group Member;

"(b) That would be likely to add to the overall combined value of the Group Members involved; and

"(c) That must be approved, insofar as the proposals relate to a particular Group Member, in the jurisdiction in which that Group Member has its centre of main interests.

"(4) 'Planning Proceeding' means a proceeding:

"(a) That is a main proceeding for a Group Member that would be a necessary and integral part of a Group Solution;

"(b) In which a Group Representative has been appointed;

"(c) In which there is a reasonable prospect of developing a Group Solution; and

"(d) In which one or more additional Group Members are participating for the purpose of attempting to develop a Group Solution."

40. The following suggestions were made with respect to the drafting of the definitions:

(a) To the extent that the definitions reflected those included in other UNCITRAL insolvency texts, including part three of the Legislative Guide, care should be taken to ensure consistency;

(b) With respect to paragraph 1, since the word "enterprise" could refer to a single entity or something broader, the definition should be along the lines of "a separate legal entity that is a member of an enterprise group";

(c) The chapeau of paragraph 3 should include the text "a proposal or set of proposals…"; and

(d) With respect to subparagraphs 3(b) and 4(c), a more objective test should be used along the lines of "the purpose of which would be to enhance the overall combined value of the group members involved" and "the purpose of which would be to develop a group solution" respectively.

41. The next article considered was:

"**Article B — Participation by Group Members in an Insolvency Proceeding in this State; Appointment of a Group Representative**

"(1) Subject to paragraph (2), if an insolvency proceeding has been commenced in this State for a Group Member whose centre of main interests is located in this State, any other Group Member (whether solvent or insolvent) may participate in that proceeding for the purpose of attempting to develop a Group Solution.

"(2) An insolvent Group Member whose centre of main interests is in another State may not participate in a proceeding under paragraph (1) if a court in that other State precludes it from so doing.

"(3) If one or more Group Members participate in a proceeding under paragraph (1), the court may appoint a Group Representative, who may then seek recognition from foreign courts and may seek to participate in any foreign proceeding related to a participating Group Member."

42. The following suggestions were made with respect to the drafting of the article:

(a) Paragraph 1 should distinguish between solvent and insolvent group members because they were governed by different legislative frameworks; the interests of creditors of solvent entities were different to those of an insolvent entity; different considerations would apply as between liquidation and reorganization as to the participation in a group solution of solvent and insolvent entities; and

(b) Paragraph 3 should clarify on whose behalf the group representative was acting in seeking recognition.

43. The next article considered was:

"**Article C — Recognition of a Proceeding Occurring in Another State as a Planning Proceeding**

"A Group Representative appointed in a foreign proceeding may seek to have that proceeding recognized in this State as a Planning Proceeding. Recognition shall be granted by the court if the criteria in Article A(4) are met."

44. It was suggested that it should be clarified that the State referred to in article C was the receiving State and not the originating State in which the group representative had been appointed.

45. The next article considered was:

"**Article D — Participation by Group Representative and Available Relief**

"(1) Upon recognition of a foreign proceeding as a Planning Proceeding under Article C, the Group Representative may participate in any proceedings in this State related to Group Members that are participating in the Planning Proceeding.

"(2) To the extent needed to preserve the possibility of developing a Group Solution, the court may, at the request of the Group Representative, grant the following relief with respect to the assets or operations of any insolvent Group Member that is participating in the Planning Proceeding in this State:

"(a) Staying execution against the Group Member's assets;

"(b) Suspending the right to transfer, encumber, or otherwise dispose of any assets of the Group Member;

"(c) Suspending the proceedings temporarily to allow for the development of a Group Solution;

"(d) Staying the commencement or continuation of individual actions or individual proceedings concerning the Group Member's assets, rights, obligations, or liabilities;

"(e) Entrusting the administration or realization of all or part of the Group Member's assets located in this State to the Group Representative or another person designated by the court, in order to protect and preserve the value of assets that, by their nature or

because of other circumstances, are perishable, susceptible to devaluation, or otherwise in jeopardy;

"(f) Providing for the examination of witnesses, the taking of evidence, or the delivery of information concerning the Group Member's assets, affairs, rights, obligations, or liabilities; and

"(g) Granting any additional relief that may be available to [insert the title of a person or body administering a reorganization or liquidation under the law of the enacting State] under the laws of this State."

46. The following suggestions were made with respect to the drafting of the article:

(a) There needed to be consistency between the proceedings being recognized and the debtors in respect of whose assets relief might be granted, and further consideration of whether the relief should be automatic or discretionary upon recognition, bearing in mind the distinction between articles 20 and 21 of the Model Law;

(b) Appropriate safeguards for creditors should be considered;

(c) In respect of article D(1), thought might need to be given to the situation where a group member from the receiving State was participating in the planning proceeding, but no local proceeding had been commenced in the receiving State;

(d) Consideration should be given to adding, where relevant, the words "in this State" if the relief in article D(2) was intended to have merely territorial rather than universal effect;

(e) Identification or specification of the receiving and originating jurisdictions in respect to the COMI of relevant debtors needed to be clearer; and

(f) In respect of article D(2)(e), the restriction of relief to perishable and other assets in jeopardy was thought to be too narrow.

47. The next article considered was:

"**Article E — Approval of Local Elements of a Group Solution**

"(1) If a proposed Group Solution is developed in the Planning Proceeding, and the Group Representative submits to the court in this State the portion of the Group Solution affecting an insolvent Group Member whose centre of main interests is in this State, the court shall submit the relevant portion of the Group Solution to the approval process in [*cross-reference to relevant provisions in domestic insolvency law*].

"(2) If the approval process pursuant to paragraph (1) results in approval of the portion of the Group Solution affecting the Group Member, the court shall confirm and implement those elements relating to assets or operations in this State."

48. The following suggestions were made with respect to the drafting of the article:

(a) In respect of article E(1), the group representative should submit the entire group solution to the court in the receiving State and the approval process could then be limited to the relevant local elements of that solution; and

(b) A reference to establishment should also be included in article E(1) to cover the situation where a group solution affected creditors in a jurisdiction in which the group member participating in that solution only had an establishment.

49. The next articles considered were:

"**Article F — Use of Synthetic Non-Main Proceedings**

"(1) To facilitate the treatment of claims that could otherwise be brought by creditors in a non-main proceeding in another State, a foreign representative or Group Representative appointed in this State may commit to, and the court in this State may approve, providing those creditors with the treatment in this State that they would have received in a non-main proceeding in that other State.

"(2) A court in this stage may stay or decline to open a non-main proceeding if a foreign representative or Group Representative from another State in which a main proceeding is pending has made a commitment under paragraph (1)."

"**Article G — Use of Synthetic Main Proceedings**[1]

"(1) To facilitate the treatment of claims that would otherwise be brought by creditors in a proceeding in another State, a foreign representative or Group Representative appointed in this State may commit to, and the court in this State may approve, providing those creditors with the treatment in this State that they would have received in a proceeding in that other State.

"(2) A court in this stage may stay or decline to open a main proceeding if a foreign representative or Group Representative from another State in which a proceeding is pending has made a commitment under paragraph (1)."

50. The following suggestions were made with respect to the drafting of the articles, noting that article F formed part of the basic provisions and article G was a supplemental provision:

(a) The word "synthetic" should be deleted from the heading of article F and a more appropriate term identified;

(b) Article F should be supplemented by appropriate provisions on the protection of creditors such as draft article 8 above (see para. 29) (and article 22 of the Model Law);

(c) The meaning of the term "treatment" in both articles should be clarified, i.e. whether it referred to the ranking of claims or to some other matter; and

(d) That article F should be regarded as a supplemental rather than a basic provision. To address that concern, it was proposed that articles F(1) and G(1) should be considered to be basic provisions, as they simply addressed the type of treatment that creditors might be offered, and that the reference in article F(1) to "non-main proceeding" be adjusted to "proceeding"; article G(1) as currently drafted could then be deleted. Articles F(2) and G(2) would then address the more controversial issue of the power of the court to decline to commence main or non-main proceedings; whether that should be considered to be a basic or supplemental provision would require further consideration.

51. The next article considered was:

"**Article H — Additional Relief**

"(1) If, upon recognition of a Planning Proceeding pursuant to Article C, the court is satisfied that the interests of creditors of affected Group Members would be adequately protected in the Group Coordination Proceeding, the court, in addition to granting any relief described in Article D, may stay or decline to open insolvency proceedings in this State relating to Group Members participating in the Planning Proceeding.

"(2) Notwithstanding Article E(1), if, upon submission of a proposed Group Solution by the Group Representative, the court is satisfied that the interests of creditors of the affected Group Member are adequately protected in the Planning Proceeding, the court

---

[1] Articles G and H were proposed as supplemental components described by the following text:

"The supplemental components, which would be additional options, would go a step further. They would permit a court to use synthetic proceedings for a group member whose COMI was in a different jurisdiction. They would also allow a court to provide additional relief — staying or declining to open proceedings, as well as approving the relevant portion of a group solution without submitting it to the applicable approval procedures under local law — if the court determined that creditors would be adequately protected.

"Use of the optional provisions might result in a group member's insolvency being handled in a manner that was not consistent with the prior expectations of creditors and other third parties that the legal entity would be subject to normal proceedings in its COMI jurisdiction. As a consequence, departing from that basic principle (COMI) should be limited to exceptional circumstances, namely to cases where the benefit in terms of efficiency largely outweighed the negative effect on creditors' expectations in particular and legal certainty in general. This would only appear to be justified:

- In jurisdictions where courts traditionally held a large degree of discretion and flexibility in the handling of insolvency proceedings,
- Where the group in question was closely integrated and therefore the benefit of synthetic proceedings in lieu of main proceedings (at the COMI) was obvious, and
- Where the use of the proceedings under Articles A to G (if available) could not achieve a similar result."

may approve the relevant portion of the Group Solution and grant any relief described in Article D that is necessary for its implementation."

52. The following suggestions were made with respect to the drafting of the article:

(a) There should be consideration of the extent to which the ability to recognize and enforce a group solution might go beyond what was possible pursuant to the relief provisions of the Model Law and the manner in which article H(2) might raise issues related to the model law being developed on recognition and enforcement of insolvency-related judgements; and

(b) It was clarified that articles F and G were intended to operate independently of a group solution and thus in a situation where there was no agreement on a planning proceeding.

53. At the end of the discussion, given the support expressed by the Working Group for the group solution discussed during the deliberations, the Secretariat was requested to prepare a draft text for consideration at a future session based upon the principles contained in A/CN.9/WG.V/WP.133, and the text in A/CN.9/WG.V/WP.128 and WP.134, as well as the articles and structure of the proposal outlined above in paragraphs 18 and 38 to 52. That draft should take into account the conclusions and agreements reached at the current session of the Working Group.

V. Cross-border recognition and enforcement of insolvency-related judgements

54. The Working Group commenced its discussion of this topic on the basis of the draft model law on the recognition and enforcement of insolvency-related judgements contained in document A/CN.9/WG.V/WP.135 (draft model law).

Article 1. Scope of application

55. The Working Group recalled its agreement concerning the need to take into consideration existing international and regional instruments, as well as those under development, in order to avoid overlap and to ensure that there were no gaps in terms of the scope of application of the draft model law. It was noted that that view was also reflected by the Commission at its forty-eighth session (A/70/17, para. 236). The Working Group agreed that those considerations should continue to be borne in mind in its ongoing deliberations.

56. In pursuit of that objective, it was proposed that the following text should be inserted in draft article 1:

"x. This [law] shall not apply to a judgement where there is a Treaty [in force] concerning the recognition or enforcement of civil and commercial judgements (whether concluded before or after [this law] comes into force), and that Treaty applies to the judgement.

"y. A judgement is to be treated for the purposes of paragraph x as falling within the class of judgements to which a Treaty applies:

"(i) even where the particular judgement is not enforceable under the Treaty because of the particular circumstances of the case; and

"(ii) whether or not the State has adopted the Treaty."

57. While the proposal received some support, a number of reservations were also expressed, particularly in respect of the content of paragraph (y). Some were of the view that it was unusual for an UNCITRAL instrument to state that its provisions would apply in a State other than the enacting State. Others did not agree with that interpretation of the proposed text.

58. After discussion, there was support in the Working Group for Variant 1 of draft article 1, for retaining paragraph 2 of the draft article, and with respect to the proposal outlined above, to provide a revised text based on the issues discussed in the Working Group

and exploring other possible drafting options to reflect the intent of that proposal. Support was also expressed in favour of retaining Variant 3.

Additional text to address concerns about article 1, Variant 1

59. After further discussion and recalling that the Working Group had expressed a preference for the retention of Variant 1, a concern was expressed that subparagraph 1(1)(b) might lead to a conflict of laws, as it seemed to suggest that recognition and enforcement of insolvency-related judgements in a foreign State could be governed by the law of the originating State. The following text for a new article was proposed: "In the event of a conflict between the application of this law and the law of the State where the judgement was rendered, the provisions of this law prevail."

60. There was some acknowledgement of the difficulty that was identified. It was explained, however, that the purpose of subparagraph 1(1)(b) was simply to authorize the recognition and enforcement of an insolvency-related judgement in a foreign State in much the same way as article 1(1)(b) of the Model Law authorized assistance to be sought in a foreign State in connection with a proceeding under the law of the enacting State. On that basis, Variant 1 of draft subparagraph 1(1)(b) would not give rise to a conflict of law situation. Reference was also made to article 5 of the Model Law (which is repeated in this draft text — see para. 71 below) and it was suggested that, for greater clarity, the text of the heading of that article might be used to replace subparagraph 1(1)(b). A further proposal to remedy the perceived difficulty was to add the words "in this State" to the chapeau of Variant 1 of article 1. After discussion, it was agreed that if the intent was analogous to article 1 of the Model Law, the suggestion to use the heading of draft article 5 of the current text as a substitute for draft subparagraph 1(1)(b) might provide a solution. In that case, however, it was suggested that draft subparagraph 1(1)(b) would not be needed because article 5 of the draft text would be sufficient. The Working Group agreed that the issue would require further consideration.

Article 2. Definitions

(a) "Foreign proceeding"

61. The Working Group was generally in agreement with paragraph (a) as drafted. Support was specifically expressed in favour of retaining the text "including an interim proceeding," and deleting the brackets around it.

(c) "Judgement"

62. The three issues raised with respect to the definition were the inclusion of the word "final", the reference to administrative decisions, and the inclusion of provisional measures. A number of concerns were expressed with respect to the use of the word "final", and the manner in which it might be interpreted under domestic law in different States. There was support both in favour of and against the use of the term. A proposal to resolve that issue that focussed on the enforceability of the judgement in the originating jurisdiction received some support. It was noted that the concept of enforceability was used in other international instruments.

63. Concerns expressed with respect to administrative decisions included the nature of the bodies that might issue decisions and whether the parties to the dispute had been given an opportunity to be heard before the decision was made. A proposal was made to limit administrative decisions that were enforceable under this text to those that would have the same effect as court judgements under the law of the originating State. That proposal received some support. A different proposal was to delete any reference to administrative decisions.

64. As to the inclusion of provisional measures, a number of delegations expressed concern on their inclusion on the basis that they were merely interim orders and might be changed by the originating court. Another concern related to differences between the types of relief that might be ordered by an originating court and those that might be available as relief in the receiving State; where the former were much broader than the latter, the receiving court might be unable to recognize and enforce the order. In that regard, it was

noted that relief granted under the Model Law was subject to the provisions of local law, e.g. articles 20 (2) and 22 (2). A different view was that provisional measures might be of particular importance in insolvency, particularly where they were of a protective or conservatory nature. It was suggested that some of the concerns expressed might better be addressed under draft article 10, or by qualifying provisional measures by reference to those enforceable under the laws of the originating State.

65. After discussion, it was agreed that in respect of each of the issues outlined above, since the Working Group could not reach agreement on how to reconcile the different views, the existing text should remain in square brackets. The Secretariat was requested to explore possible solutions including approaches adopted by the Hague Conference, such as that of equivalent effect, as included in article 13 of the text emanating from the fifth session of the Hague Conference working group on the judgements project (October 2015).

(d) "Insolvency-related judgement"

66. The prevailing view was that Variant 1 of the chapeau was preferred over Variant 2, noting that the reference to "insolvency estate" could be defined by reference to paragraph 12 (t) of the glossary of the Legislative Guide. No comments were expressed with respect to subparagraphs (i), (iii), and (iv).

67. With respect to subparagraph (ii), it was suggested that the words "and assets" should be added after the word "sums". That proposal received some support. A second proposal was to limit the subparagraph to those cases where the obligations arose after the commencement of insolvency proceedings. It was agreed that that proposal would need further consideration.

68. Support was expressed in favour of Variant 1 of subparagraph (v). In respect of subparagraph (vi), one view expressed was that it raised the same concerns as noted above with respect to provisional measures. It was suggested in respect of subparagraph (vii) that UNCITRAL's work on secured transactions should be cross-referenced. Further suggestions concerned subparagraphs (viii) and (xiii), which were said to be currently drafted too broadly and should be limited to judgements that would otherwise be enforceable under this instrument. In terms of subparagraph (ix), support was expressed for retention of the subparagraph with the addition of the words "that could be pursued by or on behalf of the insolvency estate". In relation to subparagraphs (x) to (xii), although it was proposed that those provisions should be deleted on the basis that they were covered by the Model Law, it was noted that there might be situations where that was not the case (such as where the foreign proceeding was no longer pending), and they should be retained in the text. There was support for the latter view on the additional basis that it was not entirely clear whether such provisions were covered by the Model Law.

69. After discussion, a preference was expressed in favour of Variant 1 of the chapeau and of Variant 1 of subparagraph (v). It was agreed that subparagraphs (ii), (vi) to (ix) and (xiii) required some revision as discussed above, and that subparagraphs (x) to (xii) should be retained. There was broad support for deleting subparagraph (xiv).

Possible additions to draft article 2

70. After discussion, the Working Group agreed to retain Variant 3 of paragraph (f), to retain paragraph (e) and to delete paragraphs (g) and (h).

Articles 3 to 7

71. Although some reservations were expressed with respect to the need for article 5, support was nonetheless expressed in favour of retaining draft articles 3 to 7.

Article 8. Recognition and enforcement of an insolvency-related judgement

72. Support was expressed in favour of retaining Variant 2, with the following adjustment to paragraph 1: a comma should be inserted at the end of the first sentence, followed by insertion of "including by way of defence." The second sentence could then be deleted. In subparagraph 1 (b), the reference to finality should be aligned with the revised definition of "judgement". Some support was expressed in favour of deleting paragraph 3.

73. The view was expressed that subparagraph 2 (c) was not needed because only notice of the application for recognition and enforcement was required to support that application. Notice relating to the originating proceeding could be requested by the judge if proper notification of that proceeding was contested.

74. It was suggested that the words "as required by the law of the State of recognition" be added after the word "evidence" in subparagraph 2 (d).

75. Reference was made to paragraph 3 of the notes section following draft article 8, which quoted from paragraph 4 of the preliminary draft text emanating from the Hague Conference working group on the judgements project dealing with the question of postponement. Support was expressed in favour of including that concept in the draft text.

Article 9. Decision to recognize and enforce an insolvency-related judgement

76. Concerns were raised as to the intent of paragraph (f). A view was expressed that the purpose was not to provide for review of the foreign judgement itself, but rather of the proceedings in which the judgement was issued, and in particular, whether those proceedings would be manifestly contrary to the public policy of the receiving State. Concerns were also expressed, however, that that could be read as contradictory to the purpose of the draft instrument. A related concern was that refusal of recognition under the Model Law on technical grounds should not be a ground for refusing recognition of a judgement emanating from those proceedings. It was proposed that the chapeau of article 9 be simplified to read "An insolvency-related judgement shall be recognized and enforced provided:".

77. It was proposed that public policy concerns might best be addressed by incorporating an article along the lines of article 6 of the Model Law. That article would replace paragraph (f) and article 10 paragraph (d) and resolve any question of the party with the burden of proving that recognition of the judgement would be manifestly contrary to public policy. That proposal received some support, and a proposal for text was made later in the session (see para. 81 below).

Article 10. Grounds to refuse recognition of an insolvency-related judgement

78. The Working Group supported revision of the chapeau of article 10 to read: "Recognition and enforcement of an insolvency-related judgement may be refused if:".

Paragraph (a)

79. Some support was expressed in favour of retaining the first part of the provision dealing with the possible review of the judgement and deleting the second part relating to lack of enforceability in the originating State because of such a review. An alternative view was also expressed that the later phrase of the provision in respect of lack of enforceability was the more important aspect of the provision and should be retained. That view received some support. In addition, some support was also expressed in favour of adding some provision for the protection of creditors and other stakeholders along the lines of article 22 of the Model Law, although it was noted that such a proposal had relevance to the text as a whole rather than simply with respect to paragraph (a). It was also noted that the draft text emanating from the Hague Conference working group on the judgements project provided for postponement or refusal of recognition in the event that the judgement was subject to review. It was suggested that that approach might be followed in the current text (see para. 75). After discussion, it was agreed to retain paragraph (a) for further consideration.

Paragraph (b)

80. One proposal was that paragraph (b) should be deleted because it required the receiving court to pass judgement on certain aspects of the proceedings in the originating State. A concern expressed related to the meaning of the word "notice" but in response, it was observed that not only was this provision commonly found in similar international instruments, but that the 1965 Hague Convention on the Service Abroad of Judicial and Extrajudicial Documents in Civil or Commercial Matters (articles 15 and 16) might assist in interpreting this provision. After discussion, paragraph (b) was retained for further consideration.

Paragraphs (c), (d) and (e)

81. It was noted that if an article dealing with a general public policy exception were included in the text, paragraphs (d) and (e) could be deleted. After further consideration, it was proposed that the following provision based upon article 6 of the Model Law and paragraph (e) could be added: "Nothing in this law prevents this court from refusing to take an action governed by this law if the action would be manifestly contrary to public policy [or] [including] the fundamental principles of procedural fairness of the State." That proposal was supported as a basis for further consideration. A suggestion that the word "and" should be used instead of the words in square brackets was not supported on the basis that public policy included both procedural and substantive fairness. Paragraph (c) was retained for further consideration.

Paragraphs (f) and (g)

82. It was observed that since all judgements were "binding", that word could be deleted from the text. It was noted that an article along the lines of article 22 of the Model Law may also have some application to paragraphs (f) and (g). There was some support for also deleting the word "final" on the basis that the decision on enforcement should not be delayed in order to wait for the prior or earlier judgement to become final. After discussion, paragraphs (f) and (g) were retained for further consideration.

Paragraph (h)

83. There was support in the Working Group for the retention of Variant 1 of paragraph (h).

Paragraph (i)

84. Various concerns were expressed with respect to different elements of Variants 1, 2 and 3, although some preference was expressed for Variant 3. Concerns expressed included the use of the terms "unreasonable or unfair" in Variants 1 and 2, and introduction of the use of the term "centre of main interests" in Variant 3. It was pointed out that the use of that term might be problematic for States that had not enacted the Model Law. Several revisions were proposed, but after discussion, there was agreement that those three variants should be deleted. It was noted that the list of factors recently proposed in the context of the Hague Conference working group on the judgements project was not required in this text.[2]

85. Two proposals for a new paragraph (i) were made; the Working Group agreed to retain them in square brackets for future consideration. The first proposal was: "(i) The judgement was not rendered by a court in the State of the debtor's centre of main interests or by a court which would have had jurisdiction in accordance with the law of the requested State concerning recognition and enforcement of the foreign judgement." The second proposal was: "(i) The judgement was not rendered by a court that: (a) [for Model Law enacting States: was supervising a main proceeding regarding the insolvency of the party against whom the judgement was issued;] (b) exercised jurisdiction based on the consent of the party against whom the judgement was issued; (c) exercised jurisdiction on a basis on which the receiving court could have exercised jurisdiction under its own law; or (d) exercised jurisdiction on a basis that was not inconsistent with the law of the receiving court." Although there was stronger support for the second proposal, the Working Group agreed to retain both for further consideration. The view was expressed that future discussion on the matter should be linked to the discussion on scope as set out in draft articles 1 and 2.

86. A further proposal was made to include an additional paragraph in draft article 10 as follows: "The judgement adversely affects the interests of creditors and other interested parties in this State who did not, directly or through an appropriate representative, participate in the foreign proceedings, and who could not reasonably be expected to have participated in such proceedings." Support was expressed for that proposal, although it was noted that if it was limited to local creditors only, the provision would be too narrow; the Working

[2] See the text emanating from the 5th meeting, October 2015.

Group's attention was drawn to article 22 of the Model Law and paragraph 198 of the Guide to Enactment and Interpretation.

Paragraph (j)

87. It was observed that paragraph (j) could be deleted as having already been addressed by article 8.

VI. Other business

88. The Working Group was advised that a meeting of the open-ended informal group established to consider the feasibility of developing a convention on international insolvency issues and to study adoption of the Model Law (A/CN.9/798, para. 19) had taken place. Several papers were presented for consideration and comment, and the work to be undertaken was further discussed. A further meeting of the informal group will be convened during the forty-ninth session of the Working Group in New York (2 to 6 May 2016).

B. Note by the Secretariat on insolvency law: facilitating the cross-border insolvency of multinational enterprise groups: key principles

(A/CN.9/WG.V/WP.133)

[Original: English]

Contents

Introduction

1. At its forty-fourth session in December 2013, following a three-day colloquium, the Working Group agreed to continue its work on the cross-border insolvency of multinational enterprise groups[1] by developing provisions on a number of issues that would extend the existing articles of the UNCITRAL Model Law on Cross-Border Insolvency (UNCITRAL Model Law) and part three of the UNCITRAL Legislative Guide on Insolvency Law (UNCITRAL Legislative Guide), as well as involving reference to the UNCITRAL Practice Guide on Cross-Border Insolvency Cooperation. While the Working Group considered that those provisions might, for example, form a set of model provisions or a supplement to the existing UNCITRAL Model Law, it noted that the precise form they might take could be decided as the work progressed. The Working Group considered this topic at its forty-fifth (April 2014), forty-sixth (December 2014) and forty-seventh (May 2014) sessions.

2. This note sets forth a number of basic principles that might be helpful to the Working Group in structuring its discussion of the topic and considering how it should progress. These principles establish possible building blocks for a draft text with annotations explaining each principle and providing further information.

I. Key principles of regime to address insolvency in the context of enterprise groups

Background

3. In the group context, it may be desirable in order to resolve group financial difficulties to develop a coordinated insolvency solution encompassing some or all group members, the common purpose of which would be the reorganization or sale as a going concern of the whole or part of the business or assets of one or more of the members of the enterprise group that would, or would be likely to, either maintain or add value to the enterprise group as a whole or to those members of the enterprise group participating in the group solution. A group solution should be a flexible concept that may be achieved in different ways, depending on the circumstances of the specific group, its structure, business model, degree and type of integration between group members, incidence of financial difficulty in the enterprise group and so forth. It may involve several different approaches for different parts of an enterprise group, such as a combination of liquidation and reorganization proceedings, but may not require proceedings to be commenced for all participating group members; there may be other ways of dealing with creditor claims (see below).

[1] *Official Records of the General Assembly, Sixty-fifth Session, Supplement No. 17* (A/65/17), para. 259 (a); A/CN.9/763, paras. 13-14; *Official Records of the General Assembly, Sixty-eighth Session, Supplement No. 17* (A/68/17), para. 326.

Principle 1

If required or requested to address the insolvency of an enterprise group member, insolvency proceedings may be commenced. When proceedings are not required or requested, there is no obligation to commence such proceedings.

4. This principle recognizes that in the group context, it might not always be necessary to commence proceedings for every group member, but that commencement of proceedings should not be restricted where they are required or requested. It does not address the status of those proceedings i.e. main or non-main, or the place in which such proceedings might be commenced, but those points might be further elaborated in the text.

5. As noted in the recast EC Insolvency Regulation 1346/2000 (Regulation (EU) 2015/848 of the European Parliament and of the Council)[2] (the recast EIR) non-main insolvency proceedings can serve different purposes, besides the protection of local interests. Cases may arise in which the insolvency estate of the debtor is too complex to administer as a unit, or the differences in the legal systems concerned are so great that difficulties may arise from the extension of effects deriving from the law of the State of the commencement of proceedings to the other States where the assets are located. For that reason, the insolvency representative in the main insolvency proceedings may request the commencement of non-main insolvency proceedings where the efficient administration of the insolvency estate so requires. However, non-main insolvency proceedings may hamper the efficient administration of the insolvency estate, especially in the group context where there might be numerous non-main proceedings. Therefore, there may be situations in which the court seized of a request to commence non-main insolvency proceedings might be able, at the request of the insolvency representative in the main insolvency proceedings, to postpone or refuse the commencement of such proceedings to preserve the efficiency of the main proceedings, provided the interests of creditors and other stakeholders are protected (see for example, the recast EIR, article 36).

Principle 2

When it is proposed that an enterprise group solution be developed for some or all of the members of an enterprise group, that solution will require coordination as between group members and may be developed through a coordinating proceeding.

6. Coordination of the various proceedings may be required to achieve a group solution. There may be several ways of achieving the desired level of coordination. One approach may be to identify one of the insolvency proceedings already commenced with respect to a group member as a coordination proceeding to provide a focal point for leading the coordination and cooperation between those group members involved in negotiating and developing the group solution. Where proceedings for more than one group member are commenced in the same jurisdiction (e.g. because multiple group members have their centre of main interests (COMI) in that jurisdiction), that jurisdiction may provide a natural coordination point.

7. It might be noted that the Working Group has previously recognized, in the context of part three of the Legislative Guide, the value of one entity taking a lead role in cooperation (see A/CN.9/WG.V/WP.114, paras. 10-12). That issue was subsequently addressed in the final version of recommendation 250, which provides that the means of cooperation between insolvency representatives may include one of them taking a coordinating role.

8. Another approach might be that taken by the recast EIR, which makes provision for the commencement of group coordination proceedings. These voluntary proceedings are additional to the separate insolvency proceedings commenced for individual group members and can be requested by an insolvency representative appointed in any of the group member proceedings. The request should specify the essential elements of the coordination, in particular an outline of the coordination plan, a proposal as to who should be appointed as a coordinator and an outline of the estimated costs of the coordination (art. 61.3). Recital 57 of the recast EIR provides that group coordination proceedings should always strive to

[2] Adopted by the Council on 12 March 2015, available from: http://eur-lex.europa.eu/legal-content/EN/TXT/?uri=uriserv:OJ.L_.2015.141.01.0019.01.ENG; Recitals 40-41 (last visited 21/09/2015).

facilitate the effective administration of the insolvency proceedings of the group members, and to have a generally positive impact for the creditors. The court requested to commence such proceedings should make an assessment of those criteria prior to opening group coordination proceedings and has to be satisfied that the proceedings are appropriate and that no creditor is financially disadvantaged (art. 63). The recast EIR sets out in some detail the manner in which coordination proceedings will operate.[3]

Principle 3

Adopting the approach of recommendation 250, enterprise group members might designate one of the insolvency proceedings commenced (or to be commenced) with respect to group members participating in the group solution to function as the coordinating proceeding, the role of which would be procedural, rather than substantive. A proviso might be that the coordinating proceeding should be a proceeding taking place in a State that is the COMI of at least one of the group members that is a necessary and integral part of the enterprise group solution.

9. Issues relevant to the designation of a coordinating proceeding might include: the criteria for identifying the coordinating proceeding, by whom the identification should be made and the means of reaching agreement on identification; recognition of that agreement in all relevant States; identification of the role to be played by the coordinating proceeding; and whether coordination should be initiated and led by the court responsible for conduct of the coordinating proceeding or by the relevant insolvency representative.

Principle 4

1. The court located in the COMI (the COMI court) of an enterprise group member participating in a group solution can authorize the insolvency representative appointed in insolvency proceedings taking place in the COMI to seek: (i) to participate and be heard in a coordinating proceeding taking place in another jurisdiction, and (ii) recognition by the coordinating court of the proceeding in the COMI jurisdiction; and

2. The coordinating court can receive such a request for recognition.

10. Where a coordinating proceeding is taking place in one State, an insolvency representative appointed in related proceedings (i.e. concerning another group member) in a different State may need authorization to participate in the coordination proceedings and to be able to seek recognition of those proceedings, consistent with article 5 of the Model Law and recommendation 239 of part three of the Legislative Guide. The coordinating court may also need appropriate authorization to receive such applications.

Principle 5

Participation in the coordination process would be voluntary for those group members whose COMI is located in a jurisdiction different to that of the coordinating proceeding. For those group members whose COMI is located in the same jurisdiction as the coordinating proceeding, the recommendations of part three of the Legislative Guide on Insolvency Law with respect to joint application and procedural coordination could apply. Solvent members of the enterprise group may participate in a coordination process without such participation implying a submission to the jurisdiction of a domestic or foreign insolvency court or to the applicability of domestic or foreign insolvency laws.

11. The coordination process is intended to be entirely voluntary for all relevant group members. Those members not seeking to participate could be reorganized or liquidated individually. Participation of solvent group members is in keeping with the recognition in part three of the Legislative Guide that such participation may be a necessary part of a financial solution for an enterprise group and is thus based upon recommendation 238.

[3] Recast EIR, articles 61-77.

Principle 6

Creditors and stakeholders of each enterprise group member participating in the group solution would vote in their own jurisdiction on the treatment they are to receive under the group reorganization plan according to the applicable domestic law.

12. This principle preserves the rights of creditors and other stakeholders to vote on the specific treatment they are to be accorded under the group plan, in accordance with the relevant applicable law. A coordinated group plan may comprise a number of parts applicable to different group members and, accordingly, approval would occur member by member with respect to the part applying to each member. If, under the law applicable in each member's jurisdiction, only creditors whose rights are affected by a plan are required to vote on it, then only those creditors would vote. That law would also apply to the voting mechanism, including use of classes, and the majorities required for approval. To approve a plan across multiple group members, a number of issues may need to be considered, including applicable majorities across group members, what is to happen to group members that do not approve the plan and so forth.

Principle 7

Following approval of the group reorganization plan by relevant creditors and stakeholders, each COMI court would have jurisdiction to deal with the group reorganization plan in accordance with domestic law.

13. In addition to the approval process, national law would apply to confirmation and implementation of the reorganization plan.

Principle 8

The insolvency representative appointed in the proceeding designated as the coordinating proceeding should have a right of access to the proceedings in each COMI court to be heard on issues related to implementation of the group reorganization plan.

14. This principle builds upon recommendation 239 and the coordination and cooperation recommendations 240-242 and 246 of part three of the Legislative Guide.

C. Note by the Secretariat on insolvency law: facilitating the cross-border insolvency of multinational enterprise groups: revised draft legislative provisions

(A/CN.9/WG.V/WP.134)

[Original: English]

Contents

I. Introduction

At its forty-fourth session in December 2013, following a three-day colloquium, the Working Group agreed to continue its work on the cross-border insolvency of multinational enterprise groups[1] by developing provisions on a number of issues that would extend the existing provisions of the UNCITRAL Model Law on Cross-Border Insolvency (UNCITRAL Model Law) and part three of the UNCITRAL Legislative Guide on Insolvency Law (UNCITRAL Legislative Guide), as well as involving reference to the UNCITRAL Practice Guide on Cross-Border Insolvency Cooperation. While the Working Group considered that those provisions might, for example, form a set of model provisions or a supplement to the existing UNCITRAL Model Law, it noted that the precise form they might take could be decided as the work progressed. The Working Group considered this topic at its forty-fifth (April 2014), forty-sixth (December 2014) and forty-seventh (May 2015) sessions.

[1] *Official Records of the General Assembly, Sixty-fifth Session, Supplement No. 17* (A/65/17), para. 259 (a); A/CN.9/763, paras. 13-14; *Official Records of the General Assembly, Sixty-eighth Session, Supplement No. 17* (A/68/17), para. 326.

2. This note by the Secretariat implements the revisions to draft articles 1-7 of the text set forth in A/CN.9/WG.V/WP.128 that were requested by the Working Group at its forty-seventh session (A/CN.9/835, paras. 23-46). The notes to the revisions indicate the origin of the revisions and include some observations by the Secretariat on drafting and substance.

II. Draft legislative provisions on the cross-border insolvency of enterprise groups

Article 2. Definitions

A. Draft provisions

For the purposes of these provisions:

(a)-(g) (*as set forth in A/CN.9/WG.V/WP.128*)

(h) "Foreign group proceeding" means

Variant 1 (as set forth in A/CN.9/WG.V/WP.128)

a collective judicial or administrative proceeding in a foreign State, including an interim proceeding, pursuant to a law relating to insolvency in which proceeding the assets and affairs of a debtor that is a member of an enterprise group are subject to control or supervision by a foreign court, for the purpose of reorganization or liquidation in [the context of] an enterprise group insolvency solution;[2]

Variant 2

[a collective judicial or administrative proceeding, including an interim proceeding, commenced pursuant to a law relating to insolvency in a foreign State that is the centre of main interests of at least one member of an enterprise group and in which an enterprise group insolvency solution (of which the foreign group proceeding is a necessary and integral part), is being developed and coordinated];

(i) "Enterprise group insolvency solution" means

Variant 1 (as set forth in A/CN.9/WG.V/WP.128)

a proposal for coordinated reorganization, sale as a going concern or liquidation (of the whole or part of the business or assets) of two or more members of an enterprise group that would, or would be likely to, either maintain or add value to the enterprise group as a whole or to those group members. An enterprise group insolvency solution may be coordinated through a proceeding in a State that is the centre of main interests of at least one enterprise group member;

Variant 2

[*First sentence remains the same as in variant 1*]. [An enterprise group insolvency solution shall be coordinated through one or more [foreign group] proceeding[, each commenced in a State that is the centre of main interests of at least one enterprise group member and each of which is a necessary and integral part of that solution]];

B. Notes

Subparagraph (h) — foreign group proceeding

1. Variant 2 of subparagraph (h) reflects a proposal made at the forty-seventh session (A/CN.9/835, para. 36). The rationale of the revision was to focus on recognition of the coordinating proceeding; proceedings pending for individual group members could be recognized under the Model Law and it was suggested that no further provisions were required for that purpose.

[2] Based on Model Law, art. 2, subpara. (a).

Subparagraph (i) — enterprise group insolvency solution

2. Variant 2 of subparagraph (i) reflects a proposal made at the forty-seventh session (A/CN.9/835, para. 36). As noted above in paragraph 1, the rationale of the revision was to focus on recognition of the coordinating proceeding; proceedings pending for individual group members could be recognized under the Model Law and no further provisions were required for that purpose. While it was suggested that subparagraphs (h) and (i) should both contain the same elements, as presently drafted there is no connection between foreign group proceeding and an enterprise group insolvency solution and the definitions are somewhat complex. A simpler drafting solution might be to refer in subparagraph (i) to an enterprise group solution being coordinated through a foreign group proceeding, and rely on the definition of a foreign group proceeding to contain the elements of COMI and the "necessary and integral" connection between the foreign group proceeding and the group solution.

Article 3. Recognition of a foreign group proceeding[3]

A. Draft provisions

1. A foreign group member representative[4] may apply to the court for recognition of a foreign group proceeding.

2. An application for recognition shall be accompanied by:

(a) A certified copy of the decision commencing the foreign group proceeding and appointing the foreign group member representative; or

(b) A certificate from the foreign court affirming the existence of the foreign group proceeding and of the appointment of the enterprise group member representative; or

(c) In the absence of evidence referred to in subparagraphs (a) and (b), any other evidence acceptable to the court of the existence of the foreign group proceeding and of the appointment of the foreign group member representative.

3. An application for recognition shall also be accompanied by:

(a) Evidence that [each group member sought to be represented in [a foreign group proceeding] [an enterprise group insolvency solution] has agreed to participate in that [proceeding] [solution]. Where such a group member is subject to insolvency proceedings in the court of its centre of main interests, evidence shall be procured that that court has not prohibited participation of that group member in the [foreign group proceeding] [enterprise group insolvency solution];]

[(b) A statement identifying all foreign proceedings commenced in respect of enterprise group members participating in the [foreign group proceeding] [enterprise group insolvency solution] that are known to the foreign group member representative.]

4. The court may require a translation of documents supplied in support of the application for recognition into an official language of this State.

B. Notes

1. At the forty-seventh session, various proposals were made for amendments to paragraph 3 (A/CN.9/835, paras. 32-35). Since one of the proposals (A/CN.9/835, para. 33) was to move the substantive elements of draft article 3, subparagraphs 3 (a) to (c) to draft article 5, those subparagraphs are now set forth in draft article 5, subparagraphs 1 (g) to (i) below. Amendments proposed to those subparagraphs are reflected in draft article 5.

2. A proposal to add a new subparagraph (d) to draft article 3, paragraph 3 (A/CN.9/835, para. 35) is reflected as a new subparagraph (a). It might be noted that the draft text proposed at the forty-seventh session refers to "participation in a foreign group proceeding", as if that type of proceeding related to multiple group members. However, since the definition of "foreign group proceeding" refers to a proceeding relating to a single group member, it may

[3] Ibid., art. 15.

[4] As appropriate, the following articles that refer to the foreign group member representative could also apply to an enterprise group committee representative, where such a committee was formed.

be more appropriate in subparagraphs (a) and (b) to use the words "enterprise group insolvency solution" which have been included in square brackets.

3. A proposal to add to draft article 3 a provision along the lines of article 15, paragraph 3 of the Model Law (A/CN.9/835, para. 33) is reflected in draft article 3, subparagraph 3 (b).

Article 4. Presumptions concerning recognition[5]

Notes

On the basis that the draft text is being developed as an addendum to the Model Law, it was suggested draft article 4 was not required (A/CN.9/835, para. 37) and accordingly it is not repeated in this draft.

Article 5. Decision to recognize a foreign group proceeding[6]

A. Draft provisions

1. [Subject to any applicable public policy exception,][7] a foreign group proceeding shall be recognized if:

(a) [deleted];

(b) [deleted];

(c) The application meets the requirements of article 3, paragraph 2;

(d) The application has been submitted to the court referred to in article ...;[8]

(e) [deleted];

[(f) The foreign group proceeding was commenced on the basis of the centre of main interests or establishment of the foreign group member or (if permissible under the laws of the enacting State) any other basis, including the presence of assets of the foreign group member or voluntary submission by the foreign group member to the jurisdiction of the court of the foreign State];

[(g) An enterprise group insolvency solution is being developed for the whole or a part of the enterprise group;[9]

(h) There is a reasonable prospect of developing an enterprise group insolvency solution; and

(i) The foreign group proceeding is [a necessary and integral part of] [is participating in] the enterprise group insolvency solution.]

[1*bis*. The foreign group proceeding shall be recognized:

(a) As a foreign main group proceeding if it is taking place in the State where the debtor has the centre of its main interests; or

(b) As a foreign non-main group proceeding if the debtor has an establishment in the foreign State within the meaning of article 2, subparagraph (f) of the Model Law.]

2. An application for recognition of a foreign group proceeding shall be decided upon at the earliest possible time.

3. Recognition may be modified or terminated if it is shown that the grounds for granting it were fully or partially lacking or have ceased to exist.

---

[5] Model Law, art. 16.

[6] Model Law, art. 17.

[7] It may be appropriate to include in the draft text an article along the lines of art. 6 of the Model Law.

[8] It may be appropriate to include in the draft text an article along the lines of art. 4 of the Model Law.

[9] Details of the evidence required to satisfy these requirements could be developed as substantive provisions or included in any commentary or guide to enactment accompanying the text.

4. For the purposes of paragraph 3, the foreign group member representative shall inform the court of changes in the status of the foreign group proceeding[, the status of the enterprise group solution] or in the status of their own appointment occurring after the application for recognition is made.[10]

B. Notes

Paragraph 1

1. Subparagraphs 1 (a) and (b) of draft article 5 have been deleted following a suggestion at the forty-seventh session that they were not required as the issues they addressed were covered by the proposed revision to the definition of "foreign group proceeding" (A/CN.9/835, para. 38).

2. As suggested at the forty-seventh session, a new subparagraph 1 (f) has been inserted in draft article 5, paragraph 1 (A/CN.9/835, para. 38). Although receiving some support, reservations were expressed with respect to the reference to presence of assets as a basis for commencement or recognition of insolvency proceedings. It might be noted that presence of assets is not recommended in the Legislative Guide as a basis for commencement of proceedings (see footnote to Legislative Guide recommendation 7). It might also be noted that the Guide to Enactment and Interpretation of the Model Law on Cross-Border Insolvency discusses use of the "presence of assets" standard in the context of article 28 and commencement of local proceedings after recognition of a foreign main proceeding (paras. 224-227). Adoption of a wider basis for jurisdiction (i.e. "or any other basis") might require the definitions of this draft text to be reconsidered.

3. As suggested at the forty-seventh session, the substantive elements of draft article 3, paragraph 3 (i.e. subparagraphs (a) to (c)) have been moved to draft article 5 (A/CN.9/835, para. 33). They are now reflected in subparagraphs 1 (g) to (i) of draft article 5 and have been revised as proposed. The content of the previous draft of subparagraph (e) would no longer be relevant and has been deleted.

*Paragraph 1*bis

4. This paragraph reflects a suggestion at the forty-seventh session (A/CN.9/835, para. 38) to include a new paragraph specifying recognition as either main or non-main proceedings, consistent with article 17, subparagraphs 2 (a) and (b) of the Model Law.

5. The need for paragraph 1*bis* may depend on whether the draft text is to be an addendum to the Model Law or free-standing. Moreover, if the regime is to include recognition as a non-main proceeding, the definitions in draft article 2 might need to be reconsidered.

Paragraph 4

6. This paragraph reflects a suggestion at the forty-seventh session (A/CN.9/835, para. 38) to include a reference to changes in the status of the group insolvency solution.

Article 6. Relief that may be granted upon application for recognition of a foreign group proceeding[11]

A. Draft provisions

1. From the time of filing an application for recognition until the application is decided upon, the court may, at the request of the foreign group member representative, where relief is urgently needed to protect the assets of the enterprise group member subject to a foreign group proceeding or the interests of the creditors, grant relief of a provisional nature, including:

(a) [Where permitted by relevant [procedural] laws,] staying execution against the enterprise group member's assets;

[10] Based on the Model Law, art. 18.
[11] Based on the Model Law, art. 19.

(b) [Where permitted by relevant [procedural] laws,] staying the commencement or continuation of insolvency proceedings in this State with respect to the enterprise group member;

(c) Entrusting the administration of all or part of the enterprise group member's assets located in this State to the foreign group member representative or another person designated by the court, in order to protect and preserve the value of assets that, by their nature or because of other circumstances, are perishable, susceptible to devaluation or otherwise in jeopardy;

[(c)*bis* Entrusting the realization of all or part of the enterprise group member's assets located in this State to the foreign group member representative or another person designated by the court in order to protect and preserve the value of assets that, by their nature or because of other circumstances, are perishable, susceptible to devaluation or otherwise in jeopardy];

(d) Recognizing existing arrangements concerning the funding of enterprise group members participating in the group insolvency solution where the funding entity is located in this State and authorizing the continued provision of finance under those funding arrangements;

(e) Any relief mentioned in article 7, paragraph 1.

2. [*Insert provisions of the enacting State relating to notice.*]

3. Unless extended under article 7, subparagraph 1 (g), the relief granted under this article terminates when the application for recognition is decided upon.

4. The court may refuse to grant relief under this article if such relief would interfere with the administration of a [foreign group proceeding] [group insolvency solution].

B. Notes

Subparagraphs 1 (a) and (b)

1. Following a suggestion made at the forty-seventh session to accommodate situations in which it might be problematic for the court to stay execution, or commencement or continuation of insolvency proceedings, subparagraphs 1 (a) and (b) refer to what is permitted under applicable law (A/CN.9/835, para. 45); the Working Group may wish to consider whether a specific reference to "procedural" law is required. The same amendment has been made to draft article 7, subparagraphs 1 (a) and (b).

*Subparagraph 1 (c)*bis

2. Subparagraph (c)*bis* reflects a proposal at the forty-seventh session to treat administration and realization of assets separately (A/CN.9/835, para. 43). The same revision is also reflected in draft article 7, subparagraph 1(a). The Working Group may wish to consider whether a distinction should be made between realization of some or substantially all of the debtor's assets.

Article 7. Relief that may be granted upon recognition of a foreign group proceeding[12]

A. Draft provisions

1. Upon recognition of a foreign group proceeding, where necessary to protect the assets of the enterprise group member or the interests of creditors and facilitate the implementation of a group insolvency solution, the court may, at the request of the foreign group member representative, grant any appropriate relief, including:

(a) [Where permitted by relevant [procedural] laws], staying the commencement or continuation of individual actions or individual proceedings concerning the assets, rights, obligations or liabilities of the enterprise group member;

[12] This article is based upon arts. 20 and 21 of the Model Law, with some additions.

(b) [Where permitted by relevant [procedural] laws,] staying the commencement or continuation of insolvency proceedings in this State with respect to the enterprise group member to enable a group insolvency solution to be developed;

(c) Staying execution against the assets of the enterprise group member;

(d) Suspending the right to transfer, encumber or otherwise dispose of any assets of the enterprise group member, except where authorized by the court;

(e) Entrusting the administration of all or part of the assets of the enterprise group member located in this State to the enterprise group member representative or another person designated by the court;

[(e)*bis* Entrusting the realization of all or part of the assets of the enterprise group member located in this State to the enterprise group member representative or another person designated by the court;]

(f) Providing for the examination of witnesses, the taking of evidence or the delivery of information concerning the assets, affairs, rights, obligations or liabilities of the enterprise group member;

(g) Extending any provisional relief granted;

(h) Recognizing existing arrangements concerning the funding of enterprise group members participating in the group insolvency solution and authorizing the continued provision of finance under those funding arrangements where the funding entity is located in this State;

(i) Subject to article 8, approving treatment in the foreign group proceeding of the claims of creditors located in this State; or

(j) Granting any additional relief that may be available to [*insert the title of a person or body administering a reorganization or liquidation under the law of the enacting State*] under the laws of this State.

2. Upon recognition of a foreign group proceeding the court may, at the request of the foreign group member representative, entrust the distribution of all or part of the assets of the enterprise group member located in this State to the foreign group member representative or another person designated by the court, provided that the court is satisfied that the interests of creditors in this State are adequately protected.

B. Notes

Draft article 7 has been revised to be consistent with draft article 6 as indicated in the notes to draft article 6.

D. Note by the Secretariat on insolvency law: cross-border recognition and enforcement of insolvency-related judgements

Contents

Introduction

1. At its forty-seventh session (2014), the Commission gave Working Group V (Insolvency Law) a mandate to develop a model law or model legislative provisions to provide for the recognition and enforcement of insolvency-related judgements.

2. At its forty-sixth session in December 2014, Working Group V (Insolvency Law) considered a number of issues relevant to the development of a legislative text on the recognition and enforcement of insolvency-related judgements, including the types of judgements that might be covered, procedures for recognition and grounds to refuse recognition. The Working Group agreed that the text should be developed as a stand-alone instrument, rather than forming part of the UNCITRAL Model Law on Cross-Border Insolvency (the Model Law),[1] but that the Model Law provided an appropriate context for the new instrument.

[1] A/CN.9/829, paras. 60 and 74.

3. At its forty-seventh session, the Working Group considered the first draft of a model law to be given effect through enactment by a State (A/CN.9/WG.V/WP.130). The content and structure of the draft text drew upon the Model Law, as suggested by the Working Group at its forty-sixth session (A/CN.9/829, para. 63) and sought to give effect to the conclusions of the Working Group at its forty-sixth session relating to the types of judgement to be included (A/CN.9/829, paras. 54 to 58), procedures for obtaining recognition and enforcement (A/CN.9/829, paras. 65 to 67) and the grounds for refusal of recognition (A/CN.9/829, paras. 68 to 71).

4. At its forty-seventh session, the Working Group had a preliminary exchange of views on articles 1 to 10 of the draft text and made a number of proposals with respect to the drafting (A/CN.9/835, paras. 47-69); articles 11 and 12 were not reached due to lack of time. The Working Group's proposals are reflected as additional variants and square bracketed text in the draft provisions set forth below. Only those draft articles for which revisions were proposed are included in this draft; the text of omitted articles remains the same as set forth in A/CN.9/WG.V/WP.130. The text of each draft article is followed by notes which indicate the source of the revision and offer additional explanation.

5. Issues not addressed by the current draft text that the Working Group may wish to consider include: the treatment of judgements arising in what might be considered competing insolvency proceedings (see A/CN.9/829, para. 75) and termination or variation of recognition (see Model Law article 17, para. 4).

Draft model law on the recognition and enforcement of insolvency-related judgements

Article 1. Scope of application

A. Draft provisions

Variant 1 (as set forth in A/CN.9/WG.V/WP.130)

1. This Law applies where:

(a) Recognition and enforcement of an insolvency-related judgement is sought in this State by a foreign representative or other person entitled to seek enforcement of such a judgement in connection with a foreign proceeding; or

(b) Recognition and enforcement of an insolvency-related judgement is sought in a foreign State in connection with a proceeding under the law of this State.

Variant 2

1. [This Law applies to the recognition and enforcement of an insolvency-related judgement on the application of a foreign representative or other person entitled to seek recognition and enforcement of such a judgement.]

Variant 3

1. [This Law applies to the recognition and enforcement of an insolvency-related judgement given in a proceeding taking place in a State that is different to the State of execution.]

2. This Law does not apply to [...].

B. Notes

Variants 2 and 3 of paragraph 1 were proposed at the forty-seventh session (A/CN.9/835, paras. 51-52). Since some support was expressed in favour of retaining subparagraph 1 (b), it is included as part of variant 1 for further consideration. No comments were made with respect to paragraph 2 dealing with possible exclusions from the application of the draft text, so it is retained as drafted for consideration.

Article 2. Definitions

A. Draft provisions — subparagraphs (a)-(c)

For the purposes of this Law:

(a) "Foreign proceeding" means a collective judicial or administrative proceeding [in a foreign State,] [including an interim proceeding,] pursuant to a law relating to insolvency in which [proceeding] the assets and affairs of a debtor are or were subject to control or supervision by [a foreign] court for the purpose of reorganization or liquidation;

(b) "Foreign representative" (*as set forth in A/CN.9/WG.V/WP.130*);

(c) "Judgement" means any [final] judicial or administrative decision, whatever it may be called, including a decree or order, and a determination of costs and expenses provided that the determination related to a judicial or administrative decision,[2] and any decision ordering [provisional] or [protective [and conservatory] measures].[3]

B. Notes

Subparagraph (a)

1. This definition is based on the Model Law, article 2, subparagraph (a). Suggestions were made at the forty-seventh session that this definition should be aligned with that of the corresponding term in the Model Law (A/CN.9/835, para. 54). The elements omitted in the previous version have now been included in square brackets. As some support was expressed in favour of retaining the words "or were", the square brackets have been deleted.

Subparagraph (c)

2. At the forty-seventh session (A/CN.9/835, para. 56) some support was expressed in favour of requiring the judgement to be final, although it was noted that that would be inconsistent with the inclusion of provisional or protective measures. Concerns were also expressed with respect to the inclusion of administrative decisions and provisional measures. It was noted however, that deleting administrative decisions might create a gap in some jurisdictions. It was also suggested that the only provisional measures that should be included were protective or conservatory measures.

3. It might be noted that draft article 3, paragraph 1 of the preliminary draft text emanating from the fourth meeting of the Hague Conference on Private International Law (the Hague Conference) working group on the judgements project (February 2015) does not require a judgement to be final; the draft text includes, in draft article 4, subparagraph 4 provision for postponement of recognition where a judgement is subject to review. It does exclude interim measure of protection:[4]

> "In this Convention, 'judgement' means any decision on the merits given by a court, whatever it may be called, including a decree or order, and a determination of costs or expenses by the court (including an officer of the court), provided that the determination relates to a decision on the merits which may be recognized or enforced under this Convention. An interim measure of protection is not a judgement."

4. It may also be noted that Article 32 of the recast EC Insolvency Regulation 1346/2000[5] (Regulation (EU) 2015/848 of the European Parliament and of the Council) (the recast EIR)

---

[2] This definition is taken from the Convention of 30 June 2005 on Choice of Court Agreements (2005 Hague Convention), art. 4.

[3] This last phrase relating to provisional measures is taken from the draft global judgements convention prepared by The Hague Conference on Private International Law, 2001 version, art. 23.

[4] The preliminary draft text emanating from the fourth meeting (February 2015) of the Hague Conference on Private International Law's working group on the judgements project, available at www.hcch.net/upload/wop/gap2015pd07b_en.pdf (last visited 21/09/2015).

[5] Adopted by the Council on 12 March 2015, available from: http://eur-lex.europa.eu/legal-content/EN/TXT/?uri=uriserv:OJ.L_.2015.141.01.0019.01.ENG (last visited 21/09/2015). The recast EIR will enter into force in June 2017.

provides for recognition of judgements relating to preservation measures taken after the request for the commencement of insolvency proceedings or in connection with it:

"*Article 32. Recognition and enforceability of other judgements*

"1. Judgements handed down by a court whose judgement concerning the opening of proceedings is recognized in accordance with Article 19 and which concern the course and closure of insolvency proceedings, and compositions approved by that court, shall also be recognized with no further formalities. Such judgements shall be enforced in accordance with Articles 39 to 44 and 47 to 57 of Regulation (EU) No. 1215/2012.

"The first subparagraph shall also apply to judgements deriving directly from the insolvency proceedings and which are closely linked with them, even if they were handed down by another court.

"The first subparagraph shall also apply to judgements relating to preservation measures taken after the request for the opening of insolvency proceedings or in connection with it.

"2. The recognition and enforcement of judgements other than those referred to in paragraph 1 of this Article shall be governed by Regulation (EU) No. 1215/2012 provided that that Regulation is applicable."

5. Paragraphs 21 and 22 of document A/CN.9/WG.V/WP.126 indicate the judgements that have been held to fall within[6] and outside[7] the provisions of article 32.

C. Draft provisions — subparagraph (d) — *article 2 continued*

(d) "Insolvency-related judgement" means

Chapeau — variant 1

[a judgement that is closely related to a foreign proceeding and was issued after the commencement of that proceeding. A judgement is presumed to be "closely related to a foreign proceeding"[8] if it has an effect upon the insolvency estate of the debtor and either: (i) is based on a law relating to insolvency; or (ii) due to the nature of its underlying claims, would not have been issued without the commencement of the foreign proceeding.[9] An insolvency-related judgement would include any equitable relief, including the establishment of a constructive trust, provided in that judgement or required for its enforcement. Insolvency-related judgements may include, [inter alia,] judgements concerning any of the following matters:]

---

[6] For example, judgements held to fall within article 32 have included: avoidance actions, insolvency law-related lawsuits on the personal liability of directors and officers; lawsuits concerning the priority of a claim; disputes between an insolvency representative and debtor on inclusion of an asset in the insolvency estate; approval of a reorganization plan; discharge of residual debt; actions on the insolvency representative's liability for damages, if exclusively based on the carrying out of the insolvency proceedings; action by a creditor aiming at the nullification of an insolvency representative's decision to recognize another creditor's claim; and claims by an insolvency representative based on specific insolvency law privilege.

[7] For example, judgements held to fall outside article 32 have included: actions by and against an insolvency representative which would have been possible also without the insolvency proceedings; criminal proceedings in connection with insolvency; an action to recover property in the possession of the debtor; an action to determine the legal validity or amount of a claim pursuant to general laws; claims by creditors with a right for segregation of assets; claims by creditors with a right for separate satisfaction (secured creditors); and an avoidance action filed not by an insolvency representative, but by a legal successor or assignee.

[8] The recast EIR uses the phrase "actions which derive directly from the insolvency proceedings and are closely linked with them" (recital 35). The recital notes that "these actions should include avoidance actions and actions concerning obligations that arise in the course of the insolvency proceedings, such as advance payment for the costs of the proceeding. In contrast, actions for the performance of obligations under a contract concluded by the debtor prior to the opening of the proceedings do not derive directly from the proceedings."

[9] The draft article might indicate that for the purposes of this model law, an insolvency-related judgement would not include a judgement imposing a criminal penalty.

Chapeau — variant 2

[*First sentence remains the same as variant 1*]. A judgement is presumed to be "closely related to a foreign proceeding" if it has an effect upon the insolvency estate of the debtor, [such as reducing the value of the estate or upsetting the principle of equitable treatment of creditors]. Insolvency-related judgements may include, [inter alia,] judgements concerning any of the following matters:]

(i) Turnover of property of the insolvency estate;

(ii) Sums due to the insolvency estate;

(iii) Sale of assets by the insolvency estate;

(iv) Requirements for accounting related to the insolvency proceeding;

(v) *Variant 1 (as set forth in A/CN.9/WG.V/WP.130)*

Overturn of transactions involving the debtor or assets of the insolvency estate that have the effect of either reducing the value of the estate or upsetting the principle of equitable treatment of creditors;[10]

Variant 2 (as set forth in A/CN.9/WG.V/WP.130)

Resolution of actions to avoid or otherwise render ineffective acts detrimental to creditors,[11] including undervalued transactions, preferential transactions and transactions intended to defeat, delay or hinder the ability of creditors to collect claims where the effect of the transaction was to put assets beyond the reach of creditors or potential creditors or to otherwise prejudice the interests of creditors;[12]

(vi) Modification or enforcement of a stay of actions in a foreign proceeding;[13]

(vii) Validity of a secured claim;

(viii) A cause of action pursued by a creditor with approval of the court, based on [an insolvency] [a foreign] representative's decision not to pursue that cause of action;

(ix) Liability of a director in the period approaching insolvency;[14]

(x) Confirmation of a plan of reorganization or liquidation or approval of a [composition] [voluntary restructuring agreement];

(xi) The discharge of a particular debt;

(xii) Recognition of the discharge of a debtor;

(xiii) [A cause of action [related to insolvency] pursued by the party to whom it has been assigned by the foreign representative in accordance with the applicable law]; and

(xiv) [Any judgement related to insolvency that is not enforceable under another instrument].

D. Notes

Subparagraph (d), chapeau variant 1

6. Variant 1 of the chapeau reflects a suggestion made at the forty-seventh session (A/CN.9/835, para. 57) to delete the words "and legal basis" in subparagraph (d) (ii) of draft article 2, and include the words "inter alia" in the last sentence of subparagraph (d). It was

[10] The wording of this variant is based on the UNCITRAL Legislative Guide on Insolvency Law, rec. 87.

[11] The wording of this variant is based on the UNCITRAL Model Law on Cross-Border Insolvency, art. 23.

[12] This wording is taken from the Legislative Guide, rec. 87.

[13] Some consideration might be given to the issue of possible overlap with provisions of the Model Law, such as art. 22, para. 3.

[14] See Legislative Guide, part four dealing with the obligations of directors of a company in the period approaching insolvency, recs. 255, 259 and 260.

noted that the statement included in footnote 9 concerning judgements imposing a criminal penalty could be included in any guide to enactment prepared for this draft text.

Subparagraph (d), chapeau variant 2

7. Variant 2 of the chapeau reflects a proposal made at the forty-seventh session (A/CN.9/835, para. 57) to simplify the chapeau of the draft definition. Variant 2 also includes language from variant 1 of subparagraph (d) (v) of draft article 2, to explain the phrase "effect upon the insolvency estate of the debtor".

Subparagraph (d) (ii)

8. At the forty-seventh session (A/CN.9/835, para. 58) various suggestions were made with respect to the subparagraphs of the definition of "insolvency-related judgement", including deleting subparagraph (d) (ii) on the ground that any judgement arising from a contractual dispute concerning sums owed under the contract should be enforceable under general rules rather than under this model law. However, "sums due to the insolvency estate" is somewhat ambiguous as to scope. It might cover, for example, sums due other than under contract, such as tort claims or sums recovered under an avoidance action (which may or may not be covered by subparagraph (v)). It is retained for further consideration.

Subparagraph (d) (vi) and (vii)

9. At the forty-seventh session (A/CN.9/835, para. 58) suggestions made with respect to the subparagraphs of the definition of "insolvency-related judgement", included deleting subparagraphs (d) (vi) and (d) (vii) on the grounds that those matters were closely related to the question of recognition of foreign proceedings under the Model Law. While that may be the case in some jurisdictions, it may not necessarily be the case in all jurisdictions that have enacted legislation based on the Model Law, as previously noted in A/CN.9/829, paragraph 58. Including those types of judgement in this text may be helpful for States that have not enacted the Model Law. The relationship between this text and the Model Law and issues that might need to be considered in enacting this text could perhaps be more effectively addressed in a guide to enactment of this text, than in the substance of its provisions.

Subparagraph (d) (x)

10. At the forty-seventh session (A/CN.9/835, para. 58) suggestions made with respect to the subparagraphs of the definition of "insolvency-related judgement" included deleting subparagraph (d) (x) on the grounds that that matter was closely related to the question of recognition of foreign proceedings under the Model Law, as noted above with respect to subparagraphs (vi) and (vii). The same considerations as notes above in paragraph 9 might be applicable to subparagraph (d) (x).

Subparagraph (d) (xii)

11. For the same reasons as cited above with respect to subparagraphs (d) (vi), (vii) and (x), it was suggested at the forty-seventh session (A/CN.9/835, para. 58) that subparagraph (xii) should also be deleted. It might be recalled however, that specific mention of the need to include the substance of subparagraphs (d) (x) and (xii) was made at both the forty-fourth and forty-sixth sessions of the Working Group (A/CN.9/798, para. 28 and A/CN.9/829, para. 60 respectively). Accordingly, the Working Group may wish to further consider those subparagraphs before agreeing to their deletion.

Subparagraphs (d) (xiii) and (xiv)

12. Two new subparagraphs (d) (xiii) and (xiv) have been added to reflect suggestions made at the forty-seventh session (A/CN.9/835, paras. 59 and 60).

Possible additions to draft article 2

A. Draft provisions

[(e) "Foreign court" means a judicial or other authority competent to control or supervise a foreign proceeding];

(f) ["Proceeding" means

Variant 1: [a judicial contest to determine and enforce legal rights];

Variant 2: [any action involving or carried out by a court of law];

Variant 3: [procedures and hearings before a court or administrative body that performs a judicial function];

[(g) "Recognition" means to [acknowledge] [confirm] the existence, validity or legality of an insolvency-related judgement];

[(h) "Enforcement" means to compel observance of a recognized insolvency-related judgement by the judgement debtor. [Note for guide: not all judgements will require enforcement to be effective.]]

B. Notes

Additional definition (e)

1. Inclusion of additional definitions was proposed at the forty-seventh session (A/CN.9/835, paras. 54 and 63(d)). The definition of "foreign court" is the same as the definition of that term in the Model Law and is limited to the court with jurisdiction over insolvency proceedings. As currently drafted, this term is only used in the definition of "foreign proceeding" and in draft article 10, subparagraph (i) of the draft model law.

Additional definitions (f), (g) and (h)

2. Inclusion of these additional terms was also proposed at the forty-seventh session (A/CN.9/835, paras. 54 and 63(d)). The definition of "proceeding" includes various alternatives the Working Group may wish to consider. The term is used in the draft text in the context of the phrase "foreign proceeding" and the "proceeding" in which the insolvency-related judgement was given.

3. The definitions of "recognition" and "enforcement" seek to clarify that while recognition is required in order to enforce a foreign insolvency-related judgement, not all recognized judgements will require enforcement to be effective. Accordingly, the definition of "enforcement" goes beyond what might be required to make the judgement effective in the recognizing State and focuses on compelling compliance with, or observance of, the judgement by the judgement debtor.

Article 3. International obligations of this State

Article 4. Competent court or authority

Article 5. Authorization to seek enforcement of an insolvency-related judgement in a foreign State

Article 6. Additional assistance under other laws

Article 7. Interpretation

Notes on articles 3-7

Articles 3-7 of the draft model law set forth in A/CN.9/WG.V/WP.130 are essentially the same as articles 3-7 of the Model Law and are not repeated in this working paper. The Working Group made no comments on those articles at its forty-seventh session (A/CN.9/835, para. 61); should it wish to include articles along these lines in the draft model law they can be added at a later stage.

Article 8. Recognition and enforcement of an insolvency-related judgement[15]

A. Draft provisions

Variant 1 (as set forth in A/CN.9/WG.V/WP.130)

1. A foreign representative or other person entitled under the law of the State in which the insolvency-related judgement was given to seek enforcement of that judgement may request the court in this State to recognize and enforce that judgement.[16]

2. A party seeking recognition and enforcement of an insolvency-related judgement shall provide:

(a) A copy of the insolvency-related judgement;

(b) A certified statement of whether the insolvency-related judgement is a final judgement or, if not, the identification of the appellate court where any appeal is pending, and the status of the appeal;

(c) Evidence that the party against whom relief is sought received notice of the proceeding in which the insolvency-related judgement was issued and had an opportunity to be heard prior to the issue of the judgement; and

(d) Evidence that the party against whom relief is sought was provided notice of the request in this State for recognition and enforcement of the insolvency-related judgement.

Variant 2

[1. A foreign representative or other person entitled under the law of the State in which the judgement was given to seek enforcement of an insolvency-related judgement may request the court in this State to recognize and enforce that judgement. A judgement may be enforced by pleading the rights created or recognized by the judgement by way of defence. A party seeking recognition and enforcement of an insolvency-related judgement shall provide:]

(a) A [certified] copy of the insolvency-related judgement;

(b) A certified statement of the [final character of the] insolvency-related judgement;

(c) [*Same as for variant 1 above*]; and

(d) [*Same as for variant 1 above*].

2. The court may require translation of documents supplied in support of recognition of the insolvency-related judgement into an official language of this State.

3. The court is entitled to presume that documents submitted in support of a request for recognition of the insolvency-related judgement are authentic, whether or not they have been legalized.

B. Notes

1. The revisions to draft article 8 were proposed at the forty-seventh session (A/CN.9/835, paras. 62-63). Variant 2 of paragraph 1 incorporates the substance of footnote 16 to variant 1 of paragraph 1 and merges paragraphs 1 and 2 of variant 1. In subparagraph 1 (a) of variant 2, the copy of the judgement to be provided should be a "certified" copy, consistent with article 15, subparagraph 2 (a) of the Model Law.

2. Draft subparagraph 1 (b) of variant 2 has been revised to indicate that the insolvency-related judgement should be a final judgement. The references in subparagraph 2 (b) of variant 1 to an appeal and the details of that appeal have been deleted. An alternative means of addressing that issue of finality, should the Working Group decide that only final judgements are to be covered by the draft text, might be to include finality as a requirement in the definition of "insolvency-related judgement".

3. An alternative approach to the issue of finality might be to consider the approach of draft article 4, paragraphs 3 and 4 of the preliminary draft text emanating from the fourth

---

[15] This draft article is based on art. 15 of the Model Law, paras. 1, 2 and 4. Draft para. 4 of this article is based on art. 16, para. 2 of the Model Law.

[16] An insolvency-related judgement may also be raised as a defence to an action concerning the same matter/claim in the enacting or another State.

meeting (February 2015) of the Hague Conference working group on the judgements project:[17]

> "3. A judgement shall be recognized only if it has effect in the State of origin, and shall be enforced only if it is enforceable in the State of origin.
>
> "4. Recognition or enforcement may be postponed or refused if the judgement is the subject of review in the State of origin or if the time limit for seeking ordinary review has not expired. A refusal does not prevent a subsequent application for recognition or enforcement of the judgement. In such cases, the court addressed may also make enforcement conditional on the provision of such security as it shall determine."

4. Draft paragraphs 2 and 3 (previously 3 and 4) of draft article 8 are unchanged from the previous draft set forth in A/CN.9/WG.V/WP.130.

Article 9. Decision to recognize and enforce an insolvency-related judgement[18]

A. Draft provisions

An insolvency-related judgement shall be recognized and may, upon recognition, be enforced without review of the merits of the judgement provided:

(a) [deleted];

(b) The person seeking enforcement of the insolvency-related judgement is a person within the meaning of article 2, subparagraph (b)[19] or another person entitled to seek enforcement of the judgement under article 8, paragraph 1;

(c) The requirements of article 8, paragraph [..] are met;

(d) The court from which recognition is sought is the court referred to in article [..];

(e) Article 10 does not apply; and

(f) [Where recognition of the underlying foreign proceeding [is] [has been] sought, it has not been refused on the ground that such recognition would be manifestly contrary to public policy.]

B. Notes

The revisions to draft article 9 reflect suggestions made at the forty-seventh session (A/CN.9/835, para. 64). Subparagraph (a) has been deleted as redundant. The cross reference in subparagraph (c) will be to the paragraph of draft article 8 setting forth the conditions for recognition. A new subparagraph (f) has been added to align the result under this text with the result under the Model Law, so that recognition of an insolvency-related judgement is dependent upon recognition of the underlying insolvency proceedings not having been refused on public policy grounds under article 6 of the Model Law. An alternative means of addressing that issue might be to include it as a ground for refusal of recognition under draft article 10.

Article 10. Grounds to refuse recognition of an insolvency-related judgement[20]

A. Draft provisions

The court may decline to recognize an insolvency-related judgement if the party against whom relief is sought demonstrates that:

(a) The insolvency-related judgement is subject to review in the originating State or the time limit for seeking review has not expired and the originating State would not enforce the insolvency-related judgement because of the availability of such review;

(b) The party against whom the proceeding giving rise to the insolvency-related judgement was instituted:

(i) Was not notified of the institution of that proceeding in sufficient time and in such a manner as to enable a defence to be arranged, unless the party entered an

---

[17] The draft text is available as indicated in footnote 4 above.

[18] This draft article is based on art. 17 of the Model Law.

[19] That is, the foreign representative.

[20] These grounds are based upon those discussed and agreed upon at the Working Group's forty-sixth session (A/CN.9/829, paras. 68-71).

appearance and presented their case without contesting notification in the originating court, provided that the law of the originating State permitted notification to be contested; or

(ii) Was notified of the institution of that proceeding in a manner that is incompatible with fundamental principles of this State concerning service of documents;

(c) The insolvency-related judgement was obtained by fraud in connection with a matter of procedure;

(d) Recognition and enforcement of the [content of the] insolvency-related judgement would be manifestly contrary to the public policy of this State;

(e) The proceeding in which the insolvency-related judgement was issued was manifestly contrary to the fundamental principles of procedural fairness of this State;

(f) The insolvency-related judgement is inconsistent with a prior [final, binding] judgement given in this State in a dispute between the same parties;

(g) The insolvency-related judgement is inconsistent with an earlier [final, binding] judgement given in another State involving the same parties, provided that the earlier judgement fulfils the conditions necessary for its recognition in this State;

(h) *Variant 1 (as set forth in A/CN.9/WG.V/WP.130)*

Recognition and enforcement of the insolvency-related judgement would interfere with the administration of the debtor's insolvency proceedings[21] or would be inconsistent with a stay or other order entered in insolvency proceedings in this or another State;

(h) *Variant 2*

[Recognition of the insolvency-related judgement has been refused by a judgement given in the State where the foreign proceeding has commenced, or if no judgement on recognition has been given in that State, the court from which recognition is sought determines that the insolvency-related judgement is not susceptible of recognition under the laws of the State where the foreign proceeding commenced;]

(i) *Variant 1 (as set forth in A/CN.9/WG.V/WP.130)*

The party against whom the proceeding giving rise to the insolvency-related judgement was instituted did not consent to the exercise of jurisdiction in that proceeding and the foreign court exercised jurisdiction over that party solely on a basis that was unreasonable or unfair. A basis of jurisdiction is not unreasonable or unfair solely because it is not an acceptable basis of jurisdiction for courts in this State;

(i) *Variant 2 (as set forth in A/CN.9/WG.V/WP.130)*

The party against whom the proceeding giving rise to the insolvency-related judgement was instituted did not consent to the exercise of jurisdiction in that proceeding and the foreign court exercised jurisdiction over that party solely on one of the following grounds:

(i) The presence of that party's property in the jurisdiction of the foreign court, when the property is unrelated to the insolvency-related judgement;

(ii) The nationality of a different party; or

(iii) Any other basis that was unreasonable or unfair; a basis of jurisdiction is not unreasonable or unfair solely because it is not an acceptable basis of jurisdiction for courts in this State;

(i) *Variant 3*

[Where the party against whom recognition is sought is the debtor in the proceedings giving rise to the insolvency-related judgement, if such proceedings were not initiated at the

[21] At the forty-sixth session, it was suggested that this ground might be included as an alternative to restricting recognition to judgements emanating from proceedings that might be regarded as main or non-main proceedings (A/CN.9/829, para. 70).

debtor's centre of main interests. In all other cases, where the judgement party did not have its centre of main interests in, or where it did not consent to the exercise of the jurisdiction of, the State in which the insolvency-related judgement was given.]

[(j) The requirements of article 8, paragraph [..] have not been met].

B. Notes

Subparagraphs (c), (d) and (e)

1. At the forty-seventh session (A/CN.9/835, para. 68), it was proposed that the potential overlap between subparagraphs (c), (d) and (e) should be addressed. On the basis that subparagraph (d) is the most broadly framed and might be interpreted as including the elements of both subparagraphs (c) and (e), those two subparagraphs might be deleted and only subparagraph (d) retained; the content of subparagraphs (c) and (e) might be reflected in any guide to enactment of the draft instrument. It might be noted that subparagraph (d), which uses the phrase from article 6 of the Model Law "manifestly contrary to the public policy of this State" has been augmented by a reference to enforcement of the "content of" the insolvency-related judgement as requested.

2. It might be noted that draft article 5, subparagraphs 1 (b) and (c) of the preliminary draft text emanating from the fourth meeting (February 2015) of the Hague Conference working group on the judgements project retains the essence of subparagraph (c) of draft article 10 above as a separate ground for refusal and combines subparagraphs (d) and (e) of draft article 10, providing that recognition or enforcement might be refused if:

"(b) The judgement was obtained by fraud in connection with a matter of procedure;

"(c) Recognition or enforcement would be manifestly incompatible with the public policy of the requested State, including situations where the specific proceedings leading to the judgement were incompatible with fundamental principles of procedural fairness of that State;"[22]

3. It might be further noted that Article 33 of the recast EIR provides:

"Any Member State may refuse to recognize insolvency proceedings opened in another Member State or to enforce a judgement handed down in the context of such proceedings where the effects of such recognition or enforcement would be manifestly contrary to that State's public policy, in particular its fundamental principles or the constitutional rights and liberties of the individual."[23]

Subparagraphs (f) and (g)

4. Subparagraphs (f) and (g), as proposed at the forty-seventh session (A/CN.9/835, para. 68), require the earlier judgements, with which the insolvency-related judgement for which recognition is sought might be inconsistent, to be final and binding.

5. It might be noted that the preliminary draft text emanating from the fourth meeting of the Hague Conference working group on the judgements project includes grounds the same as set forth above in draft subparagraphs (f) and (g),[24] but does not specifically require the earlier judgements to be final.

Subparagraph (h)

6. As proposed at the forty-seventh session (A/CN.9/835, para. 67), a new variant 2 of subparagraph (h) has been added. Variant 1 of subparagraph (h) focuses more broadly on interference with existing insolvency proceedings or inconsistency with a stay or other order granted in those proceedings. Variant 2 focuses more specifically on refusal of recognition

[22] The text is available as indicated in footnote 4 above.

[23] The text is available as indicated in footnote 5 above.

[24] The draft text is available as indicated in footnote 4 above: see draft article 5, subparagraphs 1(d) and (e): "(d) the [defendant] [person against whom the judgement was rendered] expressly consented to the jurisdiction of the court of origin in the course of the proceedings in which the judgement was given; (e) [the judgement ruled on a contractual obligation and the [defendant] [person against whom the judgement was rendered] intentionally engaged in frequent or significant activity in the State of origin related to the obligation at issue".

in the commencing State or, in the absence of a judgement on the matter in that State, a determination by a court in another State (in which recognition of the judgement is sought) that the insolvency-related judgement was not susceptible of recognition under the laws of the commencing State.

Subparagraph (i)

7. A new variant 3 of subparagraph (i) has been added as proposed at the forty-seventh session (A/CN.9/835, para. 67). While the proposal to add that variant received some support, the report of the forty-seventh session indicates (A/CN.9/835, para. 66) that "serious reservations as to its inclusion were expressed, in particular, that a blanket refusal to recognize on the basis that the insolvency-related judgement did not emanate from the debtor's centre of main interests would be too restrictive to be useful in practice."

8. It might be noted that the preliminary draft text emanating from the fourth meeting (February 2015) of the Hague Conference working group on the judgements project provides for recognition of judgements arising in States where the judgement debtor has a branch, agency or other establishment provided the claim giving rise to the judgement arose out of the activities of that branch, agency or establishment (art. 5 (3) (c). Subparagraphs (3) (e) and (f) of draft article 5 provide:

> "(e) [The judgement ruled on a contractual obligation and the [defendant] [person against whom the judgement was rendered] intentionally engaged in frequent or significant activity in the State of origin related to the obligation at issue;
>
> "(f) The judgement ruled on a contractual obligation and it was rendered by a court in the State in which performance of that contractual obligation by [defendant] [the person against whom the judgement was rendered] occurred, or in which the parties to the contract agreed that it should occur. This agreement should derive from the provisions of the contract. This shall not apply if the contractual obligation consists of a payment of money, unless such payment constituted the main obligation of the contract;]"[25]

Subparagraph (j)

9. New subparagraph (j), proposed at the forty-seventh session (A/CN.9/835, para. 68) reflects the ground included in the Model Law, article 17, subparagraph 1 (c) that permits denial of recognition where the application fails to satisfy the specified evidentiary requirements.

[25] The draft text is available as indicated in footnote 4 above.

E. Report of the Working Group on Insolvency Law on the work of its forty-ninth session (New York, 2-6 May 2016)

(A/CN.9/870)

[Original: English]

Contents

Introduction

A. Facilitating the cross-border insolvency of multinational enterprise groups

1. At its forty-fourth session (December 2013), the Working Group agreed to continue its work on cross-border insolvency of multinational enterprise groups[1] by developing provisions on a number of issues, some of which would extend the existing provisions of the UNCITRAL Model Law on Cross-Border Insolvency and part three of the UNCITRAL Legislative Guide on Insolvency Law and involve reference to the UNCITRAL Practice Guide on Cross-Border Insolvency Cooperation. The Working Group discussed this topic at its forty-fifth (April 2014) (A/CN.9/803), forty-sixth (December 2014) (A/CN.9/829), forty-seventh (May 2015) (A/CN.9/835) and forty-eighth (December 2015) (A/CN.9/864) sessions and continued its deliberations at the forty-ninth session as indicated in this report.

B. Recognition and enforcement of insolvency-derived judgements

2. At its forty-seventh session (2014), the Commission approved a mandate for Working Group V to develop a model law or model legislative provisions providing for the recognition and enforcement of insolvency-derived judgements. The Working Group discussed this topic at its forty-sixth (December 2014) (A/CN.9/829), forty-seventh (May 2015) (A/CN.9/835) and forty-eighth (December 2015) (A/CN.9/864) sessions and continued its deliberations at the forty-ninth session as reflected in this report.

[1] A/CN.9/763, paras. 13-14; A/CN.9/798, para. 16; see the mandate given by the Commission at its forty-third session (2010): *Official Records of the General Assembly, Sixty-fifth Session, Supplement No. 17* (A/65/17, para. 259(a)).

C. Obligations of directors of enterprise group companies in the period approaching insolvency

3. At its forty-fourth session, the Working Group agreed on the importance of addressing the obligations of directors of enterprise group companies in the period approaching insolvency, given that there were clearly difficult practical problems in that area and that solutions would be of great benefit to the operation of efficient insolvency regimes (A/CN.9/798, para. 23). At the same time, the Working Group noted that there were issues that needed to be considered carefully so that solutions would not hinder business recovery, make it difficult for directors to continue to work to facilitate that recovery, or influence directors to prematurely commence insolvency proceedings. In light of those considerations, the Working Group agreed that an examination of how part four of the Legislative Guide could be applied in the enterprise group context and identification of additional issues (e.g. conflicts between a director's duty to its own company and the interests of the group) would be helpful (A/CN.9/798, para. 23). The Working Group discussed this topic at its forty-sixth (December 2014) (A/CN.9/829) and forty-seventh (May 2015) (A/CN.9/835) sessions and continued its deliberations at the forty-ninth session as reported below.

II. Organization of the session

4. Working Group V, which was composed of all States members of the Commission, held its forty-ninth session in New York from 2 to 6 May 2016. The session was attended by representatives of the following States Members of the Working Group: Algeria, Argentina, Armenia, Austria, Canada, China, Czech Republic, Denmark, Ecuador, El Salvador, France, Germany, Greece, Honduras, India, Indonesia, Israel, Italy, Japan, Kenya, Mexico, Namibia, Nigeria, Panama, Philippines, Poland, Republic of Korea, Russian Federation, Singapore, Spain, Switzerland, Thailand, Turkey, Uganda, United Kingdom of Great Britain and Northern Ireland and United States of America.

5. The session was attended by observers from the following States: Albania, Chile, Cyprus, Dominican Republic, Iraq, Libya, Netherlands, Sweden and Syrian Arab Republic.

6. The session was also attended by observers from the European Union and the Holy See.

7. The session was also attended by observers from the following international organizations:

(a) *Organizations of the United Nations system*: World Bank;

(b) *Invited international non-governmental organizations*: American Bar Association (ABA), European Law Students Association (ELSA), Fondation pour le Droit Continental (FDC), INSOL Europe, INSOL International, Inter-Pacific Bar Association (IPBA), International Bar Association (IBA), International Insolvency Institute (III), International Women's Insolvency and Restructuring Confederation (IWIRC), Law Association for Asia and the Pacific (LAWASIA), New York City Bar Association (NYCBAR) and Union Internationale des Avocats (UIA).

8. The Working Group elected the following officers:

Chairman: Wisit Wisitsora-At (Thailand)

Rapporteur: Anna-Letu Haitembu (Namibia)

9. The Working Group had before it the following documents:

(a) Annotated provisional agenda (A/CN.9/WG.V/WP.136);

(b) A note by the Secretariat on facilitating the cross-border insolvency of multinational enterprise groups: summary (A/CN.9/WG.V/WP.137);

(c) A note by the Secretariat on facilitating the cross-border insolvency of multinational enterprise groups: compilation of principles and draft articles (A/CN.9/WG.V/WP.137/Add.1);

(d) A note by the Secretariat on the cross-border recognition and enforcement of insolvency-derived judgements (A/CN.9/WG.V/WP.138);

(e) A note by the Secretariat on directors' obligations in the period approaching insolvency: enterprise groups (A/CN.9/WG.V/WP.139); and

(f) A proposal by the United States on the cross-border recognition and enforcement of insolvency-derived judgements (A/CN.9/WG.V/WP.140).

10. The Working Group adopted the following agenda:

1. Opening of the session.
2. Election of officers.
3. Adoption of the agenda.
4. Consideration of: (a) facilitating the cross-border insolvency of multinational enterprise groups; (b) the recognition and enforcement of insolvency-derived judgements; and (c) directors' obligations in the period approaching insolvency.
5. Other business.
6. Adoption of the report.

III. Deliberations and decisions

11. The Working Group commenced its deliberations on the cross-border insolvency of multinational enterprise groups on the basis of documents A/CN.9/WG.V/WP.137 and A/CN.9/WG.V/WP.137/Add.1, followed by the recognition and enforcement of insolvency-derived judgements on the basis of documents A/CN.9/WG.V/WP.138 and A/CN.9/WG.V/WP.140 and directors' obligations in the period approaching insolvency on the basis of A/CN.9/WG.V/WP.139. The deliberations and decisions of the Working Group on these topics are reflected below.

IV. Facilitating the cross-border insolvency of multinational enterprise groups (A/CN.9/WG.V/WP.137 and Add.1)

Draft legislative provisions on the cross-border insolvency of enterprise groups

Chapter 1. General provisions

12. In respect of article 1, the Working Group noted that a provision on scope would be drafted for future consideration and that the material contained in the introduction to document A/CN.9/WG.V/WP.137/Add.1 could be included.

Principles 1 bis and 1

13. The Working Group stressed the importance of including those principles in the draft text. Various suggestions were made as to how they might be included, such as in a preamble or as draft articles. After discussion, it was agreed that principles 1 bis and 1 should be redrafted as articles for future consideration, taking into account the Working Group's discussion and conclusions on the remainder of the text.

Article 2. Definitions

14. The Working Group noted that the definitions in paragraphs (a) to (c) were taken from part three of the Legislative Guide on Insolvency Law ("Legislative Guide") and were included in working paper A/CN.9/WG.V/WP.137/Add.1 for information; if not ultimately required in the draft text, they could be deleted at a later stage. There was general support in the Working Group for retaining the more comprehensive definition reflected in variant 2 of paragraph (d), but it was noted that including a reference to "a separate legal entity" was potentially inconsistent with the definition in paragraph (a), and particularly with the words

"regardless of its legal form." To address that inconsistency, it was proposed that the definition should be revised along the following lines: "'Enterprise group member' means an enterprise as defined in paragraph (a), which forms part of an enterprise group as set out in paragraph (b)." That proposal was widely supported.

15. It was noted that, although some concerns were expressed with respect to the meaning of the terms "control or significant ownership", the Working Group had previously decided in the context of part three of the Legislative Guide that those terms did not require further clarification.

16. In respect of paragraph (e), there was support for variant 1 with the following revisions:

(a) Retaining the text contained in square brackets and deleting the brackets;

(b) Deleting the phrase "in this State"; and

(c) Replacing the phrase "other group members" with "one or more group members."

17. The Secretariat was requested to redraft paragraph (e) along the following lines: "'Group Representative' means a person or body, including one appointed on an interim basis, authorized to act as a representative of a planning proceeding in which one or more other group members are participating for the purpose of developing a group insolvency solution."

18. In reference to paragraph (f), the Working Group supported variant 1 with a revision to the first subparagraph changing "more than one group member" to "one or more group members."

19. Regarding paragraph (g), the Working Group expressed its support for variant 2. It was suggested that some clarification of the meaning of "main proceeding" was required. It was also suggested that the text from footnote 15 could be added, although a number of reservations were expressed on the basis that it might be difficult to sufficiently substantiate whether additional group members were likely to participate. After discussion, the Working Group did not support the addition of the text from footnote 15.

Chapter 2. Cooperation and coordination

Article 9. Cooperation and direct communication between a court of this State and foreign courts or group representatives

20. The Working Group agreed that a reference to the foreign representative should also be added to both paragraphs of draft article 9 to make the provision more comprehensive. After discussion, support was also expressed in favour of deleting all text in square brackets in paragraph 2.

Article 10. Cooperation to the maximum extent possible under article 9

21. A proposal to delete the phrase "participating in a [planning proceeding] [group insolvency solution]" from paragraphs (c) and (d) was supported. However, a proposal to delete the phrase "to facilitate the implementation of a group insolvency solution" in paragraph (g) was not supported.

Article 12. Effect of communication under article 9

22. Although there was support for the deletion of draft article 12, after discussion it was agreed that it should be retained with a view to further discussing possible modification at a future session. One delegation suggested that the meaning of the word "compromise" in subparagraph (a) be clarified. It was stated that it could be understood as a debt reduction or, alternatively, as a modification of the courts' usual practice.

Article 13. Coordination of hearings

23. It was noted that the substance of draft article 13 was explained in paragraphs 38 to 40 of Chapter III of part three of the Legislative Guide. Support was expressed for the

provision as drafted. One delegation expressed the view that hearing coordination with a foreign court could include joint hearings.

Article 14. Cooperation and direct communication between [group representatives] and foreign courts

24. The Working Group agreed to the article as drafted, with the addition of a reference to the foreign representative in addition to the group representative.

Article 15. Cooperation to the maximum extent possible under article 14

25. There was support in the Working Group for the deletion of the phrase "participating in a [planning proceeding] [group insolvency solution]" from paragraphs (a) and (d). A proposal to delete the phrase "to facilitate the implementation of a group insolvency solution" in paragraph (b) was not supported. In paragraph (e), the Working Group agreed to retain the phrase "a group insolvency solution" and remove the square brackets around it, and to delete the alternative phrase "[reorganization plans]". A general observation was made that in revising the draft provisions, there should be consistency in the references to "development and implementation of a group insolvency solution." The Working Group took note of a concern raised that the text should not inadvertently exclude a group representative from any communication taking place between courts and foreign representatives, and agreed that appropriate safeguards might be developed for future consideration.

Article 17. Authority to enter into agreements concerning the coordination of proceedings

26. It was observed that the use of the phrase "agreement concerning the coordination of proceedings" (based upon article 27(d) of the Model Law on Cross-Border Insolvency) ("Model Law") was included in this iteration of the draft article following a suggestion at the previous session of the Working Group that it should replace the phrase "cross-border insolvency agreements". There was agreement that the relationship of the final text to the Model Law would determine how those agreements should be described.

Article 18. Appointment of a single [or the same] insolvency representative

27. After discussion, the Working Group agreed that rather than choosing one of the words in square brackets, draft article 18 should instead refer to both "appointment and recognition" as well as to "administer and coordinate". It was further agreed to retain the reference to "a single [or the same]" for further consideration, and to retain the phrase "where a group insolvency solution is being developed" without the square brackets. Although it was acknowledged that the requirement that the insolvency representative must be qualified for appointment in each of the relevant States might be difficult to satisfy, it was decided that that proviso in paragraph 1 should nevertheless be retained as drafted.

Chapter 3. Facilitating the development and recognition of a group insolvency solution

A. Provisions relevant to a State in which a planning proceeding commences

Article B. Participation by enterprise group members in an insolvency proceeding in this State; appointment of a group representative

28. In response to concerns raised in respect of the inclusion of a reference to solvent entities, it was suggested that an explanation clarifying what the participation of solvent entities might mean should be elaborated. There was agreement that such participation could not substantively modify the rights of creditors of solvent entities, nor that it would subject the solvent entity to the insolvency law. Neither did the inclusion of solvent entities in draft article B imply that the solvent entity would need to apply for commencement of insolvency proceedings in order to participate in a planning proceeding. It was suggested that the following proposals would make that understanding more explicit:

(a) Adding text along the following lines: "Participation of solvent group members does not imply that such members would be subject to the insolvency law.";

(b) Describing the participation of solvent members as purely procedural; and

(c) Avoiding the use of the word "participation" with respect to solvent entities and instead specifying their rights, such as with respect to the planning proceeding, e.g. the right to appear and to be heard, and to be involved in negotiations.

29. It was recalled that further clarification of the issues outlined in the paragraph above was already contained in footnote 4 of document A/CN.9/WG.V/WP.137, which referred to part three of the Legislative Guide, paragraphs 11 to 14 and 152, as well as recommendation 238. After discussion, there was support for permitting solvent group members to be involved in the development of a group insolvency solution. To the extent that the proposals outlined in the paragraph above did not completely resolve the concerns raised, it was agreed that the Working Group could return to this matter; the Secretariat was requested to prepare text reflecting those concerns for future consideration by the Working Group.

30. In respect of the two variants of paragraph 3, some support was expressed in favour of variant 1 as providing more concise text than variant 2. Support was also expressed in favour of variant 2 since it more closely tracked the text of article 5 of the Model Law. After discussion, it was agreed that both variants would be retained for future consideration. One delegation suggested that in variant 2, it would be necessary to distinguish the meaning of "participation by the group representative" and the meaning of "participation by the group members".

Principle 4, paragraph 2 and principle 5, sentence 2

31. There was agreement on the substance of the principles, but as the Working Group had not yet agreed on the form of the text being developed, it was not possible at this stage to determine whether the principles should be redrafted as substantive provisions or should be included in commentary.

Article D. Relief available to a planning proceeding in this State

32. Concerns were expressed as to the scope of article D, paragraph 2 and its relationship to articles 6 and 7. It was observed that the goal of article D, paragraph 2 was to enable the planning proceeding court to make the orders necessary to support the development of a group insolvency solution. Articles 6 and 7, on the other hand, related to recognition of the planning proceeding in other States, and the relief that those States might provide to support the development of the group insolvency solution through the planning proceeding.

33. One proposal to clarify the scope of article D, paragraph 2 was to move the phrase "in this State" from the end of the chapeau to be inserted following the phrase "assets or operations". That change would have the effect of focusing on what a court in that jurisdiction could do to support the development of a group insolvency solution through that State, including making orders with respect to the assets in that State of debtors with a centre of main interests ("COMI") in another State. There was support in the Working Group for that proposal.

34. A further proposal was to add a new paragraph 3 along the following lines: "Concerning the assets or operations of an enterprise group member with a COMI in another State, relief under this article may only be granted if this is not incompatible with the laws of that State." With respect to that proposal, it was observed that in the event of a conflict between an order issued by the planning proceeding court and an order issued by the court of the State in which the affected debtor had its COMI, the practical solution could be that the COMI court declined to recognize or enforce the order of the planning proceeding court. That approach would preserve the pre-eminence of the COMI principle as reflected in draft article 1 bis. In addition, it was recalled that the definition of a planning proceeding already reflected the Working Group's agreement that a planning proceeding related only to group members that were not precluded by their COMI court from participating in that proceeding (as defined in article 2(g)). With respect to the issue of preclusion, it was noted that a court could at any time prevent a group member with its COMI in the State of that court from participating in a planning proceeding in another jurisdiction. It was suggested that article D, paragraph 2 should be read in the context of the definition of a "planning proceeding". In addressing the scope of article D, the view was expressed that care should be taken to ensure

that the approach to relief taken in this instrument was not inconsistent with the provisions on relief and coordination of proceedings in the Model Law.

35. Although some reservations were expressed about various subparagraphs of article D, paragraph 2, it was agreed that the Working Group would consider those issues in greater detail at a future session.

36. After discussion, the Secretariat was requested to revise article D, paragraph 2 taking into account the considerations noted above.

B. Provisions relevant to a State in which recognition of a planning proceeding is sought

Article 3. Recognition of a planning proceeding

37. The Working Group agreed to the following revisions to draft article 3:

(a) To retain references to "a planning proceeding" rather than to a "group insolvency solution";

(b) To retain variant 1 of paragraph 3 and to delete variant 2; and

(c) To add an additional subparagraph (c) along the following lines: "A statement to the effect that the group member has its COMI in the jurisdiction where the planning proceeding is taking place and that that proceeding is likely to result in added overall combined value for the enterprise group." It was recalled that the latter element was a reflection of the definition of "group insolvency solution" in draft article 2(f).

Principle 4, paragraph 1

38. Since no clear view emerged in the Working Group as to whether principle 4, paragraph 1 should be retained, deleted or redrafted as an article, it was decided to retain it for further consideration, with the addition of the word "planning" before the word "court" in subparagraph (ii).

Article 6. Relief that may be granted upon application for recognition of a foreign proceeding

39. Although a proposal was made to delete draft article 6 as being redundant in light of draft article D, it was observed that since draft article 6 related to the provision of interim relief in the context of a recognition application, it might therefore address issues not covered by article D, paragraph 2. After discussion, it was agreed that draft article 6 should be retained for further consideration in the context of a revised version of the draft instrument.

40. A proposal was made to add text after the phrase "at the request of the group representative" in the chapeau (of both draft articles 6 and 7) along the following lines: "and the group member for which relief was sought"; that suggestion did not receive support.

41. A proposal to retain in paragraph 1(d) the reference to "planning proceeding" rather than "group insolvency solution" was supported. It was also agreed that the phrase in square brackets at the end of paragraph 1(d) relating to safeguards should be retained.

Article 5. Decision to recognize a planning proceeding

42. Reservations were expressed with respect to the need for subparagraph 1(f) and it was agreed that it could be deleted. A proposal was made to place paragraphs 3 and 4 in a separate provision on the basis that they did not deal specifically with the issue of recognition.

Article 7. Relief that may be granted upon recognition of a planning proceeding

43. A concern regarding the relationship between draft articles 6, 7 and D was reiterated (see para. 32 above). To address that concern it was proposed that the three provisions could be merged, although it was again pointed out that the three articles might apply to different situations. It was noted that, to some extent, the answer to that concern might relate to the form of the final text.

44. It was observed that the current draft of article 7 did not distinguish between granting relief with respect to those debtors subject to the planning proceeding and group members participating in that proceeding, and noted that there may be some difference in the relief that might be granted to those group members in the context of recognition of the planning proceeding.

45. In response to a concern about the ability of the recognizing court to grant the relief provided in draft paragraph 1(f) in accordance with the applicable law, it was suggested that that question might be addressed in the same manner as under the Model Law, i.e. by way of a single article along the lines of article 3 of the Model Law.

46. The Working Group agreed on the substance of draft article 7 and that it should be retained for further discussion in the context of the revised version of the draft instrument.

Article D. Participation of a group representative in a proceeding in this State

47. Although some support was expressed in favour of adding to the draft provision the text suggested in footnote 43 of document A/CN.9/WG.V/WP.137/Add.1, there was also support for an alternative proposal to qualify the proceedings in which the group representative could participate along the lines of "that are relevant to development and implementation of a group insolvency solution." In response to those proposals, it was recalled that a distinction was made in the Model Law between participation under article 12 and intervention under article 24. There was agreement that the group representative should be able to participate in insolvency proceedings in accordance with article 12 of the Model Law, but some concern as to intervention under article 24. It was explained that in the Model Law context, the foreign representative could act on behalf of the debtor and therefore the ability to intervene under article 24 was appropriate. Under draft article D, paragraph 1, however, the group representative acted only on behalf of the planning proceeding, and unless the group representative and the foreign representative were the same person, a power of intervention might not be appropriate for the group representative. The Working Group agreed that the issue required further consideration.

Article 8. Protection of creditors and other interested persons

48. In response to a suggestion that the draft article should identify the entity whose creditors were being referred to, it was suggested that that would depend on what the relief granted related to. That issue might be born in mind for future consideration. The Working Group generally agreed with the content of draft article 8.

Article E. Approval of local elements of a group insolvency solution

49. In respect of the approval of a group insolvency solution under draft article E, the Working Group agreed that the group insolvency solution developed in the planning proceeding would require approval by other relevant courts, that the group representative should submit the group insolvency solution to relevant courts for approval, that the entire group insolvency solution should be provided to the court in the approving State, but that approval might relate only to the portion relevant to the creditors in that State. It was acknowledged that the approval process might vary in different States, depending on the requirements of local law — for example, in some States it might be approved by creditors, while in others it might be approved by the court. The Working Group agreed that the draft article should be clarified to reflect that understanding.

Principle 8

50. The Working Group agreed to retain the content of principle 8 and to reassess it in the context of a future iteration of the text.

Chapter 4. Treatment of foreign claims in accordance with applicable law

Articles F and G. Commitment to and approval of the treatment of foreign claims in accordance with applicable law: non-main and main proceedings

51. After a preliminary discussion of draft articles F and G, there was some general acceptance of the draft text, although different views were expressed as to how the

provisions might be interpreted and whether any additional safeguards might be required. One suggestion in that regard was that the relevant safeguards in the recast of the European Insolvency Regulation[2] might provide some guidance. It was agreed that both paragraphs of draft articles F and G might be developed in tandem, since they were substantially similar. It was also suggested that paragraph 2 of draft articles F and G might need to be further considered in the context of the decisions made with respect to draft articles 7, paragraph 1 and D, paragraph 2. Finally, in the absence of clear indication that this article provided an exception to insolvency laws (for example, priority rights) some raised the issue of whether article F, as currently drafted, was sufficient to allow insolvency representatives to commit to foreign creditors that their treatment would not be worse than they would have received had local proceedings commenced.

V. Cross-border recognition and enforcement of insolvency-related judgements (A/CN.9/WG.V/WP.138)

Article 1. Scope of application

52. The Working Group expressed a preference in favour of variant 2 of draft article 1. A proposal to delete the phrase "of execution" at the end of paragraph 1 and substitute "where recognition and enforcement are sought" received support.

Article 2. Definitions

(a) "Foreign proceeding"

53. There was agreement to retain paragraph (a) as well as to delete the square brackets and retain the text contained in them, acknowledging that that definition was based on the definition in article 2(a) of the Model Law.

(b) "Foreign representative"

54. The Working Group approved the definition of "foreign representative" as drafted.

(c) "Judgement"

55. After detailed discussion, the Working Group agreed to delete all references to provisional or protective and conservatory measures. A preference was expressed in favour of variant 2 of paragraph (c). With respect to the inclusion of decisions issued by administrative authorities, the Working Group agreed to further consider focusing on the nature of the decision rather than the body issuing it; it was recalled that the Model Law and the Legislative Guide both referred to bodies competent under the insolvency law to supervise proceedings and issue decisions relating to those proceedings. Focusing on the nature of the decision would also facilitate inclusion of decisions that were issued by what might be considered administrative authorities in some States, but which nevertheless might be reviewed and approved by a court, and in some cases related to proceedings that had been recognized under the Model Law. The Secretariat was requested to prepare a revised text based upon those considerations.

(d) "Insolvency-related judgement"

56. The Working Group considered this definition on the basis of documents A/CN.9/WG.V/WP.138 and A/CN.9/WG.V/WP.140. Some support was expressed in favour of the drafting approach adopted in WP.140. There was agreement that "insolvency-related judgements" were judgements that were closely related to foreign proceedings and were issued after commencement of those proceedings. With respect to the draft definition in WP.138, reservations were expressed with respect to the presumption in the second sentence of the chapeau, although support was expressed in favour of the substance of that sentence. Concerning the chapeau in WP.140, there was agreement that there should be some language expressing the relationship between this and other instruments, but that that might be

[2] Regulation (EU) No. 2015/848 of the European Parliament and of the Council of 20 May 2015 on insolvency proceedings (recast).

addressed in a separate article rather than in the definition. Some support was expressed in favour of the approach in WP.140 of specifying that insolvency-related judgements included judgements determining a series of issues.

57. With respect to those issues, some preference was expressed in favour of the approach of WP.140, although concerns were raised as to whether all of the issues listed in draft article 2 (d) of WP.138 had been included in the draft of article 2 (d) proposed in WP.140. In that regard, it was clarified in particular that draft article 2, subparagraph (d)(vii) of WP.138 was not included in WP.140 because of concerns about maintaining consistency with other relevant instruments. In respect of draft article 2, subparagraphs (d)(viii) and (xiii) of WP.138, a proposal was made to combine them into a single subparagraph in the draft definition. There was support in favour of and against retaining the phrase in square brackets in subparagraph (d)(ii). It was explained that draft article 2, subparagraph (d)(v) of WP.140 proposed a compromise which would include both options A and B in the draft text for enacting States to choose the appropriate one.

58. The Secretariat was requested to prepare a single text, possibly with variants, based upon both documents and taking into account the issues outlined above for consideration at a future session of the Working Group.

(e) "Foreign court"

59. The Working Group approved the definition of "foreign court" as drafted.

(f) "Proceeding"

60. The Working Group agreed to delete the definition of "proceeding" but to note that the language relating to an "administrative authority that performs a judicial function" might be useful in respect of other provisions.

Article 3 and 3 bis. International obligations of this State

61. A number of observations and proposals were made with respect to draft articles 3 and 3 bis. They included:

(a) A proposal that the following text be added: "This Law would not apply to judgements or insolvency-related judgements which are governed by any treaty in force or other form of agreement to which both enacting and receiving States are party.";

(b) To delete the phrase "insolvency-related" in draft article 3 bis;

(c) To delete paragraph 2(b);

(d) To replace:

(i) Paragraph 1 of 3 bis with: "This Law shall not apply to a judgement which is covered by the subject-matter scope of the Hague Convention of 30 June 2005 on Choice of Court Agreements and [*insert the name of any convention on the recognition and enforcement of judgements that might result from the Hague Conference on Private International Law's working group on the judgements project ("HCCH judgements project")*]"; and

(ii) Paragraph 2 of 3 bis with: "A judgement is to be treated for the purposes of paragraph 1 of this article as covered by the subject-matter scope of the said Conventions: (a) even where the particular insolvency-related judgement is not enforceable under either of the Conventions because of the particular circumstances of the case; and (b) where the receiving State has adopted the treaty.";

(e) A preference was expressed in favour of drafting based upon the final clause of the first sentence of the chapeau of article 2, subparagraph (d) in WP.140; and

(f) To add text along the following lines to the end of paragraph 1 of 3 bis: "or where the provisions on recognition and enforcement of insolvency proceedings apply to that judgement."

62. In assessing the above proposals, support was expressed in favour of (b), (c) and (f), while strong reservations were expressed in respect of (d)(i). The Working Group agreed to

retain both draft articles 3 and 3 bis, with deletion of the phrase "insolvency-related", deletion of subparagraph 2(b) of 3 bis, and inclusion in square brackets of the text in proposal (f) above.

Article 3 ter. Conflict between the law of this State and the law of the State in which the insolvency-related judgement was issued

63. Given the decision it made in respect of draft article 1, the Working Group agreed to delete draft article 3 ter.

Article 4. Competent court or authority

64. The Working Group approved the substance of draft article 4.

Article 5. Authorization to seek enforcement of an insolvency-related judgement in a foreign State

65. A proposal to replace the phrase "to act in a foreign State on behalf of a proceeding under [identify laws of the enacting State relating to insolvency]" with the words "to seek recognition and enforcement of an insolvency-related judgement" received support.

Article 6. Additional assistance under other laws

66. Although there was some support for deleting the phrase at the end of the draft article "under other laws of this State", after discussion the prevailing view was that the article should be retained as drafted.

Article 6 bis. Public policy exception

67. Various proposals were made in respect of draft article 6 bis. One was to delete the word "manifestly" on the basis that it might set too high a standard for refusal. In response, it was pointed out that "manifestly contrary to public policy" was a phrase found in many international texts and that to delete it in this context would create uncertainty and raise questions of interpretation. The prevailing view was that "manifestly" should be retained. There was general support for retaining "including" rather than "[or]" and for deleting the square brackets around the word. Although there was some support for deleting the phrase "of this State" at the end of the provision in order to encourage a broader interpretation of procedural fairness without referring to national law, the prevailing view was that that phrase should be retained. After discussion, the Working Group agreed to retain article 6 bis as amended above and to remove the square brackets around it.

Article 7. Interpretation

68. The Working Group approved the substance of draft article 7.

Article 7 bis. Effect and enforceability of an insolvency-related judgement in the State in which it was issued

69. Although there was some support for the deletion of draft article 7 bis, there was support for retaining it on the basis that it represented a compromise reached in the Working Group to focus on the enforceability of a judgement rather than its finality. It was agreed that draft article 7 bis should be retained and the square brackets around it removed. A suggestion to merge draft article 7 bis with draft article 8 bis was widely supported.

Article 8. Application for recognition and enforcement of an insolvency-related judgement

70. The Working Group agreed that paragraph 1 should refer to recognition and enforcement of an insolvency-related judgement, and that the word "certified" in subparagraph 2(a) should be retained and the square brackets around it removed.

71. It was further agreed that in subparagraph 2(b) the focus should be on the enforceability of the judgement. As to the text of that subparagraph, there were suggestions that the word "information" might be too broad and might be replaced with a requirement

for evidence or a reliable statement. Concerns were expressed that the requirement to provide information on time limits for seeking review might prove costly for the applicant and was therefore not desirable. The Secretariat was requested to provide a revision of subparagraph 2(b) taking into account those considerations.

Article 8 bis. Postponement or refusal of recognition and enforcement

72. There was broad agreement in the Working Group that draft article 8 bis should be retained and, as noted above, merged with draft article 7 bis. Noting the content of footnote 24, it was agreed that the sentence proposed should be included in the draft article to permit conditional recognition and enforcement of an insolvency-related judgement.

Article 9. Decision to recognize and enforce an insolvency-related judgement

73. The Working Group approved the substance of draft article 9, with the understanding that the cross references might need to be updated in accordance with decisions made at this session, and that references to "recognitions and enforcement" should be made consistent throughout the document.

Article 10. Grounds to refuse recognition of an insolvency-related judgement

74. With respect to paragraphs (a) and (b), a question was raised as to how they related to some of the provisions already discussed, in particular draft articles 6 bis and 8 bis. The Working Group agreed that those paragraphs should be retained and considered in the context of a future iteration of the text. The Working Group approved the substance of paragraphs (c) to (g) as drafted.

75. With respect to paragraph (h), a question was raised as to the sequence in which the events referred to occurred and how it would be interpreted, for example, if the insolvency proceeding referred to commenced following recognition but before enforcement of the insolvency-related judgement. It was agreed that that issue might need further consideration by the Working Group in light of a future iteration of the text.

76. The Working Group considered paragraphs (i) and (j) on the basis of documents A/CN.9/WG.V/WP.138 and A/CN.9/WG.V/WP.140. After discussion, it was agreed as follows:

(a) Paragraph (i)(i)(2) in WP.140 relating to judgements on directors' obligations should be included in the draft instrument;

(b) The word "express" should be added before "consent" in paragraph (i)(ii); and

(c) There was a preference for paragraph (j) as drafted in WP.140.

77. The Secretariat was requested to prepare a revised text of draft article 10 containing new variants of paragraphs (i) and (j) based upon those comments, as well as including paragraph (k) of WP.140.

Article 10 bis. Equivalent effect

78. Noting that draft article 10 bis was based on article 13 of the text emanating from the fifth meeting of the HCCH judgements project and that it might be useful to include in the draft text, the Working Group agreed to retain draft article 10 bis and remove the square brackets around the text.

Article 11. Protection of creditors and other interested persons

79. The Working Group agreed to consider this draft article in the context of a future iteration of the text.

Article 12. Severability

80. The Working Group agreed to retain draft article 12 and to remove the square brackets around the text.

81. In response to a suggestion to add a new provision along the lines of article 12 of the HCCH judgements project, it was observed that that issue might be partly addressed by draft article 1, but could be further considered in the context of a revised text.

Article 13. Provisional relief

82. The Working Group agreed to retain draft article 13. It was noted that the following observations might need to be considered in preparing a revised text:

(a) Including a reference to the party who might request that relief;

(b) The procedure for obtaining relief, including whether there would be a hearing and requirements for notice (noting the content of draft article 13(2)); and

(c) The need for additional examples including orders not addressed to any particular party but rather in respect of assets.

83. At the conclusion of its deliberations on cross-border recognition and enforcement of insolvency-related judgements, the Working Group requested the Secretariat to prepare a revised version of the draft instrument for consideration at a future session.

Article H

84. After discussion, there was general acceptance to retain draft article H for further review, perhaps considering the relationship between the relief provided in that article and draft articles 7 and D, as also noted above in respect of draft articles F and G.

85. At the conclusion of its discussion of document A/CN.9/WG.V/WP.137/Add.1, the Secretariat was requested to prepare a set of draft model provisions that addressed both the inbound and the outbound elements of the draft instrument; the question of whether those provisions would be included in any addendum to the Model Law or the Legislative Guide would be considered at a future date.

VI. Obligations of directors of enterprise group companies in the period approaching insolvency (A/CN.9/WG.V/WP.139)

86. The Working Group noted the revisions to the text provided in document A/CN.9/WG.V/WP.139 and agreed to keep it under consideration pending further development of the work on enterprise group insolvency. A number of specific drafting suggestions were made, including that:

(a) Recommendations 269 and 270 should use the same phrase as recommendation 255 “from the point in time referred to in recommendation 257” rather than referring to “in the period approaching insolvency”;

(b) Recommendation 267 (a) should replace the word “director” with a reference to the person specified in recommendation 258;

(c) The words in square brackets at the end of recommendation 268 (b) should be moved to 268 (f) to include in that subparagraph a consideration of whether formal proceedings should be commenced;

(d) The commentary should include a reference to the instrument being developed on enterprise groups and suggest that directors be encouraged to have reference to it;

(e) The last sentence of paragraph 7 of the commentary should include material explaining who might benefit from the safeguards, such as creditors and other stakeholders; and

(f) The square brackets in paragraphs 10 and 27 of the commentary could be removed.

VII. Other business

87. Noting the importance of micro, small and medium-sized enterprise (MSME) insolvency and the wide support expressed in the Working Group for work to be undertaken on that topic, the Working Group agreed to recommend that the Commission clarify, at its forty-ninth session, the mandate given at its forty-seventh session[3] to Working Group V as follows:

> "Working Group V is mandated to develop appropriate mechanisms and solutions, focusing on both natural and legal persons engaged in commercial activity, to resolve the insolvency of MSMEs. While the key insolvency principles and the guidance provided by the UNCITRAL Legislative Guide on Insolvency Law should be the starting point for discussions, the Working Group should aim to tailor the mechanisms already provided in the Legislative Guide to specifically address MSMEs and develop new and simplified mechanisms as required, taking into account the need for those mechanisms to be equitable, fast, flexible and cost efficient. The form the work might take should be decided at a later time based on the nature of the various solutions that were being developed."

88. The Working Group was advised that a meeting of the open-ended informal group established to consider the feasibility of developing a convention on international insolvency issues and to study adoption of the model law (A/CN.9/798, para. 19) had taken place. A list of issues to frame the preparation of a report to the Working Group was outlined. Participants at the meeting were requested to advise the Secretariat at their earliest convenience of their interest in contributing to the development of that study. The Secretariat will provide updates on progress with the development of that study as appropriate.

F. Note by the Secretariat on insolvency law: facilitating the cross-border insolvency of multinational enterprise groups: summary

(A/CN.9/WG.V/WP.137 and Add.1)

[Original: English]

Contents

I. Introduction

1. This note provides a summary of how the three sets of provisions contained in the following documents work in combination: (a) the key principles for facilitating the cross-border insolvency of multinational enterprise groups (A/CN.9/WG.V/WP.133); (b) the draft legislative provisions on the cross-border insolvency of enterprise groups (arts. 8-18 from A/CN.9/WG.V/WP.128 and arts. 2-7 from A/CN.9/WG.V/WP.134); and (c) the joint proposal made at the forty-eighth session of Working Group V (A/CN.9/864, paras. 38-53). The combined provisions are organized into chapters according to the structure agreed by the Working Group at its forty-eighth session.[1]

2. Accordingly, chapters 1 to 4 are the core provisions, which address scope and definitions; coordination and cooperation; facilitating the development, recognition and implementation of a group insolvency solution; and the treatment of foreign claims in main proceedings in accordance with the law applicable to those claims (so-called "synthetic proceedings").[2]

3. Chapter 5 contains supplemental provisions, which address the effect of the treatment of creditor claims in a foreign insolvency proceeding referred to in paragraph 2 on the relief that may be ordered in a creditor's home State, as well as an approach to approval of a group insolvency solution based on adequate protection of creditors. The proposal notes (A/CN.9/864, para. 49, footnote 1) that those provisions, which would be optional for a State to enact, would go a step further than the core provisions. They would permit a court in one jurisdiction to use so-called "synthetic proceedings" for a group member whose centre of main interests (COMI) is located in a different jurisdiction. They would also allow a court to provide additional relief — staying or declining to commence insolvency proceedings, as well as approving the relevant portion of a group insolvency solution without submitting it

[1] See A/CN.9/864, para. 18.

[2] The term "synthetic proceedings" is not used in the draft articles set forth in A/CN.9/WG.V/WP.137/Add.1. What is referred to is the substance of what transpires when that approach is used, for example, commitment to and approval of the treatment of foreign claims in proceedings in this State in accordance with the law applicable to those claims.

to the applicable approval procedures under local law — if the court determined that creditors would be adequately protected.

4. The proposal further notes that the use of the supplemental provisions might result in a group member's insolvency being handled in a manner that was not consistent with the prior expectations of creditors and other third parties, i.e. that the group member would be subject to normal insolvency proceedings in its COMI jurisdiction. As a consequence, departing from that basic principle of proceedings commenced on the basis of COMI should be limited to exceptional circumstances, namely to cases where the benefit in terms of efficiency largely outweigh any negative effect on creditors' expectations in particular and legal certainty in general. That would only appear to be justified:

(a) In jurisdictions where courts traditionally hold a large degree of discretion and flexibility in conducting insolvency proceedings;

(b) Where the enterprise group in question was closely integrated and therefore the benefit of so-called "synthetic proceedings" in lieu of main proceedings (conducted at the COMI) was obvious; and

(c) Where the use of the proceedings under articles A to G (if available), could not achieve a similar result.

5. Within chapters 3 to 5, the provisions have been divided into two categories. Category A provisions would be required in the State in which the main or planning proceeding commences in order to facilitate the development of a group insolvency solution through that proceeding (this might be referred to as the originating State). These provisions are of the kind that might be added to the national insolvency law of that State and reflect some of the elements of part three, chapter II of the Legislative Guide. Category B provisions would be required to facilitate cross-border recognition of that planning proceeding and implementation of a group insolvency solution in another State (this might be referred to as the receiving State). These are provisions that might be added to a cross-border recognition regime, such as provided by the Model Law. The provisions in chapter 2 on cooperation and coordination are largely based upon the provisions of the Model Law and part three, chapter III of the Legislative Guide. As such, the enacting State could be both an originating and a receiving State, depending on the circumstances.

6. Document A/CN.9/WG.V/WP.137/Add.1 contains the substantive provisions referred to in the summary, organized in accordance with the agreed structure.

7. The summary refers to the following fact scenario:

> Debtors 1 to 4 are all members of an enterprise group. Debtors 1 and 2 have their COMIs in State A. Insolvency proceedings commence in State A for debtors 1 and 2. Debtor 3 has its COMI in State B and debtor 4 has its COMI in State C.

II. Summary of the combined draft provisions on facilitating the cross-border insolvency of multinational enterprise groups

Chapter 1. General provisions

1. Principles 1 bis and 1.

2. Article 1. Scope.

3. Definitions.

Chapter 2. Coordination and cooperation

Articles 9-18 (A/CN.9/WG.V/WP.128)

4. The courts can coordinate and cooperate with each other, with a group representative (GR) and any foreign representative[3] of a group member participating in a planning proceeding (for the purpose of developing the group insolvency solution); the GR and foreign representatives can also cooperate and coordinate between themselves and with the courts.

Chapter 3. Facilitating the development and implementation of a group insolvency solution

A. Provisions relevant to the State in which a planning proceeding commences (i.e. State A concerning debtors 1 and 2)

5. Debtors 3 and 4 can "participate"[4] in a planning proceeding[5] commenced in State A for debtors 1 and 2 in order to develop a group insolvency solution,[6] provided the courts in States B and C [permit] [do not preclude] that "participation",[7] see below paragraph 10.

6. When debtors 3 and 4 are participating in the planning proceeding in State A, the court in State A can appoint a GR to represent that proceeding[8] and authorize the GR:

(a) To seek recognition of the planning proceeding commenced in State A in a foreign State (e.g. States B and C);[9] and

(b) To participate in any proceedings relating to debtors 3 and 4 taking place in a foreign State (e.g. States B and C),[10] including where those proceedings relate to approval of the group insolvency solution.[11]

7. In the planning proceeding in State A relating to debtors 1 and 2, the recommendations of part three of the Legislative Guide on joint application (rec. 199) and procedural coordination (recs. 202-210) might apply.[12]

8. The court in State A can order relief affecting the assets of debtors participating in the planning proceeding in State A (i.e. debtors 3 and 4) to support the development of the group insolvency solution through that proceeding.[13]

---

[3] As defined in UNCITRAL Model Law on Cross-Border Insolvency, art. 2(d).

[4] The notion of "participation" may need to be explained, since much of substance in the draft text arises from participation in the proceedings in State A. Two distinctions may need to be made between the type of group member participating (i.e. solvent or insolvent) and what they are actually participating in — the planning proceeding or the negotiation of the group insolvency solution. Participation by a solvent group member should be voluntary (see Legislative Guide, part three, paras. 11-14 and 152, rec. 238) and in many cases that member may only need to participate in the negotiation of the group insolvency solution (rather than the planning proceeding in State A), to which they would be contractually bound. Where participation relates to the planning proceeding, it raises issues of the approvals that are required in each case, as well as the concerns previously raised (A/CN.9/835, para. 27) with respect to the standing of solvent and insolvent group members to appear and be heard in the proceedings in State A, as well as submission to the jurisdiction of the courts of State A and the relevance of art. 10 of the Model Law. The issue of participation, particularly where it arises in the period approaching insolvency of a group member has implications for the duties of directors of insolvent group members that might need to be considered in the text being developed on that issue.

[5] As defined in art. 2, para. (g) in A/CN.9/WG.V/WP.137/Add.1.

[6] Art. B, para. 1; principles 2, 3 and 5.

[7] Principle 1 bis (b); principle 4, para. 1(i); art. B, para. 2.

[8] Art. B, para. 3.

[9] Art. B, para. 3.

[10] Art. B, para. 3; since the GR appears to have no legal relationship to debtors 3 and 4, participation in the proceedings in States C and/or D, could be based upon recognition of the planning proceeding in State A (see art. D, para. 1 and art. 12 of the Model Law).

[11] Principle 8.

[12] Principle 5.

[13] Art. D, para. 2; this relief appears to relate only to the assets etc. of foreign debtors that are located in or subject to the jurisdiction of State A (see comment in respect of art. D, para. 2 in

9. The court in State A can receive a request for recognition of any proceedings taking place in a foreign State (e.g. States B and C) concerning debtors participating in the planning proceeding in State A (e.g. these could be non-main proceedings with respect to debtors 1 and 2, and main or non-main proceedings with respect to debtors 3 and 4).[14]

B. Provisions relevant to the State in which recognition of a planning proceeding is sought (i.e. States B and C)

10. Courts in States B and C can [permit] [not preclude] "participation" of debtors 3 and 4 in a planning proceeding in State A where a group insolvency solution is to be developed.[15]

11. Courts in States B and C can authorize an insolvency representative appointed in proceedings relating to participating debtors (e.g. debtors 3 and/or 4) to seek recognition of those proceedings in State A.[16]

12. A GR can apply for recognition in States B and C (and other States as relevant) of the planning proceeding in State A.[17] Recognition shall be granted if the specified requirements are met.

13. After an application for recognition has been made in States B and C, interim relief relating to the assets (located in States B and C) of debtors 1 and 2 is available to assist that proceeding[18] and, following recognition, additional relief can be granted.[19]

14. In granting, modifying or terminating the relief referred to in paragraph 13, the interests of creditors and other interested persons are to be adequately protected.[20]

15. Upon recognition of the planning proceeding, the GR can participate in any proceeding taking place in States B and C relating to debtors 3 and 4 on the basis that they are participating in the proceedings in State A.[21]

16. Once a group insolvency solution is developed in State A, the GR submits the solution to the courts of States B and C, which are then responsible for submitting the parts affecting debtors 3 and 4 to the relevant approval process and implementation.[22]

A/CN.9/WG.V/WP.137/Add.1).

[14] Principle 4, para. 2 — this relief might be covered by provisions of the Model Law, if enacted in State A.

[15] Principle 4, para. 1(i); art. B, para. 2. It may be preferable to draft this provision as permissive, rather than preclusive. If the enacting legislation does not authorize such participation, following an approach similar to art. 5 of the Model Law, the court may be requested to provide that permission (it may be noted that some States, in enacting art. 5 of the Model Law, have adopted that approach and require the court to approve a representative seeking assistance in a foreign State).

[16] Principle 4, para. 1(ii) — this is probably covered by the Model Law, as would be acceptance of that request for recognition in State A (see para. 9 above and principle 4, para. 2 in A/CN.9/WG.V/WP.137/Add.1).

[17] Art. C; art. 3.

[18] Art. 6.

[19] Art. 7. Arts. 6 and 7 currently appear to be limited to protecting the assets etc. of the group member that is "subject to a foreign proceeding"; in the scenario above that would be the assets of debtors 1 and 2 that are located in States B and C; it does not appear to relate to the assets of participating debtors 3 or 4. The relief provided by art. D, para. 2 (see para. 8 above) appears to relate to relief that might be granted by the court of State A with respect to assets of participating debtors 3 and 4 that might be located in State A where the planning proceeding is taking place. As currently drafted, it appears not to apply to the relief that might be available to the GR with respect to the assets located in States B and C of debtors 3 or 4 that might be required to assist the development of the group insolvency solution. Art. H, paras. 1 and 2 seem to refer to such relief being available at the time of approval of the group insolvency solution in States B and C. If art. D is to apply in States A, B and C with respect to the assets of debtors 1-4, some revision of the drafting might be required to clarify that point.

[20] Art. 8.

[21] Art. D, para. 1; Participation by the GR in any insolvency proceedings relating to debtors 1 and 2 taking place elsewhere might be covered, following recognition, by art. 12 of the Model Law.

[22] Art. E; principles 6 and 7.

17. The GR has a right of access to the proceedings in States B and C to be heard on issues related to implementation of the group insolvency solution.[23]

Chapter 4. Treatment of foreign claims in accordance with applicable law[24]

18. A foreign representative or GR may commit to, and the court may approve, treatment of any foreign claims in proceedings in this State in accordance with the treatment[25] they would receive in any foreign non-main proceeding under the applicable foreign law.[26]

19. The court in this State may stay or decline to commence a non-main proceeding in this State where a commitment in accordance with paragraph 18 has been made by a foreign representative or a GR in the relevant foreign proceeding.[27]

Chapter 5. Supplemental provisions[28]

20. The commitment in paragraph 18 may also be made with respect to the treatment a claim would receive in a foreign main proceeding.[29]

21. The court in this State may stay or decline to commence a main proceeding where a commitment in accordance with paragraph 18 has been made by a foreign representative or a GR in the relevant foreign proceeding.[30]

22. As a variation upon the approval process in paragraph 16, the courts in States B and C can approve the relevant portion of the group insolvency solution relating to debtors 3 and 4 and grant appropriate relief of the type referred to in article D, paragraph 2, if satisfied that the interests of creditors of the affected group members (i.e. debtors 3 and 4) are adequately protected in the planning proceeding.[31]

23. After recognizing the planning proceeding in State A, the courts in States B and C can, provided the interests of creditors of affected group members (i.e. debtor 3 and 4) are protected in the planning proceeding, order relief of the kind referred to in article D, paragraph 2 and stay or decline to commence any proceedings in States B and C concerning debtors 3 and 4 respectively.[32]

---

[23] Principle 8.

[24] The ch. 4 provisions are not limited to cases where a group insolvency solution is being developed through a planning proceeding.

[25] The standard for that treatment, which focuses on the priority accorded under the applicable foreign law, might be that the creditors should be no worse off under that treatment than they would have been if non-main proceedings had commenced. This issue was previously discussed in the Working Group, see A/CN.9/803, paras. 17 and 21(b), and A/CN.9/829, para. 41.

[26] Art. F, para. 1 as proposed (see A/CN.9/864, para. 48).

[27] Art. F, para. 2 as proposed (see A/CN.9/864, para. 48). It might be noted, however, that a proposal made at the forty-eighth session (A/CN.9/864, para. 50(d)) suggested that art. F. para. (2) should be considered a supplemental rather than a core provision. Accordingly, arts. F, para. 1 and G, para. 1 could be combined as a core provision, while arts. F, para. 2 and G, para. 2 should be supplemental provisions. This proposal is reflected as a variant in A/CN.9/WG.V/WP.137/Add.1, footnote 50.

[28] A separate scope provision for chapter 5 could be drafted and include the material currently reproduced in paras. 3 and 4 of the introduction to this note.

[29] Art. G, para. 1 as proposed (see A/CN.9/864, para. 48).

[30] Art. G, para. 2 as proposed (see A/CN.9/864, para. 48); principle 1. Previous discussion in the Working Group referred to the court taking such action on the basis of certain considerations, e.g. after balancing the interests of the global group against protecting the interests of local creditors (see A/CN.9/803, para. 28).

[31] Art. H, para. 2.

[32] Art. H, para. 1; principle 1.

(A/CN.9/WG.V/WP.137/Add.1) (Original: English)

Note by the Secretariat on insolvency law: facilitating the cross-border insolvency of multinational enterprise groups: compilation of principles and draft articles

ADDENDUM

Contents

I. Introduction

1. The provisions set out below are arranged in accordance with the structure agreed at the forty-eighth session (A/CN.9/864, para. 18). There is some overlap between the content of the three texts that are merged below, but the original numbering of each article or principle is retained to indicate the origin of each provision; renumbering can be undertaken at a later stage. Where more than one article addresses the same issue they have been merged, while principles that are reflected in the content of articles appear in footnotes to those articles. Principles that address issues not covered by the articles are included in the text; the Working Group may wish to consider whether the substance of those principles should be reflected in draft legislative provisions. The drafting of the principles and the numbered articles has been revised to ensure consistent use of terminology such as "planning proceeding", rather than "coordinating proceeding".

II. Draft legislative provisions on facilitating the cross-border insolvency of multinational enterprise groups

Chapter 1. General provisions

Article 1. Scope [*to be drafted*][1]

Principle 1 bis[2]

The principles that follow are each subject to two fundamental underpinning principles:

(a) The jurisdiction of the courts in the State in which the centre of main interests (COMI) of an enterprise group member is located remains unaffected; and

(b) The principles do not replace or interfere with any process or procedure (including any permission, consent or approval) required by the jurisdiction in which the COMI of an enterprise group member is located, in respect of that enterprise group member's participation [to any extent] in a group insolvency solution.

Principle 1

If required or requested to address the insolvency of an enterprise group member, insolvency proceedings may be commenced. When proceedings are not required or requested, there is no obligation to commence such proceedings.

[1] The material contained in the paragraphs 3 and 4 of the Introduction in A/CN.9/WG.V/WP.137 could be included in the scope provision.

[2] Principle 1bis is taken from A/CN.9/864, para. 14.

Article 2. Definitions[3]

For the purposes of these provisions:

(a) "Enterprise" means any entity, regardless of its legal form, that is engaged in economic activities and may be governed by the insolvency law;[4]

(b) "Enterprise group" means two or more enterprises that are interconnected by control or significant ownership;[5]

(c) "Control" means the capacity to determine, directly or indirectly, the operating and financial policies of an enterprise;[6]

(d) "Enterprise group member" means

Variant 1: [an enterprise referred to in subparagraph (a)];[7]

Variant 2: [an enterprise that has a separate legal identity and that is interconnected, by control or significant ownership, with one or more other enterprises];[8]

(e) "Group Representative" means

Variant 1: a person or body, [including one appointed on an interim basis], authorized to act as a representative of a proceeding commenced in this State in respect of an enterprise group member whose centre of main interests is located in this State and in which other group members are participating for the purpose of developing a group insolvency solution;[9]

Variant 2: [a person or body who is appointed pursuant to article B, paragraph 3 and who is responsible for seeking to develop a group insolvency solution];[10]

(f) "Group insolvency solution" means

Variant 1: [a set of proposals adopted in a planning proceeding:

(a) For the reorganization, sale, or liquidation of some or all of the operations or assets of more than one group member;

(b) That would be likely to add to the overall combined value of the group members involved; and

(c) That must be approved, insofar as the proposals relate to a particular group member, in the jurisdiction in which that group member has its centre of main interests];[11]

---

[3] The variants set forth below are suggested as a means of simplifying and clarifying the drafting of the various proposals that have been made. They are not intended to introduce new material for consideration.

[4] Use of this definition from the Legislative Guide, part three was agreed by the Working Group at its forty-fifth session (A/CN.9/803, para. 16). This definition and the definitions of "enterprise group" and "control" are included for the information of the Working Group; if not required in this text, they can be deleted at a later stage.

[5] Use of this definition from the Legislative Guide, part three was agreed by the Working Group at its forty-fifth session (A/CN.9/803, para. 16).

[6] This definition is found in the Legislative Guide, part three, glossary, para. 4(c).

[7] Variant 1 of subpara. (d) is taken from A/CN.9/WG.V/WP.128.

[8] Variant 2 of subpara. (d) is taken from Art. A, para. 1 as set forth in A/CN.9/864, para. 39. This variant repeats elements of the definitions of "enterprise" and "enterprise group" as those terms appear in part three of the Legislative Guide, which are included at subparas. (a) and (b). This definition might thus be revised in accordance with variant 1 or as "an enterprise that is a member of an enterprise group".

[9] Variant 1 of subpara. (e) is taken from A/CN.9/WG.V/WP.134.

[10] Variant 2 of subpara. (e) is taken from Art. A, para. 2 as set forth in A/CN.9/864, para. 39. This person need not necessarily be authorized to administer the assets etc. of the debtors with their COMI in the commencing State and an insolvency representative (IR) may be appointed in those proceedings.

[11] Variant 1 of subpara. (f) is taken from art. A, para. 3; subparagraph (c) is a substantive requirement covered by article E and thus may not need to be part of the definition.

Variant 2: [a proposal or set of proposals developed in a planning proceeding to enhance the overall combined value of two or more enterprise group members through the reorganization, sale, or liquidation of some or all of the operations or assets of those group members.][12]

(g) "Planning proceeding" means

Variant 1: a proceeding:

(a) That is a main proceeding for an enterprise group member that would be a necessary and integral part of a group insolvency solution;

(b) In which a group representative has been appointed;

(c) In which there is a reasonable prospect of developing a group insolvency solution; and

(d) In which one or more additional group members are participating for the purpose of attempting to develop a group insolvency solution.[13]

Variant 2: [a main proceeding commenced in respect of an enterprise group member that is[14] a necessary and integral part of a group insolvency solution, in which one or more additional group members are participating[15] for the purpose of developing a group insolvency solution and in which a group representative has been appointed.]

Chapter 2. Cooperation and coordination[16]

Article 9. Cooperation and direct communication between a court of this State and foreign courts or group representatives

1. [In the matters referred to in article 1,] the court shall cooperate to the maximum extent possible with foreign courts or group representatives, either directly or through a [*insert the title of a person or body administering a reorganization or liquidation under the law of the enacting State*] or other person appointed to act at the direction of the court to facilitate the development and implementation of a group insolvency solution.

2. The court is entitled to communicate directly with, or to request information or assistance directly from, foreign courts or group representatives concerning members of the same enterprise group [participating in a [planning proceeding] [group insolvency solution]] and in particular with respect to implementation of a group insolvency solution and the roles of the respective courts when such a solution is to be implemented.

Article 10. Cooperation to the maximum extent possible under article 9

Cooperation to the maximum extent possible for the purposes of article 9 may be implemented by any appropriate means, including:

(a) Communication of information by any means considered appropriate by the court;

---

[12] Variant 2 of subpara. (f) is a drafting proposal by the Secretariat.

[13] Variant 1 of subpara. (g) is taken from art. A, para. 4 as set forth in A/CN.9/864, para. 39.

[14] Variant 2 of subpara. (g) is a drafting proposal by the Secretariat. This variant provides that the group member "is" a "necessary and integral part" of the group insolvency solution, rather than using the phrase "would be" a necessary and integral part, which suggests an indeterminate time in the future.

[15] Although it may be more flexible to provide for future participation by group members by addition of the words "or are likely to participate", art. B, para. 3 currently requires that one or more additional group members be participating in the main proceeding before the group representative can be appointed.

[16] These articles of chapter 2 have been revised to take account of some elements of the regime proposed in chapters 3-4; further revisions may be required as those chapters are further developed to include, for example, foreign representatives of enterprise group members participating in a group insolvency solution in addition to the group representative. Such an addition might be relevant, in the context of the fact situation given above in para. 7 of A/CN.9/WG.V/WP.137 to include any insolvency representatives appointed to administer the liquidation or reorganization of debtors 3 and 4 in States B and C.

(b) Participation in communication with the foreign court or group representative;

(c) Coordination of the administration and supervision of the affairs of the enterprise group members participating in a [planning proceeding] [group insolvency solution];

(d) Coordination of concurrent foreign proceedings commenced with respect to enterprise group members participating in a [planning proceeding] [group insolvency solution];

(e) Appointment of a person or body to act at the direction of the court;

(f) Approval of the treatment of the claims of creditors of the enacting State in a foreign proceeding;[17]

(g) Approval of agreements concerning the coordination of proceedings to facilitate the implementation of a group insolvency solution;

(g) bis Cooperation among courts as to how to allocate and provide for the costs associated with cross-border cooperation and communication;[18] and

(h) [*The enacting State may wish to list additional forms or examples of cooperation*].

Article 11. *Deleted*

Article 12. Effect of communication under article 9[19]

Participation by a court in communication pursuant to article 9, paragraph 2 does not imply:

(a) A compromise or waiver by the court of any powers, responsibilities or authority;

(b) A substantive determination of any matter before the court;

(c) A waiver by any of the parties of any of their substantive or procedural rights;

(d) A diminution of the effect of any of the orders made by the court;

(e) Submission to the jurisdiction of other courts participating in the communication; or

(f) Any limitation, extension or enlargement of the jurisdiction of the participating courts. Each court is entitled at all times to exercise its independent jurisdiction and authority with respect to matters presented to it and the conduct of the parties appearing before it.

Article 13. Coordination of hearings

1. The court may conduct a hearing in coordination with a foreign court.

2. The substantive and procedural rights of parties and the jurisdiction of each court may be safeguarded by reaching agreement on the conditions to govern the coordinated hearings.

3. Notwithstanding the coordination of hearings, each court remains responsible for reaching its own decision on the matters before it.

Article 14. Cooperation and direct communication between [group representatives] and foreign courts

1. [In the matters referred to in article 1,] the [group representative] shall, in the exercise of its functions and subject to the supervision of the court, cooperate to the maximum extent possible with foreign courts and foreign representatives [of enterprise group members] to facilitate the development and implementation of a group insolvency solution.

---

[17] This subparagraph will need to be aligned with whatever decision is taken with respect to draft art. F, in particular the application of that article in circumstances where there is no planning proceeding.

[18] Subparagraph (g) bis has been added as suggested at the forty-eighth session: A/CN.9/864, para. 21(b).

[19] Support was expressed at the forty-eighth session (A/CN.9/864, para. 23) in favour of both deleting and retaining draft art. 12, but it was ultimately agreed that it should be retained in the text for further consideration.

2. The [group representative] is entitled, in the exercise of its functions and subject to the supervision of the court, to communicate directly with or to request information or assistance directly from foreign courts and foreign representatives.

Article 15. Cooperation to the maximum extent possible under article 14

For the purposes of article 14, cooperation to the maximum extent possible may be implemented by any appropriate means, including:

(a) Sharing and disclosure of information concerning enterprise group members participating in a [planning proceeding] [group insolvency solution], provided appropriate arrangements are made to protect confidential information;

(b) Negotiation of agreements concerning the coordination of proceedings to facilitate the implementation of a group insolvency solution;

(c) Allocation of responsibilities between the group representative and foreign representatives;

(d) Coordination of the administration and supervision of the affairs of the enterprise group members participating in a [planning proceeding] [group insolvency solution]; and

(e) Coordination with respect to the proposal and negotiation of [reorganization plans] [a group insolvency solution].

Article 17. Authority to enter into agreements concerning the coordination of proceedings

An agreement concerning the coordination of proceedings may be entered into to facilitate the implementation of a group insolvency solution.

Article 18. Appointment of a single [or the same] insolvency representative[20]

1. The court may coordinate with foreign courts with respect to the [appointment] [recognition] of a single [or the same] insolvency representative to [administer] [coordinate] insolvency proceedings concerning members of the same enterprise group in different States [where a group insolvency solution is being developed], provided that the insolvency representative is qualified for appointment in each of the relevant States.

2. To the extent required by applicable law, the insolvency representative is subject to the supervision of each appointing court.

[20] The intent of this article as originally drafted was to facilitate cooperation and coordination by appointing the same person as insolvency representative to all relevant group members in different States (provided that person was appropriately qualified) (see Legislative Guide, part three, chap. II, paras. 142-144). In the context of the regime proposed in chapters 3-4, however, this article might need to be revised or omitted, as a different approach is contemplated. Chapter 3 provides for appointment in the State of the COMI of one or more group members (in the fact situation provided in para. 7 of A/CN.9/WG.V/WP.137, debtors 1 and 2 in State A) of a group representative that can represent the State A proceedings in other States as required for the purposes of developing a group insolvency solution. It is not contemplated that foreign courts would cooperate with the court of State A in making that appointment, as the group representative represents only the proceedings in State A. That person, or another person, may be appointed to administer the reorganization or liquidation of debtors 1 and 2 in State A; that issue is not addressed by the provisions in chapter 3. For the purposes of developing a group insolvency solution, the group representative appointed in State A may not need to be appointed in other States provided the substance of chapters 3-4 is available, i.e. recognition, participation, standing, relief and so forth. Cooperation and coordination between the courts, other insolvency representatives and the group representative is addressed in the other articles of this chapter.

Chapter 3. Facilitating the development and recognition of a group insolvency solution

A. Provisions relevant to a State in which a planning proceeding commences (i.e. State A concerning debtors 1 and 2)

Article B. Participation by enterprise group members in an insolvency proceeding in this State; appointment of a group representative[21]

1. Subject to paragraph 2, if an insolvency proceeding has commenced in this State for an enterprise group member whose centre of main interests is located in this State, any other group member (whether solvent or insolvent)[22] may participate in that proceeding for the purpose of attempting to develop a group insolvency solution.

2. An insolvent enterprise group member whose centre of main interests is in another State may not participate in a proceeding under paragraph 1 if a court in that other State precludes it from so doing.[23]

3. *Variant 1*: If one or more enterprise group members participate in a proceeding under paragraph 1, the court may appoint a group representative, who may then seek recognition from foreign courts and may seek to participate in any foreign proceeding related to a participating group member.[24]

Variant 2: If one or more enterprise group members participate in a proceeding referred to in paragraph 1 of this article, the court may appoint a group representative. The group representative is authorized to act in a foreign State on behalf of that proceeding and to participate in any foreign proceeding relating to the enterprise group members participating in the [group insolvency solution] [planning proceeding], as permitted by the applicable foreign law.[25]

Principle 4, paragraph 2

The court can receive a request for recognition of the type referred to in paragraph 1 of this principle.[26]

---

[21] Art. B, para. 1 gives effect to Principles 2, 3 and 5. Principle 2: "When it is proposed that a group insolvency solution be developed for some or all of the members of an enterprise group, that solution will require coordination as between group members and may be developed through a planning proceeding.";
Principle 3: "Adopting the approach of recommendation 250, enterprise group members might designate one of the insolvency proceedings commenced (or to be commenced) with respect to group members participating in the group solution to function as a coordinating proceeding, the role of which would be exclusively procedural, rather than substantive. A proviso might be that a coordinating proceeding should be a proceeding taking place in a State that is the COMI of at least one of the enterprise group members that is a necessary and integral part of the enterprise group solution."; and
Principle 5, sentences 1 and 3: "1. Participation in the coordination process would be voluntary for those group members whose COMI is located in a jurisdiction different to that of the planning proceeding.
3. Solvent members of the enterprise group may participate in a coordination process without such participation implying a submission to the jurisdiction of a domestic or foreign insolvency court or to the applicability of domestic or foreign insolvency laws." (see art. 10 of the Model Law).

[22] The use of the word "insolvent" should be understood as distinguishing those group members that may be subject to insolvency proceedings in accordance with recommendations 15 and 16 of the Legislative Guide, from those group members not so subject that may be described as "solvent". See footnote 4 of A/CN.9/WG.V/WP.137. See also Legislative Guide, part three, rec. 238, which stresses the voluntary nature of participation by solvent group members.

[23] Para. 2 is taken from art. B, para. 2 as set forth in A/CN.9/864, para. 41. See footnote 15 of A/CN.9/WG.V/WP.137 on possibility of using permissive language in this draft para.

[24] Variant 1 of para. 3 is taken from art. B, para. 3 as set forth in A/CN.9/864, para. 41.

[25] Variant 2 of para. 3 is a drafting proposal by the Secretariat that seeks to clarify the different elements of variant 1, drawing upon art. 5 of the Model Law.

[26] See principle 4, para. 1 below.

Principle 5, sentence 2

For those group members whose COMI is located in the same jurisdiction as the planning proceeding, the recommendations of part three of the Legislative Guide on Insolvency Law with respect to joint application and procedural coordination could apply.

Article D. Relief available to a planning proceeding in this State

2. To the extent needed to preserve the possibility of developing a group insolvency solution, the court may, at the request of the group representative, grant the following relief with respect to the assets or operations of any insolvent enterprise group member that is participating in the planning proceeding in this State:[27]

(a) Staying execution against the enterprise group member's assets;

(b) Suspending the right to transfer, encumber, or otherwise dispose of any assets of the enterprise group member;

(c) Suspending the proceedings[28] temporarily to allow for the development of a group insolvency solution;

(d) Staying the commencement or continuation of individual actions or individual proceedings concerning the enterprise group member's assets, rights, obligations, or liabilities;

(e) Entrusting the administration or realization of all or part of the enterprise group member's assets located in this State to the group representative or another person designated by the court, in order to protect and preserve the value of assets that, by their nature or because of other circumstances, are perishable, susceptible to devaluation, or otherwise in jeopardy;

(f) Providing for the examination of witnesses, the taking of evidence, or the delivery of information concerning the enterprise group member's assets, affairs, rights, obligations, or liabilities; and

(g) Granting any additional relief that may be available to [*insert the title of a person or body administering a reorganization or liquidation under the law of the enacting State*] under the laws of this State.

B. Provisions relevant to a State in which recognition of a planning proceeding is sought

Article 3. Recognition of a planning proceeding

1. A group representative appointed in a planning proceeding may apply for recognition of that proceeding [in this State].[29]

2. An application for recognition shall be accompanied by:

(a) A certified copy of the decision commencing the planning proceeding and appointing the group representative; or

(b) A certificate from the foreign court affirming the existence of the planning proceeding and of the appointment of the group representative; or

---

[27] See footnote 19 of A/CN.9/WG.V/WP.137. As currently drafted, the scope of this draft article is unclear. The chapeau appears to refer to the State in which the planning proceeding is taking place and it has thus been included in the category A provisions. It may also be relevant to the category B provisions. In that case, revision of the drafting might clarify that point and arts. D, 6 and 7 will need to be rationalized to avoid repetition and overlap.

[28] It may be desirable to add further language to clarify which proceeding subpara. 2(c) refers to — the planning proceeding or other proceedings that might be taking place in the State with respect to participating foreign debtors (e.g. for debtors 3 and 4 in State A).

[29] Para. 1 of art. 3 incorporates art. C as set forth in A/CN.9/864, para. 43.

(c) In the absence of evidence referred to in subparagraphs (a) and (b), any other evidence acceptable to the court of the existence of the foreign proceeding and of the appointment of the group representative.

3. An application for recognition shall also be accompanied by:[30]

(a) *Variant 1*: Evidence that [each group member sought to be represented in [a foreign proceeding] [a group insolvency solution]] has agreed to participate in that [proceeding] [solution]. Where such a group member is subject to insolvency proceedings[31] in the court of its centre of main interests, evidence shall be procured that any approval which may be required under the domestic law of the State of the commencement of proceedings for the participation in the [foreign proceeding] [proposed enterprise group insolvency solution] has been obtained;

(a) *Variant 2*: Evidence that an insolvent enterprise group member participating in the [planning proceeding] [foreign proceeding] whose centre of main interests is not in the State in which the planning proceeding commenced has [obtained permission to participate] [not been precluded from participating] in that proceeding in accordance with article B, paragraph 2;

[(b) A statement identifying all members of the enterprise group and all proceedings commenced in respect of enterprise group members participating in the [group insolvency solution] [planning proceeding] that are known to the group representative.][32]

4. The court may require a translation of documents supplied in support of the application for recognition into an official language of this State.

Principle 4, paragraph 1

The court located in the COMI (the COMI court) of an enterprise group member participating in a group insolvency solution can authorize the insolvency representative appointed in insolvency proceedings taking place in the COMI to seek:

(i) To participate and be heard in a planning proceeding taking place in another jurisdiction; and

(ii) Recognition by the court of the proceeding in the COMI jurisdiction.

Article 6. Relief that may be granted upon application for recognition of a foreign proceeding

1. From the time of filing an application for recognition until the application is decided upon, the court may, at the request of the group representative, where relief is urgently needed to protect the assets of the enterprise group member subject to a [foreign proceeding] [planning proceeding] or the interests of the creditors, grant appropriate relief of a provisional nature, including:

(a) Staying execution against the enterprise group member's assets;

(b) Staying the commencement or continuation of insolvency proceedings in this State with respect to the enterprise group member;

(c) Entrusting the administration of all or part of the enterprise group member's assets located in this State to the group representative or another person designated by the

---

[30] Variant 1 of subpara. 3 (a) reflects drafting suggestions made at the forty-eighth session (A/CN.9/864, para. 33(a)). Variant 2 of subpara. 3 (a) has been prepared by the Secretariat. Subpara. 3 (a) may not be required on the basis that a group representative cannot be appointed in a planning proceeding unless group members have been permitted to participate in that proceeding in accordance with art. B, para. 2. In other words, the court appointing the group representative has already considered the question of permission. Thus, all that may be required for recognition is that the group representative satisfies the other requirements of art. 3, paras. 2, 3 and 4.

[31] The words "subject to insolvency proceedings" are used throughout the Legislative Guide, part three to refer to those group members for which insolvency proceedings have commenced.

[32] Subpara. 3 (b) includes drafting suggestions made at the forty-eighth session (A/CN.9/864, para. 33(d)).

court, in order to protect and preserve the value of assets that, by their nature or because of other circumstances, are perishable, susceptible to devaluation or otherwise in jeopardy;

[(c) bis Entrusting the realization of all or part of the enterprise group member's assets located in this State to the group representative or another person designated by the court in order to protect and preserve the value of assets that, by their nature or because of other circumstances, are perishable, susceptible to devaluation or otherwise in jeopardy];

(d) Recognizing existing arrangements concerning the funding of enterprise group members participating in the [group insolvency solution] [planning proceeding] where the funding entity is located in this State and authorizing the continued provision of finance under those funding arrangements[, subject to any appropriate safeguards the court may apply].[33]

(e) Deleted.[34]

2. [*Insert provisions of the enacting State relating to notice*.]

3. Unless extended under article 7, subparagraph 1 (g), the relief granted under this article terminates when the application for recognition is decided upon.

4. The court may refuse to grant relief under this article if such relief would interfere with the administration of a [group insolvency solution] [planning proceeding] [proceeding located in the COMI of an enterprise group member participating in the group insolvency solution].[35]

Article 5. Decision to recognize a planning proceeding

1. [Subject to any applicable public policy exception,] a planning proceeding shall be recognized if:

(a) and (b) Deleted;

(c) The application meets the requirements of [article 3, paragraphs ...] [is a planning proceeding within the meaning of article 2, paragraph (g)];[36]

(d) The application has been submitted to the court referred to in article ...;

(e) Deleted;

[(f) The foreign proceeding was commenced on the basis of the centre of main interests or establishment of the foreign group member or (if permissible under the laws of the enacting State) any other basis, including the presence of assets of the foreign group member or voluntary submission by the foreign group member to the jurisdiction of the court of the foreign State].[37]

(g), (h) and (i) Deleted.[38]

---

[33] The additional text at the end of subpara. 1(d) was suggested at the forty-eighth session (A/CN.9/864, para. 36(c)). If the Working Group decides to retain art. 8 as drafted, para. 2 of that article would obviate the need to include those additional words in art. 6, subpara. 1(d). In principle support for including a provision of this nature on post commencement finance was expressed at the forty-fifth and forth-sixth sessions (A/CN.9/803, para. 30 and A/CN.9/829, para. 49 respectively). As drafted, subpara. 1(d) would apply both to post-application and post-commencement finance. This provision might need to be aligned with draft art. 7, para. (h).

[34] Subpara. 1(e) has been deleted following agreement at the forty-eighth session (A/CN.9/864, para. 36(d)).

[35] The additional text at the end of art. 6, para. 4 was suggested at the forth-eighth session (A/CN.9/864, para. 36(e)).

[36] Art. 5, para. 1 (c) incorporates art. C.

[37] It was acknowledged at the forty-eighth session that the drafting of subpara. 1(f) gave rise to numerous concerns (A/CN.9/864, para. 35) and thus required further consideration. It has been retained in the revised draft text only to remind the Working Group of the need to discuss the issue of whether to depart in this draft text from the Model Law approach of recognizing proceedings only on the basis of COMI or establishment.

[38] Although there was agreement at the forty-eighth session to retain subparas. 1(g) and (h), they have been deleted from the revised draft text, as they repeated elements of the definition of "planning proceeding". Para. (i) has been deleted following a suggestion at the forty-eighth session (A/CN.9/864, para. 34(b)).

2. An application for recognition of a [foreign proceeding] [planning proceeding] shall be decided upon at the earliest possible time.

3. Recognition may be modified or terminated if it is shown that the grounds for granting it were fully or partially lacking or have ceased to exist.

4. For the purposes of paragraph 3, the group representative shall inform the court of changes in the status of the [group insolvency solution] [planning proceeding] or in the status of their own appointment occurring after the application for recognition is made.

Article 7. Relief that may be granted upon recognition of a planning proceeding

1. Upon recognition of a planning proceeding, where necessary to protect the assets of the enterprise group member[39] or the interests of creditors and to facilitate the development of a group insolvency solution, the court may, at the request of the group representative, grant any appropriate relief, including:

(a) Staying the commencement or continuation of individual actions or individual proceedings concerning the assets, rights, obligations or liabilities of the enterprise group member;[40]

(b) Staying the commencement or continuation of insolvency proceedings in this State with respect to the enterprise group member;

(c) Staying execution against the assets of the enterprise group member;

(d) Suspending the right to transfer, encumber or otherwise dispose of any assets of the enterprise group member, except where authorized by the court;

(e) Entrusting the administration of all or part of the assets of the enterprise group member located in this State to the group representative or another person designated by the court;

[(e) bis Entrusting the realization of all or part of the assets of the enterprise group member located in this State to the group representative or another person designated by the court;]

(f) Providing for the examination of witnesses, the taking of evidence or the delivery of information concerning the assets, affairs, rights, obligations or liabilities of the enterprise group member;

(g) Extending any provisional relief granted;

(h) [When a group member located in this State is providing funding to other group members and is participating in the [group insolvency solution] [planning proceeding]], and [where permitted by relevant laws [of the receiving State]], recognizing existing arrangements concerning the funding of enterprise group members participating in the [group insolvency solution] [planning proceeding] and authorizing the continued provision of finance under those funding arrangements;[41]

(i) Subject to article 8, approving treatment in the foreign proceeding of the claims of creditors located in this State;[42] or

(j) Granting any additional relief that may be available to [*insert the title of a person or body administering a reorganization or liquidation under the law of the enacting State*] under the laws of this State.

---

[39] The drafting of some elements of art. 7 might need to specify which group members are being referred to — those in respect of which the planning proceeding commenced (i.e. that have their COMI in the State in which the planning proceeding commenced) or those participating in the planning proceeding that might have their COMI in the receiving State or both in some circumstances. Cf. art. 7, para. 2 and use of the words "in this State", also see footnote 27 above and footnote 19 of A/CN.9/WG.V/WP.137 relating to art. D, para. 2.

[40] It might be noted that art.7, subparas. 1 (a) and (b) overlap with draft art. H, para. 1.

[41] Additional language in art. 7, subpara. 1 (h) was agreed at the forty-eighth session (A/CN.9/864, para. 37(b)). This subpara. and art. 6, subpara. 1 (d) might need to be aligned.

[42] Art. 7, subpara. 1 (i) may need to be aligned to art. F, para. 1 and art. G, para. 1 noting that those articles are intended to apply irrespective of whether or not there is a planning proceeding.

2. Upon recognition of a planning proceeding the court may, at the request of the group representative, entrust the distribution of all or part of the assets of the enterprise group member located in this State to the group representative or another person designated by the court, provided that the court is satisfied that the interests of creditors in this State are adequately protected.

Article D. Participation of a group representative in a proceeding in this State

1. Upon recognition of a planning proceeding, the group representative may participate in any proceedings[43] in this State concerning enterprise group members that are participating in the planning proceeding.

Article 8. Protection of creditors and other interested persons[44]

1. In granting or denying relief under article 6 or 7, or in modifying or terminating relief under paragraph 3 of this article, the court must be satisfied that the interests of the creditors and other interested persons, including the debtor, are adequately protected.

2. The court may subject relief granted under article 6 or 7 to conditions it considers appropriate.

3. The court may, at the request of the group representative or a person affected by relief granted under article 6 or 7, or at its own motion, modify or terminate such relief.

Article E. Approval of local elements of a group insolvency solution[45]

1. If a proposed group insolvency solution is developed in the planning proceeding, and the group representative submits to the court in this State[46]

Variant 1: the portion of the group insolvency solution affecting an insolvent group member whose centre of main interests [or establishment][47] is in this State, the court shall submit the relevant portion of the group insolvency solution to the approval process in [*refer to the relevant provisions in domestic insolvency law*].[48]

Variant 2: that group insolvency solution, the court shall submit the relevant portion of the group insolvency solution affecting an insolvent group member whose centre of main interests [or establishment] is in this State to the approval process in [*refer to the relevant provisions in domestic insolvency law*].[49]

2. If the approval process [pursuant to] [referred to in] paragraph 1 results in approval of the portion of the group insolvency solution affecting the enterprise group member, the court shall confirm and implement those elements relating to assets or operations in this State.

---

[43] Are the proceedings referred to in this para. only insolvency proceedings? If so, the words "[*identify the laws of the enacting State relating to insolvency*]" might be added.

[44] There was general support at the forty-eighth session for inclusion of an article along the lines of art. 8 as drafted. The Working Group may wish to note that art. 8 may overlap with other articles, including art. H, para. 2.

[45] Art. E, para. 1 gives effect to principle 6: "Creditors and stakeholders of each enterprise group member participating in the group solution would vote in their own jurisdiction on the treatment they are to receive under the group reorganization plan according to the applicable domestic law." Art. E, para. 2 gives effect to principle 7: "Following approval of the group reorganization plan by relevant creditors and stakeholders, each COMI court would have jurisdiction to deal with the group reorganization plan in accordance with domestic law."

[46] The Working Group may wish to consider whether this article should clarify whether recognition of the planning proceeding is required for submission of the group insolvency solution to the foreign court.

[47] The reference to "establishment" is included in art. E (paras. 1 and 2) in accordance with a suggestion made at the forty-eighth session (A/CN.9/864, para. 48(b)).

[48] Variant 1 reflects art. E as proposed at the forty-eighth session (A/CN.9/864, para. 47).

[49] Variant 2 gives effect to the proposal at the forty-eighth session (A/CN.9/864, para. 48(a)) that the whole of the group insolvency solution should be submitted to the court, with the approval process applying only to the relevant local elements.

Principle 8

The insolvency representative appointed in the proceeding designated as the planning proceeding is entitled to apply directly to a court in this State to be heard on issues related to implementation of the group insolvency solution.

Chapter 4. Treatment of foreign claims in accordance with applicable law[50]

Article F. Commitment to and approval of the treatment of foreign claims in accordance with applicable law: non-main proceedings

1. To facilitate the treatment of claims that could otherwise be brought by creditors in a non-main proceeding in another State, a foreign representative or group representative appointed in this State may commit to, and the court in this State may approve, providing those creditors with the treatment in this State that they would have received in a non-main proceeding in that other State.

2. A court in this State may stay or decline to open a non-main proceeding if a foreign representative or group representative from another State in which a main proceeding is pending has made a commitment under paragraph 1.

Chapter 5. Supplemental provisions[51]

Article G. Commitment to and approval of the treatment of foreign claims in accordance with applicable law: main proceedings

1. To facilitate the treatment of claims that would otherwise be brought by creditors in a proceeding in another State, a foreign representative or group representative appointed in this State may commit to, and the court in this State may approve, providing those creditors with the treatment in this State that they would have received in a proceeding in that other State.

2. A court in this State may stay or decline to open a main proceeding if a foreign representative or group representative from another State in which a proceeding is pending has made a commitment under paragraph 1.

Article H. Additional relief

1. If, upon recognition of a planning proceeding, the court is satisfied that the interests of creditors of affected enterprise group members would be adequately protected in the planning proceeding, the court, in addition to granting any relief described in article D, may

---

[50] The provisions as set out in arts. F and G are not limited to cases where a group solution is being developed through a planning proceeding. Article F is part of the core provisions; article G is part of the supplemental provisions. They are presented as originally proposed at the forty-eighth session (A/CN.9/864, para. 49). However, a proposal made at the forty-eighth session to redraft the provisions (A/CN.9/864, para. 50) would result in the following, with art. F being based on the first paras. of arts. F and G. Whether the two paras. of art. G, as revised, should be considered to be core or supplemental provisions may, as noted, require further consideration:

"*Article F*.

"A foreign representative or group representative appointed [in this State] may commit to, and the court [in this State] may approve, providing creditors with claims that could otherwise be brought in a proceeding in another State with the treatment in this State that they would have received had a proceeding commenced in that other State."

"*Article G*.

"1. A court in this State may stay or decline to open a non-main proceeding if a foreign representative or group representative from another State in which a main proceeding is pending has made a commitment under article F.

"2. A court in this State may stay or decline to open a main proceeding if a foreign representative or group representative from another State in which a proceeding is pending has made a commitment under article F."

[51] As noted above in the introduction to A/CN.9/WG.V/WP.137, articles G and H are supplemental components, which would be additional options for a State to enact, and would go a step further than the core provisions.

stay or decline to open insolvency proceedings in this State relating to enterprise group members participating in the planning proceeding.[52]

2. Notwithstanding article E, paragraph 1, if, upon submission of a proposed group insolvency solution by the group representative, the court is satisfied that the interests of creditors of the affected enterprise group member are adequately protected in the planning proceeding, the court may approve the relevant portion of the group insolvency solution and grant any relief described in article D that is necessary for implementation of the group insolvency solution.

[52] The type of additional relief referred to in art. H, para. 1 is potentially covered by art. 7, subparas. 1 (a) and (b), albeit available at a different time of the proceedings. The two articles may need to be aligned. Relief to support the group insolvency solution may come too late to be meaningful if it is only available following submission of that group solution for approval.

G. Note by the Secretariat on insolvency law: cross-border recognition and enforcement of insolvency-related judgements

(A/CN.9/WG.V/WP.138)

[Original: English]

Contents

Introduction

1. At its forty-seventh session (2014), the Commission gave Working Group V (Insolvency Law) a mandate to develop a model law or model legislative provisions to provide for the recognition and enforcement of insolvency-related judgements.

2. At its forty-sixth session in December 2014, Working Group V (Insolvency Law) considered a number of issues relevant to the development of a legislative text on the recognition and enforcement of insolvency-related judgements, including the types of judgements that might be covered, procedures for recognition and grounds to refuse recognition. The Working Group agreed that the text should be developed as a stand-alone instrument, rather than forming part of the UNCITRAL Model Law on Cross-Border Insolvency (the Model Law), but that the Model Law provided an appropriate context for the new instrument.

3. At its forty-seventh session, the Working Group considered the first draft of a model law to be given effect through enactment by a State (A/CN.9/WG.V/WP.130). The content

and structure of the draft text drew upon the Model Law, as suggested by the Working Group at its forty-sixth session (A/CN.9/829, para. 63) and sought to give effect to the conclusions of the Working Group at its forty-sixth session relating to the types of judgement to be included (A/CN.9/829, paras. 54 to 58), procedures for obtaining recognition and enforcement (A/CN.9/829, paras. 65 to 67) and the grounds for refusal of recognition (A/CN.9/829, paras. 68 to 71).

4. At its forty-seventh session, the Working Group had a preliminary exchange of views on draft articles 1 to 10 of the text and made a number of proposals with respect to the drafting (A/CN.9/835, paras. 47-69); draft articles 11 and 12 of that text were not reached due to lack of time and are included in this note as draft articles 12 and 13.

5. At its forty-eighth session, the Working Group considered a revised version of the draft text, which reflected the decisions and proposals made at the forty-seventh session (A/CN.9/WG.V/WP.135). The following text reflects the proposals and decisions made at the forty-eighth session (A/CN.9/864, paras. 54-87). Notes to the draft articles are set forth in footnotes.

Draft model law on the recognition and enforcement of insolvency-related judgements

Article 1. Scope of application[1]

Variant 1

1. This Law applies where:

(a) Recognition and enforcement of an insolvency-related judgement is sought in this State by a foreign representative or other person entitled to seek enforcement of such a judgement in connection with a foreign proceeding; or

(b) *Variant 1* [Recognition and enforcement of an insolvency-related judgement is sought in a foreign State in connection with a proceeding under the law of this State.]

(b) *Variant 2* [Authorization to seek [recognition and] enforcement of an insolvency-related judgement in a foreign State [is [requested] [required]].[2]

2. This Law does not apply to [...].

Variant 3

1. [This Law applies to the recognition and enforcement of an insolvency-related judgement issued in a proceeding taking place in a State that is different to the State of execution.]

2. This Law does not apply to [...].

Article 2. Definitions

For the purposes of this Law:

(a) "Foreign proceeding" means a collective judicial or administrative proceeding [in a foreign State,] including an interim proceeding, pursuant to a law relating to insolvency in which [proceeding] the assets and affairs of a debtor are or were subject to control or supervision by [a foreign] court for the purpose of reorganization or liquidation;

(b) "Foreign representative" means a person or body, including one appointed on an interim basis, authorized in a foreign proceeding to administer the reorganization or the

[1] Variants 1 and 3 of draft art. 1 have been retained in accordance with a decision at the forty-eighth session (A/CN.9/864, para. 58). The text proposed at the forty-eighth session (A/CN.9/864, para. 56) for addition to draft art. 1 appears below as art. 3 bis. The second text proposed at the forty-eighth session (A/CN.9/864, para. 59) for addition to draft art. 1 appears below as art. 3 ter.

[2] Variant 2 of draft art. 1, para. (b) is based on the heading of draft art. 5 of this text as proposed at the forty-eighth session (A/CN.9/864, para. 60). Draft art. 5, which repeats art. 5 of the Model Law, provides the necessary authorization, should it be required.

liquidation of the debtor's assets or affairs or to act as a representative of the foreign proceeding;

(c) "Judgement" means

Variant 1[3] any judicial or administrative decision, whatever it may be called, including a decree or order, a determination of costs and expenses provided that the determination related to a judicial or administrative decision, and any decision ordering [provisional] [or] [protective [and conservatory]] measures.

Variant 2 [any decision, whatever it may be called, issued by a court or administrative authority, provided an administrative decision has the same effect as a decision issued by a court. For the purposes of this definition, a decision includes a decree or order, and a determination of costs and expenses by the court [provided that the determination relates to a decision that may be recognized or enforced under this Law,] and any decision ordering [provisional] [or] [protective [and conservatory]] measures].

(d) "Insolvency-related judgement" means [a judgement that is closely related to a foreign proceeding and was issued after the commencement of that proceeding. A judgement is presumed to be "closely related to a foreign proceeding" if it has an effect upon the insolvency estate[4] of the debtor and either is based on a law relating to insolvency or, due to the nature of its underlying claims, would not have been issued without the commencement of the foreign proceeding.

An insolvency-related judgement would include any equitable relief, including the establishment of a constructive trust, provided in that judgement or required for its enforcement. Insolvency-related judgements may include, [inter alia,] judgements concerning any of the following matters:][5]

(i) Turnover of property of an insolvency estate;

(ii) Sums and assets due to an insolvency estate [pursuant to an obligation arising after the commencement of the foreign proceeding];[6]

(iii) Sale of assets by an insolvency estate;

(iv) Requirements for accounting related to a foreign proceeding;

---

[3] Variant 1 of draft art. 2, para. (c) remains as drafted in A/CN.9/WG.V/WP.135. Variant 2 of para. (c) includes an additional phrase in square brackets that has been added to address the concern expressed about the inclusion of administrative decisions unless they have the same effect as a judicial decision (A/CN.9/864, paras. 62-63). The concern with respect to effect and enforceability of a judgement in the State in which it was issued is addressed in draft art. 10 bis. Administrative decisions were included in para. (c) for the same reason as administrative authorities were included in the Model Law i.e. that in some States, administrative authorities, rather than the courts, are competent to control or supervise a foreign proceeding. Accordingly, omitting any reference to such authorities or the decisions they issue might create a gap for some States (see A/CN.9/835, para. 56). Variant 2 also includes additional language (the proviso in the second sentence) to reflect changes made to the definition of the term "judgement" in the draft text emanating from the fifth session (October 2015) of the Hague Conference on Private International Law's working group on the judgements project (art. 3, subpara. 1(b)) (available from www.hcch.net/en/projects/legislative-projects/judgments/recent-developments). Reference to the decision being made "on the merits" (language that is included in the Hague draft) has not been included in para. (c); it was not initially included in the definition contained in the first draft of the instrument (A/CN.9/WG.V/WP.130), but was an element of the chapeau of draft
art. 9 relating to recognition and enforcement, which should take place "without review of the merits of the judgement". Those words have been deleted in accordance with a proposal at the forty-eighth session (A/CN.9/864, para. 76) to simplify the chapeau of art. 9. References to provisional measures are retained in both variants for further consideration (note art. 7 bis).

[4] "Insolvency estate" is defined in the Legislative Guide, Introduction, para. 12 (t) as meaning: "assets of the debtor that are subject to the insolvency proceedings."

[5] Variant 1 of the chapeau of draft art. 2, para. (d) as set forth in A/CN.9/WG.V/WP.135 has been retained; variant 2 has been deleted (A/CN.9/864, para. 69).

[6] Draft art. 2, subpara. (d) (ii) has been revised in accordance with A/CN.9/864, paras. 67, 69. The draft language in square brackets reflects a proposal to limit the article to cover only post-commencement obligations, rather than pre- and post-commencement obligations. The Working Group agreed that proposal required further consideration (A/CN.9/864, para. 65).

(v) Overturn of transactions involving the debtor or assets of an insolvency estate that have had the effect of either reducing the value of the estate or upsetting the principle of equitable treatment of creditors;[7]

(vi) Modification or enforcement of a stay of actions in a foreign proceeding;[8]

(vii) Validity [and effectiveness] of a secured claim;[9]

(viii) A cause of action pursued by a creditor with approval of the court,[10] based on [an insolvency] [a foreign] representative's decision not to pursue that cause of action [where any judgement arising from that action would otherwise be enforceable under this Law];[11]

(ix) Liability of a director in the period approaching insolvency [that could be pursued by or on behalf of an insolvency estate];[12]

(x) Confirmation of a plan of reorganization or liquidation or approval of a [composition] [voluntary restructuring agreement] [in a foreign proceeding];

(xi) The discharge of a particular debt;

(xii) Recognition of the discharge of a debtor;[13] and

(xiii) [A cause of action [related to insolvency] pursued by a party to whom it has been assigned by a foreign representative in accordance with the applicable law] [where any judgement arising from that action would otherwise be enforceable under this Law].

(e) "Foreign court" means a judicial or other authority competent to control or supervise a foreign proceeding;

(f) "Proceeding" means procedures and hearings before a court or administrative authority that performs a judicial function.[14]

[Article 3. International obligations of this State[15]

To the extent that this Law conflicts with an obligation of this State arising out of any treaty or other form of agreement to which it is a party with one or more other States, the requirements of the treaty or agreement prevail.]

[Article 3 bis. International obligations of this State[16]

---

[7] Draft art. 2, subpara. (d) (v) reflects variant 1 as set forth in A/CN.9/WG.V/WP.135; variant 2 has been deleted (A/CN.9/864, para. 69).

[8] Draft 2, subpara. (d) (vi) was noted as raising the same issues as the references to provisional measures (see A/CN.9/864, para. 68 and the last sentence of footnote 3 above).

[9] The language in square brackets added to draft art. 2, subpara. (d) (vii) responds to a suggestion made at the forty-eighth session (A/CN.9/864, para. 68) and more accurately reflects the terminology of the UNCITRAL Legislative Guide on Secured Transactions, making it clear that effectiveness between parties and against third parties is covered. A reference to the relevant chapters of the Legislative Guide on Secured Transactions — Ch II, paras. 1-71 and Ch. III, paras. 1-74 — will be included in a footnote to the final text.

[10] It may be appropriate to add language clarifying which court is being referred to e.g. the foreign court in which the foreign insolvency proceeding commenced.

[11] The additional language in square brackets in draft art. 2, subparas. (d) (viii) and (xiii) reflects proposals made at the forty-eighth session (A/CN.9/864, para. 68) to qualify the otherwise broad language of these subparas. Subpara. (d) (xiv) has been deleted (A/CN.9/864, para. 69).

[12] The additional language in square brackets in draft art. 2, subpara. (d) (ix) reflects a proposal made at the forty-eighth session (A/CN.9/864, paras. 68, 69).

[13] Draft art. 2, subparas. (d) (x)-(xii) remain for further consideration; in response to a suggestion at the forty-eighth session that they should be deleted because they were covered by the Model Law, it was suggested that there may be situations in which they are not so covered (A/CN.9/864, para. 68).

[14] The definition in draft art. 2, para. (f) is based on variant 3 of A/CN.9/WG.V/WP.135; variants 1 and 2 have been deleted. Additional definitions in draft art. 2, paras. (g) "recognition" and (h) "enforcement" have also been deleted (see A/CN.9/864, para. 70).

[15] Draft art. 3 repeats art. 3 of the Model Law; the Working Group agreed to retain arts. 3-7 of the Model Law in this text (A/CN.9/864, para. 71).

[16] Draft art. 3 bis was proposed at the forty-eighth session of the Working Group (A/CN.9/864, para. 56). The words "insolvency-related" have been added to limit the application of the article to the specific subject matter of the draft text.

1. This [Law] shall not apply to an insolvency-related judgement where there is a treaty [in force] concerning the recognition or enforcement of civil and commercial judgments (whether concluded before or after [this Law] comes into force), and that treaty applies to the insolvency-related judgement.

2. An insolvency-related judgement is to be treated for the purposes of paragraph 1 of this article as falling within the class of judgments to which a treaty applies:

(a) Even where the particular insolvency-related judgement is not enforceable under the treaty because of the particular circumstances of the case; and

(b) Whether or not the State has adopted the treaty.]

[Article 3ter. Conflict between the law of this State and the law of the State in which the insolvency-related judgement was issued[17]

In the event of a conflict between the application of this Law and the law of the State where the insolvency-related judgement was issued, the provisions of this Law prevail.]

Article 4. Competent court or authority[18]

The functions referred to in this Law relating to recognition and enforcement of insolvency-related judgements shall be performed by [*specify the court, courts, authority or authorities competent to perform those functions in the enacting State*].

Article 5. Authorization to seek enforcement of an insolvency-related judgement in a foreign State

A [*insert the title of the person or body administering a reorganization or liquidation under the law of the enacting State*] is authorized to act in a foreign State on behalf of a proceeding under [*identify laws of the enacting State relating to insolvency*], as permitted by the applicable foreign law.

Article 6. Additional assistance under other laws

Nothing in this Law limits the power of a court or a [*insert the title of the person or body administering a reorganization or liquidation under the law of the enacting State*] to provide additional assistance to a foreign representative under other laws of this State.

[Article 6 bis. Public policy exception[19]

Nothing in this Law prevents the court from refusing to take an action governed by this Law if the action would be manifestly contrary to public policy [or] [including] the fundamental principles of procedural fairness of this State.]

Article 7. Interpretation

In the interpretation of this Law, regard is to be had to its international origin and to the need to promote uniformity in its application and the observance of good faith.

[Article 7 bis. Effect and enforceability of an insolvency-related judgement in the State in which it was issued[20]

---

[17] Draft art. 3 ter was proposed at the forty-eighth session (A/CN.9/864, para. 59) to address concerns relating to the effect of draft art. 1, subpara. 1(b).

[18] Draft art. 4, which is based on art. 4 of the Model Law, has been revised for consistency with the subject matter of this draft instrument. The footnote to art. 4 of the Model Law has been omitted.

[19] Draft art. 6 bis has been added in accordance with a proposal at the forty-eighth session (A/CN.9/864, paras. 77, 81) and replaces draft arts. 9, para. (f) and 10, paras. (d) and (e), which have been deleted in this version. Although the draft is reproduced as proposed, it may be appropriate to delete the word "or" and retain the word "including" to clarify that fundamental principles of procedural fairness can be considered as part of public policy.

[20] The addition of draft art. 7 bis was suggested at the forty-eighth session to address the issue of finality of a judgement and the inclusion of administrative decisions and provisional measures under draft art. 2, para. (c) (A/CN.9/864, paras. 62-65). It is based on art. 4, para. 3 of the text emanating from the fifth meeting (October 2015) of the Hague Conference on Private International

An insolvency-related judgement shall be recognized and enforced only if it has effect and is enforceable in the State in which it was issued.]

Article 8. Application for recognition and enforcement of an insolvency-related judgement[21]

1. A foreign representative or other person entitled under the law of the State in which the judgement was issued to seek enforcement of an insolvency-related judgement may apply to the court in this State for recognition and enforcement of that judgement, including by way of defence.

2. An application for recognition and enforcement of an insolvency-related judgement shall be accompanied by:

(a) A [certified] copy of the insolvency-related judgement;

(b) [A certified statement of the [final character of the] insolvency-related judgement;] [Information relating to any current review of the insolvency-related judgement, including whether any notice of intended appeal has been received, the time limit (if any) for seeking review has expired in the State in which it was issued, and whether the judgement is enforceable in the State in which it was issued];[22]

(c) *Deleted*;

(d) Evidence [as required by the law of this State][23] that the party against whom relief is sought was provided notice of the application in this State for recognition and enforcement of the insolvency-related judgement.

23. The court may require translation of documents supplied in support of the application for recognition and enforcement of the insolvency-related judgement into an official language of this State.

34. The court is entitled to presume that documents submitted in support of the application for recognition and enforcement of the insolvency-related judgement are authentic, whether or not they have been legalized.

[Article 8 bis. Postponement or refusal of recognition and enforcement[24]

Law's working group on the judgements project (available as indicated in footnote 3). Inclusion of this draft article may necessitate additions to draft art. 8, e.g. a requirement to provide any documents necessary to establish that the judgement has effect or, where applicable, is enforceable in the State in which it was issued (see Hague working group text, art. 11, para. 1 (c)).

[21] This version of draft art. 8 is based upon the decision of the Working Group at its forty-eighth session (A/CN.9/864, para. 72) to retain variant 2 and delete variant 1.

[22] The requirement for the foreign insolvency-related judgement to be final and binding that was initially included in draft arts. 2, para. (c) and 10, paras. (f) and (g) has now been deleted; arts. 2 bis and 2 ter address aspects of that requirement. Accordingly, in order to align art. 8, para. 2 with the definition of judgement as proposed by the Working Group (A/CN.9/864, para. 72), the first words in square brackets in para. (b) could be deleted. However, in view of new art. 8 bis, it may be appropriate to require that some information be provided to the receiving court as to whether the judgement is currently subject to review, whether any notice of intended appeal has been received, whether the time limit (if there is one) for seeking review has expired in the State of issue and whether it is enforceable in the State of issue. Language to that effect has been added for consideration.

[23] The addition of the words in square brackets to art. 8, subpara. 2 (d) was suggested at the forty-eighth session (A/CN.9/864, para. 74).

[24] Following a suggestion made at the forty-eighth session (A/CN.9/864, paras. 75 and 79), draft art. 8 bis repeats the first two sentences of art. 4, para. 4 of the text emanating from the fifth meeting (October 2015) of the Hague Conference on Private International Law's working group on the judgements project. The last sentence of art. 4, para. 4 of that Hague Conference text includes the following language — "In such cases, the court addressed may also make enforcement conditional on the provision of such security as it shall determine." The Working Group may wish to consider whether that language is required in this text and if so, whether it should apply both to recognition and enforcement. The Working Group may also wish to consider the need to align this draft article with whatever language is adopted for draft art. 8, para. 2(b).

1. Recognition and enforcement may be postponed or refused if the insolvency-related judgment is the subject of review in the State in which it was issued or if the time limit for seeking ordinary review in that State has not expired.

2. A refusal under paragraph 1 does not prevent a subsequent application for recognition and enforcement of the judgment.]

Article 9. Decision to recognize and enforce an insolvency-related judgement

An insolvency-related judgement shall be recognized and enforced provided:

(a) *Deleted*;

(b) The person seeking enforcement of the insolvency-related judgement is a person within the meaning of article 2, subparagraph (b) or another person entitled to seek enforcement of the judgement under article 8, paragraph 1;

(c) The requirements of article 8, paragraph 2 are met;

(d) The court from which recognition is sought is the court referred to in article 4; and

(e) Articles 8 bis and 10 do not apply.[25]

Article 10. Grounds to refuse recognition of an insolvency-related judgement

Recognition and enforcement of an insolvency-related judgement may be refused if:

(a) The insolvency-related judgement is subject to review in the originating State or the time limit for seeking review has not expired and the originating State would not enforce the insolvency-related judgement because of the availability of such review;[26]

(b) The party against whom the proceeding giving rise to the insolvency-related judgement was instituted:

(i) Was not notified of the institution of that proceeding in sufficient time and in such a manner as to enable a defence to be arranged, unless the party entered an appearance and presented their case without contesting notification in the originating court, provided that the law of the originating State permitted notification to be contested; or

(ii) Was notified of the institution of that proceeding in a manner that is incompatible with fundamental principles of this State concerning service of documents;

(c) The insolvency-related judgement was obtained by fraud in connection with a matter of procedure;

(d) and (e) *Deleted*[27]

(f) The insolvency-related judgement is inconsistent with a prior judgement issued in this State in a dispute involving the same parties;

(g) The insolvency-related judgement is inconsistent with a prior judgement issued in another State involving the same parties, provided that the earlier judgement fulfils the conditions necessary for its recognition in this State;

---

[25] Draft art. 9, para. (f), which provided that the insolvency-related judgement could be recognized and enforced unless recognition of the proceeding in which the judgement was issued had been refused on public policy grounds, has been deleted (A/CN.9/864, para. 77) and a general article along the lines of art. 6 of the Model Law included as draft art. 6 bis.

[26] The Working Group agreed to retain draft art. 10, para. (a) (A/CN.9/864, para. 79); since this issue is now addressed by draft art. 8 bis, para. (a) may not be required.

[27] Draft art. 10, paras. (d) and (e) have been deleted as agreed (A/CN.9/864, paras. 77 and 81) and replaced by draft art. 6 bis.

(h) Recognition and enforcement of the insolvency-related judgement would interfere with the administration of the insolvency proceedings or would be inconsistent with a stay or other order entered in insolvency proceedings in this or another State;[28]

[(i) *New variant 1*:[29] The insolvency-related judgement was not issued by a court in the State of the [judgement] debtor's centre of main interests or by a court which would have had jurisdiction in accordance with the law of this State concerning recognition and enforcement of the insolvency-related judgment.]

[(i) *New variant 2*: The insolvency-related judgement was not issued by a court that:

[(i) For Model Law enacting States: Was supervising a foreign main proceeding regarding the insolvency of the [party against whom the judgement was issued] [judgement debtor];]

(ii) Exercised jurisdiction based on the consent of the [party against whom the judgement was issued] [judgement debtor];

(iii) Exercised jurisdiction on a basis on which [a receiving court could have exercised jurisdiction under its own law] [a court in this State could have exercised jurisdiction]; or

(iv) Exercised jurisdiction on a basis that was [not inconsistent] [consistent] with the law of this State.]

[(j) The insolvency-related judgement adversely affects the interests of creditors and other interested persons in this State who did not, directly or through an appropriate representative, participate in the foreign proceeding, and who could not reasonably be expected to have participated in the foreign proceeding.][30]

[Article 10 bis. Equivalent effect[31]

1. An insolvency-related judgment recognized or enforceable under this Law shall be given the same effect it has in the State in which it was issued.

2. If the insolvency-related judgment provides for relief that is not available under the law of this State, that relief shall, to the extent possible, be adapted to relief that is equivalent to, but does not exceed, the effect it has under the law of the State in which it was issued.]

[Article 11. Protection of creditors and other interested persons[32]

---

[28] Draft art. 10, para. (h) is based upon variant 1 as set forth in A/CN.9/WG.V/WP.135. Variant 2 has been deleted (A/CN.9/864, para. 83).

[29] Previous variants 1, 2 and 3 of draft art. 10, para. (i) as contained in A/CN.9/WG.V/WP.135 have been deleted. The new variants 1 and 2 reflect proposals made at the forty-eighth session (A/CN.9/864, paras. 84-86).

[30] The previous version of draft art. 10. para. (j) has been deleted and a new para. (j) added in accordance with a proposal at the forty-eighth session (A/CN.9/864, para. 86) to address a concern that if the provision were to be limited to local creditors (i.e. creditors in the enacting State) it might to be narrow. It may be of assistance to note art. 11 of the Model Law and the Guide to Enactment and Interpretation, para. 198, which indicates the inadvisability of limiting such a provision to local creditors and the difficulties of crafting a definition of such creditors without discriminating against certain creditors on the basis of, for example, place of business or nationality.

[31] The addition of draft art. 10 bis was suggested at the forty-eighth session to address various concerns about differences that might occur between the relief available under the law of the originating State and that available under the law of the receiving State (A/CN.9/864, paras. 64-65).

[32] As requested by the Working Group (A/CN.9/864, para. 79), draft art. 11 is based upon art. 22, para. 1 of the Model Law, with some modification to be consistent with the subject matter of this draft instrument. The draft art. reflects the basic principle of art. 22, para. 1, without providing for (i) the imposition of conditions on recognition and enforcement, or (ii) the court to modify or terminate recognition or enforcement (that is, art. 22, paras. 2 and 3). If this draft art. is to be retained, the Working Group may wish to consider the scope of such a safeguard — whether it should apply generally to all insolvency-related judgements as drafted, or be limited to specific judgements referred to in draft art. 2.

In recognizing and enforcing an insolvency-related judgement under article 9, the court must be satisfied that the interests of the creditors and other interested persons, including the judgement debtor, are adequately protected.]

[Article 12. Severability[33]

Recognition and enforcement of a severable part of an insolvency-related judgement shall be granted where recognition and enforcement of that part is applied for, or only part of the judgement is capable of being recognized and enforced under this Law.]

Article 13. Provisional relief[34]

1. From the time recognition and enforcement of an insolvency-related judgement is sought until a decision is made, the court may grant relief of a provisional nature where relief is urgently needed, including:

(a) Staying the disposition of any assets of any party or parties against whom the insolvency-related judgement has been issued; or

(b) Granting other legal or equitable relief, as appropriate, within the scope of the insolvency-related judgement.

2. [*Insert provisions (or refer to provisions in force in the enacting State) relating to notice.*]

3. Unless extended by the court, relief granted under this article terminates when a decision on recognition and enforcement of the insolvency-related judgement is made.

[33] Draft art. 12 is based on art. 14 of the draft emanating from the fifth session (October 2015) of the Hague Conference on Private International Law's working group on the judgements project. It was previously included in A/CN.9/WG.V/WP.130 as art. 11, but not considered at the forty-seventh session for lack of time. It is included in this draft for the Working Group's consideration.

[34] Draft art. 13 was previously included in A/CN.9/WG.V/WP.130 as art. 12, but not considered at the forty-seventh session for lack of time. It is included in this draft for the Working Group's consideration.

H. Note by the Secretariat on insolvency law: directors' obligations in the period approaching insolvency: enterprise groups

(A/CN.9/WG.V/WP.139)

[Original: English]

Contents

Introduction

1. Part three of the UNCITRAL Legislative Guide on Insolvency Law deals with the treatment of enterprise groups in insolvency and provides background on the nature of enterprise groups; reasons for conducting business through enterprise groups; what constitutes an enterprise group by reference to concepts such as ownership and control; and regulation of enterprise groups. Part four of the Legislative Guide addresses the obligations of directors in the period approaching insolvency, discussing issues associated with directors' obligations in that period and, in particular, the rationale for imposing obligations specific to that period by way of the operation of insolvency, rather than corporate, law. Neither part addresses the specific issues that might affect the obligations of directors who perform that function for one or more enterprise group members.

2. At its forty-fourth session (December 2013), the Working Group agreed on the importance of addressing the obligations of directors of enterprise group companies in the period approaching insolvency, given that there were clearly difficult practical problems in that area and that solutions would be of great benefit to the operation of efficient insolvency regimes. At the same time, the Working Group noted that possible solutions needed to be considered carefully so that they did not hinder business recovery, make it difficult for directors to continue to work to facilitate that recovery, or influence directors to prematurely commence insolvency proceedings. In light of those considerations, the Working Group agreed that an examination of how part four of the Legislative Guide could be applied in the enterprise group context and identification of additional issues (e.g. conflicts between a director's obligations to its own company and the interests of the group) would be helpful.

3. Deliberations on this topic commenced at the Working Group's forty-sixth session (December 2014) on the basis of a draft prepared by the Secretariat following consultation with an informal expert group as requested by the Working Group (A/CN.9/WG.V/WP.125) and continued at its forty-seventh session (May 2015) on the basis of a revised draft (A/CN.9/WG.V/WP.129).

4. This note has been prepared by the Secretariat on the basis of the deliberations and conclusions of the Working Group at its forty-seventh session (A/CN.9/835, paras. 13-21). Set out below are revisions to draft recommendations 267 to 270 and the accompanying

commentary. Proposed additions and revisions to the commentary are included in square brackets, with explanations as appropriate included in the footnotes.

UNCITRAL Legislative Guide on Insolvency Law, part four: Directors' obligations in the period approaching insolvency — enterprise groups

Introduction and purpose of this section

1. This second section of part four builds upon recommendations 255 to 266 of the first section, which address the obligations of directors of an individual company in the period approaching insolvency. Focusing on the nature of the obligations and the steps that might be taken to discharge those obligations (as established in recommendations 255 and 256), this section proposes how those recommendations could be revised for application in the context of enterprise groups. Recommendations 257 to 266 of the first section of part four continue to apply in the enterprise group context as drafted, however cross references in those recommendations to recommendations 255 and 256 should be read for the purposes of this additional section as references to recommendations 267 and 268.

2. Additional recommendations (recommendations 269 and 270) have been added to this section to address the situation where a director is appointed to, or holds a managerial or executive position in, more than one group member and conflicts arise in discharging the obligations owed to the different members.

3. This section uses the same terminology as other parts of the Legislative Guide. To provide orientation to the reader, this section should be read in conjunction with part three and the first section of part four.

I. Background

4. The first section of part four of the Legislative Guide considers the obligations of directors of individual companies in the period approaching insolvency, providing information on how those obligations are treated under current laws. While some jurisdictions have developed provisions to impose obligations on directors in the period approaching insolvency, the relative advantages and disadvantages of such regimes remain the subject of debate.[1] The first section of part four underlines the need for early action to be taken when businesses face financial difficulty in order to avoid rapid decline and to facilitate rescue and reorganization. It also notes that while there has been an appropriate refocusing of insolvency laws in many countries towards increasing the options for that early action to be taken, there has been little corresponding attention paid to creating appropriate incentives for directors to use those options.[2] The first section encourages the development of appropriate incentives by identifying, for incorporation in the law relating to insolvency, the basic obligations a director of an enterprise may have in the period approaching insolvency and the steps that might be taken to discharge those obligations. Those obligations would become enforceable only when insolvency proceedings have commenced.

5. In the enterprise group context, the issue of directors' obligations in the period approaching insolvency does not appear to be clearly or widely addressed by national legislation. While the concept of enterprise groups has been considered and developed in many jurisdictions, the question of the obligations of directors of one or more members of those enterprise groups remains somewhat uncertain.[3]

6. Part three of the Legislative Guide, which addresses the insolvency treatment of enterprise groups, notes that enterprise groups are often characterized by varying degrees of economic integration (from highly centralized to relatively independent) and types of

[1] Legislative Guide, part four, chap. I, paras. 8-10.
[2] Ibid., para. 6.
[3] A/CN.9/WG.V/WP.115, para. 40, which outlines the manner in which a number of different jurisdictions address this issue.

organizational structure (vertical or horizontal) that create complex relationships between group members and may involve different levels of ownership and control. Those factors, together with adherence to the single entity principle and the widespread lack of any explicit acknowledgement of the group reality in the legislation applicable to individual group members, raise a number of issues for directors of enterprise group members. Adherence to the single entity principle typically requires directors to promote the success and pursue the interests of the company they direct, respecting the limited liability of that company and ensuring that its interests are not sacrificed to those of the enterprise group, irrespective of the interests of the group as a whole, the position of the director's company in the group structure, the degree of independence or integration among group members and the incidence of ownership and control. But where that company's business is part of an enterprise group and reliant, at least to some extent, on other group members for the provision of vital functions (e.g. financing, accounting, legal services, suppliers, markets, management direction and decision-making or intellectual property), addressing the financial difficulties of that company in isolation is likely to be difficult, if not, in some cases, impossible. [Indeed, adhering to a strictly narrow interpretation of the director's obligations may bring about the failure that it is hoped to avoid.] Part three discusses in some detail the current economic reality of enterprise groups and, in the context of insolvency, the impact of treating enterprise group members as unrelated entities on resolving the financial difficulties of some group members or of the group more widely.[4]

7. The requirement to act in the interests of the directed company may be further complicated in the group context when a director of one group member performs that function or holds a managerial or executive position in other group members. In such a situation, it may be difficult for the director to separately identify the interests of each of those group members and treat them in isolation. [Moreover, the interests of those group members may be affected by the possibly competing economic goals or needs of other group members and those of the enterprise group collectively. The short and long term implications for the interests of the different group members may need to be assessed, which may involve accepting, even if only in the short term, some detriment to the interests of individual group members in order to achieve a longer term benefit for the enterprise group to which those individual members belong. Where a group insolvency solution is pursued, it is reasonable that some safeguards would apply.][5]

8. Some examples of situations in which the interests of individual group members may be affected by those of the group more widely may include where one group member is a key supplier, or provides finance to another group member or acts as a guarantor for finance provided by an external lender to another group member, in an attempt to keep the group as a whole afloat, including its own business; where one group member agrees to transfer its business or assets or surrender a business opportunity to another group member or to contract with that member on terms that could not be considered commercially viable, but where to do so may ultimately benefit the business of group member agreeing to the transfer; or where a group member enters into cross-guarantees with other group members to assist the group as a whole to use its assets more effectively in financing group operations.

9. Such considerations might be relevant in the period approaching insolvency, when greater control and coordination of the groups' activities may be required to maximize efficiency and design solutions to resolve the financial difficulties of the group as a whole or for some of its parts. At that time, there may also be more opportunities for advantage to be taken of more vulnerable and dependent group members in order to benefit other members, such as through transfers of assets, diversion of business opportunities and use of those group members to conduct more risky transactions or activities or to absorb losses and bad assets.

10. To address the best interests of the directed group member, a director may require a degree of flexibility to weigh the various competing interests and act for the benefit of other group members or the group as a whole where that action coincides with the best interests of the directed member. To the extent that the course of action a director chooses to follow in such circumstances is reasonable and directed to avoiding insolvency or minimizing its

[4] Legislative Guide, part three, chap. I.

[5] The changes to this paragraph address some of the concerns expressed at the forty-seventh session, A/CN.9/835, para. 17.

impact on the directed group member, they should not be liable for breach of their obligations. [Where having weighed the competing interests of the directed group members, the course of action chosen gives rise to a conflict between the obligations the director owes to those different group members, that conflict should be disclosed to the affected group members. Resolving such a conflict might require mediation or negotiation of the opposing interests.]

11. While, as noted above, few laws address directors' obligations in the enterprise group context, courts in different jurisdictions have accorded differing degrees of recognition to the practical reality of the manner in which enterprise groups operate. While the focus is still upon directors exercising their powers for the benefit of their own group member or members, some jurisdictions may permit directors to have regard, for example, to the direct or derivative commercial benefits accruing to that group member from pursuing a particular course of action with other group members and to the extent to which their group member's prosperity or continued existence depends on the well-being of the group as a whole. Typically, however, collective benefit is not a sufficient justification by itself [for acts judged to be prejudicial to creditors.] Moreover, directors might also be required to take into account any reasonably foreseeable detriments that might flow to their group member as a result of the course of action taken and to consider the position of their group member's unsecured creditors, particularly where that member's solvency might be affected. The latter consideration is of particular importance where the transaction is a guarantee or security for a loan to another group member, [especially where the survival of that other group member is not critical to the solvency of the group member giving the guarantee or security].

12. Other jurisdictions have allowed directors of group companies to act in the interests of the overall group when certain conditions are met, such as that the group has a [structure that affords group members some influence in the overall decisions]; that the group member took part in the long-term and coherent group policy; and that the directors in good faith reasonably assumed that any detriment suffered by their group member would in due course be made good by other advantages. Another approach permits a director of a group member to act in the interests of the parent provided it does not prejudice the group member's ability to pay its own creditors and the directors are authorized, either by the constitution of the group member or by shareholders. Under those laws, for the director to avoid liability, the group member should not be insolvent at the time the director acts, nor should it become insolvent by virtue of that action.

13. This section identifies the extent to which a director of an enterprise group member may take account of considerations beyond the group member they direct in fulfilling their obligations in the period approaching insolvency and the safeguards that should apply. Those considerations will, to a greater or lesser extent, reflect aspects of the economic reality of the enterprise group. This section proposes principles for inclusion in the law concerning the obligations of directors of enterprise group companies in the period approaching insolvency. These principles may serve as a reference point and can be used by policymakers as they examine and develop appropriate legal and regulatory frameworks. Whilst recognizing the desirability of achieving the goals of insolvency law (outlined in part one, chapter I, paragraphs 1-14 and recommendation 1) through early action and appropriate behaviour by directors, it is also acknowledged that there are threats and pitfalls for entrepreneurs that may result from overly draconian rules.

14. This section does not deal with the liability of directors under criminal law, company law or tort law. It focusses only on those obligations that may be included in the law relating to insolvency and become enforceable once insolvency proceedings commence.

II. Elements of the obligations of directors of enterprise group companies in the period approaching insolvency

A. The nature of the obligations

15. The underlying rationale of imposing obligations on directors in the proximity of insolvency is addressed in the first section of part four, paragraphs 1 to 7, and remains equally applicable in the enterprise group context. The obligations of directors of a group

member continue to be the same basic obligations as established in recommendation 255, but provision might be made to permit the broader context of the economic reality of the enterprise group to be taken into account in determining the steps that should be taken by a director to avoid liability for breach of those obligations. Relevant factors to be considered might include the position of the enterprise group member in the enterprise group, the degree of integration between enterprise group members (as mentioned in recommendation 217 of part three) and the possibility of maximizing value in the group by designing a solution to the group's financial difficulties that includes the whole group or some of its parts. Such solutions may require a director of a group member in financial difficulty to take steps that may appear, at first glance, to be detrimental to that group member, but that will ultimately achieve a better result for it and ensure the continuation of its business and maximization of its value. Taking those same steps in circumstances where they are not likely to benefit the group member in financial difficulty may expose directors to liability for failure to discharge their obligations reasonably.

16. One consideration for directors evaluating the steps to be taken to address the group member's financial difficulties is the impact of those steps on creditors of that group member, especially when wider group interests are to be accommodated. Recommendation 255 requires directors to have due regard to the interests of creditors, as well as of other stakeholders of the group member. The interests of creditors may be safeguarded by establishing a "no worse off" standard — i.e. that creditors will be no worse off under the steps that are taken than they would have been had those steps not been taken.[6]

17. The first section of part four discusses the types of steps that a director might reasonably be expected to take in order to address financial difficulty, avoid the onset of insolvency and, where it is unavoidable, to minimize its impact (see part four, chap. II, para. 5). Those steps would continue to be relevant in the group context and might be supplemented by additional steps, depending on the factual situation, that might effectively require some degree of mutual assistance and cooperation with other group members. Those additional steps might be affected by the position of the group member in the enterprise group and require consideration of whether more value might be preserved or created by assisting the implementation of a solution for the enterprise group as a whole or some of its parts, than by taking steps that relate only to the individual group member. Consideration might be given to assessing the directed member's obligations, both financial and legal, to other group members; the transactions that should (or should not) be entered into with other group members; possible sources and availability of finance [(both in the period approaching insolvency and once formal proceedings commence)],[7] including its provision by the directed group member to other group members; and the impact of possible solutions, whether limited to the directed group member or involving the group more widely, on creditors and other stakeholders of the directed group member. A director might also consider taking steps to organize informal negotiations with creditors, such as voluntary restructuring negotiations, with a view to devising a solution for the enterprise group as a whole or some of its parts where that will benefit the directed group member.

18. Where insolvency is unavoidable and formal proceedings are to be commenced, a director might consider the court in which those proceedings should commence, particularly when there is a possibility of making a joint application with other group members and procedurally coordinating those proceedings, as discussed in part three.[8]

---

[6] The Working Group may wish to consider whether there is a need for the safeguards provided in this draft text and the draft being developed on cross-border insolvency of enterprise groups to be consistent. See for e.g., draft art. 8, A/CN.9/WG.V/WP.137/Add.1, which refers to adequate protection of creditors in the context of developing a group insolvency solution. See also the purpose clause for recommendations 267-268 and recommendation 267 below.

[7] The language in parentheses has been added to broaden the issues to be considered beyond the period after proceedings commence (reflected by the current drafting and use of the phrase "post-commencement finance") to include finance that might be required in the period approaching insolvency before the group member commences formal proceedings, as well as once formal proceedings have been applied for and subsequently commenced. This would include both post-application and post-commencement finance, as discussed in the Legislative Guide, part three. The same change is reflected in rec. 268, para. 1(b).

[8] Legislative Guide, part three, recs. 202-210.

Recommendations 267-268

Purpose of legislative provisions

The purpose of these provisions addressing the obligations of those responsible for making decisions concerning the management of an enterprise group member that arise when insolvency is imminent or unavoidable is:

(a) To protect the legitimate interests of creditors and other stakeholders of the enterprise group member;

(b) To ensure that those responsible for making decisions concerning the management of an enterprise group member are informed of their roles and responsibilities in those circumstances;

(c) To recognize the impact of the enterprise group member's position in the enterprise group upon the manner in which the group member should be managed to address its imminent or unavoidable insolvency and the obligations of those responsible for making decisions concerning the management of that group member, including in situations where they are also responsible for making decisions concerning the management of other group members; and

(d) To permit an enterprise group member to be managed, where appropriate, in a manner that will maximize value in the enterprise group by promoting approaches to resolve insolvency for the enterprise group as a whole or for some of its parts, whilst taking reasonable steps to ensure that the creditors of that group member and its other stakeholders are no worse off than if that group member had not been managed so as to promote such approaches to resolution.

Paragraphs (a)-(d) should be implemented in a way that does not:

(a) Unnecessarily adversely affect successful business reorganization of the enterprise group member, taking into account the possible benefit of maximizing the value of the enterprise group and promoting an insolvency solution for the enterprise group as a whole or some of its parts, the position of the group member in the enterprise group and the degree of integration between group members;

(b) Discourage participation in the management of companies, particularly those experiencing financial difficulty; or

(c) Prevent the exercise of reasonable business judgement or the taking of reasonable commercial risk.

Contents of legislative provisions

The obligations

267. (a) The law relating to insolvency should specify that the obligations established in recommendation 255 will apply to a director of a company that is a member of an enterprise group.

(b) Insofar as not inconsistent with those obligations, the director of an enterprise group member may take reasonable steps to promote a solution that addresses the insolvency of the enterprise group as a whole or some of its parts. In so doing, the director may take into account the possible benefits of maximizing the value of the enterprise group as a whole, whilst taking reasonable steps to ensure that the creditors of the group member and its other stakeholders are no worse off than if that group member had not been managed so as to promote such a solution.

Reasonable steps for the purposes of recommendation 267

268. For the purposes of recommendation[s] 255 and 267, and to the extent not inconsistent with the obligations of the director to the group member of which they are director reasonable steps in the enterprise group context might include, in addition to the steps outlined in recommendation 256:

(a) Evaluating the current financial situation of the enterprise group member and of the enterprise group to consider whether more value might be preserved or created by considering a solution for the enterprise group as a whole or some of its parts;

(b) Considering the financial and other obligations of the group member to other enterprise group members, whether transactions should be entered into with other enterprise group members, and possible sources and availability of finance, [including when formal proceedings are to be commenced];[9]

(c) Evaluating whether the enterprise group member's creditors and other stakeholders would be better off under an insolvency solution for the enterprise group as a whole or some of its parts;

(d) Assisting the implementation of an insolvency solution for the group as a whole or some of its parts;

(e) Holding and participating in informal negotiations with creditors, such as voluntary restructuring negotiations,[10] where organized for the enterprise group as a whole or some of its parts; and

(f) Where formal insolvency proceedings are to be commenced, considering the court in which they should be commenced, whether a joint application[11] with other relevant enterprise group members is possible or appropriate and whether proceedings should be procedurally coordinated.[12]

B. Identifying the parties who owe the obligations

19. In the enterprise group context, identifying those responsible for management decisions may be more complex than in the case of a single company. Various layers of management and influence can affect the affairs of any single group member and the manner in which it conducts its business, particularly in the vicinity of insolvency. Such influence may undermine the ability of the directors of a group member to take appropriate steps to address the financial difficulties of the directed member or involve that member in the financial difficulties of other group members, to the detriment of the creditors of the directed group member. This may occur in numerous circumstances, such as where the boards of two or more members consist of substantially the same persons; where the majority of the board of one group member is nominated by another group member, which is in a position of control; where one group member controls the management and financial decision-making of the group; or where one group member interferes in a sustained and pervasive manner in the management of another group member, typically in the situation of a parent and controlled group member.

20. There may also be some enterprise groups in which it is difficult to identify the precise boundaries between group members because management responsibilities across different boards are blurred. In addition, relevant executives and decision makers may be employed by group members several steps removed from the group member in question and the separate identity and liability of that group member may be generally disregarded in the daily business of the group. In such situations, serious issues may arise as to the obligations of such persons with respect both to the actual business conducted by the group member in question and to the group member by which they are employed.

21. Persons that might be considered to be a director in the group context could include another group member or the director of another group member, including a shadow director[13] of that other group member. While some laws do not permit a group member to be formally appointed as a director of another group member, such a group member might nevertheless be regarded as a shadow director of that other member when it exercises influence over or directs its activities.

---

[9] See footnote 7 for an explanation of this revision.
[10] Legislative Guide, part one, chap. II, paras. 2-18.
[11] Ibid., part three, recs. 199-201.
[12] Ibid., part three, recs. 202-210.
[13] Ibid., part four, footnote 11 to para. 13.

22. Paragraphs 13 to 16 of the first section of part four discuss the parties who owe the obligations discussed above. Recommendation 258 adopts a broad formulation, providing that it should include any person formally appointed as a director or exercising factual control and performing the functions of a director. Paragraph 15 of the commentary notes the types of function that may be expected to be performed by such a person. Those considerations would also be applicable in the enterprise group context discussed in this part.

C. Conflict of obligations

23. It may often be the case in enterprise groups that a director performs that function or holds a management or executive position in more than one group member, whether as a result of the ownership and control structure of the group, the alliances between group members, family ties across the group or some other aspect of the manner in which the business or businesses of the group are organized.[14] Whatever the reason, a director who sits on the boards of, [or has managerial responsibility for,] a number of different group members may face, in the period approaching insolvency, potential conflicts between the obligations owed to those different group members as they attempt to identify the course of action most likely to preserve value and provide the best solution to the financial difficulties of each group member. The nature and complexity of the conflict may relate to the position of the directed entities in the group hierarchy, the related degree of integration between group members, and the incidence of control and ownership. Where a director sits on the boards of the parent and controlled group members, for example, that director needs to be able to demonstrate that any transaction involving the parent took into account, and was fair and reasonable to, the controlled group member.

24. In addition, the interests of the directed group members may be closely intertwined with the enterprise group more widely, requiring the economic reality of the group as a whole to be considered. In such circumstances, steps that may be regarded as detrimental to a company operating as a stand-alone entity may be reasonable when considered in that broader context. The business of a subsidiary, for example, may be generally dependent on the business of the group more widely and it may be appropriate for that subsidiary to provide funding in the short term for other members in order to keep that wider business operating and ultimately save the business of the subsidiary itself.

25. Directors facing such a conflict might be expected to act reasonably and take adequate and appropriate steps to address the situation. That might require a director, depending on the factual situation, to identify the nature and extent of the conflict in accordance with applicable law and determine how it might be addressed. It may be sufficient in some circumstances for the director to disclose relevant information regarding the conflict, including its nature and extent, to the affected boards of directors, while in other circumstances wider disclosure to creditors and other stakeholders, including the boards of directors of other group members, may be reasonable. Such disclosure may be sufficient to support the director's continuing integrity and any lack of the impartiality or independence required can be assessed against the circumstances disclosed.

26. It may be appropriate in some circumstances for the director to refrain from participating in any decisions relating to the conflict that are to be taken by the affected boards or attending meetings at which related issues are to be discussed [and for this to be recorded as a deliberate approach agreed with fellow directors, as opposed to an act of omission.] Appointment of additional or substitute board members may be possible in some cases and, if the conflict cannot be resolved, the director may consider, as a last resort, resigning from one or other of the affected boards. That might potentially include resignation from the board of an insolvent or a solvent group member. While that option of resignation may free the director of the dilemma, it simultaneously neglects the larger problem and may exacerbate the situation, especially in the period approaching insolvency, if it leaves the affected group member or members without the expertise necessary to address their financial difficulties. As noted in the first section of part four, resignation from the board will not render a director immune from liability, as under some laws they may leave themselves open to the suggestion that the resignation was connected to the insolvency or that they had failed

[14] See Legislative Guide, part three, chap. I, paras. 6-15.

to take reasonable steps to minimize losses to creditors in the face of impending insolvency.[15]

27. [Good corporate governance that supports analyses of the situations of the respective group members giving rise to the conflict and records the reasons for the action taken may be critical to the director in discharging obligations with respect to the conflict. A policy on corporate governance does not, however, replace or limit obligations owed by directors to the group member or members. It offers indicia as to what steps are considered reasonable to manage the conflict. Different corporate governance policies and standards between the members of an enterprise group can also lead to conflicting solutions and outcomes, which need to be carefully reviewed and assessed by directors.][16]

Recommendations 269-270

Purpose of legislative provisions

The purpose of provisions on conflict of obligations is to address the situation where a director of one enterprise group member holds that position or a management or executive position in another or other enterprise group members, whether the parent or a controlled group member. That situation may give rise, in the period approaching insolvency, to a conflict between the obligations owed to the different group members, which may have an impact upon the steps to be taken to discharge those obligations.

Contents of legislative provisions

Conflict of obligations

269. The law relating to insolvency should address the situation where, in the period approaching insolvency, a director of an enterprise group member who holds that position or a management or executive position in another or in other enterprise group members has a conflict between the obligations owed in relation to the creditors and other stakeholders of those different group members.

Reasonable steps for the purposes of recommendation 269

270. The insolvency law may specify that a director faced with such conflicting obligations should take reasonable steps to manage those conflicts. Reasonable steps may include:

(a) Obtaining advice to establish the nature and extent of the different obligations;

(b) Identifying the parties to whom the conflict of obligations must be disclosed and disclosing relevant information, including, in particular, the nature and extent of the conflict;

(c) Identifying when the director should not (i) participate in any decision by the boards of directors of any of the relevant group members on the matters giving rise to such conflicts, or (ii) be present at any board meeting at which such issues are to be considered;

(d) Seeking the appointment of an additional director when the conflicting obligations cannot be reconciled; and

(e) As a last resort, where there is no alternative course of action available, resigning from the relevant board(s) of directors.

[15] Legislative Guide, part four, chap. II, para. 27.

[16] Revisions to this paragraph seek to address concerns expressed at the forty-seventh session (A/CN.9/835, para. 18) and include some additional suggested text.

I. Note by the Secretariat on insolvency law: cross-border recognition and enforcement of insolvency-related judgements: proposal by the United States of America

(A/CN.9/WG.V/WP.140)

[Original: English]

Contents

The Government of the United States of America has submitted to the Secretariat of the United Nations Commission on International Trade Law (UNCITRAL) the following proposal in order to provide the Working Group with additional information for its deliberations. The text of the proposal is reproduced as an annex to this note in the form in which it was received by the Secretariat, with formatting changes.

Annex

Proposals by the United States of America for articles 2 and 10 of the draft model law on the recognition and enforcement of insolvency-related judgements

1. The United States would like to thank the Secretariat for its latest version of the draft model law on the recognition and enforcement of insolvency-related judgments, A/CN.9/WG.V/WP.138, which very helpfully builds on the progress made during the Working Group's discussions in December 2015 and sets forth a number of options for the Working Group's consideration.

2. During the previous session, two issues led to some of the most difficult discussions: the scope of the new model law (i.e., which types of judgments would be encompassed) and how it would interact with the Model Law on Cross-Border Insolvency. The United States would like to propose two pieces of new text that seek to find common ground on these issues and provide a potential path forward.

A. Definition of insolvency-related judgment: scope of Model Law and interaction with existing Model Law

3. The first piece of text is a new version of article 2, paragraph (d) (the definition of "insolvency-related judgment") that would provide States with two options for implementing the model law — a broader approach and a narrower approach — depending on their policy preferences regarding the scope of the law. This new text also simplifies the definition in order to allow easier discussion of any controversial issues (e.g., by reorganizing the list of types of judgments and shortening the chapeau), and clarifies that a judgment is not covered by the model law if an applicable treaty to which the State is a party governs its recognition and enforcement.

"**Article 2.**

"(d) Insolvency-related judgment" means a judgment that is closely related to a foreign proceeding and was issued after the commencement of that proceeding, but does not include any judgment for which recognition and enforcement is governed by an applicable treaty to which this State is a party. Insolvency-related judgments include, inter alia, judgments determining whether:

(i) An asset is part of, should be turned over to, or was properly disposed of by the insolvency estate;

(ii) A transaction involving the debtor or assets of the insolvency estate should be overturned because it upset the principle of equitable treatment of creditors or improperly reduced the value of the estate;

(iii) A representative of the debtor is liable for action taken when the debtor was insolvent or in the vicinity of insolvency;

(iv) A plan of reorganization or liquidation should be confirmed, a discharge of the debtor or of a debt should be recognized, or a voluntary restructuring agreement should be approved; or

(v) [Option A: other sums are owed to or by the debtor or estate;]

[Option B: other sums are owed to or by the debtor or estate, and the cause of action arose after debtor entered insolvency proceedings];

including instances in which the cause of action was pursued by (a) a creditor with approval of the court, based on an insolvency representative's decision not to pursue that cause of action, or (b) the party to whom it has been assigned by an insolvency representative in accordance with the applicable law."

4. The text divides insolvency-related judgments into five categories.[1] The fifth category is broader than the first four, as it seeks to encompass other judgments that would affect the size of the insolvency estate. Some delegations have taken the position that otherwise-applicable rules for recognition and enforcement of non-insolvency-related judgments — rather than this model law — should apply to this fifth category unless the judgment in question was based on a cause of action arising after insolvency. By contrast, other delegations have taken the position that the judgments in this category are very important for the insolvency estate even if the underlying cause of action arose before insolvency, and thus that this model law should provide for their recognition and enforcement. The United States strongly believes that the broader approach, reflected in Option A, would be more appropriate.[2] However, the divided views in the Working Group suggest that States may need to have two options for implementation of this aspect. States could select one of the two options based on their policy preferences and on how their pre-existing law on the recognition and enforcement of judgments would interact with the draft model law.

5. The proposed text also reduces the overlap with the existing Model Law on Cross-Border Insolvency, as some delegations have expressed strong concerns about such overlap. "Modification or enforcement of a stay" is not included as a category of insolvency-related judgments, as this type of cooperation during ongoing insolvency proceedings is a central component of the existing Model Law; thus, the existing Model Law should be enacted as the framework to govern these issues. However, other categories of judgments are retained, even though the existing Model Law could in some situations enable recognition and enforcement of many judgments, including those in category (iv). Even if a State declines to enact the existing Model Law or has construed it not to cover judgments within the scope of category (iv), recognition and enforcement of the final results of those proceedings should still fall within the scope of this new model law.

B. Exceptions to recognition and enforcement: jurisdictional issues and interaction with existing Model Law

6. The second piece of text proposed consists of some additions to Article 10 — in particular, amendments to article 10, subparagraph (i)(i) (variant 2) and new proposals for

[1] The text proposed here does not address judgments concerning the validity and effectiveness of a secured claim. It may be appropriate to cover such judgments. However, in doing so, the Working Group would likely need to consider a new exception for article 10, to permit refusal of recognition and enforcement if the judgment does not originate from a court that is competent to adjudicate such issues with respect to the property in question. Such a provision may be very difficult to draft, particularly while seeking to maintain consistency with existing instruments.

[2] In fact, we believe there would be merit in including relevant judgments even if they were issued prior to the commencement of insolvency proceedings, in order to facilitate the collection of assets for the estate. However, given the wide range of views in the Working Group, we are not proposing to broaden the definition in that respect.

article 10, paragraphs (j) and (k) (in place of the existing article 10, paragraph (j) and Article 11).

"**Article 10.**

Recognition and enforcement of an insolvency-related judgment may be refused if:

[(a)-(h) unchanged]

"(i) The insolvency-related judgment was not issued by a court that:

(i) [For States that have enacted the existing Model Law: was supervising a main proceeding regarding the insolvency of

(1) The party against whom the judgment was issued, or

(2) A debtor for which the party against whom the judgment was issued was serving as a director, if the judgment was based on that party's conduct as a director, including breach of fiduciary duty,

or by another court in the State where such a main proceeding occurred;]

(ii) Exercised jurisdiction based on the consent of the party against whom the judgment was issued;

(iii) Exercised jurisdiction on a basis on which a court in this State could have exercised jurisdiction; or

(iv) Exercised jurisdiction on a basis that was not inconsistent with the law of this State;

"(j) The judgment falls within Article 2, subparagraph (d)(iv) and the interests of creditors and other interested persons, including the debtor, were not adequately protected in the proceeding in which the judgment was issued;

"*[For States that have enacted the existing Model Law:*

"*(k) The judgment was not issued in a proceeding that has been, or could have been, recognized under [Article 17 of the existing Model Law], unless the judgment is related solely to assets that were located in the State of origin at the time the proceeding was commenced.]*"

7. Article 10 provides a list of situations in which recognition and enforcement can be denied; article 10, paragraph (i) in particular permits refusal of recognition and enforcement if the originating court exercised jurisdiction (over the party against whom the judgment was issued) on grounds other than those listed. This proposed text includes two changes to article 10, subparagraph (i)(i) (variant 2), which is a clause that is only intended for enactment in States that have already implemented the existing Model Law. First, the addition of article 10, subparagraph (i)(i)(2) addresses situations in which a judgment is issued against a director of an insolvent company by a court in that company's COMI jurisdiction. As long as such a judgment was based on the director's conduct as a director, the court's exercise of jurisdiction would not provide grounds for refusal. Second, a new clause at the end of article 10, subparagraph (i)(i) clarifies that recognition and enforcement should not be refused for jurisdictional reasons solely because the judgment came from a different court in the COMI State, rather than from the specific court that was actually supervising the main proceeding.

8. Next, the new proposed article 10, paragraph (j) would take the place of both the existing article 10, paragraph (j) and Article 11 but would only apply to judgments falling within article 2, subparagraph (d)(iv) as proposed above — i.e., judgments determining whether "a plan of reorganization or liquidation should be confirmed, a discharge of the debtor or of a debt should be recognized, or a voluntary restructuring agreement should be approved." Such judgments directly affect the rights of creditors and other stakeholders, and thus their interests should have been taken into account in the proceeding where the judgment originated. For other types of insolvency-related judgments that simply resolve bilateral disputes between two parties, although creditors and other stakeholders are often affected, any such effects are only indirect (e.g., via the judgment's effect on the size of the

estate). In those instances, permitting a judgment debtor to resist recognition and enforcement by citing third-party interests could unnecessarily generate opportunities for wasteful relitigation. For example, if a court in jurisdiction A determines that the debtor owns a particular asset and issues a judgment against a local creditor resolving that ownership dispute, and the insolvency representative then seeks to enforce that judgment in jurisdiction B, the creditor should not be able to resist enforcement in B by raising arguments about the interests of other creditors and stakeholders.

9. Finally, the new proposed article 10, paragraph (k) would address another issue related to overlap with the existing Model Law (for States in which that Model Law has also been enacted). In some situations, it may be useful for the insolvency representative to seek recognition and enforcement of a judgment from a jurisdiction in which the debtor had neither its COMI nor an establishment. For example, in the hypothetical situation described above, the debtor may have had neither its COMI nor an establishment — only the disputed assets — in jurisdiction A. The proceeding in which that judgment was issued could not have been recognized under the existing Model Law, even though recognition and enforcement of the resulting judgment may still be useful. By facilitating the recognition and enforcement of such judgments, this model law could help address this limitation in the existing Model Law and enable the recovery of additional assets for the estate. At the same time, a limitation is needed to help ensure that the existing Model Law framework is not undermined by the recognition and enforcement of judgments resolving issues that ought to have been addressed by a court in a COMI or establishment State. The proposed article 10, paragraph (k) would permit a court to deny recognition or enforcement if the judgment did not relate only to assets in jurisdiction A, while still allowing recognition and enforcement of some judgments that do not come from main or non-main proceedings.

VI. SECURITY INTERESTS

A. Report of the Working Group on Security Interests on the work of its twenty-eighth session (Vienna, 12-16 October 2015)

(A/CN.9/865)

[Original: English]

Contents

I. Introduction

1. At its present session, Working Group VI (Security Interests) continued its work on the preparation of a model law on secured transactions (the "draft Model Law"), pursuant to a decision taken by the Commission at its forty-fifth session (New York, 25 June-6 July 2012).[1] At that session, the Commission agreed that, upon its completion of the UNCITRAL Guide on the Implementation of a Security Rights Registry (the "Registry Guide"), the Working Group should undertake work to prepare a simple, short and concise model law on secured transactions based on the general recommendations of the UNCITRAL Legislative Guide on Secured Transactions (the "Secured Transactions Guide") and consistent with all texts prepared by UNCITRAL on secured transactions, including the United Nations Convention on the Assignment of Receivables in International Trade (the "Assignment Convention"), the Supplement on Security Rights in Intellectual Property (the "Intellectual Property Supplement") and the UNCITRAL Guide on the Implementation of a Security Rights Registry (the "Registry Guide").[2]

2. At its twenty-third session (New York, 8-12 April 2013), the Working Group had a general exchange of views on the basis of a note prepared by the Secretariat entitled "Draft Model Law on Secured Transactions" (A/CN.9/WG.VI/WP.55 and Add.1 to 4).

3. At its forty-sixth session (Vienna, 8-26 July 2013), the Commission agreed that the preparation of the draft Model Law was an extremely important project to complement the work of the Commission in the area of security interests and provide urgently needed guidance to States as to how to implement the recommendations of the Secured Transactions Guide. It was also agreed that, in view of the importance of modern secured transactions law for the availability and the cost of credit, and the importance of credit for economic

[1] *Official Records of the General Assembly, Sixty-seventh Session, Supplement No. 17* (A/67/17), para. 105.

[2] Ibid.

development, such guidance was extremely important and urgent to all States at a time of economic crisis but in particular to States with developing economies and economies in transition. In addition, it was stated that the scope of the draft Model Law should include all economically valuable assets.[3] After discussion, the Commission confirmed the mandate it had given to Working Group VI in 2012 (see para. 1 above).[4] The Commission also agreed that whether that work would include security interests in non-intermediated securities would be assessed at a future time.[5]

4. At its twenty-fourth session (Vienna, 2-6 December 2013), the Working Group considered a note by the Secretariat entitled "Draft Model Law on Secured Transactions" (A/CN.9/WG.VI/WP.57 and Add.1 and 2) and requested the Secretariat to revise the draft Model Law to reflect the deliberations and decisions of the Working Group (A/CN.9/796, para. 11). At its twenty-fifth session (New York, 31 March-4 April 2014), the Working Group continued its work based on a note by the Secretariat entitled "Draft Model Law on Secured Transactions" (A/CN.9/WG.VI/WP.57/Add.2-4 and A/CN.9/WG.VI/WP.59 and Add.1) and requested the Secretariat to revise the draft Model Law to reflect the deliberations and decisions of the Working Group (see A/CN.9/802, para. 11). The Working Group also decided to recommend to the Commission that the draft Model Law address security rights in non-intermediated securities along the lines agreed upon by the Working Group at that session (see A/CN.9/802, para. 93).

5. At its forty-seventh session (New York, 7-18 July 2014), the Commission expressed its satisfaction for the considerable progress achieved by the Working Group in its work and requested the Working Group to expedite its work so as to complete the draft Model Law, including certain definitions and provisions on non-intermediated securities, and to submit it to the Commission for adoption together with a guide to enactment as soon as possible.[6]

6. At its twenty-sixth session (Vienna, 8-12 December 2014), the Working Group considered a note by the Secretariat entitled "Draft Model Law on Secured Transactions" (A/CN.9/WG.VI/WP.61 and Add.1-4) and requested the Secretariat to revise the draft Model Law to reflect the deliberations and decisions of the Working Group (see A/CN.9/830, para. 12). At its twenty-seventh session (New York, 20-24 April 2015), the Working Group considered a note by the Secretariat entitled "Draft Model Law on Secured Transactions" (A/CN.9/WG.VI/WP.63 and Add.1-4) and requested the Secretariat to revise the draft Model Law to reflect the deliberations and decisions of the Working Group (see A/CN.9/836, para. 13).

7. At its forty-eighth session (Vienna, 29 June-16 July 2015), the Commission considered and approved in principle article 26 of chapter IV (on the registry system) of the draft Model Law and articles 1 to 29 of the draft Registry Act (see A/CN.9/852). At that session, the Commission also agreed that a draft guide to enactment should be prepared and referred that task to the Working Group.[7]

II. Organization of the session

8. The Working Group, which was composed of all States members of the Commission, held its twenty-eighth session in Vienna from 12 to 16 October 2015. The session was attended by representatives of the following States members of the Working Group: Algeria, Austria, Brazil, Canada, China, Colombia, Croatia, Czech Republic, France, Germany, India, Indonesia, Iran (Islamic Republic of), Italy, Japan, Kenya, Kuwait, Mexico, Pakistan, Panama, Philippines, Republic of Korea, Russian Federation, Spain, Switzerland, Thailand, Turkey, United States of America and Venezuela (Bolivarian Republic of).

9. The session was attended by observers from the following States: Bolivia (Plurinational State of), Cyprus, Dominican Republic, Ghana, Lebanon, Luxembourg,

[3] Ibid., *Sixty-eighth Session, Supplement No. 17* (A/68/17), para. 193.
[4] Ibid., para. 194.
[5] Ibid., para. 332.
[6] Ibid., *Sixty-ninth Session, Supplement No. 17* (A/69/17), para. 163.
[7] Ibid., para. 216.

Portugal, Qatar, Slovakia, United Arab Emirates and Viet Nam. The session was also attended by observers from the Holy See and the European Union.

10. The session was also attended by observers from the following international organizations:

(a) *United Nations system*: World Bank;

(b) *International non-governmental organizations invited by the Commission*: American Bar Association (ABA), Commercial Finance Association (CFA), EU Federation for Factoring and Commercial Finance (EUF), Factors Chain International (FCI), International Bar Association, International Factors Group (IFG), International Insolvency Institute (III), Law Association for Asia and the Pacific (LAWASIA), Moot Alumni Association (MAA) and National Law Centre for Inter-American Free Trade (NLCIFT).

11. The Working Group elected the following officers:

Chairperson: Ms. Kathryn SABO (Canada)

Rapporteur: Ms. Diana MUÑOZ (Mexico)

12. The Working Group had before it the following documents: A/CN.9/WG.VI/WP.64 (Annotated Provisional Agenda) and A/CN.9/WG.VI/WP.65 and Add.1-4 (Draft Model Law on Secured Transactions) and A/CN.9/WG.VI/WP.66 and Add.1-4 (Draft Guide to Enactment).

13. The Working Group adopted the following agenda:

1. Opening of the session and scheduling of meetings.
2. Election of officers.
3. Adoption of the agenda.
4. Draft Model Law on Secured Transactions.
5. Draft Guide to Enactment of the draft Model Law on Secured Transactions.
6. Other business.
7. Adoption of the report.

III. Deliberations and decisions

14. The Working Group considered notes by the Secretariat entitled “Draft Model Law on Secured Transactions” (A/CN.9/WG.VI/WP.65 and Add.2 and 4). The deliberations and decisions of the Working Group are set forth below in chapter IV. The Secretariat was requested to revise the draft Model Law and the draft Guide to Enactment to reflect the deliberations and decisions of the Working Group.

IV. Draft Model Law on Secured Transactions

A. Chapter I. Scope of application and general provisions (A/CN.9/WG.VI/WP.65)

Article 1. Scope of application

15. The Working Group agreed that no type of outright transfer of receivables needed to be excluded explicitly from the scope of the draft Model Law. It was widely felt that States that wished to exclude any type of transaction or asset could do so under subparagraph 3(f). It was also agreed that, to provide guidance to States in that regard, the draft Guide to

Enactment should give a couple of examples (e.g. outright transfers of receivables for collection purposes or as part of a sale of the business out of which they arose).

16. With respect to subparagraph 3(d), the Working Group agreed that, to avoid interfering with other law governing netting agreements, all types of netting agreements, rather than only close-out netting agreements, should be excluded.

17. With respect to subparagraph 3(e), the Working Group agreed that it should be deleted. It was widely felt that, in view of the broad definition of the term "financial contract" (see art. 2, subpara. (l)), subparagraph 3(d) was sufficient to cover also payment rights arising under or from foreign exchange transactions addressed in subparagraph 3(e).

18. With respect to paragraph 5, the Working Group agreed that, to avoid creating questions of interpretation, it should be aligned more closely with article 4, paragraph 4 of the Assignment Convention.

19. Subject to the above-mentioned changes, the Working Group adopted article 1.

Article 2. Definitions and rules of interpretation

"Acquisition security right"

20. It was agreed that, to simplify and shorten the definition of the term "acquisition security right", the words "an obligation incurred or credit otherwise provided" could be replaced by the words "other credit extended". It was also agreed that that definition should be revised to ensure that only a security right securing an obligation to pay credit actually used for the acquisition of an asset would be afforded the special priority status that an acquisition security right would have under the draft Model Law.

"Bank account"

21. It was agreed that the term "bank" was too narrow to cover all relevant institutions and should thus be replaced by words along the following lines: "financial institution authorised to receive deposits from the public", "an institution to be specified by the enacting State" or "by a bank as defined in [another law to be specified by the enacting State]" and "[any institution to be specified by the enacting State]".

22. It was also agreed that the words "other than a securities account" that appeared within square brackets in the definition of the term "bank account" could also be deleted on the understanding that the draft Guide to Enactment would clarify that the draft Model Law did not apply to the right to payment of funds credited to a securities account. Alternatively, it was suggested, article 1, subparagraph 3(c), should be revised to also exclude securities accounts. Finally, it was agreed that, as the type of bank account to be covered might differ from State to State, the second and the third sentences of the definition of the term "bank account" should be deleted and discussed as examples in the draft Guide to Enactment.

"Competing claimant"

23. Diverging views were expressed as to whether both the chapeau and the list of types of competing claimant should be retained in the definition of the term "competing claimant". After discussion, it was agreed that, at least for educational reasons, both the chapeau and the list of types of competing claimant should be retained.

24. As to the formulation of that definition, it was agreed that: (a) the words "in conflict" that appeared in the chapeau should be replaced with the words "in competition"; (b) the words "whether as an original encumbered asset or proceeds" that appeared in parenthesis in subparagraph (i) were redundant and should thus be deleted, while the draft Guide to Enactment could discuss the matter addressed by those words; (c) the words "such as a judgement creditor or" that appeared in subparagraph (ii) should be deleted so that it would be left to the enacting State to specify the types of creditor that might have a right in the same encumbered assets, while the draft Guide to Enactment could give examples; and (d) for reasons of consistency with the articles in which those words were used (e.g. arts. 29 and 30), the words "or other transferee" that appeared in subparagraph (iv) within square brackets should be retained outside square brackets.

“Consumer goods”

25. To ensure that goods used incidentally for personal, family or household purposes would not be treated as consumer goods in the draft Model Law, the Working Group agreed that reference should be made to such goods being “primarily” used for such purposes and thus the word “primarily” that appeared within square brackets in the definition of the term “consumer goods” within square brackets should be retained outside square brackets. The Working Group also agreed that reference should be made in that definition to “the” grantor, rather than to “a” grantor (in the definitions of the terms “equipment” and “inventory” as well).

“Debtor of the receivable”

26. Diverging views were expressed as to whether a different term should be used to avoid confusing the “debtor of the receivable” with the “debtor” of the secured obligation. After discussion, for reasons of consistency with the Assignment Convention and the Secured Transactions Guide, it was agreed that the term “debtor of the receivable” should be retained as it was. At the same time, it was agreed that, to make the distinction between those terms sufficiently clear, reference should be made in the definition of the term “debtor of the receivable” to the payment of an “encumbered receivable” or “a receivable that was subject to a security right”.

“Encumbered asset”

27. As the definitions of the terms “tangible asset” and “intangible asset” referred to movable assets, it was agreed that the term “movable” in the definition of the term “encumbered asset” was redundant and should thus be deleted (in the definition of the term “future asset” as well).

“Equipment”

28. It was agreed that all the bracketed wording contained in the definition of the term “equipment” (“other than inventory”, “primarily” and “or intended to be used”) added clarity and should thus be retained. It was also suggested that, to avoid having to exclude in the definition of the term “equipment” the types of reified intangible asset that were included in the definition of the term “tangible asset”, reference should be made to “goods” rather than to tangible assets (in the definitions of the terms “inventory”, “mass or product” and “tangible asset” as well). However, it was noted that the term goods was not always understood in the same way in all legal systems. The drafting was therefore referred to the Secretariat.

“Independent undertaking”

29. It was agreed that, in line with the approach taken in the definition of the term “independent undertaking” in the Secured Transactions Guide, the definition of that term in the draft Model Law should also refer to commercial letters of credit. Noting that the term “independent undertaking” was used in article 1, subparagraph 3(a), and in article 13, option A, paragraph 2, the Working Group agreed that, depending on its decision with respect to article 13, the matter could be addressed in article 1, subparagraph 3(a), and the definition of that term could be deleted (see para. 60 below).

“Insolvency representative”

30. It was suggested that, to cover situations in which the insolvent debtor remained in possession of the insolvency estate, reference should also be made in the definition of the term “insolvency representative” to the supervision (and not only to the administration) of reorganization or liquidation proceedings by the insolvency representative. It was agreed that that point should be addressed in the definition or in the draft Guide to Enactment in a way that would be consistent with the Secured Transactions Guide and the UNCITRAL Legislative Guide on Insolvency Law (the “Insolvency Guide”).

"Inventory"

31. It was agreed that, as inventory could not be held partly for sale or lease in the ordinary course of business and partly for other purposes, the reference to the primary purpose of the grantor holding inventory that appeared in the definition of the term "inventory" could be deleted. It was also agreed that the draft Guide to Enactment should clarify that, in States that treated a lease of goods as a licence, reference should also be made in that definition to a "licence" of goods.

"Money"

32. It was agreed that the word "currently" that appeared in the definition of the term "money" should be deleted and the draft Guide to Enactment should explain that that word was deleted as redundant, since, if currency was not "currently authorized" as "legal tender", it would not qualify as "legal tender".

"Netting agreement"

33. Recalling its decision with respect to article 1, subparagraph 3(d) (see para. 16 above), the Working Group agreed that the term to be defined should be "netting agreement", rather than "close-out netting agreement" and thus the words "close-out" that appeared within square brackets in the definition of the term "netting agreement" should be deleted.

"Notification of a security right in a receivable"

34. It was agreed that the second sentence of the definition of the term "notification of a security right in a receivable" contained a substantive rule and should thus be moved to the relevant article (i.e. art. 56). Diverging views were expressed as to whether what was left of that definition should also be moved to the relevant article. After discussion, it was agreed that it should be retained in article 2 as a definition or rule of interpretation. As to the form of a notification of a security right in a receivable, the Working Group noted that, since the term "notice" was defined as a communication in writing and the term "notification of a security right in a receivable" was defined as a particular type of notice, a notification of a security right should be in writing.

"Possession"

35. It was agreed that the reference to "actual possession" in the definition of the term "possession" was sufficient to exclude deemed or constructive possession from the concept of "possession". It was also agreed that the reference to possession being "physical" that appeared within square brackets in the definition of the term possession was redundant, as only tangible assets could be subject to possession, and should thus be deleted.

"Priority"

36. The Working Group agreed that the definition of the term "priority" should be revised to read along the lines of article 5, subparagraph (g), of the Assignment Convention and thus to refer to the right (not just the economic benefit) of a person (not just a secured creditor) in preference to the right of a competing claimant.

"Proceeds"

37. Diverging views were expressed with respect to whether the definition of the term "proceeds" should be limited to proceeds received by the grantor and not extend to proceeds received, for example, by a transferee of the original encumbered asset. In support of that approach, it was stated that, without that limitation, the rights of third-party transferees would be unduly prejudiced, as they would have no way of finding out that the assets were proceeds of another asset in which somebody else had a security right, at least where the proceeds were cash proceeds and thus a security right in such proceeds would be effective against third parties without the registration of an amendment notice (see art. 17, para. 1). It was also observed that the rights of the secured creditor of the transferor would be sufficiently protected in any case, as, subject to limited exceptions (see, for example, art. 29, paras. 2 and 3), the security right would typically follow the asset in the hands of any

transferee and any other person that would obtain a right in the asset from the transferee. In opposition to that limitation of the concept of "proceeds", it was stated that, with that limitation, even where the transferee of an encumbered asset acquired the asset subject to a security right, it could sell the asset and keep the proceeds. It was also observed that, in any case, the limitation of the concept of "proceeds" would not be necessary to protect transferees that were already protected under other provisions of the draft Model Law. After discussion, it was agreed that, while the definition of the term "proceeds" should be retained as it was, the draft Guide to Enactment should explain the possible impact of that definition and ways to avoid a prejudice to third-party transferees that were not otherwise protected by other provisions of the draft Model Law.

"Receivable"

38. It was agreed that the reference to "a right to receive the proceeds under an independent undertaking" that appeared in the definition of the term "receivable" should be deleted, as under article 1, subparagraph 3(a), the draft Model Law did not apply to that type of asset. It was also agreed that a reference to non-intermediated securities that gave rise to rights to payment (i.e. debt securities) should also be made in the definition of the term "receivable" so that they would also be excluded from the scope of the term "receivable".

"Right to receive the proceeds under an independent undertaking"

39. In view of the fact that the draft Model Law did not apply to any rights arising from an independent undertaking (see para. 38 above), the Working Group agreed that the definition of the term "right to receive the proceeds under an independent undertaking" should be deleted.

"Secured obligation"

40. With respect to the wording in the definitions of the terms "grantor", "secured creditor", "secured obligation", "security agreement" and "security right" dealing with outright transfers of receivables, it was agreed that two alternative formulations should be prepared; one that would deal with the issue in one provision that would be placed in article 1; and another in which the relevant wording should be retained in each relevant definition, but in a more streamlined way to provide, for example, that the term "secured creditor" meant: (a) a creditor that had a security right; and (b) a transferee in an outright transfer of receivable.

41. Subject to the above-mentioned changes, the Working Group adopted article 2.

Article 3. International obligations of this State

42. In view of the diverging approaches followed from State to State with respect to the hierarchy between treaty obligations and domestic law of a State, the Working Group agreed that article 3 should be deleted and the matter addressed therein left to other law of the enacting State. It was also agreed that the draft Guide to Enactment could give examples of approaches followed by various States with respect to the hierarchy between national law rules and international obligations of a State.

Article 4. Party autonomy

43. The Working Group noted that article 4 was based on article 6 of the Assignment Convention and recommendation 10 of the Secured Transactions Guide. With respect to paragraph 1, it was agreed that it should be revised to ensure: (a) clarity, as the provisions referred to therein did not provide explicitly that they were mandatory law rules; (b) the list of mandatory law rules contained therein would be complete and accurate; and (c) the ability of competing claimants to enter into a subordination agreement would not be impaired.

44. Diverging views were expressed as to whether paragraph 2 should be retained, as it appeared to set out the general principle of contract law that an agreement between two parties could not affect the rights of third parties. After discussion, it was agreed that paragraph 2 should be retained, since the draft Model Law dealt also with relationships in which an agreement between two parties (e.g. the grantor and the secured creditor) might

have or appear to have an impact on the rights of third parties (e.g. the debtor of the receivable). For reasons of simplicity and consistency with the provisions on which article 4 was based, it was also agreed that the word "negatively" that appeared within square brackets in paragraph 2 should be deleted.

45. Subject to the above-mentioned changes, the Working Group adopted article 4.

Article 5. General standards of conduct

46. It was agreed that subparagraph 2(a) was not necessary and should thus be deleted, as article 4 already stated that the rule embodied in paragraph 1 could not be waived unilaterally or varied by agreement. It was also agreed that subparagraph 2(b) should be deleted, as, in the case of an outright transfer of a receivable without recourse against the transferor: (a) the transferee still had towards the debtor of the receivable the obligation to comply with the standards of conduct set forth in paragraph 1; and (b) it was obvious that the transferor had no remaining right or obligation. Subject to those changes, the Working Group adopted article 5.

47. In the discussion, the Working Group considered whether a provision should be added to deal with the interpretation of, and the filling of gaps, in the draft Model Law. After discussion, the Working Group agreed that such a provision should be added at the end of chapter I. The Working Group also agreed that the matter could be discussed in the draft Guide to Enactment by reference to the harmonization effect of an UNCITRAL model law and the key objectives and fundamental policies of the draft Model Law (see A/CN.9/WG.VI/WP.66, paras. 37-40, 44 and 45).

B. Chapter II. Creation of a security right (A/CN.9/WG.VI/WP.65)

Article 6. Security agreement

48. It was agreed that: (a) the heading of article 6 should be revised to better reflect its content; (b) paragraphs 3 and 4 should be merged for the conditions set forth in paragraph 3(b) through (e) to apply only to written security agreements and for paragraph 3(a) to apply to both written and oral security agreement; and (c) no reference should be made in paragraph 5 to control. With respect to the last matter, while diverging views were expressed, it was agreed that, whether control was automatic or achieved by way of a control agreement, it was not equivalent to possession (which provided a warning to third parties that the grantor's rights in the encumbered asset might not be unencumbered) or to a written security agreement (that had to satisfy the requirements of paragraph 3). It was also agreed that the draft Guide to Enactment would make clear that formal words were not necessary to create a security right. Subject to those changes, the Working Group adopted article 6.

49. In the discussion, the suggestion was made that a provision should be added, perhaps in the chapter of the draft Model Law on enforcement, to effectuate the policy embodied in article 6, subparagraph 3(e), with respect to the maximum amount for which the security right might be enforced. After discussion, the Working Group agreed to consider that suggestion when it had the opportunity to discuss the chapter on enforcement.

Article 7. Obligations that may be secured

50. After discussion, the Working Group adopted article 7 unchanged.

Article 8. Assets that may be encumbered

51. The Working Group noted that subparagraphs (c) and (d) dealt with the description of encumbered assets, a matter addressed in article 9. However, it agreed that those provisions should be retained because of their importance and the fact that their adoption would introduce significant changes to many legal systems. After discussion, the Working Group adopted article 8 unchanged.

Article 9. Description of encumbered assets

52. It was agreed that, to align the wording of article 9 more closely with that of article 8, subparagraph (c), the word "generic" should be added before the word "category" in paragraph 2. Subject to that change, the Working Group adopted article 9.

53. In the discussion, it was noted that, pursuant to the changes to article 6 (see para. 48 above), article 9 would only apply to a written security agreement.

Article 10. Proceeds and proceeds in the form of funds commingled with other funds

54. It was agreed that: (a) the heading of article 10 should be revised to reflect more closely its contents (e.g. "right to proceeds and commingled funds"); (b) paragraph 1 embodied the very important principle that a security right in an asset extended to its proceeds and should thus be separated from paragraphs 2-4, which dealt with commingled funds and could be combined in a new paragraph; (c) in the new paragraph, the wording of paragraph 2 should be revised to read along the following lines: "notwithstanding the fact that proceeds in the form of funds are not identifiable as a result of commingling with other assets of the same type, the security right extends to the commingled assets"; and (d) in the new paragraph, the wording of paragraph 3 should be revised to read along the following lines: "the security right in the commingled assets is limited to …" (and thus avoid any confusion with the optional wording, which refers to the maximum monetary amount and which is contained in art. 6, para. 3 (e)). Subject to those changes, the Working Group adopted article 10.

Article 11. Tangible assets commingled in a mass or product

55. Diverging views were expressed as to whether the same rules should apply to tangible assets when they were commingled in a mass or in a product. One view was that a rule along the lines of recommendation 22 of the Secured Transactions Guide should apply to both masses and products where there were no competing rights, while paragraph 4 was sufficient to apply to situations where there were competing rights. Another view was that, to deal with commodity price fluctuations, paragraph 2 with the first set of bracketed words should apply to masses and paragraph 3 with the second set of bracketed words should apply to products. After discussion, the Working Group requested the Secretariat to prepare two options reflecting the views expressed for further consideration. With respect to paragraph 4, the Working Group agreed that it should be retained outside square brackets. Subject to those changes, the Working Group adopted article 11.

Article 11bis. Extinction of a security right

56. As a matter of policy, it was agreed that, even if the balance in a revolving credit account was temporarily zero, a security right should not be extinguished as long as there was a further commitment by the secured creditor to extend credit. However, as a matter of drafting, diverging views were expressed as to how that policy should be reflected in article 11bis. One view was that, for reasons of legal certainty, the principle that full payment of all secured obligations should result in the extinction of a security right should not be diluted with references to any other issue. It was stated that issues relating to revolving credit arrangements could be discussed in the draft Guide to Enactment. Another view was that revolving credit arrangements were extremely important and thus article 11bis should avoid giving the impression that the security right could be extinguished while the secured creditor had an open commitment to extend further credit. It was observed that, in the absence of the proviso in article 11bis, it would not be clear that it covered conditional secured obligations.

57. After discussion, it was agreed that article 11bis should be revised to provide that a security right would be extinguished only upon full payment or other satisfaction of all present and future secured obligations, including conditional obligations. It was also agreed that the draft Guide to Enactment would clarify that the reference to future, including conditional, secured obligations was intended to address the obligation of a secured creditor to extend further credit on the basis of revolving credit agreements.

58. Subject to the above-mentioned changes, the Working Group adopted article 11bis.

Article 12. Contractual limitations on the creation of a security right

59. It was agreed that: (a) for reasons of clarity in the text and consistency with article 9 of the Assignment Convention and recommendation 24 of the Secured Transaction Guide, on which article 12 was based, paragraphs 1 and 2 should be revised to refer only to contractual limitations on the creation of a security right in a receivable; (b) the last set of bracketed words in paragraph 2 should be retained outside square brackets; and (c) in subparagraph 4 (d), the first set of bracketed words should be revised to avoid repetition of elements already contained in the definition of the term "netting agreement" (see art. 2, subpara. (w)) and retained outside square brackets, while the second bracketed set of words should be deleted. Subject to those changes, the Working Group adopted article 12.

Article 13. Personal or property rights securing or supporting payment or other performance of an encumbered receivable or other intangible asset, or negotiable instrument

60. It was agreed that paragraph 1 of option A and paragraph 2 of option B should be retained, while paragraph 2 of option A and paragraphs 3-5 of option B should be deleted and the matters addressed therein should be discussed in the draft Guide to Enactment. It was also agreed that the draft Guide to Enactment should explain that the rule in article 12 applied to contractual limitations on the creation of a security right not only in a receivable but also in personal or property rights securing payment or other performance of a receivable or other intangible asset, or negotiable instrument (see rec. 25, subpara. (d), of the Secured Transactions Guide). Subject to those changes, the Working Group adopted article 13.

61. In view of its decision to limit article 12 to receivables, the Working Group agreed that the article implementing recommendation 26 of the Secured Transactions Guide, which dealt with contractual limitations on the creation of a security right in a right to payment of funds credited to a bank account and which had been deleted, should be reinstated (see A/CN.9/830, para. 63).

Article 14. Negotiable documents and tangible assets covered

62. It was agreed that article 14 or the definition of the term "possession" contained in article 2 should be revised to address situations in which the issuer of a negotiable document held the document through various persons responsible to perform various parts of a multimodal transport contract. It was also agreed that the heading of article 14 (and all articles with the same heading) should be reviewed to ensure that it accurately reflected its contents. Subject to those changes, the Working Group adopted article 14.

Article 15. Tangible assets with respect to which intellectual property is used

63. The Working Group adopted article 15 unchanged.

C. Chapter III. Effectiveness of a security right against third parties (A/CN.9/WG.VI/WP.65)

Article 16. General methods for achieving third-party effectiveness

64. It was agreed that the reference to specialized registration in article 16 should be deleted and the matter discussed in the draft Guide to Enactment in order to ensure coordination between the Registry foreseen in the draft Model Law and existing, well-functioning specialized registration systems relating to assets to which the draft Model Law applied (e.g. intellectual property). It was also agreed that article 16 should be revised to clarify that possession was a third-party effectiveness method only for security rights in tangible assets. Subject to those changes, the Working Group adopted article 16.

65. In the discussion, a number of suggestions were made. One suggestion was that article 16 should be revised to refer to all methods of third-party effectiveness. Another suggestion was that reference should be made to notation on an invoice as method of third-party effectiveness of outright transfers of receivables. There was no sufficient support for those suggestions.

Article 17. Proceeds

66. A number of suggestions were made. One suggestion was that the order of paragraphs 1 and 2 should be reversed. Another suggestion was that the words "without any further action by the grantor or the secured creditor" should be replaced by words along the following lines: "automatically when the proceeds arise". There was no sufficient support for those suggestions. After discussion, the Working Group adopted article 17 unchanged.

Article 18. Changes in the method for achieving third-party effectiveness

67. It was agreed that paragraph 1 should be deleted, as its thrust was already reflected in paragraph 2. Subject to that change, the Working Group adopted article 18.

Article 19. Lapse in third-party effectiveness

68. It was agreed that article 19 should be revised to read along the following lines: "If the third-party effectiveness of a security right lapses, it may be re-established, but the security right is effective against third parties only as of that time". Subject to those changes, the Working Group adopted article 19.

Article 20. Impact of a transfer of an encumbered asset

69. It was agreed that the principle of the *droit de suite* of a security right embodied in article 20 was sufficiently addressed in article 29, and thus article 20 should be deleted.

Article 21. Continuity in third-party effectiveness upon a change of the applicable law to this Law

70. It was agreed that, under paragraph 1, the security right remained effective against third parties under the law of the enacting State, if: (a) the third-party effectiveness requirements of the law of the enacting State were satisfied within a short period of time (e.g. 60-90 days); and (b) at that time, the security right was effective against third parties under the law of the State whose law was previously applicable (i.e. its third-party effectiveness had not lapsed). In addition, it was agreed that the draft Guide to Enactment should explain the policy of article 21. Moreover, it was agreed that article 21 should be retained in the third-party effectiveness chapter and not moved to the conflict-of-laws chapter, as it dealt with continuity of third-party effectiveness (even if the issue arose as a result of a change of applicable law). Subject to any changes necessary to clarify its policy, the Working Group adopted article 21.

Article 22. Acquisition security rights in consumer goods

71. It was agreed that article 22 should be revised to include two options. The first option should provide that, upon its creation, an acquisition security right in the goods would be automatically effective against third parties except buyers of consumer goods. The second option should provide for the automatic third-party effectiveness of an acquisition security right in consumer goods, but only if the value of the consumer goods was below a low amount to be specified by the enacting State. Subject to those changes, the Working Group adopted article 22.

Article 23. Rights to payment of funds credited to a bank account

72. The Working Group adopted article 23 unchanged and agreed that the issue of how a secured creditor might become the account holder should be discussed in the draft Guide to Enactment.

Article 24. Negotiable documents and tangible assets covered

73. It was agreed that, as in the chapeau of articles 23 and 25, the word "also" should be inserted in paragraph 2 to ensure that registration was always available as a general method of third-party effectiveness. Subject to that change, the Working Group adopted article 24.

Article 25. Uncertificated non-intermediated securities

74. It was agreed that subparagraph (a) should be revised to clarify that the two methods for achieving third-party effectiveness were alternatives for the enacting State to choose from. Subject to that change, the Working Group adopted article 25.

D. Chapter V. Priority of a security right (A/CN.9/WG.VI/WP.65/Add.2)

Article 27. Competing security rights

75. The Working Group agreed that, in view of their importance, article 27, paragraph 1, and article 28 should be merged and form the first article of the chapter on priority. It was also agreed that paragraphs 2 to 8 should be set forth separately. The Working Group also agreed that paragraph 2 that appeared within square brackets should be retained outside square brackets, properly revised to read along the following lines: "Subject to article 27, priority among competing security rights created by different grantors in the same encumbered asset is determined according to the order of third-party effectiveness". In response to a statement that paragraph 3 might not be accurate, as a change in the method of third-party effectiveness could change the order of priority, it was noted that, by definition, asset-specific rules would modify the general rules in each chapter. It was agreed that that matter could usefully be clarified in the draft Guide to Enactment. Subject to those changes, the Working Group adopted article 27.

Article 28. Competing security rights in the case of advanced registration

76. It was agreed that option A should be retained, as it was clearer and simpler than option B, and moved to article 27 as paragraph 2, while option B should be deleted. Subject to those changes, the Working Group adopted option A unchanged.

Article 29. Rights of buyers or other transferees, lessees or licensees of an encumbered asset

77. The suggestion was made that paragraphs 4, 5, 7 and 8 should refer to "goods" rather than to "tangible assets", as the latter term included negotiable instruments and other similar reified intangible assets (see art. 2, subpara. (kk)), to which those paragraphs should not apply. While it was agreed that those paragraphs should not apply to those types of asset, it was widely felt that that change was not necessary, since the relevant asset-specific rules addressed those matters and, by definition, modified general rules like that contained in article 29. It was also agreed that the draft Guide to Enactment should clarify that the words "buyer or other transferee, lessee or licensee" included donees. After discussion, the Working Group adopted article 29 unchanged.

Article 30. Rights of buyers or other transferees, lessees or licensees of an encumbered asset in the case of specialized registration

78. In view of its decision on article 16 (see para. 64 above), the Working Group agreed that article 30 should be deleted and the matters addressed therein discussed in the draft Guide to Enactment.

Article 31. Rights of the insolvency representative

79. It was agreed that, while all of article 31 dealt with insolvency law issues, paragraph 1 should be retained because of its importance, while paragraphs 2 and 3 should be deleted. It was also agreed that the matters addressed in paragraphs 2 and 3 should be discussed in the draft Guide to Enactment, to also highlight with appropriate references to the Secured Transactions Guide and the Insolvency Guide, the need for the enacting State to coordinate its secured transactions and insolvency laws. It was also agreed that the title of article 31 should be modified to reflect its content. Subject to those changes, the Working Group adopted article 31.

Articles 32, 38-44

80. The Working Group adopted articles 32, 38-44 unchanged.

Article 33. Rights of judgement creditors

81. It was agreed that paragraph 2 should be aligned more closely with recommendation 84 of the Secured Transactions Guide and refer to an "extension" rather than to a "disbursement" of credit and to the notification being received by the secured creditor. Subject to those changes, the Working Group adopted article 33.

Articles 34-37

82. It was agreed that articles 34-37 should be revised to: (a) clearly describe the types of asset that were subject to each rule; (b) refer to consumer goods being used "primarily" for personal, family or household purposes; and (c) refer to the need for registration to occur "not later than" a specified number of days after delivery of the goods (rather than "within", which might be read as precluding registration before delivery). Subject to those changes, the Working Group adopted articles 34-37.

Article 45. Intellectual property

83. It was agreed that the words that appeared within square brackets in article 45 should be retained. Subject to that change, the Working Group adopted article 45.

Article 46. Non-intermediated securities

84. It was agreed that option A of paragraph 5 should be retained, as it was clearer than option B, while option B should be deleted. Subject to that change, the Working Group adopted article 46.

E. Chapter VIII. Conflict of laws (A/CN.9/WG.VI/WP.65/Add.4)

85. The Working Group agreed that the draft Guide to Enactment should explain that the conflict-of-laws rules should apply without a prior determination that the laws of different States would be involved in any particular case. It was widely felt that requiring a determination as to whether a situation involved a choice of laws would create uncertainty because a court might view the issue as involving a choice of laws, while another court might treat the issue differently.

Articles 78, 84, 86 and 89

86. The Working Group adopted articles 78, 84, 86 and 89 unchanged.

Article 79. Law applicable to a security right in a tangible asset

87. In view of its decision with respect to specialized registration issues (see para. 64 above), the Working Group agreed that the words "subject to paragraph 4, the" that appeared within square brackets in paragraph 3, and paragraph 4 as a whole, should be deleted, while the rules contained therein should be discussed in the draft Guide to Enactment. It was also agreed that the words contained in parenthesis in paragraph 5 should be deleted as the types of asset referred to therein (e.g. negotiable instruments) would not be captured by the expression "tangible assets in transit or to be exported". Subject to those changes, the Working Group adopted article 79.

Article 80. Law applicable to a security right in an intangible asset

88. It was widely felt that article 80 appropriately addressed the issue of the law applicable to the creation of a security right, which was a matter of property law, and not the mutual rights and obligations of the parties, which was a matter of contract law and subject to party autonomy (see art. 78). Thus, it was agreed that articles 78 and 80 were consistent with articles 28 and 30 of the Assignment Convention and recommendations 208 and 216 of the

Secured Transactions Guide. After discussion, the Working Group adopted article 80 unchanged.

Article 81. Law applicable to a security right in receivables arising from a sale or lease of or a transaction secured by immovable property

89. It was agreed that paragraph 1 should be deleted, as it simply reiterated the rule embodied in article 80, and paragraph 2 should be revised to: (a) begin with the words "Notwithstanding article 80"; and (b) to refer to the priority of a security right in a receivable that was "registrable" (rather than registered) in the immovable property registry. It was widely felt that, with that change, for article 81 to apply, it would not be necessary to determine that: (a) the law governing the immovable property registry permitted registration with respect to security rights for third-party effectiveness and priority purposes; and (b) a competing claimant did in fact register in the immovable property registry. Subject to those changes, the Working Group adopted article 81.

Article 82. Law applicable to the enforcement of a security right

90. Diverging views were expressed as to the law applicable to the enforcement of a security right in a tangible asset under subparagraph (a). One view was that the words "the relevant act" of enforcement should be retained outside square brackets, as enforcement involved various acts that could take place in different States. As a result, repossession of an asset could take place in, and be subject to the law of, one State, while the sale of the asset could take place in, and be subject to the law of, another State. Another view was that those words should not be added to subparagraph (a), as enforcement could not commence in one State and continue in another State. In that connection, it was suggested that subparagraph (a) should state more clearly the applicable law and thus refer to the law of the State in which a tangible asset was located. There was support for that suggestion. However, to have time to consider the matter carefully and avoid unnecessarily changing the rule in recommendation 218, subparagraph (a), on which article 82, subparagraph (a), was based, the Working Group agreed that article 82 should be revised to include two options that would read along the following lines: "The law applicable to issues relating to the enforcement of a security right: (a) In a tangible asset is the law of the State where [enforcement takes place] [the encumbered asset is located at the time of commencement of enforcement], except as provided in article 93". Subject to those changes, the Working Group adopted article 82.

Article 83. Law applicable to security rights in proceeds of an encumbered asset

91. Diverging views were expressed as to whether the rule in article 83 should be retained in its present formulation. One view was that the bifurcated rule of article 83 might lead to difficulties in cases where the law governing creation provided that a security right in proceeds was automatically effective against third parties (e.g. art. 17, para. 1), while the law governing third-party effectiveness and priority provided that, for a security right in proceeds to be effective against third parties, a new registration was necessary (e.g. art. 17, para. 2). Another view was that the rule in article 83 was appropriate, as paragraph 2 would only come into play only if a security right had been effectively created in accordance with the law applicable under paragraph 1. As a result, it was stated, if the proceeds were in the form of receivables, under paragraph 2, the law applicable would be the law governing the third-party effectiveness and priority of a security right in receivables as originally encumbered assets (i.e. art. 80). After discussion, the Working Group agreed that the matter should be discussed in the draft Guide to Enactment and adopted article 83 unchanged. The Working Group also agreed that the draft Guide to Enactment should explain that article 83 addressed the issue of the law applicable to proceeds derived from a disposition of an encumbered asset outside the context of the enforcement, while article 82 dealt with the law applicable to proceeds derived from a disposition of an encumbered asset pursuant to enforcement proceedings.

Article 85. Relevant time for determining location

92. It was agreed that paragraph 2 should be revised to refer to rights of competing secured creditors being "created and made effective against third parties", and to the rights of all other competing claimants being "established". Diverging views were expressed as to

whether the rule in article 85 would be appropriate where there was a change in the location of an encumbered asset or the grantor after the creation of a security right or even after the commencement of enforcement proceedings. In that regard, it was observed that, while a change in the location of an encumbered asset or the grantor was envisaged in various articles, article 85 should not give the impression that enforcement proceedings that were commenced in one State could continue in another State. In response, it was pointed out that the new rule proposed for article 82, subparagraph (a), might be sufficient to address the issue arising as a result of a change of location of an encumbered asset or the grantor. After discussion, subject to the above-mentioned change to paragraph 2, the Working Group adopted article 85, on the understanding that it would consider further the matter of the application of article 85 in the case of a change in the location of an encumbered asset or the grantor.

Article 87. Overriding mandatory rules and public policy (*ordre public*)

93. It was agreed that article 11, paragraph 5, of the Hague Principles on Choice of Law in International Commercial Contracts (the "Hague Principles"), which dealt with the public policy and mandatory law exception in the case of arbitral proceedings should also be added to article 87, in view of the importance of arbitration proceedings, the need to include all paragraphs of article 11 and the fact that UNCITRAL had endorsed the Hague Principles. It was also agreed that paragraph 5 should be revised to read along the following lines: "This article does not permit a court to displace the provisions of this chapter dealing with the law applicable to the third-party effectiveness and priority of a security right". Subject to those changes, the Working Group adopted article 87.

Article 88. Impact of commencement of insolvency proceedings on the law applicable to a security right

94. It was agreed that paragraph 1 should be revised to read along the following lines: "The commencement of insolvency proceedings relating to the grantor does not displace the law applicable to a security right under the provisions of this chapter". It was also agreed that paragraph 2 should be deleted, as it addressed matters referred to the *lex fori concursus* under insolvency law, and the matters addressed therein should be discussed in the draft Guide to Enactment. Subject to those changes, the Working Group adopted article 88.

Article 90. Law applicable to a security right in a right to payment of funds credited to a bank account

95. It was agreed that the draft Guide to Enactment should explain that, where a bank offered its services only through an online connection, for the purpose of option A of article 90, its branch or office should be considered as being located in the jurisdiction specified by law for regulatory and other purposes (e.g. court jurisdiction and anti-money-laundering laws).

Article 91. Law applicable to the third-party effectiveness of a security right in certain types of asset by registration

96. It was agreed that article 91 should be simplified so that it would apply to the third-party effectiveness of a security right by registration under the law of the grantor's location, whether or not such registration had in fact taken place. It was also agreed that article 91 should be revised to be made applicable also to negotiable documents and certificated non-intermediated securities. Subject to those changes, the Working Group adopted article 91.

Articles 92 and 94

97. The Working Group adopted articles 92 and 94 unchanged.

Article 93. Law applicable to a security right in non-intermediated securities

98. Diverging views were expressed as to the option or options of article 93 that were preferable and should be retained. After discussion, it was agreed that all options should be retained for further consideration. It was also agreed that a variant should be prepared for

paragraph 2 of option A, to refer effectiveness of a security right in debt securities against the issuer to the law governing the securities.

F. Chapter IX. Transition (A/CN.9/WG.VI/WP.65/Add.4)

Articles 95 and 97

99. The Working Group adopted articles 95 and 97 unchanged.

Article 96. Transitional application of this Law

100. It was agreed that, in the definition of the term "prior law" and where else necessary (e.g. art. 99), alternatives should be prepared to address situations in which the prior law was not the law of the enacting State but the law of another State applicable by virtue of the conflict-of-laws rules of the enacting State. It was also agreed that the definition of the term "prior security right" should be revised to refer to security rights covered by a security agreement entered into before the entry into force of the new law, to provide the benefits of the transition rules even to security rights in assets produced or acquired by the grantor after the entry into force of the new law. Subject to those changes, the Working Group adopted article 96.

Article 98. Creation of a prior security right

101. It was agreed that paragraph 2 should be revised to avoid the repetition of elements already addressed in the definition of the term "prior security right". Subject to that change, the Working Group adopted article 98.

Articles 99 and 100

102. Subject to any changes necessary to ensure that security rights created and made effective against third parties under a prior law other than a prior law of the enacting State would benefit from the transition rules, the Working Group adopted articles 99 and 100.

Article 101. Entry into force of this Law

103. It was agreed that options A to C should be replaced by wording within square brackets leaving the matter addressed in article 101 to each enacting State. It was also agreed that all options should be discussed in the draft Guide to Enactment, with particular emphasis on the essence of option C, namely the need to link the entry into force of the new law with the time the Registry would become operational.

V. Future work

104. The Working Group noted that its next session was scheduled to take place in New York from 8 to 12 February 2016. The Working Group also noted that, while completing the draft Model Law at its next session was difficult, it was possible and every effort should be made for the Working Group to achieve that result. The Working Group also noted that, in order to complete the draft Guide to Enactment, it might need to request the Commission for an additional 1 session or 2 sessions.

B. Note by the Secretariat on a draft model law on secured transactions (A/CN.9/WG.VI/WP.65 and Add.1-4)

[Original: English]

Contents

Chapter I. Scope of application and general provisions

Article 1. Scope of application

1. This Law applies to security rights in movable assets.

2. With the exception of articles 66-76, this Law applies to outright transfers of receivables.

3. Notwithstanding paragraph 1, this Law does not apply to security rights in:

(a) The right to request payment under or to receive the proceeds of an independent undertaking;

(b) Intellectual property in so far as this Law is inconsistent with [the enacting State to specify its law relating to intellectual property];[1]

(c) Intermediated securities;

(d) Payment rights arising under or from financial contracts governed by [close-out] netting agreements, except a payment right arising upon the termination of all outstanding transactions;

(e) Payment rights arising under or from foreign exchange transactions; and

(f) [The enacting State to set out other types of asset it wishes to exclude, such as those that are subject to specialized secured transactions and asset-based registration regimes under other law to the extent that that other law governs matters addressed in this Law].[2]

[4. This Law does not apply to security rights in proceeds of encumbered assets if the proceeds are a type of asset that is outside the scope of this Law to the extent that [the enacting State to specify any other law] applies to security rights in those types of asset and governs the matters addressed in this Law.]

5. [Nothing in this Law affects the application of] [This Law is subject to] laws relating to the protection of parties to transactions made for personal, family or household purposes.

6. [Nothing in this Law overrides a provision of any other law that limits the creation or enforcement of a security right in, or the transferability of, specific types of asset, with the exception of a provision that limits the creation or enforcement of a security right in or the transferability of an asset on the sole ground that it is a future asset, or a part or undivided interest in an asset].

[*Note to the Working Group: The Working Group may wish to consider whether certain types of outright transfers of receivables that are often excluded from the scope of secured transactions laws in several jurisdictions should also be excluded from the scope of the draft Model Law or at least discussed in the Guide to Enactment. In this regard the Working Group may wish to consider the following possible exclusions*:

(a) Outright transfers of receivables as part of a sale of a business out of which they arose, unless the seller remains in apparent control of the business after the sale: the reason for this exclusion is that the potential that the transferor will be able to mislead other buyers of the receivables is very limited unless the old owner remains in apparent control of the business. Whether this exclusion is necessary will depend on whether the Working Group considers that a transfer of receivables incidental to the sale of all the assets of a business may be interpreted as a transfer of receivables subject to the draft Model Law;

(b) Outright transfers of receivables made solely to facilitate the collection of the receivables for the transferor: the reason for this exclusion is that the transferee in this type of transaction effectively acts as an agent of the transferor and not as an independent

[1] This provision may not be necessary if the enacting State has coordinated, or has otherwise addressed the relationship between this Law and any secured transactions provisions of its law relating to intellectual property.

[2] If the enacting State decides to introduce any other exception(s), they should be limited and set out in the Law in a clear and specific way.

transferee capable of asserting priority over another transferee, a result that may follow from the general rules of agency in the enacting State;

(c) Outright transfers of a single receivable (or negotiable instrument) made in whole or in partial satisfaction of a pre-existing indebtedness: the reason for this exclusion is that a transferee might not think of having to register such a transaction or otherwise conform to the provisions of the draft Model Law. On the other hand, this exclusion could undermine the certainty and transparency sought to be achieved through otherwise incorporating the outright transfer of even a single receivable within the registration and priority rules of the draft Model Law;

(d) Outright transfers of an unearned right to payment under a contract to a person who is to perform the transferor's obligations under the contract: the reason for this exclusion is that the transferee takes the place of the transferor and thus there is no risk of deception of third parties as to who is entitled to receive payment. On the other hand, this type of transaction would seem to involve a novation of the contract and not a simple transfer of a right to payment and therefore would fall within the scope of the draft Model Law in any event;

(e) Outright transfer of present or future wages, salary, pay, commission, or any other compensation for labour or personal services of an employee: the reason for this exclusion is that such transfers are typically prohibited by other law. Thus, if they are excluded, they should be excluded only to the extent they are actually prohibited by other law of the enacting State. However, their exclusion may not be necessary as the draft Model Law preserves legal prohibitions to the transferability of or the creation of a security right in an asset under other law in any event (see art. 1, para. 6);

(f) Outright transfers for the general benefit of creditors of the transferor: in many common law jurisdictions, an assignment for the general benefit of creditors operates as an alternative to formal insolvency proceedings or as a device for commencing voluntary insolvency proceedings. Thus, the Guide to Enactment may need to state that enacting States that follow this approach may need to clarify that the draft Model Law does not apply to such transfers;

(g) Outright transfers of a right to damages in tort: the reason for this exclusion is that the transfer of tort claims is often prohibited by law, as these claims are personal or because of concerns that their use as security for credit may increase tort actions and insurance costs or interfere with the rights of the victims of torts. In this regard, it should be noted, that, unlike the United Nations Convention on the Assignment of Receivables in International Trade *(the "*Assignment Convention*") that applies only to contractual receivables, the draft Model Law applies to all types of receivables, including a prospective award of damages in a tort claim, a right to payment under a settlement contract pertaining to a tort claim and to proceeds of a damages claim that are deposited into a bank account. Accordingly, such an exclusion may be left to each enacting State rather than included in the Model Law;*

(h) Outright transfers of an interest in or claim under a contract of insurance: the reason for this exclusion is that such transactions may be adequately covered by existing law of the enacting State. However, such an exclusion could have a negative impact on the availability of credit on the basis of insurance policy proceeds and would run counter to the policy of the Secured Transactions Guide*, which defines "proceeds" as to include insurance policy proceeds.*

With respect to subparagraph 3(d), the Working Group may wish to note that, unlike recommendation 4, subparagraph (d), of the Secured Transactions Guide *which refers to "netting", subparagraph 3(d) refers to "close-out netting". The Working Group may wish to note that the Guide to Enactment will explain that this change of wording is necessary to ensure that transactions relating to set off even between two sellers of goods with trade claims and counter-claims would not be inadvertently excluded (see A/CN.9/830, para. 20).*

With respect to subparagraph 3(e), the Working Group may wish to consider whether the exclusion of payment rights arising under or from financial contracts governed by [close-out] netting agreements in subparagraph 3(d) is sufficient to cover also payment rights arising under or from foreign exchange transactions addressed in subparagraph 3(e)

and, if so, whether subparagraph 3(e) should be deleted. The Working Group may wish to consider subparagraphs 3(d) and (e) together with the definitions of the terms "financial contract" and "[close-out] netting" in article 2, which are based on the definitions of those terms contained in article 5 of the Assignment Convention.

With respect to paragraph 6, the Working Group may wish to consider the bracketed wording, which is intended to ensure that statutory limitations to the transferability of future assets, parts of and undivided interests in assets is overridden by the draft Model Law (see also recommendation 23 of the Secured Transactions Guide, *which has not been reflected in any article of the draft Model Law).*]

Article 2. Definitions and rules of interpretation

For the purposes of this Law:

(a) "Acquisition secured creditor" means a secured creditor that has an acquisition security right;

(b) "Acquisition security right" means a security right in a tangible asset (other than money, negotiable instruments, negotiable documents and certificated non-intermediated securities), intellectual property or the rights of a licensee under a licence of intellectual property that secures the obligation to pay any unpaid portion of the purchase price of the asset or an obligation incurred or credit otherwise provided to enable the grantor to acquire it [to the extent the credit is in fact applied for that purpose];

[*Note to the Working Group: The Working Group may wish to consider the wording within square brackets in this definition, which is intended to ensure that a security right qualifies as an acquisition security right only if the credit provided for the purpose of acquiring the encumbered asset is in fact used for that purpose. The Working Group may also wish to consider whether it is redundant to refer to "an obligation incurred or credit otherwise provided" or whether it is sufficient to simply refer to "other credit extended". The Working Group may further wish to consider whether the Guide to Enactment should explain that, where a security right secures obligations in addition to the credit extended and used for the purpose of acquiring the encumbered asset, it is an ordinary security right to the extent of those additional obligations*.]

(c) "Bank account" means an account[, other than a securities account,] maintained by a bank, to which funds may be credited or debited. The term includes a checking or other current account, as well as a savings or time deposit account. The term does not include a right against the bank to payment evidenced by a negotiable instrument;

[*Note to the Working Group: The Working Group may wish to consider the bracketed text in this definition, which is intended to draw a clear distinction from a securities account in which funds are routinely credited or debited when transactions relating to securities credited to those accounts are settled. Alternatively, this distinction may be explained in the Guide to Enactment, which can explain that, to underline this distinction, the draft Model Law defines the term "securities account" as "an account maintained by an intermediary to whom securities may be credited or debited" and the term "securities" in a manner that clearly excludes funds. The Working Group may further wish to consider whether it is appropriate to retain the second sentence of this definition since the terms "checking or other current account" and "savings or time deposit account" are business terms rather than legal terms and therefore may not be used in all enacting States or have the same meaning in all enacting States. These terms may instead be used in the Guide to Enactment as examples*.]

(d) "Certificated non-intermediated securities" means non-intermediated securities represented by a certificate that:

(i) Provides that the person entitled to the securities is the person in possession of the certificate; or

(ii) Identifies the person entitled to the securities;

(e) "Competing claimant" means a creditor of a grantor or other person with rights in an encumbered asset that may be in conflict with the rights of a secured creditor in the same encumbered asset. The term includes:

(i) Another secured creditor of the grantor that has a security right in the same encumbered asset (whether as an original encumbered asset or proceeds);

(ii) Another creditor of the grantor that has a right in the same encumbered asset, such as a judgement creditor or [the enacting State to specify creditors that have a right in the encumbered asset under other law];

(iii) The insolvency representative in insolvency proceedings in respect of the grantor; or

(iv) A buyer [or other transferee], lessee or licensee of the encumbered asset;

[*Note to the Working Group: The Working Group may wish to note that the text in square brackets in subparagraph (e)(iv) has been included to align this definition with the formulation of other articles (see, for example, arts. 29 and 30). The Working Group may also wish to note that, if the bracketed text is to be retained, its position may have to be reconsidered as in some jurisdictions lessees and licensees are considered transferees. In addition, the Working Group may wish to note that the term "judgement creditor" is defined in article 33 and consider whether that definition should be rather included in article 2*.]

(f) "Consumer goods" means goods [primarily] used or intended to be used by a grantor for personal, family or household purposes;

[*Note to the Working Group: The Working Group also may wish to add the word "primarily" to this definition to cover the case where goods are used by the grantor for both business and personal purposes in which event the primary use would determine whether they qualify as consumer goods. The Working Group may also wish to consider whether the definitions of the terms "equipment" and "inventory" should also be revised to refer to tangible assets "*primarily used or intended to be used *…"*.]

(g) "Control agreement":

(i) With respect to uncertificated non-intermediated securities means an agreement in writing among the issuer, the grantor and the secured creditor, according to which the issuer agrees to follow instructions from the secured creditor with respect to the securities without further consent from the grantor; and

(ii) With respect to rights to payment of funds credited to a bank account means an agreement in writing among the depositary bank, the grantor and the secured creditor, according to which the depositary bank agrees to follow instructions from the secured creditor with respect to the payment of funds credited to the bank account without further consent from the grantor;

(h) "Debtor" means a person that owes payment or other performance of a secured obligation, whether or not that person is the grantor of the security right securing payment or other performance of that obligation. The term includes a secondary obligor such as a guarantor of a secured obligation, and a transferor in an outright transfer of a receivable;

(i) "Debtor of the receivable" means a person that owes payment of a receivable. The term includes a guarantor or other person secondarily liable for payment of the receivable;

(j) "Encumbered asset" means a tangible or intangible movable asset that is subject to a security right. The term includes a receivable that is the subject of an outright transfer;

(k) "Equipment" means a tangible asset [other than inventory] [primarily] used [or intended to be used] by a grantor in the operation of its business;

(l) "Financial contract" means any spot, forward, future, option or swap transaction involving interest rates, commodities, currencies, equities, bonds, indices or any other financial instrument, any repurchase or securities lending transaction, and any other transaction similar to those transactions entered into in financial markets and any combination of those transactions;

(m) "Future asset" means a tangible or intangible movable asset, which does not exist or which the grantor does not have rights in or the power to encumber at the time the security agreement is concluded;

(n) "Grantor" means a person that creates a security right to secure either its own obligation or that of another person. The term includes the transferee of an encumbered asset and the transferor in an outright transfer of a receivable;

(o) "Independent undertaking" means an independent commitment, known in international practice as an independent guarantee or as a stand-by letter of credit, given by a bank or other institution or person ("guarantor/issuer") to pay to the beneficiary a certain or determinable amount upon simple demand or upon demand accompanied by other documents, in conformity with the terms and any documentary conditions of the undertaking, indicating, or from which it is to be inferred, that payment is due because of a default in the performance of an obligation, or because of another contingency, or for money borrowed or advanced, or on account of any mature indebtedness undertaken by the principal/applicant or another person;

[*Note to the Working Group: The Working Group may wish to note that this definition is based on the definition contained in article 2, paragraph (1), of the* United Nations Convention on Independent Guarantees and Stand-by Letters of Credit.]

(p) "Insolvency representative" means a person or body, including one appointed on an interim basis, authorized in insolvency proceedings to administer the reorganization or the liquidation of the insolvency estate;

(q) "Intangible asset" means all types of movable asset other than tangible assets. The term includes receivables, rights to the performance of obligations other than receivables, rights to payment of funds credited to a bank account, and uncertificated non-intermediated securities;

(r) "Inventory" means tangible assets [primarily] held by a grantor for sale or lease in the ordinary course of the grantor's business. The term includes raw and semi-processed materials (work-in-process);

(s) "Knowledge" means actual knowledge;

(t) "Mass or product" means tangible assets other than money that are so physically associated or united with other tangible assets that they have lost their separate identity;

(u) "Money" means currency currently authorized as legal tender by any State. The term does not include funds credited to a bank account or negotiable instruments;

[*Note to the Working Group: The Working Group may wish to note that the term "money", whose definition is based on a definition contained in the* Secured Transactions Guide, *is intended to include not only the national currency of the enacting State but also foreign currency. The Working Group may wish to consider deleting the word "currently" in this definition as redundant (since if currency is not "currently authorized" as "legal tender", then it would not qualify as "legal tender"). The Working Group may also wish to consider deleting the second sentence of the definition since rights to payment of funds credited to a bank account and negotiable instruments are recognized as distinct concepts in the draft Model Law and thus it is already clear that the concept "money" does not include them. All these matters may be usefully discussed in the Guide to Enactment*.]

(v) "Non-intermediated securities" means securities other than securities credited to a securities account or rights in securities resulting from the credit of securities to a securities account;

(w) "[Close-out netting] [Netting] agreement" means an agreement between two or more parties that provides for one or more of the following:

(i) The net settlement of payments due in the same currency on the same date whether by novation or otherwise;

(ii) Upon the insolvency or other default by a party, the termination of all outstanding transactions at their replacement or fair market values, conversion of such

sums into a single currency and netting into a single payment by one party to the other; or

(iii) The set-off of amounts calculated as set forth in subparagraph (ii) under two or more netting agreements;

(x) "Notice" means a communication in writing;

(y) "Notification of a security right in a receivable" means a notice by the grantor or the secured creditor informing the debtor of the receivable that a security right has been created in the receivable. A notification of the security right may include a payment instruction;

[*Note to the Working Group: The Working Group may wish to note that the requirement for the identification of the encumbered receivable and the secured creditor that was included in a previous version of this definition (and in this definition in the* Secured Transactions Guide*), was moved to article 56, paragraph 1, as it states a substantive rule on the effectiveness of a notification of a security right, a matter that is already addressed in article 56, paragraph 1. The Working Group may wish to consider whether the second sentence of this definition also states a substantive rule and should be moved to article 56*.]

(z) "Possession" means the actual [physical] possession of a tangible asset by a person or its representative, or by an independent person that acknowledges holding it for that person;

(aa) "Priority" means the right of a secured creditor to derive the economic benefit of its security right in an encumbered asset in preference to a competing claimant;

(bb) "Proceeds" means whatever is received in respect of an encumbered asset. The term includes what is received as a result of sale or other disposition or collection, lease or licence of an encumbered asset, civil and natural fruits, insurance proceeds, claims arising from defects in, damage to or loss of an encumbered asset, and proceeds of proceeds;

[*Note to the Working Group: The Working Group may wish to consider whether the definition of the term "proceeds" should be limited to proceeds received by the grantor, and not extend to proceeds received, for example, by a transferee of the original encumbered asset. A different approach could potentially prejudice a third party that acquired proceeds from a transferee and had no means of knowing or finding out that the asset was the proceeds of an asset in which somebody held a security right (e.g. grantor sells the encumbered asset, a green widget, to X who then trades it in for a blue widget and then sells the blue widget to Y. Y has no means of knowing or finding out that the blue widget is subject to a security right created by the grantor/transferor).*]

(cc) "Receivable" means a right to payment of a monetary obligation, excluding a right to payment evidenced by a negotiable instrument, a right to receive the proceeds under an independent undertaking and a right to payment of funds credited to a bank account;

(dd) "Right to receive the proceeds under an independent undertaking" means the right to receive a payment due, a draft accepted or deferred payment incurred or another item of value, in each case to be paid or delivered by the guarantor/issuer, confirmer or nominated person giving value for a draw under an independent undertaking. The term also includes the right to receive payment in connection with the purchase by a negotiating bank of a negotiable instrument or a document under a complying presentation. The term does not include:

(i) The right to draw under an independent undertaking; or

(ii) What is received upon honour of an independent undertaking;

[*Note to the Working Group: The Working Group may wish to note that the definition of this term is included here only for the purposes of the articles in which this term is used, that is, article 1, subparagraph 3(a), under which the right to receive the proceeds is excluded from the scope of the draft Model Law, and article 1, paragraph 4, under which the proceeds of an excluded type of asset are also excluded*.]

(ee) "Secured creditor" means a creditor that has a security right. The term includes a transferee in an outright transfer of a receivable;

(ff) "Secured obligation" means an obligation secured by a security right. The term does not apply to outright transfers of receivables;

(gg) "Security agreement" means an agreement, regardless of whether the parties have denominated it as a security agreement, between a grantor and a secured creditor that creates a security right. The term also includes an agreement for the outright transfer of a receivable;

(hh) "Securities" means:

[(i)] An obligation of an issuer or any share or similar right of participation in an issuer or in the enterprise of an issuer that:

a. Is one of a class or series, or by its terms is divisible into a class or series; [and]

b. Is of a type dealt in or traded on a recognized market, or is issued as a medium for investment [and

(ii) The enacting State to specify any additional rights that should qualify as securities even if they do not satisfy the requirements expressed in subparagraphs (i) a. and (i) b.;]

(ii) "Securities account" means an account maintained by an intermediary to which securities may be credited or debited;

[*Note to the Working Group: The Working Group may wish to note that this definition is derived from article 1, subparagraph (c), of the Unidroit Convention on Substantive Rules for Intermediated Securities (the "Geneva Securities Convention")*.]

(jj) "Security right" means a property right in a movable asset that is created by an agreement to secure payment or other performance of an obligation, regardless of whether the parties have denominated it as a security right, and regardless of the type of asset, the status of the grantor or secured creditor, or the nature of the secured obligation. The term also includes the right of the transferee in an outright transfer of a receivable;

(kk) "Tangible asset" means all types of tangible movable asset. The term includes money, negotiable instruments, negotiable documents and certificated non-intermediated securities;

(ll) "Uncertificated non-intermediated securities" means non-intermediated securities not represented by a certificate.

Article 3. International obligations of this State

To the extent that this Law conflicts with an obligation of this State arising out of any treaty or other form of agreement to which it is a party with one or more other States, the requirements of the treaty or agreement prevail.

[*Note to the Working Group: The Working Group may wish to note that, at its twenty-sixth session, it agreed that this article should be based on article 3 of the UNCITRAL Model Law on Cross-Border Insolvency or on article 38 of the Assignment Convention (see A/CN.9/830, para. 17). However, the latter provision, which refers only to international agreements and to agreements that specifically govern a transaction governed by the* Assignment Convention*, contains a rule of hierarchy among international agreements (the specific prevails over the general text) rather than a domestic law rule dealing with the prevalence of international treaties over domestic law. To explicitly preserve the application of regional law (e.g. EU directives), the Working Group may also wish to consider including in this article a second paragraph that could read along the following lines: "This Law does not affect the application of the rules of a Regional Economic Integration Organization, whether adopted before or after this Law" (see art. 26(6) of the Hague Convention on Choice of Court Agreements of 30 June 2005). Alternatively, the Guide to Enactment could explain that article 3 is sufficient to cover rules of a regional organization*.]

Article 4. Party autonomy

1. Except as otherwise provided in articles [5, 6, 9, 33-36, 48, 49, 66, paragraph 4, and 79-94], the provisions of this Law may be derogated from or varied by agreement.

2. An agreement referred to in paragraph 1 does not [negatively] affect the rights or obligations of any person that is not a party to the agreement.

[*Note to the Working Group: The Working Group may wish to consider whether paragraph 2 should rather refer to a negative effect or modification of third-party rights, as an agreement may have an indirect effect on or benefit to third-party rights (e.g. a subordination agreement). The Working Group may also wish to consider whether article 47, subparagraph (d) (trade usages and practices), should be placed in this article (see note to article 47).*]

Article 5. General standards of conduct

1. A person must exercise its rights and perform its obligations under this Law in good faith and in a commercially reasonable manner.

2. The general standards of conduct set forth in paragraph 1:

(a) Cannot be waived unilaterally or varied by agreement; and

(b) Do not apply to an outright transfer of a receivable without recourse to the transferor.

[*Note to the Working Group: The Working Group may wish to consider whether subparagraph 2(a) is necessary given that article 4 already states that the rule embodied in this article cannot be waived unilaterally or varied by agreement. The Working Group may also wish to note that subparagraph 2(b) has been added pursuant to a decision by the Working Group, because, in an outright transfer of a receivable without recourse to the grantor (transferor), the grantor (transferor) has no remaining interest in the receivable that could be protected by a limitation on the way in which the secured creditor (transferee) could collect the receivable (see A/CN.9/836, para. 78). The Working Group may also wish to consider whether at the end of this chapter a new provision should be added to deal with the interpretation of the Model Law taking into account its international origin and the need to promote uniformity in its application and gap filling by reference to the principles on which the Model Law is based or, in the absence of such principles, in conformity with the law applicable by virtue of the conflict-of-laws rules of the forum (see, for example, art. 7 of the Assignment Convention, art. 7 of the CISG, art. 8 of the UNCITRAL Model Law on Cross-Border Insolvency, art. 3 of the UNCITRAL Model Law on Electronic Commerce, art. 4 of the UNCITRAL Model Law on Electronic Signatures, and art. 2A of the UNCITRAL Model Law on International Commercial Arbitration).*]

Chapter II. Creation of a security right

A. General rules

Article 6. Security agreement

1. A security right is created by a security agreement that satisfies the requirements of paragraphs 2 to 5, provided that the grantor has rights in the asset to be encumbered or the power to encumber it.

2. A security agreement may provide for the creation of a security right in a future asset, but the security right in that asset is created only at the time when the grantor acquires rights in it or the power to encumber it.

3. A security agreement must:

(a) Provide for the creation of a security right;

(b) Identify the secured creditor and the grantor;

(c) Describe the secured obligation;

(d) Describe the encumbered assets as provided in article 9[; and

(e) Indicate the maximum monetary amount for which the security right may be enforced].[3]

4. Except as provided in paragraph 5, a security agreement must be [the enacting State should specify whether the security agreement must be "concluded in" or "evidenced by" a writing] that satisfies the requirements of paragraph 3 and is signed by the grantor.

5. A security agreement may be oral if the secured creditor has possession [or control] of the encumbered asset.

[*Note to the Working Group: The Working Group may wish to consider whether the requirements set out in paragraph 3 apply only to situations in which a written security agreement is required (i.e. they do not apply to possessory security rights where an oral security agreement is permitted). In this regard, the Working Group may wish to note that, in the case of oral security agreements: (a) requirements (a)-(c) are already covered by paragraph 1 of this article insofar as it refers to the creation of a "security right" and requires a "security agreement", as defined in the draft Model Law; and (b) requirements (d) and (e) by their very nature are inapplicable to the situation where an oral security agreement is permitted because, where there is possession: (i) there is no need for a description that identifies the encumbered asset adequately since the very fact of possession satisfies the description requirement; and (ii) the requirement to agree to a maximum amount to be secured is inapplicable since this requirement is practically capable of being satisfied only if there is a written agreement. If the Working Group decides to delete paragraph 2, paragraph 3 should be revised to read along the following lines: "… a writing that: (a) identifies the secured creditor and the grantor; (b) describes the secured obligation; (c) describes the encumbered assets as provided in article 9; [and] (d) is signed by the grantor[; and (e) indicates the maximum monetary amount for which the security right may be enforced"*.]

Article 7. Obligations that may be secured

A security right may secure any type of obligation, present or future, determined or determinable, conditional or unconditional, fixed or fluctuating.

Article 8. Assets that may be encumbered

A security right may encumber:

(a) Any type of movable asset, including future assets;

(b) Parts of assets and undivided rights in movable assets;

(c) Generic categories of movable assets; and

(d) All of a grantor's movable assets.

[*Note to the Working Group: The Working Group may wish to consider whether subparagraphs (c) and (d) should be retained. Subparagraphs (c) and (d) deal with the description of the encumbered assets, a matter that is addressed in article 9; and subparagraph (d) may already be covered by subparagraph (a), which refers to both present and future assets*.]

[Article 9. Description of encumbered assets

1. The assets encumbered or to be encumbered must be described in the security agreement in a manner that reasonably allows their identification.

[3] The enacting State may wish to include this subparagraph in the draft Model Law if it determines that an indication of the maximum monetary amount for which the security right may be enforced would be helpful to facilitate lending from another creditor.

2. A description that indicates that the encumbered assets consist of all of the grantor's movable assets, or of all of the grantor's movable assets within a particular category satisfies the standard in paragraph 1.]

[*Note to the Working Group: The Working Group may wish to consider the question whether this article should apply only to written agreements. The Working Group may also wish to note that, in view of their importance, the requirements for the description of encumbered assets have been moved from article 6, subparagraph 3(d), to this new article, and aligned with article 12 of the registry-related provisions*.]

Article 10. Proceeds and proceeds in the form of funds commingled with other funds

1. A security right in an asset extends to its identifiable proceeds.

2. Notwithstanding paragraph 1, where proceeds in the form of funds credited to a bank account or money are commingled with other assets of the same kind the security right extends to the commingled assets.

3. Subject to paragraph 4, the maximum amount [of the secured obligation] for which the security right in the commingled assets may be enforced is limited to the value of the proceeds immediately before they were commingled.

4. If at any time after the commingling, the value of the balance credited to the bank account or of the commingled money is less than the value of the proceeds immediately before they were commingled, the obligation secured by the security right that is enforceable against the commingled assets in accordance with paragraph 2 is limited to the lowest value between the time when the proceeds were commingled and the time the security right in the proceeds is claimed.

[*Note to the Working Group: The Working Group may wish to consider whether the Guide to Enactment should explain that, if new proceeds are deposited after the account or pool of money is depleted below the value of the proceeds originally deposited or contributed, then one would need to reapply the lowest intermediate balance rule in paragraph 4 to these later proceeds (i.e. the amount of each proceeds claim must be assessed separately)*.]

Article 11. Tangible assets commingled in a mass or product

1. A security right in a tangible asset that is commingled in a mass of assets of the same kind or product extends to the mass or product.

2. A security right that continues in a mass in accordance with paragraph 1 is limited to the value of [the mass in the same proportion as the encumbered assets and the assets not encumbered contributed to value of the mass] [the quantity of the encumbered asset that became part of the mass].

3. A security right that continues in a product in accordance with paragraph 1 is limited to the value of [the product in the same proportion as the encumbered assets and the assets not encumbered contributed to value of the product] [the encumbered assets immediately before they became part of the product].

[4. Where more than one security right continues in the same mass or product and each was a security right in a separate tangible asset at the time of commingling, the secured creditors are entitled to share in the mass or product according to the ratio that the obligation secured by each security right bears to the sum of the obligations secured by all security rights.]

[*Note to the Working Group: The Working Group may wish to note that: (a) different rules are provided in this article for masses (para. 2) and products (para. 3); (b) paragraph 2 is intended to express more clearly the policy articulated in the* Secured Transactions Guide *(chap. II, paras. 90-92) and thus to account for the fluctuation in the price of commodities; (c) paragraph 3 reflects the rule in recommendation 22 of the* Secured Transactions Guide*; and (d) paragraph 4 has been added to more closely align this article with recommendations 22 and 91 of the* Secured Transactions Guide. *The Working Group may wish to consider the policy and the formulation of paragraphs 2 and 3. The Working Group may also wish to*

consider whether the second bracketed text in paragraphs 2 and 3 is sufficient to address situations in which: (a) the quantity, for example, of oil in the tank at the time of enforcement is less than the encumbered quantity of oil; and (b) because of a worsening in market conditions, the value of the product is less than the value of the encumbered asset.]

Article 11bis. Extinction of a security right

A security right is extinguished upon full payment or other satisfaction of the secured obligation[, provided that there is no further commitment by the secured creditor to extend credit secured by the encumbered assets.]

[*Note to the Working Group: The Working Group may wish to note that this article has been added at the end of chapter II pursuant to a decision by the Working Group (see A/CN.9/836, paras. 20 and 24). The Working Group may wish to note that reference to the extinction of a security right is made in article 49 (obligation of a secured creditor to return an encumbered asset), and article 21, subparagraph 2(c) of the registry-related provisions (compulsory registration of an amendment or cancellation notice). The Working Group may wish to consider whether article 69 (grantor's right to terminate enforcement) should also refer to the extinction of a security right, rather than to full payment of the secured obligation*.]

B. Asset-specific rules

Article 12. Contractual limitations on the creation of a security right

1. A security right in a receivable or other intangible asset, negotiable instrument or right to payment of funds credited to a bank account is effective as between the grantor and the secured creditor and as against the debtor of the receivable or other intangible asset, the obligor under a negotiable instrument, or the depositary bank notwithstanding an agreement limiting in any way the grantor's right to create a security right entered into between the initial or any subsequent grantor and:

(a) The debtor of the receivable or other intangible asset, the obligor under the negotiable instrument or the depositary bank; or

(b) Any subsequent secured creditor.

2. Nothing in this article affects any obligation or liability of the grantor for breach of the agreement referred to in paragraph 1, but the other party to the agreement may not avoid the contract giving rise to [the receivable or other intangible asset, negotiable instrument or right to payment of funds credited to a bank account] [the encumbered asset] or the security agreement on the sole ground of the breach of that agreement[, or raise against the secured creditor any claim it may have as a result of such a breach against the grantor, as provided in article 58, paragraph 2].

3. A person that is not a party to the agreement referred to in paragraph 1 is not liable for the grantor's breach of the agreement on the sole ground that it had knowledge of the agreement.

4. This article applies only to receivables:

(a) Arising from a contract that is a contract for the supply or lease of goods or services other than financial services, a construction contract or a contract for the sale or lease of immovable property;

(b) Arising from a contract for the sale, lease or licence of industrial or other intellectual property or of proprietary information;

(c) Representing the payment obligation for a credit card transaction; or

(d) Arising upon [net settlement of payments due pursuant to a netting agreement involving more than two parties] [the termination of all outstanding transactions].

[*Note to the Working Group: The Working Group may wish to note that this article, which is based on recommendation 24 of the* Secured Transactions Guide*, which in turn is based on article 9 of the* United Nations Convention on the Assignment of Receivables in

International Trade *(the "*United Nations Assignment Convention*"), has been revised to address contractual limitations on the creation of a security right in assets in addition to receivables, namely other intangible assets, negotiable instruments and rights to payment of funds credited to a bank account (see A/CN.9/830, paras. 59-63). The Working Group may wish to consider the two sets of bracketed wording in paragraph 4(d) (the first set is based on rec. 24, subpara. (c)(iv) of the* Secured Transactions Guide*, while the second set is based on art. 1, subpara. 3(d) of the draft Model Law).*]

Article 13. Personal or property rights securing or supporting payment or other performance of an encumbered receivable or other intangible asset, or negotiable instrument

Option A

1. A secured creditor with a security right in a receivable or other intangible asset, or a negotiable instrument has the benefit of any personal or property right that secures or supports payment or other performance of the encumbered asset without any further action by either the grantor or the secured creditor.

2. If the right referred to in paragraph 1 is an independent undertaking, the security right automatically extends to the right to receive the proceeds of, but not the right to draw under, the independent undertaking.

Option B

1. A security right in a receivable or other intangible asset, or a negotiable instrument extends to any personal or property right that secures or supports payment or other performance of the encumbered asset that is transferable without a new act of transfer.

2. If the right referred to in paragraph 1 of this article is transferable only with a new act of transfer, the grantor is obliged to create a security right in it in favour of the secured creditor.

[3. This article does not affect a right in immovable property that under other law is transferable separately from the obligation that the right in the immovable property secures.]

4. Paragraph 1 does not affect any duties of the grantor to the debtor of the receivable or other intangible asset, or the obligor of the negotiable instrument.

5. To the extent that the automatic effects of paragraph 1 are not impaired, this article does not affect any requirement under other law relating to the form or registration of the creation of a security right in any asset that is not covered in this Law.

[*Note to the Working Group: The Working Group may wish to consider alternatives A and B of paragraphs 1 and 2 of this article. Alternative A reflects the thrust of recommendation 25 of the* Secured Transactions Guide*, while alternative B reflects the thrust of article 10 of the* Assignment Convention *(rather than rec. 25). Under alternative B, the security right extends automatically to accessory security or supporting rights, while with respect to independent rights, the grantor is obliged to create a security right in them in favour of the secured creditor. Thus, there is no inconsistency with article 1, subparagraph 3(a), and there is no need to also include the full text of recommendation 127 of the* Secured Transactions Guide *to protect the rights of a guarantor/issuer, confirmer or nominated person of an independent undertaking. If alternative A were preferred, the Working Group may wish to consider whether the thrust of recommendation 127 (which has not been included in the draft Model Law as it does not apply to the right to receive the proceeds under an independent undertaking), should also be included in this article to avoid any adverse impact on the rights of a guarantor/issuer, confirmer or nominated person of an independent undertaking. The Working Group may wish to consider whether paragraph 4 should be retained in view of the fact that articles 56, 63 and 64 have been included in the draft Model Law so as to ensure that the rights of the debtor of an encumbered receivable and the obligor of an encumbered negotiable instrument under other law are protected. In this connection, the Working Group may wish to note that there is no provision equivalent to articles 60, 63 and 64 to preserve the rights of an obligor of an intangible asset other than a receivable*.]

Article 14. Negotiable documents and tangible assets covered

A security right in a negotiable document extends to the tangible asset covered by the document, provided that the issuer of the negotiable document is in possession of the asset[, directly or indirectly,] at the time the security right in the document is created.

[*Note to the Working Group: The Working Group may wish to consider whether the bracketed wording, which comes from recommendation 28 of the* Secured Transactions Guide, *should be retained*.]

Article 15. Tangible assets with respect to which intellectual property is used

A security right in a tangible asset with respect to which intellectual property is used does not extend to the intellectual property and a security right in the intellectual property does not extend to the tangible asset.

Chapter III. Effectiveness of a security right against third parties

A. General rules

Article 16. General methods for achieving third-party effectiveness

A security right in an asset is effective against third parties if:

(a) A notice with respect to the security right is registered in the general security rights registry (the "Registry") [or in any specialized registry or title certificate to be specified by the enacting State];[4] or

(b) The secured creditor has possession of that asset.

Article 17. Proceeds

1. If a security right in an asset is effective against third parties, a security right in any proceeds of that asset is effective against third parties without any further action by the grantor or the secured creditor if the proceeds are in the form of money, receivables, negotiable instruments or rights to payment of funds credited to a bank account.

2. If a security right in an asset is effective against third parties, a security right in any type of proceeds of that asset other than the types of proceeds referred to in paragraph 1 is effective against third parties:

(a) For [a short period of time to be specified by the enacting State] days after the proceeds arise; and

(b) Thereafter, if the security right in the proceeds is made effective against third parties by one of the methods applicable to the relevant type of encumbered asset referred to in this chapter before the expiry of the time period provided in subparagraph (a).

Article 18. Changes in the method for achieving third-party effectiveness

1. A security right made effective against third parties by one of the methods provided in this chapter may subsequently be made effective against third parties by any other method applicable to the relevant type of encumbered asset.

2. A security right that is effective against third parties remains effective against third parties despite a change in the method for achieving third-party effectiveness, provided that there is no time when the security right is not effective against third parties.

Article 19. Lapse in third-party effectiveness

1. If third-party effectiveness of a security right lapses, it may be re-established by any of the methods applicable to the relevant encumbered asset provided in this chapter.

[4] An enacting State may wish to implement this provision if it has a specialized registration system.

2. If the third-party effectiveness of a security right is re-established under paragraph 1, the security right is effective against third parties only as of the time its third-party effectiveness is re-established.

Article 20. Impact of a transfer of an encumbered asset

Except as provided in article 27 [of the registry-related provisions], a security right in an asset remains effective against third parties even if the asset is sold or otherwise transferred, leased or licensed.

[*Note to the Working Group: The Working Group may wish to consider whether the rule that a security right follows an encumbered asset in the hands of a transferee fits more in the chapter on third-party effectiveness (impact on registration; see art. 27 of the registry-related provisions) and in the chapter on priority (authorization of the transfer by the secured creditor or transfer in the ordinary course of business of the transferor; see art. 29, paras. 2 to 8)*.]

Article 21. Continuity in third-party effectiveness upon a change of the applicable law to this Law

1. If a security right is effective against third parties under the law of another State and this Law becomes applicable as a result of a change in the location of the encumbered asset or the grantor, whichever determines the applicable law under the provisions of chapter VIII, the security right remains effective against third parties under this Law for [a short period of time to be specified by the enacting State] days after the change and, thereafter, only if the third-party effectiveness requirements of this Law are satisfied before the expiry of that time period.

2. If the security right remains effective against third parties under paragraph 1, the time of third-party effectiveness is the time when it was achieved under the law of the other State.

[*Note to the Working Group: The Working Group may wish to consider whether this article should be placed in chapter VIII of the draft Model Law (conflict-of-laws). The Working Group may also wish to consider whether paragraph 2 of this article should also be inserted in articles 18 and 19 to explicitly state what is implied in those articles*.]

Article 22. Acquisition security rights in consumer goods

An acquisition security right in consumer goods is effective against third parties upon its creation without any further action by the grantor or the secured creditor.

B. Asset-specific rules

Article 23. Rights to payment of funds credited to a bank account

A security right in a right to payment of funds credited to a bank account may also be made effective against third parties by:

(a) The creation of the security right in favour of the depositary bank;

(b) The conclusion of a control agreement; or

(c) The secured creditor becoming the account holder.

[*Note to the Working Group: The Working Group may wish to consider whether this article should address the question of how a secured creditor may become the account holder (e.g. by changing the name in the account of the grantor or by debiting the account of the grantor and crediting the account of the secured creditor). Alternatively, the matter may be addressed in the Guide to Enactment*.]

Article 24. Negotiable documents and tangible assets covered

1. If a security right in a negotiable document is effective against third parties, the security right that extends to the asset covered by the document in accordance with article 14 is also effective against third parties.

2. During the period when a negotiable document covers an asset, a security right in the asset may be made effective against third parties by the secured creditor's possession of the document.

3. A security right in a negotiable document that was made effective against third parties by the secured creditor's possession of the document remains effective against third parties for [a short period of time to be specified by the enacting State] after the negotiable document has been relinquished to the grantor or other person for the purpose of ultimate sale or exchange, loading or unloading, or otherwise dealing with the assets covered by the negotiable document.

Article 25. Uncertificated non-intermediated securities

A security right in uncertificated non-intermediated securities may also be made effective against third parties by:

(a) The notation of the security right or entry of the name of the secured creditor in the books maintained by or on behalf of the issuer for the purpose of recording the name of the holder of the securities; or

(b) The conclusion of a control agreement.

(A/CN.9/WG.VI/WP.65/Add.1) (Original: English)

Note by the Secretariat on a draft model law on secured transactions

ADDENDUM

Contents

Chapter IV. The registry system

Article 26. Establishment of a public registry

The Registry is established for the purposes of receiving, storing and making accessible to the public information in registered notices with respect to security rights in accordance with [the legislative instrument or instruments to be specified by the enacting State (including the "registry-related provisions" set forth below)].

[*Note to the Working Group: The Working Group may wish to consider the name and the placement of the registry-related provisions in the draft Model Law. If they are included in this chapter, article 26 should be deleted as it is exactly the same as article 1 of the registry-related provisions, which was added pursuant to a decision by the Commission (A/70/17, para. 172). If, however, they are included in an annex (or part II) of the draft Model Law (for the enacting State to decide whether to include it in its secured transactions law, a separate act, decree, regulation or other act, or a combination thereof), both articles 26 of the draft Model Law and article 1 of the draft registry-related provisions may need to be retained.*]

Registry-related provisions

Section A. General provisions

[Article 1. Establishment of a public registry

The Registry is established for the purposes of receiving, storing and making accessible to the public information in registered notices with respect to security rights in accordance with [the legislative instrument or instruments to be specified by the enacting State (including the "registry-related provisions" set forth below)].]

Article 2. Definitions

(a) "Address" means:

(i) A physical address or a post office box number, city, postal code and State; or

(ii) An electronic address;

(b) "Amendment" means a modification with respect to information contained in a previously registered notice to which the amendment relates;

[(c) "Cancellation" means the removal from the public registry record of all information contained in a previously registered notice to which the cancellation relates;]

(d) "Designated field" means the space on the prescribed registry notice form designated for entering the specified type of information;

(e) "Law" means the law of the enacting State governing security rights in movable assets;

(f) "Notice" means a communication in writing (paper or electronic) to the Registry of information with respect to a security right. The term includes an initial notice, an amendment notice and a cancellation notice;

(g) "Registrant" means the person who submits the prescribed registry notice form to the Registry;

(h) "Registrar" means the person appointed pursuant to the Law [and the Regulation] to supervise and administer the operation of the Registry;

(i) "Registration" means the entry of information contained in a notice into the registry record;

(j) "Registration number" means a unique number assigned to an initial notice by the Registry and permanently associated with that notice and any related notice;

(k) "Registry" means [the enacting State's] system for receiving, storing and making accessible to the public information about security rights in movable assets; [and]

(l) "Registry record" means the information in all registered notices stored by the Registry; it consists of the record that is publicly accessible (public registry record) and the record that has been removed from the public registry record and archived (registry archives)[; and

(m) "Regulation" means the body of rules adopted by the enacting State with respect to the Registry, whether these rules are found in administrative guidelines or the Law].

[*Note to the Working Group: The Working Group may wish to note that: (a) if a State implements the registry-related provisions in the draft Model Law, it will need to include these definitions in article 2 of the draft Model Law; (b) the definition of the term "cancellation" appears within square brackets, since a cancellation in a State that chooses the "open drawer approach" of option B of article 31, paragraph 1, would not result in the removal of the registered information from the public registry record; (c) the definition of the term "Law" would be needed only if a State decided not to include all of the registry-related provisions in its secured transactions law; and (d) the term "Regulation" appears within square brackets (in subparas. (h) and (m)), since two of the options presented to States are to insert all of the registry-related provisions in their secured transactions law or in a separate law, in which case they would not need this definition. The Working Group may wish to consider whether an additional definition should be added along the following lines: "Registered notice means a notice after the information in the notice has been entered into the public registry record". In addition, the Working Group may wish to consider the placement in the text of the clarification that, if the Registry is operated by a governmental entity, it can exercise the supervisory functions foreseen in the registry-related provisions (e.g. art. 6, para. 2, art. 13, para. 2, art. 28, and art. 34, para. 2), while otherwise these functions should only be exercised by the governmental authority supervising the private entity operating the Registry. Moreover, the Working Group may wish to consider whether the notes to each defined term in the* Registry Guide *should also be included either in this article (or in article 2 of the draft Model Law) or in the Guide to Enactment.*]

Article 3. Grantor's authorization for registration

1. Registration of an initial notice is ineffective unless authorized by the grantor in writing.

2. Registration of an amendment notice that adds encumbered assets not included in the security agreement [or increases the maximum amount for which the security right to which the registration relates may be enforced][1] is ineffective unless authorized by the grantor in writing.

[1] This provision will be necessary if the enacting State implements article 6, subparagraph 3 (e), of the draft Model Law.

3. [With the exception of an amendment notice under article 27, registration] [2] [Registration] of an amendment notice that adds a grantor is ineffective unless authorized by the additional grantor in writing.

4. Authorization may be given before or after registration of a notice.

5. A written security agreement is sufficient to constitute authorization by the grantor for the registration of a notice.

6. The Registry may not require evidence of the existence of the grantor's authorization.

[*Note to the Working Group: The Working Group may wish to consider whether paragraph 6 is necessary, since paragraph 4 provides that the grantor's authorization may be given even after registration. The Working Group may also wish to note that, in line with recommendations 71 of the* Secured Transactions Guide *and the* Registry Guide *(see para. 101), paragraph 5 provides that authorization must be given by the grantor in writing. In this connection, the Working Group may wish to consider whether a new paragraph should be added to provide that possession by the secured creditor pursuant to an oral security agreement also constitutes sufficient authorization by the grantor.*]

Article 4. One notice sufficient for security rights under multiple security agreements

The registration of a single notice may relate to security rights created by the grantor under one or more than one security agreement [between the parties identified in the registered notice] [with the same secured creditor].

[*Note to the Working Group: The Working Group may wish to consider the two sets of words in square brackets in this article. The first contains the text agreed upon at the Commission session (see A/70/17, para. 171). However, where the name of the representative of the secured creditor is entered in the notice, the security agreement will not be "between the parties identified in the notice". The second set of* bracketed words *is intended to address this problem in a way that would be consistent with recommendation 68 of the* Secured Transactions Guide*, on which this article is based and which refers to an agreement "between the same parties" (same issue in article 5; see A/70/17, para. 173).*]

Article 5. Advance registration

A notice may be registered before the creation of a security right or the conclusion of a security agreement [between the parties identified in the notice] [to which the notice relates].

Section B. Access to registry services

Article 6. Public access

1. Any person may submit a notice to the Registry, if that person:

   (a) Uses the prescribed notice form; [and]

   (b) Identifies itself in the prescribed manner[; and

   (c) Has paid or arranged to pay the prescribed fee].[3]

2. A person that submits an amendment or cancellation notice must also [satisfy the secure access requirements to be specified by the Registry].

3. Any person may submit a search request to the Registry, if that person:

   (a) Uses the prescribed search request form[; and

   (b) Has paid or arranged to pay the prescribed fee].[4]

---

[2] This wording will be necessary if the enacting State implements option A or option B of article 27 below.

[3] This provision will be necessary if the enacting State implements option A of article 34 below.

[4] This provision will be necessary if the enacting State implements option A of article 34 below.

4. If access is refused, the Registry must communicate the reason to the registrant or searcher without delay.

Article 7. Rejection of the registration of a notice or a search request

1. The Registry must reject the registration of a notice if:

(a) No information is entered in one or more of the required designated fields; or

(b) The information entered in a required designated field is not legible[; or

(c) An amendment notice that seeks to extend the period of effectiveness of a registration is not submitted within the period referred to in article 15, paragraph 2].[5]

2. The Registry must reject a search request if:

(a) No information is entered in one of the fields designated for entering a search criterion; or

(b) If the information entered in a required designated field is not legible.

3. Except as provided in paragraph 1 or 2, the Registry may not reject the registration of a notice or a search request.

4. If the registration of a notice or a search request is rejected, the Registry must communicate the reason to the registrant or searcher without delay.

Article 8. No verification by the Registry

The Registry must maintain information about the registrant's identity submitted in accordance with article 6, subparagraph 1 (b), but may not require verification of that information, or conduct any scrutiny of the content of a notice or search request.

Section C. Registration of a notice

Article 9. Information required in an initial notice

An initial notice must contain the following information in the relevant designated field:

(a) The identifier and address of the grantor [and any additional information that the enacting State may decide to require to be entered to assist in uniquely identifying the grantor] in accordance with article 10;

(b) The identifier and address of the secured creditor or its representative in accordance with article 11; [and]

(c) A description of the encumbered assets in accordance with article 12;

[(d) The period of effectiveness of the registration in accordance with article 15];[6] and

[(e) A statement of the maximum amount for which the security right to which the registered notice relates may be enforced.][7]

Article 10. Grantor identifier

1. Where the grantor is a natural person, the identifier of the grantor is the name of the grantor, as it appears in [the relevant official document in the order in which it should be used to determine the grantor's name to be specified by the enacting State].

---

[5] This provision will be necessary if the enacting State implements option B or option C of article 15, paragraph 2, below.

[6] This provision will be necessary, if the enacting State implements option B or option C of article 15 below.

[7] This provision will be necessary if the enacting State includes in its law article 6, subparagraph 3 (e), of the draft Model Law.

2. [The enacting State should specify which components of the grantor's name determined in accordance with paragraph 1 must be entered in the notice].

3. [The enacting State should specify the way in which the grantor's name is determined if the name is legally changed after the issuance of the relevant document referred to in paragraph 1.]

4. Where the grantor is a legal person, the grantor identifier is the name of the grantor that appears in [the most recent document, law or decree to be specified by the enacting State] constituting the legal person.

5. [The enacting State should specify whether additional information must be entered in the notice in special cases, such as where the grantor is subject to insolvency proceedings, a trustee, or a representative of the estate of a deceased person.]

Article 11. Secured creditor identifier

1. Where the secured creditor is a natural person, the secured creditor identifier is the name of the secured creditor or its representative as it appears in [the relevant official document in the order in which it should be used to determine the secured creditor's name to be specified by the enacting State].

2. Where the secured creditor is a legal person, the secured creditor identifier is the name of the secured creditor or its representative that appears in [the most recent document, law or decree to be specified by the enacting State] constituting the legal person.

3. [The enacting State should specify whether additional information must be entered in the notice in special cases, such as where the secured creditor is subject to insolvency proceedings, a trustee, or a representative of the estate of a deceased person.]

Article 12. Description of encumbered assets

1. The assets encumbered or to be encumbered must be described in a notice in a manner that reasonably allows their identification.

2. A description that indicates that the encumbered assets consist of all of the grantor's movable assets, or of all of the grantor's movable assets within a particular category, satisfies the standard in paragraph 1.

Article 13. Language of information in a notice

1. With the exception of the names and addresses of the grantor and the secured creditor or its representative, the information contained in a notice must be expressed in [the language or languages to be specified by the enacting State].

2. The information contained in a notice must be expressed in the character set prescribed and publicized by the Registry.

Article 14. Time of effectiveness of the registration of a notice

1. The registration of an initial or amendment notice is effective from the date and time when the information in the notice is entered into the registry record so as to be accessible to searchers of the public registry record.

2. The Registry must enter information in an initial or amendment notice into the registry record without delay after the notice is submitted and in the order in which each notice was submitted.

3. The Registry must record the date and time when the information in an initial or amendment notice is entered into the registry record so as to be accessible to searchers of the public registry record.

Option A[8]

4. The registration of a cancellation notice is effective from the date and time when the information in the notice to which it relates is no longer accessible to searchers of the public registry record.

Option B[9]

4. The registration of a cancellation notice is effective from the date and time when the information in the notice is entered into the registry record so as to be accessible to searchers of the public registry record.

Option A[10]

5. The Registry must record the date and time when the information in the initial or amendment notice to which a cancellation notice relates is no longer accessible to searchers of the public registry record.

Option B[11]

5. The Registry must record the date and time when the information in a cancellation notice is entered into the registry record so as to be accessible to searchers of the public registry record.

Article 15. Period of effectiveness of the registration of a notice

Option A

1. The registration of an initial notice is effective for [a period of time to be specified by the enacting State].

2. The period of effectiveness of the registration of an initial notice may be extended within [a period of time to be specified by the enacting State] before its expiry by the registration of an amendment notice providing for an extension.

3. The period of effectiveness of the registration of an initial notice may be extended more than once.

4. The registration of an amendment notice in accordance with paragraph 2 extends the period of effectiveness for the period referred to in paragraph 1 beginning from the time the current period would have expired if the amendment notice had not been registered.

Option B

1. The registration of an initial notice is effective for the period of time indicated by the registrant in the designated field of the notice.

2. The period of effectiveness of the registration of an initial notice may be extended at any time before its expiry by the registration of an amendment notice that indicates in the designated field a new period.

3. The period of effectiveness of the registration of an initial notice may be extended more than once.

4. The registration of an amendment notice in accordance with paragraph 2 extends the period of effectiveness for the period indicated in the amendment notice beginning from the time the current period would have expired if the amendment notice had not been registered.

---

[8] This provision will be necessary, if the enacting State implements option A or option B of article 22 below.

[9] This provision will be necessary, if the enacting State implements option C or option D of article 22 below.

[10] This provision will be necessary, if the enacting State implements option A of paragraph 4 of this article.

[11] This provision will be necessary, if the enacting State implements option B of paragraph 4 of this article.

Option C

1. The registration of an initial notice is effective for the period of time indicated by the registrant in the designated field of the notice, not exceeding [a maximum period of time to be specified by the enacting State].

2. The period of effectiveness of the registration of an initial notice may be extended within [a period to be specified by the enacting State] before its expiry by the registration of an amendment notice that indicates in the designated field a new period not exceeding the maximum period of time referred to in paragraph 1.

3. The period of effectiveness of the registration of an initial notice may be extended more than once.

4. The registration of an amendment notice in accordance with paragraph 2 extends the period of effectiveness for the period specified in the amendment notice beginning from the time the current period would have expired if the amendment notice had not been registered.

Article 16. Obligation to send a copy of a registered notice

1. Without delay after the registration of a notice, the Registry must send to the person identified in the notice as the secured creditor at its address set forth in the notice a copy of the information in a registered notice, indicating: (a) the date and time when the registration became effective; and (b) the registration number assigned to the notice.

2. Within [a short period to be specified by the enacting State] after the person identified in a registered notice as the secured creditor receives a copy of the information in the notice in accordance with paragraph 1, that person must send it to the person identified in the notice as the grantor:

(a) At the address set forth in the notice; or

(b) If that person knows that the address has changed, at the most recent address known to that person or an address reasonably available to that person.

[3. Failure of the person identified in a registered notice as the secured creditor to meet the obligation under paragraph 2 may result only in [an amount of nominal penalties to be specified by the enacting State] and any damages resulting from that failure that may be proven.]

[4.] Upon request by the person identified in a registered notice as the grantor, the Registry must provide the information about the registrant's identity obtained under article 6, subparagraph 1 (b).

[*Note to the Working Group: The Working Group may wish to note that paragraphs 3 and 4 have been added pursuant to a decision by the Commission (A/70/17, paras. 188 and 189).*]

Section D. Amendments and cancellations

Article 17. Right to register an amendment or cancellation notice

1. Subject to paragraph 2, the person identified in a registered initial notice as the secured creditor may register an amendment or cancellation notice relating to that notice.

2. Upon registration of an amendment notice changing the person identified in a registered initial notice as the secured creditor, only the person identified in the amendment notice as the secured creditor may register an amendment or cancellation notice.

Article 18. Information required in an amendment notice

1. An amendment notice must contain in the relevant designated field:

(a) The registration number; and

(b) The information to be added, deleted or changed.

2. An amendment notice may relate to one or more than one item of information in a notice.

Article 19. Global amendment of secured creditor information

Option A

The person identified in multiple registered notices as the secured creditor may register a single amendment notice to amend its identifier, its address or both, if the name, address or both of that person change or the secured obligation is assigned.

Option B

[The enacting State may wish to specify a way for the Registry to amend the identifier, address or both of the person identified as the secured creditor in multiple registered notices upon the request of that person where its name, address or both change or the secured obligation is assigned.]

Article 20. Information required in a cancellation notice

A cancellation notice must contain in the designated field the registration number assigned by the Registry to the registered initial notice to which the cancellation relates.

Article 21. Compulsory registration of an amendment or cancellation notice

1. The secured creditor must register an amendment notice if:

(a) The registered notice to which it relates contains information that exceeds the scope of the grantor's authorization; or

(b) The security agreement to which the registered notice relates has been revised to delete some encumbered assets or to reduce the maximum amount indicated in the registered notice and the grantor has not otherwise authorized the registration of a notice containing that revised information.

2. The secured creditor must register a cancellation notice if:

(a) The registration of an initial notice was not authorized by the grantor;

(b) The registration of an initial notice was authorized by the grantor but the authorization has been withdrawn and no security agreement has been concluded; or

(c) The security right to which the notice relates has been extinguished.

3. [In a case falling within subparagraphs 1 (a) and (2) (a), the] [The] secured creditor may not charge or accept any fee or expense for complying with its obligation.

4. If any of the conditions set out in paragraph 1 or 2 are met, the grantor is entitled to request the secured creditor in writing to register an amendment or cancellation notice and the secured creditor may not charge or accept any fee or expense.

5. If the secured creditor does not comply with the grantor's written request referred to in paragraph 4 within [a short period to be specified by the enacting State] after its receipt, the grantor is entitled to seek the registration of an amendment or cancellation notice through [a summary judicial or administrative procedure to be specified by the enacting State].

6. An amendment or cancellation notice in accordance with paragraph 4 is registered by

Option A

the Registry without delay upon receipt of the notice with a copy of the relevant order.

Option B

[the judicial or administrative officer to be specified by the enacting State] without delay upon the issuance of the relevant order with a copy of the order.

Article 22. Amendment or cancellation notices not authorized by the secured creditor

Option A

The registration of an amendment or cancellation notice is effective regardless of whether it is authorized by the person identified in the registered initial [or amendment] notice as the secured creditor.

Option B

1. Subject to paragraph 2, the registration of an amendment or cancellation notice is effective regardless of whether it is authorized by the person identified in the registered initial [or amendment] notice as the secured creditor.

2. The unauthorized registration of an amendment or cancellation notice does not affect the priority of the security right to which it relates as against the right of a competing claimant [which arose before the registration and] over which the security right had priority before the registration.

Option C

The registration of an amendment or cancellation notice is ineffective unless authorized by the person identified in the registered initial [or amendment] notice as the secured creditor.

Option D

1. Subject to paragraph 2, the registration of an amendment or cancellation notice is ineffective unless authorized by the person identified in the registered initial [or amendment] notice as the secured creditor.

2. The unauthorized registration of an amendment or cancellation notice is nonetheless effective as against a competing claimant whose right was acquired in reliance on a search of the registry record made after the registration of the amendment or cancellation notice, provided that it did not have knowledge that the registration was unauthorized at the time it acquired its right.

Section E. Searches

Article 23. Search criteria

A search of the public registry record may be conducted according to:

(a) The identifier of the grantor; or

(b) The registration number assigned to the initial notice.

Article 24. Search results

1. Upon submission of a search request, the Registry must provide a search result that indicates the date and time when the search was performed and:

Option A

(a) Sets forth all information in each registered notice that contains information matching the search criterion exactly; or

(b) Indicates that no registered notice contains information matching the search criterion exactly.

Option B

(a) Sets forth all information in each registered notice that contains information matching the search criterion:

(i) exactly; or

(ii) where the search criterion is the grantor identifier, closely [under criteria to be specified by the enacting State];

(b) Indicates that no registered notice contains information matching the search criterion:

(i) exactly; or

(ii) where the search criterion is the grantor identifier, closely [under criteria to be specified by the enacting State].

2. Upon request by a searcher, the Registry must issue an official search certificate indicating the search result.

3. A written search result that purports to have been issued by the Registry is proof of its contents in the absence of evidence to the contrary.

Section F. Errors and post-registration changes

Article 25. Registrant errors in required information

1. An error in the grantor identifier entered in a notice does not render the registration of the notice ineffective if the notice would be retrieved by a search of the registry record using the grantor's correct identifier as the search criterion.

[2. An error in the grantor identifier entered in a notice does not render the registration of the notice ineffective if the notice would be retrieved as a close match [under criteria to be specified by the enacting State] by a search of the registry record using the grantor's correct identifier as the search criterion, unless the error would seriously mislead a reasonable searcher.]

[3.] An error in the grantor identifier entered in a notice does not render the registration of the notice ineffective with respect to other grantors correctly identified in the notice.

[4.] An error in required information other than the grantor's identifier entered in a notice does not render the registration ineffective unless the error would seriously mislead a reasonable searcher.

[5.] An error in the description of an encumbered asset in a notice does not render the registration of the notice ineffective with respect to other encumbered assets sufficiently described.

[6.] Notwithstanding paragraph 4, an error in the period of effectiveness of registration[12] or the maximum amount for which the security right may be enforced entered in a notice,[13] does not render the notice ineffective, except to the extent it seriously misled third parties that relied on the information set out on the notice.

Article 26. Post-registration change of grantor identifier

1. If the grantor's identifier changes after a notice is registered and the secured creditor registers an amendment notice indicating the new identifier of the grantor within [a short period of time to be specified by the enacting State] after the change but before the expiry of the period of effectiveness of the registered notice, the security right to which the notice relates remains effective against third parties and retains whatever priority it had over the rights of competing claimants before the change.

2. If the secured creditor registers an amendment notice after the expiration of the time period indicated in paragraph 1 or does not register an amendment notice at all:

(a) A security right with respect to which a notice is registered or which is otherwise made effective against third parties after the change in the grantor's identifier but before the

[12] This provision will be necessary, if the enacting State implements option B or option C of article 15 above.

[13] This provision will be necessary, if the enacting State implements article 9, subparagraph (e), above.

registration of the amendment notice has priority over the security right to which the amendment notice relates; and

(b) A person that buys, leases or licenses the encumbered asset after the change in the grantor's identifier but before the registration of the amendment notice acquires its rights free of the security right to which the amendment notice relates.

Article 27. Post-registration transfer of an encumbered asset

Option A

1. If a security right in an encumbered asset has been made effective against third parties by registration of a notice and the encumbered asset is transferred to a transferee that acquires its rights subject to the security right under article 29, the security right remains effective against third parties and retains whatever priority it had over the rights of competing claimants before the transfer, provided that the secured creditor registers an amendment notice adding the transferee's identifier and address as a new grantor within [a short period of time to be specified by the enacting State] after the secured creditor acquires knowledge of the transfer.

2. If the secured creditor registers an amendment notice after the expiration of the time period indicated in paragraph 1 or does not register an amendment notice at all:

(a) A security right created by the transferee with respect to which a notice is registered or which is otherwise made effective against third parties after the transfer but before the registration of the amendment notice has priority over the security right to which the amendment notice relates; and

(b) A person that buys, leases or licenses the encumbered asset after its transfer but before the registration of the amendment notice acquires its rights free of the security right to which the amendment notice relates.

3. A security right in intellectual property that has been made effective against third parties by registration of a notice remains effective against third parties and retains its priority notwithstanding a transfer of the encumbered asset covered by the notice.

4. In the case of successive transfers of an encumbered asset, paragraphs 1, 2 and 3 apply to the last transfer.

Option B

1. If a security right in an encumbered asset has been made effective against third parties by registration of a notice and the encumbered asset is transferred to a transferee that acquires its rights subject to the security right under article 29, the security right remains effective against third parties and retains whatever priority it had over the rights of competing claimants before the transfer, provided that the secured creditor registers an amendment notice adding the transferee's identifier and address as a new grantor within [a short period of time to be specified by the enacting State] after the transfer.

2. If the secured creditor registers an amendment notice after expiration of the time period indicated in paragraph 1 or does not register an amendment notice at all:

(a) A security right created by the transferee with respect to which a notice is registered or which is otherwise made effective against third parties after the transfer but before the registration of the amendment notice has priority over the security right to which the amendment notice relates; and

(b) A person that buys, leases or licenses the encumbered asset after its transfer but before the registration of the amendment notice acquires its rights free of the security right to which the amendment notice relates.

3. A security right in intellectual property that has been made effective against third parties by registration of a notice remains effective against third parties and retains its priority notwithstanding a transfer of the encumbered asset covered by the notice.

4. In the case of successive transfers of an encumbered asset, paragraphs 1, 2 and 3 apply to the last transfer.

Option C

1. A security right in an encumbered asset that has been made effective against third parties by registration of a notice remains effective against third parties and retains its priority notwithstanding a transfer of the encumbered asset covered by the notice.

2. In the case of successive transfers of an encumbered asset, paragraph 1 applies to the last transfer.

[*Note to the Working Group: The Working Group may wish to note that the article dealing with the post-registration transfer of intellectual property has been added to options A and B of this article as paragraph 3 (it is not necessary in option C, as this option adopts the same rule for all types of asset). The Working Group may also wish to note that a new paragraph has been added to all options in this article to address successive transfers pursuant to a decision by the Commission (see A/70/17, para. 209).*]

Section G. Organization of the Registry and the registry record

Article 28. Appointment of the registrar

The [the appropriate executive, ministerial or other authority to be specified by the enacting State] is authorized to appoint and dismiss the registrar, and determine the registrar's duties.

Article 29. Organization of information in registered notices

1. The Registry must assign a unique registration number to a registered initial notice and associate all registered amendment or cancellation notices that contain that number with the initial notice.

2. The Registry must organize the registry record so that the information in a registered initial notice and in any associated registered notice can be retrieved:

Option A[14]

(a) As an exact match by a searcher of the registry record that uses the identifier of the grantor or the registration number assigned to the initial notice as the search criterion;

Option B[15]

(a) As an exact match by a searcher of the registry record that uses the identifier of the grantor or the registration number assigned to the initial notice as the search criterion, or as a close match by a searcher of the registry record that uses the identifier of the grantor as the search criterion; and

Option A[16]

(b) By the person identified in multiple notices as the secured creditor that uses its identifier or the registration number assigned to the initial notice as the search criterion.

Option B[17]

(b) By the Registry that uses the identifier of the person identified in multiple notices as the secured creditor or the registration number assigned to multiple initial notices as the search criterion.

3. Upon registration of an amendment or cancellation notice, the Registry may not amend or delete information contained in any associated registered notice, and the registration of

[14] This provision will be necessary, if the enacting State implements option A of article 24, paragraph 1, above.
[15] This provision will be necessary, if the enacting State implements option B of article 24, paragraph 1, above.
[16] This provision will be necessary, if the enacting State implements option A of article 19 above.
[17] This provision will be necessary, if the enacting State implements option B of article 19 above.

an amendment or cancellation notice does not result in the amendment or deletion of information in any associated notice.

Article 30. Integrity of information in the registry record

1. Except as provided in articles 31 and 32, the Registry may not amend or delete information contained in the registry record.

2. The Registry must preserve information contained in the registry record and reconstruct in the event of loss or damage.

Article 31. Removal of information from the public registry record and archival

Option A

Upon the expiry of the period of effectiveness of the registration of a notice in accordance with article 15 or upon registration of a cancellation notice in accordance with article 20 or 21, the Registry must remove information in a registered notice from the public registry record.

Option B

1. The Registry must remove information in a registered notice from the public registry record only upon the expiry of the period of effectiveness of the registration of a notice in accordance with article 15.

2. The Registry must archive information removed from the public registry record in accordance with paragraph 1 for [a period at least co-extensive with its prescription period for disputes arising from a security agreement to be specified by the enacting State] in a manner that enables the information to be retrieved by the Registry in accordance with article 29.

[*Note to the Working Group: The Working Group may wish to note that option B of paragraph 1 is intended to accommodate the "open-drawer approach", in which, unless a registered notice expired, all information in the public registry record would be available to searchers and the Registry would not have the authority to do anything but accept, retain and disclose all information (see A/70/17, para. 213).*]

Article 32. Correction of errors by the Registry

1. Without delay after discovering that it made an error or omission in entering into the registry record the information contained in a notice submitted for registration or erroneously removed from the registry record information contained in a registered notice, the Registry must

Option A

register a notice to correct the error or omission, or restore the erroneously removed information, and send a copy of the information in the registered notice to the person identified in the notice as the secured creditor.

Option B

inform the person identified in the registered notice as the secured creditor so as to enable that person to register a notice to correct the error or omission or restore the erroneously removed information.

2. The registration of a notice referred to in paragraph 1 is effective

Option A

as of the time the information in the notice becomes accessible to searchers of the registry record.

Option B

as of the time the information in the notice becomes accessible to searchers of the registry record, except that the security right to which the notice relates has the priority it would otherwise have had over the right of a competing claimant but for the Registry's error or omission or the Registry's erroneous removal of the information.

Option C

as of the time it would have been effective if the error or omission had never been made or the information had never been erroneously removed.

Option D

as of the time it would have been effective if the error or omission had never been made or the information had never been erroneously removed, except that the security right to which the notice relates is subordinate to the right of a competing claimant that acquired a right in the encumbered asset in reliance on a search of the public registry record made before the notice was registered, provided the competing claimant did not have knowledge of the error or omission or the erroneous removal of the information at the time it acquired its right.

[*Note to the Working Group: The Working Group may wish to note that, in accordance with a decision of the Working Group, this article has been aligned with revised article 22 on amendment or cancellation notices that are not authorized by the secured creditor (see A/CN.9/836, para. 106). However, the Working Group may also wish to note that the issue of the impact of notices correcting Registry errors on the effectiveness and priority of the security right to which the correction relates as against intervening third-party rights is different than the issue addressed in article 22. The Working Group may thus wish to consider that: (a) paragraph 1 should be retained so as to ensure that the Registry is authorized to correct its errors; and (b) paragraph 2 should be deleted, as it may not be possible to come up with a set of alternative rules equivalent to the set of options reflected in article 22. If this approach were adopted, a notice registered to correct a registry error or omission (or to restore erroneously removed information) would take effect only as of the time the information in the notice becomes searchable (in accordance with the general rule reflected in article 14). As a result, the secured creditor that was the victim of the Registry's error might find itself subordinated to a competing claimant that acquired a right in the encumbered asset before the registry record was corrected. In that event, its only recourse would be to claim compensation against the Registry subject to any limitation on the liability of the Registry under article 33. The Working Group may also wish to consider the application of article 32 where the enacting State adopts the "open-drawer approach" contained in option A of article 31, paragraph 1.*]

Article 33. Limitation of liability of the Registry

Option A

Any liability that the Registry may have under other law is limited for loss or damage caused by:

(a) An error or omission in a search result issued to a searcher or in a copy of a registered notice sent to the secured creditor [up to a maximum amount to be specified by the enacting State]; [and]

(b) An error or omission in entering or failing to enter information in the registry record or in erroneously removing information from the registry record [up to a maximum amount to be specified by the enacting State];

(c) A failure of the Registry to send a copy of the registered notice to the person identified in the notice as the secured creditor in accordance with article 16, paragraph 1 and article 32, paragraph 1; and

(d) The provision of false or misleading information to a registrant or searcher.

Option B

Any liability that the Registry may have under other law for loss or damage caused by an error or omission in the administration or operation of the Registry is limited to [a maximum amount to be specified by the enacting State].

Option C

The Registry is not liable for loss or damage caused to a person by an error or omission in the administration or operation of the Registry.

[*Note to the Working Group: The Working Group may wish to consider the options presented in this article. If the Working Group decides to retain option A, the Working Group may wish to consider whether the limitation of liability up to a maximum amount should be placed in the chapeau of option A for it to apply to all of the subparagraphs of option A.*]

Article 34. Registry fees

Option A

1. The Registry may charge [the fees at cost-recovery level or lower to be specified by the enacting State] for [the services to be specified by the enacting State].

2. The Registry must publicize its fee schedule, which it may modify from time to time.

3. The Registry may enter into an account agreement with any person to facilitate the registration process, including the payment of registry fees.

Option B

The Registry may not charge any fee for its services.

(A/CN.9/WG.VI/WP.65/Add.2) (Original: English)

Note by the Secretariat on a draft model law on secured transactions

ADDENDUM

Contents

Chapter V. Priority of a security right

A. General rules

Article 27. Competing security rights

1. Subject to articles 28-37, priority among competing security rights created by the same grantor in the same encumbered asset is determined according to the order of third-party effectiveness.

[2. Priority among competing security rights created by different grantors in the same encumbered asset is determined according to the order of third-party effectiveness[, provided that, upon transfer of the encumbered asset, the secured creditor of each grantor complies with the requirements of article 27, option A or B, [of the registry-related provisions] to preserve the third-party effectiveness and priority of its security right].]

[3.] The priority of a security right is not affected by a change in the method by which it is made effective against third parties, provided that there is no time period during which the security right is not effective against third parties.

[4.] The priority of a security right in the proceeds of an encumbered asset is the same as the priority of the security right in that asset.

[5.] If two or more security rights in the same tangible asset continue in a mass or product as provided in article 11, they retain the same priority as the security rights in the asset had as against each other immediately before the asset became part of the mass or product.

[6.] If security rights in separate tangible assets continue in the same mass or product and each security right is effective against third parties, the secured creditors are entitled to share in the aggregate maximum value of their security rights in the mass or product according to the ratio of the value of the respective security rights.

[7.] For the purposes of paragraph [6], the maximum value of a security right is the lesser of the value determined in accordance with article 11 and the amount of the secured obligation.

[8.] An acquisition security right in a separate tangible asset that continues in a mass or product and is effective against third parties has priority as against a security right granted by the same grantor in the mass or product.

[*Note to the Working Group: The Working Group may wish to consider paragraph 2, which has been added within square brackets to deal with priority conflicts among security rights granted by different grantors (i.e. the grantor and successive transferees of the same encumbered asset). In this connection, the Working Group may wish to note that paragraph 2 may need to be coordinated with articles 18 and 19. The Working Group may also wish to note that paragraph 4 has been revised to deal with the priority of a security right in the proceeds of an encumbered asset, rather than with the time of third-party effectiveness, as recommendation 100 of the* Secured Transactions Guide*, on which it was originally based. The Working Group may also wish to consider whether paragraphs 5 and 6 of this article will need to be coordinated further with article 11*.]

Article 28. Competing security rights in the case of advance registration

Option A

The priority of a security right with respect to which a notice has been registered in the Registry before the conclusion of a security agreement or, in the case of a security right in a future asset, before the grantor acquires rights in the asset or the power to encumber it, is determined according to the time of registration.

Option B

[For the purposes of articles 27, paragraph 1, 30, paragraph 1 and 33, paragraph 1, […] in] [In] the case of a security right with respect to which a notice has been registered in the Registry before the conclusion of a security agreement or, in the case of a security right in a future asset, before the grantor acquires rights in the asset or the power to encumber it, the time of registration is treated as the time of third-part effectiveness [, provided that is there is no period after the time of registration in which there is neither registration nor third-party effectiveness].

[*Note to the Working Group: The Working Group may wish to note that this article has been included in the draft Model Law pursuant to a decision by the Working Group (see A/CN.9/830, para. 86) and consider the options offered. The Working Group may also wish to consider the heading and the scope of this article (that is, whether it should apply also in the case of competing security rights or also in the case of a priority conflict between a security right and the rights of a transferee of an encumbered asset (art. 30, para. 1) or a judgement creditor (art. 33, para. 1).*]

Article 29. Rights of buyers or other transferees, lessees or licensees of an encumbered asset

1. If an encumbered asset is sold or otherwise transferred, leased or licensed and a security right in that asset is effective against third parties at the time of the sale or other transfer, lease or licence, a buyer or other transferee, lessee or licensee acquires its rights subject to the security right except as provided in this article.

2. A buyer or other transferee of an encumbered asset acquires its rights free of the security right, if the secured creditor authorizes a sale or other transfer of the asset free of the security right.

3. The rights of a lessee or licensee of an encumbered asset are not affected by a security right if the secured creditor authorizes the grantor to lease or license the asset unaffected by the security right.

4. A buyer of a tangible encumbered asset sold in the ordinary course of the seller's business acquires its rights free of the security right, provided that, at the time of the conclusion of the sale agreement, the buyer does not have knowledge that the sale violates the rights of the secured creditor under the security agreement.

5. The rights of a lessee of a tangible encumbered asset leased in the ordinary course of the lessor's business are not affected by the security right, provided that, at the time of the conclusion of the lease agreement, the lessee does not have knowledge that the lease violates the rights of the secured creditor under the security agreement.

6. Subject to the rights of a secured creditor with a security right in intellectual property in accordance with article 45, the rights of a non-exclusive licensee of an intangible encumbered asset licensed in the ordinary course of the licensor's business are not affected by the security right, provided that, at the time of the conclusion of the licence agreement, the licensee does not have knowledge that the licence violates the rights of the secured creditor under the security agreement.

7. If a buyer or other transferee of a tangible encumbered asset acquires its rights free of a security right, any subsequent buyer or other transferee also acquires its rights free of that security right.

8. If the rights of a lessee of a tangible encumbered asset or licensee of an intangible encumbered asset are not affected by the security right, the rights of any sub-lessee or sub-licensee are also unaffected by that security right.

[*Note to the Working Group: The Working Group may wish to consider whether it is sufficiently clear that exceptions to the rule in paragraph 1 apply only to buyers or other transferees, lessees or licensees for value, and not to donees or other gratuitous transferees, is sufficiently clear or whether the matter should be explicitly clarified in this article or in the Guide to Enactment (see* Secured Transactions Guide*, chap. V, para. 89).*]

Article 30. Rights of buyers or other transferees, lessees or licensees of an encumbered asset in the case of specialized registration[18]

1. A security right in an asset that is made effective against third parties by registration in [the enacting State to specify the specialized registry or title certificate, if any] has priority over a security right in the same asset which is made effective against third parties by any other method.

2. If an encumbered asset is sold or otherwise transferred, leased or licensed and, at the time of the sale or other transfer, lease or licence, a security right in that asset is effective against third parties by registration in [the enacting State to specify the specialized registry or title certificate, if any], the buyer or other transferee, lessee or licensee acquires its rights subject to the security right, except as provided in paragraphs 2-8 of article 29.

3. If a security right in an asset that may be made effective against third parties by registration in [the enacting State to specify the specialized registry or title certificate, if any],

[18] This rule is an example for the consideration of enacting States that have a specialized registration regime.

has not been made effective against third parties by such registration, a buyer or other transferee acquires its rights free of the security right and a lessee's or licensee's rights are unaffected by the security right.

[*Note to the Working Group: The Working Group may wish to note that the heading of this article does not reflect the contents of paragraph 1 and to consider whether: (a) the heading should be adjusted; or (b) paragraph 1 should be included in article 28, and paragraphs 2 and 3 should be included in article 29.*]

Article 31. Rights of the insolvency representative

[1.] A security right that is effective against third parties under this Law at the time of the commencement of insolvency proceedings with respect to the grantor remains effective against third parties and retains the priority it had before the commencement of the insolvency proceedings, unless another claim has priority pursuant to [the enacting State to specify its insolvency law].

[[2.] If a security right is effective against third parties at the time of commencement of insolvency proceedings with respect to the grantor, the secured creditor is entitled to take any action necessary to maintain the third-party effectiveness and priority the security right had before commencement of the insolvency proceedings.

[3.] An acquisition security right that is effective against third parties by the registration of a notice in the Registry after the commencement of insolvency proceedings with respect to the grantor and within the period specified in article 34, subparagraph (a)(ii), has the priority under this Law that it acquires as a result of such registration.]

[*Note to the Working Group: The Working Group may wish to note that paragraph 1 is based on recommendation 4 of the* UNCITRAL Legislative Guide on Insolvency Law *and recommendations 238 and 239 of the* Secured Transactions Guide, *paragraph 2 is based on recommendation 238 of the* Secured Transactions Guide *(see A/CN.9/830, para. 87) and paragraph 3 is intended to state explicitly what is implicit in paragraph 1 of this article and article 34. As these recommendations refer to what the insolvency law should provide, the Working Group may wish to consider whether this article should be deleted*.]

Article 32. Preferential claims

The following claims arising by operation of other law have priority over a security right that is effective against third parties but only up to [the enacting State to specify the amount for each category of claim]:

(a) […];

(b) […].[19]

Article 33. Rights of judgement creditors

1. Subject to the rights of acquisition secured creditors in accordance with article 36, the rights of an unsecured creditor that has obtained a judgement or provisional order ("judgement creditor") have priority over a security right, if, before the security right is made effective against third parties, the judgement creditor [has taken the steps to be specified by an enacting State for a judgement creditor to acquire rights in the encumbered asset or to refer to the relevant provisions of other law with respect to judgements or provisional court orders].

2. The priority of the rights of the judgement creditor referred to in paragraph 1 does not extend to credit disbursed by the secured creditor:

(a) Within [the enacting State to specify a short period of time, such as 30 days] from the time the judgement creditor notified the secured creditor that it had taken the steps referred to in paragraph 1; or

(b) Pursuant to an irrevocable commitment in a fixed amount or an amount to be fixed pursuant to a specified formula of the secured creditor to extend credit, if the

[19] The enacting State will not need this article if it does not have any preferential claims.

commitment was made before the judgement creditor notified the secured creditor that it had taken the steps referred to in paragraph 1.

[*The Working Group may wish to consider whether the judgement creditor should have priority under paragraph 2 only if the secured creditor received the notification and, if so, whether this matter should be clarified in paragraph 2 of this article, another article for the receipt rule to apply throughout the draft Model Law or in the Guide to Enactment*.]

Article 34. Non-acquisition security rights competing with acquisition security rights[20]

Option A[21]

1. Except as provided in article 30 with respect to a security right that is made effective against third parties by registration in [the enacting State to specify the specialized registry or title certificate, if any]:

(a) An acquisition security right in an asset other than inventory, consumer goods, intellectual property or rights of a licensee under a licence of intellectual property, held by the grantor [primarily] for sale or licence in the ordinary course of the grantor's business or used or intended to be used by the grantor [primarily] for personal, family or household purposes, has priority over a competing non-acquisition security right created by the grantor, provided that:

(i) The acquisition secured creditor is in possession of or has acquired the asset; or

(ii) A notice with respect to the acquisition security right is registered in the Registry within [a short period of time to be specified by the enacting State] after the grantor obtains possession of or acquires the asset;

(b) An acquisition security right in inventory, intellectual property or rights of a licensee under a licence of intellectual property, held by the grantor [primarily] for sale or licence in the ordinary course of the grantor's business has priority over a competing non-acquisition security right created by the grantor, provided that:

(i) The acquisition secured creditor is in possession of or has acquired the asset; or

(ii) Before the grantor obtains possession of or acquires the asset:

a. A notice with respect to the acquisition security right is registered in the Registry; and

b. A notice that is sent by the acquisition secured creditor is received by the non-acquisition secured creditor that has registered a notice in the Registry with respect to a security right created by the grantor in an asset of the same kind, stating that the acquisition secured creditor has or intends to acquire an acquisition security right and describing the asset sufficiently to enable the non-acquisition secured creditor to identify the asset that is the object of the acquisition security right; and

(c) An acquisition security right in consumer goods, intellectual property or rights of a licensee under a licence of intellectual property, used or intended to be used by the grantor [primarily] for personal, family or household purposes, has priority over a competing non-acquisition security right created by the grantor in the same asset.

2. A notice that is sent in accordance with subparagraph 1(b)(ii)b., may cover acquisition security rights under multiple transactions between the same parties without the need to

---

[20] This section includes the unitary-approach recommendations of the *Secured Transactions Guide*. If a State prefers to adopt the non-unitary approach recommendations, it may wish to consider implementing instead recommendations 187-202 of the *Secured Transactions Guide*.
[In particular, States may wish to consider doing so if they have implemented regional legislation along the Directive 2011/7/EU of the European Parliament and of the Council of 16 February 2011 on combating late payment in commercial transactions (the "Late Payment Directive"), article 9 of which, provides that "Member States shall provide in conformity with the applicable national provisions designated by private international law that the seller retains title to goods until they are fully paid for if a retention of title clause has been expressly agreed between the buyer and the seller before the delivery of the goods".]

[21] A State may adopt option A or option B of this article.

identify each transaction and is sufficient only for security rights in assets of which the grantor obtains possession or which the grantor acquires within [a period of time to be specified by the enacting State] after the notice is received.

Option B

Except as provided in article 30:

(a) An acquisition security right in an asset other than consumer goods, intellectual property or rights of a licensee under a licence of intellectual property, used or intended to be used by the grantor [primarily] for personal, family or household purposes, has priority as against a competing non-acquisition security right created by the grantor, provided that:

(i) The acquisition secured creditor is in possession of or acquires the asset; or

(ii) A notice with respect to the acquisition security right is registered in the Registry within [a short period of time to be specified by the enacting State] after the grantor obtains possession of or acquires the asset; and

(b) An acquisition security right in consumer goods, intellectual property or rights of a licensee under a licence of intellectual property, used or intended to be used by the grantor [primarily] for personal, family or household purposes, has priority over a competing non-acquisition security right created by the grantor in the same asset.

[*Note to the Working Group: The Working Group may wish to note that subparagraph 1(b)(ii)b. of option A refers to a notice received by an earlier registered inventory financier*.]

Article 35. Competing acquisition security rights

1. Subject to paragraph 2, the priority between competing acquisition security rights is determined according to article 27.

2. An acquisition security right of a seller or lessor, or a licensor of intellectual property, that was made effective against third parties within the period specified in article 34, subparagraph (a)(ii), has priority over a competing acquisition security right of a secured creditor other than a seller or lessor, or a licensor of intellectual property.

Article 36. Acquisition security rights competing with the rights of judgement creditors

An acquisition security right that is made effective against third parties within the period specified in article 34, subparagraph (a)(ii), has priority over the rights of a judgement creditor that would otherwise have priority under article 32.

Article 37. Acquisition security rights in proceeds[22]

Option A

1. A security right in proceeds of an asset other than inventory, consumer goods, intellectual property or rights of a licensee under a licence of intellectual property, held by the grantor [primarily] for sale or licence in the ordinary course of the grantor's business or used or intended to be used by the grantor [primarily] for personal, family or household purposes, has the same priority as the acquisition security right in that asset.

2. A security right in proceeds of inventory, intellectual property or rights of a licensee under a licence of intellectual property, held by the grantor [primarily] for sale or licence in the ordinary course of the grantor's business, has the same priority as the acquisition security right in that asset, except where the proceeds take the form of receivables, negotiable instruments, or rights to payment of funds credited to a bank account.

3. A security right in proceeds has the same priority as the security right in that asset, provided that the acquisition secured creditor notifies non-acquisition secured creditors that,

[22] A State may adopt option A of this article, if it adopts option A of article 34, or option B of this article if it adopts option B of article 34.

before the proceeds arose, the acquisition secured creditor registered a notice with respect to assets of the same kind as the proceeds in the Registry.

Option B

Notwithstanding article 34, the priority of an acquisition security right in a tangible asset, intellectual property or rights of a licensee under a licence of intellectual property that is effective against third parties does not extend to its proceeds.

Article 38. Subordination

1. A person may at any time subordinate its priority under this Law in favour of any existing or future competing claimant without the need for the beneficiary to be a party to the subordination.

2. Subordination does not affect the rights of competing claimants other than the person subordinating its priority and the beneficiary of the subordination.

[*Note to the Working Group: The Working Group may wish to consider: whether: (a) a subordination agreement has to be in writing or may also be oral; (b) the Guide to Enactment should explain whether, if third-party effectiveness of the security right has been established by registration of a notice, an amendment notice may be registered to reflect the new order of priority; and (c) the rule that an agreement cannot affect third parties (art. 4, para. 2) is not enough to cover unilateral subordination and thus paragraph 2 of this article is necessary and should be retained*.]

Article 39. Future advances, future encumbered assets and maximum amount

1. Subject to the rights of judgement creditors under article 32, the priority of a security right extends to all secured obligations, including obligations incurred after the security right became effective against third parties.

2. The priority of a security right covers all encumbered assets described in a notice registered in the Registry, irrespective of whether they are acquired by the grantor or come into existence before or after the time of registration.

[3. The priority of the security right is limited to the maximum amount set out in the notice registered in the Registry.][23]

Article 40. Irrelevance of knowledge of the existence of a security right

Knowledge of the existence of a security right on the part of a secured creditor does not affect its priority under this Law.

B. Asset-specific rules

Article 41. Negotiable instruments

1. A security right in a negotiable instrument that is made effective against third parties by possession of the instrument has priority over a security right in the instrument that is made effective against third parties by registration of a notice in the Registry.

2. A buyer or other consensual transferee of an encumbered negotiable instrument acquires its rights free of the security right that is made effective against third parties by registration of a notice in the Registry if the buyer or other consensual transferee:

(a) Qualifies as a protected holder [the enacting State may wish to use any other term used in its law]; or

[23] This provision will be necessary if the enacting State implements articles 6, subparagraph 3(e), and 9, subparagraph (e) [of the registry-related provisions].

(b) Takes possession of the negotiable instrument and gives value [the enacting State may wish to use any other term used in its law] without knowledge that the sale or other transfer is in violation of the rights of the secured creditor under the security agreement.

Article 42. Rights to payment of funds credited to a bank account

1. A security right in a right to payment of funds credited to a bank account that is made effective against third parties by the secured creditor becoming the account holder has priority over a competing security right that is made effective against third parties by any other method.

2. A security right in a right to payment of funds credited to a bank account with respect to which the secured creditor is the depositary bank has priority over a competing security right made effective against third parties by any method other than by the secured creditor becoming the account holder.

3. A security right in a right to payment of funds credited to a bank account that is made effective against third parties by a control agreement has priority over a competing security right other than a security right of the depositary bank or a security right that is made effective against third parties by any method other than by the secured creditor becoming the account holder.

4. The order of priority among competing security rights in a right to payment of funds credited to a bank account that are made effective against third parties by the conclusion of control agreements is determined on the basis of the time of conclusion of the control agreements.

5. A depositary bank's right under other law to set off obligations owed to it by the grantor against the grantor's right to payment of funds credited to a bank account maintained with the depositary bank has priority as against a security right in the right to payment of funds credited to the bank account, except a security right that is made effective against third parties by the secured creditor becoming the account holder.

6. A transferee of funds from a bank account pursuant to a transfer initiated or authorized by the grantor acquires its rights free of a security right in the right to payment of funds credited to the bank account, unless the transferee has knowledge that the transfer violates the rights of the secured creditor under the security agreement.

7. Paragraph 6 does not adversely affect the rights of transferees of funds from bank accounts under [the enacting State to specify the relevant law].

Article 43. Money

1. A transferee that obtains possession of money that is subject to a security right acquires its rights free of the security right, unless that person has knowledge that the transfer violates the rights of the secured creditor under the security agreement.

2. This article does not adversely affect the rights of persons in possession of money under [the enacting State to specify the relevant law].

Article 44. Negotiable documents and tangible assets covered

1. Subject to paragraph 2, a security right in a tangible asset made effective against third parties by possession of the negotiable document covering that asset has priority over a competing security right made effective against third parties by any other method.

2. Paragraph 1 does not apply to a security right in a tangible asset other than inventory if the security right of the secured creditor not in possession of the negotiable document was made effective against third parties before the earlier of:

(a) The time that the asset became covered by the negotiable document; and

(b) The time of conclusion of an agreement between the grantor and the secured creditor in possession of the negotiable document providing for the asset to be covered by a negotiable document so long as the asset became so covered within [a short period of time to be specified by the enacting State] from the date of the agreement.

3. A transferee of an encumbered negotiable document under [the enacting State to specify the relevant law under which certain transferees of negotiable documents acquire their rights free of competing claims] acquires its rights free of a security right in the negotiable document and the tangible assets covered thereby that is made effective against third parties by registration of a notice in the Registry or by possession of the documents or the assets covered thereby.

Article 45. Intellectual property

Article 29, paragraph 6, does not affect any rights that a secured creditor may have [as an owner or licensor of intellectual property] under [the relevant law relating to intellectual property to be specified by the enacting State].

Article 46. Non-intermediated securities

1. A security right in certificated non-intermediated securities made effective against third parties by the secured creditor's possession of the certificate has priority over a competing security right by the same grantor in the same securities made effective against third parties by registration of a notice in the Registry.

2. A security right in uncertificated non-intermediated securities made effective against third parties by a notation of the security right or registration of the name of the secured creditor as the holder of the securities in the books maintained for that purpose by or on behalf of the issuer has priority over a security right in the same securities made effective against third parties by any other method.

3. A security right in uncertificated non-intermediated securities made effective against third parties by the conclusion of a control agreement has priority over a security right in the same securities made effective against third parties by registration of a notice in the Registry.

4. The order of priority among competing security rights in uncertificated non-intermediated securities that are made effective against third parties by the conclusion of control agreements is determined on the basis of the time of conclusion of the control agreements.

Option A

5. This article does not adversely affect the rights of holders of non-intermediated securities under [the enacting State to specify the relevant law relating to the transfer of securities].

Option B

5. A buyer or other consensual transferee of encumbered non-intermediated securities under [the enacting State to specify the relevant law relating to the transfer of securities] acquires its rights free of the security right.

Note by the Secretariat on a draft model law on secured transactions

ADDENDUM

Contents

Chapter VI. Rights and obligations of the parties and third-party obligors

Section I. Mutual rights and obligations of the parties to a security agreement

A. General rules

Article 47. Source of mutual rights and obligations of the parties

The mutual rights and obligations of the parties to a security agreement are determined by:

(a) The provisions of this chapter;

(b) The provisions of other law relating to the mutual rights and obligations of the parties to an agreement;

(c) The terms and conditions set forth in the security agreement, including any rules or general conditions referred to therein; and

(d) Any usage to which the parties to the security agreement have agreed [implicitly or explicitly] and any practices they have established between themselves.

[*Note to the Working Group: The Working Group may wish to consider whether this article needs to be retained. Subparagraphs (a) and (b) refer to the application of the provisions of this and other laws and may thus be self-evident. Subparagraph (c) deals with party autonomy, which is already covered in article 4. Subparagraph (d) may be placed in article 4 on party autonomy. If this article is retained, the Working Group may wish to consider the hierarchy among the sources of the rights and obligations of the parties, or leave the matter to domestic contract law*.]

Article 48. Obligation of a person in possession to exercise reasonable care

A grantor or secured creditor in possession of an encumbered asset must exercise reasonable care to preserve the asset and its value.

[*Note to the Working Group: In addition, the Working Group may wish to consider whether this article or the Guide to Enactment should address the duty to take reasonable care where the encumbered assets would be intangible (e.g. a right to payment) by referring to the discussion of this matter in the* Secured Transactions Guide *(see chap. VI, paras. 30 and 70-72).*]

Article 49. Obligation of a secured creditor to return an encumbered asset [or to register an amendment or cancellation notice]

Upon extinction of a security right in an encumbered asset, the secured creditor in possession must return it to the grantor [and the secured creditor not in possession must register an amendment or cancellation notice as provided in article 21, subparagraph 1 (b) or 2 (c), of the registry-related provisions].

[*Note to the Working Group: The Working Group may wish to consider whether the bracketed words in this article should be retained. If those words are retained, this article or the Guide to Enactment should explain that, if the security right in one asset (but not in all) is extinguished, the secured creditor must register an amendment notice. If the security right in all encumbered assets is extinguished, the secured creditor must register a cancellation notice. In addition, the Working Group may wish to consider whether this or another article should address the issue of release of control (or generally every method of third-party effectiveness). Moreover, the Working Group may wish to note that, pursuant to its decision, a new article (art. 11bis) has been added at the end of chapter II of the draft Model Law to address the extinction of a security right (see A/CN.9/836, para. 20).*]

Article 50. Right of a secured creditor to use, be reimbursed for expenses and inspect an encumbered asset

1. A secured creditor in possession of an encumbered asset has the right:

(a) To be reimbursed reasonable expenses it incurs for the preservation of the asset and its value in accordance with article 48;

(b) To make reasonable use of the asset and apply the revenues it generates to the payment of the secured obligation.

2. A secured creditor not in possession has the right to inspect an encumbered asset in the possession of the grantor or another person.

[*Note to the Working Group: The Working Group may wish to consider whether paragraph 2 should be retained, as it is a matter that would be typically addressed in the security agreement. The Working Group may wish to introduce in this section of the draft Model Law or in the third-party effectiveness chapter (as the methods of third-party effectiveness do not disclose sufficient information about a security right) an article that would give to the grantor a right to demand information from the secured creditor with regard to the security right (the secured obligation or the encumbered asset). This article would also have to deal with the question whether: (a) the secured creditor would have an obligation to respond within a certain period of time; (b) what would be the grantor's remedy if the secured creditor did not respond within that time period; and (c) the secured creditor is entitled to charge a fee for expenses incurred in providing the requested information. This article could read along the following lines*

Article X. Grantor's right to obtain information

1. A grantor is entitled to request the secured creditor to provide information with regard to the secured obligation or the encumbered assets.

2. Within [a short period of time to be specified by the enacting State] days after receipt of a request for information, a secured creditor [other than a buyer of receivables] must send to the grantor:

(a) An authenticated statement of account; and

(b) An authenticated approval or correction of the list of encumbered assets.

3. A grantor is entitled without charge to one response to a request during [a time period to be specified by the enacting State].

4. The secured creditor may require payment of a charge not exceeding [a nominal amount to be specified by the enacting State] for each additional response.

The Working Group may also wish to consider whether a third-party creditor (e.g. competing secured creditor or judgement creditor) should also have the same right to

request information. In this regard, the Working Group may wish to note that, under article 63, paragraph 1, a depositary bank does not have to respond to such requests.]

B. Asset-specific rules

Article 51. Representations of the grantor of a security right in a receivable

1. The grantor represents at the time of conclusion of the security agreement that:

(a) The grantor has not previously created a security right in the receivable in favour of another secured creditor; and

(b) The debtor of the receivable does not and will not have any defences or rights of set-off.

2. The grantor does not represent that the debtor of the receivable has, or will have, the ability to pay.

Article 52. Right of the grantor or the secured creditor to notify the debtor of the receivable

1. The grantor or the secured creditor or both may give the debtor of the receivable notification of the security right and a payment instruction, but after notification of the security right has been received by the debtor of the receivable only the secured creditor may send a payment instruction.

2. Notification of a security right or of a payment instruction sent in breach of an agreement between the grantor and the secured creditor is not ineffective for the purposes of article 58, but nothing in this article affects any obligation or liability of the party in breach for any damages arising as a result of the breach.

Article 53. Right of the secured creditor to payment of a receivable

1. As between the grantor and the secured creditor, whether or not notification of the security right has been sent, the secured creditor is entitled:

(a) To retain the proceeds of any payment made to the secured creditor and tangible assets returned to the secured creditor in respect of the encumbered receivable;

(b) To the proceeds of any payment made to the grantor and also to any tangible assets returned to the grantor in respect of the encumbered receivable; and

(c) To the proceeds of any payment made to another person and tangible assets returned to such person in respect of the encumbered receivable, if the right of the secured creditor has priority over the right of that person.

2. The rights of the secured creditor in accordance with paragraph 1 are limited to the value of the secured obligation.

Article 54. Right of the secured creditor to preserve encumbered intellectual property

If so agreed between the grantor and the secured creditor, the secured creditor is entitled to [the enacting State to specify the steps necessary to preserve encumbered intellectual property].

[*Note to the Working Group: Noting that article 54 deals with the right of the secured creditor as against the grantor to take steps that are typically taken by an owner of intellectual property (e.g. to renew registrations or pursue infringers), the Working Group may wish to consider whether the draft Model Law or the Guide to Enactment should address the question whether a patent registry should be obliged to accept a notice from a secured creditor or whether a secured creditor would be considered by a court as having the right to pursue infringers*.]

Section II. Rights and obligations of third-party obligors

A. Receivables

Article 55. Protection of the debtor of the receivable

1. Except as otherwise provided in this Law, the creation of a security right in a receivable does not affect the rights and obligations of the debtor of the receivable, including the payment terms contained in the contract giving rise to the receivable, without its consent.

2. A payment instruction may change the person, address or account to which the debtor of the receivable is required to make payment, but may not change:

(a) The currency of payment specified in the original contract; or

(b) The State specified in the original contract in which payment is to be made to a State other than that in which the debtor of the receivable is located.

Article 56. Notification of a security right in a receivable

1. Notification of a security right in a receivable or a payment instruction is effective when received by the debtor of the receivable if it reasonably identifies the encumbered receivable and the secured creditor and is in a language that is reasonably expected to inform the debtor of the receivable about its contents.

2. It is sufficient if a notification of the security right or a payment instruction is in the language of the contract giving rise to the receivable.

3. Notification of a security right in a receivable or a payment instruction may relate to receivables arising after notification.

4. Notification of a subsequent security right in a receivable constitutes notification of all prior security rights.

Article 57. Discharge of the debtor of the receivable by payment

1. Until the debtor of the receivable receives notification of a security right in a receivable, it is discharged by paying in accordance with the original contract.

2. After the debtor of the receivable receives notification of a security right in a receivable, subject to paragraphs 3-8, it is discharged only by paying the secured creditor or, if otherwise instructed in the notification or subsequently by the secured creditor in a writing received by the debtor of the receivable, in accordance with the payment instruction.

3. If the debtor of the receivable receives more than one payment instruction relating to a single security right of the same receivable created by the same grantor, it is discharged by paying in accordance with the last payment instruction received from the secured creditor before payment.

4. If the debtor of the receivable receives notification of more than one security right in the same receivable created by the same grantor, it is discharged by paying in accordance with the first notification received.

5. If the debtor of the receivable receives notification of one or more subsequent security rights in the same receivable, it is discharged by paying in accordance with the notification of the last of such subsequent security rights.

6. If the debtor of the receivable receives notification of the security right in a part of or an undivided interest in one or more receivables, it is discharged by paying in accordance with the notification or in accordance with this article as if the debtor of the receivable had not received the notification.

7. If the debtor of the receivable receives a notification as provided in paragraph 6 and pays in accordance with the notification, it is discharged only to the extent of the part or undivided interest paid.

8. If the debtor of the receivable receives notification of a security right in a receivable from a [subsequent secured creditor] [a secured creditor that acquires its right from the initial

or any other secured creditor], it is entitled to request the secured creditor to provide within a reasonable period of time adequate proof that the security right created by the initial grantor to the initial secured creditor and any intermediate security right have been created and, unless the secured creditor does so, the debtor of the receivable is discharged by paying in accordance with this article as if it had not received notification of the security right.

9. Adequate proof of a security right referred to in paragraph 8 includes but is not limited to any writing emanating from the grantor and indicating that a security right has been created.

10. This article does not affect any other ground on which payment by the debtor of the receivable to the person entitled to payment, to a competent judicial or other authority, or to a public deposit fund discharges the debtor of the receivable.

[*Note to the Working Group: The Working Group may wish to consider the bracketed sets of words in paragraph 8, noting that the second set of words is intended to explain the meaning of the term "subsequent secured creditor" (see art. 2, subpara. (b) of the* Assignment Convention *and the definition of the term "subsequent assignment" in the* Secured Transactions Guide.]

Article 58. Defences and rights of set-off of the debtor of the receivable

1. Unless otherwise agreed in accordance with article 59, in a claim by the secured creditor against the debtor of the receivable for payment of the encumbered receivable, the debtor of the receivable may raise against the secured creditor:

(a) In the case of a contractual receivable, all defences and rights of set-off arising from the contract giving rise to the receivable, or any other contract that was part of the same transaction, of which the debtor of the receivable could avail itself as if the security right had not been created and the claim were made by the grantor; and

(b) Any other right of set-off that was available to the debtor of the receivable at the time it received notification of the security right.

2. Notwithstanding paragraph 1, the debtor of the receivable may not raise as a defence or right of set-off against the grantor breach of an agreement referred to in article 12, paragraph 2, limiting in any way the initial or subsequent grantor's right to create the security right.

Article 59. Agreement not to raise defences or rights of set-off

1. Subject to paragraph 3, the debtor of the receivable may agree with the grantor in a writing signed by the debtor of the receivable not to raise against the secured creditor the defences and rights of set-off referred to in article 58.

2. The agreement referred to in paragraph 1 may be modified only by an agreement in a writing signed by the debtor of the receivable and its effectiveness against the secured creditor is determined by article 60, paragraph 2.

3. The debtor of the receivable may not waive defences arising from fraudulent acts on the part of the secured creditor or based on the incapacity of the debtor of the receivable.

Article 60. Modification of the original contract

1. An agreement concluded before notification of a security right in a receivable created by a security agreement between the grantor and the debtor of the receivable that affects the secured creditor's rights is effective as against the secured creditor, and the secured creditor acquires corresponding rights.

2. An agreement concluded after notification of a security right in a receivable created by a security agreement between the grantor and the debtor of the receivable that affects the secured creditor's rights is ineffective as against the secured creditor unless:

(a) The secured creditor consents to it; or

(b) The receivable is not fully earned by performance and either the modification is provided for in the contract giving rise to the receivable or, in the context of that contract, a reasonable secured creditor would consent to the modification.

3. Paragraphs 1 and 2 do not affect any right of the grantor or the secured creditor arising from breach of an agreement between them.

Article 61. Recovery of payments made by the debtor of the receivable

The failure of the grantor or, in the case of an outright transfer of a contractual receivable, the transferor of the receivable to perform the contract giving rise to a receivable does not entitle the debtor of the receivable to recover from the secured creditor a sum paid by the debtor of the receivable to the grantor or the secured creditor.

B. Negotiable instruments

Article 62. Rights as against the obligor under a negotiable instrument

The rights of a secured creditor that has a security right in a negotiable instrument as against the person obligated on the negotiable instrument are determined by [the enacting State to specify the relevant law relating to negotiable instruments].

C. Rights to payment of funds credited to a bank account

Article 63. Rights as against the depositary bank

1. The creation of a security right in a right to payment of funds credited to a bank account does not affect the rights and obligations of the bank with which that bank account is maintained without its consent, nor does it obligate the depositary bank to provide any information about that bank account to third parties.

2. Any rights of set-off that the depositary bank may have are not affected by any security right that the bank may have in a right to payment of funds credited to a bank account maintained with the bank.

D. Negotiable documents and tangible assets covered

Article 64. Rights as against the issuer of a negotiable document

The rights of a secured creditor that has a security right in a negotiable document as against the issuer of the document or any other person obligated on the document are determined by [the enacting State to specify the relevant law relating to negotiable documents].

E. Non-intermediated securities

Article 65. Rights as against the issuer of a non-intermediated security

The rights of a secured creditor that has a security right in non-intermediated securities as against the issuer of the securities are determined by [the enacting State to specify the relevant law relating to the obligations of the issuer of non-intermediated securities].

Chapter VII. Enforcement of a security right

A. General rules

Article 66. Post-default rights

1. After the failure of the debtor to pay or otherwise perform the secured obligation (“default”), the grantor and the secured creditor are entitled to exercise:

(a) Any right under the provisions of this chapter; and

(b) Any other right provided in the security agreement or any other law, except to the extent it is inconsistent with the provisions of this Law.

2. The exercise of one post-default right does not prevent the exercise of another post-default right, except to the extent that the exercise of one right makes the exercise of another right impossible.

3. The exercise of a post-default right with respect to an encumbered asset does not prevent the exercise of a post-default right with respect to the secured obligation, and the exercise of a post-default right with respect to the secured obligation does not prevent the exercise of a post-default right with respect to an encumbered asset.

4. The grantor and any other person that owes payment or other performance of the secured obligation may not waive unilaterally or vary by agreement any of its rights under the provisions of this chapter before default.

[*Note to the Working Group: The Working Group may wish to consider whether the definition of the term "default", which is included in this article, should instead be included in article 2 (see A/CN.9/836, para. 47)*.]

Article 67. Methods of exercising post-default rights

1. The secured creditor may exercise its post-default rights by application to [a court or other authority to be specified by the enacting State] or without such an application.

2. The exercise of the secured creditor's post-default rights by application to [a court or other authority to be specified by the enacting State] is determined by [the rules to be specified by the enacting State].

3. The exercise of the secured creditor's post-default rights without application to [a court or other authority to be specified by the enacting State] is determined by the provisions of this chapter.

Article 68. Relief for non-compliance

Option A

If a secured creditor does not comply with the provisions of this chapter, the debtor, the grantor or any other interested person

Option B

If a secured creditor does not comply with the provisions of this chapter, the debtor, the grantor or any competing claimant

Option C

Any person whose rights are affected by the non-compliance of another person with the provisions of this chapter

is entitled to apply for relief to [a court or other authority to be specified by the enacting State], including relief in the form of [the enacting State to specify expeditious proceedings].

[*Note to the Working Group: The Working Group may wish to consider the options reflected in this article (see A/CN.9/836, para. 54). If the Working Group retains option A, it may wish to consider whether in this article or in article 2 the term "interested person" should be defined. Alternatively the Guide to Enactment could give examples of interested persons referring to a secured creditor with a lower priority ranking than that of the enforcing secured creditor, a guarantor or a co-owner of the encumbered assets. If the Working Group decides to retain option B, it may wish to note that the term "competing claimant" is defined (see art. 2, subpara. (e)). If the Working Group decides to retain option C, it may wish to consider whether this wording should be used in other articles in this chapter as well*.]

Article 69. Right of affected persons to terminate enforcement

1. Any person whose rights are affected by the enforcement process in accordance with the provisions of this chapter is entitled to terminate the enforcement process by paying or

otherwise performing the secured obligation in full, including the reasonable cost of enforcement.

2. The right of termination of the enforcement process may be exercised until the asset is sold or otherwise disposed of, acquired or collected by the secured creditor or until the conclusion of an agreement by the secured creditor for that purpose.

[3. Where the encumbered asset is leased or licensed by the secured creditor, the right of termination of the enforcement process may still be exercised subject to the rights of the lessee or licensee.]

[*Note to the Working Group: The Working Group may wish to consider paragraph 3, which has been included within square brackets in this article pursuant to a decision by the Working Group (see A/CN.9/836, para. 57). In this connection the Working Group may wish to note that paragraph 3 is intended to address the grantor's right in the residual value of the encumbered asset*.]

Article 70. Right of the higher-ranking secured creditor to take over enforcement

1. Notwithstanding commencement of enforcement by another secured creditor or a judgement creditor, a secured creditor whose security right has priority over that of the enforcing secured creditor or judgement creditor is entitled to take over the enforcement process at any time before the asset is sold or otherwise disposed of, or acquired by the secured creditor or until the conclusion of an agreement by the secured creditor for that purpose.

[2. Where the encumbered asset is leased or licensed by the secured creditor, the right of the higher-ranking secured creditor to take over the enforcement process may still be exercised subject to the rights of the lessee or licensee.]

[3][2]. The right of the higher-ranking secured creditor to take over the enforcement process includes the right to enforce by any method available to a secured creditor under this Law.

[*Note to the Working Group: The Working Group may wish to consider paragraph 2, which appears within square brackets and is intended to clarify that the senior secured creditor may take over enforcement even after the encumbered asset is leased or licensed but subject to the rights of a lessee or licensee to whom the enforcing secured creditor leased or licensed the encumbered asset*.]

Article 71. Right of the secured creditor to possession of an encumbered asset

1. Subject to the rights of a person with a superior right to possession, after default, the secured creditor is entitled to obtain possession of an encumbered asset by applying to a [court or other authority to be specified by the enacting State].

2. The secured creditor is also entitled to obtain possession of an encumbered asset without applying to a court or other authority if all of the following conditions are satisfied:

(a) The grantor has consented in the security agreement to the secured creditor obtaining possession without applying to a [court or other authority to be specified by the enacting State];

(b) The secured creditor has given the grantor and any person in possession of the encumbered asset notice of default and of the secured creditor's intent to obtain possession [after the expiry of the period of time indicated in paragraph 3]; and

(c) At the time the secured creditor attempts to obtain possession of the encumbered asset, the grantor or any other person in possession of the encumbered asset does not object.

[3. The secured creditor is not entitled to obtain possession of an encumbered asset under paragraph 2 before the expiry of [a short period of time to be specified by the enacting State].]

[4.] The notice referred to in subparagraph 2 (b) need not be given if the encumbered asset is perishable, [or] may decline in value speedily [or is in the form of certificated non-intermediated securities].

[5.]

Option A

If a higher-ranking secured creditor is in possession of the encumbered asset other than for the purpose of pursuing enforcement, a lower-ranking secured creditor is entitled to obtain possession of the asset.

Option B

If a higher-ranking secured creditor is in possession of the encumbered asset, a lower-ranking secured creditor is not entitled to obtain possession of the asset.

[*Note to the Working Group: The Working Group may wish to consider whether the words "all of the following conditions are satisfied" in paragraph 2 are necessary. In addition, the Working Group may wish to consider whether the grantor and any person in possession of the encumbered asset may object to the secured creditor obtaining possession within the period provided for in subparagraph 3. Moreover, the Working Group may wish to consider paragraph 3, which appears within square brackets and is intended to provide that the secured creditor may obtain possession of the encumbered asset only after the expiry of a short period of time (as para. 3 appears within square brackets, the reference to it in subpara. 2 (b) also appears within square brackets). Furthermore, the Working Group may wish to consider paragraph 5. The rationale underlying option A is that, if the lower-ranking secured creditor did not have the right to obtain possession of an encumbered asset from a higher-ranking secured creditor, the higher-ranking secured creditor in possession without an interest to enforce its security right could delay or preclude enforcement (the result of article 70 is that, if the higher-ranking secured creditor enforces its security right, it does not need to relinquish possession to a lower-ranking secured creditor). The justification for option B is that: (a) if the higher-ranking secured creditor had to relinquish possession, its security right could cease to be effective against third parties and thus lose its priority status; and (b) if the encumbered asset was disposed of by the lower-ranking secured creditor, it could diminish in value*.]

Article 72. Right of the secured creditor to dispose of an encumbered asset

1. After default, a secured creditor is entitled to sell or otherwise dispose of, lease, or license an encumbered asset by applying or without applying to a [court or other authority to be specified by the enacting State].

2. If a secured creditor decides to exercise the right provided in paragraph 1 by applying to a [court or other authority to be specified by the enacting State], the method, manner, time, place and other aspects of the sale or other disposition, lease or licence are determined by [the rules to be specified by the enacting State].

3. A secured creditor that exercises the right provided in paragraph 1 without applying to a [court or other authority to be specified by the enacting State] may select the method, manner, time, place and other aspects of the sale or other disposition, lease or licence, including whether to sell or otherwise dispose of, lease or license encumbered assets individually, in groups or altogether.

4. If a secured creditor decides to sell or otherwise dispose of, lease or license an encumbered asset without applying to a [court or other authority to be specified by the enacting State], it must give notice of its intention to:

(a) The grantor and the debtor;

(b) Any person with rights in the encumbered asset that notifies in writing the secured creditor of those rights, at least [a short period of time to be specified by the enacting State] before the notice is received by the grantor;

(c) Any other secured creditor that registered a security right notice with respect to the encumbered asset, at least [a short period of time to be specified by the enacting State] before the notice is received by the grantor; and

(d) Any other secured creditor that was in possession of the encumbered asset at the time when the enforcing secured creditor took possession of the asset.

5. The notice must be given at least [a short period of time to be specified by the enacting State] before the sale or other disposition, lease or licence takes place and must contain a description of the encumbered assets, a statement of the amount required to satisfy the secured obligation including interest and a reasonable estimate of the cost of enforcement, a reference to the right of any person whose rights may be affected by the enforcement process to terminate the enforcement process as provided in article 69 and a statement of the date after which the encumbered asset will be sold or otherwise disposed of, leased or licensed, the time and place of a public disposition, and the manner of the intended disposition.

6. The notice must be in a language that is reasonably expected to inform its recipients about its contents.

7. It is sufficient if the notice to the grantor is in the language of the security agreement.

8. The notice need not be given if the encumbered asset is perishable, may decline in value speedily or is of a kind sold on a recognized market.

Article 73. Right of the secured creditor to distribute the proceeds of a disposition of an encumbered asset

1. If a secured creditor decides to exercise the right provided in article 72 by applying to a [court or other authority to be specified by the enacting State], the distribution of the proceeds of sale or other disposition of, lease or licence of an encumbered asset is determined by [the rules to be specified by the enacting State], but in accordance with the priority provisions of this Law.

2. If a secured creditor decides to exercise the right provided in article 72 without applying to a [court or other authority to be specified by the enacting State]:

(a) [Subject to the rights of holders of preferential claims under article 45,] the enforcing secured creditor must apply the net proceeds of its enforcement after deducting costs of enforcement to the secured obligation;

(b) Except as provided in subparagraph 2 (c), the enforcing secured creditor must pay any surplus remaining to any subordinate competing claimant that, prior to any distribution of the surplus, notified the enforcing secured creditor of its claim, to the extent of the amount of that claim, and remit any balance remaining to the grantor; and

(c) Whether or not there is any dispute as to the entitlement or priority of any competing claimant under this Law, the enforcing secured creditor may pay the surplus to [a competent judicial or other authority or to a public deposit fund to be specified by the enacting State] for distribution in accordance with the provisions of this Law on priority.

3. [Whether the secured creditor decides to exercise the right provided in article 72 by applying or without applying to a [court or other authority to be specified by the enacting State, a] [A] debtor remains liable for any shortfall owing after application of the net proceeds of enforcement to the secured obligation.

[*Note to the Working Group: The Working Group may wish to consider the bracketed words in paragraph 3*.]

Article 74. Right of the secured creditor and the grantor to propose the acquisition of an encumbered asset by the secured creditor

1. After default, the secured creditor may propose in writing to acquire one or more of the encumbered assets in total or partial satisfaction of the secured obligation.

2. The secured creditor must send the proposal to:

(a) The grantor and the debtor;

(b) Any person with rights in the encumbered asset that has notified in writing the secured creditor of those rights, at least [a short period of time to be specified by the enacting State] before the proposal is received by the grantor;

(c) Any other secured creditor that registered a security right notice with respect to the encumbered asset, at least [a short period of time to be specified by the enacting State] before the proposal is received by the grantor; and

(d) Any other secured creditor that was in possession of the encumbered asset at the time the secured creditor took possession.

3. The proposal must specify the amount owed as of the date the proposal is sent, including interest and the cost of enforcement, and the amount of the obligation that is proposed to be satisfied by acquiring the encumbered asset, describe the encumbered asset, refer to the right of the debtor or the grantor to terminate the enforcement process as provided in article 69, and state the date after which the encumbered asset will be acquired by the secured creditor.

4. The secured creditor acquires the encumbered asset as provided in paragraph 1:

(a) In the case of a proposal for the acquisition of the encumbered asset in full satisfaction of the secured obligation, unless the secured creditor receives an objection in writing from any person entitled to receive such a proposal within [a short period of time to be specified by the enacting State] after the proposal is received by the grantor; and

(b) In the case of a proposal for the acquisition of the encumbered asset in partial satisfaction of the secured obligation, only if the secured creditor receives the affirmative consent of each addressee of the proposal in writing within [a short period of time to be specified by the enacting State] after the proposal is received by the grantor.

5. The grantor may make a proposal in accordance with paragraph 1 and, if the secured creditor accepts it, the secured creditor must proceed as provided in paragraphs 2-4.

Article 75. Rights acquired in an encumbered asset

1. If a secured creditor sells or otherwise disposes of an encumbered asset by applying to a [court or other authority to be specified by the enacting State], the buyer or other transferee acquires the asset [the enacting State to specify whether the buyer or other transferee acquires its rights subject to or free of any rights].

2. If a secured creditor leases or licenses an encumbered asset by applying to a [court or other authority to be specified by the enacting State], a lessee or licensee is entitled to the benefit of the lease or licence during its term, except as against creditors with rights that have priority over the right of the enforcing secured creditor.

3. If a secured creditor sells or otherwise disposes of an encumbered asset without applying to a [court or other authority to be specified by the enacting State], a buyer or other transferee acquires the grantor's right in the asset free of the rights of the enforcing secured creditor and any competing claimant, except the rights that have priority over the security right of the enforcing secured creditor.

4. If a secured creditor leases or licenses an encumbered asset without applying to a [court or other authority to be specified by the enacting State], a lessee or licensee is entitled to the benefit of the lease or licence during its term, except as against creditors with rights that have priority over the right of the enforcing secured creditor.

5. If a secured creditor sells or otherwise disposes of, leases or licenses the encumbered asset not in accordance with the provisions of this chapter, a buyer or other transferee, lessee, or licensee of the encumbered asset acquires the rights or benefits described in paragraphs 1 and 2, provided that [it had no knowledge of a violation of the provisions of this chapter that materially prejudiced the rights of the grantor or another person].

[*Note to the Working Group: The Working Group may wish to consider whether the bracketed text in paragraph 5 should be retained outside square brackets*.]

B. Asset-specific rules

Article 76. Collection of payment under a receivable, negotiable instrument, right to payment of funds credited to a bank account or non-intermediated security

1. After default, a secured creditor with a security right in a receivable, negotiable instrument, right to payment of funds credited to a bank account or non-intermediated security is entitled to collect payment from the debtor of the receivable, obligor under the negotiable instrument, depositary bank or issuer of the non-intermediated security.

2. The secured creditor may exercise the right to collect under paragraph 1 even before default with the consent of the grantor.

3. A secured creditor exercising the right to collect under paragraph 1 or 2 is also entitled to enforce any personal or property right that secures or supports payment of the encumbered asset.

4. If a security right in a right to payment of funds credited to a bank account has been made effective against third parties by registration of a notice, the secured creditor is entitled to collect or otherwise enforce its security right only pursuant to an order of a court, unless the depositary bank agrees otherwise.

5. The right of the secured creditor to collect under paragraphs 1 to 4 is subject to articles 55-61.

Article 77. Collection of payment under a receivable by an outright transferee

In the case of an outright transfer of a receivable, the transferee is entitled to collect the receivable before or after default of the transferor.

(A/CN.9/WG.VI/WP.65/Add.4) (Original: English)

Note by the Secretariat on a draft model law on secured transactions

ADDENDUM

Contents

Chapter VIII. Conflict of laws[1]

A. General rules

[*Note to the Working Group: The Working Group may wish to consider when the conflict-of-laws rules should apply. One approach would be to apply the conflict-of-laws rules of the forum whether or not a situation involves a choice between the laws of different States. A reason to follow this approach might be that requiring a determination as to whether a situation involves a choice of laws would create uncertainty because a court may view the issue as involving a choice of laws, while another court may see the issue differently. In addition, the conflict-of-laws rules should apply in any case, as they are also the rules that provide whether the applicable law is the domestic law of the forum or a foreign law. Another approach would be to apply the conflict-of-laws rules in all cases involving a choice between the laws of different States. Under this approach, the conflict-of-laws rules would apply, unless there was absolutely no element in the facts of a case that might require a decision as to which of two or more laws might be applicable; any foreign element would trigger the applicability of the conflict-of-laws rules. This approach could ensure a relatively broad application of the conflict-of-laws rules but also result in uncertainty as to their application. Yet another approach would be to require always or only in the particular circumstances that additional specified criteria be met for the conflict-of-laws rules to apply. Under such an approach, the application of the conflict-of-laws rules could be limited and uncertain.*]

Article 78. Law applicable to the mutual rights and obligations of the grantor and the secured creditor

The law applicable to the mutual rights and obligations of the grantor and the secured creditor arising from their security agreement is the law chosen by them and, in the absence of a choice of law, the law governing the security agreement.

Article 79. Law applicable to a security right in a tangible asset

1. Except as provided in paragraphs 2 to 5 and article 93, the law applicable to the creation, effectiveness against third parties and priority of a security right in a tangible asset is the law of the State in which the asset is located.

2. The law applicable to the priority of a security right in a tangible asset covered by a negotiable document made effective against third parties by possession of the document as against a competing security right made effective against third parties by another method is the law of the State in which the document is located.

3. [Subject to paragraph 4, the] [The] law applicable to the creation, third-party effectiveness and priority of a security right in a tangible asset of a type ordinarily used in more than one State is the law of the State in which the grantor is located.

4. If ownership of a [motor vehicle, ship, aircraft or similar tangible asset to be specified by the enacting State] is registered in a specialized registry or noted on a title certificate, and a notice with respect to a security right in that asset may be registered in that registry or noted on that certificate], the law applicable to the creation, third-party effectiveness and priority of the security right in a tangible asset is the law of the State under whose authority the registry is maintained or the certificate is issued.

5. Subject to paragraph 3, a security right in a tangible asset (other than a negotiable instrument, negotiable document or certificated non-intermediated security) that is in transit at the time of its putative creation or intended to be relocated to a different State than the State in which it is located at the time of the putative creation of the security right may be created and made effective against third parties under the law of the State of the location of the asset at the time of the putative creation of the security right or under the law of the State of the asset's ultimate destination, provided that the asset reaches that State within [a short

[1] Depending on its legal tradition and drafting conventions, the enacting State may incorporate the conflict-of-laws provisions in its secured transactions law (at the beginning or at the end of it) or in a separate law (civil code or other law).

period of time to be specified by the enacting State] after the time of the putative creation of the security right.

[*Note to the Working Group: The Working Group may wish to note that paragraph 1, which is based on recommendation 203 of the* Secured Transactions Guide, *reflects the generally acceptable* lex situs *(or* lex rei sitae*) approach. The Working Group may also wish to note that paragraph 2, which is based on recommendation 206 of the* Secured Transactions Guide, *addresses the question whether the law applicable to the priority of a security right in tangible assets covered by a negotiable document that was made effective against third parties by possession of the document should be the* lex situs *of the assets or the document. This rule is the logical consequence of article 44, under which a security right in tangible assets covered by a negotiable document that was made effective against third parties by possession of the document has priority over a competing security right made effective by another method (e.g. by possession of the assets or registration of a notice in the Registry in the State of the grantor's location).*

In addition, the Working Group may wish to consider the bracketed text in paragraph 3, which is intended to ensure that, if mobile goods are subject to the specialized registration system referred to in paragraph 4, paragraph 4 would apply. In addition, the Working Group may wish to note that paragraph 4 has been revised to be aligned more closely with recommendation 205, on which it is based, and address the points made in the Secured Transactions Guide *(see chap. X, paras. 37 and 38). In particular, the Working Group may wish to note that the need for a special rule seems limited to title registries and title certificates. If a State has a specialized registry for notices of security rights and other encumbrances, but which does not also serve as a title registry (in which initial ownership and outright sales can be recorded, for example), the general conflict-of-laws rules can handle the matter and, if those rules point to the law of a State that has such a registry, the substantive law of that State will tell a secured creditor to register in that registry rather than the general security rights registry of the State. However, the Working Group may wish to consider that paragraph 4 should be deleted, because: (a) there are few specialized title registrations systems that permit the registration of a notice of a security right for third-party effectiveness purposes; (b) to the extent that there are such specialized title registrations systems and a notice of a security right may be registered in the specialized title registry of more than one State, paragraph 4 would not work well; and (c) to the extent that such specialized registration is based on an international convention, of which the enacting State is a party, article 3 (international obligations of the enacting State) would be sufficient to preserve the application of the convention.*

Moreover, the Working Group may also wish to consider whether in this provision (and in other provisions in this chapter that include a reference to the location of the encumbered asset or the grantor), explicit reference should be made to article 85, which indicates the relevant time for determining the location of the encumbered asset or the grantor. Alternatively, such a reference may be included in the Guide to Enactment, which could also explain that the provisions of the draft Model Law, in particular those contained in the same chapter, should be read together.

The Working Group may also wish to consider whether: (a) paragraph 5 is a conflict-of-laws rule rather than a substantive rule of the receiving State like article 21; and (b) the wording in parenthesis is necessary, as negotiable instruments, negotiable documents and certificated non-intermediated securities are normally not captured by the expression "tangible asset in transit or to be exported".]

Article 80. Law applicable to a security right in an intangible asset

Except as provided in articles 81 and 90-93, the law applicable to the creation, effectiveness against third parties and priority of a security right in an intangible asset is the law of the State in which the grantor is located.

Article 81. Law applicable to a security right in receivables arising from a sale or lease of or a transaction secured by immovable property

1. The law applicable to the creation, effectiveness against third parties and priority of a security right in a receivable arising from a sale or lease of, or a transaction secured by, immovable property is the law of the State in which the grantor is located.

2. Notwithstanding paragraph 1, the law applicable to the priority of a security right in a receivable arising from a sale or lease of, or a transaction secured by, immovable property as against the right of a competing claimant that is registered in the immovable property registry, in which rights in the relevant immovable property are registered, is the law of the State under whose authority the immovable property registry is maintained, provided that under that law registration is relevant to the priority of the security right in the receivable.

[*Note to the Working Group: The Working Group may wish to note that, while this article reflects recommendation 209 of the* Secured Transactions Guide *(see also chap. X, para. 54), the rule in paragraph 1 is the same as the general rule in article 80. The Working Group may thus wish to consider whether paragraph 1 should be deleted and paragraph 2 be amended to read as follows: "Notwithstanding article 80, in the case of a security right in a receivable arising from a sale or lease of, or a transaction secured by, immovable property, the law applicable to the priority of the security right in the receivable as against the right of a competing claimant that is registered in the immovable property registry in which rights in the relevant immovable are registered is the law of the State under whose authority the immovable property registry is maintained". The Working Group may wish to note that this rule would apply only if: (a) the State under the authority of which the immovable property registry was organized required registration by a competing claimant for triggering the application of a different priority rule for security rights in such receivables; and (b) a competing claimant did in fact register in the immovable property registry. The Working Group may wish to reconsider these requirements as they add complexity to the rule in this article.*]

Article 82. Law applicable to the enforcement of a security right

The law applicable to issues relating to the enforcement of a security right:

(a) In a tangible asset is the law of the State where [the relevant act of] enforcement takes place, except as provided in article 93; and

(b) In an intangible asset is the law applicable to the priority of the security right, except as provided in articles 90, 92 and 93.

[*Note to the Working Group: The Working Group may wish to consider the text within square brackets in subparagraph (a), which is intended to clarify that enforcement may involve several distinct acts (e.g. notice of default, notice of the secured creditor's intent to obtain possession of an encumbered asset without applying to a court or other authority, disposition of an encumbered asset, and distribution of the proceeds of disposition) that may take place in different States (see A/CN.9/802, para. 105). For example, a secured creditor may take possession of the encumbered assets in one State, dispose of them in a second State, and distribute the proceeds of disposition in a third State. Alternatively, the matter may be discussed or explained in the Guide to Enactment*.]

Article 83. Law applicable to a security right in proceeds of an encumbered asset

1. The law applicable to the creation of a security right in proceeds is the law applicable to the creation of the security right in the original encumbered asset from which the proceeds arose.

2. The law applicable to the third-party effectiveness and priority of a security right in proceeds is the law applicable to the third-party effectiveness and priority of a security right in an asset of the same kind as the proceeds.

[*Note to the Working Group: The Working Group may wish to note that, if the original encumbered asset is inventory, which is sold, and the purchase price is paid into a bank account: (a) under paragraph 1, the law applicable to the question of whether the secured*

creditor automatically acquires a security right in the right to payment of the funds credited to a bank account as proceeds of the original encumbered inventory would be the law of the location of the inventory; and (b) under paragraph 2, the law applicable to the third-party effectiveness and priority of any security right in the proceeds would be the law applicable to the right to payment of funds credited in the bank account. The Working Group may wish to consider whether this type of bifurcated rule may lead to difficulties in cases where the law governing creation recognizes a broad automatic proceeds rule whereas the law governing third-party effectiveness and priority recognizes no or only a very limited automatic proceeds right. In addition, the Working Group may wish to consider whether the text of this article should be revised to make it clear that it is dealing only with the law applicable to proceeds derived from the original encumbered assets as a result of a disposition by the grantor or other event prior to default, whereas article 82, subparagraph (a), deals with the law applicable to the distribution of proceeds derived from a disposition of the encumbered assets pursuant to post-default enforcement proceedings.]

Article 84. Meaning of "location" of the grantor

For the purposes of the provisions of this chapter, the grantor is located:

(a) In the State in which it has its place of business, if any;

(b) If the grantor has a place of business in more than one State, in the State in which the central administration of the grantor is exercised; and

(c) If the grantor does not have a place of business, in the State in which the grantor has his or her habitual residence.

Article 85. Relevant time for determining location

1. Except as provided in paragraph 2, references to the location of the encumbered asset or of the grantor in the provisions of this chapter refer:

(a) For creation issues, to the location at the time of the putative creation of the security right; and

(b) For third-party effectiveness and priority issues, to the location at the time the issue arises.

2. If the rights of all competing claimants in an encumbered asset are created and made effective against third parties before a change in the location of the asset or the grantor, references in the provisions of this chapter to the location of the asset or of the grantor refer, with respect to third-party effectiveness and priority issues, to the location prior to the change in location.

[*Note to the Working Group: The Working Group may wish to consider whether paragraph 2, which is based on recommendation 220 of the* Secured Transactions Guide, *is correct in referring to "the rights of all competing claimants" having been "created and made effective against third parties before a change in the location of the asset or grantor". It would seem that this language only works for competing claimants that are competing secured creditors, and not for competing claimants that are outright transferees, judgement creditors or the grantor's insolvency representative. In addition, the Working Group may wish to note that, under a combined application of articles 82 and 85: (a) enforcement of a security right in a tangible asset would seem to be referred to the law of the State in which enforcement takes place (i.e. in most instances, the law of the State in which the asset is located) at the time of enforcement; (b) enforcement of a security right in an intangible asset would seem to be referred to the law governing priority (i.e. for receivables, the law of the State in which the grantor is located) at the time the issue arises; and (c) if the location changed after enforcement commenced, the relevant location would be the location at the time enforcement commenced. In addition, the Working Group may wish to consider whether this article produces the appropriate result where there is a change of location of the encumbered assets or the grantor after the creation of a security right or after the beginning of enforcement proceedings. For example, in the case of a change in the location of a tangible asset after the creation of a security right in it and thus a change to the law applicable to enforcement, the secured creditor's right to repossess the asset without applying to a court or other authority may be limited or regulated differently. In this regard,*

the Working Group may wish to take into account that: (a) a rule providing that the relevant time for determining the location of a tangible asset for enforcement issues should be the time of the putative creation of the security right might be inconsistent with article 82, subparagraph (a); (b) article 21 of the draft Model Law clearly contemplates that there could be a change in the applicable law; and (c) article 85, paragraph 2, deals with the issue for all claimants whose rights arose before the change.]

Article 86. Exclusion of *renvoi*

A reference in the provisions of this chapter to "the law" of a State as the law applicable to an issue refers to the law in force in that State other than its rules of private international law.

Article 87. Overriding mandatory rules and public policy (*ordre public*)

1. The provisions of this chapter do not prevent a court from applying overriding mandatory provisions of the law of the forum that apply irrespective of the law applicable under the provisions of this chapter.

2. The law of the forum determines when a court may or must apply or take into account overriding mandatory provisions of another law.

3. A court may only exclude the application of a provision of the law applicable under the provisions of this chapter if and to the extent that the result of such application would be manifestly incompatible with fundamental notions of public policy (*ordre public*) of the forum.

4. The law of the forum determines when a court may or must apply or take into account the public policy (*ordre public*) of a State other than the State the law of which would be applicable under the provisions of this chapter.

5. This article does not permit the application of the provisions of the law of the forum [or another State] to the third-party effectiveness and priority of a security right.

[*Note to the Working Group: The Working Group may wish to note that, pursuant to a decision by the Working Group (see A/CN.9/802, para. 106), articles 86 and 87 of the draft Model Law have been revised to be aligned with articles 8 and 11 of the Hague Principles on Choice of Law in International Commercial Contracts (the "Hague Principles). In addition, the Working Group may wish to consider whether article 11, paragraph 5, of the Hague Principles, which deals with the public policy and mandatory law exception in the case of arbitral proceedings should also be added to this article. Moreover, the Working Group may wish to consider whether paragraph 5 of this article, which is based on recommendation 222, subparagraph (c), of the* Secured Transactions Guide*, should be revised to clarify that the forum State may not displace the provisions of the law applicable to third-party effectiveness and priority, and apply its own provisions or the provisions of another State (unless the forum law or the law of another State is the law applicable under the provisions of this chapter). "This approach is justified by the need to achieve certainty with respect to the law applicable to third-party effectiveness and priority. The same approach is followed in articles 23, paragraph 2, 30, paragraph 2, and 31 of the* Assignment Convention*. It is also followed in article 11, paragraph 3, of The Hague Securities Convention" (see* Secured Transactions Guide*, chap. X, para. 79). In this regard, the Working Group may wish to consider an alternative formulation of paragraph 5 along the following lines: "This article does not permit a court to displace the provisions of this chapter dealing with the law applicable to the third-party effectiveness and priority of a security right", or "This article does not permit the overriding application of the provisions of the law of the forum or another State, the law of which is applicable under the provisions of this chapter, that relate to the third-party effectiveness and priority of a security right".*]

Article 88. Impact of commencement of insolvency proceedings on the law applicable to a security right

1. Subject to paragraph 2, the law applicable to a security right under the provisions of this chapter applies notwithstanding the commencement of insolvency proceedings relating to the grantor.

2. The application of the law applicable to a security right under the provisions of this chapter is subject to the application of the insolvency law of the State in which insolvency proceedings are commenced to the treatment of security rights in the grantor's insolvency.

[*Note to the Working Group: In view of the fact that the draft Model Law does not deal with insolvency law issues (or the law applicable in the case of the grantor's insolvency), the Working Group may wish to consider whether this article, which is based on recommendation 223 of the* Secured Transactions Guide*, should be retained. If the Working Group decides that this article should be deleted, the matters addressed therein could be discussed in the Guide to Enactment as matters for other law of the enacting State. If the Working Group decides that this article should be retained, it may wish to consider whether paragraph 2 should be deleted, as: (a) while the second sentence of recommendation 223, on which paragraph 2 is based, is appropriate for a guide, it may not be sufficiently specific for a model law; and (b) the scope of paragraph 2, as revised to be included in a model law, may be broader than the second sentence of recommendation 223. If paragraph 2 is deleted, the Guide to Enactment could explain the impact of the application of the law applicable to insolvency (i.e., the* lex fori concursus*) on the law applicable to the validity, enforceability and priority of a security right (see* Secured Transactions Guide*, rec. 223, and chap. X, paras. 80-82, and* Insolvency Guide*, rec. 31, and part two, para. 88).*]

B. Asset-specific rules

Article 89. Law applicable to the relationship of third-party obligors and secured creditors

The law applicable to the relationship between the grantor of a security right in a receivable, negotiable instrument or negotiable document and the debtor of the receivable, the obligor under the negotiable instrument or the issuer of the negotiable document is the law applicable to:

(a) The relationship between the debtor of the receivable, the obligor under the instrument or the issuer of the document and the holder of a security right in the receivable, instrument or document;

(b) The conditions under which a security right in the receivable, instrument or document may be invoked against the debtor of the receivable, the obligor under the instrument or the issuer of the document, including whether an agreement limiting the grantor's right to create a security right may be asserted by the debtor of the receivable, the obligor under instrument or the issuer of the document; and

(c) Whether the obligations of the debtor of the receivable, the obligor under the instrument or the issuer of the document have been discharged.

[*Note to the Working Group: The Working Group may wish to note that this article is based on recommendation 217 of the* Secured Transactions Guide *(see chap. X, paras. 62 and 63) and article 29 of the* Assignment Convention.]

Article 90. Law applicable to a security right in a right to payment of funds credited to a bank account

1. Subject to article 91, the law applicable to the creation, effectiveness against third parties, priority and enforcement of a security right in a right to payment of funds credited to a bank account, as well as to the rights and obligations between the depositary bank and the secured creditor, is

Option A[2]

the law of the State in which the bank with which the account is maintained has its place of business.

2. If the bank has places of business in more than one State, the law applicable is the law of the State in which the branch maintaining the account is located.

[2] A State may adopt option A or B of this article.

Option B

the law of the State expressly stated in the account agreement as the State whose law governs the account agreement or, if the account agreement expressly provides that another law is applicable to all such issues, that other law.

2. The law of the State determined pursuant to paragraph 1 applies only if the depositary bank has, at the time of the conclusion of the account agreement, an office in that State that is engaged in the regular activity of maintaining bank accounts.

3. If the applicable law is not determined pursuant to paragraph 1 or 2, the applicable law is to be determined pursuant to [the enacting State to insert here the default rules based on article 5 of the Hague Convention on the Law Applicable to Certain Rights in Respect of Securities Held with an Intermediary].

[*Note to the Working Group: The Working Group may wish to note that this article is based on recommendation 210 of the* Secured Transactions Guide. *The Working Group may wish to consider whether option A or the Guide to Enactment should clarify that a branch (or office) of a bank should be considered as being located in a particular jurisdiction irrespective of whether the bank offers its branch services through physical offices or only through an online connection accessible electronically by customers located in that jurisdiction. In this connection, the Working Group may wish to take into account that a bank must have a physical presence or legal address in a jurisdiction for regulatory and other purposes (anti-money-laundering laws, Foreign Account Tax Compliance Act, court jurisdiction, etc.).*]

Article 91. Law applicable to the third-party effectiveness of a security right in certain types of asset by registration

If the law of the State in which the grantor is located recognizes registration of a notice as a method for achieving effectiveness against third parties of a security right in a negotiable instrument or in a right to payment of funds credited to a bank account, the law of that State is the law applicable to the issue of whether third-party effectiveness has been achieved by registration under the laws of that State.

[*Note to the Working Group: The Working Group may wish to consider whether this article, which is based on recommendation 211 of the* Secured Transactions Guide, *should be retained. In this regard, the Working Group may wish to note that the effect of this rule would be that, if the State in which the grantor is located recognizes registration of a notice as a method of third-party effectiveness, a secured creditor would have the option of achieving third-party effectiveness by registration under the law of the State in which the grantor is located (art. 91) or under the law of the State in which the instrument is located (art. 79, para. 1). However, the Working Group may wish to consider that this result may have unintended consequences. For example, a potential competing claimant will need to review the law of the grantor's location to determine if registration is a method for achieving third-party effectiveness and then search in the registries of two different States in order to determine whether there is a security right in the instrument that is effective against third parties. If the Working Group decides that this article should be retained, it may wish to consider whether it should apply only to negotiable instruments and rights to payment of funds credited to bank accounts or also to other types of asset (e.g. tangible assets covered by a negotiable document, the third-party effectiveness of a security right in which would be determined by the location of the document).*]

Article 92. Law applicable to a security right in intellectual property

1. The law applicable to the creation, effectiveness against third parties and priority of a security right in intellectual property is the law of the State in which the intellectual property is protected.

2. A security right in intellectual property may also be created under the law of the State in which the grantor is located and may also be made effective under that law against third parties other than another secured creditor, a transferee or a licensee.

3. The law applicable to the enforcement of a security right in intellectual property is the law of the State in which the grantor is located.

Article 93. Law applicable to a security right in non-intermediated securities

Option A

1. Subject to paragraph 2:

(a) The law applicable to the creation, effectiveness against third parties and priority of a security right in certificated non-intermediated securities is the law of the State in which the certificate is located; and

(b) The law applicable to the enforcement of a security right in certificated non-intermediated securities is the law of the State in which [the relevant act of] enforcement takes place.

2. The law applicable to the effectiveness of a security right in certificated non-intermediated securities against the issuer is the law of the State under which the issuer is constituted.

3. The law applicable to the creation, effectiveness against third parties, priority and enforcement of a security right in uncertificated non-intermediated securities, as well as to its effectiveness against the issuer, is the law of the State under which the issuer is constituted.

Option B

The law applicable to the creation, effectiveness against third parties, priority and enforcement of a security right in non-intermediated securities, as well as to its effectiveness against the issuer, is the law of the State under which the issuer is constituted.

Option C

1. The law applicable to the creation, effectiveness against third parties, priority and enforcement of a security right in non-intermediated equity securities, as well as to its effectiveness against the issuer, is the law under which the issuer is constituted.

2. The law applicable to the creation, the effectiveness against third parties, the priority and the enforcement of a security right in non-intermediated debt securities, as well as to its effectiveness against the issuer, is the law governing the securities.

[*Note to the Working Group: The Working Group may wish to consider the above-mentioned options. Option A provides separate rules for certificated and uncertificated securities and, with respect to certificated securities, different rules for the various matters (which are rules similar to those applicable to tangible assets; see articles 79, para. 1, and 82, subpara. (a)). In particular with respect to certificated securities, this approach has the advantage of flexibility but also the disadvantage of uncertainty as it may lead to inconsistencies and overlaps. For example, to the extent that a clear distinction cannot be drawn among those matters, they may be referred to the law of the issuer's constitution rather than the law of the certificate's location. However, this is an issue that may arise with respect to other types of intangible asset, such as receivables, where, under article 80, the law of the grantor's location applies to creation, effectiveness against third parties and priority, while, under article 89, the law applicable to the receivable applies to the relationship between the debtor of the receivable and the secured creditor. Thus, the Working Group may wish to consider concluding that this allocation of applicable law is sound or addressing this concern in the draft Model Law or the Guide to Enactment also with respect to other types of intangible asset. In addition, by referring the creation, third-party effectiveness and priority of a security right in certificated securities to the law of the certificate's location, option A makes it possible for the secured creditor to manipulate the law applicable to third-party effectiveness and priority under option A (but presumably not creation in light of article 85) by moving the certificate from one country to another. Again, this concern would also arise with respect to other types of tangible asset in which the secured creditor has physical possession, whether they embody a claim against a third party (such as negotiable instruments and negotiable documents) or not (e.g. precious metals).*

Moreover, with respect to uncertificated securities, option A has the advantage that only one rule would apply to all issues and refer to one and the same law (which would be different from the law applicable to other types of intangible asset). It has, however, the disadvantage that it does not draw a distinction between equity securities (with respect to which, for the effectiveness of a security right against an issuer, the law of the State of the constitution of the issuer is appropriate) and debt securities (with respect to which, the law governing the securities may be more appropriate). A variant of option A might be to limit the application of paragraph 2 to equity securities and add a new paragraph for debt securities along the following lines: "The law applicable to the effectiveness of a security right in non-intermediated debt securities against the issuer is the law governing the securities" (while deleting the reference to the effectiveness against the issuer from current paragraph 3). Alternatively, this new paragraph may track the language of, or be addressed in, article 89. In this regard, the Working Group may wish to note that the issuer of securities is treated as a third-party obligor in the draft Model Law and the effectiveness of a security right as against third parties obligors is addressed in article 89 (with the exception of effectiveness as against a depositary bank, which is addressed in article 90).

Option B provides one single rule that would apply to both certificated and uncertificated securities and to all issues (creation, effectiveness against third parties, priority and enforcement, as well as the effectiveness of a security right against the issuer). This approach eliminates the risks of inconsistencies or overlaps between the law of the State of issuer's constitution and another law that the conflict-of-laws rules of the forum may designate for other issues (e.g. the law of the location of the certificate for the priority of a security right in certificated non-intermediated securities). In addition, referring to only one law for all issues provides greater certainty, as some matters (e.g. limitations on the transfer of securities under corporate law) may be viewed as being relevant not only to the effectiveness of the security right against the issuer but also to its creation and its enforcement. Moreover, by not referring to the law of the location of the certificate with respect to certificated securities, option B prevents the person in possession from manipulating the designation of the applicable law by moving the certificate from one country to another. The disadvantage of option B, however, is that it departs from the lex situs *rule for the creation, effectiveness against third parties and priority of a security right in certificated securities. Thus, the conflict-of-laws rules for certificated securities would then be different from those applicable to other intangible assets that have been assimilated for certain purposes to tangible assets (under article 79, the creation, effectiveness against third parties and priority of a security right in negotiable documents or instruments are governed by the law of the location of the document or instrument). Another disadvantage of option B is that it does not differentiate between equity and debt securities and thus refers even security rights in debt securities to the law of the State under which the issuer is constituted, which may not always be appropriate.*

Option C retains option B for equity securities (whether certificated or uncertificated) but refers to a different rule for debt securities (whether certificated or uncertificated), that is, the law of the State governing the securities. The justification for that approach is that, if the issuer has selected a law other than the law of the State of its constitution as the governing law of the securities, that other law should also be the law applicable to security right matters. The benefit of this approach is that one single law would govern all matters relating to debt securities, which would avoid the risks of inconsistencies arising from different laws being applicable to the various issues. The disadvantage of option C, however, is that the distinction between equity securities and debt securities may be blurred in certain circumstances (e.g. convertible securities). In addition, while option C focusses on the contractual nature of debt securities, which are analogous to receivables in that respect, it would not be consistent with the conflict-of-laws rule on the creation, effectiveness against third parties and priority of a security right in a receivable (under article 80, in the case of a receivable, the law of the State in which the grantor is located would govern those issues). As debt securities are receivables in a generic sense (monetary obligations), then a variation of option C would be to apply to debt securities the same conflict-of-laws rule as for receivables.]

Article 94. Law applicable in the case of a multi-unit State

1. If the law applicable to an issue is the law of a multi-unit State, subject to paragraph 3, references to the law of a multi-unit State are to the law of the relevant territorial unit and, to the extent applicable in that unit, to the law of the multi-unit State itself.

2. The relevant territorial unit referred to in paragraph 1 is to be determined on the basis of the location of the grantor or of the encumbered asset, or otherwise under the provisions of this chapter.

3. If the applicable law is that of a multi-unit State or one of its territorial units, the internal conflict-of-laws provisions in force in the multi-unit State or territorial unit determine whether the substantive provisions of law of the multi-unit State or of a particular territorial unit of the multi-unit State apply.

Chapter IX. Transition

Article 95. Amendment and repeal of other laws

1. [The laws to be specified by the enacting State] are repealed.

2. [The laws to be specified by the enacting State] are amended as follows [the text of amendments to be specified by the enacting State].

Article 96. Transitional application of this Law

1. For the purposes of this chapter:

(a) "Prior law" means [the law to be specified by the enacting State] that was in force immediately before the entry into force of this Law; and

(b) "Prior security right" means a right created in accordance with prior law before the entry into force of this Law that is a security right within the meaning of this Law and to which this Law would have applied if it had been in force at the time when the security right was created.

2. Except as otherwise provided in this chapter, this Law applies to all security rights within its scope, including prior security rights.

[*Note to the Working Group: The Working Group may wish to consider the question of whether "prior law" could be only the law of the enacting State or also the law of another State applicable by virtue of the conflict-of-laws rule of the forum State. In this regard, the Working Group may wish to take into account that the provisions of the transition chapter (and any other chapter of this Law) will be triggered only if the law of the enacting State is the applicable law. The Working Group may also wish to note that the term "this Law" in paragraph 2 includes the provisions of the conflict-of-laws chapter of "this Law".*]

Article 97. Inapplicability of this Law to actions commenced before the entry into force of this Law

1. Prior law applies to a matter that is the subject of proceedings before a court or arbitral tribunal commenced before the entry into force of this Law.

2. If enforcement of a prior security right commenced before the entry into force of this Law, the enforcement may continue under the prior law.

[*Note to the Working Group: The Working Group may wish to note that this article has been revised to be aligned more closely with recommendation 229 of the* Secured Transactions Guide*, on which it is based. As a result, even though article 96, paragraph 2, provides that new law applies, a secured creditor that has already begun enforcement on the date of the entry into force of the new law has the option to continue enforcement under the rules of prior law (but may, instead, comply with the new rules). This is important if, for example, the new rules are clearer or more useful, in which case the secured creditor would decide not to exercise the option and, instead, proceed under the new rules.*]

Article 98. Creation of a prior security right

1. Prior law determines whether a prior security right was created before the entry into force of this Law.

2. A prior security right that was created under prior law remains effective between the parties notwithstanding that its creation did not comply with the creation requirements of this Law.

Article 99. Third-party effectiveness of a prior security right

1. A prior security right that was effective against third parties under prior law continues to be effective against third parties under this Law until the earlier of:

(a) The time it would have ceased to be effective against third parties under prior law; and

(b) The expiration of [a period of time to be specified by the enacting State] after the entry into force of this Law.

2. A written agreement between the grantor and the secured creditor creating or providing for a prior security right entered into before the entry into force of this Law is sufficient to constitute authorization by the grantor for the registration of a notice after the entry into force of this Law.

3. If the third-party effectiveness requirements of this Law are satisfied before the third-party effectiveness of a prior security right ceases in accordance with paragraph 1, the security right continues to be effective against third parties under this Law from the time when it was made effective against third parties under prior law.

4. If the third-party effectiveness requirements of this Law are not satisfied before the third-party effectiveness of a prior security right ceases in accordance with paragraph 1, the prior security right is effective against third parties only from the time it is made effective against third parties under this Law.

Article 100. Priority of a prior security right

1. The time to be used for determining priority of a prior security right is the time it became effective against third parties or, in the case of advance registration, became the subject of a registered notice under prior law.

2. The priority of a prior security right is determined by prior law if:

(a) The security right and the rights of all competing claimants arose before the entry into force of this Law; and

(b) The priority status of none of these rights has changed since the entry into force of this Law.

3. The priority status of a security right has changed only if:

(a) It was effective against third parties at the time when this Law entered into force, in accordance with article 99, paragraph 1, and ceased to be effective against third parties as provided in article 99, paragraph 4; or

(b) It was not effective against third parties under prior law at the time when this Law entered into force, and became effective against third parties under this Law.

[*Note to the Working Group: The Working Group may wish to note that, based on recommendations 232-234 of the* Secured Transactions Guide, *this article refers to situations in which prior law applies to the priority of a prior security right.*]

Article 101. Entry into force of this Law

This Law enters into force

Option A

on [a date to be specified by the enacting State in this Law].

Option B

[…] months [after a date to be specified by the enacting State].

Option C

on [a date to be specified by the enacting State in a decree to be issued once the Registry is operational.]

[*Note to the Working Group: The Working Group may wish to note that this article has been revised to be aligned more closely with the* Secured Transactions Guide *(see rec. 228 and chap. XI, paras. 4-6). The Working Group may also wish to note that the Guide to Enactment will: (a) refer in this regard to the discussion in the* Secured Transactions Guide *(see chap. XI, paras. 4-6); (b) explain that the expression "date on which the Law enters into force" means the date on which the Law begins to apply to transactions within its scope; and (c) explain that this article may be introduced at the beginning or the end of this Law.*]

C. Note by the Secretariat on a draft guide to enactment of the draft model law on secured transactions

(A/CN.9/WG.VI/WP.66 and Add.1-4)

[Original: English]

Contents

I. Purpose of the Guide to Enactment

1. In preparing and adopting the [draft] UNCITRAL draft Model Law on Secured Transactions (the "Model Law"), the United Nations Commission on International Trade Law ("UNCITRAL" or the "Commission") was mindful of the fact that the Model Law would be a more effective tool for States modernizing their legislation and organizations assisting States, if background and explanatory information were provided to executive and legislative branches of Government to assist in their consideration of the Model Law for enactment ("Guide to Enactment").[1]

2. In addition, the Commission was aware that in the preparation of the Model Law it was assumed that the Model Law would be accompanied by such a guide. For example, it was decided in respect of a number of issues not to settle them in the Model Law but to address them in the Guide so as to provide guidance to States enacting the Model Law. So, the Guide also addresses or clarifies matters that were not settled in the Model Law but were referred to the Guide.[2]

3. The Commission agreed that the Guide to Enactment should be prepared and referred that task to the Working Group. In addition, the Commission agreed that the Guide to Enactment: (a) should be as short as possible; (b) include cross references to the Secured Transactions Guide and the other texts of the Commission on secured transactions; (c) focus on giving guidance to legislators rather than users of the text; (d) explain the thrust of each provision or section of the Model Law and any difference with the corresponding recommendations of the Secured Transactions Guide or the provisions of another UNCITRAL text on secured transactions; (e) give guidance to States with respect to matters referred to them and in particular explain each option offered in various articles of the Model Law to assist enacting States in choosing one of the options offered.[3]

4. The Commission was also aware of the likelihood that the Model Law would be used in a number of States with limited familiarity with the type of secured transaction covered by in the Model Law. So, the Guide, much of which is drawn from the *travaux préparatoires* of the Model Law, is also intended to be helpful to other users of the text, such as judges, arbitrators, practitioners and academics.

---

[1] *Official Records of the General Assembly, Seventieth Session, Supplement No. 17* (A/70/17) para. 215.
[2] Ibid.
[3] Ibid., para. 216.

5. The information presented in this Guide is intended to briefly explain the thrust of each provision or section of the Model Law and its relationship with the corresponding recommendation(s) of the UNCITRAL Legislative Guide on Secured Transactions (the "Secured Transactions Guide") or other UNCITRAL texts on secured transactions, including the Supplement on Security Rights in Intellectual Property (the "Intellectual Property Supplement"). With respect to security rights in receivables, the recommendations of the Secured Transactions Guide and thus the provisions of the Model Law are based on the United Nations Convention on the Assignment of Receivables in International Trade (the "Assignment Convention"). The provisions of the Model Law dealing with the security rights registry (the "Registry") are also based on the UNCITRAL Guide on the Implementation of a Security Rights Registry (the "Registry Guide").

6. Mindful of the fact that the Secured Transactions Guide contains extensive commentary, the Commission decided that the Guide to Enactment should nevertheless be prepared. The reason was that the commentary of the Secured Transactions Guide had a different structure and did not contain a straightforward discussion of each recommendation but rather a discussion of the comparative advantages and disadvantages of various workable approaches with the recommendation being set out as a conclusion of that discussion. At the same time, as mentioned above, to avoid repetition, the Commission agreed that the draft Guide to Enactment should not repeat, but rather incorporate by reference, those comments contained in the Secured Transactions Guide that could assist in explaining a provision of the Model Law.

7. The Guide to Enactment was prepared by the Secretariat pursuant to the request of the Commission and is based on the considerations of the Working Group and the Commission. [It was considered and approved in principle by the Working Group at its twenty-eighth and twenty-ninth sessions (see […] respectively) and by the Commission at its forty-ninth session (see […]).]

II. Purpose and origin of the Model Law

A. Purpose of the Model Law

8. The Model Law is designed to assist States in implementing the recommendations of the Secured Transactions Guide, the Intellectual Property Supplement and the Registry Guide with respect to security rights in movable assets. The overall objective of those texts and the Model Law is to promote low-cost credit by enhancing the availability of secured credit (see Secured Transactions Guide, rec. 1, subpara. (a)). Like all those texts, the Model Law is intended to be useful to States that do not currently have efficient and effective secured transactions laws, as well as to States that already have workable laws but wish to modernize their laws and harmonize them with the laws of other States whose secured transactions laws are generally consistent with the recommendations of those texts (see Secured Transactions Guide, Introduction, para. 1).

9. The provisions of the Model Law are based on the recommendations of the Secured Transactions Guide, including the Intellectual Property Supplement. The provisions of the Model Law dealing with the security rights registry (the "Registry") are also based on the Registry Guide. The provisions of the Model Law on security rights in receivables are based on the recommendations of the Secured Transactions Guide, which in turn are based on the Assignment Convention.

B. Background

10. At its first session, in 1968, the Commission included the topic of security interests in goods in its future work programme.[4] At its third session in, 1970, the Commission discussed the topic and decided to request the Secretary-General to: (a) invite Governments to submit

[4] Ibid., *Twenty-third Session, Supplement No. 16* (A/7216), paras. 40-48.

information on security interests in goods; (b) make that information available to the Commission; and (c) prepare a study on conditional sales of goods and trust receipts.[5]

11. At its eighth session, in 1975, the Commission considered a note by the Secretariat entitled "Study on security interests" with an annex entitled "Legal principles governing security interests" (A/CN.9/102) and decided to request the Secretary-General to: (a) complete the study by including the law of additional countries; (b) continue the feasibility study on the possible scope of uniform rules on security interests in goods and, for this purpose, consult with interested international organizations and trade and financial institutions; and (c) submit a progress report to the Commission.[6]

12. At its tenth session, in 1977, the Commission considered two notes by the Secretariat entitled "Study on security interests" (A/CN.9/130 and A/CN.9/131) and a third note entitled "Note by the Secretariat on article 9 of the Uniform Commercial Code of the United States of America" (A/CN.9/132), and requested the Secretary-General to: (a) submit to the Commission a further report on the feasibility of preparing a uniform text on security interests and on its possible content; and (b) carry out further work on the subject in consultation with interested international organizations and banking and trading institutions.[7]

13. At its twelfth session, in 1979, the Commission considered a note by the Secretariat entitled "Security interests: feasibility of uniform rules to be used in the financing of trade" (A/CN.9/165) and requested the Secretariat to prepare a report setting out the issues to be considered in the preparation of uniform rules on security interests.[8]

14. At its thirteenth session, in 1980, the Commission considered a note by the Secretariat entitled "Security interests: issues to be considered in the preparation of uniform rules" (A/CN.9/186) and decided that no further work should be carried out and the subject should no longer be accorded priority as "the world-wide unification of the law of security interests in goods, for the reasons brought out in the discussions, was in all likelihood unattainable".[9] The main reason mentioned for this decision was that "the subject was too complex and for there to be reasonable expectations that uniform rules might be developed" because: (a) the concepts of security interests and title retention were understood differently in various legal systems and it would be difficult for many legal systems to make the adjustments necessary to accommodate the different concepts; and (b) the topic of security interests was closely connected with other areas of law, such as bankruptcy law, which would have to be unified or harmonized for the proposed model law to be effective.[10] At that session, a number of suggestions were made. One suggestion was that the Commission might wish to await the outcome of the work on retention of title by the Council of Europe and on factoring by the International Institute for the Unification of Private Law ("Unidroit"), before it undertook work of its own. Another suggestion was that, if further work were to be undertaken in the future, emphasis should be placed on the practical problems in respect of security interests in international trade.[11]

15. Developments in the years that followed made possible the work of the Commission on secured transactions. More concretely, in 1984, the European Committee on Legal Cooperation (CDCJ) decided to defer its work to a future session work on a draft Convention on Simple Reservation of Title.[12] The Committee considered that two issues needed to be studied further, namely the publicity to be given to the reservation of title (written form or registration) and the treatment of the reservation of title in the case of the buyer's insolvency.[13]

[13] Ibid., para. 57.

16. In 1988, at a diplomatic conference held in Ottawa, States adopted the Unidroit Convention on International Factoring (Ottawa, 28 May 1988).[14]

17. In 1997, the Commission adopted the UNCITRAL Model Law on Cross-Border Insolvency, which is designed to assist States to equip their insolvency laws with a modern legal framework to more effectively address insolvency proceedings concerning debtors that have assets in more than one State or where some of the creditors of the debtor are not from the State where the insolvency proceeding is taking place.

18. In 2001, the Commission adopted the Assignment Convention, dealing with security interests in, and outright transfers of, receivables in international trade. In that year, a diplomatic conference held in Cape Town adopted the Convention on International Interests in Mobile Equipment and the Aircraft Protocol. In 2004, the Commission adopted the UNCITRAL Legislative Guide on Insolvency Law, which provides a comprehensive statement of the key objectives and principles that should be reflected in a State's insolvency laws. As all this work set the stage for further work, in 2007, the Commission adopted the UNCITRAL Legislative Guide on Secured Transactions, the overall objective of which is to promote low-cost credit by enhancing the availability of secured credit. Subsequently, the Commission adopted further texts on insolvency[15] and security interests,[16] making possible the preparation of a model law on secured transactions.[17]

C. Preparatory work and adoption

19. At its fortieth session in 2007, the Commission decided that, after completion of the Secured Transactions Guide, future work should be undertaken with a view to preparing a supplement to the Guide dealing with security rights in certain types of securities (i.e. non-intermediated securities), taking into account work by other organizations, in particular Unidroit.[18]

20. At its fourteenth and fifteenth sessions, Working Group VI (Security Interests) had a preliminary discussion about its future work programme. During those sessions, several suggestions were made, including the following: (a) a supplement to the Guide dealing with security rights in securities not covered by the Unidroit Convention on Substantive Rules for Intermediated Securities (Geneva, 2009; the "Unidroit Securities Convention"); (b) a legislative guide on registration of security rights in general security rights registries; (c) a model law on secured transactions based on the recommendations of the Guide; (d) a contractual guide on secured transactions; and (e) a contractual guide on intellectual property licensing (see A/CN.9/667, para. 141, and A/CN.9/670, paras. 123-126, respectively).

21. At its forty-second session, in 2009, the Commission noted with interest the future work topics discussed by Working Group VI at its fourteenth and fifteenth sessions (A/CN.9/667, para. 141, and A/CN.9/670, paras. 123-126, respectively). At that session, the Commission agreed that: (a) the Secretariat could hold an international colloquium early in 2010 with broad participation of experts from Governments, international organizations and the private sector; and (b) the Commission would be in a better position to consider and make a decision on the future work programme of the Working Group at its forty-third session on the basis of a note by the Secretariat.[19]

22. At its sixteenth and seventeenth sessions, Working Group VI engaged in a preliminary discussion of its future work programme (A/CN.9/685, para. 96, and A/CN.9/689, paras. 59-61). At the seventeenth session of the Working Group, some support was expressed for work on regulations on registration of security rights and a model law on secured transactions based on the recommendations of the Guide. With regard to a supplement to the Guide on security rights in certain types of securities, it was observed that

that work would have to be limited to non-intermediated securities in view of the work done by Unidroit and the Hague Conference on intermediated securities (see the Unidroit Securities Convention and the Convention on the Law Applicable to Certain Rights in respect of Securities held with an Intermediary; The Hague, 2006; the "Hague Securities Convention").

23. In accordance with the decision of the Commission at its forty-second session, an international colloquium on secured transactions was held in Vienna from 1 to 3 March 2010. The purpose of the colloquium was to obtain the views and advice of experts with regard to possible future work in the area of security interests. Approximately 100 experts from governments, international organizations and the private sector participated in this three-day event. The papers submitted for the international colloquium are available on the UNCITRAL website.[20] The following topics were discussed at the colloquium: (a) security rights in non-intermediated securities; (b) registration of security rights in movable assets; (c) security rights in movable assets: a model law; (d) rights and obligations of the parties to a security agreement; and (e) intellectual property licensing (A/CN.9/702 and Add.1).

24. At its forty-third session, in 2010, the Commission had before it a note by the Secretariat on possible future work in the area of security interests (A/CN.9/702 and Add.1). The Commission agreed that four issues related to secured transactions law listed in document A/CN.9/702, paragraph 2(a)-(d), were interesting (non-intermediated securities, registration of security rights, a model law and a contractual guide on secured transactions) and should be retained on its future work agenda.[21] At the same time, in view of the limited resources available to it, the Commission agreed that it could not undertake work on all four issues at the same time and that, as a result, it should set priorities. In that regard, there was general agreement that priority should be given to work on registration of security rights in movable assets. At that session, the Commission decided that Working Group VI should be entrusted with the preparation of a text on registration of security rights in movable assets as a matter of priority. It was also agreed that other topics, such as security rights in non-intermediated securities, a model law based on the recommendations of the Guide and a text dealing with the rights and obligations of the parties should be retained in the future programme of Working Group VI for further consideration by the Commission at a future session on the basis of notes to be prepared by the Secretariat within the limits of existing resources.[22] With respect to intellectual property licensing, the Commission requested the Secretariat to prepare a study, within existing resources, that would identify specific topics and discuss the desirability and feasibility of the Commission preparing a legal text with a view to removing specific obstacles to international trade in the context of intellectual property licensing practices.[23]

25. At its forty-fifth session, in 2012, the Commission decided that, upon its completion of the Registry Guide, Working Group VI should undertake work to prepare a simple, short and concise model law on secured transactions based on the Secured Transactions Guide and consistent with all texts prepared by UNCITRAL on secured transactions.[24] At that session, the Commission noted that the Working Group, at its twenty-first session, had agreed to propose to the Commission that the Working Group should develop a model law on secured transactions based on the general recommendations of the Secured Transactions Guide and consistent with all the texts prepared by UNCITRAL on secured transactions. It was also noted that the Working Group had agreed to propose to the Commission that the topic of security rights in non-intermediated securities should be retained on its work agenda and be considered at a future session (A/CN.9/743, para. 76).[25]

26. Recalling that, at its forty-third session, in 2010, the Commission had agreed that the topics mentioned above should be retained on the programme of the Working Group for further consideration, the Commission considered the proposals of the Working Group. It

[21] *Official Records of the General Assembly, Sixty-fifth session, Supplement No. 17* (A/65/17), para. 264.

[22] Ibid., para. 268.

[23] Ibid., para. 273.

[24] Ibid., *Sixty-seventh Session, Supplement No. 17* (A/67/17), para. 105.

[25] Ibid., para. 101.

was widely felt that a simple, short and concise model law on secured transactions could usefully complement the Secured Transactions Guide and would be extremely useful in addressing the needs of States and in promoting implementation of the Secured Transactions Guide. While a concern was expressed that a model law might limit the flexibility of States to address the local needs of their legal traditions, it was generally viewed that a model law could be drafted in a sufficiently flexible manner to adapt to various legal traditions. Moreover, there was support for the idea that a model law could greatly assist States in addressing urgent issues relating to access to credit and financial inclusion, in particular for small and medium-sized enterprises.[26]

27. As to the topic of security rights in non-intermediated securities, it was widely felt that the topic merited further consideration. The Commission noted that non-intermediated securities, in the sense of securities other than those credited to a securities account, that were used as security for credit in commercial finance transactions were excluded from the scope of the Secured Transactions Guide (see recommendation 4, subparas. (c)-(e) of the Guide), the Unidroit Securities Convention and the Hague Securities Convention.[27]

28. At its twenty-third session, in 2013, Working Group VI had a general exchange of views on the basis of a note prepared by the Secretariat entitled "Draft Model Law on Secured Transactions" (A/CN.9/WG.VI/WP.55 and Add.1 to 4).

29. At its forty-sixth session, in 2013, the Commission agreed that the preparation of the draft Model Law was an extremely important project to complement the work of the Commission in the area of security interests and provide urgently needed guidance to States as to how to implement the recommendations of the Secured Transactions Guide. It was also agreed that such guidance was extremely important and urgent to all States at a time of economic crisis but in particular to States with developing economies and economies in transition. In addition, it was stated that the scope of the draft Model Law should include all economically valuable assets.[28] The Commission also agreed that whether that work would include security interests in non-intermediated securities would be assessed at a future time.[29]

30. The Working Group continued its work at its twenty-fourth session, in 2013, and at its twenty-fifth session, in 2014, on the basis of notes prepared by the Secretariat entitled "Draft Model Law on Secured Transactions" (A/CN.9/WG.VI/WP.57 and Add.1-4, and A/CN.9/WG.VI/WP.59 and Add.1). The reports of the Working Group on its work at those sessions are contained in documents A/CN.9/796 and A/CN.9/802. At its twenty-fifth session, the Working Group also decided to recommend to the Commission that the draft Model Law address security rights in non-intermediated securities (see A/CN.9/802, para. 93).

31. At its forty-seventh session, in 2014, the Commission expressed its satisfaction for the considerable progress achieved by the Working Group in its work and requested the Working Group to expedite its work so as to complete the draft Model Law, including certain definitions and provisions on non-intermediated securities (see A/CN.9/811), and to submit it to the Commission for adoption together with a guide to enactment as soon as possible.[30]

32. The Working Group continued its work at its twenty-sixth session, in 2014, and at its twenty-seventh session, in 2015, on the basis of notes prepared by the Secretariat entitled "Draft Model Law on Secured Transactions" (A/CN.9/WG.VI/WP.61 and Add.1-3, and A/CN.9/WG.VI/WP.63 and Add.1-4). The reports of the Working Group on its work at those sessions are contained in documents A/CN.9/830 and A/CN.9/836.

33. At its forty-eighth session, in 2015, the Commission considered and approved the substance of article 26 of chapter IV of the Model Law and articles 1-29 of the draft Registry

[26] Ibid., paras. 102 and 103.
[27] Ibid., para. 104.
[28] Ibid., *Sixty-eighth Session, Supplement No. 17* (A/68/17), para. 193.
[29] Ibid., para. 332.
[30] Ibid., *Sixty-ninth Session, Supplement No. 17* (A/69/17), para. 163.

Act.[31] At that session, the Commission also agreed that a guide to enactment of the Model Law should be prepared and referred that task to the Working Group.[32]

34. The Working Group continued its work at its twenty-eighth session, in 2015, and completed it at its twenty-ninth session, in 2016, on the basis of notes prepared by the Secretariat entitled "Draft Model Law on Secured Transactions" (A/CN.9/WG.VI/WP.65 and Add. 1-4) and "Draft Guide to Enactment" (A/CN.9/WG.VI/WP.66 and Add. 1-4). The reports of the Working Group on its work at those sessions are contained in documents […].

35. In preparation for the forty-ninth session of the Commission, the text of the draft Model Law as approved by Working Group VI was circulated to all Governments and to interested international organizations for comment. At that session, the Commission had before it the reports of the Working Group on its twenty-eighth and twenty-ninth sessions, the comments received from Governments (A/CN.9/[…]), as well as the Model Law and the draft Guide to Enactment prepared by the Secretariat (A/CN.9/[…]). At that session, the Commission […].

36. After consideration of the Model Law and the draft Guide to Enactment, the Commission adopted the following decision:

[…].

III. The Model Law as a tool for harmonizing laws

37. The Model Law is in the form of a legislative text that is recommended to States for incorporation into their national law. Unlike an international convention, model legislation does not require the State enacting it to notify the United Nations or other States that may have also enacted it. However, States are strongly encouraged to inform the UNCITRAL secretariat of any enactment of the new Model Law (or any other model law resulting from the work of UNCITRAL).

38. In incorporating the text of model legislation into its legal system, a State may wish to consider modifying or leaving out some of its non-fundamental provisions. In the case of a convention, the possibility of changes being made to the uniform text by the States parties (normally referred to as "declarations") is much more restricted; trade law conventions in particular usually either totally prohibit declarations or allow only very few, specified ones. The flexibility inherent in model legislation is particularly desirable in those cases where it is likely that the State would wish to make various modifications to the uniform text before it would be ready to enact it as national law. Some modifications may be expected, in particular when the uniform text is closely related to the national court and procedural system. This, however, also means that the degree of, and certainty about, harmonization achieved through model legislation is likely to be lower than in the case of a convention.

39. However, this relative disadvantage of model legislation may be balanced by the fact that the number of States enacting model legislation is likely to be higher than the number of States adhering to a convention. In order to achieve a satisfactory degree of harmonization and certainty, it is recommended that States make as few changes as possible in incorporating the new Model Law into their legal systems and that they take due regard of its basic principles, including the unitary and functional approach to secured transactions, party autonomy and the international origin of the Model Law. In general, in enacting the Model Law, it is advisable to adhere as much as possible to the uniform text in order to make the national law as transparent and familiar as possible for foreign users of the national law. The Model Law is sufficiently flexible in providing options and leaving a number of matters to States.

40. While it is recommended that the Model Law should be implemented in one law, depending on its legal tradition and drafting conventions, the registry-related provisions may be incorporated in the secured transactions law, in another law, decree, regulation or another

[31] Ibid., *Seventieth Session, Supplement No. 17* (A/70/17), para. 214.
[32] Ibid., para. 216.

act adopted by a legislative or executive body, or a combination thereof. Similarly, the conflict-of-laws provisions may be incorporated in the secured transactions law (at the beginning or at the end of it) or in a separate law (civil code or other law).

IV. Main features of the Model Law

A. Relationship of the Model Law with the secured transactions texts of UNCITRAL

41. The Secured Transactions Guide, including the Intellectual Property Supplement, and the Registry Guide contain detailed commentary and recommendations on all issues to be addressed in a modern law on secured transactions. However, they are long texts and States will need assistance in implementing their recommendations. Thus, the Model Law was prepared to complement those texts and to assist States in implementing their recommendations.

42. The Model Law reflects the policies embodied in the recommendations of those texts. The difference in the formulation between a provision of the Model Law and the relevant recommendation is due to the legislative nature of the Model Law. Where there is a difference, it is explained in the remarks to the relevant provision of the Model Law below.

43. For reasons explained below, the Model Law also addresses matters that were not addressed in the Secured Transactions Guide (e.g. security rights in non-intermediated securities) or were not addressed in a recommendation of the Registry Guide (e.g. the effectiveness of amendment or cancellation notices that have not been authorized by the secured creditor). At the same time, the Model Law does not address matters that were addressed in the Secured Transactions Guide (e.g. security rights in the right to receive the proceeds under an independent undertaking).

B. Key objectives and fundamental policies of the Model Law

44. The overall objective of the Model Law is the same as that of the Secured Transactions Guide, that is, to promote low-cost credit by enhancing the availability of secured credit (see rec. 1 and Introduction, paras. 43-59). The fundamental policies of the Model Law are the same as those of the Secured Transactions Guide (see Introduction, paras. 60-72). In enacting the Model Law, States may wish to consider issues of harmonization with existing law, legislative method, drafting technique and post-enactment acculturation (see Introduction, paras. 73-89).

45. Depending on its drafting method and technique, the enacting State may wish to consider including the key objectives of the Model Law in a preamble or other statement of objectives of the law. That statement could be used for the purpose of the interpretation of, and the filling of gaps in, the Model Law.

[*Note to the Working Group: The Working Group may wish to consider the suggestion made in the note to article 5 about a new rule on the interpretation of the Model Law.*]

V. Assistance from the UNCITRAL secretariat

A. Assistance in drafting legislation

46. In the context of its training and assistance activities, the UNCITRAL secretariat assists States with technical consultations for the preparation of legislation based on the Model Law. The same assistance is brought to Governments considering legislation based on other UNCITRAL model laws (i.e. the UNCITRAL Model Law on Cross-Border Insolvency, the UNCITRAL Model Law on International Commercial Arbitration, the UNCITRAL Model Law on International Commercial Conciliation, the UNCITRAL Model Law on Electronic Commerce, the UNCITRAL Model Law on Electronic Signatures, the

UNCITRAL Model Law on International Credit Transfers and the UNCITRAL Model Law on Public Procurement) or considering adhesion to one of the international trade law conventions prepared by UNCITRAL (e.g. the Assignment Convention).

47. Further information concerning the Model Law and other model laws and conventions developed by UNCITRAL, may be obtained from the UNCITRAL secretariat at the address below:

International Trade Law Division, Office of Legal Affairs
United Nations
Vienna International Centre
P.O. Box 500
A-1400 Vienna, Austria
Telephone: (+43-1) 26060-4060 or 4061
Telecopy: (+43-1) 26060-5813
Electronic mail: uncitral@uncitral.org
Internet home page: www.uncitral.org

B. Information on the interpretation of legislation based on the Model Law

48. The UNCITRAL secretariat welcomes comments concerning the Model Law and the Guide, as well as information concerning enactment of legislation based on the Model Law. Once enacted, the Model Law will be included in the CLOUT information system, which is used for collecting and disseminating information on case law relating to the conventions and model laws that have emanated from the work of UNCITRAL. The purpose of the system is to promote international awareness of the legislative texts formulated by UNCITRAL and to facilitate their uniform interpretation and application. The UNCITRAL secretariat publishes, in the six official languages of the United Nations, abstracts of decisions and makes available, against reimbursement of copying expenses, the decisions on the basis of which the abstracts were prepared. The system is explained in a user's guide that is available from the UNCITRAL secretariat in hard copy (A/CN.9/SER.C/GUIDE/1) and on the above-mentioned Internet home page of UNCITRAL.

VI. Article-by-article remarks

Chapter I. Scope of application and general provisions

Article 1. Scope of application

49. Article 1 is based on recommendations 1-7 of the Secured Transactions Guide (see chap. I, paras. 1-4). It is intended to set out the various types of transaction and asset covered by the Model Law (see art. 1, paras. 1-4), as well as to clarify the relationship between the Model Law and other law (see art. 1, paras. 5 and 6). Generally, the Model Law has the same comprehensive scope of application as the Secured Transactions Guide and applies to all property rights in any type of movable asset, such as equipment, inventory and receivables, which is created by an agreement to secure payment or other performance of an obligation (see art. 1, para. 1, and definition of the term "security right" in art. 2, subpara. (jj)). However, there are a few differences between the scope of the Model Law and the scope of the Secured Transactions.

50. Like the Secured Transactions Guide, the Model Law applies to outright transfers of receivables (see art. 1, para. 2). The main reasons for this approach are that outright transfers of receivables take place in the context of financing transactions and it is difficult to determine at the outset of a transaction whether an assignment will be held to be an outright or a security assignment (see Secured Transactions Guide, Chap. I, paras. 25-31). [However, unlike the Secured Transactions Guide, the Model Law excludes from its scope certain types of outright transfers of receivables.]

[*Note to the Working Group: Depending on the decision of the Working Group, this paragraph may need to be deleted or revised to refer to the relevant reasons for the exclusion of certain types of outright transfer of receivables (see art. 1, Note to the Working Group).*]

51. In addition, unlike the Secured Transactions Guide, the Model Law excludes from its scope security rights in the right to receive the proceeds under an independent undertaking (see art. 1, subpara. 3(a)). The reason is that financing practices relating to independent undertakings are subject to special rules. In any case, States interested in addressing those practices in their general secured transactions law can always implement the relevant recommendations of the Secured Transactions Guide (recs. 27, 50, 107, 127, 176 and 212).

52. Moreover, unlike the Secured Transactions Guide, the limitation as to the application of the Model Law to security rights in intellectual property (see art. 1, subpara. 3(b)) may not be necessary if the enacting State has already coordinated or otherwise addressed the relationship between the Model Law and its law relating to intellectual property.

53. Also, unlike the Secured Transactions Guide, the Model Law does not exclude from its scope security rights in non-intermediated securities (see art. 1, subpara. 3(c)). The reason is that such securities are part of commercial finance transactions and are not addressed in any other international trade law text.

54. [Finally, the Model Law excludes payment rights under or from financial contracts governed by "close-out netting agreements", rather than "netting agreements", to ensure that transactions relating to set off [even between two sellers of goods with trade claims] and counter-claims would not be inadvertently excluded (see art. 1, subpara. 3(d)).]

[*Note to the Working Group: The Working Group may wish to note that the bracketed text may have to be deleted or revised, depending on its decision with respect to the bracketed words in article 1, subparagraph 3(d) (see Note to the Working Group).*]

55. While consistent with the policy of recommendation 7 of the Secured Transactions Guide, subparagraph 3(f), adds a condition to further exclusions, that is, that other law governs matters addressed in the Model Law. The reason for this approach is to avoid inadvertently creating gaps in the law. In addition, subparagraph 3(f), provides guidance to States as to possible exclusions, referring to types of asset, such as ships and aircraft, that are subject to specialized secured transactions and asset-based registration regimes.

56. Similarly, while paragraph 4, is formulated somehow differently from recommendation 6 of the Secured Transactions Guide, there is no policy difference between the two rules. The policy may be explained as follows. In the case of a security right in an asset covered by the Model Law, the security right extends to its identifiable proceeds (see art. 10, para. 1). This rule applies even if the proceeds are of a type that is outside the scope of the Model Law (such as intermediated securities) except if a security right in those securities is subject to other law.

57. Paragraph 5, which is a reformulation of the rule in recommendation 2, subparagraph (b), of the Secured Transactions Guide, is intended to preserve the application of consumer protection law. For example, under consumer-protection law, it may not be possible to create a security right in all present and future assets, employment benefits, at least up to a certain amount, or necessary household items of a consumer. Enacting States that do not have a developed consumer-protection law may need to consider whether enactment of the Model Law should be accompanied by the enactment of such special protections for consumers. It should also be noted that the Model Law already includes certain consumer-specific rules. For example, under article 22, an acquisition security right in consumer goods is effective against third parties upon its creation.

58. In line with recommendation 18 of the Secured Transactions Guide, paragraph 6 is intended to preserve limitations to the creation or the enforceability of a security right in certain types of asset (such as employment benefits) that are based on other law (statutory or case law), if any. At the same time, it is intended to ensure that such limitations based on the sole ground that an asset is a future asset or a part or undivided interest in an asset are overridden (see art. 8, paras. (a) and (b)). However, paragraph 6 does not apply to contractual limitations (negative pledge agreements). The Model Law overrides explicitly contractual limitations with respect to receivables or other intangible assets, negotiable instruments or rights to payment of funds credited to a bank account (see art. 12). With respect to other

types of asset, contractual limitations are overridden implicitly to the extent that the Model Law allows the owner of an asset to create a security right in that asset, even if the security or other agreement expressly restricts that right. The Model Law does not condition the creation, third-party effectiveness or priority of a security right in an asset on the grantor having the right to encumber it (art. 6, para. 1, refers only to the "power to encumber").

59. Finally, unlike the Secured Transactions Guide, the Model Law does not apply to attachments to movable assets or immovable property. Thus, the Model Law does not include a provision along the lines of recommendation 5, which provides that, while the law recommended in the Secured Transactions Guide does not apply to immovable property, it does apply to attachments to immovable property. Enacting States are encouraged to include in their enactments of the Model Law provisions based on the relevant recommendations of the Secured Transactions Guide (see recs. 21, 25, 43, 48, 87, 88, 164, 165, 184, 195 and 196).

Article 2. Definitions and rules of interpretation

60. Article 2 explains the meaning of most key terms used in the Model Law. The meaning of other terms is explained in various articles of the Model Law. For example: (a) the meaning of the term "registry" is explained in article 26; and (b) the meaning of the term "default" is explained in article 66, paragraph 1. Article 2 is based on the terminology and rules of interpretation of the Secured Transactions Guide (see Introduction, paras. 15-20). Rules of interpretation include the following: (a) the word "or" is not intended to be exclusive; (b) the singular includes the plural and vice versa; and (c) the words "include" or "including" are not intended to indicate an exhaustive list (see Introduction, para. 17).

Acquisition security right

61. An acquisition security right is a security right that secures the grantor's obligation with respect to credit provided to enable the grantor to acquire a tangible asset (other than reified intangible assets), intellectual property and the rights of a licensee in intellectual property. Where a security right secures obligations in addition to the credit extended and used for the purpose of acquiring the encumbered asset, it is an ordinary security right to the extent of those additional obligations.

Bank account

62. To underline the distinction between a "bank account" and a "securities account", the Model Law defines the latter term as "an account maintained by an intermediary to whom securities may be credited or debited" and the term "securities" in a manner that clearly excludes funds. The term "bank account" includes a checking or other current account, as well as a savings or deposit account. The enacting State may wish to consider including a definition of the term "bank" in its secured transactions law or rely for this purpose on other law.

Certificated non-intermediated securities

63. The term "represented" is broad enough to cover the approaches taken in different jurisdictions (e.g. "covered" or "embodied"). The term "certificate" means only a tangible document subject to physical possession. Thus, securities represented by an electronic certificate are uncertificated securities under the Model Law.

Control agreement

64. While the effect of a control agreement is to render a security right effective against third parties (see art. 16), its purpose is to ensure the cooperation of the depositary bank or the issuer in the enforcement of a security right. Unlike the definition of this term in the Secured Transactions Guide, on which this definition is based, this definition does not refer to a "signed writing". This difference does not reflect a policy change but rather a decision that this matter should be left to the authorization requirements of the enacting State. A control agreement does not need to be in a single writing. It should be noted that any reference to a "writing" in the Model Law is intended to cover electronic equivalents (see Secured Transactions Guide, recs. 11 and 12).

Money

65. The term "money", whose definition is based on a definition contained in the Secured Transactions Guide, is intended to include not only the national currency (i.e. banknotes and coins) of the enacting State but also foreign currency. No reference is made to currency "currently" authorized as a legal tender, because if currency is not "currently" authorized as a legal tender, it would not qualify as a legal tender. Rights to payment of funds credited to a bank account and negotiable instruments are recognized as distinct concepts in the Model Law and they are not included in the term "money".

Non-intermediated securities

66. The term "non-intermediated securities" includes shares and bonds that are not held in a securities account. The term does not include the rights of an intermediary or a competing claimant in securities held by the intermediary directly against the issuer because those securities are credited by the intermediary to a securities account in the name of the grantor and therefore qualify as intermediated securities for the purposes of that transaction.

Notification of a security right in a receivable

67. The requirement for the identification of the encumbered receivable and the secured creditor that was included in the definition of this term in the Secured Transactions Guide was moved to article 56, paragraph 1, as it states a substantive rule on the effectiveness of a notification of a security right, a matter that is already addressed in article 56, paragraph 1.

Proceeds

68. The term "proceeds" has the same meaning as in the Secured Transactions Guide. It is important to note that it covers both proceeds of the sale of an encumbered asset by the grantor or a person that acquired the asset from the grantor and natural or civil fruits. The terms revenues, dividends and distributions, which were included in the definition of this term in the Secured Transactions Guide, have been deleted on the understanding that they are covered by the term "civil fruits".

Receivable

69. Like the Secured Transactions Guide, the Model Law defines the term "receivable" in a broad way to cover even non-contractual receivables (e.g. tort receivables). To the contrary, in the Assignment Convention, the term "receivable" is limited to contractual rights to payment.

Secured obligation

70. The term "secured obligation" includes any obligation secured by a security right, including credit extended to cover the operational costs of a business or to pay the purchase price of goods. It includes not only obligations already incurred at the time of the extension of the credit but also obligations incurred thereafter, if the security agreement so provides. As in other UNCITRAL texts, in the Model Law the singular includes the plural and vice versa (see para. 60 above). So, for example, a reference to the secured obligation would be sufficient to cover all present and future secured obligations.

Securities

71. The definition of the term "securities" is narrower than the definition of that term in article 1, subparagraph (a), of the Unidroit Securities Convention. The reason is that, while a broad definition is appropriate for the purposes of that Convention, it is overly broad for the purposes of the Model Law and could result in subjecting security rights in receivables, negotiable instruments, money and other generic intangible obligations to the special rules applicable to security rights in non-intermediated securities (see A/CN.9/802, para. 74). In any case, each enacting State would need to coordinate the definition of the term "securities" in its secured transactions law with the definition of this term in its securities transfer law.

Securities account

72. The definition of this term is derived from article 1, subparagraph (c), of the Unidroit Securities Convention.

Tangible asset

73. The term "tangible asset" includes the terms consumer goods, equipment and inventory, terms that do not refer to subcategories of tangible assets but rather to the way in which particular tangible assets are used by the grantor. Thus, the same cars could qualify as "consumer goods", if it is used by the grantor for personal purposes, as "equipment", if it is used by the grantor in its business, or as "inventory", if the grantor happens to be a car dealer or manufacturer.

Article 3. International obligations of this State

74. Article 3 is based on article 3 of the UNCITRAL Model Law on Cross-Border Insolvency. It is intended to reflect the principle of the prevalence of international treaties (such as the Convention on International Interests in Mobile Equipment and its Protocols) over domestic law.

Article 4. Party autonomy

75. Article 4 is based on article 6 of the Assignment Convention (the first sentence of which is based on art. 6 of the United Nations Convention on Contracts for the International Sale of Goods ("CISG")) and recommendation 10 of the Secured Transactions Guide. It is intended to reflect the principle that, with certain exceptions stated in the Model Law, parties are free to vary its effect as between them.

76. An agreement referred to in paragraph 1 may be not only between the secured creditor and the grantor but also between the secured creditor or the grantor and other parties whose rights may be affected by the Model Law, such as the debtor of an encumbered receivable, or between the secured creditor and a competing claimant. [Paragraph 2 is intended to clarify that, while an agreement between two parties may benefit a third party, it cannot negatively affect its rights.]

[*Note to the Working Group: Depending on the decision of the Working Group with respect to the bracketed words in paragraph 2, the bracketed text in this paragraph my need to be revised.*]

Article 5. General standards of conduct

77. Article 5 is based on recommendation 132 of the Secured Transactions Guide (see chap. VII, para. 15). Under paragraph 1, any person must exercise all its rights and perform all its obligations under the Model Law (and not only the rights and obligations under the provisions of the enforcement chapter) in good faith and in a commercially reasonable manner. The violation of this obligation may result in liability to damages and other consequences that are left to the relevant law of the enacting State.

78. The concept of "commercial reasonableness" refers to the commercial transaction context and best practices. Meeting the specific standards referred to in other articles of the Model Law (e.g. art. 72, para. 4, according to which notice is to be given within a short period of time) should generally be construed as meeting the general standards of conduct referred to in this article.

79. To protect the legitimate interests of all parties and avoid abuses, subparagraph 2(a) provides that the duty to act in good faith and in a commercially reasonable manner cannot be waived or varied by agreement. Under subparagraph 2(b), this duty does not apply to an outright transfer without recourse. The reason is that the grantor (transferor) has no remaining vested interest in the receivable that could be protected by a limitation on the way in which the secured creditor (transferee) could collect the receivable.

Chapter II. Creation of a security right

A. General rules

Article 6. Security agreement

80. Article 6 is based on recommendations 13-15 of the Secured Transactions Guide (see chap. II, paras. 12-37). Its purpose is to deal with the creation of a security right, and the form and the minimum content of a security agreement so as to achieve one of the key objectives of an effective and efficient secured transactions law, that is, to enable parties to create a security right in a simple and efficient manner (see Secured Transactions, rec. 1, subpara. (c)).

81. Thus, under paragraph 1, an agreement that meets the requirements of paragraphs 2 to 5 is sufficient to create a security right even in future assets (produced or acquired by the grantor after the conclusion of the security agreement; see definition in art. 2, subpara. (m)). Paragraph 2 clarifies that, in the case of future assets, the security right is created when the grantor acquires rights in them or the power to encumber them.

82. Depending on what it considers as most efficient financing practices and on the assumptions of market participants, the enacting State may wish to consider whether to retain subparagraph 3(c). One approach is to retain subparagraph 3(c) to facilitate the grantor's access to secured financing from other creditors in situations where the value of the assets encumbered by the prior registered security right exceeds the maximum amount indicated in the notice. Another approach is to leave out subparagraph 3(c) to facilitate the grantor's access to credit by the first-registered secured creditor (for the comparative advantages and disadvantages of the two approaches, see Secured Transactions Guide, chap. IV, paras. 92-97).

83. The enacting State may wish to select in paragraph 4 one of the two alterative wordings that are set out within square brackets that is most fitting to its contract law. If the enacting State retains the words "concluded in", a security agreement that is not in written form is not effective. If the enacting State retains the words "evidenced in", a security agreement that is not in written form is in principle effective but its existence may only be evidenced by a writing.

Article 7. Obligations that may be secured

84. Article 7 is based on recommendation 16 of the Secured Transactions Guide (see chap. II, paras. 38-48). It is primarily intended to ensure that future, conditional and fluctuating obligations may be secured (see Secured Transactions Guide, chap. II, paras. 38-48). The main reason for this approach is to facilitate modern financing transactions, in the context of which disbursements are made at different times depending on the needs of the grantor (e.g. revolving credit facilities for the grantor to buy inventory). This approach does not preclude the introduction of special protections for grantors (e.g. setting a maximum amount for which the security right may be enforced; see art. 6, subpara. 3(c)).

Article 8. Assets that may be encumbered

85. Article 8 is based on recommendation 17 of the Secured Transactions Guide (see chap. II, paras. 49-57 and 61-71). It is primarily intended to ensure that future assets, parts of assets and undivided rights in assets, generic categories of assets, as well as all assets of a person, may become the subject of a security right.

86. It should be noted that the fact that future assets may be subject to a security right does not mean that statutory limitations to the creation or enforcement of a security right in specific types of asset (e.g. employment benefits in general or up to an amount) are overridden (see art. 1, para. 6).

87. It should also be noted that the fact that all assets of a grantor may be subject to a security right so as to maximize the credit that may be available and improve the terms of the credit agreement does not mean that other creditors of the grantor are necessarily

unprotected. The protection of other creditors (within and outside insolvency proceedings) is a matter of other law and is foreseen in article 32.

Article 9. Required description of assets

88. Article 9 is based on recommendation 14, subparagraph (d), of the Secured Transactions Guide (see chap. II, paras. 58-60). In view of their importance, the requirements for the description of encumbered assets in a security agreement are presented in a separate article. Article 9 is intended to ensure that a security right may be created in an asset or class of assets even if the description in the security agreement is generic, such as "all inventory" or "all receivables" (see Secured Transactions Guide, chap. II, paras. 58-60).

Article 10. Proceeds and proceeds in the form of funds commingled with other funds

89. Article 10 is based on recommendations 19 and 20 of the Secured Transactions Guide (see chap. II, paras. 72-89). Paragraph 1 is intended to ensure that, unless otherwise agreed by the parties, a security right in an asset automatically extends to its identifiable proceeds (see para. 1). The rationale for this rule is that it reflects the normal expectations of the parties and ensures that the secured creditor is sufficiently secured. This is important as other parties may have a security right in assets that are proceeds of other assets (e.g. in the receivables generated from the sale of encumbered inventory) and the rights of all competing creditors should be clearly defined and addressed in the same law.

90. Here is an example of a typical transaction that highlights the importance of proceeds: where the original encumbered asset is inventory, the receivables generated from the sale of the inventory are proceeds. If upon payment of the receivables the money is deposited in a bank account, the right to payment of the funds credited to the bank account are also proceeds of the inventory. If a check is issued out of the bank account for the purchase of new inventory, the check is also part of the proceeds of the inventory. So is new inventory purchased, as well as any warehouse receipt if the new inventory is placed in a warehouse.

91. Paragraph 2 introduces an exception to the rule in paragraph 1. Even though they are not identifiable, the security right in an asset extends to its proceeds in the form of funds that are commingled with other funds.

92. Paragraph 3 limits that security right to the value of the proceeds immediately before they were commingled. So, if a sum of €1,000.00 is deposited in a bank account and at the time of enforcement the bank account has a balance of €2,500.00, the security right extends to the sum of €1,000.00.

93. Paragraph 4 deals with the situation in which the balance in the bank account is less than the value of the proceeds deposited (e.g. less than €1,000.00). In such a case, under paragraph 4, the security right extends to the lowest value between the time when the proceeds were commingled and the time the security right in the proceeds is claimed. So, if in the example given, the balance in the account where the proceeds were deposited was €1,500.00, then it went down to €500.00 and at the time of enforcement was €750.00, the security right extends to €500.00 (i.e. the lowest intermediate balance).

Article 11. Tangible assets commingled in a mass or product

94. Article 11 is based on recommendations 22 and 91 of the Secured Transactions Guide (see chap. II, paras. 90-95 and 100-102, and chap. V, paras. 117-123). Paragraph 1 is intended to ensure that a security right in assets commingled in a mass or product, even though they are no longer identifiable, continues in the mass or product.

95. Under paragraph 2, the security right is limited to the value of the mass in the [same proportion as the encumbered assets and the assets not encumbered contributed to the mass] [quantity of the encumbered asset that became part of the mass]. So, [if a secured creditor has a security right in €100,000.00 worth of oil that is commingled with €50,000.00 worth of oil in the same tank and thus the mass has €150,000.00 worth of oil, the security right is deemed to encumber two thirds of whatever oil remains in the tank at the time it becomes necessary to enforce the security right (even if the price of the oil goes up or down)] [if: (a) a security right is created in 100,000 litres of oil to secure an obligation of €100,000.00

(€1 per litre) and the security agreement and the notice describe the encumbered assets accordingly; (b) the 100,000 litres of oil are commingled with another 50,000 litres of oil in a tank and become part of a mass; and (c) at the time of enforcement, the value of the mass (150,000 litres of oil) is only €75,000.00 because of a drop on oil prices (€0.5 per litre), the secured creditor should be able to enforce its security right against 100,000 litres of oil worth only €50,000.00)].

96. Paragraph 3 contains a different rule with respect to tangible assets commingled in a product (e.g. flour commingled in bread). Under paragraph 3, the security right in the product is limited to the value of the encumbered asset immediately before they became part of the product. So, if encumbered flour worth €100.00 is commingled and bread worth €500.00 is produced, the security right is limited to €100.00.

97. It should be noted that the word "limited" in paragraphs 2 and 3 means that, if the value of the encumbered asset commingled in the mass or product increases after commingling, the increased value is unencumbered. In other words, the secured creditor does not benefit from commodity price increases (see Secured Transactions Guide, chap. V, para. 118 ad finem). Similarly, the word "limited" does not address the question of what is the amount secured if the price of the encumbered asset decreases after commingling. The rule applicable to all types of encumbered asset applies to tangible assets commingled in a mass or product, namely that each party bears the risk of decreases of the price of the encumbered asset.

[*Note to the Working Group: Depending on the decisions of the Working Group, the commentary to paragraphs 2 and 3 may need to be revised. The commentary to 4, which appears within square brackets, will be prepared after the Working Group has decided whether it should be retained.*]

Article 11bis. Extinction of a security right

98. Article 11bis deals with the extinction of a security right by full payment or other satisfaction of all secured obligations, including future obligations based on an existing commitment of the secured creditor to extend credit. Reference to the extinction of a security right is made in articles 49 (obligation of a secured creditor to return an encumbered asset), and article 21, subparagraph 2(c) of the registry-related provisions (compulsory registration of an amendment or cancellation notice).

B. Asset-specific rules

Article 12. Contractual limitations on the creation of a security right

99. Article 12 is based on recommendation 24 of the Secured Transactions Guide (see chap. II, paras. 106-110 and 113), which in turn is based on article 9 of the Assignment Convention. It is intended to ensure that an agreement limiting the grantor's right to create a security right in the types of assets listed in this article does not invalidate a security right created in violation of such an agreement. The rationale underlying this approach is to facilitate the use of receivables as security for credit, which is in the interest of the economy as a whole, without unduly interfering with party autonomy.

100. Compared with recommendation 24 of the Secured Transactions Guide, article 12 has been revised to address contractual limitations on the creation of a security right in assets in addition to receivables, namely other intangible assets, negotiable instruments and rights to payment of funds credited to a bank account (see A/CN.9/830, paras. 59-63).

101. Paragraph 2 limits the impact of the rule in paragraph 1. Under paragraph 2, if the debtor of the receivable has sufficient negotiating power to force the grantor to accept the inclusion of a "no-assignment clause" in their agreement and a breach of that agreement by the grantor results in a loss to the debtor of the receivable, the grantor is liable to damages under contract law. However, the debtor of the receivable may not avoid the contract because of that breach or raise against the secured creditor (assignee) any claim it may have against the grantor for that breach. In addition, under paragraph 3, a secured creditor that accepts a receivable as security for credit is not liable for the grantor's breach just because it had knowledge of the "no-assignment clause".

102. As a result of the rules in paragraphs 1-3, a secured creditor does not have to check each contract from which a receivable might arise to determine whether it contains a no assignment clause. This facilitates secured transactions in which security is created in bulk receivables and transactions in which future receivables are involved.

103. Paragraph 4 limits the scope of the rule in paragraph 1 to broadly defined trade receivables. It does not apply to so-called "financial receivables", because, where the debtor of the receivable is a financial institution, even partial invalidation of an anti-assignment clause could affect obligations undertaken by the financial institution towards third parties (see Secured Transactions Guide, para. 108).

104. Read together with article 6, paragraph 1, article 24 does not override statutory limitations to the creation or enforcement of a security right in certain types of receivable (e.g. sovereign receivables).

Article 13. Personal or property rights securing or supporting payment or other performance of an encumbered receivable or other intangible asset, or negotiable instrument

105. Option A of paragraphs 1 and 2 reflects the thrust of recommendation 25 of the Secured Transactions Guide (see chap. II, paras. 111-122), while option B reflects the thrust of article 10 of the Assignment Convention.

106. Under option A, a security right in a receivable or another of the assets described in paragraph 1 automatically extends to any personal right that supports payment or other performance of the receivable (e.g. guarantee) and any property right that secures such payment or other performance (e.g. a security right in another asset). To avoid interfering with the rights of a guarantor, issuer, confirmer or nominated person of an independent undertaking, where the supporting right is an independent undertaking, the security right extends only to the right to receive the proceeds and not to the right to demand payment under the independent undertaking.

107. Under option B, the security right extends automatically to accessory security or supporting rights, while with respect to independent rights, the grantor is obliged to create a security right in them in favour of the secured creditor. Thus, there is no inconsistency with article 1, subparagraph 3(a), and there is no need to also include the full text of recommendation 127 of the Secured Transactions Guide to protect the rights of a guarantor/issuer, confirmer or nominated person of an independent undertaking.

[*Note to the Working Group: If the Working Group retains option A, to avoid any adverse impact on the rights of a guarantor/issuer, confirmer or nominated person of an independent undertaking, the thrust of recommendation 127 of the Secured Transactions Guide should also be included in the Model Law.*]

Article 14. Negotiable documents and tangible assets covered

108. Article 14 is based on recommendation 28 of the Secured Transactions Guide (see chap. II, para. 128). It is intended to ensure that a security right in a negotiable document extends to the tangible assets covered by the document, if the issuer is in possession of the assets when the document is issued (e.g. inventory or crops deposited in a warehouse for which the warehouse operator issued a negotiable warehouse receipt).

109. In view of the definition of the term "possession" in article 2, subparagraph (z), possession of the issuer of a negotiable document includes possession by its representative or a person acting on behalf of the issuer. A security right in a negotiable document extends to the tangible assets covered by the document and will continue to exist even after the document no longer covers the assets. However, effectiveness against third parties through possession of the document applies only as long as the document covers the assets and lapses once they are released by the issuer (see article 24, para. 2).

Article 15. Tangible assets with respect to which intellectual property is used

110. Article 15 is based on recommendation 243 of the Intellectual Property Supplement (see paras. 108-112). It is intended to ensure that, unless otherwise agreed, a security right

in a tangible asset does not automatically extend to the intellectual property right contained therein, and that a security right in an intellectual property right does not automatically extend to the tangible asset with respect to which the intellectual property right is used (e.g. the copyrighted software included in a personal computer or the trademark on an inventory of clothes).

Chapter III. Effectiveness of a security right against third parties

A. General rules

Article 16. General methods for achieving third-party effectiveness

111. Article 16 is based on recommendation 32 of the Secured Transactions Guide (see chap. III, paras. 19-86). It is intended to set out general methods for achieving third-party effectiveness (i.e. registration in the general security rights registry, a specialized registry or title certificate, and possession of the encumbered asset by the secured creditor). Other methods (e.g. control) are set out in the asset-specific provisions of this chapter.

Article 17. Proceeds

112. Article 17 is based on recommendations 39 and 40 of the Secured Transactions Guide (see chap. III, paras. 87-96). It is intended to determine the circumstances in which the security right in proceeds that is provided for in article 10 will be effective against third parties.

113. Under paragraph 1 a security right in cash proceeds (i.e. money, receivables, negotiable instruments or rights to payment of funds credited to a bank account) is automatically effective against third parties. For example, upon the sale of encumbered inventory, the receivable, cash, bank deposit, check and new inventory generated are proceeds of the originally encumbered inventory.

114. Unlike recommendation 39, on which this article is based, paragraph 1 does not refer to the description of the proceeds in the notice. This change is a drafting change and does not constitute a change of policy. The reason for this change is that, once the proceeds are described in the notice (in line with the security agreement), they constitute original encumbered assets, not proceeds, and article 16 is sufficient in dealing with the third-party effectiveness of a security right in those assets.

115. Under paragraph 2, if a security right in an asset is effective against third parties, the security right in their proceeds is effective against third parties for a short period of time and thereafter only, if before the expiry of that short period, the security right in the proceeds is made effective against third parties by one of the methods set out in article 16 or the asset-specific provisions of this chapter.

Article 18. Changes in the method for achieving third-party effectiveness

116. Article 18 is based on recommendation 46 of the Secured Transactions Guide (see chap. III, paras. 120 and 121). It is intended to ensure that a security right made effective by one method may later be made effective by another method, and that third-party effectiveness is continuous as long as there is no time gap between the two methods.

Article 19. Lapse in third-party effectiveness

117. Article 19 is based on recommendation 47 of the Secured Transactions Guide (see chap. III, paras. 122-127). It is intended to ensure that, if third-party effectiveness lapses, it may be re-established, but third-party effectiveness dates as of the time it is re-established.

Article 20. Impact of a transfer of an encumbered asset

118. Article 20 has a twofold purpose; first, to reflect the generally accepted rule that a security right follows an encumbered asset in the hands of a transferee (droit de suite); and second, to provide that, unless otherwise provided in article 27 [of the registry-related provisions], that security right is also automatically effective against third parties.

Article 21. Continuity in third-party effectiveness upon a change of the applicable law to this Law

119. Article 21 is based on recommendation 45 of the Secured Transactions Guide (see chap. III, paras. 117-119). Under paragraph 1, if the Model Law becomes applicable as a result, for example, of a change in the location of the encumbered asset or the grantor, a security right that was effective against third parties under the previously applicable law remains effective against third parties under the Model Law for a short period of time. Thereafter, the security right is effective only if, before the expiry of that period, it is made effective against third parties under the relevant provisions of the Model Law. Under paragraph 2, if the third-party effectiveness of a security right does not lapse, it dates back to the time it was first achieved under the previously applicable law.

Article 22. Acquisition security rights in consumer goods

120. Article 22 is based on recommendation 179 of the Secured Transactions Guide (see chap. IX, paras. 125-128). While an acquisition security right in consumer goods is automatically effective against third parties, it does not have the special priority of an acquisition security right over a security right registered in a specialized registry (see article 30).

B. Asset-specific rules

Article 23. Rights to payment of funds credited to a bank account

121. Article 23 is based on recommendation 49 of the Secured Transactions Guide (see chap. III, paras. 138-148). It adds three new methods of achieving third-party effectiveness of a security right in a right to payment of funds credited to a bank account (i.e. the creation of the security right in favour of the depositary bank, the conclusion of a control agreement and any action necessary for the secured creditor to become the account holder). The exact nature of the action to be taken for the secured creditor to become the account holder depends on the banking law and practice of the enacting State. For example, the name of the secured creditor may replace the name of the grantor as an account holder or the account of the grantor may be debited and the account of the secured creditor may be credited.

Article 24. Negotiable documents and tangible assets covered

122. Article 24 is based on recommendations 51-53 of the Secured Transactions Guide (see chap. III, paras. 154-158). It is intended to deal with the effect of the third-party effectiveness of a security right in a negotiable document on the third-party effectiveness of a security right in the tangible assets covered by the document.

123. Under paragraph 1, if a security right in a negotiable document (which extends to the assets covered by the document under article 14) is effective against third parties, the security right in the assets covered by the document is also effective against third parties. Under paragraph 2, possession of the document is sufficient to make effective against third parties also the security right in the assets covered by the document. Under paragraph 3, the security right referred to in paragraph 2 remains effective against third parties even after the secured creditor gives up possession of the document for a short period of time.

124. Enacting States that are parties to the Convention Providing a Uniform Law For Bills of Exchange and Promissory Notes (Geneva, 1930; the “Geneva Uniform Law”) may wish to consider including in the asset-specific section of the creation or third-party effectiveness chapter a provision that a security right in a negotiable instrument may be created and made effective against third parties by delivery and endorsement containing the statement “value in security” (“valeur en garantie”), “value in pledge” (“valeur en gage”), or any other statement implying a security right (see art. 19 and art. 22 of the United Nations Convention on International Bills of Exchange and International Promissory Notes (the “Bills and Notes Convention”), which contains a similar rule). An enacting State that decides to do so will have to adjust article 27 of the Model Law to deal with the comparative priority of such a security right.

Article 25. Uncertificated non-intermediated securities

125. Article 25 is a new provision that does not correspond to any of the recommendations of the Secured Transactions Guide, which did not apply to any type of securities (see rec. 4, subpara. (c)). It adds a new asset-specific method of third-party effectiveness, that is, notation of the security right or entry of the name of the secured creditor as the holder of the securities in the books maintained for recording the name of the holder of the securities by or on behalf of the issuer. It also reiterates the conclusion of a control agreement as a method of third-party effectiveness with respect to a security right in non-intermediated securities (not just rights to payment of funds credited to bank accounts; see art. 2, subpara. (g)).

126. Enacting States parties to the Geneva Uniform Law may wish to include in the asset-specific section of the creation or third-party effectiveness chapter a provision that a security right in non-intermediated securities may be created and made effective against third parties by delivery and endorsement containing the statement "value in security" ("valeur en garantie"), "value in pledge" ("valeur en gage"), or any other statement implying a security right (see art. 19 of the Geneva Uniform Law and art. 22 of the Bills and Notes Convention, which contains a similar rule). An enacting State that decides to do so will have to adjust article 46 of the Model Law to deal with the comparative priority of such a security right.

(A/CN.9/WG.VI/WP.66/Add.1) (Original: English)

Note by the Secretariat on a draft guide to enactment of the draft model law on secured transactions

ADDENDUM

Contents

Chapter IV. The registry system

Article 26. Establishment of a public registry

1. The promotion of certainty and transparency by providing for the registration of notices with respect to security rights in movable assets is a key objective of a modern secured transactions regime (see Secured Transactions Guide, rec. 1, subpara. (f)). Accordingly, the establishment of a general security rights registry (the "Registry") is an integral component of the third-party effectiveness and priority provisions of the draft Model Law (see Secured Transactions Guide, chap. IV, paras. 1-8, and Registry Guide, para. 73). Thus, article 26, which is based on recommendation 1 of the Secured Transactions Guide and the Registry Guide, provides for the establishment by the enacting State of a public registry for recording and searching information about the possible existence of security rights in movable assets within the scope of application of the draft Model Law.

2. The text in square brackets recognizes that an enacting State may decide to enact some or all of the provisions relating to the registry system in the secured transactions law, a separate law, subordinate regulations, or a combination thereof. For ease of reference, all the relevant provisions are collected below in a single separate instrument called "the registry-related provisions".[1]

3. The registry-related provisions have been drafted to accommodate flexibility in registry design. If possible, the registry record should be electronic in the sense that information in registered notices is stored in electronic form in a single computer database (see Secured Transactions Guide, rec. 54, subpara. (j)(i), and chap. IV, paras. 38-41 and 43). An electronic registry record is the most efficient and practical means of enabling enacting States to implement the recommendations of the Secured Transactions Guide that the registry record should be centralized and consolidated (see rec. 54, subpara. (e), and chap. IV, paras. 21-24).

4. In addition, the Secured Transactions Guide further recommends that, if possible, access to registry services should be electronic in the sense of permitting the direct electronic submission of notices and search requests by users over the Internet or via direct networking systems as an alternative to the submission of paper notices and search requests (see Secured Transactions Guide, rec. 54, subpara. (j)(ii), and chap. IV, paras. 23-26 and 43). This

[1] A reference to an article below is a reference to an article of the registry-related provisions, unless otherwise indicated.

approach eliminates the risk of human error in entering the information contained in a paper notice into the registry record, facilitates speedier and more efficient access to registry services by users, and greatly reduces the operational costs of the registry process (for a discussion of these advantages and guidance on implementation, see Registry Guide, paras. 82-89).

5. Some States provide for the registration in their general security rights registries of notices in addition to those contemplated by the draft Model Law, such as, for example, notices relating to judgments obtained by unsecured creditors against their debtors, claims of non-consensual preferential creditors or non-possessory ownership rights of long term lessors (see Registry Guide, paras. 40, 46, 50 and 51). If the enacting State follows this approach, it will need to specify whether registration is necessary for the creation or third-party effectiveness of these other rights and the priority effect of registration, including priority as against rights within the scope of the draft Model Law.

Registry-related provisions

Section A. General provisions

Article 1. Establishment of a public registry

6. Article 1 reiterates article 26 of chapter IV of the draft Model Law. It would be necessary only if the registry-related provisions are implemented in a law or other act other than the secured transactions law.

Article 2. Definitions

7. Article 2 contains definitions of key terms defined in the Registry Guide (see paras. 8 and 9). If the enacting State decides to implement the registry-related provisions in its enactment of the draft Model Law, these definitions should be included in the provision of the secured transactions law implementing article 2 of the draft Model Law.

Registry

8. If the Registry is operated by a governmental entity, it can exercise the supervisory functions foreseen in the registry-related provisions (e.g. art. 6, para. 2, art. 13, para. 2, art. 28, and art. 34, para. 2, below). Otherwise these functions should only be exercised by the governmental authority supervising the private entity operating the Registry.

Article 3. Grantor's authorization for registration

9. Article 3 is based on recommendations 71 of the Secured Transactions Guide (see chap. IV, para. 106) and recommendation 7, subpara. (b), of the Registry Guide (see para. 101). Paragraph 1 states the basic principle that the registration of an initial notice must be authorized by the grantor in writing. To ensure that this basic rule does not unnecessarily interfere with the efficiency of the registration process, paragraph 6 confirms that the authorization is to be given off-record. Thus, the Registry is not entitled to require evidence of the existence of the grantor's registration as part of the registration process. Paragraphs 4 and 5 further confirm that the grantor's authorization may be given before or after registration and that the conclusion of a written security agreement with the grantor automatically constitutes authorization.

10. Paragraphs 3 and 4, with which deal with amendment notices, are derived from the basic principle in paragraph 1. Paragraph 2 requires a new authorization from the grantor only for amendment notices that may affect the rights of the grantor. Thus, a new authorization is needed for the registration of an amendment notice that adds encumbered assets not included in a security agreement or any amendments to it. A new authorization from the grantor is not needed if the amendment notice merely seeks to add assets that were not described, inadvertently or otherwise, in the initial registered notice but were covered by the security agreement or any amendments to it. In addition, there is no need to register an amendment notice or obtain the authorization of the grantor with respect to "additional assets" that are proceeds of encumbered assets described in a prior registered notice if the

proceeds are: (a) of a type that fall within the existing description (for example, the description covers "all tangible assets" and the grantor exchanges one type of tangible asset for another (see Secured Transactions Guide, rec. 39); or (b) "cash proceeds" (money, receivables, negotiable instruments or funds credited to a bank account) (see art. 17, para. 1).

11. Under paragraph 2, the grantor's authorization must also be obtained for the registration of an amendment notice that seeks to increase the maximum amount for which the security right to which the registration relates may be enforced. This provision only applies in systems that require this information to be set out in the security agreement and in the registered notice. A new authorization from the grantor would not be needed for an amendment notice that merely seeks to correct an error in the maximum amount stated in the initial notice to bring it into line with the amount actually set out in the initial security agreement since the grantor's authorization would already have been given. It should be noted that the registration of an amendment notice takes effect only from the time when the registration of the amendment notice (not the initial notice) becomes effective (see article 14, para. 1).

12. Where an amendment notice seeks to add a new grantor, paragraph 3 requires the additional grantor's authorization to be obtained in line with the general principle in paragraph 1 and in the same manner. The bracketed wording in paragraph 3, which will be necessary only if the enacting State implements option A or option B of article 27 below, creates an exception to the requirement in paragraph 3. Where the new grantor is a transferee of an encumbered asset from the original grantor and the purpose of the amendment is to enable the secured creditor to protect its priority status as against claimants that acquire rights in the encumbered asset from that transferee the authorization of the grantor would not be necessary. Likewise, where the grantor's identifier changes after the registration, the grantor's authorization is not required for an amendment notice to disclose the new identifier of the grantor (see art. 26).

Article 4. One notice sufficient for security rights under multiple security agreements

13. Article 4 is based on recommendations 68 of the Secured Transactions Guide (see chap. IV, para. 101) and 14 of the Registry Guide (see paras. 125 and 126). It confirms that a single registered notice is sufficient to achieve the third-party effectiveness of security rights arising under multiple security agreements [between the parties identified in the notice] [with the same secured creditor]. This rule applies regardless of whether the agreements are related to one another or are separate and distinct, and regardless of whether the registration relates to security rights in the grantor's current assets or assets in which the grantor acquires rights only after the registration. This is the consistent with notice registration system contemplated by the draft Model Law, which requires a registrant to submit a standardized "notice" in the prescribed form rather than the underlying security agreements giving rise to the security rights to which their registrations relate or tender these for scrutiny.

14. A registration is effective only to the extent that the information in a registered notice accurately reflects the terms of any security agreement, as revised (see Registry Guide, para. 126). If, for example, the parties enter into a security agreement that covers assets not covered by the description in a previously registered notice, a new initial notice (or an amendment to an existing notice) will be needed for the security right in the additional assets to be effective against third parties, and it will take effect against third parties only from the time of its registration (see art. 14, para. 1).

Article 5. Advance registration

15. Article 5 is based on recommendations 67 of the Secured Transactions Guide (see chap. IV, paras. 98-100) and 13 of the Registry Guide (see paras. 122-124). It confirms that a registration may be made even before the conclusion of a security agreement [between the parties identified in the notice] [to which the notice relates], or the creation of any security rights contemplated by any such agreement. Article 5 is consistent with article 4, according to which the underlying security documentation is not required to be deposited with the

Registry or tendered for scrutiny in the type of notice registration system contemplated by the draft Model Law. It is also consistent with article 8, subparagraph (a), of the draft Model Law, which provides that a security agreement may cover future assets (see art. 2, subpara. (m)).

16. Registration does not create, and is not necessary for the creation of, a security right (see Registry Guide, paras. 20 and 123). Accordingly, advance registration does not protect a secured creditor against a competing claimant, other than a competing secured creditor that acquires rights in encumbered assets before the security agreement with the secured creditor that made an advance registration is actually entered into and the other requirements for creation are satisfied. However, where the competing claimant is another secured creditor, advance registration will ensure its priority regardless of the order of creation of the competing security rights, provided that priority among them is governed by the general first-to-register rule.

17. If a security agreement is never concluded between the parties, or covers different assets than those described in the registered notice, advance registration may have a negative impact on the ability of the person identified as the grantor to obtain financing against or dispose of its assets. Accordingly, article 21 below provides for a procedure to enable the grantor to obtain the compulsory amendment or cancellation of a registered notice that does not accurately reflect their relationship.

Section B. Access to registry services

Article 6. Public access

18. Article 6 is based on recommendations 54, subparagraph (c), (f) and (g), and 55, subparagraph (b), of the Secured Transactions Guide (see chap. IV, paras. 25-228) and 4, 6 and 9 of the Registry Guide (see paras. 95-97 and 103-105).

19. Paragraphs 1 and 3 confirm that the Registry is public in the sense that any person is entitled to register a notice of a security right or search the registry record subject only to meeting the conditions governing access. With one qualification, the conditions are the same for both types of service. The user must use the form of notice or search request prescribed by the registry (which includes both a paper and an electronic form or screen) and pay or make any arrangements to pay any fees prescribed by the Registry for the relevant service (if payment of a fee is required; see art. 34). The one qualification relates to the requirement in subparagraph 1(b) for a user to identify itself to the Registry in the prescribed manner. This requirement only applies to users that submit a notice for registration as opposed to a search request. This requirement is aimed at assisting the person identified in a registered notice as the grantor to determine the identity of the registrant in the event that the grantor did not authorize the registration (see Registry Guide, para. 96). This consideration must be balanced against the need to ensure efficiency and speed in the registration process. Accordingly, the evidence of identity required of a registrant should be that which is generally accepted as sufficient in day-to-day commercial transactions in the enacting State (for example, a driver's licence or other state-issued official document).

20. If access to registry services is refused, paragraph 4 requires the Registry to communicate the specific reason (for example, the user failed to use the prescribed form or to pay the prescribed fee). The reasons must be communicated without delay. What this means in practice depends on the mode by which the notice or search request is submitted to the Registry. If the system is designed to enable users to submit notices and search requests electronically and directly to the Registry, the system can and should be programmed to automatically communicate the reason during the registration process and display the reason on the registrant's screen. In the case of notices and search requests submitted in paper form, the registry staff will need a reasonable period of time to examine the notice or search request and then prepare and communicate a formal response.

21. In order to facilitate access to registry services, and avoid their unnecessary refusals, the Registry should be designed to accept all modes of payment in common commercial use in the enacting State. However, if cash payments are allowed, controls will need to be introduced for registry staff access to cash payments; and, in the case, of other modes of

payment, controls will be necessary with respect to the registry staff use of financial information submitted by clients (see Registry Guide, para. 138). In addition, users should be given the option of setting up a pre-payment account with the Registry that enables them to deposit funds on an ongoing basis to pay for their ongoing requests for services. This would facilitate more efficient access by frequent users (such as financial institutions, automobile dealers, lawyers and other intermediaries).

22. In order to protect secured creditors and third parties against the risk of the registration of amendments and cancellations not authorized by the secured creditor paragraph 2 provides for security requirements to be specified by the Registry (if it is a governmental authority and, otherwise, by the governmental authority supervising the Registry). For example, the system might require registrants to set up a password-protected account with the Registry when submitting an initial notice, and then require all amendments and cancellations to be submitted through that account. The registrant will thus not be able to amend or cancel registered notices that do not appear in its own account. Alternatively (or in addition), the system might be designed to provide a unique confidential user code to registrants upon registration of an initial notice and then require entry of that code on all amendment and cancellation notices submitted for registration (see art. 22).

Article 7. Rejection of the registration of a notice or a search request

23. Article 7 is based on recommendations 8 and 10 of the Registry Guide (see paras. 97-99 and 106). Paragraph 1 obligates the Registry to reject the registration of a notice if no information, or only illegible information, has been entered in one or more of the required designated fields in a notice submitted for registration. As all required fields must be completed legibly for a registered notice to be effective, this provision is designed to ensure that the information in submitted notices that clearly do not satisfy the minimum requirements for effectiveness are never entered into the registry record. On the other hand, even if all required fields in a submitted notice contain legible information and the notice is therefore accepted for registration, it does not follow that the registration is effective since the information that is entered, while being legible, may be erroneous or incomplete.

24. Paragraph 2 obligates the Registry to reject a search request if no information, or only illegible information, has been entered in one of the designated fields for entering a search criterion. Since searchers are entitled to search by either or both of the identifier of the grantor and the registration number assigned to the initial notice (see art. 23), it is sufficient if legible information is entered into at least one of the search criterion fields. That having been said, the fact that at least one of the search criteria fields contains legible information does not ensure that the search result will be accurate since the criterion entered by the searcher may be erroneous or incomplete. To avoid any arbitrary decisions on the part of the Registry, paragraph 3 clarifies that the Registry may not reject the registration of a notice or search request where registrant or searcher satisfies the access conditions set out in paragraphs 1 and 2.

25. Paragraph 4 obligates the Registry to provide the reason for rejecting the registration of a notice or a search request without delay. What this means in practice depends on the mode by which the notice or search request was submitted to the Registry. If the system is designed to enable users to electronically submit notices and search requests directly to the Registry, the system can and should be designed to automatically reject the submission of incomplete or illegible notices during the registration process and display the reasons on the registrant's screen. In the case of notices and search requests submitted in paper form, there will necessarily be some delay between the time of receipt by registry staff and the communication of the refusal and reason to the user. In the case of notices and search requests submitted in paper form, the registry staff will need a reasonable period of time to examine the notice or search request and then prepare and communicate a formal response.

Article 8. No verification by the Registry

26. Article 8 is based on recommendations 54, subparagraph (d), and 55, subparagraph (b), of the Secured Transactions Guide (see chap. IV, paras. 15-17 and 48) and 7 of the Registry Guide (see paras. 100 and 102). It obligates the Registry to maintain the identity information submitted by registrants in compliance with article 6, subparagraph 1(b). It

should be noted that, while this information does not form part of the public or archived registry record, it nonetheless must be preserved by the Registry in a manner that enables it to be retrieved in association with the registered notice to which it relates. In order to facilitate the time and cost efficiency of the registration process, article 8 goes on to provide that the Registry may not require verification of the identity information provided by a registrant under article 6, subparagraph 1(b).

Section C. Registration of a notice

Article 9. Information required in an initial notice

27. Article 9 is based on recommendations 57 of the Secured Transactions Guide (see chap. IV, para. 65) and 23 of the Registry Guide (see paras. 157-160). It sets out the items of information required to be entered in the appropriate designated fields in an initial notice submitted to the Registry for registration. As each of these required elements is the subject of separate specific articles below, the reader is generally referred to the commentary on the relevant articles. It should be noted, however, that a notice might relate to more than one grantor or secured creditor, and the required information should be entered separately for each grantor or secured creditor.

28. An enacting State may require "additional information" (such as the birth date of the grantor or an identification number issued by the enacting State) to be entered to assist in uniquely identifying a grantor where there is a risk that many persons may have the same name (see bracketed text in art. 9, subpara. (a)). However, this additional information does not constitute a separate and independent search criterion. Accordingly, if this approach is adopted, the form of notice prescribed by the enacting State should provide a separate designated field for entering this "additional information". The enacting State should also enact provisions specifying the type of additional information to be included. It should also specify that this additional information is required in the sense that it must be entered in the relevant field for a notice to be accepted by the Registry (on all these points, see Registry Guide, rec. 23, subpara. (a)(i), and paras. 167-169, 171, 181-183, 226, as well as examples of forms in Annex II).

29. It should also be noted that subparagraphs (d) and (e) appear within square brackets, as their inclusion depends on the decision of the enacting State with respect to the options in article 15 below and article 6, subparagraph 3(e), of the draft Model Law (see paras. 47-49 and commentary to art. 6, subpara. 3(e); see also Registry Guide, paras. 199-204).

Article 10. Grantor identifier

30. Article 10 is based on recommendations 59-60 of the Secured Transactions Guide (see chap. IV, paras. 68-74) and 24 and 25 of the Registry Guide (see paras. 161-180). It provides that the identifier of the grantor is its name. It then sets out separate rules for determining the name of the grantor depending on whether the grantor is a natural person or a legal person or other entity.

31. If the grantor is a natural person, paragraph 1 provides that the grantor's name is the name that appears in the official document specified by the enacting State as the authoritative source. Since not all grantors may possess a common official document, the enacting State will need to specify alternative official documents as authoritative sources and specify the hierarchy of authoritativeness among them (for examples of possible approaches, see Registry Guide, paras. 163-168).

32. In view of the conflict-of-laws provisions of the draft Model Law (see, for example, art. 79), the law of the enacting State could apply to a security right created by a foreign grantor. Thus, if the enacting State requires the entry of a State-issued identity or other official number to uniquely identify a grantor, it will be necessary for the enacting State to address cases in which the grantor is not a citizen or resident of the enacting State, or for any other reason has not been issued an identification number. The enacting State might, for example, provide that the number of the grantor's foreign passport or the number in some other foreign official document is a sufficient substitute (see Registry Guide, para. 169).

33. Paragraph 2 requires the enacting State to indicate which components of a name of a grantor, who is a natural person, must be entered into the registered notice. Accordingly, the enacting State will need to specify, for example, whether only the given and family name of the grantor is required, or whether a middle name or initial must also be included. It will also need to specify, in the event the grantor's name consists of a single word, whether that name should be entered in the field designated for entering the grantor's family name (see Registry Guide, para. 165).

34. Paragraph 3 requires the enacting State to address how the grantor's name is to be determined where the grantor's name has legally changed under applicable law after the issuance of the official document that paragraph 1 designates as the authoritative source of the grantor's name (for example, by reason of marriage or as a result of a formal application for a name change under change of name legislation; see Registry Guide, para. 164(f)).

35. Paragraph 4 provides that, where the grantor is a legal person, the name of the grantor is the name that appears in the most recent document, law or decree to be specified by the enacting State constituting the legal person (see Registry Guide, paras. 170-173).

36. Paragraph 5, which is set out in square brackets, provides for the possibility that an enacting State may wish to require additional information to be entered in a registered notice in special cases, such as where the grantor subject to insolvency proceedings (see Registry Guide, paras. 174-179).

Article 11. Secured creditor identifier

37. Article 11 is based on recommendations 57, subparagraph (a), of the Secured Transactions Guide (see chap. IV, para. 81) and 27 of the Registry Guide (see paras. 184-189). It largely seeks to replicate the rules set out in article 10 concerning what constitutes the identifier of the grantor. Unlike article 10, however, article 11 provides that the registrant may also enter the name of a representative of the secured creditor (e.g. a service provider or an agent of a syndicate of lenders). This approach is intended to protect the privacy of the secured creditor. It is based on the assumption that it does not have an negative impact on the rights of the grantor, who would typically know the identity of the actual secured creditor from the security agreement and other dealings with the actual secured creditor) or third parties, as long as the representative is authorized to act on behalf of the actual secured creditor (see Registry Guide, paras. 186 and 187). It should also be noted that, as registration does not create the security right, the fact that the name of a representative is entered into a notice does not make the representative the actual secured creditor.

Article 12. Description of encumbered assets

38. Article 12 is based on recommendations 62 of the Secured Transactions Guide (see chap. IV, paras. 82-86) and 28 of the Registry Guide (see paras. 190-192). The test for the adequacy of a description contained in a registered notice in paragraph 1 consciously parallels the test for the adequacy of a description in a security agreement (see art. 9). In any case, a description in a registered notice need not be identical to the description in any related security agreement so long as it satisfies the requirement in paragraph 1 that it reasonably allows identification of the relevant encumbered assets. On the other hand, a description in a registered notice that satisfies this test will not make a security right effective against third parties, if the description exceeds the description in any related security agreement, since the requirements for the effective creation of a security right will not have been satisfied.

39. Paragraph 2 confirms that a description in a registered notice that refers to all of the grantor's movable assets or to all of the grantor's assets within a specified generic category (for example, all receivables owing to the grantor) satisfies the requirement in paragraph 1 that the description reasonably allow identification of the encumbered assets. It follows that a generic description will be sufficient even if any related security agreement only covers a specific asset within that broad generic category (for example, the description in the registered notice refers to all "tangible assets of the grantor", whereas the security agreement only covers a specific tangible asset). However, the grantor is entitled, pursuant to article 21, paragraph 1, to compel the secured creditor to register an amendment notice that narrows the description of the assets in the registered notice. Further, the efficacy of the registration

in this scenario is dependent on the authorization of the grantor pursuant to article 3; it follows that, if the grantor did not authorize a registration covering all assets within the specified category, but only a specific asset within that category, the registration will not be effective. It should be noted that reference to an asset in a registered notice does not imply or represent that the grantor presently or in the future will have rights in the asset.

40. The secured transactions laws of some States adopt specific alphanumerical description requirements ("serial number") for specified classes of high-value assets that have a significant resale market. In States that adopt this approach, entry of the serial number in its own designated field is required, in the sense of being necessary to achieve the third-party effectiveness and priority of the security right as against specified classes of third parties that acquire rights in the asset. States that are interested in adopting this approach are referred to the discussion in the Registry Guide (for the organization of the registry record to permit searches by serial number, see paras. 131-134; for the description of proceeds in a notice, see paras. 193-194; for the consequence of an error in a serial number, see para. 212; and for a search by serial number, see para. 266).

41. If proceeds of an encumbered asset are in the form of cash or equivalent types of asset and are not encompassed by the description of the encumbered assets in a registered notice, the secured creditor must amend its registered notice to add a description of the proceeds within a short period of time after the proceeds arise in order to preserve the third-party effectiveness and priority of its security right in the proceeds as from the date of the initial registration (see art. 17, para. 2). An amendment is necessary because otherwise there would not be a registered notice that would provide a description of the assets constituting the proceeds (see Registry Guide, paras. 195-197).

Article 13. Language of information in a notice

42. Article 13 is based on recommendation 22 of the Registry Guide (see paras. 153-156; the Secured Transactions Guide includes a discussion of this matter in chapter IV, paras. 44-46, but does not include a recommendation). Paragraph 1 requires the enacting State to specify the language or languages in which the information contained in notices submitted for registration must be expressed. Typically, the enacting State would require registrants to use its officially recognized language or languages. Information that needs to be translated in the officially recognized language or languages does not include the name and addresses of the grantor and the secured creditor or its representative and is essentially limited to the description of the encumbered assets (as the other items of information required to be entered in a notice may be reflected by numbers). Where such information is not expressed in the required language or languages, the registration of the notice would be ineffective or ineffective if it would seriously mislead a reasonable searcher (see art. 25, para. 4).

43. Paragraph 2 requires all information in a notice to be in the character set to be prescribed and publicized by the Registry (where the Registry is a governmental authority and otherwise the government authority supervising the Registry). Where the names and addresses of the grantor and secured creditor or its representative are expressed in a character set different from the character set used in the language or languages recognized by the enacting State, guidance will need to be given on how the characters are to be adjusted or transliterated to conform to the language of the registry (see Registry Guide, para. 155). If the information is not in the character set prescribed and publicized by the Registry, the notice will be rejected as illegible under article 7, subparagraph 1(b) (for the same rule with respect to search requests, see art. 7, subpara. 2(b)).

Article 14. Time of effectiveness of the registration of a notice

44. Article 14 is based on recommendations 70 of the Secured Transactions Guide (see paras. 102-105) and 11 of the Registry Guide (see paras. 107-112). Paragraph 1 provides that the registration of an initial or amendment notice submitted to the Registry becomes effective only once the information in the notice is entered into the public registry record so as to be available to searchers. If the registry system is designed to enable users to electronically submit information in a notice to the Registry directly without the intervention of registry staff, there will be little or no delay between the time when the information in a

notice is submitted to the Registry and the time when it becomes available to searchers. But in systems that permit or require the use of paper notice forms, there will inevitably be some time lag since the registry staff must enter the information on the paper notice form into the registry record on behalf of registrants. In view of the importance of the timing and order of registration to the third-party effectiveness and priority of a security right, paragraph 2 obligates the Registry to enter the information into the registry record without delay after the notice is submitted and in the order in which it was submitted. For the same reason, paragraph 3 requires the date and time of effectiveness of the registration to be set out in the registry record and made available to searchers.

45. Paragraph 4 deals with the time of effectiveness of the registration of a cancellation notice. Option A reflects option A of article 31, which obligates the Registry to remove information in a registered notice from the public registry record, and archive it, upon registration of a cancellation notice. Accordingly, option A of paragraph 4 provides that the registration of a cancellation notice becomes effective once the information in the registered notices to which the cancellation notice relates is no longer publicly searchable. Option B of paragraph 4 reflects the "open-drawer approach" (in which all information in the registry record is available to searchers and the Registry has no authority to do anything but accept, retain and disclose all information submitted) enshrined in option B of article 31. Accordingly, it provides that the registration of a cancellation notice becomes effective once the information in the registered notices to which the cancellation notice is entered into the registry record so as to be accessible to searchers.

46. Option A and option B of paragraph 5 require the Registry to maintain a record in its archives of the date and time of effectiveness of the registration of the cancellation notice, reflecting the approaches taken in option A and option B of paragraph 4 respectively.

Article 15. Period of effectiveness of the registration of a notice

47. Article 15 is based on recommendations 69 of the Secured Transactions Guide (see chap. IV, paras. 87-91) and recommendation 12 of the Registry Guide (see paras. 113-121, 240 and 241). It offers enacting States a choice of three different approaches to the determination of the initial period of effectiveness (or duration) of the registration of a notice. If option A is enacted, an initial notice (and any associated amendment notices) would be effective for the period of years stipulated by the enacting State. If option B is enacted, registrants would be permitted to choose the desired period of effectiveness for themselves. If option C is enacted, registrants would likewise be permitted to choose the period of effectiveness not to exceed a maximum number of years stipulated by the enacting State.

48. All options permit registrants to extend the period of effectiveness of the notice before its expiry (more than once) by the registration of an amendment notice. Under option A, the duration of the registration would be extended by an equivalent number of years. Under option B or option C the registrant would again be permitted to select the further period of effectiveness up to the stipulated maximum in the case of option C.

49. If option B or option C is enacted, the period of effectiveness of a registered notice is a mandatory component of the information required to be included in a notice submitted to the registry (see art. 9, subpar. (d)). States that adopt either of these options would also need to indicate on the prescribed notice form how registrants must enter the desired period of effectiveness. The notice form might be designed to enable registrants to simply enter the desired number of whole years from the date of registration. Alternatively, the notice form might permit registrants to enter the specific day, month and year on which the registration is to expire unless renewed.

Article 16. Obligation to send a copy of a registered notice

50. Article 16 is based on recommendations 55 subparagraphs (c), (d) and (e) of the Secured Transactions Guide (see chap. IV, paras. 49-53) and 18 of the Registry Guide (see paras. 145-149).

51. Paragraph 1 obligates the Registry to send a copy of a registered (initial, amendment or cancellation) notice to the person identified in the notice as the secured creditor without

delay after the registration becomes effective (the Registry cannot know or have to determine the identity of the actual secured creditor). This is important for the grantor to be able to protect its rights where the registration was not authorized at all or only partially (see art. 21). It is also important for the person identified in a notice as the secured creditor to be able to protect its position where an amendment or cancellation notice was registered by error (see Registry Guide, paras. 245-248) or without the secured creditor's authorization (see art. 22; as to the liability of the Registry for failure to send a copy of a notice, see art. 33).

52. Paragraph 2 obligates the person identified as the secured creditor in a registered notice sent to it by the Registry pursuant to paragraph 1 to forward it to the person identified in the notice as the grantor. The secured creditor has to comply with this obligation within the period of time specified by the enacting State after it receives the notice.

53. [Paragraph 3 clarifies that compliance by the secured creditor with its obligation under paragraph 2 should not be a precondition to the effectiveness of the registration but rather should result in only a nominal penalty and liability to compensate the grantor for any actual damage caused by the non-compliance.]

Section D. Amendments and cancellations

Article 17. Right to register an amendment or cancellation notice

54. Article 17 is based on recommendations 73 of the Secured Transactions Guide (see chap. IV, paras. 110-116) and 19, subparagraph (a), of the Registry Guide (see paras. 150 and 225-244). Paragraph 1 gives the person identified in an initial notice as the secured creditor the right to register a related amendment or cancellation notice at any time (this right is given to the registrant as the Registry cannot know or have to determine the identity of the actual secured creditor). Paragraph 2 provides that after an amendment notice changing the secured creditor identifier has been registered, only the new secured creditor is entitled to register an amendment or cancellation notice. If more than one amendment has been registered, only the person identified in the latest registered notice has the right to register an amendment or cancellation notice. It should be noted that article 17 should be read in combination with the discussion of article 22 below on the effectiveness of a registered amendment or cancellation notice not authorized by the secured creditor.

Article 18. Information required in an amendment notice

55. Article 18 is based on recommendation 30 of the Registry Guide (see paras. 221-224; the Secured Transactions Guide does not contain an equivalent recommendation). Paragraph 1 provides that an amendment notice must contain in the designated field the registration number assigned by the Registry to the initial notice to which the amendment relates. This ensures that the amendment will be associated in the registry record with the initial notice so as to be retrieved and included in a search result (see arts. 23, subpara. (b), and 29, para. 1, below).

56. Paragraph 2 makes it clear that an amendment notice may relate to more than one item of information in a registered notice. That is to say, a registrant need register only one amendment notice even if it wishes, for example, to add both a description of new encumbered assets and a new grantor. It follows that the form of amendment notice prescribed by the Registry must be designed to enable a registrant to change any and all items of information in an initial notice using that form (see Registry Guide, Annex II, Examples of registry forms, amendment notice form).

Article 19. Global amendment of secured creditor information

57. Article 19 is based on recommendation 31 of the Registry Guide (see para. 242; the Secured Transactions Guide does not contain an equivalent recommendation). It addresses the scenario where there is a change in the identifier or address or both of the person identified in multiple registered notices as the secured creditor. Its purpose is to make it possible for the person identified in multiple registered notices as the secured creditor (option A) or for the Registry on the application of that person (option B) to register a single global amendment notice. The secured creditor's name and/or, address may change either as

a result of a name or address change (e.g. merger with another company), or as a result of an assignment of the secured obligation.

58. As provided in article 18, the amendment must contain in the relevant field the registration number and the new name, address or both. In addition, as provided in article 29, subparagraph 2(b), the Registry must organize the registry record in a manner that enables the retrieval of all registered notices according to secured creditor identifier. Moreover, as provided in article 6, paragraph 2, a person that submits a global amendment notice or requests the Registry to make such a global amendment must satisfy the secured access requirements to be specified by the enacting State. This should reduce the risk of the registration of unauthorized global amendments.

Article 20. Information required in a cancellation notice

59. Article 20 is based on recommendation 32 of the Registry Guide (see paras. 243 and 244; the Secured Transactions Guide does not contain an equivalent recommendation). It requires a cancellation notice to contain in the designated field the registration number assigned by the Registry under article 29, paragraph 1, to the initial notice to which the cancellation relates. The registration number is the only item of information required to be included in a cancellation notice form (see Registry Guide, Annex II, example of cancellation notice form).

60. As already noted (see paras. 55 above and 100 below), the purpose of assigning a registration number to an initial notice is to ensure that all related amendment and cancellation notices are associated in the registry record with the initial notice. This ensures that the effect of the registration of a cancellation notice extends to the information in all registered notices containing that number. To minimize the risk of inadvertent cancellations, the prescribed cancellation notice form should be designed to include a note alerting the secured creditor to the legal consequences of a cancellation (see Registry Guide, Annex II, example of cancellation notice form; for the effectiveness of a cancelation notice not authorized by the secured creditor, see paras. 66-72 below).

Article 21. Compulsory registration of an amendment or cancellation notice

61. Article 21 is based on recommendations 72 of the Secured Transactions Guide (see paras. 260-263) and 33 of the Registry Guide (see paras. 260-263). It should be read in conjunction with article 3, which requires the person identified as the grantor in a registered notice to authorize its registration.

62. Paragraph 1 obligates the secured creditor to register an amendment notice, if the information in a registered notice exceeds the scope of the grantor's authorization. This is the case, for example, where the description of the encumbered assets in the registered notice is broader than that included in the security agreement and the broader description is not otherwise authorized (see subpara. 1(a)). An amendment notice must also be registered if the security agreement to which a registered notice relates has been revised so as to make the information in the registered notice excessively broad and the grantor has not otherwise authorized the revised registered notice. For example, the parties have agreed to delete certain assets from the description of the encumbered assets in the original security agreement (see subpara. 1(b)). States that implement article 9, subparagraph (c), will also need to include in subparagraph 1(b) a requirement for the registration of an amendment notice in the case of a reduction of the maximum amount for which the security right may be enforced.

63. Paragraph 2 obligates the secured creditor to register a cancellation notice where the registration of an initial notice was not authorized by the grantor or the grantor has withdrawn its authorization and no security agreement has been entered into between the parties (see subparas. 2(a) and 2(b)). A cancellation notice must also be registered, if the obligation secured by the security right to which the registered notice relates has been extinguished. It should be noted that, under article 11bis, a security right is extinguished upon full payment or other satisfaction of the secured obligation[, provided that there is no further commitment by the secured creditor to extend any further secured credit (see subpara. 2(c)). Paragraph 3 provides that the secured creditor may not charge any fee for complying with its obligation[, except if …].

64. Normally a secured creditor will comply with its obligation under paragraphs 1 and 2 within a short period of time after it became aware that any of the relevant conditions were met. In the event it does not, any liability of the secured creditor is left to the law of the enacting State on liability for violations of statutory obligations. However, to protect the grantor, paragraph 4 gives the grantor the right to send at any time (i.e. without having to wait for the secured creditor to comply) a formal written request. If the secured creditor does not comply with the grantor's request within the time period specified by the enacting State, paragraph 5 contemplates that the enacting State will need to establish a summary judicial or administrative procedure and identify the relevant court or other authority to enable the grantor to seek an order compelling registration of the appropriate notice. Depending on local institutional considerations, the enacting State may decide to use an existing administrative or judicial summary procedure or it may decide to set up a special new procedure administered, for example, by the Registrar or registry staff. As noted in the Registry Guide (see para. 262), the process should be speedy and inexpensive while also incorporating appropriate safeguards to protect the secured creditor against an unwarranted demand by the grantor (for example, through a requirement to notify the secured creditor of a demand submitted to the relevant authority).

65. Once an order for registration has been issued pursuant to the procedure established by the enacting State under paragraph 5, paragraph 6 contemplates that the appropriate notice must be registered by the Registry upon receipt of a copy of the order (option A), or by the judicial or administrative officer who issued the order upon presenting a copy of the order to the Registry (option B). Where the officer charged by the enacting State with administering the process is the Registrar or a member of the Registry staff, it would be sufficient for the enacting State to simply provide that the Registry may make the relevant registration upon its issuance of the order.

Article 22. Amendment or cancellation notices not authorized by the secured creditor

66. Article 22 is a new provision and is not based on a recommendation of the Secured Transactions Guide or the Registry Guide. However, the options set out in article 22 are based on the discussion of the matter in the Registry Guide (see paras. 249-259). Article 22 addresses the effectiveness of a registered amendment or cancellation notice where the registration was not authorized by the secured creditor. An unauthorized registration may occur, for example, as a result of fraud or error by a third party, or even a member of the registry staff (for corrections of errors by the Registry, see art. 32). The issue is whether conclusive effect should be given to the registered notice in a priority competition with a competing claimant.

67. Under option A, the registration of an amendment or cancellation notice is effective regardless of whether or not it is authorized by the person identified as the secured creditor in the registered notice to which the amendment or cancellation relates. If a State adopts this approach, it would need to put in place security procedures in order to limit the risk of unauthorized registrations (see art. 6, para. 2).

68. Option B is a variation of option A in the sense that it places an important qualification on the extent of the effectiveness of an unauthorized amendment or cancellation. The priority of the security right to which the unauthorized registration relates is preserved as against the right of a competing claimant over whom it would have had priority but for the registration. This qualification is predicated on the theory that, to award priority to a competing claimant that would have been subordinated but for the unauthorized registration, would result in an unjustified windfall. The words in square brackets in option B are directed at the scenario where the competing claimant is a secured creditor that acquired its security right under a security agreement that was entered into before the unauthorized registration of the cancellation or amendment notice but that only made its security right effective against third parties after the unauthorized registration. The competing claimant in this scenario would have been subordinated at the time of the unauthorized registration, since it had not yet made its right effective against third parties.

69. If a State decides to adopt option A or option B, it would need to implement option B of article 31 below, which obligates the Registry to remove information in a registered notice

from the public registry record, and archive it, upon the expiry of its period of effectiveness or upon registration of a cancellation notice.

70. Option C is at the opposite end of the spectrum from option A. It provides that an unauthorized registration or cancellation is ineffective, unless authorized by the secured creditor. Under this approach, a third party would need to conduct off-record inquiries to verify whether the registration of a cancellation or amendment notice which purported to terminate a security right in an asset in which it wishes to acquire rights had in fact been authorized by the secured creditor.

71. Option D is a variation of option C in the sense that it places an important qualification on the general rule in option C. It provides that the unauthorized registration is nonetheless effective as against a competing claimant whose right was acquired in reliance on a search of the registry record made after the registration of the amendment or cancellation notice, and who did not have knowledge that the registration was unauthorized at the time it acquired its right. This qualification differs from the qualification in option B above insofar as it requires the competing claimant that would have priority if the registration were treated as effective to provide factual evidence that it actually searched and relied on the registry record prior to acquiring its right.

72. If a State decides to adopt option C or option D (that is, an "open drawer system), it would need to implement option B of article 31 below, which obligates the Registry to remove information in a registered notice from the public registry record, and archive it, only upon the expiry of its period of effectiveness. The cancellation notice and the registered notices to which it relates would need to remain in the public registry record in order for searchers to know whom they should contact to verify whether the cancellation was authorized.

[*Note to the Working Group: The Working Group may need to consider what constitutes an unauthorized registration (at least for States that adopt option A or B). In this regard, the Working Group may wish to note that it is not uncommon for secured creditors to delegate authority to register amendments or cancellations to third-party service providers. In this context the question arises whether, if the third party erroneously or inadvertently registers an amendment or cancellation notice, this would constitute an unauthorized registration. Similarly, the question arises whether, if the third party acts maliciously or fraudulently, this would be an unauthorized registration or the secured creditors should bear the risk of dishonesty by third parties they authorize to effect registrations on their behalf*.]

Section E. Searches

Article 23. Search criteria

73. Article 23 is based on recommendation 54, subparagraph (h), of the Secured Transactions Guide (see chap. IV, paras. 31-36) and 34 of the Registry Guide (see paras. 264-265). It sets out the two criteria according to which any person may conduct a search of the public registry record.

74. Under subparagraph (a), the first and principal search criterion is the identifier of the grantor. The identifier of the grantor is its name, determined according to the rules set out in article 10. If an enacting State decides to require "additional information" to be entered in a separate field to assist in uniquely identifying a grantor, this additional information does not constitute an alternative search criterion (see art. 9, subpara. (a)). Rather it will simply appear as additional information in a search result.

75. Under subparagraph (b), the registration number assigned to the initial notice under article 29, paragraph 1, constitutes an alternative search criterion. A search by registration number gives secured creditors an efficient means of identifying and retrieving a registered notice for the purposes of registering an amendment or cancellation notice. However, searches by registration number generally will not be conducted by third parties as they typically will not know the relevant registration number.

76. If the enacting State provides for the entry of the serial number of an asset in a separate designated field (see para. 40 above), entry of this serial number in its own designated field in the initial or amendment notice is required in the sense of being necessary to achieve the third-party effectiveness and priority of the security right as against specified classes of competing third-party claimants. If a State decides to adopt this approach, it would need to list the serial number of the asset as an additional search criterion in this article. It would also need to deal with a number of issues, including what constitutes the correct serial number, design the registry system so that registered notices can be searched and retrieved by serial number and third-party effectiveness and priority by serial number registration (see Registry Guide, para. 266).

77. To allow the registration of global amendment notices, as provided in article 17, the Registry must organize the registry record to permit registered notices to be identified and retrieved by reference to the relevant secured creditor. However, for public policy reasons relating to privacy and confidentiality, the name or other identifier of the secured creditor should not be an available criterion for general public searching (see Secured Transactions Guide, chap. IV, para. 81 and Registry Guide, para. 267).

Article 24. Search results

78. Article 24 is based on recommendation 35 of the Registry Guide (see paras. 268-273; the Secured Transactions Guide does not contain an equivalent recommendation). Paragraph 1 sets out the required content of search results provided by the Registry in response to a search request. The search result must first indicate the date and time when the search was performed.

79. No reference is made to a "currency date" indicating that the search result includes only information contained in notices that were registered as of that date (as opposed to the actual date of the search result). The reason is that registration becomes effective when the information in a notice submitted to the Registry has been entered into the registry record so as to be accessible to searchers (see art. 14, para. 1). Thus, the "currency date" is the actual date of the search (see Registry Guide, para. 273).

80. With respect to the substantive content of the search result, paragraph 1 contemplates that an enacting State may enact one of two options. The difference between the two options is whether the system should be designed to retrieve notices that match the search criterion (grantor name or registration number) exactly or the grantor name closely (close matches do not apply to registration numbers). What constitutes a "close match" under option B of paragraph 1 is not a free-floating concept but rather depends on the current close-match search programme or logic adopted by the enacting State.

81. Options A and B should be read in conjunction with article 25, paragraph 1, which provides that an error in the grantor identifier entered in a notice does not render the registration of the notice ineffective if the notice would be retrieved by a search of the registry record using the grantor's correct identifier as the search criterion. The result of applying this test differs depending on whether option A or B of article 24, paragraph 1, is adopted. If option A is adopted, a registration is ineffective if the registrant fails to enter the correct name of the grantor in the notice. But if option B is adopted, the registration of a notice that contains an error in the grantor's name would still be effective as long as the name that is entered is a sufficiently close match to result in the notice being retrieved on a search using the grantor's correct name.

82. Paragraph 2 obligates the Registry to issue an official search certificate setting out a search result on the request of a searcher. Paragraph 3 minimizes the administrative burden on the Registry in this respect by providing that a search certificate may take the form of a printed search result issued by the Registry. Paragraph 3 also facilitates the use of search results by providing that they are proof of their contents in the absence of evidence to the contrary.

Section F. Errors and post-registration changes

Article 25. Registrant errors in required information

83. Article 25 is based on recommendations 58 and 64-66 of the Secured Transactions Guide (see chap. IV, paras. 66-74, and 82-97) and 29 of the Registry Guide (see paras. 205-220). Its overall aim is to provide guidance on when the effectiveness of a registration may be challenged owing to errors or omissions in the information in registered notices.

84. Paragraph 1 addresses errors in the grantor identifier set out in a registered notice. It provides that: (a) if the registrant enters the name of the grantor in accordance with article 10 above, the effectiveness of the registration cannot be challenged on the ground of an error in the grantor name; and (b) if the registrant makes an error, the registration may still be effective if the notice would be retrieved by a search using the correct grantor identifier.

85. Paragraph 4 deals with errors or omissions in the other items of information required to be set out in registered notices under article 9, subparagraphs (a)-(c). It provides that an error does not make a registration ineffective unless it "would seriously mislead a reasonable searcher." This language implies an objective test in the sense that a person challenging the registration need not show that any person was actually misled by the error. It is sufficient to show that a reasonable person hypothetically would have been misled.

86. Paragraphs 3 and 5 incorporate the general legal concept of severability. A fatal error in entering the name of a particular grantor or the description of a particular encumbered asset does not make the registration of a notice ineffective with respect to other grantors correctly identified or other encumbered assets correctly described in a registered notice.

87. Paragraph 6 creates a special test for assessing the impact of errors made by a registrant in two instances. The first arises where an enacting State allows a registrant to self-select the period (duration) of effectiveness of the registration of a notice pursuant to options B or C of article 15 (and art. 9, subpara. (d)). The second arises where the enacting State requires a registrant to indicate the maximum sum for which a security right may be enforced pursuant to article 9, subparagraph (e). In these two cases, an error in the entry of the information does not render a registration ineffective even if the error would be seriously misleading from the perspective of an abstract reasonable searcher. Rather, the registration will be treated as ineffective only as against, and only to the extent that, the competing claimant that challenges the effectiveness of the registration shows that it was personally misled by the error (see Registry Guide, paras. 215 and 217-220). This approach may give rise to circular priority problems.

88. As observed in the commentaries on articles 12 and 23 above, some States provide for the entry of an alphanumerical asset identifier for specified classes of high-value assets that have a significant resale market. In States that adopt this approach, entry of this identifier in its own designated field in the initial notice is required in the sense of being necessary to achieve the third-party effectiveness and priority of the security right as against specified classes of competing third-party claimants. States that decide to adopt this approach would need to deal with the impact of errors in the serial number on the effectiveness of a registration. They may also wish to consider whether to provide for search results to disclose close matches.

[*Note to the Working Group, the Working Group may wish to consider the following text of paragraph 1 of article 25 for States that adopt option A of article 24, paragraph 1:*

> *"An error in a grantor identifier in a registered notice does not render the registration of the notice ineffective if the information in the notice would be retrieved as an exact match by a search of the registry record using the grantor's correct identifier as the search criterion."*

The Working Group may also wish to consider the following text of paragraphs 1 and 2 of article 25 for States that adopt option B of article 24, paragraph 1:

> *"1. An error in a grantor identifier in a registered notice does not render the registration of the notice ineffective if the information in the notice would be retrieved*

as an exact match by a search of the registry record using the grantor's correct identifier as the search criterion.

"2. An error in the grantor identifier in a registered notice does not render the registration of the notice ineffective if:

(a) The notice would be retrieved as a close match by a search of the registry record using the grantor's correct identifier as the search criterion, and

(b) The error would not seriously mislead a reasonable searcher."

The Working Group may also wish to consider the words "except to the extent in seriously misled third parties that relied on the information set out in the notice, as third parties may not be misled or prejudiced (see Registry Guide, paras. 215 and 217-220).]

Article 26. Post-registration change of the grantor's identifier

89. Article 26 is based on recommendation 61 of the Secured Transactions Guide (see chap. IV, paras. 75-77; see also Registry Guide, paras. 226-228). It addresses the impact of a post-registration change in the identifier of the grantor (i.e. its name under art. 10) on the effectiveness of the registration of a notice. It follows that, if the grantor's name changes after the registration of a notice, a search under the new name will not retrieve registered notices in which the grantor is identified by its old name. This poses a risk for third parties that acquire rights in the grantor's encumbered assets after the name change.

90. To address this risk, paragraph 1 gives the secured creditor a grace period (the duration of which is to be specified by the enacting State) to register an amendment notice adding the new name of the grantor. If the amendment notice is registered before the expiry of the grace period, the security right retains whatever priority it otherwise would have as against competing claimants, even if their rights arise after the change of name but before the registration of the amendment notice.

91. Under paragraph 2, the secured creditor may still register an amendment notice after the expiry of the grace period. However, its security right will be subordinated to an intervening security right that is made effective against third parties after the change of name but before the amendment notice is registered (see subpara. 2(a)). In addition, buyers, lessees or licensees who acquire rights in the encumbered assets after the change of name but before the registration of the amendment notice take free of the security right (see subpara. 2(b)).

92. As against competing claimants other than those specifically protected by subparagraph 2(b), the third-party effectiveness and priority of the security right is not prejudiced by the late registration of the amendment notice or the failure of the secured creditor to register an amendment notice altogether. Thus, the secured creditor will retain whatever priority it had against competing claimants whose rights arose before the change of name. Its rights are also preserved as against competing claimants whose rights arise after the change of name that are not specifically mentioned in paragraph 2 (for example, the grantor's insolvency representative).

Article 27. Post-registration transfer of an encumbered asset

93. Article 27 is based on recommendation 62 of the Secured Transactions Guide (see chap. IV, paras. 78-80; see also Registry Guide, paras. 229-232). It addresses the impact of a post-registration transfer of an encumbered asset on the effectiveness of the registration of a notice in relation to a security right in that asset. In principle, the transferee will acquire its right subject to the security right to which the registered notice relates (see art. 29, para. 1). This creates a risk for third parties that acquire rights in the encumbered asset from the transferee: a search of the registry record by the third party under the name of the transferee will not retrieve registered notices in which the grantor is identified as the transferor. This risk is analogous to that addressed in article 26 above in relation to post-registration changes in the grantor's identifier, but, unlike article 26, article 27 does not provide a uniform rule. Rather, it gives enacting States the option to enact any one of three approaches.

94. The approach in paragraphs 1 and 2 of option A is identical to that set out in article 26 for post-registration changes in the grantor's identifier. It gives the secured creditor a grace

period (the duration of which is to be specified by the enacting State) to register an amendment notice adding the transferee as a new grantor. As under article 26, the secured creditor's failure to register the amendment notice before the expiry of the grace period, or at all, does not generally prejudice the third-party effectiveness and priority status of its security right. However, its security right will be subordinated to competing security rights acquired and made effective against third parties after the encumbered asset was transferred, leased or licensed, and before the amendment notice was registered. Transferees that acquire rights during this same period also will take free of the security right.

95. Paragraph 1 of option B is similar to paragraph 1 of option A, with the important qualification that the grace period to register the amendment notice begins (not when the secured creditor acquires knowledge that the grantor has transferred the encumbered asset, as under paragraph 1, option A), but when the transfer takes place.

96. Paragraph 3 of options A and B implement recommendation 244 of the Intellectual Property Supplement. The reason for this different approach with respect to intellectual property is that, if the secured creditor would have to register an amendment notice each time intellectual property was transferred or licensed (to the extent that an exclusive licence is treated as a transfer under intellectual property law), intellectual property financing would be discouraged or become more expensive (see Intellectual Property Supplement, paras. 158-166).

97. Under paragraph 4 of options A and B (and paragraph 2 of option C), in the case of successive transfers of encumbered assets, article 27 applies to the last transfer. So, for example, where the encumbered assets are transferred from A to B, from B to C and from C to D, article 27 applies to the transfer from C to D and thus the secured creditor meant is the secured creditor of C.

98. Under paragraph 1 of option C, registration of the amendment notice is optional in the sense that the failure to register does not affect the third-party effectiveness or priority of the security right as against intervening competing claimants. This approach parallels the approach to post-registration transfers of encumbered intellectual property.

Section G. Organization of the Registry and the registry record

Article 28. Appointment of the registrar

99. Article 28 is based on recommendation 2 of the Registry Guide (see para. 74; the Secured Transactions Guide does not contain an equivalent recommendation). Recognizing that these matters may be dealt with differently in each State, article 28 leaves it to the enacting State to specify the authority responsible for the appointment, dismissal and supervision of the registrar. It also leaves it to the authority specified by each enacting State to determine the registrar's duties in the relevant law, decree, regulation or similar act.

Article 29. Organization of information in registered notices

100. Article 29 is based on recommendations 15 and 16 of the Registry Guide (see paras. 127-130; the Secured Transactions Guide did not include an equivalent recommendation). Paragraph 1 requires the Registry to assign a unique registration number to an initial notice and associate all registered amendment or cancellation notices that contain that number with the initial notice in the registry record. These requirements aim to ensure that amendment and cancellation notices are linked to an initial notice in the registry record so as to be retrievable on a search (see arts. 18, 20 and 23).

101. Option A of paragraph 2 is offered for States that implement option A of article 24, paragraph 1. Option B of paragraph 2 is offered for States that implement option B of article 24, paragraph 1. Option A of paragraph 3 is offered for States that implement option A of article 19, above. Option B of paragraph 3 is offered for States that implement option B of article 19 above.

102. Paragraph 3 is intended to ensure that the entire registration record relating to an initial notice remains intact. It provides that the registry record must be organized in a manner that preserves the information in all registered notices, notwithstanding the registration of

amendment or cancellation notices that purport to change the information contained in the initial notice.

103. The enacting State will need to revise article 27 to impose additional organizational obligations on the Registry should it decide to provide for: (a) registration and searching according to serial number (see the commentary on arts. 12 and 23); (b) registration and searching according to a grantor identifier other than the name of the grantor (see paras. 40 and 76); and (c) the assignment of unique confidential numbers to secured creditors on the registration of an initial notice, and to require registrants to enter this number as a precondition to the registration of related amendment or cancellation notices (see paras. 22, 58 and 67 above).

Article 30. Integrity of information in the registry record

104. Article 30, paragraph 1, is based on recommendation 17, subparagraph (a), of the Registry Guide (see para. 136; the Secured Transactions Guide does not contain an equivalent recommendation). It prohibits the Registry from unilaterally amending or removing information in the registry record except as authorized in articles 31 and 32 below.

105. Article 30, paragraph 2, is based on recommendations 55, subparagraph (f), of the Secured Transactions Guide (see chap. IV, para. 54), and 17, subparagraph (b), of the Registry Guide (see para. 137). It obligates the Registry to ensure that the information in the registry record is preserved and may be reconstructed in the event of loss or damage. In practice, this obligation requires the registry to create and maintain a backup copy of the registry record.

Article 31. Removal of information from the public registry record and archival

106. Option A of article 31 is based on recommendations 74 of the Secured Transactions Guide (see chap. IV, para. 109), and 20-21 of the Registry Guide (see paras. 151-152). It requires the Registry to remove information in registered notices from the public registry record once the period of effectiveness of the notice expires or a cancellation notice is registered. If the information in "cancelled or expired notices remained publicly searchable, this might create legal uncertainty for third-party searchers, potentially impeding the ability of the grantor to grant a new security right in or deal with the assets described in the notice" (see Registry Guide, para. 151).

107. Option B of article 31 is a new provision that has been inserted to implement the "open drawer approach", in the context of which all information in the registry record is available to searchers and the Registry is given no authority to do anything but accept, retain and disclose all information (see art. 22, options C and D).

108. Paragraph 2 requires the Registry to archive the information in registered notices removed from the pubic registry record under paragraph 1 in a manner that enables the information to be retrieved by the Registry in accordance with article 29. This is necessary since the information in "expired or cancelled notices may need to be retrieved in the future, for example, in order to determine the time of registration or the scope of the encumbered assets described in the notice for the purposes of a subsequent priority dispute between the secured creditor and a competing claimant" (see Registry Guide, para. 151).

109. As to the duration of the registry's archival obligation, paragraph 2 leaves this decision to the enacting State (while cautioning that it should minimally be coextensive with the prescription period under local law for disputes arising from a security agreement).

[Article 32. Correction of errors by the Registry]

[*Note to the Working Group: The Working Group may wish to note that the commentary on article 32 will be prepared once article 32 has been considered by the Working Group*.]

Article 33. Limitation of liability of the Registry

110. Article 33 is based on recommendation 56 of the Secured Transactions Guide (see chap. IV, paras. 55-64; see also Registry Guide, paras. 141-144).

111. Subparagraph (a) of option A is intended to leave the issue of the liability of the Registry (or the enacting State) for loss or damage to other law of the enacting State and, if liability is foreseen by that other law, to limit that liability to the types of errors or omissions listed in option A (which may be covered by a compensation fund that the Registry (or the enacting State) may wish to establish and pay from the registry fees). Subparagraph (b) is intended to cover the liability of the Registry in entering or failing to enter in the registry record information submitted by a registrant in a paper notice form. It is not intended to address any liability of the Registry for entering or failing to properly or completely enter information in the registry record directly submitted by a registrant electronically, since it may be impossible or very difficult for the registrant to prove that this was due to the fault of the Registry as opposed to the registrant's own error or omission. Subparagraph (c) is intended to address and limit any liability that the Registry may have under other law for loss or damage caused by a failure of the Registry to send a copy of the registered notice to the secured creditor that can then verify the accuracy and completeness of the information. Subparagraph (d) is intended to limit any liability that the Registry may have under other law for loss or damage caused by false or misleading information provided by the Registry to registrants or searchers.

112. Option B of article 33 is intended to leave any liability that the Registry (or the enacting State) may have for loss or damage caused by an error or omission in the administration or operation of the Registry to other law, and to limit it to an amount to be specified by the enacting State. Option C of article 33 is intended to exclude any liability of the Registry (or the enacting State) for an error or omission in the administration or operation of the Registry.

Article 34. Registry fees

113. Article 34 is based on recommendations 54, subparagraph (i), of the Secured Transactions Guide (see chap. IV, para. 37) and 36 of the Registry Guide (see paras. 274-280).

114. One of the key objectives of an effective and efficient secured transactions law is to enhance certainty and transparency by providing for registration of a notice in a general security rights registry (see Secured Transactions Guide, rec. 1, subpara. (f)). This objective cannot be achieved if the Registry is used as an opportunity to generate revenue, as borrowers in low-value transactions will not be able to bear the cost of registration, and borrowers in high-value transactions will be discouraged to use the Registry. Accordingly, the Secured Transactions Guide, recommends that registry fees, if any, should be set a cost-recovery level to encourage registrants and searchers to use the registry services. Following the same policy, the Registry Guide, sets forth in an indicative way three options, namely a cost-recovery option, a no-fee or fee-below cost-recovery option and an option leaving fees to be determined, in one of the two other options, not in the regulation, but in a decree to be enacted later (see Registry Guide, paras. 274-280, and rec. 36).

115. In line with the above-mentioned considerations, two options are presented in article 34. There may be other options and, in particular, a fee structure might distinguish between electronic and paper use of the registry, where the fee differential might be designed to stimulate electronic use rather than paper use in an enacting State that offers both. Irrespective of the option a State chooses to implement, it may wish to provide that the Registry may enter into an agreement with a person to establish a Registry user account to facilitate the payment of fees and the identification of the registrant. Similarly, irrespective of the option it decides to adopt, the enacting State may wish to specify the Registry fees in its registry related act and allow the administrative authority supervising the Registry (e.g. a ministry or the central bank) to modify the fees and methods of payment by decree. This may be necessary, for example, if experience shows that one or the other fee is too low or too high, or that the method payment initially chosen is not sufficiently time- or cost-efficient. Another variant of this approach is to leave the determination or modification of Registry fees to the administrative authority supervising the Registry.

116. Option A provides for fees for all Registry services but only at a cost-recovery level or lower. This cost-recovery option has several variants, including the following. One variant is to limit fees to registration services and to provide that all searching services are free of

charge. The advantage of this variant is that it will encourage and facilitate the due diligence that potential financiers have to do and reduce risks and disputes. Another variant is to limit fees to the registration of an initial notice and to provide that the registration of any subsequent notice and searching services are free of charge. This variant has the benefit of ensuring that the enacting State will receive the revenue that it desires to derive at the earliest time. In addition, this variant will remove fee issues from, and thus simplify, all subsequent transactions and searches. Moreover, this variant will encourage registrants to register cancellation notices and relieve grantors from incurring time and expense to initiative proceedings to force cancellations or amendments. Another variant for States that enact option B or C of article 15 (allowing a registrant to select the period of effectiveness) is to charge fees on a sliding scale, depending on the period selected by the registrant in an initial notice and any amendment notice that extends the period of effectiveness of a notice. This approach has the advantage of discouraging registrants from entering an inflated period in a notice out of an excess of caution (see Registry Guide, para. 277).

117. Option B is based on the assumptions that: (a) according to best practices, registries in the future will most likely be all electronic, and thus the cost of their establishment and operation should be minimal; and (b) that cost should be borne by the State, as the Registry is a key component of the public purpose of a modern secured transactions law to enhance the availability of more credit at lower cost and with greater speed and efficiency, and not simply a private benefit for grantors and secured creditors. Like option A, option B also has several variants. One variant is to offer free registration services for a limited start-up period in order to encourage acclimatization to and use of the registry system. Another variant is to charge no fee only for certain types of services (e.g., the registration of an amendment and cancellation notice, or for searching services, the registration of a notice aimed at restoring an erroneously cancelled notice or for registration of a notice aimed at preserving third-party effectiveness achieved by registration in a registry operating under prior law).

Note by the Secretariat on a draft guide to enactment of the draft model law on secured transactions

ADDENDUM

Contents

Chapter V. Priority of a security right

A. General rules

Article 27. Competing security rights

1. Article 41 is based on recommendation 76 of the Secured Transactions Guide (see chap. V, paras. 45-54). It refers to third-party effectiveness (which requires creation and a third-party effectiveness act), while advance registration (i.e. registration before the creation of the security right or conclusion of the security agreement and thus before third-party effectiveness is achieved) is addressed in article 28.

2. As a general matter, priority between competing security rights is determined by the order in which the security rights became effective against third parties. Most often, third-party effectiveness of a security right created in accordance with the provisions of chapter II will be achieved by registration of a notice in the security rights registry (see art. 16). However, as detailed in chapter III, there are several other methods of achieving third-party effectiveness, the applicability of which depends on the nature of the encumbered asset and the secured transaction.

3. Notwithstanding the variety of acts that may achieve third-party effectiveness, however, the general rule in paragraph 1 determines priority unless one of the special rules in articles 28-37 is applicable. Thus, subject to those articles, paragraph 1 determines priority between competing security rights that were created by the same grantor and made effective against third parties by registration of a notice (i.e. where, for example, Grantor A creates a security right in its equipment favour of secured creditor ("SC") 1 and then another security right in favour of SC 2). It also determines priority when one or both of the competing security rights were made effective against third-parties by another means.

4. Paragraph 2 is a new provision dealing with competing security rights created by different grantors (i.e. where, for example, Grantor A creates a security right in its equipment in favour of SC 1 and then transfers it to Transferee B who creates a security right in favour of SC 2). Under paragraph 2, priority is determined on the basis of the order of third-party effectiveness, provided that the secured creditor (SC 1) registers an amendment notice indicating the identifier of the transferee within a short period of time after the secured creditor becomes aware of the transfer or after the transfer (see art. 27, options A and B, of [the registry-related provisions]).

5. Paragraph 3 addresses situations in which there has been a change in the method of third-party effectiveness. This may happen, for example where a secured creditor in possession of the encumbered asset returns possession of it to the grantor after registering a notice with respect to it in the security rights registry. In such a case, the priority of the security right is determined by the time at which the security right was first effective against third parties so long as there was no time thereafter during which the security right was not effective against third parties.

6. Paragraph 4, which is based on recommendation 100 of the Secured Transactions Guide (see chap. V, paras. 144-150), is of particular economic importance because the security right whose priority is being determined will often be a security right in proceeds of the original encumbered asset. This is quite common when the original encumbered asset is inventory or a receivable inasmuch as the grantor frequently sells the inventory or collects the receivable before satisfaction of the obligation secured by the encumbered asset. In such a case, the security right continues in the proceeds as provided in article 10 and the security right in the proceeds is effective against third parties if the conditions in article 17 are satisfied. If those conditions are satisfied, under paragraph 4 the security right in the proceeds has the same priority as the security right in the original collateral. The rule in paragraph 4 is, however, limited by the special rule on the priority of security rights in proceeds of acquisition security rights in article 37.

7. Paragraphs 5-8 address priority issues resulting from situations in which one or both of the competing security rights is a security right that continued to a mass or product because the original encumbered asset was commingled in that mass or product (see Secured Transactions Guide, paras. 117-124).

[*Note to the Working Group: The Working Group may wish to consider whether illustrations of the operation of paragraphs 5-8 would be helpful*.]

Article 28. Competing security rights in the case of advance registration

8. Article 28 qualifies article 27, paragraph 1. While a security right cannot be effective against third parties unless it has been created in accordance with the provisions of chapter II, it is possible to register a notice in the Registry before the security right has been created. In such a case, article 28 provides that the priority of that security right as against other security rights is determined by the time of registration rather than the time of third-party effectiveness.

9. When combined with article 27, paragraph 1, article 28 creates a rule that brings about the following results: (a) as between security rights that were made effective against third parties by registration of a notice, priority is determined by the order of registration, regardless of the order of creation of the security rights; and (b) as between a security right that was made effective against third parties by registration and a security right that was made effective against third parties otherwise than by registration, priority is determined by the order of registration or third-party effectiveness, whichever occurs first. In both cases, when a security right has been the subject of a notice that was registered before the security right was created, it is the time of registration rather than the later time of third-party effectiveness that is used to determine priority.

10. To illustrate this rule, assume that: (a) on Day 1, Grantor authorizes SC 1 to register a notice listing Grantor as the grantor and describing the encumbered assets as all present and future equipment of Grantor and SC 1 registers the notice; (b) on Day 2, Grantor borrows money from SC 2 and grants SC 2 a security right in all of Grantor's present and future equipment, and SC 2 registers a notice with respect to this security right; and (c) on Day 3, Grantor borrows money from SC 1 and grants SC 1 a security right in all of Grantor's present and future equipment. In this case, the security right of SC 2 became effective against third parties before the security right of SC 1 (because a security right cannot be effective against third parties until it is created). Yet, as a result of article 28, the priority of SC 1's security right is determined by the time of registration of its notice. Thus, SC 1 will have priority over SC 2 because SC 1's registration of the notice (on Day 1) occurred before the security right of SC 2 became effective against third parties.

11. This rule is beneficial for two reasons. First, as a result of this rule, the priority date for security rights that are made effective against third parties by the registration of a notice will always be determined by the time of registration. The time of registration is maintained by the Registry and is, therefore, easy to demonstrate and easy to search. By way of contrast, the creation of a security right is a private event between the grantor and the secured creditor; the time of creation is not maintained by the Registry and is not publicly available and may be difficult to establish.

12. Second, the results that follow from the application of the rule in this article are consistent with the behaviour of prudent secured creditors. For example, assume that SC 2 is considering extending credit to Grantor, secured by a security right in an item of Grantor's equipment. If SC 2 searches the records of the Registry and discovers that a notice has been registered listing Grantor as the grantor and SC 1 as the secured creditor and indicating that the encumbered asset is the same item of equipment, SC 2 will not know whether SC 1 has a security right or, rather, has registered a notice before creation of the security right. In such a situation, SC 2 would likely make the conservative assumption that the registered notice reflects an existing security right and, accordingly, if SC 2 decides to go forward with the transaction, it will be with the understanding that its rights are subordinate to that of SC 1. The rule in this article is consistent with the behaviour of SC 2.

[*Note to the Working Group: The Working Group may wish to note that, depending on the decision of the Working Group with respect to the contents of this article, the commentary may need to be revised*.]

Article 29. Rights of buyers or other transferees, lessees or licensees of an encumbered asset

13. Article 29 is based on recommendations 79-82 of the Secured Transactions Guide (see chap. V, paras. 60-89). It addresses situations in which the encumbered asset is sold or otherwise transferred, leased or licensed, and determines the rights of the buyer or other transferee, lessee or licensee vis-à-vis the security right.

14. The general rule, which is stated in paragraph 1 and is subject to important exceptions stated in paragraphs 2-6, is that a security right in an encumbered asset that is effective against third parties continues to encumber the asset notwithstanding the sale or other transfer, lease or license of the encumbered asset.

15. The article provides two types of exceptions to the general principle stated in paragraph 1. Paragraphs 2 and 3 provide exceptions based on the actions of the secured creditor, while paragraphs 4-6 provide exceptions based on the nature of the sale or other transfer, lease or licence and the knowledge of the buyer or other transferee, lessee or licensee.

16. Paragraphs 2 and 3 both give effect to authorizations of the secured creditor that protect the buyer or other transferee, lessee or licensee. The most common circumstances in which a secured creditor authorizes such a result are those in which the transaction will generate payment to the grantor that can be used to satisfy the secured obligation, although the rule is not limited to those circumstances.

17. Paragraphs 4-6 protect a buyer, lessee, or licensee in ordinary course of business transactions from being subject to a security right that was effective against the third parties, provided that they acquired their rights without knowledge that the transaction violated the rights of the secured creditor under the security agreement. “Knowledge”, as the term is used in paragraphs 4-6, is defined in article 2, paragraph (s), as actual knowledge. It is important to note that knowledge of the existence of the security right is insufficient to disqualify the buyer, lessee, or licensee from the benefits of paragraphs 4-6 (see art. 40 below).

18. Paragraphs 7 and 8 state what is often referred to as a “shelter principle” — once a buyer, lessee, or licensee obtains rights in the encumbered asset free of (or unaffected by) a security right, those that acquire their rights in the encumbered assets from or through the buyer, lessee, or licensee are similarly free of (or unaffected by) the security right.

Article 30. Rights of buyers or other transferees, lessees or licensees of an encumbered asset in the case of specialized registration

19. Article 30 is based on recommendations 77, subparagraph (a), and 78 of the Secured Transactions Guide (see chap. V, paras. 56 and 57). It is relevant only in States that provide a specialized registry or title certificate system for achieving third-party effectiveness of a security right in particular types of asset. Recommendation 77, subparagraph (b) of the Secured Transactions Guide is not reflected in this article on the understanding that the priority of rights registered in a specialized registry is a matter for the relevant specialized registration law.

20. In order to enable competing claimants that utilize the specialized registry or title certificate system to determine their rights solely by a search of the specialized registry system or examination of the title certificate, article 30 provides rights to such parties that are superior to the rights of a secured creditor that achieved third-party effectiveness by other means.

21. In particular, a security right made effective against third parties through the specialized registry or title certificate system is superior to a security right made effective against third parties by any other means. Similarly, even if a security right in an encumbered asset is effective against third parties by a means other than registration in a specialized registry or notation on a title certificate, if the security right could have been made effective against third parties by such registration or notation a buyer or other transferee, lessee, or licensee will acquire its rights free of, or unaffected by, the security right (for the coordination with specialized movable property registries, see Registry Guide, para. 64-70).

Article 31. Rights of the insolvency representative

[*Note to the Working Group: The Working Group may wish to note that the commentary to this article will be prepared if the Working Group decides to retain it*.]

Article 32. Preferential claims

22. Article 32 is based on recommendations 83, 85 and 86 of the Secured Transactions Guide (see chap. V, paras. 90-93 and 103-109). Its purpose is to implement the policy of these recommendations and give an enacting State an opportunity to: (a) list in a clear and specific way any statutory claims that may have priority over security rights; and (b) indicate a limitation on their amount. Examples of claims that may be listed in this article include claims of service providers and unpaid sellers or suppliers of goods but only to the extent that they have retained possession of the goods (see A/CN.9/830, para. 89). It should be noted that secured creditors typically obtain representations from grantors about preferential claims and otherwise address the possible existence of such claims.

23. This article applies outside insolvency. As the Model Law does not deal with insolvency matters, it does not include a similar rule for preferential claims in the case of the grantor's insolvency along the lines of recommendation 239 of the Secured Transactions Guide. In most States that require registration of a notice with respect to preferential claims, the priority of preferential claims is determined in the same way as the priority of security rights, that is, in other words, the general first-to-register priority rule applies. It should also be noted that, in the case of enforcement, if a preferential creditor does not take over the enforcement process (see art. 70), its claim will have to be paid ahead of the claims of secured creditors.

Article 33. Rights of judgement creditors

24. Article 33 is based on recommendation 84 of the Secured Transactions Guide (see chap. V, paras. 94-102). It determines the priority as between a security right in an encumbered asset and the rights of a judgement creditor that has acquired rights in the encumbered asset by taking certain steps. The enacting State will have to complete paragraph 1 by inserting the relevant step or steps necessary for a judgement creditor to acquire rights in the encumbered asset. These steps typically involve actions such as registration of a notice in the security rights registry, seizure of assets or service of a garnishment order.

25. Paragraph 1 gives priority to the judgement creditor if the steps necessary for it to acquire rights in the encumbered asset occur before the security right is made effective against third parties. In States that require registration of a notice with respect to these enforcement steps, the priority of the rights of judgement creditors is determined in the same way as the priority of security rights, that is, in other words, the general first-to-register priority rule applies.

26. Paragraph 2, however, provides that the priority of the rights of the judgement creditor does not extend to credit extended by the secured creditor within a short time after the judgement creditor notifies the secured creditor that it has taken the steps necessary to acquire its right, or to credit extended thereafter pursuant to an irrevocable commitment made before that notification. Paragraph 2 protects secured creditors against the possibility of inadvertently extending credit without realizing that their security rights are subordinate to the rights of a judgement creditor.

Article 34. Non-acquisition security rights competing with acquisition security rights

27. Article 34 is based on recommendations 180 of the Secured Transactions Guide (see chap. IX, paras. 131, 136, 137, 143 and 146) and recommendation 247 of the Intellectual Property Supplement (see paras. 259-263). Both option A and option B provide that, under certain circumstances, an acquisition security right has priority over a competing non-acquisition security right in the same encumbered asset even if, under the general priority rule in article 27, paragraph 1, the non-acquisition security right would have priority.

When those circumstances are present, it is often said colloquially that the acquisition security right has "super-priority" over the competing non-acquisition security right.

28. "Super-priority" for acquisition security rights is a feature of the law of most States, whether phrased in terms of a higher priority for security rights securing obligations incurred in acquiring the encumbered asset or, more traditionally, as a result of title to the encumbered asset being retained by the seller or other acquisition financier. Article 34 continues this practice, providing a variety of "super-priority" rules depending on the nature of the asset that is subject to the acquisition security right.

29. Option A contains three "super-priority" rules. Which of the three rules is applicable in a particular case depends on the nature of the encumbered assets. If the encumbered assets are inventory, or intellectual property or rights of a licensee under a licence of intellectual property held by the grantor [primarily] for sale or licence in the ordinary course of the grantor's business, the rule in subparagraph (1)(b) applies. If the encumbered assets are consumer goods, intellectual property or rights of a licensee under a licence of intellectual property used or intended to be used by the grantor [primarily] for personal, family or household purposes, the rule in subparagraph (1)(c) applies. In all other cases, the rule in subparagraph (1)(a) applies.

30. Under the general "super-priority" rule in subparagraph (1)(a), an acquisition security right has priority over a competing non-acquisition security right created by the grantor, if either the acquisition secured creditor is in possession of the asset (unlikely inasmuch as most acquisition security rights are non-possessory) or a notice with respect to the acquisition security right is registered in the Registry within a short period of time to be specified by the enacting State after the grantor obtains possession of the asset. Thus, so long as the acquisition secured creditor registers a notice with respect to the acquisition security right within the specified period, that security right will have priority over a competing non-acquisition security right that was made effective against third parties before the acquisition security right was made effective against third parties.

31. Under the super-priority rule in subparagraph (1)(b), additional requirements must be satisfied for an acquisition secured creditor that does not have possession of the encumbered assets to have "super-priority" over a competing non-acquisition security right. In particular, before the grantor obtains possession of the encumbered asset, a notice with respect to the acquisition security right must be registered and, in addition, a notice must be received by the non-acquisition secured creditor (if the non-acquisition secured creditor has registered a notice in the Registry with respect to a security right created by the grantor in an asset of the same kind), stating that the acquisition secured creditor has or intends to acquire an acquisition security right and describing the asset sufficiently to enable the non-acquisition secured creditor to identify the asset that is the object of the acquisition security right. Under the super-priority rule in subparagraph (1)(c), an acquisition security right automatically has priority over a non-acquisition security right in the same encumbered asset.

32. Option B contains only two "super-priority" rules. One of the rules (subparagraph (b)) applies when the encumbered assets are consumer goods, or intellectual property or rights of a licensee under a licence of intellectual property used or intended to be used by the grantor [primarily] for personal, family or household purposes. That "super-priority" rule is identical to the rule in option A, subparagraph (1)(c). For those types of encumbered asset, an acquisition security right automatically has priority over a non-acquisition security right in the same encumbered asset. The other "super-priority" rule in option B (subparagraph (a)) is identical to the rule in option A, subparagraph (1)(a). Thus, the only difference between option A and option B is that, in the former, extra steps must be taken in order for an acquisition security right in inventory, or in intellectual property or rights of a licensee under a licence of intellectual property held by the grantor [primarily] for sale or licence in the ordinary course of the grantor's business, to have priority over a competing non-acquisition security right.

33. The prerequisites to "super-priority" in option A, subparagraphs (1)(a) and (1)(b), and option B, subparagraph (a), are present to provide some protection to competing secured creditors whose security rights are effective against third parties before the third-party effectiveness of the acquisition security right. By providing a means by which the non-acquisition secured creditor can determine that newly-acquired assets are subject to an

acquisition security right (either by registration of a notice shortly after the grantor's acquisition of the asset (see option A, subparagraph (1)(a), and option B, subparagraph (a)) or by a notice to the acquisition secured creditor (see option A, subparagraph (1)(b)), the non-acquisition secured creditor can assess its economic position more accurately and make informed decisions as to whether to extend additional credit. The main difference in this regard is that under option A the non-acquisition secured creditor will receive a notice only for some types of encumbered asset (primarily inventory, see 34(1)(b)) and thus may have to conduct a search before every advance secured by another type of asset, while under option B the non-acquisition secured creditor will receive notice from the acquisition creditor for most types of encumbered asset (all but consumer goods).

Article 35. Competing acquisition security rights

34. Article 35 is based on recommendation 182 of the Secured Transactions Guide (see chap. IX, paras. 173-178). It addresses the priority of competing security rights when both are acquisition security rights. Unlike article 34 (which gives priority to acquisition security rights that satisfy certain criteria as against non-acquisition security rights), this article addresses priority as between security rights both of which would otherwise be entitled to "super-priority". The article reflects two policy decisions. First, an acquisition security right of a seller or lessor, or a licensor of intellectual property, has priority over an acquisition security right of another person such as a lender. Second, in all other cases, priority between acquisition security rights should be determined on the basis of rules applicable when neither are acquisition security rights.

Article 36. Acquisition security rights competing with the rights of judgement creditors

35. Article 36 is based on recommendation 183 of the Secured Transactions Guide (see chap. IX, paras. 145-148). Without the rule in this article, the period provided in article 34 would not be useful. The reason for this is that a secured creditor taking an acquisition security right typically would not want to have a period in which it would be vulnerable to the rights of a judgement creditor. In such a case, a secured creditor would likely register a notice before, or as soon as possible after, the security right was created. Accordingly, a secured creditor would not benefit from the longer period to register and achieve "super-priority" under article 34.

36. By way of illustration, assume that Grantor acquires an item of equipment from Seller on credit on Day 1 and grants Seller an acquisition security right in the item of equipment to secure its obligation to pay the remainder of the purchase price; on Day 5 Seller registers a notice that has the effect of making its acquisition security right effective against third parties. Between those two dates, on Day 3, Judgement Creditor obtains a judgement against Grantor and takes the steps specified in article 33, paragraph 1, to acquire rights in the item of equipment. Under the rule in article 33, paragraph 1, Judgement Creditor's rights would have priority over Seller's security right because Judgement Creditor obtained its rights before Seller's security right was effective against third parties. As a result of the operation of article 36, however, Seller's security right has priority over the rights of Judgement Creditor.

Article 37. Acquisition security rights in proceeds

37. Article 37 is based on recommendation 185 of the Secured Transactions Guide (see chap. IX, paras. 158-172). Both option A and option B of article 34 provide that, under certain circumstances, an acquisition security right has priority over a competing non-acquisition security right in the same encumbered asset even if, under the general priority rule in article 27, paragraph 1, the non-acquisition security right would have priority. This article determines whether that "super-priority" over non-acquisition security rights carries over to proceeds of the encumbered assets that are subject to the acquisition security right.

38. Under the general principles of article 10, a secured creditor with a security right in an asset obtains a security right in the identifiable proceeds of that asset and, under the circumstances described in article 17, that security right is effective against third parties.

This is equally true of assets subject to non-acquisition security rights and those subject to acquisition security rights. Under the general priority rule in article 27, paragraph 4, the priority of the security right in the proceeds is the same as the priority of the security right in that asset. Under that rule, the security right in proceeds of assets subject to an acquisition security right would have the same "super-priority" as the security right in the original asset. Article 37, however, limits the reach of article 27, paragraph 4, by extending "super-priority" to proceeds only of certain types of assets subject to an acquisition security right (option A) or by not extending the "super-priority" to proceeds at all (option B).

39. Under option A, the "super-priority" with respect to assets subject to an acquisition security right carries over to proceeds of those assets in certain circumstances and does not carry over in other circumstances. More particularly, option A provides that the "super-priority" with respect to the assets subject to the acquisition security right always carries over to the proceeds of those assets, except when the assets subject to the acquisition security right consist of: (a) inventory; (b) consumer goods; or (c) intellectual property or rights of a licensee under a licence of intellectual property held by the grantor [primarily] for sale or licence in the ordinary course of the grantor's business or used or intended to be used by the grantor [primarily] for personal, family or household purposes. When the asset subject to the acquisition security right is inventory, or intellectual property or rights of a licensee under a licence of intellectual property held by the grantor [primarily] for sale or licence in the ordinary course of the grantor's business, whether the "super-priority" carries over to proceeds depends on the nature of the proceeds. If the proceeds are receivables, negotiable instruments, or rights to payment of funds credited to a bank account, the "super-priority" does not carry over to those proceeds. If, on the other hand, the proceeds take another form, the "super-priority" does carry over to the proceeds. When the assets subject to the acquisition security right are consumer goods or intellectual property or rights of a licensee under a licence of intellectual property used or intended to be used by the grantor [primarily] for personal, family or household purposes, however, the "super-priority" does not carry over to the proceeds.

40. The primary reason for the decision not to provide "super-priority" for certain types of proceeds in option A relates to the difficulty that would be faced by competing secured creditors with security rights in payment rights in determining which of those payment rights are proceeds of assets subject to acquisition security rights and which are not. As a result, if there were "super-priority" treatment for those types of proceeds, competing secured creditors with security rights in payment rights might simply assume that all of those payment rights are proceeds and, as a result, extend less credit on the basis of them.

41. Option B provides that the "super-priority" with respect to assets subject to an acquisition security right does not carry over to proceeds of those assets under any circumstances, with the result that the priority of the security right in the proceeds will be determined under the general principle in article 27. This option is provided as an option for States that do not wish to make the sort of distinctions between types of proceeds made in option A.

42. As the Model Law does not deal with insolvency-related matters, with the exception of article 31, no article has been included in the Model Law along the lines of recommendation 186 of the Secured Transactions Guide to deal with the application of the special priority rules for acquisition security rights. However, there is nothing in these articles to imply that insolvency law will not operate against the background of secured transactions law and thus that these provisions will not apply to acquisition security rights in the case of insolvency.

Article 38. Subordination

43. Article 38 is based on recommendation 94 of the Secured Transactions Guide (see chap. V, paras. 128-131). Paragraph 1 allows a person to agree to lower priority of its security right as against a competing claimant than would otherwise result from application of the priority rules in this Chapter.

44. Such an agreement, usually referred to as a subordination agreement, may be in the form of a bilateral agreement between the party agreeing to lower priority and the competing claimant that will benefit from that agreement; it may also be a unilateral commitment

(usually made to the grantor) by the party agreeing to lower priority that its priority will be lower than that of the beneficiaries described in the commitment. Such an agreement is governed by this article so long as it is between a secured creditor and a grantor, between two or more secured creditors or between a secured creditor and another competing claimant (e.g. a judgement creditor or an insolvency representative).

45. Paragraph 2 makes it clear that a subordination agreement affects only the parties to it and any other beneficiaries of the subordination. For example, if SC 1, that has a claim for 50, subordinates its claim to SC 3, who has a claim for 70, SC 3 has priority over SC 2 only for 50.

46. In unusual circumstances, subordination can create circular priority issues. For example, assume that SC 1, 2, and 3 each have a security right in the same encumbered asset and their priority, determined under the rules of this chapter, is in that order, so that SC 1's security right is superior to that of SC 2 and SC 2's security right is, in turn, superior to that of SC 3. Then assume that SC 1 enters into a subordination agreement with SC 3, pursuant to which SC 1 agrees to subordinate its priority in favour of SC 3. As a result, SC 3 has priority over SC 1. However, SC 1 (who did not subordinate its priority in favour of SC 2) has priority over SC 2, and SC 2 has priority over SC 3, completing the circle.

Article 39. Future advances, future encumbered assets and maximum amount

47. Article 39 is based on recommendations 97-99 of the Secured Transactions Guide (see chap. V, paras. 135-143). Not all secured transactions involve a single extension of credit that is secured by encumbered assets in which the grantor has rights at the outset of the transaction. Rather, article 7 provides that the parties may agree that the encumbered assets will secure not only the obligation created contemporaneously with the security agreement but also any subsequent obligation of the grantor to the secured creditor; and article 8 provides that the parties may agree that assets created or acquired by the grantor after the security agreement is entered into will also secure the indebtedness.

48. Paragraphs 1 and 2 of this article provide that the priority of security rights so created extends to those subsequent obligations and after-acquired assets. Paragraph 3, which will be necessary only if the enacting State enacts provisions based on article 6, subparagraph 3(e), and article 9, subparagraph (e) [of the registry-related provisions], gives effect to any cap on the secured obligation stated in the notice by providing that the secured creditor's priority is limited by that cap.

Article 40. Irrelevance of knowledge of the existence of a security right

49. Article 40 is based on recommendation 93 of the Secured Transactions Guide (see chap. V, paras. 125-127). Knowledge or lack of knowledge of a security right by a competing secured creditor is not relevant to a determination of priority under either the general priority rule in article 27 or any of the special priority rules. The point is made explicit here to emphasize that priority is determined only on the basis of the objective facts referred to in those articles and not on the basis of difficult to prove subjective states of knowledge. However, article 40 does not go as far as to treat as irrelevant the knowledge on the part of, for example a buyer of an encumbered asset, that the sales agreement violates the rights of the secured creditor under the security agreement (see art. 29, paras. 4-6, art. 41, para. 2(c), art. 42, para. 6, and art. 43, para. 1).

B. Asset-specific rules

Article 41. Negotiable instruments

50. Article 41 is based on recommendations 101 and 102 of the Secured Transactions Guide (see chap. V, paras. 154-156). Any drafting changes are intended to ensure that paragraph 1 deals only with the relative priority of conflicting security rights in the same negotiable instrument, while paragraph 2 addresses the rights of a secured creditor with a security right in a negotiable instrument as against a buyer or other consensual transferee of the negotiable instrument (see A/CN.9/830, para. 49).

51. Under paragraph 1, a security right in a negotiable instrument that is made effective against third parties by the secured creditor's possession of the negotiable instrument has priority over a security right in the same negotiable instrument that is made effective against third parties by registration of a notice, without regard to the order in which the security rights became effective against third parties. This is consistent with the important role that possession plays in the law of negotiable instruments.

52. Under paragraph 2, certain buyers or other transferees that take possession of a negotiable instrument take their rights in the instrument free of a security right that is effective against third parties by registration of a notice (if the security right were effective against third parties because of the secured creditor's possession of the negotiable instrument, the buyer or other transferee could not also have possession of it, unless the same agent possesses the negotiable instrument both on behalf of the secured creditor and the buyer or other transferee).

53. The parties that take free under this rule are a protected holder of the negotiable instrument (see subpara. 2(a), which refers the exact formulation of this concept to the enacting State) or a transferee that takes possession of the instrument and gives value for it without knowledge that the sale or other transfer is in violation of the rights of the secured creditor (see subpara. 2(b)). As with the rule in paragraph 1, this rule preserves the important role of possession in the law of negotiable instruments.

54. Knowledge of the existence of a security right does not prevent a buyer or other transferee of a negotiable instrument from acquiring its rights in the instrument free of the security right. Rather, it is only knowledge that the transfer violates the rights of the secured creditor under the security agreement that prevents the transferee from taking free. "Knowledge", as defined in article 2, paragraph (s), means "actual knowledge". The reference to "good faith" that was included in recommendation 102, subparagraph (b) has been deleted on the understanding that the absence of knowledge amounts essentially to good faith and the concept of good faith is used in the draft Model Law only to reflect an objective standard of conduct (see A/CN.9/830, para. 50).

Article 42. Rights to payment of funds credited to a bank account

55. Article 42 is based on recommendations 103-105 of the Secured Transactions Guide (see chap. V, paras. 157-163). It determines the priority between competing security rights in a right to payment of funds credited to a bank account whether those rights to payment are original encumbered assets or proceeds of a security right in other property (which, according to art. 17, para. 1, is automatically effective against third parties, if the security right in the original encumbered asset is effective against third parties).

56. Paragraph 1 provides that a security right in a right to payment of funds credited to a bank account made effective against third parties by any of the methods foreseen in article 23 has priority over a security right made effective against third parties by registration of a notice. Under paragraphs 2 and 3, as among security rights in a right to payment of funds credited to a bank account that have been made effective against third parties by one of those alternative methods, a security right made effective against third parties by the secured creditor becoming the account holder has the highest priority, followed by a security right made effective against third parties as a result of the secured creditor being the depositary bank. Under paragraph 4, if there are more than one control agreements, priority is determined on the basis of the order of conclusion of the control agreements.

57. Under paragraph 5, except when the secured creditor has become the account holder, a security right in a right to payment of funds credited to a bank account will be subordinate to the depositary bank's rights of set-off (that are subject to other law) for debts owed to the depositary bank by the grantor. This protects depositary banks against losing their rights of set-off without their knowledge or consent.

58. Under paragraph 6, a transferee of funds from a bank account pursuant to a transfer initiated or authorized by the grantor acquires its rights free of a security right in the right to payment of funds credited to the bank account so long as the transferee does not have knowledge that the transfer violates the rights of the secured creditor under the security agreement. A "transfer of funds" includes transfers by a variety of mechanisms, including

by cheque and electronic means. The purpose of paragraph 7 is to preserve the free negotiability of funds.

59. Knowledge of the existence of a security right does not prevent a transferee of funds from the bank account from taking free of the security right. Rather, it is only knowledge that the transfer violates the rights of the secured creditor under the security agreement that prevents the transferee from taking free. "Knowledge", as defined in article 2, paragraph (s), means "actual knowledge".

Article 43. Money

60. Article 43 is based on recommendation 106 of the Secured Transactions Guide (see chap. V, para. 164). Its purpose is to preserve negotiability of money. Thus, under paragraph 1, a transferee of encumbered money acquires its rights in it free of the security right, unless it has knowledge that the transfer violates the rights of the secured creditor under the security agreement. "Knowledge", as defined in article 2, paragraph (s), means "actual knowledge". Paragraph 2 is intended to preserve the free negotiability of money.

Article 44. Negotiable documents and tangible assets covered

61. Article 44 is based on recommendations 108 and 109 of the Secured Transactions Guide (see chap. V, paras. 167-169). It is designed to preserve current practices under which rights to the tangible assets covered (or represented) by a negotiable document are subsumed in the negotiable document with the result that parties that deal with the document generally need not concern themselves separately with claims to the assets not reflected in the document. Accordingly, under paragraph 1, a security right in a tangible asset made effective against third parties by possession of the negotiable document covering that asset is given priority over a competing security right made effective against third parties by any other means.

62. Paragraph 2 states an exception to that general rule. Except when the encumbered asset is inventory, it provides that the rule in paragraph 1 does not apply against a secured creditor that had a security right in an encumbered asset before the earlier of the time that either the asset became covered by the negotiable document or the time that an agreement was concluded between the grantor and the secured creditor in possession of the negotiable document providing that the asset was to be covered by a negotiable document so long as the asset actually became covered by such a negotiable document within the time to be specified by the enacting State.

Article 45. Certain licensees of intellectual property

63. Article 45 is based on recommendation 245 of the Intellectual Property Supplement (see paras. 193-212). The purpose of this article is to clarify that the rule in article 29, paragraph 6, does not obviate other rights of the secured creditor as an owner or licensor of the intellectual property that is the subject of the license. This clarification is of particular importance because the concept of "ordinary course of business", used in article 29, paragraph 6, is a concept of commercial law and is not drawn from law relating to intellectual property law and thus may create confusion in an intellectual property financing context. Typically, law relating to intellectual property does not distinguish in this respect between exclusive and non-exclusive licences and focuses rather on the issue whether a licence has been authorized or not.

64. As a result, unless the secured creditor authorized the grantor to grant licences unaffected by the security right (which will typically be the case as the grantor will rely on its royalty income to pay the secured obligation), the licensee would take the licence subject to the security right. Thus, if the grantor defaults, the secured creditor would be able to enforce its security right in the licensed intellectual property and sell or license it free of the licence. In addition, a person obtaining a security right from the licensee will not obtain an effective security right as the licensee would not have received an authorized licence and would have no right in which to create a security right.

Article 46. Non-intermediated securities

65. Article 46 covers a topic not addressed in the Secured Transactions Guide, which excluded all types of securities (see rec. 4, subpara. (c)). So as not to interfere with existing customs and practices with respect to non-intermediated securities, this article adapts the general priority rule of article 27 in a manner similar to the special priority rules for security rights in negotiable instruments and rights to payment of funds credited to a bank account.

66. For certificated non-intermediated securities, paragraph 1 provides that a security right made effective against third parties by the secured creditor's possession of the certificate has priority over a competing security right by the same grantor that is made effective against third parties by registration of a notice in the Registry (this is parallel to the rule for negotiable instruments in art. 41, para. 1).

67. For uncertificated non-intermediated securities, paragraph 2 provides that notation of a security right or registration of the name of the secured creditor as the holder of the securities in the books maintained for that purpose (by the issuer or someone else on behalf of the issuer) fulfils a similar function to the secured creditor becoming the account holder of a bank account (this rule is similar to the rule for rights to payment of funds credited to a bank account in art. 42, para. 1).

68. Paragraphs 3 and 4 are also applicable only to uncertificated non-intermediated securities (they parallel the similar rules for rights to payment of funds credited to a bank account in art. 42, paras. 3 and 4). Paragraph 3 gives priority to a security right made effective against third parties by conclusion of a control agreement over other security rights in the same securities. As between security rights made effective against third parties by conclusion of a control agreement, paragraph 4 awards priority in the order in which those control agreements were concluded.

[*Note to the Working Group: The Working Group may wish to note that discussion of paragraph 5 will be inserted once the Working Group has had the opportunity to consider it and reach an agreement as to its contents*.]

(A/CN.9/WG.VI/WP.66/Add.3) (Original: English)

Note by the Secretariat on a draft guide to enactment of the draft model law on secured transactions

ADDENDUM

Contents

Chapter VI. Rights and obligations of the parties and third-party obligors

Section I. Mutual rights and obligations of the parties to a security agreement

A. General rules

Article 47. Source of mutual rights and obligations of the parties

1. Article 47 is based on recommendation 110 of the Secured Transactions Guide (see chap. VI, paras. 14 and 15). It is intended to describe the universe of sources affecting the mutual rights and obligations of the parties to a security agreement: (a) the other articles of chapter VI of the draft Model Law; (b) other applicable law; (c) the terms of the security agreement (reiterating the principle of party autonomy enshrined in art. 4); and (d) any usage the parties have agreed upon and any practices the parties have established (thereby giving legislative strength to these usages and practices, which might not be generally recognized in all jurisdictions but which may nevertheless have important meaning to the parties).

2. With the exception of certain mandatory rules included in the chapter (see art. 4, para. 1), the parties are given wide latitude to tailor their security agreement and their usage and practices to the transaction at hand in order to most effectively and efficiently facilitate their respective commercial goals (as reflected in articles 6 and 11 of the Assignment Convention, as well as articles 6 and 9 of the CISG).

3. It is important to note that the person challenging the effectiveness of the agreement on the ground that it is inconsistent with this article bears the burden of proof.

Article 48. Obligation of a person in possession to exercise reasonable care

4. Article 48 is based on recommendation 111 of the Secured Transactions Guide (see chap. VI, paras. 24-31). It sets forth the rule that a grantor or secured creditor in possession of a tangible asset (which under the definition in art. 2, subpara. (kk), includes money, negotiable instruments, negotiable documents and certificated non-intermediated securities) must exercise reasonable care in physically preserving both the asset and its value. It does not apply to any party in possession of an encumbered asset, but only to the grantor or secured creditor in possession of the asset. A third party in possession of an encumbered asset would also be obliged to take reasonable care to preserve the encumbered assets, but only if that third party agreed to do so, and such an agreement should be enforceable under contract law.

5. What constitutes “reasonable care” in a given case depends upon the nature of the encumbered asset. Thus, reasonable care may mean something very different with respect to equipment, inventory, crops or live animals.

6. Although physical preservation of a tangible asset would, in most cases, have the effect of preserving the asset's value, this rule also recognizes preservation of the asset's value as an end in itself that may go beyond the physical preservation of the asset, and in some cases may go beyond the control of the grantor or secured party in possession. For example, if a lender has possession of certificated non-intermediated shares of a borrower's wholly-owned subsidiary and actually takes over direct operation of the business of the subsidiary (a situation that would rarely happen in practice), article 48 could, depending on the particular circumstances, require the party in possession to exercise reasonable care in doing so.

7. Article 48 and a rule of securities law along the lines of article 5(1) of the Financial Collateral Directive ("FCD"), which gives a secured creditor the right to use securities in its possession, should be read together and their relationship would be a matter of domestic rules of interpretation. It should be noted that, according to article 1(4) of the FCD, financial collateral (a term that is, strictly speaking, not defined in the FCD) may consist of "cash" (see art. 2(1)(d) FCD), "credit claims" (see art. 2(1)(o) FCD), and/or "financial instruments" (see art. 2(1)(e) FCD). Under the FCD, "financial instruments" may be either intermediated ("book entry securities collateral"; see art. 2(1)(g) FCD) or non-intermediated securities, as long as they are tradable ("negotiable on the capital market" or "normally dealt in"; see art. 2(1)(e) FCD).

Article 49. Obligation of a secured creditor to return an encumbered asset [or to register an amendment or cancellation notice]

8. Article 49 is based on recommendations 112 and 72 of the Secured Transactions Guide (see chap. VI, paras. 35-39). It provides that, once a security right in an encumbered asset is extinguished, a secured creditor in possession of the asset must return it to the grantor and register an amendment or cancellation notice as provided in article 21, subparagraph 1 (b) or 2 (c) [of the registry-related provisions]. A security right generally will be deemed extinguished once the secured obligation is paid in full or otherwise satisfied in full, and all further commitments to extend credit to the debtor have terminated.

9. Article 49 does not expressly address the obligation of a secured creditor to withdraw any notifications that it has given to the debtor of the receivable. Rather, the grantor is protected in this regard by article 53, paragraph 2, and article 73, subparagraph 2 (b), which require the secured creditor to return to the grantor any surplus proceeds it receives.

10. This article does not apply to outright transfers of receivables, because the term "secured obligation" does not apply to outright transfers of receivables (see art. 2, subpara. (ff)), and receivables could not be the subject of physical possession (see art. 2, subpara. (z)).

11. The question of whether a secured creditor could return equivalent non-intermediated securities to replace the originally encumbered non-intermediated securities is a matter of securities law (see art. 5(2) FCD and A/CN.9/836, para. 24).

Article 50. Right of a secured creditor to use, be reimbursed for expenses and inspect an encumbered asset

12. Article 50 is based on recommendation 113 of the Secured Transactions Guide (see chap. VI, paras. 50-65). It provides that a secured creditor not only has certain obligations (described in articles 48 and 49), but also certain rights.

13. Under subparagraph 1 (a), a secured creditor in possession has the right to be reimbursed for the reasonable expenses incurred to preserve an encumbered asset in accordance with article 48.

14. Under subparagraph 1 (b), a secured creditor in possession may make reasonable use of an encumbered asset, so long as it applies any revenues generated from the use to the payment of the obligation secured by the asset.

15. Finally, under paragraph 2, where an encumbered asset is in the possession of the grantor, the secured creditor has the right to inspect the asset. As this article is subject to the general standard of commercial reasonableness and good faith set forth in article 5, the right

to inspect may only be exercised at commercially reasonable times and in a commercially reasonable manner. The application of this standard depends upon the circumstances. For example, in extreme cases, such as where the debtor is in default or the secured creditor has reason to believe that the physical condition of the collateral is in jeopardy or has been, or is about to be, removed from the jurisdiction, the secured creditor may be justified in demanding an immediate inspection.

16. As article 50 is not one of the mandatory rules listed in article 4, paragraph 1, article 50 may be waived or modified by the parties to the security agreement. An agreement between the secured creditor and the grantor may affect the rights of a third party in possession of the encumbered asset only in the case where the third party is acting as the agent of the secured creditor.

B. Asset-specific rules

Article 51. Representations of the grantor of a security right in a receivable

17. Article 51 is based on recommendation 114 of the Secured Transactions Guide (see chap. VI, para. 73), which in turn is based on article 12 of the Assignment Convention. It provides that, when a grantor grants a security right in a receivable, the grantor is deemed to make various representations to the secured creditor at the time the security agreement is concluded.

18. In particular, under paragraph 1, the grantor represents that it has not previously created a security right in the receivable in favour of another secured creditor, and that the debtor of the receivable will not have any defences or rights of set-off with respect to the receivable. Under paragraph 2, the grantor does not represent that it has, or will have, the ability to pay the receivable.

19. As article 51 is not one of the mandatory rules listed in article 4, paragraph 1, any or all of the provisions of article 51 may be waived or modified by the parties to the security agreement. For this reason, a reference to contrary agreement of the parties, which was included in recommendation 114 of the Secured Transactions Guide, has been deleted.

20. Article 51 presents another difference with recommendation 114 of the Secured Transactions Guide. The representation that the grantor has the right to create a security right was not carried over into article 51, to avoid giving the impression that it applies to security rights created only in receivables. As a result, the matter is left to general contract law.

Article 52. Right of the grantor or the secured creditor to notify the debtor of the receivable

21. Article 52 is based on recommendation 115 of the Secured Transactions Guide (see chap. VI, paras. 74 and 75), which is based on article 13 of the Assignment Convention. Subparagraph 1 provides that, when a security right has been created in a receivable, either the grantor or the secured creditor has the right to notify the debtor of the receivable of the existence of the security right and give a payment instruction, but that once notification of the security right has been received by the debtor of the receivable, only the secured creditor may give a payment instruction.

22. Subparagraph 2 provides that a notification sent in breach of an agreement between the grantor of the security right and the secured creditor is nevertheless effective for the purposes of article 58, which precludes the grantor from raising, after receiving notice of the security right, certain rights of set-off with respect to the receivable that became available to the grantor after it received notice of the security right.

23. Although the express language of article 52, paragraph 1, refers to the right of the parties to "give" a notification of the security right and a payment instruction, it is clear from the draft Model Law that the notification is effective only when received by the debtor of the receivable, provided that the notification also meets the other requirements of article 56.

24. As article 52 is not one of the mandatory rules listed in article 4, paragraph 1, it may be waived or modified by the parties to the security agreement. For this reason, a reference

to contrary agreement of the parties, which was included in recommendation 115 of the Secured Transactions Guide, has been deleted.

Article 53. Right of the secured creditor to payment of a receivable

25. Article 53 is based upon recommendation 116 of the Secured Transactions Guide (see chap. VI, paras. 76-80), which is based on article 14 of the Assignment Convention. Any changes made are intended to clarify the text, but not change its policy.

26. The article establishes the right of the secured creditor to receive the proceeds of a receivable in which it holds a security right as against the grantor of the security right. Paragraph 1 provides that, regardless of whether notification of the security right has been sent to the debtor of the receivable, the secured creditor is entitled to retain: (a) the proceeds of any full or partial payment of the receivable made to the secured creditor, as well as any tangible assets (such as inventory) returned to the secured creditor in respect of the receivable; (b) the proceeds of any full or partial payment of any receivable made to the grantor (as well as any tangible assets returned to the grantor); and (c) the proceeds of any full or partial payment of any receivable made to a third party (as well as any tangible assets returned to the grantor) if the right of the secured creditor has priority over the right of the third person.

27. As article 53 is not one of the mandatory rules listed in article 4, paragraph 1, it may be waived or modified by the parties to the security agreement. For this reason, a reference to contrary agreement of the parties, which was included in recommendation 116 of the Secured Transactions Guide, has been deleted.

Article 54. Right of the secured creditor to preserve encumbered intellectual property

28. Article 54 is based on recommendation 246 of the Intellectual Property Supplement (paras. 223-226). It recognizes the effectiveness of an agreement between the grantor of a security right in intellectual property and the secured creditor that the secured creditor may take the necessary steps to preserve the value of the intellectual property, such as making any necessary registration (such as a patent registration) and initiating actions to prevent infringement by third parties.

29. Although articles 4 (party autonomy) and 48 (obligation to preserve an encumbered asset) may be generally sufficient to ensure that the secured creditor may take these steps, article 54 has been inserted in to the draft Model Law, because, in an intellectual property right context, these rights are normally rights of the intellectual property owner.

Section II. Rights and obligations of third-party obligors

A. Receivables

Article 55. Protection of the debtor of the receivable

30. Article 55 is derived from recommendation 117 of the Secured Transactions Guide (see chap. VII, para. 12), which is based on article 15 of the Assignment Convention. Paragraph 1 sets forth the general principle that the creation of a security right in a receivable does not affect the rights or obligations of the debtor of the receivable, unless the debtor of the receivable consents.

31. To implement the general principle of paragraph 1, paragraph 2 provides that a payment instruction may change the person, address or account to which the debtor of the receivable is required to make payment, but it may not change: (a) the currency in which the receivable is to be paid, as specified in the original contract giving rise to the receivable; or (b) the State in which the payment is to be made, as specified in the original contract giving rise to the receivable, to a State other than that in which the debtor of the receivable is located.

Article 56. Notification of a security right in a receivable

32. Article 56 is based on recommendation 118 of the Secured Transactions Guide (see chap. VII, paras. 13-16), which is based on article 16 of the Assignment Convention. It describes the requirements for an effective: (a) notification to a debtor of a receivable of the existence of a security right in the receivable; or (b) payment instruction with respect to the receivable.

33. Under paragraph 1, for the effectiveness of both a notification and a payment instruction, they must be "received" by the debtor of the receivable. In addition, both must reasonably identify the receivable and the secured creditor, and be in a language reasonably expected to inform the debtor of its contents. On this latter point, paragraph 2 makes it clear that the language of the original contract evidencing the receivable is always sufficient.

34. Under paragraph 3, both a notification and payment instruction may relate not only to receivables in existence at the time the notification or payment instruction is given, but also may relate to receivables arising thereafter.

35. Under paragraph 4, where A creates a security right in its receivables and then transfers them to B, who also creates a security right in the receivables and then transfers them to C, who also creates a security right in the receivables, notification of the debtor of the receivable relating to the security right created by C constitutes notification of all prior security rights created by A and B.

Article 57. Discharge of the debtor of the receivable by payment

36. Article 57 is based on recommendation 119 of the Secured Transactions Guide (see chap. VII, paras. 17-20), which is based on article 17 of the Assignment Convention. It sets forth the rules affecting when and how a receivable is discharged by payment.

37. Paragraph 1 embodies the basic principle that, until the debtor of the receivable is notified of the existence of a security right in the receivable, it may be discharged by payment in accordance with the contract giving rise to the receivable ("original contract"). Where the original contract is a sales contract, this means payment to the seller. However, under paragraph 2, once the debtor receives notices of the existence of the security right, it can only be discharged by paying either the secured creditor or another party, as instructed by the secured creditor in the notification or as subsequently instructed by the secured creditor in a written payment instruction received by the debtor. However, the rule in paragraph 2 is subject to a number of qualifications that are set forth in paragraphs 3-8.

38. First, under paragraph 3, if the debtor of the receivable receives more than one payment instruction relating to a single security right in a receivable created by the same grantor, it is discharged by paying in accordance with the last payment instruction received from the secured creditor before payment, as the last payment instruction will be the most up-to-date. Second, under paragraph 4, if the debtor is notified of the existence of more than one security right in the same receivable created by the same grantor, it is discharged by paying in accordance with the first notification received, on the theory that the security right covered by the first notification will probably have priority over the subsequent security right under the draft Model Law's priority rules.

39. Third, under paragraph 5, if the debtor receives notification of one or more subsequent security rights in the same receivable, it is discharged by paying in accordance with the notification of the last of such subsequent security rights. The reason is that the last in a series of transferees/secured creditors will be the actual holder of the security right.

40. Fourth, under paragraph 6, where the debtor receives notification of a security right in a part of, or an undivided interest in, one or more receivables, the debtor has a choice. It may be discharged by paying either in accordance with the notification or in accordance with paragraph 1 as if the debtor has not received the notification. However, if the debtor chooses the first of these alternatives, under paragraph 7, it is discharged only to the extent of the part or undivided interest paid.

41. Finally, under paragraph 8, if the debtor receives notification from a [subsequent secured creditor][a secured creditor that acquires its right from the initial or any other secured creditor], to be protected, it may request from the secured creditor to provide, within

a reasonable time, proof of the creation of the security right by the initial grantor to the initial secured creditor and any intermediate security right. If the secured creditor fails to provide such proof, the debtor may pay as if it had not received such notification. For this purpose, under paragraph 9, adequate proof includes any writing from the grantor that indicates a security right has been created (e.g. a security agreement).

42. Paragraph 10 is intended to preserve any other grounds for discharge based on payment to the person entitled to payment under other law (e.g. payment to a competent judicial or other authority, or to a public fund).

Article 58. Defences and rights of set-off of the debtor of the receivable

43. This article is based on recommendation 120 of the Secured Transactions Guide (see chap. VII, para. 21), which is based on article 18 of the Assignment Convention. It must be read in conjunction with article 59. Subparagraph 1 preserves for the debtor all defences and rights of set-off arising from the contract giving rise to the receivable, including any other contract that was part of the same transaction, as if the security right had never been created and the claim were made by the grantor. Subparagraph 1 is subject to a contrary agreement of the parties as provided in article 59. Subparagraph 1 (b) ensures that the debtor of the receivable can assert against the secured creditor any other right of set-off that was available to the debtor at the time it received notification of the security right. This means, however, that the debtor may not assert a right of set-off that arises subsequent to such notification.

44. Under paragraph 2, paragraph 1 does not give the right to the debtor of the receivable to raise against the secured creditor as a defence or right of set-off the breach of an agreement by the grantor limiting the grantor's right to create a security right. Otherwise, the validation of a security right under article 12 notwithstanding such an agreement would be meaningless.

Article 59. Agreement not to raise defences or rights of set-off

45. Article 59 is based on recommendation 121 of the Secured Transactions Guide (see chap. VII, para. 22), which is based on article 19 of the Assignment Convention. Paragraph 1 provides that the debtor of the receivable may agree, in a writing signed by it, not to raise the defences and rights of set-off permitted by article 58. Under paragraph 2, any modification to such an agreement must also be in a writing signed by the debtor of the receivable and is effective as against the secured creditor only if the secured creditor consents or, in the case of a receivable that has not been earned yet by performance, a reasonable secured creditor would consent. To avoid abuses, paragraph 3 provides that the debtor may not waive defences based on fraud committed by the secured creditor or the debtor's incapacity.

Article 60. Modification of the original contract

46. This article is based on recommendation 122 of the Secured Transactions Guide (see chap. VII, paras. 23 and 24), which is based on article 20 of the Assignment Convention. It addresses the impact of an agreement between the grantor of a security right in a receivable and the debtor of the receivable that modifies the terms of the receivable. The result depends on when the agreement is made.

47. Under paragraph 1, if the agreement is concluded before the debtor receives notification of a security right in the receivable, it is effective against the secured creditor, although the secured creditor also [enjoys any benefits derived from the agreement].

48. Under paragraph 2, even if the agreement is concluded after notification, it is also effective, even if it affects the secured creditor's rights if either: (a) the secured creditor consents to it; or (b) the receivable has not been fully earned by performance and the modification was provided for in the original contract giving rise to the receivable or a reasonable secured creditor would consent to the modification.

49. Paragraph 3 provides that article 60 does not affect any right of the grantor or secured creditor arising under other law for breach of an agreement between them (such as an agreement that the grantor would not agree to any modifications of the terms of the receivable).

Article 61. Recovery of payments made by the debtor of the receivable

50. Article 61 is based on recommendation 123 of the Secured Transactions Guide (see chap. VII, paras. 25 and 26), which is based on article 21 of the Assignment Convention. It addresses the situation in which the grantor of a security right in a receivable (or the transferor in an outright transfer of the receivable) fails to perform its obligations under the contract giving rise to the receivable. The article insulates the secured creditor from liability in this circumstance, by providing that the debtor of the receivable may not look to the secured creditor to recover any amount that it has paid to either the grantor or the secured creditor. As a result, the debtor of the receivable bears the risk of the insolvency of its contractual partner (i.e. the grantor).

B. Negotiable instruments

Article 62. Rights as against the obligor under a negotiable instrument

51. Article 62 is based on recommendation 124 of the Secured Transactions Guide (see chap. VII, paras. 27-31). It is intended to preserve the rights of parties under the applicable law relating to negotiable instruments. For example, a secured creditor with a security right in a negotiable instrument may collect from the obligor under the instrument only in accordance with its terms; also, even if the grantor defaults, the secured creditor cannot collect from the obligor before payment becomes due under the instrument and the law relating to such instruments.

C. Rights to payment of funds credited to a bank account

Article 63. Rights as against the depositary bank

52. Article 63 is based on recommendations 125 and 126 of the Secured Transactions Guide (see chap. VII, paras. 32-37). It addresses the situation in which a security right is granted in a right to payment of funds credited to a bank account.

53. Paragraph 1 provides that the rights and obligations of the depositary bank are unaffected by the security right, unless the bank consents. The rationale for protecting banks in this manner is that imposing duties on a depositary bank or changing the rights and duties of a depositary bank without its consent may subject the bank to risks that it is not in a position to manage appropriately unless it knows in advance what those risks might be (see chap. VII, para. 33).

54. To safeguard the confidentiality of the relationship of a bank and its client, paragraph 1 also provides that the depositary bank has no obligation to respond to requests for information (e.g. about the balance in the account, whether a control agreement exists or whether the account holder retains the right to dispose of funds credited to its bank account).

55. Finally, paragraph 2 provides that, even where the depositary bank consents to the creation of a security right in the right to payment of funds credited in a bank account held by the grantor with the bank, any right of set-off that the bank may have under other law also remains unaffected. The rationale for this rule is the need to avoid any interference with the way banks manage risks, given the nature of the transaction and the business of their customer.

D. Negotiable documents and tangible assets covered

Article 64. Rights as against the issuer of a negotiable document

56. Article 64 is based on recommendation 130 of the Secured Transactions Guide (see chap. VII, paras. 43-45). It provides that, when a secured creditor has a security right in a negotiable document, the rights of the secured creditor as against the issuer of the document or any person obligated on the document are determined by the law relating to negotiable documents. This means that, for a secured creditor with a security right in the document to enforce it against the assets covered by the document: (a) at the time of enforcement, the

assets covered by the document must still be in the possession of the issuer or other obligor under the document; and (b) the issuer or other obligor will have no obligation to deliver the assets to the secured creditor, unless the negotiable document was transferred to the secured creditor in accordance with the law governing negotiable documents (e.g. with a necessary endorsement).

E. Non-intermediated securities

Article 65. Rights as against the issuer of a non-intermediated security

57. As already mentioned, the Secured Transactions Guide did not address security rights in any types of securities (see rec. 4, subpara. (c)). Thus, article 65 is a new rule. In line with articles 62-64, it provides that the rights of a secured creditor holding a security right in non-intermediated securities as against the issuer of the securities are determined by other law of the enacting State. For example, under that law, governmental approval, specific formalities, payment of a special tax, registration on the books of a corporation, or special enforcement procedures may be required with respect to a security right in the shares of a domestic corporation.

Chapter VII. Enforcement of a security right

A. General rules

Article 66. Post-default rights

58. Article 66 is based on recommendations 133, 139, 141, 143, and 144 of the Secured Transactions Guide (see chap. VIII, paras. 10-12, 15-17, 33-35). Paragraph 1 clarifies that, following the debtor's default, the grantor and the secured creditor may exercise any right they may have under the provisions of chapter VII, as well as under the security agreement and the law governing the security agreement, provided that it is not inconsistent with the provisions of the draft Model Law.

59. The meaning of the term "default" is generally defined in paragraph 1. Its exact meaning, however, is subject to the agreement of the parties and the law governing the agreement. It should also be noted that some of the grantor's rights under this article would be available to the grantor even before default under contract law (e.g., the right of redemption and the right to apply to a court or other authority for relief).

60. Paragraphs 2 and 3 indicate that the exercise of one right generally does not prevent the exercise of another right, except if the exercise of one right makes impossible the exercise of another right (e.g. if the secured creditor decides to obtain possession and sell the encumbered asset, it cannot propose to acquire it in satisfaction of the secured obligation).

61. Paragraph 4 provides that the grantor and others who may owe payment of the secured obligation may not waive or vary their rights under this chapter before default. Otherwise, the secured creditor could put pressure on any debtor of the secured obligation to waive or vary their rights in return for concession in the security agreement (see Secured Transactions Guide, chap. VIII, paras. 16 and 17).

Article 67. Methods of exercising post-default rights

62. Article 67 is based on recommendation 142 of the Secured Transactions Guide (see chap. VIII, paras. 18-20 and 29-33). Paragraph 1 clarifies that the secured creditor may exercise its post-default rights by applying or without applying to a court or other authority to be specified by the enacting State (e.g. a chamber of commerce, arbitration tribunal or notary public). The enacting State may wish to indicate whether any rights specified in this chapter must be exercised by application to a court or other authority (e.g. the right to obtain possession and the right to dispose of an asset). In any case, in view of the fact that legal systems differ as to which post-default rights may be exercised only by an application to a court or other authority (e.g. the right to obtain possession and the right to dispose of an asset), the draft Model Law does not introduce any limitation to the ability of the parties to

avail themselves of the assistance of a court or other authority at any time to exercise a post-default right or resolve a dispute arising in that respect (A/CN.9/836, para. 52).

63. Under paragraph 2, the exercise of post-default rights by application to a court or other authority is subject to the relevant rules to be specified by the enacting State, while, under paragraph 3, the exercise of those rights without application to a court or other authority is subject to the provisions of this chapter.

Article 68. Relief for non-compliance

64. Article 68 is based on recommendation 137 of the Secured Transactions Guide (see chap. VII, para. 31). It is intended to indicate that, if a person's rights are affected by another person's non-compliance with its obligations under the provisions of this chapter, the first person is entitled to relief by a court or other authority. A violation of the secured creditor's obligations includes violations by the secured creditor's agents, employees or service providers. Persons that may be affected include: a secured creditor with a lower priority ranking than that of the enforcing secured creditor, a guarantor or a co-owner of the encumbered assets.

65. The enacting State may wish to specify the court or other authority to which the party seeking relief should apply and the type of expeditious proceeding that would be available. That authority may include an arbitral tribunal, chamber of commerce or notary public (provided that there is an arbitration agreement between the grantor and the secured creditor that is enforceable under the law of the enacting State). In such a case: (a) the arbitral agreement (and award) would bind only the parties thereto; and (b) if the winning party attempts to seize an asset, the law of the enacting State must provide protection for the rights of persons, who are not party to the arbitration agreement, in the encumbered assets. In this case, third-party creditors should be notified (e.g. before an extrajudicial sale takes place, as provided in article 72) and given an opportunity to assert their rights (e.g. their right to take over enforcement, as provided in article 70, or be paid from the proceeds of a sale according to their priority rank, as provided in article 73).

66. As protracted and expensive enforcement proceedings are likely to have a negative impact on the availability and the cost of credit, enacting States are encouraged to provide for expedited court proceedings (including proceedings for interim measures of protection and preliminary orders).

Article 69. Right of affected persons to terminate the enforcement process

67. Article 69 is based on recommendation 140 of the Secured Transactions Guide (see chap. VIII, paras. 22-24). Under paragraph 1, any person whose rights are affected by the enforcement process is entitled to terminate the enforcement process by paying or otherwise performing the secured obligation in full. This provision is based on the assumption that the residual value of the asset is higher than the outstanding part of the secured obligation. It should be noted that the extinction of a security right, which was also addressed in recommendation 140 of the Secured Transactions Guide, is addressed in article 11bis.

68. Full payment includes the reasonable cost of enforcement. This means that: (a) in the case of enforcement before a court or other authority, the court or other authority would set the cost of enforcement based on evidence; and (b) in the case of enforcement without an application to a court or other authority, the grantor could seek the assistance of a court or other authority if it were to dispute the reasonableness of the cost of enforcement.

69. Under paragraph 2, this right may be exercised until the secured creditor has disposed of, acquired or collected the encumbered asset, or entered into an agreement for that purpose. Otherwise, the finality of acquired rights would be undermined. [Paragraph 3 provides that the rule in paragraph 2 does not apply in the case of a lease or licence of an encumbered asset. This means that a person affected by the enforcement may still terminate the enforcement process, if there is sufficient residual value left in the encumbered asset. However, there is one limitation, the rights of a lessee or licensee must be respected.]

[*Note to the Working Group: The Working Group may wish to note that the reference to article 69, paragraph 3, in paragraph 69 above appears within square brackets, because article 69, paragraph 3, is also within square brackets*.]

Article 70. Right of the higher-ranking secured creditor to take over enforcement

70. Article 70 is based on recommendation 145 of the Secured Transactions Guide (see chap VIII, para. 36). Paragraph 1 clarifies that a secured creditor, whose security right has priority over that of the enforcing secured creditor or judgement creditor ("higher-ranking secured creditor"), has the right to take over the enforcement process. The higher-ranking secured creditor may take over the enforcement process at any time before the asset is sold or otherwise disposed of, or acquired by the secured creditor or until the conclusion of an agreement by the secured creditor for that purpose. [Like article 69, paragraph 3, paragraph 3 of this article, allows the exercise of this right even after the encumbered asset has been leased or licensed, without, however, affecting the rights of lessees or licensees.]

71. Under paragraph 3, the right of the higher-ranking secured creditor to take over the enforcement process includes the right to enforce by any of the methods foreseen in this chapter. This means that the higher-ranking secured creditor may change the method of enforcement, for example to correct mistakes made by the enforcing creditor. It should be noted, however, that the exercise of this right is subject to the standard of article 5, paragraph 1, that is, the secured creditor would be obliged to act in good faith and in a commercially reasonable manner, for example, to avoid unnecessary enforcement costs.

Article 71. Right of the secured creditor to possession of an encumbered asset

72. Article 71 is based on recommendations 146 and 147 of the Secured Transactions Guide (see chap. VIII, paras. 38-48 and 51-56). Paragraph 1 clarifies that, after default, the secured creditor is entitled to obtain possession of an encumbered asset by applying to a court or other authority. The opening words of paragraph 1 are intended to clarify that the mere fact that the grantor defaulted does not automatically give the secured creditor the right to obtain possession of the encumbered asset from a person that obtained its rights free of the security right (e.g. buyer or other transferee, a lessee or licensee; see art. 29).

73. Under paragraph 2, the secured creditor is also entitled to obtain possession of an encumbered asset without applying to a court or other authority if all the conditions set out therein are met. The enacting State may wish to specify how long before seeking possession the secured creditor must give notice.

74. [Under paragraph 3, the secured creditor may take possession only after the short period of time (to be specified by the enacting State), and not upon receipt of the notice by its addressees.]

75. Under paragraph 4, to avoid damage to perishable assets or speedy loss of value of an encumbered asset [such as an intermediated security], the notice referred to in subparagraph 2 (b) need not be given.

[*Note to the Working Group: The Working Group may wish to note that the commentary to paragraphs 3 and 4 will be prepared after their finalization*.]

Article 72. Right of the secured creditor to dispose of an encumbered asset

76. Article 72 is based on recommendations 148-151 of the Secured Transactions Guide (see chap. VIII, paras. 48 and 57-60). Paragraph 1 deals with the secured creditor's right to sell or otherwise dispose of, lease, or license an encumbered asset by applying or without applying to a court or other authority (to be specified by the enacting State); and paragraph 2 provides that the enacting State is also to specify the rules that will determine the method, manner, time, place and other aspects of the sale or other disposition, lease or licence.

77. Paragraphs 3-8 deal with dispositions by the secured creditor without an application to a court or other authority. Under paragraph 3, the secured creditor may determine the aspects of the sale or other disposition, lease or licence. Under paragraph 4, the secured creditor must give to the grantor, any debtor and any person with rights in the encumbered asset that notifies in writing the secured creditor of those rights a notice that contains all the elements set out in paragraphs 5-7. Under paragraph 8, the notice need not be given if the encumbered asset is perishable, may decline in value speedily or is of a kind sold on a recognized market.

78. Subject to its obligation to act in good faith and in a commercially reasonable manner (see art. 5, para. 1), the secured creditor may: (a) dispose of the encumbered assets by public or private sale, and if by public sale, through auction or tender (see A/CN.9/836, para. 68); and (b) decide whether to dispose of the encumbered assets individually, in groups or as a whole (see Secured Transactions Guide, chap. VIII, paras. 71-73).

Article 73. Right of the secured creditor to distribute the proceeds of disposition of an encumbered asset

79. Article 73 is based on recommendations 152-155 of the Secured Transactions Guide (see chap. VIII, paras. 60-64). Paragraph 1 clarifies that, in the case of a sale or other disposition, lease or licence supervised by a court or other authority, the distribution of the proceeds is subject to the rules to be specified by the enacting State. However, such distribution should follow the order of priority according to the priority rule of the draft Model Law.

80. Under paragraph 2, the distribution of the proceeds of a sale or other disposition, lease or licence without an application to a court or other authority is subject to the rules set forth in paragraph 2. Subparagraph 2 (b) refers only to payment to a subordinate secured creditor, because, under article 75, paragraphs 3 and 4, the security right of a higher-ranking secured creditor is preserved even after enforcement by a lower-ranking secured creditor.

81. Under paragraph 3, if after distribution of the proceeds there is a shortfall, the debtor has a personal (unsecured) obligation to pay.

82. It should be noted that: (a) this article does not apply to outright transfers of receivables; and (b) damages for non-compliance with enforcement obligations under the provisions of this chapter are a matter for other law, in particular in relation to consumer transactions (see A/CN.9/836, para. 73).

Article 74. Right of the secured creditor and the grantor to propose the acquisition of an encumbered asset by the secured creditor

83. Article 74 is based on recommendations 156-159 of the Secured Transactions Guide (see chap. VIII, paras. 65-70). Paragraph 1 states the right of the secured creditor to propose in writing to acquire one or more of the encumbered assets in total or partial satisfaction of the secured obligation. Paragraphs 2 and 3 deal with the addressees and the contents of the proposal. The proposal must be sent to: (a) the grantor and any debtor; and (b) certain other persons.

84. Paragraph 4 provides that: (a) in the case of a proposal for the acquisition of the encumbered asset in full satisfaction of the secured obligation, the secured creditor acquires the encumbered asset, if none of the addressees objects; (b) in the case of a proposal for the acquisition of the encumbered asset in partial satisfaction of the secured obligation, the secured creditor acquires the encumbered asset if all of the addressees consent. The latter approach is intended to safeguard the rights of all addressees of the notice, since they will remain liable for part of the secured obligation.

85. Under paragraph 5, if the grantor makes such a proposal and the secured creditor accepts it, the secured creditor must proceed as provided in paragraphs 2-4.

Article 75. Rights acquired in an encumbered asset

86. Article 75 is based on recommendations 160-163 of the Secured Transactions Guide (see chap. VIII, paras. 74-81). It is intended to deal with the finality of rights acquired in an encumbered asset pursuant to the enforcement of a security right (e.g. whether a transferee acquires its rights free or subject to the security right). Paragraph 1 deals with sales or other dispositions under the supervision of a court or other authority and refers finality of rights to the law to be specified by the enacting State. Paragraph 2 deals with leases and licences of encumbered assets under the supervision of a court or other authority and provides that the lessee or licensee acquires its rights to use the leased or licensed asset except as against creditors with rights that have priority over the right of the enforcing secured creditor.

87. Under paragraphs 3 and 4, in the case of a sale or other disposition, lease or licence of an encumbered asset, the buyer or other transferee acquires its rights subject only to rights that have priority over the security right of the secured creditor, and the lessee or licensee is entitled to the benefit of the lease or licence except as against creditors with rights that have priority over the rights of the secured creditor.

88. Under paragraph 5, if the sale or other disposition, lease or licence of an encumbered asset takes place in violation of the provisions of chapter VII, the buyer or other transferee, lessee or licensee does not acquire any rights or benefits[, if it had knowledge of the violation and that the violation materially prejudiced the rights of the grantor or another person].

[*Note to the Working Group: The Working Group may wish to note that part of paragraph 88 above appears within square brackets as the relevant text in article 75, paragraph 5, also appears within square brackets*.]

B. Asset-specific rules

Article 76. Collection of payment under a receivable, negotiable instrument, right to payment of funds credited to a bank account or non-intermediated security

89. Article 76 is based on recommendations 169-171, 173 and 175 of the Secured Transactions Guide (see chap. VIII, paras. 93-98, 102-108, 111 and 112). It is intended to indicate that where the encumbered asset is an obligation to pay money, after default, the secured creditor is entitled to collect payment from the obligor.

90. Under paragraph 2, the secured creditor may exercise the right to collect even before default but with the agreement of the grantor; and, under paragraph 3, the secured creditor may also enforce any personal or property right that secures or supports payment of the encumbered asset.

91. Paragraph 4 is intended to protect a depositary bank from the obligation of having to pay against its consent without a decision by a court or other authority. As a result of paragraph 4, the secured creditor may collect the balance credited in a bank account without applying to a court or other authority only if the security right in the right to payment of the funds has been made effective against third parties by the security right being created in favour of the depositary bank, the conclusion of a control agreement or the secured creditor becoming the account holder (see art. 23).

Article 77. Collection of payment under a receivable by an outright transferee

92. Article 77 is based on recommendations 167-168 of the Secured Transactions Guide (see chap. VIII, paras. 99-101). It clarifies that, in the case of an outright transfer of a receivable, the transferee is entitled to collect the receivable before or after default. It should be noted that, under article 5, paragraph 2(b), the standards of good faith and commercial reasonableness do not apply to an outright transfer of a receivable without recourse to the transferor, as the grantor (transferor) had no remaining vested interest in the receivable that could be protected by a limitation on the way in which the secured creditor (transferee) could collect the receivable.

(A/CN.9/WG.VI/WP.66/Add.4) (Original: English)

Note by the Secretariat on a draft guide to enactment of the draft model law on secured transactions

ADDENDUM

Contents

Chapter VIII. Conflict of laws

Introduction

1. Chapter VIII of the draft Model Law states the rules for determining the substantive law applicable to most of the issues dealt with in the other chapters. These rules are generally referred to as the conflict-of-laws rules. In a State that has enacted the draft Model Law, a court or other authority will use the conflict-of-laws rules of chapter VIII to determine the substantive law governing issues such as the creation, effectiveness against third party, priority and enforcement of a security right, as well as the mutual rights and obligations of the grantor and the secured creditor and the relationship between third-party obligors and secured creditors. The substantive law indicated by conflict-of-laws rules may be that of the enacting State or the law of another State. It must be stressed that in the event of litigation in a State, the court or other authority will apply the conflict-of-laws rules of its own legal system to resolve the dispute (for a more elaborate discussion of the role of conflict-of-laws rules, see Secured Transactions Guide, chap. X, paras. 1-13).

2. The application of the conflict-of-laws rules relating to security rights should not be conditional on a prior determination that the case presents an international element. Whenever a conflict-of-laws rule refers to the law of a State, that reference should not be refused on the ground of the absence of true "internationality" in the situation. Otherwise, courts might disregard a conflict-of-laws rule enacted by a State by deciding that the case is not sufficiently international on the basis of discretionary criteria that are not part of the conflict-of-laws rules of that State. In other words, if in a given situation the rule of State A points to the law of State B, it must be presumed that the legislator of State A has considered that the situation of itself is presenting an international element. In the particular circumstances where additional criteria would be a prerequisite for the application of a conflict-of-laws rule of a State, these criteria should be spelled out in the conflict-of-laws rules of that State.

3. With the exception of article 78, the conflict-of-laws rules on security rights are mandatory (see art. 4, para. 1). This means that the parties cannot be permitted by a choice-of-law clause to avoid the substantive provisions of the legal system to which a conflict-of-laws rule refers. This must be so because security rights are property (*in rem*) rights and thus affect third parties. Allowing the parties to select the applicable conflict-of-laws rule would also defeat one of the main purposes of the conflict-of-laws rules, which is to identify the State whose substantive law will apply in the event of a priority dispute among competing claimants. In a priority dispute between secured creditor X and secured creditor Y, it would be impossible to ascertain the law applicable to the resolution of the dispute if each of X and Y had been permitted to choose in their security agreement with the grantor a different governing law for the ranking of their respective security right.

[*Note to the Working Group: The Working Group may wish to note that, depending on its decision with respect to the scope of application of the conflict-of-laws rules, the introduction may need to be revised (see note at the beginning of chapter VIII of the draft Model Law).*]

A. General rules

Article 78. Law applicable to the mutual rights and obligations of the grantor and the secured creditor

4. Article 78 is based on recommendation 216 of the Secured Transactions Guide (see chap. X, para. 61). It states that the parties to a security agreement are free to choose the law applicable to their contractual relationship. Article 78 follows the approach recommended by international texts on this matter, including the Hague Principles on Choice of Law in International Contracts. The question of whether there should be constraints to party autonomy with respect to the law applicable is not addressed by the draft Model Law and is left to the other conflict-of-laws rules of the enacting State. These other rules will also determine the law governing the contractual relationship of the parties in the absence of a choice of law in the security agreement; these rules will often point to the law of the State

most closely connected to the security agreement. It should be noted that the rule of article 78 is confined to the contractual aspects of the security agreement. As already mentioned, matters relating to the property aspects of secured transactions (e.g. the priority of a security right) are outside the scope of freedom of contract; the parties cannot select a law other than that indicated by the conflict-of-laws rules on such matters.

Article 79. Law applicable to a security right in a tangible asset

5. Article 79 is based on recommendations 203-207 of the Secured Transactions Guide (see chap. X, paras. 28-38). It deals with the law applicable to the creation, effectiveness against third parties and priority of a security right in a tangible asset. The term "tangible asset" is defined to refer to all types of tangible movable asset, including money, negotiable instruments, negotiable documents and certificated non-intermediated securities (see art. 2, subpara. (kk); see also Secured Transactions Guide, chap. X, para. 26).

6. Paragraph 1 states the general rule that the law applicable to these issues is the law of the location of the encumbered asset (the "*lex situs*" or the "*lex rei sitae*"). Article 85 deals with the scenario where the location of the asset changes to another State after the security right has been created. The *lex situs* rule for tangible assets is subject to five exceptions that are set out in paragraphs 2 to 5 and in options B and C of article 93.

7. The first exception provides that, if a tangible asset located in a State is covered by a negotiable document in the possession of a secured creditor in another State, the priority of the security right over the asset will be determined by the law of the location of the document, and not by the location of the asset covered by that document (see para. 2). The second exception points to the law of the grantor's location for an asset of a type which may be ordinarily used in more than one State, that is, a "mobile asset" (see para. 3; for the meaning of "location", see art. 84; for the relevant time for determining location, see art. 85). The test is an objective one and does not refer to actual use. The most obvious example is an aircraft, which may fly from a State to many other States. The rule will apply even if a particular aircraft is actually operated only in one single State. [The rule in paragraph 3 is subject to the rule in paragraph 4, which deals with mobile assets, rights in which may be registered in a specialized registry or noted on a title certificate.]

8. The third exception relates to an asset the ownership of which may be registered in a registry maintained for such purpose in a State (see para. 4).

[*Note to the Working Group: The Working Group may wish to note that the last sentence of paragraph 7 above appears within square brackets, because the words in article 79, paragraph 3, to which that sentence refers, appear within square brackets. The Working Group may also wish to note that the commentary to article 79, paragraph 4, will be prepared if the Working Group decides to retain and, if so, finalizes formulation of the specialized-registry rule.*]

9. The fourth exception deals with a tangible asset in transit or to be exported (see para. 5). A security right in a tangible asset located in a State but which is in transit or destined to be moved to another State may be created and made effective against third parties under the law of its ultimate destination, if the asset reaches that destination within the period of time to be specified by the enacting State. It should be noted that: (a) if the assets are mobile goods to which the rule in paragraph 3 applies or do not reach the intended destination in a timely fashion, the rule in paragraph 5 will not apply; and (b) the rule in paragraph 5 does not prevent taking the necessary steps to create and make the security right effective against third parties under the law of the actual location of the asset at the time such steps are taken. It should also be noted that paragraph 5 is a conflict-of-laws rule of the enacting State only and whether the security right will be treated as validly created and made effective against third parties in the State of the ultimate destination of the asset is a matter for the conflict-of-laws rules of that State.

10. The fifth exception is contained in options B and C in article 93, which refer to laws other than the location of the certificate for a security right in certificated securities.

[*Note to the Working Group: The Working Group may wish to note that the commentary to the exception in article 93 will have to be refined depending on the outcome of the discussions on article 93*.]

Article 80. Law applicable to a security right in an intangible asset

11. Article 80 is based on recommendations 208 and 209 of the Secured Transactions Guide (see chap. X, paras. 39-47). It states the general conflict-of-laws rule for the creation, effectiveness against third parties and priority of a security right in an intangible asset. The applicable law is that of the location of the grantor (for the meaning of "location", see art. 84; for the relevant time for determining location, see art. 85). It must be noted that receivables are covered by this rule, which is subject to several exceptions that are set out in articles 81 and 90-93.

12. The first exception relates to the priority of a security right in a receivable arising from a sale or lease of or a transaction secured by immovable property (see art. 81 below). The other exceptions relate to a security right in rights to payment of funds credited in a bank account (see art. 90), intellectual property (see art. 92) and non-intermediated securities (see art. 93).

Article 81. Law applicable to a security right in a receivable arising from a sale or lease of or a transaction secured by immovable property

13. Article 81 is based on recommendation 209 of the Secured Transactions Guide (see chap. X, para. 54). It deals with the priority of a security right in a receivable arising from a sale or lease of or a transaction secured by immovable property as against the rights of competing claimants. Paragraph 1 restates the general rule of article 80. Paragraph 2 states an exception to the general rule of paragraph 1 and refers that matter to the law of the State under whose authority the immovable property registry is organized. For article 81 to apply, two conditions must be satisfied. First, the law of the State of the immovable property registry must have priority rules and registration must be relevant to the priority of a security right in such receivables; and second, the right of a competing claimant must be registered in that registry.

Article 82. Law applicable to the enforcement of a security right

14. Article 82 is based on recommendation 218 of the Secured Transactions Guide (see chap. X, paras. 64-72). Subparagraph (a) deals with the law applicable to the enforcement of a security right in a tangible asset, as defined in article 2, subparagraph (kk) (with the exception of certificated non-intermediated securities, with respect to which all matters are addressed in art. 93). [It also clarifies that enforcement may involve several distinct acts (e.g. notice of default, notice of the secured creditor's intent to obtain possession of an encumbered asset without applying to a court or other authority, disposition of an encumbered asset, and distribution of the proceeds of disposition) that may take place in different States (see A/CN.9/802, para. 105). For example, a secured creditor may take possession of the encumbered assets in one State, dispose of them in a second State, and distribute the proceeds of disposition in a third State.]

15. Under, subparagraph (b), the law applicable to the enforcement of a security right in an intangible asset (with the exception of a right to payment of funds credited in a bank account, intellectual property and non-intermediated securities) is the law governing priority. As a result, the creation, third-party effectiveness, priority and enforcement of a security right in a receivable (but not the relationship between the debtor of the receivable and the secured creditor; see art. 89) is referred to one and the same law, that is, the law of the location of the grantor.

[*Note to the Working Group: The Working Group may wish to note that part the text in paragraph 14 appears within square brackets, because the wording in article 82, subparagraph (a), to which that sentence refers, appears within square brackets*.]

Article 83. Law applicable to a security right in proceeds of an encumbered asset

16. Article 83 is based on recommendation 215 of the Secured Transactions Guide (see chap. X, paras. 55-60). The following example illustrates how the rule on the law applicable to proceeds operates. Assume that the original encumbered asset is inventory, which is subsequently sold, and the purchase price is paid into a bank account. Under paragraph 1,

the law applicable to the question of whether the secured creditor automatically acquires a security right in the right to payment of the funds credited to the bank account as proceeds of the original encumbered inventory will be the law of the location of the inventory. Under paragraph 2, the law applicable to the third-party effectiveness and priority of the security right in the proceeds will be the law applicable to the right to payment of funds credited to the bank account.

17. It should be noted that this type of bifurcated rule may lead to difficulties in cases where the law governing creation recognizes a broad-based automatic proceeds rule whereas the law governing third-party effectiveness and priority recognizes no or only a very limited automatic proceeds right. It should also be noted that this article is dealing only with the law applicable to proceeds derived from the original encumbered assets as a result of a disposition by the grantor or other event prior to enforcement, whereas article 85 deals with the law applicable to the distribution of proceeds derived from a disposition of the encumbered assets pursuant to post-default enforcement proceedings.

Article 84. Meaning of "location" of the grantor

18. This article is based on recommendation 219 of the Secured Transactions Guide (see chap. X, paras. 73 and 74). It should be noted that the place of the central administration of a legal person is not necessarily the place of its statutory seat (or registered office). If the grantor is a legal person formed under the law of State A with its statutory seat in that State but has in State B a place of business where its senior management is based, then the grantor is located in State B.

Article 85. Relevant time for determining location

19. Article 85 is based on recommendation 220 of the Secured Transactions Guide (see chap. X, paras. 75-78). It deals with the situation where the location of the asset or the location of the grantor changes from one State (State A) to another (State B) in circumstances where the applicable law is determined by reference to that location. Paragraph 1 establishes that State B will recognize the existence of the security right if the latter was validly created under the law of State A at the time the asset or the grantor was located in State A. However, if a priority dispute occurs either in State A or in State B, the substantive law of State B will be applied to determine whether the security right is effective against third parties and has priority over the rights of competing claimants. As a result, the third-party effectiveness requirements of the law of State B must have been fulfilled in order for the security right to be treated as being effective against third parties either in State A or in State B. This is so even if the security right had been made effective against third parties under the law of State A at the time the asset or the grantor was located in State A. Indeed, this analysis assumes that both States are enacting States.

20. Paragraph 2 constitutes an exception to the general rules of paragraph 1. In the event of a priority dispute between two security rights that have been made effective against third parties in the State of the initial location (State A, in the example), the priority dispute will be resolved under the law of the initial location.

[*Note to the Working Group: The Working Group may wish to note that the commentary to article 85, paragraph 2, may need to be further elaborated once the rule contained therein has been finalized*.]

Article 86. Exclusion of *renvoi*

21. Article 86 is based on recommendation 221 of the Secured Transactions Guide (see chap. X, para. 14). Its purpose is to provide greater certainty with respect to the law applicable by avoiding the complications arising from the doctrine of *renvoi*. Under this doctrine, the applicable law as indicated by the conflict-of-laws rules of a State (State A) includes the private international law (this term is used in the same sense as the term "conflict of laws") of the State whose law is the applicable law. Thus, under this doctrine, if the conflict-of-laws rules of State A refer the priority of a security right in a receivable to the law of the location of the grantor (the law of State B) and the conflict-of-laws rules of State B refer that issue to the law governing the receivable (which is the law of State C), then a court in State A will resolve the priority dispute using the law of State C (and not the

law of State B). This result, however, would create uncertainty as to the law applicable and also run contrary to the expectations of the parties. For those reasons, article 86 prohibits *renvoi* (for an exception, see art. 94, para. 3).

Article 87. Overriding mandatory rules and public policy (*ordre public*)

22. This article, which is based on recommendation 222 of the Secured Transactions Guide (see chap. X, para. 79), states generally recognized principles of private international law.

23. To illustrate how the rules in paragraphs 1 and 3 will operate, assume that the law of the forum prohibits dealings in certain types of asset (such as an asset which is the proceeds of criminal activities or is the subject of international sanctions) and that the law of the State whose law is applicable does not foresee such a prohibition. In such a case, the forum court may refuse to recognize as validly created a security right created in the asset under the foreign law that is applicable under the provisions of this chapter even though that law does not foresee the same prohibition. However, to do so, the forum court must conclude that the application of the foreign law would be manifestly contrary to the public policy of the forum State (see para. 3).

24. Under paragraphs 2 and 4, the forum court (if it is allowed to do so under its law) may refuse to recognize as validly created a security right permitted to be created under the applicable law (even if the law applicable is the law of the forum), if the creation of such security right would be manifestly contrary to public policy in a State which has a close connection with the situation. For example, if a law firm is located in the forum State and under the applicable law of the forum State a security right may be created in receivables arising from legal services, but the location of the client is in a foreign State, which has strict confidentiality rules prohibiting a security right in a law firm's receivables arising from legal services, the forum court may refuse the application of the applicable law of the forum State, if it finds that its application would be manifestly contrary to the public policy of the State of the location of the client.

25. Under paragraph 5, the forum State may not displace the provisions of the law applicable to third-party effectiveness and priority of a security right on the ground that this would offend its public policy, and apply its own provisions or the provisions of another State (unless the forum law or the law of another State is the law applicable under the provisions of this chapter). This approach is justified by the need to achieve certainty with respect to the law applicable to third-party effectiveness and priority. The same approach is followed in article 23, paragraph 2, article 30, paragraph 2, and article 31 of the Assignment Convention, as well as in article 11, paragraph 3, of The Hague Securities Convention.

Article 88. Impact of commencement of insolvency proceedings on the law applicable to a security right

26. Article 88 is based on recommendation 223 of the Secured Transactions Guide (see chap. X, paras. 80-82). Its purpose is to establish that an insolvency court in the enacting State must in principle respect the conflict-of-laws rules of the draft Model Law. However, paragraph 2 preserves the application of the law of the State in which insolvency proceedings are commenced (*lex fori concursus*) to certain such matters as the avoidance of fraudulent or preferential transactions, the treatment of secured creditors, the ranking of claims and the distribution of proceeds in the grantor's insolvency.

B. Asset-specific rules

Article 89. Law applicable to the relationship of third-party obligors and secured creditors

27. Article 89 is based on recommendation 217 of the Secured Transactions Guide (see chap. X, paras. 62 and 63), Its purpose is twofold. First, the conflict-of-laws rules on the third party effectiveness of a security right do not apply to the effectiveness or enforceability of a security right against the debtor of a receivable, the obligor under a negotiable instrument or the issuer of a negotiable document; they are not considered "third parties".

Second, the law applicable to these issues is the law governing the legal relationship between the grantor and the debtor of the receivable, the obligor under the instrument or the issuer of the document; the same law also applies to the question of whether any of the latter may invoke that their agreement with the grantor prohibits or limits the grantor's right to create a security right in the relevant receivable, instrument or document.

Article 90. Law applicable to a security right in a right to payment of funds credited to a bank account

28. Article 90 is based on recommendation 210 of the Secured Transactions Guide (see chap. X, paras. 49-51). It departs from the general conflict-of-laws rule on the law applicable to intangible assets (see art. 80). A right to payment of funds credited to a bank account is in the generic sense a receivable of the bank's customer against the depositary bank but a different rule applies in this case for the determination of the applicable law. Two options are offered to the enacting State for the law applicable to the creation, third-party effectiveness, priority and enforcement of a security right in a right to payment of funds credited to a bank account, as well as to the rights and obligations between the depositary bank and the secured creditor.

29. Under option A, the applicable law is that of the State of the location of the branch or office of the bank where the account is located. It should be noted that a branch (or office) of a bank should be considered as being located in a particular jurisdiction irrespective of whether the bank offers its branch (or office) services through physical offices or only through an online connection accessible electronically by customers located in that jurisdiction. In this connection, it should be noted that a bank must have a physical presence or legal address in a jurisdiction for regulatory and other purposes (e.g. accounting, taxation and anti-money-laundering laws).

30. Under option B, the applicable law is the law designated in the account agreement as governing the issues that are the subject of article 90 or, in the absence of a designation of a law for these issues, the law designated by the parties to the account agreement as the law governing that agreement. To be effective for conflict-of-laws purposes, a designation must refer to the law of a State in which the bank is engaged in the business of maintaining bank accounts. It must be noted, however, that the State whose law is so designated may be different than the State in which the grantor's bank account is maintained.

31. If the applicable law cannot be determined as described in the preceding paragraph, option B provides for a series of sub-rules along the lines of the default rules contained in article 5 of the Hague Securities Convention, which the enacting State may wish to insert in this article, if it decides to adopt option B of article 90.

Article 91. Law applicable to the third-party effectiveness of a security right in certain types of asset by registration

32. Article 91 is based on recommendation 211 of the Secured Transactions Guide (see chap. X, para. 34). Under article 91, if the enacting State recognizes registration of a notice as a method of third-party effectiveness for a security right in a negotiable instrument or right to payment of funds credited to a bank account, the law applicable to third-party effectiveness by registration is the law of the State in which the grantor is located.

[*Note to the Working Group: The Working Group may wish to note that, depending on its decision with respect to article 91, this commentary may have to be deleted or elaborated after the Commission has revisited article 91*.]

Article 92. Law applicable to a security right in intellectual property

33. Article 92 is based on recommendation 248 of the Intellectual Property Supplement (see paras. 284-337). The effect of paragraph 1 is the following. If intellectual property is protected in a particular State, the law of that State will apply to the requirements to be met for the security right in that intellectual property to be considered as having been created, made effective against third parties and enjoying priority. It should be noted that a security right in intellectual property may be granted by any person that is entitled to use the related intellectual property under the relevant intellectual property law. Therefore, the grantor may

be the owner or a transferee, or a licensor or licensee of the intellectual property to be encumbered.

34. Paragraph 2 provides for an alternative way to create and make effective against certain third parties a security right in intellectual property. Under paragraph 2, the secured creditor may also use for these purposes the law of the State in which the grantor is located. The principal benefit of paragraph 2 is that if the security right has been made effective against an insolvency administrator of the grantor under the law of the grantor's location, an insolvency court in the enacting State will recognize the security right even if the third-party effectiveness requirements of all States in which the intellectual property is protected have not been fulfilled.

35. Paragraph 3 refers to the law of the grantor's location for enforcement issues relating to intellectual property. As enforcement may relate to several acts that may take place in several States (e.g. notice of enforcement, re-possession and sale of the encumbered assets by the secured creditor, as well as disposition of the sale proceeds), this rule leads to the application of one and the same law to all enforcement acts. It should be noted that the effectiveness of the security right against persons other than the grantor (e.g. the owner of the intellectual property, if the grantor is a licensee) is outside the scope of this article.

Article 93. Law applicable to a security right in non-intermediated securities

36. […].

[*Note to the Working Group: The Working Group may wish to note that the commentary to article 93 will be prepared after the Working Group has made a decision as to which of the options is to be retained or, alternatively, whether the article should include several options, and reached an agreement as to the contents of the article*.]

Article 94. Law applicable in the case of a multi-unit State

37. Article 94 is based on recommendations 224-227 of the Secured Transactions Guide (see chap. X, paras. 83-87). Its purpose is to deal with the law applicable where: (a) the forum State is an enacting State (so that the forum's courts are bound by this rule); (b) the State whose law is applicable under the rules in this chapter is a State other than the enacting/forum State (since the law of the enacting/forum State would directly lead the courts of that State to the right territorial unit); and (c) the State whose law is applicable has two or more territorial units.

38. In such a case, paragraph 1 is intended to preserve the application of the law of the relevant unit and, if the multi-unit State and its territorial units have different substantive laws that will be applicable to an issue, the law of the multi-unit State. For instance, in a federal State, secured transactions laws may fall under the legislative authority of one of its territorial units. In such case, each unit will have its own substantive law and conflict-of-laws rules. Under paragraph 2, the relevant unit is to be determined on the basis of the location of the grantor or of the encumbered asset, or otherwise under the provisions of this chapter.

39. To preserve the consistency of the internal conflict-of-laws rules of a multi-unit State, paragraph 3 introduces internal *renvoi*, as it provides that the conflict-of-laws rules in the relevant State or territorial unit will determine whether to apply the law of a different territorial unit in the State (see Secured Transactions Guide, chap. X, para. 85). This means that the forum court is required to master the internal conflict-of-laws rules of the State of the location of the grantor or the encumbered asset. In this regard, the Assignment Convention allows a declaration by States as to the determination of the applicable priority rule as between various territorial units (on article 37 of the Assignment Convention), but in this article there would be no declaration and the forum court would be on its own to determine the applicable under the conflict-of-laws rules of another State.

40. To illustrate how the rule in paragraph 3 will operate, assume that the conflict-of-laws rules of this chapter refer to the law of the location of the grantor and that the location of the grantor under this chapter is in a territorial unit of a multi-unit State whose laws (including its conflict-of-laws rules) govern secured transactions. Also assume that the location of the grantor under this chapter is in unit A of that multi-unit State (unit A being the place of

central administration of the grantor). If, however, the conflict-of-laws rules of unit A refer to the law of unit B as being the applicable law (e.g. because unit B also refers to the location of the grantor but defines the location of the grantor as its statutory seat instead of its place of central administration), then the forum court would have to apply the law of unit B if the statutory seat of the grantor is in unit B.

[*Note to the Working Group: The Working Group may wish to consider in particular whether subparagraph (b) should be retained in paragraph 37 above, that is, whether the rule in paragraph 1 may apply also where the applicable law is the law of the enacting/forum State*.]

Chapter IX. Transition

Article 95. Amendment and repeal of other laws

41. Security agreements that are entered into while the prior law is in effect may continue for extensive periods of time after the new secured transactions law enters into force. Thus, this chapter provides rules by which the law governing such transactions moves in a fair and efficient manner from the prior law to the new one (see Secured Transactions Guide, chap. XI, paras. 1-3).

42. The draft Model Law is intended as a complete system of secured transactions law, replacing in its entirety the prior regime, rather than a supplement to existing law. Accordingly, the enacting State should list in paragraph 1 and thus repeal the body of laws that comprise its secured transactions regime.

43. Many other bodies of law interact with secured transactions law. In some cases, provisions of those other bodies of law may be written on the assumption that prior secured transactions law is in effect. Paragraph 2 provides the enacting State an opportunity to amend those provisions so as to mesh with the new secured transactions regime.

Article 96. Transitional application of this Law

44. Paragraph 1 of this article defines two terms used in this chapter. Paragraph 2 is based on recommendation 228 (second sentence) of the Secured Transactions Guide (see chap. XI, paras. 7-12). It provides that, by the end of the transitional period specified in article 101, the draft Model Law applies to all security rights within its scope, including prior security rights, except as provided in article 97.

45. As a result of paragraph 2, even secured transactions entered into before the new law enters into force will be governed, at least in part, by the new law. Inasmuch as many secured transactions endure for several years, if the new law applied only to transactions entered into after the effective date of the new law, the prior law would persist for a lengthy period during which lenders, borrowers, attorneys, and judges would need to apply both systems and search for competing claimants under the rules of both. This would entail additional cost as well as delaying the economic benefits of the new system.

Article 97. Inapplicability of this Law to actions commenced before its entry into force

46. Article 97 is based on recommendation 229 of the Secured Transactions Guide (see chap. XI, paras. 13-16). It introduces an exception to the rule in article 96 that by the end of the transitional period the draft Model Law applies to all security rights within its scope, including prior security rights. In certain situations, only prior law will govern an aspect of a security agreement entered into under that regime.

47. In particular, paragraph 1 provides that, if a matter with respect to a security agreement entered into under prior law is the subject of litigation or arbitration proceedings commenced before the new secured transactions law enters into force, the law governing the matter under dispute will remain the prior law. This paragraph applies to all disputes arising under the prior law, whether between the secured creditor and the grantor, the secured creditor and a competing claimant, or the secured creditor and a person liable, for example, on a receivable or negotiable instrument. It should be noted that the commencement of litigation before the

new secured transactions law enters into force with respect to one dispute does not preclude application of the rules of the new law to a separate dispute arising under the same security agreement.

48. Paragraph 2, on the other hand, provides a substantive rule about enforcement of security rights. Under the rule in this paragraph, if enforcement is commenced under prior law, the secured creditor may continue enforcement under the rules of the prior law even after the new secured transactions law enters into force.

Article 98. Creation of a prior security right

49. Article 98 is based on recommendation 230 of the Secured Transactions Guide (see chap. XI, paras. 17-19). Under this article, if a security right was effectively created under prior law, this is sufficient for its continued effectiveness between the parties under the new secured transactions law even if the manner of creation would not suffice under the new law. This rule avoids creating a situation in which it might be difficult for the secured creditor to obtain the cooperation necessary from the grantor to take the additional steps necessary to create the security right under the new law. After all, a grantor that has already received an extension of credit secured by the security right in the encumbered asset might not have an incentive to cooperate in taking additional steps necessary for the continued effectiveness of the security right under the new law.

Article 99. Third-party effectiveness of a prior security right

50. Article 99 is based on recommendation 231 of the Secured Transactions Guide (see chap. XI, paras. 20-22). Under this article, security rights created and made effective against third parties under prior law before the effective date of the new secured transactions law remain effective against third parties for some time under the new law, even if the conditions for third-party effectiveness under the new law have not been satisfied.

51. Illustration 1: Under the former secured transactions law of State X, a security right effectively created in a receivable is automatically effective against third parties without any additional action required. Prior to the effective date of the new secured transactions law, Grantor created in favour of Creditor a security right in Grantor's receivables. All steps necessary for creation of a security right under prior law were properly taken; therefore, under the prior law, Creditor had a security right in the receivables that was effective against third parties. Under paragraph 1, once the new secured transactions law goes into effect, Creditor's security right will remain effective against third parties until the expiration of the period of time specified in subparagraph 1(a).

52. Illustration 2: Under the former secured transactions law of State Y, a security right effectively created in receivables by a grantor that is a corporation was made effective against third parties by submitting a notice to the registrar of corporations. Such a notice expired after four years. One year prior to the effective date of the new secured transactions law, Grantor created in favour of Creditor a security right in Grantor's receivables. All steps necessary for creation of a security right were properly taken, and Creditor submitted the requisite notice to the registrar of corporations the same day; as a result, under the former legal regime Creditor's security right was effective against third parties. Under paragraph 1, once the new secured transactions law goes into effect, Creditor's security right will remain effective against third parties until the earlier of: (a) the expiration of the four-year period of effectiveness under the prior law of the notice submitted to the registrar of corporations: and (b) the expiration of the period of time specified in subparagraph 1(b).

53. A secured creditor whose security right that is effective against third-parties based on compliance with prior law will cease to be effective against third parties under the rule in paragraph 1 may take the appropriate steps under the new secured transactions law to achieve third-party effectiveness. Most often, this will be accomplished by registering a notice with the Registry. The ability to do so is aided by paragraph 2, which provides that the prior written agreement creating the security right constitutes sufficient authorization for registration of the notice.

54. For some purposes, the secured creditor's concern may be only whether the prior security right is effective against third parties under the new secured transactions law. For

other purposes, however, such as priority, the date in which the security right became against third parties (for purposes of the priority rules) is critically important. Paragraph 3 provides that, so long as the requirements for third-party effectiveness under the new secured transactions law are satisfied before the expiration of the period specified in paragraph 1, the prior security right continues to be effective against third parties from the time when it was made effective against third parties under prior law and, thus, priority will date from that time.

55. If, however, there is a gap between the period in which third-party effectiveness under the prior regime constituted third-party effectiveness under the new secured transactions law and the satisfaction of the requirements for third-party effectiveness under the new law, paragraph 4 provides that the security right is effective against third parties only from the time it is made effective against third parties under the new law and, thus, its priority dates only from that time.

Article 100. Priority of a prior security right

56. […].

[*Note to the Working Group: The Working Group may wish to note that the commentary to this article will be prepared after the Working Group has had the opportunity to consider its content*.]

Article 101. Entry into force of this Law

57. Article 101 is based on recommendation 228 of the Secured Transactions Guide (see chap. XI, paras. 4-6). In determining when the new secured transactions law will enter into force, careful consideration should be given both to obtaining the economic benefits of the new law as soon as possible and to minimizing dislocations that may be caused by significant changes in secured transactions practice resulting from the new law. Inasmuch as the new legal regime will have been chosen because it is an improvement over the prior regime, the new law should come into force as soon as is practical. However, some lead time is necessary in order to, inter alia: (a) publicize the existence of the new law; (b) enable establishment of the Registry (or adaptation of an existing registry to the system required by the new law); and (c) enable participants in the secured transactions system, particularly present and future secured creditors, to prepare, for example, for compliance with new rules and develop new forms.

D. Report of the Working Group on Security Interests on the work of its twenty-ninth session (New York, 8-12 February 2016)

(A/CN.9/871)

[Original: English]

Contents

I. Introduction

1. At its present session, Working Group VI (Security Interests) continued its work on the preparation of a model law on secured transactions (the "draft Model Law"), pursuant to a decision taken by the Commission at its forty-fifth session (New York, 25 June-6 July 2012).[1] At that session, the Commission agreed that, upon its completion of the draft registry guide, the Working Group should undertake work to prepare a simple, short and concise model law on secured transactions based on the general recommendations of the UNCITRAL Legislative Guide on Secured Transactions (the "Secured Transactions Guide") and consistent with all texts prepared by UNCITRAL on secured transactions, including the United Nations Convention on the Assignment of Receivables in International Trade (the "Assignment Convention"), the Supplement on Security Rights in Intellectual Property (the "Intellectual Property Supplement") and the UNCITRAL Guide on the Implementation of a Security Rights Registry (the "Registry Guide").[2]

2. At its twenty-third session (New York, 8-12 April 2013), the Working Group had a general exchange of views on the basis of a note prepared by the Secretariat entitled "Draft Model Law on Secured Transactions" (A/CN.9/WG.VI/WP.55 and Add.1 to 4).

3. At its forty-sixth session (Vienna, 8-26 July 2013), the Commission agreed that the preparation of the draft Model Law was an extremely important project to complement the work of the Commission in the area of security interests and provide urgently needed guidance to States as to how to implement the recommendations of the Secured Transactions Guide. It was also agreed that, in view of the importance of modern secured transactions law for the availability and the cost of credit, and the importance of credit for economic development, such guidance was extremely important and urgent to all States at a time of economic crisis but in particular to States with developing economies and economies in transition. In addition, it was stated that the scope of the draft Model Law should include all economically valuable assets.[3] After discussion, the Commission confirmed the mandate it had given to Working Group VI in 2012 (see para. 1 above).[4] The Commission also agreed

[3] Ibid., *Sixty-eighth Session, Supplement No. 17* (A/68/17), para. 193.

[4] Ibid., para. 194.

that whether that work would include security interests in non-intermediated securities would be assessed at a future time.[5]

4. At its twenty-fourth session (Vienna, 2-6 December 2013), the Working Group considered a note by the Secretariat entitled "Draft Model Law on Secured Transactions" (A/CN.9/WG.VI/WP.57 and Add.1 and 2) and requested the Secretariat to revise the draft Model Law to reflect the deliberations and decisions of the Working Group (A/CN.9/796, para. 11). At its twenty-fifth session (New York, 31 March-4 April 2014), the Working Group continued its work based on a note by the Secretariat entitled "Draft Model Law on Secured Transactions" (A/CN.9/WG.VI/WP.57/Add.2-4 and A/CN.9/WG.VI/WP.59 and Add.1) and requested the Secretariat to revise the draft Model Law to reflect the deliberations and decisions of the Working Group (see A/CN.9/802, para. 11). The Working Group also decided to recommend to the Commission that the draft Model Law address security rights in non-intermediated securities along the lines agreed upon by the Working Group at that session (see A/CN.9/802, para. 93).

5. At its forty-seventh session (New York, 7-18 July 2014), the Commission expressed its satisfaction for the considerable progress achieved by the Working Group in its work and requested the Working Group to expedite its work so as to complete the draft Model Law, including certain definitions and provisions on non-intermediated securities, and to submit it to the Commission for adoption together with a guide to enactment as soon as possible.[6]

6. At its twenty-sixth session (Vienna, 8-12 December 2014), the Working Group considered a note by the Secretariat entitled "Draft Model Law on Secured Transactions" (A/CN.9/WG.VI/WP.61 and Add.1-4) and requested the Secretariat to revise the draft Model Law to reflect the deliberations and decisions of the Working Group (see A/CN.9/830, para. 12). At its twenty-seventh session (New York, 20-24 April 2015), the Working Group considered a note by the Secretariat entitled "Draft Model Law on Secured Transactions" (A/CN.9/WG.VI/WP.63 and Add.1-4) and requested the Secretariat to revise the draft Model Law to reflect the deliberations and decisions of the Working Group (see A/CN.9/836, para. 13).

7. At its forty-eighth session (New York, 29 June-16 July 2015), the Commission considered and approved in principle article 26 of chapter IV (on the registry system) of the draft Model Law and articles 1 to 29 of the draft Registry Act (see A/CN.9/852). At that session, the Commission also agreed that a draft guide to enactment (the "draft Guide to Enactment") should be prepared and referred that task to the Working Group.[7]

8. At its twenty-eighth session (Vienna, 12-16 October 2015), the Working Group considered a note by the Secretariat entitled "Draft Model Law on Secured Transactions" (A/CN.9/WG.VI/WP.65 and Add.2 and 4) and requested the Secretariat to revise the draft Model Law to reflect the deliberations and decisions of the Working Group (see A/CN.9/865, para. 14).

II. Organization of the session

9. The Working Group, which was composed of all States members of the Commission, held its twenty-ninth session in New York from 8 to 12 February 2016. The session was attended by representatives of the following States members of the Working Group: Armenia, Australia, Belarus, Brazil, Canada, China, Colombia, Czech Republic, Ecuador, El Salvador, France, Germany, Hungary, India, Indonesia, Israel, Italy, Japan, Liberia, Malaysia, Mexico, Namibia, Pakistan, Panama, Republic of Korea, Russian Federation, Sierra Leone, Singapore, Spain, Switzerland, Thailand, Turkey, Uganda, United Kingdom of Great Britain and Northern Ireland and United States of America.

10. The session was attended by observers from the following States: Iraq, Libya, Malta, Qatar, Syria and Ukraine. The session was also attended by observers from the Holy See and the European Union.

[5] Ibid., para. 332.

[6] Ibid., *Sixty-ninth Session, Supplement No. 17* (A/69/17), para. 163.

[7] Ibid., para. 216.

11. The session was also attended by observers from the following international organizations:

(a) *United Nations system*: World Bank and World Intellectual Property Organization (WIPO);

(b) *International non-governmental organizations invited by the Commission*: American Bar Association (ABA), Asociación Americana de Derecho International Privado (ASADIP), Commercial Finance Association (CFA), Factors Chain International and International Factors Group (FCI+IFG), Forum for International Conciliation and Arbitration (FICACIC), International Bar Association (IBA), International Insolvency Institute (III), Moot Alumni Association (MAA), National Law Centre for Inter-American Free Trade (NLCIFT) and The European Law Students' Association (ELSA).

12. The Working Group elected the following officers:

Chairperson: Sr. Rodrigo LABARDINI (Mexico)

Rapporteur: Ms. Pavlína RUCKI (Czech Republic)

13. The Working Group had before it the following documents: A/CN.9/WG.VI/WP.67 (Annotated Provisional Agenda) and A/CN.9/WG.VI/WP.65/Add.1 and 3, A/CN.9/WG.VI/WP.68 and Add. 1 and 2 (Draft Model Law on Secured Transactions), as well as A/CN.9/WG.VI/WP.66/Add.1 and 3 and A/CN.9/WG.VI/WP.69 and Add. 1 and 2 (Draft Guide to Enactment).

14. The Working Group adopted the following agenda:

1. Opening of the session and scheduling of meetings.
2. Election of officers.
3. Adoption of the agenda.
4. Draft Model Law on Secured Transactions.
5. Draft Guide to Enactment of the draft Model Law on Secured Transactions.
6. Other business.
7. Adoption of the report.

III. Deliberations and decisions

15. The Working Group considered notes by the Secretariat entitled "Draft Model Law on Secured Transactions" (A/CN.9/WG.VI/WP.65/Add.1 and 3). The deliberations and decisions of the Working Group are set forth below in chapter IV. The Secretariat was requested to revise the draft Model Law and the draft Guide to Enactment to reflect the deliberations and decisions of the Working Group.

IV. Draft Model Law on Secured Transactions

A. Chapter IV. The registry system (A/CN.9/WG.VI/WP.65/Add.1)

Article 26. Establishment of a public registry

16. In order to deal with the legal purpose of the Registry and its relationship to the draft Model Law, rather than with the operational characteristics of the Registry, it was agreed that article 26 of the draft Model Law should be revised to read along the following lines: "The Registry is established for the purpose of giving effect to the provisions of the Law relating to the registration of notices of security rights". Subject to that change, the Working Group adopted article 26 of the draft Model Law.

B. Registry-related provisions (A/CN.9/WG.VI/WP.65/Add.1)

17. Differing views were expressed with respect to the placement of the registry-related provisions. One view was that those provisions were an integral part of, and should thus be included in, the draft Model Law. Another view was that those provisions dealt with both substantive and technical matters that could be addressed in primary or secondary legislation and should thus be included in an annex to the draft Model Law. It was stated that, if the registry-related provisions were included in an annex to the draft Model Law, to highlight their importance and their nature as legal rules, their title should be "model registry act" or "model registry law". The prevailing view, however, was that, as a compromise between the above-mentioned views, those provisions should be presented right after article 26 of the draft Model Law with a separate numbering. It was widely felt that, while the registry-related provisions were of equal importance to the provisions of the draft Model Law, their enactment in primary or secondary legislation, or a combination of both, should be left to each enacting State. In addition, it was widely felt that, to avoid inadvertently creating the impression that those provisions should in all cases be enacted in a law other than the secured transactions law, they should be called "model registry-related provisions", rather than "model registry act" or "model registry law". After discussion, it was agreed that the registry-related provisions should be presented right after article 26 of the draft Model Law with a separate numbering under the heading "model registry-related provisions".

Article 1. Establishment of a public registry

18. In view of its decision as to the placement of the registry-related provisions (see para. 17 above) and the fact that article 1 of the registry-related provisions merely restated the essence of article 26 of the draft Model Law, the Working Group agreed that article 1 of the registry-related provisions should be deleted.

Article 2. Definitions

19. It was agreed that, like article 2 of the draft Model Law, article 2 of the registry-related provisions should include a chapeau along the following lines: "For the purposes of these registry-related provisions".

"Amendment"

20. It was agreed that the definition of the term "amendment" should be revised to read along the following lines: "'Amendment notice' means a notice submitted to the Registry in the prescribed registry notice form to modify information contained in a related registered notice".

"Cancellation"

21. It was agreed that the definition of the term "cancellation" should be revised to read along the following lines: "'Cancellation notice' means a notice submitted to the Registry in the prescribed registry notice form to cancel the effectiveness of the registration of all related registered notices". In that context, it was noted that a partial cancellation amounted to an amendment.

22. It was also agreed that, to have a complete set of definitions of all kinds of notices referred to in the registry-related provisions, the term "initial notice" should also be defined along the following lines: "'Initial notice' means a notice submitted to the Registry in the prescribed registry notice form to make the security right, to which the notice relates, effective against third parties".

"Law"

23. It was agreed that, in view of the decision of the Working Group with respect to the placement of the registry-related provisions (see para. 17 above), the definition of the term "law" was no longer necessary and should thus be deleted.

"Notice"

24. It was agreed that, as all kinds of notices were already defined, the definition of the term "notice" should be made into a rule of interpretation that should read along the following lines: "'Notice' includes an initial notice, an amendment notice and a cancellation notice".

"Registrant"

25. It was agreed that the definition of the term "registrant" should be revised to read along the following lines: "'Registrant' means a person who submits a notice to the Registry".

"Registrar"

26. As the term "registrar" was only used in article 28 of the registry-related provisions, it was agreed that its substance should be included in that article and the definition should be deleted. In that connection, it was also agreed that article 28 should track the language of recommendation 2 of the Registry Guide and also include a reference to the monitoring of the performance of the registrar's duties by the authority to be specified by the enacting State. It was further agreed that the draft Guide to Enactment should clarify that, while the Registry could be operated by a private or public entity, it should always be supervised by the public authority specified by the enacting State (e.g. ministry or central bank).

"Registration"

27. It was agreed that the definition of the term "registration" might be reviewed for consistency with the registry-related provisions and in particular with article 14, pursuant to which the registration of a notice was effective when the information in a notice was entered into the registry record so as to be accessible to searchers of the public registry record.

"Registry"

28. It was agreed that the definition of the term "Registry" should be revised to read along the following lines: "'Registry' means the registry established pursuant to article 26 of this Law".

"Regulation"

29. It was agreed that, in view of the decision of the Working Group with respect to the placement of the registry-related provisions (see para. 17 above) and the fact that the term "regulation" was not universally understood in the same way, its definition was no longer necessary and should thus be deleted.

30. At the close of its consideration of article 2 of the registry-related provisions, the Working Group considered whether the term "registered notice" should be defined along the following lines: "'Registered notice' means a notice after the information in the notice has been entered into the public registry record". One view was that that term did not need to be defined. It was stated that the definitions of the term "notice", the various types of notice and the term "registration", as well as article 14 of the registry-related provisions, were sufficient. It was also stated that the proposed wording was inconsistent with article 14 of the registry-related provisions that required information to be made accessible to searchers of the public registry record for a registered notice to be effective. Another view was that the term "registered notice" should be defined as it was used in several articles of the registry-related provisions. It was stated that the proposed wording could form a starting point for a definition that would be consistent with article 14 of the registry-related provisions. After discussion, the Working Group agreed that the matter could be reviewed at a later stage on the basis of an appropriately revised definition.

31. Subject to the above-mentioned changes, the Working Group adopted article 2 of the registry-related provisions.

Article 3. Grantor's authorization for registration

32. With respect to paragraph 1, it was widely felt that, in the case of multiple grantors, lack of authorization by one grantor should not result in the registration of an initial notice being generally ineffective. In order to address that point, it was agreed that paragraph 1 should be revised to read along the following lines: "Registration of an initial notice with respect to a security right in an asset of a grantor is ineffective unless authorized by that grantor in writing".

33. With respect to paragraph 2, it was agreed that: (a) it should be revised to also refer to an amendment notice that extended the period of effectiveness of the registration of a notice within square brackets to reflect option B or C of article 15 of the registry-related provisions; and (b) the words "not included in the security agreement" should be deleted in view of the change to paragraph 5 (see para. 35 below).

34. With respect to paragraph 4, it was agreed that it should refer to an initial or amendment notice. It was also agreed that the draft Guide to Enactment should explain that, like paragraphs 1-3, paragraph 4 also required that the grantor's authorization be in writing.

35. With respect to paragraph 5, it was agreed that it should be revised to read along the following lines: "A written security agreement is sufficient to constitute authorization by the grantor for the registration of an initial or amendment notice covering the encumbered assets described in the security agreement".

36. With respect to paragraph 6, it was agreed that, while paragraph 4 might be sufficient to reflect the fact that the Registry did not have the right to require evidence of the grantor's authorization, paragraph 6 had educational value and should thus be retained. As to the placement of paragraph 6 in the text, while it was stated that it would also fit in article 8, it was agreed that, for the sake of having a complete set of rules dealing with the grantor's authorization for registration in one and the same article, it should be retained in article 3.

37. In the discussion, the question was raised whether, in the case of a security right created by transfer of possession to the secured creditor and conclusion of an oral agreement, possession should be sufficient to reflect the grantor's authorization for registration. After discussion, it was agreed that, in such a case, possession would not be sufficient, as: (a) the creation of a security right was a different issue from the issue of the grantor's authorization for registration; (b) the relinquishment of possession could result in the extinction of the security right; and (c) the possession of an asset might be transferred to the secured creditor for reasons of confidentiality that would preclude the registration of a notice with respect to the security right.

38. Subject to the above-mentioned changes, the Working Group adopted article 3 of the registry-related provisions.

Article 4. One notice sufficient for security rights under multiple security agreements

39. The Working Group agreed that article 4 of the registry-related provisions should be revised to read along the following lines: "The registration of a single notice may relate to security rights granted by the grantor to the secured creditor under one or more than one security agreement". Subject to that change, the Working Group adopted article 4 of the registry-related provisions.

Article 5. Advance registration

40. The Working Group agreed that article 5 of the registry-related provisions should be revised to read along the following lines: "A notice may be registered before the creation of a security right or the conclusion of a security agreement to which the notice relates". Subject to that change, the Working Group adopted article 5 of the registry-related provisions.

Article 6. Public access

41. With respect to article 6 of the registry-related provisions, it was agreed that: (a) to better reflect its contents, its title should be revised to read along the following lines "conditions for access to registry services"; (b) for reasons of consistency in the terminology

used, subparagraph 1(a) should be revised to refer to the "prescribed registry notice form"; and (c) paragraph 2 should be revised to follow the formulation of paragraph 1. It was also agreed that the draft Guide to Enactment should explain the words "secure access requirements" and their relationship to the need to protect secured creditors against the risk of registration of unauthorized amendment and cancellation notices that was addressed in article 22 of the registry-related provisions. Subject to those changes, the Working Group adopted article 6 of the registry-related provisions.

Article 7. Rejection of the registration of a notice or a search request

42. With respect to subparagraphs 1(a), 1(b), and 2(b), it was agreed that reference should be made to "mandatory", rather than "required", designated fields. It was also agreed that the draft Guide to Enactment should explain that: (a) the registration of a notice could also be rejected, if no information was entered in one of the mandatory designated fields, even if the information entered in the other fields was legible; and (b) a search request could also be rejected if the registration number given by a searcher had expired or was non-existent. Subject to those changes, the Working Group adopted article 7 of the registry-related provisions.

Article 8. No verification by the Registry

43. It was agreed that article 8 of the registry-related provisions should be revised to more clearly address, in line with recommendation 7 of the Registry Guide: (a) the obligation of the Registry to maintain information about the registrant's identity submitted in accordance with article 6, subparagraph 1(b); (b) the prohibition of the Registry requiring verification of that information; and (c) the prohibition of the Registry conducting any scrutiny of the content of a notice or search request other than that permitted under articles 6 and 7. It was also agreed that the title of the article should be revised to better reflect its content. Subject to those changes, the Working Group adopted article 8 of the registry-related provisions.

Article 9. Information required in an initial notice

44. The Working Group adopted article 9 of the registry-related provisions unchanged.

Article 10. Grantor identifier

45. It was agreed that paragraph 4 should be revised to avoid creating the impression that it referred to a law or decree that was no longer in force. It was also agreed that the draft Guide to Enactment should make reference to a number as a grantor identifier. Subject to those changes, the Working Group adopted article 10 of the registry-related provisions.

Article 11. Secured creditor identifier

46. It was agreed that paragraph 2 should be revised to avoid giving the impression that the identifier of the representative of a secured creditor that was a legal person had to appear on the document, law, or decree constituting the legal person. Subject to that change, the Working Group adopted article 11 of the registry-related provisions.

Articles 12-15

47. After discussion, the Working Group adopted articles 12-15 of the registry-related provisions unchanged.

Article 16. Obligation to send a copy of a registered notice

48. With respect to article 16 of the registry-related provisions, it was agreed that: (a) subparagraph 1(a) should refer to the date and time recorded by the Registry under article 14, paragraph 3; (b) subparagraph 1(b) should refer to the registration number without repeating concepts that were already included in the definition of the term "registration number" in article 2, subparagraph (j) of the registry-related provisions; (c) a new paragraph should be added to clarify that the failure of the secured creditor to comply with its obligation pursuant to paragraph 2 would not affect the effectiveness of the registration of the notice; (d) paragraph 3 should be retained to limit the secured creditor's liability to nominal

penalties to be specified by the enacting State and actual damages proven to have been caused by the secured creditor's failure, while the standard of liability and other related matters could be left to the relevant law of the enacting State; and (e) paragraph 4 should be placed in article 6 or 8, which addressed issues related to the registrant's identity. It was also agreed that the draft Guide to Enactment should explain that, under paragraph 2, the secured creditor was obliged to send a copy to the grantor at the address set forth in the notice or, if the secured creditor was aware of the fact that the grantor had changed address and knew that new address or could reasonably discover it, at the grantor's new address. Subject to those changes, the Working Group adopted article 16 of the registry-related provisions.

Article 17. Right to register an amendment or cancellation notice

49. It was agreed that paragraph 2 of article 17 of the registry-related provisions should be revised to clarify that, after (rather than "upon") the registration of an amendment notice changing the person identified in a registered initial notice as the secured creditor, only the person identified in the amendment notice as the secured creditor was entitled to register an amendment or cancellation notice. It was also agreed that the draft Guide to Enactment should explain that the secured access data of the secured creditor would need to be modified to minimize the risk of the registration of unauthorized amendment or cancellation notices. Subject to those changes, the Working Group adopted article 17 of the registry-related provisions.

Article 18. Information required in an amendment notice

50. It was agreed that paragraph 1 of article 18 of the registry-related provisions should be revised to clarify that: (a) subparagraph 1(a) referred to the registration number of the initial notice to which the amendment notice related; and (b) subparagraph 1(b) referred to the information to be added or changed on the understanding that, while no information should be deleted from the registry record, a release of an encumbered asset or grantor amounted to a "partial deletion", a matter that should be clarified in the draft Guide to Enactment. It was also agreed that paragraph 2 should be modified to read along the following lines: "An amendment notice may modify one or more than one item of information in the notice to which it relates". Subject to those changes, the Working Group adopted article 18 of the registry-related provisions.

Article 19. Global amendment of secured creditor information

51. It was agreed that article 19 of the registry-related provisions should be revised so that: (a) option A would permit a person to register a single amendment notice to amend its identifier, address or both, in all registered notices in which that person was identified as the secured creditor; and (b) option B would provide that the Registry could make such a global amendment upon the request of that person. It was also agreed that the reasons for such a global amendment (i.e. a change of the secured creditor's identifier, address, or both, or an assignment of the secured obligation) should be discussed in the draft Guide to Enactment. Subject to those changes, the Working Group adopted article 19 of the registry-related provisions.

Article 20. Information required in a cancellation notice

52. It was agreed that article 20 of the registry-related provisions should be revised to refer to the registration number of the initial notice to which the cancellation notice related, without repeating elements contained in the definition of the term "registration number". Subject to that change, the Working Group adopted article 20 of the registry-related provisions.

Article 21. Compulsory registration of an amendment or cancellation notice

53. It was agreed that article 21 of the registry-related provisions should be revised so that: (a) for reasons of clarity in the text, paragraph 1 would be separated in two paragraphs (one that would deal with an amendment notice deleting encumbered assets described in a registered notice and another that would deal, within square brackets as it stated an optional rule, with an amendment notice reducing the maximum amount specified in a registered

notice); (b) for reasons of consistency with article 3, paragraph 4, that permitted the secured creditor to register a notice even before the grantor had authorized the registration, subparagraph 2(a) would apply only where the secured creditor knew that the grantor's authorization was not forthcoming or where the grantor requested the registration of a cancellation notice; (c) subparagraphs 2(b) and (c) would be set out in a separate paragraph; (d) paragraph 3 would apply where the registration was not authorized at all (subpara. 2(a)) or was authorized but not to the extent addressed in the registered notice (subpara. 1(a)); (e) paragraph 4 would require that, in its request to the secured creditor, the grantor state its identifier and the registration number of the initial notice to which the requested amendment or cancellation notice related; and (f) paragraph 6 would require the registration of an amendment or cancellation notice where a judicial or administrative order had been issued, leaving to each enacting State to determine who should register that notice (e.g. the Registry or an officer of the authority that issued the order). Subject to those changes, the Working Group adopted article 21 of the registry-related provisions.

Article 22. Amendment or cancellation notices not authorized by the secured creditor

54. With respect to article 22 of the registry-related provisions, it was agreed that: (a) in options A and C, and in paragraph 1 of option B and D, the word "amendment" should be retained outside square brackets (or the matter could be addressed with new wording to be prepared by the Secretariat); (b) in paragraph 2 of option B, the bracketed text should be retained outside square brackets to avoid that the exception in paragraph 2 would render meaningless the rule in paragraph 1, and the text would be clarified to refer to the registration of an unauthorized amendment or cancellation notice; and (c) in paragraph 2 of option D, for reasons of clarity, the word "nonetheless" should be deleted. Subject to those changes, the Working Group adopted article 22 of the registry-related provisions.

Article 23. Search criteria

55. It was agreed that, in subparagraph (b), the words "assigned to the initial notice" should be deleted, as they were part of the definition of the term "registration number". Subject to that change, the Working Group adopted article 23 of the registry-related provisions.

Article 24. Search results

56. It was agreed that paragraph 2 should be revised to read along the following lines: "Upon request by a searcher, the Registry must issue an official search certificate setting out the search result and certifying that the search result was issued by the Registry". Subject to that change, the Working Group adopted article 24 of the registry-related provisions.

Article 25. Registrant errors in required information

57. With respect to article 25, it was agreed that: (a) paragraphs 1 and 2 should refer to "information in" a notice being retrieved by a search of the "public" registry record; (b) a footnote should be added to paragraph 2 stating that it would be necessary only if the enacting State implemented option B of article 24. Subject to those changes, the Working Group adopted article 25 of the registry-related provisions.

Articles 26 and 27

58. The Working Group considered a proposal for revisions to articles 26 and 27 of the registry-related provisions. While there was broad agreement in the Working Group that the proposed revised text constituted a substantial improvement of the text of those articles, it was widely felt that it could be further refined. Subject to those changes, the Working Group adopted articles 26 and 27 as revised.

Article 28. Appointment of the registrar

59. Recalling its decision with respect to the definition of the term "registrar" (see, para. 26), the Working Group agreed that article 28 should be revised to also make reference to the monitoring of the performance of the registrar's duties by the authority to be specified

by the enacting State. Subject to that change, the Working Group adopted article 28 of the registry-related provisions.

Article 29. Organization of information in registered notices

60. With respect to article 29 of the registry-related provisions, it was agreed that: (a) to better reflect its contents, the title should be revised to refer to information in "the registry record" (rather than to information "in registered notices"); (b) in both options of subparagraph 2(b), the words "or the registration number assigned to the initial notice" should be deleted, as a search against that criterion would retrieve only a single registered notice and thus fail to achieve the purpose of a global amendment; and (c) in paragraph 3, the words "and the registration of an amendment or cancellation notice does not result in the amendment or deletion of information in any associated notice" should be deleted as redundant. Subject to those changes, the Working Group adopted article 29 of the registry-related provisions.

Article 30. Integrity of information in the registry record

61. It was agreed that paragraph 2 needed to be revised to clarify the object of reconstruction. Subject to that change, the Working Group adopted article 30 of the registry-related provisions.

Article 31. Removal of information from the public registry record and archival

62. With respect to article 31 of the registry-related provisions, it was agreed that: (a) option A should be revised to clarify that, upon the expiry of the notice or registration of a cancellation notice, the Registry was not only obliged to remove information in a registered notice from the public registry record, but also prohibited from doing so before the expiry of the notice or the registration of a cancellation notice; (b) a footnote should be added to option A stating that option A would be necessary only if the enacting State implemented option A or B of article 22; and (c) a footnote should be added to option B stating that option B would be necessary only if the enacting State implemented option C or D of article 22. Subject to those changes, the Working Group adopted article 31 of the registry-related provisions.

Article 32. Correction of errors by the Registry

63. With respect to article 32 of the registry-related provisions, it was agreed that: (a) to better reflect its contents, the title should be revised to refer to errors "made" by the Registry; (b) in options A and B of paragraph 2 (and where appropriate throughout the registry-related provisions), reference should be made to the "public" registry record; (c) for reasons of clarity, in options B and D of paragraph 2, the exception should be set forth in a separate sentence; (d) the draft Guide to Enactment should explain that, to reduce the risk of error or ensure timely correction, the secured creditor should monitor the information entered into the public registry record, which, in the case of a fully electronic registry, should be easy for the secured creditor to do; and (e) the entire article should be placed within square brackets with a footnote indicating that it would be appropriate for States that had registry systems that were not fully electronic. Subject to those changes, the Working Group adopted article 32 of the registry-related provisions.

Article 33. Limitation of liability of the Registry

64. With respect to article 33 of the registry-related provisions, it was agreed that: (a) in the chapeau of option A, to better reflect the limitation of liability, the words "limited for" should be replaced with the words "limited to"; and (b) the draft Guide to Enactment should give examples of approaches to the limitation of the liability of the Registry (such as a fixed monetary amount, an amount up to the value of the encumbered asset and a maximum annual monetary amount). Subject to those changes, the Working Group adopted article 33 of the registry-related provisions.

Article 34. Registry fees

65. With respect to article 34 of the registry-related provisions, it was agreed that: (a) in line with the approach followed in recommendations 54, subparagraph (i), of the Secured Transactions Guide and 36 of the Registry Guide, both options (fees at cost-recovery level and no fees at all) should be preserved to ensure that the Registry would not be used as a source of revenue; (b) paragraph 1 of option A should be revised to provide that fees to be specified by the enacting State could be charged or collected for the registry services, leaving all other details to the enacting State; (c) a new paragraph could be inserted to provide that the authority to be specified by the enacting State might modify the fee schedule from time to time; (d) paragraph 2 of option A should be revised to provide that the Registry should be able to publicize the fee schedule (but not modify it); and (e) the draft Guide to Enactment should explain both options in a balanced and neutral way with cross references to the Secured Transactions Guide and the Registry Guide. Subject to those changes, the Working Group adopted article 34 of the registry-related provisions.

C. Chapter VI. Rights and obligations of the parties to a security agreement and third-party obligors (A/CN.9/WG.VI/WP.65/Add.3)

Section I. Mutual rights and obligations of the parties to a security agreement

Article 47. Source of mutual rights and obligations of the parties

66. Differing views were expressed as to whether article 47 should be retained. After discussion, the Working Group agreed that: (a) subparagraphs (a) (application of the provisions of chapter VI of the draft Model Law) and (b) (application of contract law) were self-evident and should be deleted; and (b) subparagraphs (c) (security agreement) and (d) (trade usages and practices) should be retained, the latter with any necessary modification to be aligned more closely with article 11, paragraph 2, of the Assignment Convention. Subject to those changes, the Working Group adopted article 47.

67. In the discussion, differing views were expressed as to whether a new provision along the lines of article 11, paragraph 3, of the Assignment Convention (which was based on article 9, paragraph 2, of the United Nations Convention on Contracts for the International Sale of Goods), dealing with the application of practice-specific international trade usages, should be added in article 47. After discussion, the Working Group agreed that that matter should be left to the contract law of the enacting State.

Article 48. Obligation of a person in possession to exercise reasonable care

68. Differing views were expressed as to whether article 48 should be listed in article 3 as a mandatory law provision. It was ultimately agreed that article 48 could be retained as a mandatory law provision on the understanding that the reference to reasonable care and the standards of conduct contained in article 4 (good faith and commercial reasonable manner) provided sufficient flexibility. After discussion, the Working Group adopted article 48 unchanged.

Article 49. Obligation of a secured creditor to return an encumbered asset [or to register an amendment or cancellation notice]

69. It was agreed that the obligation of a secured creditor to register an amendment or cancellation notice was sufficiently addressed in article 21 of the registry-related provisions and thus the reference to that obligation within square brackets in the title and the text of article 49 should be deleted. It was also agreed that release of control of an encumbered asset by a secured creditor was a different issue and should not be addressed in article 49. Subject to those changes, the Working Group adopted article 49.

Article 50. Right of a secured creditor to use, be reimbursed for expenses and inspect an encumbered asset

70. It was agreed that, in paragraph 2, the reference to inspection by the secured creditor, where the encumbered asset was in the possession of a person other than the grantor, should be deleted. It was widely felt, in view of the definition of the term “possession” in article 2,

subparagraph (y), possession by the grantor would include possession by the grantor's representative or an independent person acting on behalf of the grantor. It was also agreed that the draft Guide to Enactment should explain: (a) the inter-relationship of article 50, subparagraph 1(b) (use of encumbered assets) and article 48 (reasonable care for encumbered assets) and that the two provisions should be read together; and (b) as a result of the standards of conduct contained in article 4 (good faith and reasonable commercial manner), the secured creditor should be able to inspect the encumbered assets in the grantor's possession only at reasonable times and pursuant to a prior notice. Subject to those changes, the Working Group adopted article 50.

Article X. Grantor's right to obtain information

71. With respect to article X (see note after art. 50), it was agreed that: (a) it was useful, as the notice registration system foreseen in the draft Model Law did not disclose sufficient information about a security right, and should thus be retained; (b) the right to obtain information from the secured creditor should be given to the grantor (other than an outright transferor of a receivable), but not to the grantor's third-party creditors (information to whom could be given at the request of the grantor); (c) the grantor's right to obtain information should be limited to information about the grantor's current indebtedness and the encumbered assets currently encumbered; and (d) the draft Guide to Enactment should discuss the possibility of extending the right to obtain information to the grantor's third-party creditors (in particular judgement creditors), and explain that other matters (such as the legal consequences of the secured creditor's failure to comply or to give accurate information) would be left to other law. Subject to those changes, the Working Group adopted article X.

Articles 51, 52, 54, 56, 62, 64 and 65

72. The Working Group adopted articles 51, 52, 54, 56, 62, 64 and 65 unchanged.

Article 53. Right of the secured creditor to payment of a receivable

73. With respect to article 53, it was agreed that: (a) the chapeau of paragraph 1 would be revised to refer to a grantor of a security right in a receivable; (b) subparagraph 1(c) should be aligned more closely with article 14, subparagraph 1(c) of the Assignment Convention; and (c) paragraph 2 should be aligned more closely with article 14, paragraph 2, of the Assignment Convention. Subject to those changes, the Working Group adopted article 53.

Section II. Rights and obligations of third party-obligors

74. It was agreed that, to more closely reflect its contents and the overall structure of the provisions of the draft Model Law, the title of section II of chapter VI on the rights and obligations of third-party obligors should clarify that the section contained asset-specific rules.

Article 55. Protection of the debtor of the receivable

75. It was agreed that the draft Guide to Enactment should explain that paragraph 1 was sufficiently broad to cover all payment terms, including those relating to the currency and the time of payment. After discussion, the Working Group adopted article 55 unchanged.

Article 57. Discharge of the debtor of the receivable by payment

76. With respect to article 57, it was agreed that: (a) in paragraph 5, the term "subsequent security rights" should be clarified to reflect the meaning of the term "subsequent assignments"; and (b) in paragraph 8, the second set of bracketed words should be retained outside square brackets, while the first set of bracketed words should be deleted. Subject to those changes, the Working Group adopted article 57.

Article 58. Defences and rights of set-off of the debtor of the receivable

77. With respect to article 58, it was agreed that: (a) in subparagraph 1(a), reference should be made to a "receivable arising from a contract" rather than to a "contractual receivable",

while the words "giving rise to the receivable" should be deleted; and (b) in paragraph 2, the words "limiting in any way the initial or subsequent grantor's right to create the security right" should be deleted as redundant. Subject to those changes, the Working Group adopted article 58.

Article 59. Agreement not to raise defences or rights of set-off

78. While some doubt was expressed as to whether the reference in paragraph 2 to the effectiveness of a waiver of the debtor's defences was necessary, it was ultimately agreed that it could be retained for reasons of consistency with article 19, paragraph 2, of the Assignment Convention, on which article 59, paragraph 2, was based. After discussion, the Working Group adopted article 59 unchanged.

Article 60. Modification of the original contract

79. It was agreed that the words "created by a security agreement" in paragraphs 1 and 2 were redundant and should be deleted. Subject to that change, the Working Group adopted article 60.

Article 61. Recovery of payments made by the debtor of the receivable

80. It was agreed that the reference to a transferor in an outright transfer of receivables in the definition of the term "grantor" contained in article 2, subparagraph (n), should be retained outside square brackets, so that the term "grantor" would include a transferor in an outright transfer of a receivable. As a result, it was agreed that the term "grantor" in article 61 was sufficient and the reference to a transferor in an outright transfer of receivables was redundant and should be deleted. Subject to that change, the Working Group adopted article 61.

Article 63. Rights as against the depositary bank

81. Subject to the substitution of the term "depositary institution" for the term "depositary bank" (see definition of the term "bank account" in art. 2, subpara. (c)), the Working Group adopted article 63.

D. Chapter VII. Enforcement of a security right (A/CN.9/WG.VI/WP.65/Add.3)

Article 66. Post-default rights

82. With respect to article 66, it was agreed that: (a) the definition of the term "default" contained in paragraph 1 should be moved to article 2 with the clarification that it would be subject to party autonomy and the explanation in the draft Guide to Enactment that it did not infringe on other laws; and (b) paragraph 3 should be deleted as its essence was covered in paragraph 2. It was also agreed that the draft Guide to Enactment should discuss the matter addressed in paragraph 3 as an example of the application of the rule in paragraph 2. Subject to those changes, the Working Group adopted article 66.

Article 67. Methods of exercising post-default rights

83. Recalling its earlier discussion (see A/CN.9/836, paras. 48-50), the Working Group considered the question whether article 67 should refer to the possibility of the parties exercising their post-default rights through alternative dispute resolution (ADR), including online dispute resolution (ODR), mechanisms (conciliation and arbitration).

84. With respect to ODR, the Working Group noted the restrictive mandate given by the Commission to Working Group III (Online Dispute Resolution) "to continue its work towards elaborating a non-binding descriptive document reflecting elements of an ODR process, on which elements the Working Group had previously reached consensus, excluding the question of the nature of the final stage of the ODR process (arbitration/non-

arbitration)",[8] and the one year given by the Commission to Working Group III to bring its work "to an end, whether or not a result had been achieved".[9]

85. There was general agreement in the Working Group as to the value of ADR. However, differing views were expressed as to whether a short reference to ADR in article 67 would be useful. After discussion, it was agreed that, in view of the complexity of the matter and the need to coordinate with Working Group II (Arbitration and Conciliation) and to discuss the matter on the basis of a detailed proposal, no such reference should be made in article 67 or other part of the draft Model Law (such as chapter VI on the mutual rights and obligations of the parties, as, in view of the consensual nature of ADR, it was said that a reference to it would fit better in chapter VI). It was also agreed that the draft Guide to Enactment should explain that there was nothing in the draft Model Law that would preclude the grantor and the secured creditor from agreeing to resolve any dispute that may arise between them by ADR, and explain the advantages of ADR, but also the difficulties associated with the use of ADR in the context of secured transactions (e.g. arbitrability, third-party rights and confidentiality of arbitral proceedings).

86. After discussion, the Working Group adopted article 67 unchanged.

Article 68. Relief for non-compliance

87. After discussion, the Working Group was not able to reach agreement on article 68 and referred it to the Commission for further consideration on the basis of a revised version to be prepared by the Secretariat.

Article 69. Right of affected persons to terminate enforcement

88. With respect to article 69. it was agreed that: (a) paragraph 1 would refer to the grantor, the debtor and any other person with a right in the encumbered asset; (b) paragraph 2 would clarify that the words "the conclusion of an agreement by the secured creditor for that purpose" referred to an agreement "for the purpose of a sale or other disposition"; and (c) paragraph 3 should be retained outside square brackets with a clarification that it did not provide the lessee or licensee with more rights than it had under the other provisions of the draft Model Law. Subject to those changes, the Working Group adopted article 69.

Article 70. Right of the higher-ranking secured creditor to take over enforcement

89. With respect to article 70, it was agreed that: (a) paragraphs 1 and 3 should be aligned more closely with recommendation 145 of the Secured Transactions Guide; (b) paragraph 1 should be revised to clarify that, where the secured creditor was a transferee of a receivable in an outright transfer, it did not need to continue enforcement; and (c) paragraph 2 should include similar clarifications as article 69, paragraph 2 (see para. 88 above). Subject to those changes, the Working Group adopted article 70.

Article 71. Right of the secured creditor to possession of an encumbered asset

90. With respect to article 71, it was agreed that: (a) its title should be revised to better reflect its content; (b) in paragraph 1, reference should be made to those parties in connection to any person with a superior right, including lessees and licensees; (c) in subparagraph 2(a), reference should be made to the grantor's consent, which could be given before or after default; (d) in subparagraph 2(c), it should be clarified that it referred to the person in possession of an encumbered asset; (e) paragraph 3 would be deleted on the understanding that the notice referred to in subparagraph 2(b) would be subject to the general standards of conduct contained in article 4 (good faith and commercially reasonable manner); (f) paragraph 4 would be retained outside square brackets and also include a reference to assets of a kind sold on a recognized market along the lines of recommendation 149 of the Secured Transactions Guide; and (g) in paragraph 5, option B would be retained on the understanding that the junior secured creditor could enforce its security right without obtaining possession and the buyer of the encumbered asset would acquire the asset subject

[8] *Official Records of the General Assembly, Seventieth Session, Supplement No. 17* (A/70/17), para. 352.
[9] Ibid.

to the right of the senior secured creditor. It was also agreed that, to ensure consistency with paragraph 1 of article 71 and other articles that dealt with enforcement by application to a court or other authority, article 67, paragraph 2, should also refer to the provisions of the enforcement chapter of the draft Model Law. It was further agreed that the draft Guide to Enactment would explain that: (a) the notice referred to in subparagraph 2(b) was subject to the general standards of conduct contained in article 4; and (b) the term "recognized market" referred to in paragraph 4 meant a market in which prices were set by the market and not by individual sellers. Subject to those changes, the Working Group adopted article 71.

E. Future work

91. At the close of its session, the Working Group decided to submit the draft Model Law to the Commission for consideration and adoption at its forty-ninth session, which was scheduled to take place in New York from 27 June to 15 July 2016. The Working Group also decided to request the Commission for an additional 1 or 2 sessions in order to complete the draft Guide to Enactment.

92. The Working Group noted that the thirtieth and thirty-first sessions of the Working Group were scheduled to take place in Vienna from 5 to 9 December 2016 and in New York from 13 to 17 February 2017, those dates being subject to approval by the Commission at its forty-ninth session.

E. Note by the Secretariat on a draft model law on secured transactions

(A/CN.9/WG.VI/WP.68 and Add.1-2)

[Original: English]

Contents

Chapter I. Scope of application and general provisions

Article 1. Scope of application

1. This Law applies to security rights in movable assets.

2. With the exception of articles 66, paragraphs 1-3, to 75,[*] this Law applies to outright transfers of receivables [and, in such a case, references in this Law to a grantor apply to the transferor, references to a secured creditor apply to the transferee, references to a security agreement apply to the agreement for the outright of a receivable, references to a security right apply to the right of the transferee and references to an encumbered asset apply to the receivable, but references to a secured obligation do not apply to the right to payment of the price of the receivable].

3. Notwithstanding paragraph 1, this Law does not apply to security rights in:

(a) The right to request payment under or to receive the proceeds of an independent guarantee or letter of credit;

(b) Intellectual property in so far as this Law is inconsistent with [the law relating to intellectual property to be specified by the enacting State];[1]

(c) Intermediated securities;

(d) Payment rights arising under or from financial contracts governed by netting agreements, except a payment right arising upon the termination of all outstanding transactions; and

(e) [Other types of asset that the enacting State wishes to exclude, such as those that are subject to specialized secured transactions and asset-based registration regimes under other law to the extent that that other law governs matters addressed in this Law].[2]

[4. This Law does not apply to security rights in proceeds of encumbered assets if the proceeds are a type of asset, to which this Law does not apply, to the extent that [any other law to be specified by the enacting State] applies to security rights in those types of asset and governs the matters addressed in this Law.]

5. Nothing in this Law affects the rights and obligations of the grantor and the secured creditor under laws governing the protection of parties to transactions made for personal, family or household purposes.

6. Nothing in this Law overrides a provision of any other law that limits the creation or enforcement of a security right in, or the transferability of, specific types of asset, with the exception of a provision that limits the creation or enforcement of a security right in or the transferability of an asset on the sole ground that it is a future asset, or a part or undivided interest in an asset.

[*Note to the Working Group: The Working Group may wish to consider which of the alternative bracketed texts should be retained, the text in article 1(2) or the texts in article 2 (j), (n), (cc), (dd), (gg) and (hh), prepared pursuant to its decision (A/CN.9/865, para. 40. The Working Group may also wish to consider whether, unlike recommendation 4(d) of the* UNCITRAL Legislative Guide on Secured Transactions *(the "*Secured Transactions Guide*") and article 4(2) of the United Nations Convention on the*

[*] The reference is to these articles as they appear in document A/CN.9/WG.VI/WP.65/Add.3.

[1] This provision may not be necessary if the enacting State has coordinated, or has otherwise addressed the relationship between this Law and any secured transactions provisions of its law relating to intellectual property.

[2] If the enacting State decides to introduce any other exception(s), they should be limited and set out in the Law in a clear and specific way.

Assignment of Receivables in International Trade (the "Assignment Convention") on which it is based, article 1(3)(d) should exclude not only "payment rights" but "rights" in general arising from or under such financial contracts before close-out. Alternatively, the draft Guide to Enactment could explain that: (a) security rights in any rights arising before close-out would interrupt the mutuality of obligation that is necessary to ensure that close-out netting is fully enforceable even in the event of the grantor's insolvency; (b) if a security right in rights arising before close-out were to be created (e.g. in the case of a security right in all the assets of a grantor), the relevant financial contract should include a broad prohibition to the creation of a security right in such rights by one party without the prior written consent of the other party; and (c) the draft Model Law does not affect such a prohibition, as article 13 applies only to trade receivables and payment rights arising after close-out, and article 15 applies only to rights to payment of funds credited to a bank account (while under article 63(1), the creation of a security right does not affect the rights and obligations of the depositary institution without its consent).]

Article 2. Definitions and rules of interpretation

For the purposes of this Law:

(a) "Acquisition secured creditor" means a secured creditor that has an acquisition security right;

(b) "Acquisition security right" means a security right in a tangible asset, intellectual property or the rights of a licensee under a licence of intellectual property, which secures the obligation to pay any unpaid portion of the purchase price of the asset or other credit extended to enable the grantor to acquire it to the extent the credit is used for that purpose;

(c) "Bank account" means an account maintained by a [a financial institution authorized to receive deposits from the public] [an authorized deposit-taking institution] [any institution to be specified by the enacting State] to which funds may be credited or debited;

(d) "Certificated non-intermediated securities" means non-intermediated securities represented by a certificate that:

(i) Provides that the person entitled to the securities is the person in possession of the certificate; or

(ii) Identifies the person entitled to the securities;

(e) "Competing claimant" means a creditor of a grantor or other person with rights in an encumbered asset that may be in competition with the rights of a secured creditor in the same encumbered asset. The term includes:

(i) Another secured creditor of the grantor that has a security right in the same encumbered asset;

(ii) Another creditor of the grantor that has a right in the same encumbered asset [the enacting State to specify creditors that have a right in the encumbered asset under other law];

(iii) The insolvency representative in insolvency proceedings in respect of the grantor; or

(iv) A buyer or other transferee, lessee or licensee of the encumbered asset;

(f) "Consumer goods" means goods primarily used or intended to be used by the grantor for personal, family or household purposes;

(g) "Control agreement":

(i) With respect to uncertificated non-intermediated securities means an agreement in writing among the issuer, the grantor and the secured creditor, according to which the issuer agrees to follow instructions from the secured creditor with respect to the securities without further consent from the grantor; and

(ii) With respect to rights to payment of funds credited to a bank account means an agreement in writing among the depositary institution, the grantor and the secured

creditor, according to which the depositary institution agrees to follow instructions from the secured creditor with respect to the payment of funds credited to the bank account without further consent from the grantor;

(h) "Debtor" means a person that owes payment or other performance of a secured obligation, whether or not that person is the grantor of the security right securing payment or other performance of that obligation, including a secondary obligor such as a guarantor of a secured obligation;

(i) "Debtor of the receivable" means[: (i) a person that owes payment of a receivable that is subject to a security right, including a guarantor or other person secondarily liable for payment of the receivable; and (ii) a transferor of a receivable];

(j) "Encumbered asset" means[: (i)] a movable asset that is subject to a security right; [and (ii) a receivable that is the subject of an outright transfer;]

(k) "Equipment" means a tangible asset other than inventory or consumer goods that is primarily used or intended to be used by the grantor in the operation of its business;

(l) "Financial contract" means any spot, forward, future, option or swap transaction involving interest rates, commodities, currencies, equities, bonds, indices or any other financial instrument, any securities repurchase or lending transaction, and any other transaction similar to those transactions entered into in financial markets and any combination of those transactions;

(m) "Future asset" means a movable asset, which does not exist or which the grantor does not have rights in or the power to encumber at the time the security agreement is concluded;

(n) "Grantor" means: (i) a person that creates a security right to secure either its own obligation or that of another person; [and] (ii) a buyer or other transferee, lessee, or licensee of an encumbered asset that acquires its rights subject to a security right; [and (iii) a transferor in an outright transfer of a receivable;]

(o) "Insolvency representative" means a person or body, including one appointed on an interim basis, authorized in insolvency proceedings to administer the reorganization or the liquidation of the insolvency estate;

[*Note to the Working Group: The Working Group may wish to note that this term is only referred to in the definition of "competing claimant" and thus consider whether it should be retained in article 2 or rather explained in the draft Guide to Enactment. In any case, the Guide to Enactment may clarify that the term includes an insolvency representative that may be appointed to supervise, rather than only administer, the reorganization of the insolvency estate, for example, in the context of debtor-in-possession insolvency proceedings, and/or simply refer to the discussion in* UNCITRAL Legislative Guide on Insolvency Law *(the "*Insolvency Guide*") on the supervision of the debtor by the insolvency representative and the various functions performed by the insolvency representative (see part two, chap. III, paras. 11-18 and 35). The Working Group may also wish to consider whether the term "insolvency proceedings", which is referred to in this definition and in articles 33 (priority chapter) and 91 (conflict-of-laws chapter), and the term "insolvency estate", which is referred in the definition of this term and the definition of the term "competing claimant", should also be defined in article 2 or explained in the draft Guide to Enactment by reference to the definitions of those terms contained in the* Secured Transactions Guide, *which are based on the relevant definitions of the Insolvency Guide.*]

(p) "Intangible asset" means all types of movable asset other than tangible assets;

(q) "Inventory" means tangible assets held by the grantor for sale or lease in the ordinary course of the grantor's business, including raw and semi-processed materials (work-in-process);

(r) "Knowledge" means actual knowledge;

(s) "Mass or product" means tangible assets that are so physically associated or united with other tangible assets that they have lost their separate identity;

(t) "Money" means currency authorized as legal tender by any State;

(u) "Non-intermediated securities" means securities other than securities credited to a securities account and rights in securities resulting from the credit of securities to a securities account;

(v) "Netting agreement" means an agreement between two or more parties that provides for one or more of the following:

(i) The net settlement of payments due in the same currency on the same date whether by novation or otherwise;

(ii) Upon the insolvency or other default by a party, the termination of all outstanding transactions at their replacement or fair market values, conversion of such sums into a single currency and netting into a single payment by one party to the other; or

(iii) The set-off of amounts calculated as set forth in subparagraph (ii) under two or more netting agreements;

(w) "Notice" means a communication in writing;

(x) "Notification of a security right in a receivable" means a notice by the grantor or the secured creditor informing the debtor of the receivable that a security right has been created in the receivable;

(y) "Possession" means the actual possession of a tangible asset by a person [directly or indirectly] or its representative, or by an independent person that acknowledges holding it for that person;

[*Note to the Working Group: The Working Group may wish to note that the bracketed words have been added pursuant to its decision to address situations in which the issuer of a negotiable document held it through various persons responsible to perform parts of a multimodal transport contract (A/CN.9/865, para. 62), and consider whether they should be retained.*]

(z) "Priority" means the right of a person in an encumbered asset in preference to the right of another person;

(aa) "Proceeds" means whatever is received in respect of an encumbered asset, including what is received as a result of sale or other transfer, lease, licence or collection of an encumbered asset, civil and natural fruits, insurance proceeds, claims arising from defects in, damage to or loss of an encumbered asset, and proceeds of proceeds;

(bb) "Receivable" means a right to payment of a monetary obligation, excluding a right to payment evidenced by a negotiable instrument, a right to payment of funds credited to a bank account and a right to payment under a non-intermediated security;

(cc) "Secured creditor" means[: (i)] a person that has a security right; [and (ii) a transferee in an outright transfer of a receivable;]

(dd) "Secured obligation" means an obligation secured by a security right[. The term does not include the obligation of the transferee to pay the price in an outright transfer of a receivable];

(ee) "Securities" means:

[(i)] An obligation of an issuer or any share or similar right of participation in an issuer or in the enterprise of an issuer that:

a. Is one of a class or series, or by its terms is divisible into a class or series; [and]

b. Is of a type dealt in or traded on a recognized market, or is issued as a medium for investment [and

(ii) The enacting State to specify any additional rights that should qualify as securities even if they do not satisfy the requirements expressed in subparagraphs (i) a. and (i) b.;]

(ff) "Securities account" means an account maintained by an intermediary to which securities may be credited or debited;

(gg) "Security agreement" means[: (i)] an agreement, regardless of whether the parties have denominated it as a security agreement, between a grantor and a secured creditor that provides for the creation of a security right; [and (ii) an agreement that provides for the outright transfer of a receivable;]

(hh) "Security right" means[: (i)] a property right in a movable asset that is created by an agreement to secure payment or other performance of an obligation, regardless of whether the parties have denominated it as a security right, and regardless of the type of asset, the status of the grantor or secured creditor, or the nature of the secured obligation; [and (ii) the right of the transferee in an outright transfer of a receivable;]

(ii) "Tangible asset" means all types of tangible movable asset. Except in articles [2, subparagraphs (b), (j), (q) and (s), 11, 32, 36-40, and …], the term includes money, negotiable instruments, negotiable documents and certificated non-intermediated securities; and

(jj) "Uncertificated non-intermediated securities" means non-intermediated securities not represented by a certificate.

Article 3. Party autonomy

1. Except for articles [4, 6, 9, 48, 49, 66, paragraph 4,* and 82-97], the provisions of this Law may be derogated from or varied by agreement.

2. An agreement referred to in paragraph 1 does not affect the rights or obligations of any person that is not a party to the agreement.

Article 4. General standards of conduct

A person must exercise its rights and perform its obligations under this Law in good faith and in a commercially reasonable manner.

Article 5. International origin and general principles

1. In the interpretation of this Law, regard is to be had to its international origin and the need to promote uniformity in its application and the observance of good faith.

2. Questions concerning matter governed by this Law which are not expressly settled in it are to be settled in conformity with the general principles on which this Law is based.

[*Note to the Working Group: The Working Group may wish to note that article 5, which has been added pursuant to its decision (A/CN.9/865, para. 47), is based on article 3 of the* UNCITRAL Model Law on Electronic Commerce, *article 4 of the* UNCITRAL Model Law on Electronic Signatures, *and art. 2A of the* UNCITRAL Model Law on International Commercial Arbitration.]

Chapter II. Creation of a security right

A. General rules

Article 6. Creation of a security right

1. A security right is created by a security agreement, provided that the grantor has rights in the asset to be encumbered or the power to encumber it.

2. A security agreement may provide for the creation of a security right in a future asset, but the security right in that asset is created only at the time when the grantor acquires rights in it or the power to encumber it.

* The reference to articles 48, 49 and 66, paragraph 4, is a reference to those articles as they appear in document A/CN.9/WG.VI/WP.65/Add.3.

3. Except as provided in paragraph 4, a security agreement must be [concluded in] [evidenced by][3] a writing that is signed by the grantor and:

(a) Identifies the secured creditor and the grantor;

(b) Except in the case of an agreement that provides for the outright transfer of a receivable, describes the secured obligation;

(c) Describes the encumbered assets as provided in article 9[; and

(d) Indicates the maximum monetary amount for which the security right may be enforced].[4]

4. A security agreement may be oral if the secured creditor has possession of the encumbered asset.

Article 7. Obligations that may be secured

A security right may secure any type of obligation, present or future, determined or determinable, conditional or unconditional, fixed or fluctuating.

Article 8. Assets that may be encumbered

A security right may encumber:

(a) Any type of movable asset, including future assets;

(b) Parts of assets and undivided rights in movable assets;

(c) Generic categories of movable assets; and

(d) All of a grantor's movable assets.

Article 9. Description of encumbered assets

1. The assets encumbered or to be encumbered must be described in the security agreement in a manner that reasonably allows their identification.

2. A description that indicates that the encumbered assets consist of all the grantor's movable assets, or of all the grantor's movable assets within a generic category satisfies the standard in paragraph 1.

Article 10. Right to proceeds and commingled funds

1. A security right in an encumbered asset extends to its identifiable proceeds.

2. Where proceeds in the form of funds credited to a bank account or money are commingled with other assets of the same kind:

(a) The security right extends to the commingled assets, notwithstanding that the proceeds have ceased to be identifiable;

(b) The security right in the commingled assets is limited to the value of the proceeds immediately before they were commingled; and

(c) If at any time after the commingling, the value of the balance credited to the bank account or of the commingled money is less than the value of the proceeds immediately before they were commingled, the obligation secured by the security right that is enforceable against the commingled assets is limited to the lowest value between the time when the proceeds were commingled and the time the security right in the proceeds is claimed.

Article 11. Tangible assets commingled in a mass or product

1. A security right in a tangible asset that is commingled in a mass of assets of the same kind or product extends to the mass or product.

---

[3] The enacting State may wish to choose the option that best fits its legal system.

[4] The enacting State may wish to include this subparagraph in the draft Model Law if it determines that an indication of the maximum monetary amount for which the security right may be enforced would be helpful to facilitate lending from another creditor.

Option A

2. A security right that continues in a mass or product is limited to the value of the encumbered assets immediately before they became part of the mass or product.

Option B

2. A security right that continues in a mass is limited to the same proportion of the value of the mass as the value of the encumbered assets bore to the value of the mass at the time of commingling.

3. A security right that continues in a product is limited to the value of the encumbered assets immediately before they became part of the product.

[3][4.] Where more than one security right continues in the same mass or product and each was a security right in a separate tangible asset at the time of commingling, the secured creditors are entitled to share in the mass or product according to the ratio that the obligation secured by each security right bears to the sum of the obligations secured by all security rights.

Article 12. Extinguishment of a security right

A security right is extinguished upon the extinguishment of all present and future secured obligations, including conditional obligations, by payment or otherwise.

B. Asset-specific rules

Article 13. Contractual limitations on the creation of a security right

1. A security right in a receivable is effective as between the grantor and the secured creditor and as against the debtor of the receivable notwithstanding any agreement between the initial or any subsequent grantor and the debtor of the receivable or any subsequent secured creditor limiting in any way the grantor's right to create a security right.

2. Nothing in this article affects any obligation or liability of the grantor for breach of the agreement referred to in paragraph 1, but the other party to the agreement may not avoid the contract giving rise to the receivable or the security agreement on the sole ground of the breach of that agreement, or raise against the secured creditor any claim it may have as a result of such a breach against the grantor, as provided in article 58, paragraph 2.[*]

3. A person that is not a party to the agreement referred to in paragraph 1 is not liable for the grantor's breach of the agreement on the sole ground that it had knowledge of the agreement.

4. This article applies only to receivables:

(a) Arising from a contract that is a contract for the supply or lease of goods or services other than financial services, a construction contract or a contract for the sale or lease of immovable property;

(b) Arising from a contract for the sale, lease or licence of industrial or other intellectual property or of proprietary information;

(c) Representing the payment obligation for a credit card transaction; or

(d) Arising upon net settlement of payments due pursuant to a netting agreement involving more than two parties.

[*Note to the Working Group: The Working Group may wish to consider whether the words "initial or any subsequent" in paragraph 1 should be deleted as the definition of the term "grantor" covers both an initial and a subsequent grantor-transferee. The Working Group may also wish to consider whether the word "avoid" in paragraph 2 should be replaced by the word "terminate".*]

[*] The reference to article 58, paragraph 2, is a reference to that article as it appears in document A/CN.9/WG.VI/WP.65/Add.3.

Article 14. Personal or property rights securing or supporting payment or other performance of an encumbered receivable or other intangible asset, or negotiable instrument

1. A secured creditor with a security right in a receivable or other intangible asset, or a negotiable instrument has the benefit of any personal or property right that secures or supports payment or other performance of the encumbered asset without a new act of transfer.

2. If the right referred to in paragraph 1 is transferable only with a new act of transfer, the grantor is obliged to create a security right in it in favour of the secured creditor.

Article 15. Right to payment of funds credited to a bank account

A security right in a right to payment of funds credited to a bank account is effective notwithstanding an agreement between the grantor and the depositary institution limiting in any way the grantor's right to create a security right.

[*Note to the Working Group: The Working Group may wish to note that the draft Guide to Enactment will explain that, under article 63(1) (in document A/CN.9/WG.VI/WP.65/Add.3), the depositary institution is not obliged to pay the secured creditor or provide any information about the bank account to any third party.*]

Article 16. Tangible assets covered by negotiable documents

A security right in a negotiable document extends to the tangible asset covered by the document, provided that the issuer of the document is in possession of the asset at the time the security right in the document is created.

Article 17. Tangible assets with respect to which intellectual property is used

A security right in a tangible asset with respect to which intellectual property is used does not extend to the intellectual property and a security right in the intellectual property does not extend to the tangible asset.

Chapter III. Effectiveness of a security right against third parties

A. General rules

Article 18. Primary methods for achieving third-party effectiveness

1. A security right in an encumbered asset is effective against third parties if a notice with respect to the security right is registered in the general security rights registry (the "Registry").

2. A security right in a tangible asset is also effective against third parties if the secured creditor has possession of the asset.

Article 19. Proceeds

1. If a security right in an asset is effective against third parties, a security right in any proceeds of that asset remains effective against third parties without any further act if the proceeds are in the form of money, receivables, negotiable instruments or rights to payment of funds credited to a bank account.

2. If a security right in an asset is effective against third parties, a security right in any type of proceeds of that asset other than the types of proceeds referred to in paragraph 1 is effective against third parties:

(a) For [a short period of time to be specified by the enacting State] days after the proceeds arise; and

(b) Thereafter, if the security right in the proceeds is made effective against third parties by one of the methods applicable to the relevant type of encumbered asset referred to in this chapter before the expiry of the time period provided in subparagraph (a).

[*Note to the Working Group: The Working Group may wish to consider whether an article should be inserted in this place of the draft Model Law to implement recommendation 44 of the* Secured Transactions Guide *providing for the automatic third-party effectiveness of a security right in tangible assets commingled in a mass or product (for creation issues, see art. 11, and for priority issues, see art. 40).*]

Article 20. Changes in the method for achieving third-party effectiveness

A security right that is effective against third parties remains effective against third parties despite a change in the method for achieving third-party effectiveness, provided that there is no time when the security right is not effective against third parties.

Article 21. Lapse in third-party effectiveness

If the third-party effectiveness of a security right lapses, it may be re-established, but the security right is effective against third parties only as of that time.

Article 22. Continuity in third-party effectiveness upon a change of the applicable law to this Law

1. If a security right is effective against third parties under the law of another State and this Law becomes applicable as a result of a change in the location of the encumbered asset or the grantor, whichever determines the applicable law under the provisions of chapter VIII, the security right remains effective against third parties under this Law until the earlier of:

(a) The time when third-party effectiveness would have lapsed under the law of the other State; and

(b) [A short period of time to be specified by the enacting State] days after the change and, thereafter, only if the third-party effectiveness requirements of this Law are satisfied before the expiry of that time period.

2. If the security right remains effective against third parties under paragraph 1, the time of third-party effectiveness is the time when it was achieved under the law of the other State.

[*Note to the Working Group: The Working Group may wish to consider whether a buyer or judgment creditor, who acquired a right in an encumbered asset when the security right was effective against third parties and thus acquired its right subject to the security right, would remain subordinated even after the security right ceased to be effective against third parties under subparagraph (a) or (b) of this article.*]

Article 23. Acquisition security rights in consumer goods

Option A

An acquisition security right in consumer goods is effective against third parties, other than a buyer or other transferee, upon its creation without any further step.

Option B

An acquisition security right in consumer goods [below a value to be specified by the enacting State] is effective against third parties upon its creation without any further act.

[*Note to the Working Group: The Working Group may wish to consider whether the exception to the rule in option A is too broad and should thus be limited to consensual transferees and/or transferees for value.*]

B. Asset-specific rules

Article 24. Rights to payment of funds credited to a bank account

A security right in a right to payment of funds credited to a bank account may also be made effective against third parties by:

(a) The creation of the security right in favour of the depositary institution;

(b) The conclusion of a control agreement; or

(c) The secured creditor becoming the account holder.

Article 25. Negotiable documents and tangible assets covered by negotiable documents

1. If a security right in a negotiable document is effective against third parties, the security right that extends to the asset covered by the document in accordance with article 16 is also effective against third parties.

2. During the period when a negotiable document covers an asset, a security right in the asset may also be made effective against third parties by possession of the document.

3. A security right in a negotiable document that was effective against third parties by possession of the document remains effective against third parties for [a short period of time to be specified by the enacting State] after the document has been returned to the grantor or other person for the purpose of ultimate sale or exchange, loading or unloading, or otherwise dealing with the assets covered by the document.

Article 26. Uncertificated non-intermediated securities

A security right in uncertificated non-intermediated securities may also be made effective against third parties by:

(a) The [notation of the security right] [entry of the name of the secured creditor as the holder of the securities] in the books maintained by or on behalf of the issuer for the purpose of recording the name of the holder of the securities;[5] or

(b) The conclusion of a control agreement.

[5] The enacting State may wish to choose the method that best suits its legal system.

(A/CN.9/WG.VI/WP.68/Add.1) (Original: English)

Note by the Secretariat on a draft model law on secured transactions

ADDENDUM

Contents

Chapter V. Priority of a security right

A. General rules

Article 28. Competing security rights

1. Subject to articles 29-40, priority among competing security rights created by the same grantor in the same encumbered asset is determined according to the order of third-party effectiveness.

2. Subject to [article 27 of the registry-related provisions] and articles 29-40, priority among competing security rights created by different grantors in the same encumbered asset is determined according to the order of third-party effectiveness.

3. The priority of a security right with respect to which a notice has been registered in the Registry before the conclusion of a security agreement or, in the case of a security right in a future asset, before the grantor acquires rights in the asset or the power to encumber it, is determined according to the time of registration.

Article 29. Competing security rights in the case of a change in the method of third-party effectiveness

The priority of a security right is not affected by a change in the method by which it is made effective against third parties, provided that there is no time period during which the security right is not effective against third parties.

Article 30. Competing security rights in proceeds

If a security right in proceeds of an encumbered asset is effective against third parties as provided in article 19, the priority of the security right in the proceeds is the same as the priority of the security right in that asset.

Article 31. Competing security rights in tangible assets commingled in a mass or product

1. If two or more security rights in the same tangible asset continue in a mass or product as provided in article 11 and each security right is effective against third parties, the priority of each security right in the mass or product is the same as its priority in that asset immediately before the asset became part of the mass or product.

2. If security rights in separate tangible assets continue in the same mass or product and each security right is effective against third parties, the secured creditors are entitled to share in the aggregate maximum value of their security rights in the mass or product according to the ratio of the value of those security rights.

3. For the purposes of paragraph 2, the maximum value of a security right is the lesser of the value determined in accordance with article 11 and the amount of the secured obligation.

Article 32. Security rights competing with rights of buyers or other transferees, lessees or licensees of an encumbered asset

1. If an encumbered asset is sold or otherwise transferred, leased or licensed while the security right in that asset is effective against third parties, the buyer or other transferee, lessee or licensee acquires its rights subject to the security right except as provided in this article.

2. A buyer or other transferee of an encumbered asset acquires its rights free of the security right, if the secured creditor authorizes the sale or other transfer of the asset free of the security right.

3. The rights of a lessee or licensee of an encumbered asset are not affected by a security right if the secured creditor authorizes the grantor to lease or license the asset unaffected by the security right.

4. A buyer of a tangible encumbered asset sold in the ordinary course of the seller's business acquires its rights free of the security right, provided that, at the time of the

conclusion of the sale agreement, the buyer does not have knowledge that the sale violates the rights of the secured creditor under the security agreement.

5. The rights of a lessee of a tangible encumbered asset leased in the ordinary course of the lessor's business are not affected by the security right, provided that, at the time of the conclusion of the lease agreement, the lessee does not have knowledge that the lease violates the rights of the secured creditor under the security agreement.

6. Subject to the rights of a secured creditor with a security right in intellectual property in accordance with article 48, the rights of a non-exclusive licensee of an intangible encumbered asset licensed in the ordinary course of the licensor's business are not affected by the security right, provided that, at the time of the conclusion of the licence agreement, the licensee does not have knowledge that the licence violates the rights of the secured creditor under the security agreement.

7. If a buyer or other transferee of a tangible encumbered asset acquires its rights free of a security right, any subsequent buyer or other transferee also acquires its rights free of that security right.

8. If the rights of a lessee of a tangible encumbered asset or licensee of an intangible encumbered asset are not affected by the security right, the rights of any sub-lessee or sub-licensee are also unaffected by that security right.

Article 33. Impact of the grantor's insolvency on the priority of a security right

A security right that is effective against third parties under this Law at the time of the commencement of insolvency proceedings in respect of the grantor remains effective against third parties and retains the priority it had before the commencement of the insolvency proceedings, unless another claim has priority pursuant to [the insolvency law to be specified by the enacting State].

Article 34. Security rights competing with preferential claims

The following claims arising by operation of other law have priority over a security right that is effective against third parties but only up to [the enacting State to specify the amount for each category of claim]:

(a) […];

(b) […].[1]

Article 35. Security rights competing with rights of judgement creditors

1. Subject to the rights of acquisition secured creditors in accordance with article 38, the right of a creditor that has obtained a judgement or provisional order ("judgement creditor") has priority over a security right if, before the security right is made effective against third parties, the judgement creditor [has taken the steps to be specified by the enacting State for a judgement creditor to acquire rights in the encumbered asset or the steps referred to in the relevant provisions of other law to be specified by the enacting State].

2. If a security right is made effective against third parties before [or at the same time] the judgement creditor acquires its right in an encumbered asset by taking the steps referred to in paragraph 1, the security right has priority but that priority is limited to credit extended by the secured creditor:

(a) Within [a period of time to be specified by the enacting State] days from or before the time when the secured creditor received a notice from the judgement creditor that the judgement creditor has taken the steps referred to in paragraph 1; or

(b) Pursuant to an irrevocable commitment in a fixed amount or an amount to be fixed pursuant to a specified formula of the secured creditor to extend credit, if the commitment was made before the secured creditor received a notice from the judgement creditor that the judgement creditor had taken the steps referred to in paragraph 1.

[1] The enacting State will not need this article if it does not have any preferential claims.

[*Note to the Working Group: The Working Group may wish to note that, in the case of future assets, a security right is created and thus made effective against third parties at the time when the grantor acquires rights in the assets or the power to encumber them (see art. 6, para. 2). Thus, the time when a security right becomes effective in future assets may coincide with the time when a judgment creditor takes the steps referred to in paragraph 1. The Working Group may wish to consider whether this issue should be addressed and, if so, how and where, in the draft Model Law or in the Guide to Enactment (see bracketed text in para. 2 above).*]

Article 36. Non-acquisition security rights competing with acquisition security rights[2]

Option A[3]

1. An acquisition security right in equipment has priority over a competing non-acquisition security right created by the grantor, provided that:

(a) The acquisition secured creditor has possession of the asset; or

(b) A notice with respect to the acquisition security right is registered in the Registry not later than the expiry of [a period of time to be specified by the enacting State] days after the grantor obtains possession of the asset.

2. An acquisition security right in inventory, intellectual property or rights of a licensee under a licence of intellectual property that is held by the grantor for sale or licence in the ordinary course of the grantor's business has priority over a competing non-acquisition security right created by the grantor, provided that:

(a) The acquisition secured creditor is in possession of the asset; or

(b) Before the grantor obtains possession of the asset:

(i) A notice with respect to the acquisition security right is registered in the Registry; and

(ii) A notice that is sent by the acquisition secured creditor is received by the non-acquisition secured creditor that has registered a notice in the Registry with respect to a security right created by the grantor in an asset of the same kind, stating that the acquisition secured creditor has or intends to acquire an acquisition security right and describing the asset sufficiently to enable the non-acquisition secured creditor to identify the asset that is the object of the acquisition security right.

3. An acquisition security right in consumer goods, intellectual property or rights of a licensee under a licence of intellectual property that is used or intended to be used by the grantor primarily for personal, family or household purposes has priority over a competing non-acquisition security right created by the grantor in the same asset [provided that the goods are below [a value to be specified by the enacting State]].

4. A notice that is sent in accordance with subparagraph 2(b)(ii) may cover acquisition security rights under multiple transactions between the same parties without the need to identify each transaction and is sufficient only for security rights in assets of which the grantor obtains possession or which the grantor acquires not later than the expiry of [a period of time to be specified by the enacting State] days after the notice is received.

---

[2] This section includes the unitary-approach recommendations of the *Secured Transactions Guide*. If a State prefers to adopt the non-unitary approach recommendations, it may wish to consider implementing instead recommendations 187-202 of the *Secured Transactions Guide*.
[In particular, States may wish to consider doing so if they have implemented regional legislation along the Directive 2011/7/EU of the European Parliament and of the Council of 16 February 2011 on combating late payment in commercial transactions (the "Late Payment Directive"), article 9 of which, provides that "Member States shall provide in conformity with the applicable national provisions designated by private international law that the seller retains title to goods until they are fully paid for if a retention of title clause has been expressly agreed between the buyer and the seller before the delivery of the goods".]

[3] A State may adopt option A or option B of this article.

Option B

1. An acquisition security right in equipment, inventory, or intellectual property or rights of a licensee under a licence of intellectual property that is held by the grantor for sale or licence in the ordinary course of the grantor's business has priority as against a competing non-acquisition security right created by the grantor, provided that:

(a) The acquisition secured creditor is in possession of the asset; or

(b) A notice with respect to the acquisition security right is registered in the Registry not later than the expiry of [a period of time to be specified by the enacting State] days after the grantor obtains possession of the asset.

2. An acquisition security right in consumer goods, intellectual property or rights of a licensee under a licence of intellectual property that is used or intended to be used by the grantor primarily for personal, family or household purposes has priority over a competing non-acquisition security right created by the grantor in the same asset.

[*Note to the Working Group: The Working Group may wish to note that the wording within square brackets in paragraph 3 of option A is intended to reflect the options of article 23.*]

Article 37. Competing acquisition security rights

1. Subject to paragraph 2, the priority between competing acquisition security rights is determined according to article 28.

2. An acquisition security right of a seller or lessor, or a licensor of intellectual property that was made effective against third parties not later than the expiry of the period specified in article 36, subparagraph 1(b) has priority over a competing acquisition security right of a secured creditor other than a seller or lessor, or a licensor of intellectual property.

Article 38. Acquisition security rights competing with the rights of judgement creditors

An acquisition security right that is made effective against third parties not later than the expiry of the period specified in article 36, subparagraph 1(b) has priority over the rights of a judgement creditor that would otherwise have priority under article 35.

Article 39. Acquisition security rights in proceeds[4]

Option A

1. In the case of an acquisition security right in equipment, a security right in proceeds has the same priority as the acquisition security right.

2. In the case of an acquisition security right in inventory, intellectual property or rights of a licensee under a licence of intellectual property that is held by the grantor for sale or licence in the ordinary course of the grantor's business, a security right in proceeds has the same priority as the acquisition security right, except where the proceeds take the form of receivables, negotiable instruments, or rights to payment of funds credited to a bank account.

3. The priority of a security right in proceeds referred to in paragraph 2 is conditional on the acquisition secured creditor notifying non-acquisition secured creditors [with a security right in the same kind of asset as the proceeds] that, before the proceeds arose, the acquisition secured creditor registered a notice with respect to assets of the same kind as the proceeds in the Registry.

Option B

Notwithstanding article 36, the priority of an acquisition security right in a tangible asset that is effective against third parties does not extend to its proceeds.

[4] A State may adopt option A of this article, if it adopts option A of article 36, or option B of this article, if it adopts option B of article 36.

Article 40. Acquisition security rights in tangible assets commingled in a mass or product competing with non-acquisition security rights in the mass or product

An acquisition security right in a tangible asset that continues in a mass or product and is effective against third parties has priority over a non-acquisition security right granted by the same grantor in the mass or product.

Article 41. Subordination

1. A person may at any time subordinate the priority of its rights under this Law in favour of any existing or future competing claimant without the need for the beneficiary to be a party to the subordination.

2. Subordination does not affect the rights of competing claimants other than the person subordinating its priority and the beneficiary of the subordination.

Article 42. Future advances, future encumbered assets and maximum amount

1. Subject to the rights of judgement creditors under article 35, the priority of a security right extends to all secured obligations, including obligations incurred after the security right became effective against third parties.

2. The priority of a security right covers all encumbered assets described in a notice registered in the Registry, irrespective of whether they are acquired by the grantor or come into existence before or after the time of registration.

[3. The priority of the security right is limited to the maximum amount set out in the notice registered in the Registry.][5]

Article 43. Irrelevance of knowledge of the existence of a security right

Knowledge of the existence of a security right on the part of a secured creditor does not affect its priority under this Law.

B. Asset-specific rules

Article 44. Negotiable instruments

1. A security right in a negotiable instrument that is made effective against third parties by possession of the instrument has priority over a security right in the instrument that is made effective against third parties by registration of a notice in the Registry.

2. A buyer or other consensual transferee of an encumbered negotiable instrument acquires its rights free of the security right that is made effective against third parties by registration of a notice in the Registry if the buyer or other consensual transferee:

(a) Qualifies as a [protected holder or other type of holder to be specified by the enacting State]; or

(b) [Takes possession of the negotiable instrument and gives value or takes any other act to be specified by the enacting State] without knowledge that the sale or other transfer is in violation of the rights of the secured creditor under the security agreement.

Article 45. Rights to payment of funds credited to a bank account

1. A security right in a right to payment of funds credited to a bank account that is made effective against third parties by the secured creditor becoming the account holder has priority over a competing security right that is made effective against third parties by any other method.

2. A security right in a right to payment of funds credited to a bank account with respect to which the secured creditor is the depositary institution has priority over a competing

[5] This provision will be necessary if the enacting State implements article 6, subparagraph 3(e) of the draft Model Law, and article 9, subparagraph (e) of the registry-related provisions.

security right made effective against third parties by any method other than by the secured creditor becoming the account holder.

3. A security right in a right to payment of funds credited to a bank account that is made effective against third parties by a control agreement has priority over a competing security right other than a security right of the depositary institution or a security right that is made effective against third parties by any method other than by the secured creditor becoming the account holder.

4. The order of priority among competing security rights in a right to payment of funds credited to a bank account that are made effective against third parties by the conclusion of control agreements is determined on the basis of the time of conclusion of the control agreements.

5. A depositary institution's right under other law to set off obligations owed to it by the grantor against the grantor's right to payment of funds credited to a bank account maintained with the depositary institution has priority as against a security right in the right to payment of funds credited to the bank account, except a security right that is made effective against third parties by the secured creditor becoming the account holder.

6. A transferee of funds from a bank account pursuant to a transfer initiated or authorized by the grantor acquires its rights free of a security right in the right to payment of funds credited to the bank account, unless the transferee has knowledge that the transfer violates the rights of the secured creditor under the security agreement.

7. Paragraph 6 does not adversely affect the rights of transferees of funds from bank accounts under [the relevant law to be specified by the enacting State].

Article 46. Money

1. A transferee that obtains possession of money that is subject to a security right acquires its rights free of the security right, unless that person has knowledge that the transfer violates the rights of the secured creditor under the security agreement.

2. This article does not adversely affect the rights of persons in possession of money under [the relevant law to be specified by the enacting State].

Article 47. Negotiable documents and tangible assets covered

1. Subject to paragraph 2, a security right in a tangible asset made effective against third parties by possession of the negotiable document covering that asset has priority over a competing security right made effective against third parties by any other method.

2. Paragraph 1 does not apply to a security right in a tangible asset other than inventory if the security right of the secured creditor not in possession of the negotiable document was made effective against third parties before the earlier of:

(a) The time that the asset became covered by the negotiable document; and

(b) The time of conclusion of an agreement between the grantor and the secured creditor in possession of the negotiable document providing for the asset to be covered by a negotiable document so long as the asset became so covered within [a short period of time to be specified by the enacting State] from the date of the agreement.

3. A transferee of an encumbered negotiable document under [the relevant law to be specified by the enacting State under which certain transferees of negotiable documents acquire their rights free of competing claims] acquires its rights free of a security right in the negotiable document and the tangible assets covered thereby that is made effective against third parties by registration of a notice in the Registry or by possession of the document or the assets covered thereby.

Article 48. Intellectual property

Article 32, paragraph 6, does not affect any rights that a secured creditor may have as an owner or licensor of intellectual property under [the relevant law relating to intellectual property to be specified by the enacting State].

Article 49. Non-intermediated securities

1. A security right in certificated non-intermediated securities made effective against third parties by the secured creditor's possession of the certificate has priority over a competing security right created by the same grantor in the same securities made effective against third parties by registration of a notice in the Registry.

2. A security right in uncertificated non-intermediated securities made effective against third parties by [[a notation of the security right] [entry of the name of the secured creditor as the holder of the securities] in the books maintained for that purpose by or on behalf of the issuer][6] has priority over a security right in the same securities made effective against third parties by any other method.

3. A security right in uncertificated non-intermediated securities made effective against third parties by the conclusion of a control agreement has priority over a security right in the same securities made effective against third parties by registration of a notice in the Registry.

4. The order of priority among competing security rights in uncertificated non-intermediated securities that are made effective against third parties by the conclusion of control agreements is determined on the basis of the time of conclusion of the control agreements.

5. This article does not adversely affect the rights of holders of non-intermediated securities under [the relevant law relating to the transfer of securities to be specified by the enacting State].

[*Note to the Working Group: The Working Group may wish to note that articles 44(2) and 47(3), while referring to other law for the terminology to be used, provide a substantive rule for transferees of encumbered negotiable instruments and negotiable documents to acquire their rights free of the security right, while article 49(5) essentially refers the matter to other law. The Working Group may thus wish to either consider following the same approach with respect to all three types of paper or, at least, reach an understanding as to how the draft Guide to Enactment should explain the different approaches followed.*]

[6] The enacting State may wish to insert here the method it chose in article 26.

(A/CN.9/WG.VI/WP.68/Add.2) (Original: English)

Note by the Secretariat on a draft model law on secured transactions

ADDENDUM

Contents

Chapter VIII. Conflict of laws[1]

A. General rules

Article 81. Law applicable to the mutual rights and obligations of the grantor and the secured creditor

The law applicable to the mutual rights and obligations of the grantor and the secured creditor arising from their security agreement is the law chosen by them and, in the absence of a choice of law, the law governing the security agreement.

Article 82. Law applicable to a security right in a tangible asset

1. Except as provided in paragraphs 2 to 5 and article 96, the law applicable to the creation, effectiveness against third parties and priority of a security right in a tangible asset is the law of the State in which the asset is located.

2. The law applicable to the priority of a security right in a tangible asset covered by a negotiable document made effective against third parties by possession of the document as against a competing security right made effective against third parties by another method is the law of the State in which the document is located.

3. The law applicable to the creation, third-party effectiveness and priority of a security right in a tangible asset of a type ordinarily used in more than one State is the law of the State in which the grantor is located.

4. Subject to paragraph 3, a security right in a tangible asset that is in transit at the time of its putative creation or intended to be relocated to a different State than the State in which it is located at the time of the putative creation of the security right may be created and made effective against third parties under the law of the State of the location of the asset at the time of the putative creation of the security right or under the law of the State of the asset's ultimate destination, provided that the asset reaches that State within [a period of time to be specified by the enacting State] after the time of the putative creation of the security right.

Article 83. Law applicable to a security right in an intangible asset

Except as provided in articles 84 and 93-96, the law applicable to the creation, effectiveness against third parties and priority of a security right in an intangible asset is the law of the State in which the grantor is located.

Article 84. Law applicable to a security right in receivables relating to immovable property

Notwithstanding article 83, in the case of a security right in a receivable arising from a sale or lease of, or secured by, immovable property, the law applicable to the priority of the security right in the receivable as against the right of a competing claimant that is registrable in the immovable property registry in which rights in the relevant immovable may be registered is the law of the State under whose authority the immovable property registry is maintained.

[*Note to the Working Group: The Working Group may wish to note that it may not be easy for a secured creditor with a security right in receivables to find out that they are secured by a mortgage and thus that a law other than the law of the grantor's location will apply to the priority competition with a mortgagee. The Working Group may, therefore, wish to consider whether the rule in article 84 should be limited to receivables arising from the sale or lease of immovable property or whether article 84 should be deleted altogether.*]

Article 85. Law applicable to the enforcement of a security right

The law applicable to issues relating to the enforcement of a security right:

[1] Depending on its legal tradition and drafting conventions, the enacting State may incorporate the conflict-of-laws provisions in its secured transactions law (at the beginning or at the end of it) or in a separate law (civil code or other law).

(a) In a tangible asset is the law of the State where [enforcement takes place] [the encumbered asset is located], except as provided in article 96; and

(b) In an intangible asset is the law applicable to the priority of the security right, except as provided in articles 93, 95 and 96.

[*Note to the Working Group: The Working Group may wish to consider the options within square brackets in subparagraph (a) (see A/CN.9/865, para. 90), noting that recommendation 218(a), on which article 85(a) is based, refers to the place of enforcement on the assumption that, in most cases, this place will be the place in which the encumbered asset is located (see* Secured Transactions Guide, *chap. X, paras. 66-71).*]

Article 86. Law applicable to a security right in proceeds of an encumbered asset

1. The law applicable to the creation of a security right in proceeds is the law applicable to the creation of the security right in the original encumbered asset from which the proceeds arose.

2. The law applicable to the third-party effectiveness and priority of a security right in proceeds is the law applicable to the third-party effectiveness and priority of a security right in an original encumbered asset of the same kind as the proceeds.

Article 87. Meaning of "location" of the grantor

For the purposes of the provisions of this chapter, the grantor is located:

(a) In the State in which it has its place of business;

(b) If the grantor has a place of business in more than one State, in the State in which the central administration of the grantor is exercised; and

(c) If the grantor does not have a place of business, in the State in which the grantor has his or her habitual residence.

Article 88. Relevant time for determining location

1. Except as provided in paragraph 2, references to the location of the encumbered asset or of the grantor in the provisions of this chapter refer:

(a) For creation issues, to the location at the time of the putative creation of the security right; and

(b) For third-party effectiveness and priority issues, to the location at the time the issue arises.

2. If the right of the secured creditor in an encumbered asset is created and made effective against third parties and the rights of all competing claimants are established before a change in the location of the asset or the grantor, references in the provisions of this chapter to the location of the asset or of the grantor refer, with respect to third-party effectiveness and priority issues, to the location prior to the change in location.

Article 89. Exclusion of *renvoi*

A reference in the provisions of this chapter to "the law" of a State as the law applicable to an issue refers to the law in force in that State other than its rules of private international law.

Article 90. Overriding mandatory rules and public policy (*ordre public*)

1. The provisions of this chapter do not prevent a court from applying overriding mandatory provisions of the law of the forum that apply irrespective of the law applicable under the provisions of this chapter.

2. The law of the forum determines when a court may or must apply or take into account overriding mandatory provisions of another law.

3. A court may only exclude the application of a provision of the law applicable under the provisions of this chapter if and to the extent that the result of such application would be manifestly incompatible with fundamental notions of public policy (*ordre public*) of the forum.

4. The law of the forum determines when a court may or must apply or take into account the public policy (*ordre public*) of a State other than the State the law of which would be applicable under the provisions of this chapter.

5. This article does not prevent an arbitral tribunal from applying or taking into account public policy (*ordre public*), or from applying or taking into account overriding mandatory provisions of a law other than the law applicable under the provisions of this chapter, if the arbitral tribunal is required or entitled to do so.

6. This article does not permit a court to displace the provisions of this chapter dealing with the law applicable to the third-party effectiveness and priority of a security right.

Article 91. Impact of commencement of insolvency proceedings on the law applicable to a security right

The commencement of insolvency proceedings in respect of the grantor does not displace the law applicable to a security right under the provisions of this chapter.

B. Asset-specific rules

Article 92. Law applicable to the relationship of third-party obligors and secured creditors

The law applicable to the relationship between the grantor of a security right in a receivable, negotiable instrument or negotiable document and the debtor of the receivable, the obligor under the negotiable instrument or the issuer of the negotiable document is the law applicable to:

(a) The relationship between the debtor of the receivable, the obligor under the instrument or the issuer of the document and the holder of a security right in the receivable, instrument or document;

(b) The conditions under which a security right in the receivable, instrument or document may be invoked against the debtor of the receivable, the obligor under the instrument or the issuer of the document, including whether an agreement limiting the grantor's right to create a security right may be asserted by the debtor of the receivable, the obligor under the instrument or the issuer of the document; and

(c) Whether the obligations of the debtor of the receivable, the obligor under the instrument or the issuer of the document have been discharged.

Article 93. Law applicable to a security right in a right to payment of funds credited to a bank account

1. Subject to article 94, the law applicable to the creation, effectiveness against third parties, priority and enforcement of a security right in a right to payment of funds credited to a bank account, as well as to the rights and obligations between the depositary institution and the secured creditor, is

Option A[2]

the law of the State in which the depositary institution with which the account is maintained has its place of business.

2. If the depositary institution has places of business in more than one State, the law applicable is the law of the State in which the branch maintaining the account is located.

[2] A State may adopt option A or B of this article.

Option B

the law of the State expressly stated in the account agreement as the State whose law governs the account agreement or, if the account agreement expressly provides that another law is applicable to all such issues, that other law.

2. The law of the State determined pursuant to paragraph 1 applies only if the depositary institution has, at the time of the conclusion of the account agreement, an office in that State that is engaged in the regular activity of maintaining bank accounts.

3. If the applicable law is not determined pursuant to paragraph 1 or 2, the applicable law is to be determined pursuant to [the default rules based on article 5 of the Hague Convention on the Law Applicable to Certain Rights in Respect of Securities Held with an Intermediary to be inserted here by the enacting State].

Article 94. Law applicable to the third-party effectiveness of a security right in certain types of asset by registration

If the law of the State in which the grantor is located recognizes registration of a notice as a method for achieving effectiveness against third parties of a security right in a negotiable instrument, negotiable document, right to payment of funds credited to a bank account or certificated non-intermediated security, the law of that State also is the law applicable to the third-party effectiveness of the security right by registration.

Article 95. Law applicable to a security right in intellectual property

1. The law applicable to the creation, effectiveness against third parties and priority of a security right in intellectual property is the law of the State in which the intellectual property is protected.

2. A security right in intellectual property may also be created under the law of the State in which the grantor is located and may also be made effective under that law against third parties other than another secured creditor, a transferee or a licensee.

3. The law applicable to the enforcement of a security right in intellectual property is the law of the State in which the grantor is located.

Article 96. Law applicable to a security right in non-intermediated securities

Option A

1. Subject to paragraph 2:

(a) The law applicable to the creation, effectiveness against third parties and priority of a security right in certificated non-intermediated securities is the law of the State in which the certificate is located; and

(b) The law applicable to the enforcement of a security right in certificated non-intermediated securities is the law of the State in which [the relevant act of] enforcement takes place.

[2. The law applicable to the effectiveness of a security right in certificated non-intermediated securities against the issuer is the law of the State under which the issuer is constituted.]

[2. The law applicable to the effectiveness of a security right in non-intermediated debt securities against the issuer is the law governing the securities.]

3. The law applicable to the creation, effectiveness against third parties, priority and enforcement of a security right in uncertificated non-intermediated securities, as well as to its effectiveness against the issuer, is the law of the State under which the issuer is constituted.

Option B

The law applicable to the creation, effectiveness against third parties, priority and enforcement of a security right in non-intermediated securities, as well as to its effectiveness against the issuer, is the law of the State under which the issuer is constituted.

Option C

1. The law applicable to the creation, effectiveness against third parties, priority and enforcement of a security right in non-intermediated equity securities, as well as to its effectiveness against the issuer, is the law under which the issuer is constituted.

2. The law applicable to the creation, the effectiveness against third parties, the priority and the enforcement of a security right in non-intermediated debt securities, as well as to its effectiveness against the issuer, is the law governing the securities.

[*Note to the Working Group: The Working Group may wish to note that articles 92, 93 and 96 use a different wording to describe the relationship between a third-party obligor and the secured creditor, and consider whether these articles should be revised to use the same wording, or the matter should be addressed in a comprehensive way in article 92.*]

Article 97. Law applicable in the case of a multi-unit State

1. If the law applicable to an issue is the law of a multi-unit State, subject to paragraph 3, references to the law of a multi-unit State are to the law of the relevant territorial unit and, to the extent applicable in that unit, to the law of the multi-unit State itself.

2. The relevant territorial unit referred to in paragraph 1 is to be determined on the basis of the location of the grantor or of the encumbered asset, or otherwise under the provisions of this chapter.

3. If the applicable law is that of a multi-unit State or one of its territorial units, the internal conflict-of-laws provisions in force in the multi-unit State or territorial unit determine whether the substantive provisions of law of the multi-unit State or of a particular territorial unit of the multi-unit State apply.

Chapter IX. Transition

Article 98. Amendment and repeal of other laws

1. [The laws to be specified by the enacting State] are repealed.

2. [The laws to be specified by the enacting State] are amended as follows [the text of amendments to be specified by the enacting State].

Article 99. Transitional application of this Law

1. For the purposes of this chapter:

(a) "Prior law" means [the law applicable under the conflict-of-laws rules of the enacting State] that was in force immediately before the entry into force of this Law; and

(b) "Prior security right" means a right covered by a security agreement entered into before the entry into force of this Law that is a security right within the meaning of this Law and to which this Law would have applied if it had been in force at the time when the security right was created.

2. Except as otherwise provided in this chapter, this Law applies to all security rights within its scope, including prior security rights.

Article 100. Inapplicability of this Law to actions commenced before the entry into force of this Law

1. Prior law applies to a matter that is the subject of proceedings before a court or arbitral tribunal commenced before the entry into force of this Law.

2. If enforcement of a prior security right commenced before the entry into force of this Law, the enforcement may continue under the prior law.

Article 101. Creation of a prior security right

1. Prior law determines whether a prior security right was created before the entry into force of this Law.

2. A prior security right remains effective between the parties notwithstanding that its creation did not comply with the creation requirements of this Law.

Article 102. Third-party effectiveness of a prior security right

1. A prior security right that was effective against third parties under prior law continues to be effective against third parties under this Law until the earlier of:

(a) The time it would have ceased to be effective against third parties under prior law; and

(b) The expiration of [a period of time to be specified by the enacting State] after the entry into force of this Law.

2. A written agreement between the grantor and the secured creditor creating or providing for a prior security right is sufficient to constitute authorization by the grantor for the registration of a notice after the entry into force of this Law.

3. If the third-party effectiveness requirements of this Law are satisfied before the third-party effectiveness of a prior security right ceases in accordance with paragraph 1, the security right continues to be effective against third parties under this Law from the time when it was made effective against third parties under prior law.

4. If the third-party effectiveness requirements of this Law are not satisfied before the third-party effectiveness of a prior security right ceases in accordance with paragraph 1, the prior security right is effective against third parties only from the time it is made effective against third parties under this Law.

Article 103. Priority of a prior security right

1. The time to be used for determining priority of a prior security right is the time it became effective against third parties under prior law or, in the case of advance registration, became the subject of a registered notice under prior law.

2. The priority of a prior security right is determined by prior law if:

(a) The security right and the rights of all competing claimants arose before the entry into force of this Law; and

(b) The priority status of none of these rights has changed since the entry into force of this Law.

3. The priority status of a security right has changed only if:

(a) It was effective against third parties at the time when this Law entered into force, in accordance with article 102, paragraph 1, and ceased to be effective against third parties as provided in article 102, paragraph 4; or

(b) It was not effective against third parties under prior law at the time when this Law entered into force, and became effective against third parties under this Law.

Article 104. Entry into force of this Law

This Law enters into force [on the date or according to mechanism to be specified by the enacting State].

F. Note by the Secretariat on a draft guide to enactment of the draft model law on secured transactions

(A/CN.9/WG.VI/WP.69 and Add.1-2)

[Original: English]

Contents

I. Purpose of the Guide to Enactment

1. In preparing and adopting the [draft] UNCITRAL draft Model Law on Secured Transactions (the "Model Law"), the United Nations Commission on International Trade Law ("UNCITRAL" or the "Commission") was mindful of the fact that the Model Law would be a more effective tool for States modernizing their legislation and organizations assisting States, if background and explanatory information were provided to executive and legislative branches of Government to assist in their consideration of the Model Law for enactment ("Guide to Enactment").[1]

2. In addition, the Commission was aware that in the preparation of the Model Law it was assumed that the Model Law would be accompanied by such a guide. For example, it was decided in respect of a number of issues not to settle them in the Model Law but to address them in the Guide so as to provide guidance to States enacting the Model Law. So, the Guide also addresses or clarifies matters that were not settled in the Model Law but were referred to the Guide.[2]

3. The Commission agreed that the Guide to Enactment should be prepared and referred that task to the Working Group. In addition, the Commission agreed that the Guide to Enactment: (a) should be as short as possible; (b) include cross references to the UNCITRAL Legislative Guide on Secured Transactions (the "Secured Transactions Guide") and the other texts of the Commission on secured transactions; (c) focus on giving guidance to legislators rather than users of the text; (d) explain the thrust of each provision or section of the Model Law and any difference with the corresponding recommendations of the Secured Transactions Guide or the provisions of another UNCITRAL text on secured transactions; (e) give guidance to States with respect to matters referred to them and in particular explain

[1] *Official Records of the General Assembly, Seventieth Session, Supplement No. 17* (A/70/17) para. 215.
[2] Ibid.

each option offered in various articles of the Model Law to assist enacting States in choosing one of the options offered.[3]

4. The Commission was also aware of the likelihood that the Model Law would be used in a number of States with limited familiarity with the type of secured transaction covered by in the Model Law. So, the Guide, much of which is drawn from the *travaux préparatoires* of the Model Law, is also intended to be helpful to other users of the text, such as judges, arbitrators, practitioners and academics.

5. The information presented in this Guide is intended to briefly explain the thrust of each provision or section of the Model Law and its relationship with the corresponding recommendation(s) of the Secured Transactions Guide or other UNCITRAL texts on secured transactions, including the Supplement on Security Rights in Intellectual Property (the "Intellectual Property Supplement"). With respect to security rights in receivables, the recommendations of the Secured Transactions Guide and thus the provisions of the Model Law are based on the United Nations Convention on the Assignment of Receivables in International Trade (the "Assignment Convention"). The provisions of the Model Law dealing with the security rights registry (the "Registry") are also based on the UNCITRAL Guide on the Implementation of a Security Rights Registry (the "Registry Guide").

6. Mindful of the fact that the Secured Transactions Guide contains extensive commentary, the Commission decided that the Guide to Enactment should nevertheless be prepared. The reason was that the commentary of the Secured Transactions Guide had a different structure and did not contain a straightforward discussion of each recommendation but rather a discussion of the comparative advantages and disadvantages of various workable approaches with the recommendation being set out as a conclusion of that discussion. At the same time, as mentioned above, to avoid repetition, the Commission agreed that the Guide to Enactment should not repeat, but rather incorporate by reference, those comments contained in the Secured Transactions Guide that could assist in explaining a provision of the Model Law.

7. The Guide to Enactment was prepared by the Secretariat pursuant to the request of the Commission and is based on the considerations of the Working Group and the Commission. [It was considered and approved in principle by the Working Group at its twenty-eighth and twenty-ninth sessions (see […] respectively) and by the Commission at its forty-ninth session (see […]).]

II. Purpose and origin of the Model Law

A. Purpose of the Model Law

8. The Model Law is designed to assist States in implementing the recommendations of the Secured Transactions Guide, the Intellectual Property Supplement and the Registry Guide with respect to security rights in movable assets. The overall objective of those texts and the Model Law is to promote low-cost credit by enhancing the availability of secured credit (see Secured Transactions Guide, rec. 1, subpara. (a)). Like all those texts, the Model Law is intended to be useful to States that do not currently have efficient and effective secured transactions laws, as well as to States that already have workable laws but wish to modernize their laws and harmonize them with the laws of other States whose secured transactions laws are generally consistent with the recommendations of those texts (see Secured Transactions Guide, Introduction, para. 1).

9. The provisions of the Model Law are based on the recommendations of the Secured Transactions Guide, including the Intellectual Property Supplement. The provisions of the Model Law dealing with the security rights registry (the "Registry") are also based on the Registry Guide. The provisions of the Model Law on security rights in receivables are based on the recommendations of the Secured Transactions Guide, which in turn are based on the Assignment Convention.

[3] Ibid., para. 216.

B. Background

10. At its first session, in 1968, the Commission included the topic of security interests in goods in its future work programme.[4] From its third session in, 1970, to its thirteenth session, in 1980, the Commission discussed the topic[5] and, at its thirteenth session, in 1980, decided that no further work should be carried out and the subject should no longer be accorded priority as "the world-wide unification of the law of security interests in goods, for the reasons brought out in the discussions, was in all likelihood unattainable".[6] The main reason mentioned for this decision was that "the subject was too complex for there to be reasonable expectations that uniform rules might be developed" because: (a) the concepts of security interests and title retention were understood differently in various legal systems and it would be difficult for many legal systems to make the adjustments necessary to accommodate the different concepts; and (b) the topic of security interests was closely connected with other areas of law, such as bankruptcy law, which would have to be unified or harmonized for the proposed model law to be effective.[7]

C. Preparatory work and adoption

11. At its forty-third session, in 2010, the Commission had before it a note by the Secretariat on possible future work in the area of security interests (A/CN.9/702 and Add.1). The Commission agreed that four issues related to secured transactions law listed in document A/CN.9/702, paragraph 2(a)-(d), were interesting (non-intermediated securities, registration of security rights, a model law and a contractual guide on secured transactions) and should be retained on its future work agenda.[8] At the same time, in view of the limited resources available to it, the Commission agreed that it could not undertake work on all four issues at the same time and that, as a result, it should set priorities. In that regard, there was general agreement that priority should be given to work on registration of security rights in movable assets.

12. At that session, the Commission decided that Working Group VI should be entrusted with the preparation of a text on registration of security rights in movable assets as a matter of priority. It was also agreed that other topics, such as security rights in non-intermediated securities, a model law based on the recommendations of the Guide and a text dealing with the rights and obligations of the parties should be retained in the future programme of Working Group VI for further consideration by the Commission at a future session on the basis of notes to be prepared by the Secretariat within the limits of existing resources.[9] With respect to intellectual property licensing, the Commission requested the Secretariat to prepare a study, within existing resources, that would identify specific topics and discuss the desirability and feasibility of the Commission preparing a legal text with a view to removing specific obstacles to international trade in the context of intellectual property licensing practices.[10]

13. At its forty-fifth session, in 2012, the Commission decided that, upon its completion of the Registry Guide, Working Group VI should undertake work to prepare a simple, short and concise model law on secured transactions based on the Secured Transactions Guide and consistent with all texts prepared by UNCITRAL on secured transactions.[11] At that session, the Commission noted that the Working Group, at its twenty-first session, had agreed to propose to the Commission that the Working Group should develop a model law on secured transactions based on the general recommendations of the Secured Transactions Guide and consistent with all the texts prepared by UNCITRAL on secured transactions. It

[9] Ibid., para. 268.
[10] Ibid., para. 273.
[11] Ibid., *Sixty-seventh Session, Supplement No. 17* (A/67/17), para. 105.

was also noted that the Working Group had agreed to propose to the Commission that the topic of security rights in non-intermediated securities should be retained on its work agenda and be considered at a future session (A/CN.9/743, para. 76).[12]

14. Recalling that, at its forty-third session, in 2010, the Commission had agreed that the topics mentioned above should be retained on the programme of the Working Group for further consideration, the Commission considered the proposals of the Working Group. It was widely felt that a simple, short and concise model law on secured transactions could usefully complement the Secured Transactions Guide and would be extremely useful in addressing the needs of States and in promoting implementation of the Secured Transactions Guide. While a concern was expressed that a model law might limit the flexibility of States to address the local needs of their legal traditions, it was generally viewed that a model law could be drafted in a sufficiently flexible manner to adapt to various legal traditions. Moreover, there was support for the idea that a model law could greatly assist States in addressing urgent issues relating to access to credit and financial inclusion, in particular for small and medium-sized enterprises.[13]

15. As to the topic of security rights in non-intermediated securities, it was widely felt that the topic merited further consideration. The Commission noted that non-intermediated securities, in the sense of securities other than those credited to a securities account, that were used as security for credit in commercial finance transactions were excluded from the scope of the Secured Transactions Guide (see recommendation 4, subparas. (c)-(e) of the Guide), the Unidroit Convention on Substantive Rules for Intermediated Securities (Geneva, 2009; the "Unidroit Securities Convention") and the Convention on the Law Applicable to Certain Rights in respect of Securities held with an Intermediary (The Hague, 2006; the "Hague Securities Convention").[14]

16. At its twenty-third session, in 2013, Working Group VI had a general exchange of views on the basis of a note prepared by the Secretariat entitled "Draft Model Law on Secured Transactions" (A/CN.9/WG.VI/WP.55 and Add.1 to 4).[15] The Working Group developed the Model Law in 6 one-week sessions,[16] the final taking place in February 2016.

17. At its forty-seventh session, in 2014, the Commission expressed its satisfaction for the considerable progress achieved by the Working Group in its work and requested the Working Group to expedite its work so as to complete the draft Model Law, including certain definitions and provisions on non-intermediated securities (see A/CN.9/811), and to submit it to the Commission for adoption together with a guide to enactment as soon as possible.

18. At its forty-eighth session, in 2015, the Commission considered and approved the substance of article 26 of chapter IV of the Model Law and articles 1-29 of the draft Registry Act.[17] At that session, the Commission also agreed that a guide to enactment of the Model Law should be prepared and referred that task to the Working Group.[18]

19. In preparation for the forty-ninth session of the Commission, the text of the draft Model Law as approved by Working Group VI was circulated to all Governments and to interested international organizations for comment. At that session, the Commission had before it the reports of the Working Group on its twenty-eighth and twenty-ninth sessions, the comments received from Governments (A/CN.9/[…]), as well as the Model Law and the draft Guide to Enactment prepared by the Secretariat (A/CN.9/[…]). At that session, the Commission […].

20. After consideration of the Model Law and the draft Guide to Enactment, the Commission adopted the following decision:

[…].

III. The Model Law as a tool for harmonizing laws

21. The Model Law is in the form of a legislative text that is recommended to States for incorporation into their national law. Unlike an international convention, model legislation does not require the State enacting it to notify the United Nations or other States that may have also enacted it. However, States are strongly encouraged to inform the UNCITRAL secretariat of any enactment of the new Model Law (or any other model law resulting from the work of UNCITRAL).

22. In incorporating the text of model legislation into its legal system, a State may wish to consider modifying or leaving out some of its non-fundamental provisions. In the case of a convention, the possibility of changes being made to the uniform text by the States parties (normally referred to as "declarations") is much more restricted; trade law conventions in particular usually either totally prohibit declarations or allow only very few, specified ones. The flexibility inherent in model legislation is particularly desirable in those cases where it is likely that the State would wish to make various modifications to the uniform text before it would be ready to enact it as national law. Some modifications may be expected, in particular when the uniform text is closely related to the national court and procedural system. This, however, also means that the degree of, and certainty about, harmonization achieved through model legislation is likely to be lower than in the case of a convention.

23. However, this relative disadvantage of model legislation may be balanced by the fact that the number of States enacting model legislation is likely to be higher than the number of States adhering to a convention. In order to achieve a satisfactory degree of harmonization and certainty, it is recommended that States make as few changes as possible in incorporating the new Model Law into their legal systems and that they take due regard of its basic principles, including the unitary and functional approach to secured transactions, party autonomy and the international origin of the Model Law. In general, in enacting the Model Law, it is advisable to adhere as much as possible to the uniform text in order to make the national law as transparent and familiar as possible for foreign users of the national law. The Model Law is sufficiently flexible in providing options and leaving a number of matters to States.

24. While it is recommended that the Model Law should be implemented in one law, depending on its legal tradition and drafting conventions, the enacting State may implement the registry-related provisions in its secured transactions law, or in another law, decree, regulation or another act adopted by a legislative or executive body, or in a combination thereof. Similarly, the conflict-of-laws provisions may be incorporated in the secured transactions law (at the beginning or at the end of it) or in a separate law (civil code or other law).

IV. Main features of the Model Law

A. Relationship of the Model Law with the secured transactions texts of UNCITRAL

25. The Secured Transactions Guide, including the Intellectual Property Supplement, and the Registry Guide contain detailed commentary and recommendations on all issues to be addressed in a modern law on secured transactions. However, they are long texts and States will need assistance in implementing their recommendations. Thus, the Model Law was prepared to complement those texts and to assist States in implementing their recommendations.

26. The Model Law reflects the policies embodied in the recommendations of those texts. The difference in the formulation between a provision of the Model Law and the relevant

recommendation is due to the legislative nature of the Model Law. Where there is a difference, it is explained in the remarks to the relevant provision of the Model Law below.

27. For reasons explained below, the Model Law also addresses matters that were not addressed in the Secured Transactions Guide (e.g. security rights in non-intermediated securities) or were not addressed in a recommendation of the Registry Guide (e.g. the effectiveness of amendment or cancellation notices that have not been authorized by the secured creditor). At the same time, the Model Law does not address certain matters that were addressed in the Secured Transactions Guide (e.g. security rights in the right to receive the proceeds under an independent undertaking).

B. Key objectives and fundamental policies of the Model Law

28. The overall objective of the Model Law is the same as that of the Secured Transactions Guide, that is, to promote low-cost credit by enhancing the availability of secured credit (see Secured Transactions Guide rec. 1 and Introduction, paras. 43-59). The fundamental policies of the Model Law are the same as those of the Secured Transactions Guide (see Secured Transactions Guide, Introduction, paras. 60-72). In enacting the Model Law, States may wish to consider issues of harmonization with existing law, legislative method, drafting technique and post-enactment acculturation (see Secured Transactions Guide, Introduction, paras. 73-89).

29. Depending on its drafting method and technique, the enacting State may wish to consider including the key objectives of the Model Law in a preamble or other statement of objectives of the law. That statement could be used for the purpose of the interpretation of, and the filling of gaps in, the Model Law (see paras. 74 and 75 below).

V. Assistance from the UNCITRAL secretariat

A. Assistance in drafting legislation

30. In the context of its training and assistance activities, the UNCITRAL secretariat assists States with technical consultations for the preparation of legislation based on the Model Law. The same assistance is brought to Governments considering legislation based on other UNCITRAL model laws (i.e. the UNCITRAL Model Law on Cross-Border Insolvency, the UNCITRAL Model Law on International Commercial Arbitration, the UNCITRAL Model Law on International Commercial Conciliation, the UNCITRAL Model Law on Electronic Commerce, the UNCITRAL Model Law on Electronic Signatures, the UNCITRAL Model Law on International Credit Transfers and the UNCITRAL Model Law on Public Procurement) or considering adhesion to one of the international trade law conventions prepared by UNCITRAL (e.g. the Assignment Convention).

31. Further information concerning the Model Law and other model laws and conventions developed by UNCITRAL, may be obtained from the UNCITRAL secretariat at the address below:

International Trade Law Division, Office of Legal Affairs
United Nations
Vienna International Centre
P.O. Box 500
A-1400 Vienna, Austria
Telephone: (+43-1) 26060-4060 or 4061
Telecopy: (+43-1) 26060-5813
Electronic mail: uncitral@uncitral.org
Internet home page: www.uncitral.org

B. Information on the interpretation of legislation based on the Model Law

32. The UNCITRAL secretariat welcomes comments concerning the Model Law and the Guide, as well as information concerning enactment of legislation based on the Model Law. Once enacted, the Model Law will be included in the CLOUT information system, which is used for collecting and disseminating information on case law relating to the conventions and model laws that have emanated from the work of UNCITRAL. The purpose of the system is to promote international awareness of the legislative texts formulated by UNCITRAL and to facilitate their uniform interpretation and application. The UNCITRAL secretariat publishes, in the six official languages of the United Nations, abstracts of decisions and arbitral awards. In addition, upon individual request and subject to any copyright and confidentiality restrictions, the UNCITRAL secretariat makes available to the public all decisions and arbitral awards on the basis of which the abstracts were prepared. The system is explained in a user's guide that is available from the UNCITRAL secretariat in hard copy (A/CN.9/SER.C/GUIDE/1/Rev.2) and on the above-mentioned Internet home page of UNCITRAL.

VI. Article-by-article remarks

Chapter I. Scope of application and general provisions

Article 1. Scope of application

33. Article 1 is based on recommendations 1-7 of the Secured Transactions Guide (see chap. I, paras. 1-4). It is intended to set out the various types of transaction and asset covered by the Model Law (see art. 1, paras. 1-4), as well as to clarify the relationship between the Model Law and other law (see art. 1, paras. 5 and 6). Generally, the Model Law has the same comprehensive scope of application as the Secured Transactions Guide and applies to any property right in any type of movable asset, such as equipment, inventory and receivables, which is created by an agreement and which secures payment or other performance of an obligation (see art. 1, para. 1, and definition of the term "security right" in art. 2, subpara. (hh)). However, there are a few differences between the scope of the Model Law and the scope of the Secured Transactions Guide.

34. Like the Secured Transactions Guide (see rec. 3) and the Assignment Convention (see art. 1, para. 1 and art. 2, subpara. (a)), the Model Law applies to outright transfers of receivables (see art. 1, para. 2). The main reasons for this approach are that outright transfers of receivables take place in the context of financing transactions and it is sometimes difficult to determine at the outset of a transaction whether an assignment will be held to be an outright or a security assignment (see Secured Transactions Guide, chap. I, paras. 25-31). The enacting State may wish to consider excluding from the scope of the Model Law certain types of outright transfers of receivables that are not financing transactions (e.g. outright transfers of receivables for collection purposes only or as part of a sale of the business out of which they arose; see para. 39 below.

35. In addition, unlike the Secured Transactions Guide which covered security rights in the right to receive payment under an independent undertaking (see rec. 2, subpara. (a)), the Model Law excludes from its scope security rights in both the right to receive and the right to request payment under an independent guarantee or letter of credit, whether commercial or standby (see art. 1, subpara. 3(a)). The reason is that financing practices relating to independent guarantees or letters of credit might be subject to special rules. In any case, States interested in addressing those practices in their general secured transactions law can always implement the relevant recommendations of the Secured Transactions Guide (recs. 27, 50, 107, 127, 176 and 212).

36. Moreover, like the Secured Transactions Guide (see rec. 4, subpara. (b)), the Model Law defers to law relating to intellectual property (see art. 1, subpara. 3(b)). This limitation may not be necessary if the enacting State has already coordinated or otherwise addressed the relationship between the Model Law and its law relating to intellectual property.

37. Also, unlike the Secured Transactions Guide (see rec. 4, subpara. (c)), the Model Law does not exclude from its scope security rights in non-intermediated securities (see art. 1, subpara. 3(c)). The reason is that such securities are part of commercial finance transactions and are not addressed in any other international trade law text (see Secured Transactions Guide, chap. 1, paras. 37 and 38).

38. Finally, the Model Law excludes payment rights under or from financial contracts governed by netting agreements (see art. 1, subpara. 3(d)), including foreign exchange transactions, because they raise complex issues that require special rules (see Secured Transactions Guide, chap. I, para. 39).

39. Combining the policy of recommendations 4, subparagraph (a), and 7 of the Secured Transactions Guide, subparagraph 3(e) permits the enacting State to exclude further types of asset (or transaction), provided, that other law governs matters addressed in the Model Law. The reason for this approach is to avoid inadvertently creating gaps in the law. In addition, subparagraph 3(e), provides guidance to States as to possible exclusions, referring to types of asset, such as ships and aircraft, that are subject to specialized secured transactions and asset-based registration regimes.

40. Similarly, while paragraph 4, is formulated somehow differently from recommendation 6 of the Secured Transactions Guide, there is no policy difference between the two rules. The policy may be explained as follows. In the case of a security right in an asset covered by the Model Law, the security right extends to its identifiable proceeds (see art. 10, para. 1). This rule applies even if the proceeds are of a type that is outside the scope of the Model Law (such as intermediated securities) except if a security right in those securities is subject to other law.

41. Paragraph 5, which is a reformulation of the rule in recommendation 2, subparagraph (b), of the Secured Transactions Guide along the lines of article 4, paragraph 4 of the Assignment Convention, is intended to preserve the application of consumer protection law. For example, under consumer-protection law, it may not be possible to create a security right in all present and future assets, employment benefits, at least up to a certain amount, or necessary household items of a consumer. Enacting States that do not have a developed consumer-protection law may need to consider whether enactment of the Model Law should be accompanied by the enactment of such special protections for consumers. It should also be noted that the Model Law already includes certain consumer-specific rules. For example, under article 23, an acquisition security right in consumer goods is effective against third parties upon its creation (see also para. 118 below).

42. In line with recommendation 18 of the Secured Transactions Guide, paragraph 6 is intended to preserve limitations to the creation or the enforceability of a security right in certain types of asset (such as employment benefits) that are based on other law (statutory or case law), if any. At the same time, it is intended to ensure that such limitations based on the sole ground that an asset is a future asset or a part or undivided interest in an asset are overridden (see art. 8, paras. (a) and (b)). However, paragraph 6 does not apply to contractual limitations (negative pledge agreements). The Model Law overrides explicitly contractual limitations with respect to receivables (see art. 13) or rights to payment of funds credited to a bank account (see art. 15). With respect to other types of asset, contractual limitations are overridden implicitly to the extent that the Model Law allows the owner of an asset to create a security right in that asset, even if the security or other agreement expressly restricts that right. The Model Law does not condition the creation, third-party effectiveness or priority of a security right in an asset on the grantor having the right to encumber it (art. 6, para. 1, refers only to the “power to encumber”).

43. Finally, unlike the Secured Transactions Guide, the Model Law does not apply to attachments to movable assets or immovable property. Thus, the Model Law does not include a provision along the lines of recommendation 5, which provides that, while the law recommended in the Secured Transactions Guide does not apply to immovable property, it does apply to attachments to immovable property. Enacting States are encouraged to include in their enactments of the Model Law provisions based on the relevant recommendations of the Secured Transactions Guide (see recs. 21, 25, 43, 48, 87, 88, 164, 165, 184, 195 and 196).

Article 2. Definitions and rules of interpretation

44. Article 2 contains definitions and rules of interpretation with respect to most key terms used in the Model Law. Other terms are defined explained in various articles of the Model Law. For example: (a) the term "registry" is defined in article [26];* and (b) the term "default" is defined in article [66, paragraph 1]. Article 2 is based on the terminology and rules of interpretation of the Secured Transactions Guide (see Secured Transactions Guide, Introduction, paras. 15-20). Rules of interpretation include the following: (a) the word "or" is not intended to be exclusive; (b) the singular includes the plural and vice versa; and (c) the words "include" or "including" are not intended to indicate an exhaustive list (see Secured Transactions Guide, Introduction, para. 17).

Acquisition security right

45. An acquisition security right is a security right that secures the grantor's obligation with respect to credit provided to enable the grantor to acquire a tangible asset (other than reified intangible assets), intellectual property and the rights of a licensee in intellectual property. This definition, in conjunction with the definition of "security right," results in retention-of-title transactions, conditional sales and financial leases being "acquisition security rights." For a security right to be an acquisition security right, the credit it secures has to be used for that purpose. Where a security right secures obligations in addition to the credit extended and used for the purpose of acquiring the encumbered asset, it is an ordinary security right to the extent of those additional obligations.

Bank account

46. To underline the distinction between a "bank account" and a "securities account", the Model Law defines the former term as "an account maintained by a [essentially, deposit taking institution] to which funds may be credited or debited" and the latter term as "an account maintained by an intermediary to which securities may be credited or debited" and the term "securities" in a manner that clearly excludes funds. The term "bank account", therefore, includes any checking or savings account. The term does not include a right against the bank to payment evidenced by a negotiable instrument. The enacting State may wish to consider including a definition of the term "bank" in its secured transactions law or rely for this purpose on other law.

Certificated non-intermediated securities

47. The term "represented" is broad enough to cover the approaches taken in different jurisdictions (e.g. "covered" or "embodied"). The term "certificate" means only a tangible document subject to physical possession. Thus, securities represented by an electronic certificate are uncertificated securities under the Model Law.

Competing claimant

48. A competing claimant may have a right in the same encumbered asset as original encumbered asset or as proceeds. Other creditors of the grantor with a right in the same encumbered asset include judgement creditors.

Consumer goods

49. Unlike the definition of the term "consumer goods" in the Secured Transactions Guide on which it is based, this definition includes the word "primarily" to ensure that goods used incidentally for personal, family or household purposes would not be treated as consumer goods.

Control agreement

50. While the effect of a control agreement is to render a security right effective against third parties (see art. 18), its purpose is to ensure the cooperation of the depositary institution or the issuer of securities in the enforcement of a security right. Unlike the definition of this term in the Secured Transactions Guide, on which it is based, this definition does not refer

* The reference is to this article as it appears in document A/CN.9/WG.VI/WP.65/Add.1.

to a "signed writing". This difference does not reflect a policy change but rather a decision that this matter should be left to the authorization requirements of the enacting State. A control agreement does not need to be in a single writing. It should be noted that any reference to a "writing" in the Model Law is intended to cover electronic equivalents (see Secured Transactions Guide, recs. 11 and 12).

Equipment

51. Unlike the definition of the term "equipment" in the Secured Transactions Guide on which it is based, this definition includes the word "primarily" to ensure that goods used incidentally by a person in the operation of its business would not be treated as equipment. This definition also includes the words "or intended to be used" to ensure that goods are treated as equipment as long as their intended use is in the operation of a person's business. This definition also includes the words "other than inventory" to draw a distinction between "equipment" and "inventory".

Insolvency representative

52. The term is sufficiently broad to include the person responsible for administering or supervising insolvency proceedings (see UNCITRAL Legislative Guide on Insolvency Law (the "Insolvency Guide"), part two, chap. III, paras. 11-18 and 35).

Intangible asset

53. The term includes receivables, rights to the performance of obligations other than receivables, rights to payment of funds credited to a bank account, and uncertificated non-intermediated securities.

Inventory

54. In States in which a licence of tangible assets is possible, the term "lease of tangible assets" in this definition includes the licence of tangible assets.

Money

55. The term "money", whose definition is based on a definition contained in the Secured Transactions Guide, is intended to include not only the national currency (i.e. banknotes and coins) of the enacting State but also foreign currency. No reference is made to currency "currently" authorized as a legal tender, because if currency is not "currently" authorized as a legal tender, it would not qualify as a legal tender. Rights to payment of funds credited to a bank account and negotiable instruments are recognized as distinct concepts in the Model Law and they are not included in the term "money".

Non-intermediated securities

56. The term "non-intermediated securities" refers to securities (i.e. shares and bonds) that are not held in a securities account. The term does not include the rights of an intermediary or a competing claimant in securities held by the intermediary directly against the issuer where equivalent securities are credited by the intermediary to a securities account in the name of the grantor.

Notification of a security right in a receivable

57. This definition is based on the definition of the term "notification of the assignment" and recommendation 118 of the Secured Transactions Guide. The requirement for the identification of the encumbered receivable and the secured creditor was moved to article [56, paragraph 1],* as it states a substantive rule on the effectiveness of a notification of a security right, a matter that is already addressed in that article.

Possession

58. […]

* The reference is to this article as it appears in document A/CN.9/WG.VI/WP.65/Add.3.

Priority

59. The definition of this term is based on the definition in article 5, subparagraph (g), of the Assignment Convention. Its difference with the definition of the term in the Secured Transactions Guide is due to the need to clarify that the person with priority may be a secured creditor or a competing claimant (and not just a person with a security right) and that priority provides a preference to the person with priority (and not just a competing claimant).

Proceeds

60. The term "proceeds" has the same meaning as in the Secured Transactions Guide. It is important to note that it covers both proceeds of the sale or other disposition of an encumbered asset by the grantor or a person that acquired the asset from the grantor and natural or civil fruits. The terms revenues, dividends and distributions, which were included in the definition of this term in the Secured Transactions Guide, have been deleted on the understanding that they are covered by the term "civil fruits".

61. The term is not limited to proceeds received by the grantor but includes proceeds received by a transferee of an encumbered asset. The reason for this approach is that, with such a limitation, even where a transferee acquired the asset subject to the security right, it could sell the asset further and keep the proceeds. In addition, transferees are anyway protected by other provisions of the Model Law (e.g. arts. 19, para. 2, and 32, para. 2). However, as a result of this approach, third-party transferees would have no way of finding out that the assets were proceeds of another asset in which somebody else had a security right. This would be the case at least where the proceeds are cash proceeds and thus a security right in such proceeds would be effective against third parties without the registration of an amendment notice (see art. 19, para. 1, and 27, option C, of the registry-related provisions in document A/CN.9/WG.VI/WP.65/Add.1). Thus, the enacting State may wish to consider limiting the term "proceeds" to proceeds received by the grantor or consider other ways to avoid a prejudice to third-party financiers (e.g. requiring the registration of an amendment notice in the case of a transfer of an encumbered asset; see art. 27, option A or B, of the registry-related provisions in document A/CN.9/WG.VI/WP.65/Add.1).

Receivable

62. Like the Secured Transactions Guide, the Model Law defines the term "receivable" in a broad way to cover even non-contractual receivables (e.g. tort receivables). To the contrary, in the Assignment Convention, the term "receivable" is limited to contractual rights to payment. Rights to payment evidenced by a negotiable instrument, rights to payment of funds credited to a bank account and rights to payment under a non-intermediated security are excluded as they are subject to special rules.

Secured obligation

63. The term "secured obligation" includes any obligation secured by a security right, including credit extended to cover the operational costs of a business or to pay the purchase price of goods. It includes not only obligations already incurred at the time of the extension of the credit but also obligations incurred thereafter, if the security agreement so provides. As in other UNCITRAL texts, in the Model Law the singular includes the plural and vice versa (see para. 44 above). So, for example, a reference to the secured obligation would be sufficient to cover all present and future secured obligations.

Securities

64. The definition of the term "securities" is narrower than the definition of that term in article 1, subparagraph (a), of the Unidroit Securities Convention. The reason is that, while a broad definition is appropriate for the purposes of that Convention, it is overly broad for the purposes of the Model Law and could result in subjecting security rights in receivables, negotiable instruments, money and other generic intangible obligations to the special rules applicable to security rights in non-intermediated securities (see A/CN.9/802, para. 74). In any case, each enacting State would need to coordinate the definition of the term "securities" in its secured transactions law with the definition of this term in its securities transfer law.

Securities account

65. The definition of this term is derived from article 1, subparagraph (c), of the Unidroit Securities Convention.

Tangible asset

66. The term "tangible asset" includes the terms consumer goods, equipment and inventory, terms that do not refer to subcategories of tangible assets but rather to the way in which particular tangible assets are used by the grantor. Thus, the same cars could qualify as "consumer goods", if they are used by the grantor for personal purposes, as "equipment", if they are used by the grantor in its business, or as "inventory", if the grantor happens to be a car dealer or manufacturer. The term also includes the reified intangible assets listed in the definition except for the purposes of certain articles that contain rules that are non-applicable to reified intangible assets.

International obligations of this State

67. The Model Law leaves to the enacting State the issue whether international treaties (such as the Convention on International Interests in Mobile Equipment and its Protocols) prevail over domestic law. For example, in the case of a conflict with an obligation of the enacting State arising out of any treaty or other form of agreement to which it is a party with one or more other States, the requirements of the treaty or agreement may prevail (see art. 3 of the UNCITRAL Model Law on Cross-Border Insolvency). Such an approach may need to be limited to international treaties that directly address matters governed by the Model Law. In other States, in which international treaties are not self-executing but require internal legislation in order to become enforceable law, such an approach might be inappropriate or unnecessary (see Guide to Enactment and Interpretation of the UNCITRAL Model Law on Cross-Border Insolvency, paras. 91-93).

Article 3. Party autonomy

68. Article 3 is based on article 6 of the Assignment Convention (the first sentence of which is based on art. 6 of the United Nations Convention on Contracts for the International Sale of Goods ("CISG")) and recommendation 10 of the Secured Transactions Guide. It is intended to reflect the principle that, with certain exceptions stated in the Model Law, parties are free to vary its effect as between them.

69. An agreement referred to in paragraph 1 may be not only between the secured creditor and the grantor but also between the secured creditor or the grantor and other parties whose rights may be affected by the Model Law, such as the debtor of an encumbered receivable, or between the secured creditor and a competing claimant.

70. The Model Law deals with relationships in which an agreement between two parties (e.g. the grantor and the secured creditor) might have or appear to have an impact on the rights of third parties (e.g. the debtor of a receivable). Thus, paragraph 2 reiterates the general principle that an agreement between two parties cannot affect the rights of a third party.

Article 4. General standards of conduct

71. Article 4 is based on recommendation 132 of the Secured Transactions Guide (see chap. VII, para. 15). Under article 4, any person must exercise all its rights and perform all its obligations under the Model Law (and not only the rights and obligations under the provisions of the enforcement chapter) in good faith and in a commercially reasonable manner. The violation of this obligation may result in liability in damages and other consequences that are left to the relevant law of the enacting State.

72. The concept of "commercial reasonableness" refers to the commercial transaction context and best practices. Meeting the specific standards referred to in other articles of the Model Law (e.g. art. [72, para. 4],[*] according to which notice is to be given within a short

[*] Reference is to this article as it appears in document A/CN.9/WG.VI/WP.65/Add.3.

period of time) should generally be construed as meeting the general standards of conduct referred to in this article.

73. Article 4 is listed in article 3 as a mandatory law rule. As a result, the duty to act in good faith and in a commercially reasonable manner cannot be waived or varied by agreement.

Article 5. International origin and general principles

74. Article 5 is inspired by article 7 of the United Nations Convention on Contracts for the International Sale of Goods (the "CISG") and based on article 3 of the UNCITRAL Model Law on Electronic Commerce, article 4 of the UNCITRAL Model Law on Electronic Signatures and article 2A of the UNCITRAL Model Law on International Commercial Arbitration. It is intended to limit the extent to which a national law implementing the Model Law would be interpreted only by reference to concepts of national law.

75. The Model Law is a tool for harmonizing secured transactions laws (see paras. 21-24 above). To promote harmonization, paragraph 1 provides that the provisions of a national law implementing the Model Law should be interpreted with reference to its international origin and the observance of good faith. Paragraph 2 is intended to provide guidance with respect to the filling of gaps in a law implementing the Model Law by reference to the general principles on which the Model Law is based (see paras. 28 and 29 above).

Chapter II. Creation of a security right

A. General rules

Article 6. Creation of a security right

76. Article 6 is based on recommendations 13-15 of the Secured Transactions Guide (see chap. II, paras. 12-37). Its purpose is to deal with the creation of a security right, and the form and the minimum content of a security agreement so as to achieve one of the key objectives of an effective and efficient secured transactions law, that is, to enable parties to obtain a security right in a simple and efficient manner (see Secured Transactions Guide, rec. 1, subpara. (c)). A security right is created by agreement, for the content of which there are no requirements other than those listed in paragraphs 3 and 4, and for the conclusion of which no terms of art need be used.

77. Under paragraph 1, an agreement is sufficient to create a security right, provided that at the time of the conclusion of the security agreement the grantor has either a right in the asset to be encumbered (e.g. in the case of assets existing at that time) or the power to encumber it (e.g. where there is an anti-assignment agreement, the creditor does not have the right to encumber a receivable, but it does have the power to do so). Paragraph 2 clarifies that, in the case of future assets (i.e. assets produced or acquired by the grantor after the conclusion of the security agreement; see definition in art. 2, subpara. (m)), the security right is created when the grantor acquires rights in them or the power to encumber them.

78. Paragraph 3 sets out the requirements that a written security agreement has to meet. Whether written or oral, a security agreement creates a security right but need not any special words to achieve that result (see art. 2, subpara. (gg)). From the two alternative wordings set out in paragraph 3 within square brackets, the enacting State may wish to select the one that is most fitting to its contract law. If the enacting State retains the words "concluded in", a security agreement that is not in written form is not effective. If the enacting State retains the words "evidenced in", a security agreement that is not in written form is in principle effective but its existence may only be evidenced by a writing.

79. Depending on what it considers as most efficient financing practices and on the assumptions of market participants, the enacting State may wish to consider whether to retain subparagraph 3(d). One approach is to retain subparagraph 3(c) to facilitate the grantor's access to secured financing from other creditors in situations where the value of the assets encumbered by the prior registered security right exceeds the maximum amount indicated in the notice. Another approach is to leave out subparagraph 3(d) to facilitate the grantor's access to credit by the first-registered secured creditor (for the comparative

advantages and disadvantages of the two approaches, see Secured Transactions Guide, chap. IV, paras. 92-97).

80. Under paragraph 4, where the secured creditor is in possession of the encumbered asset, there is no need for a written security agreement and thus the existence of a security agreement may be evidenced by any other means.

Article 7. Obligations that may be secured

81. Article 7 is based on recommendation 16 of the Secured Transactions Guide (see chap. II, paras. 38-48). It is primarily intended to ensure that future, conditional and fluctuating obligations may be secured. The main reason for this approach is to facilitate modern financing transactions, in the context of which disbursements are made at different times depending on the needs of the grantor (e.g. revolving credit facilities for the grantor to buy inventory). This approach does not preclude the introduction of special protections for grantors (e.g. setting a maximum amount for which the security right may be enforced; see art. 6, subpara. 3(d)).

Article 8. Assets that may be encumbered

82. Article 8 is based on recommendation 17 of the Secured Transactions Guide (see chap. II, paras. 49-57 and 61-70). It is primarily intended to ensure that future assets, parts of assets and undivided rights in assets, generic categories of assets, as well as all assets of a person, may become the subject of a security right.

83. It should be noted that the fact that future assets may be subject to a security right does not mean that statutory limitations to the creation or enforcement of a security right in specific types of asset (e.g. employment benefits in general or up to an amount) are overridden (see art. 1, para. 6).

84. It should also be noted that the fact that all assets of a grantor may be subject to a security right so as to maximize the credit that may be available and improve the terms of the credit agreement does not mean that other creditors of the grantor are necessarily unprotected. The protection of other creditors (within and outside insolvency proceedings) is a matter of other law and is foreseen in article 32.

Article 9. Description of encumbered assets

85. Article 9 is based on recommendation 14, subparagraph (d), of the Secured Transactions Guide (see chap. II, paras. 58-60). In view of their importance, the requirements for the description of encumbered assets in a security agreement are presented in a separate article. Article 9 is intended to ensure that a security right may be created in an asset or class of assets even if the description in the security agreement is generic, such as “all inventory” or “all receivables” (see Secured Transactions Guide, chap. II, paras. 58-60).

Article 10. Right to proceeds and commingled funds

86. Article 10 is based on recommendations 19 and 20 of the Secured Transactions Guide (see chap. II, paras. 72-89). Paragraph 1 is intended to ensure that, unless otherwise agreed by the parties (as this article is not listed in article 4 as a mandatory law rule), a security right in an asset automatically extends to its identifiable proceeds. The rationale for this rule is that it reflects the normal expectations of the parties and ensures that the secured creditor is sufficiently secured. Otherwise, a grantor could effectively deprive a secured creditor of its security either by disposing of those assets to a person who would take free of the security right or to a person from whom those assets could not easily be recovered.

87. By way of example, where the original encumbered asset is inventory, cash or receivables generated from the sale of the inventory are proceeds. If upon payment of the receivables the funds received are deposited in a bank account, the right to payment of the funds credited to the bank account are also proceeds of the inventory.

88. Paragraph 2 introduces an exception to the identifiability requirement in paragraph 1. A security right in an asset extends to its proceeds in the form of funds that are commingled

with other funds even though the funds that are proceeds cannot be identified separately from the funds that are not proceeds (see subparagraph 2(a)).

89. Subparagraph 2(b) limits that security right to the value of the proceeds immediately before they were commingled. So, if a sum of €1,000.00 is deposited in a bank account and at the time of enforcement the bank account has a balance of €2,500.00, the security right extends to the sum of €1,000.00.

90. Subparagraph 2(c) deals with situations in which the balance in the bank account fluctuates and, at some point of time, is less than the value of the proceeds deposited (e.g. less than €1,000.00). In such a case, the security right extends to the lowest value between the time when the proceeds were commingled and the time the security right in the proceeds is claimed. So, if in the example given, the balance in the account where the proceeds were deposited was €1,500.00, then it went down to €500.00 and at the time of enforcement was €750.00, the security right extends to €500.00 (i.e. the lowest intermediate balance).

Article 11. Tangible assets commingled in a mass or product

91. Article 11 is based on recommendations 22 and 91 of the Secured Transactions Guide (see chap. II, paras. 90-95 and 100-102, and chap. V, paras. 117-123). It accomplishes three related objectives. First, it transforms the security right in the original asset into a security right in the mass or product. Second, it limits the value of that security right by tying its value to the value of the original collateral in the mass or product. Third, it addresses situations in which more than one secured creditor has a claim to a mass or product as a result of a security right in its components.

92. Paragraph 1 is intended to ensure that a security right in assets commingled in a mass or product, even though they are no longer identifiable, continues in the mass or product.

93. Under option A, the security right is limited to the value of the encumbered assets immediately before they were commingled and became part of the mass. So, if a secured creditor has a security right in €100,000.00 worth of oil (100,000 litres at €1 per litre) that is commingled with €50,000.00 worth of oil in the same tank and thus the mass has €150,000.00 worth of oil, the security right encumbers €100,000.00 worth of oil.

94. Under option B, this rule applies to products (see paragraph 3). So, if encumbered flour worth €100.00 is commingled and bread worth €500.00 is produced, the security right is limited to €100.00. But option B (see paragraph 2) contains a different rule with respect to tangible assets commingled in a mass. In the example just given, the security right is limited to two thirds of the value of the oil (i.e. €100,000.00 worth of oil).

95. It should be noted that the word “limited” in paragraph 2 of option A and paragraphs 2 and 3 of option B means that, if the value of the encumbered asset commingled in the mass or product increases after commingling, the increased value is unencumbered. In other words, the secured creditor does not benefit from commodity price increases (see Secured Transactions Guide, chap. V, para. 118 ad finem). Similarly, the word “limited” does not address the question of what is the amount secured if the price of the encumbered asset decreases after commingling. The rule applicable to all types of encumbered asset applies to tangible assets commingled in a mass or product, namely that each party bears the risk of decreases of the price of the encumbered asset. Thus, in the example given above, if, at the time of enforcement, the value of the mass is only €75,000.00 because of a drop on oil prices (€0.5 per litre), the secured creditor should be able to enforce its security right against only €50,000.00 worth of oil. If the value of the oil goes up (€1.5 per litre), the secured creditor should not benefit from it as its claim is sufficiently secured and thus should be able to enforce its security right against €100,000.00 worth of oil (not €150,000.00).

Article 12. Extinguishment of a security right

96. Article 12 deals with the extinguishment of a security right, which triggers the obligation of a secured creditor to return an encumbered asset or register an amendment or

cancellation notice (see arts. 49* and 21, subpara. 2(c), of the registry-related provisions**). Article 12 refers to full payment or other satisfaction of all present and future secured obligations, including conditional obligations. This means that a security right is extinguished only where there is full payment or other satisfaction of the secured obligation and there is no commitment of the secured creditor to extend further credit. As a result, the security right is not extinguished where temporarily there is a zero balance but there is an existing commitment of the secured creditor to extend further credit (e.g. on the basis of revolving credit arrangement).

B. Asset-specific rules

Article 13. Contractual limitations on the creation of a security right

97. Article 12 is based on recommendation 24 of the Secured Transactions Guide (see chap. II, paras. 106-110 and 113), which in turn is based on article 9 of the Assignment Convention. Paragraph 1 provides that an agreement limiting the grantor's right to create a security right in the receivables listed in paragraph 4 (often referred to as "trade receivables") does not invalidate a security right created in violation of such an agreement. The rationale underlying this approach is to facilitate the use of receivables as security for credit, which is in the interest of the economy as a whole, without unduly interfering with party autonomy. This rule does not affect statutory limitations to the creation or enforcement of a security right in certain types of receivable (e.g. consumer or sovereign receivables; see art. 1, paras. 5 and 6).

98. Paragraph 2 makes it clear that paragraph 1 goes no further than what it says (the assignment is effective notwithstanding the contractual provision to the contrary), but paragraph 1 does not excuse the assignor from liability for damages caused by breach of that contractual provision. Thus, under paragraph 2, if the debtor of the receivable has sufficient negotiating power to force the grantor to accept the inclusion of a "no-assignment clause" in their agreement and a breach of that agreement by the grantor results in a loss to the debtor of the receivable, the grantor is liable to damages under contract law. However, the debtor of the receivable may not avoid the contract because of that breach or raise against the secured creditor (assignee) any claim it may have against the grantor for that breach. In addition, under paragraph 3, a secured creditor that accepts a receivable as security for credit is not liable for the grantor's breach just because it had knowledge of the "no-assignment clause".

99. As a result of the rules in paragraphs 1-3, a secured creditor does not have to examine each contract from which a receivable might arise to determine whether it contains an anti-assignment clause. This facilitates secured transactions in which security is created in bulk receivables and transactions in which future receivables are involved.

100. Paragraph 4 limits the scope of the rule in paragraph 1 to broadly defined trade receivables. It does not apply to so-called "financial receivables", because, where the debtor of the receivable is a financial institution, even partial invalidation of an anti-assignment clause could affect obligations undertaken by the financial institution towards third parties (see Secured Transactions Guide, para. 108).

101. Article 13 applies also to anti-assignment agreements limiting the creation of a security right in any personal or property rights securing or supporting payment or other performance of an encumbered receivable or other intangible asset, or negotiable instrument (see art. 14).

Article 14. Personal or property rights securing or supporting payment or other performance of an encumbered receivable or other intangible asset, or negotiable instrument

102. Paragraph 1 reflects the thrust of recommendation 25 of the Secured Transactions Guide (see chap. II, paras. 111-122). It is intended to ensure that a security right in a

* Reference is made to article 49 as it appears in document A/CN.9/WG.VI/WP.65/Add.3.

** Reference is made to article 21 of the registry-related provisions as it appears in document A/CN.9/WG.VI/WP.65/Add.1.

receivable or another of the assets described in paragraph 1 automatically extends to any personal right that supports payment or other performance of the receivable (e.g. guarantee) and any property right that secures such payment or other performance (e.g. a security right in another asset).

103. Under paragraph 2, which reflects the thrust of article 10 of the Assignment Convention, where the rights securing or supporting payment of a receivable are independent rights (i.e. they are transferable only with a new act of transfer), the grantor is obliged to create a security right in them in favour of the secured creditor.

104. This article does not affect a right in immovable property that under other law is transferable separately from the obligation that the right in the immovable property secures. In addition, this article does not affect any duties of the grantor to the debtor of the receivable or other intangible asset, or the obligor of the negotiable instrument. Moreover, to the extent that the automatic effects of paragraph 1 are not impaired, this article does not affect any requirement under other law relating to the form or registration of the creation of a security right in any asset that is not covered in this Law (e.g. registration of a mortgage in the relevant immovable property registry).

Article 15. Right to payment of funds credited to a bank account

105. Article 15 is based on recommendation 26 of the Secured Transactions Guide (see chap. II, paras. 123-125). It is intended to implement article 13 with respect to rights to payment of funds credited to a bank account. As a result of article 63,[*] a security right may be created in a right to payment of funds credited to a bank account without the consent of the depositary institution but the depositary institution is not obliged to pay the secured creditor or respond to requests of information by the secured creditor.

Article 16. Tangible assets covered by negotiable documents

106. Article 14 is based on recommendation 28 of the Secured Transactions Guide (see chap. II, para. 128). The purpose is to follow existing law in which a negotiable document is treated as a reified right to the tangible assets it covers, so there is no need separately to create a security right in those tangible assets if there is a security right in the document (e.g. inventory or crops deposited in a warehouse for which the warehouse operator issued a negotiable warehouse receipt).

107. In view of the definition of the term “possession” in article 2, subparagraph (y), possession of the issuer of a negotiable document includes possession by its representative or a person acting on behalf of the issuer (including in the context of multi-modal transport contracts). A security right in a negotiable document extends to the tangible assets covered by the document and will continue to exist even after the document no longer covers the assets. However, effectiveness against third parties through possession of the document applies only as long as the document covers the assets and lapses once they are released by the issuer (see article 25, para. 2).

Article 17. Tangible assets with respect to which intellectual property is used

108. Article 17 is based on recommendation 243 of the Intellectual Property Supplement (see paras. 108-112). It is intended to ensure that, unless otherwise agreed, a security right in a tangible asset does not automatically extend to the intellectual property right contained therein, and that a security right in an intellectual property right does not automatically extend to the tangible asset with respect to which the intellectual property right is used (e.g. the copyrighted software included in a personal computer or the trademark on an inventory of clothes).

[*] Reference is made to this article as it appears in document A/CN.9/WG.VI/WP.65/Add.3.

Chapter III. Effectiveness of a security right against third parties

A. General rules

Article 18. Primary methods for achieving third-party effectiveness

109. Article 18 is based on recommendation 32 of the Secured Transactions Guide (see chap. III, paras. 19-86). It is intended to set out the primary methods for achieving third-party effectiveness (i.e. registration in the general security rights registry and possession of a tangible asset by the secured creditor). Other methods (e.g. control and notation in the books of an issuer) are set out in the asset-specific provisions of this chapter.

110. States that have specialized registries with respect to assets covered by the Model Law (e.g. patent or trademark registries) or title notation systems (e.g. with respect to motor vehicles) may wish to consider whether registration with respect to security rights in those types of asset should take place in the security rights registry, in a specialized registry or both. If registration may take place in both (or, if a security right may also be noted on a title certificate), the enacting State may wish to ensure coordination (with national or international specialized registries), including by way of linking the relevant registries so that information entered in one will also become available in the other and by way of appropriate priority rules (see Secured Transactions Guide, chap. IV, para. 117, and Registry Guide, paras. 64-66). With respect to security interests in attachments to immovable property and receivables arising from sale or lease of, or secured by, immovable property, the enacting State may wish to consider issues of coordination with immovable property registries (see Registry Guide, paras. 67-69). Finally, the enacting State may wish to consider issues of coordination among national security rights registries (Registry Guide, para. 70).

Article 19. Proceeds

111. Article 19 is based on recommendations 39 and 40 of the Secured Transactions Guide (see chap. III, paras. 87-96). It is intended to determine the circumstances in which the security right in proceeds that is provided for in article 10 is effective against third parties.

112. Under paragraph 1 a security right in proceeds in the form of money, receivables, negotiable instruments or rights to payment of funds credited to a bank account is automatically effective against third parties without the need for any further action by the secured creditor. For example, upon the sale of encumbered inventory, any receivable, cash, bank deposit, or check generated by the sale are proceeds of the originally encumbered inventory.

113. Unlike recommendation 39, on which this article is based, paragraph 1 does not refer to the description of the proceeds in the notice. This change is a drafting change and does not constitute a change of policy. The reason for this change is that, once the proceeds are described in the notice (in line with the security agreement), they constitute original encumbered assets, not proceeds, and article 16 is sufficient in dealing with the third-party effectiveness of a security right in those assets.

114. For proceeds other than those covered in paragraph 1, paragraph 2 provides that, if a security right in an asset was effective against third parties, the security right in its proceeds is effective against third parties for a short period of time and thereafter only, if before the expiry of that short period, the security right in the proceeds is made effective against third parties by one of the methods set out in article 18 or the asset-specific provisions of this chapter.

Article 20. Changes in the method for achieving third-party effectiveness

115. Article 20 is based on recommendation 46 of the Secured Transactions Guide (see chap. III, paras. 120 and 121). It is intended to ensure that a security right made effective by one method may later be made effective by another method, and that third-party effectiveness is continuous as long as there is no time gap between the two methods.

Article 21. Lapse in third-party effectiveness

116. Article 21 is based on recommendation 47 of the Secured Transactions Guide (see chap. III, paras. 122-127). It is intended to ensure that, if third-party effectiveness lapses, it may be re-established. In such a case, third-party effectiveness dates only form the time it is re-established.

Article 22. Continuity in third-party effectiveness upon a change of the applicable law to this Law

117. Article 22 is based on recommendation 45 of the Secured Transactions Guide (see chap. III, paras. 117-119). Under paragraph 1, if the law enacting the Model Law becomes applicable as a result, for example, of a change in the location of the encumbered asset or the grantor, a security right that was effective against third parties under the previously applicable law remains effective against third parties under the law enacting the Model Law for a short period of time, unless its third-party effectiveness under the initially applicable law has already lapsed. Thereafter, the security right is effective against third parties only if, before the expiry of that period, it is made effective against third parties under the relevant provisions of the law enacting the Model Law. Under paragraph 2, if the third-party effectiveness of a security right does not lapse, it dates back to the time it was first achieved under the previously applicable law.

Article 23. Acquisition security rights in consumer goods

118. Article 23 is based on recommendation 179 of the Secured Transactions Guide (see chap. IX, paras. 125-128). An acquisition security right in consumer goods is automatically effective against third parties [except as against buyers or other transferees of the consumer goods] [if the consumer goods are below a value to be specified by the enacting State]. This limitation is intended to [require registration for a security right in consumer goods to be effective against buyers or other transferees of consumer goods] [to exempt from registration only low-value consumer transactions]. If registration in a specialized registry or notation in a title certificate is also possible, such an acquisition security right in consumer goods should not have the special priority of an acquisition security right over a security right registered in a specialized registry. This approach would be necessary to avoid any interference with any specialized registration system.

B. Asset-specific rules

Article 24. Rights to payment of funds credited to a bank account

119. Article 24 is based on recommendation 49 of the Secured Transactions Guide (see chap. III, paras. 138-148). It adds to the primary methods of article 16 three asset-specific methods of achieving third-party effectiveness of a security right in a right to payment of funds credited to a bank account. First, if the secured creditor is the depositary institution, no additional action is required for a security right to become effective against third parties. Second, the security right is effective against third parties upon conclusion of a control agreement (see art. 2, subpara. (g)(ii)) among the grantor, the secured creditor and the depositary institution. Third, the security right is effective against third parties if the secured creditor becomes the account holder). The exact action required for the secured creditor to become the account holder depends on the banking law and practice of the enacting State.

Article 25. Negotiable documents and tangible assets covered by negotiable documents

120. Article 25 is based on recommendations 51-53 of the Secured Transactions Guide (see chap. III, paras. 154-158). It addresses the relationship between the third-party effectiveness of a security right in a negotiable document and the third-party effectiveness of a security right in the tangible assets covered by the document.

121. Under paragraph 1, if a security right in a negotiable document (which extends to the assets covered by the document under article 16) is effective against third parties, the security right in the assets covered by the document is also effective against third parties.

Under paragraph 2, possession of the document is sufficient to make the security right in the assets covered by the document effective against third parties. Under paragraph 3, the security right referred to in paragraph 2 remains effective against third parties for a short period of time after the secured creditor gives up possession of the document for the purpose of enabling the grantor to dealing with the assets covered by it.

122. Enacting States that are parties to the Convention Providing a Uniform Law For Bills of Exchange and Promissory Notes (Geneva, 1930; the "Geneva Uniform Law") may wish to consider including in the asset-specific section of the creation or third-party effectiveness chapter a provision that a security right in a negotiable instrument may be created and made effective against third parties by delivery and endorsement containing the statement "value in security" ("valeur en garantie"), "value in pledge" ("valeur en gage"), or any other statement implying a security right (see art. 19 and art. 22 of the United Nations Convention on International Bills of Exchange and International Promissory Notes (the "Bills and Notes Convention"), which contains a similar rule). An enacting State that decides to do so will have to adjust article 28 of the Model Law to deal with the comparative priority of such a security right.

Article 26. Uncertificated non-intermediated securities

123. Article 26 is a new provision that does not correspond to any of the recommendations of the Secured Transactions Guide, which did not apply to any type of securities (see rec. 4, subpara. (c)). It addresses the methods, other than registration of a notice, by which a security right in uncertificated non-intermediated securities may be made effective against third parties. First, the security right may be made effective against third parties by notation or entry of the name of the secured creditor as the holder of the securities in those books. Second, as in the case of a security right in a right to payment of funds credited to a bank account, the conclusion of a control agreement with respect to the encumbered securities will result in the security right in those securities being effective against third parties.

124. Enacting States parties to the Geneva Uniform Law may wish to include in the asset-specific section of the creation or third-party effectiveness chapter a provision that a security right in non-intermediated securities may be created and made effective against third parties by delivery and endorsement containing the statement "value in security" ("valeur en garantie"), "value in pledge" ("valeur en gage"), or any other statement implying a security right (see art. 19 of the Geneva Uniform Law and art. 22 of the Bills and Notes Convention, which contains a similar rule). An enacting State that decides to do so will have to adjust article 49 of the Model Law to deal with the comparative priority of such a security right.

Note by the Secretariat on a draft guide to enactment of the draft model law on secured transactions

ADDENDUM

Contents

Chapter V. Priority of a security right

A. General rules

Article 28. Competing security rights

1. Article 28 is based on recommendation 76 of the Secured Transactions Guide (see chap. V, paras. 45-54). It addresses two related topics. First, it addresses priority between competing security rights in the same encumbered asset in cases in which the security rights were granted by the same grantor. Second, it addresses priority between competing security rights in the same encumbered asset in cases in which the security rights were granted by different grantors. The first situation is more common. The second situation can occur, for example, if Grantor A creates a security right in its equipment in favour of Secured Creditor ("SC") 1 and then transfers the equipment to Transferee B who creates a security right in it in favour of SC 2.

2. As a general matter, priority between competing security rights is determined by the order in which the security rights became effective against third parties. This rule is reflected in paragraphs 1 and 2. Most often, third-party effectiveness of a security right is achieved by registration of a notice in the security rights registry (see art. 18). Because registration of a notice may precede creation of the security right (see art. 5 of the registry-related provisions[*]), a special rule for that circumstance is provided in paragraph 3. Paragraphs 1 and 2 also apply, however, in the wide variety of situations in which a method of third-party effectiveness other than registration of a notice is utilized, subject to certain exceptions (see paras. 29-40 below).

3. Under paragraph 3, a special rule is provided for cases in which one or both of the competing security rights was made effective against third parties by registration of a notice that preceded creation of the security right. Under the provisions of chapter II, such a security right is not effective against third parties until it has been created, but under paragraph 3 the time of the pre-registration is relevant for determining priority. In particular, paragraph 3 provides that the priority of that security right as against other security rights is determined by the time of registration rather than the time of third-party effectiveness. This means that in applying the rule in paragraph 1 or paragraph 2 to a priority determination between security rights one or both of which was the subject of a pre-registered notice, the time of such pre-registration, rather than the later date of third-party effectiveness (i.e., the time at which the security right was created), should be used.

4. To illustrate this rule, assume that: (a) on Day 1, Grantor authorized SC 1 to register a notice listing Grantor as the grantor and describing the encumbered assets as all present and future equipment of Grantor and SC 1 registered the notice; (b) on Day 2, Grantor borrowed money from SC 2 and granted SC 2 a security right in all of Grantor's present and future equipment and SC 2 registered a notice with respect to this security right; and (c) on Day 3, Grantor borrowed money from SC 1 and granted SC 1 a security right in all of Grantor's present and future equipment. In this case, the security right of SC 2 became effective against third parties before the security right of SC 1 (because SC 1's security right did not become effective against third parties until it was created). Yet, as a result of the rule in paragraph 3, in determining the priority between the security rights of SC 1 and SC 2 under paragraph 1, the time of registration of SC 1's notice, rather than the later date on which SC 1's security right became effective against third parties, is used. Thus, SC 1 has priority over SC 2 because SC 1's registration of the notice (on Day 1) occurred before the security right of SC 2 became effective against third parties.

5. When combined with the rules in paragraphs 1 and 2, paragraph 3 results in the following priorities: (a) as between security rights that were made effective against third parties by registration of a notice, priority is determined by the order of registration, regardless of the order of creation of the security rights; and (b) as between a security right that was made effective against third parties by registration and a security right that was made effective against third parties otherwise than by registration, priority is determined by

[*] Reference is to this article as it is contained in document A/CN.9/WG.VI/WP.65/Add.1.

the order of registration or third-party effectiveness, whichever occurs first for each of the parties.

6. This rule is beneficial for two reasons. First, as a result of this rule, the priority date for security rights that are made effective against third parties by the registration of a notice will always be determined by the time of registration. The time of registration is maintained by the Registry and is, therefore, easy to demonstrate and easy to search. By way of contrast, the creation of a security right is a private event between the grantor and the secured creditor; the time of creation is not maintained by the Registry and is not publicly available and may be difficult to establish.

7. Second, the results that follow from the application of the rule in this article are consistent with the behaviour of prudent secured creditors. For example, assume that SC 2 is considering extending credit to Grantor, secured by a security right in an item of Grantor's equipment. If SC 2 searches the records of the Registry and discovers that a notice has been registered listing Grantor as the grantor and SC 1 as the secured creditor and indicating that the encumbered asset is the same item of equipment, SC 2 will not know whether SC 1 has a security right or, rather, has registered a notice before creation of the security right. In such a situation, SC 2 would likely make the conservative assumption that the registered notice reflects an existing security right and, accordingly, if SC 2 decides to go forward with the transaction, it will be with the understanding that its rights are subordinate to that of SC 1. The rule in this article is consistent with the behaviour of SC 2.

Article 29. Competing security rights in the case of a change in the method of third-party effectiveness

8. Article 29 addresses situations in which there has been a change in the method of third-party effectiveness. This may happen, for example where a secured creditor in possession of the encumbered asset returns possession of it to the grantor after registering a notice with respect to it in the security rights registry. In such a case, the priority of the security right is determined by the time at which the security right was first effective against third parties so long as there was no time thereafter during which the security right was not effective against third parties.

Article 30. Competing security rights in proceeds

9. Article 30, which is based on recommendation 100 of the Secured Transactions Guide (see chap. V, paras. 144-150), is important because in many cases one or both of the competing security rights in the encumbered asset will be a security right that the secured creditor has in that asset because that asset is proceeds of a different encumbered asset that, for example, the grantor has sold. This is quite common when the original encumbered asset is inventory or a receivable inasmuch as the grantor frequently sells the inventory or collects the receivable before satisfaction of the obligation secured by the encumbered asset. In such a case, the security right continues in the proceeds as provided in article 10 and the security right in the proceeds is effective against third parties if the conditions in article 19 are satisfied. This article determines the priority of that security right in proceeds as against another secured creditor with a security right in the same encumbered asset, whether as original encumbered asset or as proceeds. Under this article, the priority of the security right in the proceeds is the same as the priority of the security right in the original encumbered asset.

10. Thus, for example, assume that: (a) on Day 1, Grantor grants SC 1 a security right in all of Grantor's present and future inventory and SC 1 registers a notice with respect to that security right; (b) on Day 2, Grantor grants SC 2 a security right in all of Grantor's present and future receivables and SC 2 registers a notice with respect to that security right; and (c) on Day 3, Grantor sells the inventory on credit, generating a receivable. SC 2 has a security right in that receivable because of its security right in present and future receivables, and SC 1 has a security right in that receivable because it is proceeds of the inventory in which SC 1 had a security right. SC 1's security right in the receivable has priority over SC 2's security right because SC 1's priority in the receivable as proceeds is determined utilizing the date of third-party effectiveness or registration of notice with respect to the security right in the inventory, whichever came first (see art. 28). Thus SC 1's priority in the

receivable dates from Day 1, while SC 2's priority in the receivable dates from Day 2 (for security rights in proceeds of acquisition security rights, however, see art. 39).

Article 31. Competing security rights in tangible assets commingled in a mass or product

11. Article 31 addresses two priority issues resulting from situations in which one or both of the competing security rights is a security right that continued to a mass or product because the original encumbered asset was commingled in that mass or product (see Secured Transactions Guide, chap. V, paras. 117-124 and recs. 90 and 91). First, in paragraph 1, it addresses situations in which the competing security rights were in the same encumbered asset and that asset became part of a mass or product. In that case, the order of priority of the two security rights in the mass or product is the same as the order of priority of the security rights in the original encumbered asset.

12. Second, in paragraphs 2 and 3, it addresses situations in which the competing security rights were originally in different encumbered assets and both of those encumbered assets became part of the same mass or product. In such as case, if the value of the two security rights in the mass or product, as determined in article 11, is insufficient to satisfy the two secured obligations, the secured parties share the aggregate maximum value of their security rights in same proportion as the ratio of the value of the two security rights in the mass or product.

13. [Illustrations will be added after a determination is made whether to retain only one of options A and B in article 11 or both options.]

Article 32. Security rights competing with rights of buyers or other transferees, lessees or licensees of an encumbered asset

14. Article 32 is based on recommendations 79-82 of the Secured Transactions Guide (see chap. V, paras. 60-89). It addresses situations in which the encumbered asset is sold or otherwise transferred, leased or licensed, and determines the rights of the buyer or other transferee, lessee or licensee vis-à-vis the security right.

15. The general rule, which is stated in paragraph 1 and is subject to important exceptions stated in paragraphs 2-6, is that a security right in an encumbered asset that is effective against third parties continues to encumber the asset notwithstanding the sale or other transfer, lease or licence of the encumbered asset.

16. The article provides two types of exceptions to the general principle stated in paragraph 1. Paragraphs 2 and 3 provide exceptions based on the actions of the secured creditor, while paragraphs 4-6 provide exceptions based on the nature of the sale or other transfer, lease or licence and the knowledge of the buyer or other transferee, lessee or licensee.

17. Paragraph 2 provides that, if the secured creditor authorizes the sale or other transfer of the asset free of the security right, the buyer or other transferee takes free of that security right. The rule in this paragraph fulfils the intention of the parties inasmuch as the secured creditor has, by its authorization, evidenced intent for the general rule in paragraph 1 not to apply. Such an authorization may occur, for example, when a sale transfer of the encumbered asset free of the security right will generate sufficient proceeds that the grantor can use to satisfy the secured obligation, but a sale subject to the security right would not do so. Paragraph 3 brings about the same result in the case of a lease or licence of the encumbered asset. It is stated differently than the rule in paragraph 2 because some, but not all, States do not characterize the rights of a lessee or licensee as property rights.

18. Paragraphs 4-6 protect a buyer, lessee, or licensee of an encumbered asset in an ordinary course of business transaction from being subject to a security right in that asset that encumbered it while in the hands of the seller, lessor, or licensor. Under paragraph 4, a buyer of a tangible encumbered asset acquires its rights free of the security right if two conditions are satisfied. First, the sale must have been in the ordinary course of the seller's business. Thus, for example, the sale of some of a seller's inventory in accordance with the typical business practices of the seller would satisfy this condition, but an atypical sale by that seller of a used item of the seller's equipment would not satisfy this condition. The

second condition is that buyer must have acquired the encumbered asset without knowledge (as of the time of the conclusion of the agreement with the seller pursuant to which buyer acquired the asset) that the sale violated the rights of the secured creditor under the security agreement. "Knowledge" is defined in article 2, subparagraph (r), as actual knowledge. It is important to note that knowledge of the existence of the security right, as opposed to knowledge that the sale violated the secured creditor's rights, is insufficient to disqualify the buyer from the benefits of paragraph 4. If, for example, a buyer knows that the seller has encumbered its inventory, but does not know whether the secured creditor has authorized sales of that inventory free of the security right, the buyer has knowledge of the security right but does not have knowledge of whether the sale violated the rights of the secured creditor.

19. Paragraphs 5 and 6 bring about similar results to those in paragraph 4 in the case of leases of tangible encumbered assets and non-exclusive licences of intellectual property. As with paragraph 3, the formulation of paragraphs 5 and 6 differs from the formulation of paragraph 4, because some, but not all, States do not characterize the rights of a lessee or licensee as property rights.

20. Paragraphs 7 and 8 state what is often referred to as a "shelter principle" — once a buyer, lessee, or licensee obtains rights in the encumbered asset free of (or unaffected by) a security right, those that acquire their rights in the encumbered assets from or through the buyer, lessee, or licensee are similarly free of (or unaffected by) the security right.

Rights of buyers or other transferees, lessees or licensees of an encumbered asset in the case of specialized registration

21. States that provide a specialized registry or title certificate system for achieving third-party effectiveness of a security right in particular types of asset may wish to consider whether, in order to enable competing claimants that utilize the specialized registry or title certificate system to determine their rights solely by a search of the specialized registry system or examination of the title certificate, rights of such parties should be superior to the rights of a secured creditor that achieved third-party effectiveness by other means (see Secured Transactions Guide, chap. V, paras. 56 and 57, and rec. 77; for the coordination with specialized movable property registries, see Registry Guide, para. 64-70).

Article 33. Impact of the grantor's insolvency on the priority of a security right

22. Under article 33, nothing in the secured transactions law changes determinations of third-party effectiveness or priority merely because insolvency proceedings have been commenced. Thus, unless the applicable insolvency law provides to the contrary, a security right that is effective against third parties under the Model Law at the time of the commencement of insolvency proceedings remains effective against third parties and retains the priority it had before the commencement of the insolvency proceedings.

Article 34. Security rights competing with preferential claims

23. Article 34 is based on recommendations 83, 85 and 86 of the Secured Transactions Guide (see chap. V, paras. 90-93 and 103-109). Its purpose is to implement the policy of these recommendations and give an enacting State an opportunity to: (a) list in a clear and specific way any statutory claims that may have priority over security rights; and (b) indicate a limitation on their amount. Examples of claims that may be listed in this article include claims of service providers and unpaid sellers or suppliers of goods but only to the extent that they have retained possession of the goods (see A/CN.9/830, para. 89). It should be noted that secured creditors typically obtain representations from grantors about preferential claims and otherwise address the possible existence of such claims.

24. This article applies outside insolvency. As the Model Law does not deal with insolvency matters, it does not include a similar rule for preferential claims in the case of the grantor's insolvency along the lines of recommendation 239 of the Secured Transactions Guide. In most States that require registration of a notice with respect to preferential claims, the priority of preferential claims is determined in the same way as the priority of security rights, that is, in other words, the general first-to-register priority rule applies. It should also be noted that, in the case of enforcement, if a preferential creditor does not take over the

enforcement process (see art. 70), its claim will have to be paid ahead of the claims of secured creditors.

Article 35. Security rights competing with rights of judgement creditors

25. Article 35 is based on recommendation 84 of the Secured Transactions Guide (see chap. V, paras. 94-102). It determines the priority as between a security right in an encumbered asset and the rights of a judgement creditor that has acquired rights in the encumbered asset by taking whatever steps are necessary under applicable law. The enacting State should complete paragraph 1 by inserting the relevant step or steps necessary for a judgement creditor to acquire rights in the encumbered asset. These steps may include actions such as registration of a notice in the security rights registry, seizure of assets or service of a garnishment order.

26. Paragraph 1 gives priority to the judgement creditor if the steps necessary for it to acquire rights in the encumbered asset occur before the security right becomes effective against third parties.

27. Paragraph 2 provides that, in cases in which the judgement creditor does not acquire its rights in the encumbered asset before the security right becomes effective against third parties, the security right has priority. However, paragraph 2 limits the extent of that priority by providing that the priority of the security right does not extend to credit extended by the secured creditor more than a short period of time after the judgement creditor notifies the secured creditor that it has taken the steps necessary to acquire its right, or to credit extended thereafter pursuant to an irrevocable commitment made before that notification. Paragraph 2 protects secured creditors against the possibility of inadvertently extending credit without realizing that their security rights are subordinate to the rights of a judgement creditor.

Article 36. Non-acquisition security rights competing with acquisition security rights

28. Article 36 is based on recommendations 180 of the Secured Transactions Guide (see chap. IX, paras. 131, 136, 137, 143 and 146) and recommendation 247 of the Intellectual Property Supplement (see paras. 259-263). Two alternative options are provided for the enacting State. Both options provide that, under certain circumstances, an acquisition security right has priority over a competing non-acquisition security right in the same encumbered asset even if, under the general priority rule in article 28, paragraph 1, the non-acquisition security right would have priority. When those circumstances are present, it is often said that the acquisition security right has "super-priority" over the competing non-acquisition security right.

29. "Super-priority" for acquisition security rights is a feature of the law of most States, whether phrased in terms of a higher priority for security rights securing obligations incurred in acquiring the encumbered asset or, in many legal systems, as a necessary implication of title to the encumbered asset being retained by the seller. Article 36 continues this advantageous treatment of acquisition finance, providing a variety of "super-priority" rules depending on the nature of the asset that is subject to the acquisition security right.

30. Option A contains three "super-priority" rules. Which of the three rules is applicable in a particular case depends on the nature of the encumbered assets. If the encumbered assets are equipment, the rule in paragraph 1 applies. If the encumbered assets are either inventory or the intellectual property equivalent of inventory (that is, intellectual property or rights of a licensee under a licence of intellectual property held by the grantor for sale or licence in the ordinary course of the grantor's business, the rule in paragraph 2 applies. If the encumbered assets are consumer goods or the intellectual property equivalent of consumer goods (that is, intellectual property or rights of a licensee under a licence of intellectual property used or intended to be used by the grantor primarily for personal, family or household purposes), the rule in paragraph 3 applies.

31. Under the "super-priority" rule in paragraph 1 of option A, an acquisition security right in equipment has priority over a competing non-acquisition security right created by

the grantor, if either the acquisition secured creditor is in possession of the asset (unlikely inasmuch as most acquisition security rights are non-possessory) or a notice with respect to the acquisition security right is registered in the Registry within a short period of time to be specified by the enacting State after the grantor obtains possession of the asset. Thus, so long as the acquisition secured creditor registers a notice with respect to the acquisition security right within the specified period, that security right will have priority over a competing non-acquisition security right that was made effective against third parties before the acquisition security right was made effective against third parties.

32. Under the super-priority rule in paragraph 2 of option A, additional requirements must be satisfied for an acquisition secured creditor with a security right in inventory or its intellectual property equivalent to have "super-priority" over a competing non-acquisition security right. In particular, two actions must occur before the grantor obtains possession of the encumbered asset in order for the acquisition security right to have "super-priority". First, a notice with respect to the acquisition security right must be registered. Second, a notice stating that the acquisition secured creditor has or intends to acquire an acquisition security right and describing the asset sufficiently to enable the non-acquisition secured creditor to identify the asset that is the object of the acquisition security right must be received by the non-acquisition secured creditor (if the non-acquisition secured creditor has registered a notice in the Registry with respect to a security right created by the grantor in an asset of the same kind).

33. There are two reasons for this more stringent treatment. First, because inventory may "turn over" quickly and depreciate quickly, it would be economically inefficient for a secured creditor with a non-acquisition security right in present and future inventory to need to wait for the passage of the period of time stated in paragraph 1 before being certain that future inventory is not subject to an acquisition security right that will have super-priority of the rights. The requirement that the actions required for super-priority in paragraph 2 take place before the grantor obtains possession of the encumbered asset addresses this concern. Second, inasmuch as new inventory can often be difficult to distinguish from old inventory, even a secured creditor with a security right in future inventory that monitors the assets of the grantor will not always be able to easily detect the presence of new inventory that has replaced similar older inventor. Thus, such a secured creditor may not be able to determine that some items of inventory are recently acquired and thus potentially subject to an acquisition security right. The notice requirement addresses this concern.

34. Paragraph 4 of option A contains two important rules about the notice required in subparagraph 2(b)(ii). First, such a notice may cover acquisition security rights under multiple transactions between the same parties without the need to identify each transaction. Thus, for example, a seller that is planning to engage in a series of transactions with the same grantor, under which the seller will sell inventory to the grantor subject to an acquisition security right, may send a single notice to the competing non-acquisition secured creditor generally describing the set of transactions. Second, a notice suffices to bring about super-priority if the grantor acquires the assets subject to the acquisition security right it is received not later than a time period to be specified by the enacting State (such as five years) after the grantor acquires the assets subject to the acquisition security right. As a result, a seller that provides a notice for a series of transactions in which acquisition security rights are created will not need to send another notice with respect to assets acquired not later than five years after the first notice is received.

35. Under the super-priority rule in subparagraph 3, an acquisition security right in consumer goods or their intellectual property equivalent automatically has priority over a non-acquisition security right in the same encumbered asset. No additional actions are required. [This paragraph to be adjusted when the Working Group reaches a decision about the bracketed language in paragraph 3.]

36. Option B contains only two "super-priority" rules. The first rule, found in paragraph 1, is identical to paragraph 1 of option A (which applies only to equipment) except that it also applies to inventory and the intellectual property equivalent of inventory. The second rule, found in paragraph 2, is identical to paragraph 3 of option A. Thus, the only difference between option A and option B is that, in the former, additional steps must be

taken in order for an acquisition security right in inventory or in the intellectual property equivalent of inventory to have priority over a competing non-acquisition security right.

Article 37. Competing acquisition security rights

37. Article 37 is based on recommendation 182 of the Secured Transactions Guide (see chap. IX, paras. 173-178). It addresses the priority of competing security rights when both are acquisition security rights. Unlike article 36 (which gives priority to acquisition security rights that satisfy certain criteria as against non-acquisition security rights), this article addresses priority as between security rights both of which would otherwise be entitled to "super-priority". The rule in article 37 reflects two policy decisions. First, an acquisition security right of a seller or lessor, or a licensor of intellectual property, should have priority over an acquisition security right of another person such as a lender. Second, in all other cases, priority between acquisition security rights should be determined on the basis of rules applicable when neither are acquisition security rights.

Article 38. Acquisition security rights competing with the rights of judgement creditors

38. Article 38 is based on recommendation 183 of the Secured Transactions Guide (see chap. IX, paras. 145-148). Without the rule in this article, the period provided in article 36 would not be useful. The reason for this is that a secured creditor taking an acquisition security right typically would not want to have a period in which it would be vulnerable to the rights of a judgement creditor. In such a case, a secured creditor would likely register a notice before, or as soon as possible after, the security right was created. Accordingly, a secured creditor would not benefit from the longer period to register and achieve "super-priority" under article 34.

39. By way of illustration, assume that Grantor acquires an item of equipment from Seller on credit on Day 1 and grants Seller an acquisition security right in the item of equipment to secure its obligation to pay the remainder of the purchase price; on Day 5 Seller registers a notice that has the effect of making its acquisition security right effective against third parties. Between those two dates, on Day 3, Judgement Creditor obtains a judgement against Grantor and takes the steps specified in article 35, paragraph 1, to acquire rights in the item of equipment. Under the rule in article 35, paragraph 1, Judgement Creditor's rights would have priority over Seller's security right because Judgement Creditor obtained its rights before Seller's security right was effective against third parties. As a result of the operation of article 38, however, Seller's security right has priority over the rights of Judgement Creditor.

Article 39. Acquisition security rights in proceeds

40. Article 39 is based on recommendation 185 of the Secured Transactions Guide (see chap. IX, paras. 158-172). Both option A and option B of article 36 provide that, under certain circumstances, an acquisition security right has priority over a competing non-acquisition security right in the same encumbered asset even if, under the general priority rule in article 28, the non-acquisition security right would have priority. This article determines whether that "super-priority" over non-acquisition security rights carries over to proceeds of the encumbered assets that are subject to the acquisition security right.

41. Under the general principles of article 10, a secured creditor with a security right in an asset obtains a security right in the identifiable proceeds of that asset and, under the circumstances described in article 19, that security right is effective against third parties. This is equally true of assets subject to non-acquisition security rights and those subject to acquisition security rights. Under the rule in article 30, the priority of the security right in the proceeds is the same as the priority of the security right in the original encumbered asset. Under that rule, the security right in proceeds of assets subject to an acquisition security right would have the same "super-priority" as the security right in the original encumbered asset. Article 39, however, limits the reach of article 30 by extending "super-priority" to proceeds only of certain types of assets subject to an acquisition security right (option A) or by not extending the "super-priority" to proceeds at all (option B).

42. Under option A, the "super-priority" with respect to the assets subject to the acquisition security right always carries over to the proceeds of those assets, except when the assets subject to the acquisition security right consist of inventory, consumer goods or their intellectual property equivalent. When the asset subject to the acquisition security right is inventory or its intellectual property equivalent, whether the "super-priority" carries over to proceeds depends on the nature of the proceeds. If the proceeds are receivables, negotiable instruments, or rights to payment of funds credited to a bank account, the "super-priority" does not carry over to those proceeds. If, on the other hand, the proceeds take another form, the "super-priority" does carry over to the proceeds. When the assets subject to the acquisition security right are consumer goods or intellectual property or rights of a licensee under a licence of intellectual property used or intended to be used by the grantor [primarily] for personal, family or household purposes, however, the "super-priority" does not carry over to the proceeds.

43. The primary reason for the decision not to provide "super-priority" for certain types of proceeds in option A relates to the difficulty that would be faced by competing secured creditors with security rights in payment rights in determining which of those payment rights are proceeds of assets subject to acquisition security rights and which are not. As a result, if there were "super-priority" treatment for those types of proceeds, competing secured creditors with security rights in payment rights might simply assume that all of those payment rights are proceeds and, as a result, extend less credit on the basis of them.

44. Option B provides that the "super-priority" with respect to assets subject to an acquisition security right does not carry over to proceeds of those assets under any circumstances, with the result that the priority of the security right in the proceeds will be determined under the general principle in article 28. This option is provided as an option for States that do not wish to make the sort of distinctions between types of proceeds made in option A.

45. As the Model Law does not deal with insolvency-related matters, with the exception of article 33, no article has been included in the Model Law along the lines of recommendation 186 of the Secured Transactions Guide to deal with the application of the special priority rules for acquisition security rights. However, there is nothing in these articles to imply that insolvency law will not operate against the background of secured transactions law and thus that these provisions will not apply to acquisition security rights in the case of insolvency.

Article 40. Acquisition security rights in tangible assets commingled in a mass or product competing with non-acquisition security rights in the mass or product

46. Article 40 deals with situations in which a grantor has granted an acquisition security right in an asset that later becomes part of a mass or product and has also granted a security right in the mass or product. Under article 11, when the original asset becomes part of the mass or product, the secured creditor has a security right in that mass or product. This article provides that the acquisition security right in the mass or product that results from the security right in the separate asset has priority over the security right in the mass or product as original encumbered asset, even if that security right was previously made effective against third parties or was the subject of a pre-registered notice.

Article 41. Subordination

47. Article 41 is based on recommendation 94 of the Secured Transactions Guide (see chap. V, paras. 128-131). Paragraph 1 allows a person to agree to lower priority of its security right as against a competing claimant than would otherwise result from application of the priority rules in this chapter.

48. Such an agreement, usually referred to as a subordination agreement, may be in the form of a bilateral agreement between the party agreeing to lower priority and the competing claimant that will benefit from that agreement; it may also be a unilateral commitment (usually made to the grantor) by the party agreeing to lower priority that its priority will be lower than that of the beneficiaries described in the commitment. Such an agreement is governed by this article so long as it is between a secured creditor and a grantor, between

two or more secured creditors or between a secured creditor and another competing claimant (e.g. a judgement creditor or an insolvency representative).

49. Paragraph 2 makes it clear that, as an agreement, a subordination agreement binds only the parties to it and does not subordinate the claims of any other parties. For example, if SC 1, that has a claim for 50, subordinates its claim to SC 3, who has a claim for 70, SC 3 has priority over SC 2 only for 50.

50. In unusual circumstances, subordination can create circular priority issues. For example, assume that SC 1, 2, and 3 each have a security right in the same encumbered asset and their priority, determined under the rules of this chapter, is in that order, so that SC 1's security right is superior to that of SC 2 and SC 2's security right is, in turn, superior to that of SC 3. Then assume that SC 1 enters into a subordination agreement with SC 3, pursuant to which SC 1 agrees to subordinate its priority in favour of SC 3. As a result, SC 3 has priority over SC 1. However, SC 1 (who did not subordinate its priority in favour of SC 2) has priority over SC 2, and SC 2 has priority over SC 3, completing the circle.

Article 42. Future advances, future encumbered assets and maximum amount

51. Article 42 is based on recommendations 97-99 of the Secured Transactions Guide (see chap. V, paras. 135-143). Inasmuch as a security right can secure obligations arising after the conclusion of the security agreement (see art. 7) and a secured obligation can be secured by assets created or acquired after the conclusion of the security agreement (see art. 8), this article clarifies the priority of a security right in such circumstances.

52. Paragraph 1 provides that the priority of a security right is not affected by the time when the obligation it secures was incurred. Thus, a security right has the same priority whether the entire secured obligation was incurred at or before the creation of the security right or whether the security right secures obligations incurred thereafter. Paragraph 2 similarly provides that when a security right has been made effective against third parties by the registration of a notice, the priority resulting from the time of that notice under article 28 is the same whether the encumbered assets were owned by the grantor at the time of registration or acquired thereafter.

53. Paragraph 3, which will be necessary only if the enacting State enacts provisions based on article 6, subparagraph 3(e), and article 9, subparagraph (e) [of the registry-related provisions[*]], gives effect to any cap on the secured obligation stated in the notice by providing that the secured creditor's priority is limited by that cap.

Article 43. Irrelevance of knowledge of the existence of a security right

54. Article 43 is based on recommendation 93 of the Secured Transactions Guide (see chap. V, paras. 125-127). A secured creditor's knowledge or lack of knowledge of a competing security right is not relevant to a determination of priority under either the general priority rule in article 28 or any of the special priority rules. The point is made explicit here to emphasize that priority is determined only on the basis of the facts referred to in those articles and not on the basis of difficult to prove subjective states of knowledge. Article 43 applies only to the knowledge of a secured creditor. Under the Model Law, knowledge of other facts is relevant to priority. For example, a buyer of a tangible encumbered asset that has knowledge that the sale violates the rights of a secured creditor with a security right in that asset under the security agreement does not take free of the security right (see art. 32).

B. Asset-specific rules

Article 44. Negotiable instruments

55. Article 44 is based on recommendations 101 and 102 of the Secured Transactions Guide (see chap. V, paras. 154-156). Any drafting changes are intended to ensure that paragraph 1 deals only with the relative priority of conflicting security rights in the same

[*] Reference is to this article as it is contained in document A/CN.9/WG.VI/WP.65/Add.1.

negotiable instrument, while paragraph 2 addresses the rights of a secured creditor with a security right in a negotiable instrument as against a buyer or other consensual transferee of the negotiable instrument.

56. Under paragraph 1, a security right in a negotiable instrument that is made effective against third parties by the secured creditor's possession of the negotiable instrument has priority over a security right in the same negotiable instrument that is made effective against third parties by registration of a notice, without regard to the order in which the security rights became effective against third parties. This is consistent with the important role that possession plays in the law of negotiable instruments.

57. Under paragraph 2, certain buyers or other transferees that take possession of a negotiable instrument take their rights in the instrument free of a security right that is effective against third parties by registration of a notice. If the security right were effective against third parties because of the secured creditor's possession of the negotiable instrument, the buyer or other transferee could not also have possession of it, unless the same agent possesses the negotiable instrument both on behalf of the secured creditor and the buyer or other transferee.

58. More specifically, under paragraph 2, a buyer or other transferee of a negotiable instrument can take free of a security right in that instrument in either of two ways. First, under subparagraph 2(a), a person who becomes a protected holder or the like (the enacting State should insert the appropriate term here) of the negotiable instrument under the law of the enacting State acquires its right in the instrument free of an existing security right in it. Second, under subparagraph 2(b), a transferee that takes possession of the instrument and gives value for it without knowledge that the sale or other transfer is in violation of the rights of the secured creditor also acquires its right in the instrument free of that security right. As with the rule in paragraph 1, this rule preserves the important role of possession in the law of negotiable instruments.

59. Knowledge of the existence of a security right does not prevent a buyer or other transferee of a negotiable instrument from acquiring its rights in the instrument free of the security right under subparagraph 2(b) (although such knowledge may prevent the buyer from qualifying as a protected purchaser or the like and, thus, may prevent the buyer from taking free of the security right under subparagraph 2(a)). Rather, only knowledge that the transfer violates the rights of the secured creditor under the security agreement prevents the transferee from acquiring its rights in the instrument free of the security right under subparagraph 2(b). "Knowledge", as defined in article 2, paragraph (r), means "actual knowledge". The reference to "good faith" that was included in recommendation 102, subparagraph (b) has been deleted on the understanding that the absence of knowledge amounts essentially to good faith and the concept of good faith is used in the Model Law only to reflect an objective standard of conduct (see A/CN.9/830, para. 50).

Article 45. Rights to payment of funds credited to a bank account

60. Article 45 is based on recommendations 103-105 of the Secured Transactions Guide (see chap. V, paras. 157-163). It determines the priority between competing security rights in a right to payment of funds credited to a bank account whether those rights to payment are original encumbered assets or proceeds of a security right in other property (which, according to art. 17, para. 1, is automatically effective against third parties, if the security right in the original encumbered asset is effective against third parties).

61. Paragraphs 1-3, taken together, result in the conclusion that a security right in a right to payment of funds credited to a bank account made effective against third parties by any of the methods provided for in article 24 has priority over a security right made effective against third parties by registration of a notice. Under paragraph 1, a security right in a right to payment of funds credited to a bank account that is made effective against third parties by the secured creditor becoming the account holder has priority over all competing security rights in the same asset. Next in priority order, paragraphs 2 and 3 give priority to: (a) a security right in a right to payment of funds credited to a bank account with respect to which the secured creditor is the depositary institution; and (b) a security right made effective against third parties by a control agreement. Under paragraph 4, if there are more than one

control agreements, priority is determined on the basis of the order of conclusion of the control agreements.

62. Under paragraph 5, except when the secured creditor has become the account holder, a security right in a right to payment of funds credited to a bank account is subordinate to the depositary institution's rights under other law to set off claims against the grantor against its obligations to the grantor with respect to the grantor's right to payment of funds from the bank account. This rule protects depositary institutions from losing their rights of set-off without their knowledge or consent.

63. Under paragraph 6, a transferee of funds from a bank account pursuant to a transfer initiated or authorized by the grantor acquires its rights free of a security right in the right to payment of funds credited to the bank account so long as the transferee does not have knowledge that the transfer violates the rights of the secured creditor under the security agreement. A "transfer of funds" includes transfers by a variety of mechanisms, including by cheque and electronic means. The purpose of paragraph 6 is to preserve the free negotiability of funds.

64. Knowledge of the existence of a security right does not prevent a transferee of funds from the bank account from taking free of the security right. Rather, it is only knowledge that the transfer violates the rights of the secured creditor under the security agreement that prevents the transferee from taking free. "Knowledge", as defined in article 2, paragraph (r), means "actual knowledge". Paragraph 7 is intended to preserve the rights of transferees of funds credited to a bank account under other law to be specified by the enacting State.

Article 46. Money

65. Article 46 is based on recommendation 106 of the Secured Transactions Guide (see chap. V, para. 164). Its purpose is to preserve negotiability of money. Thus, under paragraph 1, a transferee of encumbered money acquires its rights in it free of the security right, unless it has knowledge that the transfer violates the rights of the secured creditor under the security agreement. "Knowledge", as defined in article 2, paragraph (r), means "actual knowledge". Paragraph 2 is intended to preserve the free negotiability of money.

Article 47. Negotiable documents and tangible assets covered

66. Article 47 is based on recommendations 108 and 109 of the Secured Transactions Guide (see chap. V, paras. 167-169). It is designed to preserve current practices under which rights to the tangible assets covered (or represented) by a negotiable document are subsumed in the negotiable document with the result that parties that deal with the document generally need not concern themselves separately with claims to the assets not reflected in the document. Accordingly, under paragraph 1, a security right in a tangible asset made effective against third parties by possession of the negotiable document covering that asset is given priority over a competing security right made effective against third parties by any other means.

67. Paragraph 2 states an exception to that general rule. Except when the encumbered asset is inventory, it provides that the rule in paragraph 1 does not apply against a secured creditor that had a security right in an encumbered asset before the earlier of the time that either the asset became covered by the negotiable document or the time that an agreement was concluded between the grantor and the secured creditor in possession of the negotiable document providing that the asset was to be covered by a negotiable document so long as the asset actually became covered by such a negotiable document within the time to be specified by the enacting State.

Article 48. Intellectual property

68. Article 48 is based on recommendation 245 of the Intellectual Property Supplement (see paras. 193-212). The purpose of this article is to clarify that the rule in article 32, paragraph 6, does not obviate other rights of the secured creditor as an owner or licensor of the intellectual property that is the subject of the licence. This clarification is of particular importance because the concept of "ordinary course of business", used in article 32, paragraph 6, is a concept of commercial law and is not drawn from law relating to intellectual

property law and thus may create confusion in an intellectual property financing context. Typically, law relating to intellectual property does not distinguish in this respect between exclusive and non-exclusive licences and focuses rather on the issue whether a licence has been authorized or not.

69. As a result, unless the secured creditor authorized the grantor to grant licences unaffected by the security right (which will typically be the case as the grantor will rely on its royalty income to pay the secured obligation), the licensee would take the licence subject to the security right. Thus, if the grantor defaults, the secured creditor would be able to enforce its security right in the licensed intellectual property and sell or license it free of the licence. In addition, a person obtaining a security right from the licensee will not obtain an effective security right as the licensee would not have received an authorized licence and would have no right in which to create a security right.

Article 49. Non-intermediated securities

70. Article 49 covers a topic not addressed in the Secured Transactions Guide, which excluded from its scope all types of securities (see rec. 4, subpara. (c)). So as not to interfere with existing customs and practices with respect to non-intermediated securities, this article adjusts the general priority rule of article 27 in a manner similar to the special priority rules for security rights in negotiable instruments and rights to payment of funds credited to a bank account.

71. For certificated non-intermediated securities, paragraph 1 provides that a security right made effective against third parties by the secured creditor's possession of the certificate has priority over a competing security right by the same grantor that is made effective against third parties by registration of a notice in the Registry. This is parallel to the rule for negotiable instruments in article 44, paragraph 1.

72. For uncertificated non-intermediated securities, paragraph 2 provides that either the notation of the security right or the registration of the name of the secured creditor as the holder of the securities in the books maintained for that purpose by or on behalf of the issuer has priority over a security right in the same securities made effective against third parties by any other method. This rule is similar to the rule for rights to payment of funds credited to a bank account in article 45, paragraph 1. The rationale for this rule is that such notation or registration in the books of the issuer fulfils a similar function to the secured creditor becoming the account holder of a bank account.

73. Paragraphs 3 and 4 are also applicable only to uncertificated non-intermediated securities. They parallel the similar rules for rights to payment of funds credited to a bank account in article 45, paragraphs 3 and 4. Paragraph 3 gives priority to a security right made effective against third parties by conclusion of a control agreement over other security rights in the same securities. As between security rights made effective against third parties by conclusion of a control agreement, paragraph 4 awards priority in the order in which those control agreements were concluded.

74. Paragraph 5 is intended to preserve the rights of transferees of non-intermediated securities under other law to be specified by the enacting State. It parallels article 45, paragraph 7.

Chapter VIII. Conflict of laws

Introduction

58. Chapter VIII of the Model Law states the rules for determining the substantive law applicable to most of the issues dealt with in the other chapters. These rules are generally referred to as the conflict-of-laws rules. In a State that has enacted the Model Law, a court or other authority will use the conflict-of-laws rules of chapter VIII to determine the substantive law governing issues such as the creation, effectiveness against third parties, priority and enforcement of a security right, as well as the mutual rights and obligations of the grantor and the secured creditor and the relationship between third-party obligors and secured creditors. The substantive law indicated by conflict-of-laws rules may be that of the enacting State or the law of another State. It must be stressed that in the event of litigation in a State, the court or other authority will apply the conflict-of-laws rules of its own legal system to resolve the dispute (for a more elaborate discussion of the role of conflict-of-laws rules, see Secured Transactions Guide, chap. X, paras. 1-13).

59. The application of the conflict-of-laws rules relating to security rights should not be conditional on a prior determination that the case presents an international element. Whenever a conflict-of-laws rule refers to the law of a State, that reference should not be refused on the ground of the absence of true "internationality" in the situation. Otherwise, courts might disregard a conflict-of-laws rule enacted by a State by deciding that the case is not sufficiently international on the basis of discretionary criteria that are not part of the conflict-of-laws rules of that State. In other words, if in a given situation the rule of State A points to the law of State B, it must be presumed that the legislator of State A has considered that the situation of itself is presenting an international element. In the particular circumstances where additional criteria would be a prerequisite for the application of a conflict-of-laws rule of a State, these criteria should be spelled out in the conflict-of-laws rules of that State.

60. The conflict-of-laws rule dealing with the law applicable to the mutual rights and obligations of the parties is a non-mandatory law rule (it is not listed in art. 3, para. 1). This means that the parties may choose the law applicable to their contractual rights and obligations. However, the conflict-of-laws rules dealing with the law applicable to the creation, third-party effectiveness, priority and enforcement of a security right, as well as with the relationship between third-party obligors and secured creditors (or the effect of a security right on a third-party obligor), are mandatory (see art. 3, para. 1). This means that the parties cannot be permitted by a choice-of-law clause to avoid the substantive law provisions of the legal system to which a conflict-of-laws rule refers. This must be so because security rights are property (*in rem*) rights and thus affect third parties. Allowing the parties to select the applicable conflict-of-laws rule would also defeat one of the main purposes of the conflict-of-laws rules, which is to identify the State whose substantive law will apply in the event of a priority dispute among competing claimants. For example, if there is a priority dispute between secured creditor X and secured creditor Y, it would be impossible to ascertain the law applicable to the resolution of the dispute if each of X and Y had been permitted to choose in their security agreement with the grantor a different governing law for the ranking of their respective security right.

A. General rules

Article 81. Law applicable to the mutual rights and obligations of the grantor and the secured creditor

61. Article 81 is based on recommendation 216 of the Secured Transactions Guide (see chap. X, para. 61). It states that the parties to a security agreement are free to choose the law applicable to their contractual relationship. Article 81 follows the approach recommended by international texts on this matter, including the Hague Principles on Choice of Law in International Contracts. The question of whether there should be constraints to party autonomy with respect to the law applicable to contractual relationships is not addressed in the Model Law and is left to other conflict-of-laws rules of the enacting State. These other rules will also determine the law governing the contractual relationship of the parties in the

absence of a choice of law in the security agreement; these rules will often point to the law of the State most closely connected to the security agreement. It should be noted that the rule of article 81 is confined to the contractual aspects of the security agreement. As already mentioned, matters relating to the property aspects of secured transactions (e.g. the priority of a security right) are outside the scope of freedom of contract; the parties cannot select a law other than that indicated by the conflict-of-laws rules on such matters.

Article 82. Law applicable to a security right in a tangible asset

62. Article 82 is based on recommendations 203-207 of the Secured Transactions Guide (see chap. X, paras. 28-38). It deals with the law applicable to the creation, effectiveness against third parties and priority of a security right in a tangible asset. The term "tangible asset" is defined to refer generally to all types of tangible movable asset, including money, negotiable instruments, negotiable documents and certificated non-intermediated securities (see art. 2, subpara. (ii); see also Secured Transactions Guide, chap. X, para. 26; although with regard to certificated non-intermediated securities, art. 96 prevails as an asset-specific rule).

63. Paragraph 1 states the general rule that the law applicable to these issues is the law of the location of the encumbered asset (the "*lex situs*" or the "*lex rei sitae*"). Article 88 deals with the scenario where the location of the asset changes to another State after the security right has been created. The *lex situs* rule for tangible assets is subject to five exceptions that are set out in paragraphs 2 to 4 and in options B and C of article 96.

64. The first exception provides that, if a tangible asset located in a State is covered by a negotiable document in the possession of a secured creditor in another State, the priority of the security right over the asset will be determined by the law of the location of the document, and not by the location of the asset covered by that document (see para. 2). The second exception points to the law of the grantor's location for an asset of a type which may be ordinarily used in more than one State in the course of its normal use, that is, a "mobile asset" (see para. 3; for the meaning of "location", see art. 87; for the relevant time for determining location, see art. 88). The test is an objective one and does not refer to actual use. The most obvious example is an aircraft, which may fly from a State to many other States. The rule will apply even if a particular aircraft is actually operated only in one single State.

65. The third exception deals with a tangible asset (other than a mobile asset) in transit or to be exported (see para. 4). A security right in a tangible asset located in a State but which is in transit or destined to be moved to another State may be created and made effective against third parties under the law of its ultimate destination, if the asset reaches that destination within the period of time to be specified by the enacting State. It should be noted that: (a) if the assets do not reach the intended destination in a timely fashion, the rule in paragraph 4 will not apply; and (b) the rule in paragraph 4 does not prevent a secured creditor form taking the necessary steps to create and make the security right effective against third parties under the law of the actual location of the asset at the time such steps are taken. It should also be noted that paragraph 4 is a conflict-of-laws rule of the enacting State only and whether the security right will be treated as validly created and made effective against third parties in the State of the ultimate destination of the asset is a matter for the conflict-of-laws rules of that State.

66. The fourth exception is contained in options B and C in article 96, which refer to laws other than the location of the certificate for a security right in certificated securities.

67. Another possible exception relates to assets, with respect to which a notice of a security right may be registered in a specialized title registry or noted on a title certificate. In the case of a security right in such an asset, the law applicable to the security right is the law of the State under whose authority the registry is maintained or the certificate is located (see Secured Transactions Guide, chap. X, paras. 37 and 38, as well as rec. 205).

Article 83. Law applicable to a security right in an intangible asset

68. Article 83 is based on recommendation 208 of the Secured Transactions Guide (see chap. X, paras. 39-47). It states the general conflict-of-laws rule for the creation,

effectiveness against third parties and priority of a security right in an intangible asset. The applicable law is that of the location of the grantor (for the meaning of "location", see art. 87; for the relevant time for determining location, see art. 88). It must be noted that receivables are covered by this rule, which is subject to several exceptions that are set out in articles 84 and 93-96.

69. The first exception relates to the priority of a security right in a receivable arising from a sale or lease of [or secured by] immovable property (see art. 84 below). The other exceptions relate to a security right in rights to payment of funds credited in a bank account (see art. 93), intellectual property (see art. 95, which refers both to the *lex protectionis* and to the law of the State of the grantor's location) and non-intermediated securities (see art. 96).

Article 84. Law applicable to a security right in receivables relating to immovable property

70. Article 84 is based on recommendation 209 of the Secured Transactions Guide (see chap. X, para. 54). It deals with the priority of a security right in a receivable arising from a sale or lease of [or secured by] immovable property as against the rights of competing claimants. Introducing an exception to the general rule of article 83, article 84 refers that matter to the law of the State under whose authority the immovable property registry is organized. For article 84 to apply, the right of a competing claimant must be registrable in the relevant immovable property registry.

Article 85. Law applicable to the enforcement of a security right

71. Article 85 is based on recommendation 218 of the Secured Transactions Guide (see chap. X, paras. 64-72). Subparagraph (a) deals with the law applicable to the enforcement of a security right in a tangible asset, as defined in article 2, subparagraph (ii). It refers to the law of the State [in which enforcement takes place (*lex fori*), which in most instances would be the law of the State in which the encumbered asset would be located (for the policy reasons for this approach, see Secured Transactions Guide, chap. X, para. 66)] [in which the encumbered asset is located].

72. It should be noted that enforcement may involve several distinct acts (e.g. notice of the secured creditor's intent to obtain possession of an encumbered asset without applying to a court or other authority, disposition of an encumbered asset, and distribution of the proceeds of disposition) that may take place in different States. For example, a secured creditor may take possession of the encumbered assets in one State, dispose of them in a second State, and distribute the proceeds of disposition in a third State. As a result, the law applicable to enforcement may be the law of several States. The result would be the same if a security right is created in several tangible assets that are located in different States It should also be note that subparagraph (a) does not deal with the less frequent case where enforcement takes place in different States because the asset has been moved to another State after commencement of enforcement. In such case, it is, however, assumed that the relevant place is the place where enforcement commences.

73. Under, subparagraph (b), the law applicable to the enforcement of a security right in an intangible asset (with the exception of a right to payment of funds credited in a bank account, intellectual property and non-intermediated securities) is the law governing priority. The main advantage of this approach is that the creation, third-party effectiveness, priority and enforcement of a security right in a receivable (but not the relationship between the debtor of the receivable and the secured creditor; see art. 92) is referred to one and the same law, that is, the law of the location of the grantor (see Secured Transactions Guide, chap. X, para. 69).

Article 86. Law applicable to a security right in proceeds of an encumbered asset

74. Article 86 is based on recommendation 215 of the Secured Transactions Guide (see chap. X, paras. 55-60). The following example illustrates how the rule on the law applicable to proceeds operates. Assume that the original encumbered asset is inventory, which is subsequently sold, and the purchase price is paid into a bank account. Under paragraph 1,

the law applicable to the question of whether the secured creditor automatically acquires a security right in the right to payment of the funds credited to the bank account as proceeds of the original encumbered inventory will be the law of the location of the inventory. Under paragraph 2, the law applicable to the third-party effectiveness and priority of the security right in the proceeds will be the law applicable to the right to payment of funds credited to the bank account (see art. 93).

75. It should be noted that this type of bifurcated rule may lead to difficulties in cases where the law governing creation recognizes a broad-based automatic proceeds rule whereas the law governing third-party effectiveness and priority recognizes no or only a very limited automatic proceeds right. It should also be noted that this article is dealing only with the law applicable to proceeds derived from the original encumbered assets as a result of a disposition by the grantor or other event prior to enforcement, whereas article 88 deals with the law applicable to the distribution of proceeds derived from a disposition of the encumbered assets pursuant to post-default enforcement proceedings.

Article 87. Meaning of "location" of the grantor

76. Article 87 is based on recommendation 219 of the Secured Transactions Guide (see chap. X, paras. 73 and 74). It should be noted that the place of the central administration of a legal person is not necessarily the place of its statutory seat (or registered office). If the grantor is a legal person formed under the law of State A with its statutory seat in that State but has in State B a place of business where its senior management is based, then the grantor is located in State B. As a result of this approach, the creation, third-party effectiveness, priority and enforcement of a security right in a receivable is referred to a single law that is easy to determine and is most likely to be the law of the State in which the main insolvency proceeding with respect to the grantor will take place.

Article 88. Relevant time for determining location

77. Article 88 is based on recommendation 220 of the Secured Transactions Guide (see chap. X, paras. 75-78). It deals with the situation where the location of the asset or the location of the grantor changes from one State (State A) to another (State B) in circumstances where the applicable law is determined by reference to that location.

78. Paragraph 1 establishes that State B will recognize the existence of the security right if the latter was validly created under the law of State A at the time the asset or the grantor was located in State A. However, if a priority dispute is raised either in State A or in State B, the substantive law of State B will be applied to determine whether the security right is effective against third parties and has priority over the rights of competing claimants. As a result, for the security right to be treated as being effective against third parties either in State A or in State B, the third-party effectiveness requirements of the law of State B must have been fulfilled. This is so even if the security right had been made effective against third parties under the law of State A at the time the asset or the grantor was located in State A. Indeed, this analysis assumes that both States are enacting States.

79. Paragraph 2 constitutes an exception to the general rules of paragraph 1. In the event of a priority dispute between two security rights that have been made effective against third parties in the State of the initial location (State A, in the example), the priority dispute will be resolved under the law of the initial location.

Article 89. Exclusion of *renvoi*

80. Article 89 is based on recommendation 221 of the Secured Transactions Guide (see chap. X, para. 14). Its purpose is to reject the doctrine of *renvoi* and provide greater certainty with respect to the law applicable by avoiding the complications arising from this doctrine. Under this doctrine, the applicable law as indicated by the conflict-of-laws rules of a State (State A) includes the private international law (this term is used in the same sense as the term "conflict of laws") of the State whose law is the applicable law. As a result of this doctrine, if the conflict-of-laws rules of State A refer the priority of a security right in a receivable to the law of the location of the grantor (the law of State B) and the conflict-of-laws rules of State B refer that issue to the law governing the receivable (which is the law of State C), then a court in State A will resolve the priority dispute using the law of State C

(and not the law of State B). This result, however, would create uncertainty as to the law applicable and also run contrary to the expectations of the parties. For those reasons, article 89 prohibits *renvoi* (for an exception, see art. 97, para. 3).

Article 90. Overriding mandatory rules and public policy (*ordre public*)

81. Article 90, which is based on recommendation 222 of the Secured Transactions Guide (see chap. X, para. 79) and article 11 of the Hague Principles on Choice of Law in International Commercial Contracts (the "Hague Principles"), states generally recognized principles of private international law.

82. To illustrate how the rules in paragraphs 1 and 3 will operate, assume that the law of the forum prohibits dealings in certain types of asset (such as an asset which is the proceeds of criminal activities or is the subject of international sanctions) and that the law of the State whose law is applicable does not contain such a prohibition. In such a case, the forum court may refuse to recognize as validly created a security right created in the asset under the foreign law that is applicable under the provisions of this chapter even though that law does not contain the same prohibition. However, to do so, the forum court must conclude that the application of the foreign law would be manifestly contrary to the public policy of the forum State (see para. 3).

83. Under paragraphs 2 and 4, the forum court (if it is allowed to do so under its law) may refuse to recognize as validly created a security right permitted to be created under the applicable law (even if the law applicable is the law of the forum), if the creation of such security right would be manifestly contrary to public policy in a State which has a close connection with the situation. For example, if a law firm is located in the forum State and under the applicable law of the forum State a security right may be created in receivables arising from legal services, but the location of the client is in a foreign State, which has strict confidentiality rules prohibiting a security right in a law firm's receivables arising from legal services, the forum court may refuse the application of the applicable law of the forum State, if it finds that its application would be manifestly contrary to the public policy of the State of the location of the client.

84. Paragraph 5 is intended to make clear that the rules in paragraph 1-4 may also be relied upon by an arbitral tribunal, although, unlike a court, it does not operate as part of the judicial infrastructure of a single legal system. Under paragraph 5, an arbitral tribunal may take into account the overriding mandatory provisions and policies, for example, of the seat, however identified, or of the place where enforcement of any award would be likely to take place. Paragraph 5 requires an arbitral tribunal to determine whether it is required or entitled to take into account public policy or overriding mandatory provisions of another law, having regard (in particular) to the agreement of the parties, the designated or deemed seat of the arbitration, any institutional rules applicable to the arbitration, and the potentially controlling influence of State courts applying local arbitration legislation (see commentary to article 11(5) of the Hague Principles).

85. Under paragraph 6, the forum State may not displace the provisions of the law applicable to third-party effectiveness and priority of a security right on the ground that this would offend its public policy, and apply its own provisions or the provisions of another State. This approach is justified by the need to achieve certainty with respect to the law applicable to third-party effectiveness and priority. The same approach is followed in article 23, paragraph 2, article 30, paragraph 2, and article 31 of the Assignment Convention, as well as in article 11, paragraph 3, of the Hague Securities Convention.

Article 91. Impact of commencement of insolvency proceedings on the law applicable to a security right

86. Article 91 is based on recommendation 223 of the Secured Transactions Guide (see chap. X, paras. 80-82). Its purpose is to establish that an insolvency court in the enacting State must in principle respect the law applicable to security rights under its conflict-of-laws rules. However, nothing in article 91 restricts the application of the law of the State in which insolvency proceedings are commenced (*lex fori concursus*) to matters such as the avoidance of fraudulent or preferential transactions, the treatment of secured creditors, the ranking of claims and the distribution of proceeds in the grantor's insolvency.

B. Asset-specific rules

Article 92. Law applicable to the relationship of third-party obligors and secured creditors

87. Article 92 is based on recommendation 217 of the Secured Transactions Guide (see chap. X, paras. 62 and 63) and article 29 of the Assignment Convention. Its purpose is twofold. First, the conflict-of-laws rules on the third-party effectiveness or enforcement of a security right do not apply to the effectiveness or enforcement of a security right against the debtor of a receivable, the obligor under a negotiable instrument or the issuer of a negotiable document; they are not considered "third parties". Second, the law applicable to these issues is the law governing the legal relationship between the grantor and the debtor of the receivable, the obligor under the instrument or the issuer of the document; the same law also applies to the question of whether any of the latter may invoke that their agreement with the grantor prohibits or limits the grantor's right to create a security right in the relevant receivable, instrument or document.

Article 93. Law applicable to a security right in a right to payment of funds credited to a bank account

88. Article 93 is based on recommendation 210 of the Secured Transactions Guide (see chap. X, paras. 49-51). It departs from the general conflict-of-laws rule on the law applicable to intangible assets (see art. 83). A right to payment of funds credited to a bank account is in the generic sense a receivable of the customer against the depositary institution but a different rule applies in this case for the determination of the applicable law. Two options are offered to the enacting State for the law applicable to the creation, third-party effectiveness, priority and enforcement of a security right in a right to payment of funds credited to a bank account, as well as to the rights and obligations between the depositary institution and the secured creditor.

89. Under option A, the applicable law is that of the State of the location of the branch or office of the depositary institution with which the account is maintained. It should be noted that a branch (or office) of a depositary institution may be considered as being located in a particular jurisdiction irrespective of whether the institution offers its services through physical offices or only through an online connection accessible electronically by customers. In this connection, it should be noted that a depositary institution must generally have a physical presence or legal address in a jurisdiction in order to be allowed by the relevant regulatory authorities to carry on business in that jurisdiction.

90. Under option B, the applicable law is the law designated in the account agreement as governing the issues that are the subject of article 93 or, in the absence of a designation of a law for these issues, the law designated by the parties to the account agreement as the law governing that agreement. To be effective for conflict-of-laws purposes, a designation must refer to the law of a State in which the depositary institution is engaged in the business of maintaining bank accounts. It must be noted, however, that the State whose law is so designated may be different than the State in which the grantor's bank account is maintained.

91. If the applicable law cannot be determined as described in the preceding paragraph, option B provides for a series of subrules along the lines of the default rules contained in article 5 of the Hague Securities Convention, which the enacting State may wish to insert in this article, if it decides to adopt option B of article 93.

Article 94. Law applicable to the third-party effectiveness of a security right in certain types of asset by registration

92. Article 94 is based on recommendation 211 of the Secured Transactions Guide (see chap. X, para. 34). This article is an exception to the conflict-of-laws rules on the third-party effectiveness of a security right in a negotiable instrument, negotiable document, right to payment of funds credited to a bank account or certificated non-intermediated security. Under articles 82, 93 and 96, the effectiveness against third parties of a security right in any of these assets is governed by the laws of a State which may be different from the State of the location of the grantor. However, under article 94, if the State of the location of the grantor recognizes registration of a notice as a method of third-party effectiveness for a

security right in a negotiable instrument, right to payment of funds credited to a bank account or certificated non-intermediated security, then the law applicable to third-party effectiveness by registration is the law of the State in which the grantor is located.

Article 95. Law applicable to a security right in intellectual property

93. Article 95 is based on recommendation 248 of the Intellectual Property Supplement (see paras. 284-337). The effect of paragraph 1 is the following. If intellectual property is protected in a particular State, the law of that State will apply to the requirements to be met for the security right in that intellectual property to be considered as having been created, made effective against third parties and enjoying priority. It should be noted that a security right in intellectual property may be granted by any person that is entitled to use the related intellectual property under the relevant intellectual property law. Therefore, the grantor may be the owner or a transferee, or a licensor or licensee of the intellectual property to be encumbered.

94. Paragraph 2 provides for an alternative way to create and make effective against certain third parties a security right in intellectual property. Under paragraph 2, the secured creditor may also use for these purposes the law of the State in which the grantor is located. The principal benefit of paragraph 2 is that if the security right has been made effective against an insolvency administrator of the grantor under the law of the grantor's location, an insolvency court in the enacting State will recognize the security right even if the third-party effectiveness requirements of all States in which the intellectual property is protected have not been fulfilled.

95. Paragraph 3 refers to the law of the grantor's location for enforcement issues relating to intellectual property. If enforcement involves several acts that take place in several States, this rule would still lead to the application of one and the same law because it is unlikely that the grantor's location would change between any of those several acts. Moreover, in the rare case where there would be such a change, it is assumed that a court would refer to the laws of the grantor's location at the time of commencement of the enforcement. It should be noted that the effectiveness of the security right against persons other than the grantor (e.g. the owner of the intellectual property, if the grantor is a licensee) is outside the scope of this article.

Article 96. Law applicable to a security right in non-intermediated securities

96. […].

[*Note to the Working Group: The Working Group may wish to note that the commentary to article 96 will be prepared after the Working Group has made a decision as to which of the options is to be retained or, alternatively, whether the article should include several options, and reached an agreement as to the contents of the article.*]

Article 97. Law applicable in the case of a multi-unit State

97. Article 97 is based on recommendations 224-227 of the Secured Transactions Guide (see chap. X, paras. 83-87). Its purpose is to deal with the law applicable where the State whose law is applicable has two or more territorial units. In such a case, paragraph 1 provides that a reference to the law of a multi-unit State is a reference to the law applicable in the relevant unit. For example, in a federal State, secured transactions laws may fall under the legislative authority of one of its territorial units. In such case, each unit will have its own substantive law and conflict-of-laws rules. Under paragraph 2, the relevant unit is to be determined on the basis of the location of the grantor or of the encumbered asset, or otherwise under the provisions of this chapter. It should be noted that paragraphs 1 and 2 are interpretative provisions and also apply where the forum State is the State whose law is applicable under the provisions of this chapter.

98. Where the applicable law is that of a multi-unit State that is not an enacting State, paragraph 3 provides that the conflict-of-laws rules in the relevant State or territorial unit will determine whether to apply the law of a different territorial unit in the State (see Secured Transactions Guide, chap. X, para. 85). This means that the forum court is required to examine the internal conflict-of-laws rules of the State of the location of the grantor or the

encumbered asset. In this regard, the Assignment Convention allows a declaration by States as to the determination of the applicable priority rule as between various territorial units (on article 37 of the Assignment Convention), but in this article there would be no declaration and the forum court would have to determine the applicable law under the conflict-of-laws rules of the multi-unit State.

99. To illustrate how the rule in paragraph 3 will operate, assume that the conflict-of-laws rules of this chapter refer to the law of the location of the grantor and that the location of the grantor under this chapter is in a territorial unit of a multi-unit State whose laws (including its conflict-of-laws rules) govern secured transactions. Also assume that the location of the grantor under this chapter is in unit A of that multi-unit State (unit A being the place of central administration of the grantor). If, however, the conflict-of-laws rules of unit A refer to the law of unit B as being the applicable law (e.g. because unit B also refers to the location of the grantor but defines the location of the grantor as its statutory seat instead of its place of central administration), then the forum court would have to apply the law of unit B if the statutory seat of the grantor is in unit B.

100. Paragraph 3 is indirectly an exception to the exclusion of the doctrine of *renvoi* (see art. 89) as it introduces "internal *renvoi*". The purpose of the exception is to ensure that where the applicable law is that of a unit of a multi-unit State which is not an enacting State, a forum court outside that multi-unit State will apply the substantive law of the same unit as a forum court in that multi-unit State.

Chapter IX. Transition

Introduction

101. This chapter has three functions. First, it provides that prior law governing security rights (the "prior law") is to be repealed (see art. 98). Second, it establishes the law applicable to security rights that are created while the prior law is in force but continue to be effective, perhaps for extensive periods of time, after the new secured transactions law (the "new law") enters into force (see arts. 99-103). Third, it provides for the setting of a date on which the new law goes into effect (see art. 104). Thus, this chapter provides rules by which the law governing such security rights moves in a fair and efficient manner from the prior law to the new one (see Secured Transactions Guide, chap. XI, paras. 1-3).

Article 98. Amendment and repeal of other laws

102. The Model Law is intended as a complete system of secured transactions law, replacing in its entirety the prior law, rather than a supplement to existing law. Accordingly, the enacting State should list in paragraph 1 and thus repeal the body of laws that comprise its secured transactions law. The way in which the repeal is effectuated will depend on the form of the prior law. Where the prior law is a free-standing code or the like, that code can be repealed in its entirety. Where the prior law is derived from statutes that also address other topics, though, the enacting State must determine how to excise the rules formerly governing security rights from the rules that apply to other topics. Where part of the prior law is based on judicial opinions (as may be the case, for example, in some common law systems), the method of repeal of the prior law must be determined by the enacting State.

103. Many other bodies of law interact with secured transactions law. In some cases, provisions of those other bodies of law may be written on the assumption that prior secured transactions law is in effect. Paragraph 2 provides the enacting State an opportunity to amend those provisions so as to mesh with the new law.

Article 99. Transitional application of this Law

104. Paragraph 1 of this article defines two terms used in this chapter. According to subparagraph 1(a), "prior law" may be the law of the enacting State or the law of another State, whose law is applicable under the conflict-of-laws rules of the enacting State. According to subparagraph 1(b), "prior security right" is a security right as long as the relevant security agreement is entered into before the entry into force of the new law, even

if the security right is in future assets (see art. 2, subpara. (m)). As a result, such a security right will benefit from the transition provisions of the Model Law.

105. Paragraph 2 is based on recommendation 228 (second sentence) of the Secured Transactions Guide (see chap. XI, paras. 7-12). It provides that, by the end of the transitional period specified in article 104, the Model Law applies to all security rights within its scope, including prior security rights, except as otherwise provided in this chapter (e.g. art. 100).

106. As a result of paragraph 2, even prior security rights will be governed, at least in part, by the new law. Inasmuch as many secured transactions endure for several years, if the new law applied only to security rights from agreements entered into after the effective date of the new law, the prior law would persist for a lengthy period during which lenders, borrowers, attorneys, and judges would need to apply both laws and search for competing claimants under the rules of both. This result would entail additional cost as well as delaying the economic benefits of the new law.

Article 100. Inapplicability of this Law to actions commenced before its entry into force

107. Article 100 is based on recommendation 229 of the Secured Transactions Guide (see chap. XI, paras. 13-16). It introduces an exception to the rule in article 99 that by the end of the transitional period the Model Law applies to all security rights within its scope, including prior security rights. In certain situations, only prior law will govern an aspect of a security agreement entered into under that regime.

108. In particular, paragraph 1 provides that, if a matter with respect to a security right is the subject of litigation or arbitration proceedings commenced before the new law enters into force, the law governing the matter under dispute will remain the prior law. This paragraph applies to all disputes arising under the prior law, whether between the secured creditor and the grantor, the secured creditor and a competing claimant, or the secured creditor and a person liable, for example, on a receivable or negotiable instrument. It should be noted that the commencement of litigation before the new secured transactions law enters into force with respect to one dispute does not preclude application of the rules of the new law to a separate dispute arising under the same security agreement.

109. Paragraph 2 provides a substantive rule about enforcement of security rights created under prior law. Under the rule in this paragraph, if enforcement is commenced under prior law, the secured creditor may continue enforcement under the rules of the prior law even after the new law enters into force.

Article 101. Creation of a prior security right

110. Article 101 is based on recommendation 230 of the Secured Transactions Guide (see chap. XI, paras. 17-19). Under this article, if a security right was effectively created under prior law, this is sufficient for its continued effectiveness between the parties under the new law even if the manner of creation would not suffice under the new law. This rule avoids the invalidation of prior security rights and the creation of a situation in which the secured creditor would need to obtain cooperation from the grantor to take the additional steps necessary to continue the existence of the security right under the new law. Such cooperation may not be forthcoming from a grantor that has already received an extension of credit secured by the security right in the encumbered asset.

Article 102. Third-party effectiveness of a prior security right

111. Article 102 is based on recommendation 231 of the Secured Transactions Guide (see chap. XI, paras. 20-22). Under this article, security rights created and made effective against third parties under prior law before the effective date of the new law remain effective against third parties for a period of time under the new law, even if the conditions for third-party effectiveness under the new law have not been satisfied. The period expires at the earlier of the date specified in the Model Law or the date on which third-party effectiveness would have ceased under prior law.

112. Illustration 1: Under the former secured transactions law of State X, a security right effectively created in a receivable is automatically effective against third parties without any

additional action required. Prior to the effective date of the new secured transactions law, Grantor created in favour of Creditor a security right in Grantor's receivables. All steps necessary for creation of a security right under prior law were properly taken; therefore, under the prior law, Creditor had a security right in the receivables that was effective against third parties. Under paragraph 1, once the new secured transactions law goes into effect, Creditor's security right will remain effective against third parties until the expiration of the period of time specified in subparagraph 1(a).

113. Illustration 2: Under the former secured transactions law of State Y, a security right effectively created in receivables by a grantor that is a corporation was made effective against third parties by submitting a notice to the registrar of corporations. Under prior law, such a notice expired after four years. One year prior to the effective date of the new secured transactions law, Grantor created in favour of Creditor a security right in Grantor's receivables. All steps necessary for creation of a security right were properly taken, and Creditor submitted the requisite notice to the registrar of corporations the same day; as a result, under the former legal regime Creditor's security right was effective against third parties. Under paragraph 1, once the new secured transactions law goes into effect, Creditor's security right will remain effective against third parties until the earlier of: (a) the expiration of the four-year period of effectiveness under the prior law of the notice submitted to the registrar of corporations; and (b) the expiration of the period of time specified in subparagraph 1(b).

114. A secured creditor, whose security right that is effective against third-parties based on compliance with prior law will cease to be effective against third parties under the rule in paragraph 1, may take the appropriate steps under the new law to achieve third-party effectiveness. Most often, this result will be accomplished by registering a notice with the Registry. The ability to do so is aided by paragraph 2, which provides that the prior written agreement creating the security right constitutes sufficient authorization for registration of the notice.

115. Paragraph 3 provides that, so long as a security right is effective against third parties under prior law and the requirements for third-party effectiveness under the new law are satisfied before the expiration of the period specified in paragraph 1, the prior security right continues to be effective against third parties from the time when it was made effective against third parties under prior law and, thus, priority will date from that time.

116. If, however, a security right was effective against third parties under prior law but there is a gap before third-party effectiveness was achieved under the new law, paragraph 4 provides that the security right is effective against third parties only from the time it is made effective against third parties under the new law and, thus, its priority dates only from that time.

Article 103. Priority of a prior security right

117. Article 103 contains two rules relevant to determining the priority of a security right that was created under prior law. Paragraph 1 indicates how to apply the priority rule of article 28 to such a security right. Under that paragraph, the date of third-party effectiveness or registration of a notice, as applicable, under prior law is used for priority purposes if the security right was effective against third parties under prior law and remained effective against third parties under the new law under article 102, paragraph 3.

118. Under paragraph 2, however, prior law, rather than the new law, determines priority if the "priority status" of competing claimants has not changed. The purpose of this rule is to preserve priority among completing claimants that was established under prior law when no change has occurred other than the new law becoming effective.

Article 104. Entry into force of this Law

119. Article 104 is based on recommendation 228 of the Secured Transactions Guide (see chap. XI, paras. 4-6). It leaves to the enacting State to determine the date when or the mechanism according to which the new law will enter into force. The enacting State may also wish to determine whether this article should be placed at the beginning or at the end of the new law.

120. In determining when the new law will enter into force, careful consideration should be given both to obtaining the economic benefits of the new law as soon as possible and to minimizing dislocations that may be caused by significant changes in secured transactions practice resulting from the new law. Inasmuch as the new law will have been chosen because it is an improvement over the prior law, the new law should come into force as soon as is practical. However, some lead time is necessary in order to, inter alia: (a) publicize the existence of the new law; (b) enable establishment of the Registry (or adaptation of an existing registry to the system required by the new law); and (c) enable participants in the secured transactions system, particularly present and future secured creditors, to prepare, for example, for compliance with new rules and develop new forms. For example, the new law may enter into force on a specific date or a few months after a specific date, or on the date to be specified by a decree once the Registry becomes operational.

G. Note by the Secretariat on a draft model law on secured transactions

(A/CN.9/884 and Add.1-4)

[Original: English]

Contents

Chapter I. Scope of application and general provisions

Article 1. Scope of application

1. This Law applies to security rights in movable assets.

2. With the exception of articles 70, paragraphs 1-3, to 79, this Law applies to outright transfers of receivables [and, in such a case, references in this Law to a grantor apply to the transferor, references to a secured creditor apply to the transferee, references to a security agreement apply to the agreement for the outright transfer of a receivable, references to a security right apply to the right of the transferee and references to an encumbered asset apply to the receivable, but references to a secured obligation do not apply to the right to payment of the price of the receivable].

3. Notwithstanding paragraph 1, this Law does not apply to security rights in:

(a) The right to request payment under, or to receive the proceeds of, an independent guarantee or letter of credit;

(b) Intellectual property in so far as this Law is inconsistent with [the law relating to intellectual property to be specified by the enacting State];[1]

(c) Intermediated securities;

(d) Payment rights arising under or from financial contracts governed by netting agreements, except a payment right arising upon the termination of all outstanding transactions; and

(e) [Any other types of asset to be specified by the enacting State, such as those that are subject to specialized secured transactions and asset-based registration regimes under other law to the extent that that other law governs matters addressed in this Law].[2]

[4. This Law does not apply to security rights in proceeds of encumbered assets if the proceeds are a type of asset, to which this Law does not apply, to the extent that [any other law to be specified by the enacting State] applies to security rights in those types of asset and governs the matters addressed in this Law.]

5. Nothing in this Law affects the rights and obligations of the grantor and the debtor of the receivable under other laws governing the protection of parties to transactions made for personal, family or household purposes.

6. Nothing in this Law overrides a provision of any other law that limits the creation or enforcement of a security right in, or the transferability of, specific types of asset, with the exception of a provision that limits the creation or enforcement of a security right in, or the transferability of, an asset on the sole ground that it is a future asset, or a part or undivided interest in an asset.

[*Note to the Commission: The Commission may wish to consider which of the alternative bracketed texts should be retained, the text in article 1, paragraph 2 or the texts in article 2 subparagraph (k), (o), (dd), (ee), (hh) and (ii), prepared pursuant to a decision by the Working Group (A/CN.9/865, para. 40).*]

---

[1] This provision may not be necessary if the enacting State has coordinated, or has otherwise addressed the relationship between this Law and any secured transactions provisions of its law relating to intellectual property.

[2] If the enacting State decides to introduce any other exception(s), they should be limited and set out in the Law in a clear and specific way.

Article 2. Definitions and rules of interpretation

For the purposes of this Law:

(a) "Acquisition secured creditor" means a secured creditor that has an acquisition security right;

(b) "Acquisition security right" means a security right in a tangible asset, intellectual property or the rights of a licensee under a licence of intellectual property, which secures the obligation to pay any unpaid portion of the purchase price of the asset or other credit extended to enable the grantor to acquire rights in the asset to the extent that the credit is used for that purpose;

(c) "Bank account" means an account maintained by a [a financial institution authorized to receive deposits from the public] [an authorized deposit-taking institution] [any institution to be specified by the enacting State] to which funds may be credited or debited;

(d) "Certificated non-intermediated securities" means non-intermediated securities represented by a certificate that:

(i) Provides that the person entitled to the securities is the person in possession of the certificate; or

(ii) Identifies the person entitled to the securities;

(e) "Competing claimant" means a creditor of a grantor or other person with rights in an encumbered asset that may be in competition with the rights of a secured creditor in the same encumbered asset. The term includes:

(i) Another secured creditor of the grantor that has a security right in the same encumbered asset;

(ii) Another creditor of the grantor that has a right in the same encumbered asset [to be specified by the enacting State];

(iii) The insolvency representative in insolvency proceedings in respect of the grantor; or

(iv) A buyer or other transferee, lessee or licensee of the encumbered asset;

(f) "Consumer goods" means goods primarily used or intended to be used by the grantor for personal, family or household purposes;

(g) "Control agreement":

(i) With respect to uncertificated non-intermediated securities means an agreement in writing among the issuer, the grantor and the secured creditor, according to which the issuer agrees to follow instructions from the secured creditor with respect to the securities without further consent from the grantor; and

(ii) With respect to rights to payment of funds credited to a bank account means an agreement in writing among the depositary institution, the grantor and the secured creditor, according to which the depositary institution agrees to follow instructions from the secured creditor with respect to the payment of funds credited to the bank account without further consent from the grantor;

(h) "Debtor" means a person that owes payment or other performance of a secured obligation, whether or not that person is the grantor of the security right securing payment or other performance of that obligation, including a secondary obligor such as a guarantor of a secured obligation;

(i) "Debtor of the receivable" means:

(i) A person that owes payment of a receivable that is subject to a security right, including a guarantor or other person secondarily liable for payment of the receivable; and

(ii) A transferor in an outright transfer of a receivable;

(j) "Default" means the failure of the debtor to pay or otherwise perform the secured obligation [and any other event that the grantor and the secured creditor define in their agreement as constituting default];

[*Note to the Commission: The Commission may wish to note that this definition was added pursuant to the decision of the Working Group (see A/CN.9/871, para. 82) and consider whether the bracketed words are necessary. In this connection, the Commission may wish to note that all provisions of the draft Model Law are subject to contrary agreement of the parties, unless they are set out in article 3 as mandatory law rules.*]

(k) "Encumbered asset" means[:

(i)] A movable asset that is subject to a security right; [and

(ii) A receivable that is the subject of an outright transfer;]

(l) "Equipment" means a tangible asset other than inventory or consumer goods that is primarily used or intended to be used by the grantor in the operation of its business;

(m) "Financial contract" means any spot, forward, future, option or swap transaction involving interest rates, commodities, currencies, equities, bonds, indices or any other financial instrument, any securities repurchase or lending transaction, and any other transaction similar to those transactions entered into in financial markets and any combination of those transactions;

(n) "Future asset" means a movable asset, which does not exist or which the grantor does not have rights in or the power to encumber at the time the security agreement is concluded;

(o) "Grantor" means:

(i) A person that creates a security right to secure either its own obligation or that of another person; [and]

(ii) A buyer or other transferee, lessee, or licensee of an encumbered asset that acquires its rights subject to a security right; [and

(iii) A transferor in an outright transfer of a receivable;]

(p) "Insolvency representative" means a person or body, including one appointed on an interim basis, authorized in insolvency proceedings to administer the reorganization or the liquidation of the insolvency estate;

[*Note to the Commission: The Commission may wish to note that this term is only referred to in the definition of "competing claimant" and thus consider whether it should be retained in article 2 or rather explained in the draft Guide to Enactment. In any case, the draft Guide to Enactment may clarify that the term includes an insolvency representative that may be appointed to supervise, rather than only administer, the reorganization of the insolvency estate, for example, in the context of debtor-in-possession insolvency proceedings, and/or simply refer to the discussion in the* UNCITRAL Legislative Guide on Insolvency Law *(the "*Insolvency Guide*") on the supervision of the debtor by the insolvency representative and the various functions performed by the insolvency representative (see part two, chap. III, paras. 11-18 and 35). The Commission may also wish to consider whether the term "insolvency proceedings", which is referred to in this definition and in articles 33 (priority chapter) and 92 (conflict-of-laws chapter), and the term "insolvency estate", which is referred to in the definition of this term and the definition of the term "competing claimant", should also be defined in article 2 or explained in the draft Guide to Enactment by reference to the definitions of those terms contained in the* UNCITRAL Legislative Guide on Secured Transactions (the "Secured Transactions Guide"), *which are based on the relevant definitions of the* Insolvency Guide.]

(q) "Intangible asset" means all types of movable asset other than tangible assets;

(r) "Inventory" means tangible assets held by the grantor for sale or lease in the ordinary course of the grantor's business, including raw and semi-processed materials (work-in-process);

(s) "Knowledge" means actual knowledge;

(t) "Mass or product" means tangible assets that are so physically associated or united with other tangible assets that they have lost their separate identity;

(u) "Money" means currency authorized as legal tender by any State;

[*Note to the Commission: Noting that the term is used throughout the draft Model Law (see, for example, art 2, subpara. (jj), art. 10, para. 2 and art. 19, para. 1), the Commission may wish to consider whether the term "movable asset" should be defined along the following lines "'Movable asset' means a tangible or intangible asset other than [immovable property as defined in the law of the enacting State*.]

(v) "Non-intermediated securities" means securities other than securities credited to a securities account and rights in securities resulting from the credit of securities to a securities account;

(w) "Netting agreement" means an agreement between two or more parties that provides for one or more of the following:

(i) The net settlement of payments due in the same currency on the same date whether by novation or otherwise;

(ii) Upon the insolvency or other default by a party, the termination of all outstanding transactions at their replacement or fair market values, conversion of such sums into a single currency and netting into a single payment by one party to the other; or

(iii) The set-off of amounts calculated as set forth in subparagraph (ii) under two or more netting agreements;

(x) "Notice" means a communication in writing;

(y) "Notification of a security right in a receivable" means a notice by the grantor or the secured creditor informing the debtor of the receivable that a security right has been created in the receivable;

(z) "Possession" means the actual possession of a tangible asset by a person [directly or indirectly] or its representative, or by an independent person that acknowledges holding it for that person;

[*Note to the Commission: The Commission may wish to note that the bracketed words have been added pursuant to a decision by the Working Group to address situations in which the issuer of a negotiable document holds it through various persons responsible to perform parts of a multimodal transport contract (A/CN.9/865, para. 62), and consider whether they should be retained.*]

(aa) "Priority" means the right of a person in an encumbered asset in preference to the right of a competing claimant;

(bb) "Proceeds" means whatever is received in respect of an encumbered asset, including what is received as a result of sale or other transfer, lease, licence or collection of an encumbered asset, civil and natural fruits, insurance proceeds, claims arising from defects in, damage to or loss of an encumbered asset, and proceeds of proceeds;

(cc) "Receivable" means a right to payment of a monetary obligation, excluding a right to payment evidenced by a negotiable instrument, a right to payment of funds credited to a bank account and a right to payment under a non-intermediated security;

(dd) "Secured creditor" means:

[(i)] A person that has a security right;[and

(ii) A transferee in an outright transfer of a receivable;]

(ee) "Secured obligation" means an obligation secured by a security right[. The term does not include the obligation of the transferee to pay the price in an outright transfer of a receivable];

(ff) "Securities" means:

[(i)] An obligation of an issuer or any share or similar right of participation in an issuer or in the enterprise of an issuer that:

a. Is one of a class or series, or by its terms is divisible into a class or series; [and]

b. Is of a type dealt in or traded on a recognized market, or is issued as a medium for investment [and

(ii) The enacting State to specify any additional rights that should qualify as securities even if they do not satisfy the requirements expressed in subparagraphs (i) a. and (i) b.;]

(gg) "Securities account" means an account maintained by an intermediary to which securities may be credited or debited;

(hh) "Security agreement" means:

[(i)] An agreement, regardless of whether the parties have denominated it as a security agreement, between a grantor and a secured creditor that provides for the creation of a security right; [and

(ii) An agreement that provides for the outright transfer of a receivable;]

(ii) "Security right" means:

[(i)] A property right in a movable asset that is created by an agreement to secure payment or other performance of an obligation, regardless of whether the parties have denominated it as a security right, and regardless of the type of asset, the status of the grantor or secured creditor, or the nature of the secured obligation; [and

(ii) The right of the transferee in an outright transfer of a receivable;]

(jj) "Tangible asset" means all types of tangible movable asset. Except in articles 2, subparagraphs (b), (k), (r) and (t), 11, 32 and 36-40, the term includes money, negotiable instruments, negotiable documents and certificated non-intermediated securities; and

(kk) "Uncertificated non-intermediated securities" means non-intermediated securities not represented by a certificate.

Article 3. Party autonomy

1. Except for articles 4, 6, 9, 51, 52, 70, paragraph 3, and 83-105, the provisions of this Law may be derogated from or varied by agreement.

2. An agreement referred to in paragraph 1 does not affect the rights or obligations of any person that is not a party to the agreement.

Article 4. General standards of conduct

A person must exercise its rights and perform its obligations under this Law in good faith and in a commercially reasonable manner.

Article 5. International origin and general principles

1. In the interpretation of this Law, regard is to be had to its international origin and the need to promote uniformity in its application and the observance of good faith.

2. Questions concerning matters governed by this Law which are not expressly settled in it are to be settled in conformity with the general principles on which this Law is based.

[*Note to the Commission: The Commission may wish to note that article 5, which has been added pursuant to a decision by the Working Group (A/CN.9/865, para. 47), is based on article 3 of the UNCITRAL Model Law on Electronic Commerce, article 4 of the* UNCITRAL Model Law on Electronic Signatures, *and art. 2A of the UNCITRAL* Model Law on International Commercial Arbitration.]

Chapter II. Creation of a security right

A. General rules

Article 6. Creation of a security right

1. A security right is created by a security agreement, provided that the grantor has rights in the asset to be encumbered or the power to encumber it.

2. A security agreement may provide for the creation of a security right in a future asset, but the security right in that asset is created only when the grantor acquires rights in it or the power to encumber it.

3. Except as provided in paragraph 4, a security agreement must be [concluded in] [evidenced by][3] a writing that is signed by the grantor and:

(a) Identifies the secured creditor and the grantor;

(b) Describes the secured obligation;

(c) Describes the encumbered assets as provided in article 9[; and

(d) Indicates the maximum monetary amount for which the security right may be enforced].[4]

4. A security agreement may be oral if the secured creditor is in possession of the encumbered asset.

Article 7. Obligations that may be secured

A security right may secure any type of obligation, present or future, determined or determinable, conditional or unconditional, fixed or fluctuating.

Article 8. Assets that may be encumbered

A security right may encumber:

(a) Any type of movable asset, including future assets;

(b) Parts of and undivided rights in movable assets;

(c) Generic categories of movable assets; and

(d) All of a grantor's movable assets.

Article 9. Description of encumbered assets

1. The assets encumbered or to be encumbered must be described in the security agreement in a manner that reasonably allows their identification.

2. A description that indicates that the encumbered assets consist of all the grantor's movable assets, or of all the grantor's movable assets within a generic category, satisfies the standard in paragraph 1.

Article 10. Right to proceeds and commingled funds

1. A security right in an encumbered asset extends to its identifiable proceeds.

2. Where proceeds in the form of money or funds credited to a bank account are commingled with other assets of the same kind:

(a) The security right extends to the commingled assets, notwithstanding that the proceeds have ceased to be identifiable;

---

[3] The enacting State may wish to choose the option that best fits its legal system.

[4] The enacting State may wish to include this subparagraph if it determines that an indication of the maximum monetary amount for which the security right may be enforced would be helpful to facilitate lending from another creditor.

(b) The security right in the commingled assets is limited to the value of the proceeds immediately before they were commingled; and

(c) If at any time after the commingling, the value of the commingled money or of the balance credited to the bank account is less than the value of the proceeds immediately before they were commingled, the security right in the commingled assets is limited to the lowest value between the time when the proceeds were commingled and the time when the security right is claimed.

Article 11. Tangible assets commingled in a mass or product

1. A security right in a tangible asset that is commingled in a mass of assets of the same kind or product extends to the mass or product.

Option A

2. A security right that extends to a mass or product is limited to the value of the encumbered assets immediately before they became part of the mass or product.

Option B

2. A security right that extends to a mass is limited to the same proportion of the value of the mass as the value that the encumbered assets bore to the value of the mass at the time of commingling.

3. A security right that extends to a product is limited to the value of the encumbered assets immediately before they became part of the product.

[3][4.] Where more than one security right extends to the same mass or product and each was a security right in a separate tangible asset at the time of commingling, the secured creditors are entitled to share in the mass or product according to the ratio that the obligation secured by each security right bears to the sum of the obligations secured by all the security rights.

Article 12. Extinguishment of a security right

A security right is extinguished upon the extinguishment of all present and future secured obligations, including conditional obligations, by payment or otherwise.

B. Asset-specific rules

Article 13. Contractual limitations on the creation of a security right

1. A security right in a receivable is effective as between the grantor and the secured creditor and as against the debtor of the receivable notwithstanding any agreement between the initial or any subsequent grantor and the debtor of the receivable or any subsequent secured creditor limiting in any way the grantor's right to create a security right.

2. Nothing in this article affects any obligation or liability of the grantor for breach of the agreement referred to in paragraph 1, but the other party to the agreement may not avoid the contract giving rise to the receivable or the security agreement on the sole ground of the breach of that agreement, or raise against the secured creditor any claim it may have as a result of such a breach against the grantor, as provided in article 62, paragraph 2.

3. A person that is not a party to the agreement referred to in paragraph 1 is not liable for the grantor's breach of the agreement on the sole ground that it had knowledge of the agreement.

4. This article applies only to receivables:

(a) Arising from a contract that is a contract for the supply or lease of goods or services other than financial services, a construction contract or a contract for the sale or lease of immovable property;

(b) Arising from a contract for the sale, lease or licence of industrial or other intellectual property or of proprietary information;

(c) Representing the payment obligation for a credit card transaction; or

(d) Arising upon net settlement of payments due pursuant to a netting agreement involving more than two parties.

Article 14. Personal or property rights securing or supporting payment or other performance of an encumbered receivable or other intangible asset, or negotiable instrument

1. A secured creditor with a security right in a receivable or other intangible asset, or a negotiable instrument has the benefit of any personal or property right that secures or supports payment or other performance of the encumbered asset without a new act of transfer.

2. If the right referred to in paragraph 1 is transferable only with a new act of transfer, the grantor is obliged to transfer the benefit of that right to the secured creditor.

Article 15. Right to payment of funds credited to a bank account

A security right in a right to payment of funds credited to a bank account is effective notwithstanding an agreement between the grantor and the depositary institution limiting in any way the grantor's right to create a security right.

Article 16. Tangible assets covered by negotiable documents

A security right in a negotiable document extends to the tangible asset covered by the document, provided that the issuer of the document is in possession of the asset at the time the security right in the document is created.

Article 17. Tangible assets with respect to which intellectual property is used

A security right in a tangible asset with respect to which intellectual property is used does not extend to the intellectual property and a security right in the intellectual property does not extend to the tangible asset.

Chapter III. Effectiveness of a security right against third parties

A. General rules

Article 18. Primary methods for achieving third-party effectiveness

1. A security right in an encumbered asset is effective against third parties if a notice with respect to the security right is registered in the general security rights registry (the "Registry").[5]

2. A security right in a tangible asset is also effective against third parties if the secured creditor has possession of the asset.

Article 19. Proceeds

1. If a security right in an asset is effective against third parties, a security right in any proceeds of that asset is effective against third parties without any further act if the proceeds are in the form of money, receivables, negotiable instruments or rights to payment of funds credited to a bank account.

[5] If a State implements the Model Registry-related Provisions in its secured transactions law, it will not need to define the term "Registry" in this article. If a State implements these Provisions in another statute or other type of legal instrument, it will need to refer to that other law or instrument in this article. If a State incorporate some of these Provisions in its secured transactions law and the balance of the Provisions in a separate statute or other type of legal instrument, it will need to coordinate its secured transactions law with that statute or other legal instrument.

2. If a security right in an asset is effective against third parties, a security right in any identifiable proceeds of that asset other than the types of proceeds referred to in paragraph 1 is effective against third parties:

(a) For [a short period of time to be specified by the enacting State] after the proceeds arise; and

(b) Thereafter, only if the security right in the proceeds is made effective against third parties by one of the methods applicable to the relevant type of encumbered asset referred to in the provisions of this chapter before the expiry of the time period specified in subparagraph (a).

[*Note to the Commission: The Commission may wish to consider whether an article should be inserted in this part of the draft Model Law to implement recommendation 44 of the* Secured Transactions Guide *providing for the automatic third-party effectiveness of a security right in tangible assets commingled in a mass or product (for creation issues, see art. 11, and for priority issues, see art. 40)*.]

Article 20. Changes in the method for achieving third-party effectiveness

A security right that is effective against third parties remains effective against third parties despite a change in the method for achieving third-party effectiveness, provided that there is no time when the security right is not effective against third parties.

Article 21. Lapse in third-party effectiveness

If the third-party effectiveness of a security right lapses, third-party effectiveness may be re-established, but the security right is effective against third parties only as of that time.

Article 22. Continuity in third-party effectiveness upon a change of the applicable law to this Law

1. If a security right is effective against third parties under the law of another State and this Law becomes applicable as a result of a change in the location of the encumbered asset or the grantor, whichever determines the applicable law under the provisions of chapter VIII, the security right remains effective against third parties under this Law until the earlier of:

(a) The time when third-party effectiveness would have lapsed under the law of the other State; and

(b) [A short period of time to be specified by the enacting State] after the change and, thereafter only if the third-party effectiveness requirements of this Law are satisfied before the expiry of that time period.

2. If a security right continues to be effective against third parties under paragraph 1, the time of third-party effectiveness is the time when it was achieved under the law of the other State.

[*Note to the Commission: The Commission may wish to consider whether a third party, who acquired a right in an encumbered asset when the security right was effective against third parties and thus acquired its right subject to the security right, would remain subordinated even after the security right ceased to be effective against third parties under subparagraph (a) or (b) of this article.*]

Article 23. Acquisition security rights in consumer goods

Option A

An acquisition security right in consumer goods is effective against third parties, other than a buyer or other transferee, lessee or licensee upon its creation without any further act.

Option B

An acquisition security right in consumer goods [below a value to be specified by the enacting State] is effective against third parties upon its creation without any further act.

[*Note to the Commission: The Commission may wish to consider whether the exception to the rule in option A is too broad and should thus be limited to transferees for value*.]

B. Asset-specific rules

Article 24. Rights to payment of funds credited to a bank account

A security right in a right to payment of funds credited to a bank account may also be made effective against third parties by:

(a) The creation of the security right in favour of the depositary institution;

(b) The conclusion of a control agreement; or

(c) The secured creditor becoming the account holder.

Article 25. Negotiable documents and tangible assets covered by negotiable documents

1. If a security right in a negotiable document is effective against third parties, the security right that extends to the asset covered by the document in accordance with article 16 is also effective against third parties.

2. During the period when a negotiable document covers an asset, a security right in the asset may also be made effective against third parties by the secured creditor's possession of the document.

3. A security right in a negotiable document that was effective against third parties by the secured creditor's possession of the document remains effective against third parties for [a short period of time to be specified by the enacting State] after the document has been returned to the grantor or other person for the purpose of ultimate sale or exchange, loading or unloading, or otherwise dealing with the assets covered by the document.

Article 26. Uncertificated non-intermediated securities

A security right in uncertificated non-intermediated securities may also be made effective against third parties by:

(a) The [notation of the security right] [entry of the name of the secured creditor as the holder of the securities][6] in the books maintained by or on behalf of the issuer for the purpose of recording the name of the holder of the securities; or

(b) The conclusion of a control agreement.

[6] The enacting State may wish to choose the method that best suits its legal system.

(A/CN.9/884/Add.1) (Original: English)

Note by the Secretariat on a draft model law on secured transactions

ADDENDUM

Contents

Chapter IV. The registry system

Article 27. Establishment of a registry

A registry is established to give effect to the provisions of this Law relating to the registration of notices with respect to security rights.

Draft Model Registry-related Provisions[1]

Section A. General rules

Article 1. Definitions and rules of interpretation

For the purposes of these Provisions:

(a) "Address" means: (i) a physical address or a post office box number, city, postal code and State; or (ii) an electronic address;

(b) "Amendment notice" means a notice submitted to the Registry in the prescribed registry notice form to modify information contained in a related registered notice;

(c) "Cancellation notice" means a notice submitted to the Registry in the prescribed registry notice form to cancel the effectiveness of the registration of all related registered notices;

(d) "Designated field" means the space on the prescribed registry notice form designated for entering a specified type of information;

[1] The draft Model Registry-related Provisions are intended to take effect simultaneously with the enactment of the other provisions of the draft Model Law. They are presented as a separate component with their own internal numbering in order to give enacting States flexibility in their implementation. Depending on its drafting conventions, an enacting State may choose to: (a) incorporate all of the Provisions in its secured transactions law as a separate chapter (e.g., as chapter IV); (b) incorporate all of the Provisions in a separate statute or other type of legal instrument such as rules, regulations, orders, by-laws, proclamations, or the like by the authority designated under article 27 of these Provisions; or (c) incorporate some of the Provisions in its secured transactions law and the balance in a separate statute or other type of legal instrument.

(e) "Initial notice" means a notice submitted to the Registry in the prescribed registry notice form to achieve the third-party effectiveness of the security right to which the notice relates;

(f) "Notice" means an initial notice, an amendment notice and a cancellation notice;

[(g) "Registered notice" means a notice the information in which has been entered into the registry record;]

[(h)] "Registrant" means a person who submits a notice to the Registry;

[(i)] "Registration" means the entry of information contained in a notice into the registry record;

[(j)] "Registration number" means the unique number assigned to an initial notice by the Registry and permanently associated with that notice and any related notice;

[(k)] "Registry" means the Registry established pursuant to article 27 of this Law; and

[(l)] "Registry record" means the information in all registered notices stored by the Registry. The registry record consists of the record that is publicly accessible (the public registry record) and the record that has been removed from the public registry record and archived (the registry archives).

Article 2. Grantor's authorization for registration

1. Registration of an initial notice with respect to a security right in an asset of a grantor is ineffective unless authorized by that grantor in writing.

2. Registration of an amendment notice that adds encumbered assets [or increases the maximum amount for which the security right may be enforced][2] or extends the period of effectiveness of the registration of a notice is ineffective unless authorized by the grantor in writing.

3. [With the exception of an amendment notice to add a transferee of an encumbered asset as a grantor in accordance with article 26 of these Provisions, registration] [3] [Registration] of an amendment notice that adds a grantor is ineffective unless authorized by the additional grantor in writing.

4. Authorization may be given before or after the registration of an initial or amendment notice.

5. A written security agreement is sufficient to constitute authorization by the grantor for the registration of an initial or amendment notice covering the encumbered asset described in that security agreement.

6. The Registry may not require evidence of the existence of the grantor's authorization.

Article 3. One notice sufficient for multiple security rights

The registration of a single notice may relate to security rights created by the grantor in favour of the secured creditor under one or more than one security agreement.

Article 4. Advance registration

A notice may be registered before the creation of a security right or the conclusion of a security agreement to which the notice relates.

---

[2] This provision will be necessary if the enacting State implements article 6, subparagraph 3 (d), of the draft Model Law.

[3] This wording will be necessary if the enacting State implements option A or option B of article 26 of the draft Model Registry-related Provisions.

Section B. Access to registry services

Article 5. Conditions for access to registry services

1. Any person may submit a notice to the Registry, if that person:

(a) Uses the prescribed registry notice form; [and]

(b) Identifies itself in the prescribed manner[; and

(c) Has paid or arranged to pay the prescribed fee].[4]

2. A person may submit an amendment or cancellation notice if that person also [satisfies the secure access requirements to be specified by the Registry].

3. Any person may submit a search request to the Registry, if that person:

(a) Uses the prescribed registry search request form[; and

(b) Has paid or arranged to pay the prescribed fee].

4. If access is refused, the Registry must communicate the reason to the registrant or searcher without delay.

[*Note to the Commission: The Commission may wish to consider whether article 5 should include a paragraph along the lines of article 6, paragraph 3, which could read along the following lines: "Except if a person does not comply with the requirements of paragraph 1 or 2, the Registry may not refuse access."*]

Article 6. Rejection of the registration of a notice or a search request

1. The Registry must reject the registration of:

(a) A notice if no information or no legible information is entered in one or more of the mandatory designated fields; or

(b) An amendment notice to extend the period of effectiveness of the registration of a notice if it is not submitted within the period referred to in article 14, paragraph 2, of these Provisions.

2. The Registry must reject a search request if no information or no legible information is entered in at least one of the mandatory fields designated for entering a search criterion.

3. Except as provided in paragraph 1 or 2, the Registry may not reject the registration of a notice or a search request.

4. If the registration of a notice or a search request is rejected, the Registry must communicate the reason to the registrant or searcher without delay.

Article 7. Information about the registrant's identity and scrutiny of the form or contents of the notice by the Registry

1. The Registry must maintain information about the registrant's identity submitted in accordance with article 5, subparagraph 1(b), of these Provisions, and must, upon request, provide that information to the person identified in a registered notice as the grantor.

2. The Registry may not require verification of the information about the registrant's identity submitted in accordance with article 5, subparagraph 1(b), of these Provisions.

3. The Registry may not scrutinize the form or content of a notice or a search request other than to the extent authorized in articles 5 and 6 of these Provisions.

[4] The bracketed wording in this provision will be necessary if the enacting State implements option A of article 33 of the draft Model Registry-related Provisions.

Section C. Registration of a notice

Article 8. Information required in an initial notice

An initial notice must contain the following information in the relevant designated field:

(a) The identifier and address of the grantor [and any additional information that the enacting State may decide to require to be entered to assist in uniquely identifying the grantor] in accordance with article 9 of these Provisions;

(b) The identifier and address of the secured creditor or its representative in accordance with article 10 of these Provisions; [and]

(c) A description of the encumbered assets in accordance with article 11 of these Provisions;

[(d) The period of effectiveness of the registration in accordance with article 14 of these Provisions];[5] [and]

[(e) A statement of the maximum amount for which the security right may be enforced.][6]

Article 9. Grantor identifier

1. Where the person to be identified in an initial or amendment notice as the grantor is a natural person, the grantor identifier is the name of that person as it appears in [the relevant official document to be specified by the enacting State; if the enacting State specifies more than one document, it must designate the order in which each document should be used to determine that person's name].

2. [The enacting State should specify which components of the grantor's name determined in accordance with paragraph 1 must be entered in an initial or amendment notice].

3. [The enacting State should specify the manner in which the grantor's name is determined if the name is legally changed after the issuance of the relevant document referred to in paragraph 1.]

4. Where the person to be identified in an initial or amendment notice as the grantor is a legal person, the grantor identifier is the name of that person as it appears in [the relevant document, law or decree to be specified by the enacting State] constituting that person.

5. [The enacting State should specify whether additional information must be entered in an initial or amendment notice in special cases, such as where the grantor is subject to insolvency proceedings, a trustee, or a representative of the estate of a deceased person.]

Article 10. Secured creditor identifier

1. Where the person to be identified in an initial or amendment notice as the secured creditor is a natural person, the secured creditor identifier is the name of that person as it appears in [the relevant official document to be specified by the enacting State; if the enacting State specifies more than one document, it must designate the order in which each document should be used to determine that person's name].

2. Where the person to be identified in an initial or amendment notice as the secured creditor is a legal person, the secured creditor identifier is the name of that person as it appears in [the relevant document, law or decree to be specified by the enacting State] constituting that person.

---

[5] This provision will be necessary, if the enacting State implements option B or option C of article 14 of the draft Model Registry-related Provisions.

[6] This provision will be necessary if the enacting State includes in its law article 6, subparagraph 3 (d), of the draft Model Law.

3. [The enacting State should specify whether additional information must be entered in an initial or amendment notice in special cases, such as where the secured creditor is subject to insolvency proceedings, a trustee, or a representative of the estate of a deceased person.]

Article 11. Description of encumbered assets

1. The assets encumbered or to be encumbered must be described in an initial or amendment notice in a manner that reasonably allows their identification.

2. A description that indicates that the encumbered assets consist of all of the grantor's movable assets, or of all of the grantor's movable assets within a particular category, satisfies the standard in paragraph 1.

Article 12. Language of information in a notice

1. With the exception of the names and addresses of the grantor and the secured creditor or its representative, the information contained in an initial or amendment notice must be expressed in [the language or languages to be specified by the enacting State].

2. The information contained in an initial or amendment notice must be expressed in the character set prescribed and publicized by the Registry.

Article 13. Time of effectiveness of the registration of a notice

1. The registration of an initial or amendment notice is effective from the date and time when the information in the notice is entered into the registry record so as to be accessible to searchers of the public registry record.

2. The Registry must enter information in an initial or amendment notice into the public registry record without delay after the notice is submitted and in the order in which each notice is submitted.

3. The Registry must record the date and time when the information in an initial or amendment notice is entered into the registry record so as to be accessible to searchers of the public registry record.

Option A[7]

4. The registration of a cancellation notice is effective from the date and time when the information in the notice to which it relates is no longer accessible to searchers of the public registry record.

Option B[8]

4. The registration of a cancellation notice is effective from the date and time when the information in the notice is entered into the registry record so as to be accessible to searchers of the public registry record.

Option A[9]

5. The Registry must record the date and time when the information in the initial or amendment notice to which a cancellation notice relates is no longer accessible to searchers of the public registry record.

---

[7] This provision will be necessary, if the enacting State implements option A or option B of article 21 of the draft Registry-related Provisions.

[8] This provision will be necessary, if the enacting State implements option C or option D of article 21 of the draft Registry-related Provisions.

[9] This provision will be necessary, if the enacting State implements option A of paragraph 4 of this article.

Option B[10]

5. The Registry must record the date and time when the information in a cancellation notice is entered into the registry record so as to be accessible to searchers of the public registry record.

Article 14. Period of effectiveness of the registration of a notice

Option A

1. The registration of an initial notice is effective for [a period of time to be specified by the enacting State].

2. The period of effectiveness of the registration of an initial notice may be extended within [a period of time to be specified by the enacting State] before its expiry by the registration of an amendment notice providing for an extension.

3. The period of effectiveness of the registration of an initial notice may be extended more than once.

4. The registration of an amendment notice in accordance with paragraph 2 extends the period of effectiveness for the period referred to in paragraph 1 beginning from the time the current period would have expired if the amendment notice had not been registered.

Option B

1. The registration of an initial notice is effective for the period of time indicated by the registrant in the designated field of the notice.

2. The period of effectiveness of the registration of an initial notice may be extended at any time before its expiry by the registration of an amendment notice that indicates in the designated field a new period.

3. The period of effectiveness of the registration of an initial notice may be extended more than once.

4. The registration of an amendment notice in accordance with paragraph 2 extends the period of effectiveness for the period indicated in the amendment notice beginning from the time the current period would have expired if the amendment notice had not been registered.

Option C

1. The registration of an initial notice is effective for the period of time indicated by the registrant in the designated field of the notice, not exceeding [a maximum period of time to be specified by the enacting State].

2. The period of effectiveness of the registration of an initial notice may be extended within [a period of time to be specified by the enacting State] before its expiry by the registration of an amendment notice that indicates in the designated field a new period not exceeding the maximum period of time referred to in paragraph 1.

3. The period of effectiveness of the registration of an initial notice may be extended more than once.

4. The registration of an amendment notice in accordance with paragraph 2 extends the period of effectiveness for the period specified in the amendment notice beginning from the time the current period would have expired if the amendment notice had not been registered.

[10] This provision will be necessary, if the enacting State implements option B of paragraph 4 of this article.

Article 15. Obligation to send a copy of a registered notice

1. Without delay after the registration of a notice, the Registry must send to the person identified in the notice as the secured creditor at its address set forth in the notice a copy of the information in the registered notice, indicating:

(a) The date and time recorded by the Registry in accordance with article 13, paragraph 3, of these Provisions; and

(b) The registration number assigned to the initial notice by the Registry in accordance with article 28, paragraph 1, of these Provisions.

2. Within [a period to be specified by the enacting State] after the person identified in a registered notice as the secured creditor receives a copy of the information in the notice in accordance with paragraph 1, that person must send it to the person identified in the notice as the grantor:

(a) At the address set forth in the notice; or

(b) If that person knows that the address has changed, at the most recent address known to that person or an address reasonably available to that person.

3. The failure of a person to comply with its obligation in accordance with paragraph 2 does not affect the effectiveness of the registration of the related notice.

4. A person that fails to comply with its obligation in accordance with paragraph 2 is liable to the person identified in the notice as the grantor only for [a nominal amount to be specified by the enacting State] and any actual loss or damage proven to have resulted from that failure.

Section D. Registration of an amendment or cancellation notice

Article 16. Right to register an amendment or cancellation notice

1. Subject to paragraph 2, only the person identified in a registered initial notice as the secured creditor may register an amendment or cancellation notice relating to that notice.

2. After registration of an amendment notice changing the person identified in an initial or amendment notice as the secured creditor, only the person identified in the amendment notice as the new secured creditor may register an amendment or cancellation notice.

Article 17. Information required in an amendment notice

1. An amendment notice must contain in the relevant designated field:

(a) The registration number of the initial notice to which it relates; and

(b) The information to be added or changed.

2. An amendment notice may modify one or more than one item of information in the notice to which it relates.

Article 18. Global amendment of secured creditor information

Option A

A person may register a single amendment notice to amend its identifier, its address or both, in multiple registered notices in which that person is identified as the secured creditor.

Option B

The Registry must amend the identifier, address or both of a person identified as the secured creditor in multiple registered notices upon the request of that person.

Article 19. Information required in a cancellation notice

A cancellation notice must contain in the relevant designated field the registration number of the initial notice to which it relates.

Article 20. Compulsory registration of an amendment or cancellation notice

1. The secured creditor must register an amendment notice deleting encumbered assets described in a registered notice if:

(a) The grantor has not authorized the registration of a notice in relation to those assets and the secured creditor knows that the grantor will not authorize that registration; or

(b) The security agreement to which the registered notice relates has been revised to release those assets from the security right and the grantor has not otherwise authorized the registration of a notice covering those assets.

[2. The secured creditor must register an amendment notice reducing the maximum amount specified in a registered notice if:

(a) The grantor has authorized the registration of a notice only in the reduced amount and the secured creditor knows that the grantor will not authorize the registration the registration of a notice in the higher amount; or

(b) The security agreement to which the registered notice relates has been revised to reduce the maximum amount specified in that agreement and the grantor has not otherwise authorized the registration of a notice in that amount.][11]

[3]. The secured creditor must register a cancellation notice if:

(a) The registration of the initial notice was not authorized by the grantor: and

(i) The secured creditor knows that the grantor will not authorize the registration of the initial notice; or

(ii) The grantor requests the registration of the cancellation notice in accordance with paragraph 5;

(b) The registration of the initial notice was authorized by the grantor but the authorization has been withdrawn and no security agreement has been concluded; or

(c) The security right to which the initial notice relates has been extinguished.

[4.] The secured creditor may not charge or accept a fee or expense for complying with its obligation in accordance with subparagraph 1(a), [2(a)] or 3(a) and (b).

[5.] If the conditions set out in paragraph 1, 2 or 3 have been met, the grantor may request the secured creditor in writing, reasonably identifying itself and the related initial or amendment notice to register the appropriate amendment or cancellation notice and the secured creditor may not charge or accept any fee or expense for complying with the grantor's request.

[6.] If the secured creditor does not comply with the grantor's request made in accordance with paragraph 5 within [a short period of time to be specified by the enacting State] after its receipt, the grantor may seek an order for the registration of an amendment or cancellation notice through [a summary judicial or administrative procedure to be specified by the enacting State].

[7.] Where an order for the registration of an amendment or cancellation notice is issued in accordance with paragraph 6 the Registry must register the notice without delay [upon receipt of a request] with a copy of the relevant order] [upon the issuance of the relevant order].

[11] This provision will be necessary if the enacting State includes in its law article 6, subparagraph 3 (d), of the draft Model Law.

Article 21. Effectiveness of the registration of an amendment or cancellation notice not authorized by the secured creditor

Option A

The registration of an amendment or cancellation notice is effective regardless of whether it is authorized by the person entitled to register an amendment or cancellation notice in accordance with article 16 of these Provisions.

Option B

1. Subject to paragraph 2, the registration of an amendment or cancellation notice is effective regardless of whether it is authorized by the person entitled to register an amendment or cancellation notice in accordance with article 16 of these Provisions.

2. The unauthorized registration of an amendment or cancellation notice does not affect the priority of the security right to which the notice relates as against the right of a competing claimant which arose before the registration and over which the security right had priority before the registration.

Option C

The registration of an amendment or cancellation notice is ineffective unless authorized by the person entitled to register an amendment or cancellation notice in accordance with article 16 of these Provisions.

Option D

1. Subject to paragraph 2, the registration of an amendment or cancellation notice is ineffective unless authorized by the person entitled to register an amendment or cancellation notice in accordance with article 16 of these Provisions.

2. The unauthorized registration of an amendment or cancellation notice is effective against a competing claimant whose right was acquired in reliance on a search of the registry record made after the registration of the amendment or cancellation notice, provided that the competing claimant did not have knowledge that the registration was unauthorized at the time it acquired its right.

Section E. Searches

Article 22. Search criteria

A search of the public registry record may be conducted according to:

(a) The identifier of the grantor; or

(b) The registration number of the initial notice.

Article 23. Search results

1. Upon submission of a search request, the Registry must provide a search result that indicates the date and time when the search was performed and:

Option A

(a) Sets forth all information in each registered notice that contains information matching the search criterion exactly; or

(b) Indicates that no registered notice contains information matching the search criterion exactly.

Option B

(a) Sets forth all information in each registered notice that contains information matching the search criterion:

(i) Exactly; or

(ii) Where the search criterion is the grantor identifier, closely [under criteria to be specified by the enacting State];

(b) Indicates that no registered notice contains information matching the search criterion:

(i) Exactly; or

(ii) Where the search criterion is the grantor identifier, closely [under criteria to be specified by the enacting State].

2. Upon request by a searcher, the Registry must issue an official search certificate setting out the search result and certifying that it was issued by the Registry.

3. A written search result that purports to have been issued by the Registry is proof of its contents in the absence of evidence to the contrary.

Section F. Errors and post-registration changes

Article 24. Registrant errors in required information

1. An error in the grantor identifier entered in an initial or amendment notice does not render the registration of the notice ineffective if the information in the notice would be retrieved by a search of the public registry record using the grantor's correct identifier as the search criterion.

[2. An error in the grantor identifier entered in an initial or amendment notice does not render the registration of the notice ineffective if the information in the notice would be retrieved as a close match [under criteria to be specified by the enacting State] by a search of the public registry record using the grantor's correct identifier as the search criterion, unless the error would seriously mislead a reasonable searcher.][12]

[3.] An error in the grantor identifier that renders the registration of notice ineffective with respect to that grantor in accordance with paragraph 1 or 2 does not render the registration of the notice ineffective with respect to other grantors correctly identified in the notice.

[4.] An error in information required to be entered in an initial or amendment notice other than the grantor's identifier does not render the registration ineffective unless the error would seriously mislead a reasonable searcher.

[5.] An error in the description of an encumbered asset that renders the registration of a notice ineffective with respect to that asset in accordance with paragraph 4 does not render the registration of the notice ineffective with respect to other encumbered assets sufficiently described in the notice.

[6.] Notwithstanding paragraph 4, an error in the period of effectiveness of registration[13] [or the maximum amount for which the security right may be enforced][14] entered in an initial or amendment notice, does not render the registration of the notice ineffective, except to the extent it seriously misled third parties that relied on the erroneous information in the registered notice.

[*Note to the Commission: The Commission may wish to consider the words "except to the extent it seriously misled third parties that relied on the information set out in the notice" in paragraph 6. As explained in the Registry Guide (see paras. 215 and 217-220), as a practical matter, third-party searchers may not be misled or prejudiced by reliance on an erroneous indication of the duration of registration or an erroneous indication of the maximum amount in a registered notice (see Registry Guide, paras. 215 and 217-220). For example, if the period of effectiveness stated in the notice was too long, third-party searchers would not be prejudiced, as they would still have been alerted to the fact that a security right*

[12] This provision will be necessary if the enacting State implements option B of article 23 of the draft Model Registry-related Provisions.

[13] This provision will be necessary, if the enacting State implements option B or option C of article 14 of the draft Model Registry-related Provisions.

[14] This provision will be necessary, if the enacting State implements article 8, subparagraph (e), of the draft Model Registry-related Provisions.

might exist (although the grantor would have the right to have the record corrected). If the period of effectiveness was too short, again third-party searchers would not be prejudiced, as the registration would lapse at the end of the specified period and the security right would no longer be effective against third parties, unless the registration was renewed before the lapse.]

Article 25. Post-registration change of grantor identifier

1. Subject to paragraph 2, if the grantor's identifier changes after a notice is registered, the security right to which the notice relates remains effective against third parties and retains the priority it had over the rights of competing claimants before the change.

2. If the grantor's identifier changes after a notice is registered, and the secured creditor does not register an amendment notice adding the new identifier of the grantor before the expiry of [a short period of time to be specified by the enacting State] after the change, the security right to which the notice relates is:

(a) Ineffective against a person to whom the grantor sells or otherwise transfers, leases or licenses the encumbered asset after the change in the grantor's identifier and before the registration of the amendment notice; and

(b) Subordinate to a security right created by the grantor that is made effective against third parties during the period referred to in subparagraph (a).

Article 26. Post-registration transfer of an encumbered asset

Option A

1. Subject to paragraph 2, if a security right in an encumbered asset has been made effective against third parties by registration of a notice and the encumbered asset is sold or otherwise transferred to a transferee that acquires its rights subject to the security right in accordance with article 32 of this Law, the security right remains effective against third parties and retains the priority it had over the rights of competing claimants before the transfer.

2. If an encumbered asset is sold or otherwise transferred in the circumstances referred to in paragraph 1, and the secured creditor does not register an amendment notice adding the transferee, or, in the case of successive transfers, the most recent transferee, as a new grantor before the expiry of [a period of time to be specified by the enacting State] after the transfer, the security right is:

(a) Ineffective against the right of a person to whom the transferee sells or otherwise transfers, leases or licenses the encumbered asset after the transfer and before the registration of the amendment notice; and

(b) Subordinate to a security right created by the transferee that is made effective against third parties during the period referred to in subparagraph (a).

3. A security right in intellectual property that has been made effective against third parties by registration of a notice remains effective against third parties and retains its priority notwithstanding a transfer of the encumbered asset covered by the notice.

Option B

1. Subject to paragraph 2, if a security right in an encumbered asset has been made effective against third parties by registration of a notice and the encumbered asset is sold or otherwise transferred to a transferee that acquires its rights subject to the security right in accordance with article 32 of this Law, the security right remains effective against third parties and retains the priority it otherwise has over the rights of competing claimants before the transfer.

2. If an encumbered asset is sold or otherwise transferred in the circumstances referred to in paragraph 1, and the secured creditor does not register an amendment notice adding the transferee or, in the case of successive transfers, the most recent transferee, as a new grantor before the expiry of [enacting State to specify a period of time] after the secured creditor acquires knowledge of the transfer, the security right is:

(a) Ineffective against the right of a person to whom the transferee sells or otherwise transfers, leases or licenses the encumbered asset after the secured creditor acquires knowledge of the transfer and before it registers the amendment notice; and

(b) Subordinate to a security right granted by the transferee that is made effective against third parties in the period referred to in subparagraph (a).

3. A security right in intellectual property that has been made effective against third parties by registration of a notice remains effective against third parties and retains its priority notwithstanding a transfer of the encumbered asset covered by the notice.

Option C

A security right in an encumbered asset that was made effective against third parties by registration of a notice remains effective against third parties and retains whatever priority it otherwise has over the rights of competing claimants notwithstanding that the encumbered asset is sold or otherwise transferred by the grantor to a transferee that acquires its right subject to the security right in accordance with article 32 of this Law.

Section G. Organization of the Registry and the registry record

Article 27. Appointment of the registrar

The [the appropriate authority to be specified by the enacting State] is authorized to appoint and dismiss the registrar, and determine the registrar's duties and monitor their performance.

Article 28. Organization of information in the registry record

1. The Registry must assign a registration number to an initial notice and organize the registry record so that all registered amendment and cancellation notices that contain that number are associated with the initial notice in the registry record.

2. The Registry must organize the registry record so that the information in a registered initial notice and in any associated registered notice can be retrieved:

Option A[15]

As an exact match by a searcher of the registry record that uses the correct identifier of the grantor as the search criterion.

Option B[16]

As an exact match or as a close match by a searcher of the registry record that uses the correct identifier of the grantor as the search criterion.

Option A[17]

3. The Registry must organize the registry record so that a person may register a single amendment notice to amend its identifier, address or both in multiple registered notices in which that person is identified as the secured creditor.

[15] This provision will be necessary, if the enacting State implements option A of article 23, paragraph 1, of the draft Model Registry-related Provisions.

[16] This provision will be necessary, if the enacting State implements option B of article 23, paragraph 1, of the draft Model Registry-related Provisions.

[17] This provision will be necessary, if the enacting State implements option A of article 18 of the draft Model Registry-related Provisions.

Option B[18]

3. The Registry must organize the registry record so that it may amend the identifier, address or both of a person identified as the secured creditor in multiple registered notices upon the request of that person.

4. Upon registration of an amendment or cancellation notice, the Registry may not amend or remove information contained in any associated registered notice from the registry record.

Article 29. Integrity of information in the registry record

1. Except as provided in articles 30 and 31 of these Provisions, the Registry may not amend or remove information contained in a registered notice from the registry record.

2. The Registry must preserve all information contained in the registry record and reconstruct the registry record in the event of loss or damage.

Article 30. Removal of information from the public registry record and archival

Option A

1. The Registry must remove information in a registered notice from the public registry record upon the expiry of the period of effectiveness of the registration of a notice in accordance with article 14 or upon the registration of a cancellation notice in accordance with article 19 or 20 of these Provisions.[19]

Option B

1. The Registry must remove information in a registered notice from the public registry record upon the expiry of the period of effectiveness of the registration of a notice in accordance with article 14 of these Provisions.[20]

2. Except as provided in paragraph 1, the Registry may not remove information contained in a registered notice from the public registry record.

3. The Registry must archive information removed from the public registry record in accordance with paragraph 1 for [a period of time to be specified by the enacting State that is at least co-extensive with its prescription period for rights arising from a security agreement under contract or property law] in a manner that enables the information to be retrieved by the Registry in accordance with article 28 of these Provisions.

Article 31. Correction of errors made by the Registry

1. Without delay after discovering that [it made an error or omission in entering into the public registry record the information contained in a notice submitted for registration or][21] erroneously removed from the public registry record information contained in a registered notice, the Registry must

Option A

[register a notice to correct the error or omission, or] restore the erroneously removed information, and send a copy of the information in the registered notice to the person identified in the notice as the secured creditor.

---

[18] This provision will be necessary, if the enacting State implements option B of article 18 of the draft Model Registry-related Provisions.

[19] This provision will be necessary if a State implements option A or B of article 21 of the draft Model Registry-related Provisions.

[20] This provision will be necessary if a State implements option C or D of article 21 of the draft Model Registry-related Provisions.

[21] The bracketed wording in this provision will be necessary if a State has a Registry that is not fully electronic.

Option B

inform the person identified in the registered notice as the secured creditor so as to enable that person to [register a notice to correct the error or omission or] restore the erroneously removed information.

Option A

2. The registration of a notice referred to in paragraph 1 is effective as of the time the information in the notice becomes accessible to searchers of the public registry record.

Option B

2. The registration of a notice referred to in paragraph 1 is effective as of the time the information in the notice becomes accessible to searchers of the public registry record.

3. Notwithstanding paragraph 1, the security right to which the notice relates has the priority it would otherwise have had over the right of a competing claimant but for [the Registry's error or omission or] the Registry's erroneous removal of the information.

Option C

The registration of a notice referred to in paragraph 1 is effective as of the time it would have been effective if [the error or omission had never been made or] the information had never been erroneously removed.

Option D

1. The registration of a notice referred to in paragraph 1 is effective as of the time it would have been effective if [the error or omission had never been made or] the information had never been erroneously removed.

2. Notwithstanding paragraph 1, the security right to which the notice relates is subordinate to the right of a competing claimant that acquired a right in the encumbered asset in reliance on a search of the public registry record made before the notice was registered, provided the competing claimant did not have knowledge of [the error or omission or] the erroneous removal of the information at the time it acquired its right.

Article 32. Limitation of liability of the Registry

Option A

1. Any liability that the Registry may have in accordance with other law is limited to loss or damage caused by:

(a) An error or omission in a search result issued to a searcher or in a copy of information in a registered notice sent to a secured creditor in accordance with article 15, paragraph 1; [and]

(b) [An error or omission in entering or failing to enter information in a notice submitted to the Registry into the public registry record or] the erroneous removal of information in the registered notice from the public registry record;

(c) The failure of the Registry to send a copy of the registered notice to the person identified in the notice as the secured creditor in accordance with article 15, paragraph 1, and article 31, paragraph 1, of these Provisions; and

(d) The provision of false or misleading information to a registrant or searcher.

2. Any liability that a State may have in accordance with paragraph 1 is limited to [a maximum amount to be specified by the enacting State].

Option B

Any liability that the Registry may have in accordance with other law for loss or damage caused by an error or omission in the administration or operation of the Registry is limited to [a maximum amount to be specified by the enacting State].

Option C

The Registry is not liable for loss or damage caused to a person by an error or omission in the administration or operation of the Registry.

Article 33. Registry fees

Option A

1. Fees may be charged for [the Registry services and in the amounts to be specified by the enacting State].

2. The [authority to be specified by the enacting State pursuant to article 27 of these Provisions] may modify the fee schedule from time to time.

3. The Registry must publicize the fee schedule.

4. The Registry may enter into an account agreement with any person to facilitate the registration process, including the payment of registry fees.

Option B

The Registry may not charge any fee for its services.

(A/CN.9/884/Add.2) (Original: English)

Note by the Secretariat on a draft model law on secured transactions

ADDENDUM

Contents

Chapter V. Priority of a security right

A. General rules

Article 28. Competing security rights

1. Subject to articles 29-40, priority among competing security rights created by the same grantor in the same encumbered asset is determined according to the order of third-party effectiveness.

2. Subject to [article 26 of the Model Registry-related Provisions] and articles 29-40, priority among competing security rights created by different grantors in the same encumbered asset is determined according to the order of third-party effectiveness.

3. The priority of a security right with respect to which a notice has been registered in the Registry before the conclusion of a security agreement or, in the case of a security right in a future asset, before the grantor acquires rights in the asset or the power to encumber it, is determined according to the time of registration.

Article 29. Competing security rights in the case of a change in the method of third-party effectiveness

The priority of a security right is not affected by a change in the method by which it is made effective against third parties, provided that there is no time period during which the security right is not effective against third parties.

Article 30. Competing security rights in proceeds

If a security right in proceeds of an encumbered asset is effective against third parties as provided in article 19, the priority of the security right in the proceeds is the same as the priority of the security right in that asset.

Article 31. Competing security rights in tangible assets commingled in a mass or product

1. If two or more security rights in the same tangible asset continue in a mass or product as provided in article 11 and each security right is effective against third parties, the priority of each security right in the mass or product is the same as its priority in that asset immediately before the asset became part of the mass or product.

2. If security rights in separate tangible assets continue in the same mass or product and each security right is effective against third parties, the secured creditors are entitled to share in the aggregate maximum value of their security rights in the mass or product according to the ratio of the value of those security rights.

3. For the purposes of paragraph 2, the maximum value of a security right is the lesser of the value determined in accordance with article 11 and the amount of the secured obligation.

Article 32. Security rights competing with rights of buyers or other transferees, lessees or licensees of an encumbered asset

1. If an encumbered asset is sold or otherwise transferred, leased or licensed while the security right in that asset is effective against third parties, the buyer or other transferee, lessee or licensee acquires its rights subject to the security right except as provided in this article.

2. A buyer or other transferee of an encumbered asset acquires its rights free of the security right, if the secured creditor authorizes the sale or other transfer of the asset free of the security right.

3. The rights of a lessee or licensee of an encumbered asset are not affected by a security right if the secured creditor authorizes the grantor to lease or license the asset unaffected by the security right.

4. A buyer of a tangible encumbered asset sold in the ordinary course of the seller's business acquires its rights free of the security right, provided that, at the time of the

conclusion of the sale agreement, the buyer does not have knowledge that the sale violates the rights of the secured creditor under the security agreement.

5. The rights of a lessee of a tangible encumbered asset leased in the ordinary course of the lessor's business are not affected by the security right, provided that, at the time of the conclusion of the lease agreement, the lessee does not have knowledge that the lease violates the rights of the secured creditor under the security agreement.

6. Subject to the rights of a secured creditor with a security right in intellectual property in accordance with article 48, the rights of a non-exclusive licensee of an intangible encumbered asset licensed in the ordinary course of the licensor's business are not affected by the security right, provided that, at the time of the conclusion of the licence agreement, the licensee does not have knowledge that the licence violates the rights of the secured creditor under the security agreement.

7. If a buyer or other transferee of a tangible encumbered asset acquires its rights free of a security right, any subsequent buyer or other transferee also acquires its rights free of that security right.

8. If the rights of a lessee of a tangible encumbered asset or licensee of an intangible encumbered asset are not affected by the security right, the rights of any sub-lessee or sub-licensee are also unaffected by that security right.

Article 33. Impact of the grantor's insolvency on the priority of a security right

A security right that is effective against third parties under this Law at the time of the commencement of insolvency proceedings in respect of the grantor remains effective against third parties and retains the priority it had before the commencement of the insolvency proceedings, unless another claim has priority pursuant to [the insolvency law to be specified by the enacting State].

Article 34. Security rights competing with preferential claims

The following claims arising by operation of other law have priority over a security right that is effective against third parties but only up to [the enacting State to specify the amount for each category of claim]:

(a) […];

(b) […].[1]

Article 35. Security rights competing with rights of judgement creditors

1. Subject to the rights of acquisition secured creditors in accordance with article 38, the right of a creditor that has obtained a judgement or provisional order ("judgement creditor") has priority over a security right if, before the security right is made effective against third parties, the judgement creditor [has taken the steps to be specified by the enacting State for a judgement creditor to acquire rights in the encumbered asset or the steps referred to in the relevant provisions of other law to be specified by the enacting State].

2. If a security right is made effective against third parties before [or at the same time] the judgement creditor acquires its right in an encumbered asset by taking the steps referred to in paragraph 1, the security right has priority but that priority is limited to the greater of the credit extended by the secured creditor:

(a) Within [a short period of time to be specified by the enacting State] from or before the time when the secured creditor received a notice from the judgement creditor that the judgement creditor has taken the steps referred to in paragraph 1; or

(b) Pursuant to an irrevocable commitment of the secured creditor to extend credit in a fixed amount or an amount to be fixed pursuant to a specified formula, if the

[1] This provision will not need to be implemented if the enacting State does not have any preferential claims.

commitment was made before the secured creditor received a notice from the judgement creditor that the judgement creditor had taken the steps referred to in paragraph 1.

[*Note to the Commission: The Commission may wish to note that, in the case of future assets, a security right is created and thus made effective against third parties when the grantor acquires rights in the assets or the power to encumber them (see art. 6, para. 2). Thus, the time when a security right becomes effective in future assets may coincide with the time when a judgement creditor takes the steps referred to in paragraph 1. The Commission may wish to consider whether this issue should be addressed and, if so, how and where, in the draft Model Law or in the draft Guide to Enactment (see bracketed text in art. 35, para. 2).*]

Article 36. Non-acquisition security rights competing with acquisition security rights[2]

Option A[3]

1. An acquisition security right in assets other than inventory, consumer goods, and intellectual property or rights of a licensee under a licence of intellectual property that are held by the grantor for sale or licence in the ordinary course of the grantor's business or that are used or intended to be used by the grantor primarily for personal, family or household purposes has priority over a competing non-acquisition security right created by the grantor, provided that:

(a) The acquisition secured creditor is in possession of the assets other than inventory or consumer goods, or the agreement for the sale or licence of intellectual property has been concluded; or

(b) A notice with respect to the acquisition security right is registered in the Registry not later than the expiry of [a short period of time to be specified by the enacting State] after the grantor obtains possession of the assets other than inventory or consumer goods, or the agreement for the sale or licence of intellectual property has been concluded.

2. An acquisition security right in inventory and intellectual property or rights of a licensee under a licence of intellectual property that are held by the grantor for sale or licence in the ordinary course of the grantor's business has priority over a competing non-acquisition security right created by the grantor, provided that:

(a) The acquisition secured creditor is in possession of the inventory, or the agreement for the sale or licence of intellectual property has been concluded; or

(b) Before the grantor obtains possession of the inventory, or the agreement for the sale or licence of intellectual property has been concluded:

(i) A notice with respect to the acquisition security right is registered in the Registry; and

(ii) A notice that is sent by the acquisition secured creditor is received by the non-acquisition secured creditor that has registered a notice in the Registry with respect to a security right created by the grantor in an asset of the same kind, stating that the acquisition secured creditor has or intends to acquire an acquisition security right and describing the asset sufficiently to enable the non-acquisition secured creditor to identify the asset that is the object of the acquisition security right.

---

[2] This section includes the unitary-approach recommendations of the *Secured Transactions Guide*. If a State prefers to adopt the non-unitary approach recommendations, it may wish to consider implementing instead recommendations 187-202 of the *Secured Transactions Guide*. [In particular, States may wish to consider doing so if they have implemented regional legislation along the lines of Directive 2011/7/EU of the European Parliament and of the Council of 16 February 2011 on combating late payment in commercial transactions (the "Late Payment Directive"), article 9 of which, provides that "Member States shall provide in conformity with the applicable national provisions designated by private international law that the seller retains title to goods until they are fully paid for if a retention of title clause has been expressly agreed between the buyer and the seller before the delivery of the goods".]

[3] A State may adopt option A or option B of this article.

3. An acquisition security right in consumer goods and intellectual property or rights of a licensee under a licence of intellectual property that are used or intended to be used by the grantor primarily for personal, family or household purposes has priority over a competing non-acquisition security right created by the grantor in the same asset [provided that the goods are below [a value to be specified by the enacting State]].

4. A notice that is sent in accordance with subparagraph 2(b)(ii) may cover acquisition security rights under multiple transactions between the same parties without the need to identify each transaction and is sufficient only for security rights in assets of which the grantor obtains possession or which the grantor acquires not later than the expiry of [a period of time to be specified by the enacting State] after the notice is received.

Option B

1. An acquisition security right in assets other than consumer goods and intellectual property or rights of a licensee under a licence of intellectual property that are used or intended to be used by the grantor primarily for personal, family or household purposes has priority as against a competing non-acquisition security right created by the grantor, provided that:

(a) The acquisition secured creditor is in possession of the assets other than consumer goods, or the agreement for the sale or licence of intellectual property has been concluded; or

(b) A notice with respect to the acquisition security right is registered in the Registry not later than the expiry of [a short period of time to be specified by the enacting State] after the grantor obtains possession of the assets other than consumer goods, or the agreement for the sale or licence of intellectual property has been concluded.

2. An acquisition security right in consumer goods and intellectual property or rights of a licensee under a licence of intellectual property that are used or intended to be used by the grantor primarily for personal, family or household purposes has priority over a competing non-acquisition security right created by the grantor in the same asset.

[*Note to the Commission: The Commission may wish to note that the wording within square brackets in paragraph 3 of option A is intended to reflect the options of article 23*.]

Article 37. Competing acquisition security rights

1. Subject to paragraph 2, the priority between competing acquisition security rights is determined according to article 28.

2. An acquisition security right of a seller or lessor, or a licensor of intellectual property that was made effective against third parties not later than the expiry of the period specified in article 36, subparagraph 1(b) has priority over a competing acquisition security right of a secured creditor other than a seller or lessor, or a licensor of intellectual property.

Article 38. Acquisition security rights competing with the rights of judgement creditors

An acquisition security right that is made effective against third parties not later than the expiry of the period specified in article 36, subparagraph 1(b) has priority over the rights of a judgement creditor that would otherwise have priority under article 35.

Article 39. Acquisition security rights in proceeds[4]

Option A

1. In the case of an acquisition security right in assets other than inventory, consumer goods and intellectual property or rights of a licensee under a licence of intellectual property that is held by the grantor for sale or licence in the ordinary course of the grantor's business or that that is used or intended to be used by the grantor primarily for personal, family or

[4] A State may adopt option A of this article, if it adopts option A of article 36, or option B of this article, if it adopts option B of article 36.

household purposes, a security right in proceeds has the same priority as the acquisition security right.

2. In the case of an acquisition security right in inventory and intellectual property or rights of a licensee under a licence of intellectual property that is held by the grantor for sale or licence in the ordinary course of the grantor's business, a security right in proceeds has the same priority as the acquisition security right, except where the proceeds take the form of receivables, negotiable instruments, or rights to payment of funds credited to a bank account.

3. The priority of a security right in proceeds referred to in paragraph 2 is conditional on the acquisition secured creditor notifying non-acquisition secured creditors that have registered a notice in the Registry with respect to a security right created by the grantor in an asset of the same kind as the proceeds that, before the proceeds arose, the acquisition secured creditor registered a notice with respect to assets of the same kind as the proceeds in the Registry.

Option B

The priority of an acquisition security right in an asset in accordance with article 36 does not extend to its proceeds.

Article 40. Acquisition security rights in tangible assets commingled in a mass or product competing with non-acquisition security rights in the mass or product

An acquisition security right in a tangible asset that continues in a mass or product and is effective against third parties has priority over a non-acquisition security right granted by the same grantor in the mass or product.

Article 41. Subordination

1. A person may at any time subordinate the priority of its rights under this Law in favour of any existing or future competing claimant without the need for the beneficiary to be a party to the subordination.

2. Subordination does not affect the rights of competing claimants other than the person subordinating its priority and the beneficiary of the subordination.

Article 42. Future advances, future encumbered assets and maximum amount

1. Subject to the rights of judgement creditors under article 35, the priority of a security right extends to all secured obligations, including obligations incurred after the security right became effective against third parties.

2. The priority of a security right covers all encumbered assets described in a notice registered in the Registry, irrespective of whether they are acquired by the grantor or come into existence before or after the time of registration.

[3. The priority of the security right is limited to the maximum amount set out in the notice registered in the Registry.][5]

Article 43. Irrelevance of knowledge of the existence of a security right

Knowledge of the existence of a security right on the part of a secured creditor does not affect the priority of the security right under this Law.

[5] This provision will be necessary if the enacting State implements article 6, subparagraph 3(d), of the draft Model Law, and article 8, subparagraph (e), of the draft Model Registry-related Provisions.

B. Asset-specific rules

Article 44. Negotiable instruments

1. A security right in a negotiable instrument that is made effective against third parties by possession of the instrument has priority over a security right in the instrument that is made effective against third parties by registration of a notice in the Registry.

2. A buyer or other consensual transferee of an encumbered negotiable instrument acquires its rights free of the security right that is made effective against third parties by registration of a notice in the Registry if the buyer or other transferee:

(a) Qualifies as a [protected holder or other type of holder to be specified by the enacting State]; or

(b) [Takes possession of the negotiable instrument and gives value or takes any other act to be specified by the enacting State] without knowledge that the sale or other transfer is in violation of the rights of the secured creditor under the security agreement.

Article 45. Rights to payment of funds credited to a bank account

1. A security right in a right to payment of funds credited to a bank account that is made effective against third parties by the secured creditor becoming the account holder has priority over a competing security right that is made effective against third parties by any other method.

2. A security right in a right to payment of funds credited to a bank account with respect to which the secured creditor is the depositary institution has priority over a competing security right made effective against third parties by any method, except a security right that is made effective against third parties by the secured creditor becoming the account holder.

3. A security right in a right to payment of funds credited to a bank account that is made effective against third parties by a control agreement has priority over a competing security right except:

(a) A security right of the depositary institution; or

(b) A security right that is made effective against third parties by the secured creditor becoming the account holder.

4. The order of priority among competing security rights in a right to payment of funds credited to a bank account that are made effective against third parties by the conclusion of control agreements is determined on the basis of the time of conclusion of the control agreements.

5. A depositary institution's right under other law to set off obligations owed to it by the grantor against the grantor's right to payment of funds credited to a bank account maintained with the depositary institution has priority as against a security right in the right to payment of funds credited to the bank account, except a security right that is made effective against third parties by the secured creditor becoming the account holder.

6. A transferee of funds from a bank account pursuant to a transfer initiated or authorized by the grantor acquires its rights free of a security right in the right to payment of funds credited to the bank account, unless the transferee has knowledge that the transfer violates the rights of the secured creditor under the security agreement.

7. Paragraph 6 does not adversely affect the rights of transferees of funds from bank accounts under [the relevant law to be specified by the enacting State].

Article 46. Money

1. A transferee that obtains possession of money that is subject to a security right acquires its rights free of the security right, unless that person has knowledge that the transfer violates the rights of the secured creditor under the security agreement.

2. This article does not adversely affect the rights of persons in possession of money under [the relevant law to be specified by the enacting State].

Article 47. Negotiable documents and tangible assets covered by negotiable documents

1. Subject to paragraph 2, a security right in a tangible asset made effective against third parties by possession of the negotiable document covering that asset has priority over a competing security right made effective against third parties by any other method.

2. Paragraph 1 does not apply to a security right in a tangible asset other than inventory if the security right of the secured creditor not in possession of the negotiable document was made effective against third parties before the earlier of:

(a) The time that the asset became covered by the negotiable document; and

(b) The time of conclusion of an agreement between the grantor and the secured creditor in possession of the negotiable document providing for the asset to be covered by a negotiable document so long as the asset became so covered within [a short period of time to be specified by the enacting State] from the date of the agreement.

3. A transferee of an encumbered negotiable document that obtains possession of the document under [the relevant law to be specified by the enacting State under which certain transferees of negotiable documents acquire their rights free of competing claims] acquires its rights free of a security right in the negotiable document and the tangible assets covered thereby that is made effective against third parties by any other method.

Article 48. Intellectual property

Article 32, paragraph 6, does not affect any rights that a secured creditor may have as an owner or licensor of intellectual property under [the relevant law relating to intellectual property to be specified by the enacting State].

Article 49. Non-intermediated securities

1. A security right in certificated non-intermediated securities made effective against third parties by the secured creditor's possession of the certificate has priority over a competing security right created by the same grantor in the same securities made effective against third parties by registration of a notice in the Registry.

2. A security right in uncertificated non-intermediated securities made effective against third parties by [[a notation of the security right] [entry of the name of the secured creditor as the holder of the securities][6] in the books maintained for that purpose by or on behalf of the issuer] has priority over a security right in the same securities made effective against third parties by any other method.

3. A security right in uncertificated non-intermediated securities made effective against third parties by the conclusion of a control agreement has priority over a security right in the same securities made effective against third parties by registration of a notice in the Registry.

4. The order of priority among competing security rights in uncertificated non-intermediated securities that are made effective against third parties by the conclusion of control agreements is determined on the basis of the time of conclusion of the control agreements.

5. This article does not adversely affect the rights of holders of non-intermediated securities under [the relevant law relating to the transfer of securities to be specified by the enacting State].

[*Note to the Commission: The Commission may wish to note that articles 44, paragraph 2, and 47, paragraph 3, while referring to other law for the terminology to be used, provide a substantive rule for transferees of encumbered negotiable instruments and negotiable documents to acquire their rights free of the security right, while article 49, paragraph 5, essentially refers the matter to other law. The Commission may thus wish to either consider following the same approach with respect to all three types of paper or, at*

[6] The enacting State may wish to insert here the method it chose in article 26.

least, reach an understanding as to how the draft Guide to Enactment should explain the different approaches followed.]

(A/CN.9/884/Add.3) (Original: English)

Note by the Secretariat on a draft model law on secured transactions

ADDENDUM

Contents

Chapter VI. Rights and obligations of the parties and third-party obligors

Section I. Mutual rights and obligations of the parties to a security agreement

A. General rules

Article 50. Sources of mutual rights and obligations of the parties

1. The mutual rights and obligations of the grantor and the secured creditor arising from their agreement are determined by the terms and conditions set forth in that agreement, including any rules or general conditions referred to therein.

2. The grantor and the secured creditor are bound by any usage to which they have agreed and, unless otherwise agreed, by any practices they have established between themselves.

Article 51. Obligation of the party in possession to exercise reasonable care

A grantor or secured creditor in possession of an encumbered asset must exercise reasonable care to preserve the asset and its value.

Article 52. Obligation of a secured creditor to return an encumbered asset

Upon extinction of a security right in an encumbered asset, a secured creditor in possession must return the asset to the grantor.

Article 53. Right of a secured creditor to use and inspect an encumbered asset, and to be reimbursed for expenses

1. A secured creditor in possession of an encumbered asset has the right:

(a) To be reimbursed for reasonable expenses it incurs for the preservation of the asset and its value in accordance with article 51;

(b) To make reasonable use of the asset and apply the revenues it generates to the payment of the secured obligation.

2. A secured creditor not in possession has the right to inspect an encumbered asset in the possession of the grantor.

Article 54. Right of the grantor to obtain information

1. Within [a short period of time to be specified by the enacting State] after receipt of a request by a grantor, a secured creditor other than a transferee in an outright transfer of a receivable must send to the grantor at the address specified in the request:

(a) A statement of the obligation currently secured; and

(b) A description of the assets currently encumbered.

2. A grantor is entitled without charge to one response to a request during [a period of time to be specified by the enacting State].

3. The secured creditor may require payment of a charge not exceeding [a nominal amount to be specified by the enacting State] for each additional response.

B. Asset-specific rules

Article 55. Representations of the grantor of a security right in a receivable

1. At the time of conclusion of a security agreement that creates a security right in a receivable, the grantor represents that:

(a) The grantor has not previously created a security right in the receivable in favour of another secured creditor; and

(b) The debtor of the receivable does not and will not have any defences or rights of set-off.

2. The grantor does not represent that the debtor of the receivable has, or will have, the ability to pay.

Article 56. Right of the grantor or the secured creditor to notify the debtor of the receivable

1. The grantor or the secured creditor or both may give the debtor of the receivable notification of the security right and a payment instruction, but after notification of the security right has been received by the debtor of the receivable only the secured creditor may send a payment instruction.

2. Notification of a security right or of a payment instruction sent in breach of an agreement between the grantor and the secured creditor is not ineffective for the purposes of article 61, but nothing in this article affects any obligation or liability of the party in breach for any damages arising as a result of the breach.

Article 57. Right of the secured creditor to payment of a receivable

1. As between the grantor of a security right in a receivable and the secured creditor, whether or not notification of the security right has been sent:

(a) If payment is made to the secured creditor or a tangible asset is returned to the grantor with respect to the receivable, the secured creditor is entitled to retain the proceeds of the payment and to delivery of the asset;

(b) If payment is made or a tangible asset is returned to the grantor with respect to the receivable, the secured creditor is entitled to payment of the proceeds of the payment and to delivery of the asset; and

(c) If payment is made to another person over whom the secured creditor has priority or a tangible asset is returned to the grantor with respect to the receivable, the secured creditor is entitled to payment of the proceeds of the payment and to delivery of the asset.

2. The secured creditor may not retain more than the value of its right in the receivable.

Article 58. Right of the secured creditor to preserve encumbered intellectual property

If so agreed between the grantor and the secured creditor, the secured creditor is entitled to [the enacting State to specify the steps necessary to preserve encumbered intellectual property].

Section II. Asset-specific rules: Rights and obligations of third-party obligors

A. Receivables

Article 59. Protection of the debtor of the receivable

1. Except as otherwise provided in this Law, the creation of a security right in a receivable does not, without the consent of the debtor of the receivable, affect its rights and obligations, including the payment terms contained in the contract giving rise to the receivable.

2. A payment instruction may change the person, address or account to which the debtor of the receivable is required to make payment, but may not change:

(a) The currency of payment specified in the original contract; or

(b) The State specified in the original contract in which payment is to be made to a State other than that in which the debtor of the receivable is located.

Article 60. Notification of a security right in a receivable

1. Notification of a security right in a receivable or a payment instruction is effective when received by the debtor of the receivable if it reasonably identifies the encumbered receivable and the secured creditor, and is in a language that is reasonably expected to inform the debtor of the receivable about its contents.

2. It is sufficient if a notification of the security right or a payment instruction is in the language of the contract giving rise to the receivable.

3. Notification of a security right in a receivable or a payment instruction may relate to receivables arising after notification.

4. Notification of a subsequent security right in a receivable constitutes notification of all prior security rights.

Article 61. Discharge of the debtor of the receivable by payment

1. Until the debtor of the receivable receives notification of a security right in a receivable, it is discharged by paying in accordance with the original contract.

2. After the debtor of the receivable receives notification of a security right in a receivable, subject to paragraphs 3-8, it is discharged only by paying the secured creditor or, if otherwise instructed in the notification or subsequently by the secured creditor in a writing received by the debtor of the receivable, in accordance with the payment instruction.

3. If the debtor of the receivable receives more than one payment instruction relating to a single security right in the same receivable created by the same grantor, it is discharged by

paying in accordance with the last payment instruction received from the secured creditor before payment.

4. If the debtor of the receivable receives notification of more than one security right in the same receivable created by the same grantor, it is discharged by paying in accordance with the first notification received.

5. If the debtor of the receivable receives notification of one or more subsequent security rights in the same receivable created by a secured creditor that acquired its right from the initial or any other secured creditor, it is discharged by paying in accordance with the notification of the last of such subsequent security rights.

6. If the debtor of the receivable receives notification of the security right in a part of or an undivided interest in one or more receivables, it is discharged by paying in accordance with the notification or in accordance with this article as if the debtor of the receivable had not received the notification.

7. If the debtor of the receivable receives a notification as provided in paragraph 6 and pays in accordance with the notification, it is discharged only to the extent of the part or undivided interest paid.

8. If the debtor of the receivable receives notification of a security right in the receivable from the secured creditor, the debtor is entitled to request the secured creditor to provide within a reasonable period of time adequate proof of its security right and, if the secured creditor acquired its right from the initial or any other secured creditor, adequate proof of the security right created by the initial grantor in favour of the initial secured creditor, and of any intermediate security right. Unless the secured creditor does so, the debtor of the receivable is discharged by paying in accordance with this article as if it had not received notification of the security right.

9. Adequate proof of a security right referred to in paragraph 8 includes but is not limited to any writing emanating from the grantor and indicating that a security right has been created.

10. This article does not affect any other ground on which payment by the debtor of the receivable to the person entitled to payment, to a competent judicial or other authority, or to a public deposit fund discharges the debtor of the receivable.

[*Note to the Commission: The Commission may wish to note that the draft Guide to Enactment will explain that: (a) reflecting normal practices (e.g. undisclosed invoice discounting or securitization), paragraph 2 recognizes payment instruction as a notion distinct from notification and clarifies that a payment instruction should be in writing; and (b) paragraph 3 is intended to ensure that the assignee may change or correct its payment instructions and to protect the debtor against the risk of having to pay twice by allowing the debtor to disregard a payment instruction received by the debtor after payment*.]

Article 62. Defences and rights of set-off of the debtor of the receivable

1. Unless otherwise agreed in accordance with article 63, in a claim by the secured creditor against the debtor of the receivable for payment of the encumbered receivable, the debtor of the receivable may raise against the secured creditor:

(a) In the case of a receivable arising from a contract, all defences and rights of set-off arising from that contract, or any other contract that was part of the same transaction, of which the debtor of the receivable could avail itself as if the security right had not been created and the claim were made by the grantor; and

(b) Any other right of set-off that was available to the debtor of the receivable at the time it received notification of the security right.

2. Notwithstanding paragraph 1, the debtor of the receivable may not raise a breach of an agreement referred to in article 13, paragraph 2, as a defence or right of set-off against the grantor.

Article 63. Agreement not to raise defences or rights of set-off

1. Subject to paragraph 3, the debtor of the receivable may agree with the grantor in a writing signed by the debtor of the receivable not to raise against the secured creditor the defences and rights of set-off that it could raise in accordance with article 62.

2. The agreement referred to in paragraph 1 may be modified only by an agreement in a writing signed by the debtor of the receivable and its effectiveness against the secured creditor is determined by article 64, paragraph 2.

3. The debtor of the receivable may not waive defences arising from fraudulent acts on the part of the secured creditor or based on the incapacity of the debtor of the receivable.

Article 64. Modification of the original contract

1. In the case of a receivable arising from a contract, an agreement concluded before notification of a security right in a receivable between the grantor and the debtor of the receivable that affects the secured creditor's rights is effective as against the secured creditor, and the secured creditor acquires corresponding rights.

2. An agreement concluded after notification of a security right in a receivable between the grantor and the debtor of the receivable that affects the secured creditor's rights is ineffective against the secured creditor unless:

(a) The secured creditor consents to it; or

(b) The receivable is not fully earned by performance and either the modification is provided for in the contract giving rise to the receivable or, in the context of that contract, a reasonable secured creditor would consent to the modification.

3. Paragraphs 1 and 2 do not affect any right of the grantor or the secured creditor arising from breach of an agreement between them.

Article 65. Recovery of payments made by the debtor of the receivable

The failure of the grantor of a security right in a receivable arising from a contract to perform that contract does not entitle the debtor of the receivable to recover from the secured creditor a sum paid by the debtor of the receivable to the grantor or the secured creditor.

B. Negotiable instruments

Article 66. Rights as against the obligor under a negotiable instrument

The rights of a secured creditor that has a security right in a negotiable instrument as against any person obligated on the negotiable instrument are determined by [the relevant law relating to negotiable instruments to be specified by the enacting State].

C. Rights to payment of funds credited to a bank account

Article 67. Rights as against the depositary institution

1. The creation of a security right in a right to payment of funds credited to a bank account maintained with a depositary institution does not:

(a) Affect the rights and obligations of the depositary institution without its consent; or

(b) Obligate the depositary institution to provide any information about the bank account to third parties.

2. Any rights of set-off that a depositary institution, with which a bank account is maintained, may have are not affected by any security right that the depositary institution may have in a right to payment of funds credited to that bank account.

D. Negotiable documents and tangible assets covered by negotiable documents

Article 68. Rights as against the issuer of a negotiable document

The rights of a secured creditor that has a security right in a negotiable document as against the issuer of the document or any other person obligated on the document are determined by [the relevant law relating to negotiable documents to be specified by the enacting State].

E. Non-intermediated securities

Article 69. Rights as against the issuer of a non-intermediated security

The rights of a secured creditor that has a security right in non-intermediated securities as against the issuer of the securities are determined by [the relevant law relating to the obligations of the issuer of non-intermediated securities to be specified by the enacting State].

Chapter VII. Enforcement of a security right

A. General rules

Article 70. Post-default rights

1. After default, the grantor and the secured creditor are entitled to exercise:

(a) Any right under the provisions of this chapter; and

(b) Any other right provided in the security agreement or any other law, except to the extent it is inconsistent with the provisions of this Law.

2. The exercise of one post-default right does not prevent the exercise of another post-default right, except to the extent that the exercise of one right makes the exercise of another right impossible.

3. Before default, the grantor and the debtor may not waive unilaterally or vary by agreement any of its rights under the provisions of this chapter.

Article 71. Methods of exercising post-default rights

1. The secured creditor may exercise its post-default rights by application to [a court or other authority to be specified by the enacting State] or without such an application.

2. The exercise of the secured creditor's post-default rights by application to [a court or other authority to be specified by the enacting State] is determined by the provisions of this chapter and [the provisions to be specified by the enacting State], including the provisions on proceedings in the form of [the expeditious proceedings to be specified by the enacting State].

3. The exercise of the secured creditor's post-default rights without application to [a court or other authority to be specified by the enacting State] is determined by the provisions of this chapter.

Article 72. Relief for non-compliance

Option A

If a secured creditor does not comply with its obligations under the provisions of this chapter, the debtor, the grantor or a competing claimant.

Option B

Any person whose rights are affected by the non-compliance of another person with the provisions of this chapter is entitled to apply for relief to [a court or other authority to be

specified by the enacting State], including expeditious relief in the form of [expeditious proceedings to be specified by the enacting State].

Article 73. Right of affected persons to terminate enforcement

1. The grantor, the debtor and any other person with a right in the encumbered asset is entitled to terminate the enforcement process by paying or otherwise performing the secured obligation in full, including the reasonable cost of enforcement.

2. The right of termination may be exercised until the earlier of the sale or other disposition, acquisition or collection of an encumbered asset by the secured creditor or until the conclusion of an agreement by the secured creditor for the sale or other disposition of an encumbered asset.

3. Where the secured creditor has leased or licensed the encumbered asset to a third party, the right of termination may still be exercised subject to the rights of the lessee or licensee.

Article 74. Right of a higher-ranking secured creditor to take over enforcement

1. Notwithstanding commencement of enforcement by another creditor, a secured creditor whose security right has priority over that of the enforcing creditor is entitled to take over enforcement at any time before the earlier of the sale or other disposition, acquisition or collection of an encumbered asset by the enforcing creditor or until the conclusion of an agreement by that creditor for the sale or other disposition of an encumbered asset.

2. Where the enforcing creditor has leased or licensed the encumbered asset to a third party, the higher-ranking secured creditor may take over enforcement subject to the right of the lessee or licensee.

3. The right of the higher-ranking secured creditor to take over enforcement includes the right to enforce by any method available to a secured creditor under this Law.

Article 75. Right of the secured creditor to obtain possession of an encumbered asset

1. Subject to the rights of a person with a superior right to possession, including a lessee or licensee with such a right, after default, the secured creditor is entitled to obtain possession of an encumbered asset by applying to a [court or other authority to be specified by the enacting State].

[2. If a secured creditor decides to exercise the right provided in paragraph 1 by applying to a court or other authority, all of the following conditions must be satisfied: [to be specified by the enacting State].]

[3]. If a secured creditor decides to exercise the right provided in paragraph 1 without applying to [a court or other authority to be specified by the enacting State], all of the following conditions must be satisfied:

(a) The grantor has consented in writing to the secured creditor obtaining possession without applying to a [court or other authority to be specified by the enacting State];

(b) The secured creditor has given the grantor and any person in possession of the encumbered asset notice of default and of the secured creditor's intent to obtain possession; and

(c) At the time the secured creditor attempts to obtain possession of the encumbered asset, the person in possession of the encumbered asset does not object.

[4.] The notice referred to in subparagraph 3(b) need not be given if the encumbered asset is perishable, may decline in value speedily or is of a kind sold on a recognized market.

[5.] If a higher-ranking secured creditor is in possession of the encumbered asset, a lower-ranking secured creditor is not entitled to obtain possession of the asset.

[*Note to the Commission: The Commission may wish to note that paragraph 2 has been added by the Secretariat to align the structure of this article with the structure of article 76. In line with the recommendations of the Secured Transactions Guide, this article and the*

following article leave the details of judicial enforcement to the law to be specified by the enacting State but repeat this statement in each relevant article.]

Article 76. Right of the secured creditor to dispose of an encumbered asset

1. After default, a secured creditor is entitled to sell or otherwise dispose of, lease or license an encumbered asset by applying or without applying to a [court or other authority to be specified by the enacting State].

2. If a secured creditor decides to exercise the right provided in paragraph 1 by applying to a [court or other authority to be specified by the enacting State], the method, manner, time, place and other aspects of the sale or other disposition, lease or licence are determined by [the rules to be specified by the enacting State].

3. If a secured creditor decides to exercise the right provided in paragraph 1 without applying to a [court or other authority to be specified by the enacting State], the secured creditor may select the method, manner, time, place and other aspects of the sale or other disposition, lease or licence, including whether to sell or otherwise dispose of, lease or license encumbered assets individually, in groups or altogether.

4. If a secured creditor decides to sell or otherwise dispose of, lease or license an encumbered asset without applying to a [court or other authority to be specified by the enacting State], the secured creditor must give notice of its intention to:

(a) The grantor and the debtor;

(b) Any person with a right in the encumbered asset that notifies in writing the secured creditor of that right at least [a short period of time to be specified by the enacting State] before the notice is sent;

(c) Any other secured creditor that registered a notice with respect to a security right in the encumbered asset at least [a short period of time to be specified by the enacting State] before the notice is sent; and

(d) Any other secured creditor that was in possession of the encumbered asset when the enforcing secured creditor took possession of the asset.

5. The notice must be given at least [a short period of time to be specified by the enacting State] before the sale or other disposition, lease or licence takes place and must contain:

(a) A description of the encumbered assets;

(b) A statement of the amount required at the time notice is given to satisfy the secured obligation, including interest and the reasonable cost of enforcement;

(c) A statement that the grantor, the debtor and any other person with a right in the encumbered asset are entitled to terminate the enforcement process as provided in article 73; and

(d) A statement of the date after which the encumbered asset will be sold or otherwise disposed of, leased or licensed, or, in the case of a public disposition, the time, place and manner of the intended disposition.

6. The notice must be in a language that is reasonably expected to inform the recipient about its content.

7. It is sufficient if the notice to the grantor is in the language of the security agreement.

8. The notice need not be given if the encumbered asset is perishable, may decline in value speedily or is of a kind sold on a recognized market.

Article 77. Right of the secured creditor to distribute the proceeds of a disposition of an encumbered asset

1. If a secured creditor decides to exercise the right provided in article 76 by applying to a [court or other authority to be specified by the enacting State], the distribution of the proceeds of sale or other disposition of, lease or licence of an encumbered asset is determined by [the rules to be specified by the enacting State], but in accordance with the provisions of this Law on priority.

2. If a secured creditor decides to exercise the right provided in article 76 without applying to a [court or other authority to be specified by the enacting State]:

(a) [Subject to the rights of holders of preferential claims in accordance with article 34,] the enforcing secured creditor must apply the net proceeds of its enforcement to the secured obligation after deducting the reasonable cost of enforcement;

(b) Except as provided in subparagraph 2(c), the enforcing secured creditor must pay any surplus remaining to any subordinate competing claimant that, prior to any distribution of the surplus, notified the enforcing secured creditor of its claim, to the extent of the amount of that claim, and remit any balance remaining to the grantor; and

(c) Whether or not there is any dispute as to the entitlement or priority of any competing claimant under this Law, the enforcing secured creditor may pay the surplus to [a competent judicial or other authority or to a public deposit fund to be specified by the enacting State] for distribution in accordance with the provisions of this Law on priority.

3. A debtor remains liable for any shortfall owing after application of the net proceeds of enforcement to the secured obligation.

Article 78. Right of the secured creditor and the grantor to propose the acquisition of an encumbered asset by the secured creditor

1. After default, the secured creditor may propose in writing to acquire one or more of the encumbered assets in total or partial satisfaction of the secured obligation.

2. The secured creditor must send the proposal to:

(a) The grantor and the debtor;

(b) Any person with a right in the encumbered asset that notified in writing the secured creditor of that right, at least [a short period of time to be specified by the enacting State] before the proposal is sent;

(c) Any other secured creditor that registered a notice with respect to a security right in the encumbered asset at least [a short period of time to be specified by the enacting State] before the proposal is sent; and

(d) Any other secured creditor that was in possession of the encumbered asset when the secured creditor took possession.

3. The proposal must include:

(a) A statement of the amount of the secured obligation owed at the time the proposal is sent, including interest and the reasonable cost of enforcement, and the amount of the secured obligation that is proposed to be satisfied;

(b) A statement that the secured creditor proposes to acquire the encumbered asset described in the proposal in total or partial satisfaction of the secured obligation;

(c) A statement that the debtor, the grantor and any other person with a right in the encumbered asset are entitled to terminate the enforcement as provided in article 73;

(d) A statement of the date after which the encumbered asset will be acquired by the secured creditor.

4. The secured creditor acquires the encumbered asset:

(a) In the case of a proposal for the acquisition of the encumbered asset in full satisfaction of the secured obligation, unless the secured creditor receives an objection in writing from any person entitled to receive a proposal under paragraph 2 within [a short period of time to be specified by the enacting State] after the proposal is received by that person; and

(b) In the case of a proposal for the acquisition of the encumbered asset in partial satisfaction of the secured obligation, only if the secured creditor receives the affirmative consent of each person entitled to receive a proposal under paragraph 2 in writing within [a short period of time to be specified by the enacting State] after the proposal is received by that person.

5. The grantor may request the secured creditor to make a proposal under paragraph 1 and, if the secured creditor accepts the grantor's request, it must proceed as provided in paragraphs 1-4.

[*Note to the Commission: The Commission may wish to consider whether the deadline included in subparagraph 4(b), which was not included in recommendation 158 of the Secured Transactions Guide, on which this article is based, should be retained*.]

Article 79. Rights acquired in an encumbered asset

1. If a secured creditor sells or otherwise disposes of an encumbered asset by applying to a [court or other authority to be specified by the enacting State], the buyer or other transferee acquires the asset [the enacting State to specify whether the buyer or other transferee acquires its rights free of any rights, except rights that have priority over the right of the enforcing secured creditor].

2. If a secured creditor leases or licenses an encumbered asset by applying to a [court or other authority to be specified by the enacting State], [the enacting State to specify whether a lessee or licensee is entitled to the benefit of the lease or licence during its term, except as against creditors with rights that have priority over the right of the enforcing secured creditor].

3. If a secured creditor sells or otherwise disposes of an encumbered asset without applying to a [court or other authority to be specified by the enacting State], the buyer or other transferee acquires the grantor's right in the asset free of the rights of the enforcing secured creditor and any competing claimant, except rights that have priority over the right of the enforcing secured creditor.

4. If a secured creditor leases or licenses an encumbered asset without applying to a [court or other authority to be specified by the enacting State], the lessee or licensee is entitled to the benefit of the lease or licence during its term, except as against creditors with rights that have priority over the right of the enforcing secured creditor.

5. If a secured creditor sells or otherwise disposes of, leases or licenses the encumbered asset not in compliance with the provisions of this chapter, the buyer or other transferee, lessee or licensee of the encumbered asset acquires the rights or benefits described in paragraphs 1 and 2[, provided that it had no knowledge of a violation of the provisions of this chapter that materially prejudiced the rights of the grantor or another person].

[*Note to the Commission: The Commission may wish to consider whether the bracketed text in paragraph 5 should be retained outside square brackets*.]

B. Asset-specific rules

Article 80. Collection of payment under a receivable, negotiable instrument, right to payment of funds credited to a bank account or non-intermediated security

1. After default, a secured creditor with a security right in a receivable, negotiable instrument, right to payment of funds credited to a bank account or non-intermediated security is entitled to collect payment from the debtor of the receivable, obligor under the negotiable instrument, depositary institution or issuer of the non-intermediated security.

2. The secured creditor may exercise the right to collect under paragraph 1 before default provided that the grantor consents.

3. A secured creditor exercising the right to collect under paragraph 1 or 2 is also entitled to enforce any personal or property right that secures or supports payment of the encumbered asset.

4. If a security right in a right to payment of funds credited to a bank account has been made effective against third parties by registration of a notice, the secured creditor is entitled to collect or otherwise enforce its security right only pursuant to an order of a court, unless the depositary institution agrees otherwise.

5. The right of the secured creditor to collect under paragraphs 1 to 4 is subject to articles 59-69.

Article 81. Collection of payment under a receivable by an outright transferee

In the case of an outright transfer of a receivable, the transferee is entitled to collect the receivable before or after default of the transferor.

(A/CN.9/884/Add.4) (Original: English)

Note by the Secretariat on a draft model law on secured transactions

ADDENDUM

Contents

Chapter VIII. Conflict of laws[1]

A. General rules

Article 82. Law applicable to the mutual rights and obligations of the grantor and the secured creditor

The law applicable to the mutual rights and obligations of the grantor and the secured creditor arising from their security agreement is the law chosen by them and, in the absence of a choice of law, the law governing the security agreement.

Article 83. Law applicable to a security right in a tangible asset

1. Except as provided in paragraphs 2 to 4 and article 97, the law applicable to the creation, effectiveness against third parties and priority of a security right in a tangible asset is the law of the State in which the asset is located.

2. The law applicable to the priority of a security right in a tangible asset covered by a negotiable document made effective against third parties by possession of the document as against a competing security right made effective against third parties by another method is the law of the State in which the document is located.

3. The law applicable to the creation, third-party effectiveness and priority of a security right in a tangible asset of a type ordinarily used in more than one State is the law of the State in which the grantor is located.

4. A security right in a tangible asset that is in transit at the time of its putative creation or intended to be relocated to a State other than the State in which it is located at that time may be created and made effective against third parties under:

(a) The law of the State of the location of the asset at the time of the putative creation of the security right; or

(b) The law of the State of the asset's ultimate destination, provided that the asset reaches that State within [a short period of time to be specified by the enacting State] after the time of the putative creation of the security right.

Article 84. Law applicable to a security right in an intangible asset

Except as provided in articles 85 and 94-97, the law applicable to the creation, effectiveness against third parties and priority of a security right in an intangible asset is the law of the State in which the grantor is located.

Article 85. Law applicable to a security right in a receivable relating to immovable property

Notwithstanding article 84, in the case of a security right in a receivable that arises from the sale or lease of, or is secured by, immovable property, the law applicable to the priority of the security right in the receivable as against the right of a competing claimant that is registrable in the immovable property registry in which rights in the relevant immovable may be registered is the law of the State under whose authority the immovable property registry is maintained.

[*Note to the Commission: The Commission may wish to note that it may not be easy for a secured creditor with a security right in receivables to find out that they are secured*

[1] Depending on its legal tradition and drafting conventions, the enacting State may incorporate the provisions of this chapter in its secured transactions law (at the beginning or at the end of it) or in a separate law (civil code or other law).

by a mortgage and thus that a law other than the law of the grantor's location will apply to the priority competition with a mortgagee. The Commission may, therefore, wish to consider whether the rule in article 85 should be limited to receivables arising from the sale or lease of immovable property.]

Article 86. Law applicable to the enforcement of a security right

The law applicable to issues relating to the enforcement of a security right in:

(a) A tangible asset is the law of the State in which [enforcement takes place] [the encumbered asset is located at the time of commencement of enforcement], except as provided in article 97; and

(b) An intangible asset is the law applicable to the priority of the security right, except as provided in articles 94, 96 and 97.

[*Note to the Commission: The Commission may wish to consider the options within square brackets in subparagraph (a) added pursuant to a decision of the Working Group (see A/CN.9/865, para. 90). In this connection, the Commission may wish to note that recommendation 218, subparagraph a, on which subparagraph (a) is based, refers to the place of enforcement (lex fori), as it would result to: (a) the law governing enforcement remedies coinciding with the law generally applicable to procedural issues; (b) the law governing remedies coinciding in many instances with the place in which the encumbered asset is located; and (c) the enforcement requirements being the same for enforcement by both domestic and foreign creditors (see* Secured Transactions Guide, *chap. X, para. 66)*.]

Article 87. Law applicable to a security right in proceeds of an encumbered asset

1. The law applicable to the creation of a security right in proceeds is the law applicable to the creation of the security right in the original encumbered asset from which the proceeds arose.

2. The law applicable to the third-party effectiveness and priority of a security right in proceeds is the law applicable to the third-party effectiveness and priority of a security right in an original encumbered asset of the same kind as the proceeds.

Article 88. Meaning of "location" of the grantor

For the purposes of the provisions of this chapter, the grantor is located:

(a) In the State in which it has its place of business;

(b) If the grantor has a place of business in more than one State, in the State in which the central administration of the grantor is exercised; and

(c) If the grantor does not have a place of business, in the State in which the grantor has his or her habitual residence.

Article 89. Relevant time for determining location

1. Except as provided in paragraph 2, references to the location of the encumbered asset or of the grantor in the provisions of this chapter refer:

(a) For creation issues, to the location at the time of the putative creation of the security right; and

(b) For third-party effectiveness and priority issues, to the location at the time the issue arises.

2. If the right of a secured creditor in an encumbered asset is created and made effective against third parties and the rights of all competing claimants are established before a change in the location of the asset or the grantor, references in the provisions of this chapter to the location of the asset or of the grantor refer, with respect to third-party effectiveness and priority issues, to the location prior to the change.

Article 90. Exclusion of *renvoi*

A reference in the provisions of this chapter to "the law" of a State as the law applicable to an issue refers to the law in force in that State other than its rules of private international law.

Article 91. Overriding mandatory rules and public policy (*ordre public*)

1. The provisions of this chapter do not prevent a court from applying overriding mandatory provisions of the law of the forum that apply irrespective of the law applicable under the provisions of this chapter.

2. The law of the forum determines when a court may or must apply or take into account overriding mandatory provisions of another law.

3. A court may only exclude the application of a provision of the law applicable under the provisions of this chapter if and to the extent that the result of such application would be manifestly incompatible with fundamental notions of public policy (*ordre public*) of the forum.

4. The law of the forum determines when a court may or must apply or take into account the public policy (*ordre public*) of a State other than the State the law of which would be applicable under the provisions of this chapter.

5. This article does not prevent an arbitral tribunal from applying or taking into account public policy (*ordre public*), or from applying or taking into account overriding mandatory provisions of a law other than the law applicable under the provisions of this chapter, if the arbitral tribunal is required or entitled to do so.

6. This article does not permit a court to displace the provisions of this chapter dealing with the law applicable to the third-party effectiveness and priority of a security right.

Article 92. Impact of commencement of insolvency proceedings on the law applicable to a security right

The commencement of insolvency proceedings in respect of the grantor does not displace the law applicable to a security right under the provisions of this chapter.

B. Asset-specific rules

Article 93. Law applicable to the rights and obligations between third-party obligors and secured creditors

The law governing the rights and obligations between a debtor of a receivable, an obligor under a negotiable instrument or an issuer of a negotiable document and the grantor of a security right in these types of asset is the law applicable to:

(a) The rights and obligations between the secured creditor and the debtor, obligor or issuer;

(b) The conditions under which the security right may be invoked against the debtor, obligor or issuer, including whether an agreement limiting the grantor's right to create a security right may be asserted by the debtor, obligor or issuer; and

(c) Whether the obligations of the debtor, obligor or issuer have been discharged.

Article 94. Law applicable to a security right in a right to payment of funds credited to a bank account

1. Subject to article 95, the law applicable to the creation, effectiveness against third parties, priority and enforcement of a security right in a right to payment of funds credited to a bank account, as well as to the rights and obligations between the depositary institution and the secured creditor, is

Option A[2]

The law of the State in which the depositary institution maintaining the account has its place of business.

2. If the depositary institution has places of business in more than one State, the law applicable is the law of the State in which the office maintaining the account is located.

Option B

The law of the State expressly stated in the account agreement as the State whose law governs the account agreement or, if the account agreement expressly provides that the law of another State is applicable to all such issues, the law of that other State.

2. The law of the State determined pursuant to paragraph 1 applies only if the depositary institution has, at the time of the conclusion of the account agreement, an office in that State that is engaged in the regular activity of maintaining bank accounts.

3. If the applicable law is not determined pursuant to paragraph 1 or 2, the applicable law is to be determined pursuant to [the default rules based on article 5 of the Hague Convention on the Law Applicable to Certain Rights in Respect of Securities Held with an Intermediary to be inserted here by the enacting State].

Article 95. Law applicable to the third-party effectiveness of a security right in certain types of asset by registration

If the law of the State in which the grantor is located recognizes registration of a notice as a method for achieving effectiveness against third parties of a security right in a negotiable instrument, negotiable document, right to payment of funds credited to a bank account or certificated non-intermediated security, the law of that State also is the law applicable to the third-party effectiveness of the security right in that asset by registration.

Article 96. Law applicable to a security right in intellectual property

1. The law applicable to the creation, effectiveness against third parties and priority of a security right in intellectual property is the law of the State in which the intellectual property is protected.

2. A security right in intellectual property may also be created under the law of the State in which the grantor is located and may also be made effective under that law against third parties other than another secured creditor, a transferee or a licensee.

3. The law applicable to the enforcement of a security right in intellectual property is the law of the State in which the grantor is located.

Article 97. Law applicable to a security right in non-intermediated securities

Option A

1. Subject to paragraph 2:

(a) The law applicable to the creation, effectiveness against third parties and priority of a security right in certificated non-intermediated securities is the law of the State in which the certificate is located; and

(b) The law applicable to the enforcement of a security right in certificated non-intermediated securities is the law of the State in which [enforcement takes place] [the securities are located at the time of commencement of enforcement].

[2. The law applicable to the effectiveness of a security right in certificated non-intermediated securities against the issuer is the law of the State under which the issuer is constituted.]

[2. The law applicable to the effectiveness of a security right in non-intermediated debt securities against the issuer is the law governing the securities.]

[2] A State may adopt option A or B of this article.

3. The law applicable to the creation, effectiveness against third parties, priority and enforcement of a security right in uncertificated non-intermediated securities, as well as to its effectiveness against the issuer, is the law of the State under which the issuer is constituted.

Option B

The law applicable to the creation, effectiveness against third parties, priority and enforcement of a security right in non-intermediated securities, as well as to its effectiveness against the issuer, is the law of the State under which the issuer is constituted.

Option C

1. The law applicable to the creation, effectiveness against third parties, priority and enforcement of a security right in non-intermediated equity securities, as well as to its effectiveness against the issuer, is the law under which the issuer is constituted.

2. The law applicable to the creation, the effectiveness against third parties, the priority and the enforcement of a security right in non-intermediated debt securities, as well as to its effectiveness against the issuer, is the law governing the securities.

[*Note to the Commission: The Commission may wish to note that articles 93 and 94 refer to the rights and obligations between a third-party obligor and a secured creditor, while article 97 refers to the effectiveness of a security right in non-intermediated securities against the issuer. In this connection, the Commission may wish to consider whether these articles should be revised to use the same wording, and, if so, which wording should be used. In addition, the Commission may wish to consider whether the rights and obligations of a depositary bank and the effectiveness of a security right in non-intermediated securities against the issuer should be addressed in article 93 (to have the rights and obligations of all third-party obligors addressed in one and the same article) or in articles 94 and 97 (to have all bank account- and securities-related issues addressed in one article)*.]

Article 98. Law applicable in the case of a multi-unit State

1. Any reference in the provisions of this chapter to the law of a State that has two or more territorial units refers to the law in force in the relevant territorial unit.

2. The relevant territorial unit referred to in paragraph 1 is to be determined on the basis of the location of the grantor or of the encumbered asset, or otherwise under the provisions of this chapter.

3. If the applicable law is the law in force in a territorial unit, the internal conflict-of-laws provisions in force in the territorial unit determine whether the substantive law provisions of the State or of a particular territorial unit of the State apply.

[*Note to the Commission: The Commission may wish to consider a simplified version of this article that could read along the following lines: "If the law applicable to an issue is the law of a State that comprises one or more territorial units each of which has its own rules of law in respect of that issue: (a) any reference in the provisions of this chapter to the law of a State means the law in force in the relevant territorial unit; and (b) the internal conflict-of-laws rules of the State, or in the absence of such rules, the law in force in that territorial unit determine the relevant territorial unit whose substantive law is to apply*."]

Chapter IX. Transition

Article 99. Amendment and repeal of other laws

1. [The laws to be specified by the enacting State] are repealed.

2. [The laws to be specified by the enacting State] are amended as follows [the text of the relevant amendments to be specified by the enacting State].

Article 100. General applicability of this Law

1. For the purposes of the provisions of this chapter:

(a) "Prior law" means [the law applicable under the conflict-of-laws rules of the enacting State] that applied to prior security rights immediately before the entry into force of this Law; and

(b) "Prior security right" means a right created by an agreement entered into before the entry into force of this Law that is a security right within the meaning of this Law and to which this Law would have applied if it had been in force when the right was created.

2. Except as otherwise provided in this chapter, this Law applies to all security rights, including prior security rights within its scope.

Article 101. Applicability of prior law to matters that are the subject of proceedings commenced before the entry into force of this Law

1. Subject to paragraph 2, prior law applies to a matter that is the subject of proceedings before a court or arbitral tribunal commenced before the entry into force of this Law.

2. If any step has been taken to enforce a prior security right before the entry into force of this Law, enforcement may continue under prior law or may proceed under this Law.

Article 102. Applicability of prior law to the creation of a prior security right

1. Prior law determines whether a prior security right was created.

2. A prior security right remains effective between the parties notwithstanding that its creation did not comply with the creation requirements of this Law.

Article 103. Transitional rules for determining the third-party effectiveness of a prior security right

1. A prior security right that was effective against third parties under prior law at the time this Law entered into force continues to be effective against third parties under this Law until the earlier of:

(a) The time it would have ceased to be effective against third parties under prior law; and

(b) The expiration of [a period of time to be specified by the enacting State] after the entry into force of this Law.

2. If the third-party effectiveness requirements of this Law are satisfied before the third-party effectiveness of a prior security right ceases in accordance with paragraph 1, the prior security right continues to be effective against third parties under this Law from the time when it was made effective against third parties under prior law.

3. If the third-party effectiveness requirements of this Law are not satisfied before the third-party effectiveness of a prior security right ceases in accordance with paragraph 1, the prior security right is effective against third parties only from the time it is made effective against third parties under this Law.

4. A written agreement between a grantor and a secured creditor creating a prior security right is sufficient to constitute authorization by the grantor for the registration of a notice covering the assets described in that agreement under this Law.

Article 104. Application of prior law to the priority of a prior security right as against the rights of competing claimants arising under prior law

1. The time to be used for determining the priority of a prior security right is the time it became effective against third parties under prior law or, in the case of advance registration, became the subject of a registered notice under prior law.

2. The priority of a prior security right as against the rights of a competing claimant is determined by prior law if:

(a) The security right and the rights of all competing claimants arose before the entry into force of this Law; and

(b) The priority status of none of these rights has changed since the entry into force of this Law.

3. For the purposes of subparagraph 2(b), the priority status of a prior security right has changed only if:

(a) It was effective against third parties when this Law entered into force but ceased to be effective against third parties as provided in article 103, paragraph 3; or

(b) It was not effective against third parties under prior law when this Law entered into force, and only became effective against third parties under this Law.

[*Note to the Commission: The Commission may wish to consider the content, the placement and the necessity of retaining paragraph 1, as (a) it may be inconsistent with article 103, paragraph 2; (b) its wording may be unclear; and (c) article 103 already addresses comprehensively the transitional rules for determining the time of third-party effectiveness of prior security rights for the purposes of applying the priority provisions of this Law. To address these concerns and as its content relates to article 103, paragraph 2, paragraph 1 could be placed at the end of article 103 and be revised to read along the following lines: "If a prior security right referred to in paragraph 2 was made effective against third parties by registration under prior law, the time of registration under prior law is the time to be used for the purposes of applying the priority rules of this Law that refer to the time of registration of a security right*."]

Article 105. Entry into force of this Law

This Law enters into force [on the date or according to mechanism to be specified by the enacting State].

H. Note by the Secretariat on a draft guide to enactment of the draft model law on secured transactions

(A/CN.9/885 and Add.1-4)

[Original: English]

Contents

I. Purpose of the Guide to Enactment

1. In preparing and adopting the [draft] UNCITRAL Model Law on Secured Transactions (the "Model Law"), the United Nations Commission on International Trade Law ("UNCITRAL" or the "Commission") was mindful of the fact that the Model Law would be a more effective tool for States modernizing and harmonizing their legislation, as well as organizations assisting States, if background and explanatory information were provided to executive and legislative branches of Government to assist in their consideration of the Model Law for enactment (the "Guide to Enactment").[1]

2. In addition, the Commission was aware that in the preparation of the Model Law it was assumed that the Model Law would be accompanied by such a Guide to Enactment. For example, it was decided in respect of a number of issues not to settle them in the Model Law but to address them in the Guide so as to provide guidance to States enacting the Model Law (see, for example, paras. 68 and 124 below). Thus, the Guide to Enactment also addresses or clarifies matters that were not settled in the Model Law but were referred to in the Guide to Enactment.[2]

3. Moreover, when it referred the task of the preparation of the Guide to Enactment to the Working Group, the Commission agreed that the Guide to Enactment should: (a) be as short as possible; (b) include cross references to the UNCITRAL Legislative Guide on Secured Transactions (the "Secured Transactions Guide") and the other texts of the Commission on secured transactions; (c) focus on giving guidance to legislators rather than users of the text; (d) explain the thrust of each provision of the Model Law and any difference with the corresponding recommendations of the Secured Transactions Guide or the provisions of another UNCITRAL text on secured transactions; and (e) give guidance to States with respect to matters referred to them and in particular explain each option offered

[1] *Official Records of the General Assembly, Seventieth Session, Supplement No. 17* (A/70/17) para. 215.

[2] Ibid.

in various articles of the Model Law to assist enacting States in choosing one of the options offered.[3]

4. Mindful of the fact that the Secured Transactions Guide contains extensive commentary, the Commission decided that the Guide to Enactment should nevertheless be prepared. The reason was that the commentary of the Secured Transactions Guide had a different structure and did not contain a straightforward discussion of each recommendation but rather a discussion of the comparative advantages and disadvantages of various workable approaches with the recommendation being set out as a conclusion of that discussion. At the same time, to avoid repetition, the Commission agreed that the Guide to Enactment should not repeat, but should rather incorporate by reference, those comments contained in the Secured Transactions Guide that could assist in explaining a provision of the Model Law.

5. The Commission was also aware of the likelihood that the Model Law would be used in a number of States with limited familiarity with the type of secured transaction covered by in the Model Law. So, the Guide to Enactment, much of which is drawn from the travaux préparatoires of the Model Law, is also intended to be helpful to other users of the text, such as judges, arbitrators, practitioners and academics.

6. In view of the above, the information presented in the Guide to Enactment is intended to briefly explain the thrust of each provision of the Model Law and its relationship with the corresponding recommendation(s) of the Secured Transactions Guide or other UNCITRAL texts on secured transactions, including the Supplement on Security Rights in Intellectual Property (the "Intellectual Property Supplement"), the United Nations Convention on the Assignment of Receivables in International Trade (the "Assignment Convention") and the UNCITRAL Guide on the Implementation of a Security Rights Registry (the "Registry Guide").

7. The Guide to Enactment was prepared by the Secretariat and is based on the considerations of the Working Group and the Commission. [It was considered and approved in principle by the Working Group at its [thirtieth] and [thirty-first] sessions (see […] respectively) and by the Commission at its [fiftieth] session (see […]).[4]]

II. Purpose and origin of the Model Law

A. Purpose of the Model Law

8. The Model Law is designed to assist States in implementing the recommendations of the Secured Transactions Guide, the Intellectual Property Supplement and the Registry Guide with respect to security rights in movable assets. The overall objective of those texts and the Model Law is to promote low-cost credit by enhancing the availability of secured credit (see Secured Transactions Guide, rec. 1, subpara. (a)). Like all those texts, the Model Law is intended to be useful to States that do not currently have efficient and effective secured transactions laws, as well as to States that already have workable laws but wish to modernize their laws and harmonize them with the laws of other States whose secured transactions laws are generally consistent with the recommendations of those texts (see Secured Transactions Guide, Introduction, para. 1).

9. Thus, the provisions of the Model Law are based on the recommendations of the Secured Transactions Guide, including the Intellectual Property Supplement. The Model Registry-related Provisions are also based on the Registry Guide. The provisions of the Model Law on security rights in receivables are substantially based on the recommendations of the Secured Transactions Guide, which in turn are based on the Assignment Convention.

[3] Ibid., para. 216.

[4] Ibid., [*Seventy-second Session, Supplement No. 17* (A/72/17), para. […].]

B. Background

10. At its first session, in 1968, the Commission included the topic of security interests in goods in its future work programme.[5] From its third session in, 1970, to its thirteenth session, in 1980, the Commission discussed the topic[6] and, at its thirteenth session, in 1980, decided that no further work should be carried out and the subject should no longer be accorded priority as "the world-wide unification of the law of security interests in goods, for the reasons brought out in the discussions, was in all likelihood unattainable".[7]

C. Preparatory work and adoption

11. At its forty-third session, in 2010, the Commission had before it a note by the Secretariat on possible future work in the area of security interests (A/CN.9/702 and Add.1). The Commission agreed that four issues related to secured transactions law listed in document A/CN.9/702, paragraph 2(a)-(d), were interesting (non-intermediated securities, registration of security rights, a model law and a contractual guide on secured transactions) and should be retained on its future work agenda.[8] At the same time, in view of the limited resources available to it, the Commission agreed that it could not undertake work on all four issues at the same time and that, as a result, it should set priorities. In that regard, there was general agreement that priority should be given to work on registration of security rights in movable assets.

12. At that session, the Commission decided that Working Group VI should be entrusted with the preparation of a text on registration of security rights in movable assets as a matter of priority. It was also agreed that other topics, such as security rights in non-intermediated securities, a model law based on the recommendations of the Guide and a text dealing with the rights and obligations of the parties should be retained in the future programme of Working Group VI for further consideration by the Commission at a future session on the basis of notes to be prepared by the Secretariat within the limits of existing resources.[9]

13. At its forty-fifth session, in 2012, the Commission decided that, upon its completion of the Registry Guide, Working Group VI should undertake work to prepare a simple, short and concise model law on secured transactions based on the Secured Transactions Guide and consistent with all texts prepared by UNCITRAL on secured transactions.[10] At that session, the Commission noted that the Working Group, at its twenty-first session, had agreed to propose to the Commission that the Working Group should develop a model law on secured transactions based on the general recommendations of the Secured Transactions Guide and consistent with all the texts prepared by UNCITRAL on secured transactions. It was also noted that the Working Group had agreed to propose to the Commission that the topic of security rights in non-intermediated securities should be retained on its work agenda and be considered at a future session (A/CN.9/743, para. 76).[11]

14. Recalling that, at its forty-third session, in 2010, the Commission had agreed that the topics mentioned above should be retained on the programme of the Working Group for further consideration, the Commission considered the proposals of the Working Group. It was widely felt that a simple, short and concise model law on secured transactions could usefully complement the Secured Transactions Guide and would be extremely useful in addressing the needs of States and in promoting implementation of the Secured Transactions Guide. While a concern was expressed that a model law might limit the flexibility of States to address the local needs of their legal traditions, it was generally viewed that a model law could be drafted in a sufficiently flexible manner to adapt to various legal traditions. Moreover, there was support for the idea that a model law could greatly assist States in

[11] Ibid., para. 101.

addressing urgent issues relating to access to credit and financial inclusion, in particular for small and medium-sized enterprises.[12]

15. As to the topic of security rights in non-intermediated securities, it was widely felt that the topic merited further consideration. The Commission noted that non-intermediated securities, in the sense of securities other than those credited to a securities account, that were used as security for credit in commercial finance transactions were excluded from the scope of the Secured Transactions Guide (see rec. 4, subparas. (c)-(e) of the Guide), the Unidroit Convention on Substantive Rules for Intermediated Securities (Geneva, 2009; the "Unidroit Securities Convention") and the Convention on the Law Applicable to Certain Rights in respect of Securities held with an Intermediary (The Hague, 2006; the "Hague Securities Convention").[13]

16. At its twenty-third session, in 2013, Working Group VI had a general exchange of views on the basis of a note prepared by the Secretariat entitled "Draft Model Law on Secured Transactions" (A/CN.9/WG.VI/WP.55 and Add.1 to 4).[14] The Working Group developed the Model Law in six one-week sessions,[15] the final taking place in February 2016.

17. At its forty-seventh session, in 2014, the Commission expressed its satisfaction for the considerable progress achieved by the Working Group in its work and requested the Working Group to expedite its work so as to complete the draft Model Law, including certain definitions and provisions on non-intermediated securities (see A/CN.9/811), and to submit it to the Commission for adoption together with a guide to enactment as soon as possible.

18. At its forty-eighth session, in 2015, the Commission considered and approved the substance of article 26 of chapter IV of the Model Law and articles 1-29 of the draft Registry Act.[16] At that session, the Commission also agreed that a guide to enactment of the Model Law should be prepared and referred that task to the Working Group.[17]

19. In preparation for the forty-ninth session of the Commission, the text of the Model Law as approved by Working Group VI was circulated to all Governments and to interested international organizations for comment. At that session, the Commission had before it the reports of the Working Group on its twenty-eighth and twenty-ninth sessions (A/CN.9/865 and A/CN.9/871), the Model Law (A/CN.9/884 and Add.1-4), the Guide to Enactment prepared by the Secretariat (A/CN.9/885 and Add.1-4) and the comments received from Governments (A/CN.9/886 and A/CN.9/887). At that session, the Commission […].

20. After consideration of the Model Law, the Commission adopted the following decision:

[…].[18]

III. The Model Law as a tool for modernizing and harmonizing laws

21. The Model Law is in the form of a legislative text that is recommended to States for incorporation into their national law. Unlike an international convention, model legislation does not require the State enacting it to notify the United Nations or other States that may

---

[13] Ibid., para. 104.

[14] See A/CN.9/767, paras. 63 and 64.

[15] The reports of the Working Group on its work during these 6 sessions are contained in documents A/CN.9/796, A/CN.9/802, A/CN.9/830, A/CN.9/836, A/CN.9/865 and A/CN.9/871. During these sessions, the Working Group considered documents A/CN.9/WG.VI/WP.57 and Add.1 to 4, A/CN.9/WG.VI/WP.59 and Add.1, A/CN.9/WG.VI/WP.61 and Add.1 to 3, A/CN.9/WG.VI/WP.63 and Add.1 to 4, A/CN.9/WG.VI/WP.65 and Add.1 to 4, and A/CN.9/WG.VI/WP.68 and Add.1 and 2.

[16] *Official Records of the General Assembly, Seventieth Session, Supplement No. 17* (A/70/17), para. 214.

[17] Ibid., para. 216.

[18] Ibid., [*Official Records of the General Assembly, Seventy-first Session, Supplement No. 17* (A/71/17), para. […].]

have also enacted it. However, States are strongly encouraged to inform the UNCITRAL secretariat of any enactment of the new Model Law (or any other model law resulting from the work of UNCITRAL). This information may be made available on the UNCITRAL website to send the message that the enacting State has adopted an international standard and, in any case, assist other States in their consideration of the Model Law.

22. In incorporating the text of model legislation into its legal system, a State may wish to consider modifying or leaving out some of its non-fundamental provisions. In the case of a convention, the possibility of changes being made to the uniform text by the States parties (normally referred to as "declarations") is much more restricted; trade law conventions in particular usually either totally prohibit declarations or allow only very few, specific ones. The flexibility inherent in model legislation is particularly desirable in those cases where it is likely that the State would wish to make various modifications to the uniform text before it would be ready to enact it as national law. Some modifications may be expected, in particular when the uniform text is closely related to the national court and procedural system. This, however, also means that the degree of harmonization achieved through model legislation is likely to be lower than that achieved by a convention.

23. However, this relative disadvantage of model legislation may be balanced by the fact that the number of States enacting model legislation is likely to be higher than the number of States adhering to a convention. In order to achieve a satisfactory degree of modernization, harmonization and certainty, it is recommended that States make as few changes as possible in incorporating the new Model Law into their legal systems and that they take due regard of its basic principles, including the unitary, functional and comprehensive approach to secured transactions, notice registration, party autonomy and the international origin of the Model Law. In general, in enacting the Model Law, it is advisable to adhere as much as possible to the uniform text in order to make the national law as efficient as possible for all users and as transparent and familiar as possible for foreign users. This does not deprive enacting States of the necessary flexibility as the Model Law provides options and leaves a number of matters to enacting States.

24. While it is recommended that the Model Law should be implemented in one law, depending on its legal tradition and drafting conventions, the enacting State may implement the Model Registry-related Provisions in its secured transactions law, in a separate statute or other type of legal instrument, such as rules, regulations, orders, by-laws, proclamations or the like adopted by a legislative or executive body, or some of these Provisions in its secured transactions law and the rest in a separate statute or other type of legal instrument. Similarly, the conflict-of-laws provisions may be incorporated in the secured transactions law (at the beginning or at the end of it) or in a separate law (civil code or other law).

IV. Main features of the Model Law

A. Relationship of the Model Law with the secured transactions texts of UNCITRAL

25. The Secured Transactions Guide, including the Intellectual Property Supplement, and the Registry Guide contain detailed commentary and recommendations on all issues to be addressed in a modern law on secured transactions. However, they are long texts and States will need assistance in implementing their recommendations. Thus, the Model Law was prepared to complement those texts and to assist States in implementing their recommendations.

26. The Model Law reflects the policies embodied in the recommendations of those texts. The difference in the formulation between a provision of the Model Law and the relevant recommendation is generally due to the legislative nature of the Model Law and is briefly explained in the remarks to the relevant provision of the Model Law below.

27. For reasons explained below, the Model Law also addresses matters that were not addressed in a recommendation or even discussed in the Secured Transactions Guide, including the Intellectual Property Supplement, or in the Registry Guide (e.g. security rights in non-intermediated securities and the effectiveness of the registration of an amendment or

cancellation notice that has not been authorized by the secured creditor). At the same time, the Model Law does not address certain matters that were addressed in the Secured Transactions Guide (e.g. security rights in the right to receive the proceeds under an independent undertaking and security rights in attachments).

B. Key objectives and fundamental policies of the Model Law

28. The overall objective of the Model Law is the same as that of the Secured Transactions Guide, that is, to promote low-cost credit by enhancing the availability of secured credit (see Secured Transactions Guide rec. 1 and Introduction, paras. 43-59). The fundamental policies of the Model Law are the same as those of the Secured Transactions Guide (see Secured Transactions Guide, Introduction, paras. 60-72). In enacting the Model Law, States may wish to consider issues of harmonization with existing law, legislative method, drafting technique and post-enactment acculturation (see Secured Transactions Guide, Introduction, paras. 73-89).

29. Depending on its drafting method and technique, the enacting State may wish to consider including the key objectives of the Model Law in a preamble or other statement of objectives of the law. That statement could be used for the purpose of the interpretation of, and the filling of gaps in, the Model Law (see paras. 75 and 76 below).

V. Assistance from the UNCITRAL secretariat

A. Assistance in drafting legislation

30. In the context of its training and assistance activities, the UNCITRAL secretariat assists States with technical consultations for the preparation of legislation based on the Model Law. The same assistance is brought to Governments considering legislation based on other UNCITRAL model laws (e.g. the UNCITRAL Model Law on Cross-Border Insolvency, the UNCITRAL Model Law on International Commercial Arbitration and the UNCITRAL Model Law on International Commercial Conciliation) or considering adhesion to one of the international trade law conventions prepared by UNCITRAL (e.g. the United Nations Convention on Independent Guarantees and Stand-by Letters of Credit (New York, 1995) and the Assignment Convention).

31. Further information concerning the Model Law and other model laws and conventions developed by UNCITRAL, may be obtained from the UNCITRAL secretariat at the address below:

International Trade Law Division, Office of Legal Affairs
United Nations
Vienna International Centre
P.O. Box 500
A-1400 Vienna, Austria
Telephone: (+43-1) 26060-4060 or 4061
Telecopy: (+43-1) 26060-5813
Electronic mail: uncitral@uncitral.org
Internet home page: www.uncitral.org

B. Information on the interpretation of legislation based on the Model Law

32. The UNCITRAL secretariat welcomes comments concerning the Model Law and the Guide to Enactment, as well as information concerning enactment of legislation based on the Model Law. Once enacted, the Model Law will be included in the CLOUT information system, which is used for collecting and disseminating information on case law relating to the conventions and model laws that have emanated from the work of UNCITRAL. The purpose of the system is to promote international awareness of the legislative texts formulated by UNCITRAL and to facilitate their uniform interpretation and application. The

UNCITRAL secretariat publishes, in the six official languages of the United Nations, abstracts of decisions and arbitral awards. In addition, upon individual request and subject to any copyright and confidentiality restrictions, the UNCITRAL secretariat makes available to the public all decisions and arbitral awards on the basis of which the abstracts were prepared. The system is explained in a user's guide that is available from the UNCITRAL secretariat in hard copy (A/CN.9/SER.C/GUIDE/1/Rev.2) and on the above-mentioned Internet home page of UNCITRAL.

VI. Article-by-article remarks

Chapter I. Scope of application and general provisions

Article 1. Scope of application

33. Article 1 is based on recommendations 1-7 of the Secured Transactions Guide (see chap. I, paras. 1-4). It is intended to set out the various types of transaction and asset covered by the Model Law (see art. 1, paras. 1-4), as well as to clarify the relationship between the Model Law and other law (see art. 1, paras. 5 and 6). Generally, the Model Law has the same comprehensive scope of application as the Secured Transactions Guide and applies to any property right in any type of movable asset, such as equipment, inventory and receivables, provided that the property right is created by an agreement and secures payment or other performance of an obligation (see art. 1, para. 1, and the definition of the term "security right" in art. 2, subpara. (ii)). However, there are a few differences between the scope of the Model Law and the scope of the Secured Transactions Guide.

34. Like the Secured Transactions Guide (see rec. 3) and the Assignment Convention (see art. 1, para. 1, and art. 2, subpara. (a)), the Model Law also applies to outright transfers of receivables (see art. 1, para. 2). The main reasons for this approach are that: (a) outright transfers of receivables take place in the context of financing transactions; and (b) it is sometimes difficult to determine at the outset of a transaction whether an assignment will be held to be an outright or a security assignment (see Secured Transactions Guide, chap. I, paras. 25-31). The enacting State may wish to consider excluding from the scope of the Model Law certain types of outright transfers of receivables that are not financing transactions (e.g. outright transfers of receivables for collection purposes only or as part of a sale of the business out of which they arose; see para. 39 below).

35. In addition, unlike the Secured Transactions Guide which covered security rights in the right to receive payment under an independent undertaking (see rec. 2, subpara. (a)), the Model Law excludes from its scope security rights in both the right to receive and the right to request payment under an independent guarantee or letter of credit, whether commercial or standby (see art. 1, subpara. 3(a)). The reason is that there are various specialized financing practices in those areas and dealing with them in the Model Law would be unduly complex. States interested in addressing those practices in their general secured transactions law can always implement the relevant recommendations of the Secured Transactions Guide (recs. 27, 50, 107, 127, 176 and 212).

36. Moreover, like the Secured Transactions Guide (see rec. 4, subpara. (b)), to the extent that its provisions are inconsistent with law relating to intellectual property, the Model Law defers to law relating to intellectual property (see art. 1, subpara. 3(b)). This limitation may not be necessary if the enacting State has already coordinated or otherwise addressed the relationship between the Model Law and its law relating to intellectual property.

37. Also, unlike the Secured Transactions Guide (see rec. 4, subpara. (c)), the Model Law does not exclude from its scope security rights in non-intermediated securities (see art. 1, subpara. 3(c)). The reasons for this approach are that: (a) such securities often are part of commercial finance transactions (in which, for example, it is common for the lender's security to include in the assets to be encumbered shares of the borrower's wholly-owned subsidiaries or the shares of the borrower itself); (b) there are wide divergences among national regimes in this regard; and (c) such securities are not addressed in any other uniform law text. To the contrary, security rights in intermediated securities are excluded as such securities are typically part of financial market transactions and are addressed in other uniform law texts; see Secured Transactions Guide, chap. 1, paras. 37 and 38).

38. Finally, the Model Law excludes payment rights under or from financial contracts governed by netting agreements (see art. 1, subpara. 3(d)), including foreign exchange transactions, because they raise complex issues that require special rules (see Secured Transactions Guide, chap. I, para. 39).

39. Combining the policy of recommendations 4, subparagraph (a), and 7 of the Secured Transactions Guide, the Model Law permits the enacting State to exclude further types of asset (or transaction), provided that other law governs the matters that are addressed in the Model Law (see art. 1, subpara. 3(e)). The reason for this approach is to avoid inadvertently creating gaps (where other law does not govern an issue addressed in the Model Law) or overlaps (where other law governs an issue addressed in the Model Law). In addition, the Model Law provides guidance to States as to possible exclusions, referring to types of asset, such as ships and aircraft, that are subject to specialized secured transactions and asset-based registration regimes.

40. Similarly, with respect to the application of the Model Law to proceeds, while the relevant provision of the Model Law (see art. 1, para. 4), is formulated somehow differently from recommendation 6 of the Secured Transactions Guide, there is no policy difference between the two rules. The policy may be explained as follows. In the case of a security right in an asset covered by the Model Law (e.g. receivables), the security right extends to its identifiable proceeds (see art. 10, para. 1); this rule applies even if the proceeds are of a type of asset that is outside the scope of the Model Law (e.g. as intermediated securities), except other law applies and governs the matters addressed in the Model Law.

41. With respect to the relationship with consumer protection law, the Model Law is intended to preserve the application of consumer protection law that protects a grantor or a debtor of an encumbered receivable (see art. 1, para. 5, of the Model Law rec. 2, subpara. (b), of the Secured Transactions Guide and art. 4, para. 4, of the Assignment Convention). For example, under consumer-protection law, it may not be possible to create a security right in all present and future assets, employment benefits, at least up to a certain amount, or necessary household items of a consumer. Enacting States that do not have a developed consumer-protection law may need to consider whether enactment of the Model Law should be accompanied by the enactment of such special protections for consumers. It should also be noted that the Model Law already includes certain consumer-specific rules. For example, under article 23, an acquisition security right in consumer goods is effective against third parties upon its creation (see also para. 119 below).

42. Following the approach of the Secured Transactions Guide (see rec. 18), the Model Law (see art. 1, para. 6), is intended to preserve limitations to the creation or the enforceability of a security right in certain types of asset (e.g. employment benefits) that are based on any other statutory or case law. At the same time, it is intended to ensure that such limitations based on the sole ground that an asset is a future asset or a part or undivided interest in an asset are overridden (see art. 8, paras. (a) and (b)). However, paragraph 6 does not apply to contractual limitations (also known as negative pledge agreements). The Model Law overrides explicitly contractual limitations on the creation of a security right in receivables (see art. 13) or rights to payment of funds credited to a bank account (see art. 15). [With respect to other types of asset, contractual limitations on the creation of a security right are overridden implicitly to the extent that the Model Law allows the owner of an asset to create a security right in that asset, even if the security or other agreement expressly restricts that right. The Model Law does not condition the creation, third-party effectiveness or priority of a security right in an asset on the grantor having the right to encumber it (art. 6, para. 1, refers also to the “power to encumber”; see para. 78 below). However, the rights and obligations of third-party obligors are determined by the other law (see arts. 59-69).]

43. Finally, unlike the Secured Transactions Guide, the Model Law does not apply to attachments to movable or immovable property. Thus, the Model Law does not include a provision along the lines of recommendation 5, which provides that, while the law recommended in the Secured Transactions Guide does not apply to immovable property, it does apply to attachments to immovable property. Enacting States are encouraged to include in their enactments of the Model Law provisions based on the relevant recommendations

of the Secured Transactions Guide (see recs. 21, 25, 43, 48, 87, 88, 164, 165, 184, 195 and 196).

Article 2. Definitions and rules of interpretation

44. Article 2 contains definitions and rules of interpretation with respect to most key terms used in the Model Law. Other terms are defined or explained in various articles of the Model Law. For example, the term "registry" is defined in article 1, subparagraph (k), of the Model Registry-related Provisions. Article 2 is based on the terminology and rules of interpretation of the Secured Transactions Guide (see Secured Transactions Guide, Introduction, paras. 15-20). Rules of interpretation include the following: (a) the word "or" is not intended to be exclusive; (b) the singular includes the plural and vice versa; and (c) the words "include" or "including" are not intended to indicate an exhaustive list (see Secured Transactions Guide, Introduction, para. 17).

Acquisition security right

45. An acquisition security right is a security right that secures the grantor's obligation with respect to credit provided to enable the grantor to acquire a tangible asset (other than reified intangible assets; see art. 2, subparas. (b) and (jj)), intellectual property and the rights of a licensee in intellectual property. This definition, in conjunction with the definition of "security right," results in retention-of-title transactions, conditional sales and financial leases being treated in the Model Law as "acquisition security rights." For a security right to be an acquisition security right, the credit it secures has to be used for that purpose. Where a security right secures obligations in addition to the credit extended and used for the purpose of acquiring the encumbered asset, it is an ordinary security right to the extent of those additional obligations.

Bank account

46. To underline the distinction between a "bank account" and a "securities account", the Model Law defines: (a) the former term as "an account maintained by [essentially, a deposit taking institution] to which funds may be credited or debited"; (b) the latter term as "an account maintained by an intermediary to which securities may be credited or debited"; and (c) the term "securities" in a manner that clearly excludes funds (see art. 2, subparas. (c), (gg) and (ff) respectively). The term "bank account", therefore, includes any current or checking and savings account. The term does not include a right against the bank to payment evidenced by a negotiable instrument. The enacting State may wish to consider including a definition of the term "bank" in its secured transactions law or rely for this purpose on other law.

Certificated non-intermediated securities

47. The term "represented" used in the definition of the term "certificated non-intermediated securities" (see art. 2, subpara. (d)) is broad enough to cover the approaches taken in different jurisdictions (e.g. "covered" or "embodied"). The term "certificate" means only a tangible document subject to physical possession. Thus, securities represented by an electronic certificate are considered to be uncertificated securities under the Model Law.

Competing claimant

48. A competing claimant may have a right in the same encumbered asset as original encumbered asset or as proceeds (see art. 2, subpara. (e)). Other creditors of the grantor with a right in the same encumbered asset include judgement creditors.

Consumer goods

49. Unlike the definition of the term "consumer goods" in the Secured Transactions Guide on which it is based, the definition of the term in the Model Law (see art. 2, subpara. (f)) includes the word "primarily" to ensure that: (a) goods used primarily for personal family or household purposes and only incidentally for business purposes would be treated as

consumer goods; and (b) goods used primarily for business purposes and only incidentally for personal, family or household purposes would not be treated as consumer goods.

Control agreement

50. While the effect of a control agreement is to render a security right effective against third parties (see art. 18), its purpose is to ensure: (a) the cooperation of the depositary institution or the issuer of securities in the enforcement of a security right; and (b) the priority of the secured creditor that has control. Unlike the definition of this term in the Secured Transactions Guide, on which it is based, the definition of the term in the Model Law does not refer to a "signed writing" (see art. 2, subpara. (g)). This difference does not reflect a policy change but rather a decision that this matter should be left to the authorization requirements of the enacting State. In any case, a control agreement does not need to be in a single writing. It should also be noted that, on the assumption that other law would address this matter, the Model Law does not include a provision implementing the recommendations of the Secured Transactions Guide with respect to electronic communications (see Secured Transactions Guide, recs. 11 and 12).

Equipment

51. Unlike the definition of the term "equipment" in the Secured Transactions Guide on which it is based, the definition of the term in the Model Law includes the word "primarily" to ensure that: (a) goods used by a person primarily in the operation of its business and only incidentally for other purposes would be treated as equipment; and (b) goods used by a person primarily for other purposes and only incidentally in the operation of its business would not be treated as equipment (see art. 2, subpara. (l)). This definition also includes the words "or intended to be used" to ensure that goods are treated as equipment as long as their intended use is in the operation of a person's business. This definition also includes the words "other than inventory" to draw a distinction between "equipment" and "inventory".

Insolvency representative

52. As defined in the Model Law (see art. 2, subpara. (p)), the term "insolvency representative" is sufficiently broad to include the person responsible for administering or supervising insolvency proceedings (see UNCITRAL Legislative Guide on Insolvency Law (the "Insolvency Guide"), part two, chap. III, paras. 11-18 and 35).

Intangible asset

53. The term "intangible asset" includes receivables, rights to the performance of obligations other than receivables, rights to payment of funds credited to a bank account and uncertificated non-intermediated securities, as well as any asset other than a tangible asset (see art. 2, subpara. (q)).

Inventory

54. In States in which a licence of tangible assets is possible, the term "lease of tangible assets" in this definition includes the licence of tangible assets (see art. 2, subpara. (r)).

Money

55. The term "money", whose definition is based on a definition contained in the Secured Transactions Guide, is intended to include not only the national currency (i.e. banknotes and coins, as well as virtual currency, such as bitcoin) of the enacting State but also the currency of another State (see art. 2, subpara. (u)) No reference is made to currency "currently" authorized as a legal tender, because if currency is not "currently" authorized as a legal tender, it would not qualify as a legal tender. Rights to payment of funds credited to a bank account and negotiable instruments are recognized as distinct concepts in the Model Law and they are not included in the term "money".

Non-intermediated securities

56. The term "non-intermediated securities" refers to securities (i.e. shares and bonds) that are not held in a securities account (see art. 2, subpara. (v)). The term does not include the

rights of an intermediary or a competing claimant in securities held by the intermediary directly against the issuer where equivalent securities are credited by the intermediary to a securities account in the name of the grantor.

Notification of a security right in a receivable

57. The definition of the term "notification of a security right in a receivable" is based on the definition of the term "notification of the assignment" and recommendation 118 of the Secured Transactions Guide (see art. 2, subpara. (y)). The requirement for the identification of the encumbered receivable and the secured creditor was moved to article 60, paragraph 1, as it states a substantive rule on the effectiveness of a notification of a security right, a matter that is already addressed in that article.

Possession

58. […]

Priority

59. The definition of the term "priority" is based on the definition in article 5, subparagraph (g), of the Assignment Convention (see art. 2, subpara. (aa)). The difference in its formulation from the formulation of the definition of the term in the Secured Transactions Guide is due to the need to clarify that the person with priority may be a person with a security right or another competing claimant.

Proceeds

60. The term "proceeds" in the Model Law has the same meaning as in the Secured Transactions Guide (see art. 2, subpara. (bb)). It is important to note that it covers: (a) proceeds of the sale or other disposition, lease or licence of an encumbered asset (broadly understood); (b) proceeds of proceeds; and (c) natural or civil fruits. The terms revenues, dividends and distributions, which were included in the definition of this term in the Secured Transactions Guide, have been deleted on the understanding that they are covered by the term "civil fruits".

61. The term is not limited to proceeds received by the grantor but includes proceeds received by a transferee of an encumbered asset. The reason for this approach is that, if such a limitation were imposed, a transferee of an encumbered asset that acquired the asset subject to the security right could sell the asset further and keep the proceeds free of the security right. This result would limit the extent to which the secured creditor would be actually secured, in particular if the value of the encumbered asset diminished or the proceeds disappeared or were difficult to trace. In addition, transferees are anyway protected by other provisions of the Model Law. For example, a security right in certain types of identifiable proceeds is effective against third parties only for a short period of time and, thereafter, only if it is made effective against third parties by one of the relevant methods of third-party effectiveness (see. art. 19, para. 2); and a buyer or other transferee of an encumbered asset acquires its rights free of the security right, if the secured creditor authorized the sale or other transfer free of the security right, or if the sale or other transfer was in the ordinary course of business of the seller or other transferor (see art. 32, para. 2).

62. However, it should be noted that, as a result of the approach of the Model Law, in certain circumstances, third-party transferees would have no way of finding out that the assets were proceeds of another asset in which somebody else had a security right. This would apply be the case at least where the proceeds would be cash proceeds and a security right in such proceeds would be effective against third parties without the registration of an amendment notice (see art. 19, para. 1, of the Model Law and art. 26, option C, of the Model Registry-related Provisions). Thus, the enacting State may wish to consider limiting the term "proceeds" to proceeds received by the grantor or consider other ways to avoid a prejudice to third-party financiers (e.g. requiring the registration of an amendment notice in the case of a transfer of an encumbered asset; see art. 26, option A or B, of the Model Registry-related Provisions or protecting good faith transferees).

Receivable

63. Like the Secured Transactions Guide, the Model Law defines the term "receivable" in a broad way to cover even non-contractual receivables, such as tort receivables (see art. 2, subpara. (cc)). However, the term "receivable" does not include rights to payment evidenced by a negotiable instrument, rights to payment of funds credited to a bank account and rights to payment under a non-intermediated security, as they are treated as distinct types of asset that are subject to different asset-specific rules.

Secured obligation

64. The term "secured obligation" includes any obligation secured by a security right, including obligations arising from credit extended to finance the operation of a business or the purchase of goods (see art. 2, subpara. (ee)). It includes: (a) monetary and non-monetary obligations (see art. 2, subpara. (ii)); and (b) obligations already incurred at the time of the extension of the credit, as well as obligations incurred thereafter, if the security agreement so provides. As in other UNCITRAL texts, in the Model Law also the singular includes the plural and vice versa (see para. 44 above). So, for example, a reference to the secured obligation would be sufficient to cover all present and future secured obligations.

Securities

65. The definition of the term "securities" in the Model Law is narrower than the definition of the term in article 1, subparagraph (a), of the Unidroit Securities Convention (see art. 2, subpara. (ff)). The reason is that, while a broad definition is appropriate for the purposes of that Convention, it is overly broad for the purposes of the Model Law and could result in subjecting security rights in receivables, negotiable instruments, money and other generic intangible assets to the special rules applicable to security rights in non-intermediated securities. In any case, each enacting State would need to coordinate the definition of the term "securities" in its secured transactions law with the definition of the term in its securities transfer law.

Securities account

66. The definition of the term "securities account" in the Model Law is derived from article 1, subparagraph (c), of the Unidroit Securities Convention (see art. 2, subpara. (gg)).

Tangible asset

67. The term "tangible asset" in the Model Law includes consumer goods, equipment and inventory. These terms do not refer to subcategories of tangible assets but rather to the way in which particular tangible assets are used by the grantor (see art. 2, subpara. (jj)). Thus, the same cars could qualify as "consumer goods", if they are used by the grantor for personal, family or household purposes, as "equipment", if they are used by the grantor in the operation of its business, or as "inventory", if the grantor is a car dealer or manufacturer. The term also includes the reified intangible assets listed in the definition except for the purposes of certain articles that contain rules that are non-applicable to reified intangible assets.

International obligations of this State

68. The Model Law leaves to the enacting State the issue whether international treaties (such as the Assignment Convention) prevail over domestic law. For example, in the case of a conflict between a provision of the Model Law and a provision of any treaty or other form of agreement to which an enacting State is a party with one or more other States, the requirements of the treaty or agreement may prevail (see art. 3 of the UNCITRAL Model Law on Cross-Border Insolvency). Such an approach may need to be limited to international treaties that directly address matters governed by the Model Law. In other States, in which international treaties are not self-executing but require internal legislation in order to become enforceable law, such an approach might be inappropriate or unnecessary (see Guide to Enactment and Interpretation of the UNCITRAL Model Law on Cross-Border Insolvency, paras. 91-93).

Article 3. Party autonomy

69. Article 3 is based on article 6 of the Assignment Convention (the first sentence of which is based on art. 6 of the United Nations Convention on Contracts for the International Sale of Goods ("CISG")) and recommendation 10 of the Secured Transactions Guide. It is intended to reflect the principle that, with the exception of the provisions listed in article 3, parties are free to vary by agreement the effect of the provisions of the Model Law as between them.

70. An agreement referred to in paragraph 1 may be not only between the secured creditor and the grantor but also between the secured creditor or the grantor and other parties whose rights may be affected by the Model Law, such as the debtor of an encumbered receivable, or between the secured creditor and a competing claimant.

71. Paragraph 2 reiterates the general principle that an agreement between two parties cannot affect the rights of a third party. The reason for stating a general principle of contract law is that the Model Law deals with relationships in which an agreement between two parties (e.g. the grantor and the secured creditor) might have or inadvertently appear to have an impact on the rights of third parties (e.g. the debtor of a receivable).

Article 4. General standards of conduct

72. Article 4 is based on recommendation 131 of the Secured Transactions Guide (see chap. VII, para. 15). It is included in chapter I on the scope of application and general provisions, rather than in chapter VII on enforcement, as it states a standard of conduct with which parties should comply when they exercise their rights and perform their obligations under the Model Law, even outside the context of enforcement. Under article 4, any person must exercise all its rights and perform all its obligations under the Model Law in good faith and in a commercially reasonable manner. The violation of this obligation may result in liability in damages and other consequences that are left to the relevant law of the enacting State.

73. The concept of "commercial reasonableness" refers to the commercial transaction context and best practices. Meeting the specific standards referred to in other provisions of the Model Law (e.g. art. 76, para. 4, according to which notice is to be given within a short period of time) should generally be construed as meeting the general standards of conduct referred to in this article.

74. Article 4 is listed in article 3 as a mandatory law rule. As a result, the duty to act in good faith and in a commercially reasonable manner cannot be waived or varied by agreement.

Article 5. International origin and general principles

75. Article 5 is inspired by article 7 of the CISG and based on article 3 of the UNCITRAL Model Law on Electronic Commerce, article 4 of the UNCITRAL Model Law on Electronic Signatures and article 2A of the UNCITRAL Model Law on International Commercial Arbitration. It is intended to limit the extent to which a national law implementing the Model Law would be interpreted only by reference to concepts of national law.

76. The Model Law is a tool not only for modernizing but also for harmonizing secured transactions laws (see paras. 21-24 above). To promote harmonization, paragraph 1 provides that the provisions of a national law implementing the Model Law should be interpreted with reference to its international origin and the observance of good faith. Paragraph 2 is intended to provide guidance with respect to the filling of gaps in a law implementing the Model Law by reference to the general principles on which the Model Law is based (see paras. 28 and 29 above).

Chapter II. Creation of a security right

A. General rules

Article 6. Creation of a security right

77. Article 6 is based on recommendations 13-15 of the Secured Transactions Guide (see chap. II, paras. 12-37). Its purpose is to deal with the creation of a security right, as well as the form and the minimum content of a security agreement, so as to enable parties to obtain a security right in a simple and efficient manner (see Secured Transactions Guide, rec. 1, subpara. (c)). A security right is created by agreement, for the content of which there are no requirements other than those listed in paragraphs 3 and 4, and for the conclusion of which no terms of art need be used.

78. Under paragraph 1, an agreement is sufficient to create a security right, provided that at the time of the conclusion of the security agreement the grantor has either a right in the asset to be encumbered or the power to encumber it. This is the case, for example, where: (a) the grantor is the owner of the asset; and (b) the grantor is in possession of the asset on the basis of a security agreement (including a retention-of title sale or conditional lease) with the owner ("possession" is defined as actual possession; see art. 2, subpara. (z)). In addition, it should be noted that a transferor of a receivable can continue to have a right in or the power to encumber the receivable, even if it has already transferred the receivable. Moreover, it should be noted that, in the case of an anti-assignment agreement between the owner/grantor and the debtor of a receivable, the owner/grantor may not have the right as against the debtor of the receivable to transfer or encumber the receivable, but does have a right in the receivable, and also the power to encumber it. Paragraph 2 clarifies that, in the case of future assets (i.e. assets produced or acquired by the grantor after the conclusion of the security agreement; see definition in art. 2, subpara. (n)), the security right is created when the grantor acquires rights in them or the power to encumber them.

79. Paragraph 3 sets out the requirements that a written security agreement has to meet. Whether written or oral, a security agreement creates a security right but need not use any special words to achieve that result (see art. 2, subpara. (hh)). From the two alternative wordings set out in paragraph 3 within square brackets, the enacting State may wish to select the one that is most fitting to its contract law. If the enacting State retains the words "concluded in", a security agreement that is not in written form is not effective. If the enacting State retains the words "evidenced by", a security agreement that is not in written form is in principle effective but its existence may only be evidenced by a writing.

80. Depending on what it considers as most efficient financing practices and reasonable assumptions of market participants, the enacting State may wish to consider whether to retain subparagraph 3(d). One approach is to retain subparagraph 3(d) to facilitate the grantor's access to secured financing from other creditors in situations where the value of the assets encumbered by the prior security right exceeds the maximum amount indicated in the notice registered with respect to that right. Another approach is to leave out subparagraph 3(d) to facilitate the grantor's access to credit by the first secured creditor (for the comparative advantages and disadvantages of the two approaches, see Secured Transactions Guide, chap. IV, paras. 92-97).

81. Under paragraph 4, where the secured creditor is in possession of the encumbered asset, there is no need for a written security agreement and thus the existence of a security agreement may be concluded in or evidenced by any other means.

Article 7. Obligations that may be secured

82. Article 7 is based on recommendation 16 of the Secured Transactions Guide (see chap. II, paras. 38-48). It is primarily intended to ensure that future, conditional and fluctuating obligations may be secured. The main reason for this approach is to facilitate modern financing transactions, in the context of which disbursements are made at different times depending on the needs of the grantor (e.g. revolving credit facilities for the grantor to buy inventory). This approach does not preclude the introduction of special protections for grantors (e.g. setting a maximum amount for which the security right may be enforced; see art. 6, subpara. 3(d); or limiting the creation of a security right in or the transferability of

specific types of movable asset, such as employment benefits in general or up to a specific amount; see art. 1, para. 6).

Article 8. Assets that may be encumbered

83. Article 8 is based on recommendation 17 of the Secured Transactions Guide (see chap. II, paras. 49-57 and 61-70). It is primarily intended to ensure that future movable assets, parts of movable assets and undivided rights in movable assets, generic categories of movable assets, as well as all movable assets of a person, may become the subject of a security right.

84. It should be noted that the fact that future movable assets may be subject to a security right does not mean that statutory limitations to the creation or enforcement of a security right in specific types of movable asset (e.g. employment benefits in general or up to a specific amount) are overridden (see art. 1, para. 6).

85. It should also be noted that the fact that all movable assets of a grantor may be subject to a security right so as to maximize the credit that may be available and improve the terms of the credit agreement does not mean that other creditors of the grantor are necessarily unprotected. The protection of other creditors (within and outside insolvency proceedings) is a matter of other law and is foreseen in articles 33 and 34 of the Model Law.

Article 9. Description of encumbered assets

86. Article 9 is based on recommendation 14, subparagraph (d), of the Secured Transactions Guide (see chap. II, paras. 58-60). In view of their importance, the requirements for the description of encumbered assets in a security agreement are presented in a separate article. Article 9 is intended to ensure that a security right may be created in an asset or class of assets even if the description in the security agreement is generic, such as "all inventory" or "all receivables" (see Secured Transactions Guide, chap. II, paras. 58-60).

Article 10. Right to proceeds and commingled funds

87. Article 10 is based on recommendations 19 and 20 of the Secured Transactions Guide (see chap. II, paras. 72-89). Paragraph 1 is intended to ensure that, unless otherwise agreed by the parties (as this article is not listed in article 4 as a mandatory law rule), a security right in an asset automatically extends to its identifiable proceeds. The rationale for this rule is that it reflects the normal expectations of the parties and ensures that the secured creditor is sufficiently secured. Otherwise, a grantor could effectively deprive a secured creditor of its security either by disposing of those assets to a person who would take free of the security right or to a person from whom those assets could not easily be recovered.

88. By way of example, where the original encumbered asset is inventory, the cash or receivables generated from the sale of the inventory are proceeds. If upon payment of the receivables the funds received are deposited in a bank account, the right to payment of the funds credited to the bank account are also proceeds of the inventory. So, is a check issued by the holder of that bank account to buy new inventory and a warehouse receipt issued by the warehouse in which new inventory may be stored.

89. Paragraph 2 introduces an exception to the identifiability requirement in paragraph 1. A security right in an asset extends to its proceeds in the form of funds that are commingled with other funds even though the funds that are proceeds cannot be identified separately from the funds that are not proceeds (see subpara. 2(a)).

90. Subparagraph 2(b) limits that security right to the value of the proceeds immediately before they were commingled. So, if a sum of €1,000 is deposited in a bank account and at the time of enforcement the bank account has a balance of €2,500, the security right extends to the sum of €1,000.

91. Subparagraph 2(c) deals with situations in which the balance in the bank account fluctuates and, at some point of time, is less than the value of the proceeds deposited (e.g. less than €1,000). In such a case, the security right extends to the lowest value between the time when the proceeds were commingled and the time the security right in the proceeds is claimed. So, if in the example given, the balance in the account when the proceeds were

deposited was €1,500, then it went down to €500 and at the time of enforcement was €750, the security right extends to €500 (i.e. the lowest intermediate balance).

Article 11. Tangible assets commingled in a mass or product

92. Article 11 is based on recommendations 22 and 91 of the Secured Transactions Guide (see chap. II, paras. 90-95 and 100-102, and chap. V, paras. 117-123). It accomplishes three related objectives. First, it transforms the security right in the original asset into a security right in the mass or product. Second, it limits the value of that security right by tying its value to the value of the original asset in the mass or product. Third, it addresses situations in which more than one secured creditor has a claim to a mass or product as a result of a security right in its components.

93. Paragraph 1 is intended to ensure that a security right in assets commingled in a mass or product, even though they are no longer identifiable, continues in the mass or product.

94. Under option A, the security right that extends to a mass or product is limited to the value of the encumbered assets immediately before they were commingled and became part of the mass or product. So, if a secured creditor has a security right in €100,000 worth of oil (100,000 litres at €1 per litre) that is commingled with €50,000 worth of oil in the same tank and thus the mass has €150,000 worth of oil, the security right encumbers €100,000 worth of oil.

95. Under option B, the same rule applies only to products (see para. 3). So, if encumbered flour worth €100 is commingled and bread worth €500 is produced, the security right is limited to €100. But option B (see para. 2) contains a different rule with respect to tangible assets commingled in a mass. In the example just given, the security right is limited to two thirds of the value of the oil (i.e. €100,000 worth of oil).

96. It should be noted that the word “limited” in paragraph 2 of option A and paragraphs 2 and 3 of option B means that, if the value of the encumbered asset commingled in the mass or product increases after commingling, the increased value is unencumbered. In other words, the secured creditor does not benefit from commodity price increases (see Secured Transactions Guide, chap. V, para. 118 ad finem). Similarly, the word “limited” does not address the question of what is the amount secured if the price of the encumbered asset decreases after commingling. The rule applicable to all types of encumbered asset applies to tangible assets commingled in a mass or product, namely that each party bears the risk of decreases of the price of the encumbered asset. Thus, in the example given above, if, at the time of enforcement, the value of the mass is only €75,000 because of a drop on oil prices (€0.5 per litre), the secured creditor should be able to enforce its security right against only €50,000 worth of oil. If the value of the oil goes up (€1.5 per litre), the secured creditor should not benefit from it as its claim is sufficiently secured and thus should be able to enforce its security right against €100,000 worth of oil (not €150,000).

Article 12. Extinguishment of a security right

97. Article 12 deals with the extinguishment of a security right, which triggers the obligation of a secured creditor to return an encumbered asset or register an amendment or cancellation notice (see art. 52 of the Model Law and art. 20, subpara. 3(c), of the Model Registry-related Provisions). Article 12 refers to full payment or other satisfaction of all present and future secured obligations, including conditional obligations. This means that a security right is extinguished only where there is full payment or other satisfaction of the secured obligation and there is no longer any commitment of the secured creditor to extend further credit. As a result, the security right is not extinguished where temporarily there is a zero balance but there is an existing commitment of the secured creditor to extend further credit (e.g. on the basis of revolving credit arrangement).

B. Asset-specific rules

Article 13. Contractual limitations on the creation of a security right

98. Article 13 is based on recommendation 24 of the Secured Transactions Guide (see chap. II, paras. 106-110 and 113), which in turn is based on article 9 of the Assignment

Convention. Paragraph 1 provides that an agreement limiting the grantor's right to create a security right in the receivables listed in paragraph 4 (often referred to as "trade receivables") does not prevent the creation of a security right where such an agreement exists. The rationale underlying this approach is to facilitate the use of receivables as security for credit, which is in the interest of the economy as a whole, without unduly interfering with party autonomy. This rule does not affect statutory limitations to the creation or enforcement of a security right in certain types of receivable (e.g. consumer or sovereign receivables; see art. 1, paras. 5 and 6).

99. Paragraph 2 makes it clear that, while under paragraph 1 a security right is effective notwithstanding an agreement to the contrary, the grantor is not excused from any liability to its counter-party for damages caused by breach of that contractual provision, if such liability exists under other law. Thus, under paragraph 2, if the debtor of the receivable has sufficient negotiating power to force the creditor/grantor to accept the inclusion of an "anti-assignment clause" in their agreement and a breach of that agreement by the grantor results in a loss to the debtor of the receivable, the grantor is liable to the debtor of the receivable for damages under contract law. However, the debtor of the receivable may not avoid the contract because of that breach or raise against the secured creditor (assignee) any claim it may have against the grantor for that breach; in addition, under paragraph 3, a secured creditor that accepts a receivable as security for credit is not liable to the debtor of the receivable for the grantor's breach just because it had knowledge of the "anti-assignment clause". Otherwise, the anti-assignment agreement would in effect prevent a secured creditor from obtaining a security right in a receivable covered by the anti-assignment agreement.

100. As a result of the rules in paragraphs 1-3, a secured creditor does not have to examine each contract from which a receivable might arise to determine whether it contains an anti-assignment clause. This facilitates transactions relating to pools of receivables that are not specifically identified (with respect to which a search of the underlying transactions is possible but not necessarily time- or cost-efficient), as well as transactions relating to future receivables (with respect to which such a search would not be possible at the time of the conclusion of the security agreement).

101. Paragraph 4 limits the scope of the rule in paragraph 1 to broadly defined trade receivables. It does not apply to so-called "financial receivables", because, where the debtor of the receivable is a financial institution, even partial invalidation of an anti-assignment clause could affect obligations undertaken by the financial institution towards third parties (see Secured Transactions Guide, para. 108).

102. Article 13 applies also to anti-assignment agreements limiting the creation of a security right in any personal or property rights securing or supporting payment or other performance of an encumbered receivable or other intangible asset, or negotiable instrument (see art. 14).

Article 14. Personal or property rights securing or supporting payment or other performance of an encumbered receivable or other intangible asset, or negotiable instrument

103. Paragraph 1 reflects the thrust of recommendation 25 of the Secured Transactions Guide (see chap. II, paras. 111-122). It is intended to ensure that a secured creditor with a security right in a receivable or another of the assets described in paragraph 1 automatically has the benefit of any personal right that supports payment or other performance of the receivable (e.g. a guarantee) and any property right that secures such payment or other performance (e.g. a security right in another asset). For example, if a receivable is secured by a guarantee or mortgage, the secured creditor with a security right in that receivable obtains the benefit of that guarantee or mortgage. This means that, if the receivable is not paid, the secured creditor may seek payment from the guarantor or enforce the mortgage (which may require that the secured creditor is registered as a mortgagee; see para. 105 below).

104. Under paragraph 2, which reflects the thrust of article 10 of the Assignment Convention, where the rights securing or supporting payment of a receivable are independent rights (i.e. they are transferable only with a new act of transfer), the grantor is obliged to

transfer the benefit of that right to the secured creditor (e.g. an independent guarantee or stand-by letter of credit).

105. This article does not affect a right in immovable property that under other law is transferable separately from the obligation that the right in the immovable property secures. In addition, this article does not affect any duties of the grantor to the debtor of the receivable or other intangible asset, or the obligor of the negotiable instrument. Moreover, to the extent that the automatic effects of paragraph 1 are not impaired, this article does not affect any requirement under other law relating to the form or registration of the creation of a security right in any asset that is not covered in the Model Law (e.g. registration of a mortgage in the relevant immovable property registry).

Article 15. Right to payment of funds credited to a bank account

106. Article 15 is based on recommendation 26 of the Secured Transactions Guide (see chap. II, paras. 123-125). It is intended to implement article 13 with respect to rights to payment of funds credited to a bank account. As a result of article 15, a security right may be created in a right to payment of funds credited to a bank account without the consent of the depositary institution. However, as a result of article 67, the creation of such a security right does not affect the rights and obligations of the depositary institution or obligate the depositary institution to provide any information about the bank account to third parties.

Article 16. Tangible assets covered by negotiable documents

107. Article 16 is based on recommendation 28 of the Secured Transactions Guide (see chap. II, para. 128). Its purpose is to follow existing law in which a negotiable document is treated as a reified right in the tangible assets it covers. As a result, there is no need separately to create a security right in those tangible assets if there is a security right in the document (e.g. inventory or crops deposited in a warehouse for which the warehouse operator issued a negotiable warehouse receipt).

108. In view of the definition of the term "possession" in article 2, subparagraph (z), possession of the issuer of a negotiable document includes possession by its representative or a person acting on behalf of the issuer (including in the context of multi-modal transport contracts). A security right in a negotiable document extends to the tangible assets covered by the document and will continue to exist even after the document no longer covers the assets. However, effectiveness against third parties through possession of the document applies only as long as the document covers the assets and lapses once they are released by the issuer (see art. 25, para. 2, and para. 122 below).

Article 17. Tangible assets with respect to which intellectual property is used

109. Article 17 is based on recommendation 243 of the Intellectual Property Supplement (see paras. 108-112). It is intended to ensure that: (a) unless otherwise agreed (as art. 17 is not listed in art. 3 among the mandatory law provisions of the Model Law), a security right in a tangible asset does not automatically extend to the intellectual property right contained therein; and (b) that a security right in an intellectual property right does not automatically extend to the tangible asset with respect to which the intellectual property right is used (e.g. the copyrighted software included in a personal computer or the trademark on an inventory of clothes).

Chapter III. Effectiveness of a security right against third parties

A. General rules

Article 18. Primary methods for achieving third-party effectiveness

110. Article 18 is based on recommendation 32 of the Secured Transactions Guide (see chap. III, paras. 19-86). It is intended to set out the primary methods for achieving third-party effectiveness (i.e. registration in the general security rights registry and possession of a tangible asset by the secured creditor). Other methods (e.g. control and

registration in the books of an issuer of securities) are set out in the asset-specific provisions of this chapter (see paras. 120-124 below).

111. States that have specialized registries with respect to assets covered by the Model Law (e.g. patent or trademark registries) or title notation systems (e.g. with respect to motor vehicles) may wish to consider whether registration with respect to security rights in those types of asset should take place in the security rights registry, in a specialized registry or both. If registration may take place in both (or, if a security right may also be noted on a title certificate), the enacting State may wish to ensure coordination (with national or international specialized registries), including by way of linking the relevant registries so that information entered in one will also become available in the other and by way of appropriate priority rules (see Secured Transactions Guide, chap. IV, para. 117, and Registry Guide, paras. 64-66). With respect to security rights in attachments to immovable property and receivables arising from sale or lease of, or secured by, immovable property, the enacting State may wish to consider issues of coordination with immovable property registries (see Registry Guide, paras. 67-69). Finally, the enacting State may wish to consider issues of international coordination among national security rights registries (Registry Guide, para. 70).

Article 19. Proceeds

112. Article 19 is based on recommendations 39 and 40 of the Secured Transactions Guide (see chap. III, paras. 87-96). It is intended to determine the circumstances in which the security right in proceeds that is provided for in article 10 is effective against third parties.

113. Under paragraph 1, a security right in proceeds in the form of money, receivables, negotiable instruments or rights to payment of funds credited to a bank account is automatically effective against third parties, that is, without the need for any further act. For example, upon the sale of inventory that is subject to a security right that is effective against third parties, the security right in any receivable, cash, bank deposit, or check generated by the sale that are proceeds of the originally encumbered inventory is effective against third parties without any further act.

114. Unlike recommendation 39, on which this article is based, paragraph 1 does not refer to the description of the proceeds in the notice. This change is a drafting change and does not constitute a change of policy. The reason for this change is that, once the proceeds are described in the notice (in line with the security agreement), they constitute original encumbered assets, and article 18 is sufficient in dealing with the third-party effectiveness of a security right in those assets.

115. For proceeds other than those covered in paragraph 1, paragraph 2 provides that, if a security right in an asset was effective against third parties, the security right in its proceeds is effective against third parties for a short period of time; thereafter, the security right in the proceeds continues to be effective against third parties only, if before the expiry of that short period, it is made effective against third parties by one of the methods set out in article 18 or the asset-specific provisions of this chapter.

Article 20. Changes in the method for achieving third-party effectiveness

116. Article 20 is based on recommendation 46 of the Secured Transactions Guide (see chap. III, paras. 120 and 121). It is intended to ensure that a security right made effective by one method may later be made effective by another method, and that third-party effectiveness is continuous as long as there is no time gap between the two methods.

Article 21. Lapse in third-party effectiveness

117. Article 21 is based on recommendation 47 of the Secured Transactions Guide (see chap. III, paras. 122-127). It is intended to ensure that, if third-party effectiveness lapses, it may be re-established. In such a case, third-party effectiveness dates only from the time it is re-established.

Article 22. Continuity in third-party effectiveness upon a change of the applicable law to this Law

118. Article 22 is based on recommendation 45 of the Secured Transactions Guide (see chap. III, paras. 117-119). Under paragraph 1, if the law enacting the Model Law becomes applicable as a result, for example, of a change in the location of the encumbered asset or the grantor, a security right that was effective against third parties under the previously applicable law continues to be effective against third parties under the law enacting the Model Law for a short period of time, unless its third-party effectiveness under the initially applicable law has already lapsed. Thereafter, the security right is effective against third parties only if, before the expiry of that period, it is made effective against third parties under the relevant provisions of the law enacting the Model Law. Under paragraph 2, if the third-party effectiveness of a security right does not lapse, it dates back to the time it was first achieved under the previously applicable law.

Article 23. Acquisition security rights in consumer goods

119. Article 23 is based on recommendation 179 of the Secured Transactions Guide (see chap. IX, paras. 125-128). An acquisition security right in consumer goods is automatically effective against third parties [except as against buyers or other transferees, lessees or licensees of the consumer goods] [if the consumer goods are below a value to be specified by the enacting State]. This limitation is intended to [require registration for a security right in consumer goods to be effective against buyers or other transferees, lessees or licensees of consumer goods] [to exempt from registration only low-value consumer transactions]. If registration in a specialized registry or notation in a title certificate is also possible, such an acquisition security right in consumer goods should not have the special priority of an acquisition security right over a security right registered in a specialized registry. This approach would be necessary to avoid any interference with any specialized registration system (see Secured Transactions Guide, recs. 179 and 181).

B. Asset-specific rules

Article 24. Rights to payment of funds credited to a bank account

120. Article 24 is based on recommendation 49 of the Secured Transactions Guide (see chap. III, paras. 138-148). It adds to the primary methods of article 18 three asset-specific methods of achieving third-party effectiveness of a security right in a right to payment of funds credited to a bank account. First, if the secured creditor is the depositary institution, no additional action is required for a security right to become effective against third parties. Second, the security right is effective against third parties upon conclusion of a control agreement (see art. 2, subpara. (g)(ii)) among the grantor, the secured creditor and the depositary institution. Third, the security right is effective against third parties if the secured creditor becomes the account holder. The exact action required for the secured creditor to become the account holder depends on the relevant law and practice of the enacting State.

Article 25. Negotiable documents and tangible assets covered by negotiable documents

121. Article 25 is based on recommendations 51-53 of the Secured Transactions Guide (see chap. III, paras. 154-158). It addresses the relationship between the third-party effectiveness of a security right in a negotiable document and the third-party effectiveness of a security right in the tangible assets covered by the document.

122. Under paragraph 1, if a security right in a negotiable document (which extends to the assets covered by the document under article 16) is effective against third parties, the security right in the assets covered by the document is also effective against third parties for as long as the assets are covered by the document. Under paragraph 2, possession of the document is sufficient to make the security right in the assets covered by the document effective against third parties. Under paragraph 3, the security right referred to in paragraph 2 remains effective against third parties for a short period of time after the secured creditor relinquishes the possession of the document for the purpose of enabling the grantor to deal with the assets covered by it.

Article 26. Uncertificated non-intermediated securities

123. Article 26 is a new provision that does not correspond to any of the recommendations of the Secured Transactions Guide, which did not apply to any type of securities (see rec. 4, subpara. (c)). It addresses the methods, other than registration of a notice, by which a security right in uncertificated non-intermediated securities may be made effective against third parties. First, the security right may be made effective against third parties by notation of the security right or entry of the name of the secured creditor as the holder of the securities in the books maintained by the issuer or another person on behalf of the issuer for that purpose (the enacting State should choose the method that best suits its legal system). Second, as in the case of a security right in a right to payment of funds credited to a bank account, the conclusion of a control agreement with respect to the encumbered securities will result in the security right in those securities being effective against third parties.

124. Under article 19 of the Convention Providing a Uniform Law For Bills of Exchange and Promissory Notes (Geneva, 1930; the "Geneva Uniform Law"), "when an endorsement contains the statements 'value in security' ('valeur en garantie'), 'value in pledge' ('valeur en gage'), or any other statement implying a pledge, the holder may exercise all the rights arising out of the bill of exchange, but an endorsement by him has the effects only of an endorsement by an agent" (art. 22 of the United Nations Convention on International Bills of Exchange and International Promissory Notes (the "Bills and Notes Convention") contains a similar rule, according to which such a holder "may endorse the instrument only for purposes of collection"). An enacting State that has enacted the Geneva Uniform Law (or the Bills and Notes Convention) may wish to include: (a) this rule in its enactment of the Model Law (as a rule of creation and/or third-party effectiveness of a security right in negotiable instruments, negotiable documents and non-intermediated securities); and (b) a rule dealing with the comparative priority of such a security right. Another option would be to leave the matter to articles 44, paragraph 2, 47, paragraph 3, and 49, paragraph 3, under which such a holder of a negotiable instrument, negotiable document or non-intermediated security would take its rights free of, or unaffected by, any security right. A further option would be to leave the matter to the relevant domestic law rule dealing with the hierarchy between domestic law and an international convention (see para. 68 above).

Note by the Secretariat on a draft guide to enactment of the draft model law on secured transactions

ADDENDUM

Contents

Chapter IV. The registry system

Article 27. Establishment of a registry

1. Article 27, which is based on recommendation 1, subparagraph (f), of the Secured Transactions Guide and recommendation 1 of the Registry Guide, provides for the establishment by the enacting State of a public registry to give effect to the provisions of the Model Law relating to the registration of notices with respect to security rights. In particular, under article 18 of the Model Law, a non-possessory security right in an encumbered asset is effective against third parties, as a general rule, only if a notice with respect to the security right is registered in the registry (see Secured Transactions Guide, chap. III, paras. 29-46 and the Registry Guide, paras. 20-35). Under article 28 of the Model Law, the time of registration is also relevant, again as a general rule, to the ordering of priorities among competing claimants (see Secured Transactions Guide, chap. V, paras. 42-50, and the Registry Guide, paras. 36-46).

2. Depending on its drafting conventions, an enacting State may decide to incorporate the provisions relating to the registry system in its secured transactions law enacting the Model Law, in a separate law, or in another legal instrument, such as rules, regulations, orders, by-laws or the like issued by a governmental authority, or in a combination thereof. To preserve flexibility for enacting States, all the relevant provisions are collected below in a set of rules presented after article 27 of the Model Law and called the "Model Registry-related Provisions".[1]

3. These Provisions have been drafted to accommodate flexibility in registry design. The Secured Transactions Guide recommends that, if possible, the Registry should be electronic (see Secured Transactions Guide, rec. 54, subpara. (j)). The registry record should be electronic in the sense of permitting information in registered notices to be stored in electronic form in a single computer database (see Secured Transactions Guide, rec. 54, subpara. (j)(i), and chap. IV, paras. 38-41 and 43). An electronic registry record is the most efficient and practical means of enabling enacting States to implement the recommendations of the Secured Transactions Guide that the registry record should be centralized and consolidated (see rec. 54, subpara. (e), and chap. IV, paras. 21-24).

4. The access to registry services should be electronic in the sense of permitting the direct electronic submission of notices and search requests by users over the Internet or via direct

[1] A reference to an article in this chapter is a reference to an article of the Model Registry-related Provisions, unless otherwise indicated.

networking systems as an alternative to the submission of paper notices and search requests (see Secured Transactions Guide, rec. 54, subpara. (j)(ii), and chap. IV, paras. 23-26 and 43). This approach eliminates the risk of human error in entering the information contained in a paper notice into the registry record, facilitates speedier and more efficient access to registry services by users, and greatly reduces the operational costs of the registry process (for a discussion of these advantages and guidance on implementation, see Registry Guide, paras. 82-89).

5. Some States provide for the registration in their general security rights registries of notices in addition to those contemplated by the Model Law, such as, for example, notices relating to judgements obtained by unsecured creditors against their debtors, non-consensual non-possessory security rights, non-consensual preferential claims or non-possessory ownership rights of commercial consignors or long-term lessors (see Registry Guide, paras. 40, 46, 50 and 51). If the enacting State follows this approach, it will need to specify whether registration is necessary for the creation or third-party effectiveness of these other rights and the priority effect of registration, including priority as against rights within the scope of the Model Law.

Model Registry-related Provisions

Section A. General rules

Article 1. Definitions and rules of interpretation

6. Article 1 contains definitions of key terms used in the Model Registry-related Provisions. These terms are derived in part from the Registry Guide (see Registry Guide, paras. 8 and 9). If the enacting State decides to incorporate the Model Registry-related Provisions in its enactment of the Model Law, these definitions should be included in the provision of the secured transactions law implementing article 1 of the Model Law. In general, the definitions are self-explanatory. Where elaboration is needed, it is provided in the commentary on the relevant articles below.

Article 2. Grantor's authorization for registration

7. Article 2 is based on recommendations 71 of the Secured Transactions Guide (see chap. IV, para. 106) and 7, subpara. (b), of the Registry Guide (see para. 101). Paragraph 1 states the basic principle that the registration of an initial notice is ineffective unless authorized by the grantor in writing (the rule is formulated in the negative, as effectiveness of a registration is also subject to other requirements). To ensure that this basic rule does not interfere with the efficiency of the registration process, paragraph 6 confirms that the authorization is to be given off-record. Thus, the Registry is not entitled to require evidence of the existence of the grantor's registration as part of the registration process.

8. Paragraphs 4 and 5 confirm that: (a) the grantor's authorization need not be obtained before registration; and (b) the conclusion of a written security agreement with the grantor automatically constitutes authorization without the need to include an express authorization clause. Thus, the post-registration conclusion of a security agreement will constitute "ratification" of an initially unauthorized registration to the extent of the assets described in the security agreement. If the security agreement covers a narrower range of encumbered assets than that described in the registered notice, the registration would still be unauthorized to the extent of those additional assets. However, if the parties were to later conclude a new security agreement covering the additional assets, this would constitute retroactive authorization.

9. Paragraph 2 requires the grantor's authorization for the registration of an amendment notice that adds encumbered assets to those described in the initial registered notice or any amendment notice. The grantor's authorization is not needed if the amendment notice adds assets that are covered by a security agreement between the parties, since under paragraph 6 the conclusion of a security agreement automatically constitutes authorization. Moreover, as explained above, authorization may be given under paragraph 4 before the registration of a notice. Consequently, the subsequent conclusion of a security agreement covering the

additional assets would constitute retroactive authorization for the registration of the amendment notice.

10. It should be noted that there is no need to register an amendment notice (and thus no need to obtain the authorization of the grantor) with respect to "additional assets" that are proceeds of encumbered assets described in a prior registered notice if the proceeds are: (a) of a type that fall within the existing description (for example, the description covers "all tangible assets" and the grantor exchanges one type of tangible asset for another (see Secured Transactions Guide, rec. 39); or (b) "cash proceeds", that is, money, receivables, negotiable instruments or funds credited to a bank account (see art. 16, para. 1, of the Model Law).

11. Under the bracketed language in paragraph 2, the grantor's written authorization must also be obtained for the registration of an amendment notice to increase the maximum amount set out in a registered notice for which the security right to which the registration relates may be enforced. This provision is only needed in systems that require this information to be set out in the security agreement and in the registered notice (see art. 8, subpara. (e)). A separate authorization from the grantor is not needed if the grantor has agreed to a new amount in a security agreement since the conclusion of a security agreement automatically constitutes authorization under paragraph 6 (even if the agreement is concluded after the registration of the amendment notice).

12. Where an amendment notice seeks to add a new grantor, paragraph 3 requires the additional grantor's written authorization to be obtained in line with the general principle in paragraph 1 and in the same manner. The bracketed wording in paragraph 3 is necessary only if the enacting State implements option A or option B of article 26. It creates an exception to the requirement to obtain the grantor's written authorization where the new grantor is a transferee of an encumbered asset from the original grantor and the purpose of the amendment is to enable the secured creditor to protect its priority status as against claimants that acquire rights in the encumbered asset from that transferee in accordance with these options. Likewise, where the grantor identifier changes after the registration, the grantor's authorization is not required for the registration of an amendment notice to disclose the new identifier of the grantor for the purposes of protecting the priority of the security right against subsequent claimants dealing with the grantor after the change of name pursuant to article 25.

13. The registration of a notice, whether or not authorized by the grantor, is effective against third parties only to the extent that the assets described in the registered notice are actually covered by a security agreement between the parties. However, third parties have no means of obtaining this information with a search of the public registry record. Consequently, the grantor's ability to sell, or create a security right in, the assets described in a registered notice will be impaired, even if those assets are not subject to a security right, because of the priority risk for subsequent secured creditors and buyers posed by the potential existence of a security right. If the grantor did not authorize the registration of the notice, or only authorized the registration of a notice covering a narrower range of encumbered assets, article 20 provides a procedure by which the grantor can compel the secured creditor to register a cancellation or amendment notice as the case may be. This procedure is not available, however, if the grantor separately authorized the registration of a notice covering the assets described in the notice even if any actual or contemplated security agreement between the parties only covers a narrower range of assets.

14. While this point is not directly relevant to the issue of the grantor's authorization in article 2, it should be noted that registration of an amendment notice may affect intervening competing claimants, if it: (a) adds encumbered assets; (b) increases the maximum amount; or (c) adds a new grantor. Thus, it takes effect only from the time when the registration of the amendment notice (not the initial notice) becomes effective (see art. 13, para. 1).

Article 3. One notice sufficient for multiple security rights

15. Article 3 is based on recommendations 68 of the Secured Transactions Guide (see chap. IV, para. 101) and 14 of the Registry Guide (see paras. 125 and 126). It confirms that a single registered notice is sufficient to achieve the third-party effectiveness of security rights arising under one or more security agreements between the parties identified in the notice. This rule applies regardless of whether the agreements are related to one another or

are separate and distinct, and regardless of whether the notice relates to security rights in the grantor's current assets or assets in which the grantor acquires rights only after the registration. This is consistent with the notice registration system contemplated by the Model Law, under which a registrant need only submit a standardized "notice" containing basic information about the parties and the encumbered assets rather than having to register the underlying security agreements giving rise to the security rights to which the registration relates (see arts. 8 and 17-19).

16. A single registration is effective for security rights arising under one or more security agreements between the parties identified in the notice only to the extent that the information in the registered notice corresponds to the content of off-record agreements between those parties (see Registry Guide, para. 126). If, for example, the parties enter into a security agreement that extends to assets not covered by the description of the encumbered assets in the registered notice, a new initial notice (or an amendment to the existing notice) will have to be registered for the security right in the additional assets to be effective against third parties, and that notice will take effect against third parties only from the time of its registration (see art. 13, para. 1).

Article 4. Advance registration

17. Article 4 is based on recommendations 67 of the Secured Transactions Guide (see chap. IV, paras. 98-100) and 13 of the Registry Guide (see paras. 122-124). It confirms that a registration may be made before the conclusion of a security agreement to which the notice relates, or the creation of any security rights contemplated by any such agreement. Thus, article 4 is consistent with article 8, subparagraph (a), of the Model Law, which provides that a security agreement may cover the grantor's future assets (see art. 2, subpara. (n), of the Model Law).

18. Registration in advance of the conclusion of any security agreement between the parties is practically possible under the notice registration system contemplated by the Model Law because, as noted in relation to article 3 (see para. 15 above), the underlying security agreement does not have to be deposited with the Registry or tendered for scrutiny. Where priority among competing secured creditors is determined by the general order of registration or third-party effectiveness rule in article 28 of the Model Law, advance registration is useful because it enables a secured creditor to be sure of its priority ranking even before the security agreement with the grantor is formally concluded. However, for a security right to be effective against other classes of competing claimants, the security right must also have been created (see Registry Guide, paras. 20 and 123). Accordingly, advance registration does not protect a secured creditor against a competing claimant, other than a competing secured creditor that acquires rights in the encumbered assets before the security agreement is actually entered into and the other requirements for creation are satisfied.

19. If a security agreement is never concluded between the parties, or only covers a narrower range of assets than those described in the registered notice, advance registration may have a negative impact on the ability of the person identified in the notice as the grantor to sell or create a security in the assets described in the notice. As noted in relation to article 2 (see para. 13 above), article 20 provides for a procedure to enable the grantor to obtain the compulsory amendment or cancellation of a registered notice in this scenario, unless the grantor expressly authorized the registration of the notice.

Section B. Access to registry services

Article 5. Conditions for access to registry services

20. Article 5 is based on recommendations 54, subparagraph (c), (f) and (g), and 55, subparagraph (b), of the Secured Transactions Guide (see chap. IV, paras. 25-228) and 4, 6 and 9 of the Registry Guide (see paras. 95-97 and 103-105).

21. Paragraphs 1 and 3 confirm that the Registry is public in the sense that any person is entitled to register a notice of a security right or search the registry record subject only to meeting the conditions governing access. With one qualification, the conditions are the same for both types of service. For both types of service, the user must submit the (paper or

electronic) form of notice or search request prescribed by the registry and pay or make any arrangements to pay the prescribed fees, if any (see art. 33). The one qualification relates to the requirement in subparagraph 1(b) for a user to identify itself to the Registry in the prescribed manner. This requirement only applies to users that submit a notice for registration as opposed to a search request. This requirement is aimed at assisting the person identified in a registered notice as the grantor to determine the identity of the registrant in the event that the grantor did not authorize the registration (see Registry Guide, para. 96). This consideration must be balanced against the need to ensure efficiency and speed in the registration process. Accordingly, the evidence of identity required of a registrant should be that which is generally accepted as sufficient in day-to-day commercial transactions in the enacting State (for example, an identity card, driver's licence or other state-issued official document).

22. If access to registry services is refused, paragraph 4 requires the Registry to communicate the specific reason (for example, the user failed to use the prescribed form or to pay the prescribed fee). The reasons must be communicated without delay. What this means in practice depends on the mode by which the notice or search request is submitted to the Registry. If the system is designed to enable users to submit notices and search requests through electronic means of communication directly to the Registry, the system can and should be programmed to automatically communicate the reason during the registration process and display the reason on the registrant's screen. In the case of notices and search requests submitted in paper form, the registry staff will need a reasonable period of time to examine the notice or search request and prepare and communicate a formal response.

23. In order to facilitate access to registry services and avoid unnecessary refusals, the Registry should be organized to accept all modes of payment in common commercial use in the enacting State. However, controls will need to be introduced to avoid the risk of staff embezzlement of cash payments and to ensure the confidentiality of financial information submitted by users (see Registry Guide, para. 138). To facilitate efficient access by frequent users (such as financial institutions, automobile dealers or other suppliers of goods on credit, lawyers and other intermediaries), users should be given the option of setting up a pre-payment account that enables them to deposit funds on an ongoing basis to pay for their ongoing requests for services.

24. To limit the risk of the registration of amendment and cancellation notices not authorized by the secured creditor, paragraph 2 requires persons who submit an amendment or cancellation notice to specify the secure access details required by the Registry. For example, the Registry might require registrants to set up a password-protected account when submitting an initial notice, and then require all amendment and cancellation notices to be submitted through that account. This would prevent the grantor or third parties from amending or cancelling a registered initial notice without being given access to the account by the registrant. Alternatively, the system might be designed to assign a unique user code to registrants upon registration of an initial notice and then require entry of that code on all amendment and cancellation notices submitted for registration. This would ensure that only the registrant and those to whom the registrant chooses to disclose the code are able to register an amendment or cancellation notice (with respect to the effectiveness of the registration of unauthorized amendment or cancellation notices, see art. 21).

Article 6. Rejection of the registration of a notice or a search request

25. Article 6 is based on recommendations 8 and 10 of the Registry Guide (see paras. 97-99 and 106). Paragraph 1 obligates the Registry to reject the registration of a notice submitted for registration if no information, or only illegible information, has been entered in one or more of the mandatory designated fields in the notice. As all mandatory fields must be completed for a registered notice to be effective, this provision ensures that the information in submitted notices that clearly do not satisfy the minimum requirements for effectiveness are never entered into the registry record. On the other hand, even if all the mandatory fields in a submitted notice contain legible information and the notice is therefore accepted for registration, it does not follow that the registration is effective if the information that is entered, while being legible, is erroneous or incomplete (with respect to whether and to what extent an error or omission in the information contained in a registered notice renders the registration ineffective, see art. 24; with respect to whether and to what extent a secured

creditor is obligated to update the record where the information in a registered notice becomes inaccurate as a result of post-registration events, see arts. 25 and 26).

26. Paragraph 2 obligates the Registry to reject a search request if no information, or only illegible information, has been entered in either one of the designated fields for entering a search criterion. Since searchers are entitled to search by either or both the identifier of the grantor and the registration number assigned to the initial notice (see art. 22), it is sufficient if legible information is entered into at least one of the search criterion fields. The fact that at least one of the search criteria fields contains legible information does not necessarily mean that a search result will be accurate since the criterion entered by the searcher may be erroneous or incomplete. To avoid any arbitrary decisions on the part of the Registry, paragraph 3 confirms that the Registry may not reject the registration of a notice or search request where the registrant or searcher satisfies the access conditions set out in paragraphs 1 and 2.

27. Paragraph 4 obligates the Registry to provide the reason for rejecting the registration of a notice or a search request without delay. What this means in practice depends on the mode by which the notice or search request was submitted to the Registry. If the system is designed to enable users to submit notices and search requests through electronic means of communication directly to the Registry, the system can and should be designed to automatically reject the submission of incomplete or illegible notices during the registration process and display the reasons on the registrant's screen. In the case of notices and search requests submitted in paper form, there will necessarily be some delay between the time of receipt by registry staff and the communication of the refusal and reason to the user. In the case of notices and search requests submitted in paper form, the registry staff will need a reasonable period of time to examine the notice or search request and then prepare and communicate a formal response.

Article 7. Information about the registrant's identity and scrutiny of the form or contents of the notice by the Registry

28. Article 7 is based on recommendations 54, subparagraph (d), and 55, subparagraph (b), of the Secured Transactions Guide (see chap. IV, paras. 15-17 and 48) and 7 of the Registry Guide (see paras. 100 and 102). Paragraph 1 obligates the Registry to maintain the identity information submitted by registrants in compliance with article 5, subparagraph 1(b), and to provide information upon request to the person identified in the registered notice as the grantor. While this information does not form part of the public or archived registry record, it nonetheless must be preserved by the Registry in a manner that enables it to be retrieved in association with the registered notice to which it relates. This is consistent with the rationale for obtaining and preserving this information which is to assist the grantor in identifying the registrant in cases where the registration of the notice was not authorized by the grantor (see para. 21 above). In order to ensure that this objective is balanced against the need to facilitate efficiency of the registration process, paragraph 2 provides that the Registry may not require further verification of the identity information provided by a registrant under article 5, subparagraph 1(b). With the same objective in mind, paragraph 3 generally prohibits the Registry from scrutinizing the form or content of notices and search requests submitted to it except to the extent needed to give effect to articles 5 and 6.

Section C. Registration of a notice

Article 8. Information required in an initial notice

29. Article 8 is based on recommendations 57 of the Secured Transactions Guide (see chap. IV, para. 65) and 23 of the Registry Guide (see paras. 157-160). It sets out the items of information required to be entered in the appropriate designated fields in an initial notice submitted to the Registry for registration. The items of information specified in subparagraphs (a), (b) and (c) are the subject of articles 9, 10 and 11, and the reader is generally referred to the commentary on those articles. It should be noted, however, that where a notice relates to more than one grantor or secured creditor, the required information should be entered separately for each grantor or secured creditor.

30. An enacting State may decide to require "additional information" (such as the birth date of the grantor or an identification number issued by the enacting State) to be entered to assist in uniquely identifying a grantor where there is a risk that many persons may have the same name (see bracketed text in art. 8, subpara. (a)). If this approach is adopted, the form of notice prescribed by the enacting State should provide a separate designated field for entering the "additional information". The enacting State should also specify the type of additional information to be included and make its inclusion mandatory in the sense that it must be entered in the relevant field for a notice to be accepted by the Registry (on all these points, see Registry Guide, rec. 23, subpara. (a)(i), and paras. 167-169, 171, 181-183, 226, as well as examples of forms in Annex II).

31. Subparagraph (d) appears within square brackets, as an indication of the duration of registration on an initial notice is required only if the enacting State adopts options B or C of article 14 (see paras. 50-52 below; see also Registry Guide, paras. 199-204). Subparagraph (e) also appears within square brackets, as an indication of the maximum amount for which the security right may be enforced is required only if the enacting State implements the approach set out article 6, subparagraph 3(d), of the Model Law, which also appears within square brackets (see para. A/CN.9/885, para. 79).

Article 9. Grantor identifier

32. Article 9 is based on recommendations 59 and 60 of the Secured Transactions Guide (see chap. IV, paras. 68-74), as well as recommendations 24 and 25 of the Registry Guide (see paras. 161-180). It provides that the identifier of the grantor is its name. It then sets out separate rules for determining the name of the grantor depending on whether the grantor is a natural person or a legal person or other entity.

33. If the grantor is a natural person, paragraph 1 provides that the grantor's name is the name that appears in the official document specified by the enacting State as the authoritative source. Since not all grantors may possess a common official document (e.g., an identity card or driver's licence), the enacting State will need to specify alternative official documents as authoritative sources and specify the hierarchy of authoritativeness among them (for examples of possible approaches, see Registry Guide, paras. 163-168).

34. The enacting State may require the entry of a State-issued identity or other official number to uniquely identify a grantor either as additional information (see para. 30 above) or as alternative grantor identifier. If this approach is adopted, it will be necessary for the enacting State to address cases in which the grantor is not a citizen or resident of the enacting State, or for any other reason has not been issued an identification number. The enacting State might, for example, provide that the number of the grantor's foreign passport or the number in some other foreign official document is a sufficient substitute (see Registry Guide, para. 169).

35. Paragraph 2 requires the enacting State to indicate which components of a name of a grantor, who is a natural person, must be entered into the registered notice. Accordingly, the enacting State will need to specify, for example, whether only the given and family name of the grantor is required or whether a middle name or initial must also be included. It will also need to specify, in the event the grantor's name consists of a single word, whether that name should be entered in the field designated for entering the grantor's family name (see Registry Guide, para. 165).

36. Paragraph 3 requires the enacting State to address how the grantor's name is to be determined where the grantor's name has legally changed under applicable law after the issuance of the official document designated in paragraph 1 as the authoritative source of the grantor's name (for example, by reason of marriage or as a result of a formal application for a name change under change of name legislation; see Registry Guide, para. 164(f)).

37. Paragraph 4 provides that where the grantor is a legal person the name of the grantor is the name that appears in the relevant document, law or decree to be specified by the enacting State constituting the legal person (see Registry Guide, paras. 170-173).

38. Paragraph 5, which appears in square brackets, provides for the possibility that an enacting State may wish to require additional information pertaining to the grantor's status

to be entered in a registered notice in special cases, such as where the grantor subject to insolvency proceedings (see Registry Guide, paras. 174-179).

Article 10. Secured creditor identifier

39. Article 10 is based on recommendations 57, subparagraph (a), of the Secured Transactions Guide (see chap. IV, para. 81) and 27 of the Registry Guide (see paras. 184-189). It largely replicates the rules in article 9 for determining the identifier of the grantor. Unlike article 9, however, article 10 provides that the registrant may enter the name of a representative of the secured creditor (e.g. a service provider or an agent of a syndicate of lenders). This approach is intended to protect the privacy of the actual secured creditor and facilitate the efficiency of arrangements such as syndicated loans where there are multiple secured lenders whose identity may change over time. This approach does not have a negative impact on the grantor, who would typically know the identity of the actual secured creditor from their dealings, or third parties, as long as the representative is authorized to act on behalf of the actual secured creditor (see Registry Guide, paras. 186 and 187). It should also be noted that, as the security right is created by an off-record security agreement, the entry of the name of a representative as the secured creditor on a registered notice does not make the representative the actual secured creditor.

Article 11. Description of encumbered assets

40. Article 11 is based on recommendations 62 of the Secured Transactions Guide (see chap. IV, paras. 82-86) and 28 of the Registry Guide (see paras. 190-192). The test for the adequacy of a description of the encumbered assets in a registered notice in paragraph 1 parallels the test for the adequacy of a description of the encumbered assets in a security agreement (see art. 9 of the Model Law). The description in a registered notice need not be identical to the description in any related security agreement so long as it reasonably allows identification of the relevant encumbered assets in accordance with the test in paragraph 1. On the other hand, a description in a registered notice that satisfies this test will not make a security right effective against third parties to the extent that the description includes assets that are not covered by any related security agreement, since the requirements for the effective creation of a security right will not have been satisfied.

41. Paragraph 2 confirms that a description in a registered notice that refers to all of the grantor's movable assets or to all of the grantor's assets within a specified generic category (for example, all receivables owing to the grantor) satisfies the test in paragraph 1 that the description reasonably allow identification of the encumbered assets. It follows that a generic description will be sufficient even if any related security agreement only covers a specific asset within that broad generic category (for example, the description in the registered notice refers to all "tangible assets of the grantor", whereas the security agreement only covers a specific tangible asset). However, the effectiveness of the registration in this scenario is dependent on the authorization of the grantor pursuant to article 2; if the grantor only authorized a registration covering a specific asset, the registration will only be effective with respect to that asset. Moreover, the grantor is entitled, pursuant to article 20, paragraph 1, to compel the secured creditor to register an amendment notice that narrows the description of the assets in the registered notice to correspond to the encumbered assets covered by any security agreement between them unless the grantor separately authorized the secured creditor to register a broader description (see para. 8 above).

42. The secured transactions laws of some States adopt specific alphanumerical ("serial number") rules for describing specified classes of high-value assets that have a significant resale market. In States that adopt this approach, entry of the serial number in its own designated field is required in the sense of being necessary to preserve the priority of the security right as against specified classes of third parties that acquire rights in the asset. States that are interested in adopting this approach are referred to the discussion in the Registry Guide (for the organization of the registry record to permit searches by serial number, see paras. 131-134; for the consequences of an error in a serial number, see para. 212; and for a search by serial number, see para. 266).

43. If proceeds of an encumbered asset are not in the form of money, receivables, negotiable instruments or rights to payment of funds credited to a bank account and are

already covered by the description of the encumbered assets in a registered notice, the secured creditor must register an amendment notice to add a description of the proceeds within a short period of time after the proceeds arise in order to preserve the third-party effectiveness and priority of its security right in the proceeds as from the date of the initial registration (see art. 19, para. 2, of the Model Law). An amendment is necessary because otherwise a search result would not disclose the potential existence of a security right in the assets constituting the proceeds (see Registry Guide, paras. 193-197).

44. It should be noted that the inclusion of a description of an encumbered asset in a registered notice does not imply or represent that the grantor has or will have rights in that asset (see art. 6, para. 1, of the Model Law). That is to say, the Registry only provides for the disclosure of potential security rights in assets, not ownership or other rights. Whether the grantor owns or has rights in the relevant asset is determined by other law.

Article 12. Language of information in a notice

45. Article 12 is based on recommendation 22 of the Registry Guide (see paras. 153-156; the Secured Transactions Guide includes a discussion of this matter in chapter IV, paras. 44-46, but does not include a recommendation). Paragraph 1 requires the information contained in a notice to be expressed in the language or languages to be specified by the enacting State with the exception of the names and addresses of the grantor and the secured creditor or its representative. Typically, the enacting State would require registrants to use its officially recognized language or languages. As the names and addresses of the grantor and the secured creditor or its representative need not be translated, registrants will only need to translate the description of the encumbered assets (as the other items of information required to be entered in a notice may be expressed by numbers). Where the description of the encumbered assets is not expressed in the required language or languages, the registration of the notice would likely seriously mislead a reasonable searcher and thus would be ineffective (see art. 24, para. 4).

46. Paragraph 2 requires all information in a notice to be in the character set prescribed and publicized by the Registry. Where the names and addresses of the grantor and secured creditor or its representative are expressed in a character set different from the character set used in the language or languages recognized by the enacting State, guidance will need to be given on how the characters are to be adjusted or transliterated to conform to the language of the Registry (see Registry Guide, para. 155). If the information in a notice submitted to the Registry is not in the character set prescribed and publicized by the Registry, the notice will be rejected as illegible under article 6, subparagraph 1(a) (for the same rule with respect to search requests, see art. 6, para. 2).

Article 13. Time of effectiveness of the registration of a notice

47. Article 13 is based on recommendations 70 of the Secured Transactions Guide (see paras. 102-105) and 11 of the Registry Guide (see paras. 107-112). Paragraph 1 provides that the registration of an initial or amendment notice submitted to the Registry becomes effective only once the information in the notice is entered into the public registry record so as to be available to searchers (see the definition of the term “registry record” in art. 1, subpara. (l)). If the registry system is designed to enable users to submit information in a notice to the Registry through electronic means of communication directly without the intervention of registry staff, there will be little or no delay between the time when the information in a notice is submitted to the Registry and the time when it becomes available to searchers. But in systems that permit or require the use of paper notice forms, there will inevitably be some time lag since the registry staff must enter the information on the paper notice form into the registry record on behalf of registrants. In view of the importance of the timing and order of registration to the third-party effectiveness and priority of a security right, paragraph 2 obligates the Registry to enter the information into the registry record without delay after the notice is submitted and in the order in which it was submitted. For the same reason, paragraph 3 requires the date and time of effectiveness of the registration to be set out in the registry record and made available to searchers.

48. Paragraph 4 deals with the time of effectiveness of the registration of a cancellation notice. Option A provides that the registration of a cancellation notice becomes effective

once the information in the registered notices to which the cancellation notice relates is no longer publicly searchable. Accordingly, option A should be adopted by enacting States that adopt option A or B of article 21, since in States that adopt that approach the Registry is obligated to remove information in a registered notice from the public registry record and archive it upon registration of a cancellation notice pursuant to option A of article 30. Option B provides that the registration of a cancellation notice becomes effective once the information in the registered notices to which the cancellation notice is entered into the registry record so as to be accessible to searchers. Accordingly, option B should be adopted by enacting States that adopt option C or D of article 21, since in States that adopt that approach the Registry is obligated to retain the information in all registered notices, including cancellation notices, on the public registry record until the registration lapses pursuant to option B of article 30.

49. Option A and option B of paragraph 5 require the Registry to record the date and time of effectiveness of the registration of the cancellation notice as determined by option A and option B of paragraph 4 respectively. Accordingly, enacting States that adopt option A of paragraph 4 should adopt option A of paragraph 5, while enacting States that adopt option B of paragraph 4 should adopt option B of paragraph 5.

Article 14. Period of effectiveness of the registration of a notice

50. Article 14 is based on recommendations 69 of the Secured Transactions Guide (see chap. IV, paras. 87-91) and recommendation 12 of the Registry Guide (see paras. 113-121, 240 and 241). It offers enacting States a choice of three different approaches to the determination of the initial period of effectiveness (or duration) of the registration of a notice. If option A is enacted, an initial notice (and any associated amendment notices) would be effective for the period of time stipulated by the enacting State. If option B is enacted, registrants would be permitted to choose the desired period of effectiveness for themselves. If option C is enacted, registrants would likewise be permitted to choose the period of effectiveness but without exceeding a maximum number of years stipulated by the enacting State.

51. All options permit registrants to extend (more than once) the period of effectiveness of a notice before its expiry by the registration of an amendment notice. Under option A, the duration of the registration would be extended by an equivalent period of time. Under option B or option C the registrant would be permitted to select the further period of effectiveness, but up to the stipulated maximum number of years in the case of option C.

52. If option B or option C is enacted, the period of effectiveness of a registered notice is a mandatory component of the information required to be included in a notice submitted to the registry (see art. 8, subpara. (d)). States that adopt either of these options would also need to indicate on the prescribed notice form how registrants must enter the desired period of effectiveness. The notice form might be designed to enable registrants to simply enter the desired number of whole years from the date of registration. Alternatively, the notice form might permit registrants to enter the specific day, month and year on which the registration is to expire unless renewed.

Article 15. Obligation to send a copy of a registered notice

53. Article 15 is based on recommendations 55 subparagraphs (c), (d) and (e) of the Secured Transactions Guide (see chap. IV, paras. 49-53) and 18 of the Registry Guide (see paras. 145-149). Paragraph 1 obligates the Registry to send a copy of the information in a registered notice to the person identified in the notice as the secured creditor without delay after the registration becomes effective. This enables the person identified in a notice as the secured creditor to find out about erroneous or unauthorized amendment or cancellation notices (see art. 21; see also Registry Guide, paras. 245-248; with respect to the liability of the Registry for failure to send a copy of a notice, see art. 32).

54. In order to enable the grantor to take the steps necessary to protect its position if the registration of a notice is wholly or partially unauthorized (see art. 20), paragraph 2 obligates the person identified as the secured creditor in the copy of the registered notice sent to it by the Registry pursuant to paragraph 1 to forward it to the person identified in the notice as the grantor. The secured creditor has to comply with this obligation within the period of time

specified by the enacting State after it receives the notice. The copy must be sent to the grantor at its address set forth in the registered notice or, if the secured creditor knows that the grantor changed its address and the secured creditor knows or could reasonably discover that address, at the grantor's new address.

55. Paragraphs 3 and 4 confirm that non-compliance by the secured creditor with its obligation under paragraph 2 does not affect the effectiveness of its registration but only exposes the secured creditor to a nominal penalty and liability to compensate the grantor for any actual loss or damage caused by the non-compliance.

Section D. Registration of an amendment and cancellation notice

Article 16. Right to register an amendment or cancellation notice

56. Article 16 is based on recommendations 73 of the Secured Transactions Guide (see chap. IV, paras. 110-116) and 19, subparagraph (a), of the Registry Guide (see paras. 150 and 225-244). Paragraph 1 gives the person identified in an initial notice as the secured creditor the right to register a related amendment or cancellation notice at any time (this right is given to the registrant as the Registry cannot know or have to determine the identity of the actual secured creditor).

57. Paragraph 2 provides that, after an amendment notice changing the secured creditor identifier has been registered, only the new secured creditor is entitled to register an amendment or cancellation notice. If more than one amendment has been registered, only the person identified in the latest registered notice has the right to register an amendment or cancellation notice.

58. Where an amendment notice changes the secured creditor of record, the registry system should be designed to assign a new unique secure access code to the new secured creditors so as to prevent the previous secured creditor from registering an amendment or cancellation notice (see para. 24 above).

Article 17. Information required in an amendment notice

59. Article 17 is based on recommendation 30 of the Registry Guide (see paras. 221-224; the Secured Transactions Guide does not contain an equivalent recommendation). Paragraph 1 provides that an amendment notice must contain in the designated field the registration number assigned by the Registry to the initial notice to which the amendment relates (see art. 28, para. 1, and para. 111 below). This ensures that the amendment will be associated in the registry record with the initial notice so as to be retrieved and included in a search result (see the definition of the term "registration number" in art. 1(j) , as well as arts. 22, subpara. (b)).

60. Subparagraph 1(b) requires the amendment notice to set out the information to be "added or changed". The term change should be understood to include an amendment notice that releases an item or kind of asset or one of several grantors. Although this type of change amounts in effect to a cancellation of the registration as it relates to the relevant asset or grantor, it should be effected by registering an amendment notice and not a cancellation notice. A cancellation notice is to be used only when the purpose is to cancel the effectiveness of the registration of an initial notice and all related notices in their entirety (see the definitions of "amendment notice" and "cancellation notice" in art. 1, subparas. (b) and (c)).

61. Paragraph 2 makes it clear that an amendment notice may relate to more than one item of information in a registered notice. That is to say, a registrant need register only one amendment notice even if it wishes, for example, to add both a description of new encumbered assets and a new grantor. It follows that the form of amendment notice prescribed by the Registry must be designed to enable a registrant to change any and all items of information in an initial notice using a single form (see Registry Guide, Annex II, Examples of registry forms, amendment notice form).

Article 18. Global amendment of secured creditor information

62. Article 18 is based on recommendation 31 of the Registry Guide (see para. 242; the Secured Transactions Guide does not contain an equivalent recommendation). It addresses the scenario where there is a change in the identifier or address, or both, of the person identified in multiple registered notices as the secured creditor. Its purpose is to make it possible for the person identified in multiple registered notices as the secured creditor (option A) or for the Registry on the application of that person (option B) to amend the relevant information in all the notices in which it is contained with the registration of a single global amendment notice. For example, a secured creditor's name or address, or both, may change as a result of: (a) a merger with another company; (b) a relocation; or (c) an assignment of the secured obligations owing to a secured creditor under multiple security agreements with different grantors to an assignee who would then usually become the secured creditor of record.

63. In order to effectuate the global amendment of secured creditor information in multiple notices through a single registration, the registry record must be organized in a manner that enables the retrieval of all registered notices in which a particular person is identified as the secured creditor. To avoid the risk of unauthorized global amendments, the Registry should institute secure access requirements to ensure that the person requesting or effecting a global amendment is in fact the secured creditor of record (see para. 24 above).

Article 19. Information required in a cancellation notice

64. Article 19 is based on recommendation 32 of the Registry Guide (see paras. 243 and 244; the Secured Transactions Guide does not contain an equivalent recommendation). It requires a cancellation notice to contain in the designated field the registration number assigned by the Registry under article 28, paragraph 1, to the initial notice to which the cancellation relates. The registration number is the only item of information required to be included in a cancellation notice form (see Registry Guide, Annex II, example of cancellation notice form).

65. The purpose of assigning a registration number to an initial notice is to ensure that all related amendment and cancellation notices are associated in the registry record with the initial notice (see the definition of the term "registration number" in art. 1(j)). The inclusion of the registration number in a cancellation notice ensures that the cancellation notice extends to the information in all registered notices containing that number. To minimize the risk of inadvertent cancellations, the prescribed cancellation notice form should include a note alerting the secured creditor to the effect of a cancellation (see Registry Guide, Annex II, example of cancellation notice form; with respect to the effectiveness of a cancelation notice not authorized by the secured creditor, see paras. 74-82 below).

Article 20. Compulsory registration of an amendment or cancellation notice

66. Article 20 is based on recommendations 72 of the Secured Transactions Guide (see paras. 260-263) and 33 of the Registry Guide (see paras. 260-263). It should be read in conjunction with article 2 which requires the person identified as the grantor in a registered notice to authorize its registration.

67. Subparagraph 1(a) obligates the secured creditor to register an amendment notice deleting encumbered assets from the description in a registered notice if the grantor has not authorized (and the secured creditor knows that the grantor will not authorize) the registration of a notice in relation to those assets. For example, the secured creditor may have registered an initial notice covering "all assets" of the grantor but the security agreement between the parties ultimately covers only a specific tangible asset and the grantor does not contemplate entering into any further security agreements with the secured creditor. Provided that the grantor did not otherwise authorize the registration of the "all assets" notice, subparagraph 1(a) obligates the secured creditor to amend the description in its registered notice to limit it to the specific encumbered asset.

68. Subparagraph 1(b) addresses the scenario where the security agreement to which a registered notice relates is revised to release some of the initially encumbered assets from the security right. In this scenario, the secured creditor is obligated to register an amendment

notice to delete the released assets from the description in the registered notice provided that the grantor did not authorize the registration of a notice covering the released assets otherwise than by entering into the initial security agreement.

69. States that implement article 8, subparagraph (d), will need to adopt paragraph 2 which requires a secured creditor to register an amendment notice reducing the maximum amount specified in a registered notice if: (a) the grantor only authorized the registration of a notice in the reduced amount; or (b) the security agreement to which the notice relates has been revised to reduce the maximum amount.

70. Paragraph 3 obligates a secured creditor to register a cancellation notice where the registration of an initial notice was not authorized by the grantor or the grantor has withdrawn its authorization and no security agreement has been entered into between the parties (see subparas. 3(a) and 3(b)). A cancellation notice must also be registered if the obligation secured by the security right to which the registered notice relates has been extinguished (see subpara. 3(c)). It should be noted that, under article 12 of the Model Law, a security right is extinguished upon full payment or other satisfaction of the secured obligation[, provided that there is no further commitment by the secured creditor to extend any further secured credit.

71. Paragraph 4 prohibits the secured creditor from charging any fee for complying with its obligations under subparagraphs 1(a), 2(a) or 3(a) and (b). These provisions require a secured creditor to amend or cancel a registration because it was either never authorized by the grantor or because the grantor's initial authorization was withdrawn owing to the failure of the parties to ultimately conclude a security agreement. In these circumstances, it is appropriate to impose the cost on the secured creditor.

72. It is assumed that a secured creditor will comply with its obligation under paragraphs 1, 2 and 3 within a short period of time after it became aware that any of the relevant conditions are met. In the event it does not, any obligation of the secured creditor to compensate the grantor for loss or damage caused by non-compliance is left to the general law of the enacting State on liability for violations of statutory obligations. However, paragraph 5 gives the grantor the right to send at any time (i.e. without having to wait for the secured creditor to comply) a formal written request. If the secured creditor does not comply with the grantor's request within the time period specified by the enacting State, under paragraph 6, the grantor is entitled to apply for an order compelling registration of the appropriate notice. The enacting State needs to establish a summary judicial or administrative procedure and identify the relevant court or other authority to enable the grantor to exercise this right. Depending on local institutional considerations, the enacting State may decide to use an existing administrative or judicial summary procedure or it may decide to set up a new procedure administered, for example, by the Registrar or registry staff. As noted in the Registry Guide (see para. 262), the process should be speedy and inexpensive while also incorporating appropriate safeguards to protect the secured creditor against an unwarranted demand by the grantor (for example, by requiring the relevant authority to notify the secured creditor of a demand submitted to it and give the secured creditor an opportunity to challenge the demand within a short period of time).

73. Once an order for registration has been issued pursuant to the procedure established by the enacting State under paragraph 6, paragraph 7 requires the appropriate notice to be registered by the Registry upon receipt of a copy of the order (option A), or by the judicial or administrative officer who issued the order upon presenting a copy of the order to the Registry (option B). Where the officer charged by the enacting State with administering the process is the Registrar or a member of the Registry staff, the enacting State should simply provide that the Registry may itself make the relevant registration upon its issuance of the order.

Article 21. Effectiveness of the registration of an amendment or cancellation notice not authorized by the secured creditor

74. While not based on a recommendation of the Secured Transactions Guide or the Registry Guide, the options set out in article 21 are based on the discussion of the matter in the Registry Guide (see paras. 249-259). Its purpose is to address the effectiveness of a

registered amendment or cancellation notice where the registration was not authorized by the secured creditor.

75. An unauthorized registration may occur as a result of fraud or error made by the grantor or a third party, or even a member of the registry staff (for corrections of errors by the Registry, see art. 31). The issue is whether and to what extent conclusive effect should be given to a registered amendment or cancellation notice for the purposes of determining the third-party effectiveness and priority of the related security right as against a competing claimant.

76. Under option A, the registration of an amendment or cancellation notice is effective regardless of whether or not it was authorized by the person identified as the secured creditor in the registered notice to which the amendment or cancellation notice relates. If a State adopts this approach, it will need to put in place secure access procedures for registering amendment or cancellation notices in order to limit the risk of unauthorized registrations (see para. 24 above).

77. Option B is a variation of option A in the sense that it places an important qualification on the effectiveness of an unauthorized amendment or cancellation notice. The priority of the security right to which the unauthorized registration relates is preserved as against the right of a competing claimant over whom it had priority prior to the unauthorized registration. This qualification is predicated on the theory that to award priority to a competing claimant that would have been subordinated but for the unauthorized registration would result in an unjustified windfall, since that claimant by definition could not have suffered any loss of priority by relying on the unauthorized registration.

78. If an enacting State decides to adopt option A or option B, it will need to also implement option B of article 30 which obligates the Registry to remove information in a registered notice from the public registry record and archive it upon the expiry of its period of effectiveness or upon registration of a cancellation notice. It will also need to implement option A of article 13, paragraphs 4 and 5, dealing with the time of effectiveness of the registration of a cancellation notice.

79. Option C is at the opposite end of the spectrum from option A. It provides that the registration of an amendment or cancellation notice is ineffective, unless authorized by the secured creditor. Under this approach, a searcher will need to conduct off-record inquiries to verify whether the registration of a cancellation or amendment notice which purports to terminate a security right in an asset in which it wishes to acquire rights was in fact authorized by the secured creditor.

80. Option D is a variation of option C in the sense that it places an important qualification on the general rule in option C. It provides that the unauthorized registration of an amendment or cancellation notice is effective as against a competing claimant whose right was acquired in reliance on a search of the registry record made after the registration of the amendment or cancellation notice, and who did not have knowledge that the registration was unauthorized at the time it acquired its right. This qualification differs from the qualification in option B above insofar as it requires the competing claimant to provide factual evidence that it actually searched and relied on the registry record prior to acquiring its right in order to prevail over the secured creditor whose registration was amended or cancelled without authority.

81. If an enacting State decides to adopt option C or option D, it will need to implement option B of article 30, which obligates the Registry to remove information in registered notices from the public registry record and archive it only upon the expiry of the period of effectiveness of the initial notice. Under option C or D, all amendment or cancellation notices need to remain in the public registry record in order for searchers to discover the security right and know whom to contact to verify whether the amendment or cancellation was authorized. If all the relevant notices were instead removed from the public record upon registration of a cancellation notice, searchers would be bound by a security right of whose existence they would be entirely ignorant.

82. Searchers may not necessarily appreciate that registered amendment and cancellation notices may not be legally effective. Accordingly, enacting States that implement options C or D may wish to include a note on search results advising searchers of the need to conduct

off-record inquiries to verify whether the registration of an amendment or cancellation notice was authorized by the secured creditor.

Section E. Searches

Article 22. Search criteria

83. Article 22 is based on recommendation 54, subparagraph (h), of the Secured Transactions Guide (see chap. IV, paras. 31-36) and 34 of the Registry Guide (see paras. 264-265). It sets out the two criteria according to which any person may conduct a search of the public registry record.

84. Under subparagraph (a), the first and principal search criterion is the identifier of the grantor. The identifier of the grantor is its name, determined according to the rules set out in article 9. If an enacting State decides to require "additional information" to be entered in a separate field to assist in uniquely identifying a grantor, this additional information does not constitute an alternative search criterion (see art. 8, subpara. (a)). Rather it will simply appear as additional information in a search result.

85. Under subparagraph (b), the registration number assigned to an initial notice under article 28, paragraph 1, constitutes an alternative search criterion. A search by registration number gives secured creditors an efficient means of identifying and retrieving a registered notice for the purposes of registering an amendment or cancellation notice. Searches by registration number generally will not be conducted by third parties as they typically will not know the relevant registration number.

86. If the enacting State provides for the entry of the serial number of an asset in a separate designated field (see para. 42 above), entry of this serial number in its own designated field in the initial or amendment notice is required in the sense of being necessary to achieve the third-party effectiveness and priority of the security right as against specified classes of competing third-party claimants. If an enacting State decides to adopt this approach, it will need to list the serial number of the asset as an additional search criterion in this article. It will also need to provide rules for determining what constitutes the correct serial number, design the registry system so that registered notices can be searched and retrieved by serial number, and what categories of subsequent claimants are entitled to priority if the secured creditor omits to include the serial number in its registered notice (see Registry Guide, para. 266).

87. To allow the registration of global amendment notices, as provided in article 18, the registry record must be organized to permit registered notices to be identified and retrieved by reference to the relevant secured creditor. For public policy reasons relating to privacy and confidentiality, the name or other identifier of the secured creditor should not be an available criterion for general public searching (see Secured Transactions Guide, chap. IV, para. 81 and Registry Guide, para. 267).

Article 23. Search results

88. Article 23 is based on recommendation 35 of the Registry Guide (see paras. 268-273; the Secured Transactions Guide does not contain an equivalent recommendation). Paragraph 1 sets out the required content of search results provided by the Registry in response to a search request. The search result must first indicate the date and time when the search was performed.

89. Article 23 does not require search results to include a "currency date" indicating that the search result includes only information contained in notices that were registered as of that date (as opposed to the actual date on which the search result was issued). The reason is that registration becomes effective when the information in a notice submitted to the Registry has been entered into the registry record so as to be accessible to searchers (see art. 14, para. 1). Thus, the "currency date" is the actual date of the search (see Registry Guide, para. 273).

90. With respect to the substantive content of the search result, paragraph 1 contemplates that an enacting State may adopt one of two options. Option A contemplates that the registry

system will be designed to only retrieve notices that match the grantor's name exactly. Option B contemplates that the registry system will be designed to also retrieve notices that contain the grantor's name that closely matches the grantor's name entered by the searcher. What constitutes a "close match" under option B is not a free-floating concept but rather depends on the particular close-match search programme or logic used by the Registry.

91. Options A and B should be read in conjunction with article 24, paragraph 1, which provides that an error in the grantor identifier entered in a notice does not render the registration of the notice ineffective if the notice would be retrieved by a search of the registry record using the grantor's correct identifier as the search criterion. The result of applying this test differs depending on whether option A or B is adopted. If option A is adopted, a registration will be ineffective if the registrant fails to enter the correct name of the grantor in the notice. If option B is adopted, the registration of a notice that contains an error in the grantor's name might still be effective if the name that is entered is a sufficiently close match to result in the notice being retrieved on a search using the grantor's correct name. Whether this is the case depends on whether the information in the search result is sufficient to enable the searcher to reasonably identify the relevant grantor from the list of close matches so as to make the error not seriously misleading.

92. Paragraph 2 obligates the Registry to issue an official search certificate setting out a search result upon the request of a searcher. Paragraph 3 minimizes the administrative burden on the Registry in this respect by providing that a printed search result that purports to have been issued by the Registry is proof of its contents in the absence of evidence to the contrary.

Section F. Errors and post-registration changes

Article 24. Registrant errors in required information

93. Article 24 is based on recommendations 58 and 64-66 of the Secured Transactions Guide (see chap. IV, paras. 66-74, and 82-97) and 29 of the Registry Guide (see paras. 205-220). Its overall aim is to provide guidance on when the effectiveness of a registration may be challenged owing to errors or omissions in the information in registered notices.

94. Paragraph 1 addresses errors in the grantor identifier set out in a registered notice. It provides that: (a) if the registrant enters the name of the grantor in accordance with article 9, the effectiveness of the registration cannot be challenged on the ground of an error in the grantor's name; and (b) if the registrant makes an error, the registration may still be effective if the notice would be retrieved by a search using the correct grantor identifier.

95. Paragraph 4 deals with errors or omissions in the other items of information required to be set out in registered notices under article 8. It provides that an error does not make a registration ineffective unless it "would seriously mislead a reasonable searcher." This language implies an objective test in the sense that a person challenging the effectiveness of the registration need not show that any person was actually misled by the error. It is sufficient to show that a reasonable searcher hypothetically would have been misled.

96. Paragraphs 3 and 5 incorporate the general legal concept of severability. A fatal error in entering the name of a particular grantor or the description of a particular encumbered asset does not make the registration of a notice ineffective with respect to other grantors correctly identified or other encumbered assets correctly described in a registered notice.

97. Paragraph 6 creates a special test for assessing the impact of errors made by a registrant on the effectiveness of a registration in two scenarios. The first arises where an enacting State allows a registrant to self-select the period (duration) of effectiveness of the registration of a notice pursuant to options B or C of article 14 (and art. 8, subpara. (d)). The second arises where the enacting State requires a registrant to indicate the maximum sum for which a security right may be enforced pursuant to article 8, subparagraph (e). In these two cases, an error in the entry of the information does not render a registration ineffective even if the error would be seriously misleading from the perspective of a hypothetical reasonable searcher. Rather, the registration will be treated as ineffective only as against, and only to the extent that, the competing claimant that challenges the effectiveness of the registration

shows that it was actually misled by the error (see Registry Guide, paras. 215 and 217-220). This approach may give rise to circular priority problems.

98. As observed in the commentaries on articles 11 and 22 (see paras. 42 and 85 above), some States provide for the entry of an alphanumerical asset identifier for specified classes of high-value assets that have a significant resale market. In States that adopt this approach, entry of this identifier in its own designated field in the initial notice is required in the sense of being necessary to achieve the third-party effectiveness and priority of the security right as against specified classes of competing third-party claimants. Enacting States that decide to adopt this approach will need to deal with the impact of errors in the serial number on the effectiveness of a registration. They may also wish to consider whether to provide for search results to disclose close matches.

Article 25. Post-registration change of grantor identifier

99. Article 25 is based on recommendation 61 of the Secured Transactions Guide (see chap. IV, paras. 75-77; see also Registry Guide, paras. 226-228). It addresses the impact of a post-registration change in the identifier of the grantor (i.e. its name under art. 9) on the effectiveness of the registration of a notice. If the grantor's name changes after the registration of a notice, a search under the new name will not retrieve registered notices in which the grantor is identified by its old name. This poses a risk for third-party searchers that acquire rights in the grantor's encumbered assets after the name change.

100. To address this risk, paragraph 1 gives the secured creditor a grace period (the duration of which is to be specified by the enacting State) to register an amendment notice adding the new name of the grantor. If the amendment notice is registered before the expiry of the grace period, the security right retains whatever priority it otherwise would have as against competing claimants, even if their rights arise after the change of name but before the registration of the amendment notice.

101. Under paragraph 2, the secured creditor may still register an amendment notice after the expiry of the grace period. However, its security right will be subordinated to an intervening security right that is made effective against third parties after the change of name but before the amendment notice is registered (see subpara. 2(b)). In addition, buyers, lessees or licensees, who acquire rights in the encumbered assets after the change of name but before the registration of the amendment notice, acquire their rights in the assets free of the security right (see subpara. 2(a)).

102. As against competing claimants other than those specifically protected by subparagraphs 2(a) and (b), the third-party effectiveness and priority of the security right is not prejudiced by the late registration of the amendment notice or the failure of the secured creditor to register an amendment notice altogether. Thus, the secured creditor will retain whatever priority it had against competing claimants whose rights arose before the change of name. Its rights are also preserved as against competing claimants whose rights arise after the change of name that are not specifically mentioned in subparagraphs 2(a) and (b) (for example, the grantor's judgement creditors and insolvency representative).

Article 26. Post-registration transfer of an encumbered asset

103. Article 26 is based on recommendation 62 of the Secured Transactions Guide (see chap. IV, paras. 78-80; see also Registry Guide, paras. 229-232). It addresses the impact of a post-registration transfer of an encumbered asset on the effectiveness of the registration of a notice in relation to a security right in that asset where the transferee acquires the asset subject to the security right under article 32, paragraph 1, of the Model Law. This creates a risk for third parties that acquire rights in the encumbered asset from the transferee: a search of the registry record by the third party under the name of the transferee will not retrieve registered notices in which the grantor is identified as the transferor. This risk is analogous to that addressed in article 25 in relation to post-registration changes in the grantor identifier. Unlike article 25, article 26 does not provide a uniform rule. Rather, it gives enacting States the option to enact any one of three approaches.

104. The approach in paragraphs 1 and 2 of option A is identical to that set out in article 25 for post-registration changes in the grantor identifier. It gives the secured creditor a grace

period (the duration of which is to be specified by the enacting State) to register an amendment notice adding the transferee as a new grantor. As under article 25, the secured creditor's failure to register the amendment notice before the expiry of the grace period, or at all, does not generally prejudice the third-party effectiveness and priority status of its security right. However, its security right will be subordinated to competing security rights created by transferees and made effective against third parties after the transfer, and before the amendment notice was registered. Transferees that acquire rights during this same period from another transferee also acquire their rights free of the security right.

105. Paragraph 1 of option B is similar to paragraph 1 of option A, with the important qualification that the grace period to register the amendment notice begins only when the secured creditor acquires knowledge that the grantor has transferred the encumbered asset and not when the transfer takes place, as under paragraph 1 of option A.

106. In the case of successive transfers of encumbered assets, paragraph 2 of options A and B applies to the last transfer. So, for example, where the encumbered assets are transferred from the grantor to A, and thereafter from A to B, from B to C and from C to D before the amendment notice is registered, the secured creditor need only enter D's name as an additional grantor in its registered amendment notice.

107. Paragraph 3 of options A and B implement recommendation 244 of the Intellectual Property Supplement. It provides that a security right in intellectual property retains its third-party effectiveness and priority status notwithstanding a post-registration transfer by the grantor even as against subsequent parties. The reason for this different approach with respect to intellectual property is that, if the secured creditor were required to register an amendment notice each time intellectual property was transferred or licensed (to the extent that an exclusive licence is treated as a transfer under intellectual property law), intellectual property financing would be discouraged or become more expensive (see Intellectual Property Supplement, paras. 158-166).

108. Under option C, registration of an amendment notice following a transfer of an encumbered asset is optional in the sense that the failure to register does not affect the third-party effectiveness or priority of the security right as against intervening competing claimants. This approach parallels the approach to post-registration transfers of encumbered intellectual property.

Section G. Organization of the Registry and the registry record

Article 27. Appointment of the registrar

109. Article 27 is based on recommendation 2 of the Registry Guide (see para. 74; the Secured Transactions Guide does not contain an equivalent recommendation). Recognizing that these matters may be dealt with differently in each State, article 27 leaves it to the enacting State to specify the authority responsible for the appointment, dismissal and supervision of the registrar. It also leaves it to the authority specified by each enacting State to determine the registrar's duties and monitor their performance.

110. While an enacting State can always provide for the day-to-day operations of the Registry to be carried out by either a private or public entity, the Registry and the registrar should always be subject to the ultimate direction of and accountable to the enacting State. Accordingly, the authority specified by the enacting State under this article should be a governmental ministry or other public agency, such as a central bank (see Registry Guide, para. 77).

Article 28. Organization of information in the registry records

111. Article 28 is based on recommendations 15 and 16 of the Registry Guide (see paras. 127-130; the Secured Transactions Guide does not contain an equivalent recommendation). Paragraph 1 requires the Registry to assign a unique registration number to an initial notice and associate all registered amendment or cancellation notices that contain that number with the initial notice in the registry record. These requirements aim to ensure that amendment and cancellation notices are linked to an initial notice in the registry record

so as to be retrievable on a search (see the definition of the term "registration" in art. 1(i), as well as arts. 17, 19 and 22).

112. Option A of paragraph 2 is offered for States that implement option A of article 23, paragraph 1. Option B of paragraph 2 is offered for States that implement option B of article 23, paragraph 1. Option A of paragraph 3 is offered for States that implement option A of article 18. Option B of paragraph 3 is offered for States that implement option B of article 18.

113. Paragraph 3 is intended to ensure that the entire registration record relating to an initial notice remains intact. It provides that the registry record must be organized in a manner that preserves the information in all registered notices, notwithstanding the registration of amendment or cancellation notices that purport to change the information contained in the initial notice.

114. The enacting State will need to revise article 28 to impose additional organizational obligations on the Registry should it decide to provide for: (a) registration and searching according to serial number (see paras. 42 and 86 above); (b) registration and searching according to a grantor identifier other than the name of the grantor (see paras. 30 and 85); and (c) the assignment of unique confidential numbers to secured creditors on the registration of an initial notice, and to require registrants to enter this number as a precondition to the registration of related amendment or cancellation notices (see paras. 24 above).

Article 29. Integrity of information in the registry record

115. Article 29, paragraph 1, is based on recommendation 17, subparagraph (a), of the Registry Guide (see para. 136; the Secured Transactions Guide does not contain an equivalent recommendation). It prohibits the Registry from unilaterally amending or removing information in the registry record except as authorized in articles 30 and 31.

116. Article 29, paragraph 2, is based on recommendations 55, subparagraph (f), of the Secured Transactions Guide (see chap. IV, para. 54), and 17, subparagraph (b), of the Registry Guide (see para. 137). It obligates the Registry to ensure that the information in the registry record is preserved and may be reconstructed in the event of loss or damage. In practice, this obligation requires the Registry to create and maintain a backup copy of the registry record.

Article 30. Removal of information from the public registry record and archival

117. Option A of article 30 is based on recommendations 74 of the Secured Transactions Guide (see chap. IV, para. 109), as well as recommendations 20 and 21 of the Registry Guide (see paras. 151-152). It requires the Registry to remove information in registered notices from the public registry record once the period of effectiveness of the notice expires or a cancellation notice is registered. If the information in cancelled or expired notices remained publicly searchable, this might create legal uncertainty for third-party searchers, potentially impeding the ability of the grantor to grant a new security right in or deal with the assets described in the notice (see Registry Guide, para. 151). It should be enacted by States that adopt option A or B of article 21.

118. Option B of article 30 is a new provision that should be enacted by States that adopt options C or D of article 21. It requires the Registry to preserve all information in registered notices, including cancellation notices, on the public registry record until the registration expires. This is necessary since registered amendment and cancellation notices under these options are not legally effective unless authorized by the secured creditor, a matter that can only be determined by conducting off-record inquiries.

119. Paragraph 2 requires the Registry to archive the information in registered notices removed from the public registry record under paragraph 1 in a manner that enables the information to be retrieved in accordance with the search criteria set out in article 22. This is necessary since the information in "expired or cancelled notices may need to be retrieved in the future, for example, in order to determine the time of registration or the scope of the encumbered assets described in the notice for the purposes of a subsequent priority dispute between the secured creditor and a competing claimant" (see Registry Guide, para. 151).

120. As to the duration of the registry's archival obligation, paragraph 2 leaves this decision to the enacting State (while cautioning that it should minimally be coextensive with the prescription period under local law for disputes arising in relation to a security agreement).

Article 31. Correction of errors made by the Registry

121. Article 31 addresses the effect of errors made by the Registry in two scenarios. The first is where the Registry makes an error or omission in entering into the public registry record information contained in a notice submitted for registration. The need to address this scenario arises only if the registry system implemented by a State allows the submission of notices in paper form as opposed to requiring all registrants to transmit the information in notices directly to the Registry via electronic means of communication. The second scenario is where the Registry erroneously removes from the registry record information contained in a registered notice. The need to address this scenario arises even where notices may only be submitted directly to the Registry via electronic means of communication.

122. Paragraph 1 of article 31 requires the Registry to takes steps to correct the error or restore the erroneously removed information without delay after discovering the error. Under option A, the Registry is itself entitled to take the necessary corrective action and must then send to the secured creditor of record a copy of the notice it registered to correct the record. Under option B, the Registry is instead required to inform the secured creditor of record of the error so as to enable it to directly register the notice needed to correct the record.

123. Paragraph 2 addresses the impact of the Registry's error on the third-party effectiveness and priority status of the security right in the event of a competition with the right of a competing claimant which arose prior to the registration of the notice correcting the record referred to in paragraph 1. It offers four options which parallel the four options in article 21 with respect to the effectiveness of the unauthorized registration of an amendment or cancellation notice. The enacting State should adopt the option in article 31 that corresponds to the option it selects in article 21. Accordingly, a State that adopts option A, B, C or D of article 21 should adopt the corresponding option of article 31 (i.e. A, B, C or D respectively).

Article 32. Limitation of liability of the Registry

124. Article 32 is based on recommendation 56 of the Secured Transactions Guide (see chap. IV, paras. 55-64; see also Registry Guide, paras. 141-144). It offers three options to an enacting State in dealing with the potential liability of the Registry or the enacting State for errors or omissions allegedly committed by the Registry.

125. Option A leaves the issue of the liability of the Registry or the enacting State for loss or damage to other law of the enacting State. However, if liability is foreseen by that other law, option A restricts any right of recovery to the types of errors or omissions listed in subparagraphs (a) through (d). Thus, any potential liability is limited to: (a) errors or omissions in a search result issued to a searcher (subpara. (a)); (b) errors or omissions in a copy of information in a registered notice sent to a secured creditor under article 15 or the failure of the Registry to send a copy of a registered notice as required by that article or article 31 (subparas. (a) and (c)); and (c) the provision of false or misleading information to a registrant or searcher (subpara. (d)).

126. Subparagraph (b) appears within square brackets as it limits any liability that the Registry may have under other law for errors or omissions in registered notices to the scenario where the Registry is responsible for entering into the registry record information submitted by a registrant in a paper notice. It does not permit recovery for errors or omissions in registered notices where the information was directly transmitted to the registry record by a registrant electronically since these errors or omissions would by definition be the responsibility of the registrant as opposed to the Registry. Accordingly, subparagraph (b) should only be adopted by an enacting State if its registry system permits the submission of notices to the Registry using paper forms.

127. Like option A, option B of article 32 leaves to other law any liability that the Registry or the enacting State may have for loss or damage caused by an error or omission in the

administration or operation of the Registry. Unlike option A, option B does not restrict any right of recovery that a person may have under other law to particular types of errors or omissions. But like option A, it limits the Registry's liability to the maximum amount specified by the enacting State. As with option A, the enacting State should make it clear whether the maximum monetary limit is based on the maximum value of the relevant encumbered asset or is an absolute limit.

128. Option C of article 32 simply excludes any liability of the Registry or the enacting State for an error or omission in the administration or operation of the Registry.

Article 33. Registry fees

129. Article 33 is based on recommendations 54, subparagraph (i), of the Secured Transactions Guide (see chap. IV, para. 37) and 36 of the Registry Guide (see paras. 274-280). The Secured Transactions Guide recommends that registry fees, if any, should be set a cost-recovery level. If the Registry were instead used as an opportunity for the enacting State to generate profit, registrants and searchers may be discouraged from using the registry services. In line with this policy, the Registry Guide, sets forth three fee options, namely a cost-recovery option, a no-fee or fee-below cost-recovery option and an option leaving fees to be determined in a subsequent instrument (see Registry Guide, paras. 274-280, and rec. 36).

130. In conformity with these policy considerations, two options are presented in article 33. Under paragraphs 1 and 3 of option A, fees may be charged for the registry services and in the amounts to be specified by the enacting State; the fee schedule must be publicized. To ensure that these fees are based on cost recovery, paragraph 2 entitles the authority responsibility for the appointment of the registrar under article 27 to modify the fee schedule on an ongoing basis.

131. In setting the fee schedule, an enacting State might decide to charge a lower fee for the registration of notices and the execution of search requests transmitted directly to the registry via electronic means of communication given that electronic registration or searching does not require the intercession of registry staff and therefore is less costly.

132. To enhance the efficiency of the payment process for frequent users of registry services, paragraph 4 of option A provides that the Registry may enter into an agreement with a person to establish a Registry user account for the payment of fees. This approach has the additional advantage of facilitating the identification of the registrant for the purposes of article 5 (see para. 21 above).

133. Enacting States that adopt option A may decide to limit the charging of fees to registration services and allow searches to be made free of charge. This variant would encourage and facilitate due diligence by potential secured creditors and buyers and thereby reduce risk and future disputes. Enacting States that adopt option A may decide to limit the fees to registration services and allow searches to be made free of charge.

134. Another variant would be for the Registry to not charge any fee for the registration of amendments and cancellation notices. This variant would encourage registrants to voluntarily register amendment and cancellation notices in the circumstances contemplated by article 20 and relieve grantors from the time and expense of having to initiate proceedings to force cancellations or amendments under that article. This variant would encourage registrants to voluntarily register amendment and cancellation notices in the circumstances contemplated by article 20 and relieve grantors from time and expense of having to initiate proceedings to force cancellations or amendments under that article.

135. For enacting States that enact option B or C of article 14 (allowing a registrant to select the duration of a notice), another variant would be to charge fees on a sliding scale depending on the period selected by the registrant in an initial notice and any amendment notice. This approach would have the advantage of discouraging registrants from selecting an inflated period out of an excess of caution (see Registry Guide, para. 277).

136. Option B provides that the Registry may not charge any fees for its services. This approach is based on the assumption that the cost of establishing and operating a Registry should be borne by the State. The rationale for this approach is that the Registry is a key

component of the public purpose of a modern secured transactions law to enhance the availability of credit at lower cost and with greater speed and efficiency, and not simply a private benefit for grantors and secured creditors. Like option A, option B might have several variants. For example, the enacting State may wish to offer free registration services for a limited start-up period in order to encourage acclimatization to and use of the registry system. Another variant of this policy approach would be for the enacting State to provide that no fee should be charged for certain types of services (e.g., for the registration of an amendment and cancellation notice, the registration of a notice aimed at restoring an erroneously cancelled notice or at preserving the third-party effectiveness of a security right under prior law during the transition period to the new registry system).

Note by the Secretariat on a draft guide to enactment of the draft model law on secured transactions

ADDENDUM

Contents

Chapter V. Priority of a security right

A. General rules

Article 28. Competing security rights

1. Article 28 is based on recommendation 76 of the Secured Transactions Guide (see chap. V, paras. 45-54). It addresses two related topics with respect to competing security rights in the same encumbered asset: (a) the priority as between security rights granted by the same grantor; and (b) priority as between competing security rights granted by different grantors. The first situation is more common. The second situation can occur, for example, if Grantor A creates a security right in its equipment in favour of Secured Creditor ("SC") 1 and then transfers the equipment to Transferee B who creates a security right in it in favour of SC 2. While the two related topics are distinct, this article applies the same basic principle to both of them.

2. As a general matter, but subject to the important rule set out in paragraph 3, priority between competing security rights is determined by the order in which the security rights became effective against third parties. This rule is reflected in paragraphs 1 and 2. Most often, third-party effectiveness of a security right is achieved by registration of a notice in the security rights registry (see art. 18). Because registration of a notice may precede creation of the security right (see art. 4 of the Model Registry-related Provisions), a rule that addresses the effect on priority of such an advance registration is provided in paragraph 3. Paragraphs 1 and 2 also apply, however, in the wide variety of situations in which a method of third-party effectiveness other than registration of a notice is utilized, subject to certain exceptions (see paras. 29-40 below).

3. Under paragraph 3, when a security right was made effective against third parties by registration of a notice that preceded creation of the security right, the time of that registration is used in applying the priority rules in paragraphs 1 and 2, rather than the later time of third-party effectiveness. This is the case even though, under the provisions of chapter II, such a security right is not effective against third parties until it has been created.

4. To illustrate the rule in paragraph 3, assume that: (a) on Day 1, Grantor authorized SC 1 to register a notice listing Grantor as the grantor and describing the encumbered assets as all present and future equipment of Grantor, and SC 1 registered the notice; (b) on Day 2, Grantor borrowed money from SC 2 and granted SC 2 a security right in all of Grantor's present and future equipment and SC 2 registered a notice with respect to this security right; and (c) on Day 3, Grantor borrowed money from SC 1 and granted SC 1 a security right in all of Grantor's present and future equipment. In this case, the security right of SC 2 became effective against third parties before the security right of SC 1 (because SC 1's security right did not become effective against third parties until it was created). Yet, as a result of the rule in paragraph 3, in determining the priority between the security rights of SC 1 and SC 2 under paragraph 1, the time of registration of SC 1's notice, rather than the later time on which SC 1's security right became effective against third parties, is used. Thus, the security right of SC 1 has priority over the security right of SC 2 because the notice with respect to the security right of SC1 was registered on Day 1 before the security right of SC 2 became effective against third parties on Day 2.

5. When combined with the rules in paragraphs 1 and 2, paragraph 3 results in the following priorities: (a) as between security rights that were made effective against third parties by registration of a notice, priority is determined according to the order of registration, regardless of the order of creation of the security rights; and (b) as between a security right that was made effective against third parties by registration and a security right that was made effective against third parties otherwise than by registration, priority is determined according to the order of registration or third-party effectiveness, whichever occurs first for each of the parties.

6. This rule is beneficial for two reasons. First, as a result of this rule, the priority of security rights that are made effective against third parties by the registration of a notice will always be determined according to the time of registration. The time of registration is maintained by the Registry and is, therefore, easy to demonstrate and easy to search. By way of contrast, the creation of a security right is a private event between the grantor and the

secured creditor; the time of creation is not maintained by the Registry and is not publicly available and may be difficult to establish.

7. Second, the results that follow from the application of the rule in this article are consistent with the behaviour of prudent secured creditors. For example, assume that SC 2 is considering extending credit to Grantor, secured by a security right in an item of Grantor's equipment. If SC 2 searches the records of the Registry and discovers that a notice has been registered listing Grantor as the grantor and SC 1 as the secured creditor and indicating that the encumbered asset is the same item of equipment, SC 2 will not know whether SC 1 has a security right or, rather, has registered a notice before creation of the security right. In such a situation, SC 2 would likely make the conservative assumption that the registered notice reflects an existing security right and, accordingly, if SC 2 decides to go forward with the transaction, it will be with the understanding that its rights are subordinate to that of SC 1. The rule in this article is consistent with the behaviour of SC 2.

Article 29. Competing security rights in the case of a change in the method of third-party effectiveness

8. Article 29 addresses situations in which there has been a change in the method of third-party effectiveness. This may happen, for example where a secured creditor in possession of the encumbered asset returns possession of it to the grantor after registering a notice with respect to it in the security rights registry. In such a case, the priority of the security right is determined by the time at which the security right initially became effective against third parties so long as there was no time thereafter during which the security right was not effective against third parties.

Article 30. Competing security rights in proceeds

9. Article 30, which is based on recommendation 100 of the Secured Transactions Guide (see chap. V, paras. 144-150), is important because, in many cases in which two secured creditors have a security right in the same asset, one or both of those security rights exist because the asset is proceeds of a different encumbered asset that, for example, the grantor has sold. Situations in which a secured creditor has a security right in proceeds are quite common when the original encumbered asset is inventory or a receivable inasmuch as a grantor will frequently sell the inventory or collect a receivable before satisfaction of the obligation secured by that asset. In such a case, the security right continues in the proceeds as provided in article 10 and the security right in the proceeds is effective against third parties if the conditions in article 19 are satisfied. This article determines the priority of that security right in proceeds as against another secured creditor with a security right in the same encumbered asset, whether as original encumbered asset or as proceeds. Under this article, the priority of the security right in the proceeds is the same as the priority of the security right in the original encumbered asset.

10. Thus, for example, assume that: (a) on Day 1, Grantor grants SC 1 a security right in all of Grantor's present and future inventory and SC 1 registers a notice with respect to that security right; (b) on Day 2, Grantor grants SC 2 a security right in all of Grantor's present and future receivables and SC 2 registers a notice with respect to that security right; and (c) on Day 3, Grantor sells the inventory on credit, generating a receivable. SC 2 has a security right in that receivable because of its security right in present and future receivables, and SC 1 has a security right in that receivable because it is proceeds of the inventory in which SC 1 had a security right. SC 1's security right in the receivable has priority over SC 2's security right because SC 1's priority in the receivable as proceeds is determined utilizing the time of third-party effectiveness or registration of notice with respect to the security right in the inventory, whichever came first (see art. 28). Thus SC 1's priority in the receivable dates from Day 1, while SC 2's priority in the receivable dates from Day 2 (for security rights in proceeds of acquisition security rights, however, see art. 39).

Article 31. Competing security rights in tangible assets commingled in a mass or product

11. Article 31 addresses two priority issues resulting from situations in which one or both of the competing security rights is a security right that continued in (or extended to) a mass

or product because the original encumbered asset was commingled in that mass or product (see Secured Transactions Guide, chap. V, paras. 117-124 and recs. 90 and 91). First, paragraph 1 addresses situations in which the competing security rights were in the same encumbered asset and that asset became part of a mass or product. In that case, the order of priority of the two security rights in the mass or product is the same as the order of priority of the security rights in the original encumbered asset.

12. Second, paragraphs 2 and 3 address situations in which the competing security rights were originally in different encumbered assets and both of those encumbered assets became part of the same mass or product. In such a case, if the value of the two security rights in the mass or product, as determined in article 11, is insufficient to satisfy the two secured obligations, the secured parties share the aggregate maximum value of their security rights in same proportion as the ratio of the value of the two security rights in the mass or product.

13. [Illustrations will be added after a determination is made whether to retain only one of options A and B in article 11 or both options.]

Article 32. Security rights competing with rights of buyers or other transferees, lessees or licensees of an encumbered asset

14. Article 32 is based on recommendations 79-82 of the Secured Transactions Guide (see chap. V, paras. 60-89). It determines the rights of a buyer or other transferee, lessee or licensee of an encumbered asset vis-à-vis the security right.

15. The general rule, which is stated in paragraph 1 and is subject to important exceptions stated in paragraphs 2-6, is that a security right in an encumbered asset that is effective against third parties continues to encumber the asset notwithstanding the sale or other transfer, lease or licence of the encumbered asset.

16. The article provides two types of exceptions to the general principle stated in paragraph 1. Paragraphs 2 and 3 provide exceptions based on the actions of the secured creditor, while paragraphs 4-6 provide exceptions based on the nature of the sale or other transfer, lease or licence and the knowledge of the buyer or other transferee, lessee or licensee.

17. Paragraph 2 provides that, if the secured creditor authorizes the sale or other transfer of the asset free of the security right, the buyer or other transferee acquires its rights in the asset free of that security right. The rule in this paragraph fulfils the intention of the parties inasmuch as the secured creditor has, by its authorization, evidenced intent for the general rule in paragraph 1 not to apply. Such an authorization may be given in the security agreement or separately. It may be given when, for example, a sale or other transfer of an encumbered asset free of the security right would generate proceeds that the grantor can use to satisfy the secured obligation, but a sale or other transfer subject to the security right would generate a smaller amount of proceeds and thus result in the satisfaction of a smaller part of the secured obligation. Paragraph 3 brings about the same result in the case of a lease or licence of the encumbered asset. It is stated differently than the rule in paragraph 2 because some, but not all, States do not characterize the rights of a lessee or licensee as property rights.

18. Paragraphs 4-6 provide that a buyer, lessee, or licensee of a tangible encumbered asset (but not reified intangibles; see art. 2, subpara. (jj)) in an ordinary-course-of-business transaction acquires its rights in that asset free of the security right that encumbered it while in the hands of the seller, lessor, or licensor. Under paragraph 4, a buyer of a tangible encumbered asset acquires its rights free of the security right if two conditions are satisfied. First, the sale must have been in the ordinary course of the seller's business. Thus, for example, the sale of some of a seller's inventory in accordance with the typical business practices of the seller would satisfy this condition, but an atypical sale by that seller of a used item of the seller's equipment would not satisfy this condition. The second condition is that the buyer must have acquired the encumbered asset without knowledge (as of the time of the conclusion of the agreement with the seller pursuant to which the buyer acquired the asset) that the sale violated the rights of the secured creditor under the security agreement. "Knowledge" is defined in article 2, subparagraph (s), as actual knowledge. Therefore, "constructive knowledge" that the sale violated the rights of the secured creditor does not

disqualify the buyer from the protection of this provision. It is also important to note that knowledge of the existence of the security right, as opposed to knowledge that the sale violated the secured creditor's rights, is insufficient to disqualify the buyer from the benefits of paragraph 4. If, for example, a buyer knows that the seller has encumbered its inventory, but does not know whether the secured creditor has authorized sales of that inventory free of the security right, the buyer has knowledge of the security right but does not have knowledge of whether the sale violated the rights of the secured creditor.

19. Paragraphs 5 and 6 bring about similar results to those in paragraph 4 in the case of leases of tangible encumbered assets and non-exclusive licences of intellectual property. As with paragraph 3, the formulation of paragraphs 5 and 6 differs from the formulation of paragraph 4, because some, but not all, States do not characterize the rights of a lessee or licensee as property rights.

20. Paragraphs 7 and 8 state what is often referred to as a "shelter principle". Accordingly, once a buyer, lessee, or licensee obtains rights in the encumbered asset free of (or unaffected by) a security right, those that acquire their rights in the encumbered assets from or through the buyer, lessee, or licensee are similarly free of (or unaffected by) that security right.

Rights of buyers or other transferees, lessees or licensees of an encumbered asset in the case of specialized registration

21. States that provide a specialized registry or title certificate system for achieving third-party effectiveness of a security right in particular types of asset (see A/CN.9/885, para. 110) may wish to consider whether, in order to enable competing claimants that utilize the specialized registry or title certificate system to determine their rights solely by a search of the specialized registry system or examination of the title certificate, rights of such parties should be superior to the rights of a secured creditor that achieved third-party effectiveness by other means (see Secured Transactions Guide, chap. V, paras. 56 and 57, and rec. 77; for the coordination with specialized movable property registries, see Registry Guide, para. 64-70).

Article 33. Impact of the grantor's insolvency on the priority of a security right

22. Under article 33, a security right that is effective against all parties remains effective against all parties notwithstanding the commencement of insolvency proceedings against the grantor. Moreover, nothing in the secured transactions law changes the priority of that security right as against the rights of competing claimants merely because insolvency proceedings have been commenced. Thus, unless the applicable insolvency law provides to the contrary, a security right retains the priority it had as against the rights of competing claimants before the commencement of the insolvency proceedings.

Article 34. Security rights competing with preferential claims

23. Article 34 is based on recommendations 83, 85 and 86 of the Secured Transactions Guide (see chap. V, paras. 90-93 and 103-109). It provides a framework by which a State can implement the policy of these recommendations by: (a) listing in a clear and specific way any claims that will have priority over security rights; and (b) indicating a cap on the amount of the claim given priority. Examples of claims that a State may determine that should have priority over a competing security right and thus should be listed in this article include: (a) claims of service providers and unpaid sellers or suppliers of goods but only to the extent that they have retained possession of the goods; (b) claims of employees for employment benefits. It should be noted that, while secured creditors typically obtain representations from grantors about preferential claims and otherwise address the possible existence of such claims, a claim listed by the enacting State in this article has priority to the extent stated in this article whether or not the grantor discloses the existence of that claim.

24. The rule in this article applies whether or not insolvency proceedings have been commenced with respect to the grantor. It does not address though the issue of whether certain claims have preferential status triggered in the grantor's insolvency along the lines of recommendation 239 of the Secured Transactions Guide. In many States that require registration of a notice with respect to preferential claims, the priority of preferential claims

is determined in the same way as the priority of security rights, that is, in other words, the general first-to-register priority rule applies.

Article 35. Security rights competing with rights of judgement creditors

25. Article 35 is based on recommendation 84 of the Secured Transactions Guide (see chap. V, paras. 94-102). It determines the priority as between a security right in an encumbered asset and the right of a judgement creditor that has acquired a right in the encumbered asset by taking whatever steps are necessary in order to do so under applicable law. The enacting State should complete paragraph 1 by inserting the relevant steps, or a reference to those steps, necessary for a judgement creditor to acquire rights in the encumbered asset. These steps may include actions such as registration of a notice in the security rights registry, seizure of assets or service of a garnishment order.

26. Paragraph 1 gives priority to the right of the judgement creditor if the steps necessary for it to acquire rights in the encumbered asset occur before the security right becomes effective against third parties.

27. Paragraph 2 provides that, in cases in which the judgement creditor does not acquire its rights in the encumbered asset before the security right becomes effective against third parties, the security right has priority over the right of the judgement creditor. This rule protects a secured creditor against the possibility of having its security right be subordinate to the right of a judgement creditor that did not exist at the time the secured creditor took the steps necessary to make its security right effective against third parties. However, paragraph 2 limits the extent of that priority by providing that the priority of the security right does not extend to: (a) credit extended by the secured creditor more than a short period of time (to be specified by the enacting State) after the judgement creditor notifies the secured creditor that it has taken the steps necessary to acquire its right; or (b) credit extended thereafter pursuant to an irrevocable commitment made before that notification. This rule prevents the secured creditor from exploiting its priority status to increase the secured obligation even after the secured creditor acquires actual knowledge about the rights of the judgment creditor and has had a short period of time to adjust to the existence of those rights.

Article 36. Non-acquisition security rights competing with acquisition security rights

28. Article 36 is based on recommendation 180 of the Secured Transactions Guide (see chap. IX, paras. 131, 136, 137, 143 and 146) and recommendation 247 of the Intellectual Property Supplement (see paras. 259-263). Two alternative options are provided for the enacting State. Both options provide that, under certain circumstances, an acquisition security right has priority over a competing non-acquisition security right in the same encumbered asset even if, under the general priority rule in article 28 the non-acquisition security right would have priority over the acquisition security right. When those circumstances are present, it is often said that the acquisition security right has "super-priority" over the competing non-acquisition security right.

29. "Super-priority" for acquisition security rights is a feature of the law of most States, whether phrased in terms of a higher priority for security rights securing obligations incurred in order to acquire the encumbered asset or, in many legal systems, as a necessary implication of title to the encumbered asset being retained by the seller. Article 36 continues this advantageous treatment of acquisition finance, providing a variety of "super-priority" rules depending on the nature of the asset that is subject to the acquisition security right. [The reference to possession by the secured creditor in subparagraphs 1(a) and 2(a) of option A and subparagraph 1(a) of option B means possession as a method of third-party effectiveness, and not possession acquired in the context of enforcement. Thus, an acquisition secured creditor who forgot to register on time cannot obtain this super-priority by taking possession of the encumbered asset in the context of enforcement or otherwise if the security agreement allowed the acquisition secured creditor to do so. In other words, third-party effectiveness and priority cannot be changed upon commencement of enforcement. Otherwise, each secured creditor could change its priority by commencing enforcement, a result that would introduce great uncertainty.]

30. Option A contains three "super-priority" rules. Which of the three rules is applicable in a particular case depends on the nature of the encumbered assets. If the encumbered assets are equipment or its intellectual property equivalent (that is, intellectual property or rights of a licensee under a licence of intellectual property that is primarily used or intended to be used by the grantor in the operation of its business), the rule in paragraph 1 applies. If the encumbered assets are either inventory or its intellectual property equivalent (that is, intellectual property or rights of a licensee under a licence of intellectual property held by the grantor for sale or licence in the ordinary course of the grantor's business), the rule in paragraph 2 applies. If the encumbered assets are consumer goods or their intellectual property equivalent (that is, intellectual property or rights of a licensee under a licence of intellectual property used or intended to be used by the grantor primarily for personal, family or household purposes), the rule in paragraph 3 applies.

31. Under the "super-priority" rule in paragraph 1 of option A, an acquisition security right in equipment or its intellectual property equivalent has priority over a competing non-acquisition security right created by the grantor, if either the acquisition secured creditor is in possession of the asset (unlikely inasmuch as most acquisition security rights are non-possessory) or a notice with respect to the acquisition security right is registered in the Registry within a short period of time to be specified by the enacting State after the grantor obtains possession of the asset. Thus, so long as the acquisition secured creditor registers a notice with respect to the acquisition security right within the specified period, that security right will have priority over a competing non-acquisition security right that was made effective against third parties before the acquisition security right was made effective against third parties.

32. Under the super-priority rule in paragraph 2 of option A, additional requirements must be satisfied for an acquisition secured creditor with a security right in inventory or its intellectual property equivalent to have "super-priority" over a competing non-acquisition security right. In addition to the requirements set out in paragraph 1, the acquisition secured creditor must send a notice that must be received by the non-acquisition secured creditor that has registered a notice in the Registry with respect to a security right created by the grantor in an asset of the same kind. The notice must: (a) state that the acquisition secured creditor has or intends to acquire an acquisition security right; and (b) describe the asset sufficiently to enable the non-acquisition secured creditor to identify the asset that is the object of the acquisition security right.

33. There are two reasons for this more stringent treatment. First, because inventory may "turn over" quickly and depreciate quickly, it would be economically inefficient for a potential financier considering extending credit to be secured by a non-acquisition security right in present and future inventory to need to wait for the passage of the period of time stated in paragraph 1 before being certain that the grantor's inventory is not subject to an acquisition security right that will have super-priority. The requirement that the actions required for super-priority in paragraph 2 take place before the grantor obtains possession of the encumbered asset addresses this concern. Second, inasmuch as new inventory can often be difficult to distinguish from old inventory, even a secured creditor with a security right in future inventory that monitors the assets of the grantor will not always be able to easily detect the presence of new inventory that has replaced similar older inventory. Thus, such a secured creditor may not be able to determine that some items of inventory are recently acquired and thus potentially subject to an acquisition security right. The notice requirement addresses this concern.

34. Paragraph 4 of option A contains two important rules about the notice required in subparagraph 2(b)(ii). First, such a notice may cover acquisition security rights under multiple transactions between the same parties without the need to identify each transaction. Thus, for example, a seller that is planning to engage in a series of transactions with the same grantor, under which the seller will sell inventory to the grantor subject to an acquisition security right, may send a single notice to the competing non-acquisition secured creditor generally describing the set of transactions. Second, a notice suffices to bring about super-priority if the grantor acquires the assets subject to the acquisition security right if it is received not later than a time period to be specified by the enacting State, such as five years, after the grantor acquires the assets subject to the acquisition security right. As a result, a seller that provides a notice for a series of transactions in which acquisition security rights

are created will not need to send another notice with respect to assets acquired not later than five years after the first notice is received.

35. Under the super-priority rule in subparagraph 3, an acquisition security right in consumer goods or their intellectual property equivalent automatically has priority over a non-acquisition security right in the same encumbered asset. No additional actions are required. No reference to a requirement of third-party effectiveness is needed because, under either option in article 23, an acquisition security right in consumer goods [below the value specified by the enacting State] is automatically effective against third parties. [This paragraph to be adjusted when the Working Group reaches a decision about the bracketed language in paragraph 3.]

36. Option B contains only two "super-priority" rules. The first rule, found in paragraph 1, is identical to paragraph 1 of option A (which applies only to equipment) except that it also applies to inventory and the intellectual property equivalent of inventory. The second rule, found in paragraph 2, is identical to paragraph 3 of option A. Thus, the only difference between option A and option B is that, in the former, additional steps must be taken in order for an acquisition security right in inventory or in the intellectual property equivalent of inventory to have priority over a competing non-acquisition security right.

Article 37. Competing acquisition security rights

37. Article 37 is based on recommendation 182 of the Secured Transactions Guide (see chap. IX, paras. 173-178). It addresses the priority of competing security rights when both are acquisition security rights. Unlike article 36 (which gives priority to acquisition security rights that satisfy certain criteria as against non-acquisition security rights), this article addresses priority as between security rights both of which would otherwise be entitled to "super-priority". The rule in article 37 reflects two policy decisions. First, an acquisition security right of a seller or lessor, or a licensor of intellectual property, should have priority over an acquisition security right of another person such as a lender. Second, in all other cases, priority between acquisition security rights should be determined on the basis of rules applicable when neither are acquisition security rights.

Article 38. Acquisition security rights competing with the rights of judgement creditors

38. Article 38 is based on recommendation 183 of the Secured Transactions Guide (see chap. IX, paras. 145-148). Without the rule in this article, the period provided in article 36 would not be useful. The reason for this is that a secured creditor taking an acquisition security right typically would not want to have a period in which it would be vulnerable to the rights of a judgement creditor. In such a case, a secured creditor would likely register a notice before, or as soon as possible after, the security right was created. Accordingly, a secured creditor would not benefit from the longer period to register and achieve "super-priority" under article 36.

39. By way of illustration, assume that Grantor acquires an item of equipment from Seller on credit on Day 1 and grants Seller an acquisition security right in the item of equipment to secure its obligation to pay the remainder of the purchase price; on Day 5 Seller registers a notice that has the effect of making its acquisition security right effective against third parties. Between those two dates, on Day 3, Judgement Creditor obtains a judgement against Grantor and takes the steps specified in article 35, paragraph 1, to acquire rights in the item of equipment. Under the rule in article 35, paragraph 1, Judgement Creditor's rights would have priority over Seller's security right because Judgement Creditor obtained its rights before Seller's security right was effective against third parties. As a result of the operation of article 38, however, Seller's security right has priority over the rights of Judgement Creditor.

Article 39. Acquisition security rights in proceeds

40. Article 39 is based on recommendation 185 of the Secured Transactions Guide (see chap. IX, paras. 158-172). Both option A and option B of article 36 provide that, under certain circumstances, an acquisition security right has priority over a competing non-acquisition security right in the same encumbered asset even if, under the general

priority rule in article 28, the non-acquisition security right would have priority. This article determines whether that "super-priority" over non-acquisition security rights carries over to proceeds of the encumbered assets that are subject to the acquisition security right.

41. Under the general principles of article 10, a secured creditor with a security right in an asset obtains a security right in the identifiable proceeds of that asset and, under the circumstances described in article 19, that security right is effective against third parties. This is equally true of assets subject to non-acquisition security rights and those subject to acquisition security rights. Under the rule in article 30, the priority of the security right in the proceeds is the same as the priority of the security right in the original encumbered asset. Under that rule, the security right in proceeds of assets subject to an acquisition security right would have the same "super-priority" as the security right in the original encumbered asset. Article 39, however, limits the reach of article 30 by extending "super-priority" to proceeds only of certain types of assets subject to an acquisition security right (option A) or by not extending the "super-priority" to proceeds at all (option B).

42. Under option A, the "super-priority" with respect to the assets subject to the acquisition security right always carries over to the proceeds of those assets, except when the assets subject to the acquisition security right consist of inventory, consumer goods or their intellectual property equivalent. When the asset subject to the acquisition security right is inventory or its intellectual property equivalent, whether the "super-priority" carries over to proceeds depends on the nature of the proceeds. If the proceeds are receivables, negotiable instruments, or rights to payment of funds credited to a bank account, the "super-priority" does not carry over to those proceeds. If, on the other hand, the proceeds take another form, the "super-priority" does carry over to the proceeds. When the assets subject to the acquisition security right are consumer goods or intellectual property or rights of a licensee under a licence of intellectual property used or intended to be used by the grantor [primarily] for personal, family or household purposes, however, the "super-priority" does not carry over to the proceeds.

43. The primary reason for the decision not to provide "super-priority" for certain types of proceeds in option A relates to the difficulty that would be faced by competing secured creditors with security rights in payment rights in determining which of those payment rights are proceeds of assets subject to acquisition security rights and which are not. As a result, if there were "super-priority" treatment for those types of proceeds, competing secured creditors with security rights in payment rights might simply assume that all of those payment rights are proceeds and, as a result, extend less credit on the basis of them.

44. Option B provides that the "super-priority" with respect to assets subject to an acquisition security right does not carry over to proceeds of those assets under any circumstances, with the result that the priority of the security right in the proceeds will be determined under the general principle in article 28. This option is provided as an option for States that do not wish to make the sort of distinctions between types of proceeds made in option A.

45. As the Model Law does not deal with insolvency-related matters, with the exception of article 33, no article has been included in the Model Law along the lines of recommendation 186 of the Secured Transactions Guide to deal with the application of the special priority rules for acquisition security rights. However, there is nothing in these articles to imply that insolvency law will not operate against the background of secured transactions law and thus that these provisions will not apply to acquisition security rights in the case of insolvency.

Article 40. Acquisition security rights in tangible assets commingled in a mass or product competing with non-acquisition security rights in the mass or product

46. Article 40 deals with situations in which a grantor has granted an acquisition security right in an asset that later becomes part of a mass or product and has also granted a security right in the mass or product. Under article 11, when the original asset becomes part of the mass or product, the secured creditor has a security right in that mass or product, subject to the limits set forth in that article. This article provides that the acquisition security right in the mass or product that results from the security right in the separate asset has priority over the security right in the mass or product as original encumbered asset, even if that security

right was previously made effective against third parties or was the subject of a pre-registered notice.

Article 41. Subordination

47. Article 41 is based on recommendation 94 of the Secured Transactions Guide (see chap. V, paras. 128-131). Paragraph 1 allows a person to agree to lower priority of its security right as against a competing claimant than would otherwise result from application of the priority rules in this chapter.

48. Such an agreement, usually referred to as a subordination agreement, may be in the form of a bilateral agreement between the party agreeing to lower priority and the competing claimant that will benefit from that agreement; it may also be a unilateral commitment (usually made to the grantor) by the party agreeing to lower priority that its priority will be lower than that of the beneficiaries described in the commitment. Such an agreement is governed by this article so long as it is between a secured creditor and a grantor, between two or more secured creditors or between a secured creditor and another competing claimant (e.g. a judgement creditor or an insolvency representative).

49. Paragraph 2 makes it clear that, as an agreement, a subordination agreement binds only the parties to it and does not subordinate the claims of any other parties. For example, if SC 1, that has a claim for 50, subordinates its claim to SC 3, who has a claim for 70, SC 3 has priority over SC 2 only for 50.

50. In unusual circumstances, subordination can create circular priority issues. For example, assume that SC 1, 2, and 3 each have a security right in the same encumbered asset and their priority, determined under the rules of this chapter, is in that order, so that SC 1's security right is superior to that of SC 2 and SC 2's security right is, in turn, superior to that of SC 3. Then assume that SC 1 enters into a subordination agreement with SC 3, pursuant to which SC 1 agrees to subordinate its priority in favour of SC 3. As a result, SC 3 has priority over SC 1. However, SC 1 (who did not subordinate its priority in favour of SC 2) has priority over SC 2, and SC 2 has priority over SC 3, completing the circle.

Article 42. Future advances, future encumbered assets and maximum amount

51. Article 42 is based on recommendations 97-99 of the Secured Transactions Guide (see chap. V, paras. 135-143). Inasmuch as a security right can secure obligations arising after the conclusion of the security agreement (see art. 7) and a secured obligation can be secured by assets created or acquired after the conclusion of the security agreement (see art. 8), this article clarifies the priority of a security right in such circumstances.

52. Paragraph 1 provides that the priority of a security right is not affected by the time when the obligation it secures was incurred. Thus, a security right has the same priority whether the entire secured obligation was incurred at or before the creation of the security right or whether the security right secures obligations incurred thereafter. Paragraph 2 similarly provides that when a security right has been made effective against third parties by the registration of a notice, the priority resulting from the time of that notice under article 28 is the same whether the encumbered assets were owned by the grantor at the time of registration or acquired thereafter.

53. Paragraph 3, which will be necessary only if the enacting State enacts provisions based on article 6, subparagraph 3(d), of the Model Law and article 8, subparagraph (e), of the Model Registry-related Provisions, gives effect to any cap on the secured obligation stated in the notice by providing that the secured creditor's priority is limited by that cap.

Article 43. Irrelevance of knowledge of the existence of a security right

54. Article 43 is based on recommendation 93 of the Secured Transactions Guide (see chap. V, paras. 125-127). A secured creditor's knowledge or lack of knowledge of a competing security right is not relevant to a determination of priority under either the general priority rule in article 28 or any of the special priority rules. The point is made explicit here to emphasize that priority is determined only on the basis of the facts referred to in those articles and not on the basis of difficult to prove subjective states of knowledge. Article 43 applies only to the knowledge of a secured creditor. Under the Model Law, knowledge of

other facts is relevant to priority. For example, a buyer of a tangible encumbered asset that has knowledge that the sale violates the rights of a secured creditor with a security right in that asset under the security agreement does not take free of the security right (see art. 32).

B. Asset-specific rules

Article 44. Negotiable instruments

55. Article 44 is based on recommendations 101 and 102 of the Secured Transactions Guide (see chap. V, paras. 154-156). Any differences between article 44 and recommendations 101 and 102 are of a drafting nature and are intended to ensure that paragraph 1 deals only with the relative priority of competing security rights in the same negotiable instrument, while paragraph 2 addresses the rights of a secured creditor with a security right in a negotiable instrument as against a buyer or other consensual transferee of the negotiable instrument.

56. Under paragraph 1, a security right in a negotiable instrument that is made effective against third parties by the secured creditor's possession of the negotiable instrument has priority over a security right in the same negotiable instrument that is made effective against third parties by registration of a notice, without regard to the order in which the security rights became effective against third parties. This is consistent with the important role that possession plays in the law of negotiable instruments.

57. Under paragraph 2, certain buyers or other transferees that take possession of a negotiable instrument take their rights in the instrument free of a security right that is effective against third parties by registration of a notice. If the security right were effective against third parties because of the secured creditor's possession of the negotiable instrument, the buyer or other transferee could not also have possession of it, unless the same agent possesses the negotiable instrument both on behalf of the secured creditor and the buyer or other transferee.

58. More specifically, under paragraph 2, a buyer or other transferee of a negotiable instrument can acquire its rights free of a security right in that instrument in either of two ways. First, under subparagraph 2(a), a person who becomes a protected holder or the like (the enacting State should insert the appropriate term in subpara. 2(a)) of the negotiable instrument under the law of the enacting State acquires its right in the instrument free of an existing security right in it. Second, under subparagraph 2(b), a buyer or other transferee that takes possession of the instrument and gives value for it without knowledge that the sale or other transfer is in violation of the rights of the secured creditor also acquires its right in the instrument free of that security right. As with the rule in paragraph 1, this rule preserves the important role of possession in the law of negotiable instruments.

59. Knowledge of the existence of a security right does not prevent a buyer or other transferee of a negotiable instrument from acquiring its rights in the instrument free of the security right under subparagraph 2(b) (although such knowledge may prevent the buyer from qualifying as a protected purchaser or the like and, thus, may prevent the buyer from taking free of the security right under subparagraph 2(a)). Rather, only knowledge that the transfer violates the rights of the secured creditor under the security agreement prevents the transferee from acquiring its rights in the instrument free of the security right under subparagraph 2(b). "Knowledge", as defined in article 2, paragraph (s), means "actual knowledge". The reference to "good faith" that was included in recommendation 102, subparagraph (b) has been deleted on the understanding that the absence of knowledge amounts essentially to good faith and the concept of good faith is used in the Model Law only to reflect an objective standard of conduct.

Article 45. Rights to payment of funds credited to a bank account

60. Article 45 is based on recommendations 103-105 of the Secured Transactions Guide (see chap. V, paras. 157-163). It determines the priority between competing security rights in a right to payment of funds credited to a bank account whether those rights to payment are original encumbered assets or proceeds of a security right in other property (according

to art. 19, para. 1, a security right in proceeds in the form of a right to payment of funds credited in a bank account is automatically effective against third parties, if the security right in the original encumbered asset is effective against third parties).

61. Paragraphs 1-3, taken together, result in the conclusion that a security right in a right to payment of funds credited to a bank account made effective against third parties by any of the methods provided for in article 24 has priority over a security right made effective against third parties by registration of a notice. Under paragraph 1, a security right in a right to payment of funds credited to a bank account that is made effective against third parties by the secured creditor becoming the account holder has priority over all competing security rights in the same asset. Next in priority order, paragraphs 2 and 3 give priority to: (a) a security right in a right to payment of funds credited to a bank account with respect to which the secured creditor is the depositary institution; and (b) a security right made effective against third parties by a control agreement. Under paragraph 4, if there are multiple control agreements, priority is determined on the basis of the order of conclusion of the control agreements.

62. Under paragraph 5, except when the secured creditor has become the account holder, a security right in a right to payment of funds credited to a bank account is subordinate to the depositary institution's rights under other law to set off claims against the grantor against its obligations to the grantor with respect to the grantor's right to payment of funds from the bank account. This rule protects depositary institutions from losing their rights of set-off without their knowledge or consent.

63. Under paragraph 6, a transferee of funds from a bank account pursuant to a transfer initiated or authorized by the grantor acquires its rights free of a security right in the right to payment of funds credited to the bank account so long as the transferee does not have knowledge that the transfer violates the rights of the secured creditor under the security agreement. A "transfer of funds" includes transfers by a variety of mechanisms, including by cheque and electronic means. The purpose of paragraph 6 is to preserve the free negotiability of funds.

64. Knowledge of the existence of a security right does not prevent a transferee of funds from the bank account from taking free of the security right. Rather, it is only knowledge that the transfer violates the rights of the secured creditor under the security agreement that prevents the transferee from taking free. "Knowledge", as defined in article 2, paragraph (s), means "actual knowledge". Paragraph 7 is intended to preserve the rights of transferees of funds credited to a bank account under other law to be specified by the enacting State.

Article 46. Money

65. Article 46 is based on recommendation 106 of the Secured Transactions Guide (see chap. V, para. 164). Its purpose is to preserve negotiability of money. Thus, under paragraph 1, a transferee of encumbered money acquires its rights in it free of the security right, unless it has knowledge that the transfer violates the rights of the secured creditor under the security agreement. "Knowledge", as defined in article 2, paragraph (s), means "actual knowledge". Paragraph 2 is intended to preserve the free negotiability of money.

Article 47. Negotiable documents and tangible assets covered by negotiable documents

66. Article 47 is based on recommendations 108 and 109 of the Secured Transactions Guide (see chap. V, paras. 167-169). It is designed to preserve current practices under which rights to the tangible assets covered (or represented) by a negotiable document are subsumed in the negotiable document with the result that parties that deal with the document generally need not concern themselves separately with claims to the assets not reflected in the document. Accordingly, under paragraph 1, a security right in a tangible asset made effective against third parties by possession of the negotiable document covering that asset is given priority over a competing security right made effective against third parties by any other means.

67. Paragraph 2 states an exception to that general rule. Except when the encumbered asset is inventory, it provides that the rule in paragraph 1 does not apply against a secured creditor

that had a security right in an encumbered asset before the earlier of the time that either the asset became covered by the negotiable document or the time that an agreement was concluded between the grantor and the secured creditor in possession of the negotiable document providing that the asset was to be covered by a negotiable document so long as the asset actually became covered by such a negotiable document within the time to be specified by the enacting State.

Article 48. Intellectual property

68. Article 48 is based on recommendation 245 of the Intellectual Property Supplement (see paras. 193-212). Its purpose is to clarify that the rule in article 32, paragraph 6, does not obviate other rights of the secured creditor as an owner or licensor of the intellectual property that is the subject of the licence. This clarification is of particular importance because the concept of "ordinary course of business", used in article 32, paragraph 6, is a concept of commercial law and is not drawn from law relating to intellectual property and thus may create confusion in an intellectual property financing context. Typically, law relating to intellectual property does not distinguish in this respect between exclusive and non-exclusive licences and focuses rather on the issue whether a licence has been authorized or not.

69. As a result, unless the secured creditor authorized the grantor to grant licences unaffected by the security right (which will typically be the case as the grantor will rely on its royalty income to pay the secured obligation), the licensee would take the licence subject to the security right. Thus, if the grantor defaults, the secured creditor would be able to enforce its security right in the licensed intellectual property and sell or license it free of the licence. In addition, a person obtaining a security right from the licensee will not obtain an effective security right as the licensee would not have received an authorized licence and would have no right in which to create a security right.

Article 49. Non-intermediated securities

70. Article 49 covers a topic not addressed in the Secured Transactions Guide, which excluded from its scope all types of securities (see rec. 4, subpara. (c)). So as not to interfere with existing customs and practices with respect to non-intermediated securities, this article adjusts the general priority rule of article 28 in a manner similar to the special priority rules for security rights in negotiable instruments and rights to payment of funds credited to a bank account.

71. For certificated non-intermediated securities, paragraph 1 provides that a security right made effective against third parties by the secured creditor's possession of the certificate has priority over a competing security right by the same grantor that is made effective against third parties by registration of a notice in the Registry. This is parallel to the rule for negotiable instruments in article 44, paragraph 1.

72. For uncertificated non-intermediated securities, paragraph 2 provides that a security right made effective against third parties by registration in the books maintained for that purpose by or on behalf of the issuer has priority over a security right in the same securities made effective against third parties by any other method. Such registration may take the form of a notation of the security right or an entry of the name of the secured creditor as the holder of the securities in the issuer's books. The enacting State may choose the method that best suits its legal system. This rule is similar to the rule for rights to payment of funds credited to a bank account in article 45, paragraph 1. The rationale for this rule is that such notation or registration in the books of the issuer fulfils a similar function to the secured creditor becoming the account holder of a bank account.

73. Paragraphs 3 and 4 are also applicable only to uncertificated non-intermediated securities. They parallel the similar rules for rights to payment of funds credited to a bank account in article 45, paragraphs 3 and 4. Paragraph 3 gives priority to a security right made effective against third parties by conclusion of a control agreement over other security rights in the same securities. As between security rights made effective against third parties by conclusion of a control agreement, paragraph 4 awards priority in the order in which those control agreements were concluded.

74. Paragraph 5 is intended to preserve the rights of transferees of non-intermediated securities under other law to be specified by the enacting State. It parallels article 45, paragraph 7.

Chapter VI. Rights and obligations of the parties and third-party obligors

Section I. Mutual rights and obligations of the parties to a security agreement

A. General rules

Article 50. Sources of mutual rights and obligations of the parties

1. Article 50 is based on recommendation 110 of the Secured Transactions Guide (see chap. VI, paras. 14 and 15), which in turn is based on article 11 of the Assignment Convention. Paragraph 1 is intended to reiterate the principle of party autonomy enshrined in article 3. Paragraph 2 is intended to give legislative strength to trade usages and practices, which may not be generally recognized in all States.

2. With the exception of certain mandatory rules included in chapter VI (see arts. 3, para. 1, 51, 52 and 70, para. 3), the parties are given wide latitude to tailor their security agreement and their usage and practices to the transaction at hand in order to most effectively and efficiently facilitate their respective commercial goals. Thus, other articles of chapter VI are non-mandatory rules and apply where the parties have not provided otherwise in the security agreement. For this reason, a reference to contrary agreement of the parties, which was included in the recommendations of the Secured Transactions Guide and the provisions of the Assignment Convention on which the provisions of this chapter are based, has been deleted (see, for example, article 55, recommendation 114 of the Secured Transactions Guide and article 12 of the Assignment Convention).

Article 51. Obligation of the party in possession to exercise reasonable care

3. Article 51 is based on recommendation 111 of the Secured Transactions Guide (see chap. VI, paras. 24-31). It sets forth the rule that a grantor or secured creditor in possession of a tangible asset (which under the definition in art. 2, subpara. (jj), includes money, negotiable instruments, negotiable documents and certificated non-intermediated securities)

must exercise reasonable care to preserve both the asset and its value. Any other person in possession of an encumbered asset may also be obliged to take reasonable care to preserve the encumbered assets under other law.

4. What constitutes "reasonable care" in a given case depends upon the nature of the encumbered asset. Thus, reasonable care may mean something different with respect to equipment, inventory, crops or live animals. Although physical preservation of a tangible asset would, in most cases, have the effect of preserving the asset's value, this rule also recognizes preservation of the asset's value that may go beyond the physical preservation of the asset. For example, if a secured creditor has possession of certificated non-intermediated shares of a company, the secured creditor may be required in particular circumstances to exercise certain rights arising under the shares to preserve their rights. In any case, preservation of the value of the encumbered assets may only include measures that are within the control of the person in possession.

5. Article 51 and a rule of law relating to securities along the lines of article 5(1) of the Financial Collateral Directive ("FCD"), which gives a secured creditor the right to use securities in its possession, should be read together and their relationship would be a matter of interpretation under the rules of the applicable law (under the FCD, "financial collateral" may consist of "cash", "credit claims" and "financial instruments", and "financial instruments" may be either intermediated or non-intermediated securities, as long as they are "negotiable on the capital market" or "normally dealt in").

Article 52. Obligation of a secured creditor to return an encumbered asset

6. Article 52 is based on recommendations 112 and 72 of the Secured Transactions Guide (see chap. VI, paras. 35-39). It provides that, once a security right in an encumbered asset is extinguished, a secured creditor in possession of the asset must return it to the grantor (for the secured creditor's obligation to register an amendment or cancellation notice, see art. 20, subparas. 1(b) and 3(c) of the Model Registry-related Provisions). A security right generally will be deemed to have been extinguished once the secured obligation has been paid in full or otherwise satisfied in full, and all further commitments to extend credit to the debtor have terminated.

7. Article 52 does not expressly address the obligation of a secured creditor to withdraw any notification that it has given to the debtor of the receivable. Rather, the grantor is protected in this regard by article 57, paragraph 2, and article 77, subparagraph 2(b), which require the secured creditor to return to the grantor any surplus proceeds it receives. It should also be noted that: (a) article 52 does not apply to receivables or other intangible assets, because they cannot be the subject of physical possession (see art. 2, subpara. (z)); and (b) the question of whether a secured creditor should return equivalent non-intermediated securities replacing the originally encumbered non-intermediated securities received pursuant to the exercise of a right of use is a matter for the parties and other law (see, for example, art. 5(2) FCD).

Article 53. Right of a secured creditor to use and inspect an encumbered asset, and to be reimbursed for expenses

8. Article 53 is based on recommendation 113 of the Secured Transactions Guide (see chap. VI, paras. 50-65). It provides that a secured creditor not only has certain obligations (described in articles 51 and 52), but also certain rights. Under subparagraph 1(a), a secured creditor in possession has the right to be reimbursed for the reasonable expenses incurred to preserve an encumbered asset in accordance with article 51. Under subparagraph 1(b), a secured creditor in possession may make reasonable use of an encumbered asset, so long as it applies any revenues generated from the use to the payment of the obligation secured by the asset.

9. Finally, under paragraph 2, where an encumbered asset is in the possession of the grantor, the secured creditor has the right to inspect the asset. As this article is subject to the general standard of commercial reasonableness and good faith set forth in article 4, the right to inspect may only be exercised at commercially reasonable times and in a commercially reasonable manner. The application of this standard depends upon the circumstances. For example, in extreme cases, such as where the debtor is in default or the secured creditor has

reason to believe that the physical condition of the collateral is in jeopardy or has been, or is about to be, removed from the State of its location, the secured creditor may be justified to demand an immediate inspection.

Article 54. Right of the grantor to obtain information

10. Article 54 is a new provision intended to provide the grantor (other than the transferor in an outright transfer of a receivable) with the right to obtain information from a secured creditor (other than a transferee in an outright transfer of a receivable) as to the amount of the secured obligation or the assets encumbered at a certain point of time. This information may be necessary where the grantor is interested in obtaining credit against the security of assets that are already encumbered and the potential third-party creditor requests that information (this does not apply to a transferor of a receivable, as such a transferor retains no right in the receivable and thus may not create a security right in it under art. 6, para. 1). The enacting State may wish to extend that right to third-party creditors (e.g. judgement creditors). Other matters, such as the legal consequences of the secured creditor's failure to comply with a request for information or to give accurate information are left to other law.

B. Asset-specific rules

Article 55. Representations of the grantor of a security right in a receivable

11. Article 55 is based on recommendation 114 of the Secured Transactions Guide (see chap. VI, para. 73), which in turn is based on article 12 of the Assignment Convention. It provides that, when a grantor grants a security right in a receivable, the grantor is deemed to make various representations to the secured creditor at the time the security agreement is concluded. In particular, under paragraph 1, the grantor represents that it has not previously created a security right in the receivable in favour of another secured creditor, and that the debtor of the receivable will not have any defences or rights of set-off with respect to the receivable (e.g. that the grantor will fully perform the contract giving rise to the receivable and any other contract it has entered into with the debtor of the receivable). Under paragraph 2, the grantor does not represent that the debtor of the receivable has, or will have, the ability to pay the receivable (as this is beyond the grantor's control).

12. The representation that the grantor has the right to create a security right was not carried over from recommendation 114 of the Secured Transactions Guide into article 55, to avoid giving the impression that it applies to security rights created only in receivables. As a result, the matter is left to general contract law. It should be noted, however, that even in the case of an anti-assignment agreement between a grantor and a secured creditor, the grantor still has rights in the receivable and the power to encumber it, and thus may create a security right in the receivable (see art. 6, para. 1 and A/CN.9/885, para. 77).

Article 56. Right of the grantor or the secured creditor to notify the debtor of the receivable

13. Article 56 is based on recommendation 115 of the Secured Transactions Guide (see chap. VI, paras. 74 and 75), which is based on article 13 of the Assignment Convention. Paragraph 1 provides that, when a security right has been created in a receivable, either the grantor or the secured creditor has the right to notify the debtor of the receivable of the existence of the security right and send a payment instruction; but that, once notification of the security right has been received by the debtor of the receivable, only the secured creditor may send a payment instruction (under art. 60, a notification or a payment instruction is effective only when received by the debtor of the receivable).

14. It should be noted that a payment instruction is treated as a notion distinct from notification, because: (a) a notification may not contain a payment instruction (for example, because the secured creditor may have obtained control of the grantor's bank account to which debtors of receivables have been instructed by the grantor to pay); (b) no notification may be given (for example, because the transaction involved is a non-notification factoring or undisclosed invoice discounting transaction); and (c) the secured creditor may need to change its payment instructions and thus there may be more than one payment instruction.

15. Paragraph 2 provides that a notification sent in breach of an agreement between the grantor of the security right and the secured creditor is nevertheless effective for the purposes of article 62, which precludes the grantor from raising, after receiving notice of the security right, certain rights of set-off with respect to the receivable that became available to the grantor after it received notice of the security right (see para. 35 below).

Article 57. Right of the secured creditor to payment of a receivable

16. Article 57 is based upon recommendation 116 of the Secured Transactions Guide (see chap. VI, paras. 76-80), which in turn is based on article 14 of the Assignment Convention. Any changes made are intended to clarify the text, but not to change its policy. The article establishes the right of the secured creditor to receive the proceeds of a receivable in which it holds a security right as against the grantor of the security right.

17. Paragraph 1 provides that, regardless of whether notification of the security right has been sent to the debtor of the receivable, the secured creditor is entitled to retain: (a) the proceeds of any full or partial payment of the receivable made to the secured creditor, as well as any tangible assets (such as inventory) returned to the secured creditor in respect of the receivable; (b) the proceeds of any full or partial payment of any receivable made to the grantor (as well as any tangible assets returned to the grantor); and (c) the proceeds of any full or partial payment of any receivable made to a third party (as well as any tangible assets returned to the grantor) if the right of the secured creditor has priority over the right of the third person.

18. Paragraph 2 reflects normal practice in secured transactions relating to receivables in which the secured creditor may have the right to collect the full amount of the receivable owed, plus interest owed on the ground of contract or law, but has to account for and return to the grantor any balance remaining after payment of the secured obligation (see also art. 77, para. 2).

Article 58. Right of the secured creditor to preserve encumbered intellectual property

19. Article 58 is based on recommendation 246 of the Intellectual Property Supplement (paras. 223-226). It recognizes the effectiveness of an agreement between the grantor of a security right in intellectual property and the secured creditor that the secured creditor may take the necessary steps to preserve the value of the intellectual property, such as making any necessary registration (such as a patent registration) and initiating actions to prevent infringement by third parties.

20. Although articles 3 (party autonomy) and 51 (obligation to preserve an encumbered asset) may be generally sufficient to ensure that the secured creditor may take these steps, article 58 has been included in the Model Law, because, in an intellectual property right context, these rights are normally rights of the intellectual property owner.

Section II. Asset-specific rules: Rights and obligations of third-party obligors

A. Receivables

Article 59. Protection of the debtor of the receivable

21. Article 59 is derived from recommendation 117 of the Secured Transactions Guide (see chap. VII, para. 12), which in turn is based on article 15 of the Assignment Convention. Paragraph 1 sets forth the general principle that the creation of a security right in a receivable does not affect the rights or obligations of the debtor of the receivable, unless the debtor of the receivable consents. So, for example, the creation of a security right cannot change the payment terms of a contract giving rise to a receivable (e.g. the amount or the time of payment).

22. To implement the general principle of paragraph 1, paragraph 2 provides that, to enable the secured creditor to exercise its security right, a payment instruction (which is

treated as a notion distinct from notification; see para. 14 above) may change the person, address or account to which the debtor of the receivable is required to make payment, but it may not change: (a) the currency in which the receivable is to be paid, as specified in the original contract giving rise to the receivable; or (b) the State in which the payment is to be made, as specified in the original contract giving rise to the receivable, to a State other than that in which the debtor of the receivable is located.

Article 60. Notification of a security right in a receivable

23. Article 60 is based on recommendation 118 of the Secured Transactions Guide (see chap. VII, paras. 13-16), which in turn is based on article 16 of the Assignment Convention. It describes the requirements for an effective: (a) notification of a security right in a receivable; or (b) payment instruction (a payment instruction is treated as a notion distinct from notification, see para. 14 above).

24. Under paragraph 1, for the effectiveness of a notification or a payment instruction, it must be "received" by the debtor of the receivable. In addition, a notification or payment instruction must reasonably identify the receivable and the secured creditor, and be in a language reasonably expected to inform the debtor of its contents. On this latter point, paragraph 2 makes it clear that the language of the original contract giving rise to the receivable is always sufficient. Under paragraph 3, a notification or payment instruction may relate not only to receivables in existence at the time the notification or payment instruction is given, but also may relate to receivables arising thereafter.

25. Under paragraph 4, where A creates a security right in its receivables and then transfers the obligation secured by them to B, who also creates a security right in the receivables and then transfers the secured obligation to C, who also creates a security right in the receivables, notification of the debtor of the receivable relating to the security right created by C constitutes notification of all prior security rights created by A and B.

Article 61. Discharge of the debtor of the receivable by payment

26. Article 61 is based on recommendation 119 of the Secured Transactions Guide (see chap. VII, paras. 17-20), which in turn is based on article 17 of the Assignment Convention. It sets forth the rules affecting when and how a receivable is discharged by payment.

27. Paragraph 1 embodies the basic principle that, until the debtor of the receivable receives notification of a security right in a receivable, it may be discharged by payment in accordance with the contract giving rise to the receivable ("original contract"). Where the original contract is a sales contract, this means payment to the seller. However, under paragraph 2, once the debtor receives notification of a security right, it can only be discharged by paying either the secured creditor or another party, as instructed by the secured creditor in the notification or as subsequently instructed by the secured creditor in a written payment instruction received by the debtor. However, the rule in paragraph 2 is subject to a number of qualifications that are set forth in paragraphs 3-8.

28. First, under paragraph 3, if the debtor of the receivable receives more than one payment instruction relating to a single security right in a receivable created by the same grantor, it is discharged by paying in accordance with the last payment instruction received from the secured creditor before payment, as the last payment instruction will be the most up-to-date (a payment instruction is treated as a notion distinct from notification, see para. 14 above).

29. Second, under paragraph 4, if the debtor receives notification of more than one security right in the same receivable created by the same grantor, it is discharged by paying in accordance with the first notification received, on the theory that the security right covered by the first notification will probably have priority over the subsequent security right under the Model Law's priority rules. It should be noted that the debtor of the receivable is discharged even if the first notification does not relate to the security right with priority, since the debtor cannot be required to determine which security right has priority. In such a case, the secured creditor with a security right that has priority will have to claim the proceeds of payment from the creditor to whom the debtor paid.

30. Third, under paragraph 5, if the debtor receives notification of one or more subsequent security rights in the same receivable, it is discharged by paying in accordance with the notification of the last of such subsequent security rights (i.e. where A creates a security right in favour of B, B creates a security right in favour of C). The reason is that the last in such a series of successive secured creditors will be the actual holder of the security right.

31. Fourth, under paragraph 6, where the debtor receives notification of a security right in a part of, or an undivided interest in, one or more receivables, the debtor has a choice. It may be discharged by paying either in accordance with the notification or in accordance with paragraph 1 as if the debtor has not received the notification. However, if the debtor chooses the first of these alternatives, under paragraph 7, it is discharged only to the extent of the part or undivided interest paid.

32. Finally, under paragraph 8, if the debtor receives notification from a person other than the initial creditor of the receivable and wants to make sure that that person is a secured creditor entitled to payment, the debtor may request from the person that sent the notification to provide, within a reasonable time, adequate proof of the creation of the security right (including a security right granted by the initial or a subsequent secured creditor). If the secured creditor fails to provide such proof, the debtor may pay as if it had not received such notification. For this purpose, under paragraph 9, adequate proof includes any writing from the grantor that indicates that a security right has been created (e.g. a security agreement).

33. Paragraph 10 is intended to preserve any other grounds for discharge based on payment to the person entitled to payment under other law (e.g. payment to a competent judicial or other authority, or to a public fund).

Article 62. Defences and rights of set-off of the debtor of the receivable

34. Article 62 is based on recommendation 120 of the Secured Transactions Guide (see chap. VII, para. 21), which in turn is based on article 18 of the Assignment Convention.

35. Subparagraph 1(a) preserves for the debtor all defences and rights of set-off arising from the contract giving rise to the receivable, including any other contract that was part of the same transaction, as if the security right had never been created and the claim were made by the grantor. Subparagraph 1(b) ensures that the debtor of the receivable can assert against the secured creditor any other right of set-off that was available to the debtor at the time it received notification of the security right. This means, however, that the debtor may not assert a right of set-off that arises subsequent to such notification. Under article 63, the debtor may waive its defences and rights of set-off.

36. Under paragraph 2, paragraph 1 does not give the right to the debtor of the receivable to raise against the secured creditor as a defence or right of set-off the breach of an agreement by the grantor limiting the grantor's right to create a security right. Otherwise, the validation of a security right under article 13 notwithstanding such an agreement would be meaningless.

Article 63. Agreement not to raise defences or rights of set-off

37. Article 63 is based on recommendation 121 of the Secured Transactions Guide (see chap. VII, para. 22), which in turn is based on article 19 of the Assignment Convention. Paragraph 1 provides that the debtor of the receivable may agree, in a writing signed by it, not to raise the defences and rights of set-off permitted by article 62. The secured creditor is entitled to invoke the benefit of such an agreement even though it was not a party to it. Under paragraph 2, any modification to such an agreement must also be in a writing signed by the debtor of the receivable and is effective as against the secured creditor only if the secured creditor consents or, in the case of a receivable that has not been earned yet by performance, a reasonable secured creditor would consent (see art. 64, para. 2). To avoid abuses, paragraph 3 provides that the debtor may not waive defences based on fraud committed by the secured creditor or the debtor's incapacity.

Article 64. Modification of the original contract

38. Article 64 is based on recommendation 122 of the Secured Transactions Guide (see chap. VII, paras. 23 and 24), which in turn is based on article 20 of the Assignment

Convention. It addresses the impact of an agreement between the grantor of a security right in a receivable and the debtor of the receivable that modifies the terms of the receivable. The result depends on when the agreement is made. Under paragraph 1, if the agreement is concluded before the debtor receives notification of a security right in the receivable, it is effective against the secured creditor, but the secured creditor also enjoys any benefits derived from the agreement.

39. Under paragraph 2, even if the agreement is concluded after notification, it is also effective, even if it affects the secured creditor's rights provided that: (a) the secured creditor consents to it; or (b) the receivable has not been fully earned by performance and the modification was provided for in the contract giving rise to the receivable or a reasonable secured creditor would consent to the modification. Under paragraph 3, article 64 does not affect any right of the grantor or secured creditor arising under other law for breach of an agreement between them (such as an agreement that the grantor would not agree to any modifications of the terms of the receivable).

Article 65. Recovery of payments made by the debtor of the receivable

40. Article 65 is based on recommendation 123 of the Secured Transactions Guide (see chap. VII, paras. 25 and 26), which in turn is based on article 21 of the Assignment Convention. It addresses the situation in which the grantor of a security right in a receivable (or the transferor in an outright transfer of the receivable) fails to perform its obligations under the contract giving rise to the receivable. The article insulates the secured creditor from liability in this circumstance, by providing that the debtor of the receivable may not look to the secured creditor to recover any amount that it has paid to either the grantor or the secured creditor. As a result, the debtor of the receivable bears the risk of the insolvency of the other party to the contract (i.e. the grantor).

B. Negotiable instruments

Article 66. Rights as against the obligor under a negotiable instrument

41. Article 66 is based on recommendation 124 of the Secured Transactions Guide (see chap. VII, paras. 27-31). It is intended to preserve the rights of parties under the relevant law relating to negotiable instruments (to be specified by the enacting State). For example, under that law: (a) a secured creditor with a security right in a negotiable instrument may collect from the obligor under the instrument only in accordance with its terms; (b) even if the grantor defaults, the secured creditor may collect from the obligor only when payment becomes due under the instrument and the law relating to such instruments; (c) a secured creditor with a security right in a negotiable instrument may have greater rights against the issuer of the instrument than the payee, since the issuer may not be able to raise against the secured creditor defences based on the contract between the issuer and the payee of the instrument.

C. Rights to payment of funds credited to a bank account

Article 67. Rights as against the depositary institution

42. Article 67 is based on recommendations 125 and 126 of the Secured Transactions Guide (see chap. VII, paras. 32-37). It addresses the situation in which a security right is created in a right to payment of funds credited to a bank account.

43. Subparagraph 1(a) provides that the rights and obligations of the depositary institution are unaffected by the security right, unless the institution consents. The rationale for protecting depositary institutions in this manner is that imposing duties on a depositary institution or changing the rights and duties of a depositary institution without its consent may subject the institution to risks that it is not in a position to manage appropriately unless it knows in advance what those risks might be and to the risk of having to violate obligations imposed by regulatory or other law (see Secured Transactions Guide, chap. VII, para. 33).

44. To safeguard the confidentiality of the relationship of a depositary institution and its client that is imposed by regulatory or other law, subparagraph 1(b) also provides that the

depositary institution has no obligation to respond to requests for information (e.g. about the balance in the account, whether a control agreement exists or whether the account holder retains the right to dispose of funds credited to its bank account).

45. Finally, paragraph 2 provides that, even where the depositary institution consents to the creation of a security right in a right to payment of funds credited in a bank account held by a grantor with that institution, any right of set-off that the institution may have under regulatory or other law also remains unaffected. The rationale for this rule is the need to avoid any interference with the way depositary institutions manage risks, given the nature of the transaction and the business of their customer.

D. Negotiable documents and tangible assets covered by negotiable documents

Article 68. Rights as against the issuer of a negotiable document

46. Article 68 is based on recommendation 130 of the Secured Transactions Guide (see chap. VII, paras. 43-45). It provides that, when a secured creditor has a security right in a negotiable document, the rights of the secured creditor as against the issuer of the document or any person obligated on the document are determined by the law relating to negotiable documents (to be specified by the enacting State). This means that, for a secured creditor with a security right in the document to enforce it against the assets covered by the document: (a) at the time of enforcement, the assets covered by the document must still be in the possession of the issuer or other obligor under the document; and (b) the issuer or other obligor will have no obligation to deliver the assets to the secured creditor, unless the negotiable document was transferred to the secured creditor in accordance with the law governing negotiable documents (e.g. with a necessary endorsement).

E. Non-intermediated securities

Article 69. Rights as against the issuer of a non-intermediated security

47. As already mentioned, the Secured Transactions Guide does not address security rights in any types of securities (see rec. 4, subpara. (c)). Thus, article 69 is a new rule. In line with articles 66-68, it provides that the rights of a secured creditor holding a security right in non-intermediated securities as against the issuer of the securities are determined by other law of the enacting State. For example, registration on the books of a corporation or special enforcement procedures may be required for a security right in the shares of a corporation to be effective against the issuer.

Chapter VII. Enforcement of a security right

A. General rules

Article 70. Post-default rights

48. Article 70 is based on recommendations 133, 139, 141, 143, and 144 of the Secured Transactions Guide (see chap. VIII, paras. 10-12, 15-17, and 33-35). Paragraph 1 clarifies that, following the grantor's default, the grantor and the secured creditor may exercise any right they may have under the provisions of chapter VII, other law or the security agreement (provided that, in the last two cases, that right is not inconsistent with the provisions of the Model Law).

49. For the purposes of the Model Law, "default" includes both events described in the relevant law and events agreed to by the parties (see art. 2, subpara. (j)). It should also be noted that some of the rights under this article may be available even before default. Thus, for example, even before default: (a) the grantor may exercise its right of redemption under contract law; (b) the secured creditor may collect a receivable with the agreement of the grantor (see art. 80, para. 2); and (c) any party may apply to a court or other authority for relief under general procedural or other law (see also art. 72).

50. Paragraph 2 indicates that the exercise of one right generally does not prevent the exercise of another right, except if the exercise of one right makes impossible the exercise of another right (e.g. if the secured creditor decides to obtain possession and sell the encumbered asset, it cannot propose to acquire it in satisfaction of the secured obligation).

51. Paragraph 3 provides that the debtor (defined to include the grantor and any other person that owes payment or other performance of a secured obligation [and a transferor in an outright transfer of a receivable] (see art. 2, subpara. (h)) may not waive unilaterally or vary by agreement their rights under this chapter before default. Otherwise, the secured creditor could put pressure on the debtor to waive or vary its rights in return for concessions in the security agreement (see Secured Transactions Guide, chap. VIII, paras. 16 and 17).

Article 71. Methods of exercising post-default rights

52. Article 71 is based on recommendation 142 of the Secured Transactions Guide (see chap. VIII, paras. 18-20 and 29-33). Paragraph 1 clarifies that the secured creditor may exercise its post-default rights by applying to a court or other authority to be specified by the enacting State (e.g. a chamber of commerce, arbitral tribunal or notary public). There are many reasons why a secured creditor may decide to follow this approach. For example, judicial or similar proceedings may be sufficiently efficient, the secured creditor may wish to avoid having its self-help actions subsequently challenged, anticipate that it will have to apply to a court or other authority anyway to recover an anticipated deficiency or may fear and wish to avoid a breach of public order (see Secured Transactions Guide, chap. VIII, paras. 32 and 33).

53. Where judicial or other similar proceedings are likely to be slow and costly, and less likely to produce the highest possible amount upon the disposition of the encumbered assets, the secured creditor may decide to enforce its security right with minimal or no supervision by a court or other authority (see Secured Transactions Guide, chap. VIII, para. 29 and 31). In such a case, the Model Law introduces a number of safeguards for the grantor, the debtor and other persons the rights of whom may be affected. For example, under article 4, the secured creditor has to proceed in good faith and in a commercially reasonable manner and, under article 75, paragraph 3, ensure that the grantor has consented in writing, the grantor and any person in possession have been notified and at the time of repossession the person in possession does not object.

54. In any case, the Model Law does not introduce any limitation to the ability of the parties to avail themselves of the assistance of a court or other authority at any time to resolve a dispute arising in relation to a security agreement or the exercise of a post-default right. Quite to the contrary, under article 72, [the grantor, the debtor or any competing claimant] [any person affected by the non-compliance of the secured creditor with the provisions of this chapter] is entitled to relief from a court or other authority.

55. It should also be noted that there is nothing in the Model Law that precludes the grantor and the secured creditor from agreeing to resolve any dispute that may arise between them by arbitration, conciliation or negotiation. Depending on the efficiency of court proceedings in a particular State, these alternative dispute resolution mechanisms may provide a viable alternative to court proceedings, provided that certain issues are addressed by the relevant law, in particular with respect to arbitration, such as the arbitrability of disputes arising under a security agreement or associated with a security right, protection of rights of third parties and the confidentiality of arbitral proceedings (see also para. 58 below).

56. Under paragraph 2, the exercise of post-default rights by application to a court or other authority is subject not only to the provisions of this chapter but also to the relevant rules to be specified by the enacting State (typically, procedural in nature). Under paragraph 3, the exercise of those rights without application to a court or other authority is subject only to the provisions of this chapter.

Article 72. Relief for non-compliance

57. Article 72, which is based on recommendation 137 of the Secured Transactions Guide (see chap. VII, para. 31), addresses the availability of relief by a court or other authority in the case of a person’s non-compliance with its obligations under the provisions of this

chapter. Two options are provided. The first option addresses non-compliance only by the secured creditor, and provides that the grantor, the debtor or a competing claimant affected by that non-compliance may seek relief. The second option is broader, addressing non-compliance by any person, and giving any person affected by that non-compliance the right to seek relief. It should be noted that: (a) a violation of the secured creditor's obligations includes a violation by the secured creditor's agents, employees or service providers; and (b) persons that may be affected include a secured creditor with a lower priority ranking than that of the enforcing secured creditor, a guarantor or a co-owner of the encumbered assets.

58. The enacting State may wish to specify the court or other authority to which the party seeking relief should apply and the type of expeditious proceeding that would be available. That authority may include an arbitral tribunal, chamber of commerce or notary public. The resolution of a dispute arising generally from a security agreement or specifically in the context of enforcement of a security right by arbitration would be possible if: (a) the matter may be submitted to arbitration under the law of the enacting State; and (b) there is an arbitration agreement between the grantor and the secured creditor that is enforceable under the law of the enacting State. In such a case: (a) the arbitration agreement (and arbitral award) would bind only the parties thereto; and (b) if the winning party attempts to seize an encumbered asset, the law of the enacting State must provide adequate protection for the rights of persons, who are not party to the arbitration agreement, in the encumbered assets. For example, third-party creditors should be notified before an extrajudicial sale takes place (see art. 76, para. 4) and be given an opportunity to assert their rights, such as their right to take over enforcement (see art. 74), or their right to be paid from the proceeds of a sale according to their priority rank (see art. 77, para. 2).

59. As the length of time that it takes to obtain relief for non-compliance may bring about injustice or inefficiency, this article provides for the possibility of expeditious relief, the exact form of which is to be specified by the enacting State (e.g. proceedings for interim measures of protection and preliminary orders).

Article 73. Right of affected persons to terminate enforcement

60. Article 73 is based on recommendation 140 of the Secured Transactions Guide (see chap. VIII, paras. 22-24). Paragraph 1 enables any person whose rights are affected by the enforcement process to terminate it by paying or otherwise performing the secured obligation in full. This is sometimes known as "redeeming" the encumbered asset. A person that is affected by the enforcement of a security right is most likely to exercise this right when the residual value of the asset is higher than the outstanding part of the secured obligation. It should be noted that the extinguishment of a security right, which was also addressed in recommendation 140 of the Secured Transactions Guide, is addressed in article 12.

61. Full payment, for the purposes of paragraph 1, includes the reasonable cost of enforcement. Thus, in the case of enforcement before a court or other authority, the court or other authority will determine the reasonable cost of enforcement. In the case of enforcement without an application to a court or other authority, if the grantor or other interested person disputes the secured creditor's assertion as to the cost of enforcement, the grantor or other such person could seek the assistance of a court or other authority to resolve the dispute.

62. Under paragraph 2, the right to terminate enforcement may be exercised until the secured creditor has disposed of, acquired or collected the encumbered asset, or entered into an agreement for that purpose. Otherwise, the finality of acquired rights would be undermined (see paras. 79-81). Under paragraph 3, the rule in paragraph 2 does not apply in the case of a lease or licence of an encumbered asset. This means that a person affected by the enforcement may still terminate the enforcement process, if there is sufficient residual value left in the encumbered asset. However, there is one limitation, the rights of a lessee or licensee must be respected.

Article 74. Right of a higher-ranking secured creditor to take over enforcement

63. Article 74 is based on recommendation 145 of the Secured Transactions Guide (see chap VIII, para. 36). Paragraph 1 provides that a secured creditor whose security right has priority over that of the enforcing secured creditor or judgement creditor ("higher-ranking

secured creditor") has the right to take over enforcement. Inasmuch as the higher-ranking secured creditor is entitled to be paid out of the proceeds of any disposition before the other secured creditor or judgement creditor, this rule recognizes that this greater stake in the results of enforcement justifies giving the higher-ranking secured creditor the right to control the enforcement process if it so desires. The higher-ranking secured creditor may take over the enforcement process at any time before the asset is sold or otherwise disposed of, or acquired by the secured creditor or until the conclusion of an agreement by the secured creditor for that purpose.

64. Like article 73, paragraph 3, paragraph 2 of this article, allows the exercise of this right even after the encumbered asset has been leased or licensed, without, however, affecting the rights of lessees or licensees. Under paragraph 3, the right of the higher-ranking secured creditor to take over the enforcement process includes the right to enforce by any of the methods foreseen in this chapter. This means that the higher-ranking secured creditor may change the method of enforcement, for example to follow a different strategy than that followed by the original enforcing creditor (or terminate enforcement if the higher-ranking secured creditor is an outright transferee). It should be noted, however, that the exercise of this right is subject to the standard of article 4, that is, the secured creditor would be obliged to act in good faith and in a commercially reasonable manner, for example, to avoid unreasonable enforcement costs.

Article 75. Right of the secured creditor to obtain possession of an encumbered asset

65. Article 75 is based on recommendations 146 and 147 of the Secured Transactions Guide (see chap. VIII, paras. 38-48 and 51-56). Taken as a whole, this article provides a secured creditor with an important pair of options about enforcing its security right. The secured creditor may obtain possession of a tangible encumbered asset either through a judicial process or an analogous process with another authority or, in certain circumstances, the secured creditor can utilize "self-help remedies" and obtain possession of the encumbered asset without resort to a court or other authority. The rules governing each of these options are set out separately, with paragraphs 1 and 2 setting the parameters for obtaining possession by application to a court or other authority and paragraph 3 setting the parameters for the exercise of a self-help remedy by the secured creditor.

66. Paragraph 1 states that, after default, the secured creditor is entitled to obtain possession of an encumbered asset by applying to a court or other authority. The opening words of paragraph 1 however, subordinate this right to the right of another person who has a superior right to possession of the asset (e.g. a lessee or licensee; see art. 32). Paragraph 2 provides an enacting State with the opportunity to provide for additional conditions that must be satisfied in order for a secured creditor to be entitled to obtain possession of an encumbered asset through a judicial or similar process.

67. Under paragraph 3, the secured creditor is also entitled to obtain possession of an encumbered asset without applying to a court or other authority if all the conditions set out therein are met. The conditions are designed to ensure that such a self-help remedy is available only in appropriate circumstances. First, the self-help remedy is available only if the grantor has consented in writing to the secured creditor obtaining possession without resort to a court or other authority. Typically, the secured creditor will obtain the grantor's consent in the security agreement. Second, the secured creditor cannot utilize this self-help remedy unless it has given the grantor and any person in possession of the encumbered asset notice of default and of the secured creditor's intent to obtain possession without resort to a court or other authority (the enacting State may wish to specify how long before seeking possession the secured creditor must give notice that would be in line with the good faith and commercial reasonableness standard set forth in in art. 4). Third, and perhaps most important, the secured creditor may not obtain possession without resort to a court or other authority if the person in possession of the encumbered asset objects to the secured creditor's attempt to utilize this self-help remedy. Thus, the grantor or other person in possession of the encumbered asset will always have the ability to require the secured creditor to utilize the judicial or similar process by objecting to the creditor's attempt to act without the assistance of a court or other authority, even if the grantor has already agreed to the secured creditor's self-help remedies in the security agreement.

68. Paragraph 4 recognizes that even relatively short delays associated with giving the notices required in paragraph 3 can be economically wasteful if the encumbered assets are perishable or otherwise likely to decline speedily in value. Accordingly, paragraph 4 dispenses with the requirement of notice in those cases. In addition, inasmuch as a main purpose of the notice is to give the grantor time to monitor the process of repossession and disposition of the encumbered asset, paragraph 4 also dispenses with the need for a notice when the existence of a recognized market in assets such as the encumbered asset provides a reference point by which we can measure the secured creditor's actions. "Recognized market" in this context means a market in which prices were set by the market and not by individual sellers.

69. Under paragraph 5, a lower-ranking secured creditor may not obtain possession of an encumbered asset from a higher-ranking secured creditor. The purpose of this provision is to ensure that: (a) the security right of the higher-ranking secured creditor does not cease to be effective against third parties through the relinquishment of possession to the lower-ranking secured creditor and thus lose its priority status; (b) the value of the encumbered asset does not diminish through its disposition by the lower-ranking secured creditor. It should be noted, however, that the lower-ranking secured creditor will be able to enforce its security right without obtaining possession and the buyer of the encumbered asset would acquire its rights in the asset subject to the right of the higher-ranking secured creditor (see art. 79).

Article 76. Right of the secured creditor to dispose of an encumbered asset

70. Article 76 is based on recommendations 148-151 of the Secured Transactions Guide (see chap. VIII, paras. 48 and 57-60). Paragraph 1 provides that the secured creditor may sell or otherwise dispose of, lease, or license an encumbered asset by applying to a court or other authority (to be specified by the enacting State) or may take those actions without making such an application. Paragraph 2 provides that, if the secured creditor decides to exercise its right by applying to a court or other authority, the enacting State may specify the rules that will determine the method, manner, time, place and other aspects of the sale or other disposition, lease or licence.

71. Paragraphs 3-8 deal with dispositions by the secured creditor without an application to a court or other authority. Under paragraph 3, the secured creditor may determine the aspects of the sale or other disposition, lease or licence (including whether to sell or otherwise dispose, lease or license encumbered assets individually, in groups or altogether). Under paragraph 4, the secured creditor must give to the grantor, the debtor, any person with rights in the encumbered asset that notifies in writing the secured creditor of those rights and any other secured creditor that registered a notice in the Registry or was in possession of the encumbered asset a notice that contains all the elements set out in paragraphs 5-7. Under paragraph 8, the notice need not be given if the encumbered asset is perishable, may decline in value speedily or is of a kind sold on a recognized market.

72. Subject to its obligation to act in good faith and in a commercially reasonable manner (see art. 4), the secured creditor may: (a) dispose of the encumbered assets by public or private sale, and if by public sale, through auction or tender; and (b) decide whether to dispose of the encumbered assets individually, in groups or as a whole (see art. 76, para. 3, and Secured Transactions Guide, chap. VIII, paras. 71-73).

Article 77. Right of the secured creditor to distribute the proceeds of a disposition of an encumbered asset

73. Article 77 is based on recommendations 152-155 of the Secured Transactions Guide (see chap. VIII, paras. 60-64). Paragraph 1 provides that, in the case of a sale or other disposition, lease or licence supervised by a court or other authority, the distribution of the proceeds is determined by the rules to be specified by the enacting State. However, such distribution should follow the order of priority according to the priority rules of the Model Law.

74. Under paragraph 2, the distribution of the proceeds of a sale or other disposition, lease or licence that occurs without an application to a court or other authority must follow the rules set forth in paragraph 2 that determine the order in which the proceeds are to be applied.

Subparagraph 2(b) requires payment to a subordinate competing claimant. This is so because, under article 79, paragraphs 3 and 4, the security right of a higher-ranking secured creditor is preserved even after enforcement by a lower-ranking secured creditor.

75. Under paragraph 3, if the net proceeds of disposition are insufficient to satisfy the secured obligation, leaving a shortfall, a debtor remains obligated to pay the remainder. It should be noted that damages for non-compliance with enforcement obligations are a matter for other law, in particular in relation to consumer transactions. Thus, if a sale of an encumbered asset is not commercially reasonable and the debtor has a counter-claim, the debtor may be liable to a reduced shortfall. It should also be noted that this article, as well as articles 70, paragraph 1-3, to 79, does not apply to outright transfers of receivables (see art. 1, para. 2).

Article 78. Right of the secured creditor and the grantor to propose the acquisition of an encumbered asset by the secured creditor

76. Article 78 is based on recommendations 156-159 of the Secured Transactions Guide (see chap. VIII, paras. 65-70). Paragraph 1 states the right of the secured creditor to propose in writing to acquire one or more of the encumbered assets in total or partial satisfaction of the secured obligation. Paragraph 2 indicates to whom other than the grantor the proposal must be sent. Paragraph 3 governs the content of the proposal.

77. Paragraph 4 provides rules that determine the outcome of the secured creditor's proposal. Subparagraph 4(a) provides that, in the case of a proposal for the acquisition of an encumbered asset in full satisfaction of the secured obligation, the secured creditor acquires the encumbered asset in accordance with the proposal so long as none of the persons to whom the proposal must be sent objects within a short period of time after the proposal is received by those persons (to be specified by the enacting State); if any of those parties object, however, the secured creditor may not proceed. Subparagraph 4(b) provides that, in the case of a proposal for the acquisition of the encumbered asset in partial satisfaction of the secured obligation, the secured creditor acquires the encumbered asset only if all of the addressees consent within a short period of time after the proposal is received by those persons (to be specified by the enacting State). This approach is intended to safeguard the rights of all addressees of the notice, since they will remain liable for part of the secured obligation or they may otherwise be affected by the enforcement of a security right.

78. Paragraph 5 provides a mechanism whereby the grantor can initiate this process rather than the secured creditor, by requesting a proposal from the secured creditor. If the secured creditor makes a proposal in response to the grantor's request, and the secured creditor accepts it, the secured creditor must proceed as provided in paragraphs 2-4.

Article 79. Rights acquired in an encumbered asset

79. Article 79 is based on recommendations 160-163 of the Secured Transactions Guide (see chap. VIII, paras. 74-81). It is intended to deal with the finality of rights acquired in an encumbered asset pursuant to the enforcement of a security right (e.g. whether a transferee acquires its rights free or subject to the security right). Paragraph 1 deals with sales or other dispositions under the supervision of a court or other authority and refers the finality of rights to the law to be specified by the enacting State. Paragraph 2 deals with leases and licences of encumbered assets under the supervision of a court or other authority and provides that the lessee or licensee acquires its rights to use the leased or licensed encumbered asset except against creditors with rights that have priority over the right of the enforcing secured creditor.

80. Under paragraphs 3 and 4, in the case of a sale or other disposition, lease or licence of an encumbered asset without application to a court or other authority, the buyer or other transferee acquires its rights subject only to rights that have priority over the security right of the secured creditor, and the lessee or licensee is entitled to the benefit of the lease or licence except as against creditors with rights that have priority over the rights of the secured creditor.

81. Under paragraph 5, if the sale or other disposition, lease or licence of an encumbered asset takes place in violation of the provisions of chapter VII, the buyer or other transferee,

lessee or licensee does not acquire any rights or benefits[, if it had knowledge of the violation and that the violation materially prejudiced the rights of the grantor or another person].

B. Asset-specific rules

Article 80. Collection of payment under a receivable, negotiable instrument, right to payment of funds credited to a bank account or non-intermediated security

82. Article 80 is based on recommendations 169-171, 173 and 175 of the Secured Transactions Guide (see chap. VIII, paras. 93-98, 102-108, 111 and 112). Under paragraph 1, where the encumbered asset is an obligation to pay money, the secured creditor is entitled to collect payment from the obligor after default. Under paragraph 2, the secured creditor may also exercise the right to collect before default with the agreement of the grantor. Under paragraph 3, a secured creditor that collects under paragraph 1 or 2 also has the benefit of any personal or property right that secures or supports payment of the encumbered asset.

83. Under paragraph 4, notwithstanding the general rule of this article, a depositary institution need not pay a secured creditor with a security right in a right to payment of funds credited to a bank account held with that depositary institution against its consent without a decision by a court or other authority. However, the secured creditor may collect the balance credited in a bank account without applying to a court or other authority only if the security right in the right to payment of the funds has been made effective against third parties by the security right being created in favour of the depositary institution, the conclusion of a control agreement or the secured creditor becoming the account holder (see art. 24).

Article 81. Collection of payment under a receivable by an outright transferee

84. Article 81 is based on recommendations 167-168 of the Secured Transactions Guide (see chap. VIII, paras. 99-101). It provides that, in the case of an outright transfer of a receivable, the transferee is entitled to collect the receivable either before or after default. It should be noted that the standards of good faith and commercial reasonableness do not apply to an outright transfer of a receivable without recourse to the transferor, as the grantor (transferor) has no remaining vested interest in the receivable that could be protected by a limitation on the way in which the secured creditor (transferee) could collect the receivable.

Note by the Secretariat on a draft guide to enactment of the draft model law on secured transactions

ADDENDUM

Contents

Chapter VIII. Conflict of laws

Introduction

1. Chapter VIII of the Model Law states the rules for determining the substantive law applicable to the issues dealt with in the other chapters. These rules are generally referred to as the conflict-of-laws rules. In a State that has enacted the Model Law, a court or other authority will use the conflict-of-laws rules of chapter VIII to determine the substantive law governing issues such as the creation, effectiveness against third parties, priority and enforcement of a security right, as well as the mutual rights and obligations of the grantor and the secured creditor and the rights and obligations between third-party obligors and secured creditors. The substantive law indicated by conflict-of-laws rules may be that of the enacting State or the law of another State. It must be stressed that in the event of litigation in a State, the court or other authority will apply: (a) the substantive secured transactions law of its own legal system to characterize an issue for the purpose of selecting the appropriate conflict-of-laws rule; and (b) the conflict-of-laws rules of its own legal system to determine the law applicable to the substance of the dispute (for a more elaborate discussion of the role of conflict-of-laws rules, see Secured Transactions Guide, chap. X, paras. 1-13).

2. The application of the conflict-of-laws rules relating to security rights should not be conditional on a prior determination that the case presents an international element. Whenever a conflict-of-laws rule refers to the law of a State, that reference should not be refused on the ground of the absence of true “internationality” in the situation. Otherwise, courts might disregard a conflict-of-laws rule enacted by a State by deciding that the case is not sufficiently international on the basis of discretionary criteria that are not part of the conflict-of-laws rules of that State. In other words, if in a given situation the rule of State A points to the law of State B, it must be presumed that the legislator of State A has considered that the situation of itself is presenting an international element. In the particular circumstances where additional criteria would be a prerequisite for the application of a conflict-of-laws rule of a State, these criteria should be spelled out in the conflict-of-laws rules of that State.

3. The conflict-of-laws rule dealing with the law applicable to the mutual rights and obligations of the parties is a non-mandatory law rule (as it is not listed in art. 3, para. 1, as a mandatory law rule). This means that the parties may choose the law applicable to their contractual rights and obligations. However, the conflict-of-laws rules dealing with the law applicable to the creation, third-party effectiveness, priority and enforcement of a security right, as well as with the rights and obligations between third-party obligors and secured creditors (or the effect of a security right on a third-party obligor), are mandatory (see art. 3, para. 1). Therefore, with respect to those matters, the parties cannot be permitted by a choice-of-law clause to avoid the substantive law provisions of the legal system to which a conflict-of-laws rule refers. This is so because security rights are property (*in rem*) rights and thus affect third parties. Allowing the parties to a security agreement to select the applicable conflict-of-laws rule would also defeat one of the main purposes of the conflict-of-laws rules, which is to identify the State whose substantive law will apply in the event of a priority dispute among competing claimants. For example, if there is a priority dispute between secured creditor X and secured creditor Y, it would be impossible to ascertain the law applicable to the resolution of the dispute if each of X and Y had been permitted to choose in their security agreement with the grantor a different governing law for the ranking of their respective security right.

A. General rules

Article 82. Law applicable to the mutual rights and obligations of the grantor and the secured creditor

4. Article 82 is based on recommendation 216 of the Secured Transactions Guide (see chap. X, para. 61). It states that the parties to a security agreement are free to choose the law applicable to their contractual relationship. Article 82 follows the approach recommended by international texts on this matter, including the Hague Principles on Choice of Law in International Contracts (the "Hague Principles"). The question of whether there should be constraints to party autonomy with respect to the law applicable to contractual relationships is not addressed in the Model Law and is left to other conflict-of-laws rules of the enacting State. These other rules will also determine the law governing the contractual relationship of the parties in the absence of a choice of law in the security agreement; these rules will often point to the law of the State most closely connected to the security agreement. It should be noted that the rule of article 82 is confined to the contractual aspects of the security agreement. As already mentioned, matters relating to the property aspects of secured transactions (e.g. the priority of a security right) are outside the scope of freedom of contract; the parties cannot select a law other than that indicated by the conflict-of-laws rules on such matters.

Article 83. Law applicable to a security right in a tangible asset

5. Article 83 is based on recommendations 203-207 of the Secured Transactions Guide (see chap. X, paras. 28-38). It deals with the law applicable to the creation, effectiveness against third parties and priority of a security right in a tangible asset. The term "tangible asset" is defined to refer generally to all types of tangible movable asset, including money, negotiable instruments, negotiable documents and certificated non-intermediated securities (see art. 2, subpara. (jj); see also Secured Transactions Guide, chap. X, para. 26).

6. Paragraph 1 states the general rule that the law applicable to these issues is the law of the State in which the encumbered asset is located (the "*lex situs*" or the "*lex rei sitae*"). Article 89 deals with the scenario where the location of the asset changes to another State after the security right has been created. The *lex situs* rule for tangible assets is subject to five exceptions that are set out in articles 83, paragraphs 2 to 4, 95 and 97, in options B and C.

7. The first exception provides that, if a tangible asset located in a State is covered by a negotiable document in the possession of a secured creditor in another State, the priority of the security right over the asset will be determined by the law of the State in which the document is located, and not by the law of the State in which the asset covered by that document is located (see para. 2). The second exception points to the law of the State in which the grantor is located for an asset of a type which may be ordinarily used in more than one State in the course of its normal use, that is, a "mobile asset" (see para. 3; for the meaning of "location", see art. 88; for the relevant time for determining location, see art. 89). The test is an objective one and does not refer to actual use. The most obvious example is an aircraft, which may fly from a State to many other States. The rule will apply even if a particular aircraft is actually operated only in one single State.

8. The third exception deals with a tangible asset (other than a mobile asset) in transit or to be exported (see para. 4). A security right in a tangible asset located in a State but which is in transit or destined to be moved to another State may be created and made effective against third parties under the law of the State of its ultimate destination, if the asset reaches that destination within the period of time to be specified by the enacting State. It should be noted that: (a) if the asset does not reach the intended destination in a timely fashion, the rule in paragraph 4 will not apply; and (b) the rule in paragraph 4 does not prevent a secured creditor from taking the necessary steps to create and make the security right effective against third parties under the law of the State in which the asset is actually located at the time such steps are taken. It should also be noted that paragraph 4 is a conflict-of-laws rule of the enacting State only and whether the security right will be treated as validly created and made effective against third parties in the State of the ultimate destination of the asset is a matter for the conflict-of-laws rules of that State.

9. The fourth exception is contained in options B and C in article 97, which refer to laws other than the law of the State in which the certificate is located for a security right in certificated non-intermediated securities. The fifth exception is contained in article 95, which refers to the law of the State in which the grantor is located for third-party effectiveness by registration with respect to certain types of tangible asset.

10. Another possible exception relates to assets, with respect to which a notice of a security right may be registered in a specialized title registry or noted on a title certificate. In the case of a security right in such an asset, the law applicable to the security right is the law of the State under whose authority the registry is maintained or the certificate is located (see Secured Transactions Guide, chap. X, paras. 37 and 38, as well as rec. 205; see also A/CN.9/885, para. 110, and A/CN.9/885/Add.2, para. 21).

Article 84. Law applicable to a security right in an intangible asset

11. Article 84 is based on recommendation 208 of the Secured Transactions Guide (see chap. X, paras. 39-47). It states the general conflict-of-laws rule for the creation, effectiveness against third parties and priority of a security right in an intangible asset. The applicable law is that of the State in which the grantor is located (for the meaning of "location", see art. 88; for the relevant time for determining location, see art. 89). It must be noted that receivables are covered by this rule, which is subject to several exceptions that are set out in articles 85, 94, 96 and 97.

12. The first exception relates to the priority of a security right in a receivable arising from a sale or lease of, or secured by, immovable property (see art. 85). The other exceptions relate to a security right in rights to payment of funds credited to a bank account (see art. 94), intellectual property (see art. 96, which refers both to the *lex protectionis* and to the law of the State of the grantor's location) and non-intermediated securities (see art. 97).

Article 85. Law applicable to a security right in a receivable relating to immovable property

13. Article 85 is based on recommendation 209 of the Secured Transactions Guide (see chap. X, para. 54). It deals with the priority of a security right in a receivable arising from a sale or lease of, or secured by, immovable property as against the rights of competing claimants. Article 85 is an exception to the general rule of article 84 and refers that matter to the law of the State under whose authority the immovable property registry is organized. For article 85 to apply, the right of a competing claimant must be registrable (but not necessarily registered) in the relevant immovable property registry.

Article 86. Law applicable to the enforcement of a security right

14. Article 86 is based on recommendation 218 of the Secured Transactions Guide (see chap. X, paras. 64-72). Subparagraph (a) deals with the law applicable to the enforcement of a security right in a tangible asset, as defined in article 2, subparagraph (jj). It refers to the law of the State [in which enforcement takes place (*lex fori*), which in most instances would be the law of the State in which the encumbered asset would be located (for the policy reasons for this approach, see Secured Transactions Guide, chap. X, para. 66)] [in which the encumbered asset is located at the time of commencement of enforcement].

15. It should be noted that enforcement may involve several distinct acts (e.g. notice of the secured creditor's intent to obtain possession of an encumbered asset without applying to a court or other authority, disposition of an encumbered asset, and distribution of the proceeds of disposition) that may take place in different States. For example, a secured creditor may take possession of the encumbered assets in one State, dispose of them in a second State, and distribute the proceeds of disposition in a third State. A similar issue arises if a security right is created in several tangible assets that are located in different States or in a less frequent case where enforcement takes place in different States because the asset has been moved to another State after commencement of enforcement.

16. Under, subparagraph (b), the law applicable to the enforcement of a security right in an intangible asset (with the exception of a right to payment of funds credited to a bank account, intellectual property and non-intermediated securities) is the law governing

priority. The main advantage of this approach is that the creation, third-party effectiveness, priority and enforcement of a security right in an intangible asset (but not the rights and obligations between the debtor of the receivable and the secured creditor; see art. 93) is referred to one and the same law (see Secured Transactions Guide, chap. X, para. 69).

Article 87. Law applicable to a security right in proceeds of an encumbered asset

17. Article 87 is based on recommendation 215 of the Secured Transactions Guide (see chap. X, paras. 55-60). The following example illustrates how article 87 operates. Assume that the original encumbered asset is inventory, which is subsequently sold, and the purchase price is paid into a bank account. Under paragraph 1, the law applicable to the question of whether the secured creditor automatically acquires a security right in the right to payment of the funds credited to the bank account as proceeds of the original encumbered inventory will be the law of the location of the inventory. Under paragraph 2, the law applicable to the third-party effectiveness and priority of the security right in the proceeds will be the law applicable to the right to payment of funds credited to the bank account (see art. 94).

18. It should be noted that this type of bifurcated rule may lead to difficulties in cases where the law governing creation recognizes a broad-based automatic proceeds rule whereas the law governing third-party effectiveness and priority recognizes no or only a very limited automatic proceeds right. It should also be noted that this article is dealing only with the law applicable to proceeds derived from the original encumbered assets as a result of a disposition by the grantor or other event prior to enforcement, whereas article 86 deals with the law applicable to the distribution of proceeds derived from a disposition of the encumbered assets pursuant to post-default enforcement proceedings.

Article 88. Meaning of "location" of the grantor

19. Article 88 is based on recommendation 219 of the Secured Transactions Guide (see chap. X, paras. 73 and 74). It should be noted that the State in which a grantor that is a legal person has its central administration is not necessarily the State in which that legal person has its statutory seat (or registered office). If the grantor is a legal person formed under the law of State A with its statutory seat in that State but has in State B a place of business where its senior management is based, then the grantor is located in State B. As a result of this approach, for example, the creation, third-party effectiveness, priority and enforcement of a security right in a receivable is referred to a single law that is easy to determine and is most likely to be the law of the State in which the main insolvency proceeding with respect to the grantor will take place.

Article 89. Relevant time for determining location

20. Article 89 is based on recommendation 220 of the Secured Transactions Guide (see chap. X, paras. 75-78). It deals with the situation where the location of the asset or the location of the grantor changes from one State (State A) to another (State B) in circumstances where the applicable law is determined by reference to that location.

21. Paragraph 1 establishes that State B will recognize the existence of the security right if the latter was validly created under the law of State A at the time the asset or the grantor was located in State A. However, if a priority dispute arises either in State A or in State B, the substantive law of State B will be applied to determine whether the security right is effective against third parties and has priority over the rights of competing claimants. As a result, for the security right to be treated as being effective against third parties either in State A or in State B, the third-party effectiveness requirements of the law of State B must have been fulfilled. This is so even if the security right had been made effective against third parties under the law of State A at the time the asset or the grantor was located in State A. Indeed, this analysis assumes that both States are enacting States.

22. Paragraph 2 constitutes an exception to the general rules of paragraph 1. In the event of a priority dispute between two security rights that have been made effective against third parties in the State of the initial location (State A, in the example), the priority dispute will be resolved under the law of the State of the initial location.

Article 90. Exclusion of *renvoi*

23. Article 90 is based on recommendation 221 of the Secured Transactions Guide (see chap. X, para. 14). Its purpose is to reject the doctrine of *renvoi* and provide greater certainty with respect to the law applicable by avoiding the complications arising from this doctrine. Under this doctrine, the applicable law as indicated by the conflict-of-laws rules of a State (State A) includes the conflict-of-laws rules of the State whose law is the applicable law. As a result of this doctrine, if the conflict-of-laws rules of State A refer the priority of a security right in a receivable to the law of the State in which the grantor is located (the law of State B) and the conflict-of-laws rules of State B refer that issue to the law governing the receivable (which is the law of State C), then a court in State A will resolve the priority dispute using the law of State C (and not the law of State B). This result, however, would create uncertainty as to the law applicable and also run contrary to the expectations of the parties. For those reasons, article 90 prohibits *renvoi* (for an exception, see art. 98, para. 3).

Article 91. Overriding mandatory rules and public policy (*ordre public*)

24. Article 91, which is based on recommendation 222 of the Secured Transactions Guide (see chap. X, para. 79) and article 11 of the Hague Principles, states generally recognized principles of private international law.

25. To illustrate how the rules in paragraphs 1 and 3 will operate, assume that the law of the forum prohibits dealings in certain types of asset (such as an asset which is the proceeds of criminal activities or is the subject of international sanctions) and that the law of the State whose law is applicable does not contain such a prohibition. In such a case, the forum court may refuse to recognize as validly created a security right created in the asset under the foreign law that is applicable under the provisions of this chapter even though that law does not contain the same prohibition. However, to do so, the forum court must conclude that the application of the foreign law would be manifestly contrary to the public policy of the forum State (see para. 3).

26. Under paragraphs 2 and 4, the forum court (if it is allowed to do so under its law) may refuse to recognize as validly created a security right permitted to be created under the applicable law (even if the law applicable is the law of the forum), if the creation of such security right would be manifestly contrary to public policy of a State which has a close connection with the situation. For example, if a law firm is located in the forum State and under the applicable law of the forum State a security right may be created in receivables arising from legal services, but the location of the client is in a foreign State, which has strict confidentiality rules prohibiting a security right in a law firm's receivables arising from legal services, the forum court may refuse the application of the applicable law of the forum State, if it finds that its application would be manifestly contrary to the public policy of the State of the location of the client.

27. Paragraph 5 is intended to make clear that the rules in paragraphs 1-4 may also be relied upon by an arbitral tribunal, although, unlike a court, it does not operate as part of the judicial infrastructure of a specific legal system. Under paragraph 5, an arbitral tribunal may take into account the overriding mandatory provisions and policies, for example, of the place of arbitration, however identified, or of the place where enforcement of any award would be likely to take place. Paragraph 5 requires an arbitral tribunal to determine whether it is required or entitled to take into account public policy or overriding mandatory provisions of another law, having regard (in particular) to the agreement of the parties, the designated or deemed seat of the arbitration, any institutional rules applicable to the arbitration, and the potentially controlling influence of State courts applying local arbitration legislation (see commentary to article 11(5) of the Hague Principles).

28. Under paragraph 6, the forum State may not displace the provisions of the law applicable to third-party effectiveness and priority of a security right on the ground that this would offend its public policy (or that of another State), and apply its own third-party effectiveness and priority provisions or those provisions of another State. This approach is justified by the need to achieve certainty with respect to the law applicable to third-party effectiveness and priority. The same approach is followed in article 23, paragraph 2, article 30, paragraph 2, and article 31 of the Assignment Convention, as well as in article 11, paragraph 3, of the Hague Securities Convention.

Article 92. Impact of commencement of insolvency proceedings on the law applicable to a security right

29. Article 92 is based on recommendation 223 of the Secured Transactions Guide (see chap. X, paras. 80-82). Its purpose is to establish that an insolvency court in the enacting State must in principle respect the law applicable to security rights under its conflict-of-laws rules. However, nothing in article 92 restricts the application of the law of the State in which insolvency proceedings are commenced (*lex fori concursus*) to matters such as the avoidance of fraudulent or preferential transactions, the treatment of secured creditors, the ranking of claims and the distribution of proceeds in the grantor's insolvency.

B. Asset-specific rules

Article 93. Law applicable to the rights and obligations between third-party obligors and secured creditors

30. Article 93 is based on recommendation 217 of the Secured Transactions Guide (see chap. X, paras. 62 and 63) and article 29 of the Assignment Convention. Its purpose is twofold. First, the conflict-of-laws rules on the third-party effectiveness or enforcement of a security right do not apply to the effectiveness or enforcement of a security right against a debtor of a receivable, an obligor under a negotiable instrument or an issuer of a negotiable document; they are not considered "third parties" for the purposes of the rules on third-party effectiveness and priority of a security right, as they are not competing claimants. Second, the law applicable to these issues is the law governing the legal relationship between the grantor and the relevant debtor of the receivable, or the relevant obligor under the instrument or the issuer of the document; the same law also applies to the question of whether any of the latter may invoke that their agreement with the grantor prohibits or limits the grantor's right to create a security right in the relevant receivable, instrument or document.

Article 94. Law applicable to a security right in a right to payment of funds credited to a bank account

31. Article 94 is based on recommendation 210 of the Secured Transactions Guide (see chap. X, paras. 49-51). It departs from the general conflict-of-laws rule on the law applicable to intangible assets (see art. 84). A right to payment of funds credited to a bank account is in the generic sense a receivable of the customer against the depositary institution but a different rule applies in this case for the determination of the applicable law. Two options are offered to the enacting State for the law applicable to the creation, third-party effectiveness, priority and enforcement of a security right in a right to payment of funds credited to a bank account, as well as to the rights and obligations between the depositary institution and the secured creditor.

32. Under option A, the applicable law is that of the State of the location of the branch or office of the depositary institution with which the account is maintained. It should be noted that a branch (or office) of a depositary institution may be considered as being located in a particular jurisdiction irrespective of whether the institution offers its services through physical offices or only through an online connection accessible electronically by customers. In this regard, it should be noted that a depositary institution must generally have a physical presence or legal address in a jurisdiction in order to be allowed by the relevant regulatory authorities to carry on business in that jurisdiction.

33. Under option B, the applicable law is the law designated in the account agreement as governing the issues that are the subject of article 94 or, in the absence of a designation of a law for these issues, the law designated by the parties to the account agreement as the law governing that agreement. To be effective for conflict-of-laws purposes, a designation must refer to the law of a State in which the depositary institution is engaged in the business of maintaining bank accounts. It must be noted, however, that the State whose law is so designated may be different than the State in which the grantor's bank account is maintained.

34. If the applicable law cannot be determined as described in the preceding paragraph, option B provides for a series of rules along the lines of the default rules contained in

article 5 of the Hague Securities Convention, which the enacting State may wish to insert in this article, if it decides to adopt option B of article 94.

Article 95. Law applicable to the third-party effectiveness of a security right in certain types of asset by registration

35. Article 95 is based on recommendation 211 of the Secured Transactions Guide (see chap. X, para. 34). This article is an exception to the conflict-of-laws rules on the third-party effectiveness of a security right in a negotiable instrument, negotiable document, right to payment of funds credited to a bank account or certificated non-intermediated security. Under articles 83, 94 and 97, the effectiveness against third parties of a security right in any of these assets is governed by the law of a State which may be different from the State of the location of the grantor. However, under article 95, if the State of the location of the grantor recognizes registration of a notice as a method of third-party effectiveness for a security right in a negotiable instrument, negotiable document, right to payment of funds credited to a bank account or certificated non-intermediated security, then the law applicable to third-party effectiveness by registration is the law of the State in which the grantor is located.

Article 96. Law applicable to a security right in intellectual property

36. Article 96 is based on recommendation 248 of the Intellectual Property Supplement (see paras. 284-337). The effect of paragraph 1 is the following. If intellectual property is protected in a particular State, the law of that State will apply to the requirements to be met for the security right in that intellectual property to be considered as having been created, made effective against third parties and enjoying priority. It should be noted that a security right in intellectual property may be granted by any person that is entitled to use the related intellectual property under the relevant intellectual property law. Therefore, the grantor may be an owner, a transferee, a licensor or a licensee of the intellectual property to be encumbered.

37. Paragraph 2 provides for an alternative way to create and make effective against certain third parties a security right in intellectual property. Under paragraph 2, the secured creditor may also use for these purposes the law of the State in which the grantor is located. The principal benefit of paragraph 2 is that if the security right has been made effective against an insolvency representative of the grantor under the law of the State in which the grantor is located, an insolvency court in the enacting State will recognize the security right even if the third-party effectiveness requirements of all States in which the intellectual property is protected have not been fulfilled.

38. Paragraph 3 refers to the law of the State in which the grantor is located for enforcement issues relating to intellectual property. If enforcement involves several acts that take place in several States, this rule would still lead to the application of one and the same law because it is unlikely that the grantor's location would change between any of those acts. Moreover, in the rare case where there would be such a change, it is assumed that a court would refer to the law of the State in which the grantor is located at the time of commencement of the enforcement. It should be noted that the effectiveness of the security right against persons other than the grantor (e.g. the licensor of the intellectual property, if the grantor is a licensee) is outside the scope of this article.

Article 97. Law applicable to a security right in non-intermediated securities

39. […].

[*Note to the Commission: The Commission may wish to note that the commentary to article 97 will be prepared after the Commission has made a decision as to which of the options is to be retained or, alternatively, whether the article should include several options, and reached an agreement as to the contents of the article*.]

Article 98. Law applicable in the case of a multi-unit State

40. Article 98 is based on recommendations 224-227 of the Secured Transactions Guide (see chap. X, paras. 83-87). Its purpose is to deal with the law applicable where the State

whose law is applicable has two or more territorial units. In such a case, paragraph 1 provides that a reference to the law of a multi-unit State is a reference to the law applicable in the relevant unit. For example, in a federal State, secured transactions laws may fall under the legislative authority of one of its territorial units. In such case, each unit will have its own substantive law and conflict-of-laws rules. Under paragraph 2, the relevant unit is to be determined on the basis of the location of the grantor or of the encumbered asset, or otherwise under the provisions of this chapter. It should be noted that paragraphs 1 and 2 are interpretative provisions and also apply where the forum State is the State whose law is applicable under the provisions of this chapter.

41. Where the applicable law is that of a multi-unit State, paragraph 3 provides that the conflict-of-laws rules in the relevant State or territorial unit will determine whether to apply the law of a different territorial unit in the State (see Secured Transactions Guide, chap. X, para. 85). This means that the forum court is required to examine the internal conflict-of-laws rules of the State of the location of the grantor or the encumbered asset. In this regard, the Assignment Convention allows a declaration by States as to the determination of the applicable priority rule as between various territorial units (on art. 37 of the Assignment Convention), but in this article there would be no declaration and the forum court would have to determine the applicable law under the conflict-of-laws rules of the multi-unit State.

42. To illustrate how the rule in paragraph 3 will operate, assume that the conflict-of-laws rules of this chapter refer to the law of the location of the grantor and that the location of the grantor under this chapter is in a territorial unit of a multi-unit State whose laws (including its conflict-of-laws rules) govern secured transactions. Also assume that the location of the grantor under this chapter is in unit A of that multi-unit State (unit A being the place of central administration of the grantor). If, however, the conflict-of-laws rules of unit A refer to the law of unit B as being the applicable law (e.g. because unit B also refers to the location of the grantor but defines the location of the grantor as its statutory seat instead of its place of central administration), then the forum court would have to apply the law of unit B if the statutory seat of the grantor is in unit B.

43. Paragraph 3 is indirectly an exception to the exclusion of the doctrine of *renvoi* (see art. 90) as it introduces "internal *renvoi*". The purpose of the exception is to ensure that where the applicable law is that of a unit of a multi-unit State, a forum court outside that multi-unit State will apply the substantive law of the same unit as a forum court in that multi-unit State.

Chapter IX. Transition

Introduction

44. This chapter has three functions. First, it provides that prior law governing security rights (the "prior law") is to be repealed (see art. 99). Second, it provides rules governing the treatment under the new secured transactions law (the "new law") of security rights that are created while the prior law is in force but continue to be effective, perhaps for extensive periods of time, after the new law enters into force (see arts. 100-104). Third, it provides for the setting of a date on which the new law goes into effect (see art. 105). Thus, this chapter provides rules by which the law governing such security rights moves in a fair and efficient manner from the prior law to the new one (see Secured Transactions Guide, chap. XI, paras. 1-3).

Article 99. Amendment and repeal of other laws

45. The Model Law is intended as a complete system of secured transactions law, replacing in its entirety the prior law, rather than a supplement to existing law. Accordingly, the enacting State should list in paragraph 1 and thus repeal the body of laws that comprise its secured transactions law. The way in which the repeal is effectuated will depend on the form of the prior law. Where the prior law is a free-standing code or the like, that code can be repealed in its entirety. Where the prior law is derived from statutes that also address other topics, though, the enacting State must determine how to excise the rules formerly

governing security rights from the rules that apply to other topics. Where part of the prior law is based on judicial opinions (as may be the case, for example, in some common law systems), the method of repeal of the prior law must be determined by the enacting State.

46. Many other bodies of law interact with secured transactions law. In some cases, provisions of those other bodies of law may be written on the assumption that prior secured transactions law is in effect. Paragraph 2 provides the enacting State an opportunity to amend those provisions so as to mesh with the new law. It should be noted that, like any other article of the Model Law, article 99 can have effects only when the new law enacting the Model Law enters into force according to article 105. Thus, the existing laws are amended or repealed only as of the date the new law enters into force (in other words, there is no time in which neither set of rules governs secured transactions).

Article 100. General applicability of this Law

47. Paragraph 1 of this article defines two terms used in this chapter. According to subparagraph 1(a), "prior law" means the law of the State (whether the enacting State or another State), whose law was applicable under the conflict-of-laws rules of the enacting State before the entry into force of the new law. As a different law may be applicable to the various security right issues (i.e. contractual rights and obligations between the grantor and the secured creditor, creation, third-party effectiveness, priority and enforcement of a security right, as well as effectiveness of the security right against a third-party obligor) prior law means the law applicable to the relevant issue.

48. According to subparagraph 1(b), "prior security right" is a right created by an agreement entered into before the entry into force of the new law, provided that the new law would treat that right as a security right. This is the case even if the agreement covers future assets (see art. 2, subpara. (n)). As a result, such a security right will be governed by the transition provisions of the Model Law.

49. Paragraph 2, which is based on recommendation 228 (second sentence) of the Secured Transactions Guide (see chap. XI, paras. 7-12), states the general rule of the applicability of the new law. It provides that, when it enters into force under article 105, the new law enacting the Model Law will apply to all security rights within its scope, including prior security rights, except as otherwise provided in this chapter (e.g. art. 101). Much of the remainder of the chapter is devoted to describing exceptions to this general rule. Read together, the rule in paragraph 2 and the exceptions in the remainder of the chapter result in a transition period during which the new law will apply to all new transactions while some aspects of the prior law will continue to apply to some issues related to prior security rights until the expiration of the period described in article 103, subparagraph 1(b).

50. As a result of paragraph 2, prior security rights may be governed, at least in part, by the new law. Inasmuch as many secured transactions endure for several years, if the new law applied only to security rights created by agreements entered into after the effective date of the new law, the prior law would persist for a lengthy period during which lenders, borrowers, attorneys, and judges would need to apply both laws and search for competing claimants under the rules of both. This result would entail additional cost as well as delaying the economic benefits of the new law.

Article 101. Applicability of prior law to matters that are the subject of proceedings commenced before the entry into force of this Law

51. Article 101 is based on recommendation 229 of the Secured Transactions Guide (see chap. XI, paras. 13-16). It introduces an exception to the rule in article 100, paragraph 2, that the new law applies to all security rights within its scope, including prior security rights. In particular, paragraph 1 provides that, if a matter with respect to a security right is the subject of litigation or arbitral proceedings commenced before the new law enters into force, the law governing the substance of the dispute will remain the prior law. This paragraph applies to all disputes arising under the prior law, whether between the secured creditor and the grantor, the secured creditor and a competing claimant, or the secured creditor and a person liable, for example, on a receivable or negotiable instrument. It should be noted that the commencement of litigation before the new law enters into force with respect to one

dispute does not preclude application of the rules of the new law to a separate dispute arising under the same security agreement.

52. Paragraph 2 provides a substantive rule about the enforcement of security rights created under prior law. Under the rule in this paragraph, if enforcement is commenced under prior law (what constitutes "enforcement" and when "enforcement" begins is a matter of prior law), the secured creditor may continue enforcement under the rules of the prior law even after the new law enters into force (what constitutes "enforcement" under the new law is addressed in chapter VII). This means that, whether any of the enforcement remedies are exercised with or without application to a court or other authority results in a clear statement that, if enforcement commenced before the new law entered into force, the secured creditor may continue under the prior law, or discontinue enforcement and commence it under the new law. Thus, even if the secured creditor enforces its security right without applying to a court or other authority, for example, by taking one of the steps necessary to obtain possession of an encumbered asset before the new law enters into force, the secured creditor may choose to have its other enforcement actions that are independent of obtaining possession (such as the disposition of the encumbered asset and the distribution of the proceeds) be governed by the prior law.

Article 102. Applicability of prior law to the creation of a prior security right

53. Article 102 is based on recommendation 230 of the Secured Transactions Guide (see chap. XI, paras. 17-19). This article contains two rules. First, paragraph 1 makes clear that prior law determines whether a security right putatively created before the new law enters into force was indeed created effectively. Second, under paragraph 2, a prior security right that was effectively created under prior law will remain effective between the parties under the new law even if the requirements for creation under the new law have not been satisfied. This rule avoids the invalidation of prior security rights and the creation of a situation in which the secured creditor would need to obtain cooperation from the grantor to take the additional steps necessary to continue the existence of the security right under the new law. Such cooperation may not be forthcoming from a grantor that has already received an extension of credit secured by the security right in the encumbered asset.

Article 103. Transitional rules for determining the third-party effectiveness of a prior security right

54. Article 103 is based on recommendation 231 of the Secured Transactions Guide (see chap. XI, paras. 20-22). Under this article, a security right created and made effective against third parties under prior law before the effective date of the new law remains effective against third parties for a period of time under the new law, even if the conditions for third-party effectiveness under the new law have not been satisfied. The period expires at the earlier of the time when the third-party effectiveness of the security right would have ceased under prior law (see subpara. 1(a)) or at the time specified in subparagraph 1(b).

55. Illustration: Under the former secured transactions law of State X, a security right in receivables could be made effective against third parties by notifying the debtor of the receivable (the "Debtor"); however, such notification would cease to be effective after one year unless the secured creditor (the "Creditor") sent a renewal notice to the Debtor, which would extend the effectiveness of the notice for another year. When State X enacted the Model Law, it inserted "three years" as the time period in subparagraph (1)(b). On 1 July of Year 1, prior to the effective date of the new secured transactions law, the Grantor created in favour of the Creditor a security right in receivables owed to the Grantor by the Debtor, and the Creditor notified the Debtor about the security right. The effective date of the new law in State X is 1 January of Year 2. Under subparagraph (1)(a), the security right of the Creditor would cease to be effective against third parties under prior law on 1 July of Year 2. Under subparagraph (1)(b), the third-party effectiveness would cease on 1 January of Year 5. As 1 July of Year 2 (the date identified in subparagraph 1(a)) is earlier than 1 January of Year 5 (the date identified in subparagraph (1)(b)), third-party effectiveness will cease on 1 July of Year 2, unless the requirements of the new law are satisfied.

56. A security right that would cease to be effective against third-parties under the rule in paragraph 1 may continue to be effective against third parties if the secured creditor takes the appropriate steps under the new law to achieve third-party effectiveness. Most often, this

result will be accomplished by registering a notice with the Registry. The secured creditor's ability to do so is aided by paragraph 4, which provides that the prior written agreement creating the security right constitutes sufficient authorization for registration of the notice.

57. Paragraphs 2 and 3 address the continuity of third-party effectiveness of a prior security right in situations in which: (a) a security right was initially effective against third parties under the new law only by operation of paragraph 1; and (b) the requirements for third-party effectiveness under the new law were satisfied only after the new law entered into force. Paragraph 2 provides that, if the requirements for third-party effectiveness under the new law are satisfied before the expiration of the period specified in paragraph 1, the prior security right continues to be effective against third parties from the time when it was made effective against third parties under prior law and, thus, priority under the relevant rules according to which priority depends on the time of third-party effectiveness will date from that time.

58. If, however, the requirements for third-party effectiveness of the prior security right are satisfied only after the expiration of the period specified in paragraph 1, there will be a gap between the expiration of third-party effectiveness under paragraph 1 and the achievement of third-party effectiveness under the new law. In that case, paragraph 3 provides that the security right is effective against third parties only from the time it is made effective against third parties under the new law and, thus, priority under the relevant rules according to which priority depends on the time of third-party effectiveness dates only from that time.

Article 104. Application of prior law to the priority of a prior security right as against the rights of competing claimants arising under prior law

[*Note to the Commission: The Commission may wish to note that the commentary to this article has been prepared on the assumption that the Commission will decide to delete article 104, paragraph 1, because it is inconsistent with article 103*.]

59. Like article 103, article 104 deals with a situation in which the priority of a security right as against competing claimants will be determined by reference to prior law. Under article 103, the time when third-party effectiveness was achieved under prior law is utilized in some circumstances in determining priority under the priority rules in the new law. Under article 104, there are some situations in which priority under the new law is determined altogether by application of prior law.

60. In particular, under the rule stated in paragraph 1, the prior law, rather than the new law, determines the priority of a prior security right against competing claimants if that security right and the rights of all competing claimants arose before the entry into force of this Law and the "priority status" of competing claimants has not changed. Paragraph 2 provides that the priority status of a security right has changed if either of the two events has occurred. First, the priority status has changed if: (a) the prior security right was effective against third parties under the new law only because of the rule in article 103(1); and (b) third-party effectiveness ceased [because the expiration of the time period described in article 103(1) occurred before the necessary actions occurred to make the security right effective against third parties under the new law.] Second, the priority status of a security right has changed if it was not effective against third parties under the prior law at the time the new law entered into force but became effective against third parties when the new law entered into force or thereafter. The purpose of this rule is to preserve priority among completing claimants that was established under the prior law when no change has occurred other than the new law becoming effective.

Article 105. Entry into force of this Law

61. Article 105 is based on recommendation 228 of the Secured Transactions Guide (see chap. XI, paras. 4-6). It leaves it to the enacting State to determine the date when or the mechanism according to which the new law will enter into force. The enacting State may also wish to determine whether this article should be placed at the beginning or at the end of the new law.

62. In determining when the new law will enter into force, careful consideration should be given both to obtaining the economic benefits of the new law as soon as possible and to minimizing dislocations that may be caused by significant changes in secured transactions practice resulting from the new law. Inasmuch as the new law will have been chosen because it is an improvement over the prior law, the new law should come into force as soon as is practical. However, some lead time is necessary in order to, inter alia: (a) publicize the existence of the new law; (b) enable establishment of the Registry (or adaptation of an existing registry to the registry system required by the new law); and (c) enable participants in the secured transactions system, particularly present and future secured creditors, to prepare, for example, for compliance with new rules and develop new forms. For example, the new law may enter into force on a specific date or a few months after a specific date, or on the date to be specified by a decree once the Registry becomes operational.

I. Note by the Secretariat on a draft model law on secured transactions: compilation of comments

(A/CN.9/886)

[Original: English]

Contents

I. Introduction

1. At its twenty-eighth and twenty-ninth sessions (Vienna, 12-16 October 2015, and New York, 8-12 February 2016, respectively), Working Group VI (Security Interests) adopted a draft model law on secured transactions (the "draft Model Law") (A/CN.9/865 and A/CN.9/871) and, at its twenty-ninth session, decided to submit it to the Commission on the understanding that the Secretariat would make the text of the draft Model Law available to States for comment (A/CN.9/871, paragraph 91).

2. This note sets forth, with minimal editorial modifications, the first comments received from Governments. Any further comments will, upon receipt by the Secretariat, be included in document A/CN.9/887.

II. Comments on the draft Model Law

A. United Kingdom of Great Britain and Northern Ireland

Date: 26 April 2016

Chapter I. Scope of application and general provisions

3. Article 2(i)(ii): The words "A transferor in an outright transfer of a receivable" should be deleted. The transferor is the grantor (in the transaction) (see art. 1(2)), and not the debtor of the receivable.

4. Article 2(j): The square bracketed words should be retained outside square brackets as they make the position clearer.

5. Note to Commission after article 2(u): This is a good idea. The term "immovable property" should be retained within square brackets as a different term might be used in the law of the enacting State (e.g., English law uses the term "land").

6. Article 2(x): We note that the draft Guide to Enactment explains that the draft Model Law does not include a provision implementing the recommendations of the Secured Transactions Guide with respect to electronic communications (see Secured Transactions Guide, recs. 11 and 12) on the assumption that other law would address this matter (A/CN.9/885, para. 50), but we would like to raise the question whether the term "writing" should be defined in the draft Model Law.

Chapter II. Creation of a security right

7. Article 13(4)(a): Either the term "financial services" should be defined, or, at least, it should be made clear in the draft Guide to Enactment that it is a term which is likely to be defined elsewhere in national law and that the meaning here is to be the same.

Draft Model Registry-related provisions

8. The draft Guide to Enactment should stress that the terms, and therefore the rules, of these provisions are fully compatible with fully electronic registration, so that a "prescribed registry notice form'', for example, could be a website form, that communications from the Registry (e.g. under articles 5 and 6) could be automated messages and that the "entry of information" under article 13(2) could be automatic. Effectively, under an electronic system much of what is said to be done by the "Registry" is done by the computer programme setting up the registration system.

9. Article 5(4): Reference should be made to access "to registry services", as the heading of each article is not actually part of the law and thus its contents could not be read down into the law.

10. Note to the Commission after article 5(4): The suggestion of an extra paragraph along the lines of article 6(3) is helpful, but the requirements of article 5(3) should also be included.

11. Article 20(1)(a): The words "and the secured creditor knows that the grantor will not authorize that registration" establish an impossible test, as the secured creditor has no way of knowing what the grantor will do in the future, and it is unreasonable to put an obligation on him depending on knowledge that he cannot have (it is different if the criterion is couched in terms of a communication from the grantor that he will not register, as that is a positive measurable act). So we would suggest the following revised draft: "… and the secured creditor has been informed by the grantor that he will not authorize that registration;". The same change should be made to article 20(2)(a) and 20(3)(a)(i).

Chapter V. Priority of a security right

12. Article 36, option A (1): This is still too long and confusing. Reference should be made to equipment and its intellectual property equivalent. The same applies to article 39 Option A (1).

Chapter VI. Rights and obligations of the parties and third-party obligors

13. Article 51 and 53(1)(a): The words "and its value" should be deleted. There are many situations where the grantor (or secured creditor) cannot be expected to preserve the value of an asset. And this article cannot be contracted out of. If it is said that these situations are covered by the "reasonable" in "reasonable care", this is very unclear.

14. Article 61(2): The term "payment instruction", used here and elsewhere in this article and in other articles, should ideally be defined, as it is not clear that the instruction "subsequently by the secured creditor" is a "payment instruction" referred to here and subsequently. If "payment instruction" were not to be defined, it might be enough just to substitute "that" for "the" at the end of the paragraph.

15. Article 61(5): The phrase "its right from the initial or any other secured creditor" is confusing. It is not clear whether it is the "initial creditor" or the "initial secured creditor". If it means the initial secured creditor, the sense could be clarified by commas: "its right from the initial, or any other, secured creditor".

16. Article 61(6): Insert "either" and a comma after "notification" (an Oxford comma) to make it clear which are the two alternatives.

Chapter VII. Enforcement of a security right

17. Article 72, option A: In relation to "the debtor, the grantor or a competing claimant". To include a co-owner, say "the debtor, the grantor or any other person with a right in the encumbered asset".

18. Article 73(2): This is still unclear and does not take account of the fact that all the possibilities envisaged could happen. Revise to read as follows: "This right of termination may be exercised until the earliest of the following:

(a) The asset is sold or otherwise disposed of;

(b) The asset is acquired or collected by the secured creditor; or

(c) An agreement by the secured creditor for the sale or other disposition of the asset is concluded".

19. Article 75(1): Insert the words "or without applying" (perhaps as "either by applying or without applying to ..."), since otherwise paragraph 3 does not make sense as there is no right (established under the draft Model Law) to obtain possession without applying to a court.

20. Article 76(1): As mentioned above, the word "either" could usefully be inserted here so that it reads: "either by applying or without applying".

21. Article 76(4): The words "sell or otherwise dispose of, lease or license an encumbered asset" might be replaced with the words "exercise the right provided in paragraph 1" to be the same as in paragraphs 2 and 3.

22. Article 76(4)(b) and (c) and (5): The use of the term "notice" is potentially ambiguous. There are two notices, notice of intention to sell etc. and notification by the person with a right. Say: "before the notice of the secured creditor's intention is sent" (in article 76(5) as well).

23. Article 78(5): We would like to raise the question of what the sanction would be if the secured creditor did not proceed as indicated.

24. Note to Commission after article 78(5): A time restriction seems implicit in the wording of the Secured Transactions Guide, (see chap. VIII, para. 70).

B. United States of America

[Original: English]
Date: 27 April 2016

Chapter I. Scope of application and general provisions

25. Article 2(v): To conform exactly to the definition of "intermediated securities" in the Unidroit Convention on Substantive Rules for Intermediated Securities, the words "or interests" should be added after the words "and rights".

26. Article 2(jj): In the definition of "tangible asset", the reference to article "32" should be to article "31".

27. Article 3: A provision should be added making it clear that "Nothing in this Law affects any agreement to the use of alternative dispute resolution, including arbitration, mediation, conciliation and online dispute resolution".

[*Note to the Commission: Pursuant to a decision of the Working Group (see A/CN.9/871, para. 85), this matter was addressed in the draft Guide to Enactment (see A/CN.9/885/Add.3, paras. 55 and 58).*]

Chapter II. Creation of a security right

28. Article 6, heading: To carry out the decision of the Working Group to revise the heading of article 6 to better reflect its content (see A/CN.9/865, para. 48), the heading should be changed to "Creation of a security right; requirements for a security agreement". The reason is that article 6 deals not only with the general rules for the creation of a security right but also with the requirements for a security agreement. Alternatively, the Commission may wish to consider whether to limit article 6 to the general rules about creation and move rules about security agreements to their own article.

29. Article 6(3)(b): While this provision states that the security agreement must "describe the secured obligation", no standards are provided for the description of the secured obligation (art. 9(1) provides standards for the description of the encumbered assets). In addition, this language suggests that a security right may secure only one obligation. That point can be addressed in article 7, but we think that there should be some general guidance comparable to the standard in article 9(1) for the description of the encumbered assets. Language to the effect that "the obligations secured or to be secured must be described in the security agreement in a manner that reasonably allows their identification" would suffice.

This would make it clear, for example, that a statement that the security right secures "all obligations owed to a secured creditor at any time" will be sufficient even though the description does not identify each obligation separately.

30. Article 7: To make it clear that a security right may secure more than one obligation, the first sentence should be amended to state: "A security right may secure one or more obligations of any type, …".

31. Article 10(2)(b): This provision should be slightly rewritten so that it reads: "The security right in the commingled money or funds is limited to the amount of money or the amount of funds credited to the bank account immediately before they were commingled". The reference to the value of the money or funds in the current text is unnecessary inasmuch as money and funds do not need to be valued.

32. Article 10(2)(c): Similarly, this provision should be rewritten so that it reads: "If at any time after the commingling, the amount of commingled money or the balance credited to the bank account is less than the amount of proceeds immediately before they were commingled, the security right in the commingled assets is limited to the lowest amount between the time when the proceeds were commingled and the time when the security right is claimed".

33. Article 11(1): This provision incompletely states the situation to which it applies. It should be amended so that it reads: "A security right in a tangible asset other than money that is commingled in a mass of tangible assets of the same kind and is no longer separately identifiable or is combined with other tangible assets to create a new product extends to the mass or product".

34. Article 11[3][4]: This provision should be deleted, as the subject it addresses is addressed in article 31 (and addressed more completely there). In addition, the rule stated in this provision is a rule about the relative rights of two secured creditors and, thus, is not appropriate for this chapter, which is about the existence of a security right and not about the relative rights of that security right as against the rights of others.

35. Article 11, options A and B: These options are difficult to administer inasmuch as it will rarely be the case that encumbered assets will be valued immediately before commingling in a mass or product. In addition, in the case of encumbered assets commingled with other tangible assets to create a new product, the limit of the value of the secured creditor's interest in the product to the value of the encumbered asset before commingling with other assets may inappropriately create situations in which a product created solely from the commingling of encumbered assets is nonetheless partially unencumbered.[1]

36. Thus, an option C should be added to read: "In the case of a security right that extends to a mass, the security right is limited to the quantity of goods that were commingled. In the case of a security right that extends to a product, the security right in the product is limited to the same proportion of the value of the product as the value of the encumbered assets immediately before they became part of the product bore to the aggregate value of all of the assets that were combined to form the product".

37. According to this option: (a) in the case of tangible assets other than money that are commingled in a mass of tangible assets of the same kind, the security right will be limited to a quantity of encumbered assets commingled in the mass no greater than the quantity of its encumbered assets before the commingling (thereby eliminating the need to determine the value of those assets immediately before commingling); and (b) in the case of encumbered assets that become part of a product, the "same proportion" rule from option B, paragraph 2, will be utilized but in a way that is mathematically more precise.

38. Article 12: The current text conflates two different points. It should be amended so that it states: "A security right is extinguished when all obligations secured by the security

[1] Consider a case in which $3,000 worth of sugar that is subject to a security right of SC1 is combined with $4,000 worth of flour that is subject to a security right of SC2 to create a cake worth $12,000. Under options A and B, only $7,000 of the cake would be encumbered and the remainder would be free of any security right, even though the cake was created entirely from the combination of encumbered assets.

right have been discharged (by payment or otherwise) and there are no outstanding commitments to extend credit secured by the security right".

39. Article 13(2): To assure that this provision does not override or limit the protection given to secured creditors in the last portion of article 13(2), it should be amended to begin with the phrase: "Without limiting in any way the protection against claims provided to secured creditors in paragraph 2 …".

40. Article 13(4)(d): To avoid confusion, this provision should be more closely aligned with article 1(3)(d) which limits the scope of the draft Model Law with respect to financial contracts governed by netting agreements to payment rights arising upon the termination of all outstanding transactions.

41. Article 14: The interaction between paragraphs 1 and 2 is potentially confusing, and the article should be amended to read as follows:

> "1. A secured creditor with a security right in a receivable or other intangible asset, or a negotiable instrument, has the benefit of any personal or property right that secures or supports payment or other performance of the encumbered asset.
>
> 2. Nothing in this Law imposes any requirement of a separate act of transfer of the personal or property right referred to in paragraph 1. If, under other law, the right referred to in paragraph 1 is transferable only with a new act of transfer, the grantor is obliged to transfer the benefit of that right to the secured creditor."

Chapter III. Effectiveness of a security right against third parties

42. Article 18(1): Inasmuch as the draft Model Law does not refer to specialized registries, the reference to "the general security rights registry" should be changed to a reference to "the security rights registry."

43. Article 22(1): The phrase "as a result of a change in the location of the encumbered asset or the grantor, whichever determines the applicable law under the provisions of chapter VIII" should be deleted because there are circumstances in which a change of the applicable law may occur for reasons other than a change in the location of the encumbered asset or the grantor. For example, in the case of funds credited to a bank account, the depositary institution may change its place of business.

44. Article 23: Option A raises the possibility that, rather than a security right either being effective against third parties or not effective against third parties, a security right can be effective against some third parties and not others. Thus, the phrase "other than a buyer or other transferee, lessee or licensee" is actually a priority rule, indicating that those parties have priority over a security right made effective against third parties solely under article 23, and should be stated as such. In option B, the reference within square brackets to the "value" to be specified by an enacting State should be changed to a "price" to be specified by an enacting State. The price of goods is usually determined quite easily, while the value of those goods can be the subject of dispute.

45. Article 25(3): The security right should remain effective against third parties "for [a short period of time to be specified by the enacting State] after the document *or the asset* has been returned to the grantor or other person ...". Otherwise, the rule would not be applicable to a situation in which the secured creditor instructs the issuer to release the asset and surrenders the document directly to the issuer. In such a case, the grantor never receives the document and, under the rule as written, the secured creditor would not be protected by the grace period. We believe that there is no practical reason to treat differently these two situations: (a) return of the document to the grantor; and (b) delivery of the document to the issuer with a request that the issuer release the asset. It is essential that this rule adequately covers the existing practices, including where the negotiable document is released to a logistics provider, which is covered by the reference to an "other person."

Chapter IV. The registry system

Draft Model Registry-related provisions

46. Article 6(1)(a) and (2): These provisions should be reformulated to state that: "A notice if no information is entered in one of the mandatory designated fields or some information entered in one of the mandatory designated fields is illegible" and "The Registry must reject a search request if no information is entered in one of the fields designated for entering a search criterion or the information entered in a field designated for entering a search criterion is illegible." As presented, the rule may be interpreted to require the Registry to accept a notice if some, but not all, information in a mandatory designated field is legible, which was not the intended result. For example, an address may contain a street number that is illegible and a street name that is legible. Clarity of this provision is essential for the proper design of a registry system. The Registry would seem to have to accept such a notice under this formulation. This proposal would restore the wording of this provision as included in article 7(1) and (2) of document A/CN.9/WG.VI/WP.65/Add.1.

47. Article 8(a): It should be revised to read: "The identifier and address of the grantor in accordance with article 9 of these provisions [and any additional information that the enacting State may decide to require to be entered to assist in uniquely identifying the grantor]". The reason for moving that phrase "in accordance with article 9 of these provisions" to precede the bracketed language is that article 9 does not refer to additional information. It only prescribes rules in relation to the identifier of the grantor.

Chapter V. Priority of a security right

48. Article 28(2): For greater clarity, this provision which deals with a relatively uncommon issue, be removed from article 28 and placed in its own article.

49. Article 29: To avoid inadvertent inconsistency with articles 44-47 and 49, which give higher priority to security rights made effective by some methods (such as control) than other methods, the rule in this article should be made subject to those articles.

50. Article 30: In order to more clearly describe the topic that this article addresses, the heading should be changed to "Priority of a security right in proceeds". In addition, the text of this article should redrafted to read as follows: "If a security right in proceeds of an encumbered asset is effective against third parties as provided in article 19, the priority of the security right in the proceeds is determined by using the same date used to determine the priority of the security right in the encumbered asset against competing claimants". This is to make it clear that, if the proceeds are in the form of receivables arising from the sale of inventory, the priority of the security right in the receivables will be determined by using the same date as the date that would have been used to determine the priority of the security right in the inventory.

51. Article 31(2) and (3): As it stands, these paragraphs address matters also addressed in article 11 in a manner not consistent with that article. We have proposed deleting the inconsistent portions of article 11 (see para. 34 above). If that proposal is not accepted by the Commission, these paragraphs should be aligned with article 11.

52. Article 32: To avoid inadvertent inconsistency with articles 44-47 and 49, which provide that, in some circumstances, buyers or other transferees take free of security rights made effective against third parties by certain methods, the rule in this article should be made subject to those articles.

53. Article 35(2)(a): In order to make this provision more easily understandable, it should be reordered so that it reads: "Before the time when the secured creditor received a notice from the judgement creditor that the judgement creditor has taken the steps referred to in paragraph 1 or within [a short period of time to be specified by the enacting State] thereafter".

54. Note to the Commission after article 35: The matter raised in the notice should be addressed either by: (a) retaining the bracketed words outside square brackets in paragraph (2); or (b) rewriting paragraph 2 so that it reads: "If the right of a judgement creditor does not have priority under paragraph 1, the security right has priority but that priority is limited to the greater of the credit extended by the secured creditor".

55. Article 36, option A (2)(b)(i) and (2)(b)(ii): The word "notice" is used with two inconsistent meanings. In article 36(2)(b)(i), the term is used in the sense defined in article 1(f) of the Model Registry-related Provisions, while in article 36(2)(b)(ii) the term is used in the sense defined in article 2(x) of the draft Model Law. To avoid the confusion that will result from the use of the same term in adjoining provisions to convey different meanings, a different term, such as "notification", should be used.

56. Article 36, option A (3): The bracketed language at the end of this provision goes beyond aligning it with article 23, option B and, instead, inadvertently creates an unintended substantive rule. Article 23, option B provides that the automatic third-party effectiveness under article 23 is limited to consumer goods below a value to be specified by the enacting State. Of course, though, in such cases, the secured creditor can achieve third-party effectiveness of its security right by registration of a notice. Under the language of Article 36, option A (3), however, when the encumbered assets are above the value specified by the enacting State, the acquisition security right is ineligible for the "super-priority" provided by this article even if that security right is promptly made effective against third parties. As a result, it would be possible for a secured creditor to obtain "super-priority" for its security right in all assets subject to an acquisition security right (including high-value equipment and inventory) except for high-value consumer goods. To avoid this unintended result, option A (3) should be reworded to read: "An acquisition security right in consumer goods and intellectual property or rights of a licensee under a licence of intellectual property that is used or intended to be used by the grantor primarily for personal, family or household purposes has priority over a competing non-acquisition security right created by the grantor in the same asset [to be added only if the State has enacted article 23, option B], if the security right is effective against third parties under article 23 or a notice with respect to the acquisition security right is registered in the Registry not later than the expiry of [a short period of time to be specified by the enacting State] after the grantor obtains possession of the consumer goods, or the agreement for the sale or licence of intellectual property has been concluded".

57. Article 36, option B (1)(a) and (1)(b): The references to "consumer goods" should be deleted inasmuch as consumer goods are already excluded in the chapeau of paragraph 1.

[*Note to the Commission: The Commission may wish to note that the same issue arises in article 36, option A (1)(a) and (1)(b).*]

58. Article 39, option A (3): The phrase "the acquisition secured creditor notifying non-acquisition secured creditors" should be clarified to make explicit whether the reference is to the sending of a notification or the receipt of the notification.

Chapter VI. Rights and obligations of the parties and third-party obligors

59. Article 54(1): This provision should be amended to read: "Within [a short period of time to be specified by the enacting State] after receipt of a *written* request by a grantor …".

60. Article 57(1)(a) should be amended to read as follows: "If payment is made to the secured creditor or a tangible asset is returned to the *secured creditor* with respect to the receivable, …". Otherwise, it is essentially identical in effect to article 57(1)(b) with respect to returned tangible assets.

61. Article 60(4): The word "subsequent" qualifying a security right should be deleted as unnecessary and possibly confusing.

[*Note to the Commission: The Commission may wish to note that article 61(5) refers to "subsequent security rights in the same receivable created by a secured creditor that acquired its right from the initial or any other secured creditor".*]

Chapter VII. Enforcement of a security right

62. Article 72: It should be made clear that the words "is entitled to …" apply to both options A and B.

63. Article 75(4): The reference to assets of a kind sold on a recognized market should be deleted as it is irrelevant to the right of the secured creditor to obtain possession of the encumbered asset without notice to the grantor.

64. Article 77(3): This provision states an absolute right to a deficiency following the application of the proceeds of a disposition of an encumbered asset. It should state that the deficiency is subject to reduction to the extent the grantor suffers damage by the secured creditor's failure to follow the rules in this chapter.

Chapter VIII. Conflict of laws

65. Article 83(2): The words "a competing security right made effective against third parties by another method" should be replaced with the words "a competing claimant" so the rule also covers priority of the security right vis a vis competing claimants that are not secured creditors, such as judgement creditors who obtain a right in the encumbered asset.

66. Article 83(4): This provision is a substantive law rule rather than a conflict-of-laws rule. Otherwise, it would conflict with article 89. While it need not be relocated to another chapter because of its substantive nature, clarification is needed. In particular, it is not clear as drafted whether this rule is intended to work as a substantive rule of the State in which the assets are located at the relevant time (indicating that that State will recognize creation and third-party effectiveness achieved under the law of the destination State even before the assets are in that State and thus governed by the law of that State under the general rule of paragraph 1) or a substantive rule of the destination State (indicating that the destination State will recognize creation and third-party effectiveness achieved under the law of the State in which the assets were located at the time of putative creation even after the assets leave that State and thus are no longer governed by the law of that State under the general rule of paragraph 1). We believe that the intent is to have this rule be treated as a rule of the State in which the assets are located at the time of the putative creation of the security right. If this is correct, paragraph 4 should state this explicitly. If another result is intended, paragraph 4 should state that result explicitly.

67. Article 85: In the interest of clarity, we suggest amending the opening words of this article so that it reads as follows: "Notwithstanding article 84, in the case of a security right in a receivable that *either* arises from the sale or lease of *immovable property* or is secured by immovable property, …".

68. Article 86(a): Inasmuch as the two options were presented within square brackets for the Commission "to have time to consider the matter carefully" (see A/CN.9/865, para. 90), the language in only one of the sets of bracketed words should be retained. Our preference is to retain the wording in the first set of bracketed words but amend that wording to state "the relevant act of enforcement takes place".

69. Article 89(1)(b): We believe that the phrase "at the time the issue arises" is imprecise and, thus, uncertain. It is not clear whether the phrase refers to the time an issue arises for the first time. In such a case, the location for purposes of conflict-of-laws rules would be locked in at that time; and clarity would be required as to whether an issue "arises", for example, at the first time a party makes an assertion with respect to that issue, at the first time litigation with respect to it is instituted, or at some other time. Alternatively, this phrase could simply mean "when the issue is relevant". We think that the latter is intended, subject to the rule in paragraph 2, and the language should be clarified to make that point clearly.

70. Article 93: The chapeau should be revised so that it reads as follows: "The law … *also applies to*:". This is because, without this change, the provision is ambiguous inasmuch as it could also be read as stating that the law governing the issues described in the chapeau is determined by determining the law applicable to the three issues described in the subparagraphs and applying that law to the issues described in the chapeau.

71. Article 96(2): It is not clear whether this provision is intended to be: (a) a substantive rule of the State whose law is applicable, in which case it will apply only if the State in which the intellectual property is protected has enacted the Model Law; or (b) a "validating" conflict-of-laws rule, under which the applicable law is the law of a State that "validates" either third-party effectiveness or priority of the security right in question. In any event, it is anomalous to indicate, as does article 96(2), that a security right may be effective against some third parties but not others. Elsewhere in the draft Model Law, a security right is either effective against third parties or it is not effective against third parties, and rules preferring

one method of achieving that third-party effectiveness over other methods are styled as priority rules. That practice should be followed here as well.

72. Article 97: We propose adding a new option D. This option blends the general applicable law approach of the draft Model Law with a recognition of the important applicable law rules in entity statutes of States (like the rule on intellectual property; see article 96(2)) of the draft Model Law). We believe this option expresses the correct policy decisions concerning this extremely important topic, and also reorganizes the article in a way that we believe will be more easily understood by users of the Model Law. This option should read as follows:

> 1. Subject to article 95, in the case of a security right in certificated non-intermediated securities:
>
> (a) Except as provided in subparagraph (b), the law applicable to the creation, effectiveness against third parties and priority of the security right is the law of the State in which the certificate is located;
>
> (b) If a security right in certificated non-intermediated securities may not be created under, or does not satisfy the requirements for creation of a security right in those securities under the law of the State under which the issuer is constituted (in the case of equity securities) or the law of the State whose law governs the securities (in the case of debt securities), the security right has not been created; and
>
> (c) The law applicable to the enforcement of the security right is the law of the State in which [the relevant act of] enforcement takes place.
>
> 2. In the case of a security right in uncertificated non-intermediated securities, the law applicable to the creation, effectiveness against third parties, priority and enforcement of the security right is the law of the State under which the issuer is constituted (in the case of equity securities) or the law of the State whose law governs the securities (in the case of debt securities).
>
> 3. The law applicable to whether a security right in non-intermediated securities is effective against the issuer and whether an act of enforcement of that security right is effective against the issuer is the law of the State under which the issuer is constituted (in the case of equity securities) or the law of the State whose law governs the securities (in the case of debt securities).

73. Article 98: The current wording of this article should be replaced with the wording suggested in the Note to the Commission.

Chapter IX. Transition

74. Article 100(1)(a): The square brackets should be removed so that the term “prior law” will refer to the law that the enacting State would have applied before the entry into force of its enactment of the Model Law. Two additional issues need clarification, however. First, the reference should be to the conflict-of-laws rules that were in effect under the former law, since it was those conflict-of-laws rules that determined the State whose law governed an issue. Second, under prior conflict-of-laws rules, the law of different States might have been applicable to different issues (as in the case, for example, of a State that has different conflict-of-laws rules for creation and enforcement than for third-party effectiveness and priority), but the text of article 100(1)(a) seems to suggest that prior conflict-of-laws rules pointed to the law of a single State to apply to security rights generally. Accordingly, we suggest amending the text of article 100(1)(a) so that it reads as follows: “‘Prior law’ means the law applicable, under the conflict-of-laws rules of the enacting State existing immediately before the entry into force of this Law, to the relevant issue”.

75. Article 104(3)(a): The words “as provided in article 103, paragraph 3” should be deleted inasmuch as the priority status of a prior security right has changed if it has ceased to be effective against third parties for any reason.

J. Note by the Secretariat on a draft model law on secured transactions: compilation of comments

(A/CN.9/887 and Add.1)

[Original: English/French/Spanish]

Contents

I. Introduction

1. At its twenty-eighth and twenty-ninth sessions (Vienna, 12-16 October 2015, and New York, 8-12 February 2016, respectively), Working Group VI (Security Interests) adopted a draft model law on secured transactions (the "draft Model Law") (A/CN.9/865 and A/CN.9/871) and, at its twenty-ninth session, decided to submit it to the Commission on the understanding that the Secretariat would make the text of the draft Model Law available to States for comment (A/CN.9/871, paragraph 91).

2. This note sets forth, with minimal editorial modifications, the second compilation of comments received from Governments (the first compilation is contained in document A/CN.9/886).

II. Comments on the draft Model Law

A. Canada

[Original: English]
Date: 16 May 2016

Chapter I. Scope of application and general provisions

3. Articles 1(2) and 2(k)(ii), (o)(iii), (dd)(ii), (ee), and (ii)(ii): We suggest: (a) deleting the square-bracketed text in article 1(2) and revising the remaining text as follows: "…, this Law applies to an agreement for the outright transfer of a receivable."; (b) retaining the square-bracketed text in articles 2(k)(ii), (o)(iii), (dd)(ii) and (ii)(ii) but clarifying the text to refer to an agreement for the outright transfer of a receivable (so as to confirm that the Law only applies to transfers effected by agreement versus operation of law and because the words "in an outright transfer of a receivable" are unclear); and (c) deleting the bracketed text in the definition of "secured obligation" in article 2(ee) (as it is unnecessary).

4. Article 2(c): We support retaining the text in the second set of square brackets.

5. Article 2(j): We support retaining the text in square brackets as this best reflects common drafting practice.

6. Article 2(o)(ii): We suggest: (a) deleting the reference to "lessee or licensee" as a lessee or licensee has only a right of possession or use and cannot be a grantor even when it acquires an encumbered asset subject to a security right; and (b) revising the definition to expressly limit the inclusion of a buyer or other transferee in the definition of grantor to those articles in which the term "grantor" is truly meant to include a transferee acquiring an encumbered asset from the initial grantor (for example, the articles relating to the creation

of a security right and a grantor's liability for a post-enforcement deficiency should generally apply only to the initial grantor).

7. Article 2(r): We suggest revising the text after the word "including" to refer simply to "raw materials and work-in-process" (as the term "semi-processed materials" is included in the broader concept of "work-in-process").

8. Article 2(u), Note to the Commission: We support the suggestion to add a definition of "movable asset" to mean "a tangible or intangible asset other than immovable property" but we do not think the additional words "as defined by the enacting State" are necessary or appropriate.

9. Article 2(z): We support deleting the square-bracketed words "directly or indirectly" as their meaning is unclear and as the multimodal scenario referred to in the Note is adequately covered by the remaining wording.

10. Article 5: We support the inclusion of this article subject to the deletion from paragraph 1 of the reference to "the observance of good faith" (since, unlike the other UNCITRAL instruments from which this article is derived, article 4 of the Model Law recognizes a general obligation of good faith).

Chapter II. Creation of a security right

11. Article 6(3): We suggest deleting the words "[concluded in]" and retaining the words "evidenced by" as the latter wording best reflects our understanding of the intended substance of the article.

12. Article 8(a): We suggest deleting the words "including future assets" because: (a) "future assets" are not a "type" of movable asset but could involve any type of movable asset; and (b) article 6(2) already confirms that a security agreement may cover future assets.

13. Article 9(1): For simplicity of drafting, we suggest replacing the words "assets encumbered or to be encumbered" with the words "encumbered assets" (since, if the current wording is retained, it would be necessary to also use that wording in the many articles in which a reference to encumbered assets is meant to include future assets or assets that have not yet been encumbered because no security agreement has yet been concluded).

14. Article 11: We suggest that option A, para. 2, and option B, paras. 2 and 3, refer to "encumbered asset" and not "assets" (singular, not plural). We also note the overlap and inconsistency between article 11[3][4] and articles 31(2)-(3). To address the latter, we suggest that article 11[3][4] be deleted and articles 31(2)-(3) be revised in the manner suggested in our comment on article 31 below.

15. Article 14(2): To conform article 14 to article 10 of the United Nations Convention on the Assignment of Receivables in International Trade (the "Assignment Convention"), paragraph 2 should be revised to add the words "under the law governing it" following the word "transferable" in the first line.

Chapter III. Effectiveness of a security right against third parties

16. Article 18(1): For clarity, we suggest replacing the words "in the general security rights registry (the "Registry")" with the words "in the registry" and adding a definition of "registry" in article 2 to mean "the registry established under article 27 of this Law."

17. Article 19: While paragraph 2 incorporates the "identifiable" limitation in article 10, paragraph 1 does not do so even though it covers proceeds in the form of instruments and receivables where article 10 requires identifiability as opposed to traceability. For clarity and consistency, we suggest that the word "identifiable" in paragraph 2 be deleted and that the opening words of paragraphs 1 and 2 be revised along the following lines: "If a security right in an encumbered asset is effective against third parties, a security right in any proceeds of that asset that arises under article 10 is effective against third parties without any further act …".

18. Article 19, Note to the Commission: We support the suggestion in the Note and suggest it could be implemented by wording along the following lines: "If a security right in a tangible asset is effective against third parties, a security right in a mass or product to which

the security right extends under article 11 is effective against third parties without any further act".

19. Article 22, Note to the Commission: We agree that the effectiveness of a security right against claimants whose rights arise during the grace period should be conditioned on the secured creditor making its security right effective against third parties before the expiry of that period. This result could be implemented by revising the text that comes after the words "chapter VIII" along the following lines: "… the security right remains effective against third parties under this Law if it is made effective against third parties in accordance with this Law before the earlier of …".

20. Article 23: For clarity, we suggest that the bracketed text in option B be revised to refer to consumer goods "having an acquisition price below an amount to be specified by the enacting State" (as "value" is too vague). We also suggest that option B be revised to incorporate the special protection for buyers in option A as follows: "An acquisition security right in consumer goods [having an acquisition price below an amount to be specified by the enacting State] is effective against third parties, other than a buyer, upon its creation without any further act".

Chapter IV. The registry system

21. Article 27, title: For clarity, we suggest changing the title to "Establishment of the registry".

Draft Model Registry-related provisions

22. Article 6(2): We suggest deleting the word "mandatory", since search requests, unlike notices, do not contain "mandatory" fields.

23. Article 7: We suggest that paragraphs 1 and 2 be relocated to article 5 as they relate to subparagraph 5(1)(b) and that the title then be changed to "Scrutiny of the form or contents of a notice by the Registry".

24. Article 11: We suggest that: (a) paragraph 1 refer to "encumbered assets" not "assets encumbered or to be encumbered" (for the reasons stated in our comments on article 9 of the Law above); and (b) paragraph 2 refer to "generic category" not "particular category" (in order to align the wording with article 9 (2)).

25. Article 15: For clarity and correctness, we suggest subparagraph 2(b) be revised to refer to "the most recent address if known to or reasonably available to that person".

26. Article 20(1): To align paragraph 1 with the policy in subparagraph 3(b), we suggest adding a new subparagraph 1(c) requiring a secured creditor to register an amendment notice deleting encumbered assets in a registered notice where: "The grantor authorized the registration of a notice covering those assets but the authorization has been withdrawn and no security agreement covering those assets has been concluded".

27. Article 25: We suggest revising paragraph 2 to confirm that failure to register an amendment notice after a change in the identifier of the grantor within the grace period or at all does not prevent the secured creditor from claiming priority against a competing secured creditor or transferee on the basis of having obtained possession or control of the encumbered asset before their rights arise. To reflect this suggestion, and to further clarify the text of the entire article, we suggest dividing paragraph 2 into two paragraphs and revising article 25 along the following lines:

> "1. Subject to paragraphs 2 and 3, the third-party effectiveness and priority of a security right that was made effective against third parties by registration of a notice is not affected by a change in the identifier of the grantor after the notice is registered.
>
> 2. If the identifier of a grantor changes after a notice is registered, the registration of the notice is ineffective to give the security right to which the notice relates priority over a competing security right created by the grantor that was made effective against third parties after the change unless an amendment notice disclosing the new identifier of the grantor is registered:

(a) Before the expiry of [a short period of time to be specified by the enacting State] after the change; or

(b) If subparagraph (a) does not apply, before the competing security right is made effective against third parties.

3. If the identifier of a grantor changes after a notice is registered, the registration of the notice is ineffective to make the security right to which the notice relates effective against the right of a person to whom the grantor sells or otherwise transfers the encumbered asset after the change unless an amendment notice disclosing the new identifier of the grantor is registered:

(a) Before the expiry of the period referred to subparagraph 2(a); or

(b) If subparagraph (a) does not apply, before the encumbered asset is sold or otherwise transferred."

28. Article 26: We suggest revising paragraphs 1 and 2 in the same fashion and for the same reasons as suggested for article 25 above. We also suggest revising option B to require a secured creditor to register an amendment notice only if it acquires knowledge of the transfer and knowledge of the identifier of the transferee (since without knowing the transferee's identity, it would not be practically possible for it to take that step). We further suggest deleting the reference to subsequent transfers in option A (since the registered notice will be ineffective against a subsequent transferee of the initial transferee unless the secured creditor registers an amendment notice before the subsequent transfer occurs or before the expiry of the grace period). Finally, we suggest revising option B to clarify that if the asset is subject to subsequent transfers before the secured creditor finds out that it has been transferred, it is not required to take steps to preserve the effectiveness of its registered notice unless it has knowledge of the identifier of the most recent transferee (since it would be practically pointless to register an amendment notice identifying a prior transferee). To reflect these suggestions, we suggest that article 26, options A and B, be revised along the following lines:

"1. Subject to [paragraphs 2 and 3 (Option A)] [paragraphs 2 to 4 (Option B], the third party effectiveness and priority of a security right in an encumbered asset that was made effective against third parties by registration of a notice is not affected by a transfer of the encumbered asset after the notice is registered to a transferee that acquires its right subject to the security right under article 32 of the Law.

2. If an encumbered asset covered by a registered notice is sold or otherwise transferred to a transferee that acquires its right subject to the security right to which the notice relates under article 32 of the Law, the registration of the notice is ineffective to give the security right priority as against a competing security right created by the transferee that is made effective against third parties after [the transfer (Option A)] [the secured creditor acquires knowledge of the transfer and the identifier of the transferee (Option B)] unless the secured creditor registers an amendment notice adding the transferee as a new grantor:

(a) Before the expiry of [a short period of time to be specified by the enacting State] after [the transfer (Option A)] [acquiring knowledge (Option B)]; or

(b) If subparagraph (a) does not apply, [before (Option A)] [after acquiring knowledge and before (Option B)] the competing security right is made effective against third parties.

3. If an encumbered asset covered by a registered notice is sold or otherwise transferred to a transferee that acquires its right subject to the security right to which the notice relates under article 32 of the Law, the registration of the notice is ineffective to make the security right effective against the right of a person to whom the transferee [subsequently (option A)] sells or otherwise transfers the encumbered asset [after the secured creditor acquires knowledge of the transfer and the identifier of the transferee (option B)] unless the secured creditor registers an amendment notice adding the transferee as a new grantor:

(a) Before the expiry of the period referred to subparagraph 2(a); or

(b) If subparagraph (a) does not apply, [before (Option A)] [after acquiring knowledge and before (Option B)] the transferee sells or otherwise transfers the encumbered asset.

[4. (Option B)] If there are one or more subsequent transfers of the encumbered asset before the secured creditor acquires knowledge of the transfer, the obligation to register an amendment notice under paragraphs 2 and 3 arises only if the secured creditor has knowledge of the identifier of the most recent transferee.]

[4. (Option A)] [5. (Option B)] The third party effectiveness and priority of a security right in intellectual property that was made effective against third parties by registration of a notice is not affected by a transfer of the intellectual property after the notice is registered to a transferee that acquires its right subject to the security right under article 32 of the Law."

29. To align the wording of Option C with the revised wording of articles 25(1) and 26(1) of Options A and B above, we suggest it be revised along the following lines:

"The third-party effectiveness and priority of a security right in an encumbered asset that is made effective against third parties by registration of a notice is not affected by a transfer of the asset after the notice is registered to a transferee that acquires its right subject to the security right under article 32 of the Law".

Chapter V. Priority of a security right

30. Article 28: For clarity, we suggest that the title be changed to "Priority among competing security rights in the same encumbered asset". To clarify the substance of paragraphs 1 and 3 and their relationship, we suggest that paragraph 3 be deleted and paragraph 1 be revised along the following lines:

"Subject to articles …., competing security rights created by the same grantor in the same encumbered asset rank in priority according to:

(a) The time of third-party effectiveness; and

(b) If a security right was made effective against third parties by registration of a notice in the Registry, the time of registration without regard to the time of creation of the security right."

31. We also suggest that article 28 should only be made subject to articles 31, 36-37 and 39-41 (since articles 29-30, 32-35, 38 and 42 are not exceptions to article 28). We further suggest that paragraph 2 be made a separate article and the text be revised to: (a) state that priority is determined according to the rule in article 28 (as revised); and (b) clarify that it does not apply in the scenario where a pre-transfer secured creditor of a transferee of an encumbered asset claims priority on the basis of a security right covering after-acquired property that was made effective against third parties by registration before the transfer.

32. Article 29: To clarify the relationship of article 29 to article 28, we suggest that: (a) the opening words be revised to say that "the priority of competing security rights under article 28 is not affected …"; and (b) the title be revised to add the words "Priority among" at the beginning.

33. Article 30: To clarify its relationship with article 28, we suggest revising article 30 along the following lines: "A security right in proceeds of an encumbered asset that is effective against third parties under article 19 has the same priority as against a competing security right that the security right in the encumbered asset from which the proceeds arose has under article 28." We also suggest that the title be changed to: "Priority of a security right in proceeds against competing security rights" (so as to cover the usual case in which a secured creditor claiming a proceeds security right is competing with a secured creditor claiming the proceeds as an original encumbered asset).

34. Article 31: To clarify its relationship with article 28, we suggest revising paragraph 1 along the following lines: "If two or more security rights in the same tangible asset continue in a mass or product as provided in article 11, the priority of the security rights in the mass or product is the same as the priority that the security rights in the tangible assets had under article 28 immediately before the assets became part of the mass or product" (note that this

wording assumes that the revision suggested in the Note to the Commission on article 19, above, is adopted.) To resolve the overlap and conflict between articles 31 and 11 noted in our comment on article 11 above, we suggest that article 11[3][4] be deleted and articles 31(2)-(3) be revised along the following lines:

> "2. If more than one security right extends to the same mass or product under article 11 and each was a security right in a separate tangible asset at the time of commingling, the secured creditors are entitled to share in the mass or product according to the ratio that the obligation secured by each security right bears to the sum of the obligations secured by all the security rights.
>
> 3. For the purposes of paragraph 2, the obligation secured by a security right that extends to the product or mass is limited to the value of the security right determined in accordance with article 11 [option A, para. 2 or option B, paras. 2-3]."

35. Article 35: For clarity and simplicity, we suggest that: (a) the opening clause of paragraph 1 need only say "Subject to article 38"; (b) the opening clause of subparagraph 2(a) be revised as follows: "Before or within [a short period of time to be specified by the enacting State] after the secured creditor receives a notice …"; and (c) the title be changed to: "Priority of a security right against the rights of the grantor's judgment creditors".

36. Article 36. For clarity and substantive correctness, we suggest: (a) changing the title to "Priority between acquisition and non-acquisition security rights"; (b) qualifying the exclusion of "consumer goods" and "and intellectual property or rights of a licensee under a licence of intellectual property that are used or intended to be used by the grantor primarily for personal, family or household purposes" in the opening clause of option A, paragraph 1 (so as to cover cases where the square bracketed text in option A, paragraph 3, is adopted by a State); (c) deleting the words "other than inventory or consumer goods" in option A, subparagraph 1(a) (since this exclusion is already stated in the opening clause); (d) deleting the words "or the agreement for the sale or licence of intellectual property has been concluded" from option A, subparagraphs 1(a) and 2(a), and option B, subparagraph 1(a) (as inconsistent with subparagraph 1(b)); (e) substituting the word "before" for the words "not later than" in option A, subparagraph 1(b), and option B, subparagraph 1(b) (for drafting consistency); (f) clarifying clause 2(b)(ii) of option A along the following lines: "the non-acquisition secured creditor that has registered a notice in the Registry with respect to a security right created by the grantor in an asset of the same kind receives a notice from the acquisition secured creditor that states it has or intends to acquire an acquisition security right in the assets described in the notice and describes those assets sufficiently to enable the non-acquisition secured creditor to identify the assets that are or will be the object of the acquisition security right.";(g) revising option A, paragraph 3, as follows: "provided that the acquisition price of the asset is below [an amount to be specified by the enacting State]" (see our comment on article 23 above) and incorporating this same proviso at the end of paragraph 2 of option B; (h) qualifying the exclusion of "consumer goods and intellectual property or rights of a licensee under a licence of intellectual property that are used or intended to be used by the grantor primarily for personal, family or household purposes" in option B, chapeau of paragraph 1 (so as to cover cases where the square-bracketed text in paragraph 3 of option A, which should be added also to paragraph 2 of option B, is adopted by a State); and (i) deleting the words "other than consumer goods" from option B, subparagraph 1(a) (since this exclusion is already stated in the opening clause).

37. Article 37: For clarity, we suggest: (a) adding the words "priority between" at the beginning of the title; and (b) replacing the words "over a competing acquisition security right of a secured creditor other than a seller or lessor, or a licensor of intellectual property" with the words "over a competing acquisition security right of a secured creditor who extended credit to enable the grantor to acquire rights in the encumbered asset" (since there cannot be more than one acquisition security right in favour of a seller, lessor, or licensor).

38. Article 39, option A: For clarity, drafting simplicity and correctness, we suggest that option A be revised along the following lines:

> "1. Subject to paragraph 2, a security right in proceeds of an encumbered asset in which the secured creditor has an acquisition security right has the same priority

against a competing security right that the acquisition security right in the encumbered asset from which the proceeds arose has under article 36.

2. In the case of proceeds arising from an acquisition security right in inventory and intellectual property or the rights of a licensee under a licence of intellectual property that is held by the grantor for sale or licence in the ordinary course of the grantor's business:

(a) Paragraph 1 does not apply if the proceeds take the form of receivables, negotiable instruments, or rights to payment of funds credited to a bank account; and

(b) The priority of the security right under paragraph 1 in any other type of proceeds is conditional on the receipt by a competing non-acquisition secured creditor that registered a notice in the Registry with respect to a security right created by the grantor in an asset of the same kind as the proceeds of a notice from the acquisition secured creditor that states it has or intends to acquire an acquisition security right in assets of the same kind as the proceeds and describes those assets sufficiently to enable the non-acquisition secured creditor to identify the assets that are or will be the object of the acquisition security right."

Chapter VI. Rights and obligations of the parties and third-party obligors

39. Article 57(1): For clarity, we suggest that the words "to the debtor of the receivable" be added to the opening clause of paragraph 1. To conform paragraph 1 to article 14(1) of the Assignment Convention, we suggest: (a) deleting the words "delivery of" and replacing the word "grantor" with "secured creditor" in subparagraph 1(a); and (b) revising the first part of subparagraph 1(c) to say: "If payment is made or a tangible asset is returned to another person over whom the secured creditor has priority".

40. Article 59(2): For drafting consistency, we suggest replacing the words "original contract" in subparagraphs 2(a) and (b) with "contract giving rise to the receivable".

41. Article 60(4): To conform paragraph 4 with article 16 and the concept of "subsequent assignment" in article 2(b) of the Assignment Convention, we suggest it be revised as follows: "Notification of a security right in a receivable acquired by a secured creditor from an initial or subsequent secured creditor constitutes notification of all prior security rights in that receivable".

42. Article 61(5): To conform paragraph 5 with article 17(5) and the concept of "subsequent assignment" in article 2(b) of the Assignment Convention, we suggest that the words "created by a secured creditor that acquired its right from the initial or any other secured creditor" be replaced by the words "acquired by a secured creditor from the initial or any other secured creditor".

Chapter VII. Enforcement of a security right

43. Article 74(2): We suggest deleting paragraph 2 as it is in conflict with the general rule in article 79(2) and (4).

44. Article 76(4): We suggest deleting the references to "a short period of time" in subparagraph 4(b) and 4(c) as unnecessary and inappropriate.

45. Article 77: We suggest: (a) changing the title to "Distribution of the proceeds of disposition of an encumbered asset; debtor's liability for any deficiency" to more accurately reflect the substance of the article; and (b) replacing the term "shortfall" in paragraph 3 with the less colloquial term "deficiency".

46. Article 78: We suggest: (a) deleting the references to a "short period of time" in subparagraphs 1(b) and (c) as unnecessary and inappropriate; (b) aligning the wording of the first part of subparagraph 3(a) and the wording of article 76(5)(b); and (c) clarifying paragraph 4 by revising the text and dividing it into two paragraphs along the following lines:

"4. A secured creditor that has made a proposal for the acquisition of an encumbered asset in full satisfaction of the secured obligation acquires the encumbered asset unless a person entitled to receive the proposal under paragraph 2 objects in writing before

the expiry of [a short period of time to be specified by the enacting State] after the proposal is received by that person.

5. A secured creditor that has made a proposal for the acquisition of the encumbered asset in partial satisfaction of the secured obligation acquires the collateral only if it receives the affirmative consent in writing of all persons entitled to receive the proposal under paragraph 2 before the expiry of [a short period of time to be specified by the enacting State] after the proposal is received by each of them."

47. Article 79(1): We suggest deleting the words "except rights that have priority over the right of the enforcing secured creditor" in the square bracketed text as it is frequently the rule in the case of judicially ordered sales that the sale purges the asset of all encumbrances with the proceeds then distributed to claimants in order of priority.

48. New article: For clarity, we suggest adding a new article to chapter VII along the following lines: "If the maximum amount entered in an initial or amendment notice is lower than that indicated in the security agreement to which the notice relates, the security right to which the notice relates may be enforced only in respect of the amount entered in the registered notice".

Chapter VIII. Conflict of laws

49. Article 83(4): We suggest deleting subparagraph (a) as it is a restatement of the general rule in paragraph (1).

50. Article 85, Note to the Commission: To avoid unduly limiting the scope of the rule in article 85, we suggest that the concern expressed in the Note could be addressed by excluding cases where the immovable property to which a receivable relates is not identified or identifiable in the contract giving rise to the receivable.

51. Article 86(a): We prefer the text in the second set of square brackets as it provides greater certainty and clarity whereas the alternative text fails to state a connecting factor.

52. Article 97: We suggest deleting option C as the distinction between equity and debt securities is uncertain in many instances (for example, convertible securities).

53. Article 98: We support replacing the current text with the text suggested in the Note to the Commission as we think it more clearly states the intended substance.

Chapter IX. Transition

54. Article 100(1)(b): We suggest deleting the word "security" in the second line to align with the term "right" in the first line.

55. Article 104(1): We suggest deleting paragraph 1 as its meaning is unclear and it conflicts with article 103. If it is retained, we support its revision and relocation in line with the suggestions made in the Note to the Commission.

Chapter VII. Enforcement of a security right

56. As discussed, the aim of article 72 of the Model Law, which is based on recommendation 137 of the Guide on Secured Transactions and is entitled "Relief for non-compliance", is to indicate that any person whose rights are affected by the non-compliance of another person with its obligations under the provisions of chapter VII regarding the enforcement of a security right is entitled to apply for relief to a court or other authority.

57. Persons that may be affected by such non-compliance include the secured creditor, a guarantor or a co-owner of the encumbered assets and it is generally the enacting State that indicates the court or authority to which the party seeking relief should apply and the type of summary procedure applicable.

58. In this regard, we consider it appropriate to propose the inclusion of an article or paragraph on the use of the various forms of alternative dispute resolution, including the use of arbitration, online dispute resolution, mediation and conciliation, in the resolution of disputes over secured transactions.

59. The purpose of the inclusion of this article is to emphasize the importance of alternative dispute resolution in States and that it will serve as an incentive to introduce a system of secured transactions in countries that do not have one or to reform an existing system.

60. There are two main reasons why alternative dispute resolution is important. First, courts in many countries around the world do not resolve disputes in a timely manner. Second, slow legal proceedings become extremely expensive. Consequently, it is proven that prolonged and costly legal proceedings adversely affect the availability and the cost of credit.

61. In this regard, it is important to mention that many jurisdictions have developed alternative dispute resolution systems that have been much faster and more cost-effective than legal proceedings.

62. Article 68 of the Model Inter-American Law on Secured Transactions, adopted by the Organization of American States (OAS) in 2002, already provides for the use of arbitration in accordance with a security agreement. A number of jurisdictions expressly include article 68 of the OAS Model Inter-American Law in their legislation on secured transactions, including Colombia, Costa Rica, El Salvador and Honduras.

63. The fundamental importance of those systems in commercial transactions was also highlighted by many delegations at the 29th session of Working Group VI, including China, El Salvador and Sierra Leone.

64. In the specific case of El Salvador, article 64 of the Law on Secured Transactions establishes that the secured creditor may choose between an arbitration process, an extrajudicial process before a notary, or legal proceedings before a competent judge. These types of provision create a much more flexible and modern legal framework that enhances the value of moveable property, since a tool, other than judicial proceedings, is made available to the creditor to enforce a security or to provide conciliation in insolvency cases, this proving a less costly process, as is the case with enforcement proceedings through a notary.

65. Effective national commercial arbitration systems and mediation or conciliation are important to investors. Lawyers and business owners know that high costs and long delays can make the resolution of commercial disputes in courts difficult and expensive and may seek dispute resolution elsewhere, and companies may pass the costs on to consumers or refrain from investing in a jurisdiction.

66. In its current wording, the Model Law does not mention the use of alternative dispute resolution as an alternative to litigation in resolving disputes over secured transactions. Mention of these procedures in an article of the Model Law will draw the attention of investors to the parties' option of using them as it will be much more effective emphasizing their importance in the context of secured transactions.

67. Taking into account that there may be proposals from other delegations and to conclude this point, we suggest drafting the article along the following lines:

> "The secured creditor may use alternative dispute resolution, including arbitration, mediation, conciliation and online dispute resolution, to resolve any dispute arising between them in connection with the exercise of rights or performance of obligations under the security agreement or [the present law] [any applicable law].

68. We consider that the need for a prior agreement between the parties to authorize such alternative measures will depend on each State and the special laws governing them.

69. Article 73 of the Model Law, which is based on recommendation 140 of the Guide on Secured Transactions and is entitled "Right of affected persons to terminate enforcement", states that any person whose rights are affected by the enforcement process is entitled to terminate the enforcement process by paying or otherwise performing the secured obligation

in full. This provision is based on the assumption that the residual value of the asset is higher than the outstanding part of the secured obligation.

70. On this point the delegation of El Salvador also discussed the need to add a subparagraph that will allow the creditor to terminate the enforcement process by means of partial payment or another form of full compliance, as there is the possibility that the secured creditor may reach an extrajudicial settlement with the debtor with partial payment, provided that the creditor is satisfied and there is a written agreement between them based on autonomy of the parties and freedom of contract.

71. With no further comments of relevance, the delegation of El Salvador commends the Secretariat of the United Nations Commission on International Trade Law on the drafting of the document presented and the excellent work carried out by the Organization.

C. Spain

[Original: Spanish]
Date: 25 May 2016

Name of the draft Model Law on Secured Transactions

72. In both the last and all the previous versions, the text in Spanish was entitled “Ley de operaciones garantizadas”. The delegation of the Kingdom of Spain hereby submits for consideration by the Commission a change of the name of the Model Law in the Spanish language. The proposed name is: “Ley Modelo sobre Garantías Reales Mobiliarias”.

73. Rationale: The title we propose to change is a literal translation of the English title “Model Law on Secured Transactions”. The English term “secured transactions” has been and continues to be widely used in the legal field, both in practice, in academia and in legislative activity. Such prolific use has endowed it with a meaning that is unequivocal. The situation is, however, quite different as regards its literal translation into Spanish. The term “operaciones garantizadas” neither has been nor is commonly used, nor has it acquired an unequivocal meaning nor, finally, is it a term that serves accurately to describe the content of the document. The Model Law deals only with security rights in moveable property, but in Spanish, “operaciones garantizadas” can refer to both movable and immovable property. Furthermore, in Spanish, “operaciones garantizadas” can signify both those transactions whose performance is secured by a right in rem (pledge, mortgage, etc.) and those that rely on a credit claim against a third party (bond, guarantee). The Model Law does not regulate the latter, thereby misleading the reader about the content of the regulations.

Draft Model Registry-related provisions

74. Article 5.4 provides that, if access to the Registry is refused, the reason must be communicated to the registrant or searcher “without delay”. We propose that “without delay” be replaced by the following: “within the time limit established by each State, which may not exceed [...] days”; and that a statement be included in the Implementation Guide indicating that the time limit should be as short as possible. The same is proposed for articles 6.4 and 13.2.

75. Rationale: The term “without delay” is highly inaccurate for use in a legal document.

76. It appears appropriate to add a paragraph (c) to article 6.1, stating: “In no case may a registrable form or document or its agreements added voluntarily by grantors contradict peremptory norms”.

77. Rationale: It appears appropriate to establish the need for that which is entered in the registry to be consistent with the applicable substantive rules, without prejudice to registration on the basis of models that have been pre-established and approved by the competent administrative authority, as grantors should be allowed to agree on or establish the specificities that best suit or interest them.

78. With regard to article 13, the following suggestions are made: (a) Replace the reference to “fecha y hora” [“date and time”] in Spanish with “momento temporal preciso” [precise time] since, given that the record should be fully electronic, the time will be fixed

in its authentic form. Note that, in Spanish, "hora" [hour or time] is not necessarily the equivalent of "time". It could be misleading, giving the impression that it is sufficient to note the hour without making reference to minutes or seconds; and (b) Since an "initial notice" or "notice" may be rejected, effectiveness should refer to the time of entry of the notice in the Registry and not the time of its entry into the registry record.

79. Article 22 sets out search criteria limiting them to data regarding the grantor or registration. We propose adding a paragraph (c) to read:

> "(c) Data identifying the assets given as security, provided that the nature of those assets allows them to be thus identified."

80. Rationale: It appears reasonable that, in the case of an asset registry, albeit essentially documentary in nature, a search of the registry record may also be carried out using such identification data, given that much movable property is provided with identifiers that persist throughout its economic life.

D. Switzerland

[Original: French]
Date: 23 May 2016

81. Switzerland welcomes the fact that the draft Model Law on Secured Transactions has been approved by Working Group VI (Security Interests) and that it has been submitted to the United Nations Commission on International Trade Law with a view to adoption at its forty-ninth session.

82. Switzerland pays tribute to the high quality work accomplished by Working Group VI: the Model Law is a remarkable step forward in the area of security rights and will undoubtedly serve as a highly useful source of inspiration for States wishing to establish a modern and effective legal regime in the matter.

83. However, it should be pointed out that the draft includes a not inconsiderable number of provisions, some of which are of a relatively high level of sophistication; it might have been desirable for the Model Law to reflect more closely the Commission's express wish for a simple, short and concise text. Moreover, one may wonder why the draft Model Law retains solely the unitary approach to acquisition security rights, abandoning the non-unitary approach, which is also proposed by the UNCITRAL Legislative Guide on Secured Transactions; each of these approaches still has its merits and it would have been preferable for the Model Law to have taken that fact into account.

84. In addition, Switzerland, after a careful analysis of the draft Model Law, submits to the Commission for its consideration the following three suggestions.

85. Under article 52 of the draft Model Law, a secured creditor in possession of an encumbered asset must return the asset to the grantor upon extinction of the security right. Pursuant to article 3, paragraph 1, of the draft Model Law, that rule is binding.

86. It is unclear, however, why the Parties should not be at liberty to derogate from the rule. Firstly, the encumbered asset may belong not to the grantor but to a third party; in such circumstances, the Parties should be able to agree that the creditor must return the asset to the owner (and not to the grantor) upon extinction of the security right. It may also be the case that the grantor intends to leave the encumbered asset in the possession of the creditor notwithstanding the extinction of the security right: why could the Parties not, for example, agree that an encumbered painting will remain deposited with the creditor once the security right is extinguished? Moreover, the asset may be encumbered with another (subordinate) security right; the Parties should be able to agree, in such a situation, that the creditor in possession must return the asset to the creditor for the benefit of the other (subordinate) security right upon extinction of its security right.

87. While article 52 provides a rule that is appropriate for the majority of cases, it is clear from the foregoing examples, however, that there are situations in which the Parties have a legitimate interest in choosing an alternative solution. In the view of Switzerland, it would

be appropriate, therefore, to remove article 52 from the list of provisions from which the parties cannot derogate.

88. Article 77, paragraph 2, subparagraph (b), provides that the enforcing secured creditor must pay any surplus (after payment of its claim) to any competing claimants and remit any balance remaining to the grantor.

89. This process can only function satisfactorily, however, if the secured creditor duly reports on how it applies the proceeds of enforcement; a detailed account should be provided not only to the grantor of the security right (cf. article 77, paragraph 2, subparagraph (b)) but also to any third-party debtor (article 77, paragraph 3), as well as to any subordinate competing claimants (article 77, paragraph 2, subparagraph (b)).

90. It would be useful, therefore, if article 77 of the Model Law specified that the creditor was obliged to report to the grantor, the debtor and any subordinate competing claimant on the distribution of the proceeds of a disposition of an encumbered asset.

91. In chapter VIII on conflicts of law, article 83, paragraph 1, of the draft Model Law makes the creation, effectiveness against third parties and priority of a security right in a tangible asset subject to the law of the State in which the asset is located. The application of lex situs is not always justified, however: location may be of no significance for the secured transaction in question; it may also be the case that the Parties do not exclude relocating the encumbered object, without such relocation presenting the degree of certainty required for the application of article 83, paragraph 4 (res in transitu, etc.).

92. The Commission might therefore consider whether it would be appropriate to grant the parties a degree of freedom to decide in the matter. Thus, it might consider adding to the Model Law a rule stating that the Parties are at liberty to submit matters referred to in article 83, paragraph 1, to the law governing the rights and obligations arising from the security agreement (i.e., in principle, the law chosen by the Parties — article 82). That would allow the Parties to settle in their best interests the aforementioned situations. If necessary, the rule could provide that such choice of law is not effective against third parties, the latter being thus able to invoke the normally applicable law (i.e., in principle, lex situs).

(A/CN.9/887/Add.1) (Original: English)

Note by the Secretariat on a draft model law on secured transactions: compilation of comments

ADDENDUM

Contents

I. Introduction

1. At its twenty-eighth and twenty-ninth sessions (Vienna, 12-16 October 2015, and New York, 8-12 February 2016, respectively), Working Group VI (Security Interests) adopted a draft model law on secured transactions (the "draft Model Law") (A/CN.9/865 and A/CN.9/871) and, at its twenty-ninth session, decided to submit it to the Commission on the understanding that the Secretariat would make the text of the draft Model Law available to States for comment (A/CN.9/871, para. 91).

2. This note sets forth, with minimal editorial modifications, the third compilation of comments received from Governments (the first compilation is contained in document A/CN.9/886 and the second in document A/CN.9/887).

II. Comments on the draft Model Law

Republic of Korea

[Original: English]
Date: 27 May 2016

Chapter I. Scope of application and general provisions

3. Article 1(2): The bracketed text should be deleted and the matter addressed in each relevant provision. On balance, this approach would provide more clarity in particular to enacting States that are not familiar with the legal framework or terminology used in the draft Model Law.

4. Article 2(j): The bracketed text in the definition of the term "default" needs to be retained as is. It clarifies that the parties may define default in their agreement.

5. Article 2(p): The definition of the term "insolvency representative" is not necessary and needs to be deleted as this term appears only in the definition of the term "competing claimant" in article 2(e). This and other insolvency terms should be left to the insolvency law of the enacting State.

6. Article 2: The term "movable asset" needs to be defined in article 2, as it is a key concept that appears frequently in the draft Model Law.

7. Article 2(z): The bracketed text in the definition of the term "possession" needs to be retained as is. As pointed out in the note, indirect possession is also a method of creation of a security right. In addition, to avoid the tautology, the term "possession" in the definition should be replaced with another term, such as "control". Moreover, the term "actual" should be deleted or replaced with another term as it may conflict with the notion of indirect possession.

Chapter III. Effectiveness of a security right against third parties

8. Article 19: A new paragraph should be added to deal with the automatic third-party effectiveness of a security right in tangible assets commingled in a mass or product. This would reflect the policy of recommendation 44 of the Secured Transaction Guide. In addition, this paragraph would complete the set of rules that deal with commingled assets (i.e. article 11 for creation issues and article 40 for priority issues).

9. Article 22, Note to the Commission: The issue addressed in the Note may be better addressed in the Guide to Enactment rather than in article 22.

Draft Model Registry Rules

10. Article 5, Note to the Commission: An additional paragraph should be inserted in article 5 to deal with the issue raised in the Note. This paragraph would emphasize the public character of the Registry and prevent registry staff from arbitrarily refusing access.

11. Article 24(6): The term "reasonable" should be added before the words "third parties" to clarify that it does not aim to provide protection for unreasonable reliance by third parties on erroneous information. A similar approach is followed in article 24(2) and (4) which refers to a "reasonable searcher". In addition, the additional words suggested in the Note to the Commission for inclusion to article 24(6) are not necessary and the current text should be retained as is. The Guide to Enactment could explain further the meaning of paragraph 6.

Chapter V. Priority of a security right

12. Article 35(1), Note to the Commission: The issue raised in the Note may be better addressed in the Guide to Enactment than in article 35.

13. Article 49(5): This provision needs to be revised to address the rights of holders of non-intermediated securities in a more upfront manner, as in articles 44(2) and 47(3).

Chapter VII. Enforcement of a security right

14. Article 78(4)(b): The deadline included in this provision adds an extra rule that is not contained in recommendation 158 of the Secured Transaction Guide, on which this provision is based. This is a welcome addition. Requiring written consent from interested persons within a short period of time seems to be a reasonable way of articulating the requirements for the acquisition of the encumbered asset in partial satisfaction of the secured obligation.

15. Article 79(5): The bracketed text needs to be deleted. This text does not appear in recommendation 163 of the Secured Transaction Guide, and appear within square brackets in this provision, which means that it has not been possible to reach a decision in this regard. In addition, the requirement in the bracketed text may be inconsistent with existing legal doctrines in some States.

Chapter VIII. Conflict of laws

16. Article 85, Note to the Commission: This provision needs to be retained as is for it to apply also to security right in receivables secured by immovable property. While a secured creditor who wishes to obtain a security right in such receivables may not know that they are secured by immovable property, this would not seriously impair the rights of the secured creditor since receivables secured by a mortgage would normally provide a higher level of security.

17. Article 98, Note to the Commission: The current version should be retained as is. It reflects the same rules as the text in the Note but in a more reader-friendly way.

Chapter IX. Transition

18. Article 101(2): This provision is problematic in the sense that it does not give definite guidance regarding the continuation of enforcement proceedings, but rather seems to present two opposite options. If the enacting State is to choose, these options should be presented as option A and option B. Recommendation 229 of the Secured Transaction Guide, on which

this provision is based and which opts for the continuation of enforcement, should also be taken into consideration.

19. Article 104(1), Note to the Commission: This provision needs to be deleted. It seems to be inconsistent with article 103(3) and the reference to advance registration may cause unnecessary confusion.

VII. FUTURE WORK

A. Note by the Secretariat on the work programme of the Commission

(A/CN.9/878)

[Original: English]

Contents

I. Introduction

A. Background

1. At its forty-sixth session, in 2013, the Commission agreed that it should reserve time for discussion of UNCITRAL's future work as a separate topic at each Commission session (A/68/17, para. 310). This Note has been prepared to assist the Commission's consideration its overall work programme and planning of its activities at this forty-ninth session.

2. This Note considers UNCITRAL's main activities, that is legislative development and activities designed to support the effective implementation, use and understanding of UNCITRAL texts. This Note also introduces possible future work in these activities.

3. The Commission may wish to consider its work programme and activities taking into account the progress reports of its Working Groups and reports from the Secretariat noted below, and the conclusions reached at its forty-eighth session under this agenda item (A/70/17, paras. 335-365). The Commission also has before it several draft texts for consideration and possible adoption. When setting UNCITRAL's work programme for the forthcoming period, the Commission may also wish to recall its decision at the forty-sixth session that it would normally plan for the period to the next Commission session, but that some longer-term indicative planning (for a three-to-five year period) may also be appropriate (A/68/17, para. 305).

4. Documents for the current Commission session are available at www.uncitral.org/uncitral/commission/sessions/49th.html.[1] They include:

(a) Progress reports of the Commission's Working Groups:

A/CN.9/860 and A/CN.9/866 — Report of Working Group I (MSMEs) on the work of its 25th and 26th sessions (Vienna, 19-23 October 2015; New York, 4-7 April 2016)

A/CN.9/861 and A/CN.9/867 — Report of Working Group II (Arbitration and Conciliation) on the work of its 63rd and 64th sessions (Vienna, 7-11 September 2015; New York, 1-5 February 2016)

[1] Titles and symbols of the documents referred to are current as at the date of submission of this Note, but are subject to change. Further documents may also be issued, and, if so, will be available at the UNCITRAL weblink indicated.

A/CN.9/862 and A/CN.9/868 — Report of Working Group III (Online Dispute Resolution) on the work of its 32nd and 33rd sessions (Vienna, 30 November-4 December 2015; New York, 29 February-4 March 2016)

A/CN.9/863 and A/CN.9/869 — Report of Working Group IV (Electronic Commerce) on the work of its 52nd and 53rd sessions (Vienna, 9-13 November 2015; New York, 9-13 May 2016)

A/CN.9/864 and A/CN.9/870 — Report of Working Group V (Insolvency Law) on the work of its 48th and 49th sessions (Vienna, 14-18 December 2015; New York, 2-6 May 2016)

A/CN.9/865 and A/CN.9/871 — Report of Working Group VI (Security Interests) on the work of its 28th and 29h sessions (Vienna, 12-16 October 2015; New York, 8-12 February 2016)

(b) Draft texts for consideration and possible adoption by the Commission, and comments by States thereon:

A/CN.9/879 — A note by the Secretariat containing the draft revised UNCITRAL Notes on Organizing Arbitral Proceedings

A/CN.9/884 and Addenda 1-4 — A note by the Secretariat containing the draft Model Law on Secured Transactions

A/CN.9/885 and Addenda 1-4 — A note by the Secretariat containing the draft Guide to Enactment of the draft Model Law on Secured Transactions

A/CN.9/886 and A/CN.9/887 — Comments by States on the draft Model Law on Secured Transactions

A/CN.9/888 — A note by the Secretariat containing the draft Technical Notes on Online Dispute Resolution[2]

(c) Reports on other events and from the Secretariat:

A/CN.9/872 and A/CN.9/877 — Technical assistance activities undertaken since the Commission's forty-seventh session and technical assistance resources, Note by the Secretariat, including UNCITRAL publications, the UNCITRAL website, and a survey of the activities undertaken by the UNCITRAL Regional Centre for Asia and the Pacific (RCAP) since the Commission's forty-seventh session

A/CN.9/873 — Status and progress of CLOUT, Note by the Secretariat (including updates on the current activities concerning digests)

A/CN.9/874 — Bibliography of recent writings related to UNCITRAL's work

A/CN.9/875 — Coordination activities: Brief survey of the activities undertaken by the Secretariat since the Commission's forty-seventh session to ensure coordination with the work of other organizations active in the field of international trade law, Note by the Secretariat

A/CN.9/876 — Status of conventions and model laws, Note by the Secretariat

A/CN.9/880 — A note by the Secretariat on code of ethics in international arbitration

A/CN.9/881 — A note by the Secretariat on possible future work on concurrent proceedings in international arbitration

A/CN.9/882 — Technical assistance to law reform: Compilation of comments by States on a draft guidance note on strengthening United Nations support to States to implement sound commercial law reforms

[2] As at the date of submission of this note, States have not yet had the opportunity to comment on the draft Notes. Document A/CN.9/893 — Comments by States on the draft Technical Notes on Online Dispute Resolution will be issued if such comments are received.

A/CN.9/883 — Technical assistance to law reform: Draft guidance note on strengthening United Nations support to States, upon their request, to implement sound commercial law reforms

A/CN.9/889 — A note by the Secretariat on Possible future work in procurement and infrastructure development

A/CN.9/891 — Report on the Colloquium on Identity Management and Trust Services (Vienna, 21-22 April 2016)

A/CN.9/892 — A Note by the Secretariat on a joint proposal on cooperation in the area of international commercial contract law (with a focus on sales) prepared by the Secretariat and the secretariats of the Hague Conference on Private International Law and the International Institute for the Unification of Private Law ("Unidroit")

5. Background documents from the Commission's forty-eighth session are available at www.uncitral.org/uncitral/en/commission/sessions/48th.html. The Commission may wish to refer to the following documents in particular:

A/CN.9/841 — Planned and possible future work — Note by the Secretariat

A/CN.9/850 — Planned and possible future work in procurement and infrastructure development — Note by the Secretariat

A/CN.9/854 — Possible future work in the area of electronic commerce — legal issues related to identity management and trust services

A/CN.9/855 — Proposal by the Government of Algeria: possible future work in the area of international arbitration between States and investors — code of ethics for arbitrators

A/CN.9/856 — Possible future work in the area of electronic commerce — Contractual issues in the provision of cloud computing services — Proposal by Canada

A/CN.9/857 — Possible future work in the area of online dispute resolution — Proposal by Israel

A/CN.9/858 — Possible future work in the area of online dispute resolution — Proposal by Colombia, Honduras and the United States of America

A/70/17 — Report of the Commission's forty-eighth session (especially paras. 335-365)[3]

II. Summary of current activities and proposals for future work programme

A. Legislative development

1. Current legislative programme

6. Table 1 below sets out legislative development currently under way in the Commission's Working Groups, and the envisaged completion dates of the texts concerned.

[3] Background documents from the Commission's forty-fifth to forty-seventh sessions are available at www.uncitral.org/uncitral/commission/sessions/45th.html, www.uncitral.org/uncitral/commission/sessions/46th.html and www.uncitral.org/uncitral/commission/sessions/47th.html.

Table 1
Current legislative activities

Topic	*Report and document references*	*Envisaged completion date*
MSMEs (WG I)		
Preparation of legal standards on simplified business incorporation and registration	A/CN.9/860 and A/CN.9/866	Estimated 2018 or beyond
Arbitration (WG II)		
(i) Revision of the UNCITRAL Notes on Organizing Arbitral Proceedings	A/CN.9/861 and A/CN.9/867	To be completed during the session of the Commission
(ii) Enforcement of settlement agreements resulting from international conciliation/mediation		Ongoing
Online Dispute Resolution (WG III)		
Preparation of a non-binding descriptive document reflecting elements of an ODR process	A/CN.9/868 and A/CN.9/888	Completed at Working Group level; to be considered by the Commission for possible adoption
Electronic commerce (WG IV)		
(i) Electronic transferable records	A/66/17, para. 238; A/CN.9/863 and A/CN.9/869	Estimated 2017
(ii) Electronic single window facilities	A/66/17, para. 240	Ongoing
Insolvency (WG V)		
(i) Model law or legislative provisions on selected international issues, including jurisdiction, access and recognition in the cross-border insolvency of enterprise groups	A/CN.9/691 A/65/17, para. 259(a) A/CN.9/798 A/CN.9/803 A/CN.9/829	Ongoing
(ii) Obligations of directors of enterprise group's members in the period approaching insolvency	A/CN.9/691 A/65/17, para. 259(b) A/CN.9/829	Since text overlaps with work on topic (i), finalization related to progress with that topic.
(iii) Model law or model legislative provisions on recognition and enforcement of insolvency-related judgements	A/69/17, para. 155 A/CN.9/829	Ongoing
(iv) Study on the insolvency of large and complex financial institutions	A/CN.9/691 A/65/17, para. 260 A/CN.9/763	Ongoing
(v) Convention on selected international insolvency issues – informal consultations	A/69/17, para. 158	Ongoing
Security Interests (WG VI)		
(i) Preparation of a draft Model Law on Secured Transactions	A/CN.9/865 and A/CN.9/871 A/CN.9/884 and Addenda 1-4	2016
(ii) Preparation of a draft Guide to Enactment of the draft Model Law on Secured Transactions	A/CN.9/885 and Addenda 1-4	To be confirmed

7. As noted above, the following draft texts will be presented for consideration and possible adoption at this Commission session:

Draft revised UNCITRAL Notes on Organizing Arbitral Proceedings (A/CN.9/879)

Draft Technical Notes on Online Dispute Resolution (A/CN.9/888)[4]

Draft Model Law on Secured Transactions (A/CN.9/884 and Addenda 1-4)[5]

Progress of Working Groups

8. At its forty-seventh session, the Commission requested that the progress and status of the work of each Working Group, as set out in their reports, be collated and presented to the Commission so as to allow context of each Working Group's suggestions for future work and for prioritization among existing and new topics to be clearer (A/69/17, para. 253). A brief summary of the progress of each Working Group is accordingly presented below.

MSMEs (Working Group I)

9. At its twenty-fifth session (Vienna, 19 to 23 October 2015), Working Group I continued its exploration of the legal issues surrounding the simplification of incorporation and on good practices in business registration. In respect of the latter, the Working Group decided that work should proceed along the lines of a concise legislative guide on key principles in business registration, without prejudice to considering other possible legislative texts at a later stage. In respect of the former issue, the Working Group resumed its consideration of the concepts as contained in a draft model law on a simplified business entity.

10. At its twenty-sixth session (New York, 4 to 8 April 2016), Working Group I resumed its deliberations on the issues as contained in a draft model law on a simplified business entity and decided that the legislative text on that topic should be in the form of a legislative guide (consisting of recommendations and commentary) that reflected its policy discussions to date. In respect of its discussion on key principles in business registration, the Working Group considered draft recommendations and commentary for a legislative guide. In addition, the Working Group also considered the general architecture of its work on MSMEs, and agreed that its MSME work should be accompanied by an introductory document which would form a part of the final text and would provide an overarching framework for current and future work on MSMEs. The Working Group also agreed that the current two legislative texts being considered by it could be attached to and underpin that contextual framework as legal pillars, and that the number of legal pillars could then be expanded as necessary to accommodate the adoption by the Commission of any additional legislative texts on MSMEs.[6]

Arbitration (Working Group II)

11. At its sixty-fourth session, the Working Group considered the draft revised UNCITRAL Notes on Organizing Arbitral Proceedings ("the Notes"), prepared on the basis of the deliberations and decisions of the Commission at its forty-eighth session (A/CN.9/WG.II/WP.194). In accordance with the mandate that work on the topic should be completed, the Working Group will submit the revised version of the Notes for consideration by the Commission at its current session (A/CN.9/867, para. 15).

12. Further, in line with the mandate received from the Commission, the Working Group commenced, at its sixty-third session, work on the topic of enforcement of settlement agreements with the aim of identifying relevant issues and developing possible solutions, including the possible preparation of a convention, model provisions or guidance text, on the basis of notes by the Secretariat. The Working Group considered during both its sixty-third and sixty-fourth sessions the scope of a possible instrument, the questions of validity, content and form of settlement agreements, as well as the main features of an

[4] Document A/CN.9/893 will contain a compilation of any comments by States on the Technical Notes on Online Dispute Resolution.

[5] Documents A/CN.9/886 and A/CN.9/887 contain comments by States on the draft Model Law on Secured Transactions.

[6] A/CN.9/866, paras. 86 to 87.

enforcement procedure and defences to enforcement, on the basis of notes by the Secretariat (A/CN.9/WG.II/WP.190 and A/CN.9/WG.II/WP.195). It was agreed that the Secretariat should prepare for the forthcoming session of the Working Group a document outlining the issues considered so far and setting out draft provisions without prejudice to the final form of the instrument, grouping provisions into broad categories. Further, delegations were encouraged to review the experience of those jurisdictions where the enforcement of settlement agreements had been the subject of litigation, and to report back to the Working Group on the matter.

Online dispute resolution (Working Group III)

13. At its forty-eighth session (Vienna, 29 June-16 July 2015), the Commission instructed Working Group III to continue its work towards elaborating a non-binding descriptive document reflecting elements of an ODR process, on which elements the Working Group had previously reached consensus, excluding the question of the nature of the final stage of the ODR process (arbitration/non-arbitration). It was also agreed that the Working Group would be given a time limit of one year or no more than two Working Group sessions, after which the work of the Working Group would come to an end, whether or not a result had been achieved.

14. At its thirty-second and thirty-third sessions (Vienna, 30 November-4 December 2015 and New York, 29 February-4 March 2016),[7] the Working Group conducted deliberations on a draft text entitled "Technical Notes on Online Dispute Resolution", in accordance with the Commission's instructions, and has completed its consideration thereof. The final document is submitted for consideration by the Commission at its current session.

Electronic commerce (Working Group IV)

15. At its fifty-second (Vienna, 9-13 November 2014) and fifty-third sessions (New York, 9-13 May 2015) the Working Group continued its work on the preparation of a Model Law on Electronic Transferable Records.

16. At its forty-fourth session, in 2011, the Commission welcomed the ongoing cooperation between the Secretariat and other relevant organizations on legal issues relating to electronic single-window facilities, and asked the Secretariat to contribute as appropriate, with a view to discussing relevant matters at the working group level when the progress of joint work offered a sufficient level of detail. In that respect, the Secretariat has regularly contributed to the preparation by UN/ESCAP of a Framework Agreement on Facilitation of Cross-border Paperless Trade in Asia and the Pacific. The Commission will hear an oral report on the content of that Framework Agreement and its relevance for the promotion of the adoption, use and uniform interpretation of UNCITRAL texts on electronic commerce.

Insolvency (Working Group V)

17. At its forty-eighth and forty-ninth sessions, the Working Group continued its deliberations on (a) the structure and key elements of a draft legislative text to facilitate the cross-border insolvency of multinational enterprise groups; (b) the draft commentary and recommendations on the obligations of directors of enterprise group companies in the period approaching insolvency; and (c) the draft model law on the recognition and enforcement of insolvency-related judgements. The work on (b) is well-developed, but finalization depends upon progress with topic (a), as the solutions developed with respect to the conduct of enterprise group insolvencies will have an impact upon the nature of the obligations of directors of relevant group members and the steps that might be required to discharge those obligations.

Security Interests (Working Group VI)

18. At its twenty-eighth and twenty-ninth sessions (Vienna, 12-16 October 2015, and New York, 8-12 February 2016, respectively), the Working Group adopted the draft Model Law on Secured Transactions (A/CN.9/865 and A/CN.9/871), and, at its twenty-ninth session, decided to submit it to the Commission for consideration and adoption at its

[7] A/CN.9/862 and A/CN.9/868.

forty-ninth session (A/CN.9/865, para. 14, and A/CN.9/871, paras. 15 and 91). At its twenty-eighth session, the Working Group noted that, in order to complete the draft Guide to Enactment that the Commission had decided should accompany the Model Law (A/70/17, para. 216), it might need an additional one or two sessions, and, at its twenty-ninth session, decided to request the Commission for an additional one or two sessions for that purpose (A/CN.9/865, para. 104, and A/CN.9/871, para. 91, respectively).

2. Future legislative programme

19. At its forty-sixth session, the Commission underscored the importance of a strategic approach to the allocation of resources inter alia to legislative development, in the light of the increasing number of topics referred to UNCITRAL for consideration (A/68/17, paras. 294-295). The Commission has emphasized the benefit of UNCITRAL's primary working method — that is, legislative development through formal negotiations in a working group (A/69/17, para. 249).

20. The Commission has also reaffirmed that it retained the authority and responsibility for setting UNCITRAL's workplan, especially as regards the mandates of Working Groups, though the role of Working Groups in identifying possible future work and the need for flexibility to allow a Working Group to decide on the type of legislative text to be produced were also recalled (ibid.).

21. Table 2 below sets out proposals for future work by the Commission, annotated to show whether the work is mandated or possible future work. "Mandated future work" is planned legislative development, i.e. work in respect of which the Commission has provided a mandate to a Working Group. Items denoted as "possible future work" are topics proposed to the Commission, which the Commission may wish to consider. The final column of the table identifies areas in which a proposal may involve issues of another subject area relevant to UNCITRAL.

22. The Commission may wish to consider the items set out in Table 2, the more detailed descriptions in the paragraphs following that table and the other documents referred to in this section when setting its work programme for the year to the Commission session in 2017. The Commission may also recall that further proposals seeking legislative mandates for other subject-areas may be made at the current session, by States and/or international organizations.

Table 2
Summary of mandated and possible future legislative activity

Subject area	*Proposal*	*Document reference*	*Mandated/possible future work*	*Other relevant subject areas*
Arbitration (WG II)	Concurrent proceedings in the field of investment arbitration	Para. 23 below A/CN.9/881	Possible	–
	Code of ethics in international arbitration	Para. 23 below A/CN.9/880	Possible	
Electronic commerce (WG IV)	Identity management and trust services Cloud computing Mobile commerce	Para. 24 below A/70/17, para. 358; A/CN.9/891	Mandated	MSMEs (mobile payments)
Security Interests (WG VI)	Contractual Guide on Secured Transactions Uniform law text on intellectual property licensing	Para. 25 below A/70/17, para. 217	Mandated	Arbitration, MSMEs
Procurement and Infrastructure Development (not before WG)	Revisions to the UNCITRAL texts on PFIP[8]	Para. 28 below A/CN.9/889	Possible	Arbitration/ conciliation

[8] The UNCITRAL Legislative Guide on Privately-Financed Infrastructure Projects (2000) and the Model Legislative Provisions on Privately-Financed Infrastructure Projects (2003), available at www.uncitral.org/uncitral/uncitral_texts/procurement_infrastructure.html.

Arbitration (Working Group II)

23. At its forty-sixth session, in 2013, the Commission identified that the subject of concurrent proceedings was increasingly important particularly in the field of investment arbitration and might warrant further consideration.[9] At its forty-seventh session, in 2014, the Commission considered whether to mandate its Working Group II (Arbitration and Conciliation) to undertake work in the field of concurrent proceedings in investment treaty arbitration, based on a note prepared by the Secretariat, briefly outlining the issues at stake (A/CN.9/816, Addendum). At that session, it was said that future work in that area could be beneficial. Further, it was suggested that UNCITRAL ought not to limit its work to parallel proceedings arising in the context of investment arbitration, but rather, in light of the implication such work might have on other types of arbitration practice, to extend that work to commercial arbitration as well. It was also said, however, that parallel proceedings in investment arbitration, and those in commercial arbitration, raised different issues and might need to be considered separately.[10] After discussion, the Commission agreed that the Secretariat should explore the matter further, in close cooperation with experts and other organizations working actively in that area. That work should focus on treaty-based investor-State arbitration, without disregarding the issue in the context of international commercial arbitration. The Commission requested the Secretariat to report to the Commission at a future session, outlining the issues at stake and identifying work that UNCITRAL might usefully undertake in the area.[11] At its forty-eighth session, in 2015, the Commission considered a note by the Secretariat in relation to concurrent proceedings in investment arbitration (A/CN.9/848) and requested the Secretariat to report to the Commission at a future session with a detailed analysis of the topic including possible work that could be carried out.[12] Document A/CN.9/881 provides further details on the proposals in this subject area.

Electronic commerce (Working Group IV)

24. At its forty-eighth session, in 2015, the Commission instructed the Secretariat to conduct preparatory work on identity management and trust services, cloud computing and mobile commerce, including through the organization of colloquiums and expert group meetings, for future discussion at the Working Group level following the current work on electronic transferable records. The Commission also asked the Secretariat to share the result of that preparatory work with Working Group IV, with a view to seeking recommendations on the exact scope, possible methodology and priorities for the consideration of the Commission at its forty-ninth session. The Commission will have before it the report on the Colloquium on Identity Management and Trust Services held in Vienna, Austria on 21 and 22 April 2016 (A/CN.9/894).

Security Interests (Working Group VI)

25. As Table 1 indicates, it is envisaged that a draft Model Law on Secured Transactions (the "draft Model Law") was completed and submitted by Working Group VI to the Commission for consideration and adoption at the present session. As to the draft Guide to Enactment, the Commission may wish to consider whether one or two sessions should be given to the Working Group to complete it and submit it to the Commission for adoption in 2017.

26. As to the contractual guide on secured transactions in particular for small and medium-sized enterprises and enterprises in developing countries, and to a uniform law text on intellectual property licensing, topics that were placed by the Commission on its future work agenda at its forty-third session (see A/65/17, paras. 264 and 273), the Commission may wish to consider them at a future session on the basis of notes to be prepared by the Secretariat, after a colloquium or expert group meeting.

---

[9] *Official Records of the General Assembly, Sixty-eighth Session, Supplement No. 17* (A/68/17), paras. 129-133 and 311.

[10] Ibid., para. 127.

[11] Ibid., para. 130.

[12] Ibid., *Seventieth session, Supplement No. 17* (A/70/17), para. 147.

27. The Commission may wish to consider whether, in the context of any future work on MSME finance, the draft Model Law and the draft Guide to Enactment might need to be expanded to address matters related to secured finance to MSMEs. The Commission may also wish to note the discussion by the Working Group of the issue of the resolution of disputes arising from security agreements through alternative dispute resolution mechanisms (A/CN.9/871, paras. 83-86) and consider whether that matter should also be added on its future work agenda. The Commission may wish to consider whether both those matters should be retained on its future work programme and discussed at a future session on the basis of notes to be prepared by the Secretariat, after a colloquium or expert group meeting to be held within existing resources.

Procurement and infrastructure development (not currently before a Working Group)

28. At its forty-eighth session, the Commission considered possible future work on the topic of suspension and debarment in public procurement and in public-private partnerships (PPPs). As regards suspension and debarment, the Commission instructed the Secretariat to undertake certain exploratory work on the question and to report further to the Commission at its forty-ninth session. As regards PPPs, the Commission decided to keep the topic on its agenda, that the Secretariat would continue to follow the topic to advance preparations should it eventually be taken up, and that the Secretariat would report further to the Commission again at its forty-ninth session. Document A/CN.9/889 — A note by the Secretariat on possible future work in procurement and infrastructure development — reports to the Commission accordingly, concluding that work on suspension and debarment might be appropriate at a future time, and suggesting that limited work on PPPs might be appropriate in the short term.

29. The Commission may wish to assess the need for conference time for those of the above proposals it decides to take up, and to make recommendations regarding the use of conference time and regarding informal working methods accordingly.

B. Current and possible future activities to support the adoption and use of UNCITRAL texts

30. The reports available to this forty-ninth session of the Commission describing UNCITRAL's current activities in the provision of technical assistance, promoting ways to ensure a uniform interpretation and application of UNCITRAL texts; identifying the status of and work of other bodies in promoting its texts, coordination and cooperation with other relevant bodies and promoting the rule of law at the national and international levels ("support activities") are as follows:

A/CN.9/872 and A/CN.9/877 — Technical assistance to law reform and technical assistance resources, including UNCITRAL publications, the UNCITRAL website and UNCITRAL regional presence: survey of the activities undertaken by the UNCITRAL Regional Centre for Asia and the Pacific (RCAP)

A/CN.9/873 — Promotion of ways and means of ensuring a uniform interpretation and application of UNCITRAL legal texts: Status and progress of CLOUT, Note by the Secretariat (including updates on the current activities concerning digests)

A/CN.9/874 — Bibliography of recent writings related to UNCITRAL's work

A/CN.9/875 — Coordination activities: Brief survey of the activities undertaken by the Secretariat since the Commission's forty-seventh session to ensure coordination with the work of other organizations active in the field of international trade law, Note by the Secretariat

A/CN.9/876 — Status of conventions and model laws, Note by the Secretariat

A/CN.9/882 — Technical assistance to law reform: Compilation of comments by States on a draft guidance note on strengthening United Nations support to States to implement sound commercial law reforms

A/CN.9/883 — Technical assistance to law reform: Draft guidance note on strengthening United Nations support to States, upon their request, to implement sound commercial law reforms

Oral report — Role of UNCITRAL in promoting the rule of law at the national and international levels

31. The Commission has emphasized the importance of support activities and the need to encourage such activities at the global and regional levels through the Secretariat, through the expertise available in the Working Groups and Commission, through member States and through partnering arrangements with relevant international organizations, as well as promoting increased awareness of UNCITRAL's texts in these organizations and within the United Nations system (A/69/17, paras. 263-265). It has requested the Secretariat to continue with those activities to the extent that its resources permit (A/70/17, para. 365).

32. The UNCITRAL secretariat continues undertaking activities on the rule of law in those areas of work of the United Nations and other entities that are of general relevance to UNCITRAL. It also participates in initiatives across the United Nations system relevant to the implementation of the 2030 Agenda for Sustainable Development. These activities are described in a note by the Secretariat on coordination activities (A/CN.9/875). In addition, the Commission will hear an oral report by the Secretariat on the implementation of the relevant decisions taken by the Commission at its forty-eighth session. (*Official Records of the General Assembly, Seventieth Session, Supplement No. 17* (A/70/17), paras. 300-301.)

33. As regards technical assistance activities, in addition to a note by the Secretariat on the activities undertaken since the Commission's forty-eighth session and on the technical assistance resources (A/CN.9/872), the Commission will have before it a revised draft guidance note on strengthening United Nations support to States, upon their request, to implement sound commercial law reforms (A/CN.9/883), submitted to the Commission for its consideration pursuant to its decision at its forty-eighth session (*Official Records of the General Assembly, Seventieth Session, Supplement No. 17* (A/70/17), paras. 251-252). It will also have before it the compilation of comments by States received by the Secretariat on the earlier versions of the draft guidance note (A/CN.9/882).

34. In accordance with the deliberations of the Commission at its second, third, thirty-first, forty-first, forty-fourth and forty-fifth sessions where it promoted the dissemination of information and the harmonization of the application of the 1958 Convention on the Recognition and Enforcement of Foreign Arbitral Awards ("New York Convention", A/CN.9/814, para. 1) as well as the preparation of a guide on that convention, the Secretariat's work on the finalization of a guide on the New York Convention, in close cooperation with experts, is scheduled for completion in the course of 2016. Some chapters of the guide are currently contained in documents A/CN.9/786, A/CN.9/814 and its addenda, as well as on the website www.newyorkconvention1958.org.

35. At its forty-eighth session in 2015, the Commission expressed support for increasing, within available resources, the number of promotional and capacity-building activities aimed at supporting adoption and effective implementation of the United Nations Convention on Contracts for the International Sale of Goods (Vienna, 1980). In this regard, at its forty-ninth session, the Commission will have before it a joint proposal on cooperation in the area of international commercial contract law (with a focus on sales) prepared by the Secretariat and the secretariats of the Hague Conference on Private International Law and the International Institute for the Unification of Private Law ("Unidroit") (A/CN.9/892).

36. The Secretariat plans to prepare and distribute an accession toolkit in respect of the United Nations Convention on Contracts for the International Carriage of Goods Wholly or Partly by Sea (the "Rotterdam Rules"), as well as for the United Nations Convention on Transparency in Treaty-based Investor-State Arbitration ("Mauritius Convention on Transparency"). It is anticipated that this material will assist States intending to ratify the instruments; work in relation to the Rotterdam Rules has proceeded in preparing the materials and it is expected that the text will be finalized for the Commission to note at its 50th session in 2017.

III. Commemoration of the fiftieth anniversary of the establishment of UNCITRAL in 2016

37. At its forty-eighth session, the Commission considered that a third UNCITRAL Congress should be held to commemorate UNCITRAL's fiftieth anniversary, which falls in 2016. The Secretariat was requested to undertake preparatory work towards the organization of such a Congress, which the Commission anticipated would take place in 2017 (A/70/17, para. 366). The Congress is envisaged to be held during the first week of the Commission's fiftieth session in 2017, from 4-6 July.

38. One of the objectives of the Congress is to suggest possible areas for future UNCITRAL activity for the medium-term and onwards, which the Commission may wish to consider along with its existing programme of work. It is anticipated that opening the Congress to all persons and organizations with an interest in international trade and commerce will enhance the opportunity to identify relevant topics of potential interest to UNCITRAL. In terms of context, the Congress will also consider how the work of UNCITRAL and its contribution to trade law reform and innovation can support the United Nations sustainable development goals, through reforms to encourage commerce at the national and international levels. The Congress will examine, therefore, the potential of UNCITRAL as a technical forum to discuss legal obstacles to cross-border commerce and to propose legislative solutions.

39. Initial consultations indicate five thematic areas may be of possible interest for ongoing modernization and harmonization of international trade law:

(a) The development of the digital economy, including international data transfers;

(b) Global supply chains and access to inputs — credit, transport, infrastructure;

(c) Trade in services;

(d) Finance in international trade: International capital flows, access to credit, payments;

(e) Exploitation of global public goods/"natural" and emerging resources (e.g. cyberspace, outer space).

40. Within these areas, some of which fall within the existing work programme of the Commission, and any others identified, the Congress will examine the potential for relevant legislative development within UNCITRAL. It is therefore anticipated that the Congress will identify emerging subject areas in which UNCITRAL has a role to play, whether at the level of rules for the national economy or rules addressing cross-border relationships that will be implemented domestically.

41. It is recognized that the above five broad areas are only starting points and will overlap to some degree; they are also not intended to be exclusive. It is also anticipated that cross-cutting issues such as promotion of sustainable competitiveness, inclusive trade and enhanced productivity may arise in some or all of them.

42. In this context, relevant process questions will include whether there is a clear understanding of the obstacles to cross-border commerce that an UNCITRAL text might address; whether the consensual development, within UNCITRAL, of a legislative text would be feasible, and whether a legislative text in relevant subject areas would enhance the possibilities for cross-border commerce. The Congress would also seek to identify whether other organizations are engaged in work on any such areas, not only to avoid duplication, but also in the context of the Commission's mandate to coordinate the work of organizations active in the field of international trade law.

43. As not all participants at the Congress may be familiar with the work of UNCITRAL, the Congress will also include a session exploring its objectives and methods of work. The session is designed to encourage contributions on policy and practice from all States, relevant organizations, policymakers, academics and others that can assist UNCITRAL member States in developing, revising, enacting and interpreting UNCITRAL texts.

44. The Secretariat will seek the views of the academic community, policymakers, legal practitioners and others on the thematic areas noted above, including through a call for

papers. It is anticipated that the agenda for the Commission will be set in the autumn of 2016.

45. Information about the Congress will be published on the UNCITRAL website, at www.uncitral.org/uncitral/en/commission/colloquia/50th-anniversary.html. The Secretariat will provide an oral report on the proceedings at the Congress at the 50th session of the Commission, and a written report will be issued at a later date.

B. Note by the Secretariat on settlement of commercial disputes: possible future work on ethics in international arbitration

(A/CN.9/880)

[Original: English]

Contents

I. Introduction

1. At its forty-eighth session, in 2015, the Commission had before it a proposal for future work on a code of ethics for arbitrators in investment arbitration (A/CN.9/855), which suggested that work on the topic could relate to the conduct of arbitrators, their relationship with those involved in the arbitration process, and the values that they were expected to share and convey.[1]

2. After discussion, the Commission requested the Secretariat to explore the topic in a broad manner, including in the field of both commercial and treaty-based investor-State arbitration, taking into account existing laws, rules and regulations, as well as any standards established by other organizations. The Secretariat was requested to assess the feasibility of work in that area and report to the Commission at a future session.[2]

3. In accordance with that request, the purpose of this note is to explore the concept of ethics in international arbitration, to identify existing legal frameworks in the field of international commercial and treaty-based investor-State arbitration, and to raise questions with regard to the topic as an item for possible future work by the Commission.[3] This note is limited to exploring ethics of arbitrators, and does not address other participants in the arbitration process, such as counsel, experts, or third-party funders.

---

[1] *Official Records of the General Assembly, Seventieth Session, Supplement No. 17* (A/70/17), para. 148.

[2] Ibid., para. 151.

[3] Ibid., para. 150.

II. Concept of ethics and existing legal frameworks on ethics in international arbitration

A. Concept of ethics in international arbitration

1. Standard of conduct

4. The notion of legal or professional ethics refers to the norms and standards of acceptable conduct within the legal profession, involving the duties that one owes: conduct is considered unethical when it is not in conformity with moral norms and professional standards. Similarly, the concept of ethics in international arbitration usually refers to norms and standards applicable to the conduct of arbitrators as elaborated further below.

2. Impartiality and independence

5. Impartiality and independence are the core elements of integrity and ethical conduct of arbitrators. Arbitrators are expected to avoid direct and indirect conflicts of interest. Such conflicts usually fall in one of two categories: lack of impartiality or lack of independence. Usually impartiality and independence are distinguished on the basis of internal as opposed to external considerations. Impartiality means the absence of bias or predisposition towards a party. Lack of impartiality would arise, for instance, if an arbitrator appears to have pre-judged some matters. Independence usually relates to the business, financial, or personal relationship of an arbitrator with a party to the arbitration, and lack of independence usually derives from problematic relations between an arbitrator and a party or its counsel. Standards on ethics usually provide that ethical duties remain applicable throughout the duration of the proceedings (see below, section B).

3. Disclosure obligations

6. The obligation of impartiality and independence is usually accompanied by the requirement that the arbitrator shall disclose circumstances, past or present, that could give rise to justifiable doubts as to his or her impartiality or independence. It is then for the arbitrator to declare that the disclosed circumstances do not affect, in his or her opinion, his or her independence and impartiality.[4]

7. Investment treaties may contain additional elements regarding disclosure, specifying, for instance, that the arbitrators shall disclose any financial interest in the proceeding or in its outcome, and in an administrative proceeding, a domestic court proceeding or another panel or committee proceeding that involves issues that may be decided in the proceeding for which the arbitrator is under consideration.[5]

8. Specific requirements are also sometimes found in standards on ethics, such as that a prospective arbitrator shall disclose personal or business relationships with "any person known to be a potentially important witness in the arbitration".[6]

4. Other obligations possibly relevant to ethics of arbitrators

9. Requirements of fairness and diligence, as well as provisions on qualifications and confidentiality can be found in national legislation and arbitration rules, which, in substance, usually provide that the arbitrator shall: (i) perform his or her duties with fairness and diligence, thoroughly and expeditiously throughout the course of the proceeding;[7] and

---

[4] See, for instance, the model statement of independence contained in the Annex to the UNCITRAL Arbitration Rules (as revised in 2010) which gives an indication as to the elements that would be required to be disclosed: "Attached is a statement made pursuant to article 11 of the UNCITRAL Arbitration Rules of (a) my past and present professional, business and other relationships with the parties and (b) any other relevant circumstances."

[5] See, for instance, Canada — European Union Comprehensive Economic and Trade Agreement (CETA).

[6] See for instance the Code of Ethics for an Arbitrator, Singapore International Arbitration Centre 2.2 (a).

[7] See, for instance, article 17 (1) of the UNCITRAL Arbitration Rules (as revised in 2010), as well as their Annex (which provides that any party may consider requesting from the arbitrator a statement confirming that "on the basis of the information presently available, that arbitrator can devote the time necessary to conduct the arbitration diligently, efficiently and in accordance with the time limits in the Rules.").

(ii) keep non-public information confidential, and not use any information to gain a personal advantage, or to affect the interest of others.

5. Challenge procedure — Non-compliance with ethical standards

10. The usual consequence of a finding of non-compliance with ethical standards after the appointment of an arbitrator is usually the resignation and replacement of the arbitrator.[8] Almost all arbitration laws and arbitration rules contain provisions on procedures for challenging arbitrators who do not comply with ethical standards. They also include safeguards aimed at avoiding that the challenge procedures be used abusively, as dilatory tactics, by parties.

B. Existing legal frameworks on ethics in international arbitration

11. With the expansion of international arbitration, a variety of texts on ethics have been developed by States, international organizations, arbitral institutions as well as local bar associations. Some have been formulated as a stand-alone text, while others have been included in national legislation, in arbitration rules and more recently, in treaties relating to investor-State dispute settlement (see below, para. 19). Some have a binding effect, whereas others are meant to provide general guidance. State courts' review of challenges to arbitrators as well as challenges to awards under national laws and the Convention on the Recognition and Enforcement of Foreign Arbitral Awards (New York, 1958) ("New York Convention") often constitute a last resort review of the arbitrators' conduct.

1. National legislation

12. The UNCITRAL Model Law on International Commercial Arbitration ("Model Law on Arbitration") has been enacted in a large number of jurisdictions and its articles 12 and 13 on grounds for challenge and challenge procedure shed light on the ethics expected of an arbitrator.[9] It does so by imposing on each arbitrator a continuing duty to disclose to the parties circumstances that are likely to give rise to justifiable doubts as to his or her impartiality or independence.[10] The Model Law on Arbitration also makes it clear that arbitrators cannot be challenged for reasons other than those mentioned in article 12, paragraph 2.[11]

2. Guidance texts developed by international organizations and arbitral institutions

13. In line with the provisions found in national legislation and arbitration rules, professional standards addressing the question of conflict of interest generally refer to the principle that arbitrators have a continuing obligation to remain impartial and independent.[12]

---

[8] See, for instance, Rule 6 (2), ICSID Arbitration Rules which provides that: "Before or at the first session of the Tribunal, each arbitrator shall sign a declaration. […] Any arbitrator failing to sign a declaration by the end of the first session of the Tribunal shall be deemed to have resigned." Similarly, under the UNCITRAL Arbitration Rules, a challenge procedure is provided for in the event arbitrators would lack impartiality and independence.

[9] Jurisdictions which have enacted legislation based on the Model Law on Arbitration can be found on the Internet at www.uncitral.org/uncitral/en/uncitral_texts/arbitration/1985Model_arbitration_status.html.

[10] Article 12(2) of the Model Law on Arbitration provides that: "An arbitrator may be challenged only if circumstances exist that give rise to justifiable doubts as to his impartiality or independence, or if he does not possess qualifications agreed to by the parties. A party may challenge an arbitrator appointed by him, or in whose appointment he has participated, only for reasons of which he becomes aware after the appointment has been made".

[11] The *travaux préparatoires* show that proposals were made to delete the word "only" in article 12(2) of the Model Law on Arbitration but it was considered preferable to retain that word to clearly emphasize that possible additional grounds for challenge provided for in domestic law should not apply in the context of international commercial arbitrations (see *Official Records of the General Assembly, Fortieth Session, Supplement No. 17* (A/40/17), paras. 116-119).

[12] For example, "Code of Ethics" (AAA), "Code of Professional and Ethical Conduct" (London Chartered Institute of Arbitrators), "Code of conduct" (EU), "Guidelines on Conflict of Interests" (IBA), "Ethical Arbitration Charter" (Federation of Arbitration Centre). Code of Ethics for an Arbitrator, Singapore International Arbitration Centre.

For example, the IBA Guidelines on Conflict of Interest contain illustrations of acceptable and prohibited relationships that bifurcate into waivable and non-waivable relationships. These lists are non-exhaustive and detail specific situations that, depending on the facts of a given case, give rise to justifiable doubts as to the arbitrator's impartiality and independence. It should be noted that during the review of the IBA Guidelines, "a consensus emerged in favour of a general affirmation that the Guidelines apply to both commercial and investment arbitration, and to both legal and non-legal professionals serving as arbitrator".[13]

3. Arbitration rules

14. Most arbitration rules have statements of principle rather than detailed rules on impartiality and independence of the arbitrators. They contains specific rules on the procedure for challenging an arbitrator. The UNCITRAL Arbitration Rules (as revised in 2010, and 2013), for instance, which apply to both investor-State and commercial disputes, deal with disclosure by, and challenge of, arbitrators in articles 11 to 13. In accordance with the Rules, unless the other party agrees or the arbitrator withdraws voluntarily, the decision on the challenge will be made by the appropriate appointing authority. Decisions on challenge are usually subject to review by State courts under the applicable arbitration law or within the framework of the New York Convention.

15. Arbitration rules of institutions contain similar provisions, sometimes with slight variations. For instance, some arbitration rules make reference to "justifiable doubts" as to the arbitrator's impartiality and independence while others direct the arbitrator to consider whether the questionable circumstances would cause doubts "in the eyes of the parties", or refer to "an alleged lack of impartiality or independence".

16. In the specific situation of investor-State dispute settlement, Article 14 of the ICSID Convention requires arbitrators and conciliators to be "persons of high moral character and recognized competence (…) who may be relied upon to exercise independent judgement". This requirement is supplemented by filing a declaration of independence at the beginning of the proceedings, required under Rule 6(2) of the ICSID Arbitration Rules. Article 57 of the ICSID Convention provides a mechanism by which a party may seek disqualification of an arbitrator by showing "a manifest lack of the qualities required by paragraph (1) of Article 14." Article 39 of the ICSID Convention generally provides that an arbitrator may not have the same nationality of either party.

4. Case law

17. As mentioned above, the Model Law on Arbitration, including its articles 12 and 13, has been enacted in a number of jurisdictions. The Model Law, however, does not define terms such as "justifiable doubt", "impartiality", or "independence", and thus State courts have used their respective standards to interpret those notions. The Digest of Case Law on the Model Law on Arbitration provides an analysis of the relevant court decisions.[14] Courts have highlighted the mandatory nature of impartiality and independence and have analysed the arbitrator's duty to disclose. Some decisions have underlined that there should be objective circumstances that give rise to justifiable doubts as to the impartiality or independence of the arbitrator for a challenge to be successful.[15] For example, the notion of "justifiable doubt" has sometimes been interpreted to require a showing of objective facts that a reasonable, well-informed person would regard as constituting a bias on the part of the arbitrator. Some jurisdictions require a real manifestation of bias before an arbitrator can be removed.

18. Decisions by courts with regard to the New York Convention may also be relevant. Case law shows that there have been attempts by parties to resist enforcement of foreign arbitral awards on the basis that the arbitrators lacked independence and impartiality. While these defences to enforcement were usually presented on the basis of article V (2) (b) of the New York Convention, they have been rarely successful. Courts have underlined that the

[14] The Digest of Case Law on the UNCITRAL Model Law on International Commercial Arbitration Available on the Internet at: www.uncitral.org/uncitral/en/case_law/digests/mal2012.html.

[15] See Digest of Case Law on the UNCITRAL Model Law on International Commercial Arbitration, Article 12.

matter raised was not covered by public policy, and that the party should have raised the matter during the arbitral proceedings.[16]

5. Code of ethics in investment treaties

19. Some recently concluded investment treaties contain a code of conduct for arbitrators acting in investor-State dispute settlement arising under a treaty.[17] Those codes usually address the standards of conduct for arbitrators (and other persons), their duties in the conduct of the arbitration, the disclosure obligations and the obligations of confidentiality.

III. Questions in relation to possible future work

20. With the development of international arbitration and the variety of sources and texts on ethics, no guidance has been provided on which approach arbitrators should adopt, for instance whether arbitrators dealing with international arbitration should disregard their home jurisdictions' ethical rules in favour of international texts. As noted by the Commission at its forty-eighth session, arbitral tribunals could be bound by more than one standard on ethics depending on the nationality of the arbitrators, affiliation with bar associations as well as on the place of arbitration.[18] Therefore, concurrent norms may apply, without any clear indication on which one shall prevail.

21. The expansion of international arbitration has also resulted in the diversification of parties involved in the arbitration process. As such, their perspectives on ethics or conduct of arbitrators may differ significantly and what one expects may sometimes be at odds with the expectations of others from another jurisdiction or with the general practice in international arbitration. The increased complexity of recent disputes involving multiple parties and complicated transactions lead to new and more subtle questions. While there seems to be a general agreement about the fundamental ethical standards of international arbitration, in practice, the assessment of compliance with such standards may be carried out quite differently depending on the texts deemed applicable, and depending also on whether assessment is made by the arbitrators themselves, the parties, the arbitral institutions or national courts. Increased regulation of the arbitral procedure and increased transparency of the process have also an impact on parties' expectations in relation to ethical conduct of arbitrators.

22. In addition, the standards described above in section B contain statement of principles about ethical duties, and usually lack explanatory contents about their practical implications.

23. In that light, the Commission may wish to consider the following questions:

(a) Whether there is a need for a harmonized and authoritative source on ethics in international arbitration;

(b) Whether the purpose of undertaking work in the field of ethics in international arbitration would be to reduce any identified uncertainty and inconsistency in the existing ethical standards, and their application; if so, whether a new instrument should cover any or all of (i) persons concerned (in addition to the arbitrators), (ii) content of ethical standards (limited to impartiality and independence, or expanded to encompass other obligations), (iii) methods and extent of disclosure, (iv) challenge procedures, (v) effect of breach of ethical standards, (vi) enforcement mechanisms (how should ethical rules be enforced and by whom (arbitrators, parties, institutions, others))?

(c) Whether existing instruments sufficiently define the scope of disclosure and the disqualification process: what level of detail should be provided in relation to disclosure and the procedure for challenging an arbitrator? Could impartiality and independence as well as other obligations be waivable, and if so, under which conditions?

---

[17] See, for instance the EU — Singapore Free Trade Agreement, Annex 15-B, Code of Conduct for Arbitrators and Mediators.

[18] Ibid., para. 150.

(d) Whether the consequences of non-compliance with ethical standards are addressed in sufficient detail in existing instruments.

24. It appears from the examples in section II above that ethical standards in investor-State arbitration and in commercial arbitration largely address the same obligations with some variation. The Commission may wish to consider whether any work on the topic should encompass both commercial and treaty-based investor-State arbitration, or whether distinction should be made to take account the obvious differences between investor-State and commercial arbitration.

C. Note by the Secretariat on concurrent proceedings in international arbitration

(A/CN.9/881)

[Original: English]

Contents

I. Introduction

1. At its forty-sixth session, in 2013, the Commission identified that the subject of concurrent proceedings was increasingly important particularly in the field of investment arbitration and might warrant further consideration.[1] At its forty-seventh session, in 2014, the Commission considered whether to mandate its Working Group II (Arbitration and Conciliation) to undertake work in the field of concurrent proceedings in investment arbitration, based on a note by the Secretariat, briefly outlining the issues at stake (A/CN.9/816, Addendum). The Commission agreed that the Secretariat should explore the matter further, in close cooperation with experts and other organizations working actively in that area and that that work should focus on treaty-based investor-State arbitration, without disregarding the issue in the context of international commercial arbitration.[2] The Commission requested the Secretariat to report to the Commission outlining the issues at stake and identifying work that UNCITRAL might usefully undertake in the area.[3]

2. At its forty-eighth session, in 2015, the Commission considered a note by the Secretariat in relation to concurrent proceedings in investment arbitration (A/CN.9/848). After discussion, the Commission requested the Secretariat to report to the Commission at a future session with a detailed analysis of the topic including possible work that could be carried out.[4]

3. Accordingly, the purpose of this note is to identify and analyse the issues at stake, the current approaches that allow for the appropriate management and avoidance of concurrent

proceedings, and to suggest possible future work in that area. The note addresses concurrent proceedings in international arbitration in a general fashion, while highlighting aspects specific to commercial and to investment arbitration.[5]

II. Causes and impact of concurrent proceedings

A. Circumstances that give rise to concurrent proceedings

4. Concurrent proceedings in international arbitration may result from different factors such as (i) the involvement of multiple parties located in different jurisdictions in an investment or a contractual arrangement; (ii) the existence of multiple legal bases or causes for claims; and (iii) the availability of multiple forums and the lack of coordination among those forums.

1. Multiplicity of parties

5. In an increasingly globalized economic world, investors are developing more complex structures to carry out their investments cross-border and may seek to maximize their protection when making such investments. It is not unusual that an investment is made through a chain of entities.

6. In commercial arbitration where none of the parties is a State or State-owned entity, circumstances that could lead to concurrent proceedings would include multiple parties to the same contract taking different approaches in choosing the dispute resolution mechanism; the same parties concluding multiple contracts; and multiple parties being involved in multiple contracts (for instance, in a construction project, or other transactions where various aspects of a project are subcontracted during various phases).

7. In investment arbitration, concurrent proceedings may result from mainly two categories of situation. The first category is where different entities within the same corporate structure have a right of action against a State or state-owned entity in relation to the same investment, with regard to the same State measure and for the benefit of substantially the same interests, as long as all entities qualify as investors under an applicable investment treaty, or have a right of action under a contract or under domestic investment law. Each entity may have the possibility to commence arbitration proceedings under a different treaty, in addition to bringing claims under the dispute resolution mechanism provided for in an investment contract (see below, paras. 14 and 15). In short, one might

[5] This note is based mainly on the following documentation: *Consolidation of Proceedings in Investment Arbitration: How can multiple proceedings arising from the same or related situations be handled efficiently*, Final Report of the Geneva Colloquium held on 22 April 2006, Gabrielle Kaufmann-Kohler, Laurence Boisson de Chazournes, Victor Bonnin, Makane Moïse Mbengue; *Contract claims et clauses juridictionelles des traités relatifs à la protection des investissements*, Pierre Mayer, Lalive lecture, 22 May 2008; *Parallel Proceedings in Investor-State Treaty Arbitration: Responses for Treaty-Drafters, Arbitrators and Parties*, Robin F. Reich, eds., 2014); *Multiple Proceedings in International Arbitration: Blessing or Plague?*, Gabrielle Kaufmann-Kohler, Asian Arbitration Lecture, 24 November 2015, available on the Internet at http://bit.ly/Kaufmann-Kohler-Multiple; *Le concours de procedures arbitrales dans le droit des investissements*, Emmanuel Gaillard, Mélanges en l'honneur du Professeur Pierre Mayer; *Recent Developments on the Doctrine of Res Judicata in International Arbitration from a Swiss Perspective: A Call for a Harmonized Solution*, Nathalie Voser, Julie Raneda, ASA Bulletin, Vo. 33, No. 4, 2015. In addition, the Secretariat organized in January 2016 an expert group meeting hosted by the French Ministry of Foreign Affairs and International Development.

have various parties, claiming in various forums and under different sources of law, yet seeking substantially the same relief for the same measure.

8. The second category is where a measure by a State has an impact on a number of investors which are not related. States have developed policies favouring foreign investments, thereby increasing the occurrence of dealings with a wide range of investors. When a State takes a measure which potentially affects a number of investors, it may be faced with multiple claims from those unrelated investors in relation to that measure, in addition to claims from majority and minority shareholders of different nationalities of those unrelated investors with a right of action under different investment treaties. In addition, States or state-owned entities when concluding agreements with investors sometimes use standard contracts with similar provisions. A change of a State's policy impacting those provisions may affect a whole range of contracts concluded with different investors. While some issues raised in those proceedings will be identical, it is foreseeable that decisions rendered by separate tribunals may yield different outcomes.

2. Varied legal bases for claims

9. The legal bases for bringing claims may vary. In commercial arbitration, a party may start litigation in a State court and may commence arbitration on the basis of an arbitration agreement. Articles II (3) of the Convention on the Recognition and Enforcement of Foreign Arbitral Awards (New York, 1958) and article 8 (1) of the Model Law on International Commercial Arbitration are meant to prevent such circumstances, as where parties have concluded a valid arbitration agreement, the parties would be referred to arbitration.

10. In investment arbitration, the situation is potentially more complex, as described below.

(a) Treaty-based claims

11. An increasing number of bilateral and multilateral investment treaties have been concluded among States with the purpose of promoting economic activities and protecting investments and investors. And most, if not all, contain provisions on resolving disputes relating to investments. Yet, a large majority of those investment treaties do not take into consideration the potential for multiple claims resulting from a wide definition of protected investors and investments. At the time of their conclusion, negotiators of such investment treaties did not foresee the potential for multiple claims, whether by related or unrelated investors, and such treaties lack the mechanisms to appropriately deal with such claims.

12. In addition, arbitral case law has consistently recognized the right of direct and indirect shareholders of a local company to commence arbitration on the basis of an investment treaty seeking compensation for the damages incurred by the local company. By contrast, national legislation and case law generally do not permit shareholders to claim for damages incurred by the company solely on the basis that it is a shareholder.[6]

---

[6] Shareholders' reflective loss is incurred as a result of injury to "their" company, typically a loss in value of the shares; it is generally contrasted with direct injury to shareholders' rights, such as interference with shareholders' voting rights; *Investment Treaties as Corporate Law: Shareholder Claims and Issues of Consistency*, OECD Working Papers on International Investment, 2013/03, David Gaukrodger; *Investment Treaties and Shareholder Claims for Reflective Loss: Insights from Advanced Systems of Corporate Law*, OECD Working Papers on International Investment, 2014/02, David Gaukrodger; *Investment Treaties and Shareholder Claims: Analysis of Treaty Practice*, OECD Working Papers on International Investment, 2014/03, David Gaukrodger; see also *Reflective Loss* (presentation to Freedom of Investment Roundtable, 16 October 2013), Eilis Ferran, available on the Internet at www.slideshare.net/OECD-DAF/ferran-oecdfoipresentation; Summary of discussion at Freedom of Investment Roundtable 18 (March 2013), pp. 4-9, available on the Internet at www.oecd.org/daf/inv/investment-policy/18thFOIRoundtableSummary.pdf; Summary of discussion at Freedom of Investment Roundtable 19 (October 2013), pp. 12-19, available on the Internet at www.oecd.org/daf/inv/investment-policy/19thFOIroundtableSummary.pdf. Earlier OECD work for the OECD Investment Committee has also considered multiple and parallel proceedings and consolidation of claims. See *Improving the System of Investor-State Dispute Settlement*, OECD Working Papers on International Investment, 2006/01, Yannaca-Small, K; OECD, *International Investment Perspectives (2006)* (chapter entitled *Consolidation of claims: A promising avenue for investment arbitration*).

(b) Contractual claims

13. It is not unusual for certain types of investments to require the conclusion of related contracts (e.g. a concession contract) between the investor or an affiliate and the State or a state-owned entity, which form the basis of contractual claims and which include a separate clause for resolving disputes arising out of such contracts.

(c) Combination of treaty and contract claims

14. An investor may wish to pursue its claim based on both an investment treaty and a contract. Certain dispute resolution clauses in investment treaties limit the offer for arbitration to claims based on a breach of the substantive clauses of the treaty, thus excluding claims based on a breach of the investment contract (which must thus be pursued under a separate arbitration or in State courts). Therefore, claims of the investor, which are based on the same facts and relate to the same harm for loss due to a measure taken by the host State, may have to be submitted to different tribunals, which may result in contradictory outcomes and double recovery.

15. As an illustration, a foreign investor may set up a local company in the host State and the local company may conclude a contract with the State. In the event that the State terminates the contract, proceedings against the host State may be commenced by the local company for unlawful contract termination under the contract in accordance with the dispute resolution clause therein and by the foreign shareholder of the local company claiming a violation of certain provisions of the investment treaty concluded between the host State and the State of the foreign shareholder. This would result in concurrent proceedings, (i) a contract-based arbitration or proceeding in State court between the local company and the host State, and (ii) a treaty-based arbitration between the foreign shareholder and the host State about the same measure (the termination of the contract). In addition, minority shareholders of the local company may file their own treaty-based claims, for instance, if they are of a nationality different from the majority shareholder, and may benefit from the protection of a separate investment treaty. It could also be possible for the shareholders of the shareholders who hold interests further up the corporate chain to file one or several treaty-based claims.[7]

16. Considering the chronology of the decisions in multiple proceedings, if the claim of the local company is decided first and damages awarded, the value of the claimant company is restored and any shareholders' claim for reflective loss (loss in the value of their shares as a consequence of the damage incurred by the company) is no longer relevant. In the reverse situation where shareholders' claims are decided and compensated first, consequences for the company and its creditors are less clear.

3. Multiplicity of forums and lack of coordination mechanism

17. There exist various forums for resolving disputes arising from commercial or investment relationship. The forums available for investors to bring claims against a State or a state-owned entity include (i) forums for contract disputes, which may be the State courts, domestic arbitration, and international arbitration; and (ii) investment treaty-based forums, generally arbitration under the auspices of various arbitral institutions or ad hoc. Parties to commercial transactions that do not involve any State or state-owned entity would have the ability to bring a claim to the forums described in (i) above. There is currently no common template to coordinate multiple proceedings arising among different forums.

B. Illustration and policy considerations

18. Taken together, there may be various causes that lead to multiplicity of proceedings.

19. The most prominent illustration in investment arbitration may be the often cited cases of Lauder v. Czech Republic on the basis of the US-Czech Republic bilateral investment

[7] See *Multiple Proceedings in International Arbitration: Blessing or Plague?*, Gabrielle Kaufmann-Kohler, Asian Arbitration Lecture, 24 November 2015, available on the Internet at http://bit.ly/Kaufmann-Kohler-Multiple.

treaty (BIT) and CME Republic BV v. Czech Republic on the basis of the Netherlands-Czech BIT. These two proceedings involved: the same measure and harm (loss caused by the revocation of a license); in part, the same claimant from an economic perspective (Mr. Lauder who claimed in his own name in one proceeding and as a shareholder of CME in the other), but different legal persons (CME and Mr. Lauder), having different nationalities (Dutch and American); and two separate investment treaties. In the end, the two arbitrations resulted in contrary outcomes (a (quasi) dismissal of the claims in one case and an award of damages in the other).

20. For ease of illustration, multiple proceedings in investment arbitration may be grouped into three categories:

(i) Where substantially related claimants initiate the same claim against the same respondent (i.e., the host State or a state-owned entity) with regard to the same host State measure before different forums;

(ii) Where unrelated claimants initiate separate proceedings against the same respondent with regard to the same measure (under an investment treaty and/or a contract); and

(iii) Where the respondent initiates a separate proceeding against the claimant in a different forum.

21. As indicated in document A/CN.9/848, paragraph 13, the multiplicity of proceedings may result in a State having to defend several claims in relation to the same measure, with possibly the same economic damage at stake, leading to a duplication of efforts, additional costs, procedural unfairness and potentially contradictory outcomes (for instance, in the situations referred to above in paragraph 20 (i) and (ii)). Similarly, investors may be faced with multiple counterclaims by States. In relation to the situation described in paragraph 20 (iii), the main problem — apart from costs and potentially conflicting outcomes — is the uncertainty as to which forum will have the final say in the event there is no coordination between the forums. Concurrent claims give rise to a risk of multiple recovery of the same damage and may create dissatisfaction among users of investment treaty arbitration, thus undermining predictability more generally.

22. Similarly, in commercial arbitration, a framework to limit the occurrence of multiple proceedings could result in more expedited and cost-efficient outcomes in addition to avoiding conflicting decisions on the same issues of law and fact.

III. Existing principles and mechanisms

23. A number of principles and mechanisms exist to deal with the situations of concurrent proceedings described in section II above and to a certain extent, they are useful. However, they lack the mechanism or framework to coordinate application in appropriate circumstances.

A. Lis pendens and res judicata

24. As indicated in document A/CN.9/848, paragraph 23, lis pendens and res judicata are principles that may be referenced as part of the lex causae of a dispute.

25. The doctrine of lis pendens, familiar to many legal systems, allows a party to request a court to stay or dismiss an action because the same action is already pending in front of a different forum. For lis pendens to apply, triple identity is required between the various actions: identity of the parties, facts, and the cause of action. That triple identity requirement may make it difficult to apply the doctrine to concurrent proceedings described in section II above. For instance, in the context of investment treaty arbitration, determining the “same parties” for the purposes of applying such a principle could present a challenge in the context of multiple shareholders bringing claims for the same harm caused to the company due to the same measure of a host State.

26. The Brussels Regulation 1215/2012 (“Brussels Regulation”) may shed some light on the application of lis pendens to concurrent proceedings as it provides less strict conditions. Article 29(1) of the Brussels Regulation provides an illustration of a lis pendens mechanism

in the context of civil litigation proceedings (as mentioned in document A/CN.9/816, Addendum, paras. 23 and 24).[8] Article 30 of the Brussels Regulation also sets out a discretionary rule for "related actions", allowing for concentration of related or connected disputes in one forum.[9] Article 30.3 provides that "actions are deemed to be related where they are so connected that it is expedient to hear and determine them together to avoid the risk of irreconcilable judgements resulting from separate proceedings."

27. Pursuant to the doctrine of res judicata, a dispute cannot be adjudicated twice (a party is precluded from pursuing the same claim twice) and thus, the doctrine applies in the context of successive proceedings. In that regard, the Commission may wish to consider whether the topic of concurrent proceedings should be expanded to also include successive proceedings (see below, para. 42). The res judicata effect in international arbitration gives rise to complex issues, in particular as different legal systems may come into play to govern the application of res judicata (the law of the place of the previous arbitration; the law of the place of the subsequent arbitration; the law governing the merits of the dispute), and res judicata has different scopes in different national legal systems.

28. It may be noted that the 2006 final reports of the International Law Association (ILA) on lis pendens and on res judicata in international commercial arbitration provide that arbitral awards should have conclusive and preclusive effects in further arbitral proceedings to promote efficiency and finality of international commercial arbitrations and that such effects need not necessarily be governed by national law but may be governed by transnational rules to be developed (recommendations 1 and 2).

B. Consolidation

29. Consolidation involves the aggregation of two or more claims or pending arbitrations into one proceeding. Subject to a reasonable assessment of fairness and efficiency, consolidation can be an effective tool to reduce or avoid concurrent proceedings. Due process considerations are an important aspect of the consolidation framework. Consolidation requires a basis, whether in law or in a contract (including institutional rules) and it is usually based on parties' consent. It is necessary to differentiate between commercial and treaty-based investor-State arbitration, as the basis for consolidation may be different.

1. Commercial arbitration

30. Some jurisdictions have enacted legislation allowing State courts to consolidate different arbitral proceedings, where the cases have common issues of law and fact. Compulsory consolidation by State courts in itself may raise some challenges for arbitration. Some of these challenges relate to issues of consent, appointment of arbitrators, issues of procedure, and enforcement of the arbitration award.

31. Consolidation provisions are also increasingly found in institutional arbitration rules which permit consolidation at an early stage of the proceedings where the arbitral proceedings have started under the same set of rules. Consolidation usually requires the consent of the parties, whether in advance through the conclusion of an umbrella arbitration agreement or after the dispute has arisen. It is also usually possible where all relevant contracts contain arbitration agreements that would subject the dispute to the same set of arbitration rules, administered by the same arbitral institution. A key challenge in a multiparty context is the principle that each party to the arbitral proceedings should be given an equal opportunity to be heard and to participate in the constitution of the arbitral tribunal.

---

[8] Article 29(1) provides that: "[w]here proceedings involving the same cause of action and between the same parties are brought in the courts of different Member States, any court other than the court first seized shall of its own motion stay its proceedings until such time as the jurisdiction of the court first seized is established."

[9] Article 30(1) and (2) provide that: "1. Where related actions are pending in the courts of different Member States, any court other than the court first seized may stay its proceedings.
2. Where these actions are pending at first instance, any court other than the court first seized may also, on application of one of the parties, decline jurisdiction if the court first seized has jurisdiction over the actions in question and its law permits the consolidation thereof."

2. Treaty-based investor-State arbitration

32. Provisions on consolidation are also increasingly found in investment treaties. A review of investment treaties concluded between October 2014 and September 2015 identified 21 new treaties, out of which 18 are available in full texts. Out of these 18, 14 have investor-state dispute settlement provisions. Out of these 14, 5 have consolidation provisions.

33. Consolidation is made possible in investment treaties for instance where there is a "question of law or fact in common" (for example, NAFTA Article 1126.2),[10] or where common questions "arise out of the same events or circumstances" (for example, article 10.25 CAFTA-DR). Article 1117 NAFTA specifically calls for consolidation of actions by different shareholders for claims made on behalf of a locally incorporated entity.[11] The guidance provided to arbitral tribunals in certain investment treaties is that the tribunal must rule in the interest of fair and efficient resolution of the claims when considering whether to consolidate.

34. As mentioned above, consolidation may also be carried out under applicable institutional arbitration rules. However, it is usually not possible to consolidate proceedings which have started under different arbitration rules. In that respect, it may be interesting to note that a recent treaty allows for consolidation across dispute settlement mechanisms (see article 9.29 of the EU-Singapore Free Trade Agreement).[12]

C. Coordination mechanisms in investment treaties

35. Certain investment treaties provide for additional coordination or concentration mechanisms. For instance, the requirement that the claimant waives or terminates any other proceedings — also referred as "no U-turn" approach — is found in many recent investment treaties.[13]

36. Some examples of such treaty provisions are the so-called "fork-in-the-road" provisions, which require the claimant to make an irrevocable choice of forum between proceedings in the host State courts and investment arbitration, and waiver clauses, which require the investor to waive all other available forums before applying to investment arbitration.

---

[10] Paragraph 2 provides that: "Where a Tribunal established under this Article is satisfied that claims have been submitted to arbitration under Article 1120 that have a question of law or fact in common, the Tribunal may, in the interests of fair and efficient resolution of the claims, and after hearing the disputing parties, by order: (a) assume jurisdiction over, and hear and determine together, all or part of the claims; or (b) assume jurisdiction over, and hear and determine one or more of the claims, the determination of which it believes would assist in the resolution of the others."

[11] Paragraph 3 provides that "Where an investor makes a claim under this Article and the investor or a non-controlling investor in the enterprise makes a claim under Article 1116 arising out of the same events (...), and two or more of the claims are submitted to arbitration under Article 1120, the claims should be heard together by a Tribunal established under Article 1126, unless the Tribunal finds that the interests of a disputing party would be prejudiced thereby."

[12] Article 9.29 (5) provides that: "The consolidating tribunal shall conduct its proceedings in the following manner: (a) unless all disputing parties otherwise agree, where all the claims for which a consolidation order is sought have been submitted to arbitration under the same dispute settlement mechanism, the consolidating tribunal shall proceed under the same dispute settlement mechanism; (b) where the claims for which a consolidation order is sought have not been submitted to arbitration under the same dispute settlement mechanism: (i) the disputing parties may agree on the applicable dispute settlement mechanism available under Article 9.16 (Submission of Claim to Arbitration) which shall apply to the consolidation proceedings; or (ii) if the disputing parties cannot agree on the same dispute settlement mechanism within thirty days from the request made pursuant to paragraph 3, the UNCITRAL arbitration rules shall apply to the consolidation proceedings."

[13] For instance, the Singapore-European Union and the Singapore-United States of America Free Trade Agreements.

D. Other mechanisms

37. Other mechanisms that may have the effect of limiting concurrent proceedings include class actions, joinders, as well as anti-suit and anti-arbitration injunctions.

38. Provisions allowing joinder of third parties are contained in certain institutional arbitration rules. Arbitral tribunals usually do not have the possibility to join third parties to arbitration unless expressly provided for in the applicable arbitration rules or otherwise agreed by the parties.

39. Anti-suit and anti-arbitration injunctions are mechanisms that can be used to avoid concurrent proceedings. However due to their unilateral nature, anti-suit or anti-arbitration injunctions may not necessarily constitute helpful coordination tools.

E. Conclusion

40. The available mechanisms considered above provide a means for addressing the consequences of concurrent proceedings in some cases, but also have limitations. As noted, some mechanisms require the parties' consent for their application. Others are provided in arbitration rules and with respect to investment arbitration, provided in investment treaties. Failing parties' agreement or in the absence of a particular doctrine or procedure, arbitrators may lack any basis to take the initiative when faced with concurrent proceeding situations. They may not be aware of the options available to them and of the limits of available tools or may be prevented from taking appropriate action to avoid negative consequences when the parties had not agreed on a particular approach. Other factors that may compete with concerns that arise from concurrent proceedings relate to, inter alia, the need to respect party autonomy given the consensual nature of arbitration, and the treatment of protected and confidential information submitted in the arbitration.

IV. Possible future work

41. The Commission may wish to consider whether the purpose of undertaking work on concurrent proceedings as they occur in investment and in commercial arbitration would be to create appropriate mechanisms for limiting some of the negative consequences identified with concurrent proceedings, such as undue risk of contradictory and irreconcilable decisions or awards, and to promote procedural and cost efficiency, while respecting parties' rights in resolving disputes.

42. As multiple proceedings in investment and commercial arbitration may be concurrent or successive in time, the Commission may wish to consider whether to also include in its consideration of the topic successive proceedings (see above, para. 27). The framework of international arbitration is multilayered. Possible work in relation to concurrent proceedings could thus be considered for development at different levels.

A. Providing guidance to arbitral tribunals

43. The mandate of an arbitral tribunal to resolve disputes is usually based on the parties' agreement. An arbitral tribunal should solve the dispute efficiently and within the limits of its jurisdiction. The procedural legal framework (investment treaty, arbitration rules, and arbitration law) rarely includes guidance to arbitral tribunals on how to deal with concurrent proceedings. In most cases, where there is no agreement between the parties to take into account the potential for concurrent proceedings, an arbitral tribunal may believe that it has to render a final decision on the merits without being able to coordinate with other tribunals.

44. The UNCITRAL Arbitration Rules, in article 17 (1), contain the principle that "the arbitral tribunal may conduct the arbitration in such manner as it considers appropriate, provided that the parties are treated with equality and that at an appropriate stage of the proceedings each party is given a reasonable opportunity of presenting its case." Most institutional arbitration rules contain a similar provision. The Commission may wish to consider whether work could be undertaken with the aim of clarifying, or expanding upon,

the discretionary powers that arbitral tribunals may exercise when faced with concurrent proceedings. The purpose would be to provide arbitral tribunals with possible tools that could be used for managing such situations.

45. The work could cover in a flexible manner initiatives that an arbitral tribunal might, depending upon the circumstances, consider taking, such as:

- Seeking information from another tribunal, or ordering parties to inform the arbitral tribunal of other related proceedings,
- Coordinating parallel arbitrations (for instance, holding joint hearings or presenting a common set of evidence),
- Staying proceedings, or declining jurisdiction, for instance, based on a finding that claims are inadmissible (e.g. because a parallel action is already pending elsewhere),
- Assessing if there was an abuse of rights, and
- Ordering consolidation, when admissible.

The work would also highlight the limits of such initiatives, given the role of party consent to arbitration and its relationship to a tribunal's authority to decide matters.

46. A question for consideration is whether guidance to arbitral tribunals should identify specific measures that an arbitral tribunal could consider in determined situations. While the discretion of the arbitral tribunal to adopt a specific measure would be preserved, guidance could be provided as to the description of possible tools, with an illustration of the circumstances in which they can be used. However, as concurrent proceedings can take a wide range of forms, it may be difficult for any guidance text to provide an exhaustive list of all scenarios.

47. Guidance to arbitral tribunals could be provided in the form of a soft law instrument including a list of options for arbitrators and the methodology to deal with concurrent proceedings situations, leaving it to the tribunal to assess which option would be relevant in the case at hand. Any guidance could also clarify why the arbitral tribunal would take certain measures if the situation of concurrent proceedings is not perceived as detrimental by the parties and the basis of a tribunal's authority to take such measures in the absence of the parties' agreement for it to do so.

48. The work could also take the form of a protocol to be used by parties as part of their agreement to arbitrate.

B. Encouraging States to adopt specific mechanisms in their investment treaties

49. As indicated in section III C. above, States have begun to include provisions in investment treaties to limit certain claims. Some investment treaties contain provisions aimed at limiting the occurrence of concurrent proceedings, or providing solutions, such as consolidation. Such treaties restrict certain substantive and procedural rights of the claimants through provisions on the definitions of investors and investments, as well as the computing of damages.

50. The Commission may wish to consider whether the attention of States should be directed to those mechanisms in investment treaties, and whether work should be undertaken to supplement the work of United Nations Conference on Trade and Development (UNCTAD) in this area.[14]

[14] For instance, the UNCTAD Investor-State Dispute Settlement Sequel (2014) contains sections on consolidation of claims, "Fork-in-the Road" and "No-U-turn" clauses (with some treaty examples). Chapter IV (Reforming the International Investment Regime) of the UNCTAD World Investment Report (2015) discusses some related issues, including reform options on, for instance, the definition of investment and investor, preventing treaty "abuse" and relief for the same violation in multiple forums.

C. Coordination among arbitral institutions

51. As concurrent proceedings often commence under different arbitration rules, coordination among arbitral institutions might be considered as a useful feature for addressing concurrent proceedings.

D. Creating an international framework

52. The Commission may wish to consider whether preventing or avoiding concurrent proceedings might be an issue best dealt with at the multilateral level.

53. In that respect, the Commission may wish to consider whether the Secretariat should further explore the feasibility of a multilateral instrument with a purpose to improve the framework for the settlement of international disputes in the interest of fairness and justice.[15] The doctrine of res judicata, the priority to decide on the validity of the arbitration agreement, and the treatment of related actions could be subject matters of such a multilateral instrument.

D. Note by the Secretariat on possible future work in procurement and infrastructure development

(A/CN.9/889)

[Original: English]

Contents

I. Introduction

1. This Note has been prepared to enable the Commission's consideration of possible future work in procurement and infrastructure development at this forty-ninth session. It addresses two possible areas of legislative development: suspension and debarment in public procurement, and public-private partnerships.

II. Proposed future work in Procurement and Infrastructure development

A. Suspension and debarment in public procurement

2. At its forty-eighth session, the Commission agreed on the importance of suspension and debarment in supporting the effective implementation of a public procurement law and in fighting corruption, and considered whether UNCITRAL might issue a legislative text on the topic to support the UNCITRAL Model Law on Public Procurement.[1]

3. The Commission noted that the UNCITRAL Model Law on Public Procurement[2] permits the exclusion of suppliers pursuant to administrative suspension or debarment proceedings, but that the Model Law did not provide any procedural rules for the process. It also noted that there remain considerable variations among suspension and debarment systems in practice, as regards the objectives, procedures and outcomes.[3]

4. The Commission instructed the Secretariat to report to the Commission at its 2016 session on the results of exploratory work to assess the feasibility of developing a harmonized UNCITRAL text on the subject, the extent to which such a text would provide an appropriate solution to the issues concerned, and the extent of the demand for such a text.[4]

5. In terms of the feasibility of developing a harmonized UNCITRAL text on suspension and debarment, there appears to be limited reduction in the divergences in approach previously reported to the Commission.[5] Some emerging examples of differences include whether bribery leads to a mandatory debarment or whether a supplier that has been found to have engaged in bribery can take steps to avoid debarment; whether a bribery conviction in one State would be sufficient to debar a supplier in another State; in the extent of detail

[4] Ibid.

[5] Ibid.

in applicable regulation on procedure, and in the standard and burden of proof required for a sanction to be applied.

6. On the other hand, there is evidence of convergence in some areas. As regards processes, there is increasing consensus on definitions of sanctionable conduct and on compliance processes designed in part to assist in identifying such conduct. As regards the consequences of sanctionable conduct, there is some development towards enabling cross-debarment through a flexible approach (such as that recognition of sanctionable conduct in one jurisdiction need not trigger automatic debarment in another, but might lead to further investigation).

7. Against these indications and the background of consensus on the critical importance of transparency in the process, the need for due process when sanctions are being considered, and for cooperation between international bodies and national authorities, it appears that an UNCITRAL text might provide an appropriate solution to many issues in need of resolution for effective suspension and debarment systems. Many States are also seeking advice and assistance on the establishment of a national system, and indicate that they would welcome an UNCITRAL text reflecting international best practice for that purpose.

8. It may therefore be concluded that convergence on elements of an UNCITRAL text on suspension and debarment is emerging, and that there is a level of demand for such a text. However, it is also clear that further convergence on the key parameters for a suspension and debarment system would enhance the feasibility and success of an UNCITRAL text in this area. Events discussing suspension and debarment systems at the international level also indicate that dialogue facilitating such convergence is ongoing.[6]

9. The Commission may therefore consider that legislative development in UNCITRAL in this area is not presently feasible, but the developments towards convergence as noted above indicate that the item should be retained on its agenda.

B. Public-private partnerships (PPPs)

10. At its forty-eighth session, and in light of the importance of the topic for development and in the context of the Sustainable Development Goals, the Commission decided that the possibility of developing a legislative text on PPPs would be kept on the Commission's agenda. The Secretariat was instructed to follow the topic to advance preparations should the Commission decide to undertake work in this area and report further to the Commission in 2016.[7]

11. Accordingly, the Secretariat has continued to observe the activities of other bodies active in PPPs, primarily the World Bank and regional development banks, the United Nations Economic Commission for Europe (UNECE) and the Organisation for Economic Cooperation and Development, and has continued to encourage the use of the existing UNCITRAL texts on Privately-Financed Infrastructure Projects (PFIPs) in PPPs reform. In these activities, the Secretariat has continued to gather feedback on areas in which the PFIPs texts are considered to function well and, where appropriate, areas in which they may be in need of updating or amendment.[8]

12. These activities indicate that developments in three areas of PPPs should be brought to the attention of the Commission.

Procurement in PPPs

13. First, and as reported to an UNCITRAL Colloquium on PPPs held in March 2014,[9] an area of ongoing focus is the procurement of the concession or other project mechanism and the selection of the project partner. At the 2014 Colloquium, it was noted that there are overlapping public procurement and concessions laws in many jurisdictions. As consistency between PPPs laws and other relevant laws has been recognized as critical for the success of PPP projects, this fragmentation raises concerns.[10]

14. It was also recognized that traditional tendering procedures are generally unsuitable for both PPPs as well as for traditional (i.e. publicly-funded) procurement of complex infrastructure. When developing the UNCITRAL Model Law on Public Procurement,[11] Working Group I adapted and updated the selection procedure in the UNCITRAL PFIPs texts to provide a procurement method called Request for Proposals with Dialogue, which is available for the procurement of complex items and services (such as infrastructure projects).[12] The 2014 Colloquium concluded that procurement in the PPPs context would require interaction between the public authority and potential bidders, and that ensuring that any negotiations were subject to appropriate safeguards would be critical, and that these matters were provided for in the Model Law on Public Procurement.[13]

15. The activities in the organizations referred to above include addressing the procurement-related aspects of PPPs,[14] and demonstrate that many States are addressing PPPs as part of work to modernize their procurement systems. The incorporation of an appropriate selection procedure is vital, and so it is suggested that an UNCITRAL text providing a selection procedure that is harmonized with Request for Proposals with Dialogue as provided for in the Model Law on Public Procurement could contribute considerably to improving practice in the conclusion of PPPs. The 2014 Colloquium considered that the limited tailoring appropriate to the PPPs context (so as to accommodate changes in the contract terms during the project period, for example) would not pose consistency issues between publicly-funded procurement of complex infrastructure and procurement in PPPs.[15]

Terms of the project agreement

16. The second area is the terms of the concession or project agreement. This issue was also considered at the 2014 Colloquium,[16] which concluded that the extent to which contents of the agreement are prescribed by law varied among States, and that legislative provision could enhance consistency and reduce the scope and length of negotiations, balanced with the need for flexibility in negotiations to suit the project at hand. However, the Colloquium concluded that this was one area in which significant additional work to identify areas for harmonization would be required.[17]

---

[9] For the proceedings of this Colloquium, which considered the Commission's discussions of an earlier colloquium in 2013, the results of an exercise to map current PPPs legislation, some preliminary findings on the main topics that might be included in any future legislative text on PPPs and the form that such a text might take, see www.uncitral.org/uncitral/en/commission/colloquia/public-private-partnerships-2014.html.

[10] See A/CN.9/819, paras. 77-92, and A/CN.9/821, para. 69.

[11] Footnote 2, supra.

[12] See articles 30 and 49 of the UNCITRAL Model Law on Public Procurement, ibid. The 2014 Colloquium noted reports that the Request for Proposals with Dialogue combined many features of the selection method in the PFIPs Instruments, two-stage tendering (itself a well-tried and tested method used by the MDBs) and the EU's Competitive Dialogue procedure and was itself therefore a harmonized method. See, further, A/CN.9/821, para. 90.

[13] See A/CN.9/820, paras. 15-20, and A/CN.9/821, paras. 90-95.

[15] See A/CN.9/820, paras. 15-20, and A/CN.9/821, paras. 90-95.

[16] See A/CN.9/820, paras. 35-40, and A/CN.9/821, paras. 102-107.

[17] See A/CN.9/821, para. 107.

17. Since the issue of the PFIPs texts, some States have issued model clauses for PPPs contracts,[18] but they are considered to vary widely. In 2015, the World Bank issued a "Report on Recommended PPP Contractual Provisions",[19] noting that the variety of PPPs transactions means that a harmonized contract at the international level is not a realistic goal, but that certain legal issues are encountered in the overwhelming majority of PPPs contracts in practice, so that there is a commonly-encountered solution that can be identified. The areas concerned focus on changes and events that may arise in the course of the project which, by its nature involves long-term contracts — such as changes in law, force majeure, refinancing, termination, among others. These issues are also addressed in Section IV.A of the PFIPs Legislative Guide (which sets out guidance for "General provisions of the project agreement"). The work of the other organizations noted above[20] also suggests that recent experience would allow the guidance in Section IV.A to be updated by reference to current practice, and that a harmonized solution is now feasible.

Post-award disputes

18. The third area is settlement of disputes in PPPs, which is addressed in Section VI of the PFIPs Legislative Guide. At the 2014 Colloquium,[21] it was suggested among other things that the guidance should be updated to reflect the increasing use of dispute avoidance mechanisms, and of relatively informal settlement methods such as dispute boards,[22] as well as to provide guidance on disputes between shareholders, lending parties, operational consortium partners, regulators and operators and contractors and subcontractors (that is, in addition to guidance on disputes between the public authority and the project partner).[23]

19. Issuing harmonized standards for the dispute resolution process can both contribute to the stability of the contractual relationship and to the conclusion of the project agreement. In addition, as some disputes in PPPs may involve regulators or government bodies and the exercise of discretion in their settlement, an appropriate legislative or regulatory framework to ensure appropriate procedures for this type of dispute should also reduce the risks in the projects concerned. At the 2014 Colloquium, it was considered that agreeing legislative solutions on the outstanding issues would again be feasible.[24] The publications on contractual provisions referred to in the previous paragraph also indicate that dispute prevention and resolution provisions are commonly addressed in modern PPP contracts, so that there is evidence of increasing consensus on approaches that a legislative text should include, both to prevent and settle disputes.

[23] See A/CN.9/821, para. 112.

[24] See A/CN.9/821, para. 113.

III. Conclusions

20. The Commission in 2015, while recognising the importance of PPPs, expressed concern that the scope of the possible legislative development then under consideration might exceed UNCITRAL's resources.[25]

21. As regards suspension and debarment in public procurement, the Commission may wish to confirm that the Secretariat should continue to monitor developments, and should report to the Commission on a periodic basis.

22. In light of the developments regarding PPPs set out above, the Commission may wish to consider whether a modular approach to legislative development in PPPs might enable the Commission to fulfil the indicated need for updating some aspects of the PFIPs texts within the constraints of UNCITRAL's limited resources. If so, it may wish to consider whether UNCITRAL might undertake sequential legislative development on the above aspects of PPPs.

E. Note by the Secretariat on settlement of commercial disputes: presentation of a research paper on the Mauritius Convention on Transparency in Treaty-based Investor-State Arbitration as a possible model for further reforms of investor-State dispute settlement

(A/CN.9/890)

[Original: English]

Contents

I. Introduction

1. At its forty-eighth session, in 2015, the Commission noted with appreciation the ongoing cooperation and coordination efforts of the Secretariat with organizations active in the field of international arbitration and conciliation. The Commission further noted that UNCITRAL standards in that field were characterized by their flexibility and generic application to different types of arbitration, including both purely commercial arbitration and investor-State arbitration. In that light, the Commission agreed that the Secretariat should continue to coordinate with organizations in relation to the various types of arbitration to which UNCITRAL standards were applicable, and to closely monitor developments, further exploring areas for cooperation and coordination.[1]

2. In relation to investor-State arbitration, the Commission noted that the current circumstances posed a number of challenges and proposals for reform had been formulated by a number of organizations. In that context, the Commission was further informed that the Secretariat was conducting a study on whether the United Nations Convention on Transparency in Treaty-based Investor-State Arbitration ("Mauritius Convention on Transparency" or "Mauritius Convention") could provide a useful model for possible reforms in the field of investor-State arbitration, in conjunction with interested organizations, including the Center for International Dispute Settlement (CIDS), a joint research center of the Graduate Institute of International and Development Studies and the University of Geneva Law School. In that light, the Secretariat was requested to report to the Commission at a future session with an update on that matter.[2]

[1] *Official Records of the General Assembly, Seventieth Session, Supplement No. 17* (A/70/17), para. 268.

[2] Ibid.

3. Pursuant to that request, the purpose of this note is to provide the Commission with an update on the study conducted within the framework of a research project of the CIDS (referred to as the "research paper") and to provide a short overview of its outcome.[3]

4. The purpose of the research paper is to analyze whether the Mauritius Convention on Transparency could be used as a model for implementing broader reform initiatives of the investor-State dispute settlement ("ISDS") framework, in the event that it would be decided, at a later stage, to carry out reforms at a multilateral level. As an illustration of a possible procedural reform to which the approach adopted under the Mauritius Convention could be useful, and in order to provide a basis for the analysis, the research paper examines the scope, possibilities, and challenges for an instrument similar to the Mauritius Convention, alone or in combination with other instruments, to create (i) a permanent dispute settlement body intended to replace or complement ISDS provisions in existing and future investment treaties; or (ii) an appeal mechanism for awards rendered in ISDS proceedings under existing or future investment treaties.

5. This note, however, is limited to reporting on the outcome of the legal study on the question whether the Mauritius Convention on Transparency could be used as a model for broader procedural reform initiatives in the field of ISDS should there be a decision to undertake reforms on a multilateral basis. This note contains, for information purposes only, a brief overview of legal questions raised by possible procedural reforms of ISDS, and does not provide a detailed analysis of such reforms as this would fall outside the scope of the mandate provided by the Commission. This note does not contain recommendations for possible future work on any such reforms, for which a separate decision would need to be made by the Commission.

II. Brief overview of the research paper: the Mauritius Convention on Transparency in Treaty-based Investor-State Arbitration as a possible model for further reforms of investor-State dispute settlement

A. Background: the features of the Mauritius Convention and current proposals for procedural reform

1. The "Mauritius Convention approach"

6. In 2013, UNCITRAL adopted the Rules on Transparency in Treaty-based Investor-State Arbitration (the "Transparency Rules") together with a new article 1(4) of the UNCITRAL Arbitration Rules (as revised in 2010).[4] The Transparency Rules, which came into effect on 1 April 2014, comprise a set of procedural rules that provides for transparency, and for accessibility to the public of treaty-based investor-State arbitration. The Transparency Rules apply in relation to disputes arising out of investment treaties concluded on or after 1 April 2014, when investor-State arbitration is initiated under the UNCITRAL Arbitration Rules, unless the Parties to the investment treaty have agreed otherwise.[5] The Transparency Rules apply in relation to disputes arising out of investment treaties concluded prior to 1 April 2014, when the Parties to the relevant investment treaty (i.e. States or regional economic integration organizations),[6] or the parties to the dispute (i.e. an investor and a State or a regional economic integration organization),[7] agree to their application. The Transparency Rules are also available for use in investor-State arbitrations initiated under rules other than the UNCITRAL Arbitration Rules, and in ad hoc proceedings.[8]

---

[3] The research paper is available on the UNCITRAL website, in English only, at: www.uncitral.org/uncitral/commission/sessions/49th.html.

[4] *Official Records of the General Assembly, Sixty-eighth Session, Supplement No. 17* (A/68/17), chapter III and annexes I and II.

[5] Transparency Rules, Article 1(1).

[6] Transparency Rules, Article 1(2)(b). For multilateral investment treaties, it is sufficient that the State of the claimant and the respondent State have reached an agreement to this avail.

[7] Transparency Rules, Article 1(2)(a).

[8] Transparency Rules, Article 1(9).

7. After the adoption of the Transparency Rules, UNCITRAL prepared a convention designed to facilitate the application of the Transparency Rules to the roughly 3,000 investment treaties concluded before the entry into force of the Transparency Rules, thereby providing States with an efficient mechanism to apply the Transparency Rules to their existing investment treaties, should they wish to do so.[9] Indeed, the Mauritius Convention on Transparency is an instrument by which Parties to investment treaties concluded before 1 April 2014 express their consent to apply the Transparency Rules to arbitrations arising out of those treaties.

8. The Mauritius Convention allows the Transparency Rules to be applied to all existing bilateral, regional, and multilateral investment treaties, and in all available arbitral fora, if both the respondent State and the investor's home State are contracting parties to the Mauritius Convention or, alternatively, if the investor (as claimant) accepts the unilateral offer of the respondent State to apply the Transparency Rules. In essence, the "Mauritius Convention approach" can be described as introducing the substantive transparency standards embodied in the Transparency Rules into the fragmented treaty-by-treaty regime by way of a single multilateral instrument. It introduces a flexible regime as it foresees a limited number of reservations that Contracting Parties may formulate.

9. The Mauritius Convention is an instrument that incorporates into the existing myriad of investment treaties the notion of transparency, a procedural aspect generally not addressed under the vast majority of investment treaties. It supplements existing investment treaties with a uniform regime on transparency embodied in the Transparency Rules. At its forty-sixth session, the Commission reaffirmed the view expressed by a great number of delegations at the fifty-ninth session of Working Group II, namely that a convention on transparency, upon coming into force, would constitute a successive treaty creating new obligations pursuant to article 30 of the Vienna Convention on the Law of Treaties (1969) (the "Vienna Convention").[10]

10. A question for consideration is whether a convention implementing new reforms to existing investment treaties, modelled on the Mauritius Convention, would constitute a successive treaty creating new obligations pursuant to article 30 of the Vienna Convention, or whether it would constitute an amendment or modification of investment treaties (pursuant to provisions of existing investment treaties and Chapter IV of the Vienna Convention). If a convention implementing new reforms were to be considered as an amendment or a modification to underlying investment treaties, there would be some additional elements to be considered when drafting the convention (for instance, on procedures for amending/modifying treaties), and States parties to the Convention would need to consider possible domestic procedures to be followed to implement such reforms.

2. Challenges faced by investor-State dispute settlement mechanisms

11. The international investment law regime is composed of more than 3,000 investment treaties, including broader bilateral or multilateral free trade agreements containing a chapter on investment protection. Although investment treaties are not identical to one another, they generally follow similar patterns with regard to their structure and are centred on a number of core principles. The broad similarities between investment treaties make it possible to speak of a "regime" of international investment protection, which is essentially based on two elements.

12. First, investment treaties provide substantive guarantees to investors in the form of international obligations placed upon Contracting States, whereby States undertake to respect certain standards of investment protection vis-à-vis foreign investors and their investments (such as fair and equitable treatment, protection from expropriation, and non-discrimination).

---

[9] *Official Records of the General Assembly, Sixty-eighth session, Supplement No. 17* (A/68/17), para. 127.

[10] Ibid., *Sixty-ninth session, Supplement No. 17* (A/69/17), para. 25. When the Working Group examined that question at its fifty-ninth session, it was said that logically one could not refer to an amendment or modification to investment treaties in the context of a subsequent treaty creating new obligations between Contracting Parties, but rather, that the transparency convention would amount to a successive agreement between Contracting Parties (see A/CN.9/794, paras. 17 to 22).

13. Second, most investment treaties allow foreign investors to enforce those substantive protections through a procedural dispute resolution mechanism. While ISDS provisions show variations across the different investment treaties, they normally provide for the following features: (i) the investor may bring a claim directly against the host State; (ii) the dispute is heard by an arbitral tribunal constituted ad hoc[11] to hear that particular dispute; (iii) both disputing parties, including the investor (as claimant) and the respondent State, play an important role in the selection of the arbitral tribunal.

14. The research paper briefly outlines the diverging opinions on the merits and demerits of the foreign investment protection regime and in particular ISDS, as reported in the following paragraphs.

15. Supporters of the system normally highlight that the foreign investment protection regime has generally proven beneficial and has positively contributed to the promotion of the rule of law at the international level, the functioning of the global market, the increase of foreign investment flows, as well as the economic growth and human development in capital-exporting and capital-importing States. The development of ISDS was part of an initiative to create an institutionalized and formalized procedure on the international plane, within a broader initiative which saw investment treaties (including their provisions on dispute settlement) as instruments to foster confidence in the stability of the investment environment of developing countries.

16. Proponents also stress the novelty of the ISDS system, which allows a private subject (whether an individual or a company) to bring an international claim directly against a sovereign State, in a significant break from traditional mechanisms which were essentially founded on the institution of diplomatic protection (or diplomatic espousal). Importantly, ISDS also led to a "de-politicization" of investment disputes and drastically reduced the risk that they escalated into inter-State conflicts.

17. Numerous empirical analyses have been conducted with a view to assessing the effective impact of investment treaties on foreign direct investments.[12] Those studies have come to diverging conclusions. According to a report of the United Nations Conference on Trade and Development (UNCTAD), the majority of those studies concluded that there was indeed a positive correlation between investment treaties and foreign direct investment.[13] Others were more nuanced, and showed that this impact was dependent on the content of the investment treaties.[14] Finally, some researchers found no or insignificant investment increases due to investment treaties.[15]

18. The regime of investment treaties has also attracted strong and growing critical attention. Criticisms may be grouped into two main categories. A first series of criticism focuses on the decision makers in the ISDS system, i.e. the arbitrators (and, to a lesser extent, the arbitral institutions which may administer investor-State arbitrations). The second relates to the arbitral process, its outcome and its structural features. Concerns have been voiced regarding lack of consistency of awards issued by arbitral tribunals, length and cost of the proceedings, lack of appropriate control mechanisms, and lack of transparency.

19. Criticism of ISDS in essence reflects concerns about the democratic accountability and legitimacy of this dispute resolution process. While States themselves have established the mechanism and, therefore, their consent ensures its legitimacy under international law, this may not always be perceived as such by States and their constituencies.

---

[11] "Ad hoc" here means that the dispute is not brought before a permanent body, but before a tribunal (whether or not under the auspices of an arbitral institution) constituted to hear that particular dispute (with no mandate beyond that dispute). It is not used to refer to non-institutional arbitration.

[12] UNCTAD (2014), *The Impact of International Investment Agreements on Foreign Direct Investment: An Overview of Empirical Studies 1998-2014*, IIA Issues Note, Working draft.

[13] Ibid.

[14] See, for instance, Axel Berger, Matthias Busse, Peter Nunnenkamp and Martin Roy (2010), *Do Trade and Investment Agreements Lead to More FDI? Accounting for Key Provisions Inside the Black Box*, World Trade Organization, Economic Research and Statistics Division, Working Paper, also published under the same title as Kiel Institute for the World Economy, Working Paper No. 1647.

[15] See, for instance, Mary Hallward-Driemeier (2003), *Do Bilateral Investment Treaties Attract FDI? Only a bit…and they could bite*, World Bank, Policy Research Paper WPS 3121.

20. The research paper highlights that the deficiency in terms of accountability and legitimacy calls for remediation, and that the remedies should avoid sacrificing the gains of ISDS, i.e., (i) neutrality or, in other words, distance of the decision makers from politics — the depoliticization for which investment arbitration was praised — and from business interests at the same time; (ii) finality and enforceability of the award; and (iii) the manageability and workability of the process.

3. Existing proposals for procedural reform

21. The last decade has evidenced strong debate on, and repeated calls for, the creation of permanent bodies within the investment treaty regime, both in the form of an appeal mechanism[16] and in the more radical replacement of ISDS with a permanent dispute settlement body.[17] Indeed, the creation of a permanent dispute settlement body or an appeal mechanism tailored for ISDS has been contemplated on several occasions during the last decade. The most significant of these proposals include attempts by the International Centre for Settlement of Investment Disputes (ICSID)[18] and the Organization for Economic Co-operation and Development (OECD),[19] as well as the programmatic language contained in a number of investment treaties,[20] and the pioneering innovations towards the creation of permanent investment bodies in recent investment treaties.[21]

22. It is against this backdrop of debates and of incipient reform attempts that it can be asked whether the Mauritius Convention on Transparency can serve as a model for international investment law reform in connection with the introduction of a permanent dispute settlement body and an appeal mechanism.

B. Application of the "Mauritius Convention approach" to possible procedural reforms

1. Assessment of feasibility

23. The research paper provides an insight on the advantages of adopting the Mauritius Convention approach for the implementation of reforms to existing investment treaties in respect of the setting up of a permanent dispute settlement body or an appellate mechanism as briefly outlined below.

24. First, this approach would relieve States of the burden of pursuing potentially complex and long amendment procedures set forth in their numerous existing investment treaties. Indeed, a convention implementing new procedural reforms, modelled on the Mauritius Convention (referred to below as an opt-in convention), would render the innovations directly applicable to existing investment treaties for those States that wish to embrace such innovations.

25. Second, the Mauritius Convention approach could allow for the establishment of a multilateral permanent dispute settlement system. Indeed, it would lead to the creation of one single investment body potentially competent to resolve investment disputes concerning as many States as would opt into it, and/or to the creation of one single appeal mechanism potentially competent to serve as appellate body for ISDS awards across all investment

treaties. This approach could help increase the consistency in international investment law, thereby avoiding a piecemeal and treaty-by-treaty approach.

26. Third, a reform based on the Mauritius Convention approach would generally focus on a certain discrete part of the investment treaties' critical issues, i.e. the dispute settlement part, and avoid engaging in the controversies surrounding the substantive standards. By so doing it is more likely to be successful, as an attempt to unify substantive provisions may well lead to years of discussions with no guarantee of consensus.

27. In concrete terms, the outcome of a reform based on the Mauritius Convention approach would entail that the myriad of underlying investment treaties will continue to deal with the substantive obligations, and the newly established permanent dispute settlement body and/or an appeal mechanism would have the mandate to apply these different underlying investment treaties. Admittedly, no absolute uniformity would be achieved, because the applicable law — the substantive treaty standards — would continue to be anchored in different investment treaties. However, consistency would be reached in the application of the same investment treaty and of different investment treaties with identical or nearly identical wordings. And even when applying differently worded investment treaties, it would be expected that the permanent dispute settlement body's and/or appeal mechanism's pursuit of consistency will be greater as a natural consequence of the in-built elements of tradition, continuity and collegiality, which are inherent in permanent bodies as opposed to ad hoc bodies.

28. Finally, an opt-in convention modelled on the Mauritius Convention approach could allow a reform project to begin as a plurilateral one, with the possibility for other States to join at a later stage, whenever they consider it appropriate. This, too, would strengthen the chances for success of such reform.

29. Following the Mauritius Convention approach, if such a reform project were to be implemented, the first task could consist in determining the "substantive" features of the permanent dispute settlement body and appeal mechanism. This would include devising their mandate, nature, structure, and their organization. This step would reflect what was done in respect of transparency, where the content of the new transparency provisions was first agreed in the Transparency Rules. The second, logically subsequent step, would consist in the drafting of an opt-in convention (as was done with the Mauritius Convention) which would accomplish the extension of the new rules on the permanent dispute settlement body and appeal mechanism to the existing investment treaties.

30. In so doing, it should be determined whether the opt-in convention would constitute a successive treaty creating new obligations pursuant to article 30 of the Vienna Convention, or whether it would constitute an amendment or modification pursuant to provisions of existing investment treaties and Chapter IV of the Vienna Convention to investment treaties.

31. The response to that question would depend on how the reform project would concretely be implemented, and how that project would articulate with existing ISDS mechanisms provided for in investment treaties. If a reform project were to be conceived as a modification of the existing ISDS mechanisms (as opposed to an amendment to ISDS provisions in investment treaties), that would not necessarily amount to an amendment to the investment treaties. In the same manner, if a reform project would aim at providing an additional ISDS mechanism, without replacing the existing ones, an opt-in convention introducing the additional ISDS system may be considered as a successive treaty creating new obligations pursuant to article 30 of the Vienna Convention.

32. A procedural reform of ISDS could also lead to an amendment/modification of the ISDS provisions in the existing investment treaties, in particular where a reform would aim at replacing existing ISDS mechanisms by a new one. In that case, attention should be given in the opt-in convention to provisions on amendment/modification of investment treaties. If necessary, further information could be collected from States on domestic procedures that such reforms would trigger at the national level.

33. In the context of the questions of treaty law that the implementation of the opt-in convention would raise, the research paper also discusses possible "compatibility clauses" to address the relationship between the opt-in convention and existing investment treaties. In the same vein, another matter that would deserve consideration is the relationship between

an opt-in convention referring to an appeal mechanism for arbitral awards and the ICSID Convention, which excludes any appeal or other remedy, except for those provided for in the Convention itself (Article 53).

34. Moreover, if such a reform were implemented, mechanisms could be envisaged to allow for a level of flexibility of the States' commitments. Within agreed boundaries, States Parties to the opt-in convention could thus modulate the degree of their involvement in the reforms by making appropriate reservations or opt-in/opt-out declarations. These possibilities would accommodate specific concerns or objectives of States, aiming for instance at excluding particular investment treaties from the scope of the reform or at adopting the new dispute resolution bodies in addition (rather than to the exclusion of) existing ISDS options.

35. In this respect, it should be noted that the Mauritius Convention also allows for a limited number of reservations and that a similar approach could be adopted with regard to the opt-in convention.

2. Outline of questions

36. As the question whether the Mauritius Convention approach could be used as a possible model for further reforms cannot be considered in a vacuum, the research paper analyses in detail the example of using the Mauritius Convention approach for designing a permanent dispute settlement body or an appeal mechanism.

37. It would be beyond the mandate given by the Commission to the Secretariat at this stage to provide the full analysis undertaken under the research paper. For the sake of providing an illustration only, the following sections are limited to outlining the main legal issues and questions in relation to setting up a permanent dispute settlement body, and an appeal mechanism. Those questions are thoroughly analysed in the research paper.

Options

38. The creation of a permanent body composed of tenured (or semi-tenured) members, tasked with resolving investment disputes between foreign investors and host States is one possibility (see below, paras. 39 to 45). Such a permanent body could either be based on a two-tier adjudicative system and thus be provided with a built-in appeal or without one. The presence of a built-in appeal in that scenario must not be confused with the setting up of an appeal mechanism mentioned below in paras. 46 to 49, which addresses the creation of an appeal mechanism for awards rendered in the traditional ISDS setting.

Legal issues and questions in relation to setting up a permanent dispute settlement body

39. The following questions in relation to the setting up of a permanent dispute resolution body would require consideration.

40. The *first question* relates to the determination of the legal nature of the permanent dispute resolution body: would it be in the nature of "arbitration" or of an "international court". The answer to this issue will impact on the determination of the law governing the proceedings before the permanent dispute resolution body, and is further of paramount significance for purposes of recognition and enforcement of decisions/awards rendered by the permanent dispute resolution body. In relation to that question, the research paper analyses the main features that a permanent dispute resolution body would need in order to be characterized as either arbitration or an international court. In short, for a permanent dispute resolution body to qualify as arbitration rather than a court-like dispute settlement method, the most important element is that recourse to that body is based on an agreement between the State and the investor. That consent encompasses the acceptance of the tribunal members' selection method provided in the constitutive instrument.

41. A further issue connected to that first question is that of the law governing the proceedings before the permanent dispute resolution body, which has important consequences for the possible supervisory competence of domestic courts, for annulment/appeal, and for enforcement. The research paper suggests that an option that would deserve consideration is to subject the proceedings only to international law. This solution would avoid the difficulties of choosing a priori a suitable domestic arbitration law

(to which all States would be willing to agree) or of leaving the choice of the seat (and, as a consequence, of the procedural law) to the disputing parties or the permanent dispute resolution body, which could result in inconsistencies if different seats and arbitration laws are selected. By contrast, there is no reason to consider that a truly self-contained regime (as to the procedure) insulated from the supervision and control of any domestic court would pose any problem. The research paper suggests that whatever the choice, it should be clearly articulated.

42. The *second question* relates to the issue of the availability of systems of control in respect of the permanent dispute resolution body decisions/awards, in particular annulment and appeal, and the alternative options to an appeal, such as preliminary rulings, en banc determinations and consultations mechanisms. The research paper looks into the challenge of designing a framework that strikes a careful balance between conflicting demands: on the one hand, the need for an efficient and final dispute settlement mechanism and, on the other, the concern to protect the integrity of the process and the correctness of the decision-making. It further analyses the usual control options, annulment and built-in appeal (with all related questions, such as the appellate tribunal's composition, the grounds of appeal and standards of review, the effect of the appellate decision, the binding nature of the decision). The research paper also considers alternatives to a built-in appeal system, i.e., preliminary rulings, en banc determinations and consultation mechanisms.

43. A *third question* relates to enforcement of the decisions/awards of the permanent dispute resolution body, which is essential to ensure the ultimate effectiveness of the system, and is considered in the hypothesis that the permanent dispute resolution body would be characterized as arbitration (as opposed to court). The research paper considers that question in the situation where enforcement of the decisions/awards of the permanent dispute resolution body would need to be enforced in the territory of a State party to the opt-in convention, as well as the situation where enforcement would be sought in a State not party to the opt-in convention. It further considers enforcement issues under the Convention on the Recognition and Enforcement of Foreign Arbitral Awards (New York, 1958) ("New York Convention"), and in particular (i) whether the permanent dispute settlement body would qualify as a "permanent arbitral body" under the New York Convention, (ii) whether its decisions/awards would meet the territorial requirements of the New York Convention, and (iii) the issues related to the application of the New York Convention where a built-in appeal mechanism would be provided for.

44. A *fourth question* relates to the composition of the permanent dispute resolution body, which includes the method by which the members are to become part of the new adjudicative body, i.e. the election/selection process, and the way those elected members are appointed or assigned to a panel to decide a dispute.

45. A *fifth question* relates to the jurisdiction of the permanent dispute resolution body and the relationship with other dispute settlement mechanisms with which the body may interact (such as State-to-State arbitration and committees of the contracting States, which are empowered under investment treaties to provide interpretations of the investment treaties). The research paper provides some insight on the questions surrounding the delimitation of the body's jurisdiction.

Legal issues and questions in relation to setting up an appeal mechanism

46. The research paper underlines that several issues that would arise in the establishment of the permanent dispute settlement body would also arise in connection with the creation of an appeal mechanism.

47. The research paper considers the characterization of the appeal mechanism. It underlines that despite the fact that most arbitration regimes exclude the possibility of appeals from awards (and instead only afford dissatisfied parties the limited remedies of annulment and revision), there are nonetheless examples of institutional arbitration regimes which provide for internal appellate review of arbitral awards.[22] Under some national

[22] See, for instance, Arbitrators' and Mediators' Institute of New Zealand (AMINZ) (2009), Arbitration Appeal Rules (2009); American Arbitration Association (AAA) (2013), Optional Appellate Arbitration Rules; JAMS (2003), Optional Arbitration Appeal Procedure; International

arbitration laws, parties may agree on a two-level arbitration process, and there is no suggestion that the presence of an appeal makes the process different from arbitration.

48. The research paper addresses a number of questions potentially raised by the introduction of an appeal mechanism in relation to ICSID and non-ICSID arbitrations, such as the law governing the proceedings before the appeal mechanism, the interaction of an appeal mechanism with annulment remedies normally available against investor-State arbitral awards, and enforcement.

49. Further, the research paper considers specific legal issues to be taken into account in the design of an appeal mechanism, such as (i) the definition of the types of awards which are subject to appeal (ii) the grounds of appeal and the standard of review; (iii) the effect of the appellate decision; and (iv) the binding nature of the decision.

III. Concluding remarks

50. The Commission may wish to express its appreciation to G. Kaufmann-Kohler and M. Potestà for the study and the research paper, which provides a thorough analysis of the question.

51. The Commission may wish to consider whether the Secretariat should continue to conduct the study in conjunction with the CIDS as outlined above and, if so, which topics would require further consideration.

52. The Commission may also wish to decide whether the research paper should be made available for further consideration at a future session. Lastly, the Commission may wish to engage in a discussion on whether and how future work in this field, if any, should be pursued.

F. Note by the Secretariat on legal issues related to identity management and trust services

(A/CN.9/891)

[Original: English]

Contents

I. Introduction

1. At its forty-eighth session, in 2015, the Commission requested the Secretariat to conduct preparatory work on identity management and trust services, including through the organization of colloquiums and expert group meetings, for future discussion at the Working Group level following the current work on electronic transferable records on the basis of a proposal submitted to the Commission for its consideration (A/CN.9/854).[1]

2. At that session, the Commission also asked the Secretariat to share the result of such preparatory work with Working Group IV, with a view to seeking recommendations on the exact scope, possible methodology and priorities for the consideration of the Commission at its forty-ninth session.[2]

3. In furtherance of that request, the UNCITRAL Colloquium on Legal Issues Related to Identity Management and Trust Services was organized on 21 and 22 April 2016 in Vienna. Moreover, the Secretariat participated in a conference on "Open Issues on Electronic Commerce: the Digital Identity", organized by the University of Bologna (10 June 2015, Bologna, Italy); an "International Identity Management Law and Policy Meeting" co-organized by the American Bar Association (ABA) and the World Bank (Washington, United States of America, 14 January 2016); and a conference on "Identity Management and Trust Services since the eIDAS regulation" organized by the University of Namur (Namur, Belgium, 18 March 2016).[3]

4. This note provides a summary of the discussions at that Colloquium and at other relevant meetings. Materials used for presentations at the Colloquium are available on the UNCITRAL website.[4]

5. The Commission may wish to note that a document providing an overview of identity management had been submitted to Working Group IV (Electronic Commerce) at its forty-sixth session (A/CN.9/WG.IV/WP.120) and that additional considerations are contained in a document submitted to Working Group III (Online Dispute Resolution) at its thirty-second session (A/CN.9/WG.III/WP.136). The report on a prior colloquium on electronic commerce, which included a panel on identity management, is also available (A/CN.9/728, paras. 9-28).

II. Legal Issues Related to Identity Management and Trust Services

A. Current Legal Environment for Identity Management and Trust Services

6. Electronic identity management (IdM) is a foundational issue for the use of electronic means. Verifying the identity of remote parties, such as determining who is seeking access to an online database of sensitive information, who is trying to initiate an online transfer of funds from an account, who signed an electronic contract, who remotely authorized a shipment of product, who is seeking access to online government services, or who sent an e-mail, is often a fundamental concern. Functionally, IdM aims at answering the basic questions: "Who or what is seeking to prove identity?" and "How reliably is identity proven?" in an electronic environment.[5]

7. In that respect, it should be noted that verifying in a trustworthy manner the identity of a remote party in an electronic environment is necessarily different from verifying in a trustworthy manner the identity of a present party in a physical environment. For instance, IdM may be used remotely and simultaneously in multiple applications, while traditional means of identification may not.

8. Paper-based identity documents have been used for centuries to identify natural persons and well-established practices were developed, so that users of such documents know their reliability as identification tools and the risks associated with their use. By contrast, IdM being a relatively new process that requires correlation of electronic identity information with a person not physically present, related business practices are not yet fully established and risk assessments vary. Therefore, promoting confidence in the use of IdM systems requires clarifying, among others, various technical and legal aspects, including liability issues.

9. Given its broad relevance, IdM may have an impact on cultural, political, social and economic inclusion.[6] IdM has several implications for the Sustainable Development Goals, being directly relevant for Target 16.9 (on providing legal identity for all, including birth registration, by 2030) and an enabler to a number of other targets such as Target 1.4 (on ensuring access of the poor to economic resources, including property and finance), Target 10c (on reducing remittance costs) and Target 16.5 (on reducing corruption).

10. The ongoing transition towards online-enabled and data-driven economies requires the use of IdM for multiple business and social uses. Policymakers suggest the adoption of user-centric IdM models where users have the choice of what identity credentials and level of assurance to use.[7]

11. In the current legal environment, IdM systems and trust services are subject, on the one hand, to requirements contained in laws drafted for other purposes (e.g., commercial and civil code; privacy laws); and, on the other hand, to contractual agreements (often called "system rules", "scheme rules" or "trust frameworks"), which aim at ensuring proper functioning and trustworthiness of the system by defining the obligations of the parties.

12. Although a majority of the world's jurisdictions have adopted laws on electronic transactions and electronic signatures that often contain provisions relevant for IdM and trust services,[8] only a few laws specifically dealing with the use of IdM and trust services exist.[9]

---

[8] For an overview of the current status of legislation on electronic transactions and electronic signatures, see the UNCTAD Global Cyberlaw Tracker at http://unctad.org/en/Pages/DTL/STI_and_ICTs/ICT4D-Legislation/eCom-Global-Legislation.aspx.

[9] E.g., Regulation (EU) No. 910/2014 of the European Parliament and of the Council of 23 July 2014 on electronic identification and trust services for electronic transactions in the internal market; Virginia Electronic Identity. Management Act, 2015 (SB 814).

Additional legislative provisions may cater to specific industry needs, such as those of the banking sector and payments services.[10]

13. Several States have indicated interest for preparing legislation on IdM or have started doing so. Those initiatives are based on differing approaches and notions. There is therefore a clear, strong and urgent need to provide guidance to legislators in order to suggest desirable options and to prevent lack of harmonization.

The scope of IdM systems

14. A number of different IdM models are currently in use to discharge several functions, which may vary significantly in purpose and requirements. Since IdM systems may involve different types of applications, services and users, it is important that their legal analysis should not be limited to certain types of transactions, such as commercial ones. Similar considerations apply to trust services.

15. IdM systems may be used to identify natural and legal persons as well as physical and digital objects. However, not all of those entities have received equal attention in the study of legal issues related to IdM. In particular, work on legal aspects of identification of objects seems to require additional attention. In that respect, it should be noted that certain technologies (e.g. radio frequency identification ("RFID") tags or other contactless technology) may be more suitable for identification of objects than others and therefore may provide user cases that could be useful to start that analysis.

16. Commercial users of IdM typically carry out an analysis of benefits and costs associated with technologies and methods used to conduct business and therefore require a significant level of flexibility. Moreover, those users require clarity and predictability on the allocation of obligations and related liability among concerned parties. The same considerations may not necessarily apply in case of use of IdM systems for providing public services.

17. IdM systems may be classified in a variety of manners, such as "commercial-driven" or "government-driven", and "centralised" or "decentralised". Another classification refers to IdM systems providing foundational or core identities, i.e. identity attributes that typically do not change, such as birth name or date, which are supposed to be multipurpose; and to IdM systems providing functional identities, i.e. identity attributes that are issued for a specific purpose.

18. Although at a global level the commercial need for IdM is a major driver of IdM systems, the importance of government IdM systems should not be underestimated. It has to be noted that traditionally a number of functions related to identity management in the physical world have been performed by civil registration and vital statistics (CRVS) registries. Those registries have been, especially in the last two centuries, managed by governments. When performing CRVS-related functions, governments typically limit their liability in line with the legal regime applicable to governmental activities and ensure the reliability of the information contained in the registry with other legal mechanisms (e.g., criminal law provisions for providing or creating false identity-related information).

19. Commercial practices regarding the identification of parties developed over centuries on the basis of identity information available from CRVS and other registries and its associated legal framework. To date, CRVS registries play an important role in providing information used in IdM. In particular, CRVS registries may be used as the basis for "breeder documents" that commercial systems rely upon in establishing the identity of natural and legal persons.

20. Further, government-driven IdM systems may be designed as extensions and improvements of traditional CRVS registries. Those systems may stress security and other features relevant to their intended main use. Moreover, in line with the traditional approach of CRVS registry operators, their providers do not necessarily operate under a full liability regime in case of non-performance or partial performance of their services.

[10] See the relevant provisions contained in the Directive (EU) 2015/2366 of the European Parliament and of the Council of 25 November 2015 on payment services in the internal market.

21. Commercial identity credentials issued for different purposes may rely on the same primary identity document. Yet, those different identity credentials may offer varying levels of reliability and will be used with different methods and technologies. Hence, legal analysis of the relationship between the various identity credentials and the primary breeder identity document requires careful examination.

22. The above considerations highlight that no single model or solution for IdM exists. On the contrary, many IdM systems with different purposes co-exist. Similarly, obligations and liability of the parties involved in IdM systems may vary. This, however, does not seem to preclude the possibility of identifying common elements and of building on those elements to promote legal interoperability.

Interaction and interoperability among IdM systems

23. IdM systems are often federated. According to that model, identity information verified by one entity is made available in an agreed-upon and managed fashion to multiple parties that need such identity information for different purposes.[11] Federated IdM systems achieve interoperability among their participants by using a common technical and legal framework defined by a set of system rules. Federation of an IdM system contributes to increasing the number of users and of applications and may assist in containing IdM-related costs.

24. Currently, however, most IdM systems operate in an autonomous manner, with little or no interaction. Barriers to that interaction are both technical and legal. In particular, legal rules applicable to IdM systems may vary significantly. However, the value of an IdM system is proportional to the number of parties using it and to the number and diversity of applications in which it can be used. Hence, ideally the various IdM systems should interact seamlessly, thus implementing not only technical interoperability but also legal mutual recognition (referred to as "legal interoperability").

25. Since federation alone may not address all the issues posed by IdM, IdM systems would benefit from a harmonized legal framework. Whether federation of IdM systems as such poses specific legal challenges is a matter that requires further investigation.

26. Additional challenges to technical and legal interoperability may arise at the regional level, where specific trends may exist and where available capacity and resources may not always suffice.

27. A number of organizations aim at promoting the development and wider use of IdM systems.[12] That goal requires a combination of policy decisions, technical developments and legal provisions. Certainty and predictability of applicable legal rules — as well as, to the extent possible, their harmonization — could greatly contribute to removing barriers to the use of IdM across systems and national borders.

Trust services

28. Trust services encompass a number of different services aimed at promoting confidence in electronic transactions, including, but not limited to: digital archiving; time-stamping; signatures providing evidence of origin and integrity of the message; return receipt; guarantee to existence at a certain point in time; digital seals; authentication of electronic address (e.g. URL) and escrow.

29. UNCITRAL texts on electronic commerce contain a number of provisions relevant to trust services, such as provisions on electronic signatures, on integrity of data messages, on archiving of data messages, and on the attribution of data messages. As those texts have been widely adopted in the world,[13] a significant amount of uniform law already exists in this field.

30. Trust services may have elements in common with IdM services. However, significant differences also exist, in particular, in light of the function pursued with the use of each trust

[11] A/CN.9/WG.IV/WP.120, para. 10.

[12] See A/CN.9/WG.IV/WP.120, para. 5, for a list of several organizations engaged in the field.

[13] For the status of adoption of UNCITRAL texts on electronic commerce, see www.uncitral.org/uncitral/uncitral_texts/electronic_commerce.html.

service. It remains to be determined whether it would be feasible and desirable to jointly consider legal aspects of IdM and trust services.

B. Promoting Confidence in the Use of Identity Management and Trust Services

31. Ensuring trust in the operation of IdM systems and trust services is fundamental in order to promote their use (see paras. 6-8 above). Trust may be defined as "Firm belief in the reliability […] of […] something".[14] It is therefore an opinion influencing behaviour and the willingness to rely. In the case of IdM and trust services, trust is the opinion on the reliability of the service offered.

32. In turn, reliability may be defined as "the quality […] of performing consistently well"[15] and is the result of a process, rather than a product.

33. Lack of clarity on parties' liability is a major barrier to promoting trust in the use of IdM and trust services. Parties need to be able to clearly assess rights and obligations and to allocate risks. Currently, those terms can be clarified in contractual agreements (often contained in system rules) whose content may vary significantly. Moreover, the law may allocate liability, possibly on the basis of general rules, in absence of any agreement, or may also override those agreements. Provisions on limitation of liability contained in the law and in contractual clauses are also relevant to define risk allocation. Similarly relevant is the availability of commercial insurance to cover risks associated with the use of IdM and trust services.

34. It is of great importance that legislative and contractual provisions aimed at promoting trust should focus on the outcome of the process, e.g. providing reliable services, rather than prescribing specific processes, which could violate technology or identity system neutrality. This has important practical consequences, for instance, by ensuring that rules do not prevent use of IdM with any particular technology or method, such as mobile devices. Likewise, legislative requirements associated with reliability may refer to technical standards; however, caution is necessary to avoid favouring any technology, method or process, or to inhibit adaptability to change.

35. Specifically, the law may promote confidence in the reliability of IdM systems and trust services by rewarding compliance with certain requirements associated with reliability of the system or service.

36. In particular, the law may attach legal presumptions to the use of IdM systems or trust services that satisfy certain requirements. Such presumptions may shift the burden of proof on origin, integrity, time of despatch and receipt, etc. when electronic transactions are used with the assistance of compliant IdM systems or trust services. Parties are free to choose whether those systems and services are relevant and useful for their commercial operations, thus achieving desired flexibility.

37. Alternatively, the law may provide for limitation or exclusion of liability for certain parties involved in IdM systems and trust services as long as they comply with requirements set forth in legislation or contractual agreements. The law may also set forth that contractual agreements may not derogate or vary liability for gross negligence or wilful misconduct.

38. One important benefit arising from a clearer understanding of the obligations of the various parties in an identity system and of allocation of liability risk among them is improved assessment of cybersecurity needs, which, in turn, allows more efficient distribution of related resources in line with the parties' actual needs.

Cross-border use of IdM and trust services

39. An enabling legal environment for the use of IdM and trust services needs to take into full consideration also cross-border aspects of that use. Those aspects may pose additional challenges in the absence of a uniform legal framework promoting mutual recognition of the

[14] Oxford English Dictionary Online, "Trust", sub 1.
[15] Oxford English Dictionary Online, "Reliability", sub 1.

legal status of IdM systems and trust services. In dealing with such aspects, due consideration should be given to provisions on mutual legal recognition of authentication methods contained in international instruments such as free trade agreements.[16]

40. Currently, cross-border legal recognition may be achieved on the basis of private agreements stipulating contractually the terms of service as well as technical specifications.[17] That model is, however, subject to limits to freedom of contract set forth in applicable national law and does not apply to parties that are not contractually bound.

41. Another approach to cross-border legal recognition of IdM systems and trust services may foresee the establishment of a centralized accreditation system performing an assessment, whose result determines the legal status of the system or service and is binding on participating States. Assessment of conformity of systems and services is made before their actual use and along general categories. That model may be particularly useful when applied in the framework of regional economic integration since States pursuing that integration have an incentive to join it.

42. Yet another possibility would foresee the preparation of uniform legal provisions to pursue cross-border recognition, preferably on a multilateral basis. In that case, it would be possible to conduct the assessment of reliability only in case of actual dispute and on a case-by-case basis.[18]

43. One important consideration relates to the need for a uniform law text to interact with private international law rules. Analysis of that interaction may require special attention.

C. Relevant Issues for Future Work

44. Various stakeholders welcome UNCITRAL's decision to undertake work on legal aspects of the use of IdM systems and trust services and suggest that UNCITRAL should prepare provisions aimed at providing specific legislative guidance. The outcome shall enhance parties' confidence in the use of IdM systems and trust services and promote legal interoperability among IdM systems. That work product would, on the one hand, fill the current gap between general legislation and system rules and, on the other hand, ensure uniformity in future legislation.

45. In conducting future work, it seems particularly important to ensure coordination with relevant organizations dealing with legal and technical aspects of IdM systems and trust services. This will allow focusing the exercise on concrete issues, drawing on existing experience and expertise as well as highlighting common elements in existing and prospective laws.

46. With respect to the form of future work by UNCITRAL, while the preparation of model legislation to be enacted at the national level may be envisaged, an international text may be more appropriate to cover cross-border aspects. Non-legislative texts, such as model contractual provisions, could adequately address certain issues. Mutually reinforcing texts could be drafted.

47. With respect to the content of provisions on IdM systems and trust services, the general principles underpinning UNCITRAL texts on the use of electronic communications (technology neutrality, non-discrimination of electronic communications, functional equivalence) and other general principles of uniform commercial law, such as freedom of contract, are relevant for defining the legal framework for the use of IdM systems and trust services.

48. Moreover, several provisions contained in UNCITRAL texts on electronic commerce (e.g., provisions on electronic signatures and on archiving) and in certain other texts[19] are directly relevant for IdM systems and trust services and may provide useful guidance. A

[16] See, e.g., article 14.6 of the Trans-Pacific Partnership.

[17] This model is used by the Pan-Asian E-Commerce Alliance.

[18] This approach is adopted in article 9, paragraph 3 of the United Nations Convention on the Use of Electronic Communications in International Contracts.

[19] E.g., article 5, paragraph 2 of the UNCITRAL Model Law on International Credit Transfers, 1992.

thorough analysis of those texts may be useful for preparing future UNCITRAL work in this field.

49. In that respect, further clarification of the relationship between IdM systems and trust services, on the one hand, and electronic signatures, on the other hand, seems particularly useful. One element to consider in that analysis is that electronic signatures require an associated identity element that allows parties to rely on the signature by identifying reliably the signatory. Another element to be taken into account relates to the use of certain types of electronic signatures in delivering trust services.

50. Preparing definitions of the most relevant terms used in connection with IdM and trust services could be beneficial to clarify the various notions and ensure their uniform understanding. In doing so, existing technical standards, and definitions therein, need to be taken into consideration.[20]

51. In light of the above considerations it seems preferable that the scope of this legislative project shall cover all types of IdM systems and trust services, regardless of the nature of the provider and of the main intended purpose, function or use. It seems also desirable that it shall consider all possible entities that could be identified by an IdM system and all possible roles. Finally, the project should deal with both use of IdM systems and transactions between IdM systems.

52. With respect to specific topics, the following seem to be core issues to be discussed with respect to IdM: rights and obligations of the parties; reliability in the various steps of the IdM cycle; consequences of reliability on liability; system rules and other contractual agreements (such as service level agreements); mutual legal recognition and other matters related to legal interoperability.

53. An important aspect of IdM relates to privacy and data protection. Policy approaches to that complex topic may vary significantly and several initiatives aim at reconciling them. In practice, existing legislation on IdM recognizes the existence of specific privacy law and defers to its application. Against that background, and in view of the fact that work on IdM systems and trust services should not extend to matters outside UNCITRAL's mandate,[21] it is doubtful that UNCITRAL could efficiently deal in detail with those matters at the present stage.

54. Another aspect to be further analysed relates to the use of IdM systems and trust services in cloud computing. Cloud services may be used to provide identity management (identity as a service). Moreover, IdM (e.g., in the form of multifactor authentication) is commonly used to access cloud services, in particular to ensure compliance with privacy and other regulatory requirements. However, further investigation is needed in order to clarify whether those uses pose specific legal issues.

55. With respect to working methods, it seems particularly desirable to foster broad participation by all regions in future UNCITRAL work to better assess the current status of IdM systems and trust services as well as identify regional specific trends.[22] One possible tool to do so is the distribution of surveys. This could be done also through cooperation and coordination with relevant regional organizations, such as the Arab ICT Organization (AICTO).[23]

---

[20] See documents ISO/IEC 24760-1:2011(en) and ISO/IEC 24760-2:2015(en) for examples of IdM-related definitions.

G. Note by the Secretariat on a joint proposal on cooperation in the area of international commercial contract law (with a focus on sales)

(A/CN.9/892)

[Original: English/French]

1. At its forty-third session in 2010, the Commission encouraged the Secretariat to explore ways of collaborating further with other organizations, such as the Hague Conference on Private International Law (the "Hague Conference") and the International Institute for the Unification of Private Law ("Unidroit"), to jointly promote related texts.[1]

2. In 2012, the Commission, the Hague Conference and Unidroit jointly published an explanatory text in the area of security interests.[2]

3. At its forty-eighth session in 2015, the Commission expressed support for increasing, within available resources, the number of promotional and capacity-building activities aimed at supporting the adoption and effective implementation of the United Nations Convention on Contracts for the International Sale of Goods (Vienna, 1980).[3]

4. In furtherance of that mandate, the Secretariat has discussed with the Permanent Bureau of the Hague Conference and the secretariat of Unidroit the possibility of cooperating in preparing an explanatory text in the area of international commercial contract law (with a focus on sales).

5. The annex to this note contains a joint proposal on the preparation of an explanatory text in the area of international commercial contract law (with a focus on sales). The Council on General Affairs and Policy of the Hague Conference welcomed the proposal at its meeting from 15 to 17 March 2016.[4] On 19 May 2016, the Unidroit Governing Council recommended to the Unidroit General Assembly that work emanating from the proposal be included in the Work Programme for the triennium 2017-2019.

---

[3] *Official Records of the General Assembly, Seventieth Session, Supplement No. 17* (A/70/17), para. 333.

[4] Conclusions and recommendations adopted by the Council of March 2016, para. 333, available from www.hcch.net/en/governance/council-on-general-affairs.

Annex

Joint proposal on cooperation in the area of international commercial contract law (with a focus on sales)

The Hague Conference on Private International Law (the "Hague Conference"), the International Institute for the Unification of Private Law ("Unidroit"), and the United Nations Commission on International Trade Law ("UNCITRAL") regularly coordinate their activities in order to ensure a concerted approach to common issues.

Recently, that coordination has led to jointly publishing an explanatory text in the field of security interests, which lists and summarizes the work of the three organizations in that area. In particular, that explanatory text illustrates how the various instruments produced by the three organizations interact and provides a comparative understanding of the coverage and basic themes of each instrument.[5]

Similar cooperation is suggested in the area of international commercial contract law with a focus on sales in light of the renewed interest for further promoting the adoption, application and uniform interpretation of texts in that area.

Over the decades, the Hague Conference, Unidroit and UNCITRAL have prepared legislative and non-legislative instruments related to international commercial contract law. Often, those efforts have been conducted in close cooperation. One example of such cooperation may be found in the legislative history of the United Nations Convention on Contracts for the International Sale of Goods (Vienna, 1980)[6] (the "CISG"). In particular, the influence on the CISG of pre-existing uniform law texts developed by other organizations is well known.[7]

The CISG is one of the most successful uniform law texts in light of State participation, application by courts and arbitral tribunals and influence on sales law reform. That success highlighted the desirability of further supporting its implementation in line with its goals and guiding principles.[8]

UNCITRAL has already developed tools providing support to CISG implementation. Those tools include cases reported in the Case Law on UNCITRAL Texts (CLOUT) information system as well as the CISG Digest. However, experience demonstrates that a number of challenges to the use, application and interpretation of the CISG arise from insufficient awareness of the relation between the CISG and other uniform law texts, including those prepared by the Hague Conference and Unidroit. It is submitted that a joint effort aimed at providing guidance on how those texts relate would be beneficial for all texts concerned.

Examples of texts closely related to the CISG include the Principles on Choice of Law in International Commercial Contracts (the "Hague Principles")[9] and the Unidroit Principles of International Commercial Contracts (the "Unidroit Principles"),[10] both of which have been endorsed by UNCITRAL. Moreover, UNCITRAL has prepared treaties that are closely related to the CISG such as the United Nations Convention on the Use of Electronic

---

[6] United Nations, *Treaty Series*, vol. 1489, No. 25567.

[7] See, inter alia, as to Unidroit instruments: Convention Relating to a Uniform Law on the International Sale of Goods (The Hague, 1964), available from www.unidroit.org/instruments/international-sales/international-sales-ulis-1964; Convention Relating to a Uniform Law on the Formation of Contracts for the International Sale of Goods (The Hague, 1964), available from www.unidroit.org/instruments/international-sales/international-sales-ulfc-1964-en; or the Hague Conference: Convention of 15 June 1955 on the Law Applicable to International Sales of Goods, available from www.hcch.net/en/instruments/conventions/full-text/?cid=31.

[8] *Official Records of the General Assembly, Seventieth Session, Supplement No. 17* (A/70/17), para. 334.

[9] Available from www.hcch.net/en/instruments/conventions/full-text/?cid=135.

[10] In their most recent iteration: Unidroit Principles of International Commercial Contracts 2010, available from www.unidroit.org/instruments/commercial-contracts/unidroit-principles-2010.

Communications in International Contracts (New York, 2005) (the "Electronic Communications Convention")[11] and the Convention on the Limitation Period in the International Sale of Goods[12] (the "Limitation Convention") as well as other instruments of legislative and non-legislative nature.

The substantive overlap and cross-fertilization of those and other texts prepared by the Hague Conference, Unidroit and UNCITRAL[13] has highlighted the desirability for greater clarification of the relationship among those instruments with a view to jointly promoting their adoption and use. It is important to recall that the primary texts in this field are of an optional nature. With this in mind, coordinated presentation and guidance as to the content and consequences of the available options would be of clear value in further developing the understanding and appropriate use of these texts.

Accordingly, the goal of the suggested document on international contracts law with a focus on sales would be to guide across a range of relevant issues, from choice of law to identification, among existing texts, of those most suitable for each type of transaction. That document would reference relevant uniform texts of legislative, contractual or other nature. It could also examine how existing texts and standards relate to emerging issues such as the legal treatment of global supply chains.

If desirable and feasible, the document could address specifically issues relevant for various legal actors, including legislators, judges and arbitrators, legal counsels and commercial operators. It could also provide a solid teaching reference.

It should be stressed that the suggested document would not require new legislative work. It would analyse existing texts, coordinate them by highlighting mutual relationships and consolidate them, including by clarifying whether texts have had limited success or have been replaced by more recent ones.

One important dimension of the suggested work would be to refer, as appropriate, to relevant texts developed by other intergovernmental organizations, including at the regional level, and by the private sector. Those references would be prepared in consultation with the relevant institutions, in line with the usual inclusive approach of the Hague Conference, Unidroit and UNCITRAL.

The outcome of the suggested project could provide an important contribution to establishing clarity in the field by taking stock of the many achievements made in the past. It could also offer a clearer picture of lessons learned and best practices for the pursuit of greater legal uniformity and broader contractual freedom.

Mindful of increasing constraints on existing resources and of concurring priorities in each organization's intense work programme, it is suggested that a significant amount of the preparatory work in drafting the guidance document be carried out in an agile yet fully inclusive manner. To this end, a small joint panel of experts could be set up to provide further details on suggested scope and methodology. One possible first step could consist of mapping the most relevant texts and arranging them according to their scope. At a second stage, the panel could provide a short description of the content and relevance of those texts and assess their interaction.

The composition of the expert panel should reflect representation from different legal traditions and levels of economic development as well as, where appropriate, from other organizations active in the field. The Hague Conference, Unidroit and UNCITRAL would oversee the work of that panel through their Secretariats and provide guidance and coordination as appropriate.

---

[11] General Assembly resolution 60/21, annex.

[12] Convention on the Limitation Period in the International Sale of Goods (New York, 1974), United Nations, *Treaty Series*, vol. 1511, No. 26119; as amended by the Protocol of 11 April 1980 (Vienna), United Nations, *Treaty Series*, vol. 1511, No. 26121.

[13] Consider, for example, Uniform Rules on Contract Clauses for an Agreed Sum Due upon Failure of Performance (1983), *Official Records of the General Assembly, Thirty-eighth Session, Supplement No. 17* (A/38/17), annex I; UNCITRAL texts on electronic commerce, available from www.uncitral.org/uncitral/uncitral_texts/electronic_commerce.html; or the Hague Conference Convention of 22 December 1986 on the Law Applicable to Contracts for the International Sale of Goods (not in force), available from www.hcch.net/en/instruments/conventions/full-text/?cid=61.

The final product of the expert panel's work would be determined by the Hague Conference, Unidroit and UNCITRAL in light of the findings of that panel and of its recommendations. Appropriate venues for finalizing and adopting the project's outcome could also be considered at a later stage.

H. Note by the Secretariat on settlement of commercial disputes: proposal received from the Swiss Arbitration Association

(A/CN.9/893)

[Original: English]

1. In preparation for the forty-ninth session of the Commission, the Swiss Arbitration Association ("ASA") submitted to the Secretariat a proposal with the aim of cooperating with UNCITRAL in promoting the revised UNCITRAL Notes on Organizing Arbitral Proceedings. The text received by the Secretariat on 30 May 2016 is reproduced as an annex to this note.

Annex

Proposal by the Swiss Arbitration Association (ASA)

1. Introduction and Scope of the ASA Arbitration Toolbox

In view of a potential cooperation with UNCITRAL, this Note is aimed at presenting a project pursued by the Swiss Arbitration Association (ASA) under the working title "ASA Arbitration Toolbox".

ASA is a non-profit association with over 1,200 members, of whom a third are from outside Switzerland, all practitioners and academics engaged and/or interested in domestic and international arbitration. Membership to ASA is open to arbitration practitioners of all nationalities, irrespective of the level of experience. Since its creation in 1974, ASA has become one of the leading arbitration associations. ASA is not an arbitral institution and does not administer arbitral proceedings.

The essence of the "ASA Arbitration Toolbox" is to remind users that arbitration is a tailor-made process. There is no single "correct" or "usual" way to conduct arbitral proceedings, or even one single "best practice". Indeed, the very essence of arbitration is its flexibility: different options are available for each step of the proceedings. The "ASA Arbitration Toolbox" is thus designed to remind users (parties, arbitrators, counsel) that they have considerable freedom to customize their proceedings for each case, as is also highlighted in the UNCITRAL Notes on Organizing Arbitral Proceedings (UNCITRAL Notes).

The "ASA Arbitration Toolbox" will provide guidance on how to best adapt the proceedings to the specific needs of each individual arbitration, making the process as efficient as possible. In order to achieve this, the "ASA Arbitration Toolbox" will detail the main steps in arbitral proceedings and outline the different possible approaches for each step. It will also provide guidance on which approach might be advisable in a specific situation, as well as the consequences of the approach chosen on subsequent steps in the proceedings. At all times, the "ASA Arbitration Toolbox" will emphasize that the procedural options corresponding to each option are merely suggestions. In line with the UNCITRAL Notes, the "ASA Arbitration Toolbox" also aims at assisting arbitration practitioners by outlining the issues on which appropriately timed decisions on organizing arbitral proceedings shall be made.

The end product will be an interactive electronic handbook available online, designed for the needs of arbitrators, counsel and in-house counsel alike. The electronic tool will contain descriptive and explanatory text and guidance on how to best address specific procedural issues. Hyperlinks will allow the user to easily switch from one issue to another. In addition, and this will be the unique feature of the "ASA Arbitration Toolbox", the electronic tool will contain concrete drafting proposals for download and will show the user, by allowing him/her to make an interactive selection, how decisions made on one procedural issue may affect later options available. The details and information on how to access the prototype of the electronic tool established so far will be explained in more detail below (Section 4).

2. Background

The idea for the "ASA Arbitration Toolbox" project was aired in October 2013, when the ASA Board felt the need to remind arbitration practitioners of the flexibility of arbitration proceedings and the diversity of approaches available. At the same time, they also realized that this diversity requires guidance on which combination of approaches is recommendable. Board members pointed out that, in many cases, it was not advisable to simply employ the whole arsenal of available approaches. Instead, practitioners should be guided towards wise and efficient use of the available tools. In order to achieve this, the Board suggested the creation of a "toolbox".

From the very outset, the ASA Board recognized that the "ASA Arbitration Toolbox" should address the same fundamental concern for appropriately timed decision on the organization of arbitral proceedings and diversity that is the basis of the UNCITRAL Notes. As the UNCITRAL Notes already provide useful guidance on organizing arbitral proceedings, the goal was not to merely replicate the Notes, but to take the spirit of the UNCITRAL Notes further. It was decided that this goal could best be achieved by means of an interactive electronic tool.

3. Content of the "ASA Arbitration Toolbox"

The relevant phases in the arbitral proceedings to be covered by the "ASA Arbitration Toolbox" have been identified as follows:

(i) Regulatory and institutional framework and arbitration clauses;

(ii) Commencement of arbitration and formation of the arbitral tribunal;

(iii) Terms of Reference, financing the procedure, organization of the procedure, arbitrator's possible role as conciliator; secretary to the arbitral tribunal;

(iv) Written submissions, documentary evidence (including document production);

(v) Interim measures, emergency arbitrators, assistance from the courts;

(vi) Experts, issues of confidentiality;

(vii) Witnesses;

(viii) Hearing(s), oral opening arguments, oral closing arguments;

(ix) Post-hearing briefs, the arbitral tribunal's decisions.

4. Format and main features of the "ASA Arbitration Toolbox"

As explained, the end product will be an electronic interactive handbook available online. The electronic tool is designed as a three-layer-tool:

- The first layer features a menu showing the relevant phases in the arbitral proceedings as defined above (Section 3).
- The second layer focuses on one particular phase in the arbitral proceedings (for the time being limited to the phase "Organization of the Procedure"). It features a menu showing the topics that are relevant at the respective stage of the proceedings and the issues the parties and the arbitral tribunal may wish to consider. With regard to each topic, the second layer contains explanatory text, options and recommendations for when to choose which option. For example, in the prototype section on the "Organization of the Procedure", it is explained that the responsibility for organizing the procedure is divided between the parties and the tribunal and that different scenarios can be distinguished, e.g. that the parties can determine the procedure themselves, that the arbitral tribunal can determine the procedure after consultation with the parties, or without consulting the parties. For each scenario, the "ASA Arbitration Toolbox" provides guidance on when best to use this approach. Once the electronic tool is fully developed, the explanatory text will also contain hyperlinks to other sections of the electronic tool allowing the user to navigate easily and quickly between sections. As a unique feature, the electronic tool will also show to the user how decisions made on a procedural issue may affect later options or decisions

available. This will be implemented by interactive choices (for the time being called "Red flags") which can be activated and have the effect that the "ASA Arbitration Toolbox" will be adapted to the choice made.

- The third layer offers drafting proposals for specific documents that may be needed at any given stage. These documents will be available for download. For example, in the section on the "Organization of the Procedure", users will be able to download samples of a letter of introduction sent by the arbitral tribunal to the parties, an agenda for the organizational conference, Terms of Reference, Procedural Order No. 1 etc. In addition, arbitration rules, explanatory notes, checklists etc. will be available for download to the extent they are relevant.

For the time being, a prototype is available, but limited to the topic "Organization of the Procedure" (phase (iii) as outlined in Section 3 above), i.e. the phase in an arbitration where the arbitration proceedings have been commenced and the arbitral tribunal has been constituted. The documents for download, hyperlinks and interactive choices are not yet fully implemented. Furthermore, the explanatory text is a draft version and does not yet reflect the final wording.

The current status of the prototype can be accessed using the following links:

Title page: http://org.arbitration-ch.toolbox.u-x.ch/de/home/index.html

Section on "Organization of the proceedings": http://org.arbitration-ch.toolbox.u-x.ch/de/organization/index.html

In view of the progress made on the IT aspects of the project and the status of the substantive work completed so far, it is expected that the necessary content to the electronic tool will be added in the course of 2016. This would allow the "ASA Arbitration Toolbox" to be finalized hopefully early 2017.

5. Cooperation with UNCITRAL

Since the "ASA Arbitration Toolbox" is guided by the same spirit as reflected in the UNCITRAL Notes, and aspires at taking this spirit further and beyond, it would be beneficial to the project if it could gain the support of UNCITRAL. Cooperation with UNCITRAL would mean that the "ASA Arbitration Toolbox" could reach out to the arbitration community on a global level. UNCITRAL's support will undoubtedly provide the "ASA Arbitration Toolbox" with credibility and visibility around the world.

Cooperation with UNCITRAL will help avoid duplication of efforts in promoting flexibility but also efficiency of arbitration proceedings thereby securing consistency and coherence of approaches undertaken. In fact, it is of particular importance to have coherent guidance in an area where a multitude of approaches are available, as is the case with the organization of arbitral proceedings.

VIII. CASE LAW ON UNCITRAL TEXTS (CLOUT)

Note by the Secretariat on promotion of ways and means of ensuring a uniform interpretation and application of UNCITRAL legal texts

(A/CN.9/873)

[Original: English]

Contents

I. Case Law on UNCITRAL Texts (CLOUT)

Background

1. CLOUT continues to be an important tool to promote the uniform interpretation and application of UNCITRAL texts, as it facilitates access to decisions and awards from many different jurisdictions. Furthermore, it contributes to the promotion of UNCITRAL legal texts since it demonstrates that the texts are being used and applied in many different countries and that judges and arbitrators at different latitudes are contributing to their interpretation. CLOUT also provides the basis for the analysis of interpretation trends that is a key part of the case law Digests. Background information on CLOUT and the Digests, is provided in the Provisional Agenda of the forty-ninth session of the Commission (A/CN.9/859, paras. 53-57).

2. At present, case law on the following texts is reported in the system:

- United Nations Convention on the Recognition and Enforcement of Foreign Arbitral Awards, 1958 (New York Convention);[1]
- Convention on the Limitation Period in the International Sale of Goods, 1974 and Convention on the Limitation Period in the International Sale of Goods as amended by the Protocol amending the Convention on the Limitation Period in the International Sale Of Goods, 1980 (Limitation Convention);
- United Nations Convention on the Carriage of Goods by Sea, 1978 (Hamburg Rules);
- United Nations Convention on Contracts for the International Sale of Goods, 1980 (CISG);
- UNCITRAL Model Law on International Credit Transfers, 1992 (MLICT);
- United Nations Convention on Independent Guarantees and Stand-by Letters of Credit, 1995 (UNLOC);

[1] The Commission may recall that at its forty-first session, in 2008, it agreed that, resources permitting, the Secretariat could collect and disseminate information on the judicial interpretation of the New York Convention. For this reason, the CLOUT system includes only recent case law concerning the Convention. See *Official Records of the General Assembly, Sixty-third Session, Supplement No. 17* (A/63/17), para. 360. A comprehensive database of case law on the New York Convention complementing CLOUT can be found at www.newyorkconvention1958.org (see paras. 16-19 below and *Official Records of the General Assembly, Sixty-eighth Session, Supplement No. 17* (A/68/17), paras. 134-140).

- UNCITRAL Model Law on International Commercial Arbitration, 1985, as amended in 2006 (MAL);
- UNCITRAL Model Law on Electronic Commerce, 1996 (MLEC);
- UNCITRAL Model Law on Cross-Border Insolvency, 1997 (MLCBI);
- UNCITRAL Model Law on Electronic Signatures, 2001 (MLES); and
- United Nations Convention on the Use of Electronic Communications in International Contracts, 2005 (ECC).

3. Case law to be reported in CLOUT is provided by the network of national correspondents that, either as individuals or a specific organ or body, monitor and collect court decisions and arbitral awards and prepare abstracts of those considered relevant in one of the six official languages of the United Nations. The Secretariat collects the full texts of the decisions and awards in their original language and publishes them (see para. 13 below). The abstracts are edited and translated by the Secretariat into the official United Nations languages and published in all such languages as part of the regular documentation of UNCITRAL (under the identifying symbol: A/CN.9/SER.C/ABSTRACTS/...).

4. While the national correspondents are the principal support of the system, in agreement with the correspondents, contributions from scholars who are not appointed as national correspondents are also accepted, subject to control and prior notification to the relevant national correspondent, if appointed. This practice is consistent with the Commission's recommendation of utilising all available sources of information to supplement the information provided by the national correspondents. [2] National correspondents meet every two years, when the Commission is in session in Vienna, to take stock of the latest developments and challenges of CLOUT maintenance and improvement.

Maintenance of the system

5. As at the date of this note, 166 issues of CLOUT had been prepared for publication, dealing with 1,551 cases from 64 jurisdictions. [3] Of these, 830 cases related to CISG, 429 cases related to MAL (a number of cases dealt with both MAL and the New York Convention), 100 cases related to MLCBI, 144 cases primarily related to the New York Convention, 25 cases related to MLEC, 13 cases related to the Limitation Convention (4 of which related to the amended version of the Convention), 3 cases related to the Hamburg Rules, 2 cases related to EEC and 1 case each to UNLOC, MLES and MLICT. In addition, one case related to both CISG and MAL and one case to both CISG and the Limitation Convention. With reference to the five regional groups represented within the Commission, the figures coincide almost in full with the figures provided in A/CN.9/840 submitted to the forty-eighth session of the Commission, in 2015, with the majority of the abstracts referring to Western European and other States (65 per cent, approximately). The other regional groups were represented as follows: Asian States (16 per cent, approximately), Eastern European States (13 per cent, approximately), Latin American and Caribbean States (3 per cent, approximately) and African States (3 per cent, approximately). A few abstracts pertained to the awards of the International Chamber of Commerce (ICC). When compared with the figures provided in A/CN.9/840, a small increase in the figures concerning Eastern European States and a small decrease in those relating to African States can be noted.

6. Over the last twelve months, 87 new abstracts were received from national correspondents and voluntary contributors. The abstracts refer to the following texts: CISG (44 abstracts), New York Convention (19), MLCBI (11), MAL (8), MLEC (2) and

---

[2] *Official Records of the General Assembly, Sixty-fourth Session, Supplement No. 17* (A/64/17), para. 371.

[3] The jurisdictions include: Albania, Argentina, Australia, Austria, Belarus, Belgium, Benin, Bermuda, Bosnia and Herzegovina, Brazil, Burkina Faso, Cameroon, Canada, Chile, China, Colombia, Croatia, Cuba, Czech Republic, Côte d'Ivoire, Denmark, Egypt, El Salvador, Finland, France, Georgia, Germany, Hong Kong (China), Hungary, India, Iraq, Israel, Italy, Japan, Kenya, Liechtenstein, Lithuania, Luxembourg, Mexico, Montenegro, the Netherlands, New Zealand, Nigeria, Philippines, Poland, Portugal, Republic of Korea, Russian Federation, Serbia, Singapore, Slovakia, South Africa, Spain, Sweden, Switzerland, Thailand, Tunisia, Uganda, Ukraine, United Kingdom of Great Britain and Northern Ireland, United States of America, Zimbabwe.

Limitation Convention (amended text, 1 abstract). Two cases refer to both CISG and the Limitation Convention (amended text). The court decisions and the arbitral awards to which the abstracts refer were rendered in the following 17 countries: Albania, Australia, Belarus, Brazil, France, Japan, Lithuania, the Netherlands, New Zealand, Poland, Portugal, Republic of Korea, Singapore, Spain, Thailand, United Kingdom, United States. In the same period, 97 abstracts were published concerning CISG (45 abstracts); New York Convention (27), MAL (11), MLCBI (11), MLEC (1), EEC (1) and one case concerning both CISG and MAL. For the first time abstracts from Albania, Bosnia and Herzegovina, Portugal and Thailand were published.[4]

The network of national correspondents

7. Eleven new national correspondents were appointed in the period under review, two of whom replaced previous correspondents. The current composition of the network is thus of 74 correspondents representing 35 countries.[5] The Commission may wish to note that pursuant to a decision taken at its forty-second session, in 2009,[6] it was agreed that States should be requested to reconfirm the appointment of national correspondents every five years as of 2012. It was said that this arrangement would enable those correspondents who wished to remain actively involved to continue their work and provide an opportunity for new correspondents to join the network. The mandate of the current network of national correspondents will thus expire the day immediately before the day on which the fiftieth Commission session will commence in 2017. The Commission may wish to note that, approaching the fiftieth Commission session, the Secretariat will officially request UNCITRAL member and observer States to appoint and/or reappoint their national correspondents.

8. Over the last twelve months, national correspondents provided approximately 47 per cent of the abstracts published.[7] The remaining abstracts were received from voluntary contributors or prepared by the Secretariat.

Meeting of the national correspondents

9. The last meeting of the national correspondents took place on 7 July 2015; 18 countries were represented, in some cases national delegates attending the Commission and representatives of the Permanent Missions to the United Nations Organizations in Vienna participated on behalf of the national correspondent(s). At the meeting, progress and challenges of the CLOUT system in the previous biennium were reviewed, and information on the promotion of CISG and MAL Digests and their updating, on the preparation of MLCBI Digest and on the UNCITRAL Secretariat Guide to the New York Convention ("New York Convention Guide") was provided. A short demonstration of the upgraded CLOUT website was also conducted to familiarize participants with the new features of the database.

10. There was agreement among the participants on the importance of the national correspondents meeting, which was said to be an opportunity for sharing views among the correspondents as well as with the UNCITRAL secretariat. In this regard it was suggested that use of remote connection facilities (e.g. videoconference) could be tested in future as a way to allow participation of those correspondents who could not travel to Vienna. There was further agreement that other UNCITRAL texts, in addition to those already included, should be added in CLOUT and it was noted that cooperation with other organizations and

[4] Abstracts from the following jurisdictions were also published: Australia, Austria, Belarus, Brazil, China, France, India, Japan, Lithuania, New Zealand, Poland, Portugal, Republic of Korea, Singapore, Spain, United Kingdom and United States.

[5] The following countries have appointed national correspondents: Australia, Austria, Belarus, Bulgaria, Canada, China, Colombia, Cuba, Czech Republic, Denmark, El Salvador, Finland, France, Germany, Greece, Guatemala, Ireland, Israel, Italy, Japan, Luxembourg, Moldova, Montenegro, New Zealand, Poland, Republic of Korea, Russian Federation, Singapore, Slovakia, Spain, Sweden, Thailand, Tunisia, United States and Uruguay.

[7] The figure is similar to the one provided in A/CN.9/840.

institutions dealing with topics pertaining to those texts could be helpful to identify case law relating to such texts.

II. The Digests

11. A new round of updates of the CISG Digest was finalized. At the date of this Secretariat's Note the draft Digest is being formatted. It will then be published in the six official United Nations languages as an e-book and made available on the UNCITRAL website. Since the 2012 revision of the Digest resulted in the inclusion of a high volume of cases and several edits in the content of the publication,[8] the current round of updates has mainly focused on the inclusion of landmark cases in the text. The Commission may wish to note that the current revision of the Digest cites courts' decisions recognizing the significance of the Digest in assisting in the interpretation of the CISG.

12. Work to update the current edition of the MAL Digest is ongoing and finalization of the MLCBI Digest is progressing.

III. Enhancing CLOUT

13. With the upgraded CLOUT database in place,[9] the Secretariat commenced work to make accessible to the general users the full text decisions stored in the database archives. Due to the very time-consuming nature of the task and the modest resources available for CLOUT, the Secretariat joined the online volunteering programme, managed by the United Nations Volunteers (UNV),[10] which connects development organizations and volunteers over the Internet and facilitates their online collaboration.[11] A volunteer was thus identified and selected who is currently assisting the Secretariat (working from a remote connection) in making the full texts of decisions available online.

14. The Commission may wish to note that, since the new database was launched, in the first quarter of 2015, it had over 30,000 users.

15. As in previous Secretariat Notes to the Commission, (see, for instance, A/CN.9/810 and A/CN.9/840), the Commission may wish to note that the Secretariat responds to the resource intensive demands of CLOUT by stretching its available resources in order to ensure the coordination of the system. While this allows for routine maintenance of CLOUT, the system would greatly benefit from additional support in order to be further expanded through the provision of additional services and publication of an increased volume of abstracts. The Secretariat thus reaffirms the need for assistance in kind (e.g. non-reimbursable loans of personnel) or through budget contributions from States and other donors. The Commission might wish to reiterate its appeal to Member States to provide active support to the Secretariat's search for appropriate funding sources at the national level so as to ensure enhanced performance of the system.

IV. Promotion of uniform interpretation of the United Nations Convention on the Recognition and Enforcement of Foreign Arbitral Awards, 1958 (New York Convention)

16. Since the Secretariat's last note to the Commission (A/CN.9/840), the website www.newyorkconvention1958.org[12] continued to expand, not only by way of increasing the

[9] See A/CN.9/840, para. 11.

[10] United Nations Volunteers (UNV) is the United Nations agency that works to integrate volunteerism into development cooperation and mobilize volunteers, including UN Volunteers, throughout the world. UNV is based in Bonn, Germany, and is active in around 130 countries every year, it is represented worldwide through the offices of the United Nations Development Programme (UNDP) and reports to the UNDP Executive Board.

[11] See www.unv.org/how-to-volunteer/online-volunteers.html.

[12] The website was launched in July 2012 to support the preparation of the Guide on the New York Convention, with which the Secretariat was entrusted by the Commission in 2008. The website

volume of case law published on the application of the Convention, but also by way of adding information about the jurisdictions which have adopted the Convention. The database currently includes concise background notes concerning 45 States parties. With regard to 33 of those States, 1,138 summaries of cases, 1,052 original-language decisions and 119 English-language translations were also made available.

17. Pending publication of the final version of the New York Convention Guide, the website publishes a detailed analysis of specific provisions of the Convention, including the relevant case law (as mentioned in para. 16 above), finalized under the supervision of the Secretariat. The travaux préparatoires of the Convention are also available as well as a bibliography on the Convention, that is the most comprehensive directory of publications relating to the application and interpretation of such text. Updated in September 2015, the bibliography lists 741 books and articles from more than 71 countries in 11 different languages; 187 of such publications are directly accessible through hyperlinks.

18. Finally, over the past twelve months, the site has technically evolved, offering a new format compatible with all mobile devices and new features. In particular, the site offers a new interactivity between contents and an indexing that enables the various elements of the site to link to one another, in a unique canvas. The search engine of the website, which already allowed a thorough search among the decisions, has now been extended to enable searching the Guide, the travaux préparatoires and the bibliography.

19. As in previous years, close coordination between the website and the CLOUT system continues to be maintained (see also A/CN.9/840, para. 14). Several cases on the application of the New York Convention were published in both systems, which allowed for such cases to be available in the six official languages of the United Nations.

---

intends to make the information gathered in the preparation of such a Guide publicly available, including details on the judicial interpretation of the Convention by States Parties. See A/CN.9/777, paras. 15-16 and *Official Records of the General Assembly, Sixty-eighth Session, Supplement No. 17* (A/68/17), paras. 134-140.

IX. TECHNICAL ASSISTANCE TO LAW REFORM

A. Note by the Secretariat on technical cooperation and assistance

(A/CN.9/872)

[Original: English]

Contents

I. Introduction

1. Pursuant to a decision taken at its twentieth session in 1987, technical cooperation and assistance activities aimed at promoting the use and adoption of its texts represent one of the priorities of the United Nations Commission on International Trade Law (UNCITRAL).[1]

2. In its resolution 67/89 of 14 January 2013, the General Assembly reaffirmed the importance, in particular for developing countries and economies in transition, of the technical cooperation and assistance work of the Commission and reiterated its appeal to bodies responsible for development assistance, as well as to Governments in their bilateral aid programmes, to support the technical cooperation and assistance programme of the Commission and to cooperate and coordinate their activities with those of the Commission.

3. The General Assembly welcomed the initiatives of the Commission towards expanding, through its Secretariat, its technical cooperation and assistance programme, and noted with interest the comprehensive approach to technical cooperation and assistance, based on the strategic framework for technical assistance suggested by the Secretariat to promote universal adoption of the texts of the Commission and to disseminate information on recently adopted texts.

4. The General Assembly also stressed the importance of promoting the use of texts emanating from the work of the Commission for the global unification and harmonization of international trade law, and to this end urged States that have not yet done so to consider signing, ratifying or acceding to those conventions, enacting model laws and encouraging the use of other relevant texts.

---

[1] *Official Records of the General Assembly, Forty-second Session, Supplement No. 17* (A/42/17), para. 335.

5. The status of adoption of UNCITRAL texts is regularly updated and available on the UNCITRAL website. It is also compiled annually in a note by the Secretariat entitled "Status of conventions and model laws" (for the Commission's forty-ninth session, see A/CN.9/876).

6. This note sets out the technical cooperation and assistance activities of the Secretariat subsequent to the date of the previous note submitted to the Commission at its forty-eighth session in 2015 (A/CN.9/837 of 8 May 2015), and reports on the development of resources to assist technical cooperation and assistance activities. Activities undertaken in the Asia-Pacific region by the UNCITRAL Regional Centre for Asia and the Pacific are set out in a separate document (A/CN.9/877).

7. A separate document on coordination activities (A/CN.9/875) provides information on current activities of international organizations related to the harmonization and unification of international trade law and on the role of UNCITRAL in coordinating those activities.

8. The Commission is also expected to consider a draft guidance note on strengthening United Nations support to States, upon their request, to implement sound commercial law reforms (A/CN.9/882 and A/CN.9/883).

II. Technical cooperation and assistance activities

A. General approaches

9. Technical cooperation and assistance activities undertaken by the Secretariat aim at promoting the adoption and uniform interpretation of UNCITRAL legislative texts. Such activities include providing advice to States considering signature, ratification or accession to UNCITRAL conventions, adoption of an UNCITRAL model law or use of an UNCITRAL legislative guide.

10. Technical cooperation and assistance may involve: undertaking briefing missions and participating in seminars and conferences, organized at both regional and national levels; assisting countries in assessing their trade law reform needs, including by reviewing existing legislation; assisting with the drafting of national legislation to implement UNCITRAL texts; assisting multilateral and bilateral development agencies to use UNCITRAL texts in their law reform activities and projects; providing advice and assistance to international and other organizations, such as professional associations, organizations of attorneys, chambers of commerce and arbitration centres, on the use of UNCITRAL texts; and organizing training activities to facilitate the implementation and interpretation of legislation based on UNCITRAL texts by judges and legal practitioners.
